Contract and card rates on request. NOTE: On account of the fluctuations in the rates of exchange, remittances for foreign subscriptions and advertisements must be made in New York funds.

The Financial Situation

We HAVE now entered the season when public discussion of current national problems and policies is almost continuous. Meetings such as those taking place this week under the auspices of the National Association of Manufacturers afford excellent

forums for informative de-

bates, which the imminent

reconvenement of Congress

naturally encourages. In

addition, this year certain

Congressional and other

committes are holding

hearings in Washington on

topics that are certain to

arise for serious discussion

in Washington during the

winter. What speakers say

upon occasions of this sort,

and certainly the tone and

content of the more formal

resolutions, usually reflect

the general situation exist-

ing at the time. This year

appears to be no excep-

tion. On a number of oc-

casions during recent years

these meetings have "got

out of hand," as it were,

and acrimonious debate oc-

curred, sometimes followed

by highly critical resolu-

tions deeply regretted by

the more timid and con-

servative elements in the

associations concerned. At

other times the shoe has

been on the other foot,

and much less was said

than was undoubtedly felt

by the majority. The elec-

tion returns of last month

appear to have led the

platform - makers at the

Congress of American In-

dustry to the conclusion

that there was some real

prospect of making prog-

ress toward greater sanity

in the management of our

national affairs, and that

that progress would be best

assured by the familiar ex-

pedient of keeping official

utterances in very general

feeling that the events of

the past month or two and

Yet we cannot escape the

terms.

sentatives of the "brain trust" element in Washington, with their inevitable masses of figures (often meaningless) and the now familiar, although almost incredibly naive, interpretations of these charts and diagrams. Committee members and others listened

A Plain Story Well Told

A Plain Story Well 101a "Some sixteen years ago, in Los Angeles," an eminent industrialist told the Bond Club of New York at luncheon on Thursday, "I at-tended a banquet . . . given in honor of ex-Senator Cornelius Cole. The occasion was his hundredth birthday. . . When he spoke to us he said that he had just one suggestion to give and that was that the liberty we were enjoying in America had been fought for and paid for with blood and treas-ure, and he said: 'Gentlemen, those liberties are easily lost. You must be prepared, if necessary, to fight to keep any king or em-peror or dictator from assuming control of the destinies of this great country.' the destinies of this great country

the destinies of this great country.' "We were a group of typical business men. Our thoughts were around the real estate boom in Los Angeles in 1922. We listened be-cause he was an old man and an honored guest, but we thought, of course, that he was living in the past. And don't forget that we had just won the war to make the world safe for democracy at a cost of ten million lives and uncounted billions of treasure. Obvi-ously, what he said had no application to us ously, what he said had no application to us or our situation.

"Well, I have thought of that address a thousand times as the years have rolled by and as history has written its record in the

and as history has written its record in the last twenty years. . . . "You can't question the sincerity of most of those who advocate rigid governmental control of our economy. I have talked to too many of them. They are not only sincere; they are fanatical. But they entertain one queer notion, and that is, that they are the forward thinkers, that they have the new ideal, they are the ones that are going to lead the world forward to a new type of world order in which the common people will get a much better break. Of course, they are completely and absolutely wrong. They call those of us who oppose them by various epithets. They say our thinking is the 'horse-and-buggy' type. Well, gentlemen, their thinking goes far back beyond the days when there was any carriage, because the oldest idea in the world is that rulers, ambitious rulers, wheth there was any is that rulers, ambitious rulers, whether they be dictators or tribal chiefs, can better con-trol the affairs of the people than can the people themselves. The brand new idea in the world is the concept that a fair and the the world is the concept that a free people, controlling their own affairs, can bring about a higher standard of living than can be at-tained if rulers who know all and do all con-trol their lives for them.

the force of competition itself is a better conthe force of competition itself is a better con-trol from the standpoint of public interest, the Government, as I see it, has these obliga-tions: It has to lay down the ground rules which will accomplish these purposes: first, those which will protect the public against fraudulent practices on the part of business, and, second, which will prevent one competi-tor from having an unfair advantage over an-other competitor, and third, it has to guard other competitor, and third, it has to guard the public against private monopoly." The more the American public hears from

such speakers the better.

the speech making of the past week or two on the whole reveal progress on the part of the public, or large sections of it, in coming to grips with the fundamental problems by which we are faced. To be sure, the so-called monopoly inquiry, which, according to Washington dispatches during the past week, now plans to continue its activities for a long while to come, at the very outset brought to the fore repreof loss of popular faith in governmental magic as applied to business. Once thoroughly discredit the idea that somehow conditions have so changed that resumption of economic progress, not to say salvation from economic degeneration and death, in this country can be consummated only by the preparation in Washington of blue prints for business and supervision of the economic system by the planners, in

patiently-those who had the determination and the time-to what was intended to be proof of many weird preconceptions of the nature of the economic system and the forces which operate in the business world. There may or may not have been greater realization than heretofore on the part of those present and those following the proceeding through the press that all this is old straw many times threshed over during the past century or two, that many pseudo-economists have many times come forward with just such doctrines, and that many writers and teachers have completely demolished them one by one; but somehow, at any rate, this familiar balderdash seemed to fall flat, like a tale told too oft. The man in the street doubtless would find himself at a loss to refute these ideas, as absurd as they are to those who have made it their business to think such matters through carefully, but he has apparrently become more skeptical of the ability of the so-called intellectuals in Washington, or for that matter of any other man or group of men, to plan and manage economic society in such a way as to bring the blessings which have for so long been promised while the Nation's own finances are daily growing more precarious.

Less Faith in Magic

Nothing could be more encouraging than evidence order to oblige business to build according to the governmentally furnished prints, and half the battle is won. Of course, we should still have problems left. Such a regime of largesse and political machine construction as has occurred in this country during recent years inevitably creates a sort of vested interest in other people's money and in jobs which can be destroyed effectively only by relentless and intelligent effort, but the first task, or one of them, is that of convincing the rank and file that the proper role of government is just what it has always been, that not business stagnation but industrial and trade progress as well as a more abundant life for all, would be the result of insisting that government limit itself to its legitimate role. Accomplish this much, and the "pressure groups" seeking largesse and special favors of other sorts would be robbed of one of their most potent weapons-the claim that their objectives are essential for the public good. 1

No one will suppose, of course, that any such accomplishment has as yet been actually recorded, or that it wil be without further patient and vigorous effort. There is little or no evidence that the President is prepared to make concessions greater at most than mere tactical changes. Indeed his most recent pronouncement that he intends to continue his demand for governmental reorganization on a broad scale raises the question whether any concessions at all of consequence are to be made, so far as the drive for more and more power is concerned. The Works Progress Administrator has been reported as disposed to make some concessions in the manner of dispensing the billions of relief money. The scandals that have surrounded the entire program over which he presides has apparently obliged him to go this far, but it would be well to wait to see precisely what he is prepared to concede. Nothing which has yet occurred suggests that the little group of serious thinkers by which the President has surrounded himself has in any way lost faith in managed economy as a means of providing a more abundant life, or tempered its demand for enactments which would further programs involving this concept. Nor is there any good reason to suppose that the public will not continue to be bombarded with expositions of queer economic doctrines emanating from Washington and supported by compilations of endless figures, carefully manipulated and pre-digested, to support weird conclusions. It does appear to be a fact, however, that all this will henceforth fall upon somewhat deafened, or less interested, ears, and that an opportunity now exists in much greater degree than heretofore to combat it. Leaders of business thought, more or less unanimously, and many men in public life (whose ears are always to the ground, politically speaking) have now not only little or no faith in such preachments but the temerity to say so in no uncertain terms.

It is quite possible that we have reached the point, or soon will reach it, where the most powerful enemy of public welfare will not be those who promise a fuller life produced magically from some economic hat, but those who in the course of years have acquired vested interests in certain types of public policies, particularly those who have acquired such interests in the course of the past half dozen years of "reform and recovery" efforts. It is likely to be more and more difficult as time passes for the President, or any one else for that matter, to arouse the

rank and file of disinterested citizens to frenzied hope of Utopia by vague talk of social security, priming the pump, governmental redistribution of wealth, the shifting of income from industry and consumers to the farmer in order to build up rural purchasing power, and other similar nonsense. We shall doubtless continue to hear a great deal about all these things, but preachments of this sort will, we suspect, tend more and more to be but a cloak under which to hide the demands of this, that, or the other group which presumably at least controls large blocks of votes and which wishes to perpetuate its place at the public trough, and if possible to improve it. This element of "practical politics" has of course from the first played an important role in the maneuvers of recent years, but there can be little question that the general public in each case was persuaded to support legislation directly opposed to its own interest in considerable part by use of these spurious arguments concerning the general public welfare. These latter, however, are now losing their force, or at least so it seems to us.

If this is in fact the situation at present, or if it is to be increasingly the true inwardness of the state of affairs in the future, a responsibility not always clearly recognized falls heavily upon the business man. The President of the Studebaker Corporation in closing his address to the Bond Club of New York on Thursday last said that he was determined to express some views of his regarding "what business men must not do." He then said that "they must cease and desist from asking special privileges of any kind from local, State or national governments. If a business man needs an umbrella to protect himself against the impact of competition, he isn't a business man-he is a political racketeer. When he requests special privilege, he is attacking free enterprise. It is an act of treachery and business suicide as well, because special privilege is an invitation to governmental control, and no business can long survive bureaucratic domination. If we wish to pass down to our children our heritage of free enterprise under which America has become the greatest nation in the world, let us go to Washington for one purpose, and one purpose only, to insist that free enterprise be kept free in America."

Let Business Lead the Way

These words were addressed to a group of men who possess and ordinarily exert wide influence upon the policies of American business, particularly those branches of it which customarily ask the public for funds. It is to be hoped that they will be most carefully considered. There have been many occasions in the past-and the practice did not begin with the depression of 1929 or with the inauguration of the New Deal-when business men frequented Washington insisting upon programs which had little to do with keeping our system of free enterprise free. Otherwise we should not have any such tariff system as we now have. International trade, as far as our actions and our leadership could effect it, would now be upon a much more solid foundation; probably we should never have been subjected to the vagaries of the National Recovery Administration; and some of the other legislation concerning which complaint is now most justly made would without doubt have had much greater difficulty in reaching the statute book. If business men will carefully refrain from asking for protec-

tion against the "impact of competition" in the months to come and make it clear that they are willing to surrender some of the "umbrellas" that they have been in the habit of using for this purpose in the past, the danger of sweeping and harmful legislation as an end result of what is now taking place before the so-called monopoly investigation will be greatly reduced, and the farmer, who is in the habit of pointing to tariff benefits to industrialists in support of largesse for himself will find himself with one potent argument less. Business is now demanding a fair field; it must also ask no favor.

Asking no favors for itslef, it will of course be on much stronger ground in opposing those sought by the farmers and by wage earners. Had the National Association of Manufacturers a different record in the matter of excessive tariff protection, it would have been in a much better positin to reply to the "dirt farmer" who yesterday warned its members to keep their hands off the farm program. We have obviously reached a point where nearly every sort of interest has sought-and usually obtained-favors from government, a point where it becomes more and more true that none really get great good from them since each has to pay for the favors granted the other. The time has come for a drastic change. We should like to see the business community lead the way.

Federal Reserve Bank Statement

FRESH increases of idle bank reserves and of monetary gold stocks again are the outstanding characteristics of the banking statistics this week. Currency in circulation shows its usual pre-Christmas advance, but this tendency is not sufficient fully to offset the factors making for evergreater accumulations of potential credit resources. Excess reserves of member banks over legal requirements advanced \$60,000,000 in the week to Dec. 7, lifting the aggregate to another record figure of \$3,440,000,000. The course of excess reserve figures probably will be zig-zag in the next few weeks, but when currency begins to return to the banks after Christmas the total probably will again seek new heights. The currency circulation total advanced in the statement week by \$56,000,000 to \$6,844,000,000, which is \$442,000,000 over the low of last summer. Although the credit reservoir is full to bursting, there is still not the slightest indication of any seepage into business channels. The business loans of New York City reporting member banks were unchanged for the statement week, and this lack of movement is closely paralleled by reports from the other 100 cities that supply weekly statements. Brokers' loans this week showed an advance in New York of \$116,000,000 to \$687,000,000, but only because dealers were heavy buyers of Treasury notes due next March, which can be exchanged under an offer made last Monday for any of three series of new Treasury obligations.

Monetary gold stocks of the country advanced \$55,000,000 in the statement week to \$14,367,000,000. The Treasury deposited \$60,004,000 of gold certificates with the 12 Federal Reserve banks, raising their holdings to \$11,661,721,000. Although "other cash" was down somewhat, total reserves of the regional institutions increased \$46,999,000 to \$12,-017,471,000. Federal Reserve notes in actual circulation increased \$37,567,000 to \$4,422,449,000.

Total deposits with the 12 banks increased \$15,-152,000 to \$9,949,880,000, with the account variations consisting of an increase of member bank reserve balances by \$89,787,000 to \$8,966,268,000; a decrease of the Treasury general account balance by \$76,605,000 to \$407,377,000; an increase of foreign bank balances by \$2,621,000 to \$210,718,000, and a decrease of other deposits by \$651,000 to \$365,517,000. The reserve ratio was unchanged at 83.6%. Discounts by the regional banks declined \$1,038,000 to \$6,043,000. Industrial advances were down \$336,000 to \$15,485,000, while commitments to make such advances increased \$819,000 to \$15,-147,000. Open market holdings of bankers' bills were motionless at \$547,000, and holdings of United States Treasury obligations were similarly unchanged at \$2,564,015,000.

Government's Cotton Report

"HE Dec. 1 cotton crop report of the Department of Agriculture reduced the estimate of the current crop 129,000 bales from the forecast of a month earlier to 12,008,000 bales. General expectations were for a slightly greater reduction and the market sagged somewhat following issuance of the report Dec. 8. Spot in New York closed 6 points lower than on the day previous; the December contract lost 10 points and other futures, 5 to 6 points. The foreign market for this year's crop has largely evaporated which on basis of current figures will leave about 1,000,000 bales more than usual to be absorbed domestically. Exports this season to Dec. 9 have amounted to only 1,673,630 bales compared with 2,776,705 bales in 1937 and 2,492,733 bales in 1936.

The area left for harvest this year is placed at 25,346,000 acres and on the basis of the 3.1% abandonment calculated for this year it appears that 26,144,000 acres were in cultivation as of July 1. This year's abandonment is much greater than the 1.4% abandoned last year as well as the 2.1% average for the ten years 1927 to 1936. In addition the acreage in cultivation for the 10 years averaged 37,-380,000 acres and the fact of this year's output comparing quite closely with the 13,201,000 bales average for the 10 year period is attributable to the extremely high yield of this year's crop, 226.8 pounds per acre, which compares with a ten year average of only 179.8 pounds. The current yield is the largest in history with the single exception of last year when there was an extraordinary yield of 266.9 pounds an acre, producing the largest crop on record, 18,946,000 bales.

The Dec. 1 report reveals 11,233,157 running bales ginned up to that date compared with 16,175,505 running bales a year ago. Telegraphic reports received yesterday from our Texas correspondent advise that the entire crop has now been picked and ginned. Never before has the gathering and ginning been completed so early.

The New York Stock Market

INCERTAIN price tendencies marked another dull week of trading on the New York stock market. The sessions for the week ending today reflected little more than a quiet churning about of equities, with small losses more numerous than the equally small gains. Business reports fail to impart much confidence, although a degree of optimism Volume 147Financialcontinues to prevail as to the future. The domesticpolitical picture remains highly confusing, and possibly will not be cleared up to any extent until linesform in the new Congress. Available indicationsare that the Roosevelt Administration will attemptfurther New Deal experiments, for revival of thefight on the Reorganization bill is indicated. Norwas much encouragement to be gained from the for-eign situation, as Europe marched into another warcrisis on the basis of real or fancied Italian claimsfor French territory. Price movements, in these cir-cumstances, were modest in each and every session,and even many market leaders show only fractionalvariations as against the closings of Friday last

week. Turnover on the New York Stock Exchange

exceeded the 1,000,000-share level only on one

occasion. One sharply disturbing incident was the sudden plunging into the bankruptcy courts of the large drug firm of McKesson & Robbins, and allegations that large assets listed by that firm do not exist. Trading in stocks and bonds of the firm was suspended, pending full disclosure of all circumstances. Some good buying was reported at times in steel and motor stocks, since excellent progress is reported with their new models by the large automobile companies, and this is sure to be reflected in steel operations. Airplane manufacturing stocks and the issues of a few shipbuilding concerns were in keen demand, on occasion, since it appears that the Administration is keenly intent upon pushing its new program for armaments increases. Lowpriced stocks in general were better maintained than high-priced issues, which suggests that a good deal of public interest exists in the share market. Yearend dividend actions now are producing a few sharp price variations, in both directions. Tax selling of some stocks is an obvious factor, although balanced to a degree by acquisition of other securities on the part of investors who wish their general positions maintained. These and other conflicting influences balanced out in an almost trendless week of trading.

In the listed bond market United States Treasury issues were fairly active, owing to excellent reception of the new money offering of \$400,000,000 $23/_{4}\%$ bonds due 1965, callable 1960, and \$300,000,000 11/8% notes due in five years. This offering was accompanied by a Treasury offer to exchange \$942,-000,000 notes due next March for either of the new money issues, or for 2% bonds due in nine years. With the quarter-date financing out of the way and all indications pointing to a vast oversubscription for the new money securities, buying of the outstanding Treasury issues was resumed. High-grade corporate obligations were steady, but among speculative bonds the trend was toward modestly lower levels. In the foreign section, French and Italian issues fell sharply, owing to the threatening gestures made by these countries toward each other. The commodity markets brought little cheer to securities traders and investors. Sugar futures fell drastically last Monday, on announcement of a production quota within the United States that exceeded expectations. Some of the important food staples were better, however, while the metal markets presented both good and bad aspects. In foreign exchange dealings pressure against sterling, francs and other European units again developed, partly as a consequence of the newest war scare.

On the New York Stock Exchange 46 stocks touched new high levels for the year while 23 stocks touched new low levels. On the New York Curb Exchange 41 stocks touched new high levels and 23 stocks touched new low levels. Call loans on the New York Stock Exchange remained unchanged at 1%.

On the New York Stock Exchange the sales at the half-day session on Saturday last were 322,480 shares; on Monday they were 680,370 shares; on Tuesday, 985,930 shares; on Wednesday, 1,104,880 shares; on Thursday, 739,150 shares, and on Friday, 698,840 shares. On the New York Curb Exchange the sales last Saturday were 65,555 shares; on Monday, 175,645 shares; on Tuesday, 230,035 shares; on Wednesday, 252,315 shares; on Thursday, 225,920 shares, and on Friday, 179,394 shares.

Trading in the stock market on Saturday last came practically to a standstill, and wherever fluctuations in prices did occur they were narrow in an extreme degree. Monday failed to reveal any important change in the tone of the market. Lethargic movements again characterized dealings, and prices at the close were firmer at irregularly lower levels. Selling to establish losses for tax purposes undoubtedly contributed in some degree to the depressed state of the market. The volume of sales was broadened somewhat on Tuesday, and the general list closed with fractional net changes, while major issues were lifted up from fractions to a point or more on the day. The modest upswing in equity prices begun on Tuesday was extended further on Wednesday, with trading volume running beyond 1,000,000 shares. Strength was manifested at the start, but in the final hour an easier tendency prevailed which reduced the gains of prominent stocks to fractions. Copper shares, however, moved up to more than a point on the news of curtailment in production of foreign copper in two stages effective Dec. 15 and Jan. 1 next. A lack of interest in the market on Thursday brought about a decline in share turnover, and a corresponding reduction in stock prices. Pressure was greatest among the motor and steel shares with rubber, oil, chemical and other groups less vulnerable to the attack. Slack trading was again the rule yesterday, and equities closed with irregular changes. Closing quotations for Friday of this week show mixed changes when compared with those of Friday a week ago. General Electric closed yesterday at 401/2 against 41 on Friday of last week; Consolidated Edison Co. of N. Y. at 281/4 against 291/2; Columbia Gas & Elec. at 63% against 634; Public Service of N. J. at 295% against 311/4; J. I. Case Threshing Machine at 861/8 against 861/2; International Harvester at 58% against 59; Sears, Roebuck & Co. at 723/4 against 721/8; Montgomery Ward & Co. at 493/4 against 483%; Woolworth at 495% against 507%, and American Tel. & Tel. at 1481/2 against 1481/8. Western Union closed yesterday at 227/8 against 24 on Friday of last week; Allied Chemical & Dye at 1801/2 against 182; E. I. du Pont de Nemours at 1443/4 against 1441/2; National Cash Register at 231/2 against 23%; National Dairy Products at 121/4 against 1234; National Biscuit at 251/4 against 245/8; Texas Gulf Sulphur at 31 against 32; Continental Can at 38 against 3734; Eastman Kodak at 1815/8 against 1781/2; Standard Brands at 61/2 ex-div. against 7; Westinghouse Elec. & Mfg. at 1133/4 against $114\frac{1}{2}$; Lorillard at 21 against $21\frac{1}{4}$; Canada Dry at 17% against 19½; Schenley Distillers at 17% against 19¼, and National Distillers at 27½ against 27%.

The steel stocks came in for further downward revision in prices this week. United States Steel closed yesterday at 6134 against 625% on Friday of last week; Inland Steel at 87 against 8734; Bethlehem Steel at 701/2 against 701/8, and Youngstown Sheet & Tube at 481/2 against 493/4. In the motor group, Auburn Auto closed yesterday at 35% bid against 4 on Friday of last week; General Motors at 471% against 483%; Chrysler at 783% against 7834, and Hupp Motors at 2 against 21/4. In the rubber group, Goodyear Tire & Rubber closed yesterday at 33 against 323% on Friday of last week; B. F. Goodrich at 22 against $221/_8$, and United States Rubber at $481/_8$ against $477/_8$. The railroad shares again gave ground the present week. Pennsylvania RR. closed yesterday at 193% against 20 on Friday of last week; Atchison Topeka & Santa Fe at 361/8 against 375%; New York Central at 171% against 175%; Union Pacific at 881/2 against 891/4; Southern Pacific at 17 against 1734; Southern Railway at 183% against 183%, and Northern Pacific at 101/2 against 10%. Among the oil stocks, Standard Oil of N. J. closed yesterday at 501/8 against 501/2 on Friday of last week; Shell Union Oil at 131/4 against 141/2, and Atlantic Refining at 221/2 against 225/8. In the copper group, Anaconda Copper closed yesterday at 33 against 3234 on Friday of last week; American Smelting & Refining at 49% against 511/8, and Phelps Dodge at 411/2 against 411/2.

Trade and industrial reports this week reflected little more than maintenance of the going rate of business. Steel operations for the week ending today were estimated by American Iron and Steel Institute at 59.9% of capacity against 60.7% last week, 61.0% a month ago, and 27.5% at this time last year. Production of electric power for the week ended Dec. 3 was reported by Edison Electric Institute at 2,285,523,000 kilowatt hours against 2,183,807,000 kilowatt hours in the preceding week, which contained the Thanksgiving holiday, and 2,152,643,000 kilowatt hours in the corresponding week of last year. Car loadings of revenue freight for the week to Dec. 3 were reported by the Association of American Railroads at 649,086 cars, this being an increase of 87,002 cars over the previous week, and of 28,761 cars over the same week of 1937.

As indicating the course of the commodity markets, the December option for wheat in Chicago closed yesterday at 64%c. as against 62%c. the close on Friday of last week. December corn at Chicago closed yesterday at 51%c. as against 47%c. the close on Friday of last week. December oats at Chicago closed yesterday at 28%c. as against 26%c. the close on Friday of last week.

The spot price for cotton here in New York closed yesterday at 8.57c. as against 8.75c. the close on Friday of last week. The spot price for rubber yesterday was 16.07c. as against 15.90c. the close on Friday of last week. Domestic copper closed yesterday at $11\frac{1}{4}$ c., the close on Friday of last week.

In London the price of bar silver yesterday was 20 1/16 pence per ounce as against 20 3/16 pence per ounce on Friday of last week, and spot silver in New York closed yesterday at 42³/₄c., the close on Friday of last week.

In the matter of the foreign exchanges, cable transfers on London closed yesterday at 4.66% as against 4.687/16 the close on Friday of last week, and cable transfers on Paris closed yesterday at 2.66 1/16c. as against 2.63 9/16c. the close on Friday of last week.

European Stock Markets

PRICE trends in the securities markets of the leading European financial centers reflected this week the resurgence of nervousness regarding the international political outlook, while poor business prospects also tended to force prices lower. The London, Paris and Berlin markets all drifted irregularly lower, with the rallies only occasional and short-lived, whereas declines in some sessions were quite pronounced. Increasing tension between France and Italy figured largely in the apprehension of traders and investors. In the London market there was also a good deal of concern regarding the German campaign for recovery of colonies lost after the World War ended. The French market had internal troubles to contend with, in addition to the international difficulties, as the Daladier regime faced on Thursday the start of a Parliamentary session that may bring about another Cabinet crisis. In Berlin dealings the harrowing restrictions on Jews kept activity to a minimum. The business reports of some European countries have turned pessimistic of late, and this also contributed to the liquidation movement. British unemployment statistics indicate that in the four weeks to Nov. 14, the total of jobless increased 46,876 to 1,828,103, and it was freely admitted that some important industries now are reflecting declines.

At the start of the week, prices fell sharply on the London Stock Exchange, largely because the international atmosphere once again was growing gloomy. The gilt-edges were quite weak, and with a few exceptions industrial stocks also engaged in a pronounced decline. Oil, rubber and mining securities fell with the rest, and almost all international issues likewise dropped. The tone on Tuesday again was weak, with almost all groups affected. Giltedged issues remained depressed and buyers again were reluctant in the industrial department. Some of the commodity stocks were better, but mining issues resumed the decline. Anglo-American favorites were in modest demand. In Wednesday's dealings a little more cheerfulness was apparent. Giltedged stocks recovered a good part of their previous losses, and most industrials also advanced. The Anglo-American section showed best results, but other internationals were lower. After a good opening on Thursday, gilt-edged stocks started downward again owing to the increasing tension between France and Italy. Sharp losses were recorded in the international section, while mining and commodity securities also fell. Internationals were highly irregular, with Anglo-Americans in demand, while European Continental issues receded. Small losses were recorded yesterday in gilt-edged and industrial issues, while international securities also receded.

Trading on the Paris Bourse began in a dispirited atmosphere on Monday, as the foreign outlook was too uncertain for market interests. Rentes, French equities and international securities all drifted to lower levels, with the declines sharp in some instances. Reports that a large volume of fugitive French capital had been repatriated in the preceding week failed to stir any enthusiasm. Signature of the Franco-German non-aggression treaty buoyed the Bourse Tuesday, and activity also increased. Rentes and French equities showed best results, while international issues were irregular. After early backing and filling on Wednesday, prices on the Bourse started on another downward swing, which left the closing considerably lower than on the previous day. Franc-pegged rentes were weak, and only a few French equities resisted the trend. International securities began to come into request, as they always do when apprehension spreads regarding home developments. Firmness of the French Government in dealing both with the international and internal situations occasioned a better tone on the Bourse, Thursday. After early uncertainty the tone improved, and good advances finally were scored in rentes and French equities, while international issues drifted downward. Rentes and French equities again advanced yesterday, but international issues drifted lower.

Like other European markets, the Berlin Boerse was weak on Monday, with losses in prominent issues ranging from 1 to 2 points, while some of the specialties showed much larger recessions. Little activity was reported, despite the wide declines. Fixed-interest obligations' were soft throughout, with attention still centered on the large Reich loan that was announced a week earlier. Dealings were so slow on Tuesday that many leading issues were not quoted. Changes were irregular and mostly in fractions, with a few instances reported of decided declines. Even less business was transacted Wednesday than in the preceding session, but most of the variations were toward improved levels. There were also some declines, however, and fixed-income securities were among the weaker issues. The Boerse resumed its general downward tendency on Thursday, and all sections were affected. Small sales of Jewish-owned issues were rumored to have sent prices lower in the thin market. Still another weak session was reported yesterday, with levels one to three points lower.

Intergovernment Debts

NOTICES have been sent out by the State Department in Washington of instalments due from thirteen foreign Governments on so-called war debt account. The results on Dec. 15 will supply another salutary lesson for the American people on the advisability of refraining from international commitments and ventures. All the leading debtors doubtless will continue their complete defaults, notwithstanding the fact that the debt settlements were freely negotiated and are binding pledges under what used to be known as international law. Payment is anticipated next week only from Finland, which never defaulted, and it may be added that Hungary proposed a settlement on the basis of repayment of the precise sum advanced to that country. The obligations of those small countries were for relief purposes, and the term "war-debts" is a misnomer in both cases. Great Britain is the foremost debtor and the foremost defaulter. It is fairly well understood that some other defaulters look to London for guidance on this perplexing problem. There is always a possibility that the Brit-

ish Government will come forward with a proposal for negotiations, for London contented itself with default and never quite stooped to repudiation. Anglo-American trade problems having been adjusted, it would seem that the chances now are much improved for a settlement of the debt question.

The Americas

ELEGATES of the 21 American Republics gathered in Lima, Peru, yesterday, for the start of the eighth International Conference of American States, which promises to be much longer and more interesting than its predecessors. The importance of Latin-America in world diplomatic and trade affairs is rediscovered periodically, and all indications point to slightly frantic efforts by the United States delegation to improve relations at this time. The Good Neighbor policy has, of course, already accomplished a great deal in that direction. But far more seems now to be in the mind of Secretary of State Cordell Hull, who heads the U.S. group. Intensive preparations were made for impressive sessions, on the voyage to Peru, and when Mr. Hull and his associates arrived in Lima, Wednesday, a long series of formal calls on Peruvian officials and the delegations from other American Republics was inaugurated. The first session of the conference was devoted yesterday to a graceful address of welcome by the Peruvian President, Oscar R. Benavides. Business conferences are to start today, and it was made clear in Lima dispatches that no time will be lost in getting down to bedrock.

Immediately upon landing in Peru, Wednesday, Secretary Hull began to breath a spirit of most intense good-will. His personal liking for Lima was expressed in a formal statement, along with flattering references to the "great center of American culture and history." The friendly expressions of best wishes from the American people and Government were relayed. Mr. Hull thereupon launched into comments about the "grave problems" by which we are confronted after having "made substantial progress in building up in this hemisphere an international order based upon peace, confidence and a consideration for the welfare of all of its peoples." He urged that no effort be spared to consolidate the gains made and to assure the continuance and safeguarding of our American system. "We are seeking common objectives on the general and fair assumption that what is for the common good will be to the advantage of each of us," said Mr. Hull. "It is in that spirit that, with the sympathy and support of all our peoples, we may hope to carry forward our program of cooperation, consultation and friendship."

Such comments are sufficiently admirable in their way, but it remains to be seen whether the Latin American countries will do more than smile at the suggestion for mutual consideration. The Good Neighbor policy was aptly described in a Lima dispatch of last Sunday to the New York "Times," as "exclusively a one-way policy working from North to South at the expense of American capitalists and American investors." That long has been apparent to everyone but the State Department in Washington, and it also has been evident, as the Lima dispatch likewise pointed out, that the United States has lost much prestige in Latin America as the result of its failure to take a stronger stand on

such incidents as the Mexican confiscation of foreign oil properties. The report sets forth that other Latin American countries closely are watching the developments in the oil confiscation dispute, with unconcealed intentions of emulating the Mexican action. Our Good Neighbors to the south propose also, it appears, to seek assurances from Mr. Hull that no diplomatic or military pressure would be applied by the United States in the event of such confiscations.

There is no need for emphasizing here the contrast thus set forth between the official policies of the United States, on the one hand, and of the other 20 American republics on the other hand. Mr. Hull doubtless will make much of the "American system," but all his hearers will note mentally that thinly disguised dictatorships are the rule south of the Rio Grande, with some of the dictatorships not even parading under the democratic banner. Mr. Hull may endeavor to cement American relations. and possibly will succeed to a degree, but his accomplishments will be of little permanent value if he continues, as he has done heretofore, to disregard vital interests of United States nationals. Mr. Hull perhaps will make some progress in inducing the Latin Americans to enter the world armaments race, as President Roosevelt recently suggested, but the 20 republics south of us will wonder if the scheme is not merely one for supplying business to American armaments firms. For military experts are agreed that the Americas are quite capable as matters stand of defending their sovereignties. Latin American opinion of arms increases is sure to be that the idea is excellent, providing the United States foots the bills in one manner or another.

The trade of the Latin American countries is well worth having, and it is obvious that this consideration looms large in the program of the United States delegation to Lima. It is more important than ever at this juncture, for numerous dispatches from Brazil, Argentina and other countries have indicated of late the veritable flood of propaganda sweeping over Latin America from Germany, Italy, Japan and other sources. But it seems to be forgotten in Washington that the trade of the United States is even more worth having, especially in those Latin American countries which rely heavily upon their tremendous exports to the United States. This simple fact is carefully neglected in all comments by the Latin Americans, and they hardly can be expected to bring it up at Lima. Nor are they likely to mention the vast total of defaulted dollar bonds, which give so touching a point to the comment of the New York "Times" correspondent that the Good Neighbor policy is exclusively a one-way affair. A little consideration of such matters by Mr. Hull would be an interesting innovation, and in the end would do far more than his present policy for himespheral "consideration for the welfare of all of its peoples."

Another European Crisis

NLY a little more than two months after the Munich compact ended the European crisis centering around Czechoslovakia, still another crisis appears to be developing across the Atlantic. The aggressive fascists, as usual, are at the bottom of the trouble, but this time it seems to be Premier Benito Mussolini's turn to stir the dust of old con-

troversies and attempt to make political capital out of the confusion. The Italian intentions are far from clear, and it may be that no definite plan is mapped out, for the fascists are opportunists above all, with their actions depending in good part on the course of the trouble they evoke. The current incident concerns demonstrations in Italy against France, which have been skilfully directed toward assertions of claims for French Tunisia, Corsica, Nice and Savoy. Since Signor Mussolini permits no other opinions than his own to prevail in Italy, it is idle to believe that the demonstrations were spontaneous. Even more significant is their continuance, while comments made in the sternly controlled Italian press provide additional evidence that a crisis is being manufactured.

Relations between France and Italy have been poor for several years, but they seemed to be on the mend after the Munich compact and the appointment of an Ambassador to Italy by the French Government. Premier Edouard Daladier doubtless was consulted by the British Government, before Prime Minister Neville Chamberlain and his Foreign Secretary, Lord Halifax, arranged to visit Rome next January. These circumstances led to the impression that the system of appeasement pacts in Europe would be extended. Last week, however, Italian Deputies shouted in a Chamber meeting their demands for French territory, and matters since have been going from bad to worse. The Italian shouts for Corsica, Nice and Savoy are hardly to be taken seriously, but Tunisia is another matter, since the claims appear to be centering around that African colony. The French Government last Saturday registered an emphatic protest with Italy against the demonstrations of the Deputies in Rome. The Italian reply, made in the controlled press, was in so many words that Italy "is ready for anything, and is ready to march, if necessary, against France." The British Government attempted over the last week-end to use its good offices to restrain the Italians. Premier Daladier declared on Monday that France is resolved "by every means" to assure the absolute integrity of all French territory. Italy disavowed in diplomatic terms the demonstrations and press comments, but the clamor continued and finally evoked some counter-demonstrations in France. With their tongues obviously in their cheeks, French students paraded in Paris, Thursday, and shouted for Venice and for the return of Ethiopia to its Emperor. Such incidents now appear to be an accepted part of the international scene, and they may amount to very little in the end, but if governmental intentions are wicked another story may develop.

Meawhile a very substantial improvement has occurred in the relations of France and Germany, owing to signature on Tuesday of the non-aggression pact arranged some weeks ago along the lines of the document signed at Munich on Sept. 30 by Great Britain and the Reich. Joachim von Ribbentrop, the German Foreign Minister, went to Paris at the head of an impressive delegation and attached the German signature to the understanding, which was signed for France by Foreign Minister Georges Bonnet. The two governments agreed to use their best endeavors to assure pacific and "good neighborly" relations between them, in the belief that such relations constitute an essential element in the

consolidation of the situation in Europe and the maintenance of peace. They noted solemnly that as between them "no question of a territorial order remains in suspense," and they recognized that the existing frontier is "definitive." They agreed also to remain in contact and to consult on all common questions, so that international difficulties might be minimized.

This treaty naturally throws an interesting light on the new development between France and Herr Hitler's partner, who now is raising difficulties precisely of the order that France and Germany agreed to discountenance. On Thursday it was indicated in Paris that inquiries had been made of the German authorities, who were said to have assured the French that they did not back Premier Mussolini in his demands for Tunisia and other French areas. It was also reported that the Italian dictator was intent upon obtaining assurances from Berlin of German approval and backing. Dispatches from some European capitals suggest that the Reich would prefer to be well out of the newest controversy, partly because Bismarck formally agreed to French ownership of Tunisia, and partly because the Reich expects to be well occupied for some time to come in extending its sway over the Danube region. It would appear, indeed, that the German hegemony may be less easy to establish in some countries than was thought likely for a time. Rumanian authorities have taken drastic steps to put down a fascist movement within their own country that is modeled on German lines, and in Berlin it is freely predicted that a revolution will occur in the State. Since revolutions can be manufactured without much trouble in Europe, these suggestions occasioned much uneasiness. They do, however, bear out the hints that Germany may be but little interested in backing Italy on territorial demands at this time.

The crisis between France and Italy nevertheless continued to increase in gravity throughout the current week. Serious incidents were reported on Thursday in Tunisia, where a heavy proportion of the populace is Italian in origin. The Italian residents of French Tunisia made moves of their own to support Signor Mussolini, by means of the wearing of fascist insignia and demonstrations. The French population objected, and clashes took place, which ended in the arrests of scores of Italians. In neighboring Italian Libya, troops were reported to be concentrating near the border. These rumors were viewed calmly in Paris, but it was admitted there that matters had reached a stage requiring close study of all aspects of the situation. It was noted, especially, that Italy still has some 70,000 to 80,000 "volunteers" in Spain, who might be turned toward the French border in the event of a military clash.

Refugee Problem

RDERLY consideration was started in London, late last week, of the problem presented by the Jewish and other refugees who are anxious to escape the wrath and persecution of the German Nazi regime. This matter becomes ever more pressing, as Nazis are pushing to truly extraordinary lengths their peculiar racial superstitions. Last Monday a decree was issued in Berlin, taking control

from its owners of virtually all property remaining in Jewish hands after the wreckage of business establishments and the imposition of a mass "fine" of 1,000,000,000 marks. The newest decree establishes a sort of trusteeship for Jewish holdings and enterprises, and as liquidation is effected under previous decrees the owners may receive some com-pensation in Reich obligations. There is some question as to whether foreign Jews residing in the Reich are affected, and on Wednesday fresh representations on this score were made by our State Department. The indignities heaped on the long-suffering German Jews were augmented last Saturday, through orders banning them from certain streets and public places in Berlin. These measures are almost calculated to increase the desire of Reich Jews to seek more hospitable and tolerant shores. In order to give ample consideration to the migration problem, the steering group of the Inter-Governmental Committee on Political Refugees met in London, late last week, and decided to convoke a full conference in January of the 32 nations represented. Before the meeting takes place another attempt probably will be made to induce the Reich authorities to permit the refugees to take at least a little of their property with them when emigrating.

Spanish War

URTHER drastic tests of loyalist and insurgent strength appear to be imminent in Spain, as numerous reports told this week of a massing of forces for a battle that possibly will involve the fate of the loyalist capital, Barcelona. Indications that such a test might develop began to appear early this week, when airplane bombing of helpless civilians was resumed by the fascist leader, Francisco Franco, in a manner that equaled the most brutal exhibitions of previous months. In obvious command of the air, General Franco sent dozens of squadrons cruising in loyalist territory, where bombs killed scores and hundreds of women and children, and also a handful of men. It appears that these were merely the preparations for a desperate military attack, in which the full strength of the insurgent armies and their Italian "volunteer" allies will be employed. The impression in Barcelona was that the insurgent effort will be made with a view to the impending Anglo-Italian conversations in Rome, which possibly will result in the withdrawal of more Italians from the conflict. Neutral observers who journeyed to French border points reported an enormous massing of troops on both sides. The loyalists, meanwhile, continued quietly to discharge from service in their ranks all the real volunteers from many countries who gave their aid to the government cause in the conflict.

Far East

INTERNATIONAL aspects of the long-drawn Japanese invesion of China Japanese invasion of China began to assume more immediate importance this week than the local military developments. There were indications of international consultations that possibly will bring interesting results, and in the meanwhile the Chinese endeavored as best they could to resist the aggressors. Only sporadic efforts were made by the Japanese to extend their gains in the Upper

with the state of the second

Financial Chrcnicle

Yangtze region, while developments in the Canton area were almost equally modest. The Chinese military authorities, however, are said to be planning an extensive movement to recover the Canton salient, which was lost in good part because of Chinese political headquarters "silver bullets." now are located at Chungking, and from that city reports emanated on Wednesday of appeals to the United States, Great Britain, France and Russia for aid against the invaders. There were signs, moreover, of developments that may prove somewhat embarrassing to the Japanese. United States Ambassador Nelson T. Johnson was called home from China, Thursday, for consultation. The British Government announced on Tuesday that it is considering the granting of export credits to China, and a warning was issued to Japan at the same time of "incalculable" consequences if Japan interferes with British trade in China. The Soviet Government adopted a stringent attitude in another fisheries dispute with Japan, and Tokio warnings that a satisfactory settlement is "essential" failed to move the Moscow authorities. The Tokio militarists, on the other hand, made no secret of their intention to control and rule in the vast Chinese area captured by them in the last 17 months.

Wheat Conference

PRECIOUS little has been accomplished in recent years by the International Wheat Advisory Committee, but it appears that another meeting of this governmental group will take place in London, Jan. 10, for study of the existing wheat position and possible action to curtail production and prevent dumping. Our Ambassador to Great Britain, Joseph P. Kennedy, is Chairman of the committee, and London reports indicate that he called the meeting of 21 member nations at the request of the Australian, British, French and United States governments. The agenda indicates that consideration will be given "the present world wheat crisis," and "what action the committee should recommend to its constituent governments to cope with that crisis." Unfortunately, there is a good probability that American delegates will endeavor to persuade other countries to try some of the absurdities that steadily have marked New Deal treatment of the agricultural problems within the United States. It is earnestly to be hoped that the practical results of the Roosevelt experimentation will dissuade other countries from embarking on such ventures. Tampering with world wheat market relationships is quite apt to produce startling and unexpected results, as Washington realized recently when dumping of some of the United States surplus on the Brazilian market was considered. Apparently as a consequence of that incident, Argentina now has joined the other great wheat-producing countries in the international committee deliberations. It may be added, however, that the previous refusal of Argentina to join in international proposals had little real bearing on the problem, which now is more acute than ever.

Discount Rates of Foreign Central Banks

THERE have been no changes during the week in the discount rates of any of the foreign central banks. Present rates at the leading centers are shown in the table which follows:

Country	Rate in Bffect Dec. 9	Date	Pre- vious Rate	Country	Rate in Effect Dec. 9	Date	Pre- vious Rate
Argentina	315	Mar. 1 1936		Holland	2	Dec. 2 1936	216

Foreign Money Rates

INDON open market discount rates for short bills on Friday were 1@11-16%, as against 15-16% on Friday of last week, and 15-16@1% for three-months bills, as against $\frac{7}{8}$ @15-16% on Friday of last week. Money on call at London on Friday was $\frac{1}{2}$ %. At Paris the open market rate was raised on Dec. 8 from 3% to $\frac{31}{4}$ %, while in Switzerland the rate remains at 1%.

Bank of England Statement

"HE statement for the week ended Dec. 7 shows a rise of £6,944,000 in note circulation, customary at this time of year because of the approaching Holiday season and year-end. Notes outstanding now aggregate £487,752,000 compared with \pounds 492,830,691 a year ago. In addition the Bank lost £39,534 of bullion. Ordinarily these two changes would have the effect of reducing reserves £6,983,534, but on the present occasion a gain of £23,017,000 in reserves resulted instead. This was caused by the action taken on Tuesday last, increasing the fiduciary note issue £30,000,000 to £230,000,000, thereby releasing £30,000,000 gold backing from the note issue. A year ago the fiduciary note issue was temporarily increased £20,000,000 but the added amount was canceled early in 1938, after the strain of year-end note expansion had ceased. It is not clear whether the present increase is of a temporary nature or not. The proportion of reserves to liabilities rose sharply in consequence of the above, to 44.3% from 29.7%last week and compares with 35.3% a year ago. Public deposits decreased £4,477,000 and other deposits increased £4,617,702. The latter consists of bankers' accounts which rose £5,863,356 and other accounts which fell off £1,245,654. Government securities decreased £24,030,000 but other securities rose £1,182,099. Of the latter amount, £314,799 was an addition to discounts and advances and-£867,300, to securities. The discount rate did not change from 2%. Below are shown the different items with comparisons for previous years:

BANK OF ENGLAND'S COMPARATIVE STATEMENT

	Dec. 7, 1938	Dec. 8, 1937	Dec. 9, 1936	Dec. 11, 1935	Dec. 12, 1934
	£	£	£	£	f

Proportion of reserve	021,010,010	021,010,000	210,011,010	200,002,992	192,730,93
to liabilities	44.3%	35.3%	35.20%	35.49%	40.16%
Bank rate	2%	2%			

Bank of Germany Statement

T^{HE} quarterly statement dated Dec. 7 showed a contraction in note circulation of 114,300,000 marks, which brought the total down to 7,629,428,000 marks. Notes outstanding a year ago aggregated 5,074,627,000 marks and the year before 4,562,668,-000 marks. A loss was also recorded in reserve in foreign currency of 400,000 marks, in bills of exchange and checks of 260,500,000 marks, in advances of 800,000 marks and in other daily maturing obligations of 138,500,000 marks. The Bank's total gold holdings remain unchanged at 70,773,000 marks. The proportion of gold and foreign currency to note circulation is now 1.00%; a year ago it was 1.49% and the year before 1.58%. The item of investments registered an increase of 100,000 marks. Following are the various items with comparisons for previous years:

Bank of France Statement

HE statement for the week ended Dec. 1 showed an expansion in note circulation of 2,669,000,-000 francs, which brought the total outstanding up to 109,466,895,295 francs. A year ago notes in circulation aggregated 91,933,487,180 francs and the year before 87,272,527,930 francs. French commercial bills discounted recorded a loss of 1,215,000,000 francs and creditor current accounts of 2,566,000,000 francs, while the items of credit balances abroad and advances against securities gained 1,000,000 francs and 93,000,000 francs, respectively. A slight increase of 253,611 francs was shown in the Bank's gold holdings, the total of which is now 87,264,538,190 francs. The proportion of gold on hand to sight liabilities stands at 60.17%, compared with 53.39% last year and 61.59% the previous year. No change was shown in temporary advances to State, the total remaining at 20,627,440,996 francs.

In our issue of Nov. 26, we incorrectly stated in these columns that the new gold value of the franc was 27.6 mg., instead of the correct amount, 27.5 mg. gold .9 fine per franc. This error led us to the mistaken conclusion that the Bank had acquired about 317,000,000 francs gold during the week and that only 31,400,000,000 francs of the increase shown in the value of its gold holdings during the week resulted from the revaluation. Actually the entire amount of the week's gain was due to the changed value; which is evident when calculation is made at the proper rate.

Below we furnish the different items with comparisons for previous years:

BANK OF FRANCE'S COMPARATIVE STATEMENT

* Figures as of Nov. 17, 1938. a Includes bills purchased in France. b Includes bills discounted abroad. c In the process of revaluing the Bank's gold under the decree of Nov. 13, 1938, the three entries on the Bank's books representing temporary advances to the State

were wiped out and the unsatisfied balance of such loans was transforred to a new entry of non-interest bearing loans to the State. Revaluation of the Bank's gold (at 27.5 mg. gold, .9 fine, per franc.) under the decree of Nov. 13, 1938, was effected in the Statement of Nov. 17, 1938; prior to that date and from June 29, 1937, valuation had been at the rate, 43 mg. gold, .9 fine, per franc; previous to that time and subsequent to Sept. 26, 1936, the value was 49 mg. per franc; and before Sept. 26, 1936, there were 65.5 mg. of gold to the franc.

New York Money Market

ONDITIONS were unchanged this week in the New York money market, and rates also were merely carried over from previous weeks. The chief money market event was, of course, the Treasury offering of \$400,000,000 234% bonds due 1960-65, and \$300,000,000 11/8% Treasury notes due in five years. The applications were so enormous that allotments, as announced yesterday, are only 7% on the bonds and 9% on the notes. The Treasury also sold last Monday an issue of \$100,000,000 discount bills due in 91 days, and awards were at 0.017% average, computed on an annual bank discount basis. Bankers' bill and commercial paper trading remained dull, at motionless rates. Call loans on the New York Stock Exchange held to 1% for all transactions, while time loans again were offered at 11/4% for maturities to 90 days, and 11/2% for four to six months' datings.

New York Money Rates

DEALING in detail with call loan rates on the Stock Exchange from day to day, 1% was the ruling quotation all through the week for both new loans and renewals. The market for time money continues quiet. The only transactions reported were occasional renewals at rates previously reported. Rates continued nominal at $1\frac{1}{4}\%$ up to 90 days and $1\frac{1}{2}\%$ for four to six months maturities. The market for prime commercial paper has been moderately active this week. The demand has been good, but the supply of prime paper has been under the daily requirements. Rates are unchanged at $\frac{5}{8}@\frac{3}{4}\%$ for all maturities.

Bankers' Acceptances

THERE has been a fair demand for prime bankers' acceptances this, week, but bills have been in light supply and the market has been quiet. There has been no change in rates. Dealers' rates as reported by the Federal Reserve Bank of New York for bills up to and including 90 days are $\frac{1}{2}\%$ bid and 7-16% asked; for bills running for four months, 9-16% bid and $\frac{1}{2}\%$ asked; for five and six months, $\frac{5}{8}\%$ bid and 9-16% asked. The bill-buying rate of the New York Reserve Bank is $\frac{1}{2}\%$ for bills running for 1 to 90 days. The Federal Reserve Bank's holdings of acceptances remain unchanged at \$547,000.

Discount Rates of the Federal Reserve Banks

THERE have been no changes this week in the rediscount rates of the Federal Reserve banks. The following is the schedule of rates now in effect for the various classes of paper at the different Reserve banks:

DISCOUNT RATES OF FEDERAL RESERVE BANKS

Course of Sterling Exchange

S^{TERLING} exchange is ruling on average firmer and much steadier than last week. The market is very quiet and official operations play the major part in the movement of quotations. Nevertheless sterling continues under pressure, with apparent flight from the pound as a consequence of the political uncertainties on the Continent. The range for sterling this week has been between 4.66% and 4.69% for bankers' sight bills, compared with a range of between \$4.62% and \$4.68 11-16 last week. The range for cable transfers has been between \$4.66½ and \$4.69%, compared with a range of between \$4.62 11-16 and \$4.68 13-16 a week ago.

Following the improvement in sterling the London gold price has steadily declined from the record high of 150s. on Nov. 26 to 148s. 1d. on Dec. 6. The gold on offer in the London open market is always reported as taken for unknown destinations, but in the past few weeks it has been clearly evident that the greater part of the metal has been taken for the British exchange equalization fund. On some days the entire amount has been so absorbed, while most of the remainder has been shipped to the United States.

Since Nov. 30 considerable sums seem to have been sent to France as the repatriation of French funds continued to increase, so that the Paris financial situation is currently showing improvement.

It is now apparent that the British exchange equalization fund has been severely strained and has lost much gold in its efforts to arrest the decline in sterling since the end of September. Most of this gold has been lost to the United States, as is evidenced by the rapidity with which United States gold stocks mounted from \$13,000,000,000 in July to more than \$14,000,000,000 in September and are now approaching the \$15,000,000,000 mark. Between the end of September and Dec. 2 United States gold stocks have increased by \$364,000,000.

An indication of the pressure on the British exchange fund and on the pound is seen in the fact that the Bank of England on Dec. 6 increased the amount of Government securities held as backing for the note issue by $\pm 30,000,000$ in a measure to protect its reserves and reserve ratio against the drain from the year-end expansion in note issue. The long-term expansion in British circulation during the past several years has been made possible by transfer of gold on a number of occasions from the British exchange equalization fund to the Bank of England.

The depletion during the past few months in the fund's gold holdings required for the defense of sterling has made it impracticable to transfer gold to the Bank.

The fiduciary issue is that part of the Bank of England's note issue which is secured by Government bonds. The remainder of the note issue is backed 100% by gold deposited in the issue department of the Bank.

There is an increasing demand for American securities in London and on the Continent. It is hard to discover from New York sources the evidence of this investment. Consequently it must be assumed that much of the money coming to New York from abroad in recent months has been placed on deposit here or otherwise privately employed.

The British investment market has been declining for a long time. The British public are displaying apathy toward domestic issues.

The London "Financial News" index for 30 industrial stocks, on the basis of July 1, 1935 as 100, stood at 81.9 on Dec. 1, compared with 83 on Nov. 1, with 98.3 a year earlier, with the high record of 124.9 on Nov. 18, 1936, and the low of 73.7 on Sept. 28 of this year.

Capital issues floated in Great Britain in November were $\pounds 12,802,202$, compared with $\pounds 2,627,853$ in October and with $\pounds 12,404,174$ in November, 1937. The 11-month total this year was $\pounds 108,501,656$, against $\pounds 153,081,567$ in 1937, and the current year's showing is the lowest since 1930.

Withdrawal of foreign balances from London since the war crisis is reflected in the October statement of average weekly balances of the London clearing banks. Deposits have declined £53,000,000 in the past four months, due primarily to the outward movement of capital. This figure gives a hint of the strain to which the British equalization fund has been put. The figures cover only the 11 clearing banks in London. In additon there are many private banks which have undoubtedly been losing foreign deposits. To these sums must be added the foreign money which had been invested in the London bill market and in stocks and bonds, to say nothing of gold itself. Reports are heard of a steady transfer from London of foreign money which had not been classed as "hot" money but which had been held there for the past several years. London open market money rates tend slightly toward firmness. Two-months bills are 15-16%, three months 29-32% and four- and six- months bills $\frac{7}{8}\%$.

All the gold on offere in the London open market this week has been taken for unknown destinations, understood to be chiefly for account of the British exchange equalization fund and for transfer to New York. Gold on offer at the time of price fixing each day was as follows: On Saturday last £404,000, on Monday £145,000, on Tuesday £518,000, on Wednesday £783,000, on Thursday £530,000, and on Friday £524,000.

At the Port of New York the gold movement for the week ended Dec. 7, as reported by the Federal Reserve Bank of New York, was as follows:

GOLD MOVEMENT AT NEW YORK, DEC. 1-DEC. 7, INCLUSIVE
Imports
Exports
Exports

\$19,100,000 from England			G.	Expor	8		
172,000 from India			1	None	£		
\$19,272,000 total	L.	· · ·				8.0	

Net Change in Gold Earmarked for Foreign Account Decrease: \$4,590,000

Note—We have been notified that approximately \$3,839,000 of gold was received at San Francisco, of which \$2,930,000 came from Japan, and \$909,000 from China.

The above figures are for the week ended on Wednesday. On Thursday, there were no imports or exports of the metal, or change in gold held earmarked for foreign account. On Friday \$320,000 of gold was received from India. There were no exports of the metal or change in gold held earmarked for foreign account.

Canadian exchange is reasonably steady. Montreal funds ranged during the week between a discount of 27-32% and a discount of 25-32%.

The following tables show the mean London check rate on Paris, the London open market gold price, and the price paid for gold by the United States:

MEAN LONDON CHECK RATE ON PARIS

Saturday, Dec. 3	Thursday, Dec. 8
------------------	------------------

LONDON OPEN MARKET GOLD PRICE	
Saturday, Dec. 3 148s. 71/2d. Wednesday, Dec. 7 148s. 5d. Monday, Dec. 5 Thursday, Dec. 8 Dec. 8 11d. Tuesday, Dec. 6 Friday, Dec. 9 Dec. 9 149s. 11d.	
PRICE PAID FOR GOLD BY THE UNITED STATES (FEDERAL RESERVE BANK)	
Saturday, Dec. 325.00 Wednesday, Dec. 7\$35.00 Monday, Dec. 535.00 Thursday, Dec. 835.00 Tuesday, Dec. 6	

Referring to day-to-day rates sterling exchange on Saturday last was slightly up from previous close in Bankers' sight was \$4.681/8@ limited trading. \$4.68 9-16; cable transfers \$4.68 7-16@\$4.68 13-16. On Monday sterling was much firmer in dull trading. The range was \$4.68 15-16@\$4.69 9-16 for bankers' sight and \$4.691/8@\$4.693/4 for cable transfers. On Tuesday sterling fluctuated more widely in limited trading. Bankers' sight was \$4.681/2@ \$4.69³/₄; cable transfers, \$4.68⁵/₈@\$4.69⁷/₈. On Wednesday sterling was lower and steady in a quiet market. Bankers' sight was \$4.68@\$4.6834; cable transfers \$4.681/8@\$4.687/8. On Thursday sterling was off sharply due to the Italian threats against French colonies. The range was \$4.661/2@\$4.673/8 for bankers' sight bills and 4.667/8@44.671/2 for cable transfers. On Friday the pound continued under pressure. The range was \$4.663%@\$4.66 15-16 for bankers' sight and \$4.661/2@\$4.67 1-16 for cable transfers. Closing quotations on Friday were $$4.66^{3}/_{4}$ for demand and \$4.667/8 for cable transfers. Commercial sight bills finished at \$4.665%; 60-day bills at \$4.655%; 90-day bills at \$4.651/4; documents for payment (60 days) at \$4.655%, and seven-day grain bills at \$4.66. Cotton and grain for payment closed at \$4.665%.

Continental and Other Foreign Exchange

RENCH francs moved irregularly during the week. In terms of the dollar the unit generally followed sterling, but in terms of sterling the franc was firmer, being quoted to the advantage of Paris at 177.32 on Wednesday, the most favorable quotation for the franc since the de jure stabilization in May.

In the early part of the week, as had been the case since mid-November, there appeared to be a considerable repatriation of French funds from abroad, chiefly from London. However, this repatriation of French capital held abroad came to an abrupt close in the later trading on Wednesday as the growing anti-French demonstrations in Italy threatened to mar efforts toward a general European appeasement.

The immediate result of the Italian demands was to check the sustained recovery of sterling and French francs in the New York foreign exchange market and to cause wide declines in the two units. Heavy selling pressure developed on the franc as in addition to the Italian dispute there was the pressure consequent upon the continued unfavorable trade balance. The French control was compelled to give occasional support to the currency.

Only a few days ago the Paris authorities were confident that the inflow of funds from London would continue and would result in a steady appreciation of the franc and lend increasing ease to the Paris money market. Aside from current factors affectthe exchange market, the underlying French monetary and economic situation shows no improvement over the trends characteristic of the past few years.

The Belgian currency after some weeks of comparative firmness is again displaying an undertone of ease. This is due entirely to disturbed political

conditions in Blegium. Ever since Dec. 1 a ministerial crisis has been impending over the question of finances. The weakness of the belga is most apparent in quotations for belga futures. On Dec. 1, 30-day belgas were at a discount of 2 points under spot and are currently around 7 points discount. The discount on 90-day belgas was 10 points on Dec. 1, widened to 25 points on Dec. 6, and is now 15 points.

The banking situation in Belgium is essentially sound and were it not for the general unrest in Europe and the disturbed economic conditions prevailing throughout the world, the country's strong banking position would be reflected in firmer cur-The National Bank of Belgium adds to its rency. gold holdings from week to week, deriving most of its gold from London. In the Bank's statement for Dec. 1 gold holdings appear at 3,492,000,000 belgas The Bank's ratio of gold to notes was 78.05% and its ratio of gold to total sight liabilities was 69.27%.

The following table shows the relation of the leading European currencies to the United States dollar:

donar:	Old Dollar	New Dollar	Range	
	Parity	Parity a	This Week	
b c France (franc)	. 3.92	6.63	2.62% to 2.65	
Belgium (belga)	_ 13.90	16.95	16.821/2 to 16.841/2	
Italy (lira)		8.91	5.261/8 to 5.261/2	
Switzerland (franc)	_ 19.30	32.67	22.621/2 to 22.701/2	
Holland (guilder)	_ 40.20	68.06	54.32 1/2 to 54.42	
a Now dollar parity as he	fore develu	ation of the	Furopoon aurronaios	

a New dollar parity as before devaluation of the European currencies between Sept. 30 and Oct. 3, 1936. b Franc cut from gold and allowed to "float" on June 30, 1937. c On May 5, 1938, the franc was devalued on a de facto basis of 179 francs to the pound, or 2.79 cents a franc.

The London check rate on Paris closed on Friday at 177.54, against 177.87 on Friday of last week. In New York sight bills on the French center finished at 2.63, against 2.631/2 on Friday of last week; cable transfers at 2.66 1-16, against 2.63 9-16. Antwerp belgas finished at 16.831/4 for bankers' sight bills and at 16.831/4 for cable transfers, against $16.821/_2$ and 16.82 $\frac{1}{2}$. Final quotations for Berlin marks were 40.08 for bankers' sight bills and $40.08\frac{1}{2}$ for cable transfers, in comparison with $40.08\frac{1}{2}$ and $40.08\frac{1}{2}$. Italian lire closed at 5.26 for bankers' sight bills and at 5.261/4 for cable transfers, against 5.26 and 5.261/4. Exchange on Czechoslovakia finished at 3.423/8, against 3.42; on Bucharest at 0.74, against 0.74; on Poland at 18.89, against 18.863/4; and on Finland at 2.07, against 2.071/2. Greek exchange closed at 0.855/8, against 0.857/8.

XCHANGE on the countries neutral during the E war presents no new features from those of recent weeks. The Scandinavian currencies move in close sympathy with sterling, while the Holland guilder and the Swiss franc move independently and have shown firmness since Sept. 26 when they were detached from the sterling tie. However, both the guilder and the Swiss franc are currently somewhat easier, due in part to the uncertainty felt with respect to the course of sterling and the French franc and in some measure to the movement away from these currencies into dollars.

The Netherlands Bank statement for Dec. 5 showed gold holdings of 1,461,000,000 guilders, a reduction from the previous week of 20,000,000 guilders, due probably to transfer of gold to the Holland equalization fund in connection with the gold payment of the Mendelssohn's French credit on Nov. 10. The Bank's ratio of gold to total sight liabilities stands at 80%.

Bankers' sight on Amsterdam finished on Friday at 54.34, against 54.39 on Friday of last week; cable

Financial Chronicle

Dec. 10, 1938

transfers at 54.34, against 54.39; and commercial sight bills at 54.29, against 54.34. Swiss francs closed at $22.62\frac{3}{4}$ for checks and at $22.62\frac{3}{4}$ for cable transfers, against 22.71 and 22.71. Copenhagen checks finished at $20.84\frac{1}{2}$ and cable transfers at 20.84½, against 20.90½ and 20.90½. Checks on Sweden closed at $24.04\frac{1}{2}$ and cable transfers at 24.041/2, against 24.121/2 and 24.121/2; while checks on Norway finished at 23.46 and cable transfers at 23.46, against 23.53 and 23.53.

XCHANGE on the South American countries is unchanged in all important respects. The quotations for most of the South Americans are largely nominal as a consequence of the strict control of exchange. The Argentine peso, which enjoys the most freedom among the South American units, is inclined to reflect the changes in sterling. Advices from Buenos Aires state that October foreign trade figures indicate the probability that the turning point for the better has been reached in Argentina's foreign trade. Its wool exports are up 12%, while Argentine exports as a whole are the highest since February.

Argentine paper pesos closed on Friday at 311/8 for bankers' sight bills, against 31.22 on Friday of last week; cable transfers at 311/8, against 31.22. The unofficial or free market close was 22.60@22.75, against 22.55@22.75. Brazilian mileris are quoted at 5.90 (official), against 5.90. Chilean exchange is quoted at 5.19 (official), against 5.19. Peru is nominally quoted at 201/8, against 203/4.

XCHANGE on the Far Eastern countries con-L' tinues largely unfavorable to the Far East as has been the case ever since the Japanese invasion of China. Day-to-day quotations for all Far Eastern points are affected by and move with sterling.

Closing quotations for yen checks yesterday were 27.23, against 27.30 on Friday of last week. Hongkong closed at 291/4@293/8, against 291/4@297-16; Shanghai at 16 1-16@16¼, against 16.08@16¼; Manila at 49.90, against 49.90; Singapore at 543%, against 54 9-16; Bombay at 34.87, against 34.00; and Calcutta at 34.87 against 34.00.

Gold Bullion in European Banks

HE following table indicates the amounts of gold bullion (converted into pounds sterling at par of exchange) in the principal European banks as-of respective dates of most recent statements, reported to us by special cable yesterday (Friday); comparisons are shown for the corresponding dates in the previous four years:

Banks of-	1938	1937	1936	1935	1934

The value of gold held by the Bank of France is presently calculated, in accordance with the decree of Nov. 13, 1938, at the rate, 27,5 mg, gold. 9 fine, equals one franc; previously and subsequent to July 23, 1937, gold in the Bank was valued at 43 mg, gold. 9 fine, per france before then and after Sept. 26, 1936, there were 49 mg, to the france; prior to Sept. 26, 1936, 65,5 mg, gold. 9 fine, equalsed one france; Trace is a the rate at which the Fank of England values its gold holdings (7.9851 gr. gold 11-12ths fine equals £1 sterling), the sterling equivalent of 296 frances gold in the Bank of France is now just about £1; when there were 43 mg, gold to the franc, the rate was about 190 frances to the £1; when 49 mg., about 165 frances per £1; when 65.5 mg, about 125 francs equaled £1.

The United States and the Lima Conference

The forthcoming conference at Lima, Peru, seems likely to have before it, as one of the principal items of its actual agenda, the question of united resistance by the American republics to alien political doctrines and systems, and to foreign aggression if that is attempted. A considerable effort appears to have been made to arouse the Latin American peoples to the dangers of German and Italian propaganda, and to put them on their guard against political or territorial changes in Europe or Africa that would make Latin America more exposed than now to attack. There is inseparable from such a program the subject of armament, and with the example of the United States before them the other States may not unnaturally be expected to conclude that they, too, should develop their war establishments in preparation for the day when national defense may become the supreme issue. Officially, there has been no public encouragement by the American Government of a general armament increase, but since Mr. Roosevelt has publicly promised, although without the backing of Congress, that in case of invasion the United States would help defend Canada and has further envisaged the Americas as offering a kind of united front to European aggression, there is every reason for thinking that the general issue, if it comes before the Lima conference, will be regarded as carrying the endorsement of the United States.

The question merits examination not only by itself but also because of its bearing upon the general question of Pan-American solidarity. There is no doubt that German and Italian propaganda has for some time been actively carried on in a number of the Latin American States, and press reports have represented it as especially active at Lima in preparation for the conference. The primary aim, presumably, has been to win support for fascism and its political methods and, incidentally, increase the opportunities for trade, but there is reason for suspecting that such intensification of propaganda as has taken place in recent months has aimed particularly at discrediting the United States and weakening its influence at Lima. If provocation were needed for a propaganda offensive, the United States has given it in such things as the Chicago "quarantine" speech of President Roosevelt, the invectives launched by public officials, including some high in the Federal service, against Nazism and Fascism and their leaders, and resolutions of societies and public meetings which have assumed to represent public opinion. There was, doubtless, some further ground for hoping that propaganda would succeed because of the presence of important German and Italian minorities in the larger Latin American States, a relatively slender hold of democratic ideas upon the minds of Latin American peoples, and the fact that few Latin American States have failed to show, in their list of rulers, one or more dictators.

A united front, on the other hand, would, if it were realized, confront Latin America with some difficult situations. It would doubtless be possible for any State that chose to do so to expel foreign propagandists and keep others from replacing them, but expulsion would not improve relations with the States to which the propagandists belonged, the mails and the press would still be open unless a rigid censorship were set up, and the activities of citizens who had espoused Nazi or Fascist views and felt called upon to progagate them could with difficulty be curbed. A united front, moreover, implies the existence of an enemy, actually embodied or prospective, to whose advances some kind of joint resistance is to be offered. Who, what or where is the enemy against whom Latin America would be urged to combine its forces? Material weapons are not likely to prove very effective against ideas, and it would not improve diplomatic relations with Europe or Asia if it were known that the American republics were arrayed in opposition to Germany, Italy and Japan merely because in those countries dictatorships prevail. The mere suggestion of a united front is provocative, and a State which wishes to remain at peace will not, if it is wise, deliberately invite discrimination or attack either by itself or jointly with others.

The role of the United States in maintaining the political integrity and independence of the American republics calls for careful determination if joint policies of any kind are to be adopted. Under the Monroe Doctrine the role of the United States was long interpreted, to the increasing irritation of Latin America and the impairment of friendly relations with its members, as that of a lord protector and, on frequent occasion, as that of a boss and indirectly an exploiter. Today, when the Monroe Doctrine has been pushed aside to make room for the policy of the "good neighbor," cooperation for peace and mutual benefit is emphasized. If the protection of all the Americas, however, is to be in part the task of the United States, and the danger to Latin America is to be regarded by the Administration as equal to, or inextricably bound up with, that of this country, the demand for preparedness by land, sea and air may be expected greatly to outrun even the large plans which the Administration is already supposed to have in hand.

The best thing that could happen at Lima would be for the assembled Powers to avoid all commitments to joint action for defense, whether against foreign isms or foreign material aggression. If the majority of Latin American peoples desire Fascism, no power on earth can prevent them from "going Fascist"; if they do not want it, they have the power in their individual States, to keep it from establishing itself in their territory. It is as separate and independent States, however, that they can best deal with the problem. There is no reason to expect that collective security, specious in theory and a wreck in practice in Europe, can be revived and made respectable or workable in Latin America. It will be easier to void commitments if the American representatives at the conference, while giving all proper emphasis to the ideas of the "good neighbor," refrain from emphasizing the armament issue or intimating

that the war forces of the United States are available for anything except national defense.

If a census of Latin American opinion could be taken, it is probable that cooperation between the United States and the countries to the south, but without any assumption by the United States of the role of dictator, is what the Latin American peoples and their governments desire. For all the differences in size, population and wealth that the Latin American States show (differences, it may be noted, similar to those that obtain in Europe), they feel entirely able to protect their own interests and have no excited fear of foreign aggression. It is on this spirit of independence that cooperation will have to build. There are admittedly some serious obstacles to what, if a legal phrase may be used, may be described as an international "meeting of minds." In spite of President Roosevelt's announcement of a "good neighbor" policy, Latin America has not forgotten the time when the American Government boasted of its supremacy and assumed a right to interfere by force in political situations that were not to its liking. There are difficulties of language and marked differences of national tradition and culture. No tourist tide comparable to that which flows to Europe is likely to turn in the direction of Latin America, and the distances are great if one travels by sea.

Yet hopeful progress in mutual understanding has bene made, and it is cordially to be hoped that the Lima conference may hasten the pace. The reciprocal tariff agreements which Secretary Hull has negotiated have been helpful, although they have not prevented Germany, which has been blacklisted as far as reciprocal tariff privileges go, from gaining a substantial foothold in trade with some South American countries by credit extension or underselling. It is in the development of trade on a basis which makes the United States a valuable market for Latin America, without fear of dumping in an effort to get rid of some unmanageable surplus here, that the best success for cooperation is to be expected.

There is less to be said for some of the schemes of political cooperation which have engaged the attention of previous conferences. Ambitious plans for joint agreements to abstain from aggressive war, to extend aid to other Powers if they are attacked and aid is needed, and to submit all controversies to elaborately contrived arbitration bodies belong to the time when some political leaders still affected to believe that the Kellogg anti-war pact was something more than a hollow pretense, and when the League of Nations was still harping upon collective security and claiming an official voice in international disputes. How futile this kind of thing would be in practice can be perceived by asking whether the United States, if it were involved in a serious dispute with a Latin American republic, would submit its case to the final decision of an arbitration body in which Latin America was predominantly represented. It would be well if such proposals, if pushed to actual discussion at Lima, could be set aside as impracticable, at least at the present time, and as obstacles to the informal, but far more effective, cooperation based upon cordial and helpful everyday relationships in politics and trade, and a conviction, which Secretary Hull and his associates at Lima can do much to deepen, that a "good neigh-

bor" means nothing more nor less than a good neighbor and that elaborate agreements for united political action are not needed to make neighborliness effective.

The Business Man's Bookshelf

Japan's War on Foreign Business in China

74 Pages. Shanghai: The China Weekly Review

The material in this pamphlet, consisting mainly of two articles reprinted from the "China Weekly Review," is interesting and timely for such facts as are presented. The articles reprinted from the "China Weekly Review," is interesting and timely for such facts as are presented. The material, gathered, it is stated, mainly from Japanese sources and in part from non-Chinese sources "with no axes to grind," is intended to show in some detail the methods employed by Japan to root out foreign interests in China,

the extent of the losses already sustained (estimated at \$800,000,000 American currency), and the outlook for for-eign business men. The partisan and propaganda standing of the pamphlet is evidenced by the publisher's statement of belief that the circulation of the information in the United States, Great Britain and elsewhere will "lead to the adoption of determined measures to protect what is left of foreign in-vestments and commercial rights" in China.

Credit Manual of Commercial Laws, 1939

Edited by Henry H. Heimann, W. Ran-dolph Montgomery and Richard G. Tobin. 762 Pages. New York: Na ional Associa-tion of Credit Men. \$6.50.

The annual volumes of this well-known manual grow with the years, this 31st annual issue being the largest yet brought out. In addition to thorough revision of the sections deal-ing with business law and the section devoted to a summary of State laws, there have been added new sections on the Chandler Act, the Fair Labor Standards Act, trust receipts, a calendar of corporation reports and taxes, and a list of uniform laws which States have adopted. There is also a summary of State laws relating to public improvement bonds and the misapplication of construction funds.

The New Capital Flotations in the United States During the Month of November and for the Eleven Months of the Calendar Year 1938

New capital flotations in November reached a grand total of \$388,587,925 for the month, as against \$764,759,873 recorded for October, \$238,812,755 for September, \$415,179,-181 for August, \$470,208,890 for July, \$511,614,398 for June, \$221,127,172 for May, \$352,212,019 for April. Dur-ing the months comprising the first quarter of the year it is found that March accounted for a grand total of \$245,-747,393, February showed \$200,518,612 of new issues, while for January the grand total was \$121,544,413.

The grand total of \$388,587,925 for November comprised \$145,438,685 of corporate issues; \$156,449,240 of State and municipal securities; an offering for the Government of the Dominion of Canada of \$40,000,000 30-year 3% bonds due Nov. 15, 1968, floated at $97\frac{1}{4}$, to yield about 3.14%; \$25,000,000 Argentine Republic 10-year $4\frac{1}{2}$ s due Nov. 1, 1948, offered at 951/2, to yield about 5.08%; and \$21,700,000 of issues falling under the head of Farm Loan and publiclyoffered governmental agency securities.

We mention here that our compilations, as always, are very comprehensive, and include the stock, bond and note issues by corporations, by holding, investment and trading companies, and by State and municipalities, foreign and domestic, and also Farm Loan issues and direct public offerings by governmental agencies.

Financing through the sale by borrowing corporations of bond issues directly to the ultimate investor, usually a group of life insurance companies, rather than through the medium of underwriters, continued during November. During the month our records indicate that a total of nine corporate issues, aggregating \$113,320,000, were placed privately or semi-privately. In the month of October a total of five corporate issues were so placed for a total of \$10,700,000. In the month of September a total of six corporate emissions for a total of \$45,790,000 were so placed. In the month of August our records show that a total of 14 corporate issues aggregating \$117,513,000 were placed privately or semiprivately. During the month of July 15 different issues amounting to \$49,692,000 were placed privately or semiprivately. In the month of June 20 issues amounting to \$90,385,000 were also placed privately. During the month of May six issues aggregating \$22,240,000 were placed pri-vately. In the month of April nine issues amounting to \$17,117,780 were so placed. In the month of March seven issues amounting to \$61,035,000 were so placed. In the month of February three issues totaling \$35,050,000 were also placed privately, and in January last three small issues total-ing \$1,401,000 were reported as having been placed privately. This makes a grand total of \$564,243,780 in corporate se-curities, covering 97 separate issues, placed privately or semi-privately in the first 11 months of 1938, and compares with \$425,351,000 of corporate securities, comprising 99 different issues, so placed in the corresponding period of 1937. United States Government issues appeared in the usual order during the month of November. The month's financ-ing done publicly, in addition to "baby bond" sales, com-prised five single Treasury bill issues sold on a discount basis. The details are recorded further below. In the month of June 20 issues amounting to privately.

New Treasury Financing During the Month of November, 1938

Secretary of the Treasury Morgenthau on Oct. 27 an-nounced a new offering of \$100,000,000 or thereabouts of 91-day Treasury bills. The bills were dated Nov. 2 and will mature Feb. 1, 1939. Tenders for the bills totaled \$399,386,-000, of which \$100,241,000 was accepted. The average price for the bills were 00 002

000, of which \$100,241,000 was accepted. The average price for the bills was 99.993, the average rate on a bank discount basis being 0.027%. Issued to replace maturing bills. On Nov. 1 Mr. Morgenthau announced a new offering of \$100,000,000 or thereabouts of 91-day Treasury bills. The bills were dated Nov. 9 and will mature Feb. 8, 1939. Ap-plications for the bills totaled \$331,119,000, of which \$100,-729,000 was accepted. The average price for the bills was 99.994, the average rate on a bank discount basis being 0.022%. Issued to refund maturing bills. Mr. Morgenthau on Nov. 9 announced a new offering of

plications for the bills totaled \$331,113,000, or which \$100,-729,000 was accepted. The average price for the bills was 99.994, the average rate on a bank discount basis being 0.022%. Issued to refund maturing bills. Mr. Morgenthau on Nov. 9 announced a new offering of \$100,000,000 or thereabouts of 91-day Treasury bills. The bills were dated Nov. 16 and will mature Feb. 15, 1939. Subscriptions to the offering totaled \$288,457,000, of which \$100,544,000 was accepted. The average price for the bills was 99.993, the average rate on a bank discount basis being 0.027%. Issued to replace maturing bills. On Nov. 17 Secretary of the Treasury Morgenthau an-nounced another new offering of 91-day Treasury bills in the amount of \$100,000,000 or thereabouts. The bills were dated Nov. 23 and will mature Feb. 23, 1939. Tenders to the offering amounted to \$323,934,000, of which \$100,323,000 was accepted. The average price for the bills was 99.993, the average rate on a bank discount basis being 0.026%. Issued to refund maturing bills. On Nov. 24 Mr. Morgenthau announced a further new offering of \$100,000,000 or thereabouts of 91-day Treasury bills. The bills were dated Nov. 30 and will mature March 4, 1939. Applications for the bills totaled \$325,620,000, of which \$100,304,000 was accepted. The average price for the bills was 99.995, the average rate on a bank discount basis being 0.021%. Issued to replace maturing bills. Baby bond sales during the month aggregated \$37,103,127. Total sales of this type of securities during the first 11 months of 1938 have amounted to \$503,949,538. In the following we show in tabular form the Treasury financing done during the first 11 months of the current year. The results show that the Government publicly disposed of \$7,579,842,138 in that period, of which \$5,770,722,200 went to take up existing issues and \$1,809,119,938 represented an addition to the public-debt. For November alone the dis-posals amounted to \$539,244,127, of which \$502,141,000 comprised refunding ant \$37,103,127 constit

Features of November Corporate Financing Making further reference to the new corporate offerings announced during November, we note that public utility issues accounted for \$79,530,000, which compares with \$279,100,000 in October. Industrial and miscellaneous is-sues totaled \$65,908,685 in November as against \$58,058,-754 reported for them in October. There was no railroad financing during the month of November. The total corporate securities of all kinds put out during November was, as already stated, \$145,438,685, of which \$121,300,000 comprised long-term issues, \$40,000 was of short-term maturity, and \$24,098,685 represented stock offerings. The portion of the month's corporate offerings devoted to refunding operations was \$102,367,800, or more than 71% of the total. In October the refunding portion was \$273,237,144, or more than 81% of the total. In September the refunding portion was \$65,135,600, or more than 43% of the total. In August the refunding portion was \$211,140,930, or more than 62% of the total. In July the refunding portion was \$55,545,325, or more than 31% of the total. In June the refunding portion was \$98,791,000, or more than 33% of the total. In May the refunding portion was \$25,691,650, or more than 40% of the total. In April the refunding portion was \$66,750,000, or about 70% of the total. In February the refunding portion was \$62,-325,590, or about 60% of the total, and in January the re-funding portion was \$4,031,400, or more than 7% of the total. In November a year ago the amount for refunding was \$1,120,000, representing about 3% of that month's total. Features of November Private Financing

Features of November Private Financing

Features of November Private Financing The largest emission during November, 1938, which was placed privately with a group of insurance companies and which also was the largest refunding issue, was \$40,000,000 Goodyear Tire & Rubber Co. (Akron, Ohio) 1st mtge. & coll. trust 3½s, 1958, the proceeds of which are to be used entirely for refunding. Other sizable issues worthy of men-tion were: \$34,000,000 Commonwealth Edison Co. (Chicago) 1st mtge. 3½s, series I, June 1, 1968, priced at 104, and \$15,000,000 Connecticut Light & Power Co. 1st & ref. mtge. 3½s, series H, Dec. 1, 1968, sold at 104.9124, to yield about 3.00%, both placed privately. Included in the month's flotations was an offering of \$20,300,000 Federal Intermediate Credit Banks 1% consoli-dated debentures, dated Nov. 15, 1938, and due in six and 11½ months, priced at a slight premium over par value; \$950,000 Atlanta Joint Stock Land Bank 1½% and 2% refunding Farm Loan bonds, due Dec. 1, 1939-41, offered at 100, to yield from 1.00% to 2.00%; and \$450,000 First Joint Stock Land Bank of Montgomery, Ala., 3¼% Farm Loan refunding bonds, due Nov. 1, 1945, priced at 100, to yield 3.25%.

to yield 3.25%.

During the month the Argentine Republic floated in this country an offering of \$25,000,000 10-year 4½s, due Nov. 1, 1948, issued at 95½, to yield about 5.08%. There were but two offerings during the month of Novem-

ber carrying a right to acquire stock on a basis of one kindor another, namely:

- 60,000 shs. National Gypsum Co. \$4.50 conv. pref. stock, convertible into common stock at \$17 per share for the first year through Nov. 30, 1939, thereafter at \$20 per share through Nov. 30, 1941, thereafter at \$23 per share through Nov. 30, 1943, and thereafter through Nov. 30, 1945, at \$26 per share, when the conversion privilege ends.
 - conversion privilege ends.
 \$600,000 Richmond Radiator Co. 10-year conv. debenture 5s, Nov. 1, 1948, convertible for each \$50 face value into 15 shares of common stock until Nov. 1, 1940, 10 shares until Nov. 1, 1942, and 6 shares thereafter to maturity.

In the elaborate and comprehensive tables on the succeed-ing pages we compare the foregoing figures for 1938 with the corresponding figures for the four years preceding, thus affording a five-year comparison. We also furnish a detailed analysis for the five years of the corporate offerings, showing separately the amounts for all the different classes of cor-porations. porations

Following the full-page tables we give complete details of the new capital flotations during November, including every issue of any kind brought out in that month.

\$4.867.500

The Course of the Bond Market

This week's moderate reaction in bond prices has had most effect in the railroad section and least effect on the medium-grade utilities. Highest-grade issues have revealed some softness, but United States Governments have been strong, while subscriptions were in process for \$400,000,000 new 23/s, 1960-65, and \$300,000,000 11/ss, 1943.

High-grade railroad bonds have displayed fractional improvement. Medium-grade and speculative railroad bonds, in spite of comparatively better traffic reports (car loadings this week were for the third time this year higher than in the corresponding weeks of 1937), have been marking time. Delaware & Hudson 4s, 1943, have gained 1/2 point at 56%, while Illinois Central ref. 4s, 1955, lost % at 51%. Reorganization of the Chicago Great Western and the Chicago &

Eastern Illinois RR. may be expedited by the Reconstruction Finance Corporation's recent agreement to furnish new capital in the amount of \$11,500,000 to the aforementioned roads.

High-grade utility bonds such as Illinois Bell Telephone Co. $3\frac{1}{2}$ s, 1970, and New York Edison $3\frac{1}{4}$ s, 1966, have held close to former high levels and fluctuations have been in decidedly narrow range. Lower grades among utilities have been generally unsettled, with a moderate tendency toward weakness. A reactionary trend has been evidenced particularly in the Memphis Power & Light issues, reflecting an unfavorable turn in the negotiations for purchase of the company's properties by the City of Memphis. The company's 5s, 1948, declined $9\frac{1}{2}$ points to $87\frac{1}{4}$ this week. An offering of \$38,000,000 $3\frac{3}{4}$ s, 1968, and \$10,000,000 serial debentures of Central Illinois Public Service Co. has been the evient of the new financing this week.

the extent of the new financing this week. Industrial bonds rose slightly at the beginning of this week, but have since receded and have closed at about the same levels as a week ago. Steel issues have receded slightly, although an exception has been the Youngstown Sheet & Tube 4s, 1961, which have advanced % to 103%. Oil bonds have been mixed. The General Cable 5½s, 1947, have fallen 1 point to 102½. Paper bonds have strengthened, the International Paper 5s, 1947, rising 1% to 98¼. Amusement bonds have weakened, the largest drop being 3% to 72 in R.K.O. 6s, 1941.

Trading was suspended in the McKesson & Robbins 5½s, 1950, on news of reorganization proceedings. Unlisted quotations have been 67-70 against last week's close of 103%.

The majority of foreign bonds turned softer towards the closing sessions, with lower prices prevailing in almost all departments. In the speculative group, German issues lost up to 3 points, while among other European obligations, particular weakness developed in Italian bonds. South American obligations continued to sag, with pronounced softness in Argentine and Brazilian issues. Japanese bonds ruled firm.

Moody's computed bond prices and bond yield averages are given in the following tables:

* These prices are computed from average yields on the basis of one "typical" bond (4% coupon, maturing in 30 years), and do not purport to show either the average level or the average movement of actual price quotations. They merely serve to illustrate in a more comprehensive way the relative levels and the relative movement of reled averages, the latter being the truer picture of the bond market.

t The latest complete list of bonds used in computing these indexes was published in the issue of July 23. 1938, page 488.

Indications of Business Activity

THE STATE OF TRADE—COMMERCIAL EPITOME Friday Night, Dec. 9, 1938.

Business activity showed further expansion the past week, with reports generally of a decidedly optimistic nature in spite of the seasonal let-downs looked for in many industries. The automotive industry is standing well out in front and reaching new 1938 highs. The motor output in December will probably be between 425,000 and 450,000 units, according to informed trade observers. This would compare with 347,000 units produced in the same month last year. The "Journal of Commerce" weekly index of business activity advanced to 90.0% and compares with a revised figure of 87.2% for the precious week and 78.6% for a year ago. Car loadings continued at peak levels, while electric output and automotive activity advanced sharply to new 1938 highs. Bituminous coal production, steel ingot output and petroleum runs-to-stills registered declines, the publication states. Although scoring a lessthan-seasonal rebound from the preceding week, which included Thanksgiving, electric power production in the United States last week rose to a new 1938 high, totaling 6.2% greater than a year ago for the best year-to-year gain since fall of 1937. Last week's output, as reported by Edison Electric Institute, was 2,285,523,000 kilowatt hours, compared with 2,183,807,000 kilowatt hours for the week ended Nov. 26. The latter figure was 5.7% above a year ago. Enlarged buying in railroad material and equipment,

\$4,867,500

The Course of the Bond Market

This week's moderate reaction in bond prices has had most effect in the railroad section and least effect on the medium-grade utilities. Highest-grade issues have revealed some softness, but United States Governments have been strong, while subscriptions were in process for \$400,000,000 new 2%s, 1960-65, and \$300,000,000 1%s, 1943.

High-grade railroad bonds have displayed fractional improvement. Medium-grade and speculative railroad bonds, in spite of comparatively better traffic reports (car loadings this week were for the third time this year higher than in the corresponding weeks of 1937), have been marking time. Delaware & Hudson 4s, 1943, have gained 1/2 point at 56%, while Illinois Central ref. 4s, 1955, lost % at 51%. Reorganization of the Chicago Great Western and the Chicago &

Eastern Illinois RR. may be expedited by the Reconstruction Finance Corporation's recent agreement to furnish new capital in the amount of \$11,500,000 to the aforementioned roads.

High-grade utility bonds such as Illinois Bell Telephone Co. $3\frac{1}{2}$ s, 1970, and New York Edison $3\frac{1}{4}$ s, 1966, have held close to former high levels and fluctuations have been in decidedly narrow range. Lower grades among utilities have been generally unsettled, with a moderate tendency toward weakness. A reactionary trend has been evidenced particularly in the Memphis Power & Light issues, reflecting an unfavorable turn in the negotiations for purchase of the company's properties by the City of Memphis. The company's 5s, 1948, declined $9\frac{1}{2}$ points to $87\frac{1}{4}$ this week. An offering of \$38,000,000 $3\frac{3}{4}$ s, 1968, and \$10,000,000 serial debentures of Central Illinois Public Service Co. has been the extent of the new financing this week.

Industrial bonds rose slightly at the beginning of this week, but have since receded and have closed at about the same levels as a week ago. Steel issues have receded slightly, although an exception has been the Youngstown Sheet & Tube 4s, 1961, which have advanced % to 103%. Oil bonds have been mixed. The General Cable 5½s, 1947, have fallen 1 point to 102½. Paper bonds have strengthened, the International Paper 5s, 1947, rising 1¾ to 98¼. Amusement bonds have weakened, the largest drop being 3¾ to 72 in R.K.O. 6s, 1941.

Trading was suspended in the McKesson & Robbins 5½s, 1950, on news of reorganization proceedings. Unlisted quotations have been 67-70 against last week's close of 103%.

The majority of foreign bonds turned softer towards the closing sessions, with lower prices prevailing in almost all departments. In the speculative group, German issues lost up to 3 points, while among other European obligations, particular weakness developed in Italian bonds. South American obligations continued to sag, with pronounced softness in Argentine and Brazilian issues. Japanese bonds ruled firm.

Moody's computed bond prices and bond yield averages are given in the following tables:

* These prices are computed from average yields on the basis of one "typical" bond (4% coupon, maturing in 30 years), and do not purport to show either the average level or the average movement of actual price quotations. They merely serve to illustrate in a more comprehensive way the relative levels and the relative movement of reled average, the latter being the truer picture of the bond market.

teld averages, the latter being the truer picture of the bond market. + The latest complete list of bonds used in computing these indexes was published in the issue of July 23, 1938, page 488.

Indications of Business Activity

THE STATE OF TRADE—COMMERCIAL EPITOME Friday Night, Dec. 9, 1938.

Business activity showed further expansion the past week, with reports generally of a decidedly optimistic nature in spite of the seasonal let-downs looked for in many industries. The automotive industry is standing well out in front and reaching new 1938 highs. The motor output in December will probably be between 425,000 and 450,000 units, according to informed trade observers. This would compare with 347,000 units produced in the same month last year. The "Journal of Commerce" weekly index of business activity advanced to 90.0% and compares with a revised figure of 87.2% for the precious week and 78.6% for a year ago. Car loadings continued at peak levels, while electric output and automotive activity advanced sharply to new 1938 highs. Bituminous coal production, steel ingot output and petroleum runs-to-stills registered declines, the publication states. Although scoring a lessthan-seasonal rebound from the preceding week, which included Thanksgiving, electric power production in the United States last week rose to a new 1938 high, totaling 6.2% greater than a year ago for the best year-to-year gain since fall of 1937. Last week's output, as reported by Edison Electric Institute, was 2,285,523,000 kilowatt hours, compared with 2,183,807,000 kilowatt hours for the week ended Nov. 26. The latter figure was 5.7% above a year ago. Enlarged buying in railroad material and equipment, Financial Chronicle

Dec. 10, 1938

Revenue Freight Car Loadings in Week Ended Dec. 3 Total 649,086 Cars

Total 649,086 Cars Loadings of revenue freight for the week ended Dec. 3, 1938, totaled 649,086 cars, a gain of 87,002 cars, or 15.5%, from the preceding week, a gain of 28,761 cars, or 4.6% from the total for the like week a year ago, and a drop of 96,209 cars, or 18.3%, from the total loadings for the cor-responding week two years ago. For the week ended Nov. 26, 1938, loadings were 13.4% above those for the like week of 1937, and 17.4% below those for the corresponding week to a gain of 1.9% when compared with 1937, and a drop of 20.7% when comparison is made with the same week of 1936. The first 18 major railroads to report for the week ended Dec. 3, 1938, loaded a total of 304,830 cars of revenue freight on their own lines, compared with 265,455 cars in the preceding week and 292,888 cars in the seven days ended Dec. 4, 1937. A comparative table follows: REVENUE FREICHT LOADED AND RECEIVED FROM CONNECTIONS

REVENUE FREIGHT LOADED AND RECEIVED FROM CONNECTIONS (Number of Cars)

58,855 69,669 The Association of American Railroads in reviewing the

week ended Nov. 26, reported as follows: Loading of revenue freight for the week ended Nov. 26, totaled 562,084 cars. This was an increase of 6,322 cars or 1.1% above the corresponding week in 1937, but a decrease of 217,668 cars or 27.9% below the same week in 1930.

week in 1930. Loading of revenue freight for the week of Nov. 26 was a decrease of 95,-393 cars or 14.5% below the preceding week due to observance of Thanks-giving Day. Miscellaneous freight loading totaled 224,180 cars a decrease of 43,014 cars below the preceding week, but an increase of 10,427 cars above the corresponding week in 1937. Loading of merchandise less than carload lot freight totaled 129,890 cars, a decrease of 24,097 cars below the preceding week, and a decrease of 4,646 cars below the corresponding week in 1937. Coal loading amounted to 120,403 cars, a decrease of 13,244 cars below the preceding week, and a decrease of 1,035 cars below the corresponding week in 1937.

Week in 1937. Grain and grain products loading totaled 29,159 cars, a decrease of 6,963 cars below the preceding week, and a decrease of 3,377 cars below the corresponding week in 1937. In the Western Districts alone, grain and grain products loading for the week of Nov. 26 totaled 18,308 cars, a decrease of 4,535 cars below the preceding week, and a decrease of 1,796 cars below the corresponding week in 1937. Live stock loading amounted to 13,769 cars, a decrease of 4,288 cars below the preceding week but an increase of 14,040 core before the preceding week in 1937.

Live stock loading amounted to 13,769 cars, a decrease of 4,288 cars below the preceding week, but an increase of 1,421 cars above the corres-ponding week in 1937. In the Western Districts alone, loading of live stock for the week of November 26, totaled 10,430 cars, a decrease of 3,983 cars below the preceding week, but an increase of 869 cars above the corres-ponding week in 1937.

Forest products loading totaled 25,588 cars, a decrease of 2.948 cars below the preceding week, but an increase of 613 cars above the corres-ponding week in 1937. Ore loading amounted to 12,337 cars, a decrease of 512 ears below the preceding week, but an increase of 2,981 cars above the corresponding week in 1937.

Coke loading amounted to 6,758 cars, a decrease of 327 cars below the receding week, and a decrease of 62 cars below the corresponding week in 1937.

In 1937. Five districts—Allegheny, Pocahontas, Southern, Northwestern and Central Western—reported increases compared with the corresponding week in 1937. The Eastern and Southwestern districts reported decreases. All districts, however, reported decreases compared with the correspond-ing work in 1920. ing week in 1930.

3522 Financial construction steel, tin plate, automotive requirements and miscellaneous business is definitely in sight for steel pro-ducers, "Iron Age" reported in its mid-week summary of the industry. Year-end caution in buying, the magazine states, does not obscure an improved outlook for business in the first quarter. Falling off in orders this month is not drastic, while prospects that will build up mill tonnage early next year continue to accumulate. The magazine estimates ingot output at mid-week at 60%, off half a point from last week. Department of Commerce estimates that residential building will show a gain of 30% to 40% next year are regarded as too conservative by some trade observ-ers. Among building material manufacturers it has been held that a rise of 60% to 70% may be expected. For this year about 300,000 new dwelling units were constructed as against 284,000 units in 1937. A total of 475,000 to 500,000 units in 1939 is predicted in the trade. Daniel C. Roper, Secretary of Commerce, said this week that all indications point to one of the most active Christmas trade seasons in several years. The Commerce Department head said busi-ness men in most leading cities expected Christmas sales would exceed last year's. The belief of retailers, he added, was backed by statistical evidence of the recent improve-ment in industrial and other lines. "Industrial production experienced a sharp rise in November and distribution re-corded an improvement in the flow of general merchandise into the hands of consumers," he said. It was further stated by the Commerce Department that total construction activity this year would be the highest since 1930, and prospects pointed to a further increase next year. Producment in industrial and outer, and, and and intribution re-corded an improvement in the flow of general merchandise into the hands of consumers," he said. It was further stated by the Commerce Department that total construction activity this year would be the highest since 1930, and prospects pointed to a further increase next year. Produc-tion of automobiles and trucks in the United States and Canada this week topped the 100,000 mark for the first time in 16 months, according to the estimate of Ward's Automotive Reports. Output was placed at 100,705 units, a rise of 2,910 units above the preceding week and 14,942 units greater than the corresponding week of last year. Ward's at the same time revised its estimate of November production upward to 378,000 units. This is the first time in any month this year that the total has improved over the comparative 1937 figure. Last year's November output of automobiles and trucks was 376,629 units. The report also pointed out that the increase was concrete evidence that the industry has passed its crossroads and definitely is on the way to a vasily improved position over that of the model year recently closed. The Association of Amer-ican Railroads reported today 649,086 cars of revenue freight were loaded during the week ending last Saturday. This was an increase of 77,002 cars, or 15.5%, compared with the preceding week, an Increase of 25,761 cars, or 46%, compared with a year ago, and a decrease of 51,964 cars, or 7.4%, compared with 1930. The rising tide of Christmas buying swept retail sales totals to new high ground this week, even though milder weather and rain dampened consume interest in winter clothing, Dun & Bradstreet observed today. The gain was not as sub-stantial as in the week before, however, and volume re-ceded from the level of a year ago. Buyer preference for the lower-priced articles became more. unmistakable; the tendency to pay less for individual purchases, combined with the lower average of prices, pulled dollar volume under last year. In the was remarkable for abnormal warmth throughout practi-cally the entire country, the Government report states. In the New York City area the weather was pleasant during most of the week, with sharply cold conditions prevailing at times. Today it was raining and cold here, with tem-peratures ranging from 49 to 62 degrees. The forecast was for overcast with occasional rain tonight and Saturday morning. Warmer and probably fair Sunday. Overnight at Boston it was 44 to 52 degrees; Baltimore, 46 to 54; Pittsburgh, 34 to 40; Portland, Me., 42 to 48; Chicago, 32 to 44; Cincinnati, 38 to 52; Cleveland, 34 to 48; Detroit, 34 to 46; Charleston, 50 to 60; Milwaukee, 30 to 38; Savan-nah, 50 to 56; Dallas, 38 to 64; Kansas City, 26 to 42; Springfield, Mo., 26 to 42; Oklahoma City, 30 to 56; Salt Lake City, 34 to 56; Seattle, 44 to 56; Montreal, 34 to 44, and Winnipeg, 4 to 18.

Balance at End of September

Moody's Commodity Index Lower

Moody's Commodity Index declined moderately, from 141.2 a week ago to 139.8 this Friday. The principal factors in the decline were lower prices for cotton, hides, hogs and sugar. Corn had a sharp advance. The movement of the Index was as follows:

Tue	o mo	vement of	the index	was as follows:	
Fri.,	Dec.	2	141.2	Two weeks ago, Nov. 25141.8	
Sat.,	Dec.	3	140.9	Month ago, Nov. 9

"Annalist" Weekly Index of Wholesale Commodity Prices Rose 0.3 of a Point During Week Ended Dec. 3

Dec. 3 The "Annalist" announced on Dec. 5 that moderate im-provement took place in the commodity markets during the week ended Dec. 3. The "Annalist" index rose 0.3 of a point to 80.2, the highest level since the early part of Octo-ber. The "Annalist" added: Farm and food products led the rise with some of the major commodities showing unusual strength. Wheat rose more than 2c. a bushel on improved export demand, cash rye jumped 4c. to reach the highest price in about a month. Corn gained more than a cent as farmers held back offerings. Fowls recovered almost all of last week's severe losses as buyers took advantage of low prices. Other meats did little. Holiday demand brought about higher prices for the citrus fruits, notably oranges. Some weakness was evident in textile prices, partly as a result of lower row cotton quotations.

Wholesale Commodity Prices Advanced 0.1% During Week Ended Dec. 3 According to United States Department of Labor

The United States Department of Labor, Bureau of Labor Statistics' index of wholesale commodity prices advanced 0.1% for the week ended Dec. 3 largely because fo higher prices for farm products, Commissioner Lublin announced on Dec. 8. "The increase brought the all-commodity index of 813 price series to 77.4% of the 1926 average," Mr. Lubin said. "It is 0.1% above the level of a month ago and 5.6% below a year ago." Commissioner Lubin also stated:

In addition to farm products, wholesale market prices of foods also averaged higher. Hides and leather products, textile products, fuel and lighting materials, and building materials declined fractionally while metals and metal products, chemicals and drugs, housefurnishing goods, and miscellaneous commodities did not change.
The index for the large group of "all commodities other than farm products, remained unchanged at 79.3. It is 0.3% and 5.4% below a month ago 'nd a year ago respectively.

remained unchanged at 79.3. It is 0.3% and 5.4% below a month ago 'nd a year ago respectively. The index for industrial commodities fell 0.1% to the lowest point in the past two years. It is 0.6% below the corresponding week of November and 3.8% below the level of a year ago. Primarily as a result of strengthening prices for agricultural commodi-ties, the raw materials group index rose 0.6% during the week. It is 1.8%higher than it was a month ago. Compared with a year ago, it is down 4.9%. 4.9%.

The semi-manufactured commodities group index fell 0.3 and is 0.4% below a month ago and 3.2% below a year ago. Average wholesale prices of finished products rose 0.1%. The group index, 80.7, is 0.4% below the level of the corresponding week of last month and 6.1% lower than it was at this time last year.

The announcement, issued Dec. 8 by the Department of Labor, quoting Commissioner Lubin as above, also stated:

The announcement, issued Dec. 8 by the Department of Labor, quoting Commissioner Lubin as above, also stated: Prices of farm products at wholesale advanced 1.2% largely as a result of higher prices for grains, and livestock and poultry. Quotations were apples, peanuts, sweet potatoes and white poultry (New York), eggs, apples, peanuts, sweet potatoes and white potatoes in Eastern markets. Lower prices were reported for rye, cotton, lemons, oranges, hops and white potatoes (Chicago and Portland, Ore.). The current farm products index, 69.1, is 2.8%. higher than it was a month ago and 6.5% lower than it was a year ago. Advances of 2.9% for dairy products and 1.2% for fruits and vegetables caused the foods group index to rise 0.4%. Important foods which aver-aged higher were butter, cheese, dried fruits, vegetables, fresh beef, lamb, mutton, veal and dressed poultry. Cereal products declined 0.7% and meats dropped 0.4%. Quotations were lower for flour, cured and fresh pork, lard, and oleomargarine. This week's food index, 74.3, is up 1.9% from a month ago and down 7.9% from a year ago. As a result of weakening prices for hides, skins and sole and side leather the hides and leather products group index declined 0.6% during the week. No changes were reported in prices of shoes and other leather manufactures such as gloves, belting, luggage and harness. Lower prices for cotton yarns, silk yarns, raw silk, burlap and raw jute caused the index for the textile products group to decline 0.2%. Average wholesale prices for clothing, hosiery and underwear and worsted and woolen goods were steady. The iadex for the fuel and lighting materials group dropped 0.1% to the lowest point reached this year. Lower prices for naturai gasoline were higher and prices for coal and coke were steady. A decrease of 0.1% was also recorded in the building materials group index. Lower prices were reported for rosin, turpentine, red cedar shingles,

and yellow pine timbers. Prices for yellow pine lath and flooring wer higher. The brick and tile, and structural steel subgroups remained a the level of the preceding week. For the third consecutive week, the index for the metals and metal products group index has remained at 95.0%. Prices averaged lower for malleable iron castings, scrap steel, babbitt metal, solder and pig tin. The plumbing and heating subgroup advanced 0.3% as a result of higher prices for range bollers. prices for range boilers.

A fractional advance in prices for fertilizer materials did not affect the index for the chemicals and drugs group as a whole. It remained at 76.3. Wholesale prices of chemicals, drugs and pharmaceuticals, and mixed fertilizers were firm.

fertilizers were firm. The index for the housefurnishing goods group remained unchanged at 87.7% of the 1926 average. Prices for woolen blankets advanced slightly. Average wholesale prices for crude rubber declined 0.9% and paper and pulp dropped 0.1%. Cattle feed advanced 0.7%. The following table shows index numbers for the main groups of com-modities for the past five weeks and for Dec. 4, 1937, Dec. 5, 1936, Dec. 7, 1935 and Dec. 8, 1934. (1026-100) (1926 = 100)

Electric Output for Week Ended Dec. 3, 1938, 6.2% Above a Year Ago

Above a Year Ago The Edison Electric Institute, in its current weekly re-port, estimated that production of electricity by the electric light and power industry of the United States for the week ended Dec. 3, 1938, was 2,285,523,000 kwh. The current week's output is 6.2% above the output of the corresponding week of 1937, when production totaled 2,152,643,000 kwh. The output for the week ended Nov. 26, 1938, was estimated to be 2,183,807,000 kwh., an increase of 5.7% from the like week a year ago.

Wholesale Commodity Prices Advanced Slightly During the Week Ended Dec. 3, According to the National Fertilizer Association

After fluctuating throughout the week ended Dec. 3, with After fluctuating throughout the week ended Dec. 3, with advances slightly outnumbering declines, the wholesale com-modity price index of the National Fertilizer Association recorded a slight upturn, standing at 73.3% against 73.2% in the preceding week. A month ago the index (based on the 1926-28 average of 100%) registered 72.9%, and a year ago 78.7%. The National Fertilizer Association, under date of Dec. 5, further states:

of Dec. 5, further states: Last week's rise in the all-commodity index was largely due to higher prices for foodstuffs, with the food group average advancing to the highest point reached since early September. In the farm product group a frac-tional drcp in cotton prices was more than offset by rising quotations for grains. A small decline in the index for livestock and livestock products was due to lower poultry prices; reliable livestock quotations were not available because of the stockyard strike in Chicago. The only significant decline in any of the group averages during the week was in the index representing the prices for hides, cattle feed, and book paper. Twenty-three price series included in the index advanced during the week and 20 declined; in the preceding week there were 21 advances

declines; in the second preceding week there were 26 advances and and 18 declines

October Production of Electric Energy in the United States

United States The production of electric energy for public use during the month of October, 1938, totaled 9,966,736,000 kilowatt hours, according to reports filed with the Federal Power Commission. This is an increase of 3.8% when compared with the previous month, and is 2% less than was produced during the same month of the previous year. The normal change from September to October is plus 2.3%. The pro-duction of electric energy by electric railway, electric rail-road and other plants which generate principally for their own use totaled 243,615,000 kilowatt hours, making a total production reported to the Commission for the month of October of 10,210,351,000 kilowatt hours. The production by water power in October amounted to 3,321,764,000 kilowatt hours, or 33% of the total output for public use.

public use.

public use. The total capacity of generating plants available for service amounted to approximately 38,335,000 kilowatts as of Nov. 1, 1938. This is an increase of 143,000 kilowatts reported during November over that previously reported. This figure includes plants owned by electric railway, elec-tric railroads, Federal and State organizations, as well as that portion of manufacturing plants which is allocated to the production of electric energy for public use to the production of electric energy for public use.

Note—Above data are solicited from all plants engaged in generating electric energy or public use and, in addition, from electric railways, electrified steam railroad and miscellancous Federal, State, and other plants. Accurate data are receive ach month representing approximately 98% of the total production shown; the maining 2% of the production is estimated and corrections are made as rapid

as actual figures are available. Thus, the figures shown for the current month are preliminary while those for the preceding months are corrected in accordance with actual reports received and vary slightly from the preliminary data. Coal Stock and Consumption

Coal Stock and Consumption The total stock of coal on hand at electric utility power plants on Nov. 1, 1938, was 9,478,108 tons. This was an increase of 1.6%-when compared with Oct. 1, 1938, and a decrease of 10.8% from Nov. 1, 1937. Of the total stock 8,194,634 tons were bituminous coal and 1,283,474 tons were anthracite. Bituminous coal stock increased 2.1% while anthracite stock decreased 1.5% when compared with Oct. 1, 1938. Electric utility power plants consumed approximately 3,760,156 net tons of coal in October, 1938, of which 3,575,243 tons were bituminous coal and 184,913 tons were anthracite, increases of 6.9% and 6.8%, respectively, when compared with the preceding month. In terms of days' supply, which is calculated at the current rate of consumption, there was enough bituminous coal on hand Nov. 1, 1938, to last 71 days, and enough anthracite for 215 days' requirements.

Value of October Residential Building Permits In-creased 65% Over Year Ago, Secretary Perkins Reports—Total Permit Valuations 26% Higher Than October, 1937

Reports—Total Permit Valuations 26% Higher Than October, 1937 The value of residential buildings for which permits were issued in October showed an increase of 65% aver the corresponding month of 1937, Secretary of Labor Frances Perkins reported Nov. 26. "This is the fourth consecutive month in which the permit valuation for residential con-struction has been more than 50% higher than during the corresponding month of 1937," he said. "There was also an increase of 10% in the value of additions, alterations and repairs to existing structures over the year period. The value of new non-residential buildings, however, showed a slight decrease (less than one-tenth of 1%). Total permit valuations were 26% higher than during October, 1937. "Total permit valuations rose slightly in October as com-pared with September. This increase, which is contrary to the usual seasonal trend, was due to gains in the value of new non-residential buildings amounting to 14% and in the value of new residential buildings declined 10% from the September level. These data are based on reports re-ceived by the Bureau of Labor Statistics from 2,021 cities having an aggregate population of 59,265,000. "During the first 10 months of 1938 the total permits issued in the cities reporting to the Bureau for buildings were valued at \$1,409,421,000. This is an increase of 1% as compared with the corresponding period of 1937. The value of new residential buildings over the same period showed a gain of 12%. There was a decrease of 3% in the value of additions, alterations and repairs. "For the first six months total permit valuations in 1938

value of new non-residential buildings and of 16% in the value of additions, alterations and repairs. "For the first six months total permit valuations in 1938 were 11% under the corresponding months of 1937. For the four months, July to October, inclusive, however, there was a gain of 21% over the same period of 1937." An announcement by the Department of Labor, from which the foregoing is taken, continued: The percentage change from September to October in the permit valua-tion of the various classes of construction is indicated in the following table for 2,021 cities having a population of 1,000 or over:

	Change from Sep	t., 1938 to Oct., 1938
Class of Construction	All Cities	Ezcl. New York
New residential	-9.7 +14.2 +7.8	$\begin{array}{r} -3.3 \\ +9.1 \\ +10.2 \end{array}$
m + 1	+0.4	+3.3

There were 20,916 family-dwelling units provided in the new house-keeping dwellings for which permits were issued during October in these cities. This is a decrease of 10% compared with September. The percentage change from October, 1987, by class of construction, is given below for 1,521 cities having a population of 2,500 or over:

		Change from Oct., 1937 to Oct., 1938					
	Class of Construction	All Cittes	Excl. New York				
New non	dential -residential s, alterations, repairs	+65.3 * +9.6	+51.6 +55.0 +13.3				
÷		1.95.8	44 1				

Total_ * Decrease less than 0.1 of 1%.

Compared with October, 1937, there was an increase of 74% in the number of family-dwelling units provided. The changes occurring between the first 10 months of 1938 and the like period of 1937 are indicated below;

Class of Construction	Change from Firs. to First 10 M	t 10 Mos. in 1937 Ios. in 1938

Bank Debits 11% Lower Than Last Year

Bank Debits 11% Lower Than Last Year Debits to individual accounts, as reported by banks in leading cities for the week ended Nov. 30, which included only five business days, aggregated \$6,942,000,000, or 10% below the total reported for the preceding week and 11% be-low the total for the corresponding week of last year, which also included only five business days. Aggregate debits for the 141 cities for which a separate total has been maintained since January, 1919, amounted to \$6,368,000,000, compared with \$7,049,000,000 the preceding week and \$7,183,000,000 the week ended Dec. 1 of last year. These figures are as reported on Dec. 5, 1938, by the Board of Governors of the Federal Reserve System.

Summary of Business Conditions in the Federal **Reserve** Districts

We give below excerpts from the monthly reports on business of the various Federal Reserve banks. The follow-ing remarks are from the reports of the Reserve banks of Boston, New York, Philadelphia, Cleveland, Richmond, Atlanta, Chicago, St. Louis, Minneapolis, Kansas City, Dallas and San Francisco:

First (Boston) District

The Federal Reserve Bank of Boston, in its "Monthly Review" of Dec. 1, states that "between September and October in New England there was not much change in the level of general business activity, after allowances had been made for customary seasonal changes." The Bank further stated:

In October department store sales in this district were about 2% less than ney were in October last year, and during the 5-week period ended Nov. 12 eight canoadings were 6.8% smaller than during the corresponding period the

During October the amount of raw cotton consumed by mills in New

last year.
During October the amount of raw corton consumed by mills in New Engand was 67,002 bales, as compared with 61,673 bales in September and 62,365 bales in October last year. In each of the first nine menths of the current year cotton consumption was less than in the corresponding month in 1937. In October, however, cotton consumption was 7.4% higher than in October last year.
Boot and shoe production in New Engiand is estimated to have been 11,884,000 pairs in October. This total was about 16% less than in September but was larger than in October last year by about 27%.
In Massachusetts the total number of wage-arners employed in representative manufacturing establishments for the week including or ending nearest Oct. 15 was 264,629, an increase of 2,071 employees, or 0.8%, when compared with the number employed in these same establishments during the corresponding week in September. There was an increase of 0.7% in the amount of aggregate weekly payrolls between September and October, according to the Massachusetts Department of Labor and Industries. The increase in employment between September and October was not as large as the average increase of 1.6% which had occurred during the 13-year period 1925-1937, inclusive. There has been an average decrease of 0.4% between September and October, as compared with \$21,526,829 reported by these concerns in October last year. This was a decrease of 3.7%. Decreases were reported in 9 of the 11 major classifications, the only two reporting a gain being the lumber and drug groups, with increases of 15.5% and 1.7%, respectively.

respectively.

Second (New York) District

"During October business operations continued the recent upward movement, owing in large measure to ac-celerated rates of activity in important durable goods lines," said the Federal Reserve Bank of New York in presenting in its "Monthly Review" of Dec. 1, its indexes of business activity. The Bank addad. activity. The Bank added:

activity. The Bank added: There were substantial increases in production of steel, pig iron, copper, zinc, cement, and plate glass, and automobile assemblies rose rapidly as volume output of new models was attained. During October shoe produc-tion decimed less than is usual at this time of the year, but moderate in-creases in cotton and wool mill operations were iargely of a seasonal character and activity at meat packing plants was little changed. Among series reflecting the rate of distribution of goods, shipments of freight over the rairoads and sales of chain stores other than grocery in-creased more than is customary during October, and grocery chain store sales advanced as in other years, but department store and mail order sales rose less than usual.

rose less than usual.

rose less than usual. Preliminary evidence indicates that there was a further gain in the general level of business activity in November. Steel mill activity, after rising further, eased off slightly during the latter part of the month, but apparently averaged substantially higher than in October. Since June, steel mills have more than doubled their rate of production. Assemblies of auto-mobiles continued to rise during the month, and car manufacturers are reported to have revised production schedules upward, owing to result sales in excess of earlier expectations. Cotton mill activity apparently increased further in November, though mill sales of cotton goods during the latter part of the month were reported to be lower than current output. For the first three weeks of November electric power generation rose more than seasonally, and department store sales in this district also appear to have increased by more than by the usual proportions, while the movement of freight by railway declined less than is usual. (Adjusted for seasonal variations, for estimated long-term trend, and where necessary

Third (Philadelphia) District

"Industrial production in the Philadelphia Federal Reserve District, after advancing more than seasonally for two suc-cessive months, continued at about the same level in October as in the previous month, but was still noticeably lower than

igitized for FRASER //fraser stlouisfed org/ a year ago," said the Philadelphia Federal Reserve Bank, in its "Business Review" of Dec. 1, which continued, in part: The October level was sustained by the expanding output of durable goods, including iron and steel products, transportation equipment, and building materials. This upward trend continued in November. Produc-tion of consumers' goods, on the other hand, declined from September to October, and the output of anthracite coal increased less than is usual in this period. Production of crude petroleum in this district registered an actual decline. Early reports indicate a further recession in textile activity. The number of workers employed at manufacturing and nonmanufactur-ing establishments increased 2% and the amount of wages disbursed, 7% from September to October, but the volume of both continued substantially

Following a sharp increase from August to September, wholesale trade contracted slightly in October, and retail trade sales increased less than is usual at this season. In both lines, however, the decimes from a year ago were the smallest since last spring.

Manufacturing

Manufacturing The market for manufactured goods in this district has improved further since the middle of October, particularly in the case of iron and steel prod-ucts, woolens, hosiery, and clothing. Despite increases in both sales and operations, however, the volume of unfilled orders has remained practically unchanged from earlier periods and continues substantially below a year ago. Stocks of raw materials for the most part are maintained at the low levels which have prevailed over the past several months, while inventories of finished goods have been reduced further, especially at plants producing textile products. textile products.

Fourth (Cleveland) District

Fourth (Cleveland) District The Federal Reserve Bank of Cleveland, in its "Monthly Business Review" dated Nov. 30, reports that "many Fourth District Cleveland industries have advanced opera-tions further in recent weeks, largely because of pressure for delivery of parts and materials to automobile assembly plants. That industry expanded operations in November to the highest rate in more than a year in an effort to stock dealers, following an apparent underestimation of public interest in and demand for new cars." The Bank further reported: reported:

reported: Other local industries have shown improvement, but they have been more moderate, and the total gain, while causing a substantial rise in employment, has not been sufficient to restore it to levels prevailing a year ago. This present sharp upward movement, however, is in decided contrast to the contraction which was well under way last year at this time. Steel mill operations in local producing areas rose quite sharply between the third weeks of October and November, and were somewhat above the national average. It is reported that sheet and strip steel rollings, against large commitments made in mid-October when price concessions were available, are the most important factors in current ingot output. Produc-tion facilities for these types are large in this district, which accounts for the fact local plant operations, excluding Pittsburgh, have been above the national rate since early in October. Pittsburgh is a large producer of heavy steels, and while gains have occurred there in recent weeks, demand for this product has lagged.

Fifth (Richmond) District

Fifth (Richmond) District The Federal Reserve Bank of Richmond, in its "Monthly Review" of Nov. 30, reported that "seasonal expansion of trade and industry continued in the Fifth Federal Reserve District in October and early November, although the extent of the improvement varied considerably." The following is also from the "Review":

of the information that the construction of the second layer from the "Review": In some lines the increase in activity was not up to seasonal average, while in others marked gains were registered. A sharp rise in construction work during October was perhaps the outstanding development of the month, building permits issued in 31 cities totaling 48% more than permits issued in October last year, and contracts actually awarded reaching the second highest figure reported for any month in eight years. . . . There was a material increase in automobile sales in October in the Fifth District, only partly attributable to the introduction of new models. Coal pro-duction rose 8% in October over production in September, but the rise was somewhat less than seasonal average. In retail trade circles, the weather during October and early November was exceptionally mild, and sales of fall goods were materially retarded. October department store sales in the district advanced 12% over September sales, but over the past 10 years the average increase between these two months was approximately 20%. Auction tobacco markets sold fewer pounds last month than in September, but the better grades predominated and a resulting improvement in prices brought the growers a higher total amount in October than in September. Sixth (Atlanta) District

brought the growers a higher total amount in October than in September. Sixth (Atlanta) District According to the Nov. 30 "Monthly Review" of the Federal Reserve Bank of Atlanta, "the business improvement begun in the second quarter of this year has continued without reversal of direction in October, either in the country as a whole or in the Sixth Federal Reserve District." The follow-ing is also from the "Review":

ing is also from the "Kevnew": Increasing business activity in the Sixth District on the basis of latest available data has been represented by expansion in residential construction contracts, in the production of pig iron and electric power, in employment and payrolls, and in farm income. The increase in residential contracts in October reversed a previous decline in September. The October increase in pig iron production was 14% over September, and the production rate—the largest in a year—was more than two and one-half times the rate in July. Electric power production for September, the latest available figure, increased to the highest level on record. Declines in business activity were represented by a small decrease in wholesale sales and, after a previous steady increase for five months, in a

gitized for FRASER tp://fraser.stlouisfed.org/ decrease of 2.3% in the rate of cotton consumption. In addition, retail trade was affected by a lagging seasonal movement.

Seventh (Chicago) District

Seventh (Chicago) District "Led by the automotive industry, Seventh (Chicago) District industrial activity advanced steadily upward during October, and preliminary data for November indicate that this trend has continued," it is noted by the Federal Reserve Bank of Chicago, in its Nov. 25 "Business Conditions Report." In several instances, says the Bank, current volumes of output have attained or surpassed the levels prevailing a war ago when the recession in business had prevailing a year ago when the recession in business had become quite marked. The Bank also had the following to sav:

Say: Because initial demand for new cars has been greater than expected, manufacturers of automobiles have had to revise production schedules upward, and it appears that the November volume of output will closely approximate that of the month last year. Production of steel, largely stimulated by activity in the automotive industry, had reached a level by mid-November higher than at any time since the close of the third quarter of 1937. Building construction, as indicated by contracts awarded, re-corded a further definite rise in October, the increase bringing the volume for the year to date to within 5% of the corresponding 1937 period. As a result of this activity, demand for building materials has expanded. Paper mills in the Seventh District displayed greater activity in October than either a month or a year earlier, and although output from furniture fac-tories declined counter to trend for the period, incoming business fiell off less than seasonally and was above the 1928-37 average for October. Employment and payrolls in the durable goods industries showed another sharp gain in October, while in the non-durable goods classification some recession was noted from the preceding month. Non-manufacturing groups increased their employment and payroll volumes in the current period.

groups increased their employment and payroll volumes in the current period. Less favorable trends than prevailed in September were noted during October in the department store and retail shoe trades of the Seventh District, attributable to a considerable extent to mild weather, but business improved in the first half of November. Sales of furniture and house-furnishings fell off during October in accordance with seasonal trend. Al-though a number of wholesale trade groups had heavier sales in October than a month previous, aggregate sales showed some decline from September and were much below those of a year ago.

and were much below those of a year ago. Eighth (St. Louis) District In the Nov. 30 "Business Conditions" of the Federal Reserve Bank of St. Louis, it is stated that "the greater part of statistical series and data generally, bearing on Eighth District business during October and the first three weeks of November, reflects continuance of the upward trends which began last summer." The "Review" also had the following to save to sav:

Production in the principal and many minor industries increased in some-what more than the expected seasonal amount and was accompanied by well defined improvement in employment in a majority of the manufacturing what more than the exp cen

centers. As indicating the increased rate of industrial activity, consumption of electric current by industrial users in the principal cities in October was well sustained, and has moved sharply upwards in November. The general rate of operations in the iron and steel industry showed further improvement, with steel ingot production at mid-November advancing to 51.5% of capac-ity, a new high for the year and the best since October, 1937. Shipments and the melt of pig iron during October also moved up to the highest levels since last fall.

and the met of pig from during occode also inorded up to the ingited stocal since last fall. Lumber production in the district remained practically unchanged from September, and shipments and new orders were still measurably larger than current output. In all fields of the district, production of bituminous coal in October exceeded that of the preceding month, but total tonnage lifted was about 15% below that of a year ago. Stimulated by broader demand, production at zinc mines in the area increased 9% over September. . . . The steady expansion in production of petroleum, noted in each preceding month this year, continued in September. Measured by sales of department stores in the large cities, the volume of retail trade in October was 2.9% greater than in September and 7.5% less than in October 1937; for the first 10 months this year cumulative total was smaller by 7.2% than for the same interval in 1937. Combined sales of all wholesaling and jobbing firms in October fell 7.9% and 1.9%, re-spectively, below those a month and a year earlier and for the 10 months the aggregate was 11.7% smaller than for the same time in 1937. Ninth (Minneapolis) District

Ninth (Minneapolis) District

According to the Minneapolis Federal Reserve Bank, business volume in the Ninth District in October held about even with preceding months. In its "Monthly Review" of Nov. 28, the Bank also had the following to say:

The building and building material industries were well above October last year and country lumber sales were the largest since 1929. Most other indicators showed declines. Farm income decreased but farm product

last year and country innite sates were the infect and response indicators showed declines. Farm income decreased but farm product prices showed little change. The volume of business in October was about the same as in the preceding two months. One-third of our indexes were higher in October than in September after taking the usual seasonal changes into consideration, one-third showed little change, and one-third were lower. Country lumber sales under the influence of mild weather greatly exceeded the volume in any recent year and were the largest for any month since October, 1929. However, the unusually fine weather during the month was also partly responsible for the low level of business in October. Both city and country department store index dropped to 91, the lowest point since last May and the lowest for October since 1935. After remaining unchanged for two months the city department store stocks index dropped two points in October. Lumber sales in board feet at 478 retail yards were nearly one-third larger than in September and were one-fifth larger than in October last year. Iron ore shipments from this district again increased in October and were in figure and were only a little over half as large as in October last year.

The largest rule curves scales in but was only a neutron of a largest rule in State Business failures, both in number and in amount, were much larger in October than in September or in October last year. The number of non-farm real estate foreclosures, however, was one-third smaller in September than in September, 1937.

Tenth (Kansas City) District

The Federal Reserve Bank of Kansas City, in its "Monthly eview" of Nov. 30, stated that "department store sales Review"

showed less than the usual seasonal rise in October, partly because of the exceptionally warm weather. Dollar volume in October, as in the first 10 months of the year, was about 7% less than in the corresponding period of 1937." The Bank further said:

Bank further said: The value of October wholesale sales was only 7% lower than a year ago, as compared with a decrease of 10% for the first 10 months of the year. In addition to drugs, sales of automotive supplies and industrial hardware show recent improvement over last year. Wholesale dollar inventories are 15% under a year ago. . . . Building operations continue the most promising factor in the business situation. Contracts awarded are 23% and lumber sales 28% above a year ago. . . Widespread November rains gave greatly improved the farm situation Dry weather was rapidly developing a critical situation with respect to winter wheat. Generally speaking, wheat is going into the winter in good condition.

condition

Eleventh (Dallas) District From the Dec. 1 "Monthly Business Review" of the Federal Reserve Bank of Dallas, we take the following regarding business conditions in the Eleventh District:

Building activity in the Eleventh District increased sharply from Septem-ber to October, reflecting substantial increases in all classes of construction, and the value of awards exceeded that of a year ago by a wide margin. Production of crude oil rose moderately during the month but remained below that of a year ago what of a year ago.

The persistence of unusually nigh temperatures during the first hair of October resulted in a sharp decline in department store trade and, while cooler weather in the latter part of the month was accompanied by increased buying, total sales for the month showed a counter-to-seasonal decline from the preceding month and were 9.5% under the volume in October last

year. The distribution of merchandise by reporting wholesale firms in the Eleventh District, which had increased substantially in September, declined 9% from September to October. Although four of the eight lines reported small increases over the preceding month, those gains were more than coun-ter-balanced by large declines in other lines. Sales in October this year were 6% smaller than in October last year, but the year-to-year comparison was more favorable in October than in the earlier months of 1938.

Twelfth (San Francisco) District

The Federal Reserve Bank of San Francisco, in its "Busi-ness Conditions Report" of Dec. 1, stated that "output of Twelfth District industries in October remained at about the level of the preceding month." The Bank also had the following to say, in part:

following to say, in part: Factory employment and payrolls were likewise unchanged, after allow-ance for seasonal influences. Residential building became more active, the value of projects initiated during October increasing from the September totals in practically all parts of the district, although some reduction is customary at this time of year. In November, according to preliminary figures, only the usual seasonal decline in building occurred. Railway freight business increased by the full seasonal amount during October. In the field of retail trade, department. apparel, and furniture store sales increased considerably and there was an expansion in sales of new passenger automobiles. Further expansion during November is indicated by avail-able data. able data

able data. Industrial output in the Twelfth District has increased moderatly since last June. Much of the expansion has come in the important lumber in-dustry, in which production has increased 40% more than seasonally since last winter, and in other industries which produce building materials or home furnishings. Employment and payrolls in these industries have also increased. Data on output of many industries which are not closely related to home building are not available, but on the basis of such information as is reported, it appears that aggregate output of those industries has risen but little since last June. Activity at automobile assembly plants has increased considerably in recent weeks, paper and pulp production in the Pacific Northwest is reported to have expanded somewhat from the low levels of the summer months, and gains in copper mining and smelting have taken place during the past two months. taken place during the past two months.

Weekly Report of Lumber Movement, Week Ended Nov. 26, 1938

The lumber industry during the holiday week ended Nov. 26, 1938, stood at 50% of the 1929 weekly average of production and 55% of average 1929 shipments. Production Nov. 26, 1938, stood at 50% of the 1929 weekly average of production and 55% of average 1929 shipments. Production was about 60% of the corresponding holiday week of 1929; shipments, about 69% of that week's shipments; new orders, about 105% of that week's orders, according to reports to the National Lumber Manufacturers. Association from regional associations covering the operations of important softwood and hardwood mills. In the holiday week ended Nov. 26, 1938, reported new business was slightly above the previous full week; production and shipments were below but about the same on a per day basis. New orders were heaviest in five weeks and were 58% above those booked in the corresponding week of 1937, nearly every reporting region showing large gain over last year. New business was 35% above, and shipments were 7% above output in the week ended Nov. 26. Reported production (hardwoods and softwoods) was 11% above the corresponding week of 1937; shipments were 24% above. Softwood production, ship-ments and new orders were, respectively, 14% greater, 24% meeter and 57% greater than in last year's week. Total 1937; shipments were 24% above. Softwood production, ship-ments and new orders were, respectively, 14% greater, 24% greater and 57% greater than in last year's week. Total production reported for the holiday week ended Nov. 26 by 1% fewer mills was 16% below the output (revised figure) of the preceding full week; shipments were 11% below that week's shipments; new orders were 0.2% above the orders of the previous week. The Association further reported: During the week ended Nov. 26, 1938, 550 mills produced 166,238,000 eet of softwoods and hardwoods combined; shipped 178,224,000 feet; pooked orders of 224,813,000 feet. Revised figures for the preceding week were: Mills, 561; production, 198,605,000 feet; shipments, 200,011,000 feet; orders, 224,250,000 feet. All regions but Southern Pine and California Redwood reported new orders above production in the week ended Nov. 26, 1938. All regions except Redwood reported shipments above output. All regions reported orders above those of corresponding week of 1937; all regions reported

shipments above last year, and all except Southern Cypress, Northern Hemlock, Southern Hardwood and Northern Hardwood reported production above the 1937 week.

above the 1937 week. Lumber orders reported for the week ended Nov. 26, 1938, by 459 soft-wood mills totaled 215,134,000 feet, or 36% above the production of the same mills. Shipments as reported for the same week were 168,258,000 feet, or 6% above production. Production was 158,455,000 feet. Reports from 110 hardwood mills give new business as 9,679,000 feet, or 24% above production. Shipments as reported for the same week were 9,966,000 feet, or 28% above production. Production was 7,803,000 feet.

Identical Mill Reports

Identical Mill Reports Last week's production of 445 identical softwood mills was 156,906,000 feet, and a year ago it was 137,970,000 feet; shipments were, respectively, 166,370,000 feet and 134,350,000 feet, and orders received, 213,619,000 feet and 135,833,000 feet. In the case of hardwoods, 90 identical mills reported production last week and a year ago 5,956,000 feet and 8,858,000 feet; shipments, 7,546,000 feet and 6,029,000 feet, and orders, 7,331,000 feet and 4,025,000 feet.

Thirteen Per Cent Increase Noted in Motor Vehicle Shipments

An increase of 78% in motor vehicle shipments was in-dicated for the month of November as compared with October in the preliminary estimate of the industry's opera-tions, according to the figures contained in the December issue of "Automobile Facts," a publication of the Automobile Manufacturers Association.

Canadian Industrial Operations Continued Upward Trend During November Says A. E. Arscott of Canadian Bank of Commerce—Declares New Trade Treaty Has Received Generally Favorable Reception

In his monthly review of business conditions in Canada, issued Dec. 8, A. E. Arscott, General Manager of the Cana-dian Bank of Commerce, Toronto, said that "the uptrend in industrial operations continued during the past month. The advance does not appear to have been as general as in October, for recession was apparent in certain groups which had shown quite rapid progress in the early autumn." Mr. Arscott continued:

Arsout continued: On the other hand, industries which have been handicapped by sluggish markets consequent upon unseasonable weather became busier. The most noticeable improvement was in the automotive trades, the production of which rose markedly, in contrast to the downturn in October, in which month the output of, motor vehicles reached the low point of the current year. The progressive turn in November should be reflected in numerous allied industries, as well as in steel mill activity. The mills had already recorded a slightly increased rate the preceding month, when a wider demand developed from farm implement, machinery and tool manufacturers. Thus, the decline in steel production, which began in March and was of large proportions in the past summer, was reversed.

World Coffee Consumption During Five Months of Crop Year Increased 18.1% Above Same Period Last Year

Consumption of coffee in the United States (as indicated by disappearance) was 1,081,887 bags, or 24% higher for the five months of the coffee crop year, July through Novem-ber 1028, then during the cipilar period of 1027, while in the five months of the coffee crop year, July through Novem-ber, 1938, than during the similar period of 1937, while in Europe deliveries rose by 516,000 bags, or 11.7%, and in other parts of the world the gain was 100,000 bags, or 21.6%. World consumption, therefore, shows an increase of 1,697,887 bags, or 18.1%, the New York Coffee and Sugar Exchange revealed on Dec. 2. The Exchange further reported. More astonishing than the increased disappearance is the swing to Brazilian coffees. During the five months deliveries of Brazilian-grown coffee throughout the world expanded by 2,381,368 bags, or 47.7%, whereas disappearances of all other growths showed a decrease of 683,481 bags, or 15.5%, against the similar period of 1937. In the United States deliveries of Brazilian coffee were 1,372,368 bags, or 43.8%, and elsewhere, up 100,000 bags, or 21.6%. Other growths in the United States were off 290,481 bags, or 14.1%, and off 393,000 bags, or 16.8% in Europe.

Brazilian Coffee Exports During November Fell 23% Below October—However, 11 Months' Total In-creased 47.6% Above Year Ago

The New York Coffee and Sugar Exchange announced on Dec. 1 that exports of coffee from Brazil during November fell 23% behind October's shipments and were the smallest monthly total since November last year—the month in which Brazil announced the partial abandonment of control and a program to regain lost export markets for coffee. Novem-ber, 1938, shipment totaled 1,218,000 bags against 1,598,000 bags in October and 942,000 bags in November, 1937. It was further announced:

The United States during November took 775,000 bags against 861,000 bags the previous month, while exports to Europe totaled but 373,000 bags against 663,000 bags in October. Other destinations made up 70,000 bags against 74,000 bags. The sharp decline in exports to Europe represented, to a large extent, a decline in shipments to Germany to 18,000 bags

against average monthly shipments of about 200,000 bags. Indications that this condition will be remedied shortly are seen in recent advices from Brazil admitting that 200,000 bags of coffee have been sold to Germany with payment in the form of "compensated" marks. Exports from Brazil for the first 11 months of 1938 have totaled 16,187,000 bags against 10,968,000 bags in the corresponding period of 1937, a gain of 5,219,000 bags, or 47.6%.

November Rayon Shipments Totaled 21,000,000 Pounds, Reports "Rayon Organon"—Poundage Figures on Shipments and Inventories Made Available for First Time

The Textile Economics Bureau, Inc., New York, announced The Textile Economics Bureau, Inc., New York, announced on Dec. 9 that for the first time in the history of the rayon industry figures are now available showing actual ship-ments to consumers and stocks on hand at the close of each month in pounds. The figures appear monthly in the "Rayon Organon," published by the Textile Economics Bureau, Inc. November shipments of rayon filament yarn to domestic consumers aggregated 21,000,000 pounds, or substantially more than double the 9,400,000 pounds ship-ments in November, 1937. In noting this, an announcement by the Bureau further said: by the Bureau further said:

by the Bureau further said: Compared with October, however, there was a reduction from the 24,500,000 pounds shipped during that month, which was not surprising, due to the three holidays in November and also the more popular demand for finer denier yarns, which also reduces poundage. Stocks of rayon yarn held by domestic producers amounted to 39,700,000 pounds on Nov. 30 against 35,800,000 pounds on Oct. 31. "It will be realized," states the "Organon," "that with the increasing variety of deniers, filament counts, lusters, and types of rayon yarn offered by producers, these November stocks cannot be called unwieldy. In fact, there still are definite inventory shortages today in some of the more popular yarns." Rayon consumption and stocks on hand at the close of each month

Rayon consumption and stocks on hand at the close of each month given follows:

	Consumption ·	Stocks on Hand
November, 1938	21,000,000 24,500,000 9,400,000	39,700,000 35,800,000 44,500,000

Petroleum and Its Products—Humble Oil Readjusts Price Schedule—Pipe Line Company Summoned Before Texas Commission—Crude Stocks Again Dip—Daily Average Oil Production Off—Illinois Output at New High

The Humble Oil & Refining Co. issued a new price schedule early this week in which the highest posting on gravity schedules is "40 and above," retroactive to Dec. 3. It was pointed out, however, that prices are unchanged except for the elimination of premiums paid based on gravities above 40 degrees. Magnotia Petroleum Co. took similar action.

the eminimation of preinfults plat based of gravitation. 40 degrees. Magnotia Petroleum Co. took similar action. Under the new schedule, top prices by grades are West Central Texas, \$1.03; Gray County, 96 cents; Carson Hutchinson, 91 cents; Tomball, Raccoon Bend (Deep Sand) and Satsuma, \$1.31; Anahuac, Dickinson, \$1.03; Refugio, \$1.28; Mirando, \$1.23. The posted prices for Liberty, Orange and Barbera Hill crudes, formerly listed under Anahuac and Dickinson crude, and for Pettus crude have been discarded. The price of Flour Bluff crude was cut 4 cents a barrel to \$1.23 to eliminate the premium for gravity above 40 in the previous postings. On the same day as the news of the price readjustments, incidentally, Humble Oil & Refining was notified by E. O. Thompson, Chairman of the Texas Railroad Commission, to appear at the Statewide proration hearing on Dec. 12 to show why it would not take ratably from the West Texas-New Mexico and Flour Bluff areas where it has served notice to the Barsndall Oil Co. that its connections will be dropped

New Mexico and Flour Bluff areas where it has served notice to the Barsndall Oil Co. that its connections will be dropped at the start of the new year. "The Railroad Commission is against pipe-line proration and against discrimination in purchases," Mr. Thompson said. "This is required of us by law and it is the very heart of proration. Pipeline proration and selective buying would wreck any proration system." It was also disclosed by the Commission that it had been notified that the low price of refined products, particularly gasoline, made it imperative for the East Texas Refining Co. to shut down its Longview plant. The plant, which has a daily capacity of 10,000 barrels, has been running on a curtailed schedule for several months. months

An Associated Press dispatch from Washington on December 9 reported that the State Department disclosed that this Government was inquiring into a reported barter deal be-tween Mexico and Germany involving about \$25,000,000 of oil taken from expropriated American oil properties in Mexico.

This announcement on the heels of the news from Mexico Ints announcement on the neets of the news from Mexico City of the near-completion of negotiations between the Mexican Government and W. R. Davis, New York oil man, approximately \$17,000,000 of oil during the coming year. It was also reported by well-informed sources that this oil would be exchanged for machinery and other industrial products from Germany, where the oil would reputedly be chipped shipped.

Chronicle 3529 News dispatches from Calgary reported that the new oil deas conservation act has finally been passed after having been amended or the final reading and has been signed by the lieutenant Governor. The amendment provides for the adoption of a broader base of compensation for those operators of wells at present producing at capacity. It also provides for the establishment of a compensation fund from the resale of quotas which may be released to the Conservation Board by any operator who feels that his operations are unprofitable under the proration setup. The official quotas went into the U. S. Bureau of Mines reported in mid-week that stocks of domestic and foreign erude oil held in the United states at the close of the week ended Nov. 26 were off 1,392,000 barrels to 270,563,000 barrels. Domestic stocks showed a decline of 1,293,000 barrels. Domestic stocks showed a decline of 1,293,000 barrels for the period while forign oil inventories were off 99,000 barrels. Current stocks are the lowest in nearly 18 years, and are fast approach-ing a level below which most companies do not wish to slump. The Bureau of Mines, however, believes that stocks of around 20,000 barrels. The total is approximately 22,000 barrels below the estimated daily average market demand or the final month of 1938 as outlined in the united States food on Weenesday. The total is approximately 22,000 barrels below the estimated daily average of 417,550 barrels, California off 17,000 barrels to a daily average of 646,700 partels, and Kansas off 7,650 barrels to a daily average of 646,700 partels, and Kansas off 7,650 barrels to a daily average of 646,700 partels, and Kansas off 7,650 barrels to a daily average of 646,700 partels, and Kansas off 7,650 barrels to a daily average of 646,700 partels, and Kansas off 7,650 barrels to a daily average of 646,700 partels, and Kansas off 7,650 barrels to a daily average of 646,700 partels, and Kansas off 7,650 barrels to a daily average of 646,700 partels, barrels to 260,900 barrels califor

or of refined products produced from such crude oil. Further cooperation among the major oil producing States will be the theme with the idea of a Federal law governing pro-duction distinctly unpopular. Price changes follow:

Dec. 5-The Humble Oil & Refining Co. and the Magnolia Petroleum Co. eliminated premiums of crude oils above 40 gravity in Texas, retroactive to Dec. 3.

REFINED PRODUCTS-REFINERY OPERATIONS SLASHED, DUE TO LOW PRICES-MOTOR FUEL STOCKS SHOW SMALL GAIN-GAS AND FUEL OIL INVENTORIES SLUMP

A slash of 3.3 points in the operating rate of refineries, which brought the total down to 78.9% of capacity, one of the sharpest reductions in months, in the initial week of December was due to the easing price structure for refined petroleum, well informed oil men held. The American Petroleum Institute's report disclosed also that daily average runs of crude oil to stills dropped 120,000 barrels to 3,175,000 harrels barrels.

The contraction in refinery rates also played an important part in influencing the inventory figures on finished and un-finished gasoline. A gain of only 527,000 barrels in stocks of motor fuel, much below the expansion for the comparable period in previous years, lifted total holdings to 69,155,000 barrels. This total is more than 2,000,000 barrels less than the 71,244,000-barrel total reported for the like 1937 date by the American Petroleum Institute. The most heartening statistical development of the week, however, was the decline of 2,017,000 barrels in the record holdings of gas and fuel oils during the week ended Dec. 3, as reported by the American Petroleum Institute. The slump in inventories on rising demand was laid to both increased consumption in the home market due to the cold weather and to the sustained increase in industrial activity. Stocks had been hitting new high levels regularly week-by-week until November when the long uptrend was arrested. Prices of refined products showed a mixed trend. Faced with the usual saasonal contraction of damand, gasoline

Prices of refined products showed a mixed trend. Faced with the usual seasonal contraction of demand, gasoline has been weakening in the wholesale markets at Eastern points. No general price reductions have developed but persistent talk in the markets of price-shading provides an accurate indicator that the market is easing somewhat. On the other hand, prices of gas and fuel oil, bolstered by rising demand and declining stocks, have been stiffening.

Weekly Coal Production Statistics

The current weekly coal statement of the National Bituminous Coal Commission showed that the total production of soft coal in the week ended Nov. 26 is estimated at 7,600,000 net tons. Reflecting time lost at the mines in the universal observance of the Thanksgiving Day holiday, this shows a decrease of 725,000 tons, or 8.7%, from the output in the preceding week. Activity on other days was greater than in the week of Nov. 19, however, and the average daily rate of output shows an increase of 9.5%.

The United States Bureau of Mines in its weekly coal report stated that due to the observance of Thanksgiving report stated that due to the observance of Thanksgiving Day, Nov. 24, the production of anthracite in Pennsylvania for the week ended Nov. 26 dropped to 645,000 tons, a loss of 189,000 tons in comparison with the full-time week of Nov. 19. The average daily output for the five days of the week, amounting to 129,000 tons, was 7% less than that of Nov. 19, and 33% below the rate obtained in the correspond-ing week of 1937.

Daily Average Crude Oil Production During We Ended Dec. 3, 1938, Placed at 3,223,650 Barrels During Week

The American Petroleum Institute estimates that the daily average gross crude oil production for the week ended Dec. 3. 1938, was 3,223,650 barrels. This was a decline of 37,250 barrels from the output of the previous week, and the current week's figure was below the 3,305,800 barrels calculated by the United States Department of the Interior to be the total of the restrictions imposed by the various oilproducing States during December. Daily average production for the four weeks ended Dec. 3, 1938, is estimated at 3,245,900 barrels. The daily average output for the week ended Dec. 4, 1937, totaled 3,387,000 barrels. Further

details, as reported by the Institute, follow: Imports of petroleum for domestic use and receipts in bond at principal United States ports for the week ended Dec. 3 totaled 1,180,000 barrels, a daily average of 168,571 barrels, compared with a da

barlets for the week ended Nov. 20 and 105,075 barlets daily for the four weeks ended Dec. 3.
 Receipts of California oil at Atlantic and Gulf Coast ports for the week ended Dec. 3 totaled 50,000 barrels, a daily average of 7,143 barrels compared with 12,464 barrels daily for the four weeks ended Dec. 3.
 Reports received from refining companies owning 85.6% of the 4,211,000-barrel estimated daily potential refining capacity of the United States indicate that the industry as a whole ran to stills, on a Bureau of Mines basis, 3,175,000 barrels of crude oil daily during the week, and that all companies had in storage at refineries, bulk terminals, in transit and in pipe lines as of the end of the week, 69,155,000 barrels of finished and unfinished gasoline; 32,502,000 barrels of gas and distillate fuel oil, and 119,115,000 barrels of heavy fuel oils.
 Total gasoline production by companies owning 84.6% of the total daily refinery capacity of the country amounted to 9,658,000 barrels.
 The complete report for the week ended Dec. 3, 1938, follows in detail:

Preliminary Estimates of Production of Coal for Month of November, 1938

of November, 1938 According to preliminary estimates made by the United States Bureau of Mines and the National Bituminous Coal Commission, bituminous coal output during the month of November, 1938, amounted to 35,480,000 net tons, compared with 36,428,000 net tons in the corresponding month last year and 35,094,000 tons in October, 1938. Anthracite pro-duction during November, 1938, totaled 3,737,000 net tons, as against 4,439,000 tons a year ago and 4,165,000 tons in October, 1938. The consolidated statement of the two afore-mentioned organizations follows:

	Total for Month (Net Tons)	Number of Working Days	Average per Work- ing Day (Net Tons)	Calendar Year to End of November (Net Tons)
November, 1938 (Prelim.)-				· · .

-Ferrous Metals—Foreign Copper Producers Cut Output to Steady Market—Lead Price Lower Non

"Metal and Mineral Markets," in its issue of Dec. 8, re-ported that the fact that foreign producers of copper partici-pating in the control agreement acted quickly to steady the market abroad by reducing output made a favorable im-pression on the trade. London prices strengthened even before the news became official. Sterling exchange im-proved, which removed some of the pressure that has made buyers here nervous for the last two weeks. In the domestic market the feature pricewise was a reduction in lead of 15 points. Zinc was unchanged. Domestic producers of anti-mony reduced the price ½c. Tin sold in fair volume. A firmer tone prevailed in quicksilver. The publication fur-ther stated: "Metal and Mineral Markets," in its issue of Dec. 8, ther stated:

Copper

The continued unsettlement in the foreign market for copper forced foreign producers to take further action on production quotas. On Dec. 7 it was announced in London that the Cartel will restrict production for the period beginning Dec. 15 and ending Dec. 81 to 105% of the basic tonnages, and on Jan. 1, 1939, output will be established at the rate of

1

100%. This cancels the action taken Nov. 23 to produce copper in the foreign field at 110%. The latest move strengthened prices in London and brought in some good business abroad, sales by the Cartel on Dec. 7 amounting to 5,700 tons. Sales reported abroad on Dec. 7 were closed at prices ranging from 10.175c. to 10.450c., c.i.f. European ports. Japan came into the market here for a good tonnage, which helped matters considerably on this side of the water.

on this side of the water. Buying of copper for domestic account continued quiet, as most con-sumers are well covered. Sales for the week ended Dec. 6 totaled 3,287 tons. Sales for the month of November amounted to only 12,524 tons against 78,288 tons in October. Consumption of copper in this country is holding up well. Domestic deliveries of refined for November should come close to 60,000 tons, according to preliminary estimates, and another reduction in stocks of refined is expected. Mine production at present is a little too high, some operators contend, but output will probably come down over the winter period. Producers continued to quote the market at 11¼cc, Valley. 11%c., Valley.

Lead

Lead Heavy receipts at smelters recently reopened have created an intake problem at a time when sales of lead in the domestic market have been very slow. This is believed to account for the reduction in the price on Dec. 6 from 5c. to 4.85c., New York. Business done during the last week involved 1,060 tons of lead, against less than 1,000 tons in the previous week. Producers believe consumption is continuing at a good rate, but con-sumers are reluctant to buy during inventory time. Some in the industry, however, think buying will improve soon, as December requirements are not more than 65% covered and January only 15%. The domestic quotation was steady on Dec. 7. Effective Dec. 6, the American Smelting & Refining Co. established its settling basis at 4.85c., New York.

Zino

Zino Inquiry for zinc improved during the last week, sales of the common grades amounting to about 1,700 tons, against 450 tons in the week previous. The London market steadied and sterling exchange was higher, which developments exerted a strengthening influence on the domestic market. The November statistics were fairly good, showing a reduction in domestic stocks of 3,850 tons. Deliveries, covering all grades, were actually a little higher than in October, totaling 43,693 tons. Under present conditions, it was said, nothing short of an upturn in prices abroad will help the domestic industry. The price of zinc concentrate in the Tri-State district dropped to the basis of \$29 per ton for jig, a reduction of \$1.50. of \$1.50.

Tin

Tin Business in the domestic tin market was more active during the last week, with a fair volume of sales booked each day. On Dec. 5 the price was firm at 46c. and quotations rose steadily over the remainder of the week, closing Dec. 7 at 46½c. Higher prices in London and an improved feeling in Wall Street encouraged the trade. Tin-plate operations are con-tinuing steady at 85% of capacity. The world's visible supply of tin, including the Eastern and Arnhem carryovers, was 30,598 long tons at the end of November. This compares with 31,539 tons a month previous and 24,389 tons in November last year. World's deliveries of tin amounted to 7,455 tons during November, which compares with 8,200 tons in October and 10,618 tons in Novem-ber, 1937.

 Average prices for calendar week ended Dec. 3 are: Domestic copper f.o.b. refinery, 11.025c.; export copper, 10.08c.; straits tin, 45.950c.; New York lead, 5.017c.; St. Louis lead, 4.867c.; St. Louis lead, 4.867c.; and sliver, 42.750c.

 The above quotations are "M. & M. M.'s" appraisal of the major United States markets, based on sales reported by producers and agencies. They are reduced to the basis of cash, New York or St. Louis lead on sales for both prompt and future delivered; tin quotations are for prompt delivery only.

 In the trade, domestic copper prices are quoted on a delivered basis; that is, delivered states consumers' plants. As delivery charges vary with the destination, the figures shown above are net prices at refineries on the Atlantic seaboard. On foreign business in coopper are leader to net at refineries on the Atlantic seaboard. On foreign business in coopper allers usually name a c.if. price Hamburg, Havre, and Liverpool. The c.if. basis commands a premium of 0.325c. per pound above f.o.b. refinery quotation

November Daily Pig Iron Output Up 14.3%

The "Iron Age" in its issue of Dec. 8 stated production of coke pig iron in November on a daily basis increased 14.3% over that in October, or from 66,203 gross tons a day to 75,666 tons. Output for the month totaled 2,269,983 tons compared with 2,052,284 tons in October. The "Iron Age" further said:

IUITINET SAID: There were 121 furnaces in blast on Dec. 1, operating at the rate of 75,795 tons a day, compared with 115 furnaces on Nov. 1, producing at the rate of 70,690 tons daily. Eight furnaces were put in operation during the month and two were taken off blast. U. S. Steel blew in two furnaces, independents blew in five and took one off blast and merchant producers blew one in and took one unit out of production. Among the furnaces blown in were the following: One Carrie and one Gary, Carnegie-Illinois Steel Corp.; one Cambria and one Sparrows Point,

Financial Chronicle

Dec. 10, 1938

Bethlehem Steel Co.; one Campbell, Youngstown Sheet & Tube Co.; one River and one Betty, Republic Steel Corp., and one Niagara, Tonawanda Iron Corp.

Iron Corp. The two furnaces blown out or banked included the Troy Furnace Corp. unit, and one Bhethlehem furnace of the Bethlehem Steel Co. The number of available furnaces making pig iron has been decreased from 239 to 238 by the dismantling of the Keystone furnace at Reading, Pa.,

of the Reading Iron Co.

Copper Production Outside of United States

The American Bureau of Metal Statistics issues the following accounting of production of copper in the world from ore originating outside of the United States, on smelter basis, in short tons. Estimates for Russia and Japan are conjectural, as precise information is not available. Advices from Moscow indicate that production in the Urals has been increasing. Smelting of some Canadian ore in Japan, apart from domestic production, points to a gain in output for Japan.

a Copper content of ore and matte imported at 95%, including receipts from Cuba admitted duty free. b Imports of blister copper into the United States from Mexico, except that the total for 1937 is the reported production. c Partly esti-mated; includes Finland, Great Britain, Spain, France, Norway, Sweden, Italy, Rumania, and Belcium ex-Katança; copper from Katança matte smelted in Belçium is credited to Africa. d Refined copper. e Comprises Belgian Congo, Rhodesia and Union of South Africa. f Conjectural.

November Steel Output 14.6% Above October

For the fifth consecutive month production of open hearth and Bessemer steel ingots in November was higher than in the preceding month, according to a report released Dec. 7 by the American Iron and Steel Institute.

Dec. 7 by the American Iron and Steel Institute. Output in November totaled 3,572,220 gross tons, an increase of 14.6% over the total of 3,117,934 tons in October, and of 118% over the total of 1,638,277 tons in June. Production last month exceeded the total for November, 1937, by almost 66%. It was the first month this year in which output was larger than in the similar month of 1937. In producing the November tonnage the industry operated at an average of 62.05% of capacity, the highest rate since September, 1937, when the industry averaged 76.30% of capacity. In October, 1938, the rate was 52.45% and in November, 1937, 38.23%. An average of 832,685 gross tons of ingots was produced weekly during November, as against an average output of 703,823 tons per week in October and 502,183 tons per week in November, 1937.

MONTHLY PRODUCTION OF OPEN-HEARTH AND BESSEMER STEEL INGOTS-JANUARY, 1937, TO NOVEMBER, 1938 (Calculations based on reports of companies which in 1937 made 98.26% of the open-hearth and 100% of the Bessemer ingot production)

Note-The percentages of capacity operated are calculated on weekly capacities of 1,341,856 gross tons based on annual capacities as of Dec. 31, 1937, as follows Open-hearth and Bessemer ingots, 69,964,356 gross tons.

Steel First Quarter Prospects Improving—Current Buying Cautious

The "Iron Age" in its issue of Dec. 8 reported that yearend caution in steel buying does not obscure an improved outlook for business in the first quarter. The falling off in orders this month is not drastic, and operations may not decline much. Meanwhile, prospects that will build up mill tonnage early next year continue to accumulate. The "Iron Age" further reported:

Enlarged buying programs in railroad material and equipment, con-struction steel, tin plate, automotive requirements and miscellaneous

struction steel, tin plate, automotive requirements and miscellaneous business are definitely in sight. Railroad requirements, though below normal, are building up. About 50,000 tons of steel will be needed for freight cars now pending, including 2,100 for the Norfolk & Western, a new inquiry for 1,000 gendola cars from the Illinois Central and 400 for the Wheeling & Lake Eric. Rail inquiries, which may appear in larger volume next month, include 25,000 tons for the Chesapeake & Ohio, 13,000 tons for the Norfolk & Western and 5,000 tons for the Nickel Plate.

tons for the Nickel Plate. Construction steel awards are heavier, totaling nearly 41,000 tons of fabricated structural material, more than 11,000 tons of reinforcing bars and 9,200 tons of plates. New structural steel projects for which inquiries have been issued total upward of 43,000 tons, while 16,800 tons is pending

have been issued total upward of 43,000 tons, while 16,800 tons is pending in new reinforcing bar projects. Automobile companies may make new purchases before the end of the month. Last week's assemblies probably would have totaled 100,000 or more had it not been for strikes. Tin plate purchases are expected to develop in large volume shortly after the first of the year, present operations being about 30 to 35%. This week's ingot production is estimated at 60% down a half point from last week. While there have been declines in the Pittsburgh, Cleveland-Lorain, Wheeling-Weirton and Buffalo districts, operations are higher at Chicago. Youngstown and in southern Ohio. Elsewhere they are holding even with last week.

Chicago. Youngstown and in southern Ohio. Elsewhere they are holding even with last week. November output of ingots, at 3,572,220 gross tons, representing an average rate of 62.05% was the largest since September, 1937, and was about 14.6% over that of October. The reaffirmation of steel prices for the first quarter by leading steel companies was generally expected by the trade, although under similar conditions in the past a price advance probably would have been attempted. The only important price change is on black plate, recently quoted at a base price of 3.15c. a lb., Pittsburgh, which has been reduced to 3.05c. for 29 gauge and lighter. New extras, effective Dec. 1, are being pullished. Although wire prices have been reaffirmed for the first quarter, no action has been taken on merchant wire products, which, because of persistent price irregularities, probably will remain on a spot basis for the present. Revision of extras on mails may be delayed until orders and prices are firmer. Several bolt and nut producers have temporarily withdrawn prices on all headed and threaded items with the explanation that quotations are below manu-facturing costs. New prices on a higher level will be out soon. Pig iron prices probably will be reaffirmed this week. The only action announced is by Lake Superior charcoal iron makers, who will continue present prices through the next quarter. Prices on ferro-alloys other than ferromanganese have been reaffirmed.

igitized for FRASER n.//fraser.stlouisfed.org/ Reflecting the year-end business lull, scrap prices have declined 50c. a ton at Chicago, though steel production there is higher than last week, while at Pittsburgh and in the East quotations are steady. The "Iron Age" scrap composite price is 17c. lower at \$14.75; a decline of 25c. from the Nov. 22

With the Lake Superior ore carrying season at an end, the 1938 movement was 19.263,011 gross tons, lowest since 1932.

The American Iron and Steel Institute on Dec. 5 an-nounced that telegraphic reports which it had received indi-cated that the operating rate of steel companies having 98% of the steel capacity of the industry will be 59.9% of capacity for the week beginning Dec. 5, compared with 60.7% one week ago, 61.0% one month ago, and 27.5% one year ago. This represents a decrease of 0.8 points, or 1.3% from the estimate for the week ended Nov. 28, 1938. Weekly in-dicated rates of steel operations since Oct. 25, 1937, follow: 1937- 1938- 1 1938- 1 1938-

"Steel" of Cleveland, in its summary of the iron and steel markets, on Dec. 5 stated:

Activity in steel markets continues to moderate gradually. Consumer pressure for delivery is less urgent, and with seasonal influences commenc-ing to be felt, a tapering in demand and production through the year-end is not unlikely.

ing to be feit, a tapering in demand and production through the year-end is not unlikely. Decision of the industry to extend current prices into next quarter gen-erally was looked for and will tend to stabilize orders and operations. In the absence of price advances the incentive to anticipate forward needs through heavier buying at this time has been removed. Mindful of in-

Current Events and Discussions

The Week with the Federal Reserve Banks

During the week ended Dec. 7 member bank reserve balances increased \$90,000,000. Additions to member bank reserves arose from decreases of \$77,000,000 in Treasury deposits with Federal Reserve banks and \$8,000,000 in Treasury cash and increases of \$55,000,000 in gold stock and \$7,000,000 in Reserve bank credit, offset in part by an increase of \$56,000,000 in money in circulation. Excess reserves of member banks on Dec. 7 were estimated to be approximately \$3,440,000,000, an increase of \$60,000,000 for the week.

for the week. The statement in full for the week ended Dec. 7 will be found on pages 3568 and 3569. Changes in the amount of Reserve bank credit outstanding

and related items were as follows:

1				Increase (+) o	
		x 2.	Dec. 7, 1938	Nov. 30, 1938	Dec. 8, 1937

gitized for FRASER p://fraser.stlouisfed.org/ consumers may be expected to regulate their purchases this

Ventories, consumers may be expected to regulate their particulate their month in line with early requirements. Steel consumption is well sustained. Automobile production is at a new peak since August, 1937; railroad inquiries and orders are slightly heavier, while several large projects involving fabricated plates and shapes have been placed or are pending. Needs of miscellaneous users generally are steady.

The present lull in steel demand as yet is small. Last week's decrease in production of 1 point to 61% brought the total reduction from the second half peak to only 2 points. Since the early-November bulge in operations to a certain extent was the result of heavy forward buying of flat-rolled steel at price concessions, some compensation for this excess is regarded as a natural development. November pig iron production was 10% ahead of October and 14% higher than a year ago, first month so far this year to exceed the corresponding 1937 period. Output for 11 months was off 52% from last year. Still influenced by active retail demand, automobile production last week rose to 98,695 units, against 84,930 the week before, when the holi-day interrupted operations. A year ago output totaled 86,848. General Motors' assemblies last week increased from 40,125 units to 44,505. Chrys-ler was up from 20,840 to 25,270, Ford from 14,000 to 17,856 and all others from 9,965 to 11,070.

Motors' assemblies last week increased from 40,125 units to 44,505. Chrys-ler was up from 20,840 to 25,270, Ford from 14,000 to 17,856 and all others from 9,965 to 11,070. Rail inquiry is headed by 13,000 tons for the Norfolk & Western, while the Chesapeake & Ohio is expected in the market shortly for 25,000 tons. United States Bureau of Reclamation Denver is inquiring for 3,160 tons of rails and 1666 tons of accessories. Bessemer & Lake Erie has ordered 200 freight cars, and city of Baltimore has placed 40 trolley cars. Shipbuilding awards continue to bolster prospective business in heavy steel products. Four cargo boats placed by the maritime commission will take about 16,000 tons of hull steel. Another battleship ordered by the navy involves 11,000 tons of miscellaneous steel, in addition to a heavy tonnage of armor plate. Awards of fabricated structural steel were substantially heavier last week, principally as a result of the placing of the Narrows bridge, Tacoma, Wash., requiring 16,404 tons of shapes, reinforcing bars, cable and piling and a Brooklyn, N. Y., bridge, taking 17,000 tons. Iron and steel export trade increased during October for the second con-secutive month. Shipments of all products, excluding scrap, totaled 201,477 gross tons, against 196,395 tons in September and 336,993 tons in October, 1937. Exports for 10 months this year were 1,786,624 tons, compared with 2,867,340 in 1937 period, when foreign sales were at a record level. record level.

Imports declined from 23,470 tons in September to 20,921 in October and compared with 29,502 tons a year ago. Imports of 194,974 tons the first 10 months of 1938 were off sharply from the 402,431 tons received the year before.

Jear Defore. Lower operations at Pittsburgh and Chicago principally were responsi-ble for the latest dip in steel making. The former slipped 3 points to 47%, while Chicago was down 2 points at 56.5%. Other districts showing de-creases were Cleveland, off 5 points to 72%; Wheeling, off 4 points to 62; Buffalo, off 2 points to 49.

Buffalo, off 2 points to 49. Except for Birmingham, unchanged at 75%, production was higher at other centers. Gains included 3 points in eastern Pennsylvania to 37%, 2 points in New England to 76, 4 points at Youngstown to 65, 5 points at Cincinnati to 75, 2 points at Detroit to 84 and 3 points at St. Louis to 51.5. Scrap is easier in most markets, the composite being down 21 cents to \$14.75, the first drop since the first week of October. Scrap weakness also lowers the iron and steel composite 1 cent to \$36.36, while the finished steel composite is unchanged at \$56.50.

Steel ingot production for the week ended Dec. 5, is placed at 61% of capacity according to the "Wall Street Journal" of Dec. 8. This compares with 61½% in the previous week and 63% two weeks ago. The "Journal" further reported: U. S. Steel is estimated at 56½%, against 58% in the week before and 60½% two weeks ago. Leading independents are credited with 64%. compared with 63½% in the preceding week and 64% two weeks ago. The following table gives a comparison of the percentage of production with the nearest corresponding week of previous years, together with the approximate changes, in points, from the week immediately preceding:

Complete Returns of Member Banks of the Federal Reserve System for the Preceding Week

As explained above, the statements of the New York and Chicago member banks are given out on Thursday, simultaneously with the figures for the Reserve banks themselves and covering the same week, instead of being held until the following Monday, before which time the statistics covering the entire body of reporting member banks in 101 cities cannot be compiled.

In the following will be found the comments of the Board of Governors of the Federal Reserve System respecting the returns of the entire body of reporting member banks of the Federal Reserve System for the week ended with the close of business Nov. 30:

The condition statement of weekly reporting member banks in 101 leading cities shows the following principal changes for the week ended Nov. 30 Increases for the week of \$74,000,000 in reserve balances with Federal Reserve banks, \$97,000,000 in demand deposits—adjusted, and \$28,000,000 in "other securities," and a decrease of \$23,000,000 in United States Gov-

ernment direct obligations. Commercial, industrial and agricultural loans increased \$16,000,000 in New York City and declined \$3,000,000 at all reporting member banks. Loans to brokers and dealers and all other loans each increased \$7,000,000

Loans to brokers and dealers and all other loans each increased \$7,000,000 at all reporting member banks. Holdings of United States Government direct obligations declined \$27,000,000 in New York City and \$23,000,000 at all reporting member banks. Holdings of other securities increased \$28,000,000 in New York City and at all reporting member banks. Demand deposits—adjusted increased \$20,000,000 in New York City, \$17,000,000 in the Cleveland district, \$13,000,000 each in the St. Louis and San Francisco districts, \$12,000,000 in the Boston district, and \$97,000,000 at all reporting member banks. Time deposits increased \$6,000,000 in the New York district and declined \$5,000,000 in the Cleve-land district.

Deposits credited to domestic banks increased \$42,000,000 in New York City and declined \$7,000,000 each in the Philadelphia, Cleveland and Kansas City districts, all reporting member banks showed a net increase of \$13,000,000 for the week. Deposits credited to foreign banks increased \$4,000,000 in New York City. Borrowings of weekly reporting member banks amounted to \$1,000,000 on Nov. 30.

A summary of the principal assets and liabilities of reporting member banks, together with changes for the week and the year ended Nov. 30, 1938, follows:

United States Again Protests to Germany on Anti-Jewish Decree—Asks Exemption of American Na-tionals and Property from Order Banning Jews from Retail Trade After 1938

Acting Secretary of State Sumner Welles revealed in a press conference on Dec. 7 that the American Embassy in Berlin had again made representations to the German Government regarding anti-Semitic decrees. The latest United States protest, according to the State Department, was in connection with the Reich decree of Dec. 5, ordering Jews in Germany to abandon retail trade by the end of this year. Mr. Welles said that the American Embassy, in accordance with standing instructions, had insisted on protection and exemption of American nationals and property from the terms of the order. In Associated Press advices of Dec. 7

from Berlin it was stated: The American Embassy was understood today to have sent a detailed report to the State Department expressing belief that the anti-Jewish property decrees announced on Monday [Dec. 5] by Economics Minister Walter Funk may affect American property rights. The Embassy was said to have asked Washington for instructions. Since publication of the Funk decrees American officials have been trying to obtain an official German interpretation of them. Herr Funk's decrees made certain sections of the law—forbidding Jews to acquire, pawn or sell precious metals and jewels without official permits and requiring them to deposit all securities in banks—applicable specifically to German and Stateless Jews. But American officials found no such distinction in the sections for-bidding Jews to acquire real estate and empowering German officials to compel Jews to liquidate or sell their real estate and industrial enter-prises. Therefore, it was believed that American Jews owning property in Germany might be affected. It was understood that the British Embassy had called attention of the German Foreign Office to London's apprehensions lest British interests be involved. Meanwhile Das Schwarze Korps, organ of the S. S. (Elite Guarde')

Involved. Meanwhile Das Schwarze Korps, organ of the S. S. (Elite Guards), demanded revision of the Nuremberg racial laws of 1935, so as to make women as well as men liable.

A previous American note to Germany dealing with anti-Jewish decrees was referred to in the "Chronicle" of Nov. 26, page 3235.

France and Germany Sign Peace Pact at Paris— Renounce War as Means of Settling Differences— Reich Recognizes Present French Boundries, but Makes no Mention of Colonies

Makes no Mention of Colonies A pact renouncing war as a means of settling differences between France and Ge many was signed in Paris on Dec.6 by Joachim von Ribbentrop, German Foreign Minister, and George Bonnet, French Minister of Foreign Affairs. The agreement also, on the part of Germany, recognizes present boundaries of the French Republic, although it makes no mention of colonial possessions. It follows the anti-war accord signed at Munich, and the peace-pact of Munich, both of which were reported in the "Chronicle" of Oct. 1 (pages 2014 and 2015). An unofficial translation of the Paris treaty, as furnished in a wireless message to the New York "Times," under date of Dec. 6 follows: M. Georges Bonnet, Minister of Foreign Affairs of the French Republic.

M. Georges Bonnet, Minister of Foreign Affairs of the French Republic, and M. Joachim von Ribbentrop, Minister of Foreign Affairs for the German Reich, Acting in the name and on behalf of their governments have agreed as follows during their meeting in Paris, Dec. 6, 1938:

I

The French Government and the German Government share fully the conviction that pacific and good neighborly relations between France and Germany constitute one of the essential elements in the consolidation of the situation in Europe and the maintenance of general peace. The two govern-ments will in consequence use their best endeavor to assure the develop-ment of relations between their two countries in this direction.

II The two governments take note that between their countries no question of a territorial order remains in suspense and they solemnly recognize as definitive the frontier between their two countries as it is at present established.

III . The two governments are resolved, under the reservation of their special relations with third party powers, to remain in contact on all questions interesting their two countries and to consult together mutually in the event that any ulterior evolution of these questions might risk leading to international difficulties.

In faith whereof the representatives of the two governments have signed the present declaration, which enters into effect immediately.

United Press Paris advices of Dec. 6, in summarizing the signing of the treaty said in part:

Signing of the treaty said in part: Guarded by thousands of mobile guards in shiny helmets who surrounded him wherever he turned, Chancellor Adolf Hitler's "traveling salesman" was spirited into Paris in a roundabout manner that brought his train into the rarely used Invalides station to thwart any hostile Lefist demonstrations. From then on, through the signing of the "no-more-war" pact by Rib-bentrop and French Foreign Minister Georges Bonnet in the historic clock-room of the Quai D'Orsay at 3:28 p. m., every precaution was taken to guard the Nazi leader.

Mr. Ribbentrop, in a private discussion with Mr. Bonnet and Premier Edouard Daladier after the pompous ceremony of the pact signing, was understood to have expressed Berlin's reluctance to intervene between France and Italy and silence the Fascist clamoring for French-held Corsicia, Tunisia and Nice.

After a State dinner tonight, Mr. Bonnet held further conversations with Mr. Ribbentrop and it was learned he was informed that although the Berlin-Rome axis is as strong as ever the German Government does not support Italian aspirations regarding Tunisia and Corsica and had no part in the Fascist clamor for the French-held territories.

The pact, signed on the spot where the Briand-Kellogg anti-war treaty was initialled a decade ago, provides:
1. France and Germany will live as good neighbors, forever settling the dispute over Alsace-Lorraine, as an example to the rest of Europe.
2. Neither nation has any territorial claims against the other.
3. They will use consultation instead of guns to settle any disputes in the future.

the future.

The future. For the time-being the accord will remain within the framework of the Munich four-power pact that dismembered Czechosolovakia. It is pat-terned after the Anglo-German anti-war declaration of Sept. 30, but both Mr. Ribbentrop and Mr. Bonnet indicated that they hope soon to widen its scope to include more general political and economic problems. The pact contains no time limit and is to remain in force indefinitely. Mr. Ribbentrop and Mr. Bonnet in a joint statement this evening said that they had examined both economic and political problems troubling Europe, including a determination that Franco-German relations shall con-tinue "on the basis of mutual recognition of frontiers." "The Paris visit of the Foreign Minister of the Reich on Dec. 6 furnished the occasion for a broad Franco-German exchange of views," the com-munique said.

munique said.

munique said. "In the course of the conversations of M. Bonnet and Herr Ribbentrop the principal European problems were examined, particularly those con-cerning the political and economic relations of France and Germany. "It was recognized on both sides that the development of relations be-tween both countries on the basis of formal recognition of their frontiers would serve not only their common interests, but would constitute an essential contribution to the maintenance of peace. "It is in this spirit that the foreign ministers of the two countries signed the declaration which, while reserving the separatate relations of the two governments with third powers, expresses the will for peaceful cooperation in mutual respect and thus marks an important step on the road to general appeasement."

appeasement." Thus France, while recognizing the strength of the Rome-Berlin axis, won from Germany acknowledgment of the continued operation of her military alliance with Soviet Russia.

Rising Trend in Canada's Commercial Loans Noted by President Gordon at Bank of Montreal's Annual Meeting—Doclares Tri-Partite Trade Treaties Will Affect Every Industrial and Commercial Enter-prise in Canada—G. W. Spinney Urges "Pay As You Go" Principle for Government and Municipalities Anc prise in You Municipalities

The rising trend of commercial loans in Canada, the wide-spread influence upon its industrial and commercial enter-prises expected from the tri-partite trade treaties and pros-pective stimulation of Canadian manufacturing industries by British armament orders were brought to the attention of Bank of Montreal stockholders at their 121st annual meeting on Dec. 5 by Sir Charles Gordon, President, and G. W. Spinney, Joint General Manager. Although it has been a year of great uncertainty in respect to the immediate future, and a year consequently of some hestitancy in business, Sir Charles said that the volume of the bank's commercial loans had shown a measurable in-crease. Standing at \$178,700,000, the bank's current ioans and discounts in Canada show an increase of \$27,800,000 over last year and \$47,900,000 over two years ago. Sir Charles' further remarks were summarized as follows: Reviewing the trade treaties just signed by the representatives of the The rising trend of commercial loans in Canada, the wide

over last year and \$47,900,000 over two years ago. Sir Charles' further remarks were summarized as follows: Reviewing the trade treaties just signed by the representatives of the United Kingdom, the United States and Canada, Sir Charles declared that they provide the most dramatic demonstration yet given of Canada's position as the natural liaison between Great Britain and the United States. These treaties, he said, will affect in more or less degree every industrial and commercial enterprise in the Dominion. "Without Canada's coopera-tion," he added, "the agreement making for closer commercial cooperation between the two largest English speaking nations, so important at this functure in world affairs, would not have been possible. Canada has given that cooperation, not without sacrifices and not without some misgivings as to what these sacrifices may portend. Partly as compensation for giving way to American producers in the British market and partly as com-pensation for a lowering of our tariffs all along the line in favor of American manufactures. Canada has received advantages in the American market for a wide variety of the products of the farm, the forst, the fisheries and the mines. Primary producers in every province have long desired this freer access to the great market to the South, and we all hope that the advantages which it offers to them will result in such a general increase in the purchasing power of the nation as to offset the added competition which many manufacturing industries. Sir Charles informed the bank's stockholders, is the prospect of the country contributing to the armament requirements of Great Britain. Contracts already have been negotiated, he reported, and it is hoped that additional business will follow. Although the recurrent crises in Europe, the situation in the Orient and the depression in the United States have all combined to give a setback to Canada's export trade, Sir Charles reported that business throughout the Dominion during the past year hal been satisfactory. Mo

improvement in railway traffic. In his address as Joint General Manager, G. W. Spinney pointed out that, as custodians of savings, banks and large investment companies were seriously concerned about the constant upward trend of Government and municipal debts. While admitting that deficit financing in certain cases during depression years was unavoidable, he said that if public credit was to be preserved it was clear that the "pay as you go" principle should be reestablished as quickly as possible and appropriate measures taken to pay off the debts already incurred. incurred.

Comparative Figures of Condition of Canadian Banks

In the following we compare the condition of the Canadian banks for Oct. 31, 1938, with the figures for Sept. 30, 1938, and Oct. 30, 1937:

Member Trading on New York Stock and New York Curb Exchanges—Figures for Weeks Ended Nov. 12 and Nov. 19

Trading in stocks on the New York Stock Exchange by members, except odd-lot dealers, for their own account, amounted to 3,524,098 shares during the week ended Nov. 19, it was announced by the Securities and Exchange Com-mission yesterday (Dec. 9), which amount was 20.72% of total transactions on the Exchange of 8,502,210 shares. During the previous week end. d Nov. 12 (as announced by the SEC on Dec. 2) round-lot purchases and sales of stocks for the account of the members, except odd-lot dealers, totaled 3,339,410 shares; this amount was 18.69% of total transactions for the week of 8,928,690 shares. The week ended Nov. 12 included on'y four trading days, the Ex-changes having been closed on Nov. 8, Election Day, and on Nov. 11, Armistice Day. The Commission also promulgated figures showing the relation of trading by members of the New York Curb Exchange for their own account to total transactions on the Exchange. During the week ended Nov. 19 the member trading was 588,230 shares, or 20.82% of total transactions of 1,412,350 shares, while in the preceding week (Nov. 12) the Curb members traded in stocks for their own account in amount of 451,190 shares. The data issued by the SEC is in the series of current fig-ures being published weekly, in accordance with its program embodied in its report to Congress in June, 1936, on the "Feasibility and Advisability of the Complete Segregation of the Functions of Broker and Dealer." The figures for the week ended Nov. 5 were given in our issue of Dec. 3, page 3381. The data published are based upon weekly reports filed members, except odd-lot dealers, for their own account, amounted to 3,524,098 shares during the week ended Nov. 19,

3381.

The data published are based upon weekly reports filed with the New York Stock Exchange and the New York

Curb Exchange by their respective members. These reports are classified as follow::

5 ⁶		Nov. 12- New York Curb Exchange	New York Stock	
Total number of reports received	1,081	825	1,083	82-
1. Reports showing transactions as specialists	. 211	105	210	105
2. Reports showing other trans- actions initiated on the floor	. 304	68	297	75
 Reports showing other trans- actions initiated off the floor. 		117	342	124
4. Reports showing no transactions	423	558	439	584

■ Note—On the New York Curb Exchange the round-lot transactions of specialists in stocks in which they are registered are not strictly comparable with data similarly designated for the New York Stock Exchange, since specialists on the New York Curb Exchange perform the functions of the New York Stock Exchange odd-lot dealer as well as those of the specialist.

The number of reports in the various classifications may total more than the number of reports received because, at times, a single report may carry entries in more than one classification.

The following data made available by the SEC shows the proportion of trading on the New York Stock and New York Curb Exchanges done by members for their own account during the weeks ended Nov. 12 and Nov. 19:

In calculating these percentages the total of members' transactions is compared with twice the total round-lot volume on the Exchange for the reason that the total of members' trading transactions includes both purchases and sales, while the Exchange volume includes only sales.

Regulations Introduced for Earmarking Gold in South Africa

The South African Reserve Bank has introduced regula-The South African Reserve Bank has introduced regula-tions under which gold buyers and hoarders may buy South African gold and maintain it to their credit in South Africa. The gold must, however, be purchased in the London market at the London price, with sterling, according to a report to the United States Department of Commerce from the office of the American Commercial Attache at Johannesburg, which further said. further said:

Gold earmarked in South Africa on private account may be shipped to any destination on demand or debited with any difference, lower or higher,

between the costs of railage, ocean freight, and insurance from Capetown to London and from Capetown to another destination, the report stated. Direct shipment to New York, for example, will now be possible should an American purchaser desire to import directly from South Africa gold earmarked there to his account. Any substantial gold exported directly from Capetown to New York, of course, have a desirable effect in making more apparent to South Africans the true destination of the greater part of its gold production, which provides the basis of the country's prosperity and purchasing power, according to the report.

Odd-Lot Trading on New York Stock Exchange During Week Ended Dec. 3

Week Ended Dec. 3 The Securities and Exchange Commission on Dec. 8 made public a summary for the week ended Dec. 3, 1938, of the corrected figures on odd-lot stock transactions of odd-lot dealers and specialists on the New York Stock Exchange, continuing a series of current figures being published weekly by the Commission. The figures for the weeks ended Nov. 19 and Nov. 26 were given in our issue of Dec. 3, page 3382. The data published are based upon reports filed with the Commission by odd-lot dealers and specialists.

Odd-Lot Dealers of New York Curb Exchange Revise Policy on Limited Orders

The odd-lot dealers of the New York Curb Exchange have informed the Committee of Arrangements that on and after Dec. 15, 1938, they will trade odd-lot limited orders selling through their limit on the following basis:

If the effective round lot sale in a stock is more than one-half point away from the limit, an odd lot order to sell will be filled at a price one-half point less than the effective sale and if to buy, at a price one-half point more than the effective sale.

Examples

Examples (1) An order is entered to purchase 10 shares at 25 and is in the hands of the odd lot dealer. Round lot sales occur at 25 and then at 24. The order is executed at $24\frac{1}{5}$. Under the old method the price would be 25. (2) An order is entered to sell 10 shares at 25 and is in the hands of the odd lot dealer. Round lot sales occur at $24\frac{1}{5}$ and then at 26. The order is executed at $25\frac{1}{5}$. Under the old method the price would be 25. An odd lot dealer may charge in excess of one-half point only after receiv-ing the approval of a member of the Committee of Arrangements. In applying the above policy, members' attention is called to the fact that the same refers to transactions on a single day only and does not cover a period of time.

a period of time.

Examples

(1) An open order is entered on Dec. 2 to purchase 10 shares at 25. The low sale on Dec. 2 is 25½. The stock opens on Dec. 3 at 24. The 10 shares are purchased, based on such price, plus the odd lot differential.
 (2) An open order is entered on Dec. 2 to sell 10 shares at 25. The high sale on Dec. 2 is 24½. On Dec. 3 the stock opens at 26½. The 10 shares are sold based on such price, less the odd lot differential.

Short Interest on New York Stock Exchange Decreased **During November**

The total short interest existing as of the close of business The total short interest existing as of the close of business on the Nov. 29 settlement date, as compiled from infor-mation obtained by the New York Stock Exchange from its members, was 587,314 shares, compared with 669,530 shares on Oct. 28, it was announced Dec. 8. Of the 1,244 individual stock issues listed on the Exchange on Nov. 29, there were 33 issues in which a total short interest of more than 5,000 shares existed, or in which a change in the short position of more than 2,000 shares occurred during the month, the Exchange's announcement said. The total number of issues in which a short interest was reported as of Nov. 29, 1938 was 483, compared with 474 on Oct. 28. In the following tabulation is shown the short interest

In the following tabulation is shown the short interest existing at the opening of the last business day of each month since Nov. 30, 1936:

Representatives of Four Exchanges Meet with Officials of New York Stock Exchange in Discussion of of New York S Listing Program

At the invitation of William McC. Martin Jr., President of the New York Stock Exchange, representatives of the Philadelphia Stock Exchange, the Detroit Stock Exchange, the Cleveland Stock Exchange and the Washington Stock Exchange met in New York on Dec. 8 to discuss the recently issued report of a Sub-committee of the Committee on Stock List relating to listing requirements List relating to listing requirements.

Those present were:

Philadelphia Stock Exchange—Howard Butcher Jr., President, and Howard H. Yocum, Counsel. Detroit Stock Exchange—George A. Miller, President, and Clark C. Wickey, Executive Vice-President. Cleveland Stock Exchange—Percy W. Brown, Acting President, and Cecil B. Whitcomb, Secretary. Washington Stock Exchange—James M. Johnston, President.

Washington Stock Exchange—James M. Jonnston, President. The New York Exchange—James M. Jonnston, President. President, Edward E. Bartlett Jr., Chairman of the Board; John M. Hancock, Chairman of the Committee on Stock List; H. Allen Wardle, Chairman of the Sub-committee, which prepared the report on listing requirements, and John Haskell, Director of the Department of Stock List. The announcement by the Stock Exchange also says:

announcement by the Stock Exchange also says: Mr. Martin welcomed the visiting group and explained briefly the objec-tives of the New York Exchange in the new listing program which has been adopted by the Board of Governors upon the recommendation of the Committee on Stock List. Mr. Hancock outlined the program in some detail, emphasizing the mutuality of interestamong the Exchanges in this program. The New York Exchange, Mr. Hancock explained, invites to its list the securities of soundly-managed, seasoned companies in which there is a national interest. The securities of local companies, he pointed out, should properly be listed upon the various local Exchanges. Details which were raised in connection with the listing program of the New York Exchange were freely discussed in the interest of a complete un-derstanding. The obvious advantages to the public which listing on organized Exchanges affords formed the basis for much of the discussion. Representatives of other Exchanges will confer with officials of the New York Exchange over the next few weeks. The adoption of the Sub-committee's report was reported

The adoption of the Sub-committee's report was reported in these columns of Nov. 26, page 3236.

Monthly Report of Market Value of Securities Listed on New York Curb Exchange—Value of Stocks on Nov. 30, \$10,616,552,633, Against \$10,857,743,581 on Oct. 31—Total Value of Bonds Also Declined

Oct. 31—Total Value of Bonds Also Declined The New York Curb Exchange on Dec. 2 announced that all stocks on the Exchange at Nov. 30, 1938, had an ag-gregate market value of \$10,616,552,633, as against \$10,-857,743,581 aggregate market value at Oct. 31, 1938. The average price of each share was \$15.26, compared with \$15.60 at the end of the preceding month. The total market value of all bonds was \$3,999,678,652, equal to \$84.76 per \$100 par value, as against \$4,064,875,631 total market value and

\$85.23 per \$100 par value of bonds at Oct. 31, 1938. Re-garding its monthly tabulation, the Exchange's announcement said:

Ment Said: The Exchange also released the usual monthly tabulation showing by classification number of issues on the Exchange, the amount of the se-curities outstanding, and the total market value thereof as of Nov. 30, 1938. For comparative purposes, the table indicates the monthly totals of all stocks and bonds and the aggregate monthly market value thereof beginning with January, 1938.

The tabulation released by the New York Curb Exchange on Dec. 2 follows:

New York Curb Exchange Short Interest on Nov. 30 Totaled 17,981 Shares Compared with 20,714 Shares on Oct. 31

on Oct. 31 The total short position in stocks dealt in on the New York Curb Exchange for the month of November, reported as of Nov. 30, amounted to 17,981 shares, compared with 20,714 shares on Oct. 31, the Exchange announced on Dec. 8. Creole Petroleum Corp. capital stock had the heaviest short interest with a total of 1,869 shares, an increase of 1,123 from the previous month. Seversky Aircraft Corp. capital stock was next with 1,679 shares contrasted with 798 the previous month. The Fisk Rubber Corp. common stock was the only other issue in which a short interest of more than one thousand shares existed; its total being 1,200 shares. shares.

National City Bank of New York Finds Business Sentiment Strengthened—Limit of Rise Far from Reached if Capital Goods Industries Can Be Brought into Circle

Referring to the month of November as having been Referring to the month of November as having been "another period of rising production and employment, with the gains again proving greater than most people expected," the National City Bank of New York, in its December "Monthly Letter," finds "business sentiment strengthened as the rise has proceeded," but it adds "no one would say that the doubts as to the extent and duration of the recovery have been wholly thrown off, or that the way is clear for a sharp revival of new enterprise." In part, the bank goes on to say: on to say:

On to Say: The chief need now, if business is to keep moving ahead, is improve-ment in the industries which thus far have been backward, and this is precisely where the outlook is uncertain and opinions divided. There is no limit to the business that can be carried on in this country, short of the limit imposed by productive capacity, if all the industries are going along together and supporting each other. But obviously depression in any one reduces the market for all. The automobile industry is making a strong showing this fall, but not as strong as it would if the railways, the machinery and heavy equipment manufacturers, factory and com-mercial building, foreign trade, and the other relatively depressed occupa-tions were giving more employment to people who undoubtedly would like to buy automobiles. The textile and apparel industries are doing better than at this time last year, but of course the unemployment in the

areas mentioned limits the ability to buy clothing, except as derived from

areas mentioned limits the ability to buy clothing, except as derived from relief payments. The essence of the situation is that automobiles, apparel, household equipment, and consumer goods industries and services generally are in a circle where each is providing better business for the others; residential building and public works have joined in the improvement; and all these together are giving support to the producers of steel and other metals. If the capital goods industries can be brought into the circle, the limit of the rise is far from reached. Conversely, it is recognized that a flatten-ing out will be inevitable unless they are included.

Further Changes Made in New York Stock Exchange Ticker Symbols

The New York Stock Exchange made known on Dec. 1 the fifth group of changes in stock ticker symbols under its recently announced plans to improve the ticker service by shortening the symbols of the most active stocks to two letters and assigning new three-letter symbols to less active issues. The fourth group of changes, which became effective Dec. 5 were reported in these columns of Dec. 3, page 3382. The stock exchange to become effective Dec. 12 follow:

"Pay as You Go" Should Be National Policy, According to J. Stewart Baker, of Bank of Manhattan Co.---In Annual Report to Stockholders Says Net Operat-ing Earnings of Bank for Year Will approximate \$2,375,000---Special Dividend of 10 Cents a Share to Be Paid in Last Quarter

to Be Paid in Last Quarter In noting that "there are a number of very serious matters awaiting solution which are bound to have their effect on business conditions," J. Stewart Baker, Chairman of the Board of Directors of the Bank of the Manhattan Co. of New York, said, in his annual report to the stockholders Dec. 6, that "to my mind the most important is the problem of balancing our national budget, which in simple language, means that our Government does not spend more than it receives. Our budget should be balanced," he said, "by reducing expenses to a minimum and increasing taxation reducing expenses to a minimum and increasing taxation sufficiently to cover this minimum." In part, he added:

sufficiently to cover this minimum." In part, he added: The necessary reduction can and should be achieved by the elimination of waste, duplication and unnecessary governmental activity, the simplifica-tion of bureaus and agencies, and a general reduction in the number of people on our Government's payroll. If this is to be done business must be en-couraged to undertake certain of the activities now carried on by the Government. Not only would this reduce its expenses but it would make it unnecessary for the Government to borrow on such a large scale. To finance these undertakings business would make use of the vast credit facilities that are available. Thus, private loans would gradually take the place of Government obligations in the portfolios of the banks—a healthy change both for the banks and the Government.

In conclusion, Mr. Baker said " 'pay as you go' should be our national policy!"

In referring to the bank's affairs, Mr. Baker stated, in part:

In referring to the bank's affairs, Mr. Baker stated, in part: A year ago I told you that the future earnings of your company would depend on two things: First, the general level of interest rates and, second, the volume of loans. In April the Secretary of the Treasury "desterilized" gold with a value of \$1,392,000,000, thus putting this amount of money into the credit structure: At the same time the Federal Reserve Boad announced a reduction in reserve requirements for members of the Federal Reserve System. This released about \$750,000,000 to the banks for loans and investments. The President accompanied these moves by a statement that he would ask for additional large appropriations to be spent or loaned for public works. Immediately the general level of interest rates declined and the demand for loans decreased. It was evident that for the quarter ending June 30 the net operating earnings of your company, not including profits realized on the sale of securities, would not be sufficient to cover the quarterly dividend of 37½ cents per share which it has been paying. Accordingly, your directors after considering the probable effect of these actions of our Government on the earnings of your company, decided it would be wise and in the best interests of your company to. fix the quarterly dividend at 20 cents per share. They believed that a dividend of this amount could be maintained under current business conditions and in spite of low interest rates and the small demand for commercial loans. Barring a general decline in business or some unforeseen governmental action which would adversely affect banks, it is my opinion that your company can continue to pay this amount as a regular quarterly dividend and add something to the special dividend based on the results attained. In accordance with this plan and in keeping with the past policy of paying out to stockholders in dividends as large an amount of the carings as is consistent with sound management, they intend to declare in addition to the regular dividend of

a dividend will be declared at the end of every year, for this will depend on the results of each year's operations. The average rate of return on loans and securities in the year 1937 was 2.48%. The average rate for the first 11 months of this year was 2.21% or a decline of more than $\frac{14}{3}$ of 1%. This decline in rate and the decrease in the demand for loans by our customers have reduced considerably our income from interest.

Income from interest. Based on the earnings for the first nine months and on estimated earnings for the last three months, net operating earnings for this year, not including profits on the sale of securities, will approximate \$2,375,000. This com-

pares with \$2,961,000 for 1937. Profits realized on securities sold have amounted to \$1,623,000. Recoveries on items previously charged off and reserves previously set up which are no longer required are estimated at \$724,000 for the year.

\$724,000 for the year. By the end of the year if the plan for the dividends as outlined is carried out \$2,150,000 will have been declared in dividends and we estimate that \$310,000 will have been added to undivided profits, \$307,000 used to write down other securities, \$740,000 to charge off or reduce the book value of miscelaneous items, and \$1,215,000 to set up reserves against our holdings of United States Government obligations. With such a large amount of Government securities it has seemed wise to use the profits arising from sales as reserve against our portfolio. This policy is being pursued at the present time. Therefore, if any further profits on Government securities are realized before the end of the year, they will be added to these reserves.

In part, Mr. Baker also said:

In part, Mr. Baker^calso said: I know you would like me to say something about the outlook for your company during the coming year. When one had only the economic and financial situations here and abroad to consider in forecasting business conditions, the task was difficult enough, but now, when one also must consider the disturbed foreign situation and the possible actions of Govern-ment bureaus and agencies with their vast regulatory powers and with their control of the money market and of the spending of immense sums, it is impossible to express an opinion with any degree of confidence. To the business man or investor, large or small, there is nothing so dis-concerting as the possibility of having the laws and regulations under which he is operating so changed that, through no fault of his or error of judgment, his transactions prove unprofitable. Recently there has been some indica-tion that the people of this country would like to see business man relieved of this uncertainty. Already it has had its effect on the business man and if he sees further signs that he is not to be exposed to more experimenta-tion, it is my belief his business activity will increase. If it does, your company will benefit accordingly.

Tenders of \$354,169,000 Received to Offering of \$100,-000,000 of 91-Day Treasury Bills Dated Dec. 7-\$100,983,000 Accepted at Average Rate of 0.017%

A total of \$354,169,000 was tendered to the offering of \$100,000,000, or thereabouts, of 91-day Treasury bills dated

\$100,000,000, or thereabouts, of 91-day Treasury bills dated Dec. 7, 1938, and maturing March 8, 1939, it was announced Dec. 5 by Secretary of the Treasury Henry Morgenthau Jr. Of this amount, Secretary Morgenthau said, \$100,983,000 was accepted at an average rate of 0.017%. The tenders to the offering of Treasury bills were received at the Federal Reserve banks and the branches thereof up to 2 p. m., Eastern Standard Time, Dec. 5. Reference to the offering appeared in our issue of Dec. 3, page 3385. The following regarding the accepted bids to the offering is from Secretary Morgenthau's announcement of Dec. 5: from Secretary Morgenthau's announcement of Dec. 5:

Total applied for. \$354,169,000 Total accepted, \$100.983,000 Range of accepted bids:

High, 100.

New Offering of \$100,000,000, or Thereabouts, of 91-Day Treasury Bills—To Be Dated Dec. 14, 1938

Tenders to a new offering of \$100,000,000, or thereabouts, of 91-day Treasury bills to be received at the Federal Reof 91-day Treasury bills to be received at the Federal Re-serve banks, or the branches thereof, up to 2 p. m., Eastern Standard Time, Dec. 12, were invited on Dec. 8 by Secretary of the Treasury Henry Morgenthau Jr. Tenders will not be received at the Treasury Department, Washington. The bills, which will be sold on a discount basis to the highest bidders, will be dated Dec. 14, 1938, and will mature on March 15, 1939; on the maturity date the face amount of the bills will be payable without interest. There is a maturity of a similar issue of Treasury bills on Dec. 14 in amount of \$100,000,000. The following is from Secretary Morgen-thau's announcement of Dec. 8: They (the bills) will be issued in beaver form only, and in amounts or

They (the bills) will be issued in bearer form only, and in amounts or denominations of \$1,000, \$10,000, \$100,000, \$500,000, and \$1,000,000

denominations of \$1,000, \$10,000, \$10,000, \$10,000, \$100,000,0\$}

on the basis of 100, with not more than three decimal places, e. g., 99.125. Fractions must not be used. Tenders will be accepted without cash deposit from incorporated banks and trust companies and from responsible and recognized dealers in invest-ment securities. Tenders from others must be accompanied by a deposit of 10% of the face amount of Treasury bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated bank or trust company. Immediately after the closing hour for receipt of tenders on Dec. 12, 1938, all tenders received at the Federal Reserve banks or branches thereof up to the closing hour will be opened and public announcement of the ac-ceptable prices will follow as soon as possible thereafter, probably on the following morning. The Secretary of the Treasury expressly reserves the right to reject any or all tenders or parts of tenders, and to allot less than the amount applied for, and his action in any such respect shall be final. Those submitting tenders will be advised of the acceptance or rejection thereof. Payment at the price offered for Treasury bills allotted n.ust be made at the Federal Reserve banks in cash or other immediately available funds on Dec. 14, 1938.

made at the Federal Reserve banks in cash or other immediately available funds on Dec. 14, 1938. The Treasury bills will be exempt, as to principal and interest, and any gain from the sale or other disposition thereof will also be exempt, from all taxation, except estate and inheritance taxes. (Attention is invited to Treasury Decision 4550, ruling that Treasury bills are not exempt from the gift tax.) No loss from the sale or other disposition of the Treasury bills shall be allowed as a deduction, or otherwise recognized, for the purposes of any tax now or hereafter imposed by the United States or any of its posses-sions.

Treasury Department Circular No. 418, as amended, and this notice escribe the terms of the Treasury bils and govern the conditions of their preser issue.

asury Dec. 15 Financing Operation—Offers \$400,-000,000 22-27-Year 234% Bonds and \$300,000,000 Five-Year 11/8% Notes—Offering Also Makes Pro-vision for Exchange of \$941,613,750 Notes Maturing March 15 for Bonds or Notes Offered for Cash or New Nine-Year 2% Bonds—Holders of \$922,000,000 Notes Accept Exchange Offer—No Preferential Allotments—Cash Offering Over-Subscribed he amount sought by the Treasury on the bond offering

The amount sought by the Treasury on the bond offering The amount sought by the Treasury on the bond othering for cash was \$400,000,000 or thereabouts and, on the note offering, \$300,000,000 or thereabouts. On the basis of the announced percentages of subscriptions allotted it appears that the Treasury sold a total of \$401,240,000 bonds and \$301,140,000 notes for cash. The Treasury statement that there would be no preference shown in making allotments read:

No preferred allotments; subscriptions for both issues made on straight percentage basis with adjustment, where necessary, to the nearest \$100 denomination

percentage basis with adjustment, where necessary, to the nearest \$100 denomination The Treasury this week completed its quarterly financing for Dec. 15, having floated an issue of 22-27-year $2\frac{3}{4}\frac{9}{60}$ Treasury bonds of 1960-65 and an issue of five-year $1\frac{1}{8}\frac{9}{60}$ Treasury notes of Series B-1943, offered for cash in amount of \$700,000,000, or thereabouts. At the same time, holders of $1\frac{1}{2}\frac{9}{60}$ Treasury notes of Series C-1939 maturing March 15, 1939, were offered the privilege of exchanging such maturing notes for additional amounts of either the Treasury bonds or the Treasury notes offered for cash subscription, or for a new series of nine-year $2\frac{9}{6}$ Treasury bonds of 1947, the exchange in any case to be made par for par, with an adjustment the Secretary of the Treasury called attention to the fact that Treasury notes of Series C-1939, maturing March 15, 1939, are now outstanding in the amoun' of \$941,613,750, and that the present exchange offering will be the only opportunity afforded the holders of these maturing notes to exchange them for other interest-bearing obligations of the United States. The Treasury bonds were offered for cash in amount of \$300,000,000, or thereabouts, and the notes in amount of \$300,000,000, or thereabouts. The right was reserved by the Secretary of the Treasury to increase the cash offering of bonds or notes by an amount sufficient to accept all subscriptions of maturing notes tendered in exchange. The Treasury made a preliminary announcement on Dec. 2 of the type of securities to be offered in its mid-December \$1,641,613,750 financing, as was noted in our issue of Dec. 3, page 3385.

of the type of securities to be offered in its mid-December \$1,641,613,750 financing, as was noted in our issue of Dec. 3, page 3385. The Treasury Department yesterday (Dec. 9) made a preliminary announcement of the results of its Dec. 15 financing. Of the \$941,613,750 outstanding Treasury notes of Serices C-1939, maturing March 15, 1939, \$922,000,000 accepted the offer of exchange of new securities on a par for par basis. Of the total exchanges, \$695,000,000 was for the nine-year 2% Treasury bonds of 1947, \$188,000,000 for the 22-27-year 234% Treasury notes of Series B-1943. A departure was made in the allotment of cash subscrip-tions, in that no preferential allotments were made; hereto-fore it has been the practice to allot subscriptions of \$1,000 in full. It is said that this privilege has been abused and consequently all subscriptions were allotted on a straight percentage basis. Cash subscriptions to the 22-27-year 234% Treasury bonds of 7% of the amount sought. \$3,346,000,000 was the total of subscriptions to the offering of five-year 11%% Treasury notes of Series B-1943 and allot-ments were made on the basis of 9% of the amount sub-scribed. The cash subscription books were closed at the close of scribed.

scribed. The cash subscription books were closed at the close of business Dec. 5, the day they were offered. The exchange books were closed at the close of business Dec. 7. In each instance subscriptions placed in the mail before midnight on the day of the closing of the books, it was announced by Secretary Morgenthau, "will be considered as having been entered before the close of the subscription books." Secre-tary Morgenthau issued the following announcement on Dec. 5 on the closing of the books:

Dec. 5 on the closing of the books: Secretary of the Treasury Morgenthau announced last night (Dec. 5) that the subscription books for the current offering of 24% Treasury bonds of 1960-65 and of 11% Treasury notes of Series B-1943 closed at the close of business Dec. 5, for the receipt of cash subscriptions. - Cash subscriptions for either issue addressed to a Federal Reserve bank or branch, or to the Treasury Department, and placed in the mail before 12 o'clock midnight, Dec. 5, will be considered as having been entered before the close of the subscription books. The subscription books for both issues, and also for the issue of 2% Treasury bonds of 1947, will close at the close of business Dec. 7, for the receipt of subscriptions in payment of which Treasury notes of Series C-1939, maturing March 15, 1939, are tendered. Exchange subscriptions for any of the three issues addressed to a Federal Reserve bank or branch, or to the Treasury Department, and placed in the mall before 12 o'clock midnight, Dec. 7, will be considered as having been entered before the close of the subscription books. Announcement of the amount of cash subscriptions and the bases of allotment will probably be made on Dec. 9. The details of the offering were made available by Mr.

The details of the offering were made available by Mr. Morgenthau on Dec. 4, for publication on Dec. 5. The bonds and notes, offered for cash at par and accrued interest, and the exchange bonds, offered at par, are dated and bear interest from Dec. 15, 1938; the interest is payable semi-annually on June 15 and Dec. 15. The 234% bonds are due

Dec. 15, 1965, but may be redeemed at the option of the United States on and after Dec. 15, 1960, in whole or in part, at par and accrued interest. The 2% bonds will mature on Dec. 15, 1947, and the $1\frac{1}{8}$ % notes become due Dec. 15, 1943; neither of these issues is subject to call for redemption prior to maturity.

This is the second time the Treasury has borrowed "new money" this year. In the Sept. 15 financing, referred to in This is the second time the Treasury has borrowed "new money" this year. In the Sept. 15 financing, referred to in these columns of Sept. 10, page 1571, the Treasury offered $400,000,000 2\frac{1}{2}\%$ bonds of 1950-52 and $300,000,000 1\frac{1}{6}\%$ notes of Series A-1943; both issues were also offered in ex-change for 4433,460,900 of $1\frac{1}{4}\%$ notes which mature on Dec. 15, 1938. As to this week's offering, Washington advices Dec. 4 to the New York "Times" noted:

In all, the Treasury's current financing involves the issuance of securities in the possible total amount of \$1,641,000,000, of which \$700,000,000 would be "new money" and some \$941,000,000 in exchange issues. The "new money" issues would push the national debt over the \$39,000,000,000 for the first time.

Details of the new bonds and notes offered this week are contained in the following official Treasury Department circulars:

UNITED STATES OF AMERICA

234% TREASURY BONDS OF 1960-65 Dated and bearing interest from Dec. 15, 1938 Due Dec. 15, 1965

Due Dec. 15, 1965 Redeemable at the option of the United States at par and accrued interest on and after Dec. 15, 1960 Interest payable June 15 and Dec. 15 1938—Department Circular No. 598—Public Debt Service

TREASURY DEPARTMENT Office of the Secretary Washington, Dec. 5, 1938

1 Offering of Bonds I Offering of Bonds 1. The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, approved Sept. 24, 1917, as amended, invites subscriptions, at par and accrued interest, from the people of the United States for 2¼% bonds of the United States, designated Treasury bonds of 1960-65. The amount of the offering is \$400,000,000, or thereabouts, with the right reserved to the Secretary of the Treasury to increase the offering by an amount sufficient to accept all subscriptions for which Treasury notes of Series C-1939, maturing March 15, 1939, are tendered in payment and accented and accepted.

II. Description of Bonds

notes of Series C-1939, maturing March 15, 1939, are tendered in payment and accepted.
II. Description of Bonds
1. The bonds will be dated Dec. 15, 1938, and will bear interest from that date at the rate of 2%% per annum, payable semi-annually on June 15 and Dec. 15 in each year until the principal amount becomes payable. They will mature Dec. 15, 1965, but may be redeemed at the option of the United States on and after Dec. 15, 1960, in whole or in part, at par and accrued interest, on any interest day or days, on four months' notice of redemption given in such manner as the Secretary of the Treasury shall prescribe. In case of partial redemption the bonds to be redeemed will be determined by such method as may be prescribed by the Secretary of the Treasury. From the date of redemption shall cease.
2. The bonds shall be exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) eetate or profits taxes, now or hereafter imposed by the United States, and (b) graduated additional income taxes, commonly known as surtaxes, and excess-profits and war-profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations. The interest on an amount of bonds authority principal of which does not exceed in the aggregate \$5,000, owned by any individual, partnership, association, or corporation, shall be exempt from the taxes provided for in clause (b) above.
3. The bonds will be acceptable to secure deposits of public moneys, but will not beer the circulation privilege and will not be entitled to any privilege of conversion.
4. Bearer bonds with interest coupons attached, and bonds registered as to principal and interest, will be issued in denominations of \$50, \$100, \$50, \$10,000, \$10,000 and \$100,000. Provision will be made for the intercha

III. Subscription and Allotment
1. Subscriptions will be received at the Federal Reserve banks and branches and at the Treasury Department, Washington. Banking institutions generally may submit subscriptions for account of customers, but only the Federal Reserve banks and the Treasury Department are authorized to act as official agencies. Others than banking institutions will not be permitted to enter subscriptions except for their own account. Cash subscriptions from banks and trust companies for their own account will be received without deposit but will be restricted in each case to an amount not exceeding one-half of the combined capital and surplus of the subscriptions from banks and trust companies from all others must be accompanied by payment of 10% of the amount of bonds applied for. The Secretary of the Treasury reserves the right to close the books as to any or all subscriptions or classes of subscriptions at any time without notice.
2. The Secretary of the Treasury reserves the right to reject any subscription, in whole or in part, to allot less than the amount of bonds applied for, to make allotments in full upon applications for larger amounts, or to adopt any or all of said methods or such other methods of allotment and classification of allotments as shall be deemed by him to be in the subject to these reservations, subscriptions in full. Allotment notices will be sent out promptly upon allotment, and the basis of the allotment will be publicly announced.

IV. Payment

1. Payment at par and accrued interest, if any, for bonds allotted on cash subscriptions must be made or completed on or before Dec. 15, 1938, or on later allotment. In every case where payment is not so completed, the payment with application up to 10% of the amount of bonds applied for shall, upon declaration made by the Secretary of the Treasury in his

discretion, be forfeited to the United States. Any qualified depositary will be permitted to make payment by credit for bonds allotted to it for itself and its customers up to any amount for which it shall be qualified in excess of existing deposits, when so notified by the Federal Reserve bank of its district. Treasury notes of Series C-1939, maturing March 15, 1939, with coupon dated March 15, 1939, attached, will be accepted at par in payment for any bonds subscribed for and allotted, and should accompany the subscription. Accrued interest from Sept. 15, 1938, to Dec. 15, 1938, on the maturing notes (\$3.770718 per \$1,000) will be paid following acceptance of the notes.

V. General Provisions

V. General Provisions
1. As fiscal agents of the United States, Federal Reserve banks are authorized and requested to receive subscriptions, to make allotments on the basis and up to the amounts indicated by the Secretary of the Treasury to the Federal Reserve banks of the respective districts, to issue allotment notices, to receive payment for bonds allotted, to make delivery of bonds on full-paid subscriptions allotted, and they may issue interim receipts pending delivery of the definitive bonds.
2. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the offering, which will be communicated promptly to the Federal Reserve banks.

New Income Tax Form Designed to Simplify Returns for 85% of Nation's Business Corporations Ap-proved by Secretary of Treasury Morgenthau

A new four-page corporation income tax form intended, it is stated to provide simplified returns for approximately 85% of the country's business organizations was approved on Nov. 30 by Secretary of the Treasury Morgenthau. With certain minor exceptions, corporations with total receipts of not more than \$250,000 and net income of not more than \$25,000 will be provided with the new Form 1120A. For 1937 business operations, all corporations made their returns

on the six-page Form 1120, it was stated. Carried out under the direction of Guy T. Holvering, Commissioner of Internal Revenue, the development of the new return for smaller corporations was a continuation of the program of simplifica-tion undertaken last year by Secretary Morgenthau and Roswell Magill, former Under Secretary of the Treasury, and inaugurated with improved returns for individual in-come. It was stated in a Treasury Department announce-ment which went on to say: come. It was stated in a ment which went on to say:

Since the second secon

were possible to aid the taxpayers in computing their tax liability as re-quired by law. The forms will be available for release and distribution by the Collectors

The forms will be available for release and distribution by the Collectors of Internal Revenue during the first week in January. The revision of the returns was the work of the Committee on Internal Revenue Forms, whose members are: T. C. Atkeson, J. E. Jenkins, and George Targett of the Income Tax Unit and H. C. Armstrong and W. D. Freyburger of the Office of the Chief Counsel of the Bureau of Internal Revenue.

President Roosevelt Lauds Democratic Processes and Urges Nation to Continue in Liberal Path—In Address at University of North Carolina He Con-tends New Deal Must Pursue Policies

tends New Deal Must Pursue Policies President Roosevelt, addressing the student forum at the University of North Carolina, on Dec. 5, in a speech broad-cast throughout the Nation and to foreign countries, declared that liberalism in government is here to stay, and that birth, wealth or political position no longer carry the right to govern. Although it had been thought that the President in his address would discuss at length the foreign policy of the United States and the question of political refugees, he mentioned these matters only by bare implication when he said that although "there may be those in the world who believe that a regimented people, whose every thought and action is , directed by one man, may give some type of people a security which is pleasing to them. But whatever convictions I have, none is stronger than my abiding belief that the security and well-being of the American people can best be served by the democratic processes." The President stopped at Chapel Hill, N. C., the site of

The President stopped at Chapel Hill, N. C., the site of the University, after completing a fortnight's vacation in Warm Springs, Ga. Following his address he continued to Washington, where he arrived Dec. 6. In his speech at Chapel Hill Mr. Roosevelt repeatedly expressed his faith in democracy and said that the recel

expressed his faith in democracy, and said that the people of the United States could best serve the cause of world of the United States could best serve the cause of world peace by demonstrating the workability of democratic insti-tutions. He said that the results of the November elections did not constitue a crushing blow to the cause of liberalism in this country, and indicated that he intends to carry on the "liberal program" of the New Deal. In some quarters the sense was intermeted as the compiner offert in the the speech was interpreted as the opening effort in the Democratic 1940 campaign.

The President's address follows: The late Justice Cordozo of the Supreme Court wrote a few years ago:

"We live in a world of change. If a body of law were in existence adequate fo the civilization of today, it could not meet the demands of tomorrow. Society is inconstant. So long as it is inconstant... there can be no constancy in law ... Law defines a relation not always between fixed points, but often betwee points of varying position..... There is change whether we will it or not."

Inconstant. Bo long as it is inconstant . . . there can be no constancy in law. . . Law defines a relation not always between fixed points, but often between points of varying position. . . There is change whether we will it or not." It is recognition of this philosophy that has made the University of North Carolina representative of liberal teaching. And it is my recognition of that philisophy that brings me so willingly to Chapel Hill today. It is a far cry from the days of my first visit to the university, nearly a quarter of a century ago. I came then because my old chief—that great North Carolina liberal, Josephus Daniels—told me I should see for myself a great institution of learning which was thinking and acting in terms of today and tomorrow and not in the tradition of yesterday. In those days the leadership of the Nation was in the hands of a great President who was seeking to recover for our social system ground which had been lost under his conservative predecessor, and to restore something of the fighting liberal spirit which the Nation had gained under Theodore Roosevelt. It seemed one of our national tragedies that just when Woodrow Wilson was beginning to accomplish definite improvements in the living standards of America, the World War not only interrupted his course, but laid the foundation for 12 years of retrogression. I say this advisedly because it is not progress, but the reverse, when a nation goes through the madness of the 20's, pilling up paper profits, hatching all manner of speculations, and coming inevitably to the day when the bubble bursts.

bursts. It is only the unthinking liberals in this world who see nothing but tragedy in the slowing up or temporary stopping of liberal progress. It is only the unthinking conservatives who rejoice when a social or economic reform fails to be 100% successful. It is only the "headline" mentality that exaggerates or distorts the true objectives of those in this Nation, whether they be the President of the University of North Carolina or the President of the United States, who, with Mr. Justice Cardozo, admit the fact of change and seek to guide change into the right channels, to the greater glory of God and the greater good of mankind.

5041 You undergraduates who see me for the first time have read your news-papers and heard on the air that I am, at the very least, an ogre—a consorter with Communists, a destroyer of the rich, a breaker of our ancient traditions. You think of me, perhaps, as the inventor of the economic royalist, of the wicked utilities, of the money changers of the temple. You have heard for six years that I was about to plunge the Nation into war, that you and your little brothers would be sent to the bloody fields of battle in Europe, that I was driving the Nation into bank-ruptcy, and that I breakfasted every morning on a dish of "grilled millionaire."

Actually, I am an exceedingly mild-mannered person—a practitioner of peace, both domestic and foreign, a believer in the capitalistic system, and for my breakfast a devote of scrambled eggs. You have read that, as a result of balloting last November, the liberal forces in the United States are on their way to the cemetery, yet I ask you to remember that liberal forces in the United States have often been killed and buried—with the inevitable result that in short order they have come to life again, with more strength than they had before. It is also true that other men in public life have protested against certain forms of economic control, and that epithets far stronger than any I have used have been employed, even by Presidents of the United States. Those of us who knew Woodrow Wilson and Theodore Roosevelt and Grover Cleveland could hardly call them mollycoddles.

<text><section-header><text><text><text><text><text>

the plea of development of our national resources that they might feather their own nests. In the lifetime of people who are still with us there were men whom, we must admit, had courage and vision, who pushed railroads across the plains, opened mines, dammed rivers, created vast aggregations of capital, and left in their wake vast aggregations of national and State and local political power. In a sense, those were glorious days, because the wide-open spaces were open to those native Americans and those who were flocking hither from the centers of Europe to find work in new fields. A current author emphasizes the perfection of life that surrounded our population half a century ago. He draws a picture of the complete lack of any restraints on any individual and infers that every American of those days, no matter what part of the country he or she lived in, lived in a Utopia of work and play to which we should seek an immediate return. A few days ago, in Georgia, I talked with an old friend whom I have known for 10 years. He was what might be called an old-fashioned South-ern conservative. We got to "reminiscing" about the old days when first lived in Georgia. He reminded me of the days when cotton was selling at 5c. a pound, and, while he admitted that the ramifications of our Federal legislation, and especially of court decisions during the past six years, were somewhat beyond him, he allowed that some principle of crop control—cotton and tobacco—decided on by a majority of the farmers themelves, was the most democratic way to prevent the return of 5c. cotton. He reminded me of two little banks in Warm Springs, Ga.—banks in which many thousands of dollars of local savings had been deposited—of the failure of both of these banks and the loss of the savings, and of the fact today that deposits in the banks of the United States are safe, and he remarked: "I hope that that type of liberal legislation will not be repealed."

repealed."

He reminded me of the white men and Negroes who never saw, as the heads of families. \$100 in cash the whole year round. He reminded me of the days in 1932 when the States of the Union were going broke and losing their credit because the whole burden of the relief of the starving was placed on their shoulders, without the contribution of one dollar from the Federal Government. He reminded me of the complete lack of any social security program—of the days when a home-builder was charged 15% and 20% to borrow the money to build his house; of the days when slum clearance was a beautiful ideal on paper, and nowhere else. And when he left he said:

clearance was a beautiful ideal on paper, and nowhere else. And when he left he said: "Young man, I don't know the United States the way you do, but I know this section of the Nation pretty well. I don't understand the actual working out of all these new-fangled things that the Government has been starting in these past six years. But I know this section of the country, and I want to tell you that there is a new spirit abroad in the land. I am not talking just about the fact that there is more buying power, that houses are painted betore, that all of our young people in my section of the country think that we are 'going place'." These two words, "graing places" seem to be an essential in modern

two words, "going places," seem to be an essential in modern Those

civilization. They represent the conviction on the part of the young people of America that life never remains static, that there are better days ahead than ever before, that an opportunity to find a way of life, to earn a living, to raise a family in comfort and security, are better today and will be better tomorrow. There may be those in the world who believe that a regimented people whose every thought and action is directed by one man may give some people a type of security which is pleasing to them. But whatever convictions I have, none is stranger than my abiding belief that the security and well-being of the American people can best be served by the democratic processes which have made this country strong and great.

and great. The future, however, rests not on chance alone, not on mere conservatism, mere smugness, mere fatalism, but on the affirmative action which we take in America. What America does or fails to do in the next few years has a far greater bearing and influence on the history of the human race for centuries to come than most of us who are here today can ever conceive.

conceive. We are not only the largest and most powerful democracy in the whole world, but many other democracies look to us for leadership that world democracy may survive. I am speaking not of the external policies of the United States. They are exerted on the side of peace and they are exerted more strongly than ever before toward the self-preservation of democracies through the assurance of peace. What I would emphasize is the maintenance of successful democracy at the set of the set of

What I would emphasize is the maintenance of successful democracy at home. Necessarily, democratic methods within a nation's life entail change—the kind of change through local processes described by Mr. Justice Cardozo—the kind of change to meet new social and economic needs through recognized processes of government. Because we live in an era of acceleration, we can no longer trust to the evolution of future decades to meet these new problems. They rise before us today and they must be met today. That is why the younger generation means so much in our current affairs. They are part of the picture in their 20's without having to wait until they have passed middle age. That is why I myself associate myself so greatly with the younger generation. That is why I am happy and proud to become an alumnus of the University of North Carolina, typifying, as it does, American liberal thought through American action.

President Roosevelt Plans to Renew Recommendations for Legislation for Government Reorganization

Plans of President Roosevelt to again send to Congress a message recommending the enactment of legislation to reorganize the Government agencies, was disclosed by Mr. Roosevelt yesterday (Dec. 9), according to Associated Press accounts from Washington, which also stated:

The President conferred with Government reorganization experts yes-terday. He said at his press conference today that the conference reported

very good progress. The legislation he will request will be broad in scope, he said, adding that he understood various members of Congress planned to introduce bills. The Chief Executive said he had no idea whether there would be funda-mental changes in the new program as compared to that which passed the Senate in the last Congress but met defeat in the House.

President Roosevelt Believes Cost of Armaments Pro-gram Should be Put on "Pay-as-You-Go" Basis— Warns, However, He Does Not Necessarily Favor Increased Taxes—Will See Anthony Eden While Former British Foreign Secretary is in United States

The new United States national defense program should be placed on a "pay-as-you-go basis," President Roosevelt said at a press conference on Dec. 6. At the same time, Mr. said at a press conference on Dec. 6. At the same time, Mr. Roosevelt warned against any assumption that he advocated paying the expense the same year it was incurred, or that he would propose new taxes in connection with the Adminis-tration's armament expansion plans. The President also said that it must not be forgotten that the Federal Govern-ment also collects revenues each year other than from taxa-tion, and it should not be concluded that increased taxation was necessarily a corollary of the "pay-as-you-go" theory. A Washington dispatch of Dec. 6 to the New York "Times" summarized in part his remarks as follows: summarized in part his remarks as follows:

So important did White House aldes consider the President's statement that Stephen T. Early, Press Secretary, called in newspaper men after the conference to elucidate Mr. Roosevelt's off-hand comment substantially as follow

as follows: His position is that he is determined to pay for the national defense year by year. However, that does not of necessity mean, because of other com-pensation budgetary adjustments that may be made, that there will be in-creased taxation. Moreover, the President has not yet determined to go ahead with expansion of the national defense, even aside from the question of increased taxation.

Repayments by States Cited

From the President's and Mr. Early's remarks the impression was gained that the Administration was optimistic that new levies for paying the cost of whatever increased defense expenditures are authorized might be avoided. In this connection, Mr. Roosevelt seemed particularly anxious to call atten-

tion to repayment to the Federal Government by States on account of advances for public works expenditures. These observations were made by the President in connection with the national defense program, which he emphasized was still in the study stage.

and any one resident in connection with the national defense program, which he emphasized was still in the study stage:

 Pump-priming and the question of unemployment will not be a factor in whatever rearmament and military modernization program is recommended by experts now investigating the nation's needs in the light of technical improvements abroad in the machinery of war.
 The Administration has good reason for doubting the accuracy of suggestions that American airplane manufacturers are lagging foreign builders in construction and design.
 In his contemplated message to Congress on the subject of national defense Mr. Roosevelt will not include a proposal for the conservation of natural resources which might be needed in the conduct of war. No thought has been given to subsidizing domestic production of manganese because it would be too expensive.
 While the War and Navy Departments have recommended the accumulation of certain metals such as nickle, tin and others in which this fourth, such as nickle, tin and others in which this defense.

The press conference also included an admission by the President that he expects to meet Anthony Eden, former British Secretary, who arrived in the United States yesterday (Dec. 9).

President Roosevelt Indicates Federal Lending to Georgia May Be Resumed—Says State's Legislators Have Found Constitutional Loophole Enabling Assumption of Financial Obligations

Assumption of Financial Obligations President Roosevelt told a press conference at Warm Springs, Ga., on Dec. 2, that Georgia legislative leaders had found means of circumventing the State's constitutional prohibition against contracting financial obligations except for restricted emergency purposes, and he indicated that it would not be necessary to cut off further Federal public works appropriations, as he had indicated would be done at an earlier press conference, Nov. 22 (referred to in the "Chronicle" of Nov. 26, page 3240). Governor Rivers of Georgia attended the press conference on Dec. 2, and also assured newspaper men that a way had been found to harassured newspaper men that a way had been found to har-monize the State's constitution with borrowing from the

assured newspaper men that a way must been count to main monize the State's constitution with borrowing from the Federal Government. As to the conference, we quote as follows from Associated Press advices from Warm Springs, Dec. 2: He (the President) reported that he and Georgia officials were agreed on plans to enable the State to participate legally in its share of Federal public works funds in the future. The President did not go into details, but Governor E. D. Rivers, who attended his interview, told newspaper men that enabling legislation was all prepared and he expected no difficulty in getting it through. He added that it would not be necessary to amend the State Constitution. The President's remarks were made in response to questioning. He had just received Governor Rivers, Lawrence S. Camp, Federal Dis-trict Attorney who was defeated by Senator Walter F. George in the sena-torial primary, and James L. Gillis, Democratic State Chairman—a visit which he described as purely social. Asked whether the Governor had assured him that Georgia would take steps to obtain its full share of Public Works money, in view of his criticism of the State's failure to pass legislation permitting it to borrow, the President replied they were agreed and the matter would be taken care of all right. "Our attitude." Governor Rivers interjected, "will be one of cooperaof all right. "Our attitude," Governor Rivers interjected, "will be one of coopera-

tion "

United States Supreme Court Denies Plea of Thomas J. Mooney in Further Move for Release from Prison Term

Term The United States Supreme Court on Dec. 5 rejected an-other attempt by counsel for Thomas J. Mooney, designed to liberate him from the Federal penitentiary at San Quen-tin. This was noted in the following Associated Press dis-patch of Dec. 5 from Washington: The tribunal denied permission to file a petition for a writ of habeas corpus intended to compel California officials to show that Mooney is rightfully held in prison. Apparently the next step in the long contest for freedom will be a pardon application filed with Culbert C. Olson when he takes office on Jan. 3 as Governor of California. Mr. Olson has said publicly that he believed Mooney to be innocent and that he would give prompt consideration to a pardon application.

application.

In asking the Supreme Court to grant a habeas corpus writ, John F. Finerty, Washington lawyer, proposed that Mooney be brought here to testify personally before the justices. Immediately after the court turned him down today, Mr. Finerty reoffered a similar petition.

An earlier reference to the Supreme Court's declination to reconsider plea for review appeared in our Nov. 26 issue, page 3241.

United States Supreme Court Voids NLRB Order Ban-ning A. F. of L. as Bargaining Agent with Con-solidated Edison Co. of New York—Tribunal at Same Time Upholds Federal Authority Over Intra-State Utility Companies

The United States Supreme Court on Dec. 5 overruled part of a National Labor Relations Board order directing the Consolidared Edison Co. of New York and its subsidiaries to abrogate contracts with the International Brotherhood of Electrical Workers, an affiliate of the American Federation of Labor. At the same time, however, the Court upheld the NLRB contention that although the company is intra-State IN LAB contention that although the company is intra-State in character, the Federal Government has competent juris-diction because some of the company's power is supplied to inter-State activities. It was believed that this latter prin-ciple, as defined by the Court, may be extended to the entire utility field. A majority of the Court held that there was no proof that the company's contracts with the A. F. of L. were made "to consummate and perpetuate" unfair labor practices which discriminated against the Congress of Industrial Organiza-tions. Regarding the Court's conclusions, a Washington dispatch Dec. 5 to the New York "Times" said:

dispatch Dec. 5 to the New York "Innes" said: Chief Justice Hughes said in the opinion that the Board's argument that Edison had illegally signed contracts with the I. B. E. W. without giving employees opportunity to choose a collective bargaining agency was a conclusion "entirely too broad to be sustained." Other portions of the NLRB order were left undisturbed, including a direction to the company to cease recognizing the I. B. E. W. as exclusive bargaining agency for the workers. The court concluded that the Federa-tion union was the bargaining agency only for its own members.

Division of the Court

Division of the Court Justices Brandeis, Stone and Roberts supported Chief Justice Hughes completely. Justices Reed and Justices Black thought that the Chief Justice should have sustained every action of the Board. Justices Butler and McReynolds wanted the Board rebuffed in every particular. Technically, the ruling might be recorded as 6 to 2, for Justices Reed and Black concurred in part, while Justice Butler and Justice McReynolds stood fast against any of the findings. The opinion was the first blow the Labor Board has received in a long line of decisions, beginning with the upholding of the Wagner Act, which created the Board. Board officials, despite the setback regarding the I. B. E. W., set great store by the conclusion concerning jurisdiction over intra-State activities which extended into interstate fields. The United Press accounts from Washington Dec. 5 had

The United Press accounts from Washington Dec. 5 had the following to say regarding the rulings:

the Ioliowing to say regarding the rulings: The sharply-divided tribunal reminded the Board that it was given no express authority in the Wagner Act to invalidate contracts with in-dependent labor organizations and that the scope of its power is restricted to taking such affirmative action as will effectuate the policies of the law. "We think that this authority does not go so far as to confer a punitive jurisdiction enabling the Board to inflict upon the employer any penalty that it may choose because he is engaged in unfair labor practices" The Court held. "The power to command affirmative action is remedial, not punitive"

cedure.

by iterating to their complaints were upheld by the Court. Justice Hughes carefully explained where the Board has erred. He said that if the Board intended to make a charge that the contracts represented a device to consummate the company's alleged illegal conduct, its complaint should have been amended accordingly. The A. F. of L. affiliate, Mr. Justice Hughes contended, then should have been given an opportunity to be heard and evidence should have been brought forward in an attempt to sustain the charge. Instead, he said, it was left a matter of mere conjecture to what extent membership in the brotherhood was induced by "any illegal conduct on the part of the employees."

employers." employers." "These rights (of the Brotherhood) cannot be brushed aside as im-material, for they are the very essence of the rights which the Labor Relations Act was passed to protect and the Board could not ignore or override them in professing to effectuate the policies of the Act." the decision said.

The United Press also had the following to say as to the Courts ruling affecting intra-State commerce:

Courts ruling affecting intra-State commerce: The Board's contention that it has jurisdiction over local utilities that service interstate industries, which the company disputed, also was up-held. In so doing, the Court reaffirmed the new interpretation of the interstate commerce clause of the Constitution which it adopted in validating the National Labor Act—that industries operating in intra-State commerce are subjected to Federal regulation if industrial strife or other emergencies would hamper interstate traffic. Previously the tribunal had ruled persistently that the Government had to keep hands-off intrastate industries. The National Recovery Administration and the first Guffey coal control Act fell before this in-tepretation. Justices Pierce M. Butler and James Clark McReynolds, the bench's stout conservatives, cited these decisions today in a separate opinion holding that the NLRB order in the Consolidated case should have been killed in its entirety on jurisdictional grounds. "Asseveration of need to uphold our dual form of government and the safeguards set for protection of Federal power does not assure adherence to or conceal failure to discharge the duty to support the Constitution," the Butler-McReynolds opinion said. The Consolidated Edison Co. of New York on Dec. 6

The Consolidated Edison Co. of New York on Dec. 6 posted on its bulletin boards notices advising employees of the Supreme Court decision. In discussing the effects of the rulings, the New York "Sun" of Dec. 6 said:

Spokesmen for the National Labor Relations Board, the A. F. of L. and the Congress of Industrial Organizations differed considerably over the probable effect of the decision on other union controversies.

A. F. of L. leaders declared that the ruling was an out and out victory for their Federation over the C. I. O. William Green, A. F. of L. President, asserted that it would force the Labor Board to reverse itself in cases where "it has illegally abrogated contracts entered into between employers and A = R of L upplore" A. F. of L. unions

"The Supreme Court has knocked the props out from under the Board's arbitrary, prejudicial and grossly unfair position toward the A. F. of L. with regard to union contracts," said Mr. Green.

Finds but Cold Comfort

Lee Pressman, general counsel for the C. I. O., remarked that the Court's decision "can give but cold comfort to labor organizations seeking to ad-vance themselves at the cost of the workers by obtaining preferential treatment from employers." Other C. I. O. spokesmen contended that the decision would not hinder the organization from continuing to seek relief under the National Labor Relations Act against collusion between "em-ployers and A. F. of L. Unions."

According to the New York "Times" Charles Fahy, general counsel of the board, said:

A careful reading of the opinion will show that the question of these contracts was decided on an extremely narrow ground, was one of procedure and does not affect the Board's right to Act on such contracts.

Banks, Newspapers, Insurance Companies, &c. Not Entitled to Exemption from Provisions of Wage-Hour Law According to Interpretation Made Public by Administrator Andrews

In a ruling designed to define the "service establishments" under the Wage-Hour Act, the Administration denied on Dec. 7 the claims under this category made by banks, insur-ance companies, newspapers, radio stations, utilities, stock brokers, security dealers, advertising agencies and similar concerns. concerns.

Advices from Washington Dec. 7 to the New York "Herald Tribune" from which we quote, also said:

1 FIDURE IFOM which we quote, also said: The ruling was prepared by Calvert Magruder, General Counsel, and made public by Acting Administrator Paul Sifton as an interpretation of section 13 (A) (2) of law and will operate to bring a large segment of business under the rigid 44-hour a week provision. The Act provides examption from the wage and hour provisions for "retail and service establishments, the greater part of whose selling or servicing is in intrastate commerce," In its interpretation today, the division said:

a conclusion.'

Part of New York State Multiple Housing Law Held Unconstitutional—State Court of Appeals Voids Section Granting Prior Lien on Improvement Assessments

Assessments The New York State Court of Appeals decided on Dec. 6 that a part of the State's Multiple Dwelling Law, making assessments for improvements to ond-iaw tenement houses in New York City a prior lien on any mortgages, was un-constitutional. The ruling was handed down in a test case brought by Central Savings Bank of New York City, the Emigrant Industrial Savings Bank, the Dry Dock Savings Institution and Fanny Messer, owner of the properties involved, against the City of New York and Alfred Rheinstein as Commissioner of Housing and Buildings. Chief Judge Frederic E. Crane wrote the court's opinion, which was con-curred in by his six associates. Regarding the findings of the court, United Press advices from Albany said: This law shoving the mortgage lien into second place at the behest or

This law shoving the mortgage lien into second place at the behest or desire of the mortgagor contrary to all his contractual obligations is un-constitutional both under the Federal and State Constitutions, Judge

constitutional both under the Federal and State Constitutions, Judge Crane said. The decision did not affect other sections of the housing law. The court directed judgment for the banks and Miss Messer and added: "Any liens imposed upon the respective premises for the expenses of making alterations or repairs in accordance with the orders of the De-partment of Housing and Buildings shall at all times be subject and sub-ordinate to the plaintiff's respective mortgage liens." Judge Crane, explaining operations of the law, said that housing officials may order improvements and alterations to be made in old law tenement houses. If the owner does not desire to comply with the law and incur the expense he can close up the building or devote it to other uses. If he desires to continue the tenement, he may make the alterations at his own expense or permit the city to do it for him. In making these determinations, the mortgages is not consulted. The mortgages not being in possession, has no option whatever, but must sit idly by while the de-partment or the owner proceeds to diminish the value of his lien. The work being done . the expenses become a lien upon the property ahead of his mortgage, all of which is final as to him. The law affords him no opportunity to be heard as to the reasonableness of the proceedings or the expenses. His property is thus taken without due process of law and the obligation of his contract with the mortgager impaired contrary to provisions of Article 1. Section 10 of the United States Constitution.

His property is thus taken without due process of law and the obligation of his contract with the mortgagor impaired contrary to provisions of Article 1, Section 10 of the United States Constitution. The case came to the court as a test action involving approximately 3,500 mortgages held by the banks. Constitutionality of the section was the sole question involved.

Leading Industrialists Oppose "Incentive Tax" in Testimony Before Senate Finance Subcommittee —Advocate Lower Federal Levies as Aid to Business -Views of Edsel Ford, L. M. Giannini, Recovery and Others

That reductions in Federal taxation would be the best possible stimulus for business was the consensus of opinion among business leaders who testified this week before the Senate Finance Subcommittee which is studying proposals for so-called "incentive taxes" designed to encourage profitsharing with employees. Previous testimony was outlined in the "Chronicle" of Dec. 3, page 3387. Edsel Ford and other industrialists who testified Dec. 6 said that lower taxes would aid materially in promoting industrial recovery. In a summary of their testimony, Associated Press Wash-ington advices of Dec. 6 said:

Mr. Ford, President of the Ford Motor Co. and son of Henry Ford, its founder, said he believed a reduction of taxes would be "as good an incentive to business as any." Testifying before the Senate Profit-Sharing Committee, he expressed opposition, however, to granting special tax credits for plant expansion, purchase of equipment and regularization of employment, asserting they "might lead to consequences difficult to handle."

purchase of equipment and regularization of employment, asserting they "might lead to consequences difficult to handle." The committee is studying the question of allowing such credits in the hope of encouraging production and the sharing of profits with employees. Mr. Ford said the Ford Motor Co. believed in the principle of sharing profits directly through high wages. Largely as a result of that policy, he said, there has been no serious labor troubles in the Ford plants. "We try to be more than fair to our employees," he added. "We try to pay them just as high wages as we can and produce at as low cost as possible, thus creating volume production." From 1914 to 1919, inclusive, Mr. Ford testified, his company had paid \$77,565,000 in profit-sharing in excess of the established wage scale for the motor industry. In 1920, he explained, the company changed to a system of cash bonuses, paying out \$6,750,000 in bonuses for 1919 and 1920. The company instituted a \$6-a-day wage scale in 1920. It now main-tains an investment plan by which all employees may deposit a percentage of their wages. They receive a guaranteed interest of 4½%, plus special returns paid semi-annually. These special returns, the witness said, have reached as much as 10%. Walter Schwartz, Philadelphia textile machinery manufacturer, express-ing views similar to Mr. Ford's, suggested that taxes be lowered immedi-ately to a rate which would balance Government revenue and expenses if the national income were from \$80,000,000,000 to \$90,000,000,000 out specificials have estimated that the national income will be \$65,000,000,000 this year.

"Let the budget go out of balance," Mr. Schwartz said. "If you lower taxes materially now, business will increase so that the national income will soon reach \$80,000,000,000 or \$90,000,000,000, and revenue will balance outgo. Then we can turn to the serious business of balancing the budget."

Willard H. Dow, President of the Dow Chemical Co. of Midland, Mich.,

Willard H. Dow, President of the Dow Chemical Co. of Midland, Mich., opposed incentive taxation to encourage profit-sharing.
Mr. Dow thought capital as represented in money holdings was "scared" and that incentive taxation would do little to revive business.
"The incentive you prefer, then," interposed Senator Vandenberg, "is to have Government mind its own business?"
"I think that is very properly stated," Mr. Dow replied.
Mr. Dow said that his company, which is now involved in a case brought before the National Labor Relations Board by the Congress of Industrial Organizations, paid an annual wage averaging \$1,935 in 1937. He said this was considerably above the average for the chemical industry. The company shares profits, the witness explained, by a system of bonuses paid to all of 3,600 employees except the President and the Creasurer. He said there had been no bonuses for the last 10 months because earnings had not been sufficient, but he testified under questioning by Senator Herring that the three years beginning in 1934 had been the company smost profitable.
Diedrich Gristede, New York chain grocer, told the committee that a system of profit-sharing with employees had reduced waste and increased company profits.
"We have been very liberal with our bonuses," he added, "because we figure that you can't take it with you."

Witnesses before the subcommittee on Dec. 5 voiced opposition to Federal tax policies, as reported in the following dispatch of that date from the Associated Press in Washington:

dispatch of that date from the Associated Press in Washington: C. W. Hazelett, President of the Hazelett Metal Co. of New York, said that "unsound tax laws" had been enacted in recent years. He called for a novel system under which high levies would be clapped on persons responsible for strikes by labor or by capital. This, he argued, would lead to a high rate of production and of reemployment. L. M. Giannini, President of the Bank of America, San Francisco, who appeared before the committee to tell of a profit-sharing plan operating in his institution, told reporters after the hearing that Federal tax policies offered a "psychological handicap" to the expansion of business. He urged revision of the tax structure to promote individual initiative. Mr. Hazelett, author of a book on incentive taxation, urged that present tax rates be reduced to all firms which maintained a high rate of employ-ment of their productive facilities. Moreover, he advised the Government to tax in such a way as "to discourage the withholding from the people the fruits of production and the stoppage by anybody or any class of the machinery of production." The idea, he said, was to make it "too expensive" for business to remain idle. "It proposes to tax those calling strikes to support the strikers until reemployed," Mr. Hazelett said of his plan. It proposes the elimination of relief by giving people a permanent opportunity to work. Moreover, it proposes a tax on idle money with no tax on money in reasonable use." Mr. Hazelett argued that the right to strike had not improved the con-dition of labor because a strike reduced production "and therefore real wages," and because capital also might strike in retaliation. "The fact that capital can live much longer on its accumulation than labor," he said, "makes the strike of the latter absolutely futile." Frank Gannett, Rochbester publisher of the Gannett news-nearcers' A. L. March. Detroit manufacturer and Wilford I.

Frank Gannett, Rochester publisher of the Gannett news papers; A. L. Marsh, Detroit manufacturer, and Wilford I. King, New York University professor, all indorsed the prin-ciples of profit-sharing and incentive taxation to encourage it, according to Associated Press accounts from Washington, Dec. 1, which also said :)

ent into effect.

Business Leaders and Economists Appear Before Teminess Leaders and Economists Appear Derore Iem-porary National Economic Committee Investigating Effect of Monopolies—Hearings Expected to Cover Many Months—Dr. Lubin, Department of Com-merce Economist, Says Depression Cost \$132 Billion in National Income—Edsel Ford and Dr. Willard Thorp Among Others Heard

The Temporary National Economic Committee, created by Congress to conduct an extensive investigation into monopolies in the United States, began its hearings on Dec. 1, and in the course of its first few sessions heard many of the Nation's leading industrialists and economists. Opening the hearings on Dec. 1, Dr. Isador Lubin, Department of Com-merce economist, said that the Nation's bill for the depres-sion of 1930-38 has been \$132,000,000,000 in national income, or about one and one-half times the value of the goods produced in 1929. According to a Washington dispatch, Dec. 1, to the New York "Herald Tribune," Dr. Lubin testi-fied after Senator Joseph C. O'Mahoney, Democrat of Wyoming and Chairman of the committee, officially known as the Temporary National Economic Committee, read into

as the Temporary National Economic Committee, read into the record a statement outlining its aims. Chairman O'Mahoney stated that the committee members were "deeply sensible of the responsibility that rests upon them to utilize the broad powers with which they have been vested," and added that the joint congressional Administra-tion group is seeking only "economic facts." The "Herald Tribune" account also said:

Thouse account also said: The full committee attended the open hearing, but some left before the noon recess. In addition to Chairman O'Mahoney, the other congressional members of the committee are Senators William E. Borah, Republican of Idaho, and William H. King, Democrat of Utah, and Representatives Hatton W. Sumners, Democrat, Texas, and B. Carroll Reece, Republican, Tennessee.

The departmental representatives are William O. Douglas, Chairman of the Securities and Exchange Commission; Thurman Arnold, head of the Anti-Trust Division of the Department of Justice; Garland S. Ferguson, Chairman of the Federal Trade Commission; Herman Oliphant, general counsel of the Treasury; Richard C. Patterson, Assistant Secretary of Commerce, and Leon Henderson, Executive Secretary of the committee.

In part, the "Herald Tribune" advices also had the following to say:

lowing to say: In his four-hour prologue, Dr. Lubin contended that the eight depression years also cost the Nation \$119,000,000 in wages, \$20,000,000 in dividends to stockholders, \$38,000,000,000 in gross farm income, and 43,435,000 man-hours of work. A statistical analysis of the wage-earning families of the United States showed, he said, that about 5,200,000 of these families, or 55% of the total, had incomes of \$1,250 or less, or a total combined income of \$4,000,000

\$4,000,000,000

\$4,000,000,000. An annual increase in income averaging about \$720 would contribute, he said, to a consumer demand of more than \$3,100,000,000. This sum would be spent as follows: Food, \$800,000,000; clothing, \$416,000,000; housing, \$613,000,000; fuel, light and refrigeration, \$213,000,000; house furnishings and equipment, \$224,000,000; transportation, \$385,000,000; personal care, \$73,000,000; recreation, \$234,000,000, and medical care, \$208,000,000.

In Associated Press advices from Washington, Dec. 1, it was stated:

Mr. Lubin's estimate that \$132,000,000,000 of national income has been

Mr. Lubin's estimate that \$132,000,000,000 of national income has been lost since 1929 did not compare with his figures of losses attributed to unemployment, agriculture and declining dividends. His associates explained that the \$132,000,000,000 loss listed for national income was adjusted to the 1929 price level, while the other estimates were not price-adjusted. Thus, it was said, the individually-estimated losses could not be considered a breakdown of the aggregate income loss.

losses could not be considered a breakdown of the aggregate income loss. Dr. Willard L. Thorp, economic adviser to the Department of Commerce, told the committee on Dec. 2 that develop-ment of large corporate enterprise has been partly respon-sible to the Sherman Anti-Trust Act, although that law was designed to prevent this particular occurrence. A Washing-ton dispatch of Dec. 2 to the New York "Journal of Com-merce" outlined this testimony, in part, as follows: The reason for this, he declared, is that through the process of interpre-tation the law prohibits a group of corporations by collective action to allocate markets and production and fix prices without imposing restraint upon the merger of the group into a single huge enterprise to accomplish the same purpose. Mr. Arnold Takes Up Issue

Mr. Arnold Takes Up Issue

His criticism of the Act was not shared, however, by Thomas Arnold, head of the anti-trust division of the Justice Department, who declared that his division hopes to prove that this interpretation of the law is erroneous in the suit now being pressed against Aluminum Co. of America.

"That is a common interpretation, newspaper interpretation, of the anti-trust law, but without arguing the point," Mr. Arnold said, "I wish to make the record clear that we made no such distinction, and we will get a specific decision on that, I think, in the Aluminum case." . . . Growth in numbers of corporations has been most marked since 1910, he [Dr. Thorp] said, the number increasing from about 260,000 to 530,000 in 1936, a rise of 90%. Beginning with 1924, he added, the number of partnerships declined sharply, on the other hand, from approximately 325,000 to about 225,000 in 1932. The number then rose to about 275,000 in 1936. 275.000 in 1936.

210,000 in 1936. Importance of corporate activity by branches of industry in the contribu-tion to national income was also cited by Dr. Thorp. In 1937 over 90% of the entire business of manufacturers was done by corporations, and this branch of industry contributed about one-fourth of the total national in-come. It was estimated that practically all electric light and power, manufactured gas and communication companies are corporately owned.

Small Business Dominant -

Dr. Thorp told the committee that although the business community is still dominated by small firms when considered from the standpoint of the number of small firms in operation, big corporations supply the greatest number of jobs

Leon Henderson, Executive Secretary of the Committee said on Dec. 3 that the growth of American economic activity/ had been halted. He presented a list of moves designed to had been halted. He presented a list of moves designed to correct this situation, and said that it was possible to achieve the 1929 level of production once more. He added that "we must go far beyond that if we are to preserve our institutions." We quote from a report of this testimony in a Washington dispatch of Dec. 3 to the New York "Times":

a washington dispatch of Dec. 3 to the New York "Times": The former WPA economist told the committee that there was a "residual of about 1,000,000 unemployed in 1929," but said that under an equal pro-duction peak today there would be 7,000,000 or more unemployed. He added that we would have to reach 140 in the Federal Reserve Index of production, 21 points above the 1929 peak, to get back to the 1929 em-ployment situation. This he explained on the basis of a continuously grow-ing available labor force.

ployment situation. This he explained on the basis of a continuously growing available labor force. Mr. Henderson, in declaring throttling of competition a major cause of the halted business growth of the Nation, was at variance with the view of Isador Lubin, Labor Department economist, who opened the "pro-logue" Thursday. Mr. Lubin asserted insufficient purchasing power in the lower income groups to be the key to the difficulty. . .

Issue as Posed by Witness

The question at issue was put by Mr. Henderson, who is the coordinator of the investigation, as follows: "Why have we not had full employment and full utilization of our mag-nificent resources?"

"Why have we not had full employment and full utilization of our mag-nificent resources?" Despite this question and the complex problems it involved, he asserted: "We are left with a tremendous sense of appreciation for the degree of coordination still retained by the complex mechanism which is producing \$62,000,000 of goods and services this year." He added, however, that "appreciation gives way to bewilderment and perplexity when we remember" the depression losses, both in terms of dol-lars and human suffering. The loss in dollars, if the rate of growth from 1899 to 1929 had continued to date, would be \$293,000,000,000, he de-clared, while the human losses were shown by unemployment figures. Mr. Henderson offered an unofficial estimate that the total of unem-ployed in the country dropped by about 1,200,000 from February, when it was estimated at 11,793,000, to October, when it was put at 10,569,000. He declared that while the number of unemployed varied between about 14,000,000 in March, 1933, and about 7,000,000 in July, 1937, the low point of recent years, the available labor force grew continuously from about 48,000,000 in January, 1929, to about 54,800,000 today. Between March, 1933, and the high point in 1937, he stated, about 9,600,000 persons found jobs in private enterprise, including those indus-tries which were stimulated by PWA. Edsel Ford, President of the Ford Motor Co., said on

Senator O'Mahoney asked him whether he would recommend the free patent licensing system to other industries. "Every industry has its own problems," the witness replied. "The sys-tem has benefited the automobile industry and is well worth looking into." On only one occasion had the Ford company's patents been licensed for a royalty fee, Mr. Ford said. He testified that his company was not inter-ested in making money from its patents, but in producing motorcars.

Mr. Arnold, in questioning William S. Knudson, President of General Motors Corp., on Dec. 6, suggested that the Government might devise a dual patent policy to provide different treatment for large and small businesses. Mr. Knudson's comments were described in the following Asso-ciated Press Washington advices of Dec. 6:

ciated Press Washington advices of LPCC 6: Mr. Knudsen said that even if the patent laws were abolished General Motors would continue its research program but, under questioning, ob-served that small manufacturers would be greatly handicapped if they culd not protect their monopolies. He asserted that General Motors exercises no monopoly on its patented inventions. Other witnesses before the committee have brought out that one of the chief reliances of the small manufacturer for continued eco-nomic existence, on the other hand, is his right of monopoly over his patented inventions. nomic existence, on patented inventions.

nonic existence, on the other hand, is his right of monopoly over his patented inventions. Officials of the General Motors Corp., testifying before the committee, Dec. 6, were praised for their attitude toward the use of patents. Representative O'Mahoney, Chairman of the committee, said that the automobile industry, through its patent practices, had materially contributed to industrial progress. Previously, Charles F. Kettering, Vice-President of the company, had said that the big problem facing the Nation was to create new industries to put men and money to work, while William S. Knudson, President, said that at this stage in the development of the automobile it was virtually impossible for anyone to make a "revolutionary invention." From an account from Washington to the "Journal of Commerce" we quote: Mr. Kettering, who heads the research department of General Motors, old the committee that "one-man invention is not very possible these days." Most of them, he said, are worked cut as part of a general problem. "We are way behind in technological development," he said. "We are not ahead at all. In fact I am rather ashamed of our time for doing such a poor job. We've got a lot of men out of work and a lot of money out of work and a lot of materials not in use." The committee is called upon specifically to inquire into

The committee is called upon specifically to inquire into The committee is called upon specifically to inquire into "the concentration of economic power in and financial con-trol over American industry." The resolution providing for the inquiry was signed by President Roosevelt in June. Reference thereto appeared in these columns June 11, page 3471, and June 18, page 3884. Some of the other items regarding the inquiry were noted in our issue of Aug. 27, page 1279 page 1279.

I. C. C. Extends Bituminous Rates

The freight rates on bituminous coal, which would have expired Dec. 31, 1938 will be continued indefinitely, the Interstate Commerce Commission ruled on Nov. 30. The railroads estimate that the present high rates will produce \$19,374,421 more revenue this year than they would earn otherwise otherwise.

Commissioners Joseph B. Eastman and William E. Lee Commissioners Joseph B. Eastman and William E. Lee declined to concur in the majority's decision to include the Pocahontas lines, the principal bituminous carriers, in the continuance of the high level after Dec. 31. The "New York Times" in reporting the increase states:

Mr. Eastman, who wrote the partly concurring opinion in which Mr. Lee joined, assailed the Pocahontas lines for their "arbitrary refusal" to join in a pooling plan to share their excess revenues with other railroads. He admitted the Pocahontas roads were correct in holding that the commission could not compel them to join a pooling arrangement if they did not so

desire. "We have power, however, to withhold approval of rate increases, if we find that they will result in unjust and unreasonable rates," he said. "Here no increase in the rates of the Pocahontas lines would be warranted, save for the needs of other railroads. That being so, the resulting rates will not, in my opinion be just and reasonable, unless the carriers concerned take such steps as the law permits to apply the increased revenue to the needs which furnish its only justification, and this they arbitrarily refuse to do."

to do." The Commission observed that "bituminous coal is by far the most important single source of railroad earning, and in recent years has pro-duced 15 or 16% of the total operating revenues." It warned that continu-ance of the increase might spur the use of competitive fuels, notably natural

"The situation," the Commission said, "challenges the serious considera-tion of all who have a stake in the well-being either of raimoad transporta-tion, including the employees, the taxing authorities and the security holders, and the managements of the railroads, or of those who are con-cerned with or responsible for conditions in the coal industry. But these conditions cannot control in our determination as to whether the present rates on coal may be continued as being just and reasonable on and after Jan. 1, 1939. In view of the present level of railroad expenses and taxes, we find upon the whole record in this proceeding that the present rates are just and reasonable and will be so for the indefinite future." The majority suggested that the matter of pooling might be a proper subject for a special inquiry by the Commission. gas. "The situation," the Commission said, "challenges the serious considera

TVA Rejects Plan for Valuation of Tennessee Utility by SEC—J. A. Krug Tells Joint Congressional Com-mittee of Objections—W. L. Wilkie Replies
In testimony presented to the Joint Congressional Com-mittee investigating the Tennessee Valley Authority, J. A.
Krug, chief power planning engineer of the TVA, on Dec. 7 announced the rejection of the proposa of Wendell L. Wilkie, President of the Commonwealth & Southern Corp., that the valuation of the corporation's properties in the TVA area be

fixed by the Securities and Exchange Commission as a basis of sale to the TVA. Mr. Krug asserted that he was au-thorized to speak for the TVA Board of Directors. This decision was the first official comment on Mr. Wilkie's recommendation, which was proposed on Nov. 23 before the investigating committee and noted in our issue of Nov. 26, page 3245 page 3245.

Under date of Dec. 7 Washington United Press advices enumerated Mr. Krug's objections to the arbitration offer as follows:

That the proposal would require a score of municipalities to enter the power business blindfolded.
 It is "of such dubious legality that it would lead to years of litigation."
 The problem requires an immediate solution and arbitration (on a basis fixed by the SEC) would take a long time.
 Fixing of a restrictive boundary for TVA would violate the act which created the "yardstick" power measuring agency.

Following Mr. Krug's testimony, a statement was issued by Mr. Wilkie wherein he said the objections were "entirely without merit." The statement, in part, follows:

Two of his objections are purely legalistic, namely, that the TVA Act does not authorize the TVA to arrive at a fair price by arbitration and that likewise the act does not permit TVA to limit the area in which it will operate. In other words, that there is nothing in the act by which the TVA can agree not to continue to raid and compete with utilities wherever they may be located.

TVA can agree not to continue to raid and compete with utilities wherever they may be located. His next objection to my proposal to arbitrate is that it will lead to delay. This is not true. In order that there may be no question, however, we will agree that the SEC must determine the value within a 60-day period. We will also agree to pay all necessary costs which SEC may incur in the employment of engineers and others to determine the value. The other objection that it would lead to confusion and require scores of cities to enter the power business blindfolded, comes rather strangely from the TVA. Mr. Lilienthal proposed in writing on March 4, 1938, that the entire property be purchased at one time . . . No dificulty arcse on the points raised by Mr. Krug until we refused to accept the price proposed by TVA. Again I wish to repeat that the duplications of utility properties with

Again I wish to repeat that the duplications of utility properties with Federal funds or the combined efforts of the Public Works Administration, TVA and power boards to force the utilities to sell their property at less than their true value is preventing a building program on the part of the utilities throughout the country in the next few years running into billions of dollars. No greater single thing could be done to restore economic pros-perity than the working out of this problem on a fair and rational basis such as I proposed. as I proposed.

Again we plead with the Federal government in simple justice not to destroy these properties, but to repay to the investors the money which they have invested in them or their value as appraised by the SEC.

Life Insurance Companies Made Smallest Additions to United States Bond Holdings in 1938 Since 1932 —T. A. Phillips Addresses Association of Life Insurance Presidents—E. R. Stettinius Discusses Responsibility of Industry to Society—Warning by F. N. Julian of United States Insurance Curbs

F. N. Julian of United States Insurance Curbs Life insurance companies in this country in 1938 recorded the smallest increase in holdings of United States Govern-ment bonds since 1932, T. A. Phillips, President of the Minnesota Life Insurance Co. of St. Paul, said on Dec. 2 in an address before the annual convention of the Association of Life Insurance Presidents in New York City. On the preceding day, Edward R. Stettinius Jr., Chairman of the Board of the United States Steel Corp., discussed before the convention the responsibility of industry to society. A warning against possible Federal supervision of insurance was given by Frank N. Julian, President of the National Associa-tion of Insurance Commissioners, in addressing the Con-vention, according to the New York "Times," which we also quote: also quote:

Mr. Julian, who is State Superintendent of Insurance of Alabama, urged the continuation of conservative State supervision, which he declared had proved its value strikingly. He declared insurance supervision might be at the cross roads. He asked if it should be a continuation of State supervision as upheld by the highest courts, or Federal supervision with its multiplicity of rules, regula-tions, civil service employees and interference where least expected. "In my opinion our present system should be continued." he said. "It is our responsibility and yours to see that insurance supervision remains on its high level of effectiveness and that it maintains its present intimate contract with the problems that arise."

Mr. Phillips' address was reported as follows in the New York "Journal of Commerce" of Dec. 3:

York "Journal of Commerce" of Dec. 3: "The total of United States bonds held by the companies now amount⁸ to \$4,551,000,000, which represents a decline of 17.9% total assets from the peak of 18.1% last year," he said. "This is doubly gratifying. First, it means that a larger portion of new funds is being invested on a more favorable interest basis and, second, it reflects improvement in the mortgage and corporate bond markets sufficient to permit larger commitments in those categories than in 1937, larger indeed than in any year since 1928." The increase in holdings of Government securities for the year is \$188,-000,000. In contrast, public utility securities were increased \$431,000,000. reaching the total of \$3,254,000,000. The proportion increased from 11.7% to 12.8%. "Other" stocks and bonds, which would comprise the industrials. increased \$253,000,000, rising from 5% to 5.7% of the total admitted assets.

Railroad Problem

Railroad Problem The effect of the present railroad situation on life insurance companies "although not to be minimized, has probably been greatly exaggerated," Mr. Phillips declared. Pointing out that railroad holdings of the companies today account for only 12.1% of total life insurance assets, he continued: "It must be remembered that the percentage of mileage in receivership is not a measure of the losses taken by investors. There is hardly a road in bankruptcy today that is not paying all or a part of the interest on some of its senior liens, and most of the receivership roads are paying both prifi-cipal and interest on equipment trust certificates. "Another major consideration is the fact that the present railroad diffi-culties are not a sudden development but have accumulated over a period

of years, and, since insurance companies follow the practice of writing defaulted bonds down to market prices, losses have been taken gradually as they occurred. Such losses as have occurred have been minor in relation to total assets and have been taken in stride." \overline{W} also quote from the "Times" of Dec. 2, discussing the proceedings of the previous day:

proceedings of the previous day:

proceedings of the previous day: Industry must manage its affairs with due regard to the whole field of human relations, Mr. Stettinius declared in a prepared address read by William Beye, Vice-President of the Steel corporation in charge of indus-trial relations. While the realization of industry's responsibilities to society is growing the general welfare calls for even greater progress, Mr. Stettinius said. "No longer can industry plow a single furrow toward a single strictly commercial objective; instead, it must manage its affairs with due regard to the whole field of human relations," he said. "Industry must strive to adjust its operations to the highest purposes of life and, in so doing, it may safely depend upon the wholehearted support, sympathy and understand-ing not only of our great body of employees and their families but the public as well. Only thus will we achieve a better social as well as economic standard of living." Social Security Law Endorsed

Social Security Law Endorsed

Mr. Stettinius expressed himself in favor of social security legislation. Mr. stettmins expressed nimsel in lavor of social security legislation. He said that without passing on the details of the Social Security Act, and although aware that its machinery may need readjusting, he is convinced the recognition of the principle of social security by the enactment of that legislation represents a great advance, one deeply desired by the people and deserving to be protected by all who cherish the well-being of the social order order.

order. He gave his concept of economic security, which he said he believed most of the citizens hold today, as follows: "It seems to me that employees expect to work during their produc-tive years at wages which permit of an improving standard of living and a modest backlog of protection against adversity. This is often visualized an an unencumbered home, a savings account, and insurance against the major hazards of life—death, sickness, accident, unemployment and old age. It is a natural instinct of mankind to reach for safeguards against these hazards."

these hazards." Mr. Stettinius discussed the mutual contribution to employee security by industry and insurance in the group field, saying: "In helping men to help themselves industrial leaders who recognized their social responsibility became convinced that through insurance many projected benefits could be obtained with the full cooperation of their employees." employees

employees." It was pointed out that many employers in the last two years have adopted or have revised pension plans providing for old age retirement. He drew attention to the fact that this had been done in addition to and independent of the old age benefits contemplated under Federal legislation. "Through these plans the employers and employees have undertaken responsibilities for a level of protection higher than that provided through social insurance and better sdapted to the needs of the group and the individual," he said. . Mr. Stettinus traced the changes brought about in the social and economic life of the Nation through specialization and large-scale production. He

Mr. Stettinus traced the changes prought about in the social and economic life of the Nation through specialization and large-scale production. He pointed out that the so-called industrial revolution, although it raised the general standard of living, none the less created complex problems in human

and social relationships. "These difficulties were not and are not insuperable," he declared. "Many of them have now been overcome and many of the remaining problems are in the process of solution."

W. Gibson Carey Urges End of "Economic Fallacies" and "Theoretical Fancies"—Radio Address Under Auspices of Merchants Association of New York Seeks to Link Public With Business Welfare

"Economic fallacies must be swept away and theoretical fancies must give place to common sense," W. Gibson Carey Jr., President of the Yale & Towne Manufacturing Carey Jr., President of the Yale & Towne Manufacturing Co., said on Dec. 7 in a radio broadcast under the auspices of the Merchants Association of New York. Business lead-ership, Mr. Carey said, is working to translate its plans into productive action. What hurts business, he declared, hurts the average man, and what helps business helps him... He says:

When business slows up the Nation slows up. After all, business is another name for all of the activities of all of the people. It is business that creates income. When we are idle we earn no income. When pro-ductive enterprise swings along in full stride, everybody profits—workers, only managers, investors.

In an abstract of Mr. Carey's address the Merchants

In an abstract of Mr. Carey's address the Merchants Association said: Mr. Carey, who is a director of the Merchants Association of New York and a Vice-President of the Chamber of Commerce of the United States, spoke on behalf of the "What Helps Business Helps You" campaign, which is now being carried on in New York City by the Merchants Association, the Chamber of Commerce of the State of New York, the New York Board of Trade, the Brooklyn Chamber of Commerce, the Chamber of Commerce of the Borough of Queens, the Bronx Board of Trade, and the Staten Island Chamber of Commerce.

Island Chamber of Commerce. "Without sacrificing reasonable humanity we must check and double check many things," Mr. Carey declared. "Taxes are one of these. We all know that a certain amount of taxation is necessary. We also know the devastating result of excess taxation. "America still possesses the business leadership, the workers and the capital that have made her supreme. She still has the stamina and will-power that have carried her forward. We must substitute confidence for doubt, and replace inaction with action. We can do that if we all understand the truth of the statement that 'What helps business helps you." "Every man who contributes his time and energy to the day's job is a part of business. That takes in all of the millions of workers there are, whether they labor in office, factory or elsewhere."

Governor-Elect O'Daniel of Texas Changes Plans Re-specting State Finance Agency—RFC to Assist State Administration in Financing New Industries

In indicating that he had given up his original plans with respect to the formation of a State finance agency along the lines of the Reconstruction Finance Corporation to aid in the development of the State's industries, Governor-elect

W. Lee O'Daniel of Texas was reported as stating on Nov. 19 that "I have found that my program for industrialization can be carried out with the aid of the RFC. More money will be available and it will not be necessary to delay action." The Houston "Post" of Nov. 20 also reported Mr. O'Daniel as follows:

The Governor-elect, who returned Friday from a tour of West Texas,

said: "I have asked each community to name a committee to study industrial conditions in that community and to work toward obtaining industries

In outlining the plan to be carried out under the RFC, Mr. O'Daniel said the governmental agency "would release funds for business to any extent necessary for complete industrialization of the State."

Bottamental agency "would release funds for business to any extent and necessary for complete industrialization of the State."
"The State administration will do everything possible to promote action on the plan," he said. "We've done a lot of talking in Texas about developing our resources, but very little has been done."
In listing industries which he believes can be built up on a sound basis in Texas, Governor-elect O'Daniel included the processing of wool and manufacture of cloth and clothing.
"They proved to me it can be done," he said. "My inauguration suit is being made at the Texas Technological College at Lubbock. They processed the wool produced by Texas sheep."
Mr. O'Daniel said that under the RFC plan the Federal agency will put up money for new industries on a dollar-for-dollar basis.
"Under my plan the new industries will be financed by small investors, who will provide half the money necessary. This will take the development of new enterprises out of the hands of men who are in the upper income bracket," he said.

bracket," he said. Mr. O'Daniel said also that by communities supporting the new industries, stock will be bought by business leaders in the respective communities. "Commissions to stock salesmen will be eliminated," he said, "and fly-by-night enterprises will be done away with." Asked for comment on criticism expressed by Elliott Roosevelt Friday evening on his "Texas in the World News" broadcast series in repard to plans to pay the \$30 a month pension, Mr. O'Daniel said: "Mr. Roosevelt was giving 'just another man's opinion.' After all, the Legislature hasn't yet met. It's a little early to talk about that. "I know the pension can be paid, and in talking to business men over the State I have found they are in favor of paying the pension because they believe that by pegging it where it is, radical plans may be headed off. "We don't want radical plans similar to those gaining foothold in other States to start here."

The earlier plans of Governor-elect O'Daniel were referred to in these columns Nov. 19, page 3098.

Warning by Julius H. Cohen Against Increasing En-croachment of National Government on State Rights—General Counsel of Chamber of Com-merce of New York Finds Action Endangering Democratic Form of Government

Julius Henry Cohen, general counsel of the Port of New York Authority, criticized the plan of Federal Government officials to end tax exemption of the properties, bonds, revenues and agencies of the States and municipalities, and in addressing the monthly meeting of the Chamber of Com-merce of the State of New York said that increasing en-croachment of the National Government on State rights menaced the very existence of our democratic form of gov-ernment

croachment of the National Government on State Tights menaced the very existence of our democratic form of gov-ernment. The speaker said that the unsoundness of the proposals had been demonstrated by such competent constitutional lawyers as David M. Wood and Henry Epstein, Solicitor General of New York State. He added: But the strategy of the Departments of Justice and Treasury is even worse than the constitutional interpretation itself. The proposal is that if Congress will pass an Act which will be operative as to future bonds, then the door will be open for these two departments to contend before the United States Supreme Court that full constitutional power to tax all securities exists, and when they succeed in establishing this, where will be the protection against the taxation in the future of now outstanding bonds? Mr. Cohen, who is also general counsel of the New York State Chamber of Commerce, predicted that the States and municipalities would unite in a common front to defeat any attempt by Congress to end tax exemption of the prop-erties, bonds, revenues and agencies of the States. He referred to the creation of the Port Authority as an illus-tration of the sovereign right of States to enter into com-pacts without surrendering their property and their enter-prise to the Federal Government. The same right was attacked by the Federal Government a year ago in the Hinderleider case, involving a compact between Colorado and New Mexico, and was successfully defended, he said. Reference was also made to the position taken by New York State against the waiver or surrender of any State rights, whether sovereign or proprietary, following the appointment in 1930 of the St. Lawrence Power Development Commis-sion, of which Mr. Cohen was Vice-Chairman and general counsel. He pointed out that the States of Vermont, Con-necticut, Massachusetts and Rhode Island are now fighting for similar protection of State rights in a joint effort to control the power in the navigable streams and were being opposed by Feder

In part, he also said:

In part, he also said: This whole topic of taxing State and Federal bonds has been presented for years on the basis that there was something unequitable and unfair in these tax immunities. Of course, all thoughtful persons know there is nothing unfair about it at all. Tax immunity is the means by which the Federal Government or the States achieve results, through getting money at low rates of interest. It has a very practical significance. We in the Port Authority know, because for every dollar of interest more that we pay we have to raise just so much more money with which to build bridges and tunnels, and our tolls must be adequate, and continue long enough to pay back the interest and ultimately the debt.

Those who have studied the housing problem understand it perfectly. Every dollar of interest that can be cut down means a deduction of one dollar per room per month for the tenant to pay. Now, you have your choice: You can get cheap rooms for the people of New York City by permitting money to be borrowed at low rates of interest on tax-exempt securities; or by making up the difference in subsidies.

The speaker reminded his audience that even in the case of privately-held property tax immunity was not regarded as immoral.

Four Amendments to Wagner Labor Relations Act Recommended by New York State Chamber of Commerce

The Chamber of Commerce of the State of New York unanimously recommended on Dec. 1 four amendments to the Wagner Labor Relations Act creating the National Labor

the Wagner Labor Relations Act creating the National Labor Relations Board, which it regarded as the most important changes essential to the promotion of industrial peace. The report from the Chamber's Committee on Industrial Problems and Relations, presented by Chairman Lewis R. Gwyn, urged (1) the creation of two distinct agencies for the prosecution and adjudication of complaints; (2) the requirement that the Labor Relations Board must determine which union shall be recognized as the proper collective bargaining agency; (3) giving employers the right to initiate proceedings, and (4) making it an unfair labor practice for either employers or workers to use coercion, intimidation or violence or to repudiate a contract. The committee, in its report, declared that the Wagner Act had failed to promote industrial peace, and the denial to employers of the right to initiate proceedings was criticized. The following are the amendments to the Act recommended by the committee and endorsed by the Chamber: and endorsed by the Chamber:

and endorsed by the Chamber: (1) An amendment to create two separate agencies, one for prosecution and the other for adjudication; the ordinary rules of evidence prevailing in courts of law should be followed. Under the present provisions the National Labor Board files a petition with itself. It appoints a trial examiner whose salary it pays. One of its own lawyers tries the case. The trial examiner reports its recommendations to the Board, and the Board makes its final decision upon the complaint which it originally made to itself. This procedure is a travesty on justice. (2) An amendment to require that the Board, when requested by the employer, or any other interested party, must determine (as between two or more unions) when the proper bargaining representative is in doubt, which union and its representative must be recognized as the proper col-lective bargaining party.

which union and its representative must be recognized as the proper con-lective bargaining party. (3) An amendment should provide that the employer or any other interested party has the same right to appeal to the Board that the union now has. The fact that the law does not permit employers as well as workers to initiate proceedings is unjust. (4) An amendment to provide that it shall be an unfair labor practice for anyone (either side) to use coercion, intimidation or violence or to repudiate a contract. Workers and employers should be barred from the benefits of this law in any case when they have instigated illegal acts in the pursuance of their objectives.

Associated with Chairman Gwyn on the committee were: Frederick Coykendall, Fred B. Dalzell, Jeremiah R. Van-Brunt and Frederic T. Wood.

New York State Chamber of Commerce Reaff Oppostion to St. Lawrence Waterway Project Reaffirms

Oppostion to St. Lawrence Waterway Project Upon motion of George Nichols, Acting Chairman of the Committee on Internal Trade and Improvements, the Cham-ber of Commerce of the State of New York unanimously adopted a report and resolutions reaffirming its opposition, dating as far back as 1920, to the St. Lawrence seaway and power project. The Chamber has repeatedly expressed the belief that the proposed development was commercially and economically unsound and a waste of public funds. "In the opinion of your committee," said the report, "no change in conditions has occurred which impairs the soundness of the position taken in the past by this Chamber. In fact, developments during the last decade have decreased the prospects of the St. Lawrence project becoming a valuable utility." Members of the committee who signed the report are: Mr. Nichols, Acting Chairman; Jonathan Bulkley, Louis S. Cates, John W. Hiltman, Arthur M. Reis and Harold S. Sutton.

American Standards Association Marks 20th Year of Its Activities—President Barnum Sees Increasing Chances for Its Usefulness

Chances for Its Usefulness William L. Batt, President of SKF Industries and Presi-dent of the International Management Conference, was guest speaker at the annual meeting of the American Stand-ards Association, held on Nov. 30 at the Hotel Astor, New York. This meeting marked the twentieth year of the American Standards Association's activities as national clearing house for the standardization work of American industry, including health and safety codes. The increasing opportunities for usefulness by the Association were stressed on Nov. 30 by Dana L. Barnum, retiring President of the organization in addressing the meeting. Mr. Barnum said that during the past three years the Association has brought together "representatives of the great national con-sumer and retail organizations in a comprehensive program brought together "representatives of the great national con-sumer and retail organizations in a comprehensive program for the development of standards for goods sold at retail. Important undertakings have already been started in this field and the program has unlimited possibilities." In a summary of the proceedings at the meeting the Association said, in part:

In speaking of the international work in which the Association is taking part, Mr. Barnum called particular attention to a recent request trom the Chamber of Commerce at Buenos Aires that a representative of the A. S. A. be stationed in the Argentine. "Industrial groups feel that this is advisable not only to increase the United States proportion of South American trade but even to protect the trade that we now have," he said

South American trade but even to protect the trade that we how have, be said. Mr. Barnum also called attention to the 14 active projects in the building field, to the beginnings of work for the prevention of occupa-tional diseases, and to the newly-organized Highway Traffic Standards Committee which is bringing together 17 national organizations and Gov-ernment groups interested in safety standards for traffic. "Twenty years ago this October," Mr. Barnum pointed out, "the American Standards Association was organized by industry for a definite purpose. It has today reached a point where it is providing services which industry cannot do without.

"We have 20 years of successful operation to our credit; we have methods that are tried and found good; we have acknowledgment by industry of the worth of the work; we have the confidence of industrial executives, regulatory bodies and enforcement officers who have used the standards and safety codes."

and safety codes." Reporting briefly, F. M. Farmer, Vice-President of Electrical Testing Laboratories and Chairman of the Standards Council of the American Standards Association, announced that during the year 21 new standards and 24 revisions of existing standards have been approved. Eleven of these are in the paint field, several in the petroleum, and several in the clustrical field. electrical field.

Edmund A. Prentis of the firm of Spencer, White & Pren-tis, New York, was elected President of the Association at the meeting. Mr. Prentis, a trustee of Columbia University, served for three years as Vice-President of the American Standards Association and as a member of the Board of Directors since 1935. R. E. Zimmerman, Vice-President of the United States Steel Corp., was elected Vice-President of the A. S. A. F. M. Farmer, Vice-President of the Elec-trical Testing Laboratories, New York, was reelected Chair-man of the Standards Council, which is in charge of stand-ardization activities of the A. S. A., and R. P. Anderson of the American Petroleum Institute, New York, was reelected Vice-Chairman of the Standards Council. Edmund A. Prentis of the firm of Spencer, White & Pren-

Real Estate Association Urges Strengthening of State License Laws—Convention Adopts Resolution to That Effect—After Hearing Arguments on Patman Anti-Chain Bill, by Representative Patman and Prof. Nystrom, Delegates Approve Resolution Prof. Nystrom, I Opposing Measure

The National Association of Real Estate Boards, in resolutions adopted at its recent annual convention in Milwaukee, endorsed resolutions strengthening the real estate license laws of the various States by raising the real estate license laws of the various States by raising the qualifica-tions required of licensees both as to knowledge and as to apprentice experience in the real estate business. While the convention was held early in November, the text of the relative to the meeting appeared in our issue of Nov. 26, near 2945 page 3245.

During the convention the delegates heard Representative Patman of Texas in an address on Nov. 9 in which he pre-dicted the adoption of the Patman Anti-Chain bill at the coming session of Congress. On the same day Paul H. Ny-strom, Professor of Marketing at Columbia University, criticized the bill in a speech before the convention which, on Nov. 12, adopted the following resolution:

On Nov. 12, adopted the following resolution: Whereas, it is probable that a bill will be introduced in the next Congress which would impose upon chain store organizations operating in more than one State punitive taxes which would compel their dissolution or their reorganization; Whereas, skilled management of chain store organizations has tended to improve the character of retail districts, to stabilize land values and thus has contributed directly to the stability of real estate and local govern-mental revenue:

al revenue;

Mencial revenue; Whereas, disruption of this method of merchandising would occur if legislation of the character proposed were enacted by Congress and would entail a widespread disorganization of commercial property use and a conse-quent dislocation of real estate values in the business centers and sub-centers of every American city, involving for municipal governments a direct loss of taxable values and adversely affecting business recovery; Now, therefore, be it resolved, that this Association express the members of Congress its conviction that the contempt of Reduct heighting the

Now, therefore, be it resolved, that this Association express to memours of Congress its conviction that the enactment of Federal legislation of the kind contemplated by the proposed Patman Act is not in the public interest and would, if enacted, be harmful to normal development of our economic and community life.

After noting the adoption of resolutions favoring the strengthening of real estate license laws, an Association report under date of Dec. 3 said:

Such license Acts, adopted in 31 States, the District of Columbia and Hawaii, have shown their value in protecting the public from fraud and, what is equally dangerous, ignorance on the part of real estate operators, the resolution points out the resolution points out.

the resolution points out. The Association, which as one of its earliest services to the calling of real estate brought about the drafting of a model real estate license Act (the MacChesney Act, which, under the leadership of local real estate boards and State real estate associations, have become the basis of practically all the existing license legislation in the field), pledged itself formally to continue to assist its member boards and State associations to secure the protection afforded by real estate license laws in those States not now having them. not now having them.

In six States not yet under such legislation a measure for the licensing of real estate brokers and salesmen is expected to be before the Legislature at its coming session.

Representative Patman in his address stated, in part:

Congress will meet Jan. 3, 1939. A bill, which will be numbered 11. R. 1, has already been filed. This bill will be introduced by a number

of Members of Congress, including myself, from a number of States. There is a similar bill pending in the present Congress. It is numbered H. R. 9464. The object of this proposal is to restrict interstate chain stores to a smaller area or to the boundaries of one State. The method of approach is through taxation for the reason that those of us who have studied this question believe it is the only safe constitu-tional annuach to the problem of dealing with interstate chain stores....

tional approach to the problem of dealing with interstate chain stores ... No one can present reliable figures showing that the number of inde-pendent stores has increased in lines of business in which the prominent interstate chains are engaged and in the areas in which they operate;

There are about 1,500 retail chain companies in the United States. The average chain company owns 35 retail units, and will hardly be affected by this proposal.

affected by this proposal. There are about 20 interstate chain store companies, however, that will be affected seriously if this proposal becomes a law. They will not be allowed to break up into State corporations under one holding company without being subject to the tax. It will, therefore, be necessary for them to dispose of their unprofitable units, which will be those outside of the boundaries of one State. Our bill proposes that the interstate chains have two years within which to liquidate their unprofitable units. I am not insisting upon any certain period of time; in fact, I will be willing to agree to a much longer period of time.

period of time

The chain store question does not constitute a battle between persons. We are engaged in an attempt to correct an uneconomic system.

Upon enactment into law, this bill will provide:

Upon enactment into law, this bill will provide: 1. Needed revenue foi old age assistance. 2. Employment for more than 1,000,000 people. 3. Reasonable security to small business men. 4. Compensation by payment of taxes to State and Nation by absentee owners who today are hogging valuable local privileges. 5. Lower retail prices through clean competition. 6. Benefits to farmers and small manufacturers, because there will be more buyers for their products. This is the direct opposite of the monopolistic picture. 7. It will not apply to voluntaries and cooperatives composed of individually owned stores.

This bill is designed to break the vast monopolistic chain store system of the United States into smaller groups, and to confine the retail distribu-tion of these groups practically within the limits of individual States. Professor Nystrom, addressing the meeting on "The Fal-lacies of Anti-Chain Store Taxation," had the following to

lacies of Anti-Chain Store Lakation, have the say, in part: We are told in flaming words that the chains are monopolies and that they are driving independent retailers out of business, in spite of the fact that every public census of distribution continues to show that the number of independent retailers is greater than before and that the volume of business done by independent retailers is gaining in proportions. We are told about "absentee ownership." Absentee ownership are bad-sounding words. They are apparently intended to suggest the evils suffered under some odious tenant system in agriculture. We may note, however, that the complaints of abuses from absentee landlordism come from the tenants and not from their competitor farmers and laborers. Here, we

that the complaints of abuses from absentee landlordism come from the tenants and not from their competitor farmers and laborers. Here, we have very few, if any, complaints from the managers and employees of the chains under this so-called absentee ownership system. Only recently the American Federation of Labor, at its annual conven-tion in Mr. Patman's own home State, passed a resolution opposing the bill. Speaking for 5,000,000 wage earners throughout the country, it declared that the destruction of chain stores "would dislocate upwards of 1,000,000 wage earners" and condemned and disapproved "the Patman bill and all forms of taxation which prostitute the taxing power of the Government to a weapon for the destruction of worthy enterprise by business rivals." Even the Texas Newspaper Publishers Association, the Southwide Association of Texas, and the Texas Federation of Labor, all in Mr. Patman's own State, have condemned his measure as a menace to the Nation's standard of living. Let us see what will actually happen if the Patman bill becomes a law;

Let us see what will actually happen if the Patman bill becomes a law: (1(If the chain stores are driven out of existence, there will be higher

Roger W. Babson on Umenployment Problem—Spiri-tual Rebirth of Employers and Wage Earners Required He Says to Put Unemployed Back to Work

"To put the final 3,000,000 unemployed back to work requires a spiritual re-birth on the part of employers and wage-workers," said Roger W. Babson in addressing the Penn Athletic Club in Philadelphia on Dec. 8, when he discussed the subject "Can Unemployment be solved?" "By spiritual re-birth," said Mr. Babson, "I mean the long-range spiritual re-birth," said Mr. Babson, "I mean the long-range thinking of the good of the country as a whole, rather than the temporary comfort and profit of us as individuals. Men do not work for bread alone and this applies to all classes, including employers, wage-workers, and investors. These people are now lacking faith in God and man. Only as their faith is revived will new industries be developed, new mills be built and this remaining 3,000,000 be put to work. In his address, Mr. Babson, conceding that "President Roosevelt has done many good things," went on to say in part.

part:

President Roosevelt, however, has done nothing to eliminate the causes for unemployment. About one-third of our 9,000,000 unemployed are idle for one or more of the following six reasons:

Women in industry, while men are refusing to take their places as 2. Labor Unions which are forcing employers to install automatic machin

ery which temporarily throws more out of work. 3 Loss of Foreign Trade through high tariffs, excess labor costs, and

4. High School Instruction which is creating the desire for an easy life "is without struggle or sacrifice.

5. Foolish Legislation attempting, artificially, to fix prices, wages and hours of work, based upon socialistic propaganda which scares people from

hours of work, based upon socialistic propaganda which scares people from investing in new enterprises. 6. Constantly widening breach between the birth rate of the employing and wage-earning strains. The unemployment problem will never be solved until the employing strain increases its birth rate, while those dependent upon others employing them reduce their offsprings.

According to Mr. Babson "the cure for these six unfortunate factors will come slowly, although a return to normal business will absorb a large proportion of these first 3,000,000 unemployed."

Gerard Swope Says Engineers Should Work for Welfare of Working Man—Head of General Electric Co. Calls New York State Unemployment Insurance Law "One of Worst in Union" in Testifying Before **Albany Committee**

Gerard Swope, President of the General Electric Co., in testifying before a New York State joint legislative com-mittee hearing at Albany on Nov. 30 declared that the State's unemployment insurance law is "one of the worst in the Union." As the only witness before the joint legislative committee studying industrial-labor relations and the worth of the profit-sharing systems. Mr. Swope asserted real cooperation between employer and employee will not come "by mandatory law." This was noted in the Albany "Times-Union" of Dec. 1, from which the following is also taken:

Mr. Swope, who was Chairman of President Roosevelt's commission which recently studied labor relations in England and Sweden, said a "voluntary compliance" should feature industry-labor agreements. He told the Committee that in England and Sweden mediation is "offered"

He told the Committee that in England and sweden memators is outside by the Government "but you don't have to accept it or be bound by the findings." Asked by a committee member whether he thought Government here is "fair and impartial" in dealing with labor and industry, Mr. Swope replied: "Of course they're not." "There is shown by the conception of the National Labor Relations Board that the (labor relations) Act was only for the protection of labor," he said. "I don't mean all agencies of Government are unfair. The mediation Board is eminently fair."

mediation Board is eminently fair." Describing unemployment insurance law as the "worst in the Union," Mr. Swope said mutual responsibility of employers and workers is "not entirely possible" under existing statutes. He declared that under the Act the "entire burden is carried by the

"You're not going to have any responsibility by labor unless it is in-terested in the administration of the Act. And you can't have that unless some of their money is involved."

From Associated Press advices from Albany we quote:

Asked whether self-regulation of industry was possible under the existing State and Federal laws, Mr. Swope asserted that it was "not imposible

State and rederal laws, Mr. Swope asserted that it was not impositive but difficult." "There has never been a time," he said, "when you could get unanimity among employers on the question of labor relations." This, he continued, was because of "fear of the law as it exists." Discussing the sufficiency of profit-sharing systems to bring about co-operation between employers and workers, Mr. Swope said it "was not encurch it test".

"It is very desirable," he added, "and we—General Electric Co.-practice it when there are any profits to share."

practice it when there are any profits to share." The State unemployment insurance fund is created through an annual tax of 3% on employers' payrolls. Speaking before the annual meeting of the American Society of Mechanical Engineers in New York City on Dec. 6, Mr. Swope said that the welfare of the working man should be one of the principal aims of engineering, and that engineering skill should be applied toward the creation of an industrial democracy within the framework of a political democracy. In quoting from his speech, the New York "Times" of Dec. 7 said in part:

Much of the industrial strife of recent times, Mr. Swope declared, could have been avoided had the engineers realized that their skill must be ap-plied to the men operating the machines as well as to the machines them-selves

must be sought.

must be sought. "This means patience and appeal to the reason and the goodwill of the individual. If this groundwork is well laid, then in time efficiency, as well as the happiness and well-being of the individual, may be secured. "In this way we can come nearer to the ideal that we have endeavored to build up socially, by having not only a political deomcracy butalsoan industrial democracy." See Einsticity Demonstrated

See Elasticity Demonstrated

See Elasticity Demonstrated Because of the work of the engineer, Mr. Swope said, industry in America was able before, during and after the National Recovery Adminis-tration days to shorten the work week materially, with increased wages, and now, again, "to accept the minimum wage and maximum hours that are being imposed by law, without the disruption of industry, such as has occurred in other places where similar laws were put into effect." "A beginning in social security legislation has been made, but this work has not reached a finality, either in scope or method. Much remains still to be done. Greater understanding of objectives and better methods for accomplishing the desired results still lie ahead of us."

Livestock Handlers at Chicago Stockyards Return to Work Ending Strike—Company Agrees to Sign Written Contract

A strike of livestock handlers, which had closed the Chicago stockyards since Nov. 21, was terminated on Dec. 5 when the strikers returned to work under a ten-day truce agreement, pending further negotiations. An adjustment of the differences was reached on Dec. 4, when Henry

Johnson, organizer for the Packing House Workers' Organiz-ing Committee, said union men had voted unanimously to return to work after officials of the Union Stockyards & Transit Co. agreed to enter into a written contract.

The following, regarding the return to work of the strikers, is from the Chicago "Journal of Commerce" of Dec. 5:

The following, regarding the return to work of the strikers, is from the Chicago "Journal of Commerce" of Dec. 5: Approximately 575 workers will have returned to work today and opera-tions are expected to be at a normal rate of activity. Halling the company decision as an "historic victory" for workers in the meat packing industry, Henry Johnson, Assistant National Director of the Packinghouse Workers Organizing Committee, stated that the company would be given ten days in which to reach the written agreement. "If an agreement isn't reached by that time, we'lı call the men out again," he said. Mr. Johnson also said that "approximately fifteen men" affiliated with the American Federation of Labor would be given ten days in which to join the Committee for Industriai Organization. "The men refuse to work whith them," he said, "and we'll give the n ten days to join up or get out of the union." The C. I. O. union accused A. F. of L. men of attempting to "scab" while the strike was in progress. O. T. Henkle, General Manager of the Union Stockyards and Transit Co. said, "The company is glad to have each man return to his post where he left off and report at his usual hour and place." Prelude to the vote of the union to return to work was a written state-ment from the company agreeing to: 1. Recognize the P. W. O. C. as sole and exclusive bargaining agent for all appropriate employes coming within the category of the union. 2. Continue negotiations on the union demands regarding wages, hours, working conditions and other conditions of employment. 3. Sign a mutual agreement as a result of such negotiations. Negotiations for settlement of the strike were referred to

Negotiations for settlement of the strike were referred to In our Dec. 3 issue, page 3392.

Strike at Fisher Plant in Flint, Mich., Ended-Dispute Involved 25,000 Auto Workers -Wage

Dispute Involved 25,000 Auto Workers Settlement of the strike at the Fisher Body Plant No. 1 in Flint, Mich., was announced on Dec. 5 by the General Motors Corp. The strike was called on Dec. 2 by the United Automobile Workers of America, a Congress of Industrial Organizations unit, in a dispute over the demands of workers in two departments of the plant for day wages instead of piece-work rates. At the start of approximately 6,400 Fisher employees and 3,000 workers on the final assembly line of the General Motors Buick division at Flint were af-fected. fected.

On Dec. 5 the members of Flint Local 581 voted to accept the settlement negotiated by Homer Martin, President of the U. A. W. A., and returned to work on Dec. 6. The following is from an Associated Press Dec. 6 dispatch from Flint, Mich.:

Flint, Mich.: Directly or indirectly more than 25,000 workers were affected by the strike as result of the closely geared production machinery of various General Motors Corp. units. The Fisher plant force here, directly involved, numbers approximately 6,400 men. Buick operations were soon curtailed, however, and 14,000 of their workers became idle. The interruption finally extended yesterday (Dec. 5) to 600 Fisher Body Co., plant workers in Pontiac , Mich., and today to approximately 5,000 Pontiac Motor Co. men in Pontiac. It was announced this morning that the Fisher No. 1 plant was operating at 90% of normal and that Buick was operating normally. Pontiac was expected to resume work tomorrow (Dec. 7).

A. W. Members Repudiate "Sit-Down" Strike of 300 Workers in Kenosha, Wis., Plant of Nash-Kelvinator Corp. U.

The unauthorized strike of 300 workers of the Kenosha, The unauthorized strike of 300 workers of the Kenosha, Wis., plant of the Nash-Kelvinator Corp., who went on a "sit-down" strike Dec. 1, forcing approximately 4,000 work-ers into idleness, was repudiated on Dec. 3 by a vote of local members of the United Automobile Workers Union, an affili-ate of the Congress of Industrial Organizations. The union voted to return to work on Dec. 5. On Dec. 2 the company announced that it had discharged the 300 men responsible for the cossertion of work but agreed the 300 men responsible for the cessation of work, but agreed to withdraw its order on Dec. 3 pending negotiations. Associated Press Kenosha advices of Dec. 3 described this action as follows:

advices of Dec. 3 described this action as follows: The corporation announced that it had received assurances from the local that the union would penalize members responsible for the unauthorized sit-down and any one responsible for any future unauthorized strikes. The sit-downers sought an increase in the piece-work rate. Union leaders and company officials met last night and reached an agreement for settlement of the dispute that started Thursday [Dec. 1]. The agreement was ratified overwhelmingly by the union meeting today, which was attended by 2,000 members, officials said. No mention of wages was made in the agreement between the company and the union committee. It was announced that any grievances would be handled through usual procedure.

The 4,000 workers of the Nash plant in Kenosha and approximately 2,600 employees of the Seaman Body Co., Milwaukee, Nash-Kelvinator subsidiary, who had been made idle because of the Nash plant strike, returned to work on Dec. 5.

National Association of Manufacturers Adopts "Pro-gram for American Progress" Co-Operation of Industry and Government Necessary to Insure Progress—Tax Revision Essential to Recovery

Progress—I ax Revision Essential to Recovery The National Association of Manufacturers which opened its annual Congress of Industry in New York City at the Hotel Waldorf-Astoria on Dec. 7, adopted unanimously on Dec. 8 its "Program for American Progress," in which it declared that "the first concern of business continues to be recovery and jobs." "America's progress" said the "Pro-gram" "depends upon a united effort of industry, commerce.

agriculture and labor in co-operation with the government." This was prefaced by the statement that —

This was pretacted by the buckshifts that the The United States is nearing the end of nine years of sharply arrested development in its economic life. Never before in our history has so long a period passed without re-cording a new high point in industrial production and individual well-being. It has been a period of trial and difficulty for even the most favored among us; of distress and anxiety for the less fortunes. Enterprise has been discouraged, the flow of new capital reduced and employment retarded; the resulting depression has borne down heavily on the typical American family.

"What industry suggests for America's future" was in-dicated as follows in the "Program"

While recognizing the necessity of unemployment relief, the primary obligation is to create healthy business by eliminating the causes of unemployment.

employment.
Desire for healthy business is not alone the interest of industry, but is likewise the vital concern of—
Every owner of a lot, a home, a farm.
The millions of industrial workers and all others who perform services, and who together receive 85% of the national income.
64 million holders of life insurance policies, since these are backed up largely by investments in private business.
44 million saving depositors.
10 million individual stockholders in American companies.
6 million investors in building and loan associations.

6 million investors in building and loan associations. Industry pledges its best efforts in this national endeavor, including detailed review of its own operations and policies and full recognition of

detailed review of its own operations and policies and full recognitits social responsibilities.
Industry's program includes specific suggestions with respect to:

Business responsibility.
Labor relations.
Tools for more jobs.
Purchasing power.

Regulation versus control.

(6) Taxes.

(7) Government economy. (8) Government competition.

(9) Foreign trade.

Under the heads "Business Responsibility" and "Govern-ment Competition" the "Program" stated:

Business Responsibility

Business Kesponsionity Business men generally are aware that their human responsibilities in-clude the operation of business with regard for the best interests of cus-tomers, employees and stockholders, and with recognition at all times of the rights of the public. Such policies contribute to understanding, promote harmony and thus tend to increase jobs and raise living stand-ards. Industrial management should therefore— 1. Interest itself actively in the economic and social needs of the times, present suggestions to meet the problems involved, and tell the story of industry's views and accomplishments to the public.

present suggestions to meet the problems involved, and tell the story of industry's views and accomplishments to the public.
2. Publish frequently simple and informative statements concerning financial and other operations, in order to interest both employees and stockholders more directly in company problems and operations.
3. Consistently maintain quality standards; develop and improve products offered by means of market research, technical research and experimentation; make price adjustments as rapidly as improved manufacturing processes and other economies will permit without injustice or injury to employees, creditors and owners, including stockholders.
4. So manage its financial, inventory and customer credit policies as to effect the maximum volume of production, distribution and employment that can be maintained continuously.
5. Maintain sound relations with its employees as set forth in the following section of this program.

Maintain sound relations with its employees as set forth in the following section of this program.
 Conduct its business so that it is at all times a desirable citizen of the local community in which it operates.
 Encourage effective functioning and co-operation of associations to consider community, State and national problems.

Government Competition

The function of the government is primarily political, not economic.

The function of the government is primarily political, not economic. It was neither conceived nor constructed to compete with its own citizens in the production and distribution of the things used by the people. Government business will invariably destroy private business when in competition with it. Private enterprise cannot compete successfully with enterprise carried on by government. In the final analysis deficits when created by government enterprise are always paid by the taxpayer. If and when public enterprise is undertaken, the field in which it is to operate should be clearly defined and shut off from the area in which private enterprise functions.

private enterprise functions. Continuing and increasing government competition with private en-terprise is a major deterrent to the flow of job-creating capital into business.

The Program adopted, said the New York "Times" of Dec. 9 it represented a compromise between those who wanted to tell government and labor once more to get out of the way of industry and those who believed that co-operation finally had become the only way. In part the "Times" also said:

"Times" also said: The cooperators prevailed in the resolutions committee of the Manu-facturers Association by about the same 10% margin that President Roose-velt seemed to have in the recent election and opinion polls. The resolutions committee, consisting of 63 industrialists selected as the most representative of American manufacturing enterprise, came to agree-ment on the document that they reported yesterday only by taking points out of contradictory drafts submitted.

In the "Times" of Dec. 9 that a program of tax revision, viewed as essential to recovery, was adopted by the Congress of American Industry on Dec. 8 after presentation of a report by A. G. Spalding, Chairman of the Committee on government finance of the National Association of Manu-facturers. A vital feature of the program is a broader in-come tax base said the "Times" from which we also quote:

Recommendations of Mr. Spalding's committee for the tax policy adopted Recommendations of Mr. Spating's commence for the tax points by the congress were: "Broadening of the income tax base. "The elimination of the tax on intercorporate dividends. "Taxation of corporate profits at a uniform rate. "Elimination of what is left of the tax on undistributed profits. "Elimination of the normal individual tax on dividends.

Permission to file consolidated returns. "Corrections in the statutory definitions of net income, improved treat-ent of inventory profits and losses, and simplification of depreciation." m

At the Dec. 7 session Charles R. Hook, President of the American Rolling Mill Company, pleaded for peaceful co-operation among government, labor and the management of industry said the New York "Herald Tribune" which observed:

Mr. Hook offered five suggestions of pessible common ground on which these three forces might co-operate, the major suggestion being "increased production to reduce unemployment."

Senator Joseph C. O'Mahoney, Chairman of the Tempor-ary National Economic Committee, which is conducting the Washington inquiry into so-called "Monopolies" addressed the Congress on Dec. 8 at which time he stated that both private monopoly and totalitarian control of business by the State are equally objectionable to Americans. In part the "Times" added:

Instead, he said, the efforts of government and people must be bent toward the preservation of competition in a form which while retaining the advantages of private enterprise at the same time would conserve also the public interest

the advantages of private enterprise at the same time would conserve also the public interest. Success of these efforts cannot be attained, however, by permitting business to regulate itself without "government interference," Senator O'Mahoney declared, for to do so would be to permit one element in society "to draw rules which will affect all others." "This," the Senator said, "is the method by which trade associations have sometimes sought to exploit the public by fixing prices, limiting production or attempting to exclude newcomers from the field." To preserve healthy competition and at the same time retain the ad-vantages of large-scale business organization, the cooperation of agriculture and industry, labor and investor, producer and consumer is essential, Senator O'Mahoney maintained. Stand in "Bewildering Crisis" "We cannot succeed one without the other," he said. "We stand to-gether in a bewildering crisis with the world rushing headlong backward to the doctrines of hatred and force. Ours is the opportunity to teach the world that only a free progress governing themselves with tolerance and good-will can achieve a lasting prosperity."

3,600 Employees of Chrysler Plant in New Castle, Ind., Return to Work, Ending Strike

Ind., Return to Work, Ending Strike Employees of the Chrysler Corp. factory in New Castle, Ind., to the number of 3,600, returned to work on Dec. 5, ending a strike which had been in progress since Dec. 1. The plant was closed because of a dispute between the United Automobile Workers of America, a Congress of In-dustrial Organizations affiliate, and the Die Sinkers Union of the American Federation of Labor. The C. I. O. union claims that 98% of the plant's employees are its members and that it was seeking 100% organization. Representatives of the Die Sinkers Union said that negotiations on the ques-tion of affiliation of their organization with the C. I. O. would be continued further.

Grocery Manufacturers Adopt Resolutions Opposing Laws Aimed to Bar Chain Stores—Annual Con-vention Hears Addresses by Senator O'Mahoney, Fred I. Kent, W. L. Thorp, and Others Resolutions adopted Nov. 30 by the Associated Grocery Manufacturers of America, Inc., in the final session of their three-day convention in New York City, included an attack on the Patman Anti-Chain bill, which is scheduled to be re-introduced during the forthcoming session of Congress. The resolution in question did not mention the measure directly, but criticized "Federal or State legislation which is purposed and effective, either directly or indirectly, arbi-trarily to prohibit or limit any mode of business." Fred I. Kent, director of the Bankers Trust Co. of New York, told the convention on Nov. 29 that it is useless to hope for an increase in the issuance of new securities until the most important uncertainties which face business are removed.

Temoved. The following regarding the meeting is from the New York "Times" of Dec. 1:

"Parade of Progress" Planned

"Parade of Progress" Planned Most of the day was given over by the delegates to an executive session, at which Paul S. Willis was reelected President and resolutions summarizing the three days of discussions were adopted. A feature of yesterday's pro-gram, however, was a special luncheon at which 800 members and their guests cheered the announcement of plans for an industry-wide "Parade of Progress" promotion of nationally-known brands to be launched April 6. Cooperation of all divisions of the industry, including manufacturers, brokers, wholesalers, voluntary and corporate chains, organized independent grocers and super-market operators, was pledged for the project.

Tax Measures

In its resolution on discriminatory tax measures the organization stated:

In its resolution on discriminatory tax measures the organization stated: "Industrial democracy is a fundamental principle of the American plan of govern-ment. The application of this principle means freedom of business in ordinary trade, subject to that legislative regulation which is required to maintain a com-petitive order, to assure fair dealing and relationships, and otherwise to protect or promote the public welfare. And the exercise of that freedom, subject to this restraint, is essential to the economic and social well-being of the country. "Therefore, Be II Resolved by the Associated Grocery Manufacturers of America, inc., that it condemns Federal or State legislation which is purposed and effective; whether directly or indirectly, arbitrarily to prohibit or limit any mode of business." Senator Joseph C. O'Mahoney of Wyoming, Chairman of the Temporary National Economic Committee investigating monopoly, addressed the convention on the subject of "Gov-ernment and Business." According to the "Times," Senator O'Mahoney said that business in this country has grown so great that State lines no longer exist and, therefore, the Federal Government has been fully justified in regulatory measures. These measures at present are not aimed at

restraining business, he said, but are designed to help business to expand, it was noted in the "Times," from which

the following is also taken: In every instance where State powers have been turned over to the Federal Government, he [Senator O'Mahoney] asserted, it was solely for the purpose of stabilizing and helping business. Conditions have changed with the years, he went on, and business is no longer local. Most trade is done through centralized groups, catering to a population which has grown increasingly urban. Because of this fact, he said, we have been unable to cope with the unemployment problem. Neither business nor government alone can solve the problem, he said, appealing for cooperation between government and business without hatred, ill-feeling or name-calling as a means to solution of all problems and as a means to liberty, which he said was earnestly desired by 95% of the people.

people. The opening session was described, in part, as follows in the New York "Journal of Commerce" of Nov. 29: An institute devoted to food research, dedicated to the public health and maintained by the food industry, was the proposal laid before the annual convention of the Associated Grocery Manufacturers of America yesterday by its general counsel, Charles Wesley Dunn. The speaker also indicated that the industry should make "every reasonable and consistent effort to cut food costs in order to lower food prices" as one objective of counting the third statement.

effort to cut food costs in order to lower food prices" as one objective of scientific research in this field. Consumer and industrial relations were discussed at the first day of the A. G. M. A. convention at the Hotel Waldorf-Astoria, a meeting which also marked the thirtieth anniversary of the Association. Remarking that "plerty of water had gone over the dam" since 1908, Paul S. Willis, A. G. M. A. President, said that membership in the Association today is the largest in its history. Membership requirements in the Association in the meanwhile have been steadily adhered to, Mr. Willis said. This requirement includes that a manufacturer's operations must reflect good management, satisfactory trade relations, consumer and employee relations, sanitary factory con-ditions, properly labeled merchandise, truth in advertising, and the like. *Labor Relations*

Labor Relations

Labor relations were discussed by a representative from another industry, bber manufacture, C. S. Ching of U. S. Rubber Products, Inc. rubber m

The "Wall Street Journal" of Nov. 30 reported principal addresses on the previous day as follows:

The "Wall Street Journal" of Nov. 30 reported principal addresses on the previous day as follows: Speakers at yesterday's session included W. T. Kelley, chief counsel of the Federal Trade Commission, and Dr. Willard L. Thorp, Special Adviser on Economic Studies of the Department of Commerce. Mr. Kent pointed out that in the first 10 months of 1937 the railroads issued \$224,000,000 of new securities, but for the like 1938 period only \$15,000,000. "The issuance of new corporate securities comes about because business and industries in the United States wish to expand to meet expected future needs or for the purpose of establishing new enter-prises," he said. "During the 1920s average new issues a year were about \$7,000,000,000. For the first 10 months of 1937 the total of all new capital issues was only \$962,000,000, and this dropped for the same period of 1938 to \$614,000,00". Dr. Thorp told the gathering that during the last half dozen years there has been something of a groundswell challenging the belief of former years that large enterprises were efficient and were fairly desirable. This, he said, was in sharp contrast with the theory held during the 1920s, when people felt that the country was the gainer by big business. Mr. Kelley in his address declared that the requirements of the Federal. Trade Commission Act as amended by the Wheeler-Lea Act are plain and susceptible of no misinterpretation and the Commission is fully implemented with all the necessary machinery for requiring truthfulness and candor in advertising.

in advertising.

Annual Report of FTC—Recommends Amendment to Clayton Anti-Trust Act to Prohibit Acquisition by Corporations of Stock of Competing Companies —Would Not Apply Where Less Than 10% Interest Is Involved—Other Recommendations

Is involved—Other Recommendations In its annual report for the fiscal year 1937-38, submitted to Congress Nov. 29, the Federal Trade Commission renews its recommendation for an amendment to the Clayton Anti-Trust Act, broadening the scope of Section 7 of the Act. The report discusses the President's recommendation that a Government bureau should collect and publish current statis-tical and other information regarding market conditions and be in a position to warn against the dangers of temporary tical and other information regarding market conditions and be in a position to warn against the dangers of temporary overproduction, excessive inventories and other conditions affecting the welfare of business. Regarding its proposal as to changes in the Clayton Act, the Commission says:

Recommendation is renewed for amendment of Section 7 of the Clayton Act to make unlawful the acquisition by any corporation, directly or indirectly, through a holding company, subsidiary, or otherwise, of any of the stock or assets of a competing corporation, when either is engaged in

indirectly, through a holding company, subsidiary, or otherwise, of any of the stock or assets of a competing corporation, when either is engaged in interstate commerce. At present Section 7 declares to be unlawful the acquisition by one corporation of the capital stock of a competing corporation, and in the case of holding companies, of the capital stock of two or more corpora-tions competing with one another, where substantial lessening of competiton may result. It does not prevent the acquisition of physical assets with similar results. Elimination of competition by acquisition of physical assets is a method increasingly employed by corporations. The Commission suggests that Section 7, if amended as recommended, should not apply where the corporations involved control, in the aggregate, less than 10% of the stale of a commodity as to which the corporations are in competition, unless the effect of the acquisition may be to restrain competition or tend to create a monopoly in any line of commerce. This amendment would have the advantage of creating a positive legis-lative standard, defining the limit at which corporate accretions in size and power through such acquisitions shall be halted in order to prevent monopoly.

monopoly.

The Commission's further recommendations are indicated as follows:

Periodic Industry Reports

The Commission has been identified for many years with the proposal to collect and publish current industry reports, and is fully implemented

with expressly granted powers to perform this work. However, it has not been able to use these powers effectively because of lack of appropria-tions, and has recommended at different times to the Director of the Budget and to the appropriation committees of Congress that it be per-mitted to undertake such activity.

Amendment of the Federal Trade Commission Act

The report lists the principal amendments to the Federal Trade Commission Act mission Act as contained in the Wheeler-Lea Act of March 21, 1938. In connection with the false advertising provisions of the Act as amended, the Surgeon General of the United States Public Health Service has detailed a commissioned medical officer to the Commission, who will act as adviser and consultant with respect to all matters relating to food, drugs, devices and consultant with respect to all matters relating to food, drugs, devices and cosmetics.

Trust Laws and Unfair Competition Abroad

The report contains a brief review of legislative, judicial and adminis-trative measures pertaining to business and industry as enacted or promul-gated in 32 foreign countries or dominions during the last year or more. A concise and comprehensive picture of world trends in trade and industrial law is presented. The trend toward Government control of industries is apparent in many of these summaries.

The Commission indicates as follows its outstanding

activities during the year: Outstanding activities reported include general investigations; general legal activities under the Federal Trade Commission, Clayton, Robinson-Patman and Webb-Pomerene Export Trade Acts, trade practice conferences and investigation of radio and periodical advertising:

General Investigations

utenerus investigations Investigation of the agricultural implement and machinery industry was com-leted and a report transmitted to Congress and printed. Reports on the (1) agricultural income, and (2) fresh fruits, vegetables and grapes ivestigations, completed in the last preceding year, were printed. Investigation of the motor vehicles industry was in progress at the close of the scal year. DI inves In

Investigation of the motor vehicles industry was in prostant in the second seco

General Legal Work

General Legal WORE The Commission completed approximately 1,800 investigations in pre-liminary cases; approved 576 stipulations to cease and desist from unfair practices, and issued 305 complaints and 246 orders to cease and desist. Two hundred and eighty-eight of the complaints charged violation of Section 5 of the Federal Trade Commission Act prohibiting unfair methods of competition and unfair or deceptive acts or practices in commerce.

Robinson-Patman Anti-Discrimination Act

Robinson-Patman Anti-Discrimination Act Since passage of the Robinson-Patman Act, on June 19, 1936, the Com-mission instituted 515 field investigations of alleged violations of the statute; 486 of this number represented separate cases while 29 were reinvestigations or supplemental inquiries. As of June 30, 1938, the Commission had completed 345 investigations, of which 321 were separate matters and 24 supplemental inquiries. Twenty formal complaints charg-ing violation of the Act were issued during the year. The Robinson-Patman cases cover a wide range of producing and dis-tributing industries and of commodities, and provide a substantial cross-section of pricing and merchandising practices in current use.

Cases in the Courts The Commission was successful in 18 cases before various Federal courts. Fourteen of these were before the United States Circuit Courts of Appeals, two were before the United States District Courts, and two before the Supreme Court of the United States.

Appeals, two were before the United States District Courts, and two before the Supreme Court of the United States. The Commission was unsuccessful in four other cases brought before the United States Circuit Courts of Appeals, although it was sustained in one of these upon appeal to the Supreme Court.

Export Trade Associations

Export Trade Associations Forty-four export trade associations organized under provisions of the Webb-Pomerene or Export Trade Act had papers on file with the Com-mission as of June 30, 1938. Shipments by such associations in 1937 increased approximately \$50,000,000 over their exports in 1936.

Radio and Periodical Advertising Review

Examination of radio, newspaper and magazine advertising for false and misleading representations and the disposition of cases resulting from such scrutiny was continued by the Commission through its Special Board of Investigation, now known as the Radio and Periodical Division.

Trade Practice Conference Proceedings

Trade practice conference proceedings advanced to the stage of final promulgation of rules for 11 industries having an annual volume of sales estimated to be more than a billion dollars.

The members of the Commission are: Garland S. Fergu-The members of the Commission are: Garland S. Fergu-son of North Carolina, Chairman; Charles H. March, Minne-sota; Ewin L. Davis, Tennessee; William A. Ayres, Kansas, and Robert E. Freer, Ohio. Chairman Ferguson is the Commission's representative on the National Economic Com-mittee conducting the monopoly investigation. Commis-sioner Davis is the Commission's alternate representative.

Death of Peter J. Maloney, Member of New York Stock Exchange for Last 29 Years—Served on Board of Governors of Exchange from 1919 to 1937

Governors of Exchange from 1919 to 1937 Peter J. Maloney, a member of the New York Stock Ex-change for the past 29 years and a Governor of the Ex-change from 1919 to 1937, died on Dec. 3 at his home in New York City. Mr. Maloney was the senior partner of the Stock Exchange firm of Block, Maloney & Co. He was also a former member of the Chicago Board of Trade. During Mr. Maloney's term as a Governor of the Exchange he served on the committees of Admissions, Arbitration, Pub-lic Relations and Business Conduct. Mr. Maloney was Vice-Chairman of the Arbitration Committee from 1929 to 1930, and Chairman of that committee from 1930 to 1937. The following is from a Stock Exchange announcement in the matter:.

Mr. Maloney was born June 22, 1875 in Chicago, Illinois. Following graduation from Chicago public school, Mr. Maloney commenced his busi-ness career, at the age of 14 with Robert Lindblom & Co., members of the Chicago Board of Trade. He remained with that firm until 1893,

when he became associated with John C. Ross & Co., also members of the Chicago Board of Trade. In 1899 Mr. Maloney became associated with Finley Barrell & Co., for whom he acted as a wheat trader in the Chicago "pit," and in 1909 he was also elected to membership in the New York Stock Exchange.

Will of Clarence H. Mackay Head of Postal Telegraph & Cable Corp. Probated
The will of the late Clarence H. Mackay, head of the Postal Telegraph & Cable Corp., who died on Nov. 12, was probated in Surrogate's Court at Mineola, N. Y., on Dec. 7. Mr. Mackay left \$2,050,000 in cash or securities to his wife; \$25,000 each to one friend and eight grandchildren, and the rest of his estate to be divided equally among his three children. His house in New York City is left to his wife. The value of the estate was not given in published reports. The death of Mr. Mackay was reported in the "Chronicle" of Nov. 19, page 3103. In announcing the fiting of the will, the New York "Sun" of Dec. 7 said:
To his widow, the former Anna Case, the singer, he left \$50,000 in

the New 10rK Sun of Dec. 1 shall: To his widow, the former Anna Case, the singer, he left \$50,000 in cash to be paid to her immediately. He also directed that she receive in cash or the equivalent in stocks, bonds or other securities, an additional \$2,000,000. Mrs. Mackay also is to receive the Mackay town house at East 75th street as well as all its furnishings with certain stated exceptions. Mrs. Ellin Mackay Berlin, wife of Irving Berlin, the widely known song writer and two other children will share equally in the residuary estate, according to Mr. Mackay's will which was filed in Mineola Sur-rozate's Court today.

estate, according to Mr. Mackay's will which was filed in Mineoia Sur-rogate's Court today. Additional bequests were set forth in the will in behalf of Mr. Mackay's son John who, with his two sisters, was the child of Mr. Mackay by his first wife. The will directs that John Mackay shall receive certain of the New York city household furnishings upon Mrs. Mackay's death and that he shall receive the household furnishings, silver, automobiles, livestock, farm machinery, books, prizes, trophies, family portraits and other items on the Mackay estates at Harbor Hill and Gardiner's Island, L. I., and the Deep River Lodge at Jamestown, N. C.

\$25,000 Each to Grandchildren

\$25,000 Each to Grandchildren
In a codicil dated July 7 last, Mr. Mackay bequeathed to eight grandchildren the sum of \$25,000 each.
The grandchildren are John William Michael Mackay, Mary Rose Mackay, Marie Louise O'Brien, Katherine O'Brien, Morgan O'Brien Jr., Mary Ellin Berlin, Linda Berlin and Elizabeth Berlin.
Mr. Mackay said in his will: "I earnestly request my children to preserve as far as they are able any heirlooms which they may inherit from me and my mother and hand them down as far as may be practicable to their descendants with the same request.
"I give," says the will, "devise and bequeath all the rest, residue and remainder of my estate, of every kind and description, and wherever stituated, which shall belong to me or be subject to my disposal at the time of my death, as follows:

"To divide the same into as many equal parts as there shall be children

of mine surviving, and children of mine who shall pre-decease me leaving descendants me surviving, and I give, devise and bequeath one of such equal parts to each such child of mine me surviving, and one of such equal

equal parts to each such child of mine me surviving, and one of such equal parts to the descendants me surviving collectively of any such deceased child of mine, in equal shares, per stirpes and not per capita." Mr. Mackay explained his failure to include charitable bequests in his will by stating that during his lifetime he had made liberal donations to charitable, civic and philanthropic institutions. "I desire," the testament said, "that my legatee or beneficiaries be left free to do likewise without any special direction or suggestion from me."

The New York "Herald Tribune" stated:

The executors of the estate are Mr. Mackay's son and Frank L. Polk, former Acting Secretary of State; William J. Deegan, of 975 Park Avenue. New York City, and Milton Blackmar, of 31 North 22nd Street, East Orange, N. J. The Guaranty Trust Co. of New-York City was named as contingent executor, to act if, through death, the number of executors is reduced to two reduced to two.

Death of Martin Egan of Staff of J. P. Morgan & Co.-Those Serving as Honorary Pall Bearers

Martin Egan, a member of the staff of J. P. Morgan & Co. for 25 years, and a former war correspondent, died of a heart attack at his home in New York City on Dec. 7. Mr. Egan, who had been in failing health for five years, was 66 years of age. Thomas W. Lamont issued the following statement at the offices of J. P. Morgan & Co. regarding the death of Mr. Egan: death of Mr. Egan:

Martin Egan had been a loyal and devoted member of the firm staff for 25 years. With an intimate knowledge of the Far East and of many other lands, gained through his long journalistic experience, Mr. Egan had a world-wide host of friends, who were devoted to him and found joy in his wit and whimsical humor. Every member of our firm had for him the highest esteem and warmest affection.

highest esteem and warmest affection. It was noted in the New York "Times" that officially Mr. Egan was a liaison officer between the firm and the press and public, but actually his function in the banking house was much broader. He accompanied Mr. Lamont, a partner, to the Orient when the Chinese Consortium was arranged. Mr. Egan, who was born at Martinez, Cal. on June 18, 1872, was the son of James and Mary Canty Egan. He studied law, but, although admitted to the bar in California in 1898, he did not practice, entering newspaper work as a reporter for The San Francisco Chronicle. In its further accounts of his activities, the "Times" said: At the outbreak of the Spanish-American War he was sent to Manila.

At the outbreak of the Spanish-American War he was sent to Manila, arriving there shortly after the battle of May 1. He remained until the fol-lowing October and then returned to the United States to become New York correspondent of The San Francisco Chronicle. Mr. Egan left The Chronicle to join the staff of The Associated Press and the outbreak of the Japanese-Russian War found him in Tokyo in charge of the bureau. Melville Stone, in his book on The Associated Press, says: Long before the trouble between Russia and Japan had reached a critical stage 1 ordered Mr. Egan, then of our New York office, a gentleman of wide experience and rare ability, to Tokio to establish an independent bureau.

Praised for Work in Japan His work in Tokyo was an outstanding journalistic accomplishment. Mr. Sta

At Tokio, very early in his service, Mr. Egan established a relation with the Government which was easily more intimate than that of any other jcurnalist. His high sense of honor, his administrative ability and his tact were appreciated and soon won hin the confidence and esteem of the Japanese authorities. He was given official reports from the generals in the field several hours ahead of any other correspondent and his wishes in regard to the treatment accorded The Associated Press men at the front were respected in a remarkable manner.

Were respected in a remarkable manner. His cordial relationship with the Japanese Government enabled him to accomplish what the New York "Times" on Nov. 5, 1904, described as "one of the notable achievements in the annals of American journalism," This was the successful transmission of a story concerning the siege of Port Arthur by the Japanese before other news agencies had any official report. The story was 4,385 words of cable and ran 9,500 words as published. It required 14 hours to transmit. The dispatch was sent by Richmond Smith, The Associated Press man at the scene, but Mr. Egan made the arrangements for transmission. He first wanted to charter a steamer to take the dispatch from Port Arthur to Chefoe but the Japanese biotect

take the dispatch from Port Arthur to Chefoo, but the Japanese objected and countered with an offer to have a dispatch boat carry the message 90 miles "at their leisure."

Flew Own Flag on Junk

This was not satisfactory to Mr. Egan and he pressed the Foreign Office and obtained permission to send it on a junk which carried a white cotton flag bearing his initials, M. E., in red. The transmission cost of that one v was \$1.783.

flag Dearing ins initials, M. E., in red. The transmission cost of that one story was \$1,783. Mr. Egan had also covered the Boxer uprising, the Philippine insurrec-tion, the assassination of President McKinley, the American tour of Prince Henry of Prussia, the American and Canadian tour of King George V, who was then Prince of Wales; the trial of William Haywood at Boise, Idaho, and the Portsmouth peace conference. He had also headed The Associated Press bureau in London. He returned to Manila in 1908 to become publisher and editor of The Manila Times. He came back to this country in 1913 to become associated with J. P. Morgan & Co. When Henry P. Davison, another Morgan partner, became the head of the American Red Cross during the World War he asked Mr. Egan to go to Washington with him. Mr. Egan served there until shortly before the end of the war in 1918, when he became a civilian aide to General John J. Pershing in France. After the armistice he returned to the United States and resumed his duties with the Morgan firm. Mr. Egan was a member of the Players, India House, Dutch Treat, Coffee House and Brook Clubs in New York; Metropolitan Club at Wash-ington; Savage in London; Tokio Club and University Club in Manila. Funeral services were held yesterday (Dec. 9) in St. James

International Conference of American States Opens at Lima, Peru—Secretary of State Hull Confident that Meeting Will Mark Another Significant Milestone in Inter-American Solidarity

The eighth International Conference of American States opened at Lima, Peru, yesterday, Dec. 9, under the chairmanship of Secretary of State Cordell Hull. Secretary Hull, who arrived at Lima on Dec. 7, gave out a statement on that day in which he expressed himself as "confident that under the wise and statesmanike guidance of the Government of Peru the Eighth International Conference of American States will mark another significant milestone in the progress toward inter-American solidarity and understanding." Secretary Hull added:

I look forward with the greatest pleasure to renewing friendships with those with whom I have been privileged to work at previous conferences and to making new friendships. We are seeking common objectives on the general and fair assumption that what is for the common good will be to the advantage of each of us. It is in that spirit that, with the sympathy and support of all of our peoples, we may hope to carry forward our program of cooperation, con-sultation and friendship.

sultation and friendship.

Under date of Dec. 8 Associated Press advices from Lima said:

A series of informal conferences between Secretary Hull, chief of the United States delegation, and heads of the Latin American groups demon-strated that they were taking President Roosevelt's solidarity proposals with deep seriousness.

Some among the Latin American envoys believed the conference could bact concrete measures against political and cultural invasion from urope, but it appeared that Secretary Hull himself was feeling his way Europe,

Europe, but it appeared that Secretary new models and a secretary new models and secretary new models. By the series of informative talks he began last night soon after his arrival, the Secretary was said to be sounding out the attitude of all the other delegations before deciding to present any specific project for a united hemisphere.

Secretary Hull in a radio address on Dec. 8 over an National Broadcasting Corp. program, shared in by Foreign Minister Carlos Concha of Peru, said, according to a cable-gram to the New York "Times":

gram to the New York "limes": The forthcoming conference must attempt "to secure peace throughout the world and, as a corallary, preservation of our American institutions and our system of international relations based upon peaceful settlements of all international disputes," in Mr. Hull's belief. "We are determined that peace shall be maintained on the American continent," he declared, "and we are in agreement that any menace to that peace is a matter of concern to all of us. We shall seek to imple-ment and make more effective the measures already adopted to that end."

The cablegram also said:

Senor Concha devoted his time on the air to a defense of the present Peruvian Government.

Peruvian Government. "In vain detractors of the men who govern our country," he said, "try to surprise American conscience by attributing to the Peruvian people maintenance of a regime of despotism and oppression." Dr. Concha declared his Government had the backing of "an immense majority in the country." He said it maintained "absolute tranquillity," and that Peruvians and foreigners alike enjoyed the legal rights accorded by civilized nations. He pointed with pride to the Government's educa-tional program, highways, betterment of the indigenous population, irriga-tion works and relief of destitution. The Secretary of State and other delegates spent a busy day paying official calls and attending various receptions in their honor.

From Lima yesterday, Dec. 9, as the conference got under way, the Associated Press said:

As the delegations of 21 nations assembled for the formal opening of the conference, United States State Department officials whipped into shape a project to coordinate existing Pan-American peace, conciliation and consultation agreements into one accord.

At the same time the advices quoted stated that United States delegates to the conference expressed the belief that President Roosevelt's continental defense plan would be adopted as a resolution, and not incorporated in a pact.

adopted as a resolution, and not incorporated in a pact. Items bearing on the proposed conference appeared in these columns Nov. 19, page 3103 and Dec. 3, page 3396. At Guayaquil, Ecuador, Dec. 4, Secretary Hull en route to the conference pledged himself anew to efforts to stimulate trade among the American Nations, according to the Asso-ciated Press, from which we also quote: His statement, made during a brief visit to this country, had a back-ground of political and economic developments: Ecuador and the United States recently signed a trade pact, and Ecuador was the last of the Pan-American nations to accept an invitation to the coming meeting at Lima, Peru, to which Mr. Hull and the other United States delegates are traveling aboard the liner. Santa Clara.

"The development of a natural and prosperous international trade is of the utmost importance to large and small nations alike. The basis exists for such a trade among the American nations, and it is my sincere desire to contribute in every possible way to the further stimulation of that

"In this and in other matters of inter-American interest, I anticipate working with the representatives of Ecuador for those measures which are for our common good."

Beneficial Industrial Loan Corp. Creates Consumer Relations Committee—Announcement Made by Charles H. Watts

Charles H. Watts The formation of a Consumer Relations Committee was announced this week by Charles H. Watts, President of Beneficial Industrial Loan Corp. and its subsidiary, Per-sonal Finance Co. The function of the new committee, he said, is to advise the officers and directors of the companies under the Beneficial management on the needs of the gen-eral public in the field of consumer finance. The public point of view, he continued, should be "ably represented in our management and policy-making groups." In indicating plans respecting its Consumer Relations Council, Mr. Watts says: says:

Says: The Council as constituted at present consists of Leon J. Ingram, assistant to the President, Chairman; Dr. M. R. Neifeld, economist; David H. Finck, personnel director; C. V. Smith, advertising manager; F. C. Eibell, sales manager, and Alexander Williams, consumer relations counsel. All of these men are in constant touch with the public and, as members of the Council, it will be their duty to act as the representatives of the general public in the policy-making and management groups of this organization, advising us constantly upon the needs of the consumer, in order that we may more efficiently and economically be of service in this wide and most important field. wide and most important field.

E. C. Eicher Sworn in as Member of SEC—Resigns as Representative in Congress Edward C. Eicher, former Representative from Iowa, was sworn in as a member of the Securities and Exchange Commission on Dec. 2. Following this Mr. Eicher resigned as a member of Congress. His term would have expired when the new Congress convenes in January. His resigna-tion from Congress automatically removed him from mem-bership on the Temporary National Economic Committee, the so-called "monopoly" committee. Mr. Eicher was active in the adoption of the Public Utility Holding Company Act

of 1935 and the Maloney Act regulating over-the-counter markets—measures administered by the SEC. He was ap-pointed to the Commission by President Roosevelt on Nov. 29, as was noted in these columns Dec. 3, page 3397.

R. R. Clarke Named Deputy Governor of FCA

R. R. Clarke Named Deputy Governor of FCA Rufus R. Clarke, Vice-President and Secretary of the Federal Land Bank of Columbia, S. C., was named on Dec. 5 a Deputy Governor of the Farm Credit Administration by Governor F. F. Hill. Mr. Clarke, who will assume his new duties in Washington about Jan. 1, will be associated with the operations of the Land Bank Division and the Federal Farm Mortgage Corporation, the two units having super-vision over the Farm Credit Administration's lending activi-ties in the long-term farm mortgage field.

N. P. Hallowell for Governing Committee The Nominating Committee of District No. 13 of the Investment Bankers Conference, Inc., has nominated for the Governing Committee Frank Dunne, of Dunne & Co., for a succeeding term, and N. Penrose Hallowell, of Lee Higginson Corp., to succeed Joseph R. Swan, of Smith, Barney & Co. District No. 13 embraces the States of New York, New Jersey and Connecticut. Members of the nominating com-mittee are John J. McKeon, of Charles W. Scranton & Co., New Haven; Meyer Willett of Willett & Bristol, New York; and Pierpont V. Davis, of Brown Harriman & Co., Inc., New York, Chairman.

Philip A. Benson and Henry R. Kinsey Honored at Dinner Given by New York State Savings Bank Association

Association Philip A. Benson, President of the American Bankers Association and President of the Dime Savings Bank of Brooklyn, and Henry R. Kinsey, President of the National Association of Mutual Savings Banks and President of the Williamsburgh Savings Bank, were given a testimonial dinner on Dec. 5 at the Waldorf-Astoria Hotel, New York City. The dinner, attended by over 900 persons, was sponsored by the Savings Banks Association of the State of New York to honor these men from its ranks, who simul-taneously hold two of the highest offices in the field of hanking and also to honor others who have played important

taneously hold two of the highest offices in the field of banking, and also to honor others who have played important roles in the history of savings banking in New York State. Albert S. Embler, newly elected President of the State Savings Banks Association, and President of the Walden Savings Bank, Walden, N. Y., acted as toastmaster. Dr. Harold A. Stonier, Executive Manager of the American Bankers Association, was guest speaker.

New York State Savings Banks Association to Seek Legislation for Central Form of Operation for Savings Banks Life Insurance

The Savings Banks Life Insurance The Savings Banks Association of the State of New York, at a special meeting held Dec. 5 at the Waldorf-Astoria Hotel, New York City, voted to seek permissive legislation at the next legislative session to make possible a central insurance association form of operation of savings banks life insurance in addition to the provisions of the present law. In describing the results of the vote, the Association, in an announcement issued Dec. 6, said:

announcement issued Dec. 6, said: Out of 105 banks present of the 134 in the State, 75 voted to seek such legislation: 23 banks voted that additional legislation should not be sought and 7 banks did not vote. Twenty banks stated that their boards had already agreed to support a central form of operation and the officers of 28 additional banks stated that they would recommend participation. Eleven banks stated definitely that they would not participate under a central plan and 24 banks indicated that they would not so participate at the present time, leaving the question open as to whether they might engage in the future in the sale of life insurance under any plan. Nineteen banks expressed no opinion as to whether their banks would participate. The matter is now being referred to the competent committees of the Association for further consideration and appropriate action. The present law, authorizing savings banks in New York

Association for further consideration and appropriate action. The present law, authorizing savings banks in New York State to issue life insurance policies, becomes effective Jan. 1. Signing of the bill by Governor Lehman last April 6 was noted in these columns of April 9, page 2300.

ITEMS ABOUT BANKS, TRUST COMPANIES, &c. At a meeting of the Board of Managers of the New York Coffee and Sugar Exchange held Dec. 7 it was decided to close the Exchange for trading purposes on Saturday, Dec. 24 and Saturday, Dec. 31, 1938.

Five officers of the Bankers Trust Co. of New York, who have completed a quarter century of service with the bank, and John I. Downey, who has been associated with the bank as a director and officer since 1900, were honored at a dinner of the Quarter Century Club of the Bankers Trust Co., at the University Club on Dec. 6. The officers who have completed 25 years of service with the bank and have been admitted to the club are: John I. Downey, Vice Presi-dent; R. B. Gahs, Assistant Treasurer; C. G. Haviland, As-sistant Secretary; John F. Rath, Assistant Secretary; H. L. Simms, Comptroller; and F. W. Bristow, Assistant Treas-urer. S. Sloan Colt, President of Bankers Trust Co. pre-Five officers of the Bankers Trust Co. of New York, who

sented mementos to the new members of the Quarter Century Club.

Frederick H. Hornby, President of the Continental Bank & Trust Co. of New York, on Dec. 7 announced the follow-ing promotions of officers, made at the December meeting of the Board of Directors of the bank: Thomas F. Bennett and James F. Draper from Assistant Vice Presidents to Vice Presidents; and Carroll J. Hester from Assistant Sec-retary to Assistant Vice President.

Arrangements were made Dec. 7 for the transfer of a New York Stock Exchange membership at \$71,000. The previous transaction was at the same price on Dec. 2.

The Commodity Club of New York will hold a dinner meeting on Dec. 15 at the Park Central Hotel, New York City. The guest speaker will be Carl Wilken, of Sioux City, Iowa, one of the leading Western authorities on the problems of agriculture.

Laurence G. Payson, Chairman of the Finance Committee of New York University, has been elected a director of the Bank of the Manhattan Co., New York. Mr. Payson suc-ceeds to the place left vacant by the retirement of John C. Moore, it was announced in the bank's annual report, made public Dec. 6.

Fred H. Hilton was appointed an Assistant Secretary of the Corn Exchange Bank Trust Co., New York, at a meeting of the Board of Directors of the company on Dec. 7.

William Peterson, an Assistant Secretary of the Brooklyn Trust Co. Brooklyn, N. Y., died on Dec. 2 at his home, Ozone Park, L. I., N. Y., after a short illness. Born in New York City in 1875, Mr. Peterson joined the staff of the old First National Bank of Jamaica in 1914, and was Cashier of that bank at the time it was merged with the Mechanic's Bank of Brooklyn in 1926. Mr. Peterson was appointed an Assistant Cashier of the Mechanics Bank after the merger, and in 1929, when the Mechanics Bank was merged with the Brooklyn Trust Co., Mr. Peterson was ap-pointed an Assistant Secretary of the trust company. He has been located at the company's Jamaica Office, 159-17 Jamaica Avenue, Jamaica.

Thomas L. Pryor, income tax specialist and head of the Income Tax Department of the Brooklyn Trust Co. Brook-lyn, N. Y., died suddenly on Dec. 4 at his home in Brooklyn. He was 58 years old. Born in Mauch Chunk, Pa. on July 22, 1880, Mr. Pryor was Chief of the Income Tax Division, Bureau of Internal Revenue for the first New York District for several years prior to his first connection with the Brooklyn Trust Co. in July, 1929. Mr. Pryor was secretary of the Committee of Banking Institutions on Taxation; a group of tax specialists of various banking institutions. He was an enrolled practitioner on taxation before the U. S. Treasury Department. U. S. Treasury Department.

Announcement was made on Dec. 8 that Charles E. Spen-cer Jr., a Vice-President of the First National Bank of Boston, Mass., since March, 1920, is to be elected President of the institution at a meeting of the directors on Dec. 22, when he will succeed Philip Stockton, who, in turn, will become Chairman of the Executive Committee. Mr. Stock-ton has headed the bank since 1929, and was President of the Old Colony Trust Co. (the bank's affiliate) from 1910 to 1934. The Boston "Transcript" of Dec. 8 quotes him as saving: saying:

I do not wish nor intend to give less time or effort to the affairs of the bank, but believe that Mr. Spencer is eminently qualified to fill the office of President and that it is time he be given full executive responsibility.

In briefly outlining the new President's career, the paper mentioned says, in part:

Mentioned says, in part: Mr. Spencer was born in New Brunswick, N. J., son of Charles E. and Sarah V. (Conover) Spencer. He was graduated from Rutgers Preparatory School in 1900. He entered the banking field in his home State with the National Bank of New Jersey. He was then successively associated with the National Bank of Commerce of New York, the National Bank of Commerce of Kansas City, the Trust Co. of America of New York, and the Colonial Trust Co. of Waterbury, Conn. He has been a Deputy Governor of the Federal Reserve Bank of Boston. He is a member of the Algonquin Club, the Country Club of Brookline, and the Union League Club of New York. He is a member of the Executive Council of the American Bankers Association and of the Com-mittee on Banking Studies of the Association.

Winthrop Coffin, retired member of the Boston banking investment house of Coffin & Burr, Inc., died suddenly on Dec. 2 in Winter Park, Fla. Mr. Coffin, whose home was in Brookline, Mass., was born in Roxbury, Mass., 75 years ago. He received his education at Newton High School and also for a time attended the Massachusetts Institute of Technology. While a resident of Auburndale, he was one of a group who developed the old Newton Street Railway Co. Later he became President of the company. The deceased banker spent several years in the chemical business, trans-ferring in 1888 to the electrical industry, and ultimately entering the employ of the Thompson Houston Electric Co., which subsequently was absorbed by the General Electric

Co. Mr. Coffin remained with the latter company until 1898 when he resigned to join in the formation of the in-vestment banking firm of Perry, Coffin & Burr, which spe-cialized in the bond issues of electric public service corpora-tions. In 1919 he was appointed a trustee of the Boston Elevated By by Governor Coolidge an office he held until Elevated Ry. by Governor Coolidge, an office he held until 1928.

Elevated Ry. by Governor Coolidge, an office ne neid until 1928. Colonel Philip Leffingwell Spalding, a partner in the banking firm of Estabrook & Co., Boston, Mass., and a World War veteran, died at his home in Milton, Mass., and a World War veteran, died at his home in Milton, Mass., on Dec. 4. Colonel Spalding, who was 67 years old, was born in Ithaca, N. Y., but moved to Cambridge with his parents as a boy. After preparing for college at Noble's School in Boston, he was graduated from Harvard with an A.B. de-gree in 1892, received an A.M. degree in 1893, and a B.S. degree in 1894 from the Lawrence Scientific School of Harvard. For a time he was connected with the American Bell Telephone Co. of Boston., later joined the Bell Tele-phone Co. of Philadelphia as an engineer, and then rose through several promotions to become General Manager of the latter company. Subsequently, 1911, he was made Sec-ond Vice-President and a director of the Pennsylvania Bell Telephone Co. In November, 1912, he was appointed Presi-dent of the New England Telephone & Telegraph Co. He also was President of the Providence Telephone Co. from 1916 to 1918. Shortly after the start of the World War (in which he was commissioned a Lieutenant-Colonel in 1917, two years later, 1919, being promoted to Colonel), he or-ganized the telephone companies' facilities for Government use. Upon his return from France after the close of the war, Colonel Spalding resigned as President of the New England Telephone & Telegraph Co., to enter the investment banking firm of Estabrook & Co. as a partner, and contin-ued with that company until his death. Colonel Spalding held numerous directorships of banks, telephone companies and charitable institutions, among them being the Gen-eral Public Service Corp., and the Copley Square Trust Co.

Alvin V. Lane, a Vice-President of the First National Bank in Dallas, Dallas, Texas, and one of the founders of the institution, died in Galveston on Dec. 1. He was 78 years old. Born in New Orleans, La., Mr. Lane went to Dallas in 1888 where with his father-in-law, the late Joseph Huey, he established the bank which was the nucleus of the present First National Bank in Dallas. At the time of this death among other interests he was Treasurer of the his death, among other interests, he was Treasurer of the Dallas Chamber of Commerce, Treasurer and a Director of Huey & Philip Hardware Co., Dallas Public Library and the Museum, and a patron of the Smithsonian Institution at Washington at Washington.

THE CURB EXCHANGE

Curb stocks were lower during the fore part of the week but the market gradually strengthened despite occasional periods of irregularity due to profit-taking. Public utilities, particularly the preferred stocks, were somewhat stronger and aircraft shares moved forward under the impulse of the news from Washington that Congress may be asked to appro-priate a special fund of \$100,000,000 for the Army Air Corps. Specialties were bicher at times and mining and metal stocks Specialties were higher at times and mining and metal stocks were irregular. The turnover was light as the week opened, but the volume gradually increased.

but the volume gradually increased. Except for some further gains in the preferred stocks of the public utility group, curb shares continued to sag all along the line during the brief period of trading on Saturday. The losses were not particularly noteworthy, however, but were largely in small fractions. The transfers were down to approximately 66,000 shares with 221 issues traded in. Of these 96 closed on the side of the decline, 50 were unchanged and 68 were slightly higher. Specialties were generally lower, mining and metal stocks and oil shares were quiet and aircraft issues made little change either way.

lower, mining and metal stocks and oil shares were quiet and aircraft issues made little change either way. Lower prices prevailed in the main list on Monday but there were a few scattered stocks in the industrial specialties and an occasional high grade issue in the utilities group that moved against the trend. Aircraft stocks also were inclined to move higher, Bell Aircraft and Lockheed showing modest gains as the session ended. Wide price changes wereapparent in the public utilities and most of the mining and metal stocks were off at the close. Prominent among the changes on the side of the decline were Celluloid pref., 4 points to 25; Consolidated Mining & Smelting, 3 points to 58; Gulf Oil, 1 point to 37½; Jones & Laughlin Steel, 1½ points to 37½; Newmont Mining, 2 points to 76¾, and Valspar pref., 3 points to 29. 3 points to 29

Aircraft stocks moved briskly forward on Tuesday follow-ing the report from Washington that Congress may be asked to appropriate \$100,000,000 for the Army Air Corps. Other armament shares joined the rise and there was a fairly large representation of the regular market leaders on the side of the advance as the session came to a close. The volume of solar was higher than on the preceding day, the turner the advance as the session came to a close. The volume of sales was higher than on the preceding day, the turnover moving up to 234,385 shares, against 175,990 on the pre-ceding day. Outstanding among the gains were Celanese pref. (1), 5 points to 90; Midvale Co., $5\frac{1}{2}$ points to 103; United Gas pref., 5 points to 80; Childs pref., 3 points to 58; Electric Bond & Share pref., 2 points to 63, and Niles-Bement-Pond, $1\frac{3}{4}$ points to $54\frac{1}{2}$.

Stocks continued to move forward on Wednesday, par-Stocks continued to move forward on Wednesday, par-ticularly in the morning dealings when the advances among the market leaders ranged from 1 to 6 or more points and several new tops were established. As the session progressed considerable profit-taking appeared, especially among the strong stocks of the opening hour, and some of the early gains were canceled. The transfers worked up to 252,190 shares, against 234,000 on the preceding day. Mining and metals improved as Aluminum Co. of America climbed upward $6\frac{1}{2}$ points to 123, followed by other members of the group with smaller gains. Aircraft issues were fractionally higher and oil stocks were steady with modest changes on the side of the advance.

Volume 147

higher and oil stocks were steady with modest changes on the side of the advance. Light trading and receding prices were the features of Thursday's dealings on the curb market. Opening prices were under the preceding close, and as the session progressed, there was little or no change from the downward trend. The losses were small, most of the changes being confined to minor fractions. Aircraft stocks were inclined to move against the trend, Bell Aircraft climbing up to 271% at its top for the day and Grumman Aircraft closed fractionally higher. Public utilities were heavy, specialties were steady higher. Public utilities were heavy, specialties were steady and oil shares and mining and metal issues were generally off on the day.

off on the day. Irregular price movements dominated the trading on Friday, and while there were a number of small gains scat-tered through the list, the trend of the market was toward lower levels. Trading was extremely quiet the transfers dipping to approximately 179,000 shares against 226,000 on Thursday. Outstanding among the declines were Aluminium Ltd. 2¾ points to 136½; Safety Car Heating & Lighting 3 points to 61 and Humble Oil 1¾ points to 65¾. As com-pared with Friday of last week the range of prices was to lower levels, Aluminium Ltd. closing last night at 136½ against 139 on Friday a week ago; American Gas & Electric at 30 against 31; Carrier Corp. at 17½ against 18½; Cities Service at 6¼ against 7½; Electric Bond & Share at 9¾ against 10½; Fisk Rubber Corp. at 9½ against 10⅓; Humble Oil (new) at 65⅔ against 66¼ and New Jersey Zinc at 55¾ against 57½. at 553/4 against 571/2.

Financial Chronicle

Dec. 10, 1938

American purchases, for both deliveries, together with some nervous bear-covering have absorbed offerings comprising Eastern and speculative, as well as Indian, sales. Bombay has continued reluctant to follow the rise with the result that quotations have on occasion been above the shipping parity and, as noted elsewhere in this letter, silver is now on its way from Bombay to London at a season of the year when the flow should normally be in the other direction. The maintenance of the present level depends upon the dollar-sterling exchange.

The maintenance of the product sector and exports of silver, exchange. The following were the United Kingdom imports and exports of silver, registered from mid-day on Nov. 14 to mid-day on Nov. 21. Exports Exports 700 120

THE ENGLISH GOLD AND SILVER MARKETS

We reprint the following from the weekly circular of Samuel Montagu & Co. of London, written under date of Nov. 23, 1938.

GOLD The Bank of England gold reserve against notes amounted to £326,414,426 Nov. 16 last showing no change as compared with the previous Wecnes-

The Bank of England gold reserve against on Nov. 16 last showing no change as compared with the previous werned day. Business during the week in the open market has been on a rather smaller scale, only £3,200,000 having been dealt in at the daily fixing. The rapidity of the decline in sterling has deterred rather than encouraged arbitrage operators who have gccerally been apprehensive of a sudden reaction in the trend. There has been quite a steady demand from the Continent and prices have been fixed daily with a small premium over the dollar parity. The authorities have not had to supply all the gold required as the higher prices attracted private sales, while on Tuesday some West African and Rhodesian gold came on offer. Today's price, 149s. 2d., is the highest since March 6, 1935, when the record high price of 149s. 4d. was reached. Outstions: Per Fune Ounce

Course of Bank Clearings

Course of Bank Clearings Bank clearings this week will show an increase compared with a year ago. Preliminary figures compiled by us based upon telegraphic advices from the chief cities of the country indicate that for the week ended today (Saturday, Dec. 10) bank clearings from all cities of the United States from which it is possible to obtain weekly clearings will be 10.8% above those for the corresponding week last year. Our preliminary total stands at \$5,106,500,095, against \$5,512,255,711 for the same week in 1937. At this center there is a gain for the week ended Friday of 19.5%. Our comparative summary for the week follows: the week follows:

Clearings-Returns by Telegraph Week Ending Dec. 10	1938	1937	Per Cent

* Estimated. x No figures available. a The Spokane Clearing House declines to continue to report bank clearings for the stated reason that the discontinuance of the Federal Reserve Bank branch in that city on Oct. 1, 1938, has resulted in a sharp decline in the clearings figures from those for periods prior to Oct. 1, 1938. We have calculated the estimated figures for the week and month on the basis of the percentage of decline in the October, 1938 figures from October, 1937, instead of omitting Spokane from our tabulation for the time being.

REDEMPTION CALLS AND SINKING FUND NOTICES

Below will be found a list of bonds, notes and preferred stocks of corporations called for redemption, together with sinking fund notices. The date indicates the redemption or last date for making tenders, and the page number gives the location in which the details were given in the "Chronicle":

DIVIDENDS

Dividends are grouped in two separate tables. In the first we bring together all the dividends announced the current week. Then we follow with a second table in which have not yet been paid. Further details and record of past dividend payments in many cases are given under the com-pany name in our "General Corporation and Investment News Department" in the week when deciared. The dividends announced this week are:

		When Payable	Holders of Record

x These are certificate ver from the Reserve b 00 cents to 59.06 cent given by the United States Treasury for the gold taken has when the dollar was, on Jan. 31, 1934, devalued from these certificates being worth less to the extent of the tself having been appropriated as profit by the Treasury e Gold Reserve Act of 1934. t

Weekly Return for the Member Banks of the Federal Reserve System

Following is the weekly statement issued by the Board of Governors of the Federal Reserve System, giving the principal Items of the resources and liabilities of the reporting member banks in 101 leading cities from which weekly returns are obtained. These figures are always a week behind those for the Reserve banks themselves. The comment of the Board of Governors of the Federal Reserve System upon the figures for the latest week appears in our department of "Current Events and Discussions, immediately preceding which we also give the figures of New York and Chicago reporting member banks for a week later.

Commencing with the statement of May 19, 1937, various changes were made in the breakdown of loans as reported in this statement described in an announcement of the Federal Reserve Bank of New York of April 20, 1937, as follows: The changes in the report form are confined to the classification of loans and discounts. This classification has been changed primarily to show the amounts of (1) commercial, industrial and agricultural loans, and (2) loans (other than to brokers and dealers) for the purpose of purchasing or carrying securities. The revised form also eliminates the distinction between loans to brokers and dealers in securities located in New York Oity. Provision has been made also to include "acceptances of own bank purchased or discounted" with "acceptances and commer-elaipaper boughtin open market" under the revised caption "open market paper," instead of in "all other loans," as formerly. Subsequent to the above announcement, it was made known that the new thems "commercial, industrial and agricultural loans" and "other loans would each be segregated as "on securities" and "other wise secured and unsecured." A more detailed explanation of the revisions was published in the May 29, 1937, issue of the "Ohronicle," page 3590.

Financial Chronicle

Weekly Return of the Board of Governors of the Federal Reserve System

The following was issued by the Board of Governors of the Federal Reserve System on Thursday afternoon, Dec. 8, showing the condition of the 12 Reserve banks at the close of business on Wednesday. The first table presents the results for the System as a whole in comparison with the figures for the eight preceding weeks and with those of the corresponding week last year. The second table shows the resources and liabilities separately for each of the 12 banks. The Federal Reserve note statement (third table following) gives details recording transactions in Endered Reserve notes between the week last year. The second table shows the resources and habilities separately for each of the 12 banks. The reversal Reserve note statement (third table following) gives details regarding transactions in Federal Reserve notes between the Reserve Agents and the Federal Reserve banks. The comments of the Board of Governors of the Federal Reserve System upon the returns for the latest week appear in our department of "Current Events and Discussions."

Dec. 10, 1938

3586 New York Curb Exchange—Weekly and Yearly Record Dec. 10, 1938 NOTICE—Cash and deferred delivery sales are disregarded in the week's range unless they are the only transactions of the week and when selling outside of the regular weekly range are shown in a footnote in the week in which they occur. No account is taken of such sales in computing the range for the year.

3586

In the following extensive list we furnish a complete record of the transactions on the New York Curb Exchange for the week beginning on Saturday last (Dec. 2, 1938) and ending the present Friday (Dec. 9, 1938). It is compiled entirely from the daily reports of the Curb Exchange itself, and is intended to include every security, whether stock or bond, in which any dealings occurred during the week covered.

American Potash & Chemical Corp. — To Pay \$1 Div. — Directors have declared a dividend of \$1 per share on the common stock, no par value, payable Dec. 16 to holders of record Dec. 13. Similar amount was paid on July 29, last, and compares with \$2 paid on Dec. 10, 1937; \$1.50 on June 22, 1937; \$1.25 on Dec. 18, 1936 and \$1 paid on July 1, 1936, this last being the first payment on the common stock since June 30, 1931 when a regular quarterly dividend of 25 cents per share was distributed. —V. 147, p. 1182.

American Rolling Mill Co.—New Director— W. W. Sebald, Vice-President and Assistant General Manager of the mpany, has been elected a director to fill the vacancy left by the late H. Frantz, Charles R. Hook, President, announced on Dec. 2. Mr. bald was employed by American Rolling Mill as an office boy in 1906 id a few years later became the company's only traveling salesman. V 147. p. 3140 Sebald was employ and a few years la -V. 147, p. 3149.

American Seating Co.—To Pay 50-cent Dividend— The directors have declared a dividend of 50 cents per share on the com-mon stock, no par value, payable Dec. 27 to holders of record Dec. 13. This compares with \$1 paid on Dec. 16, 1937; 25 cents paid on July 22, 1937, and on Dec. 21, 1936 the company paid a 53-cent dividend and also an optional payment of \$3 in cash or 1-10th of a share of common stock, these being the first dividend payments made since April 1, 1930, when 50 cents was disbursed.—V. 147, p. 3003.

American Service Co.—Accumulated Dividend— Directors have declared a dividend of \$3 per share on account of accu-mulations on the \$3 cumulative pref. stock, payable Dec. 23 to holders of record Dec. 10. A dividend of \$1.50 per share was paid on Dec. 30, 1937 and one of \$3 per share was distributed on Dec. 19, 1936. Dividends on this issue are cumulative only to the extent that they are earned.—V. 147, p. 2079.

American Snuff Co.—25-cent Extra Dividend— The directors on Dec. 7 declared an extra dividend of 25 cents per share addition to the regular quarterly dividend of 75 cents per share on common stock, par §25, both payable Jan. 3 to holders of record Dec. Similar payments have been made on Jan. 2 of 1938, 1937, 1936, 1935, 1931 1933, 1932 and 1931. An extra dividend of 50 cents per share was paid Jan. 2, 1930.—V. 146, p. 1230.

Institute have been made out san, 2 or 1935, 1937, 1935, 1935, 1934, 1933, 1932, and 1931. An extra dividend of 50 cents per share was paid on Jan. 2, 1930.—V. 146, p. 1230.
 American Telephone & Telegraph Co.—Company Assails Walker Report—Brands Recommendations as Unsound and Contends Report Full of Errors and Unjustified Inferences—
 The company, on Dec. 15, filed a brief at the Federal Communications commission answering allegations made in the Walker report on the telephone investigation authorized by Congress in 1935.

 The brief excoriates the report of Commissioner Walker and gives the system's arguments as to why the Walker report "cannot properly be used in whole or in part as the report that it is prepared to elaborate if given permission. The brief gives four main reasons as to why the Commission should not submit the Walker report. These are that:

 (1) The investigation on which the Walker report is based was, as a whole, unfair, the hearings were ex parte and the whole procedure was incapable of producing reliable conclusions.
 (2) The Walker report is incorrect. To a large extent the allegations of fact and to a greater extent the inferences and conclusions drawn therefrom are not true. The report is full of errors in fact, misstatements of fact and unjustified inferences and unsupported conclusions.
 (3) The report is full of errors in fact, misstatements of fact and the spresented are in a large measure separated from significant surrounding circumstances and distorted by improper emphasis.
 (4) The recommendations are unsound. Regardless of how the Walker report was produced and regardless of what facts it alleges or conclusions it draws, its specific recommendations are not sound proposals for presentation to Congress. They are unnecessary. In most instances they evolutionary in the field of regulation.—V. 147, p. 3302.

American Water Works & Electric Co., Inc.-Weekly Output-

Output of electric energy of the electric properties of American Water Output of electric Co. for the week ended Dec. 3, 1938, totaled 45,697,000 kilowatt hours, an increase of 8.3% over the output of 42,206,100 kilowatt hours for the corresponding week of 1937. Comparative table of weekly output of electric energy for the last five years follows:

Arkansas-Missouri Power Corp.—Larger Dividend— At a meeting of the board of directors held Dec. 2, they declared a divi-dend of 35 cents per share on the common stock of the corporation, payable Dec. 23, to holders of record Dec. 12. An initial dividend of 25 cents was paid on Dec. 24, 1937.—V. 147, p. 3302.

Armour & Co. of Del.—Listing— The Chicago Stock Exchange has approved the application to list 557,825 shares of 7% guaranteed cumulative preferred stock.—V. 146, p. 3173.

Armstrong Cork Co.—Final Dividend— Directors have declared a final dividend of 50 cents per share for the year 1938 on the common stock, payable Dec. 22 to holders of record Dec. 12. A dividend of 25 cents per share was paid on March 1, last. During the year 1937 dividends totaling \$2.50 per share were distributed. -V. 147, p. 2859.

-V. 147, p. 2859. Associated Breweries of Canada, Ltd.—Extra Dwidend The directors have declared an extra dividend of 45 cents per share in addition to the regular quarterly dividend of 20 cents per share on the common stock, both payable Dec. 31, to holders of record Dec. 15? An extra of 25 cents was paid on Dec. 31, 1937.—V. 147, p. 2080.

Associated Gas & Electric Co.-SEC Asks Company

Associated Gas & Electric Co.—SEC Asks Company for Data on Investments— The Securities and Exchange Commission, on Dec. 5 ordered the company to file a statement in writing containing certain information as of Oct. 31, 1938 regarding investment accounts of itself and each of its subsidiary com-panies. The information, which must be filed not later than Dec. 17, asks the following: Name of issuer or debtor; description of investment, including rate of interest of dividend; date when investment was acquired; principal amount held carrying value; and investment pledged. Officials explain that the Commission was merely endeavoring to acquire recetain information about the system which is not at present a part of its record.

electricity in the debtor's system and in the electric industry generally has been substantially higher than for the corresponding period of 1937. The outputs of the debtor's subsidiaries for the weeks ended Nov. 18 and Dec. 2, 1938, were the highest in the history of the debtor's system. "Various economics have been instituted during the current year which are now being reflected more fully in the current net earnings is definitely upward, and there is no reason for any belief that such consolidated net earnings will not in the future exceed all of the fixed charges of the debtor and its subsidiaries." The Associated Gas & Electric Co. denies categorically many of the allegations in the petition of the three alleged creditors, and admits some others. It says: \$219.000.000 for New Construction

others. It says: \$219,000,000 for New Construction *219,000,000 for New Construction "The debtor admits that its system has grown by the acquisition of new properties, but denies that it has not grown by expansion and alleges that during the 10-year period from 1928 to 1937, inclusive, the deotor's sub-sidiaries have expended \$219,000,000 for construction, of which \$26,000,000 was expended in the year 1937. The debtor admits that despite the ex-penditure of \$219,000,000 for construction during the past 10 years the gross annual income of its present operating subsidiary companies has decreased by \$5,000,000, but denies that such decrease was the result of any failure of the debtor's expansion policy either in new construction or acquisition of new properties, and alleges that such decreases was gineringially due to decreases in rates, increases in taxes and general business de-pression."

alle to accreases in rates, increases in taxes and general business de-pression." In mentioning reductions in rates, the motion says: "The debtor admits that reductions in rates charged by the debtor's subsidiary operating companies have reduced the amount of the debtor's net earnings, but alleges that the effect of such reductions upon the consolidated net earnings of the debtor have been to a large extent offset by increased consumption, extensions of service, and economies in operation." Concerning its assets and liabilities, the company states: "The debtor admits that the liabilities stated in the consolidated balance sheet contained in the annual report of the debtor for 1937 contains items aggregating nearly \$50,000,000, which from their designation alone, some accountants might class as 'current liabilities which had to be liquidated within 12 months of the date of said balance sheet, and that a considerable part of such liabilities are of a character which will be refunded in the normal course of business."

of business." 5.4% Output Increase for November— For the month of November, Associated Gas & Electric System reports an increase of 5.4% in net electric output over November a year ago. This is the best comparative showing for any month since September of 1937. It also compares favorably with the output for October, which showed a small decline under a year ago. Production for the month of November amounted to 406,927,023 units (kwh.), an increase of 20,-828,602 units over the figure of 386,098,421 for the same month a year ago. For the 12 months ended Nov. 30 output was 4.513,290,373 units, or 3.8% below production for the previous comnarable period. Gas sendout for November was up 1.6% or 32.702,400 cubic feet to 2.082,116,400 cubic feet. For the 12 months ended Nov. 30 sendout was up 4.9% to 23,236,249,300 cubic feet.

Weekly Output-

For the week ended Dec. 2, Associated Gas & Electric System reports net electric output of 95.612,857 units (kwh.). This is an increase of 6,386,173 units or 7.2% above the output of \$9,226,684 units for the comparable week a year ago. The electric output of the system is associated to the system of the system is associated to the system is a system is a system in the system is a system is a system in the system is a system in the system is a system in the system is a system is a system in the system in the system is a system in the system in the system in the system in the system is a system in the system in a year ago. The electric output of the system is currently running at the highest point in its history.

in its history. Associated Public Utilities Corp.—Dividend— At a special meeting held on Nov. 11, 1938, the board of directors de-clared a dividend of 12½ cents per share on the common stock, payable on Dec. 17, to holders of record at the close of business on Nov. 30. Holders of five-year convertible secured gold bonds of Utilities Public Service Co. or certificates of deposit issued in respect of such bonds, who have not exchanged them for common stock of Associated Public Utilities Corp. in accordance with the amended plan of reorganization dated May 1, 1937, of Utilities Public Service Co., will receive the dividend payable upon the stock issuable to them (in the ratio of 50 shares for each 31,000 principal amount of bonds or certificates of deposit) only after surrender of their bonds or certificates of deposit to the Huntington National Bank of Colum-bus, Columbus, Ohio, in exchange for shares of such common stock.— V. 147, p. 2235. Austin Nichole & Co.—To Sell Grocern Businges—

bus, columnus, Onio, in exchange for shares of such common stock.—
 V. 147, p. 2235.
 Austin, Nichols & Co.—To Sell Grocery Business— Thomas F. McCarthy, President of this company issued the following our beer, wine and liquor business has developed into the principal part of our business and our sales of these items for the first half of the present fiscal year, that is, for the six months ended Oct. 31, 1938, are 20% greater than in the corresponding period last year. By reducing lines and outlets, the company has been curtailing its grocery activity because it was unprofitable for the company. The grocery inventory constitutes only about 30% of the entire current inventory. The grocery prands, labels, &c., with some exceptions, to Francis H. Leggett & Co. The grocery inventory is sold at replacement cost, and, in view of inventory losses of consequence are expected on the sale. This transaction enables the company to concentrate on the beer, wine and liquor business, and a few related grocery specialties, and, as many of the present outlets sell alcoholic beverages, much of the relationship with consens will remain undisturbed. The company regularly discounts its accounts payable but this transac-tion will further strengthen its financial position and permit substantial reduction in bank loans.—V. 147, p. 2080.

Automatic Products Corp.—Transfer Agent— The Continental Illinois National Bank & Trust Co. of Chicago, Chicago, Ill., has been appointed as transfer agent for this company's common capi-tal stock, effective Dec. 1, 1938. On that date corporation will discon-tinue to act as transfer agent for its own stock.—V. 146, p. 4107.

Baker Hotel of Dallas, Inc.—*Earnings*— Net income for the year ended July 31, 1938, after taxes, depreciation, amortization, interest and other charges, amounted to \$125,198.—V. 140, p. 792.

p. 792. Baltimore & Ohio RR.—Director— The Interstate Commerce Commission has authorized J. Hamilton Cheston to serve as a director of this company.—V. 147, p. 3447.

Gain in Phones-

Gain in Phones— Company reports a net gain of 5,204 telephones in service during Novem-ber as compared with a gain of 3,721 in the same month a year ago. For the 11 months the net gain was 23,393, as compared with a gain of 68,780 in corresponding period of 1937. There was a total of 1,228,458 telephones in service as of Nov. 30. For Philadelphia, November gain was 2,331 phones, against increase of 1,913 in corresponding month of last year. In Pittsburgh November gain was 851 stations, compared with 393 in the 1937 month.—V. 147, p. 3151.

Beneficial Industrial Loan Corp.-Offering Price and

Beneficial Industrial Loan Corp.—Offering Price and Underwriters Named— Corporation announced Dec. 6 that it had filed an amendment with the Securities and Exchange Commission fixing the price of an offering of 150,000 shares of \$2.50 prior preference stock and disclosing the names of principal underwriters. The price on the offering to stockholders is fixed at \$50 per share. Shares fot taken up by the present preferred stockholders may be offered to the public at a price of \$50 per share plus acroued dividends. The names of underwriters are listed as follows: Eastman, Dillon & Co., Bancamerica-Blair Corp., E. H. Rollins & Sons, Inc., Ladenburg, Thal-mann & Co., Alex. Brown & Sons, Hayden, Stone & Co., Riter & Co., Wm. Cavalier & Co., Hornblower & Weeks, Whiting, Weeks & Knowles, Inc., Mackubin, Legg & Co., Stroud & Co., Putnam & Co., Piper, Jaffray & Hopwood, Mitchum, Tully & Co. and Rogers & Tracy, Inc.-V. 147, p. 3303.

B-G Foods, Inc.—Accumulated Dividend— The directors have decalred a dividend of \$5.25 per share on account of accumulations on the 7% cumulative preferred stock, par \$100, payable Dec. 21 to holders of record Dec. 9. This compares with \$3.50 paid on Oct. 1, last and \$1.75 paid on July 1 and on April 1, last. A dividend of \$5.25 was paid on 'Dec. 21, 1937. See also V. 147, p. 1183 for record of previous dividend payments.—V. 147, p. 1917.

Birks Mfg. Co.—10-cent Dividend.— Directors have declared a dividend of 10 cents per share on the common stock, payable Dec. 21 to holders of record Dec. 15. This will be the first dividend paid since Dec. 23, 1937 when 25 cents per share was dis-tributed. Dividends of 15 cents were paid on Oct. 22, July 30 and on March 25, 1937; an extra dividend of 25 cents was paid on Dec. 21, 1936, and an initial dividend of 50 cents was paid on Dec. 15, 1936.—V. 145, p. 4110.

p. 4110. Birmingham Electric Co.—Accumlated Dividends— The directors have declared a dividend of \$1.75 per share on the \$7 cum. pref. stock, no par, and \$1.50 per share on the \$6 cum. pref. stock, no par, both payable Jan. 3 to holders of record Dec. 9. Similar distributions were made in each of the seventeen preceding quarters. Effective with the current payments, arrears on the \$7 pref. stock will amount to \$3.50 per share and on the \$6 pref. stock to \$3 per share.—V. 147, p. 3447. Blackstone Valley Gas & Electric Co.—Bonds Called— Company has deposited funds necessary with the Pawtucket Branch of the Industrial Trust Co. for redemption of \$4.045,000 of its 1st & gen. mitge. 5% bonds. Immediate payment of principal and accrued interest may be obtained by presentation of bonds and attached coupons.—V. 147, p. 3447.

Boston Consolidated Gas Co.—Output— The company reports output for November, 1938, of 1,131,406 cubic feet, an increase of 1.1% compared with November, 1937.—V. 147, p. 3151.

Boston & Maine RR.-Reconstruction Loan-

The Interstate Commerce Commission on Dec. 6 approved a loan of not to exceed \$1,500,000 to the road by the Reconstruction Finance Corporation for maintenance. The report of the Commission says in part: The applicant requests an additional loan of \$1,500,000 for such term as may be agreed upon in order to provide funds to enable it to repair the damage to its road beds, tracks, bridges, buildings, signals and other equip-ment occasioned by the floods of Sept. 17-23; 1938 and the hurricane of Sept. 21, 1938, which swept over a large part of the territory traversed by its railroad. The loan is not necessary to enable it to meet current obli-gations.

ment occasioned by the floods of Nept. 17-23; 1938 and the number of Sept. 1, 1938, which swept over a large part of the territory traversed by its railroad. The loan is not necessary to enable it to meet current obligations. On the night of Sept. 22, 1938 operations had ceased on about 1,000 miles out of the total mileage of 1,960. Major flood damage occurred in more than 300 locations. There were 27 bridges and culvets desiroyed or damaged, 206 washouts, 22 landslides, and the right-of-way was submerged at 45 locations. The over the damage caused by the floods and hurricane is estimated by the applicant at \$2,200,000, of which \$1,708,750 will be chargable to operating expenses and \$491,250 to capital accounts. In the work of rehabilitation the applicant is employing about 3,000 men and in addition, contractor's forces and equipment are being used, so that requires large quantities of steel, lumber, filling material, stone and riprap, and other miscellaneous material and supplies. The applicant is at present supplying funds for rehabilitation, but needs \$1,500,000 in addition to the funds which its treasury can supply. for the maintenance of its railroad. The applicant has filed a forecast of cash receipts and disbursements by months for the period Sept. 30, 1938, to Dec. 31, 1939, \$3,379,702 on Sept. 30, 1938, would be \$2,397,592 on Dec. 31, 1938, \$3,307,002 on Sept. 30, 1938, would be \$2,397,592 on Dec. 31, 1938, \$3,307,002 on The applicant has \$10,000, par value; Connecticut & Passumpsic Rivers RR. stock, \$10,000, par value; Connecticut & Fassumpsic Rivers RR. stock, \$16,000; Nashua & Lowell RR. stock, \$149,200; Northern RR. stock, \$17,00; Peterborogh RR. stock, \$10,000, par value; Connecticut & Passumpsic Rivers RR. stock, \$17,00; Peterborogh RR. stock, \$17,00; Peterborogh RR. stock, \$17,00; Reverborogh RR. stock, \$17,00; Reverborogh RR. stock, \$17,00; Reverborogh RR. stock, \$10,000,

Dec. 10, 1938

Financial Chronicle

Volume 147 Pinancial Building, Inc., 2nd mortgage 6% bonds, \$318,444; prior preference stock of the applicant, \$197,100; and general mortgage bonds of applicant as follows: 3%, due 1950, \$100,000; 5% series V, due 1942, 71,000; 5% series X, due 1942, \$2,000; 5% series V, due 1942, 71,000; 5% series X, due 1942, \$2,000; 5% series V, due 1942, 71,000; 5% series EE, due 1946, \$60,000; 5% series FF, due 1947, \$3,000; 4% \$39,000. In its conclusion the Commission states: "On Jan. 27, 1938, we certified that the applicant might reasonably be expected to meet its fixed charges without a reduction thereof through judicial reorganization. Less than a year has elapsed since then during which there has been an unprecedented business recession, and the territory traversed by the applicant. But we are not required by the Act, in connection with our approval of loans for purposes of maintenance to make the certification referred to above. The express exception of such loans from that requirement, in our opinion, shows that the Congress realized that at the expectad to agencies in safe operating condition must be recognized for is needed by the applicant for the maintenance of its railroad. While we may not ignore the financial prospects of applicant in connection with our consideration of its applicant for the maintenance of the applicant for is needed by the applicant for the maintenance of the the dur-for is needed by the applicant for the maintenance of the applicant. While we may not its consider that the circumstances the public interest in maintenance of transportation agencies in safe operating condition must be recognized for is needed by the applicant for the maintenance of its railroad. While we may not ignore the financial prospects of applicant in connection with, our consider that the circumstances that the cir-cumstances of this case as above stated justify our approval of the appli-cation.""

Commissioner Mahaffie, dissenting states: "The loan approved by the majority is for maintenance of the railroad. Hence no certificate as to the ability of the applicant to meet its charges is required. However, I do not believe we properly can disregard the financial prospects of a carrier even in such a case. If larger sums than are likely to be available are required for fixed charges, loans to pay, or to reimburse the treasury, for maintenance merely prolong the agony. For the reasons I stated in dissenting from the approval of a loan to the Chicago & North Western (decided Oct. 17, 1934, 202 ICC, 347,350) I think it unwise to expend public funds in order to defer reorganization. The present and pro-spective earnings of this applicant indicate to me that reorganization of its financial structure can not be avoided. In view of this I would not, at this time, lend it additional money."—V. 147, p. 4448.

Bralorne Mines, Ltd.—Extra and Larger Dividend— Directors have declared an extra dividend of 10 cents per share in addi-tion to a quarterly dividend of 20 cents per share on the common stock, no par value, both payaole Jan. 14 to holders of record Dec. 31. Previously regular quarterly dividends of 15 cents per share were distributed. In addition, extra dividends of 10 cents were paid on Oct. 15, July 15 and April 14 last.—V. 147, p. 2385.

1.4% from the sale of water, 7.7% from the sale of ice and 0.6% from heating and other activities. As a part of its load-building program, the company sells appliances. At Sept. 30, 1938, the company supplied electric service at retail to 155,512 customers in 499 cities, villages and unincorporated communities and to 6,177 rural customers in adjacent rural areas. At the same date the company supplied at retail natural gas to 22,289 customers in 20 cities and villages, manufactured gas to 1,112 customers in one city and water to 6,886 customers in 6 cities. It also sold ice at retail or wholesale in 20 cities and villages and supplied curtal steam heating service in one city. The territory served by the company has an estimated population 650,000, is located in 61 counties in central and southern 111inois and com-prises an area of about 20,000 square miles, or about one-third of the area of the entire State. The territory served is chiefly dependent upon agri-culture and the mining of bituminous coal. In 1937, about 14% of the gross electric revenues of the company was derived from the sale of industrial power for coal mining operations.

Commercial Investment Trust Corp.-Universal Credit Merger

Merger— Corporation has acquired 100% common stock ownership of Universal Credit Corp., the subsidiary which has specialized in the financing of Ford Motor Car sales. The New York Stock Exchange has approved the listing of an additional 250,000 shares of Commercial Investment Trust common stock. The corporation acquired all the preferred stock and 70% of the common stock of Universal Credit on May 25, 1933, and has operated it as a subsidiary since then. The latest acquisition was 40,000 shares and was effected by an agreement signed Nov. 28. In return for the 40,000 shares of Universal Credit common, Commercial Investment Trust will give 200,000 shares of its own common stock, with a market value of a little more than \$12,000,000; \$1,500,000 in cash, and options to buy 50,000 shares of its own common at \$32 a share, a privilege now worth about \$1,400,000, or a total consideration of about \$15,000,000. The listing statement at the Exchange discloses that Commercial In-vestment Trust had an agreement with the minority stockholders whereby it could acquire the outstanding minority stock by the payment of between \$7,000,000 and \$7,500,000 in cash, the exact amount determinable over a period of time. The Portion of the consolidated net income of Universal Credit applica-tion to the minority stockholders was given as follows: 1934, \$1,693,434; 1935, \$2,817,369; 1936, \$3,628,228; 1937, \$3,490,115, and for the first six months of this year, \$1,043,031. The book value of the 40,000 shares on June 30, last was said to be \$5,485,496.—V. 147, p. 3155. Commonwealth Edison Co.—Weekly Output—

Commonwealth Edison Co.—Weekly Output— The electricity output of the Commonwealth Edison Co. group (inter-company sales deducted) for the week ended Dec. 3, 1938, was 145.607,000 kilowatt hours compared with 137,929,000 kilowatt-hours in the correspond-ing period last year, an increase of 5.6%.

The following are the			or the last loui
weeks and the correspon	nding periods last y	ear:	Per Cent

Company and Units Plan \$4,000,000 Note Issues-

Company and Units Plan \$4,000,000 Note Issues— The company and its subsidiaries, Southwestern Electric Co., Kansas Utilities Co., Missouri Utilities Co. and Texas-New Mexico Utilities Co., have filed declarations with the Securities and Exchange Commission in connection with the issuance of collateral promissory notes aggregating \$4,000,000. The \$1,350,000 notes of Community Power are to be sold to the Recon-struction Finance Corporation. Proceeds are to be used to reimburse company for funds expended for construction and to supply Southwestern Electric with funds to furnish equipment; machinery and facilities to the other three companies. The \$1,250,000 notes of Southwestern Electric are to be acquired by Community Power. Notes of the other three companies aggregating \$1,400,000 are to be acquired by Southwestern Electric. A hearing has been set for Dec. 15.—V. 147, p. 3156.

Compania Hispano-Americana de Electricidad, S. A. Chade")-Interest Payment-

This company will distribute, beginning on Dec. 12, against Coupon No. 35, the sum of 22 Argentine paper pesos, 50 centavos on series A, B and C shares and four Argentine paper pesos, 50 centavos on series D and E shares to apply on the dividend for the fiscal year of 1938. Coupon No. 35 will be payable at the option of the bearers either in check on Buenos Aires or in other foreign exchanges on the basis of the current rates for checks on Buenos Aires. Coupons are to be presented to the Guaranty Trust Co. --V. 144, p. 4001.

Congregation of the Immaculate Heart, Scranton, Pa.—Bonds Offered—Dempsey-Tegeler & Co., St. Louis, are offering \$300,000 1st & ref. mtge. 4% serial bonds.

are offering \$300,000 ist & ref. flige. 4% serial bonds. Dated Nov. 15, 1938. Principal payable annually Nov. 15, 1940, through 1950. Interest payable M-N, at office of St. Louis Union Trust Co., 8t. Louis, trustee. Bonds in coupon form—\$500 and \$1,000 denomination. Bonds may be prepaid on any int. payment date prior to maturity on 30 days written notice at par and interest. These bonds are the direct obligation of The Congregation of the Imma-culate Heart, Scranton, Pa. (the Motherhouse of the Sisters, Servants of the Immaculate Heart of Mary). Bonds are further secured by a deed of trust in the nature of a mortgage on property in Carbondale, Pa. The

property, including land, buildings and equipment, is carried on the books of the Sisters as of June 1, 1938, at \$957,160. *Purpose*—To refund outstanding indebtedness at a reduced interest rate.—V, 130, p. 2399.

Consolidated Mining & Smelting Co. of Canada, Ltd. Extra Dividend-

The directors have declared an extra dividend of \$1 per share in addition to a semi-annual dividend of 50 cents per share on the capital stock, par \$5, both payable Dec. 31 to holders of record Dec. 9. An extra of 50 cents was paid on July 15 last and one of \$1.50 was paid on Dec. 31, 1937. Extra dividends of \$1 were paid on July 15, 1937, and on Dec. 31, 1936, and a dividend of 50 cents was paid on July 15, 1936.—V. 146, p. 3951.

Consumers Power Co. -Registers \$10,168,000 Bonds-Company on Dec. 3 filed with the Securities and Exchange Commission a registration statement (Noi. 2-3981, Form A2) under the Securities Act of 1933 covering \$10,163,000 of 1st mtge. 314% bonds, series of .1936, due Nov. 1, 1966. According to the registration statement the proceeds from the sale of \$2,000,000 of the new bonds together with \$1,200,000 to be received from the sale of 43,636 shares of (no par) common stock to the Commonwealth & Southern Corp. will be applied to the purchase of the physical properties of the Citizens Light & Power Co. The proceeds from the sale of the remaining \$8,168,000 of the new bonds, together with 0ther treasury funds will be used to retire on or before May 1, 1939, \$2,168,000 of the com-pany's 1st mtge, bonds and 1st mtge. 4% bonds, series of 1934, due 1944. The names of the underwriters and the amounts to be underwritten by each are as follows: Morgan Stanley & Co., Inc., \$2,234,000; Benobright & Co., Inc., \$2,234,000; The First Boston Corp. \$1,000,000; Borburght Marriman & Co., Inc., \$1,000,000; Smith Barney & Co., \$800,000; Coll Borburght & Co., Inc., \$2,00,000. The registration statement states that Morgan Stanley & Co., Inc. and Bonbright & Co., Inc., are authorized to engage in certain market operations in the bonds 'to facilitate the distribution of the exbedred, or, if effected, that they will not be discontinued at any time." The bonds are redeemable in whole or in part after at least 30-days' notice at the principal amount plus a premium of \$4 of 1% for each year or fraction thereof of unexpired life until Nov. 1, 1963. No premium will be naid if the bonds are redeemed on or after that date. The Securities and Exchange Commission on Dec. 5 announced that company has filed a declaration (\$4'1-72') under the Holding Company Act in connection with the issuance and sale of \$8,168,000 first mortgage \$4% bonds, due 1966. The company is a su

Continental Baking Corp.—\$5 Preferred Dividend— The directors have declared a dividend of \$5 per share on account of accumulations on the 8% cum. pref. stock, par \$100, payable Dec. 24, to holders of record Dec. 12. This compares with \$2 paid on Oct. 1, July 1 and on April 1, 1as7: \$4 paid on Dec. 24, 1936; \$2 paid on Oct. 1, July 1 and on April 1, 1937; \$4 paid on Dec. 24, 1937; \$2 paid on Oct. 1, 1936; dividends of \$1 per share were paid in each of the 15 preceding quarters, \$1.50 per share paid on July 1 and Oct. 1, 1932; and requiar quarterly dividends of \$2 per share previously.—V. 147, p.3156.

Continental Oil Co.—Listing— The New York Stock Exchange has authorized the listing of \$21,071,600 10-year 2½% convertible debentures, due Dec. 15, 1948, upon official notice of issuance and distribution; and 632,148 additiona. shares of capital stock (par \$5) upon official notice of issuance, from time to time upon con-version of the debentures; making the total amount applied for 5,370,742 shares. For details of offering of debentures see V. 147, p. 3452.

The directors have declared a dividend of \$4 variable bar of the state of the state

Crown Drug Co.—Sales— Sales for Nov., 1938 were \$699.864, as compared to \$705.475 for Nov., 1937—a decrease of \$5,611, or a per centage decrease of 0.8%. Sales for Nov., 1938 included 80 stores, as compared to 90 stores for Nov., 1937. The decrease in the number of stores is the result of the sale of our Oklahoma City properties. Eliminating the sales of the Oklahoma City Stores for Nov., 1937, it would show an increase in volume of \$43,144, or 6.6%.—V. 147, p. 3453.

Delaware Fund, Inc.—Dividend— The board of directors of this company, a management type investment trust, has declared a dividend of 15 cents per share, payable Dec. 15 to holders of record Dec. 1. An initial dividend of like amount was paid on Sept. 1, last.—V. 147, p. 2528.

Detroit Gray Iron Foundry Co.—Extra Dividend— Directors have declared an extra dividend of four cents per share in ad-dition to the regular semi-annual dividend of two cents per share on the common stock, both payable Dec. 20 to holders of record Dec. 10. Extra dividend of eight cents was paid on Dec. 20, 1937. V. 147, p. 2680.

Vidend of eight cents was paid on Dec. 20, 1907. T. A., p. 2007. Detroit Steel Corp.—Official Resigns— Clyde P. Craine has tendered his resignation as Vice-President of this mpany and its subsidiary, Craine-Schrage Steel Co. and as a director of oth corporations. Resignation is effective immediately and was made cessary by Mr. Craine's ill health, it was announced.—V. 147, p. 3307. both c

Detroit Steel Products Co.—25-cent Dividend— Directors have declared a dividend of 25 cents per share on the common stock, no par value, payable Dec. 22 to holders of record Dec. 16. Like amount was paid on Nov. 10 last, this latter being the first dividend paid since Dec. 22, 1937, when 50 cents per share was distributed. See also V. 146, p. 2039, for detailed record of previous dividend payments.— V. 147, p. 2528.

Directors at their meeting on Dec. 7 decided to omit the dividends or-dinarity due at this time on the class A and class B common shares. Dirs, of 25 cents per share were paid on these issues on Oct. 1 and July 1, last, and previously regular quarterly dividends of 75 cents per share were distributed. Delancey Kountze, Chairman, stated the current action was due to decreased business and decreased raw material prices of certain com-modities which adversely affected company's profits.—V. 147, p. 1772.

decreased business and decreased raw material prices of certain com-modities which adversely affected company's profits.-V. 147, p. 1772. **Dewey & Almy Chemical Co.**-Plan Completed--Successful completion of the plan recently proposed for readjustment of the capital structure of this company was announced on Dec. 8. With formal exchange offers received from holders of more than 98% of the prior preference and class B preferred stocks, the plan has been declared operative and actual exchanges will begin at once. They will be effected as rapidly as possible on receipt of the old stocks by the company. Under the plan, holders of more than 98% of the 8.213 shares of prior preference may make the same exchange but had the option of accepting \$10 in cash in lieu of the one-half share of common. Holders of the 8.213 shares of only 83% shares have indicated a preference for cash. "Additional offers for exchange will be accepted if submitted within the next few days," according to a statement by Bradley Dewey, President of the company. "Although the plan as originally amounced loft the question of redemption of unexchanged stock optional with the company. Will consist of a maximum of 22.496 shares of common (non-votil) pre-ferred, between 184,500 and 185,000 shares of norm of new preferred is con-vertible into 4 shares of common (non-votil) and 7,200 shares of class B preferred. Tolowing the exchanges, outstanding capitalization of the company will consist of a maximum of 22.496 shares of common (non-votil) pre-ferred, between 184,500 and 185,000 shares of common (non-votil) and 7,200 shares of class B common. Each share of new preferred is con-vertible into 4 shares of common up to Jan. 1, 1942 and into 3 shares of common thereafter up to Jan. 1, 1943. The new preferred is entitled to cumulative divs. from Dec. 16, 1938.-V. 147, p. 3454.

Dixie-Vortex Co.-Listing of Stocks-Acquisition of Securities Co-

Securities Co— The New York Stock Exchange has authorized the listing of 82,093 additional shares of class A stock (no par) and 29,362 additional shares common stock (no par) upon official notice of issuance pursuant to an agreement and act of merger, with authority to add 82,093 shares of com-mon stock (no official notice of issuance upon conversion of class A stock making the total amount applied for 260,743 shares of class A stock making the total amount applied for 260,743 shares of class A stock and ordered submitted to their respective shareholders an agreement and act of merger of Dixle Securities Corp. have approved and ordered submitted to their respective shareholders an agreement and act of merger of Dixle Securities Corp. 1938, for the purpose of considering and passing upon the agreement and act of merger and a special meeting of the stockholders of Dixle Securities Corp. will be held on Dec. 27, 1938, for the same purpose. It is expected that the merger will become affective on Dec. 30, 1938. Pursuant to the terms and condi-tions of the agreement and act of merger, the holders of all issued and out-standing shares of class A and common stock of the company, except the 82,093 shares of class A stock and 29,362 shares of common stock of the

Chronicle Dec. 10, 1938 company to be owned by Dixie Securities Corp. upon the merger becoming effective, will continue to hold such shares of the company. The 82,093 shares of class A stock and 29,362 shares of common stock owned by Dixie securities Corp. will be acquired by the company upon the merger becoming effective, and will become treasury shares. Upon the merger becoming effective, there will be outstanding 82,093 shares of class A stock and 29,362 shares of common stock of Dixie Securities Corp., and the holders of the class A stock of Dixie Securities Corp. will be entitled to receive on a share for share basis the class A stock of the company. A further result of the merger becoming effective will be that the separate existence of Dixie Securities Corp. will be entitled to receive on a share for share basis the class A stock of the company. A further result of the merger becoming effective will be that the separate existence of Dixie Securities Corp. will be company to the Dixie Vortex Co., us the surviving corporation, will become vested with all the assets and liabilities of Dixie Securities Corp. in the amount of approxi-mately \$100,000, will be extinguished by operation of law upon the merger becoming effective. Before the merger becomes effective, Dixie Securities Corp. shall have called for redemption at par and accrued int. on April 15, 1939, its 14% collateral trust bonds outstanding in the principal amount of \$787,100 and shall have placed with the trustee the funds required to effect such redemption. Upon the merger becoming effective, the company will become obligated to pay a bank loan of Dixie Securities Corp. approxi-mating the amount required to make such redemption which, it is proposed, will be paid at an early date by the company out of its cash and other current asets. A Federal income tax payable on income to Oct. 31, 1938 arising from the purchase, at less than par, of the corporation's 35-year 5% sinking fund debentures as required by sinking fund provisions. This income is credited to surplus account.—V. 147, p. 1487.

Evans Products Co.-Plans Stock Increase-

Evans Products Co.—*Plans Slock Increase*— Stockholders at a special meeting on Dec. 23 will vote on the proposed increase in authorized common stock to 500.000 shares from 300,000 to take care of the conversion provision in the \$2,000,000 debenture issue planned. Commenting on the plan, Edward S. Evans, President, stated: "The wide trade and public acceptance of our new Evanoil space heater and the adoption of our vacuum power gear shift unit by one of the major group automobile manufacturers form the principal reasons for our explan-sion program. In addition to providing us ample working capital we will also utilize a portion of this new capitalization for retirement of long-term bank loans and commercial paper outstanding."—V. 147, p. 3158.

Fanny Farmer Candy Shops—Extra Dividend— Directors have declared an extra dividend of 50 cents per share in addition to the regular quarterly dividend of 25 cents per share on the common stock, both payable Dec. 27 to holders of record Dec. 15. Extra of 25 cents was paid on Oct. 1, 1937.—V. 147, p. 1487.

Federal Knitting Mills Co.—Liquidating Dividend— Directors have declared a liquidating dividend of \$5 per share on the no-par common stock, payable Jan. 5 to holders of record Dec. 27. Like amount was paid on July 20 last. A dividend of \$10 was paid on Feb. 1, 1938, and an initial liquidating dividend of \$10 per share was paid on Dec. 20, 1937. A regular quarterly dividend of 62½ cents per share was paid on May 1, 1937; none since.—V. 147, p. 419.

Fish Rubber Corp.—Initial Dividend— Directors have declared an initial dividend of 50 cents per share on the common stock, payable Dec. 20 to holders of record Dec. 10. This will be the first dividend paid by the reorganized company on the common shares.

shares. In connection with the current dividend declaration, Col. Charles E. Speaks, President, expressed optimism about the tire industry outlook for the coming year. The enthusiastic reception being given to 1939 automo-biles and the sharp rise in the nation's mileage indicate a good year for both original and replacement tire sales. He also anticipates a strong upturn abroad, where Fisk is now distributing its tires to more than 50 foreign countries.—V. 147, p. 1.35.

countries.--V. 147, p. 1.035. Flatbush Industrial Building-Tenders--Holders of 1st mortgage fee 6% serial gold bonds are being notified that pursuant to the provisions by the Massasoit Corp. and declared operative by it under date of Jan. 18, 1934, that said Massasoit Corp. has convenanted to deposit with the trustee designated in said plan of reorganization certain funds, which funds are in the sum of \$43,107.56 to be used for the retirement of bonds of said issue at market. Pursuant to said plan of reorganization the Continental Bank & Trust Co. of New York, Successor Trustee will until Thursday, Dec. 15, at 3 o'clock p. m. at it's office located at 30 Broad Street, Horough of Man-hattan, City and State of New York, receive proposals for the sale and delivery to it on or before Friday, Dec. 22, 1938, of bonds of said issue in an amount sufficient to exhaust as nearly as may be the funds available for the retirement of bonds as required by said plan of reorganization. All coupons maturing May 24, 1939 and thereafter shall be attached to said bonds. -V. 125, p. 3204.

Flintkote Co.—To Pay 60-cent Dividend— Directors have declared a dividend of 60 cents per share on the common stock, payable Dec. 20 to holders of record Dec. 13. Last previous dividend was a regular quarterly dividend of 25 cents per share distributed on Dec. 20, 1937.—V. 147, p. 3159.

This compares with 25 cents paid on Dec. 24, 1937; 50 cents paid on Oct. 1, 1937, and an initial dividend of 25 cents per share paid on July 1, 1937.—V. 146, p. 2041.

General Baking Co.—To Pay 35-cent Dividend— Directors on Dec. 2 declared a dividend of 35 cents per share on the com-mon stock, par \$5, payable Dec. 22 to holders of record Dec. 10. An extra dividend of 10 cents in addition to a dividend of 15 cents was paid on Oct. 1 last; dividends of 10 cents per share were paid on July 1 and May 2 last, and previously regular quarterly dividends of 15 cents per share were dis-tributed.—V. 147, p. 2244.

and previously regular quarterly dividends of 15 cents per snare were ustributed.-V. 147, p. 2244. **General Foods Corp.**-*Expansion Program*--A \$15,000,000 expansion program is being undertaken by this corpora-tion, C. M. Chester, Chairman of the Board, announced on Nov. 25. The program includes new plant facilities, enlargement of quick-freezing apparatus, a new laboratory and other equipment. A new coffee and tea plant is now being built by 500 workmen on a 10-acre site on the Hoboken, N. J., waterfront. The work started on fue to floor area, with manufacturing facilities of the most modern design. A new to flee and tea plant is now being built by 500 workmen on a 10-acre site on the Hoboken, N. J., waterfront. The work started on fue of floor area, with manufacturing facilities of the most modern design. Anong the building will be a new research laboratory which will be head-quarters for the company's 28 laboratories in various parts of the country. "Another division of General Foods, Frosted Foods Sales Corp., is ex-panding its operations to meet the increasing public demand for Birds Eye foods," the announcement continues. "A new quick-freezing plant is being developed in Florida. We are increasing the output of quick-freezing of farm products in Boston and extending the quick-freezing of farm products. "Mobile quick-freezing machines are used by the Birds Eye Frosted Foods division, so that fruits, berries, vegetables, meats, fish and poulty are freshest. At present 50 items are marketed. Quick-frozen foods, it is expected, will utilinately provide all parts of the nation with a large variety of foods regardless of season. "Last year capited expenditures amounted to approximately \$6,700.000. In 1936 they were about \$3,200.000. Authorized for completion during 1938 were expenditures of \$6,750.000."-V. 147, p. 3159. **General Investors Trust**-Sire. Dividend--The dimetry are block a dividend of six on the spine on

General Investors Trust—Six-cent Dividend— The directors on Nov. 30 declared a dividend of six cents per share on company's shares of beneficial interest, par \$1, payable Dec. 20 to holders of record Dec. 2. This compares with four cents paid on Sept. 15 last; three cents paid on June 15 last; two cents on March 15 last; 12 cents on Dec. 15, 1937; 10 cents on Sept. 15, 1937; 5 cents paid on June 15 and March 15, 1937; 40 cents on Dec. 15, 1936, and 8 cents on May 1, 1936.— V. 147, p. 3014.

General Motors Corp.—November Car Sales—The com-pany on Dec. 8 released the following statement:

pany on Dec. 8 released the following statement: November sales of General Motors cars and trucks from all sources of manufacture totaled 200,256 compared with 195,136 in November a year ago. Sales in October were 123,835. Sales for the first 11 months of 1938 totaled 1,119,840 compared with 1956,645 for the same 11 months of 1937. Sales of dealers in the United States totaled 159,573 in November com-pared with 153,184 in Nove. ber a year ago. Sales in October were 92,890. 571,792 for the same 11 nonths of 1937. Sales to consurers in the United States totaled 131,387 in November compared with 117,387 in November a year ago. Sales in October were

68,896. Sales for the first 11 months of 1938 totaled 882,882 compared with 1,504,533 for the same 11 months of 1937.

Generating Corp. properties acquired Aug. 25, 1938.—V. 147, p. 3016. Hamilton Cotton Co., Ltd.—Accumulated Dividend— The directors have declared a dividend of 50 cents per share on account of accumulations on the \$2 cum. conv. sinking fund preference stock, par \$30, payable Jan, 2 to holders of record Dec. 15. The dividend will be paid on Canadian funds and is subject, in the case of non-residents, to a 5% tax. Like amount was paid on Oct. 1 and on July 1, last; a dividend of \$1 was paid on April 1, last, and dividends of 50 cents per share were paid in each of the 12 preceding quarters, the April 2, 1935, dividend being the first to be paid on this issue since the regular quarterly dividend of 50 cents per share was distributed on Oct. 1, 1931. Accumulations after the current dividend will amount to \$6 per share. —V. 147, p. 1779. Hartford Times, Inc. Dividend Parmar's

Hartford Times, Inc.—Dividends Resumed— Directors have declared a dividend of \$1 per share on the common stock, payable Dec. 15 to holders of record Dec. 1. This compares with \$1.50 paid on Dec: 15, 1936 and one of 25 cents per share in 1934.—V. 147, p. 1928.

Hawaiian Electric, Ltd.—Extra Dividend— Directors have declared an extra dividend of 20 cents per share in addi-tion to a dividend of 14 cents per share on the common stock, both payable Dec. 15 to holders of record Dec. 5.—V. 146, p. 442.

Haytian Co. of America-Committee Gives Reasons for

Opposing Plan—
 The bondholders committee, of which Leonard A. Wales is Chairman, in a letter to holders of the company's 15-year income debenture bonds due Dec. 31, 1938, sets forth briefly its reasons for opposing the arrangement proposed by the management and supported in principle by the note-holders committee, to scale down the principal amount of bonds, extend the maturity and reduce the interest rate, as follows:

 (1) To reduce the debentureholders' claims to \$1,000,000 and then give to the present stockholders any substantial part of the equity so created seems to be unjustified and unreasonable.
 (2) The proposed arrangement gives no recognition to the fact that \$2,340,000 of unpaid interest rate to the stockholders.
 (3) No arrangement or plan should be consummated until the acts and record of the present management have been subjected to the proper serving.
 We believe that the present debentureholders should be assured a controlling voice in the selection of the board of directors which will install the management of the company, and that this end should not be defeated by any voting trust or other device.
 The Committee is requesting authorizations to act on behalf of the debentureholders, but no deposit of bonds is asked for at this time.—V. 147, p. 3016.

Hershey Creamery Co.—\$1 Common Dividend— Directors on Nov. 29 declared a dividend of \$1 per share on the common stock, payable Dec. 21 to holders of record. Dec. 6. This will be the first payment made on the common shares since Dec. 21, 1937 when a regular semi-annual dividend of 50 cents per share was distributed.—V. 147, p. 1780.

Hinde & Dauch Paper Co.—To Pay 25-cent Dividend— Directors have declared a dividend of 25 cents per share on the common stock payable Dec. 23 to holders of record Dec. 15. A like amount was paid on June 30, last and previously regular quarterly dividends of 50 cents per share were distributed.—V. 147, p. 3309.

Hodges Carpet Co.—Par Value Changed— Stockholders at a recent meeting voted to change the company's stock from \$100 par value to no-par.—V. 142, p. 1291.

Hooker Electrochemical Co.—\$1 Dividend— Directors have declared a dividend of \$1 per share on the common stock, payable Nov. 30 to holders of record Nov. 17. Like amount was paid on Aug. 31, last. Dividends of \$1.50 per share were paid on May 31 last and each three months previously. In addition, a special dividend of \$2 was paid on Oct. 20, 1937.—V. 147, p. 1340.

Hoskins Mfg. Co.—To Pay 15-cent Dividend— The directors have declared a dividend of 15 cents per share on the common stock, par \$2.50, payable Dec. 23 to holders of record Dec. 8. This compares with 10 cents paid on Sept. 26, last; 15 cents paid on June 25, last; 25 cents paid on March 26, last, and on Dec. 24, 1937, and 40 cents paid on Sept. 27, and on June 26, 1937, this latter being theinitial payment on the \$1.50 par shares. See V. 144, p. 4009 for detailed record of previous dividend payments.—V. 147, p. 2867.

Hudson Motor Car Corp.—Shipments— Shipments of Hudson cars in the United States for the week of Dec. 3 were 57% higher than for the same period a year ago, William R. Trazy, Vice-President in charge of sales for the company, announced on Dec. 8: "Retail sales for the week were greater than for any previous week in the last 12 months, and 10% above the same week last year," Mr. Tracy said, -V. 147, p. 3017.

Hydro-Electric Corp. of Va.—*Tenders*— City Bank Farmers Trust Co., as successor trustee, will receive on or before noon, Dec. 13, 1938, written proposals for the sale to it of a sufficient amount of first mortgage 5% gold bonds, series A, to exhaust as nearly as possible the sum of \$8,334 available in the sinking fund for the purchase of bonds at the lowest prices offered, in no event exceeding 103% of the principal amount and accrued interest. Proposals should be good for acceptance on or before 3 p. m., Dec. 16. Delivery of accepted bonds must be made on or before Dec. 20.—V. 145, p. 3657.

Hygrade Sylvania Corp.—37 ½-cent Common Dividend— Directors have declared a dividend of 37½ cents per share on the common stock, payable Dec. 23 to holders of record Dec. 10. A like amount was paid on April 1, last, and previously regularly quarterly dividends of 75 cents per share were distributed.—V. 147, p. 1195.

Illinois Zinc Co.—New President— James A. Hill of New York was on Dec. 5 elected President of the com-pany by the directors following a meeting of stockholders. He succeeds L. E. Wemple, who was President for about 15 years. The stockholders elected several new directors, including J. Ford Johnson of New York, who is with Smith, Barney & Co.; Francis M. Barker, Balti-more, and Leroy E. Nelson, a Vice-President, of Chicago, W. B. Porter. who also was elected a director, joined the company recently as Vice-Presi-dent and General Manager.—V. 147, p. 3310.

J. P. S. Ltd.—Capital Note—In August, 1938, the Jamaican income tax law was amended, retroactive to Jan. 1, 1937, the tax being approximately doubled. Be-ginning with July, 1938, the monthly figures include the monthly pro rata

portion of the estimated 1938 tax on the new basis. An additional amount of \$12,390 applicable to the six months ended June 1938 is included in the current 12 months figures. The additional tax of \$23,857 applicable to the year 1937 has been charged to earned surplus.—V. 147, p. 3018.

Jefferson Electric Co.—Common Dividend Resumed— Directors have declared a dividend of 25 cents per share on the common stock, payable Jan. 2 to holders of record Dec. 20. This compares with 25 cents paid on March 31, 1938; \$1.50 on Dec. 24, 1937; dividends of 50 cents per share paid in each of the three preceding quarters; \$1.50 paid on Dec. 21, 1936, and quarterly dividend of 50 cents per share paid previously. -V. 147, p. 576.

Jefferson Lake Oil Co., Inc.—Preferred Dividend— Directors have declared a dividend of 75 cents per share on account of accumulations on the 7% cumulative preferred stock, payable Dec. 15 to holders of record Dec. 5.—V. 147, p. 1197.

Jewel Tea Co., Inc.—Obituary— Robert W. Muir, Secretary and General Counsel of this company, died on Nov. 30.—V. 147, p. 3331, 2689.

Los Angeles Ry. Corp.—Time Extended— Corporation has announced that the time for making deposits and filing assents to the plan for refunding \$6,850,000 of outstanding underlying bonds of the system has been extended to the close of business on Dec.31. The company's letter to bondholders discloses that a substantial additional deposit of bonds has been made during November. At the close of business on Nov. 30 there had been deposited a total of \$6,211,000 par value of bonds, or 90.54% of the total underlying bonds outstanding. Although the very substantial percentage of bonds now on deposit has indicated widespread approval of the plan, corporation calls the attention of the ond-depositors to the fact that the plan will not be feasible, in its opinion, unless the holders of a least 95% of all underlying bonds assent to the plan and deposit of their bonds.
The plan called for an exchange of a new issue of first mortgage bonds for the currently outstanding underlying bonds of the system, with maturities on Oct. 1 and Dec. 1 of this year and Dec. 1 in 1940. The new bonds to be exchanged for the 1940 maturities will mature in 1950. They will bear the same rate of interest as the present bonds, and will constitute a closed first mortgage on all the property of the corporation.—V. 147, p. 3461.

McKesson & Robbins, Inc.—Equity Receivers A provinted Mismanagement Charged by Stockholders—

-Mismanagement Charged by Stockholders-Charging waste and mismanagement and presenting affidavits to the court to support his allegations, Attorney Vincent W. Dennis, Corporation Counsel of the City of Hartford, as a common stockholder, on Dec. 5 filed an equity receivership action in the U. S. District Court at Hartford against the company, engaged in the manufacture and distribution of drugs and cosmetics and the distillation of spirits. The litigation in no way reflects on the solvency of the corporation, it is said. On the strength of the evidence contained in the affidavits signed by Mr. Dennis, Federal Judge Edwin S. Thomas appointed as temporary receivers Thomas J. Spellacy of Hartford and Abraham S. Weissman of New Haven. Brought by Mr. Dennis, who asserts he is a holder of some 2.000 shares of common stock in his own behalf and in the behalf of other stockholders who wish to join him, the action will require the establishment as a fact of the allegation that in its last statement the corporation included an asset that is non-existent.

As a next step the matter anticipates an application by the receivers for an inventory and an audit, together with the appointment of appraisers by the court, to determine the financial condition of the corporation. The purpose of the receivership is to conserve the assets of the corporation. Mich has distributing houses in 70 cities in 35 States, the District of Colum-bia and the Territory of Hawaii, and to effect a reorganization so as to re-establish the concern and turn it back to the corporation. Engaged also in the importing and exporting of drugs and the memicals, the general wholesaling of all drugstore requisites and the wholesaling of imported and domestic wines and distilled spirits, McKesson & Robbins has its manufacturing division and main offices at Bridgeport. With for-eign offices in Canada, Japan, England and Norway, the corporation also controls McKesson & Robbins, Ltd., incorporated in Canada in 1927, which is also affected by the action.

C. F. Michaels, Executive Vice-President of the company, on Dec. 6 issued the following statement:
Temporary receivers were appointed for McKesson & Robbins on Monday afternoon, Dec. 5, in the U. 8. District Court at Hartford, Conn., on the suit of a stockholer alleging mismangement and deficiency in stated assets. The crude drug department of the business is the only department involved and there appears no question of the company, which is the manufacture and wholesaling of inventories and accounts receivable, was quite unrelated to the principal business of the company, which is the manufacture and wholesaling of drugs and distilled liquor. The section of the solvency of the company and have advised all departments of the solvency of the company and have advised all departments of the business of the business of the business of the business.

the solvency of the company and nave advised all departments of the busi-ness except that involved to continue operations as usual. The Committee on Stock List of the New York Stock Exchange issued the following statement Dec. 7: J. F. Thompson, Treasurer and a director of the company, and W. L. Cummings, a director, appeared before the Committee on Stock List of the New York Stock Exchange today. Their appearance was in response to a request made by the Committee on Tuesday for full information relat-ing to the company's answer to allegations made in connection with the application for an equity receivership for the company. Messers. Thompson and Cummings assured the Committee of the com-pany's readiness to cooperate in every way possible in the effort to deter-mine the company's financial position for the information of security hold-ers and the investing public. They explained that there had not been time. The receivers for the company notified the Committee on Stock List that they are now investigating the affairs of the company and that any testimony by either of them at this time would be useless. The Committee on Stock List announced that trading in the securities of McKesson & Robbins, Inc., will remain suspended because sufficient official information to enable the public reasonably to appraise those securities is not now available. Bankruptcy Trustees Appointed—

information to enable the public reasonably to appraise choice securities is not now available. Bankrupicy Trustees A ppointed— William J. Wardell, an attorney, and C. F. Michaels, Executive Vice-President, were named trustees Dec. S by Federal Judge Alfred C. Coxe of the Southern District of New York under Chapter 10 of the Chandler Act, the revised Federal bankruptcy law. The action of the company in filing in New York is expected to supersede that of a stockholder who had equity receivers appointed by the Federal Court at Hartford, Conn. on Dec. 5. The SEC has been granted permission by the Court to intervene in the proceedings. The petition was filed pursuant to a resolution adopted by the board of directors of the company. The petition was filed by C. F. Michaels, Executive Vice-President, who has signed all information given the press since the first proceedings started, and by Wilbur L. Cummings, attorney and member of the board. Nearly Fourth of Assets May Be Fictitious— Nearly Fourth of the assets of the company may be fictitious and elimination of these items from the company before the committee on stock list of the New York Stock Exchange indicates. All of the fictious listing of assets occurred in the crude drug department of the company, a department under the exclusive control of an official of the company, a department under the exclusive control of an official of the company, wilbur L. Cummings, director of the company, told the Exchange officials. The testimony was given Dec. 7 and made public Dec. 8. In his testimony before the Exchange Committee, Mr. Cummings char-

Inst of the New York Stock Actuals courred in the crude drug department of the company, topk 1. Cummings, director of the company, told the bit course of the company of the test statement we still can't believe them." Mr. Cummings outlined for the committee the discovery of the situation by you and the receivership.
The result of the company of the course of the statement of McKeense the statement of McKeense and the statements of a statement of McKeense and the statements of the statement of McKeense and the statements of the statement of McKeense and the model was a sort of the statement of McKeense and the model was a sort of the statement of McKeense and the model was a sort of faced after the test and as a manage sale. The statement of McKeense and the statement of McKeense and the model was a sort of faced after the test and as a contract with W. W. Smith & Co. of Montreal the accounts seem to have been paid was a sort of faced after the test and as the made of the openent at mr called Manning and the accounts seem to have been paid was a sort of faced after the test and all the partnership. The accounts seem to have there and and the analyzed accounts and passed on the accounts were made from customers; estenship the see three and passed on the department of the statement of

F IDADCI2 according to Mr. Cummings, pursued the matter and found that Manning & Co. had only a woman Secretary in Montreal. The Secretary said their principal place of business was in Liverpool. The receiver told Mr. Cummings that the man who handled all the details of the crude drug department told the receiver that "the depart-ment is just a shell, that the assets are not there." The same man, Mr. Cummings said, was the employee in charge of this department, and shoulders the entire olame. "The assets of that department at Bridgeport on the books of the Bridge-port offices, are approximately \$17,000,000, roughly \$9,000,000 in inven-mings said. "It may be the whole thing is just a hollow shell," Mr. Cummings told the committee. "There may be nothing them of the same set

tories, and \$6,000,000 to \$7,000,000 in accounts receivable," Mr. Cum-mings said. "It may be the whole thing is just a hollow shell," Mr. Cummings told the committee. "There may be nothing there. That is the worst of the picture. There is no involvement of any other department of the business. The manufacturing business is a healthy business and makes a profit. There is no involvement of the wholesale business, and no involvement of the manufacture and drug business or liquor business or the wholesaling of those liquors. "The receiver satisfied himself of the integrity of every other branch of the business, of the solvency of the company, and sent telegrams to all the branches to continue business in the usual way, and all the company's banks to cash checks, and it his purpose to pay bills as they mature; that is, so far as he can," Mr. Cummings said. Pointing out that the company had unsecured loans of \$4,750,000, Mr. Cummings said that the banks have been exceedingly sympathetic and friendly. "What their final attitude will be, I don't know," he added. "One of the banks, the Manufacturers Trust, said that they had refused checks which had come in this (Wednesday) morning." *Condolidated Balance Sheet*

This will be the first dividend paid since Dec. 10, 1937, when 25 cents per share was distributed; like amounts were paid on Sept. 10 and June 10, 1937.—V. 147, p. 119.

dividend paid since Dec. 10, 1937, when 25 cents per share was distributed; like amounts were paid on Sept. 10 and June 10, 1937.--V. 147, p. 119. **Manhattan Ry.**-Sixth Ave. Line Sold for \$80,000 for Scrap The Sixth Avenue "EI" was sold at auction for scrap at \$80,000, Dec. 5, despite protests fron representatives of the company, former owners of the line. Train service had been suspended Sunday might, Dec. 4. On Dec. 5, Manhattan Ry, stock interests and other parties attempted to olock the auction. Early in the day Supreme Court Justice Steuer denied a petition for a temporary injunction restraining the sale. Supreme Court Justice Collins denied a request by Manhattan Ry, for a review of the Transi Commission's order permitting condemnation of the line. The terms of the auction sale provided that the bidder be prepared to demolish the ine within 90 days. The high bid was offered by George I. Weissman, representing the Portland Mill Wrecking Co. of San Francisco. Experts estimated the value of the structure for scrap at \$30,000. The deal by which the city acquired the Sixth Avenue elevated line was completed Dec. 6, when Mayor La Guardia presented a check for \$3,500,000 to Van S. Merie-S.nith, Chairman of a boncholders' committee of the Man-hattan Ry. Omdbolders as directed by the Court." The money will be held by the U. S. District Court and "paid out to all Manhattan Ry. bondholders as directed by the Court." The das on Occ. 13 by Edward H. Childs, Special Master, of the Sixth Avenue Line to the Merie-Smith Bondholders' protective Committee of \$12,00,000. The Court directed that necessary steps be taken toward transferring the property and ordered payment of \$3,500,000 of the purchase price by Dec. 6, and the balance on or before Jan. 9, 1939. New York City taxes are to be paid out of the second instalment.-V. 147, p. 3313. **Mapes Consolidated Mfg. Co.***Extra Dividend*--Directors have declared a metre dividend of 50 contract due det dedie

Mapes Consolidated Mfg. Co.—Extra Dividend— Directors have declared an extra dividend of 50 cents per share in addi-tion to the regular quarterly dividend of like amount on the common stock. The extra dividend will be paid on Dec. 26 to holders of record Dec. 15, and the regular quarterly distribution will be made on Jan. 1 to holders of

record Dec. 15. Similar payments were made on Oct. 1, 1937 and an extra dividend of 25 cents was paid on July 1, 1937.-V. 147, p. 1041.

Maple Leaf Milling Co., Ltd.—Stock Issued for Interest— Instructions have been issued to the Montreal Trust Co. and the Toronto General Trusts Corp., transfer agent and registrar, respectively, authorizing the issuance of 3,170 class A partic. pref. shares of the company as of Dec. 1, 1938, to the company's bankers in lieu of interest on the No. 2 bank loan, in accordance with the capital reorganization.—V. 147, p. 2537.

Railway Co. 6% prior preference stock.—v. 147, p. 3020. (Glenn L.) Martin Co.—Stock Offered—A group con-sisting of Smith, Barney & Co.; Blyth & Co., Inc., Brown Harriman & Co., Inc., and Otis & Co., Inc., released for offering Dec. 8 on a when-issued basis a block of 57,847 shares of common stock of the company. This stocks is being offered through the exercise of rights purchased from Glenn L. Martin, President of the company.

Holders of common stock of record at the close of business on Dec. 10-1938, will be offered the right to subscribe at \$20 per share for common stock (\$1 par) to the extent of one share for each six shares held. The rights expire on Dec. 30, 1938.-V. 147, p. 3462.

Massachusetts Fire & Marine Insurance Co.-Extra Dividend-

Directors have declared an extra dividend of \$2 per share in addition to the regular semi-annual dividend of \$5 per share on the capital stock, both payable Dec. 15 to holders of record Dec. 8. Similar payments were made in December of each of the three preceding years.—V. 145, p. 3660.

Memphis Power & Light Co.-Company to Meet TVA

Rates— The company on Dec. 3 told the Board of Light and Water Commission of Memphis that it was putting into effect as of Dec. 1, 1938, the same electric rates as are now being charged by the city's own distribution system which is buying power from the Tennessee Valley Authority. The company's announcement was contained in its reply to the so-called "final offer" of \$17,385,000 made by the City's own distribution system which is buying power from the Tennessee Valley Authority. The company's electric and gas properties in the city'. The company declared that in view of the fact that the offer meant a heavy loss to its security holders because the price was several million dollars less than the invest-ment in the property it would have to submit the offer to its security holders. The city's price of \$17,385,000 is the same as was offered in April and was refused by Paul B. Sawyer. President of National Power & Light Co. which controls the Memphis company. It includes \$2,000,000 from the TVA for certain of the largest transmission lines and stand-by service from the company's steam generator. The company would retain only its trans-mission lines to Arkanasa and Mississippi plus cash, securities and receivable items. The city would take real estate with a rate base valuation of about \$1,100,000, which was excluded from the previous agreement, including the office building at Third and Madison Streets. The Memphis Street Ry. owned by the utility is not affected by the proposed trade, except that, in case the company refuses to sell, it is ex-pected that a competing bus line with a lower fare will appear. The Jone of \$17,385,000 for the entire business of the power company compares with the agreement of Sept. 30 in which the company accepted a price of \$13,500,000 for the electric business alone, excluding real estate. V. 147, P. 3462.

Merritt-Chapman & Scott Corp.—Accumulated Div.— Directors have declared a dividend of \$6,50 per share on account of ac-cumulations on the 6½% cumulative pref. class A stock payable Dec. 23 to holders of record Dec. 15. A similar amount was paid on Dec. 24, 1937, this latter being the first dividend paid since Dec. 1, 1931 when a regular quarterly dividend of \$1.62½ per share was distributed.—V. 147, p. 2538.

Michigan Associated Telephone Co.—Bonds Called— All of the outstanding 1st mtge. 5% gold bonds, series A, due April 1, 1961, have been called for redemption on Jan. 10 at 104 and accrued interest. Payment will be made at the Continental Illinois National Bank & Trust Co. of Chicago.—V. 147, p. 3462.

Michigan Gas & Oil Corp.—Pref. Stock Offered—Keeler, Baker & Co., Inc., New York, on Dec. 6 offered 100,000 shares (\$10 par) 5% cum. conv. pref. stock at \$10 per share

bares (\$10 par) 5% cum. conv. pref. stock at \$10 per share and divs. *History*—Company was organized Aug. 26, 1927 in Delaware under the name of New York Petroleum Royalty Corp., which name was changed in 1931 to Michigan Gas & Oil Corp. At its inception company bought and sold oil and gas royalties for its own account in Texas, Oklahoma, New Mexico and Kansas. In 1929 it acquired leasehold interests in Michigan and for several years operated producing oil properties in that State. The company, however, has dis-continued its operations in Michigan and has transferred its equipment to its Texas properties. In 1935 the company commenced development operations in Loying County, Texas, in an area in which it held several iboust a deres of leases and royalty. In 1937 it completed a commercial oil well on one of these leases for the discovery well in the Mason Pool. Subsequently the company has concentrated its activities largely in this area, having drilled four additional producing wells on the 280 acre lease on which the discovery well is located⁷. In 1937 the corpleted in Aprin Has drame the eight producing wells on the discovery well is located⁷. In 1937 the corporation organized a wholly-owned subsidiary, the Mason Pipe Line Co. (Del.). The Mason Pipe Line, completed in April, 1937 and the remainder for other operators, and receives 10 cents per barrel as gathering and transporting all the oil produced there on division order

Financial Chronicle

Purpose—The present intention of the company is to employ the proceeds from the sale of the preferred stock, approximately \$350,000, for the following purposes: Expenses in connection with the registration and filing securities, \$25,000; liquidation of bank loans and accounts payable, \$250,000; development of additional lease acreage, \$450,000; additional production equipment, \$75,000; working capital for general corporate *Capitalization*—The company had the following consolidated capitaliza-tion as of June 30, 1938:

Control Stock of the Mason Pipe Line Co. A supply loan of \$25,492 wed to Five Fiver wholder of near the following consolidated capitalization as of the Mason Pipe Line Co. Missouri-Kansas Pipe Line Co.—New Directors— At the annual meeting of stockholders of this company, the following directors were elected: Harold P. Childs, A. Faison Dixon, Hubert E. Howard, William G. Maguire, Geoffrey R. Mellor, John R. Perry and William M. Vermilye. Mr. Howard is a new member of the board, the others having been reelected. Large majorities of both classes of stock were represented at the meeting.—V. 147, p. 2870. Modine Mfg Co.—To Pau 25-cent Dividend—

Modine Mfg. Co.—To Pay 25-cent Dividend— The directors have declared a dividend of 25 cents per share on the common stock, no par value, payable Dec. 20 to holders of record Dec. 10. This compares with 50 cents paid on March 20; last; \$1 paid on Dec. 20, 1937, and 75 cents paid on Nov. 1 and on Aug. 2, 1937; previously regular

quarterly dividends of 50 cents per share were distributed. In addition, a special dividend of \$1 per share was paid on Dec. 22, 1936.—V. 146, p. 3810.

Monolith Portland Midwest Co.—Accumulated Dividend. Directors have declared a dividend of 50 cents per share on account of accumulations on the 3% cumulative preferred stock, payable Dec. 15 to holders of record Dec. 1. Arrearages after the current payment will amount to \$8.20 per share.—V. 145, p. 3503.

Monongahela West Penn Public Service Co.—Files Amendment with SEC—

Amendment with SEC— Company has filed an amendment to its declaration under the Holding Company Act to provide for the issuance and sale of 200,000 shares (\$15 par) common capital stock to American Waterworks & Electric Co., Inc., for a consideration of \$3,000,000. The declaration concerns the reduction of the par value of the company's common capital stock from \$25 to \$15 a share. The proceeds from the sale of the stock are to be used to discharge \$3,000,000 of open account indebtedness now owed by the company to American Waterworks & Electric Co., Inc., The West Penn Electric Co., and West Penn Railways Co., all registered holding companies. American Waterworks & Electric Co., Inc., has filed an application for approval of the acquisition of the securities. Public hearing on the declaration and application will be held on Dec. 10. -V. 147, p. 3314.

National Bond & Share Corp.—Special Dividend— Directors have declared a special dividend of 10 cents per share on the capital stock, payable Dec. 21 to holders of record Dec. 14. A dividend of 15 cents was paid on Oct. 15, last, this latter being the initial dividend on the larger amount of stock now outstanding.—V. 147, p. 2539.

the larger amount of stock now outstanding.—V. 147, p. 2539. National Refining Co.—Urges Holders to Assent to Plan— Further deposits of preferred shareholders in connection with the amended recapitalization plan originally submitted Dec. 22, 1936, has been called for in a letter sent by the company. The plan, validity of which was upheld by the Ohio Supreme Court, was approved by holders of 70% of preferred shares and 86% of common shares at a special meeting held Jan. 19, 1937, and the letter states that approximately 72% of the old preferred stock has been deposited under the amended plan. Each preferred share had accrued dividends of \$34 as of Oct. 1, 1938, and holders are entitled (but not required) to exchange it for 1 1-3 shares of new prior preferred staten to the profit decline; for nine months ended Sept. 30, net loss before taxes, and subject to year-end audit, was \$235,063, comparing with net profit of \$266,841 in the 1937 period. 9 Months Ended Sept. 30-

New England Power Association—Preferred Dividends— Directors have declared a dividend of \$1 per share on the 6% pref. shares and of 33 1-3 cents per share on the \$2 pref. shares, both payable Jan. 3 to holders of record Dec. 15. Similar amounts were paid on Oct. 1, July 1 and April 1 last. Dividends are in arrears on both issues,—V. 147, p. 3316.

New Orleans Public Service Inc.—Preferred Dividend— Directors have declared a dividend of \$1.75 per share on account of accumulations on the \$7 cum. pref. stock, payable Jan. 3 to holders of

igitized for FRASER o://fraser.stlouisfed.org record Dec. 15. A like amount was paid on Oct. 1 and July 1 last, and a dividend of $87\frac{1}{2}$ cents was paid on April 1 last, this latter being the first dividend paid since April 1, 1933, when $87\frac{1}{2}$ cents per share was also distributed.—V. 147, p. 3465.

New Orleans Texas & Mexico Ry.—Bondholders' Com-mittee to File Exceptions to Reorganization Plan—

itew orleans lexas & Mexico Ky,—Bondholders' Com-mittee to File Exceptions to Reorganization Plan— The protective committee for the first mortgage bonds and 5% non-cumu-lative income bonds, whose Chairman is George H. Walker, has notified holders of such bonds that it will file exceptions to the reorganization plan proposed by an Interstate Commerce Commission Examiner last Oct. 24, demanding more favorable treatment. The railroad, known as the Gulf Coast Lines, is a subsidiary of the Missouri Pacific RR. Other groups of Gulf Coast bondholders are understood to be dissatisfied with the treatment accorded them under the Examiner's plan, according to the committee's notice, and the Missouri Pacific RR. The committee's notice, and the Missouri Pacific RR, has already notified all parties to the reorganization proceedings that it intends to oppose the Examiner's plan to the utmost. The committee, believing that a prompt reorganization of the Gulf Coast Lines was in the best interests of the bondholders, "reluctantly agreed to recommend acceptance of the Stedman committee plan, if approved by the Commission." Concessions made in agreeing to the Stedman plan, accord-ing to the committee, 'were made in the hope that plan could be put through promptly." Now that there has already been a long delay, and further delay seems inevitable, the committee says it feels it must insist that any plan shall take into account the earnings now being contributed by the Gulf Coast Lines. It seems clear to the committee that a prompt reorganization cannot be carried out on the basis of the Examiner's plan. Of the 1932-1934 average net available for interest of the Missouri Pacific. International-Great Northern and Gulf Coast Lines, 8.0% was accounted for by the Gulf Coast Lines, but for the 12 months endeed Oct. 31, 1938, this percentage was 26.3, according to figures in the committee notice. Of the gross revenues for the corresponding periods, Gulf Coast Lines con-tributed 10.2% and then 13.2%. To Extend Deposit Agreement Untit A

To Extend Deposit Agreement Until April, 1943— The Walker committee has been authorized to extend the deposit agree-ment until April 25, 1943, and urges bondholders who have not deposited to do so. Copies of the deposit agreement may be obtained from the depositary, the Chase National Bank, 11 Broad St., New York, or from the Secretary of the committee, Edward F. Hayes, 38 Wall St., New York. Other members of the committee are: Alex Berger, Willard V. King, B. A. Tompkins, and George E. Warren. V. 147, p. 3465.

New York Central RR.—Abandonment— The Insterstate Commerce Commission on Nov. 26 issued a certificate permitting abaondonment by the company of that portion of its line of railroad extending easterly from Caledonia to Holcomb, N. Y., approxi-mately 25.13 miles.—V. 147, p. 3465.

New York Lake Erie & Western Docks & Improvement Co.--Interest-

The interest due July 1, 1938, on the first mortgage bonds extended at 5%, due 1943, is now being paid.—V. 146, p. 445.

New York New Haven & Hartford RR.—Official Retires On Dec. 1, 1938, Thomas F. Paradise retired as Treasurer. Arthur W. Bowman, Assistant Treasurer, has been appointed Treasurer, effective Dec. 1. E. L. Bartholon ew, Cashier, has been appointed Assistant Treasurer, effective Dec. 1.—V. 147, p. 3465.

New York Telephone Co.—Gain in Stations— Company reports a station gain in November of 6,316 which compares with a gain of 4,019 in November, last year, a gain of 10.040 in November, 1936, and a gain of 5,585 in November, 1935. In the first 11 months of this year the station gain was 19,942 contrasted with a gain of 90,907 in 1937; 92,513 in 1936, and 18,302 in 1935.

with a gain of 90,907 in 1937; 92,513 in 1936, and 18,302 in 1935. Lower Telephone Rates for Hotel Calls— The New York Public Service Commission has ordered this company to reduce and revise rates charged for telephone service to and through hotels. Under the Commission's order the maxmum surcharge which may be applied to toll calls originating at hotel guest room telephones is five cents when the toll charge is 50 cents or less, and 10 cents when the toll charge is over 50 cents. The changes are to beccme effective Jan. 1, 1939. The same rates at lobby public telephones are to be charged by the tele-phone company, whether these telephones are to be charged by the tele-phone company, whether these telephones are to be charged by the tele-phone company, whether these telephones are to be charged by the tele-phone company. The Commission also prohibited hotels from charg-ing for overtime on local calls, except for those calls for which the hotel is ordered by the Commission. This will remove from the telephone company's tariff schedule a practice involving payment of a 20% commission to certain hotels on all their local and toll message charges. Period End. New York Title & Mortgage Co.—Series F Trustees to Disburse \$\$18,964 on Dec. 31—

Aaron Rabinowitz, James L. Clare and Lawrence N. Martin, trustees for liquidation of the \$28,000,000 issue of mortgage investments known as Series F-1, announced Dec. 6 that a distribution of \$818,964 would be made to certificate holders on Dec. 31. It is calculated at \$2.97 for each \$99 of principal of the certificates. The announced distribution will be the eighth made by the trustees since their appointment in May, 1935, and will bring the total to \$4,673,891. --V. 147, p. 749.

Noma Electric Corp.—25-cent Dividend— The directors have declared a dividend of 25 cents per share on the com-mon stock, payable Dec. 20 to holders of record Dec. 12. This compares with 40 cents paid on Feb. 23. 1938, Feb. 18. 1937 and April 15, 1936, this last being the first dividend paid since Feb. 1, 1932, when a regular quarterly dividend of 10 cents per share was distributed.—V. 146, p. 3963.

dividend of 10 cents per share was distributed.—V. 146, p. 2963. North American Co.—Stock Offered—Offering of 375,000 shares of common stock was made Nov. 6 by an under-writing group comprising Dillon, Read & Co.; The First Boston Corp.; Blyth & Co., Inc.; Brown Harriman & Co., Inc.; Smith, Barney & Co.; Stone & Webster and Blodget, Inc.; Spencer Trask & Co.; Goldman, Sachs & Co.; Bon-bright & Co., Inc.; Union Securities Corp.; Shields & Co.; Kidder, Peabody & Co.; Riter & Co., and 62 other invest-ment houses. The shares were offered by a prospectus; the price being \$21 ¼ per share, the closing quotation for the stock, as set forth in the prospectus. Dillon, Read & Co. announced Nov. 6 that the selling group books had been closed.

closed. The shares were sold to the underwriters by American Cities Power & Light Corp., which will use the proceeds for reinvestment in securities or for other corporate purposes. The North American Co. does not own any of the shares offered by the prospectus and will not receive any proceeds

Oswego Falls Corp.—30-cent Dividend— Directors on Dec. 2 declared a dividend of 30 cents per share on the capi stock, payable Dec. 15 to holders of record Dec. 3. A regular quarter dividend of 10 cents was paid on Nov. 1, ast.—V. 147, p. 2542.

Pacific Can Co.—Dividend Resumed— Directors have declared a dividend of 50 cents per share on the common stock, payable Dec. 22 to holders of record Dec. 15. Previously dividends of 25 cents per share had been distributed each three months from Sept. 30, 1936, to and including June 30, 1937; none since.—V. 147, p. 3317.

Pacific Portland Cement Co.—May Recapitalize— A letter has been addressed to stockholders proposing a recepitalized plan which involves a \$6,000,000 write-down of assets. A special meeting has been called in San Francisco on Dec. 19 to vote on the plan, upon which the California Corporation Department will hold hearings beginning Dec. 21.—V. 139, p. 1412.

Pacific Telephone & Telegraph Co.—Gain in Phones— This company and subsidiary reports for November a net gain of 9,144 telephones, as compared with 10.386 gain in November, 1937. For the first 11 months of 1938 the gain was 63,326 stations, compared with 113, 070 in the corresponding period of 1937.

Larger Dividend— Directors have declared a dividend of \$2 per share on the common stock, payable Dec. 21 to holders of record Dec. 10. A dividend of \$1.50 was paid in each of the three preceding quarters and previously regular quarterly dividends of \$2 per share were distributed.—V. 147, p. 3167.

Pathe Film Corp.—Court Denies Minority Stockholders Plea for Injunction Against Liquidation.—
A decision and opinion by Justice Philip J. McCook of the Supreme Court, New York State was handed down Dec. 7 denying a motion for an injunction applied for by a group of minority stockholders against the corporation and its directors. The plaintiffs had sought to restrain the holding of a special meeting now scheduled to be held Dec. 13, 1938 to approve a proposed plan for dissolution which the management stated would

Transfer of Stock Holdings Opposed by du Pont de Nemours— The E. I. du Pont de Nemours & Co., Inc., on Nov. 30, began suit in the U. S. District Court to restrain Pathe Film Corp. from transferring to Pathe Film stockholders 3,000 common voting shares of the du Pont Film Manufacturing Co. without first offering them to the plaintiff on equal terms. An alternative to offer the stock for cash is suggested, or, if neither plan can be accomplished, the plaintiff asks that the stock to be transferred be stamped with a notice that if sold it must be offered to the plaintiff on equal terms.

blan can be accomplished, the plaintiff asks that the stock to be transferred be stamped with a notice that if sold it must be offered to the plaintiff on equal terms.
In 1924, both the du Pont and Pathe were engaged in the manufacture of films under license to use patents of the Pathe Cinema Societe Anonyme. They agreed to combine their resources in the manufacture of films and organize the du Pont Film Manufacturing Co., Inc., in which the plaintiff received 51% of the voting stock and Pathe 49%. Subsequently when Pathe needed funds it sold 4,900 shares to the plaintiff, later redeeming 3,500 shares.
Plaintiff maintained that agreement between it and the Pathe require that Pathe first offer the stock to du Pont on equal terms and alleges that it will be placed at a great disadvantage if the voting stock falls into the hands of many of the 7,000 stockholders of Pathe Film Corp.
O. H. Briggs, President of Pathe, issued a statement declaring that the complaint served upon Pathe by du Pont does not seek to enjoin Pathe's plan of liquidation. "du Pont's request to the court," Mr. Briggs continued, is based upon the contract between the two companies, dated Feb. 3, 1925, and seeks that either: (1) Pathe be restrained from disposing of the said stock without offering it to du Pont on equal terms for cash, if this can be done; or (2) if the Court will not grant the above request. Pathe be required to stamp upon the du Pont Film certificates which are distock may not be sold by any stockholder of Pathe without an offer being made first to du Pont on equal terms for cash. "Counsel for Pathe has advised the company which are dispose of." Subsequent contracts drawn up in 1929, again in 1930, and again in 1935, all carefully eliminated the words 'otherwise dispose of and confined the restrictions to a 'sale." It seems clear that Pathe's dissolution does not constitute a sale.
"Pathe of course, will resist du Pont's attempt to limit in any way its stockholders' rights to the du

Patino Mines & Enterprises Consolidated—Dividend— Directors on Dec. 8 declared a dividend of 75 cents per share on the common stock, par \$10, payable Dec. 24 to holders of record Dec. 19. This compares with 25 cents paid on June 30, last and a special dividend of \$2 per share paid on Dec. 23, 1937, this latter being the initial distribution on the \$10 par shares.

Earnings for 9 Months Ended Sept. 30-

Earnings for 9 Months Ended Sept. 30— The company reports for the nine months ended Sept. 30, 1938, after taxes but before providing for United States undistributed profits tax, estimated net profit of 29,125 pounds sterling, exclusive of £7,743 profit on investment securities transferred to subsidiary company not consolidated, and estimated profit of 1,913,613 bolivianos. This compares with profit of 66,929 pounds sterling (excluding £19,852 received as a dividend from investment now held by subsidiary company) and profit of 4,483,206 bolivianos for the same period in 1937. Profits of subsidiary companies are not taken up until declared as dividends. Production for the nine months ended Sept. 30, 1938 was 6,065 tons of fine tin as against a pro-duction of 6,184 tons for the same period in 1937. Tin in concentrates shipped but not sold at the close of the 1938 period was valued in inventory at £186 as against £212 at the close of the 1937 period.—V. 147, p. 1935.

Peninsular Telephone Co.—Year-end Dividend— The directors have declared a year-end dividend of 40 cents per share in addition to the regular quarterly dividend of like amount on the common stock, no par value. The year-end dividend will be paid on Dec. 20 to holders of record Dec. 5 and the regular quarterly distribution will be made on Jan. 3 to holders of record Dec. 15. An extra dividend of 40 cents was paid on Dec. 22, 1937.—V. 146, p. 2382.

(J. C.) Penney Co.—*Extra* Dividend— Directors on Dec. 6 declared an extra dividend of \$1 per share in addition to a regular quarterly dividend of 75 cents per share on the common stock both payable Dec. 20 to holders of record Dec. 9. An extra dividend of \$1.50 per share was paid on Dec. 23, 1937.—V. 147, p. 3024.

Potomac Electric Power Co.—New Director— Company has notified the New York Stock Exchange of the election of William H. Lipecomb as a director, succeeding Eugene E. Thompson, resigned.—V. 147, p. 2544.

Pressed Metals of America, Inc.-To Vote on Stock Increase

Pressed Metals of America, Inc.—To Vole on Stock Increase—
A special meeting of stockholders has been called for Dec. 20 to approve an increase in the authorized stock from \$150,000 par value to \$500,000. If the plan is approved, present shareholders will receive two new shares of \$10 par value in exchange for each share now held. The plan also calls for the sale of additional stock to underwriters to obtain funds for the retirement of the company's mortgage debt.
President 3. W. Leighton sent the following letters to stockholders regarding the proposed stock increase:
The company's expansion program for 1936 and 1937 necessitated the expenditure of approximately \$54,000 for plant and equipment.
In 1936 \$225,000 was received from the sale of treasury stock, and it was planed to obtain \$330,000 through the same channels in 1937, it was found indvisable to attempt permanent financing by offering stock for sale at that time, so a temporary bank loan was obtained instead.
Two of the largest car manufacturers have adopted our patented parts intereased demand for the company's products for 1939 car models made it imperative to provide additional manufacturing capacity and working especial. In order to secure adequate bank loans for that purpose it has been necessary to mortgage the company. The plan includes a broad distribution of the stock throughout 10 or more States of the Union which which which is the greeent shareholders. To help this wider distribution it was deemed advisable to increase the number of the new stock for each share now held, and doubling the number of unissued shares in the market for the company's scale show shares of the new stock for each share now held, and doubling the number of the new stock for each the greeent shareholders. To help this wider distribution it was deemed advisable to increase the number of the new stock for the company's mortgage didebedness.
The outdown wheld, and doubling the number of unissued shares in the accordance with t

October and \$369,210 for November."-v. 141, p. 423. **Prosperity Co.**—Sales— In October, 1938, net sales of the company, showed an increase over the like month of 1937 for the first time this year, totaling \$173,117, an increase of 49% over sales of \$116,427 reported for October last year, according to A. R. Braun, President. September sales this year were \$158,974. Total net sales of the company for the first 10 months of 1938 ended Oct. 31, were \$1,822,032, compared with \$2,759,229 for the first 10 months of 1937, a decrease of 34%, according to the report. "With orders booked to date evidencing a continuing improvement, business of the company during the final quarter of 1938 is showing an upward trend, as compared with the downward trend experienced in the same period of 1937," Mr. Braun states. "The present improvement is expected to continue into the new year.".-V. 145, p. 3665. **Descridence Co.**—Special Div.—

Providence-Washington Insurance Co.—Special Div.— The directors have declared a special dividend of 40 cents per share in addition to the regular quarterly dividend of 25 cents per share on com-pany's capital stock, par \$10, payable Dec. 23 to holders of record Dec. 9. A special dividend of 40 cents was paid on Dec. 24, 1937 and 1936; 25 cents was paid on Dec. 24, 1935; one of 10 cents on Dec. 27, 1934, and a special distribution of 20 cents per share was made on Dec. 27, 1933.—V. 146, p. 925.

Public Service Co. of New Hampshire-Stock Issue Approved

A pproved— A declaration filed under the Utility Act by the company regarding sale of 8:737 shares of \$5 preferred stock has been declared effective by the Securities and Exchange Commission. The shares of stock are to be initially offered to the public at \$91 each. The order was subject to condition that the stock will not be sold at less than \$90 a share to the public. The Commission also requested the com-pany to report not later than the tenth day of each month the number of shares sold on each day of the time previous calendar month, together with the price of such sales and the agent to whom the sales were made. This data must be furnished until the sale of the proposed shares has been completed.—V. 147, p. 3320.

Public Utility Engineering & Service Corp.--New

Public Utility Engineering & Service Corp.—New Vice-President, &c.— William J. Hagenah, President of the corporation, announced the election of E. D. Uhlendort as a Vice-President and director, and M. A. Morrison as Secretary of the corporation. It was also announced that the board of directors of the corporation has been reduced from 14 to 5 members. The retiring directors consist of presidents of the Public Utility operating companies in the Standard Gas & Electric Co. system. These companies purchased Public Utility Engineering & Service Corp. in 1935 from Standard. Gas & Electric Co., and Public Utility Engineering & Service Corp. at that time was reorganized as a mutually owned service company to provide en-gineering and other services to operating companies in the Standard Gas & Electric Co. system on a cost basis. The reorganization of the board of directors of Public Utility Engineering that are now in progress for the reacquisition of the service corporation by Standard Gas & Electric Co. would be in a better position it is believed Standard Gas & Electric Co. would be in a better position it on ore fully comply with the spirit of the Public Utility Engineering & On Oct 5 1038, the board of directors of Public Utility Engineering & On Oct 5 1038, the board of directors of Public Utility Engineering & On Oct 5 1038, the board of directors of Public Utility Engineering & On Oct 5 1038, the board of directors of Public Utility Engineering & On Oct 5 1038, the board of directors of Public Utility Engineering & On Oct 5 1038, the board of directors of Public Utility Engineering & On Oct 5 1038, the board of directors of Public Utility Engineering & On Oct 5 1038, the board of directors of Public Utility Engineering & On Oct 5 1038, the board of directors of Public Utility Engineering &

acquisition it is believed Standaru Gas & Internet of the Public Utility Act or position to more fully comply with the spirit of the Public Utility Act or 1935. On Oct. 5, 1938, the board of directors of Public Utility Engineering & Service Corp. elected Mr. Hagenah as President to succeed Bernard W. Lynch, who previously had been President of both Public Utility Engineer-ing & Service Corp. and Standard Gas & Electric Co. At that time, it was announced, this change was made as a result of the reorganization of Standard Gas & Electric Co. under Section 77B of the Federal Bankruptcy Act and Mr. Lynch remained as President of Standard Gas & Electric Co.. The Board of Directors of Public Utility Engineering & Service Corp. now consists of Mr. Hagenah, Henry C. Cummins, Bernard F. Braheney, Mr. Morrison and Mr. Uhlendorf. All of the present directors, with the exception of Mr. Uhlendorf, were formerly members of the Board. Mr. Uhlendorf has been executive engineer and Mr. Morrison has been treasurer of the corporation, white position he will retain. Mr. Cummins and Mr. Braheney continue as Vice-Presidents.—V. 147, p. 2254. **Durget Sound Power & Light Co. (& Subs.)**—*Earnings*

Seversky Aircraft Corp.-Listing-Conversion of Notes-

Seversky Aircraft Corp.—Listing—Conversion of Notes— The New York Curb Exchange on Nov. 23, approved the listing of 220,000 additional unissued shares (§1 par) common stock upon official notice of issuance upon conversion by the holders of convertible notes, making the total amount applied for 800,000 shares. On Nov. 11, 1938 company had outstanding demand promissory notes in the total face amount of approximately \$2,057,000. The holder of these notes proposed to the company that \$770,000 of these notes be made convertible into common stock at \$3.50 per share, being the approximate market price of the stock at that date, the holder or holders of said notes to have the right to exercise this conversion privilege at any time prior to Nov. 14, 1939. At a meeting of the directors held Nov. 11, 1938, resolutions were unani-mously adopted authorizing the delivery to this creditor of \$770,000 of demand notes carrying the conversion privilege and authorizing the issu-ance of 220,000 shares of common stock to the holder or holders of such notes upon the exercise of the conversion privilege, either in whole or in part. The holder of the damand mominery packs the start and the pack of the start.

notes upon the exercise of the conversion privace, carried the company that part. The holder of the demand promissory notes informed the company that he would dispose of the \$770,000 convertible promissory notes to a limited number of persons and he has also agreed if this conversion privilege is granted, he will immediately make a further necessary loan to the company of \$110,000 and that, if requested, he will make further advances of \$320,000. to \$420,000 within the next seven months. Southern Utilities Co., Ltd.—Foreign Utilities Exempted SEC—Commission Simplifies Provisions Under the Holding by SEC-Act for Two Canadian Concerns-

Inder certain restrictions which it felt were necessary for protection of the investors in this country, the Securities and Exchange Commission has granted exemption from various provisions of the Public Utility Holding Company Act to Southern Utilities Co., Ltd., and Great Northern Gas Co., Ltd., operating respectively in Alberta and Ontario, Canada. Both com-panies are subsidiaries of North Continent Utilities Corp., a registered holding company.

Company Act to Southern Utilities Co., Ltd., and Great Northern Gas Co., Ltd., operating respectively in Alberta and Ontario, Canada. Both com-panies are subsidiaries of North Continent Utilities Corp., a registered holding company. The exemptions granted will in each instance expire Dec. 31, 1940, without prejudice, however, to applications for extensions. In granting the exemptions the SEC announced: "The question as to which of the provisions of the Act are not neces-sary for such ptroposes has been before this Commission in similar cases and as we held in those cases that although few of the applicant's securities are outstanding in the hands of the public, the large number of American security holders who have made investments in the securities of the parent organization have an interest in the soundness of the Capital structure and management of every foreign company in which any of the funds of that company have been invested. "However, as in those cases, the Commission feels that it was the pur-pose of Section 3 (b) that such foreign subsidiary companies as the one involved in this application shall largely be freed from the jurisdiction of this Commission with respect to such of their activities as are essentially foreign in their nature and effects. "In granting an exemption from such provisions of the Act as the Com-mission feels will accomplish this result, the regulatory powers of the Com-mission with respect to further investment of funds in foreign enterprises by the United States investors should be retained as should also jurisdiction over other matters which would affect persons in the united. States." **Sperry Corp.**—To Pay §1 *Dividend*— Drectors on Nov. 30 declared a dividend of \$1 per share on the common stock voting trust certificates, \$1 par, payable Dec. 19 to holders of record Dec. 12. This compares with 60 cents paid on July 29 last and on Dec. 22 and Sept. 9, 1937. New Trustee—

New Trustee-

At a meeting of the voting trustees held on Nov. 30, 1938, Fred J. Fisher of Detroit was elected a voting trustee to fill the vacancy created by the death of Lindsey Hopkins. Mr. Fisher has been a director of the Sperry Corp. since July 22, 1937.--V. 147, p. 1504.

 Admitted to Trading-

Admitted to Trading— The registration of the company's 1.275,658 shares of common stock, par \$2, on the Chicago Stock Exchange has become effective and has been admitted to trading—V. 147, p. 3028. Square D Co.—Dividend Doubled— Directors have declared a dividend of 30 cents per share on the common stock, par \$1, payable Dec. 23 to holders of record Dec. 13. This com-pares with 15 cents paid in each of the three preceding quarters; \$1.05 paid on Dec. 24, 1937; 35 cents paid on Sept. 30 and on June 30, 1937, and a dividend of 25 cents per share paid on March 31, 1937.—V. 147, p. 2705.

(E. R.) Squibb & Sons—Dividends— The directors have declared a stock dividend of 1-100th of a share of \$6 cumulative first preferred stock for each share of common stock held and a cash dividend of 50 cents per share, both payable Dec. 24 to holders of record Dec. 15. Similar stock dividend was paid on Dec. 27, 1937. A cash dividend of 50 cents was paid on Dec. 24, 1936, and on Dec. 1, 1936.— -V. 146, p. 122.

Standard Commercial Tobacco Co., Inc.-Favors Dissolution-

Dissolution— Counsel for the Securities and Exchange Commission, after studying plans for the reorganization of the company has recommended partial or complete liquidation of assets as more desirable than reorganization. The company's principal assets consist of 80,610 shares of class B common stock of the Axton-Fisher Tobacco Co., most of which is pledged to secure indebtedness approximating \$800,000. The SEO's lawyers suggested to Federal Judge Coxe that about one-haif of the pledged shares be sold to obtain sufficient funds to meet debts, but that more benefits would accrue if complete liquidation were decreed. The company, they said, had no function except to hold the block of Axton-Fisher stock and that this cost \$25,000 a year in salaries and oper-ating expenses. Reorganization expenses, they said, would be about \$90,000 plus commissions to underwriters of a plan. SEC counsel also pointed out that because large blocks of Standard Commercial's stock are held by groups which are seeking control of the company it might be impossible to obtain the consent required under the law to make any plan feasible. Turther, they said that of the four plans, the so-called Wertheim & Co. plan, which calls for the issue of only common stock, seemed to them to be the best. Judge Coxe indicated that he agreed that the all-common-stock plan would be best for stockholders. He suggested that the proponents of the three other plans make an effort to reduce their plans to a common-stock plan would be best for stockholders. He suggested that the plans to a common-stock basis. The Court adjourned the hearing until Dec. 19.—V. 147, p. 3028. Standard Gas & Electric Co.—Files Integration Plan—

The Court adjourned the hearing until Dec. 19.-V. 147, p. 3028. **Standard Gas & Electric Co.**—*Files Integration Plan*— Bernard W. Lynch, President, announced Nov. 30 that the regular monthly statements have been discontinued and that hereafter these re-ports will be made quarterly. Mr. Lynch further states: On Aug. 3 William O. Douglas, Chairman of the Securities and Exchange Commission, addressed a letter to the President of the company, requesting that the company present, not later than Dec. 1, 1938, suggestions, plans and programs, even though tentative, looking toward compliance with those sections of the Public Utility Act of 1935 which deal with geographical integration and corporate simplification. In accordance with this request, under date of Nov. 26, 1938, we submitted our plans. We were previously advised the Commission intended to treat such plans in confidence and would not, without prior consultation with any holding company filing plans, disclose their details. Although they are necessarily tentative, they are more comprehensive than a mere statement of intention. We believe our proposals can be made the basis for a definite plan or plans. Since the election in July of the new board of directors, in accordance with the plan of reorganization consummated in August, Georges F. Doriot, a director, has resigned and Victor Emanuel has been elected to fill the vacancy. The office of Chairman of the Board was created and Mr. Eman-uel was elected to that position. Changes have also been made in certain official positions and the following are now the officers of the company; Victor Emanuel, Chairman; Bernard W. Lynch, President; A. S. Cummins, vice-Pres. & Secy; G. W. Knourek, Treasurer; E. H. Niehoff, Asst. Sec. and Asst. Treasurer.

Vice-Pres. & Sec'y; G. W. Knourek, Treasurer; E. H. Niehoff, Asst. Sec. and Asst. Treasurer. Negotiations are now in progress for the reacquisition by Standard Gas & Electric Co. of Public Utility Engineering & Service Co. as a wholly-owned subsidiary. At the present time all of the stock of the latter cor-poration, which is the service company for the operating utility companies of the Standard Gas & Electric Co. system, is owned by these operating companies. By such reacquisition to is believed Standard Gas & Electric Co. would be in a better position to comply with the spirit of the Public Utility Act of 1935. On Oct. 5, 1938, directors of Public Utility Engineer-ing & Service Corp. elected William J. Hagenah as President, succeeding Bernard W. Lynch, who previously had been President of both Public Utility Engineering & Service Corp. and Standard Gas & Electric Co. under Section 77-B of the Federal Bankruptcy Act. Pursuant to the plan of reorganization of Standard Gas & Electric of a reserve in the amount of \$120,000,000 by transferring the item of capital surplus, amounting to \$111,173,241, and \$8,826,758 from surplus account, to an account to be known as 'reserve for investments.'' *Consolidated Income Statement (Including Subsidiaries*)

Sinking Fund-A sir	king fund	to nurchase	or redeem	series A d	lehenture

Condensed Statement of Results of Operations

Sinking Fund—A sinking fund to purchase or redeem series A debenture shares is provided based substantially on 10% of the sale price of crude oil and natural gas produced or under certain conditions, 7½% of outstanding debenture shares. Had the sinking fund been in operation during the past three years there would have been required to be paid into it approximately the following sums: 1935, \$152,000; 1936, \$189,000; 1937, \$358,000; 1938 (to Aug. 31), \$214,000.

Had the sinking run because $v_{\rm prime}$ and $v_{\rm prime}$ based on the prime required to be paid into it approximately the romoving sums: 1935, \$152,000; 1936, \$189,000; 1937, \$358,000; 1938 (to Aug. 31), \$214,000. Debenture Shares—Additional series of debenture shares may be issued upon certain conditions stated in the indenture, provided that not more than \$9,000,000 principal amount shall at any one time be outstanding. The debenture shares are not to be secured by any lien; but they are to have be benefit of a covenant by the corporation not to create any mortgage, pledge or lien upon its assets or the assets of any subsidiary, unless the debenture shares are secured equally and ratably with the indebtedness so so secured, with certain stated exceptions. The indentures will also contain certain limitations upon the power of the corporation and its subsidiaries to incur indebtedness or to create certain mortgages, pledges or other liens on their properties. Tar Refund—Certain stated exceptions are made for tax refunds to residents of the States of California, Massachusetts and Pennsylvania. *Warants*—Corporation has agreed to issue to the principal underwriter warrants to purchase an additional 50,000 shares of such common stock (\$1 par), when \$2,000,000 eries A debenture shares shall have been sold: and warrants will evidence the right of the holder to purchase 100 shares of such common stock at \$4 per share to and incl. Dec. 31, 1942; or \$9 per share thereafter to and incl. Dec. 31, 1942; or \$0 per share to and incl. Dec. 31, 1944. The warrants will expire Dec. 31, 1944.—V. 147, p. 3471.

Sunshine Mining Co.—To Pay 40-cent Dividend— Directors have declared a dividend of 40 cents per share on the common stock, payable Dec. 24 to holders of record Dec. 10. Dividends of 60 cents were paid in each of the three preceding quarters and previously regular quarterly dividends of 75 cents per share were distributed.—V. 147, p. 3323.

Superior Oil Corp.—Initial Dividend— Directors have declared an initial dividend of 10 cents per share on the common stock, payaole Dec. 28 to holders of record Dec. 16.—V. 147, p. 2706.

Symington-Gould Corp.—Meeting Adjourned— The special meeting of stockholders called for Nov. 30 to vote on acquisi-tion of McConway & Torely Corp. has been adjourned until Dec. 21.— V. 147, p. 3172.

Sweets Co. of America, Inc.—Director— The company has notified the New York Stock Exchange of the election of Joseph Rubin as a director.—V. 147, p. 3323.

of Joseph Rubin as a director.—v. 141, p. 0020. **Tapoan Stove Co.**—To Pay 80-cent Dividend— The directors have declared a dividend of 80 cents per share on the common stock, payable Dec. 15 to holders of record Dec. 7. This com-pares with 20 cents paid on Sept. 15 last; 80 cents paid on Dec. 15, 1937, and an initial dividend of 20 cents per share paid on June 15, 1937.—V. 147, 146.

(John R.) Thompson Co.—Options Granted— This company has notified the New York Stock Exchange that an option has been granted to Paul Moore as of Oct. 1, 1938, to purchase 5,000 shares of common stock, \$25 par value, at \$5 per share. The option is exercisable any time to April 1, 1942.—V. 147, p. 3172.

Thayers, Ltd.—Accumulated Dividend— Directors have declared a dividend of \$3.50 per share on account of accumulations on the \$3.50 first preferred stock, no par value, payable Jan. 1 to holders of record Dec. 20. A like amount was paid on Jan. 1, 1938; one of \$2.50 was paid on Jan. 2, 1937 and a regular semi-annual dividend of \$1.75 per share was distributed on Jan. 2, 1936.—V. 145, p. 3984.

Thew Shovel Co.—50-cent Common Dividend— Directors have declared a dividend of 50 cents per share on the common stock, payable Dec. 20 to holders of record Dec. 10. Like amount was last paid on Dec. 23, 1937; a dividend of \$2 was paid on Aug. 25, 1937, and one of 50 cents per share was distributed on Dec. 15, 1936, this last being the first payment made on the common shares since Dec. 15, 1931.—V. 147, p. 1355.

Thompson Products, Inc.—Dividends Resumed— Directors have declared a dividend of 25 cents per share on the common stock, no par value, payable Dec. 27 to holders of record Dec. 15. This compares with a dividend of 30 cents paid on Dec. 23, 1937; 50 cents paid on Oct. 1 and on July 1, 1937 and a dividend of 40 cents paid on April 1, 1937.—V. 147, p. 3172.

Timken-Detroit Axle Co.—To Pay 50-cent Dividend— Directors have declared a dividend of 50 cents per share on the common stock payable Dec. 20 to holders of record Dec. 10. This compares with \$1 paid on Dec. 24, 1937; 50 cents paid on Sept. 20, 1937; a quarterly divi-dent of 25 cents and an extra of \$1.25 paid on Dec. 21, 1936, and a quarterly dividend of 25 cents in addition to an extra dividend of 25 cents paid on Sept. 21, 1936, these latter being the first dividends paid since April 1, 1931 when a payment of 20 cents per share was made.—V. 147, p. 1647.

Toledo Edison Co.—Definitive Bonds Ready.— The Chase National Bank announced that definitive first mortgage bonds, 3½% series due 1968, due July 1, 1968, are now available for delivery in exchange for the temporary bonds at its corporate trust department, 11 Broad St.—V. 147, p. 3324.

Broad St.-V. 147, p. 3324. **Transamerica Corp.**—Disputes SEC Charges— The following communication from the board of directors was mailed Dec. 1, to stockholders of the corporation: You have undoubtedly been informed that the Securities and Exchange Commission will conduct a public hearing in Washington, D. O., on Jan. 16, to determine whether the registration of the capital stock of the corporation on New York, San Francisco and Los Angeles Stock Exchanges should be suspended or withdrawn because of certain statements, claimed to be 'false and misleading." contained in the application for registration filed pur-suant to the requirements of the Securities and Exchange Act of 1934. A careful study of the items contained in the order for hearing has con-vinced your board of directors that at least 14 out of the 18 items on which the order is based relate entirely to accounting practices. The science of nave their own ideas as to what constitutes good accounting practices and so have many other equally reputable certified public accountings. Our annual reports, ever since the inception of the corporation, and the financial statements (other than bank and insurance company statements) contained in the application for registration, have been certified by a

Income \$341 713

nationally known firm of independent certified public accountants, while the statements of banks and insurance companies were taken from the reports filled with the Comptroller of the Currency, the Superintendent of Banks, and the Commissioners of Insurance. These differences of opinion as to accounting practices, disclosed for the first time by this order for hearing, have no bearing upon nor do they materially affect the intrinsic value of the capital stock of your corporation. It is, to say the least, unfortunate that the SEC, before calling for a public hearing, did not give us an opportunity to compose these differences of opinion. Yoy may rest assured that your board of directors will take the necessary steps to protect your interests, and we urge you not to allow yourselyes to

It is to say the least, unfortunate that the SEC, before calling for a public hearing, did not give us an opportunity to compose these differences of oplinon. Yoy may rest assured that your board of directors will take the necessary steps to protect your interests, and we urge you not to allow yourselves to be influenced by this action on the part of the Commission to the extent of sacrificing your holdings at prices substantially below real values. We can assure you that your corporation has had a prosperous year and that ts regular dividend will be amply earned. Your board of directors is confident that after a full and impartial hearing none of the statements contained in the application for registration will be found to have been either false or misleading. Three of the four items in the order for hearing which do not come under accounting practices deal with the interpretation of the regulations of the Commission and have no material significance. The other item, however, demands a more detailed statement. We refer to the item which suggests that the corporation has failed to make complete disclosure as to the compensation paid to Mr. A. P. Giannini for the years 1932 to 1936 inclusive. The corporation stated in its application for registration, as it has on more than one occasion stated to its stockholders, that the annual compensation paid to Mr. Giannini was at the rate of \$1 for each year since 1932 when he was returned to the management of the corporation state upon that statement; any statement to the contrary would have been untrue. In July, 1935 the directors N. T. & S. A., which bank was at that time practically a wholly owned subsidiary of Transamerica Corp., tota a reasonable salary be voted to Mr. Giannini for his valuable services to the institution. In Jan., 1938 the directors of Transamerica Corp. voted an expense allowance whatsoever. Your board of the term and energy to restore the corporation since his resumption of the management of its affairs in 1932. He has given unsparingly of his ti

Transcontinental & Western Air, Inc.—New Chairman Belection of T. B. Wilson as Chairman of the board and a director was incounced by Jack Frye, President of the company, following a meeting the Board of Directors on Nov. 29. Mr. Frye stated that Mr. Wilson will fill the vacancy caused by the signation some time ago of Mr. Henry Dupont.—V. 147, p. 3324.

Triumph Explosives, Inc.—Stock Sold—Whitney-Phoenix Co., Inc., and MaeBride, Miller & Co., Inc., announce the sale of 150,000 shares (par \$2) of common stock at \$2.50 per share. Net proceeds of the issue will be used for ad-

sale of 150,000 shares (par \$2) of common stock at \$2.50 per share. Net proceeds of the issue will be used for ad-ditional working capital. Transfer Agent, Continental Bank & Trust Co., New York. Registrar. Chase National Bank, New York. Company has agreed to apply for listing on a recognized national securi-ties exchange upon request of the principal underwriter. Company was incorporated in Maryland, Aug. 15, 1933, under the name of Trumph Fusee & Fireworks Co. Name changed to present title March 3, 1938. The plant and principal executive office of the company is located in Cecil County, Md. Company is the successor to a business which was started by Josef Ben Decker and W. L. Kann in the early part of 1933 as a partnership. In July of 1933 approximately five acres of land were purchased a short distance outside the limits of the town of Elikton and the building of a factory was commenced. In Aug., 1933, after the company was incorporated, it took over the the assets of the predecessor partnership. At its inception the company was encaped primarily in the manufacture and sale of toy firework and novelty items for use in connection with 4th of July celebrations in the North and Christmas celebrations in the South. Practically all of the company's business the first year was of this type. Toward the end of the first year the company began developing fusees and track torpedoes for railway use. This portion of the company's busi-ness has developed into a substantial volume and is a profitable part of its business. During the second year that the company was in business it was offered an uncompleted contract to aircraft float lights, a large number of which are purchased annually by the U. S. Navy. Company not only successfully completed such contract but, through its research facilities, developed an aircraft float light which under test showed an unusual degree of perform-ance. Since such time this item has been purchased in large quantities by wears, many other items which are now regularly used by the Unite

Twentieth Century-Fox Film Corp.—Bank Liquidates Part of Holdings-

Part of Holdings— The Chase National Bank has reported to the Securities and Exchange Commission that during October, 1938, it sold from its holdings of stocks in the Twentieth Century-Fox Film Corp., 50,200 shares of common and 10,000 shares of preferred. For the most part these sales were made in private transactions abroad. It is the bank's policy to reduce gradually its holdings of stocks (acquired in pertoilo indefinitely. As occasion arises in the future the bank may sell additional amounts from its holdings. As of Nov. 1, 1938, the Chase National Bank owned 287,168 shares of the corporation's preferred stock. To Distribute Gaumont.Exritish Pictures—

To Distribute Gaumont-British Pictures-

In an arrangement concluded Dec. 8 with Gaumont-British Pictures, Twentieth Century-Fox will take over the distribution of all Gaumont pictures in the United States beginning Dec. 12. Announcement of the arrangement was made jointly by Sidney R. Kent, President of Twentieth Century-Fox, and Arthur Lee, Vice-President of Gaumont-British of America, who stated that the deal was in the interests of economy

 United Corp.—Opposition to Investing Program—
 Opposition to the \$8,000,000 investment program of corporation was
 voiced before the \$8,000,000 investment program of corporation was
 tatives of a group of Philadelphia trust and insurance companies.
 A representative of Insurance Co. of North America and several other
 insurance concerns, whose aggregate holdings were 11,500 shares of United
 Corp. preference stocks, objected to the spending of \$8,000,000 on equity
 securities of non-utility companies.
 It was his opinion that United should use the \$8,000,000 to purchase its
 own preference stock which, he said, would result in an immediate profit
 to the utility.
 A spokesman for a Philadelphia Trust Co. shared similar views. Another
 representative of a Philadelphia trust compary, after making clear that he
 speculative nature of the fund. He recommended that further considera tion by given by United Corp. to the advisability of exchanging portfolio
 securities with its own security holders.—V. 147, p. 3473.

tion by given by United Corp. to the advisability of exchanging portfolio securities with its own security holders.—V. 147, p. 3473.
 United Cas Improvement Co.—Files with SEC—
 John E. Zimmermann, President, in a letter dated Nov. 17, 1938, to the Securities and Exchange Commission, in reply to the Commission sign and programs, even though they may be tentative, looking towards complance with Sectors 11(b)(1) and 11(b)(2)" of the Publicity Holding Company Act of 1935, gives to the Commission a clear understanding of where U. G. I. stands with respect to the question of integration and simplification under the Holding Company Act.
 The letter states in part:
 The letter states in other companies and miscellaneous items. Some \$195,000,000 in these investments of approximately \$332,000.000 (at cost or less), 64% being investments are in two Integrated areas: (1) \$157,000.000 in the great industrial and residential area extending from the Delaware River at Trenton across Southeastern Pennsylvania, Delaware, and a portion of Maryland to the Susruehana River. U. G. I. 's original investment in Connecticut was made in 1889.
 (2) \$38,000.000 in the State, including many imporant industrial centers. U. G. J. 's original investment in companies now part of its two integrated application of the state, including many imporant industrial centers. U. G. J. 's original investment in companies now part of its two integrated apolicy of development and integration in these territories in order to obtain for the state, including many imporant industrial centers. U. G. J. 's original investment in companies now part of its two integrated apolicy of the states. These territories in order to obtain for the provement in these territories in order to obtain for the provement in these territories in order to obtain for the state. The some cases this has involved the acquisition of the head of the state of continuously pursued a policy of there holding companies.

3624 Financial States of the second states of th

under le subsidiat

ry. principal successive steps in forming the Philadelphia Electric Co.

Subsidiary.
The principal successive steps in forming the Philadelphia Electric Co., were:

Building up by U. G. I. of The Counties Gas & Electric Co., serving territory suburban to Philadelphia.
The acquisition by U. G. I. in 1925 of The American Gas Co. (a holding company), principally for the purpose of acquiring its controlled Philadelphia Suburban Gas & Electric Co., which served suburban areas of Philadelphia Suburban Gas & Electric Co., which served suburban areas of Philadelphia on either side of U. G. I.'s Counties Co.

Formation of Philadelphia Suburban-Counties Gas & Electric Co. in 1927, as a merger of these and 16 other smaller companies.

The acquisition of The Philadelphia Electric Co. (predecessor) in 1928, giving U. G. I. control of the core of the present area served.
The acquisition by U. G. I. of additional companies later merged into Philadelphia Electric Co. in 1929, combining all the companies into the present large company.
The acquisition of The American Gas Co. in 1925 (subsequently dissolved in 1936 in the interests of corporate simplification) was desirable for several reasons:

The acquisition of The American Gas Co. III 1920 (Subsequency Linson vo. III 1936 in the interests of corporate simplification) was desirable for several reasons: (1) It owned the Philadelphia Suburban Gas & Electric Co. which fitted precisely into the U. G. I. expansion program. (2) It owned the Luzerne County Gas & Electric Corp. which might, at a future date, be integrated. (3) It owned properties in Iowa, which, with certain additions, made by U. G. I., for the purpose of integrating the territory, were used in exchange for the Delaware properties, and the Chester County Light & Power Co., now part of U. G. I.'s primary system. Consistently and coincidentally with the building up of the interest in the present Philadelphia Electric Co., U. G. I. has developed other invest-ments in the same service area. Adjacent to the Philadelphia Electric properties in Pennsylvania, lies the territory in Delaware served by Dela-ware Power & Light Co., and in Pennsylvania by Chester County Light & Power Co., which, as mentioned above, were acquired in 1928 by exchange of utility properties in Iowa, built into an integrated and interconnected system by U. G. I. over a period commencing in 1889. Somewhat later, in 1930, Wilmington Gas Co. and two gas companies in New Jersey were irransaction placed these gas companies in the system in which they property belonged and added gas service in Wilmington to the already-owned electric service. The Luzerne County Gas & Electric Corp., mentioned abore, serves gas

Immediately sold to Public Service Corp. of New Jersey for stock. This transaction placed these gas companies in the system in which they properly belonged and added gas service in Wilmington to the already-owned electric service.
 The Luzerne County Gas & Electric Corp., mentioned above, serves gas and electricity to the Wyoming Valley in the anthracite mining territory part of Luzerne County. The Luzerne County Co. is indirectly interconnection ring of Pennsylvania Power & Light Co., Public Service Electric Gas Co., and Philadelphia Electric Co. The gas service of the Luzerne Co. is divided into two disconnected divisions, operated as separate units—25 miles apart-with sparsely settled mountainous country intervening, and not susceptible of interconnection below.
 The gas companies serving the Allentown, Bethlehem, Harrisburg and Reading territories were all acquired comparatively early in the company shistory and are now considered as integrated companies in the U. G. I. System, there being only a few small breaks in complete gas interconnection. The Lebanon Valley Gas Co. came into this group somewhat later. The company serving Reading is directly interconnected with Philadelphia Electric and purchases its primary gas supply from that company. These gas companies have been consistently built up by U. G. I. In 1885 control was purchased of a predecessor of the Allentown-Bethlehem Gas Co., serving Allentown. By 1913 the properties of seven company serving Bethlehem was merged, under the name of the present company. In 1930, a merger brought two more companies in the conspany.
 M. Harriburg Gas Co. The resent company was formed in 1913, as a result of the merger of two companies. The Harriburg Gas Co., serving Reading, Pa., and surrounding territory, dates from 1890, after which the service area area of two companies. The Harriburg Gas Co., serving Reading, Pa., and surrounding territory dates from 1990. G. G. I. I. Investment in the Consumers Gas Co., serving R

This group of U. G. I. gas companies serves an area of 147 square miles and a population of approximately 575,000. (2) Connecticut Group Over the period dating from 1883, when it acquired an interest in the Waterbury Gas Light Co., U. G. I., in pursuance of its general policy of integrating companies in geographical areas, has co-ordinated and developed public utility properties in the State of Connecticut and simplified their corporate structures, so that at present U. G. I. has controlling interests in the Connecticut Light & Power Co., furnishing electric (and gas) service directly or indirectly to three-quarters of the area of the State; the Con-necticut Railway & Lighting Co., which leased for 999 years its electric and gas properties to the Connecticut Light & Power Co.; and in New Haven Gas Light Co. Connecticut Railway & Lighting Co.—From time to time U. G. I. acquired btocks of gas, electric and street railway companies which by 1901 had practically all been conveyed to Connecticut Railway & Lighting Co. The operations included Greenwich, Norwalk, Bridgeport, Derby, Waterbury and New Britain. U. G. I. also owned certain interests which had not been transferred to Connecticut Railway & Lighting Co., but were sold to the New York, New Haven & Hartford RR. (through the Consolidated Railway Co., later merged with the New Haven railroad), which company in 1906 (also through the Consolidated Railway & Lighting Co. for 999 years. Subletting the street railway properties to the Connecticut Co. (a New Haven railroad subsidiary) and the gas and electric properties to Housa-tonic Power Co. (also a New Haven railroad subsidiary which had been acquired from U. G. I. (J). Due to the disaffirmation of the lease of the transportation properties by the New Haven railroad, the Connecticut Railway & Lighting Co. (a New Haven railroad subsidiary) and the gas and electric properties to Housa-tonic Power Co. (also a New Haven railroad subsidiary which had been acquired from U. G. I.)

Minority Investments in Holding Companies

Minority Investments in Holding Companies In addition to its holding company system, as represented by these two integrated areas, U. G. I. has substantial minority investments in other utility holding companies to the amount of \$100,000,000. More than half of this amount—\$59,000,000—is represented by an interest in the Public Service Corp. of New Jersey, serving an area in New Jersey which is ad-jacent to an a logical continuation of the important territory served by Philadelphila Electric Co. The two companies (and Pennsylvania Power & Light Co.) are interconnected by means of a 220,000 volt transmission loop and also have an operating agreement for pooling generating facilities. The properties of Public Service Corp. of New Jersey and Philadelphia Electric Co. are also interconnected by substantial facilities at two other points.

The properties of Fubic Service Corp. of New Jersey and Indexpute Electric Co. are also interconnected by substantial facilities at two other points. From its year of incorporation, 1882, U. G. I. has had an interest in com-panies now represented in Public Service Corp. of New Jersey. This in-vestment has been built up, predominantly in the common stock, until today U. G. I. owns 28½% of the voting securities. This has been accom-plished by turning in properties for stock, by purchases for cash, exercise of subscription and conversion rights and when Public Service offered to holders of stock in certain leased companies the option of one of three plans, U. G. I. elected to take common stock; rather than cash or preferred. U. G. I. minority investments in other utility holding companies are-Niagara Hudson Power Corp. (original investment 1884), and Midland United Co. (original investments 1884), and Midland United Co. (original investments 1884), and Midland United Co. (original investments by U. G. I. in operating companies in the case of these other minority investments. In each case the present holdings result from early investments by U. G. I. in operating companies in the respective territories, these companies having been expanded and developed individually under the U. G. I. auspices to the extent possible. In the further building up of integrated areas, U. G. I. then co-operated with other interests by exchanging its operating company securities, for purposes of unification, for those of the holding company developing the larger system, in many cases further assisting by making substantial addi-tional cash investments. The carrying out of this program resulted in U. G. I.'s present minority interests in these holding companies. The holy other investment in this group compasites of a cash investment made in American Water Works & Electric Co., Inc.

Other Insection Construction of the State Provided in American Water Works & Electric Co., Inc. Other Investments The balance of U. G. I. investments, \$37,000,000, consists of miscellaneous utility and non-utility stocks, bonds, notes and advances, which include two majority-owned electric companies, one in Arizona and one at Erie, Pa., and two majority-owned gas companies, one at Nashville, Tenn., and one at Concord, N. H. Thus it is seen that insofar as its principal investments go, U. G. I. today is an integrated holding company within the spirit of the public policy declared by Congress in the Holding Company Act of 1935, including its substantial minority interests in other regional holding companies and certain incidental non-utility investments. The process of integration itself and the policy of U. G. I. within an integrated system has resulted, in a marked simplification of corporate structures. The foregoing shows how much has been accomplished by U. G. I. by Way of Integration and comparison to the policy of U. G. I. by Way of Integration and comparison to the policy of the public comparison of the policy of the public companies and structures.

The forcegoing shows how much has been accomplished by U. G. I. by way of integration and corporate simplification over a period of years. U. G. I. would expect in co-operation with the Commission to continue in the future as in the past its long-time policy, as opportunities and operating conditions permit.

United Stores Corp.—Accumulated Dividend— The directors have declared a dividend of \$4.50 per share on account of accumulations on the \$6 cumulative preferred stock, par \$100, payable Dec. 27 to holders of record Dec. 16. A dividend of \$6 was paid on Dec. 27, 1937; \$11.81.14 was paid on Dec. 15, 1936; one of \$3 was paid on June 15, 1936, and one of 81% cents per share was paid on Dec. 15, 1934.—V. 147, p. 1054.

Universal Cyclops Steel Corp.—To Pay 25-cent Dividend Directors have declared a dividend of 25 cents per share on the common stock, payable Dec. 28 to holders of record Dec. 16. This compares with 12½ cents paid on March 29, 1938 and proviously regular quarterly divi-dends of 25 cents per share were distributed.—V. 147, p. 3174.

United Telephone & Electric Corp.—*Plan Confirmed*— U. 8. District Court Judge John P. Nields at Wilmington, Del., recently signed an order confirming the reorganization of the corporation.—V. 147, p. 2406.

Universal Leaf Tobacco Co.—Extra and Larger Dividend Directors have declared an extra dividend of \$2 per share in addition to a quarterly dividend of \$1 per share on the common stock. The extra dividend will be paid on Dec. 23 to holders of record Dec. 13, and the quarterly distribution will be made on Feb. 1 to holders of record Jan. 17. Previously regular quarterly dividends of 75 cents per share were dis-tributed. An extra dividend of \$1.50 per share was paid on Dec. 28, 1937. -V. 147, p. 1647.

Universal Products Co., Inc.—Dividend— The directors have declared a dividend of 45 cents per share on the com. stock, no par value, payable Dec. 21 to holders of record Dec. 10. This compares with 25 cents paid on Sept. 30, last; 15 cents paid on June 15, last; 50 cents on March 31, last; \$1.25 paid on Dec. 21, 1937; 50 cents paid on Sept. 30, June 30 and March 31, 1937; \$1.25 paid on Dec. 18, 1936; 75 cents on Sept. 30, 1936 and 25 cents paid on June 30 and March 31, 1936.—V. 147, p. 1940,

Upressit Metal Cap Corp.—Accumulated Dividend— The directors have declared a dividend of \$3 per share on the 8% cumul. pref. stock, par \$100, payable on account of accumulations, on Dec. 21 to holders of record Dec. 10. Dividends of \$2 were paid on Oct. 1, July 1 and April 1, last. See also V. 147, p. 1210.

to holders of record Dec. 10. Dividends of \$2 were paid on Oct. 1, July 1 and April 1, last. See also V. 147, p. 1210. Utilities Power & Light Corp.—Atlas Corp. Claims Against Company Approved by Judge— Federal Judge William H. Holly on Dec. 8 entered an order approving the claims of Atlas Corp. and Floyd B. Odlum against Utilities Power & Light for sums totaling slightly in excess of \$3,200,000 representing claims for commissions for sale of U. P. & L.'s English properties and amounts due on bearer notes held by Atlas Corp. Judge Holly declared "it appears from the evidence that a thorough investigation has been made by counsel for the trustee and I think the recommendations of the trustee approving settlement of these claims should be followed, for with this claim out of the way, the debtor corporation (U. P. & L.) can proceed more speedily toward reorganization." Counsel for Associated Investing Corp., in a closing statement at the hearing, declared that the position of Associated was one of neutrality. Associated does not approve or disapprove a settlement but leaves the matter up to the court to appraise on its merits, it was stated. At the hearing, representatives of various protective committees for different classes of U. P. & L. stocks were heard from and all approved the settlement save for one objector. With the settlement of this law suit out of the way in Federal Court at Chicago, the case now moves back to Washington before the Securities and Exchange Commission where hearings will be continued on valuation of U. P. & L. properties.—V. 147, p. 3474. Vapor Car Heating Co., Inc.—Dividends Resumed—

Vapor Car Heating Co., Inc.—Dividends Resumed— Directors have declared a dividend on the common stock of 25 cents per share payable Dec. 10 to holders of record Dec. 1. A like amount was paid on June 10, last; one of 50 cents was paid on March 10, 1938; \$3 on Dec. 10, 1937; \$1 on Sept. 10 and June 10, 1937 and a dividend of 50 cents per share distributed on March 10, 1937.—V. 147, p. 1789.

COMMERCIAL EPITOME

Friday Night, Dec. 9, 1938

Coffee—On the 3d inst. futures closed 3 points higher to 4 points lower in the Santos contract, with sales totaling 24 lots. There was only one sale in the Rio contract, which closed 2 to 1 point down. There was some light European and trade selling, which was absorbed by operators who were covering shorts on the scale down. While there were no important developments in the actual market in the short session, the tone continued easy both in Brazilian and mild

elosed 2 to 1 point down. There was some light Luropean and trade selling, which was absorbed by operators who were covering shorts on the scale down. While there were no important developments in the actual market in the short session, the tone continued easy both in Brazilian and mild grades, and in primary and foreign markets the trend was lower. In Brazil Rio 7s and 5s closed 200 reis lower at 13.500 and 15.700 respectively, while spot soft and hard & the off 100 reis at 20,600 and 17.900. Havre closed 12 to 14.5 frames lower. On the 5th inst, futures closed 11 to 4 points net lower in the Santos contract, with sales of 123 lots. The Rio contract closed 5 to 8 points net lower, with sales of 15 lots. Near months, because of the appearance of additional notices, showed maximum weakness. Five notices were issued against Dec. in the "D." reportedly by Levy and T. Barbour Brown. One was put out against the Rio "A" calling for delivery of Ecuadors. European selling and lower cost and freight offerings to this market played its part in the declines. The Havre market was off 11 to 12 francs. Spot price in Brazil of Rio 7x, was 13.60 milreis, up 100 reis. Clearances from Brazil last week were 376,000 bgs, of which the United States took 307,000 bags. Europe 52,000, and "all others" 17,000. On the 6th inst, futures closed 5 to 8 points net higher in the Santos contract, with sales totaling only 29 lots. There were no sales in the Rio contract, which the nominal closing for this contract 4 to 5 points higher. Official denial of re-ports that there would be any change in the N.C.D. coffee poicy or that sales of coffee against the 1938-40 coffee loan had been made, in addition to a steadier tone in the actual market, influenced some new buying and covering in coffee poicy or that sales of coffee against the 1938-40 coffee loan had been made, in 363,000 in October. This years of ar. 2,526,000 bags have been destroyed. Havre futures. Full Signo bags compares with 636,000 in October. This years of ar. 2,526,000 bags have

Cocoa—On the 3d inst. futures closed unchanged to 1 point lower. The opening level was 5 points off. Sales for the short session dropped to 85 lots or 1,139 tons. London noted a loss of $1\frac{1}{2}d$. on the outside and reported futures on the Terminal Cocoa Market net $1\frac{1}{2}d$. to 3d.

ETALS-DRY GOODS-wood-its. lower, with 30 tons trading. The market ruled beavy on the local exchange, there being no appreciable sup-port. Offerings at no time ran heavy. Local closing: Dec., 4.52; Jan., 4.62; March, 4.76; May, 4.87; July, 4.98; Oct., 5.14; Dec., 5.24. On the 5th inst. futuress closed 5 to 9 points net lower. The opening range was 2 to 4 points down. Sales totaled 206 lots, or 2,760 tons. London reported no change to 1½d. toss on the outside, while| futures on the Terminal Cocoa Market ran net 1½d. to 4½d. weaker, with 420 tons changing hands. Hedge selling was the chief factor operating against values today. The hedges were chiefly against new West African crops. Local closing: Dec., 4.47; Jan., 4.56; March, 4.70; May, 4.80; June, 4.85; July, 4.89; Sept., 5.00. On the 6th inst. futures closed 1 point higher to 2 points lower. The opening range was unchanged to 1 point up. At one time during the session gains of as much as 4 points were in evidence. Only 199 lots or 2,667 tons changed hands. London lost 1½d. to 3d. on the outside and ran 1½d. lower to unchanged on the Terminal Cocoa Market, with 380 tons trading. Moderate hedging pressure continued in the local market. Local closing: Dec., 4.46; Jan., 4.55; May, 4.80; July, 4.90; Sept., 5.00. On the 7th inst. futures closed 1 point up to 3 points down. Transactions totaled 250 con-tracts. Trading continued light. There was liftle pressure to sell, but on other hand manufacturers were indifferent. During early afternoon the market was 2 points higher to 2 points lower. The turnover to that time was 150 lots. Warehouse stocks were unchanged at 914,792 bags. A year ago they totaled 1,163,698 bags. Local closing: Dec., 4.47; March, 4.66; May, 4.77; July, 4.88; Sept., 4.98; Oct., 5.03; Dec., 5.13. On the 8th inst. futures closed 2 to 8 points net lower. Transactions totaled 248 contracts. Hedge selling originat-ing in producing countries depressed cocoa futures, the market sagging back to the former lows. Prices

ing in producing countries depressed cocca futures, the market sagging back to the former lows. Prices this after-noon were 4 to 6 points lower, with December selling at 4.43c. Trading to early afternoon totaled 170 lots. The London market was steady. Warehouse stocks increased 1,400 bags. They now total 916,183 bags compared with 1,170,243 bags a year ago. Local closing: Dec., 4.45; Jan., 4.49; Mar h, 4.61; May, 4.71; July, 4.81; Sept., 4.91; Dec., 5.05. Today futures closed 1 point up to unchanged, with sales totaling 213 contracts. The cocca futures market was quiet and steady, prices this afternoon being unchanged. Trading to that time amounted to 150 lots. The market apparently is on an even keel with hedge selling by producers about balanc-ing buying by manufacturers. The latter are willing to pay current prices for cocca, it would seem. Warehouse stocks decreased 1,700 bags overnight. They now total 914,443 eurent prices for cocoa, it would seem. Warehouse stocks decreased 1,700 bags overnight. They now total 914,443 bags compared with 1,166,873 bags a year ago. Local closing: Dec., 4.46; Jan., 4.50; March, 4.61; May, 4.71; July, 4.81; Sept., 4.91; Oct., 4.96.

Sugar—On the 3d inst. futures closed 1 to 2 points net higher in the domestic contract. Transactions totaled 255 lots. The Wall Street house with the leading Cuban producing connection was prominent on the supporting cubain produc-business in Friday's session at the basis of 3c. accounted for the firmer tone in futures. In addition to the previously reported sales effected late on Friday, an operator bought 4,000 tons of Philippines for Dec.-Jan. shipment at 3c. and refiners bought 10 180 base of Louising repus at 2.875 The reported sales effected late on Friday, an operator bought 4,000 tons of Philippines for Dec.-Jan. shipment at 3c. and refiners bought 19,180 bags of Louisiana raws at 2.87c.To-day no raw sales were reported. The world sugar contract ruled steady on trade buying, with the market closing ½ to 1 point higher. Sales totaled 53 lots. London was un-changed for raws and futures closed ½d. lower to ¼d. higher. On the 5th inst. futures closed 22 to 24 points net lower. Domestic sugar futures dropped the full limit of 25 points today (Monday) in the most active trading in more than 5½ years on the announcement Saturday by Secretary of Agriculture Henry A. Wallace that the quota for 1939 would be 6,832,157 tons, at least 100,000 tons above trade estimates and 200,000 to 300,000 tons above probable con-sumption. The market opened 15 to 25 points lower, with Jan. and Mar. contracts off the limit. A technical rally of 3 to 9 points did not hold, but managed to keep closing prices a fraction above the early lows. Sales totaled 71,000 tons, the most active day since July 21, 1933. Trade opinion was sharply divided on whether the decline fully discounted the new quota, which well-informed traders asserted was 300,000 tons in the excess of probable distribution. While the only sale of raw sugar reported today was one of 19,000 bags of Cubas for late Dec. shipment at 2c. ex-duty of 0.90c. to American, reports were current that duty frees sold at 2.88c., delivered. World sugar contracts were 2 to 3 points lower. No weakness was apparent in the London market. On the 6th inst. futures closed 1 to 2 points net higher. After the early selling resulting from overnight margin calls, as the result of the sharp break on Monday, domestic sugar

and totaled 19,000 head, against 100,000 head for the same day a year ago. On the 6th inst. futures closed 7 points lower to 10 points higher. The opening range was 2 to 7 points lower than previous finals. Easiness in hogs caused by the heavy hog

Chronicle 3627 receipts at the Western packing centers had a depressing influence upon the lard market and attracted light selling for both trade and speculative account. Lard exports from the Port of New York today were 309,480 pounds, destined for London and Liverpool. According to advices received from London, prospects of a good export business between England and the United States for the coming year are reported to be excellent. Liverpool lard futures were un-changed to 3d. lower. Chicago hog prices were 10c. to 20c. lower today, the late top price registering \$7.35. Western hog receipts were quite heavy and totaled 78,800 head against 78,600 head for the same day a year ago. On the 7th inst. futures closed 2 to 10 points net higher. Trading was very light, with practically all operations in the distant May delivery. Western hog receipts were below expectations and the continued firmness in cash corn, which is the principal feed for hogs, stimulated light buying for both trade and speculative account. The distant May option advanced 15 points on the later buying. Export clearances of lard from the Port of New York totaled 128,000 pounds, estimated for Manchester and Hamburg. Liverpool lard futures were unchanged to 3d. lower. Hog prices at Chicago were 15c. to 20c. higher on the close. Sales were reported at prices ranging from \$7.35 to \$7.55. Western hog marketings totaled 62,900 head, against 71,000 head for the same day a year ago. On the 8th inst. futures closed unchanged to 2 points

totaled 62,900 head, against 71,000 head for the same any a year ago. On the 8th inst. futures closed unchanged to 2 points lower. Trading was light and without significant feature. Export clearances of lard from the Port of New York today were extremely light, being only 8,400 pounds, destined for Rotterdam. Liverpool was unchanged to 9d. higher. Western hog receipts continue heavy and marketings as reported today totaled 66,300 head against 67,200 head for the same day last year. Sales of hogs ranged from \$7.35 to \$7.55. Today futures closed 3 points down to 2 points up. Trading was light, with traders more or less uncertain as to future developments, especially as concerns the movement of hogs and the demand from abroad for lard.  Tothe of the 2d inst futures closed 4 to 7 points net.
 Februa. March_

3628 Financial outside market was again generally quiet. Local closing: Dec., 15.97; Jan., 15.96; Mar., 15.96; May, 15.98; July, 15.99; Sept., 15.99; Oct., 15.99. On the 7th inst. futures closed 25 to 14 points net higher. Transactions totaled 309 contracts. After hesitating on the opening, the rubber futures market turned upward when it became apparent that securities were rising and that other markets were stronger. Bidding for the Dec. position was the feature. The position appeared to be congested and continued to command a premium. Japanese interests were credited with buying the Oct. position. Seventeen additional notices were issued, making 430 altogether. London closed 1-16 to ½d. higher. Singapore was 3-32 to ½d. higher. Local closing: Dec., 16.22; Mar., 16.13; May, 16.12; July, 16.16; Sept., 16.20; Oct., 16.20. On the 8th inst. futures closed 14 to 20 points net lower. Transactions totaled 87 contracts. There was a renewal of iquidation in the rubber market, but factory buying and London support absorbed offerings to hold the decline in check. Trading was dull, with a total of oniy 660 tons to early afternoon. At that time March stood at 16.02e., off 11 points. London closed steady 1-16d. lower to 1-16d. higher. Singapore also closed irregular. Trade advices report heavy consumption of rubber continuing this month. Local closing: Dec., 16.05; March, 15.95; May, 15.98; July, 15.99; Sept., 16.00. Today futures closed 4 to 7 points net higher, with sales totaling 228 contracts. After opening 5 to 14 points lower, rubber futures rallied, standing about 2 points net higher this early afternoon, with March at 15.97c., May at 15.98 and July at 16.01. It developed that lifting of hedges by commission houses with Eastern connections more than absorbed offerings, especially in deferred positions. London closed unchanged to 1-16d. higher. It was indicated than absorbed offerings, especially in deferred positions more London closed unchanged to 1-16d. higher. It was indicated that United Kingdom rubber stocks had decreased 1,400 tons this week. Singapore was 3-32 to ½d. lower. Local closing: Dec., 16.09; March, 16.02; May, 16.03; July, 16.04; Sept., 16.05; Oct., 16.06.

that United Kingdom rubber stocks had decreased 1,400 tos this week. Singapore was 3-32 to 1/30 lower. Local closing: Dec., 16.09; March, 16.02; May, 16.03; July, 16.04; Sept., 16.05; Oct., 16.06. Hides—On the 3d inst. futures closed 20 to 29 points net hower. The market continued its downward trend today. Opening the short session with the range from 11 to 15 points lower in the old contract and from 7 to 18 points network of the decline. The trading in the old contract totaled 49.000 pounds, while in the new contract sales totaled 49.000 pounds, while in the new contract is ales totaled 49.000 pounds, while 280,000 pounds were ex-changed for actuals. Local closing: Old contract: Dec., 10.65; Mar., 11.70; June 12.08; Sept., 12.45; Dec., 12.75; On the 5th inst. futures closed unchanged to 6 points higher in the old contract and 6 points higher to 1 point lower in the new contract. No important developments were reported in the domestic market for spot hides today. The tanning interests still are reported showing a fair interest, but no purchases were reported. The futures market opened weak, but the tone improved steadily during the course of the day. The turnover in the old contract amounted to 36,0000 pounds, while in the new contract mounted to 36,0000 pounds, while in the new contract mounted to 60,000 pounds, while in the new contract the sales amounted to 7. Mar., 10.93; June, 11.25; Sept., 11.40. New contract: Dec., 11.30; Mar., 11.76; June, 12.10; Sept., 12.44. On the 6th inst. futures closed unchanged to 9 points net lower. The opening range was 18 to 14 points decline, while the new contract ranged from 6 to 14 points lower. Buying improved during the day and when the last bell rang the softading amounted to 5,200,000 pounds. There were three contracts tendered for delivery against Dec. position. In the sylo market it was reported that the Packer Hild Assac itation soid 3,000 ight native cow hiles at 116.e. apound and 2,000 branded cow hiles at 10%c. apound. These profese represent a decline of ½c. L

futures closed 2 points up for the old contract, with sales totaling 5 contracts. The new contract closed unchanged to 6 points net higher, with sales totaling 44 contracts. Like other markets, hides started lower, initial prices being 22 points net lower. Later it became apparent that there was a scarcity of contracts on the offering side. As a result, prices rebounded strongly, standing 12 to 13 points net higher this afternoon. Sales of old contracts up to early afternoon totaled 80,000 pounds, while sales of the new totaled 640,000 pounds. Local closing: Old contract: March, 10.93; June, 11.25. New contract: March, 11.74; June, 12.08; Sept., 12.49. 12.49.

pounds. Local closing: Old contract: March, 10.93; June, 11.25. New contract: March, 11.74; June, 12.08; Sept., 12.49.
Ocean Freights—There was a moderate amount of activity in the freight market the past week, with the bulk of tonnage chartered at steady rates. Charters included: Grain: Portland, Ore. to United Kingdom and Continent, 24s. 6d. (reported but not confirmed). Gulf to United Kingdom, spot basis, 3s. 6d. Atlantic range, including Albany to United Kingdom, December, basis, 2s. 9d. Atlantic range, including. Albany to United Kingdom, December, basis, 2s. 9d. Pacific Coast to United Kingdom, December, basis, 2s. 9d. Pacific Coast to United Kingdom, December, loading. Scrap: Atlantic range to Gdynia, December, loading. Gulf to Japan, January loading. Gulf to Japan, January 10, \$4, net form. Gulf to Japan, January loading. Gulf to Japan, January 25-February 10, \$29,600, lump sum. Sugar: Cuba to United Kingdom and Continent, January, 15s. Cuba to Marseilles. December, loading. Time: Round trip transatlantic trade, prompt, 3s. Trip across, December 15, lay days, \$1.70.
Coal—It is reported that the current cold weather snap that the Eastern part of the country is experiencing has caused the demand for anthracite coal to move out fairly good. During the last few days, however, with a slight increase in temperature the sales have decreased accordingly. Wholesale coal sales at Tidewater have been fairly good, especially in the buckwheat sizes. One large factor states that of all anthracite coal produced, buckwheat represents only 30%. Yet the orders for buckwheat sizes at Tidewater are approximately 50% of the current business. Cold weather has been the prime factor in stimulating activity. Many of the retail merchants in and around New York City agree that consumers have stored less this summer and fall than under normal conditions. This, they claim, is largely due to the economic situation rather than any other factor. Prices for retail coal are the same.

Wool—Well informed observers expect operations in the wool market to be sustained around the present level for the next three months at least. However, they feel uncertain about the outlook after orders for spring delivery now on the books have been filled. It is stated that mills producing cloth for men's wear have orders in hand sufficient to keep them going at the present level of operations uptil page March cloth for men's wear have orders in hand sufficient to keep them going at the present level of operations until past March 15. Prices have been advanced 10c. a yard over the quota-tions named at the beginning of the season, reflecting the active demand. The feeling is rather widespread that some cut in wool duties may occur next year, when and if new trade agreements are concluded with Australia, South Africa and Argentine. Preparing its members for the pos-sibility of such action a recent bulletin of the National Association of Wool Manufacturers states that "it is entirely unlikely that any projected cut in the duty on wool could be effective prior to July 1, 1939. Negotiations, however, may commence in the new year and for the following months an uncertainty fully equal to that which dragged for months over the British pact may throw its shadow over the general wool industry." It is asserted that domestic wool growers will offer most strenuous opposition to any lowering of raw wool duties. As this year comes to an end growing interests will have an unusually large volume of wool on their hands on which Government loans have been received. Silk—On the 5th inst. futures closed unchanged to 2½.

with have an unustany large volume of wool on their names on which Government loans have been received. Silk—On the 5th inst. futures closed unchanged to 2½. net lower. Little interest was displayed in the raw silk market today. Volume was very light, with only 110 bales sold, incl. 60 bales in the old contract, 50 bales in the No. 1 contract and none in No. 2 contract. Prices moved lower on the weakness in the securities market. Yokohama was 4 to 6 yen up and Kobe was 3 to 6 yen better. Grade D. advanced 5 yen to 810 yen in both markets. Spot sales amounted to 850 bales, while futures transactions equaled 2,525 bales. Local closing: Old contract—Dec., 1.71½; Jan., 1.72; Feb., 1.71. Contract No. 1—March, 1.63; April, 1.67; May, 1.67½; June, 1.67; July, 1.67. Contract No. 2—March, 1.65; May, 1.64; June, 1.63; July, 1.63. On the 6th inst. futures closed unchanged to 1½c. higher. Dullness continued in the market today, but prices were steady, influenced somewhat by the stronger action of the securities market. Transactions totaled 80 bales in the old contract, 10 bales in No. 1 contract and none in No. 2 contract. Yokohama futures were unchanged to 8 yen off, while Kobe was 1 yen higher to 2 yen lower. Grade D contract, 10 bales in No. 1 contract and none in No. 2 contract. Yokohama futures were unchanged to 8 yen off, while Kobe was 1 yen higher to 2 yen lower. Grade D dropped 2¹/₂ yen to 870¹/₂ yen at Yokohama and declined 5 yen to 805 yen at Kobe. Spot sales in both Japanese markets totaled 800 bales, while futures transactions totaled 1,900 bales. Local closing: Old contract—Dec., 1.72¹/₂; Jan., 1.72; Feb., 1.72. Contract No. 1—March, 1.69¹/₂; April, 1.68; May, 1.65¹/₂; June, 1.68; July, 1.68. Contract No. 2—March, 1.65; April, 1.65; May, 1.64; June, 1.64; July, 1.63¹/₂. On the 7th inst. futures closed unchanged to 1c. up in the old contract, with sales totaling only 11 contracts. The

Volume 147 No. 1 contract closed unchanged to $\frac{1}{2}$ cent up, with sales of only 7 contracts. The No. 2 contract closed 3 points up, with sales of 5 contracts. News of a revival of demand in the town spot silk market, coupled with improvement in other markets, caused improved demand for silk futures, but trade continued light. Sales to early afternoon totaled 50 bales, of which 20 were in the old contract. Prices rose 1 to $3\frac{1}{2}$ cents a pound in the early trading. The price of erack doule extra silk remained unchanged at \$1.79. The Yokohama Bourse closed 3 to 5 yen higher. Grade D silk was unchanged at 807 $\frac{1}{2}$ yen a bale. Local closing: Old contract—Dec., 1.73; Jan., 1.73; Feb., 1.72. No. 1 contract —March, 1.69 $\frac{1}{2}$; July, 1.68 $\frac{1}{2}$. No. 2 contract—Mar., 168. On the 8th inst. futures closed $\frac{1}{2}$ contract closed 1 to $\frac{1}{2}$ cent higher, with sales totaling 10 contracts. The market seemed neglected during the early session. Up to early afternoon only ten bales had been done in the old con-tract, while no sales were reported on the new. Prices of futures were firm in sympathy with a rise in the uptown spot market. The price of crack double extra silk was marked up $\frac{1}{2}$ to 61.79 $\frac{1}{2}$ a pound. Yokohama Bourse prices were 1 to 6 yen higher. Grade D silk was 5 yen higher at 812 $\frac{1}{2}$ yen a bale. Local closing: Old Contract: Dec., 1.73 $\frac{1}{2}$; No. 1 Contract: March, 1.70 $\frac{1}{2}$; May, 1.70; June, 1.70. Today futures closed unchanged in the old contract, with sales totaling 10 contracts. The No. 1 contract closed 1 to up to $\frac{1}{2}$ c. down, with sales of 9 contracts. Silk futures were steady with increased activity. This afternoon prices were unchanged. The turnover on old contracts was 90 bales, while 60 bales in the No. 1 contract had been done to that time. The price of crack double extra silk in the up town spot market was $\frac{1}{2}$. lower at \$1.79. Yokohama Bourse prices were 1 yen higher to 2 yen lower. Grade D silk in the outside market declined 2 $\frac{1}{2}$ yen to

COTTON

Friday Night, Dec. 9, 1938 The Movement of the Crop, as indicated by our tele-grams from the South tonight, is given below. For the week ending this evening the total receipts have reached 77,815 bales, against 89,957 bales last week and 88,143 bales the previous week, making the total receipts since Aug. 1, 1938, 2,617,438 bales, against 5,032,280 bales for the same period of 1937, showing a decrease since Aug. 1, 1938, of 2,414,842 bales bales.

The market appeared to be more or less in the doldrums, due largely to the general uncertainty that prevails, especially as concerns Saturday's vote of cotton growers in the South as to whether they want continued Federal control under the 1938 Agricultural Adjustment Act for the 1939 season. Should growers vote for control, it is assumed the Farm Act would continue in effect, but with revisions. On the 3d inst; prices closed 14 to 19 points net lower. The market suffered an unusual break today. The downward trend of prices which developed in the cotton market on Friday became more pronounced in today's session, when prices showed further losses of 14 to 19 points. The opening range was 3 to 6 points lower owing to weakness in Liverpool. Prices continued downward with only occasional rallies throughout the session. Highs of the day were made at the opening and lows at the close. The deeline was the result of heavy domestic and foreign liquidation, as well as hedge selling partly for mill account. The trade was the best buyer at limits, but selling was more aggressive than buying, and the demand was easily satisfied. At the low of the day the market showed losses of 36 to 63 points from the highs of the past upward movement. December showed the smallest loss, and October the greatest. The sudden down-ward plunge in prices following a long period of stability and narrow price changes, came as a surprise to many, and from this it is apparent that confidence has been undermined and that longs were inclined to set out and await developments. Average price of middling at the 10 designated spot markets was 14 points off at 8.33c., compared with 8.38c., the closing price for December in th

opinion growing out of statements by agricultural officials in Washington. Moreover, the recent sale of 20,000,000 bushels of wheat to English millers at an undisclosed price, has been given consideration abroad as an indication of America's position on farm products. Consequently, senti-ment has undergone a change, and foreign houses which were long of cotton here on arbitrage operations, have been selling. Trade houses were good buyers on the scale down, and during the latter half of the day the market firmed considerably. Average price of middling at the 10 designated spot markets was unchanged at 8.33c.

Bing of conton here on an array of the scale down, and during the latter half of the day the market firmed considerably. Average price of middling at the 10 designated spot markets was unchanged at 8.33e.
On the 6th inst. prices closed 8 to 13 points net higher. The market toned down quite a bit today, with prices firmer and closing at the best of the day. The liquidating morement, which had extended from Friday until Monday noon, appeared to have run its course, and with contracts scarce, prices advanced readily and showed gains of 22 to 24 points from the low levels made on Monday. The opening range was 3 to 6 points advance in response to a steadier tone in the Liverpool market and on a more active demand for the near positions from mills and on foreign buying of the distant months. Hedge selling by the South was comparatively small. Liquidation through commission houses was less active and there was no important selling, exceept about 10,000 bales of October by a leading broker. At times the market was very quiet, with narrow fluctuations and with traders inclined to await developments. The demand for spot cotton was again quiet and little activity is expected until improvement develops in the txtile trade. Average price of middling at the 10 designated spot markets was 8.4.e., or 8 points up.
On the 7th inst. prices closed 1 to 3 points net higher. The cotton market was inactive today, and after moving within a range of 3 to 5 points, closed steady near the best of advances in the Liverpool and Bombay markets and on overnight trade and scattered buying. Foreign houses were on both sides, but on the whole foreign business was light. Hedge selling was also of small proportions, and while the demand was not aggressive, contracts were scarce aside from moderate liquidation. Traders assumed a waiting position pending the publication of the preliminary final crop report, and also the referendum on Saturday, when cotton cron sillower was 8.4.8. On the 8 th inst, prices closed 5 to 10 po

Today prices closed 8 to 11 points net lower. Prices for cotton futures again suffered further losses today in a moderate volume of sales. A short time before the close of business active positions showed declines of 8 to 11 points from the closing levels of the previous day. Around midday the market was 9 to 10 points lower. Prices moved lower in moderately active dealings on the opening, with initial prices 5 to 7 points below yesterday's last quota-tions. Selling by Bombay, cooperative brokers, Japanese interests, the South and spot houses was the feature of the early trading. Most of the buying appeared to be price-fixing for Eastern mills. After the call the market was 4 to 5 points lower, with a barely steady tone in evidence. Shortly after, prices fell into new low ground. Liquidation and poor demand caused prices in the Liverpool market to decline today, with closing quotations 4 to 7 points lower. The official quotation for middling upland cotton in the

contracts of 28,000 bales.

The Visible Supply of Cotton tonight, as made up by cable and telegraph, is as follows. Foreign stocks as well as afloat are this week's returns, and consequently all foreign figures are brought down to Thursday evening. To make the total show the complete figures for tonight (Friday) we add the item of exports from the United States, for Friday only.

New Cotton Handbook Issued—The 68th edition of the "Annual Cotton Handbook" has just been published by Comtelburo, Ltd. Containing a complete statistical picture of the cotton trade, the "Handbook" represents one of the most compact and comprehensive works of its kind. Al-though Far Eastern conditions have prevented the inclusion of the Shanghai movement, the 1938 edition more than makes up for this omission by including new features such as quotations on the various grades of cotton in the Alex-andria market. The books are available at the New York office of Comtelburo, Ltd., 66 Beaver St. Price \$1 per copy.

office of Comtelburo, Ltd., 66 Beaver St. Price \$1 per copy. Agricultural Department's Report on Cotton Acreage, Yield per Acre and Production—The Agricultural Depart-ment at Washington on Tuesday (Dec. 8) issued its report on cotton acreage, yield per acre and production as of Dec. 1. None of the figures takes any account of linters. Comments on the report will be found in the editorial pages. Below is the report in full: A United States cotton crop of 12,008,000 bales of 500 pounds gross weight is estimated by the Crop Reporting Board of the United States Department of Agriculture, based on indications of Dec. 1, 1938. This is 129,000 bales, or about 1.0% less than was forecast a month ago, and compares with 18,946,000 bales produced in 1937, 12,399,000 bales, the 10-year (1927-36) average. The yield is estimated at 226.8 pounds per acre, which compares with 266.9 pounds in 1937 and 179.8 pounds, the 10-year (1927-36) average.

compares with 266.9 pounds in 1937 and 179.8 pounds, the 10-year (1921-30) average.
 Harvested acreage is now estimated at 25,346,000 acres, which is 25.5% less than that harvested in 1937. Allowing for the estimated abandonment of 3.1%, the cotton acreage in cultivation on July 1 is indicated to have been 26,144,000 acres. The abandonment in 1938 was greater than average, some acreage having been removed by farmers after July 1 in order to be in compliance with the 1938 Agricultural Adjustment program. COTTON REPORT AS OF DEC. 1, 1938
 The Crop Reporting Board of the Bureau of Agricultural Economics makes the following report from data furnished by crop correspondents, field statisticians and cooperating State agencies. The final total ginnings for the season will depend upon whether the various influences affecting the

3631

* Includes 157,865 bales of the crop of 1937 ginned prior to Aug. 1 which was counted in the supply for the season of 1937-38, compared with 142,983 and 41,130 bales of the crops of 1937 and 1936.

bales of the crops of 1937 and 1936. The statistics in this report include 151,324 round bales for 1938; 287,319 for 1937 and 262,706 for 1936. Included in the above are 15,236 bales of American-Egyptian for 1938; 3,745 for 1937; and 10,604 for 1936; also 3,235 bales Sea-Island for 1938; 3,745 for 1937 and 859 for 1936. The statistics for 1938 in this report are subject to revision when checked against the individual returns of the ginners being transmitted by mail. The revised total of cotton ginned this season prior to Nov. 14 is 10,749,913 bales.

CONSUMPTION, STOCKS, IMPORTS AND EXPORTS-UNITED STATES

STATES Cotton consumed during the month of October, 1938, amounted to 542,778 bales. Cotton on hand in consuming establishments on Oct. 31, was 1,507,245 bales, and in public storages and at compresses 15,312,719 bales. The number of active consuming cotton spindles for the month was 22,113,952. The total imports for the month of October, 1938 were 10,933 bales and the exports of domestic cotton, excluding linters, were 464,590 bales.

WORLD STATISTICS

WORLD STATISTICS The estimated world's production of commercial cotton, exclusive of linters, grown in 1937, as compiled from various sources was 35,591,000 bales, counting American in running bales and foreign bales of 478 pounds lint, while the consumption of cotton (exclusive of linters in the United States), for the year ended July 31, 1938, was 26,748,000 bales. The total number of spinning cotton spindles, both active and idle, is about 147,-000 000

Indineer of spinning cotton spindles, both active and idle, is about 147,-000,000. Present Position and Outlook for Cotton Surveyed by Carl M. Loeb, Rhoades & Co.—A tight spot situation is in prospect for American cotton later this season, according to a survey of the cotton situation and outlook, recently issued by Carl M. Loeb, Rhoades & Co. This situation ,it is stated, will be induced by the large Government holdings of the staple. The report also says in part: If loans to growers are discontinued after this season, and liquidation of loan stocks is begun, cotton prices thereafter will reflect supply and demand conditions more closely. Our studies indicate that the Government loan held cotton above the supply-and-demand price in 1937-38, and that the same has been true during the season to date. Past experience suggests caution in following any advance in cotton prices that may occur during the next few months, and indicates that any advance resulting from an actual shortage of spot cotton is likely to be deferred until the later part of this season. At the same time, it should be remembered that conditions in no two seasons are exactly similar. The stock of cotton in Government loans now is larger than ever before, while general industrial activity has been increasing rapidly. In the cotton trade, methods are being discussed for liquidating the large Government holdings of loan cotton. Some of these proposes sharp restriction of acreage and production in 1939, with growers to be paid for restriction with cotton from Government holdings rahter than with cash. It is probable that these various proposals will receive wider attention,

and it is possible that one or more of them will be submitted to the next Congress. The feeling is growing that the Government has reached an impasse in its cotton program, and that new legislation is necessary. Some advocate a return to unrestricted acreage and production, while others feel that continuance of restricted acreage and production is neces-sary owing to the present high level of foreign cotton acreage and supplies. The trend of though is towards the return to a price system unaffected by Government loans and holdings, in which cotton prices will truly reflect supply and demand conditions and permit American cotton once more to move freely into world trade.

to move freely into world trade. Cotton Loans of CCC Through Dec. 1 Aggregated \$143,675,556 on 3,111,450 Bales—On Dec. 2 the Com-modity Credit Corporation announced that "Advices of Cotton Loans" received by it through Dec. 1 showed loans disbursed by the Corporation and lending agencies of \$143,-675,555.54 on 3,111,450 bales of cotton. The loans average 8.87 cents per pound. Figures showing the number of bales on which loans have been made by States are given below: State— Bales 1. State— Bales 1

State	Bales	State	Bales
		New Mexico

Mississippi	469.746	Virginia	58
Missouri	71,494	n ne norderende en di	

CCC Loaned \$13,262,736 on 73,276,696 Pounds of Wool Through Nov. 26—The Commodity Credit Corporation an-nounced Dec. 2 that through Nov. 26, loans aggregating \$13,262,736.32 had been made on 73,276,696 net grease pounds of wool, an average of 18.10 cents. This figure in-cludes repayments of \$2,034,124.50 covering 11,426,674 pounds of wool.

Returns by Telegraph—Telegraphic advices to us this evening denote that the 1938 cotton crop has been gathered, no cotton remaining in the fields. The ripening of cotton, picking and ginning advanced rapidly, and as a result the crop was picked and ginned earlier than any crop on record.

Receipts from the Plantations-The following table indicates the actual movement each week from the planta-tions. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

Week End.	Rec	eipts at I	Ports	Stocks	Stocks at Interior Towns			Receipts from Plantations

The above statement shows: (1) That the total receipts from the plantations since Aug. 1, 1938, are 4,269,531 bales; in 1937 were 6,830,892 bales and in 1936 were 5,714,154 bales. (2) That, although the receipts at the outports the past week were 77,815 bales, the actual movement from

plantations was 65,209 bales, stock at interior towns having decreased 12,606 bales during the week.

World's Supply and Takings of Cotton—The follow-ing brief but comprehensive statement indicates at a glance the world's supply of cotton for the week and since Aug. 1 for the last two seasons from all sources from which statistics are obtainable; also the takings or amounts gone out of sight for the like period:

Cotton Takings, Week and Season	19	38	1937		
week and Season	Week	Season	Week	Season	
Visible supply Dec. 2 Visible supply Aug. 1 American in sight to Dec. 9 Bombay receipts to Dec. 8 Other India ship'ts to Dec. 8 Alexandria receipts to Dec. 7. 1937		2,000			5,000	66,000	136,000	207,000
1936	3,000	6,000	69,000	78,000	11,000	78,000	306,000	395,000
Other India-	4 000	1 000	S	5.000	58.000	120.000		178.000
1938	4,000 5,000	1,000 14,000		19,000	34,000	92.000		126.000
1936	10.000	16.000		26,000	81.000	132.000		213,000
1930	10,000	10,000		20,000	81,000	102,000		210,000
Total all-			:			9		
1938	4.000	4.000	31.000	39.000	73,000	180,000	410,000	663,000
1937	5.000	16,000			39,000	158,000		333,000
1936	13.000			104.000	92,000	210,000	306,000	608,000

According to the foregoing, Bombay appears to show an increase compared with last year in the week's receipts of 6,000 bales. Exports from all India, ports record an increase of 12,000 bales during the week, and since Aug. 1 show an increase of 330,000 bales.

Alexandria Receipts and Shipments—We now re-ceive weekly a cable of the movements of cotton at Alexan-dria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years:

Alexandria, Egypt, Dec. 7	' i	938	1	937	1	936	
Receipts (cantars)— This week Since Aug. 1	32	20,000		40,000 39,836	350,000 5,174,184		
Exports (bales)	This Week	Since Aug. 1	This Week	Since Aug. 1	This Week	Since Aug. 1	
To Liverpool To Manchester, &c To Continent & India To America	5.000 6.000 18,000 1,000	$51,641 \\ 236,285$	6,000 9,000 24,000	71,392	7,000 26,000 2,000	76,315 229,341	
Total exports	30 000	338 417	30 000	440 032	35.000	399.010	

Note—A cantar is 99 lbs. Egyptian bales weight about 750 lbs. This statement shows that the receipts for the week ended Dec. 7 were 320,000 cantars and the foreign shipments 30,000 bales.

Manchester Market—Our report received by cable to-night from Manchester states that the market in both yarns and cloths is quiet. Demand for yarn is poor. We give prices today below and leave those for previous weeks of this and last year for comparison:

BREADSTUFFS

Friday Night, Dec. 9, 1938

Flour -Dulness again prevails in the flour market. The **Flour**—Dulness again prevails in the flour market. The general dulness of the wheat market, with its narrow fluctuations and lower trend, has done much to curtail consumer buying in the flour trade. It now is clear that the rate of flour sales has fallen back to the dull level seen prior to the spurt in the closing days of last week. No appreciable demand for flour is expected now unless comething of grave importance develops in the political something of grave importance develops in the political situation abroad.

Something of grave importance develops in the political situation abroad. Wheat—On the 3d inst. prices closed ½c. lower to ¼c. higher. Activity of spreaders who bought December wheat contracts and sold options expiring in May and July had a very unsettling effect on wheat values and did much to counter the demand that developed as a result of a private forecast of heavy acreage abandonment and subnormal yields in the winter wheat belt. Trade was not particularly active, but it was enlivened by leading professionals who bought December against sales of deferred deliveries in un-winding previous spreads. The discount of about 3c. for December contracts also attracted cash and elevator in-terests, and there were indications of some removing of hedges, possibly against eash business in connection with re-cently announced subsidized sales to British millers. Decem-ber wheat moved up as high as 63 %c., or ½c. net gain, while May dropped to 65½, or ¾ net loss. On the 5th inst. prices closed ½c. to 1¼c. net higher. Prospects that unofficial reports tomorrow would emphasize widespread moisture deficiency in domestic winter crop areas, did much to raise Chicago wheat prices 1¼c. today. A substantial decrease of 1,379,000 bushels of Canadian wheat were reported. Contributing to the upward price trend on the Chicago Board were reports that because of unfavorable wheather the Argentine wheat crop this season would not exceed 255,000,000 to 310,000,000 bushels. The fact that no moisture relief had appeared in drought regions of the domestic Southwest in the last 24 hours attracted notice. On the other hand, an unofficial report issued today estimated the United States winter wheat seeded area at 46,942,000 acres compared with an estimate from the same source Nov. 1 of 46,550,000.

the United States winter wheat seeded area at 46,942,000 acres compared with an estimate from the same source Nov. 1 of 46,550,000. On the 6th inst. prices closed ½c. to ¾c. net higher. The wheat market showed gains at one time during the session of 1c. a bushel, but later because of profit taking, lost part of the gain. Unofficial monthly domestic crop figures showed winter wheat acreage abandonment larger then normal and indicated yields would be sub-normal on the reduced acreage. The condition of winter wheat was reported the lowest on record, with one exception, and the 1939 probable harvest was forecast as the smallest since 1935. Export purchases of North American grains today consisted of about 400,000 bushels of Canadain wheat and 100,000 bushels of corn from the United States. Somewhat enlarged trading accompanied the upturn of wheat values. The private estimates on domes-tic seeding for the 1939 harvest averaged about 47,000,000 acres, against 57,316,000 acres seeded the preceding season. A prospective crop of around 524,000,000 bushels harvested this year. On the 7th inst. prices closed unchanged to ¼c lower. Wheat prices averaged fractionally higher, helped by corn-market strength coupled with drought reports from domestic winter crop areas southwest and west, as well as with a sharp increase of domestic flour sales. Late setbacks of Winnipeg wheat quotations, though; acted as a weight on prices in Chicago. Only a small export business in Canadian wheat was noted, 300,000 bushels, and none from the United States. Announcement that India had decreed an import duty of 28¼ cents a bushel on wheat, courted also as a handicap. On the 8th inst. prices closed ¼ to ½c. net higher. Re-ports of Italian troop movements, together with an 8,000,000-bushel Italian purchase of Rumanian wheat, led to frac-tional upturns of Chicago wheat prices today. Elief was expressed in some quarters here that the foreign political news had become more disturbing than at any time since the Munich settlement. Serving further

unfavorable domestic crop conditions, especially drought Southwest and West, were also stressed. Today prices closed unchanged to ¼c. lower. Reports that Germany and Italy had arranged to take over all that was left of Rumania's wheat surplus served as a market stimulus. Besides, European political uncertainties were given continued notice. Indications, too, were that 500,000 bushels overnight export business had been done in wheat from Canada. Open interest in wheat an Elburghar resched from Canada. Open interest in wheat on Thursday reached 100,838,000 bushels. DAILY CLOSING PRICES OF WHEAT IN NEW YORK

July______ 62% 63% 63% 63% 63% 63% 64 Corn—On the 3d inst. prices closed 1%c. to 1/2c. net lower. Corn followed wheat, ignoring evidence of improving export demand as a result of recent upturns in Argentina prices. Export sales were estimated at 100,000 bushels on top of 500,000 sold yesterday, and it was disclosed Mexico had bought 400,000 bushels of white corn early this week. On the 5th inst. prices closed 3/4c. to 11/4c. net higher. Corn values received quite a lift today as a result of the strong action of wheat and a sharp rise of 15% to 2 cents in Argentine corn quotations. Export business in United States corn was believed to exceed the amount acknowledged, 250,000 bushels. bushels

On the 6th inst. prices closed 1/4c. lower to 5/8c. higher. Corn averaged higher most of the session owing to sympathy Corn averaged higher most of the session owing to sympathy with wheat and to firmness of Argentine corn quotations. Besides, arrivals in Chicago continued to dwindle, totaling only 50 cars today. On the other hand, the market in Chicago turned irregular in the late dealings, with trade mostly local, chiefly selling of May against buying of De-cember. Export purchases of 100,000 bushels of corn from the United States were reported. On the 7th inst. prices closed ¼c. to ¾c. higher. Jumps of 2½ cents overnight in Argentine prices led to a cent a bushel upturn in the Chicago corn market today. Profit taking later reduced the gains. Leading traders said soaring of Argentine quotations indi-cated the United States and the Danube region had become the only available immediate sources of corn supplies. It cated the United States and the Danube region had become the only available immediate sources of corn supplies. It was added that regardless of heavy feeding of low grade wheat abroad, Europe would require large quantities of corn from North America between now and spring. Commission houses were buyers of corn futures on a fairly large scale in Chicago, and export interests were said also to have purchased futures. Contributing to the upward trend was scantiness of Chicago receipts, only 81 cars today, with rural offerings displaying no evidence of any material increase except at a higher price level.

displaying no evidence of any material increase except at a higher price level. On the 8th inst. prices closed % to %c. net higher. Corn displayed independent strength and rose nearly 1c. a bushel, with liberal export business a factor. Estimates were current that as high as \$00,000 bushels of United States corn were bought today for overseas. This did not include 600,000 bushels of Government corn, said also to have been sold to go abroad. There was no confirmation. Although the Buenos Aires Grand Exchange was not open today, the corn market here received stimulus when Argentine corn quotations scored decided additional upturns last night after business in Chicago had ended. Besides Chicago receipts of corn were again meager, only 72 cars today. A canvass of country elevators indicated farmers would not sell corn freely unless prices advinced 6 to 10c. a bushel. Today prices closed ½ to 1%c. net higher. Corn elimbed briskly 1%c. a bushel here today, whereas wheat failed to hold fractional gains. United States Government loans on a vast amount of corn, together with shortage of Argen-tine supplies, have brought about a unique situation for this time of year. Scantiness of domestic receipts has re-sulted, as well as increasing export trade, including today's purchases of about 500,000 bushels. Corn values displayed independent strength, largely as a result of notable fresh soaring of Buenos Aires quotations. Chicago traders said export demand for United States corn implied concern in Europe over shortage of available supplies from Argentina, and that prospects were for continued call by overseas im-porters. Fairly good takings today to go abroad were noted. Open interest in corn on Thursday reached 60,348,000 bushels. DAILY CLOSING PRICES OF COEN IN NEW YORK

Oats—On the 3d inst. prices closed ½c. to ¾c. net higher. Cash houses bought December oats, strengthening that mar-ket, which was in marked contrast to the downward action of wheat and corn. On the 5th inst. prices closed ½c. to ½c. higher. This market was firm in sympathy with the strong action of wheat and corn. On the 6th inst. prices closed unchanged to ¼c. up. This market was relatively quiet, though the undertone was firm in sympathy with the firm-ness of wheat and corn. On the 7th inst. prices closed ½c. decline to ¾c. advance. There was little of interest in this market, trading being more or less routine. On the 8th inst. prices closed unchanged to ¼c. advance.

Inarket, trading being more or less routine. On the 8th inst. prices closed unchanged to ¼c. advance. Trading was dull, though the undertone was steady. Today prices closed ¼ to ¼c. net higher. There was very little to report concerning the market in oats, trading being light and without feature.

July ______ 28 284 283 284 283 283 283 283 **Rye**—On the 3d inst. prices closed unchanged to ½c. off. Trading was dull, with the undertone relatively steady. On the 5th inst. prices closed ¾c. to ½c. net higher. This was a rather light response to the strength in wheat and corn, and was attributed to a lack of real interest on the part of the trade, attention apparently being focused on wheat and corn markets. On the 6th inst. prices closed ½c. decline to ½c. advance. This market was fairly active, with the trading mixed. On the 7th inst. prices closed unchanged to ½c. up. The market was quiet and unresponsive to the activity and strength in wheat and corn. On the 8th inst. prices closed ¼ to ¾c. net higher. There was no aggressive buying in this grain, the market's strength being influenced largely by the upward trend of wheat and corn. Today prices closed ¼c. up to ½c. lower. Trading was light and without feature. DAILY CLOSING PRICES OF RYE FUTURES IN CHICAGO

Weather Report for the Week Ended Dec. 7—The general summary of the weather bulletin issued by the Department of Agriculture, indicating the influence of the weather for the week ended Dec. 7, follows:

<text><text><text><text><text><text><text>

In Oklahoma and Texas, except in the Panhandle of Texas, moisture is needed badly. In some southern and western counties of Oklahoma wheat is the poorest in many years, while in Texas, except the northwest, much was seeded dry and is still ungerminated. In Montana and the Pacific Northwest conditions continue favorable, with wheat entering the winter in very good shape, although in Montana some seeded on stubble land and in the drier areas shows weakness. Melting snow and mild temperatures were favorable in the eastern Great Basin, while rains were helpful in northern California. It is too dry in southern California.

The Weather Bureau furnished the following resume of conditions in the different States:

Conditions in the different States: North Carolina—Raleigh: Favorable for hog butchering at beginning. Field work slow account freeze and wet soil. Truck rather badly damaged in recent cold spell. Still some cotton and considerable corn ungathered. Texas—Houston: Averaged about 6 degrees above normal; good rains on upper coast and in extreme east. Light rains in remainder of east, but generally dry elsewhere. Progress and condition of winter wheat gener-ally good in Panhandle and adjacent areas, but mostly poor in remainder

of State where rain badly needed for germination of seed, much of which was dry planted. Truck fair to good on coastal plains, but poor to only fair elsewhere. Frost of last week practically wiped out beans and squash in Rio Grande Valley, but other truck not as badly damaged as previously indicated. Ranges drying rapidly: catile continue fair to good; some feeding necessary locally. Small amount of rice remains to be harvested. General rain urgently needed, except on immediate coast, in extreme east, and in Panhandle. *Arkansz*-Little Rock: Favorable for cotton picking most of week: little now in fields. Favorable for gathering corn and seed crops, most of which have been gathered. Plowing, butchering, clearing fields, and work in timber progressed. Favorable for wheat, oats, tame pastures, and winter truck,

THE DRY GOODS TRADE

New York, Friday Night, Dec. 9, 1938.

Less favorable weather conditions prevailing in parts of the country, had a somewhat retarding influence on retail business, notwithstanding the fact that holiday buying is now approaching its peak. While store attendance left little to be desired, it was observed that customers were giving preference to popular priced items. Comparisons with last year's volume are, moreover, influenced by the fact that prices are generally at lower levels than in 1937. Department store sales, the country over, for the week ending Nov. 26, according to the Federal Reserve Board, were 4% below the corresponding week of, ast year. In New York and Brooklyn stores the decline in the dollar volume reached 9.4%, while in Newark stores a loss of 11.6% was established.

Trading in the wholesale dry goods markets continued to be affected by inventory taking activities, although the usual rush of last-minute orders for holiday goods served to offset this factor to some extent. Following the inventory period, a resumption of buying activities on the part of wholesalers is anticipated. Some interest was shown by garment manufacturers in cotton dress goods, and a moderate amount of orders for January promotion sales also came into the market. Business in silk goods continued fairly active, with most attention again being given to pure dye crepes for Spring. Prices ruled steady reflecting the growing scarcity of spot Trading in rayon yarns remained active. merchandise. Chief interest centered in the acetate division, whereas buy-ing of viscose yarns slowed down somewhat. While surplus stocks in the hands of producers at the end of November showed a moderate increase over the previous month, the statistical position of the industry continues to be regarded optimistically, with the outlook for the volume of December shipments substantially better than last year.

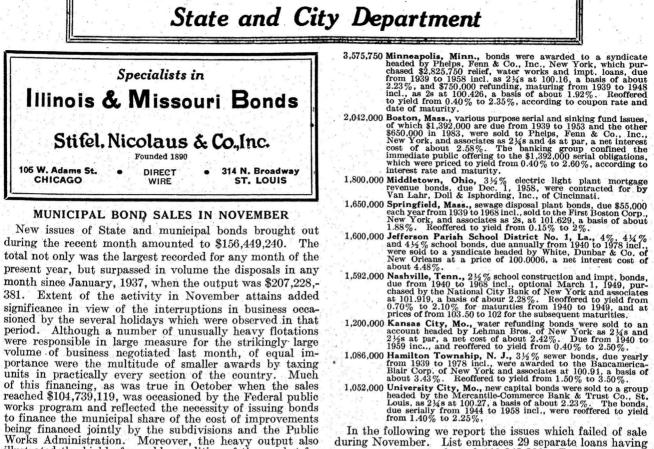

Domestic Cotton Goods-Trading in the gray cloths markets remained dull, and total sales were believed to have absorbed less than half of the current output. Prices ruled lower for most constructions. Although stocks in printers' and converters' hands are reported to be of modest proportions, and the movement of finished goods continues steady, buyers displayed little willingness to enter the market, partly due to lack of confidence in the current price structure, and in part owing to prevailing uncertainties over the world political outlook. The easiness of the raw cotton market, and the absence, so far, of any concrete measures by the mills to curtail their output, also served to depress sentiment. Business in fine goods continued quiet, and sales were confined to occasional fill-in lots, as producers refused to concede requests for price concessions. An outstanding exception were voiles in which active buying continued. Closing prices in print cloths were as follows: 39-inch 80's, 61/8 to $6\frac{1}{4}$ e.; 39-inch 72-76's, $5\frac{7}{8}$ to 6c.; 39-inch 68-72's, 5 to $5\frac{1}{8}$ c.; 38 $\frac{1}{2}$ -inch 64-60's, $4\frac{1}{4}$ to $4\frac{3}{8}$ c.; 38 $\frac{1}{2}$ -inch 60-48's, 3 13-16 to 31/8c.

to $3\frac{7}{8}$ c. Woolen Goods—Trading in men's wear fabrics slowed down perceptibly, chiefly because of the fact that clothing manufacturers appeared to be covered on most of their nearby requirements. Mill operations, fortified by the large backlog of unfilled orders, continued very active. A feature of the week was the price advance of $2\frac{1}{2}$ c. a yard on top-coatings and woolen suitings, announced by a large pro-ducer. Reports from retail clothing centers made a some-what less favorable showing, as adverse weather interfered with the further covering of pent-up consumer needs. Busi-ness in women's wear goods broadened moderately reflecting the growing willingness of garment manufacturers to cover the growing willingness of garment manufacturers to cover their fabric needs for Spring. Active interest again existed in tweeds, boucles and fleeces.

In tweeds, boucles and neces. Foreign Dry Goods—Tradings in linens gave indications of a substantial pickup after the turn of the year when the new British-American trade agreement will go into effect. Meanwhile, scattered last-minute rush orders for holiday gift items served to enliven current business in some measure. Business in burlap continued inactive although prices ruled steady, in response to rumors of further curtailment measures in the Indian producing center. Domestically lightweights were quoted at 3.70e., heavies at 5.00.

Volume 147

Financial Chronicle

New issues of State and municipal bonds brought out during the recent month amounted to \$156,449,240. The total not only was the largest recorded for any month of the present year, but surpassed in volume the disposals in any month since January, 1937, when the output was \$207,228, 381 Extent of the activity in November attains added significance in view of the interruptions in business occa-sioned by the several holidays which were observed in that period. Although a number of unusually heavy flotations significance in view of the interruptions in business occa-sioned by the several holidays which were observed in that period. Although a number of unusually heavy flotations were responsible in large measure for the strikingly large volume of business negotiated last month, of equal im-portance were the multitude of smaller awards by taxing units in practically every section of the country. Much of this financing, as was true in October when the sales reached \$104,739,119, was occasioned by the Federal public works program and reflected the necessity of issuing bonds to finance the municipal share of the cost of improvements being financed jointly by the subdivisions and the Public Works Administration. Moreover, the heavy output also illustrated the highly favorable condition of the market for tax-exempt securities. This was singularly apparent in the fact that despite the extent of the awards, most of which were negotiated on terms extremely pleasing to the issuers, there was no apparent dislocation of the general price struc-ture. As a matter of fact, the ease with which the issues were absorbed by investment sources, served to strengthen the market for securities of all grades. Some of the larger flotations completed in the recent month included issues of \$40,000,000 by the City of New York, \$25,000,000 by the State of Connecticut and \$24,432,-000 by the State of Massachusetts. The "city" thus in-creased to \$133,000,000 the amount of long-term financing negotiated in the present year. The Connecticut award marked that State's initial appearance in the bond market for a number of years and the loan in question represents its sole item of outstanding funded debt. Another feature of last month's financing was the comparatively insignificant portion accounted for by refunding loans. The grand total of \$156,449,240 includes only \$5,612,651 of issues of that character. The Nov. 28 sale of \$4,025,000 Baltimore, Md., bonds was later canceled owing to doubt as to validity of the issue. Further details appear in

subsequent page.

subsequent page. In summarizing the results of State and municipal financing during the 11 months of 1938, our figures disclose that last month's unusually heavy output served to increase the total awards for the entire period to no less than \$959,389,505. A breakdown of this figure shows that new capital issues amounted to \$846,399,575 as compared to \$112,989,930 for refunding. The grand output has already greatly exceeded the disposals in the full year of 1937, when the awards aggregated \$902,307,162. The November financing included the following issues of

The November financing included the following issues of \$1,000,000 or more:

S1,000,000 or more:
\$40,000,000 New York, N. Y., serial and special assessment bonds, comprising \$25,000,000 3s, due from 1939 to 1973 incl., and \$15,000,000 24s, maturing from 1940 to 1944 incl., were awarded to a large syndicate headed by the Chase National Bank of New York, at a price of 100,019, a net Interest cost of about 2.88%. The 3s were reoffered to yield from 0.50% to 3.15%, according to hmaturity, and the 2¼s from 1.10% 2.20%. Only other bidder at the sale, which was the third completed by the city in the present year, was a group managed by the National City Bank of New York.
25,000,000 Connecticut (State of) funding and building bonds, embracing \$6,250,000 114s due from 1939 to 1943 incl., and \$18,750,000 114s, due from 1939 to 1943 incl., and \$18,750,000 114s, due from 1939 to 1943 incl., and \$18,750,000 114s, due from 1939 to 1952 maturities to yield from 0.15% to 1.50%, according to rate and redemption date, and the balance at prices of 99, 98 and 97. This marked the State's first appearance in the long-term capital market for a great number of years and the issue in question represents its total funded debt.
24,432,000 Massachusetts (State of) bonds were sold as follows: \$19,-432 000 hypericane and flood damage issues. due years for a great number of years and the issue in question represents its total funded debt.

represents its total funded debt.
24,432,000 Massachusetts (State of) bonds were sold as follows: \$19,-432,000 hurricane and flood damage issues, due yearly from 1939 to 1943 incl., were purchased as 0.75 at 100.19, a basis of about 0.69%, by the Bankers Trust Co. of New York, which did not make any formal reoffering of the obligations. The remaining \$5,000,000 of borrowing was made up of the sale of that amount of Metropolitan additional water bonds to the First Boston Corp. of New York and associates as 2s, at 101.659, a basis of about 1.90%. These bonds, due \$200,-000 each year from 1944 to 1968 incl., were publicly offered on a yield basis of from 1.10% to 2%.

In the following we report the issues which failed of sale during November. List embraces 29 separate loans having an aggregate par value of \$10,248,200. Page number of 'Chronicle'' is given for reference purposes:

x Rate of interest was optional with the bidder. **a** State Supreme Court invali-dated bonds. **b** Postponement was caused by litization in connection with issue. New offering has been announced for Dec. 22—V. 147, p. 3497. **c** Bonds are being reoffered for sale on Dec. 13.

The recent month witnessed the disposal of quite a large number of temporary loans by States and municipalities, some of which were negotiated in anticipation of the sale at a later date of long-term bonds. This procedure was followed in order to permit municipalities which are par-ticipating in the PWA program to get projects in con-struction prior to Jan. 1, 1939, as stipulated in the legisla-tion governing Federal allotment of grants for such improve-ments. In these instances, various factors made it necessary to secure required funds on an interim basis rather than through immediate application to the long-term credit market. Then, too, other communities found it necessary to borrow on a temporary basis due to failure of tax collections to measure up to expectations, thus resulting in a shortage of funds to meet the year's budget requirements. In any event, short-term financing amounted to \$51,513,946, of which \$21,000,000 was accounted for by the City of New York. Interest rates on this type of credit continues to reflect the existence of a large supply of investable funds in the banks and other institutions. Teature of the Canadian municipal bond market during November was the public sale in the United States of \$40,-000,000 Dominion of Canada 3% bonds for refunding pur-poses. The issue was placed on the market by Morgan Stanley & Co., Inc., New York, and associates at a price of 97.25. The Government was paid a price of 95.25 for the loan which contains a maturity date of Nov. 15, 1968, although the bonds are callable in whole or in part at varying prices, depending on the date of redemption exercised by the Dominion. Aside from that transaction, which constituted The recent month witnessed the disposal of quite a large

Financial

the first Canadian municipal issue offered publicly in the United States since September, 1937, there were practically no other municipal issues of consequence, as shown in the fact that the total of Canadian municipal issues marketed in November was only \$41,831,867. Premier William Aber-hart indicated on Dec. 1 that the Province of Alberta will again default on its funded debt when he stated that, under present circumstances, the Government will not be able to meet a total of \$3,500,000 in bonds which mature during January, 1939. Mr. Aberhart disclosed that he again dis-cussed with Dominion officials the subject of arranging for a refunding of the total provincial funded debt of about \$160,000,000. No information concerning the conference was made public. There was no United States possession financing during November. Below we furnish a comparison of all various forms of obligations put out in November during the last five years: 1938. 1937 1936 1935 1934 Permiticans (IL S 1166 449 240 47 306 174 64 855 702 112 713 762 92 001 301

(New York City).	None	None	None	None	None
Bds of IT & Posses'ns	None	None	None	1.750.000	None

Total * Includes temporary securities issued by New York City: \$21,000,000 in Nov., 1938; \$24,200,000 in Nov., 1937; \$25,500,000 in Nov., 1936, \$25,600,000 in Nov., 1935, and \$50,900,000 in Nov., 1934.

1935, and \$50,900,000 in Nov., 1934. The number of municipalities emiting bonds and the number of separate issues made during November, 1938, were 497 and 601, respectively. This contrasts with 556 and 665 for October, 1938, and with 304 and 351 for November, 1937. For comparative purposes we add the following table, showing the aggregate of permanent loans, excluding Cana-dian and United States Possessions issues, for November and the 14 months for a series of verse.

\$1,000.11, \$1,002.00 per \$1,000.
\$1,000.

\$1,000. 114,000 City of Stamford, Jones County, Taxas, 4% water revenue bonds, The Ranson-Davidson Co., San Antonio, Texas, \$992.00 per

The Ranson-Davidson Co., San Antonio, Texas, \$992.00 per \$1,000.
 34,000 The City of Morgantown, Monongalia County, West Virginia, 4% incinerator revenue bonds, The First National Bank of Morgantown, Morgantown, W. Va., \$1,010.00 per \$1,000.

PUBLIC WORKS ADMINISTRATION

<section-header>

 PUBLIC WORKS ADMINISTRATION

 Report on Progress of Construction—We quote in part as follows from a press release (No. 3530), made public by the above federal agency on Dec. 5:

 The Public Works Administration has placed more than a billion dollars for the rederal agency on Dec. 5:

 The Public Works Administration has placed more than a billion dollars for the rederal agency on Dec. 5:

 The Sublic Works Administration has placed more than a billion dollars for down within the Public Works Administrator. A sublic Works Administration has placed more than a billion dollars for down within the place of works administrator. The sublic Works Administration has placed more than a billion dollars for down within the place of the sublic works administrator. A sublic Works Administration has placed more than a billion dollars for the works administration. A sublic works administration has placed more than a billion dollars for the work and the lass PWA Act public Works Administrator. A sublic Works Administration of the sublic dollars in the sublic dollars. This means that this vast volume was ender construction, creating jobs and causing the place within 129 working to \$200,000,000.

 Mathematic address construction, some 3,558 are non-Federal projects. The sublic Mole of San. 1, set by Congress, approaches. By that time, according the place approximately \$1,677,000,000 worth of work of projects was allowed the 1938 PWA Act on June 21, and allotments the allotted the first week. Approvale continued at the rate of around the allotted the first week. Approvale continued at the rate of around the sublic dollars approximately \$20,000,000 worth of projects are allotted the first week. Approvale continued at the rate of around the place of stele ingot projects cause in production in the market, week week approvale continued at the ra

News Items

Connecticut—New Edition of Municipal Financial Statistics Prepared—The 1938 edition of "Financial Sta-tistics of Connecticut Towns and Cities," a copyrighted booklet compiled and published by F. W. Horne & Co., Hartford, is now ready for distribution. The booklet gives the population, assessed valuation, indebtedness, tax rate, tax levy and tax collections of the 169 cities and towns in the State of Connecticut, as well as a brief account of the financial condition of the eight counties and the Metro-politan District of Hartford County. The supply of this edition is limited, and copies will be furnished only upon request.

Local Government Activities Surveyed—The Municipal Finance Officers Association has issued a study of the financial problems involved in the continual expansion of local govern-

Financial Chronicle

A balance must be achieved, the survey ment activities. points out, between the maintenance of public services and municipal financial resources. Only a qualified affirmative is given to this problem. Recognition of the difficulties is urged upon all concerned.

and it is argued that expenditures should be made as effective as possible, services should be curtailed where advisable, present revenue sources utilized to the fullest extent and new or additional revenues found.

New York, N. Y.—Relief Deficit of \$7,700,000 Seen—A deficit in relief financing of \$7,700,000 was predicted on Dec. 5 by Comptroller Joseph D. McGoldrick following an estimate by Welfare Commissioner William Hodson that \$79,000,000 would be needed for relief expenditures for the fixed was and for the second s

Stinkte by Weinare Commissioner Winnam Housin that
\$79,000,000 would be needed for relief expenditures for the fiscal year ending June 30, 1939.
The Comptroller has reported in a memorandum to members of the City Council that the maximum yield from the various emergency taxes would be \$71,300,000. Mr. McGoldrick's figures assumed the continuation of the tax upon cigarettes.
In a letter addressed to the Comptroller, Commissioner Hodson declared that the only possible variance he could see from the \$79,000,000 figure "would be upward."
"The probable reduction of Works Progress Administration employment would increase substantially the city's home relief case load," Mr. Hodson said. "The current Federal appropriation will carry the present WPA enrollment only to March 1, 1939, and there is every prospect of reduction at that time thus placing an additional burden upon the city."
The Comptroller's memorandum to the Councilment analyzed the estimated recipts for each of the emergency taxes and declared that during the fiscal year ended June 30, 1939, they would exceed by \$3,530,130 the recipts of the fiscal year ended June 30, 1937 hes shan the previous fiscal year.
Estimate Board Approves Capital Budget for 1939—The Board of Estimate adopted the 1939 capital outlay budget at a meeting held on Dec. 2, amounting to \$140,849,618.50, without curtailing the circumferential parkway funds.

book of the theorem is a second and provided the problem of the provided of the provided of the provided the continued in part as follows:

The Court, in an opinion by Chief Justice John W. Kephart, went even further than the ordinance, in proposing to City Council that it take steps to collect the tax "at the source," or by the employer from the pay envelope of the employee. The tax applies to 1938 incomes. The exemptions invalidated include the \$15 filling credit, which would have exempted all incomes of \$1,000 and under. The Court also held the tax is applicable to non-residents of Philadelphia who earn their iiving in the city, and disallowed exemptions to domestics employed in private homes, farm laborers and farmers selling their own produce in Philadelphia. The Board of Revision of Taxes, which will make the assessments, esti-mated today that 1,000,000 individuals will be affected. The Court also knocked out the provision of the ordinance that would have permitted home owners or tenants to deduct from their gross incomes the amount paid in taxes to the city on the properties in which they live. The opinion of Justice Kephart was given on a suit brought by the Com-mittee of Seventy, which challenged the constitutionality of the entire ordinance because of the exemption clauses. Argument was heard iast Friday. The ordinance, introduced in Council at the request of the Mayor more

The ordinance, introduced in Council at the request of the Mayor more than a year ago, and amended to make the impost 1½% instead of the original ½ of 1%, was passed finally by Council on Nov. 26. The Mayor signed it immediately.

Local Authority Also Upheld by Court—The con-stitutionality of the Philadelphia Authority, which was created as a means of obtaining money for municipal im-provements without additional borrowing by the city, was also upheld on the same date by the State Supreme Court. The judgment was rendered "on the express condition" that the city impose a contal charge for use of severe sufficient the city impose a rental charge for use of sewers sufficient to make the authority a self-liquidating project.

Bond Proposals and Negotiations ALABAMA

GADSDEN, Ala.—BOND OFFERING—Sealed bids^{*} will be received until 11 a. m. on Dec. 15, by H. C. Thomas, City Clerk, for the purchase of an issue of \$166,000 coupon public improvement bonds. Interest rate is not to exceed 5%, payable J-J. Dated Jan. 3, 1939. Denom. \$1,000. Due Jan. 3 as follows: \$16,000 in 1940 to 1948, and \$22,000 in 1949. Bidders to name a single rate of interest in a multiple of 1/10°. The bonds will be sold to the highest bidder, but no bid for less than par and accrued interest will be considered. Prin. and int. payable in lawful money at the Central Hanover Bank & Trust Co., New York. The full faith and credit of the city are pledged for the payment of the bonds and the interest thereon, and as security of the bonds and interest thereon, all the proceeds of the assess-ments that may be made by the City Commission against the property benefited by the improvements are pledged for the payment of the bonds. The legal opinion of Storey. Thorndike, Palmer & Dodge of Boston, will be furnished the purchaser. Enclose a certified check for \$1,000, payable to the City Clerk.

ALASKA

JUNEAU, Alaska—BOND OFFERING—Harry I. Lucas, Mayor, will receive sealed bids until 4 p. m. on Dec. 20, for the purchase of \$93,000 not to exceed 4% interest coupon or registered municipal improvement bonds, Dated Oct. 1, 1938. Denom. \$1,000. Due Oct. 1 as follows: \$3,000, 1939; \$4,000 from 1940 to 1944, incl. and \$5,000 from 1945 to 1958, incl. Bidder to name a single rate of interest, expressed in a multiple of ¥ of 1%. Principal and semi-annual interest payable at the First National Bank, Juneau. A certified check for 2% of the bonds must accompany each proposal. The bonds will be payable from unlimited ad valorem taxes on all of the city's taxable property. Total bonded debt of the city, including proposed issue, is \$289,000. Assessed value for taxation, 1938 appraisement,

\$5,921,559 at \$18 per \$1,000. Total tax levy for all purposes: 1935, \$97, 028.96: 1936, \$98,738.64; 1937, \$102,306.30. Uncollected delinquent tax, incl. 1937, \$7,068.96. Property assessed at 80% of value. Bond issue authorized at special election on Sept. 20, 1938.

REFSNES, ELY, BECK & CO.

BOND ISSUANCE UPHELD BY COURT—In connection with the above report we quote as follows from the Chicago "Journal of Commerce" of Nov. 30:
 "The Kentucky Court of Appeals has held unconstitutional that part of an Act of the 1936 General Assembly which provided that before any city is authorized to purchase, establish or operate an electric light, heat and power plant, the plan must be approved by a majority of the voters of the city. The decision was in the case of V. B. Booth against Owensboro. It affirmed the Daviess Circuit Court's ruling. The case involved issuance of \$1,300,000 bonds by the city to rehabilitate its municipally-owned electric light and power plant and water works, the proceeds of the bond issue to be supplemented by a grant of \$1,041,000 from the Federal Government. Issuance of the bonds was held valid by the Court.
 "The Court held the referendum provision of the provisions of an existing statute enabling cities of the third class to acquire or improve their electric plants."

plants." **RUSSELL, Ky.**—BONDS OFFERED TO PUBLIC—The Bankers Bond Co. of Louisville is offering for general investment a \$40,000 issue of $3\frac{4}{4}$ % coupon semi-annual public scool corporation bonds at prices to yield from 2.75 % to 3.75 %, according to maturity. Chronicle 3645 SOUTH SAINT PAUL, Minn.—BOND OFFERING—Seeled bids will be received until 7:30 p.m. on Dec. 22, by E. L. Sloan, City Recorder, for the purchase of a \$528.000 issue of coupon sewage treatment plant bonds. Interest rate is not to exceed 6%, payable F-A. Dated Aug. 1, 1938. Denom. \$1,000. Due Aug. 1 as follows: \$10,000 in 1941, \$11,000 in 1942, \$12,000 in 1943 and 1944, \$14,000 in 1945, and 1946, \$15,000 in 1947, \$16,000 in 1948 to 1950, \$17,000 in 1951 and 1952, \$18,000 in 1953 and 1944, \$19,000 in 1955 and 1956, \$20,000 in 1957 and 1958, \$21,000 in 1959, \$23,000 in 1960, and \$25,000 in 1961 to 1968. Bonds maturing in 1959, \$23,000 in 1960, and \$25,000 in 1961 to 1968. Bonds maturing in 1954 to 1968 to be redeemable after 30 days notice published in the official news-paper of the city at the option of the city on any interest payment date up to and including Aug. 1, 1948 at 102% of par, on any interest payment date from and after Aug. 1, 1948 to and including Aug. 1, 1958 at 101% of par and on any interest payment date from and after Aug. 1, 1958 at 101% of par and on any interest payment date from and after Aug. 1, 1958 to in multiples of 4 of 1%. Each bid may name one rate for part of the bonds (having the earliest maturities) and another rate for the balance, but no bid may name more than two rates, and each bidder must specify in his bid the amount of bonds of each rate. The bonds will be awarded to the bidder offering to purchase the bonds at the lowest interest: cost to the city, such cost to be determined by deducting the total amount of the premium bid from the aggregate amount of interest upon all the bonds until their respective maturities, disregarding any redeemable dates. No bid of less than par and accrued interest will be entertained. Bids are required on forms to be determined by the city. The city will furnish the approving opinion of Junell, Fletcher, Dorsey, Barker & Coman of Minneapolis, which opinion will be to the effect that such bonds are general obligations of the city. Enc

Due \$1,000 from Oct. 1, 1939 to 1956, incl. Int. payable A-O.
 CRAND ISLAND, Neb.—BONDS SOLD—It is reported that the following bonds aggregating \$135,000, have been purchased by the Kirkpatrick-Petits Co. of Omaha: \$100,000 city hall, and \$35,000 park bonds.
 KEARNEY, Neb.—BOND OFFERING—It is stated by Mrs. M. E. Burke, City Clerk, that she will receive sealed bids until 8 p.m. on Dec. 19 for the purchase of a \$50,000 issue of not to exceed 3% city hall, jail and firemen's building bonds. Denom. \$1,000. Dated about Jan. 10, 1939. Bonds to mature serially as follows: \$6,000 at the end of the second years after date of issue. Redeenable after three years from date of issuance. It is stated that an annual tax will be levied for the payment of interest and principal when due. The city is reported to have no debt, either bonded, special assessment or floating, and an assessed value of over \$6,250,000. A certified check for \$100 must accompany the bid.

assessment or floating, and an assessed value of over \$6,250,000. A certi-ried check for \$100 must accompany the bid. **NEBRASKA**, **State of** *—MARKETING OF MUNICIPAL UTILITY DISTRICT ISSUE EXPECTED*—The "Wall Street Journal" of Dec. 6 carried the following report: "Unless there is a hitch in plans now nearing completion, the first of the new utility district offering will be made within the next week when approxi-mately \$26,500,000 of Nebraska public power district issues are marketed. Bancamerica-Blair Corp. is expected to manage the offering syndicate. "The issue will probably consist of two district issues of which \$21,500,000 will be for one and \$5,000,000 for the other. The bonds will be revenue obligations, payable from receipts of the utility districts. "The Public Works Administration last week permitted amendments to the indentures securing PWA loans for the two Nebraska public power districts, which makes way for the sale of securities to private bankers. "Proceeds of the bond offering will be used for the purchase of properties of private utility systems now operating in the territory. It is estimated that the ultimate cost of these systems may exceed \$80,000,000. The district involved are the Central Nebraska Public Power and Irrigation District and the Loup River Public Power District. "Those close to the financing negotiations say that the prices offered to the private companies represent fair values and no attempt has been made to absorb them at condemnation prices. For this reason, it is anticipated that the various entities will have little objection to merging their properties with the district. "Successful consolidation of the various Nebraska companies into the district will establish the first non-competitive publicly owned State-wide power grid system in the United States." **WINSIDE, Neb.**—BOND SALE DETAILS—It is reported by the Village

WINSIDE, Neb.—BOND SALE DETAILS—It is reported by the Village lerk that the \$12,000 3% semi-ann. auditorium bonds purchased by the /inside State Bank, at par, as noted here—V, 147, p. 3494—are due in Clerk that Winside 10_years.

Sev-eral changes have been made in the particulars of the issue.—V. 147, p. 3052.) NEW YORK. N. Y.—MUNICIPAL DEBT WELL SECURED—From the

(1) It is use was originally oriered Nov. 1s and the safe Dostponed. Several changes have been made in the particulars of the issue.—V. 147, p. 3052.)
NEW YORK, N. Y.—MUNICIPAL DEBT WELL SECURED—From a consideration of the taxable resources, the debt burden and the taxes required to support debt and operating costs, together with due attention to propective operations under the new tity charter and provisions of the constitution, recently amended, and after giving consideration to the additional debt incurred in connecton with transit unfication, there is apparently good reason for confidence in the ability of New York City to deal with its financial obligations on a satisfactory basis, according to John S. Linen, 2nd Vice-President of the Chase National Bank, in an address before the monthly meeting of the New York State Savings Bank Bond men on "The Security Position of New York City Bonds."
"The taxable resources are of great variety and ample to support the debt permitted under the constitution," Mr. Linen said. "The limitations on debt are definite and effective. Operations from a budgetary and fiscal standpoint have been sound, with short term borrowing and tax collections showing an improving trend. Relief has been carried without any undue strain or endangering of the current position and the city has performed a noteworthy accomplishment in this connection which compares favorable with any city in the country. The new city charter and constitutional metals provisions, while raising certain questions which will have to be deali with, such as transit unflication and pension requirements, are constructive and assure operating policies on a basically sound foundation. In comparison with other large cites, the debt burden and tax burden are reasonable in relation to resources and with constitutional influences applying, they must remain so. All in all, the holder of New York City obligations is at present well secured. Constitutional and tegistative provisions provide unusual protecions as

bolds to the chase National Bank of New York and associates.—v. 147, p. 3495.

ASKS BLDS ON \$1,800,000 COUNTY PARKWAY BONDS—H. A. Mulli-gan, Treasurer of the Reconstruction Finance Corporation, will receive sealed bids at his office in Washington until noon on Dec. 12 for the purchase of \$1,800,000 not to exceed 4% interest coupon or registered cross county parkway revenue bonds. They are to be issued by the county for the purpose of \$1,800,000 not to exceed 4% interest coupon or registered cross county parkway revenue bonds. They are to be issued by the county for the purpose of providing funds to pay the cost of a revenue-producing parkway under-taking, consisting of the construction, reconstruction, improvement, better-ment and extension of the Cross County Parkway from the vicinity of "Fleetwod" in the City of Mount Vernon to the intersection with the Saw Mill River Parkway in the City of Yonkers with viaducts, bridges, ap-proaches and connections. Bonds will be in denom. of \$1,000 in coupon form, registerable as to principal only, or exchangeable for fully registered bonds, and will bear the rate of interest (payable semi-annually commencing June 1, 1939) named in the bid accepted. They will be dated Dec. 1, 1938,

CAROMICLE Dec. 10, 1938 and mature on Dec. 1, 1950. The county is to reserve the right to redeem the bonds before maturity at its option on any interest payment date on or after Dec. 1, 1941, but not prior thereto, upon payment of par, accrued interest, and a premium equal to ¼ of 1% for each year or fraction thereof from the date of redemption to the date of maturity. Both principal and interest will be payable at the office of the County Treasurer, in any coin or currency of the United States of America which at the time of payment is legal tender for the pyament of public and private debts. Bilders are to mame the rate of interest which said bonds shall bear, not exceeding 4% per annum. The rate named may be either a multiple of 1-8th of 1% or a multiple of 1-20th (.05) of 1%. All bilders shall offer to pay exactly 102 and accrued interest for said bonds. The bonds will be approved as to legality by Hawkins, Delafield & Long-fellow of New York City. They will be payable solely from revenues of the projected parkway and will in no sense constitute an indebtedness of the sold on the condition that the successful bidder will not expressly or by implication indicate to anyone that RFC, or the United States of America, or any agency thereof, has any obligation or responsibility whatsoever with respect to such bonds, or refer to or use the name of the RFC, or the United States of America or any agency thereof, as an inducement to anyone to purchase any of said bonds.

purchase any of said bonds. WYOMING COUNTY (P. O. Warsaw), N. Y.—BOND OFFERING— Charles B. Smallwood, County Treasurer, will receive sealed bids until 11 a.m. on Dec. 16 for the purchase of \$48,000 not to exceed 4% interest coupon or registered refunding bonds. Dated Dec. 1, 1938. Denom. \$1,000. Due \$24,000 on Dec. 1 in 1949 and 1950. Bidder to name a single rate of interest, expressed in a multiple of ¼ or 1-10th of 1%. Prin-cipal and interest (J-D) payable at the Wyoming County Bank & Trust Co., Warsaw, with New York exhcange. The bonds are general obliga-tions of the county, payable form unlimited taxes. A certified check for \$960, payable to order of the county is required. Legal opinion of Dillon, Vandewater & Moore of New York City will be furnished the successful bidder.

C.—BOND OFFERING—Sealed bids will be received until 11 a. m. on Dec. 13, by W. E. Easterling, Secretary of the Local Government Commission, at his office in Raleigh, for the pur-chase of a \$48,000 issue of coupon refunding bonds. Interest rate is not to exceed 6%, payable J-D. Dated Dec. 1, 1938, maturing on Dec. 1, \$12,000, 1945 to 1948, incl. without option of prior payment. There will be no auction. Denom. \$1,000; not registerable; prin. and int. (J-D) payable in lawful money in New York City; general obligations; unlimited tax; delivery at place of purchaser's choice. Bidders are requested to name the interest rate or rates in multiples of 4% of 1%. Each bid may name one rate for part of the bonds (having the earliest maturities) and another rate for the balance, but no bid may name more than two rates, and each bidder must specify in his bid the amount of bonds of each rate. The bonds will be awarded to the bidder offering to purchase the bonds at the lowest interest cost to the town, such cost to edetermined by deducting the total amount of the premium bid from the aggregate amount of interest upon all of the bonds until their respective maturities. No bid of less than par and accrued interest will be enter-tained. Bids must be accompanied by a certified check upon an incor-porated bank or trust company, payable unconditionally to the order of the State Treasurer for \$960. The approving opinion of Storey, Thorndike, Palmer and Dodge, Boston, will be furnished the purchaser. **ROBESON COUNTY (P. O. Lumberton), N. C.**

PUERTO RICO

Descrive the description of t

of the Revenue Act of 1936, the term "kross income" does not include the following, which shall be exempt under that title (4) interest upon (c) obli-gations of the United States or its Possessions. Unless otherwise stated in the bid, each bid will be understood as being for all or any part of the bonds appled for. If the bid makes no mention of accrued interest, it will be understood that accrued interest from Dec. 1, 1938, to date of delivery, is offered by the bidder in addition to the price named for the bonds. If any bidder fails to make payment of the purchase price of bonds awarded to him, at the time and at the place designated by the Division of repritories and Island Possessions for such payment, he will forfeit all right to such bonds and to the check accompanying his bid. Accepted subscriptions will be payable on Dec. 21, 1938 at a bank in New York City to be designated by the Division of Territories and Island Possessions, Interior Department, and the bank so designated will make delivery of Interim certificates, which will be exchangeable for the definitive bonds at the office of the Secretary of the Treasury, Division of Loans and Currency, Washington, D. C., as soon as the bonds can be prepared.

SOUTH CAROLINA

SOUTH CAROLINA SPARTANBURG COUNTY (P. O. Spartanburg), S. C.—BOND OFFERING—Sealed bids will be received until 11 a. m. on Dec. 19 by R. H. Ashmore, Clerk of the County Board, for the purchase of an issue of \$125,000 coupon road improvement, Series C. bonds. Denom, \$1,000. Dated Dec. 1, 1938. Due on Dec. 1 as follows: \$10,000 from 1939 to 1943 and \$15,000 from 1944 to 1948, all inclusive. Coupon bonds, registerable as to principal only. Prin, and int. (J-D) payable in New York. The bonds are to be issued pursuant to Act No. 611 of the Acts of 1937 of south Carolina, as amended. The Act authorizes the county to issue not exceeding \$500,000 of bonds. So much as is necessary of the gasoline tax distributed by the State of South Carolina to the county during the life of the bonds and for such period thereafter as may be necessary to pay the bonds is pledged to and required to be used and applied to the payment of such principal and interest. However, if, for any reason whatsoever, such gasoline tax is insufficient or unavailable for the prompt payment of the bonds issued pursuant to said Act as amended, and the interest thereon, as they severally mature, then there is pledged in addition to the revenue from such gasoline tax distributed to the county, the full faith and credit of the poonty and there must be levied annually upon all the taxable property in the county a sum sufficient to pay such principal and interest as they respectively mature. Bidders are invited to name the rate of interest which the bonds are to bear. The rate must be a multiple of ½ of 1%, must not exceed 4%, and must be the same for all of the bonds. The bonds will be awarded to ne bidder offering to take them at the lowest rate of interest, at a price not preserved bidder will be furnished with the opinion of Reed, Hoyt, Wash-burn & Clay of N. Y. City that the bonds are valid and binding obligations of Spartanburg County. A certified check, payable to the order of the budder offering to take them at the lowest rate of interest, at a price n

HONEY GROVE INDEPENDENT SCHOOL DISTRICT (P. O. Honey Grove), Texas-BONDS SOLD—It is reported by the Superin-tendent of Schools that \$35,000 building bonds have been purchased by the State Treasurer's Department.

State Treasurer's Department. HUNTSVILLE INDEPENDENT SCHOOL DIS1 KIC1 (P. O. Hunts-ville), Texas-BOND SOLD-It is stated by the Superintendent of Schools that \$10,000 building bonds have been sold locally. LAMPASAS, Texas-BOND OFFERING-It is stated by E. B. Moody, City Secretary, that he will receive sealed bids until 7 p. m. on Dec. 20 for the purchase of an issue of \$100,000 electric system revenue bonds. Dated Dec. 15, 1938. Denom. \$1,000. Due Dec. 15 as follows: \$3,000

3032 Financial In 1941 to 1945, \$4,000 in 1946 to 1950, \$5,000 in 1951 to 1960, and \$15,000 in 1961. Because of the various courses which may be pursued the amount of bonds required to be issued is at this time wncertain. Therefore bidders are requested to submit bids on amounts as follows: from \$50,000 to \$60,000, from \$60,000 to \$75,000, and from \$75,000 to \$100,000. If an amount less than \$100,000 is issued the amount maturing in each of the years set above will be reduced in approximately the same proportion as the amount of the issue is reduced. The base bid in each instance should be for bonds without option of redemption alternate bids should be sub-mitted on (a) bonds with option of redemption in numerical order after 10 years from date, and (b) on bonds callable at any time after date in reverse numerical order beginning with those last maturing. It is the intention of the city to sell the bonds at the lowest interest cost that will bring a price of approximately but not less than par and accrued inter-est. Bidders are required to name the rate or combination of two rates for each issue with their bid which is closest to par and accrued inter-est. Bidders are required to name the rate or combination of two rates first lien on and pledge of the revenues of the city's proposed electric light and power distribution system. No part of the principal or interest will be payable out of funds raised by taxation. The city will furnish the printed bonds, a copy of the legal proceedings, the approving opinion of Gibson & Gibson of Austin or of Chapman & Cutler of Chicago, and will deliver the bonds to the bank designated, all without cost to the purchaser. Enclose a certified check for 2% of the amount of bonds proposed to be purchased. **LUBBOCK INDEPENDENT SCHOOL DISTRICT (P. O. Lubbock)**

as 3%s and 3%s. Due in from two to 20 years after date of issue.
 WASHINGTON, State of --POWER DISTRICTS ACT TO ABSORB PRIVATE UNITS--A special dispatch from Seattle to the "Wall Street Journal" of Dec. 2 reported in part as follows:
 First transfers of private power properties to public ownership under the place during the next few weeks as negotiations in the southwestern part of the State of Washington's public utility district law now appear likely to take place during the next few weeks as negotiations in the southwestern part of the State of Power and Willips Electric (Federal Light & Traction).
 Agreement on purchase price for the properties of West Coast Power Co. (Peoples Light & Power) and Willips Electric (Federal Light & Traction).
 Agreement on purchase price for the properties of West Coast Power has been reached, and preliminary agreement is understood to have been made on the price of Willips properties. Efforts are being made to con-summate both deals at the same time in order to market a single revenue bond issue to cover both purchases in the three counties.
 At the present time, engineers representing the investment group con-templating underwriting of the bond issue are engaged in analysis of district representations. Their reports are expected to be completed shortly and if satisfactory will clear the way for consummation of the purchases within the next month.

the next month.
