MOBILE AND OHIO RAILROAD COMPANY

Refunding and Improvement Mortgage Bonds 41/2 % Series due 1977 5% Secured Gold Notes due September 1, 1938 Montgomery Division First Mortgage 5% Bonds due 1947

FORECLOSURE SALE OF THE MOBILE AND OHIO RAILROAD PROPERTIES HAS BEEN ORDERED TO BE HELD AT MOBILE, ALABAMA, ON AUGUST 1, 1940. Upset prices have been set by the Court. All bonds favoring the Reorganization and Consolidation Plan should be deposited with The New York Trust Company, Depositary, New York, N. Y., NOT LATER THAN JULY 25, 1940.

Under equity receivership only those bonds deposited under the Plan are entitled to obtain the new securities. The only alternative is to receive in cash the distributive share of the proceeds of sale. Although the exact amount thus to be paid to non-assenting bonds cannot be determined prior to the completion of the sale, the Reorganization Committee estimates that upon the basis of upset prices already fixed by the Court the amount applicable to the securities involved will not exceed approximately \$182.00 per \$1,000 Refunding and Improvement 4½% Bond due 1977; \$218.00 per \$1,000 5% Secured Note due 1938; and \$163.00 per \$1,000 Montgomery Division First Mortgage 5% Bond due 1947.

Bondholders who have not already deposited their securities should obtain Letters of Transmittal and copies of the Plan of Reorganization immediately from The New York Trust Company, New York, N. Y., or Mr. John E. Morrison, Sr., Committee Representative, 20 Pine Street, New York, N. Y., telephone WHitehall 3-7474.

NOTICE

REDEMPTION

TEXAS CORPORATION THE

(A DELAWARE CORPORATION)

31/2% DEBENTURES, DUE JUNE 15, 1951

NOTICE IS HEREBY GIVEN that, pursuant to the provisions of Article Third of the Indenture dated as of June 15, 1936, entered into by and between The Texas Corporation (a Delaware corporation) and Central Hanover Bank and Trust Company, as Trustee, The Texas Corporation has elected to redeem and pay, and will redeem and pay, on August 12, 1940, all its 3½% Debentures, due June 15, 1951, now outstanding under said Indenture, at the following redemption price, to wit: 103% of the principal amount thereof, together with interest on the principal accrued and unpaid to August 12, 1940. interest on the principal accrued and unpaid to August 12, 1940.

Said Debentures are required to be presented and surrendered on the redemption date for redemption and payment as aforesaid, at the principal office of Central Hanover Bank and Trust Company, in the Borough of Manhattan, The City of New York, at 70 Broadway, New York, New York, or at the office of Continental Illinois National Bank and Trust Company of Chicago, at 231 South La Salle Street, Chicago, Illinois. Bank and Trust Chicago, Illinois.

Coupon Debentures presented and surrendered for redemption and payment must have attached all appurtenant coupons maturing after August 12, 1940. Registered Debentures without coupons, and coupon Debentures registered as to principal, presented and surrendered for redemption and payment must be accompanied by instruments of transfer satisfactory to The Texas Corporation, executed in blank.

From and after August 12, 1940, interest on said Debentures will cease. Coupons, appertaining to said Debentures, which mature subsequent to August 12, 1940, will be of no force or effect.

THE TEXAS CORPORATION

Dated: July 12, 1940.

By L. H. LINDEMAN, Treasurer.

Additional Notice

All of The Texas Corporation's 3½% Debentures, due June 15, 1951, have been called for redemption on August 12, 1940, as appears from the foregoing notice.

At any time prior to August 12, 1940, holders of said Debentures may at their option present and surrender said Debentures, in the manner and at either of the offices specified in said notice, and receive the full redemption price, including interest on the principal accrued and unpaid to August 12, 1940.

THE TEXAS CORPORATION

Dated: July 12, 1940.

By L. H. LINDEMAN, Treasurer.

Estates Need X-Rays, Too!

No one disputes the wisdom of a regular physical check-up. It has become an accepted fact that it's easier and more economical to stay well than to get well.

It's becoming increasingly popular, too, for men of means to review their affairs frequently to X-Ray their estates and subject their plans to a searching check-up. For with taxes rising, with investment yields low, and with the constantly changing income needs of the family, no man can be sure that the plan he made two, five, or ten years ago is the best arrangement today!

The Massachusetts Mutual will help you organize your own estate clinic! One of our seasoned men, working with your lawyer, your trust officer, and your accountant can assist you in minimizing taxes, avoiding unnecessary depreciation, and arranging a flexible plan of distribution which will save you time and worry now, and save your family money later on.

Here's a question affecting tomorrow which should be answered today. Surely it is worth investigating.

The Financial Situation

WHATEVER hopes may have existed that the approaching political campaign might bring a clarification of our thinking about our foreign relations and a joining of issues bearing upon our attitude toward the course of events in Europe appear to be fading. The President's reiteration of his "belief" that we shall not be drawn into war and his flat statement on July 10 that "we will not send our men to take part in European

wars" seem to have taken the wind from the sails of those elements within his party which had been threatening definite rebellion on the ground that their party was fast becoming, if it had not already become, a "war party." Meanwhile the Republicans in Philadelphia, partly in the interest of harmony and partly under pressure of influentially placed interventionists among their own leaders, finally gave up the idea of saving anything of consequence concerning our attitude toward the war in Europe, contenting themselves with a vague pronouncement which appears to embody the essence of the position of the Roosevelt Administration but without even the assurances about sending soldiers to take part in European wars. The Republican nominee, likewise, is unfortunately on record, so far as he has committed himself, as favoring a policy which in its general aspects at least is difficult to distinguish from that of the present Washington regime.

Here is a situation most deeply to be deplored. It is indeed one which must somehow be rectified if we are not to persist

in running the most serious risk of reaping a whirlwind of unpleasant consequences. Only the mentally indolent or those whose emotions prevent dispassionate thought can possibly find much encouragement from such alleged assurances as those contained in "we-will-not-send-our-men-to-take-partin-European-wars" phrases, especially when such assertions are coupled with pronouncements made ominous by a long chain of other official utterances with which no Washington outgivings can be disassociated. The President, for example, also said in his July 10 message that "the people and their

representatives in the Congress know that the threats to our liberties, the threats to our security, the threats against our way of life, the threats to our institutions of religion, of democracy, and of international good faith, have increased in number and gravity from month to month, from week to week, and almost from day to day." Assign any meaning to such prases and we, of course, must find a stubborn insistence upon what John Basset

Moore two and a half years ago styled "the same adroit and skilfully disguised propaganda which, with the aid of the romantic but tricky philos-ophy of the war 'to end war' and 'to make the world safe for democracy,' once before proved to be so effective," and which he observed was "again in full flood and, with an even more varied, more extensive and more passionate combination of forces, apparently tiding the country to a new immolation."

This is obviously not the road to peace, and so long as we travel this route it is idle, or worse, to talk of determination not to send our men to take part in European wars. That this trend of policy on the part of The Administration, and for that matter, supported by many influential non-democratic elements, is not new, hastily conceived, or ephemeral, is easily demonstrated. was not far from three years ago when the President in Chicago made his widely publicized "quarantine" address—and not long after received from Governor Landon renewed assurance of full support of his foreign policies. Upon the occasion of the

Landon telegram of such repeated assurance, the "Chronicle" said:

"The reply which President Roosevelt made on Tuesday to the telegram in which Governor Landon, of Kansas, renewed the pledge which he had given a year ago of support for the President's foreign policy, is a somewhat disturbing document. 'I believe,' Mr. Roosevelt wrote, 'that the overwhelming majority of our countrymen, regardless of politics, race, creed or color, from the days of Washington to this hour, have desired to pursue the even tenor of their way at peace with all nations and all peo-

Information Wanted

At the beginning of September the storm broke, and on the twenty-first of that month, in a message to the extraordinary session of the Congress, I said that this Government must lose no time or effort to keep this nation from being drawn into the war, and I asserted my belief that we would succeed in these efforts. We have succeeded. I believe we shall continue to succeed.

That we are opposed to war is known not only to every American, but to every government in the world. We will not use our arms in a war of aggression; we will not send our men to take part in European wars.—The President of the United States.

Whatever may be the motive of President At the beginning of September the storm

Whatever may be the motive of President

Whatever may be the motive of President Roosevelt in reiterating these assurances at this particular moment, it is beyond question that they have the approval of a vast majority of the citizens of this country.

They, however, leave the average man in the dark concerning the necessity, if such there is, for some of the items in the vast national defense program that has been launched—or perhaps is being launched—under the President's auspices.

Cheek by jowl with these assurances contained in the special message of July 10 are demands for huge sums of money "to complete the total equipment for a land force of

demands for huge sums of money "to complete the total equipment for a land force of approximately 1,200,000 men . . . to procure reserve stocks of tanks, guns, artillery, ammunition, &c., for another 800,000 men or a total of 2,000,000 men . . . to provide for manufacturing facilities, public and private, necessary to produce critical items of equipment required for a land force of 2,000,000 men. . . "

In addition, the President refers with every appearance of approval to the plan now before Congress for "the enactment of a system of selective training for developing the necessary man power to operate this material and man power to fill army noncombat needs."

What the average man would like to know

What the average man would like to know is this. If we are really to confine our military activities to the defense of the United States or even of the Americas from European

States or even of the Americas from European or Asiatic aggression what would an army of 2,000,000 men fully equipped according to modern standards be called up on to do?

There may be sound military reasons for such a land force, but they certainly have not been disclosed. After all, this is a democracy and it is the people who must bear the burdens necessarily imposed by such a program. such a program.

ples. But throughout our long history we Americans have rejected every suggestion that ultimate security can be assurred by closing our eyes to the fact that, whether we like it or not, we are a part of a large world of other nations and peoples. As such we owe some measure of cooperation and even leadership in maintaining standards of conduct helpful to the ultimate goal of general peace.'

"Mr. Roosevelt has not always been happy in his references to American history, and his interpretation of the attitude of the American people toward war and international cooperation needs qualification. Outside of New England, the country clamored for war with England in 1812. The West and South were all for war with Mexico, in 1845, in a quarrel which the United States had sedulously nourished, and a declaration of war against Spain, in 1898, which could have been avoided if President McKinley had chosen to do so, was enthusiastically supported. Undoubtedly the American people have desired to live at peace with all the world, but they have been peculiarly sensitive to incidents that seemed to carry an affront to American dignity or prestige. Being an intelligent people, they have also never forgotten that there are other nations and peoples, and that certain relations with them were, accordingly, inevitable, but not until the Wilson philosphy of internationalism took temporary possession of the public mind have they felt that the United States had a mission of 'cooperation and even leadership in maintaining standards of conduct helpful to the ultimate goal of general peace.' The sense of mission which President Wilson implanted, moreover, hardly survived the World War, and the experiences of attempted cooperation since 1919 have not encouraged its revival.

"Mr. Roosevelt's reply, in short, harks back to the aggressive ideas that permeated his Chicago speech (popularly known as his "quarantine" pronouncement). What was said at that time was clothed in rather vague language, and the collapse of the Brussels Conference did not help to clarify it, but the impression was nevertheless given that certain nations, among them the United States, ought to cooperate in dealing with conduct by other nations which, in their judgment, endangered civil as well as political rights and contravened the obligations of international law.

"It is the intrusion of this idea, and of others closely related to it, that tends to aggravate the present controversy with Japan and threatens to embarrass American foreign policy generally."

Embarrassed Foreign Policy

It still embarrasses our foreign policy, and now even more than then threatens at one time or another to plunge us into a European war regardless of whether or not we at this time resolve to send no men to engage in such wars. As is well known to all men, the President, up to the day the flood burst upon Europe last autumn, from time to time as occasion arose or as the occasion was created made it clear that he had in no way altered his ideas on this subject. Throughout this whole period while Mr. Chamberlain was endeavoring to avoid war by appeasement the President seemed to be intent upon preventing war by bluster. When war nonetheless came and it was evident that both he and Mr. Cham-

berlain had failed, there was a period of somewhat greater caution in utterance in Washington, but impulse soon overcame prudence and discretion. The measures-short-of-war doctrine as a means of preventing wars of aggression was quickly converted into a measures-short-of-war aid for the Allies as a matter of defense for the United States which in ways rarely specified was seen to be in mortal danger. But about one more step is required to reach the idea that a siege of Berlin is necessary to protect Washington. Bluster had failed to prevent war; now bluff must be used to help the Allies to defeat the aggressors. We would not send an army, which we did not in any case have, or the navy which was not needed, but material. It soon developed, as must all along have been well known to the aggressors, that we had no material of any substantial account, so the bluff was no more effective than the bluster.

But we have not only failed to prevent war and, once war came, to give effective aid to those opposing the aggresors. We have failed to maintain a position which is conducive to living at peace with the victors. When the President of the United States cables the King of Belgium that "the cruel invasion by force of arms of the independent nations of Belgium, Netherlands and Luxemburg has shocked and angered the people of the United States and, I feel sure, their neighbors in the Western Hemisphere," and makes the cable public, the message is received in Berlin about as quickly as it is in Brussels. When he cables the Premier of France that "making every possible effort under present conditions, the Government of the United States has made it possible for the Allied armies to obtain during the weeks that have just passed airplanes, artillery and munitions of many kinds and . . . this Government, so long as the Allied Governments continue to resist, will redouble its efforts in this direction," we can scarcely expect the Government of Germany to remain long in ignorance or quickly to forget the fact.

A Dangerous Dagger

To be sure we do not expect a nation (with whom we are nominally, at least, at peace) to feel well disposed toward us when the head of our Government refers to one of its acts, no matter what we as citizens may think of the deed, by asserting that "the hand that held the dagger has struck it into the back of its neighbor." The subterfuges to which our Government has resorted in order to evade the plain mandate of international law in giving aid to the Allies are of course known and read of all men. We have not yet declared war upon Germany or Italy. There has been no occasion or even excuse for it. No credit can, therefore, be claimed by any one in this country for the fact that we are not now at war. It is obvious, however, that should we continue our present line of policy and should England prove able to stand against the expected attack for a substantial period the danger of our finding an occasion for joining the conflict will be far from negligible regardless of vague assurances to the contrary, or apparently to the contrary, now given. Should Great Britain not be able to hold the fort we shall inevitably find ourselves in a position of being obliged either to go to battle with the aggressors or of living at peace with them. should be prepared to do neither.

A New Administration Essential

Hope for finding a feasible route out of the maze in which our ill-devised foreign policies has placed us lies almost wholly in a change of Administration in Washington. It is difficult indeed to see how Mr. Roosevelt, or any man under his influence, as an occupant of the White House could in the existing circumstances accomplish the feat. But a new Administration free of Rooseveltian domination or influence and not committed to essentially the same internationalism is essential. Despite some indiscretions in the past, an opportunity for at least getting a better start lies before Mr. Willkie. He should lose no time in taking advantage of it. He cannot afford to wait until after the elections, and certainly he cannot afford any further interventionist indiscretions.

The ultimate decision, however, rests with the people. They must undertake some sober and realistic thinking about all these matters. They, least of all, can afford to permit themselves to be lulled into slumber by soft words or glib assurances. Most important of all, perhaps, they must shake off the defeatism which leads them, or many of them, into the fatalistic attitude that we shall in any event sooner or later become embroiled.

Federal Reserve Bank Statement

FFICIAL banking statistics reveal, this week, a further increase in the monetary gold stocks of the United States, and in the idle credit resources which are a direct accompaniment of that sharp and steady advance. The increase of the monetary gold holdings in the week to July 10 amounted to \$103,-000,000, which raised the aggregate to \$20,166,-000,000. The impact of the gold advance on the credit situation was counteracted, to a degree, by increases of United States Treasury, foreign bank and other deposits with the 12 Federal Reserve banks. Currency in circulation, on the other hand, fell \$40,000,000 to \$7,884,000,000, owing to the return to the banks of hand-to-hand money required over the Independence Day holiday period. The net result was a modest increase of member bank reserve balances, and a gain of excess reserves over legal requirements by \$20,000,000, to a new record of \$6,830,000,000. Demand for credit accommodation remains small, despite the vast total of idle credit and the low money rates current under the official policies being pursued at Washington. New York City weekly reporting member banks experienced an increase of business loans in the week to July 10 by \$2,000,000, which raised the total of such advances to \$1,714,000,000. Loans by the same banks to brokers and dealers on security collateral were up \$3,000,000 to \$265,000,000, this being the first advance in a number of weeks.

The condition statement of the 12 Federal Reserve banks, combined, indicates that open market operations were in suspense, as the holdings of United States Treasury securities remained unchanged at \$2,449,928,000. The Treasury in Washington deposited \$104,001,000 gold certificates with the regional institutions, raising their total holdings to \$17,944,476,000. Other cash of the Federal Reserve banks advanced because of the return of currency from circulation, and total reserves thus increased \$125,986,000 to \$18,315,571,000. Federal Reserve notes in actual circulation moved lower by \$15,-

374,000 to \$5,232,463,000. Total deposits with the regional banks advanced \$132,171,000 to \$15,35,601,000, with the account variations consisting of an increase of member bank reserve deposits by \$27,714,000 to \$13,764,343,000; an increase of the Treasury general account balance by \$75,981,000 to \$297,428,000; an increase of foreign bank deposits by \$11,750,000 to \$765,082,000, and an increase of other deposits by \$16,726,000 to \$508,748,000. The reserve ratio improved to 89.0% from 88.9%. Discounts by the regional banks were down \$144,000 to \$2,004,000. Industrial advances fell \$33,000 to \$9,153,000, while commitments to make such advances were lower by \$18,000 at \$8,682,000.

Government Cotton Report

OTTON plantings this year have been on about the same reduced scale as in the two years previous, according to the report of the Department of Agriculture of cotton in cultivation July 1. This year's figure of 25,077,000 acres is only slightly greater than the 1939 area of 24,683,000 acres and the 1938 area of 25,018,000 acres; consequently, as in those years, plantings this year are markedly below 1937 and the ten-year (1929 to 1938) average of 34,929,000 acres. Whether as in 1939 and 1938, greater than average yields will compensate for a large measure of the acreage deficiency in calculating actual output remains to be seen. No official estimate of yield or output will be issued, as usual, for another month, but one private authority who has issued a figure expects a considerable reduction in yield this year. His figure of 208 pounds per acre for 1940 compares with 237.9 in 1939 and 235.8 pounds in 1938. Yields in recent years have been exceptionally great and a yield of 208 pounds would be large compared with the ten-year (1929 to 1938) average of 198.0 pounds. Nevertheless it would provide, on the basis of this year's seedings, less than 10,500,000 bales in comparison with 11,817,000 bales in 1939 and a ten-year (1929 to 1938) average of 13,547,000 bales. If however this year's production conforms to the high average yield of the past five years, a different result would obtain for on that basis production would approximate 11,250,000

Whatever the production however there will be no shortage of American cotton in the coming season, for the carryover on July 31 in the United States is not likely to be more than 2,000,000 bales lower than a year earlier when no less than 12,956,-000 bales were on hand, the largest for the date on record. What the situation with respect to world carryover of American cotton at the end of the current season may be is impossible to say in the absence of figures since the war started in Europe. The world carryover as of July 31, 1939 was about 15,152,000 bales and may be as great next July 31. A reduction in domestic carryover does not necessarily signify one in the world figure for domestic stocks are reduced by exports, but the exported staple remains in the world figure until actually consumed.

It seems likely at this juncture that domestic supplies of cotton during the coming season will aggregate 21,000,000 bales or more. On the basis of the ten months figures it seems likely that domestic consumption in the current crop year will amount to about 7,500,000 bales and exports to about

6,500,000 bales. How closely these figures may be duplicated next year depends on too many major uncertainties to permit any estimate, but exports at least are more likely to be smaller than larger.

Business Failures in June

Business failures in June pursued their seasonally downward course numbering 1,114 with \$13,734,000 liabilities in comparison with 1,238 involving \$13,068,000 liabilities in May. The decline from May to June last year was more marked and consequently last month's failures did not show as substantial a reduction from a year ago as did last May's figures. In fact, the decrease from June 1939, when 1,119 firms failed for \$12,581,000, amounted to less than a half of a percent, and represented the poorest showing of any month this year. In previous months the percentage drop, on a year-to-year basis, has ranged from as much as 21% in January down to 3% in April. The amounts of liabilities which the failures involve from month to month rarely move in just the same proportion, up or down, as do the insolvencies with which they are associated. June's liabilities, however, did not show any decline but were greater than those for both May and June 1939.

The results for the six months of the current year compare more favorably with last year, the 7,119 failures in the period being about 10% fewer than the 7,875 in the first half of 1939. In the first half of the current year liabilities involved totaled \$83,-481,000 17% less than the \$100,431,000 of a year

In the breakdown of the figures by commercial groups it is shown that of the five divisions, three had more failures than last year and two, fewer. The inconsistency of the liabilities trend is shown here by the fact that liabilities were smaller in two of the groups having a larger number of failures, and greater in the other three. There were 113 wholesale failures involving \$1,383,000 liabilities, in comparison with 105 involving \$1,695,000 a year ago. In the construction division 61 firms failed for \$984,000 compared with 52 for \$1,159,000 last year. The manufacturing division had 226 failures with \$5,039,000 compared with 209 involving \$4,789,000. Retail failures numbered 666 involving \$5,228,000 compared with 687 with \$4,397,000 in June 1939. In the commercial service group there were 48 casualties with \$1,100,000 liabilities compared with 66 with \$541,000 last year.

The upward tendency of the figures was also in evidence in the geographical division of the failures for in seven of the twelve Federal Reserve Districts there were more insolvencies than last year while in only five were there fewer. Among those showing increases were the three important northeastern Districts, Boston, New York, and Philadelphia, and also San Francisco. The Chicago District was among those with fewer insolvencies.

Government Crop Report

WHEAT prospects, in the aggregate, underwent little change during June, according to the July 1 report of the Department of Agriculture, for, according to the latest estimate, total wheat production in the United States will this year total 728,644,000 bushels, which compares with the June 1 forecast of 727,858,000 bushels. The present fore-

cast can be viewed with much more certainty, however, for most of the winter wheat crop is harvested by the end of June. It seems fairly well established, therefore, that the total supply (production plus carryover) during the season just started will aggregate approximately 1,000,000,000 bushels, or almost exactly the same as in the crop year just ended. At the beginning of last season stocks of old wheat carried over amounted to 254,286,000 bushels and at the beginning of the current season it is believed old wheat on hand amounted to about 280,000,000 bushels.

Although the outlook for total wheat production changed only slightly last month, the same was not true of prospects for the individual crops of spring and winter wheat. The 34,346,000 bushel decrease in the prospects for the former, however, was more than offset by a 35,132,000 bushel increase in expectations for the latter. It is not quite correct to refer to the June 1 spring figure as an estimate, for it was offered more as a rough approximation, it being then too early to regard the crop's future with much certainty. The course of improvement from month to month in this year's winter crop has been truly remarkable. In the early stages of its career conditions were so adverse that when the Department of Agriculture last December hazarded a prediction as to its outcome, it placed the harvest at only 399,000,000 bushels. The first real estimate, based on April 1 conditions, raised the figure to 426,215,000 bushels, the May 1 estimate, to 459,-691,000 bushels, the June 1, to 488,858,000 bushels and the July 1, to 523,990,000 bushels. Since last December, in other words, the forecast has increased by about 125,000,000 bushels and even since April 1, by nearly 100,000,000 bushels.

Last year's winter output amounted to 563,431,-000 bushels and the ten-year (1929-38) average, 571,067,000 bushels. The spring crop in 1939 aggregated 191,540,000 bushels and the ten-year average, 183,619,000 bushels. The yield per harvested acre this year is believed above the ten-year average for both crops; winter is estimated at 15.0 bushels per acre compared with 14.3 bushels average, and spring at 11.5 bushels compared with 10.4 bushels average.

The July 1 report offers the first forecast of the corn crop and this is placed at 2,415,998,000 bushels, a reduction of 8% from the 1939 output of 2,619,-137,000 bushels, but greater than the ten-year average of 2,299,342,000 bushels. This year's yield per acre is placed at 28.0 bushels, smaller than the exceptionally high 1939 yield of 29.5 bushels, but well over the average of 23.2 bushels. The acreage which will remain for harvest this year is estimated at only 86,306,000 acres, which would be the smallest in nearly half a century, or since a period when acreage was still being expanded on new lands.

The greatest acreage of corn ever harvested was that of 1932 when the total amounted to 110,577,000 acres. Since then, under New Deal direction, the harvested area has declined almost every year. However, because of the substantially better yields of recent years, production has been about the same as in years prior to 1933.

On the basis of the July 1 estimate of farm stocks of old corn of 862,474,000 bushels, compared with 849,765,000 bushels a year earlier, it seems probable that the corn carryover next October 1 will be at least as great as the record breaking quantity brought forward last year. Nearly all the corn carryover consists of stocks on farms and last October 1 there remained there no less than 546,100,000 bushels; the previous peak was recorded October 1, 1938 when farm stocks amounted to 353,200,000 bushels. The average farm carryover in the eight years 1930 to 1937 was about 180,000,000 bushels.

The New York Stock Market

USINESS on the New York stock market was almost at a complete standstill this week. Traders and investors obviously saw no reason for enlargement of their commitments, or for liquidation of those they already had, and a series of exceptionally dull and aimless sessions resulted. Not in any session on the New York Stock Exchange was the 500,000-share figure even approached, and at times the tickers were idle for minutes at a stretch. Trading last Monday amounted only to 232,890 shares, which was the smallest total in 18 years. The most active session, on Thursday, produced a volume of 328,330 shares. In these circumstances the price variations have no significance. The changes were so small, indeed, that many prominent stocks were precisely at the levels, last night, that prevailed a week earlier. The aircraft manufacturing issues were in slightly better demand than others, owing to the Federal program for prodigious enlargement of our air defenses. The principal drift of the stock market was slightly lower, in the first half of the week, but the small losses were regained on Thursday, when it appeared that the punitive excess profits tax may be modified to a degree that will permit companies which expand their facilities for defense production to amortize the cost in five years, before calculation of the impost.

The lethargy of the markets clearly was traceable to the many domestic and international uncertainties that now hedge business and prevent it from operating freely. It is possible that one great obstacle will be swept away next week when the Democratic National Convention meets in Chicago and decides the thorny question of a third term effort by President Roosevelt. If the leader of the New Deal were to withdraw and refrain from an attempt to violate one of the soundest traditions of the country, it is obvious that tremendous relief would be felt in all business circles. The European problem remains extremely difficult and uncertain, with the totalitarians in control of the entire Continent of Europe, and the fight for the British Isles finally in desperate progress. In view of the many unsettling elements of that situation, little tendency exists in the securities markets to engage in transactions of any kind.

Investment dealings of the institutional variety were somewhat more active this week. The Treasury in Washington announced on Thursday a new issue of \$650,000,000 2½% bonds due 1956, callable 1954, and an immense oversubscription made possible the closing of books late the same day. Three sizable corporate bond flotations were announced, and in all instances the demand was reported excellent. An equipment trust issue of \$7,995,000 for the Pennsylvania RR. likewise found a ready mar-

with Treasury issues virtually motionless, and highgrade corporate obligations similarly quiet. A little demand appeared for secondary railroad liens and other speculative bonds of domestic origin. Foreign dollar securities gained modestly, in most instances. The commodity markets were only slightly more active than their security counterparts. Wheat and other staples declined in United States markets, and base metals were quiet. Foreign exchange trading was marked by some further sharp fluctuations in "free" sterling, but the great bulk of business was done at the official rates. Foreign gold continued to pour into the United States in heavy volume.

On the New York Stock Exchange six stocks touched new high levels for the year, while 10 stocks touched new low levels. On the New York Curb Exchange 15 stocks touched new high levels and 22 stocks touched new low levels.

Call loans on the New York Stock Exchange remained unchanged at 1%.

On the New York Stock Exchange the sales on Saturday were 131,870 shares; on Monday, 232,890 shares; on Tuesday, 303,530 shares; on Wednesday, 282,140 shares; on Thursday, 328,330 shares, and on Friday, 255,990 shares.

On the New York Curb Exchange the sales on Saturday were 19,645 shares; on Monday, 51,655 shares; on Tuesday, 98,620 shares; on Wednesday, 78,980 shares; on Thursday, 141,430 shares, and on Friday, 74,200 shares.

An almost trendless market obtained on Saturday of last week as trading pursued an extremely narrow course and the volume of sales dipped to the smallest for an abbreviated session in a year. Indications of business activity for the country continues encouraging, but were overshadowed by the course of events in Europe and our political situation at home. Traction shares were the sole feature of a day that opened quiet and steady. The main portion of the list was without change as initial transactions got under way and thereafter the market drifted aimlessly through the close to irregularly higher levels. Monday witnessed the dullest session in an 18-year period as market interest went into hiding. The list in the main ruled firm, and what weakness developed in isolated issues sprung more from the narrowness of the market than by any outside influence. On the day prices closed steady and mixed. There was little to commend Tuesday's session, as stocks had the same conditions to contend with as on preceding days. Fluctuations ran into small fractions, with speculative interest shared by Loft, Packard and Commonwealth & Southern. Bethlehem Steel held the limelight for a time with an early gain of 11/4 points, but as trading progressed it was pared down to one-quarter of a point. Closing time found stocks steady and mixed. Progress was lacking on Wednesday as stocks followed the same procedure as in other sessions. With the exception of the utility shares, which featured trading, the general run of stocks wound up the session where they started from. Outstanding in the former group were the preferred and common stocks of the Electric Power & Light Corp., its \$7 preferred closing 2% points higher, its \$6 preferred 21/2 points, and the common one-half

point above its former level. Steel shares were depressed in a day of firm to mixed closings. Some ray of hope for improved markets was afforded brokers on Thursday as overnight news from the capital forecast a substitute for the present limit of 8% on ship and airplane contracts and permission to write off investments in war material plants over a five-year period, thus removing a real obstacle in the way of armament production for national defense. Trading proceeded in a cautious manner and fresh strength was noted in war stocks. Total transactions, while still small, showed some improve-The first hour saw the high point of the forward movement paced by aircraft shares; steel and shipbuilding issues also participated. Utility and railroad shares were relegated to the background. Later trading brought with it waning interest and lower prices, although on the day the general list ruled irregularly higher. The pending German invasion of Great Britain fast approached a reality, and had the effect of restricting trading on Friday in a material way. The price range was largely fractional and without much significance. A comparison of closing prices for yesterday with final quotations on Friday of the previous week indicate a mixed trend.

General Electric closed yesterday at 30% against 31¾ on Friday of last week; Consolidated Edison Co. of N. Y. at 27¾ against 28¾; Columbia Gas & Electric at 5⅓ against 6½; Public Service of N. J. at 37 against 36¾; International Harvester at 43½ against 43½; Sears, Roebuck & Co. at 72¾ against 72¼; Montgomery Ward & Co. at 38¾ against 39 bid; Woolworth at 32⅓ against 32¼, and American Tel. & Tel. at 159⅓ against 160⅓.

Western Union closed yesterday at 18 against 17½ on Friday of last week; Allied Chemical & Dye at 145 against 148½; E. I. du Pont de Nemours at 158 against 158; National Cash Register at 11½ against 12; National Dairy Products at 13½ against 13½; National Biscuit at 18½ against 19; Texas Gulf Sulphur at 30½ against 30½; Loft, Inc., at 24½ against 24½; Continental Can at 39½ against 39; Eastman Kodak at 118¾ against 118; Standard Brands at 6½ against 6½; Westinghouse Elec. & Mfg. at 92 against 91; Canada Dry at 13½ against 14½; Schenley Distillers at 9 against 8¾, and National Distillers at 20½ ex-div. against 20½.

In the rubber group, Goodyear Tire & Rubber closed yesterday at 14% against 15 on Friday of last week; B. F. Goodrich at 121/4 against 121/4, and United States Rubber at 18% against 191/8.

Railroad shares in most instances reflect fractional declines the present week. Pennsylvania RR. closed yesterday at 19¾ against 19⅓ on Friday of last week; Atchison Topeka & Santa Fe at 15½ against 16¼; New York Central at 11¾ against 11⅓; Union Pacific at 80⅓ against 79½ bid; Southern Pacific at 8½ against 8½; Southern Railway at 11¼ against 11¾, and Northern Pacific at 6⅓ against 6¾.

Steel stocks for the most part reveal fractional advances this week. United States Steel closed yesterday at 51½ against 51¼ on Friday of last week; Crucible Steel at 28¼ against 29¾; Bethlehem Steel at 75½ against 75, and Youngstown Sheet & Tube at 31½ against 31¾.

In the motor group, General Motors closed yester-day at 43½ against 42% on Friday of last week; Chrysler at 63 against 63¾; Packard at 3% against 4, and Hupp Motors at ½ against 5%.

Among the oil stocks, Standard Oil of N. J. closed yesterday at 341/4 against 325% on Friday of last week; Shell Union Oil at 81/8 against 81/8 bid, and Atlantic Refining at 211/8 against 211/2.

Among the copper stocks, Anaconda Copper closed yesterday at 19\% against 19\% on Friday of last week; American Smelting & Refining at 35\% against 36\%, and Phelps Dodge at 26\% against 26\%.

In the aviation group, Curtiss-Wright closed yesterday at 7½ against 6½ on Friday of last week; Boeing Airplane at 14½ against 13¾, and Douglas Aircraft at 68½ against 67½.

Trade and industrial trends were somewhat obscured this week by the comparisons with the previous week, which contained the Independence Day suspension of business. Steel operations for the week ending today were reported by the American Iron and Steel Institute at 86.4% against 74.2% in the preceding week, 84.6% a month ago, and 49.7% at this time last year. Production of electric power for the week ended July 6 was reported by Edison Electric Institute at 2,264,953,000 kwh., against 2,514,461,000 kwh. in the previous week and 2,077,956,000 kwh. in the similar week of 1939. Car loadings of revenue freight in the week to July 6 were reported by the Association of American Railroads at 636,901 cars, a decrease of 115,425 cars from the previous week, but a gain of 81,749 cars over the similar week of last year.

As indicating the course of the commodity markets, the July option for wheat in Chicago closed yesterday at 72%c. against 77½c. the close on Friday of last week. July corn closed yesterday at 61½c. against 61½c. the close on Friday of last week. July oats at Chicago closed yesterday at 30½c. against 31¾c. the close on Friday of last week.

The spot price for cotton here in New York closed yesterday at 10.70c. against 10.90c. the close on Friday of last week. The spot price for rubber closed yesterday at 20.75c. against 20.62c. the close on Friday of last week. Domestic copper closed yesterday at 11½c., the close on Friday of last week. In London the price of bar silver closed yesterday at 21¾ pence per ounce against 21 11/16 pence per ounce the close on Friday of last week, and spot silver in New York closed yesterday at 34¾c., the close on Friday of last week.

In the matter of foreign exchanges, cable transfers on London closed yesterday at \$3.71 against \$3.68½ on Friday of last week.

European Stock Markets

SMALL changes were the rule this week on the few stock exchanges in Europe which are operating at present. The immense military and other developments of recent weeks still are reverberating in the great financial centers. There are no indications of a resumption of business at Paris, and only halting progress has been made toward trading in Amsterdam. Dealings on the London Stock Exchange were small, and were overshadowed by an

announcement, Thursday, that Sir Frederick Phillips, Under-Secretary of the British Treasury, would visit Washington for talks with Secretary of the Treasury Henry Morgenthau Jr. The meeting, which will take place at the invitation of the American Treasury, "will provide occasion for the discussion of technical and other questions," the announcement said. In London the tendency was to attach considerable importance to the forthcoming discussions, which probably will cover the problem of French gold, in addition to many technical matters. Trading on the London Stock Exchange was dull in all sessions of the week, and net price variations were modest. Small gains were noted in the first two sessions, but a degree of profit-taking developed thereafter, modifying the early improvement. The Berlin Boerse showed a good tendency in the modest trading of last Monday and Tuesday, with variations inconsequential thereafter.

American Policies

FRESH defense appropriations on a prodigious scale were requested by President Roosevelt, Wednesday, in another special message to Congress. which also added a few comments about the foreign policies of this Administration. It is no longer possible to speak of one foreign policy in Washington, for there are too many aspects, often contradictory, to the program as it is being developed. Not a day passes without some additional word from the White House or the State Department, and it cannot be said, unfortunately, that the comments all are well reasoned. In the latest special defense message, Mr. Roosevelt called for appropriations totaling a mere \$4,848,171,957, for the Army, Navy and Air Force. Since \$5,082,210,080 already has been voted by the present Congress for defense purposes, authorizations on the scale now suggested by Mr. Roosevelt would bring the total close to the \$10,-000,000,000 mark. "Selective service," which is the new euphemism for conscription, was urged in the message. Mr. Rooselevt also added a general statement of opposition to war. "We will not use our arms in a war of aggression; we will not send our men to take part in European wars," the message. said. Emphasis was added to the defense preparations by the disclosure in Washington, Thursday, that contracts for 25,000 airplanes already have been placed.

Over the last week-end President Roosevelt expounded his views on international affairs in the grand manner. From his summer some at Hyde Park, N. Y., he made known to the world that five ideals must form the basis of any just and lasting peace. These are, briefly, world disarmament, improvement of living standards, freedom of religion, freedom of speech, and freedom of the press. Through White House Secretary Stephen T. Early, the President let it be known, further, that he favors the application of the principles of the Monroe Doctrine in Asia and Europe, as well as in the Americas. All the European and Asiatic Powers should confer and make decisions respecting territorial changes, not just one conquering Power, it was indicated. "For instance," Mr. Early was quoted as saying, "in the case of French Indo-China we think the disposition should be decided among the Asiatic There was much along the same line,

most of it vague and uncertain. The French reaction, if any, to this entirely gratuitous suggestion for the disposition of a French colony is not known. The comments caused much dissatisfaction, however, in all informed circles within the United States, and introduced new uncertainties as to what the Administration really has in mind in the allimportant sphere of foreign relations.

The Latin American sphere produced a number of interesting incidents, chief among them a German reply to a "hands-off" note addressed to the leading European Powers. The Reich note was not made public, for reasons that have not been adequately explained. Secretary of State Cordell Hull preferred to summarize the German statement, and to add his own comments in passing. He indicated that the German Government held the American note unwarranted and pointless, since the Germans have made no move toward the acquisition of territory in the Western Hemisphere. But the German Foreign Office apparently added some argument to the effect that the American interpretation of the Monroe Doctrine perpetuates the possessions in the Americas of certain European Powers, while denying others access. The German note commented, finally, that non-intervention by European Powers in the affairs of the Americas can be valid only on condition that the American nations, on their part, refrain from interference in the affairs of Europe. Mr. Hull commented that further communication with the German Government on this matter could not serve any useful purpose. He declared that the Monroe Doctrine is solely a policy of self-defense, which does not contain "the slightest implication, much less assumption, of hegemony on the part of the United States." The doctrine has no remote connection with the fact that certain European nations exercise sovereignty over colonies in the Western Hemisphere, and that other nations do not, according to Mr. Hull. This situation existed before the Monroe Doctrine was proclaimed. The Secretary made it plain that the United States will not recognize the transfer of American possessions from one European Power to another.

A good deal of maneuvering seemed to be in progress, this week, in advance of the newest Pan-American conference, which is scheduled to begin in Havana, July 20. The disconcerting "cartel" plan so casually announced by President Roosevelt some weeks ago, whereunder a \$2,000,000,000 corporation would be formed with American funds to control the foreign trade of all the Americas, apparently will be foremost on the agenda. Various joint defense measures and arrangements also will be discussed. Much was made in Washington of real or alleged German Nazi propaganda in Latin America. The German Minister to the Central American republics was rumored to have "warned" those countries against the Pan-American conference, and Secretary Hull on Thursday charged that the rumored German action was a species of intimidation. Washington was said to be watching closely some exceedingly important developments at the French island of Martinique, in the Caribbean, where British warships were hovering with a view to control of the movements of a French aircraft carrier, and other French vessels. No action appears to have been taken, however, with respect to this incident. Efforts were continued, this week, to repatriate Americans from the Britsh Isles and other parts of Europe, and a degree of official support was given proposals for the care of British refugee children in the United States.

Mexican Election

LECTIONS in Mexico still fall little short of earthquakes and other natural disasters in their destructive effects, and a plebiscite held last Sunday was no exception to this rule. The voters of the nation went to the polls to register their choice of a President for the next six years, and also of a complete Senate and Chamber of Deputies. In one sense the balloting was a vast improvement over many previous Mexican elections, for President Lazaro Cardenas did not defy the Mexican Constitution and stand for reelection. On the contrary, Senor Cardenas seemed more anxious than most of his followers to make the plebiscite truly democratic. The degree to which he succeeded is perhaps best measured by the serio-comic incident which resulted when he went to the poll to cast his own Mexico's President found that the voting booth in his own district, which admittedly favored the candidate of the oppisition, was closed to all voters by his own party members. In a Mexico City dispatch to the New York "Times", it was noted that President Cardenas "left in disgust after vainly trying to gain admittance."

Essentially, the contest was between General Manuel Avila Camacho, candidate of the revolutionary party, which has ruled Mexico these many years, and General Juan Andreu Almazan, an "independent" of conservative leanings who had the support of almost all elements save organized labor. A good deal of feeling prevailed during the campaign, and when the polls finally opened the antagonistic groups met in open combat, here and there. The encounters resulted in the deaths of 47 persons, and it was estimated that at leaset 300 were injured. The widespread revolt which many had predicted as a concomitant of the balloting was lacking, although it is far from certain that peace will continue to prevail. Results of the voting are not yet known, for the preliminary count started on Thursday, and is to be followed by an official tabulation. Both sides claimed the victory in their early pronouncements. It may be, indeed, that the race was close, for each side had the support of strong elements. The danger period for Mexico will develop when the tabulation of the ballots is completed and the results are indicated, for the defeated side almost certainly will claim irregularities. The difficulties encountered by the President in casting his ballot prove rather conclusively that the election was conducted in the traditional Mexican fashion, and it is hardly to be supposed that the counting of the votes will be in better taste.

Britain and the Axis

Some important signs pointed this week to that intensification of the war between Great Britain and the Berlin-Rome axis Powers which possibly will precede an attempt by the German Nazis to invade the United Kingdom, and end the war on a basis of complete victory in Europe. That the Germans are confident of their ability to per-

form this prodigious military task is fairly obvious, but the British are equally confident of their defensive powers, so that a test probably impends which may outrank even the campaigns in Flanders and France. It was rumored in Rome and Berlin. Thursday, that peace has been assured in the Balkans, and the way thus cleared for the great attack against England. Concurrently, German airplane and submarine activities were increased sharply over and around the British Isles, while in the Mediterranean some contacts were reported between British and Italian fleet units. The British Navy, meanwhile, carried to completion its assigned task of immobilizing the French fleet, thus assuring continued British control of the seas. The form that the battle between the German land and air power and the British sea power will take is not yet entirely clear, but it can hardly be doubted that the conflict will be desperate in the extreme. In the background looms starvation for all of Europe, owing to poor crops and inadequate man-power for tilling of the soil.

British measures with respect to the French navy constitute an absorbing chapter in the war story of the week. The battle at Oran apparently put a sizable part of the French fleet out of action, and there remained the question of French units at Alexandria and scattered French warships in various ports of the world. A French battleship and four cruisers were said to be at Alexandria, where negotiations were conducted for some days with the French admirals. It appeared, finally, that the French agreed to demobilize these warships, and arrangements were made for transportation of the crews back to their native soil. The large new battle cruiser Richelieu, just commissioned by the French, was put out of service at Dakar, early this week, through discharges of depth bombs under her propellers. Airplanes bombed the remains of the French battleship Dunkerque, at Oran, to make sure the vessel cannot be used by the Germans against England. The French liner Ile de France was reported held at Singapore by the British authorities. At Martinique, in the West Indies. the French aircraft carrier Bearn was reported under surveillance by British craft. French authorities indicated that some of these actions were felt grievously by the former British ally. In the battle at Oran, some 1,000 French sailors are said to have lost their lives. French airplanes were reported this week to be bombing the British base at Gibraltar, and it seems quite possible that London has sacrificed for years to come the alliance with France. All these matters doubtless were taken into full consideration before the British Cabinet reached its unanimous decision to take the French fleet out of action, regardless of consequences.

The Balkans quite obviously entered into the picture, owing to the demands by Hungary and Bulgaria for slices of Rumania, and to the Russian advances into Rumanian territory. The threat of war at the back door of the German Reich apparently proved disconcerting to the Berlin regime. Count Galeazzo Ciano, the Italian Foreign Minister, conferred over the last week-end in Berlin with the representatives of Germany, and after the conference ended he was taken on a tour of the occuppied territories of the Low Countries and France. In

these talks the fate of the Balkans seemingly was decided, on a basis of future satisfaction of the Hungarian and Bulgarian demands. According to Rome dispatches, decisions also were reached as to phases of the war against Great Britain which the German and Italian forces were to prosecute. The Italian role, it was rumored, would be to keep the British fleet busy in the Mediterranean, and to continue the attacks on British colonies in Africa. Germany, on the other hand, would concentrate on the reduction of the United Kingdom. Whether or not such decisions were reached at the Berlin conference, the fact is that the course of the war this week was along such lines.

British aerial raids were reported daily over the German military and industrial area of the German Reich, and for the early part of the week the Germans merely retaliated, through bombing attacks upon various objectives in England, Scotland and Wales. The claims on either side were that great damage had been done by their own airmen, whereas the enemy merely killed a few civilians and inflicted no damage of any importance. Similarly, large numbers of enemy aircraft invariably were reported as shot down, whereas the home defense forces suffered small losses or none at all. On Wednesday, however, the Germans suddenly unleashed an aerial attack exceeding in scope and intensity anything previously suffered by the British. More than 100 Nazi bombing planes, with accompanying squadrons of fighters, appeared over British points of presumed military or industrial importance. raids were continued and even intensified subsequently, with heavy aerial losses reported on both sides. The Germans stated on Thursday that they had bombed a British convoy in the English Channel, sinking a cruiser and a number of merchant ships. The Royal Air Force claimed hits, Tuesday, on two Nazi warships at Wilhelmshaven. The German submarine campaign was stepped up to such a degrees that losses of more than 600,000 tons of British merchant shipping were reported by the Germans, for the last six weeks, this representing a rate of British loss exceeding the average of the intensive German campaign of 1917. The German aim to starve out the British, and thus turn the tables of the London blockade plan, was indicated in Berlin reports that harbor establishments were bombed persistently from the air. Nothing daunted, the British Government asked Parliament on Tuesday for a war appropriation of £1,000,000,000, which promptly was voted without a dissenting voice.

In the Mediterranean an inconclusive sea battle developed when units of the Italian navy emerged briefly, Wednesday, from the protective shelter of their bases. The British Admiralty announced laconically that contact had been made with enemy forces in the central Mediterranean, east of Malta. Two Italian battleships and a number of cruisers and accompanying craft were encountered, but the Italians promptly laid down a smoke screen and retired, according to London. One hit was registered on an Italian ship, it was added, while no damage was sustained by the British vessels. The Italian version was that the British retired, after losing a ship. Rome also stated that several sea battles had taken place in various parts of the Mediterranean, and it was added yesterday that

aerial attacks had damaged some of the principal units of the British fleet. The Italians admitted the loss of a destroyer and some minor vessels, including a troop transport. In response to the Italian statements about aerial bombings of vital fleet units, London admitted that bombs had fallen near the great battleship Hood and the aircraft carrier Ark Royal, but it was added that none of the bombs found its mark. London was frankly "disappointed" over the inconclusive results of the Mediterranean battles, and the reported refusal of the Italians to fight it out.

Crippled France

ARNEST efforts were made by the French au-L thorities this week to reform some sort of provisional authority, and the indications are that this will take the aspect of fascism, possibly because only such methods are acceptable to the German conquerors. Marshal Henri Petain, who assumed the sad role of peacemaker with the Germans, remains in command of the French regime, which this week operated from Vichy. His principal aide seems to be Pierre Laval, who long his manifested fascist leanings, and who may be acceptable to the Germans for that reason. Among the first tasks of the Petain-Laval regime was that of considering the consequences of the British action against the French fleet. It was decided late last week to end the alliance with England, and notification to this effect was issued last Monday, when passports were requested for the entire French diplomatic mission in London. The French Parliament met at Vichy, Wednesday, and voted for a new totalitarian Constitution which ends the Third Republic. Those who were democratically inclined insisted successfully, however, that the new Constitution be subjected to a national plebiscite. President Albert Lebrun was relieved of his post, and Marshal Petain installed as Chief of State. The French dictator appealed on Thursday for popular support of his regime, which will be assisted by 12 Ministers. The seat of government will be transferred to Versailles, which is now held by the German forces. In the course of his address Marshal Petain inveighed against both "capitalism and socialism," but added that the profit system will be continued in France. It is generally believed that the new regime will find its path eased by the prevailing conviction among Frenchmen that the system now discarded was primarily responsible for the military defeat.

Southeastern Europe

ERMAN and Italian authorities apparently have settled, for the time being, the question of war or peace in the Balkans and the Near East, according to inspired versions of conversations in Berlin and Munich during the course of the week The Rumanian surrender of Bessnow ending. arabia to Russia occasioned insistent demands from Hungary, and also some requests from Bulgaria, for further revision of the frontiers of Rumania, which gained Transylvania and part of the Dobrudja in the World War settlement. Italian Foreign Minister Count Galeazzo Ciano journeyed to Germany for discussions of this matter, over the last week-end. Also present at the Munich conference were the Hungarian Premier and Foreign Minister, Count Paul Teleki and Count Stephen Csaky. Unofficial accounts from both Germany and Italy agreed, yesterday, in reporting that the Hungarians were told not to disturb the peace of the Balkans at this time, and that Hungarian territorial aspirations would be satisfied in the final peace settlement. The assumption is that Transylvania, which was part of the old Austro-Hungarian Empire before the war, will be turned over at least in part to the Hungarians in any settlement dictated by the Axis Powers. Bulgaria, similarly, may be expected to regain the Dobrudja. Russia was said in some dispatches to have joined in the general guarantee of Balkan peace. That Russia was satisfied in one way or another was suggested by Moscow statements that Turkish fears of an attack are "pure nonsense." The full story of this cynical business of territorial changes remains to be revealed.

Scandinavia

ERMAN Nazi overlords of the Scandivanian countries indicated in various ways, this week, their intention of subordinating Sweden, Norway and Denmark to the economic requirements of the Reich. It would seem, moreover, that the Scandinavians have little choice for the moment but submission to the Nazis. The Swedish authorities made it known, last Sunday, that they have complied with a German request for the transit of unarmed German soldiers through Sweden, the German intent apparently being to grant a respite to the forces in northern Norway which held Narvik despite strenuous Allied attacks. Some popular discontent was occasioned by his decision, but the Swedish authorities were able to announce on Wednesday that British aerial attacks had been made against four Swedish destroyers, built in Italy and under convoy to Sweden. German authorities facilitated the voyage of the new destroyers, it was emphasized, but the partially manned and armed vessels were made targets by the British fliers, who caused some damage. It was stated in London, early in the week, that the German-dominated Parliament in Norway had called for the abdication of King Haakon, who reputedly paid no attention to this demand. Berlin made some outlines apparent, Wednesday, of a "Germanic Union" of the Scandinavian and Baltic States, based upon German domination of the area. No details of this vast project so far have been made available. Sweden now is the principal source for news about Scandinavia, since Norway and Denmark are completely in Nazi hands.

Militant Japan

VARIOUS developments in the Far East served to emphasize, this week, the growing tendency of the Japanese militarists to regard the activities of all other nations there as hostile to their own interests. High-handed actions by the Japanese have been common, of course, but usually were confined to one foreign country at a time. The present trend is toward adverse moves with respect to all foreign countries, apparently on the ground that the present situation in Europe provides the Nipponese with an "opportunity." It seems, moreover, that the unfortunate and ill-timed comments made last Saturday by White House Secretary Stephen T. Early, in behalf of President Roosevelt, added to

the Japanese militancy. The vague declaration in favor of regional Monroe Doctrines delighted the Japanese and perturbed the Chinese defenders of their homeland. Tokio reports indicate that German authorities are urging the Japanese to take a firm stand. The entire course of events suggests fresh trouble, which might result at any time in an extension of the European war into the Far East.

The status of French Indo-China is one of the great problems of the moment, notwithstanding the closing of that avenue for munitions supplies to the Nationalist Chinese. Reports that British authorities are holding French ships at Hongkong were scanned eagerly by the Japanese, who are all too anxious to take advantage of all indications of dissention among the Western Powers. It was made known in Tokio, last Monday, that the British Government had rejected a Japanese request for closing of the Burma road into "free" China, and the request promptly was renewed in a more emphatic manner. A Japanese naval patrol was said on Tuesday to have seized the British ship Shengking, on the ground that the vessel was carrying rifle ammunition. The United States came into the picture rather sharply, last Sunday, when 16 Japanese gendarmes were seized by American marines in a part of the Shanghai International Settlement patrolled by our forces. The gendarmes, dressed in civilian clothes, were released after a reputed apology by the Japanese authorities, but the Japanese expressed increasing irritation over the incident, which finally occasioned a formal note of explanation from the commander of the marines to the Japanese military. Hongkong remains uneasy over its status and the possibility of a Japanese attack, which might easily develop quickly were it not for the continued presence in the Pacific of the American fleet.

Discount Rates of Foreign Central Banks

THERE have been no changes during the week in the discount rates of any of the foreign central banks. Present rates at the leading centers are shown in the table which follows:

Country	Rate in Effect July 12	Date	Pre- vious Rate	Country	Rate in Effect July 12	Date	Pre- vious Rate
Argentina	31/2	Mar. 1 1936		Holland	3	Aug. 29 1939	2

Foreign Money Rates

IN LONDON open market discount rates for short bills on Friday were 1 1-32%, as against 1 1-32% on Friday of last week, and 1 1-32% @ 1 1-16% for three-months' bills, as against 1 1-32% @ 1 1-16% on Friday of last week. Money on call at London on Friday was 1%.

Bank of England Statement

THE statement of the Bank for the week ended July 10 revealed a further increase in note circulation of only £2,194,000, which again raised the total to a new peak of £610,378,000. Since May 22

circulation has advanced no less than £63,881,000. A year ago currency outstanding aggregated £507,-929,406. As the circulation increase was attended by a decline of £163,505 in gold holdings, reserves dropped £2,357,000. Public deposits rose £5,594,000 while other deposits fell off £34,163,741. The latter includes "bankers' accounts" and "other accounts," which declined £33,120,654 and £1,043,087, respectively. The reserve proportion is now 11.9%, compared with 11.5% last week and 25.5% a year ago. Government security holdings decreased £24,574,000 and other securities £1,620,009. Of the latter amount, £1,571,045 represented a loss in discounts and advances and £48,964 in securities. No change was made in the 2% discount rate. Below we show the different items with comparisons for previous years:

Bank of Germany Statement

HE statement of the Bank for the first quarter of July showed notes in circulation at 12,555,581,-000 marks, a loss of 229,764,000 marks from the record high of 12,785,345,000 marks the last quarter. A year ago notes in circulation totaled 8,531,196,000 marks. A decrease also appeared in bills of exchange and checks of 213,620,000 marks, in investments of 3,151,000 marks, in other assets of 123,767,000 marks and in other daily maturing obligations of 87,420,000 marks. The Bank's gold and foreign exchange rose 172,000 marks to a total of 77,352,000 marks, compared with 76,555,000 marks a year ago. The proportion of gold to note circulation is now 0.62%, compared with the record low of 0.60% the last quarter and 0.90% last year. Following we show the various items with comparisons for previous years:

New York Money Market

ULL conditions continued to prevail, this week, in the New York money market, rates being unchanged in all departments. Bankers' bills and commercial paper were in poor supply, and little business could be done. The Treasury in Washington sold a further issue of \$100,000,000 discount bills due in 91 days, and awards were at an average of 0.017% discount, computed on an annual bank discount basis. Call loans on the New York Stock Exchange held to 1% for all transactions, while time loans again were $1\frac{1}{4}\%$ for maturities to 90 days, and 11/2% for four to six months datings.

New York Money Rates

EALING in detail with call loan rates on the Stock Exchange from day to day, 1% was the ruling quotation all through the week for both new loans and renewals. The market for time money continues quiet. Rates continued nominal at 11/4% up to 90 days and 1½% for four to six months' maturities. The market for prime commercial paper continued moderately active this week. Transactions have been in about the same volume as last week with the demand in excess of the supply. Ruling rates are 5/8@1% for all maturities.

Bankers' Acceptances

THE market for prime bankers' acceptances failed to hold last week's moderate improvement, and the volume of business has fallen off. Prime bills are again in short supply and the demand has been lighter. Dealers' rates as reported by the Federal Reserve Bank of New York for bills up to and including 90 days are ½% bid and 7-16% asked; for bills running for four months 9-16% bid and ½% asked; for five and six months, 5/8% bid and 9-16% asked. The bill-buying rate of the New York Reserve Bank is \(\frac{1}{2}\)% for bills running from 1 to 90 days.

Discount Rates of the Federal Reserve Banks

HERE have been no changes this week in the rediscount rates of the Federal Reserve banks; recent advances on Government obligations are shown in the footnote to the table. The following is the schedule of rates now in effect for the various classes of paper at the different Reserve banks:

DISCOUNT RATES OF FEDERAL RESERVE BANKS

Federal Reserve Bank	Rate in Effect on July 12	Date Established	Previous Rate

Course of Sterling Exchange

IN NEW YORK free sterling is again ruling firmer and higher after the sharp decline experienced on Friday of last week, when owing to the intervening July 4 holiday there was a moderate accumulation of South American and Far Eastern offerings which forced the cable rate down from the high of \$3.84 on Wednesday to Friday's range of between \$3.68 $\frac{1}{2}$ and \$3.83¾ for cable transfers. The higher figure on Friday represented opening asking quotations and closing rate for the day was \$3.681/2. The wide range was effected in a limited market and sterling was bought sparingly.

The trading was of such a character as to cause the market to believe that most importers of British goods had covered their requirements of sterling to take care of contracts entered into before June 8, dead line set by the British authorities for free sterling transactions.

The range for sterling in the free market this week has been between \$3.661/4 and \$3.773/4 for bankers' sight, compared with a range of between \$3.67½ and \$3.88 last week. The range for cable transfers has been between \$3.661/2 and \$3.781/2, compared with a range of between $$3.68\frac{1}{2}$ and \$3.89 a week ago. Official rates quoted by the Bank of England are as follows: New York, 4.02½-4.03½; Canada, 4.43-4.47; Australia, 3.2150-3.2280; New Zealand, 3.2280-3.2442.

Exchange on the following countries is no longer quoted in London or New York: Germany, Czechoslovakia, Poland, Denmark, Norway, Holland, Belgium, Italy, France, and Rumania. However, in New York there is an occasional nominal quotation for the German gold mark around 40.05 and for the Italian lira around 5.05.

The most important event affecting the immediate outlook for sterling was the receipt on July 8 by the Foreign Exchange Committee of New York of advices from London which virtually eliminated the use of free sterling to pay for exports from the United Kingdom. At the same time London warned of the possibility that further measures may be taken at any time to restrict the already limited market still further. The effect of Monday's advices was to end the period of grace allowed after the June 8 regulations, which made official sterling mandatory for all British imports and exports. Up to that time exports from Great Britain to the United States could be paid for in the cheaper free sterling with the exception of some major British exports, notably whisky, tin, jute, rubber, furs, and diamonds. Up to July 8 free sterling could be used for free items on contracts which had been placed prior to June 8. This permission has now been rescinded. Free sterling, however can still be used for contracts entered into before March 8 for specified goods on which exchange has not yet been covered. There is no indication as to how long this privilege will be continued, but in any case such outstanding contracts must be extremely limited. As a consequence of these further restricttions the free market has become more inactive than ever.

There can be little doubt that the official exchange rates set by London will become steadily more effective and continue to dominate exchange for some time. Interest in exchange is now, as since the outbreak of the war and even long before, centered on the extreme disturbance of international commerce, now aggravated by the complete defeat of France. British authorities constantly reiterate their determination to preserve a sound and stable currency, but the pressure on Great Britain's financial situtation becomes daily more apparent. Only an early completely successful defense of the British Isles or the conclusion of a peace without victory for either side can relieve the pressure on Britain's financial structure. Such a possible peace is as reasonable a surmise as a complete victory for either Germany or Great Britain. At present it is known that German commercial agents in Brazil and other South American countries are endeavoring to negotiate orders for delivery of German goods in those countries, doubtless on a barter basis, by October or November. This must be taken to indicate either that Germany expects to achieve complete victory or to conclude peace by or before that time. However, even if the ultimate outcome is a victory for British arms, Great Britain must feel the pressure on its financial system for a long time to come, doubtless for years.

The British Chancellor of the Exchequer, Sir Kingsley Wood, on July 9 asked the House of Commons for another £1,000,000,000 to meet the rapidly rising cost of the war. His demands were voted

without dissent. The Chancellor said that the fight ing services alone are now costing £7,500,000 a day. At the same time he intimated that these costs will increase and warned that the people must be taxed to capacity. Other State expenditures, such as debt service, bring the national budget to £9,500,000 a day. The sum voted last March, £700,000,000, to supplement the previous £500,000,000, he said would last only another two or three weeks. The £1,000,000,000 voted on July 9 was the largest ever asked of Parliament.

The Chancellor said: "The gap between our revenue and our expenditure is widening and further contributions from taxation toward the cost of the war must clearly be the very highest possible, must cover the widest possible field, and must be made The strictest curtailment of unnecessary consumption must be effected and in addition there must be a continuous flow of savings from large investors to the exchequer. It is imperative that the necessity should always be kept before us of maintaining sound financial methods and that we should be ready to make heavy but necessary sacrifices. This is vital not only for the purpose of waging war but also because at the end of it we want to emerge financially strong and thus ensure some reasonable prospect of decent conditions and tolerable lives for the people of the country."

Some indication of the tax burden that must soon fall on the British people can be gained from the fact that of the £3,500,000,000 expected to be spent in this financial year taxation will bring in only about £1,234,000,000 plus revenue from the purchase tax, which has not yet been imposed and has already evoked strong opposition from labor spokesmen in Parliament.

It cannot be too often repeated that ever since the outbreak of the war and for a long time before, Great Britain has succeeded in steadily increasing its export trade. Despite this improvement, Britain's import balance has mounted persistently, as a direct result of essential war purchases and the failure of Great Britain to improve its income from overseas interest payments and shipping dues. Practically all British shipping since September has been limited to the import of war supplies and indispensable sustenance products.

The severe strain on the Government was emphasized on July 5, when the Treasury instituted a type of compulsory borrowing, which took the form of utilization of bank deposits by the Government for short-term loans. The Chancellor of the Exchequer in a written reply to a question in the House of Commons said that he had arranged partially to cover the Treasury's weekly financial needs by drawing on deposits of the clearing house banks and the Scottish banks, the amounts to be fixed weekly. He explained that he relied primarily upon subscriptions to national war bonds, savings certificates and defense bonds, but that in view of the present volume of Treasury bills and the uneven flow of revenue receipts, now accentuated by the high rate of direct taxation, he was also resorting to the use of the The deposits will be repayable after six months, subject to the right to request payment at any time in covering emergency needs. Deposits will be discounted at the regular bank rate and the rate of interest will be fixed from time to time in the light of prevailing conditions. For the present the interest rate will be $1\frac{1}{8}\%$.

The constantly increasing note circulation of the Bank of England is a further sharp index of the pressure on the financial position of Britain. The Bank's statement for the week ended July 10 showed total circulation of £610,378,000, a new record high.

The increased circulation made it necessary to raise the fiduciary issue by £50,000,000 to £630,000,000 a month ago. Now there is further talk of another increase in the fiduciary issue. These Treasury notes are well above the Bank's total circulation. The fiduciary issue is the amount of currency which is backed not by gold but only by Government securities. The pressure for available cash from all quarters is such that the Bank of England has no alternative other than to raise the fiduciary note limit. London views with complacency the increasing gold stocks of the United States Treasury and regards them as an assurance of the eventual restoration of free international commerce as it existed prior to 1914.

The London money market continues easy with rates unchanged from last week. Call money against bills is available at $\frac{3}{4}\%$. Discount rates are as follows: Two-months bills 1 1-32%, three-months bills 1 1-16%, four-months bills 1 3-32%, and sixmonths bills $1\frac{1}{4}\%$.

The Canadian exchange situation continues unchanged except that exchange regulations have been tightened so as to limit Canadian spending in the United States on vaction passports. The regulations do not prohibit a Canadian entering the United States from carrying up to \$100 in Canadian money which can be converted into United States dollars in this country at a discount of about 14% or 15%. For taking more than \$100 in Canadian money a permit is required which must be presented to Canadian border officials on demand. However, business men will have no trouble in obtaining exchange from their banks, upon presenting evidence that the money is required for other than pleasure purposes. On July 5 Finance Minister J. L. Ralston said that much as Canadians would like to continue to visit friends in the United States, "the time has come when this ought to be regarded as a luxury which we should forego so as to maintain the flow of war supplies and essential commodities which have the first call upon Canada's foreign exchange resources."

Montreal funds in the free market this week ranged between a discount of $14\frac{5}{8}\%$ and a discount of 12%.

The amounts of gold imports and exports which follow are taken from the weekly statement of the United States Department of Commerce and cover the week ended July 3, 1940.

Gold held under earmark at the Federal Reserve banks was reduced during the week ended July 3 by \$71,197,590, to \$1,654,120,958.

Referring to day-to-day rates sterling exchange on Saturday last was firm, up from previous close. Bankers' sight was \$3.70@\$3.771/4; cable transfers, $3.70\frac{1}{2}$ \$3.78\frac{1}{2}. On Monday exchange was steady. The range was \$3.73@\$3.77 for bankers' sight and $$3.73\frac{1}{4}$ @ $$3.78\frac{1}{2}$ for cable transfers. On Tuesday the market was limited with rates relatively steady. Bankers' sight was \$3.75@\$3.77¾; cable transfers, $3.75\frac{1}{4}$ \$3.78\frac{1}{2}. On Wednesday trading continued limited. The range was $$3.73\frac{1}{2}@$3.77\frac{3}{4}$ for bankers' sight and $$3.73\frac{3}{4}@3.78 for cable transfers. On Thursday the market was unchanged in all important respects. Bankers' sight was \$3.661/4@ \$3.73½; cable transfers, \$3.66½@\$3.74. On Friday the market presented no new features. The range was $\$3.66@\$3.70\frac{1}{4}$ for bankers' sight and $\$3.66\frac{1}{4}@$ \$3.71 for cable transfers. Closing quotations on Friday were \$3.70 for demand and \$3.71 for cable transfers. Commercial sight bills finished at \$3.69, 60-day bills at \$3.67. Ninety-day bills are not quoted. Documents for payment (60 days) closed at \$3.67. Cotton and grain for payment closed at

Continental and Other Foreign Exchange

NOTHING of true factual enlightenment can be expected regarding the foreign exchange and financial situation of Europe. This must be the case for a long time to come and the observation must be taken to apply to every country from the Baltic to the Mediterranean without any exception, even of Sweden and Switzerland, whose currencies are supposedly free and functioning on the basis existent before the outbreak of the war in September.

The French financial position is chaotic. finances of the country must be reorganized. Whether the monetary unit of the country continues to be designated as the franc is of little moment. The franc as of September has to all practical purposes disappeared, much as its predecessor, the franc of 1913, has vanished. The September franc was reckoned in terms of the pound at 176.50 francs to the pound and in terms of the dollar at approximately 2.2883 cents, not taking into account day-to-day variations. The franc of July, 1914 was equivalent to 19.30 cents, or roughly 5 francs to the dollar and 25 francs to the pound. The several devaluations of the franc made since 1914, with resulting gold "profits" accruing to the Government, brought the quotation down to the low figures quoted above. Were it not for the tie of the British pound at 176.50 francs or 2.2883 cents, the quotable exchange value of the unit would have fallen still lower, probably even lower than 1 cent per franc.

The steady disintegration of the French position is emphatically illustrated by a comparison of the position of the Bank of France in 1914 with the last official statement published here as of May 30, 1940. The paper money of the Bank of France before the World War consisted of notes of the Bank of France, redeemable in either gold or silver at the option of the Bank. The maximum circulation was limited in 1911 to 6,800,000,000 francs, where it stood in 1914. The gold reserve in the vaults of the Bank against all its liabilities at that time was about 3,500,000,000 The silver reserve was about 500,000,000 francs. The last statement of the Bank published before the conquest of France by Germany showed total gold holdings of 84,615,732,590 francs on May 30, 1940. The note circulation on that date stood at an all-time high of 170,853,000,000 francs. The French currency and financial structure must now be reorganized along lines dictated by Berlin policies.

The German Reichsbank statement as of July 6 shows total note circulation of 12,555,581,000 marks and ratio of reserves at 0.62% only 0.02% higher than the previous week, which was the lowest on record. The statement affords no true reflection of the fiduciary money expansion in the Reich. conquest of the several European nations has not directly affected the Reichsbank note circulation since prior measures had been taken in order to prevent exportation of German currency to the Nevertheless, the issuance of occupied areas. "occupation" reichsmarks in the form of Reich credit office notes constitutes Germany's formal liability. However, in the event of complete German victory the respective subjugated countries are expected to be called upon to redeem this occupation currency in some manner.

Germany's great industrial expansion began around To maintain the gold standard during this 1875. period of expansion the Reichsbank pursued the policy of accumulating gold. At the beginning of the World War in 1914 Germany possessed about 4,000,000,000 gold marks, of which about 2,750,-000,000 marks were in circulation and the remainder served largely as cover for the note and deposit liabilities of the Reichsbank. The 1914 pre-war reichsmark represented 398.25 milligrams of gold 0.9 fine, with a par value of \$0.2382. Up to 1914 the weekly note circulation of the Reichsbank statements ran around 2,000,000,000 marks, but several other German banks had the right to issue notes in small denominations. The Bank's notes were all redeemable in gold on demand and there were no restrictions on the exportation of gold.

It is claimed in Germany that there is no danger of inflation there due to the rigid and efficient price control policies adopted by the Reich, for which the necessary machinery was set up long before the war. This control is supported by the general discipline of the population, which has been enormously strengthened by the present regime. The authorities in Germany are constantly reiterating their plans to end the use of gold as a money base, and it is claimed that these plans are gaining in popularity with the merchant and industrial classes. Proponents of a "new European currency" talk of making the reichsmark, backed by the Reich's political might and hard German work, the standard currency of Europe, but admit that gold cannot be entirely eliminated inasmuch as no other means exists for the final settlement of international trade, even though most of this trade may be carried on in the form of clearing or barter.

The Swedish krona continues relatively steady in New York in limited trading at around 23.88 cents. The Swiss franc is also steady around 22.68. On July 8 dispatches from Berne stated that the Swiss authorities have taken drastic steps to prevent the freezing of any more Swiss capital abroad. In an action similar to that taken by the United States, the Swiss Government has issued a decree restricting free disposal of foreign capital deposited in Switzerland either by individuals or firms of the countries conquered by Germany. Hundreds of millions of

dollars of foreign capital have taken refuge in Switzer land since the war began and the country's importtance as a banker-trustee for such fugitive funds is second only to that of the United States. In an effort to protect commercial and private Swiss holdings abroad, the government has decreed that all outgoing payments to invaded countries must clear through the national bank. It is hoped by the Swiss authorities that this measure will be only temporary pending international regulation of payments. The National Bank of Switzerland in its statement for the week ended July 6 shows gold stocks at 2,133,-000,000 Swiss francs and note circulation at 2,214,-300,000 Swiss francs. The ratio of gold to notes stands at 96.35%, as compared with similar ratios of well above 100% published for long before the war and even into September. The ratio of gold to total sight liabilities on July 6 was 86.47%.

The London check rate on France, which shortly after the beginning of the war was officially fixed by the Bank of England at 176.50-176.75, ceased to be quoted on Monday, June 17. The last quotation for francs in New York was 2.18 cents (nominal) at noon on June 15. In New York Berlin marks are not quoted, nor is exchange on Poland, Czechoslovakia, Norway, Denmark, Holland, and Belgium. Exchange on Bucharest is not quoted. quotation on Bucharest was 0.50 (nominal) on Friday of last week. There is little or no business being done even in Swedish or Swiss units, while forward Swedish and Swiss are not quoted. Exchange on Finland closed at 2.05 (nominal), against 2.05 (nominal). Greek exchange closed at 0.68 (nominal). against 0.68 (nominal). Swedish exchange is nominally quoted at 23.88, against 23.90 (nominal). Swiss exchange is nominally quoted at 22.67, against 22.67½ (nominal). Spanish pesetas are nominally quoted at 9.25, against 9.25.

EXCHANGE on the South American countries is quiet, with rates held steady by the action of the various controls. The Argentine peso has been ruling slightly firmer in the last few days. On June 28 the Argentine Central Bank froze all funds to France, its colonies and protectorates. In addition the transfer of funds to Germany, Spain, and the British Empire was made subject to strict supervision. The regular fortnightly statement of the Central Bank of Argentina as o June 30, published here on July 8, showed gold reserve ratio to notes in circulation at 100.18%. The ratio of gold to notes and total sight liabilities was 78.09%.

The Argentine unofficial or free market peso closed at 21.70@21.80, against 21.35@21.40. Brazilian milreis closed at 5.15, against 5.15. Chilean exchange is nominally quoted at 5.17, against 5.17. Peru is nominally quoted at 15¾, against 15¾.

EXCHANGE on the Far Eastern countries presents no new features of importance. The Hongkong dollar has been displaying decided weakness. The Shanghai yuan has been on the whole steadier than in many weeks. The Straits dollar has been declining sharply. In a dispatch from Simla, India, on July 10 it was announced that the Government of India is issuing a notification demanding the return to the Reserve Bank of India of all securities of which the principal, interest, or dividends are payable in United States dollars. If it becomes necessary, the

Government statement said, to transfer to itself such securities, the Government may do so at a price not less than the market value of the securities of the date of the order.

Closing quotations for yen checks yesterday were 23.45, against 23.45 on Friday of last week. Hongkong closed at 22.90, against 23.00; Shanghai at 6.11, against 6 3-16; Manila at 49.80, against 49.85; Singapore at 475/8, against 475/8; Bombay at 30.31, against 30.31; and Calcutta at 30.31, against 30.31.

Gold Bullion in European Banks

HE following table indicates the amounts of gold bullion (converted into pounds sterling at the British statutory rate, 84s. 11½d. per fine ounce) in the principal European banks as of respective dates of most recent statements, reported to us by special cable yesterday (Friday); comparisons are shown for the corresponding dates in the previous four years:

Banks of-	1940	1939	1938	1937	1936
England	£ *812,076 242,451,946 b3,867,600 c63,667,000 a17,440,000 e97,714,000 e132,857,000 86,730,000 41,505,000 6,505,000	£ 141,346,659 311,709,184 3,827,750 63,667,000 23,400,000 96,333,000 98,764,000 34,167,000 6,555,000	25,232,000 123,435,000 81,027,000 72,588,000 29,174,000 6,539,000	87,323,000 25,232,000 103,824,000 107,305,000 *83,598,000 25,831,000 6,549,000	£ 231,954,289 436,854,089 2,372,300 88,092,000 50,936,000 107,141,000 49,292,000 24,028,000 6,553,000 7,210,000

*Pursuant to the Currency and Bank Notes Act, 1939, the Bank of England statements for March 1, 1939 and since have carried the gold boldings of the Bank at the market value current as of the statement date, instead of the statutory price which was formerly the basis of value. On the market price basis (1688, per fine ounce) the Bank reported holdings of £1,605,846; equivalent, however, to only about £812,076 at the statutory rate (84s. 11½d. per fine ounce), according to our calculations. In order to make the current figure comparable with former periods as well as with the figures for other countries in the tabulation, we show English holdings in the above in statutory pounds.

**Amount held Dec. 21. 1939, latest figures available. Cold holdings of the

as well as with the figures for other countries in the tabulation, we show English holdings in the above in statutory pounds.

a Amount held Dec. 31, 1939, latest figures available. b Gold holdings of the Bank of Germany include "deposits held abroad" and "reserves in foreign currencies." c As of April 30, 1938, latest figure available. e Prior to invasion. The value of gold held by the Bank of France was revalued with the statement of the Bank as of March 7, in accordance with the decree of Feb. 29, 1940, at the rate of 23.34 mg. gold 0.9 fine equals one franc; prior to the latest revalorization the value of the Bank's gold holdings was calculated, in accordance with the decree of Nov. 13, 1938, at 27.5 mg. gold 0.9 fine per franc; previously and subsequent to July 23, 1937, gold in the Bank was valued at 43 mg. gold 0.9 fine per franc; before then and after Sept. 28, 1936, there were 49 mg. to the franc; prior to Sept. 26, 1936, 65.5 mg. gold 0.9 fine equaled one franc. Taking the pound sterling at the English statutory rate (7.9881 gr. gold 11-12th fine equals £1 sterling), the sterling equivalent of 349 francs gold in the Bank of France is now just about £1; at 27.5 mg. gold to the franc the rate was about 296 francs to the £1; when there were 43 mg. gold to the franc the rate was about 190 francs to the £1; when there were 43 mg. gold to the franc the rate was about 190 francs to the £1; when there were 43 mg. gold to the franc the rate was about 195 francs equaled £1.

Revision of the Securities Acts

By HAROLD M. FLEMING

With the recent agreement between the Securities and Exchange Commission, the National Association of Securities Dealers and the Investment Bankers Association, a beginning has at long last been made in modernizing the laws regulating Wall Street which were written six and seven years ago in heat of blood, and which have cried out for revision since that time without effect.

The troublesome and doctrinaire 30-day waiting period is appparently to be struck out, in effect, to the extent that the Commission is to have discretion to permit security offerings to become effective in less than that time. The Commission has agreed to sponsor, or not to oppose, a bill to that effect. It still sticks to its point, that it be given discretion as to how soon it is to allow a registration to become effective, and the investment bankers naturally don't like that discretionary feature, arguing for government by law and not by men, and reserving their right to sponsor further amendments next year when Congress meets again. But at least a breach has been made in the granite wall of resistance to any modification which the SEC has heretofore presented.

The Securities Act of 1933 and the Securities Exchange Act of 1934 need overhauling for the fundamental reason that they were enacted in a period of punitive political resentment against Wall Street, and that for that reason they contain features which only nominally protect investors, but which actually defeat the interest of investors, deny them the right to make their own decisions, right or wrong, and obstruct the smooth functioning of the financial machinery by which the hopes of investors and the faith of industrial risk-takers are brought effectively In other words, regulation for the national welfare is one thing, and regulation for punitive or destructive purposes is another. two major security laws were written ostensibly to make the country's central financial machinerywhich is located in Wall Street-work better, but the resentment written into the two laws caused them to be written actually in such a way as to make the country's central financial machinery work less effectively, or not work at all. It is an unfortunate fact in human psychology that anything done in a spirit of resentment generally obstructs its own ends.

To be specific, the 20-day waiting period was enacted ostensibly "to afford a waiting or cooling period . . . to eliminate . . . abuses connected with high-pressure salesmanship . . . under circumstances permitting an inadequate examination by informed critics of the essential facts. . . ." Well and good, in theory, though it is odd that foreign securities (with certain exceptions), where most of the damage had been done, are permitted to be effective in seven days, while railroad securities, where far heavier losses were suffered than in the industrial and utility list, are exempt, as are municipal securities, despite the claims of grievous abuses aired by the SEC in its protective committee reports.

But this 20-day waiting period has, in fact, been no real gain to the investor, because of the requirements written into the law by vindictiveness. In the first place, the incredibly bulky registration statement is of no real advantage to anyone. Based on the idea of complete rather than adequate information, it costs months of work and thousands of dollars only to provide information which large investors and statistical houses could have had anyway for the asking, and which actually is a preposterous luxury to the average investor who can have the use of it only by the choice of a trip to Washington or the outlay of several hundred dollars for photostat copies of indescribably dull minutiae. The waiting period automatically deprives him in large part even of the questionable advantages of reading the prospectus, because in order to prevent bond salesmen from committing the crime of "jumping the gun," underwriters naturally are very reluctant to issue even the "red herring" prospectuses which outline (in a brief 50 to 100 scarcely readable pages) what the offering is about. The investor is so thoroughly protected against himself that in contrast to the fairly accurate four- or eight-page summary prospectuses which he used to receive of an offering, he now has the choice between wading through a 50-page prospectus, which he will not do, or accepting the so-called tombstone advertisement which informs him of nothing more than the price, coupon, maturity, offering houses, and such baldest details.

The 1933 Act should be amended at least so that those corporations which have already furnished the preposterously voluminous information called for by the Act, in previous offerings, or as a prerequisite to exchange listing, and which have thereby automatically submitted themselves to the additional requirement of periodic additional information, should be excused from submitting the same information and going through the 20-day waiting period for any additional security offerings. Only a wish to encumber rather than to speed the operations of Wall Street can stand in the way of such a proposal. In fact, it would hurt no one if the present registration requirements were entirely eliminated. They help no one. The institutional investors and the investment research houses who want the last significant detail can always get them from the issuing house. About the only really tangible argument to be cited for the registration statement is that it has forced some investment bankers, some corporations, and some accounting firms to think twice and then thrice about certain accounting practices. There is some good to be found in every requirement for self-analysis or for review of what has been taken for granted; but to justify the whole procedure on this basis is about the same as to require every able-bodied male to lie down on a psychiatrist's couch for a year's psychoanalysis or to pass a law that every time an automobile passes the 5,000-mile mark the motor, drive-shaft, and all, must be pulled apart for mechanical analysis. Life isn't like that. It's too brief.

Here are some of the specific changes needed in the Federal security laws to make them better workable.

First, they should be simplified and consolidated. The 1933 Act and the 1934 Act impose different types of liability. Both should be made equally mild or equally severe. Second, the registration requirements of the 1933 Act are burdensome, costly, and unnecessary. Every effort should be made to reduce them, on the general theory that adequate disclosure is more important than full disclosure. Third, the 20-day waiting period is unnecessary, and should be drastically cut in every case where reasonably adequate information is already available. Fourth, the liability provisions, which largely determine the working out of the two laws, should be modified so that issuers and others are responsible only for damage actually caused by their actual negligence. The result, among other things, would be that the registration statement might get down to as readable a volume as the present prospectus and the present prospectus might get down to as readable proportions as the old-fashioned prospectus. Fifth, in order that underwriters and subunderwriters be induced to pass around advance information of new offerings, it ought to be made possible that everything, up to solicitations of orders, be permissible except actual firm sales of the new security even before the simplified registration becomes effective. Sixth, the liability provisions and the requirements of inclusion or omission of "material fact" should be so reasonably rewritten that the prospectus will become an engine of information to the investor instead of an instrument of protection to the underwriter. For this purpose the liability provisions of the Securities Act of 1934 and the Utility Act of 1935 provide a ready blueprint for rewriting of the 1933 Act. Seventh, sub-underwriters ought to be allowed a defense in rescission suits if they can show that they relied properly on investigations made by other underwriters and if their names are not included in the prospectus. Eighth, the period for the compulsory distribution of prospectuses should be cut down. Ninth, the investment banking business deserves to know the line the SEC intends to draw between manipulation and "pegging, stabilizing, and fixing" prices.

This latter involves modification of the 1934 Act. The same Act requires amendment also so that Section 9 (a) (2) shall be as reasonable in its rule against manipulation as is the present Stock Exchange rule against it. It needs modification of Sections 12 and 13 on the present silly requirements for information on financial history and the troublesome and doctrinaire requirements on sales and cost of sales. It needs modification of Section 14 (a) to prevent the SEC from trying to promulgate the preposterous proxy solicitation requirements which are now forcing corporations back to their old minimum quorum requirements. It needs modification on the notorious Section 16 (b) which requires "insiders" to turn over six months' security profits to the corporation, but says nothing about six months' losses, though these insiders have to make public their transactions anyway.

The whole system of Federal regulation of the securities markets, including not only the Acts of 1933 and 1934, but the Utility Act of 1935, the amendments on unlisted securities of 1936, the revision of Section 77-B of the Bankruptcy Act in 1938, and the Maloney Act and the Barkley-Cole Trust Indenture Act of 1939, needs revision on the general principle that the law should help the securities markets to work, not hamper them.

An Excess-Politics' Tax

The industries of the United States, and its people, are presently threatened with the grafting upon the already unbalanced and cumbersome conglomeration of taxes by which their activities are hampered of a substantial re-enactment of the so-called excessprofits' tax of the first World War period. When the flood-gates of appropriation were impetuously opened for an outflow of billions of the people's cash for war-like preparations, euphemistically called defensive, it was inevitable that some minds should turn to the expedients of taxation by which efforts were made, during the former period of warfare, to divert to the public treasury substantial portions of any unusual profits assumed to be attributable to the extraordinary conditions of the time. Such measures were adopted in England as well as in the United States but, despite their elements of superficial popularity, were repealed in this country as promptly as possible after cessation of the abnormal conditions of which they were an outgrowth. It was necessarily recognized that this form of special war tax was nothing but a crude makeshift, operating unequally and oftentimes most unjustly, penalizing in many cases commendable efficiency in the public service, and not only badly adapted to the times and conditions of peace but

susceptible of very great improvement should future resort to taxation involving the same generic principle and the same subject-matter ever become expedient.

Whether it was desirable to re-impose taxes of this general character, in view of the enormous recent appropriations for war materials and equipment, was almost the first inquiry addressed to the Secretary of the Treasury when the leaders of the Senate and House of Representatives decided that their public obligations required immediate consideration of the fiscal means to be applied in raising the enormous sums which were being appropriated under Administration leadership. reply received from Secretary Morgenthau was, in substance, that it would not be desirable or satisfactory merely to re-enact the makeshift statutes which imposed the former taxes of this variety, but that the subject was receiving consideration by the Treasury's experts in taxation, who would, however, be unprepared to make suitable recommendations until they had had at least two months to devote to research and investigation after they had concluded with the more urgent matters with which they were currently engaged. Under these circumstances, Mr. Morgenthau urged that legislative consideration should be deferred to await the further studies in his Department which he believed to be prerequisite to wise action. At that time, President Roosevelt was openly anxious to induce Congress to adjourn and leave Washington and it is altogether probable that he was gratified to become possessed of such a sound reason for excluding from its deliberations proposals so likely to lead to discussion which could scarcely fail materially to prolong the session. At any rate, his complete acquiesence in the suggestions of the Treasury Department appeared to be beyond question. He vouchsafed no intimation to the contrary. Thereupon, the Ways and Means Committee, under Chairman Doughten, formulated and sanctioned its report upon the tax bill recently enacted, incorporating therein an entire section, written in the Treasury Department itself and transmitted with the authority of the Secretary of the Treasury, explaining why this particulaar tax item should be postponed for consideration by the new Congress which will come into existence on the third of next January.

The argument, in this section which originated in the Treasury, for deferred consideration, was strong and convincing. There was nowhere any protest and nothing was done to obtain different action, except the provisional adoption of the Connally amendment by the Senate, an amendment palpably hasty and unworkable which was readily dropped by the Conference Committee of the two Houses before which it was attacked by authorized representatives of the Treasury and of the Administration. In fact, no subsequent event has in any way impaired the strength of the position orginally taken by Secretary Morgenthau and his official advisers. There has been no change in any condition which an honest and well-disposed officer of the Government ought to regard in connection with an important measure of taxation. The only conditions which have in any way altered are political conditions, and propriety would leave them out of the reckoning in any matter of such pro-

found economic significance to a country still endeavoring to support the weight of a long and distressing period of business and industrial depression.

Doubtless, from another and an unworthy point of view the political changes that appeared were impressive and absorption in ambitions in which the aspiration to promote economic recovery does not occuppy the first place made it impossible that they should be ignored. Chief among them were these. First, Congress, actuated no doubt by such arguments as those advanced in these columns on June 8, 1940, was led to place higher value upon its obligations to the public than on subserviency to the Executive desire, and refused to bow before President pressure to abdicate its functions and to adjourn. Next, the Republican National Convention, at Philadelphia, proved to be a singularly united and independent body of men imbued with high patriotism and prompt to subordinate all minor matters to the one sound purpose of rescuing the country from the personal control of an impulsive and extravagant President who has shown that he is imperfectly restrained by comprehension of the great fundamentals of true democracy and the beneficent qualities of representative govern-

Arthur Krock, the reliable chief of the Mr. Washington Bureau of The New York "Times," relates that one prominent Democrat, an essential leader in any tax legislation by the present Congress, has declared that Mr. Willkie's nomination at Philadelphia resulted in "jitters" at the White House, out of which emerged the sudden reversal of policy with regard to the Profits' tax and the excited recommendation for early renewal of that tax in about the form in which it formerly existed. As told in Mr. Krock's column in The "Times," it was in the early morning of the second full business day after the making of the Republican nomination that Secretary Morgenthau asked certain Democratic leaders, including Chairman Harrison of the Senate Committee on Finance and Chairman Doughten of the Committee on Ways and Means of the House, to meet with him at once for further consulation upon tax measures. What occurred is thus related:-

"Secretary Morgenthau... said the President was anxious to send up a message for action at this session on an excess profits' tax. In reply to a question whether politics was involved, the story in the cloak-rooms is that Mr. Morgenthau smiled and said: 'a little.'

"There was an expression of reluctance from some of the visitors. They reviewed their understanding, the Treasury authorship of the pertinent section of the House report, their reasons, to believe the President had agreed to a postponement. They said... a political motive was obvious and not impressive... Later that day, the Secretary reported that the President's letter to the chiefs of Congress was ready and was going forward."

The letter did go forward. It will be remembered that it urged renewal of the profits' taxes on two grounds; (1 that the Government would thus derive additional tax revenues, and (2) that it would prevent some men and corporations from accumulating their beneficial interests in payments for materials and equipment supplied to the United

States under contracts to be entered by high officers in the Federal service in accordance with the laws, and at a time of urgent Governmental need. This is all old stuff, which ought to be disgustingly transparent and familiar to everyone of mature age and sound intelligence in the country. Playing lowgrade politics with the Federal power of taxation has been so frequent since March, 1933, and the disguise of public purpose so thin and so readily penetrated that any misunderstanding, either as to its impulse or its impropriety, ought to be impossible. From the beginning, Mr. Roosevelt's tax proposals have rarely emerged except with dramatic suddenness and they have commonly been supported by arguments as appealing to the envious and discontented as they must have been revolting to the soberminded and clear-thinking who comprehend as well as may be the nature and final incidence of such unusual expedients in taxation. No one ought to forget, for example, how the disasterous and discredited tax upon undistributed corporate surplus was suddenly sprung upon the public, with the result of compelling Congress to abandon an impending adjournment, and, so plainly that no sane observer ever entertained the slightest doubt, as a

means to over-bid the late Huey Long, and wean from his support as many as possible of the dull minds and ignorant zealots who flocked under the banner of his Share-the-Wealth clubs. The indications are that, without openly disclosing their resentment at this latest proposal, the Democratic leaders in Congress will strive to compel the President to remain satisfied with the mere record that he favors such a tax, allowing the legislation to be postponed pending adequate consideration and the formulation of a measure less impracticable and obnoxious in execution than any which could be prepared and brought to a vote at this time. Possibly, however, this superficial trickery of troubled leadership, one of the excited attempts at manipulation of a doubtful Presidential campaign, may result in adding another hasty and imperfectly conceived item of tax legislation to the already long list of taxes now upon the statute book and urgently demanding revision, with some repeals, a great deal of simplification, and many re-adjustments. If it should, the term excess profits' tax applied to it would be a misnomer. In accurate nomenclature, it ought, in that case, to be designated as the "Excess Politics' Tax."

Gross and Net Earnings of United States Railroads for the Month of May

Owing to a fairly substantial volume of general business, the railroads of the United States were able to report rea-sonably good earnings in May. On a comparative basis, the gross earnings of these carriers during the month were nearly equal to some of the best similar months since the great depression settled over the country a decade ago. The net earnings, before taxes, were the best for any May since 1930. These financial results of railroad operations for the period are heartening, but continuance of the improvement period are heartening, but continuance of the improvement remains a matter of conjecture. There is much uncertainty regarding the war in Europe and the political situation within the United States, and a similar lack of definiteness in the economic sphere. The collapse of the French defense in June, before the German Nazi onslaught, leaves Great Britain to fight alone against the German-Italian combina-tion. The British Government has taken over the French arms contracts it is true which suggests that the mild arms contracts, it is true, which suggests that the mild stimulus provided by the war buying in this country may continue for a time. Such astonishing turns have been taken by the European conflict, however, as to suggest the need for early settlement of American internal problems without produces delay.

without needless delay.

The stake of the railroads in this matter is sufficiently obvious, since these carriers depend upon the offerings of obvious, since these carriers depend upon the offerings of freight and passenger traffic which express the economic situation. It would appear, incidentally, that the favorable aspects outweigh the others for the time being. An enormous program for the increase of American armaments has been undertaken in Washington, because of the course of the European war, and the effect doubtless will be to stimulate trade and industry, albeit at the expense of still greater Federal Treasury deficits than have been common under the New Deal. It may be, moreover, that a change in Administration can be effected soon, for the Republican National Convention choose a strong candidate in Wendell L. Wilkie, former head of Commonwealth & Southern Corp. and one of the most stringent critics of the Roosevelt Corp. and one of the most stringent critics of the Roosevelt regime. On the eve of the Democratic National Convention, it is still uncertain whether President Roosevelt aims to defy all sound traditions of the country and seek a third term. These uncertainties naturally are depressing to business in general, and the railroads suffer with the rest of the country.

If remains true on the other hand, that the month of

It remains true, on the other hand, that the month of May was reasonably satisfactory from the point of view of the railroads. Almost all sections of the country showed of the railroads. Almost all sections of the country showed transportation gains, as against the same month of 1939. The improvement was especially pronounced in the Pocahontas coal region, where a mining strike curtailed production sharply in April and May last year. To a degree, this circumstance also affected the earnings tabulation of the Great Lakes and Central Eastern regions, on a comparative basis. For last May, accordingly, gross earnings of the railroads amounted to \$342,532,854, against \$301,993,228 in the same month of 1939, an increase of \$40,539,626, or 13.42%. Additional operating expenses absorbed only a part of this gain, and net earnings in May totaled \$90,494,636, against \$65.198,328 in the same period of last year, a gain of \$25,296,308, or 38.80%. We now present these results in tabular form:

Month of May	1940	1939	Inc. (+) or L	ec. (—)
Mileage of 132 roads	232,819 \$342,532,854 252,038,218 (73.58)	236,794,900	+\$40,539,626 +15,243,318	$-0.30 \\ +13.42 \\ +6.44$
Net earnings	\$90,494,636	\$65,198,328	+\$25,296,308	+38.80

In order to indicate in a simplified form the measure of trade activity in relation to its bearing on the revenues of the railroads during the month under review, we have brought together in the table below the figures indicative of activity in the more important industries, together with those pertaining to grain, cotton and livestock receipts and revenue freight car loadings for the month of May, 1940, as compared with the same month of 1939, 1938, 1932 and 1929. It will be readily seen, on examination, that, with the exception of anthracite coal production, the output of all the industries covered was in greater or less degree much the industries covered was, in greater or less degree, much larger than in the corresponding month of last year. A substantial increase, too, as might be expected, is shown in the number of cars loaded with revenue freight. Receipts Receipts of cotton at the Southern outports were also on a greatly increased scale, but receipts at the Western primary markets (taking them as a whole) of the various farm products, and the receipts of livestock at the leading cattle markets (taking them collectively) fell below those of a year ago.

Note-Figures in above table issued by: a United States Bureau of the Census.

a United States Bureau of the Census. b F. W. Dodge Corp. (figures for 37 States east of Rocky Mountains). c National Bituminous Coal Commission. d United States Bureau of Mines. e Association of American Railroads. f Compiled from private telegraphic reports. 2 Reported by major stock yard companies in each city. h New York Produce Exchange. k "Iron Age." 1 American Iron and Steel Institute. m National Lumber Manufacturer's Association (number of reporting mills varies in the different years). x Four weeks. z Five weeks.

All that has been said above applies exclusively to the railroads of the country as a whole. Turning our attention now to the separate roads and systems, we find the exhibits in consonance with the results shown in the general totals. In May, 1940, 45 roads are able to show gains in gross earnings in excess of \$100,000, and 11 roads are obliged to show decreases above that amount, while in the case of the net earnings, 34 roads report increases and 12 decreases. Outstanding among the roads and systems able to show increases in both gross and net earnings alike are the Pennsylvania RR., which heads the list in both gross and net, reporting \$6,995,287 in gross and \$4,358,024 in net; the Chesapeake & Ohio, with \$5,692,728 increase in gross and \$4,156,654 increase in net; the New York Central, with a gain in gross of \$4,151,302 and in net of \$1,236,332. (These gain in gross of \$4,151,302 and in net of \$1,230,532. (These figures cover the operations of the New York Central and its leased lines; when, however, the Pittsburgh & Lake Erie is included, the result is a gain in gross of \$4,926,532 and in net of \$1,722,255); the Norfolk & Western, reporting a gain of \$3,763,967 in gross and of \$2,698,094 in net, and the Baltimore & Ohio, showing a gross gain of \$3,244,021 and a net increase of \$2,133,362. Among the roads showing decreases in both gross and net earnings are found the Chicago creases in both gross and net earnings are found the Chicago Burlington & Quincy, with a loss of \$545,162 in gross and in net of \$731,346, and the Atlantic Coast Line, showing \$270,656 decrease in gross and \$533,155 in net. In the following table we show all changes for the separate roads and systems for amounts in excess of \$100,000, whether increases or decreases, and in both gross and net:

Cincinnati Northern and Evansville Indianapolis & Terre Haute. Including Pittsburgh & Lake Erie, the result is an increase of \$1.722.255.

When, as is our custom, we arrange the roads in groups or geographical divisions, according to their location, the returns, it is seen, are in consonance with the figures for the separate roads. All the three great districts—the Eastern, the Southern and the Western—together with all the various regions comprising these districts, show increases in both gross and net earnings alike, with the single exception of the Southwestern region (in the Western district), which in both instances reports a small decrease. A few of the regions show a very high percentage of gains both in gross and net, the Central Eastern region (in the Eastern district) reporting 22.46% in the gross and 64.60% in the ret; the Pocahontas region (in the Southern district) 77.20% in the gross and 201.44% in the net, and the Northwestern region (in the Western district) 13.23% in the gross and 68.40% in the net. Our summary by groups is as below. As previously explained, we group the roads to conform with the classification of the Interstate Commerce Commission. The boundaries of the various groups and regions are indicated in the footnote to the table: regions are indicated in the footnote to the table:

SUMMARY BY GROUPS-MONTH OF MAY Gross Earnings

District and Region	1940	1939	Inc. (+) or Dec. (-

NOTE—Our grouping of the roads conforms to the classification of the Interstate Commerce Commission, and the following indicates the confines of the different groups and regions:

EASTERN DISTRICT

-Comprises the New England States. New England Region-

Great Lakes Region—Comprises the section on the Canadian boundary between New England and the westerly shore of Lake Michigan to Chicago, and north of a line from Chicago via Pittsburgh to New York.

Central Eastern Region—Comprises the section south of the Great Lakes Region ast of a line from Chicago through Peorla to St. Louis and the Mississippi River the mouth of the Ohio River, and north of the Ohio River to Parkersburg, W. Va., and a line thence to the southwestern corner of Maryland and by the Potomac iver to its mouth. SOUTHERN DISTRICT

Southern Region—Comprises the section east of the Mississippi River and south of the Ohio River to a point near Kenova, W. Va., and a line thence following the eastern boundary of Kentucky and the southern boundary of Virginia to the Atlantic.

eastern boundary of Kentucky and the southern boundary of viginia to the National Pocahontas Region—Comprises the section north of the southern boundary of Virginia, east of Kentucky and the Ohio River north to Parkersburg, W. Va., and south of a line from Parkersburg to the southwestern corner of Maryland and thence by the Potomac River to its mouth.

WESTERN DISTRICT

WESTERN DISTRICT

Northwestern Region—Comprises the section adjoining Canada lying west of the reat Lakes Region, north of a line from Chicago to Omaha and thence to Portland, in by the Columbia River to the Pacific.

Central Western Region—Comprises the section south of the Northwestern Region est of a line from Chicago to Peoria and thence to St. Louis, and north of a line m St. Louis to Kansas City and thence to El Paso and by the Mexican boundary the Pacific.

Southwestern Region—Comprises the section lying between the Mississippi River south of St. Louis and a line from St. Louis to Kansas City and thence to El Paso, and by the Rio Grande to the Gulf of Mexico.

south of St. Louis and a line from St. Louis to Krisss City and tende to the Gulf of Mexico.

The grain traffic over Western roads (taking them collectively) in May the present year fell very much below that of May, 1939. The decrease was brought about by the large falling off in the receipts of corn and oats, the movement of all the other cereals having been, in greater or less degree, larger than last year. Altogether, the receipts at the Western primary markets of the five staples, wheat, corn, oats, barley and rye, in the five weeks ended June 1 were only 60,025,000 bushels, as against 67,744,000 bushels in May a year ago and 65,934,000 in May, 1938. In the same period of 1932 the grain movement fell to 39,732,000 bushels, and back in 1929 totaled 49,712,000 bushels. In the table which follows we give the details of the Western grain movement in our usual form:

WESTERN FLOUR AND GRAIN RECEIPTS

As to the cotton traffic over Southern roads, we find that both the overland shipments and port receipts of the staple were on a greatly increased scale as compared with May, 1939. Gross shipments overland of cotton totaled 109,053 bales in May, 1940, as against only 87,082 bales in May, 1939, and 75,402 in 1938. In May, 1932, total overland shipments fell to 23,095 bales, and back in 1929 were 35,141 bales. Details of the port movement of cotton for the past three years are set out in the subjoined table:

RECEIPTS OF COTTON AT SOUTHERN PORTS FOR MONTH OF MAY AND SINCE JAN. 1

The Business Man's Bookshelf

Commercial Banks and Consumer Instalment Credit

By John M. Chapman and Associates. National Bureau of Economic Research. 313 pages and preface. \$3.

In 1938 the National Bureau of Economic Research inaugurated a broad program of research in finance, under grants from the Association of Reserve City Bankers and the Rockefeller Foundation. The initial project of this program was a comprehensive investigation of the instalment financing of consumers. The present study of commercial banks as agencies of consumer instalment credit is one of a series dealing with the important financial institutions which

participate in consumer instalment financing.

This is a factual study of the personal loan departments and time-sales activities of commercial banks, providing extensive information heretofore almost wholly lacking concerning various phases of this type of business. The topics covered include: (1) growth of personal loan departments, (2) extent of bank consumer financing, (3) type and size of personal loans, (4) volume of sales finance credit extended, (5) legal status of consumer lending by commercial banks, (6) customers of personal loan departments, (7) operating methods and collection experience, (8) factors affecting credit risk, (9) customer charges, (10) aggregate cost to the consumer, (11) income, expenses and profits, (12) bank financing of other consumer credit agencies, (13) competitive relations with other agencies in the field of consumer in_ stalment credit, and (14) interbank competition and cooperation.

The book evidently prepared with care and competence is a veritable storehouse of information which, we should suppose, those actively engaged in the business or with particular interest in it would not do without. For those who do not need so detailed an acquaintance with the facts an informative summary of findings is presented at the outset.

The Busch Jewelry Stores Labor Injunction

By John H. Mariano, Ph. D., Member of the New York Bar. The Christopher Publish-ing House, Boston. 238 pages. \$2.50

This book is devoted, as its title indicates, to the "Busch" case, which is described as a causa celebre and has having made labor injunction history in New York State. author, who served as Secretary of an arbitration committee appointed by the court in the course of the proceedings and as referee, carefully, point by point, sets down the history of this famous case from its beginning to its end dispassionately and without bias. Indeed to the casual reader he appears at times to "lean over backwards" to avoid even the appearance of taking sides, although the facts he sets forth are clearly of a sort to provoke some plain speaking in the premises.

Residents of New York City scarcely need to be reminded of the essential facts of the controversy. In 1938 a dispute arose between the Busch stores and their employees which developed into a strike or lockout-which it was is a matter of dispute. In any event, certain local affiliates of the C. I. O. at once began a type of picketing apparently inspired by the technique that had become more or less the order of the day somewhat earlier in such states as Ohio and Michigan. The Busch interests petitioned for injunctive relief, and at once a number of questions concerning the interpretation of the so-called anti-injunction law of the State of New York were at issue.

The proceedings gave rise, as the author points out, to two injunctions, two convictions involving 15 persons, two jury trials, the assessment of hundreds of dollars in fines, four contempts, one citation against a labor attorney, an arbitration, a reference, an election with the aid of the New York State Labor Relations Board, three appeals and a dissenting opinion in the Court of Appeals which the author finds as significant as the majority opinion which upheld the injunction.

the injunction.

finds as significant as the majority opinion which upheld the injunction.

There is no reason to review here the conduct of the picketers save to say that it went to wholly indefensible, and even to outrageous extremes, and that police protection either for the public or the plantiffs was simply non-existent. The question was whether the "advanced" anti-injunction law of the State of New York and the sweep of popular, maudlin sentementalism had robbed the courts of the power to give effective relief in a situation of this sort. The question whether a court could in such circumstances enjoin all picketing if upon the record it was evident to the court such a course was indicated as a protection against unlawful picketing was particularly at issue. The courts, including both the trial court and the higher tribunals, proved stronger than the unions, and the new law, although imposing burdens, did not prove a barrier to the affording of relief.

This seems to the present reviewer at all events to have been the kernal of the matter, and it is the record of the proceedings which constitutes the warp and woof of the book here under discussion, this and a number of conclusions, both legalistic and general, drawn by the author from the whole experience, which seems to have left him remarkably free from bias and even from that resentment which most Americans find it hard to avoid in the presence of such behavior as that of the unions in this case.

Securities of the United States Government and its Instrumentalities

Published by The First Boston Corp., New York and Boston—No Charge

New York and Boston—No Charge

A new and amplified edition of "Securities of the United States and Its Instrumentalities" has just been brought out by The First Boston Corporation. The 1940 edition contains 89 pages into which are crammed an encyclopedic amount of information on government securities and on securities of the various Federal agencies.

In addition to an up to date version of the charts and textual matter contained in previous editions, and which gives, in ably digested form, the pertinent facts concerning Federal direct and guaranteed debt, the current issue contains data on the corporate and individual income taxes, and capital gains taxes, as well as a discussion of institutional portfolio problems from the standpoint of accounting pro-

portfolio problems from the standpoint of accounting procedure, taxes, maturity diversification, and account activity.

The volume is available without charge upon application to The First Boston Corp. and it is not extravagant to say that it is an invaluable guide to the Government securities

Understanding American Business

By Neill and Cool. 448 pages. Macmillan. \$2.50

This is the time of the year when the youth of the country, This is the time of the year when the youth of the country, just out of High School, or possibly about to enter College, wonders what form of career lies waiting in the business field. This book would come as a boon to such enquirers: they will receive a clearcut impression of what is meant by the business world, industrial, agricultural, entertainment enterprises. A discussion of business in general is followed by analyses of incorporating, financing, insurance, distribution. The place of chain-stores, and the cooperatives are treated as lucidely as are the functions of trust companies as executors of wills, or the roles of banks, and the place of advertising in the mechanism of world-wide business.

Covering such a wide range of subjects, this book does not

in the mechanism of world-wide business.

Covering such a wide range of subjects, this book does not possess the profundity of a text-book. Yet it does give the student a fairly broad conception of almost any phase of business. Take for instance the subject of consumer credit: after indicating its economic importance, the various consumer-credit institutions are briefly described—credit unions, industrial banks, personal-loan departments of banks, personal finance companies, small-loan laws, pawnbrokers, remedial loan societies unlicensed lenders, instalment credit. remedial loan societies, unlicensed lenders, instalment credit, sales finance companies, open charge accounts. Statistics showing volume of loans in a given year, and the amounts outstanding at the end of the year add to the impressiveness of this aspect of business enterprise.

The systems of distribution are similarly analyzed and discussed so that the part played by the wholesaler or jobber, and of the advertising agency are made clear, and the values of their several functions are carefully weighed. The book having been written with the collaboration of the National Batter Business Burgay assures one that some riffells to be Better Business Bureau assures one that some pitfalls to be avoided are made known. Excellent illustrations, good charts, and useful statistics will help out the value of the text which, throughout, strikes the right key-note in aiming to interest and instruct the intelligent and studious young

man or woman.

Perhaps the greatest value of this work will be its influence in shaping the destiny of those who have not yet entered business, or who are not yet so deeply involved that they cannot retrace their steps. They will discover that there exist many occupations which had been overlooked in their possibly brief survey of openings to be sought. Each chapter is followed by a set of questions intended to test the reader's grasp of what he has just read. Also, the technical phrases which have just been met come to view again as a list of "reference words" meets the eye to check the reader's retentiveness. The chapter on "The Business of Banking" brings up the following: "Frozen loans, Bank of issue, Sight Draft, Trade acceptance, Liquidity" and many more.

While the book will be specially useful and valuable to the son, Father will probably be glad to dip into it, whenever it is available. At this time of the year, it will be easy to discover some recipient who would consider it a most appropriate gift.

W. C. B.

Manners and Morals of Business

By Max Radin. 259 pages and index. Bobbs Merrill. \$2.50

Coming from the hand of a Professor of Law at the University of California, this book does not confine itself to a consideration of the conduct of men in business, as regulated by law. The author dips into the usages of the Middle Ages, plumbs history in search of explanations of or sidelights on modern trade and business habits. Describing the lights on modern trade and business habits. Describing the origins of trade, he traces its development until he comes to the modern merchant, and finds that in the evolution many sinister qualities were responsible for the growth and influence of the class—greed, for instance, and the callous indifference to the health or welfare of employees. The unpleasant characteristics arising from the clash of competitors in trade or industry are reviewed and entertainingly discussed. That all is not fair in business is made clear, whether in considering the middle ages, or international rivalries of today, from Mr. Radin's objective marshaling of the facts.

He speaks neither as a moralist, nor as a disgruntled business renegade. He notes evil or good conduct in the world of business as excrescences which have come and gone or are still with us, subject to such changes as public opinion may dictate, or passively may tolerate. The ethical aspects of salesmanship, the functions of greed, chicanery and cajolery in marketing products, the evils which spring from the lust of accumulation in enterprises big and little, are illustrated from cases which have come to the author's attention as an expounder of law. They afford room for much speculation, and seem to point to the greater part to be played in the future by the State as supervisor or controller. "A world without gaudy advertising," says the author, without high-pressure salesmen, without economic bribery, without exploitation of labor, without fraud or intrigue in business, may be far below . . a desirable society. We should be abundantly satisfied if we could think of it as a remote but not unattainable ideal."

Ending upon this note, one suspects that Mr. Radin's studies have led him to a conclusion perhaps unduly pessimistic. Consideration of his book as a whole helps one to believe that much that was ignoble, blatant and meretricious still with us, subject to such changes as public opinion

mistic. Consideration of his book as a whole helps one to believe that much that was ignoble, blatant and meretricious in business has been swept away for all time. That which still remains receives less and less encouragement to survive. Mr. Radin's profoundly interesting book will well repay its readers desirous of seeing such a better future brought about.

W. C. B.

The Course of the Bond Market

The U.S. Treasury Department made its first offering of bonds for new money since December, 1939, when it sold this week \$600 millions of 21/4s due 1954-56. The issue, sold at par, advanced to a premium of 26-32 points by Friday night. High-grade bonds, as well as governments, have remained firm this week and lower grades have advanced moderately.

High-grade railroad bonds have advanced but there has been little trading volume among this type of security. Medium-grade rail issues registered gains as did the more speculative rails. Louisiana & Arkansas 5s, 1969, advanced $1\frac{1}{8}$ to 80. Boston & Maine 5s, 1967, rose $6\frac{1}{2}$ points to 65½. Defaulted rails scored price gains with Chicago Great Western 4s, 1959, at 27¾, up ¼.

Trading in utility bonds has been extremely light but the tone has been firm in all departments. Investment issues have been particularly steady and a new offering of \$32,-000,000, Indianapolis Power & Light 31/4s, 1970, was well received. Speculative issues moved up with Electric Power & Light 5s, 2030, Cities Service 5s, 1969, and New England Gas & Electric 5s, 1950, recording good gains. Canadian utilities also experienced marked recovery among which were Canada Northern Power 5s, 1953, and Bell Telephone of Canada 5s, 1957.

Mixed changes, primarily on the up side and confined generally to a point or less, have been the rule among industrial bonds this week. Most changes among oil company obligations have been downward but relatively unimportant. Steel company obligations have been mixed, with more gains than losses. In the retail selling group the United Drug 5s, 1953, gained 11/2 points at 83, and among shipping company obligations the International Mercantile Marine 6s, 1941, showed further strength after several points gain last week.

The foreign bond market has been quite steady on the The outstanding degree of strength has been shown whole. by Norwegian bonds, most of which advanced from 2 to 3 points. Danish bonds also moved up and Brazilian issues gained moderately. Italian loans recovered partly from last week's decline. The Irish Freestate 5s continued lower on invasion fears.

• These prices are computed from average yields on the basis of one "typical" bond (4% coupon, maturing in 30 years), and do not purport to show either the average novement of actual price quotations. They merely serve to illustrate in a more comprehensive way the relative levels and the relative movement id averages, the latter being the truer picture of the bond market.
† The latest complete list of bonds used in computing these indexes was published in the issue of Jan. 13, 1940, page 179.

Indications of Business Activity

THE STATE OF TRADE—COMMERCIAL EPITOME

THE STATE OF TRADE—COMMERCIAL EPITOME

Friday Night, July 12, 1940.

Business activity reflected the over-the-fourth holiday period, the "Journal of Commerce" weekly index showing a drop to 86.1, and compares with a revised figure of 103.6 for the previous week and 73.5 for the corresponding week of 1939. The business outlook continues most promising. Informed observers state that the volume of private industrial construction contracts let this year may achieve an all-time peak under the stimulus of defense production expansion. Such construction totaled \$51,130,000 last month, according to "Engineering News-Record." With the exception of June, 1937, this was the highest monthly level of any June in 10 years. For the first 6 months industrial construction contracts totaled \$220,000,000, or only \$60,000,000 less than the total construction for all of last year. Industrial con-

struction during 1929, the previous peak, totaled \$547,000.-000, informed sources state. To achieve this level, the monthly average of contracts over the remainder of the year would have to approximate only \$50,000,000. It is stated that the more generous depreciation policies contemplated by the Government, coupled with the availability of a large volume of Government funds for financing manufacturing plant construction is expected to release a large volume of plant construction, is expected to release a large volume of construction.

Only complete cessation of hostilities abroad would change the forward picture for the steel industry, and even then the readjustment might be temporary in view of the probability that such an event would accelerate America's own defense program, the "Iron Age" declares in its mid-week survey. The magazine reports a steady flow of new steel business only slightly interrupted by the holiday period last week. These orders, superimposed on already fairly large backlogs that have been accumulating in the last few weeks, assure a continued high rate of steel production for some time to come, the review observes. "While some of the current buying is admittedly of an anticipatory nature, the significant factor in the situation is that the present production is based on demands in which the automobile industry, the railroads and the construction industry, the principal peace time steel outlets, are taking less than average requirements and the national defense programs' requirements are largely to come," the survey states. "The automobile industry will be taking more steel as it goes further along in its 1941 model production schedules. The railroads are considering substantial purchases of equipment and rails and the construction industry should eventually be stimulated by the many projects earmarked for the defense program. With the expansion to be expected in these lines during the next few months, together with the national defense needs which will be felt in many directions as soon as plans mature, the probability of capacity operations in the fourth quarter or sooner is evident. The magazine reports that several large plants are already at or near capacity and that the Chicago district, with 95 per cent of facilities in operation, is at the highest level of activity since 1929.

Production of electrical energy in the United States totaled 2.264,953.000 kilowath hours in the week ended July 6th, compared with 2.077,956,000 for the corresponding week last year, an increase of 9%, the Edison Electric Institute reported. Output for the week, affected by the Independence Day holiday, was substantially under the 2.514.461,000 hours produced in the week ended on June 29th. For the latest week the largest percentage gain of 32.6% was recorded by the Rocky Mountain Central areas were the largest, and the country-wide rise, compared with the 1939 week, was 9.3%. The Association of American Railroads reported today of 50.00 ca

of year as a result of cool and damp weather in May and June.

The week was characterized by persistently cool weather in Eastern and Southern States, although near its close there was a reaction to about normal temperatures. In the Northwest and West, warm weather persisted. Rainfall was frequent over a large southeastern area and showers were general in the Atlantic States, but much of the interior had but little rainfall. Recent weather conditions have affected crops oppositely in different sections of the country. In the South, where June rainfall was heavy, frequent showers so far in July have been detrimental to agricultural interests to a considerable extent, especially in preventing the cultivation of row crops which are becoming weedy. Dry, sunshiny weather is urgently needed throughout the entire South. On the other hand, good rains in the middle Atlantic area relieved droughty conditions there and crops are responding rapidly to the improved situation, Government advices state. In general, however, temperatures were too low in the Northeast and from the Onio and lower Missouri Valleys southward for good growth of warm weather crops, although grasses and pastures made favorable advance. In the New York City area hot weather prevailed most of the week. After about five days of intense heat, relief was afforded by one of the heaviest storms of the year. A thunder and lightning storm which brought the temperature down 20 degrees within a half hour, caused considerable damage early last night in the metropolitan area and eastern New Jersey.

In Waterbury, Conn., three persons were killed by lightning. Today was mostly given over to rair, prevailing temperatures ranged from 60 degrees to 72 degrees. Partial cloudiness is looked for tonight, Saturday and Sunday. Somewhat cooler temperatures are expected tonight with thermometer readings touching a low point of 55 degrees both for the city and its outlying sections. Moderately cool weather is the prediction for Saturday and Sunday.

Overnight at Boston itiwas 57 to 76 degrees; Pittsburgh, 58 to 88; Portland, Me., 54 to 73; Chicago, 57 to 76; Cincinnati, 65 to 94; Cleveland, 58 to 79; Detroit, 55 to 75; Milwaukee, 54 to 66; Charleston, 72 to 90; Savannah, 72 to 94; Kansas City, Mo., 67 to 84; Springfield, Ill., 59 to 91; Oklahoma City, 65 to 71; Salt Lake City, 70 to 98, and Seattle, 58 to 82.

Revenue Freight Car Loadings Rise 81,749 Cars in Week Ended July 6

Loading of revenue freight for the week ended July 6 totaled 636,901 cars, the Association of American Railroads announced on July 11. This was an increase of 81,749 cars, or 14.7% above the corresponding week in 1939 and an increase of 135,920 cars, or 27.1%, above the same week in 1938. Loading of revenue freight for the week of July 6, which included holiday, was a decrease of 15,425 cars, or 15.3%, below the preceding week. The Association further reported:

Miscellaneous freight loading totaled 248,760 cars, a decrease of 60,000

IUITHET reported:
Miscellaneous freight loading totaled 248,760 cars, a decrease of 60,637 cars below the preceding week, but an increase of 34,107 cars above the corresponding week in 1939.
Loading of merchandise less-than-carload-lot freight totaled 127,240 cars, a decrease of 22,192 cars below the preceding week, and a decrease of 421 cars below the corresponding week in 1939.
Coal loading amounted to 103,272 cars, a decrease of 20,268 cars below the preceding week, but an increase of 17,375 cars above the corresponding week in 1939.

the preceding week, but an increase of 17,375 cars above the corresponding week in 1939.

Grain and grain products loading totaled 47,586 cars, an increase of 2,808 cars above the preceding week, but a decrease of 5,899 cars below the corresponding week in 1939. In the Western districts alone grain and grain products loading for the week of July 6 totaled 36,282 cars, an increase of 3,837 cars above the preceding week, but a decrease of 3,528 cars below the corresponding week in 1939.

Livestock loading amounted to 8,876 cars, a decrease of 2,165 cars below the preceding week, and a decrease of 542 cars below the corresponding week in 1939. In the Western districts alone loading of livestock for the week of July 6 totaled 6,193 cars, a decrease of 1,323 cars below the preceding week, and a decrease of 449 cars below the corresponding week in 1939.

Forest products loading totaled 25,038 cars, a decrease of 10,846 cars below the preceding week, but an increase of 3,023 cars above the corresponding week in 1939.

Ore loading amounted to 65,690 cars, a decrease of 1,748 cars below the preceding week, but an increase of 29,267 cars above the corresponding week in 1939.

week in 1939.

Coke loading amounted to 10,439 cars, a decrease of 377 cars below the preceding week, but an increase of 4,839 cars above the corresponding week

All districts reported increases compared with the corresponding week in 1939 and all districts reported increases over 1938 except the Southwest.

Retail Prices in June Show First Advance Since March, According to Fairchild Publications Retail Price Index

Retail prices gained fractionally during June, according to the Fairchild Publications Retail Price Index. The Index recorded the first change since April 1, showing a gain of 0.1% as compared with June 1, but also showing an increase of 4.3% above July 1 a year ago. The Index at 92.9 (Jan. 3, 1931—100) compares with 92.,8 for the previous month and 89.1 for the corresponding period a year ago. Prices show a decline of 3.8% below Sept. 1, 1937, high, but continue 5.7% above the 1936 low. Under date of July 12, the company further said:

With the exception of piece goods, all major groups showed slight changes during the month. Men's wear, women's wear and infants' wear recorded fractional gains; home furnishings showed a minor decline. All the groups, however, showed gains as compared with a year ago, with home furnishings and women's wear recording the greatest increases. However, infants' wear and home furnishings recorded the greatest advance above the 1936

low.

An analysis of the individual items comprising the Index show advances for the following: woolens, blankets, furs, men's and infants' shoes, and floor coverings. Decreases were recorded by silk piece goods women's silk hose, women's underwear, and electrical household appliances. The other items remained unchanged.

The fractional increase in the Index is not a forerunner of a sharp continued advance in retail prices, according to A. W. Zelomek, Economist, under whose supervision the Index is compiled. He points out that with wholesale prices falling to show any changes, retail quotations will hardly make much headway. Restricted price fluctuation for several months is likely, with the trend beyond that depending on foreign developments.

Moody's Commodity Index Lower

Moody's Daily Commodity Index closed at 155.8 this Friday, as compared with 156.4 a week ago. The principal individual changes were the decline in wheat and the advance in hog prices.

The movement of the Index was as follows:

Fri.	July	5156.4	Two weeks ago, June 28155.1
Sat.	July	6156.7	Month ago, June 12157.4
		8157.3	Year ago, July 12141.3
Tues.	July	9156.2	1939 High—Sept. 22172.8
Wed.	July	10156.0	Low-Aug. 15138.4
Thurs.	July	11156.3	1940 High—May 13166.8
Fri.	July	12155.8	Low-May 23 151.9

"Annalist" Weekly Index of Wholesale Commodity Prices Again Advanced During Week Ended July 6

Accelerating its rise of the two previous weeks, the "An nalist" weekly index of wholesale commodity prices advanced on July 6 to 80.2 from 79.5 the week before, and a

vanced on July 6 to 80.2 from 79.5 the week before, and a low since the outbreak of the war of 79.0 on June 15. The "Annalist's" announcement of July 8 further said:

The advance was due primarily to higher prices for most of the livestock and meat division and for spring wheat, the latter as a result of a crop scare in the Northwest due to unfavorable weather conditions in that region. The week's gain for the farm products group amounted to 2.3%, and for food products, 1.9%. The other grains, except barley, were higher in sympathy, while hides also were higher. Losses were principally among cotton, silk and wool, cocca, copper, tin and rubber.

"ANNALIST" WEEKLY INDEX OF WHOLESALE COMMODITY PRICES (1926=100)

(1926=100)

	July 6, 1940	June 29, 1940	July 8, 1939

All commodities	80.2	79.5	77.4

Wholesale Commodity Prices Increased 0.5% During Week Ended July 6, According to Bureau of Labor Statistics' Index

A sharp rise in market prices of farm products and foods, particularly livestock and poultry and meats, caused the Bureau of Labor Statistics' index of wholesale commodity prices to increase 0.5% during the week ended July 6, Commissioner Lubin reported on July 11. "The advance," Mr. Lubin said, "raised the all-commodity index to 77.5% of the 1926 average from 77.1, the lowest level reached since early in September of last year." The Commissioner added:

in September of last year." The Commissioner added:

With the exception of the 0.1% decline in the index for textile products, all group indexes showed increases ranging from 0.1% for fuel and lighting materials, metals and metal products, housefurnishing goods, and miscellaneous commodities to 1.5% for farm products. As compared with the corresponding week in July, 1939, each of the group indexes, except fuel and lighting materials, is substantially higher. The increases range from about 13% for metals and metal products to approximately 8% for hides and leather products. Fuel and lighting materials are 1.6% lower.

Higher prices for hides and skins, manila hemp, copra, and coal, in addition to the marked increases for farm products, resulted in the 0.7% advance in the raw materials group index. Prices for semi-manufactured articles rose 0.3% and manufactured commodities, 0.4%. Average whole-sale prices for nonagricultural commodities, as mesured by the index for "all commodities other than farm products," are 0.4% above the preceding week and the industrial commodities group, as measured by the index for "all commodities other than farm products and foods," is up 0.1%. The index for each of the five special classifications is substantially higher than a year ago.

From the Labor Department's announcement the following is also taken:

ing is also taken:

The farm products group index rose 1.5% principally because of higher prices for oats, rye, livestock and poultry, eggs, fresh milk (Chicago market), and sweet potatoes. Lower market prices were reported for barley, corn, wheat, lemons, hops, seeds, territory wool, white potatoes, and onions. Average prices for foods at wholesale were 1.0% above a week ago, caused largely by advancing prices for Chicago milk, fruits and vegetables, meats, eggs, lard, raw sugar, and cottonseed oil. Prices were lower for butter, rye and wheat flour, prunes, dried peaches, cocoa beans, Santos coffee, and corn starch. Part of the rise in livestock and meat prices was seasonal. The index for the hides and leather products group increased 0.4% primarily as a result of stronger prices for hides and skins and certain types of leather. No changes were reported in the general average prices for shoes and other leather products including luggage. A sharp break in prices of raw silk more than offset slightly higher prices for worsted yarns, men's work trousers, brown sheeting, and madras shirting with a net decline

shoes and other leather products including lugage. A sharp break in prices of raw silk more than offset slightly higher prices for worsted yarns, men's work trousers, brown sheeting, and madras shirting with a net decline of 0.1% in the index for textile products.

Seasonal advances in anthracite and bituminous coal prices caused the index for fuel and lighting materials to increase 0.1%. Strengthening prices for pig tin and ferromanganese were largely responsible for the 0.1% increase in the metals and metal products group. Lower prices were reported for scrap steel, solder, babbitt metal, and hand water pumps. The index for building materials increased 0.2% primarily because of higher prices for yellow pine lumber, red cedar shingles, carbon black, chinawood oil, and window glass. Prices were lower for rosin, linseed oil, ethyl acetate, butyl acetate, and Ponderosa pine and gum lumber.

Partly influenced by the higher tax rate on alcohols and stronger prices for oils and fats, the index for chemicals and allied products rose 1.4% during the week. Fertilizer materials declined 1.2% on the average. Cattle feed prices dropped 2.9% and crude rubber declined 3.3%. Higher prices were reported for cigarettes and boxboard. The index for housefurnishing goods showed a fractional increase.

The following tables show (1) index numbers for the main groups of commodities for the past three weeks, for June 8, 1940 and July 8, 1939 and the percentage changes from June 8 and June 29, 1940 and July 8, 1939 to July 6, 1940. (2) important percentage changes in subgroup indexes from June 29 to July 6, 1940.

Wholesale Commodity Prices Advanced Slightly During Week Ended July 6, According to National Fer tilizer Association

The general level of wholesale commodity prices was slightly higher last week, according to the price index comslightly higher last week, according to the price index compiled by the National Fertilizer Association, which rose for the second consecutive week. This index in the week ended July 6 was 75.1 compared with 75.0 in the preceding week, 75.1 a month ago, and 72.0 a year ago, based on the 1926-28 average as 100. The Association's announcement, dated July 8, went on to say:

July 8, went on to say:

A new low point for the year was registered last week by the food price average, with a sharp drop in potato quotations being largely responsible. Higher prices for cattle, hogs and poultry resulted in an upturn in the farm product index. Cotton was slightly lower and grain prices were mixed. A small decline was recorded by the textile average, which had risen in each of the three preceding weeks. Continued weakness in steel scrap, copper, and tin caused another downturn in the index of metal prices. The building material average fell to a new low for the year, reflecting declines in lumber and linseed oil. A mark-up in ethyl alcohol quotations, attributed to the national defense tax, was responsible for a rise in the chemical and drug index.

In spite of the slight rise in the all-commodity index, declines in individual price series outnumbered advances 27 to 21; in the preceding week there were 24 declines and 29 advances; in the second preceding week there were 36 declines and 21 advances.

June Department Store Sales Maintained at May Volume, Says Board of Governors of the Federal Reserve System

The Board of Governors of the Federal Reserve System The Board of Governors of the Federal Reserve System announced on July 6 that department store sales in June were maintained at the May volume, although a considerable decline is usual between these months, and the Board's seasonally adjusted index advanced to 93. This level is the highest since last December, and six points above the index for May. The index is shown below for the last three months and for June 1939.

INDEX OF DEPARTMENT STORES SALES 1923-25 Average==100

	June,	May,	A pril,	June,
	1940	1940	1940	1939
Adjusted for seasonal variation	93	87	89	86
	89	89	86	83

^{*} Monthly indexes refer to daily average sales in calendar months; June, 1940, tures estimated from weekly data.

Sales in the four weeks ended June 29 were 10% larger than in the corresponding period last year and the total for the first 26 weeks was 4% above a year ago, the Board said, presenting the following compilation:

^{*} During March and April changes from a year ago reflect in part the fact that Easter was on March 24 this year while in 1939 it was on April 9. On this account it is estimated that in comparisons with last year allowance should be made for an increase in March of about 4% and for corresponding reduction for the month

Production of Electric Energy in the United States for April and May, 1940

The production of electric energy for public use during the month of May, 1940, totaled 11,428,552,000 kwh., according to reports filed with the Federal Power Commission. This represents an increase of 12.3% when compared with the same month of the previous year. The average daily production of electric energy for public use was 368,663,000 kwh. during May which is 0.5% more than the average daily production during April, 1940. The production of electric energy by electric railways, electric railroads, and other plants which generate principally for their own use totaled 186,269,000 kwh., making a total production reported to the Commission for the month of May of 11,614,821,000 kwh. or an average daily production of 374,672,000 kwh. The Commission's report further disclosed:

The production by water power in May amounted to 4,578,836,000 kwh.

Commission's report further disclosed:

The production by water power in May amounted to 4,578,836,000 kwh. or 40% of the total output for public use.

Reports were received during June, 1940, indicating that the capacity of generating plants in service in the United States on May 31, 1940, totaled 40,646,000 kw. This is a net increase of 90,000 kw. over that previously reported in service on April 30, 1940. Occasionally changes are made in plants which are not reported promptly so that the figures shown for any one month do not necessarily mean that all the changes were made during that month but only that they were reported to the Commission since the previous monthly report was issued. since the previous monthly report was issued.

PRODUCTION OF ELECTRIC ENERGY FOR PUBLIC USE

The production of electric energy for public use by 12-month periods for each of the preceding 12 months is given below:

12 Months Ended	Production Kilowatt-Hours	% Change from Previous Year
June 30, 1939	120,565,000,000	+5
July 31, 1939	121.641.000.000	+7
Aug. 31, 1939	122,645,000,000	+8
Sept. 30, 1939	123,881,000,000	+9
Oct. 31, 1939	125,474,000,000	+11
Nov. 30, 1939	126,836,000,000	+12
Dec. 31, 1939	128.037.000.000	+12
Jan. 31, 1940	129,625,000,000	+13
Feb. 29, 1940	131,051,000,000	+13
Mar. 31, 1940	131,989,000,000	+13
Apr. 30, 1940	133,208,000,000	+13
May 31, 1940	134,459,000,000	+13

Note—Since the above data show production by 12-month periods, all seasons of the year are included in each total and the effect of seasonal variations is largely eliminated.

Total	128,037,000,000		+12		34	

Note—Above date are solicited from all plants engaged in generating electric energy for public use, and, in addition, from electric railways, electrified steam

railroads, and certain miscellaneous plants which generate energy for their own us Accurate data are received each month, representing approximately 98% of the tot production shown; the remaining 2% of the production is estimated and correction are made as rapidly as actual figures are available. Thus, the figures shown for the current month are preliminary while those for the preceding months are corrected in accordance with actual reports received and vary slightly from the preliminar data.

Coal Stock and Consumption

Coal Stock and Consumption

The total stock of coal on hand at electric utility power plants on June 1, 1940, was 10.827.636 tons. This was an increase of 3.2% as compared with May 1, 1940, and 36.4% as compared with June 1, 1939. Of the total stock 9,797.665 tons were bituminous coal and 1,029.971 tons were anthracite, increases of 3.0% and 4.9%, respectively, when compared with May, 1, 1940. Electric utility power plants consumed approximately 3.872.184 net tons of coal in May, 1940, of which 3,705,770 tons were bituminous coal and 166.414 tons were anthracite, increases of 3.9% and 0.1%, respectively, when compared with the preceding month.

In terms of days' supply, which is calculated at the current rate of consumption there was enough bituminous coal on hand June 1, 1940, to last 82 days and enough anthracite for 192 days' requirements.

Electric Output for Week Ended July 6, 1940, 9.0% Above a Year Ago

Above a Year Ago

The Edison Electric Institute, in its current weekly report, estimated that production of electricity by the electric light and power industry of the United States for the week ended July 6, 1940, was 2,264,953,000 kwh. The current week's output is 9.0% above the output of the corresponding week of 1939, when the production totaled 2,077,956,000 kwh. The output for the week ended June 29, 1940, was estimated to be 2,514,461,000 kwh., an increase of 9.3% over the like week a year ago.

F. W. Dodge Corp. Review of June Construction Contracts

The construction industry continued to forge ahead in June at a high level of activity seemingly unaffected by developments in Europe. Total contracts awarded last month in the 37 states east of the Rocky Mountains amounted to \$324,726,000, representing a 13% increase over June of last year, according to the F. W. Dodge Corp. This record gains added significance when it is noted that private contracts rose from \$160,721,000 in June, 1939 to \$177,410,000 in June of this year.

rose from \$160,721,000 in June, 1939 to \$177,410,000 in June of this year.

Residential building, which has been particularly strong this year, continued to show an improvement over comparable periods last year by rising from \$111,896,000 in June, 1939 to \$135,274,000 last month. The leading individual class in the residential field continued to be the one-family dwelling built by small home owners with the intention of living in their houses. That this class should bulk so large in the residential total adds stability to the construction industry and optimism to the outlook for a continued high level of work. level of work

level of work.

Public works and utilities contracts (92% of which was publicly financed) showed a 17% increase in June over the corresponding month last year.

Thomas S. Holden, Vice-President in charge of Statistics and Research of the F. W. Dodge Corp., said in commenting on the June record: "The high level of building activity recorded for June should dispel all remaining fear that the industry will, at any early date, suffer adversely from the economic displacements caused by the war. There may indeed be decreases in certain classes of construction: for example, public improvements of a civilian character—but such declines are likely to be offset by gains in other categories. Manufacturing building, as one example, is likely to continue at a substantial level, reflecting the advancement of the preparedness program. Moreover, Government projects for barracks, other defense buildings, are likely to bulk large in the total for the coming months. Industrial plant expansion will undoubtedly create a large demand for industrial housing."

Permit Valuations for May Building Construction at About Same Level as Month and Year Ago, Secretary of Labor Perkins Reports

Permit valuations for total building construction in May, 1940, were at practically the same level as for the preceding month and for May, 1939, Secretary of Labor Frances Perkins reported on June 29. "As compared with April, May permit valuations for new residential buildings registered

kins reported on June 29. "As compared with April, May permit valuations for new residential buildings registered a gain of 2%, and new non-residential buildings showed an increase of 3%," she said. "However, there was a decline of about 4% in permit valuations for additions, alterations and repairs to existing structures. Total building construction was slightly over 1% higher than during the past month. Miss Perkins added:

As compared with May, 1939, the indicated volume of residential construction showed an increase of slightly less than 1%. However, private residential construction over the same period showed a gain of 18%. The decrease in the total is due to the fact that the value of contracts awarded for United States Housing Authority-aided projects in May, 1940, was 51% less than in May, 1939. The value of new non-residential buildings was 3% higher during the current month than during the corresponding month of 1939. This is the second consecutive month this year in which non-residential building was greater than a year ago. In each of the first three months a decrease was shown as compared with the corresponding month of 1939. A decrease of 4% was indicated in permit valuations for additions, alterations and repairs to existing structures, while total building construction showed a gain of less than 1% over the year period. These data are based on reports received by the Bureau of Labor Statistics from 2,047 cities having an aggregate population of 59,888,000.

During the first five months of 1940 permits were issued in reporting cities for buildings valued at \$822,205,000, a decline of less than 1% as compared with the corresponding period of 1939. Permits issued for residential buildings for the first five months of the current year amounted to \$483,771,000, an increase of 9% over the like period of the preceding year.

The Labor Department's approved the less had the fall

ing year.

The Labor Department's announcement also had the fol-

lowing to say:

The changes occurring between April and May, 1940, in the permit valuations of the various classes of building construction are indicated in the following table for 2,047 cities having a population of 1,000 or over:

1	Change from April to May, 1940			
Class of Construction	All Cities	Excl. N. Y. City		
New residential	$^{+1.9\%}_{+3.1\%}_{-3.5\%}$	+8.4% +17.3% -4.0%		
Totali	+1.3%	+8.3%		

Permits issued during May, 1940, provided for 32,162 dwelling units. Of these, 4,620 were in projects under the jurisdiction of the United States Housing Authority. April permits in these cities provided for 33,408 dwelling units, of which 4,202 were in USHA-aided projects. Compared with May, 1939, there was a decrease of 1% in the total number of family-dwelling units provided. USHA projects for which contracts were awarded during May, 1939, provided for 8,803 dwelling units.

The percentage change in permit valuations from May, 1939, to May, 1940, by class of construction, is given below for the same 2,047 cities:

	Change from May, 1939 to May, 1940				
Class of Construction	All Cities	Excl. N. Y. City			
New residential	+0.6% +3.1% -4.1%	+0.2% +3.0% -2.7%			
Total	+0.4%	+0.4%

Total.

The information collected by the Bureau of Labor Statistics includes contracts awarded by Federal and State governments in addition to private and municipal construction. For May, 1940, Federal and State construction amounted to \$21,052,000; for April, 1940, to \$18,692,000, and for May, 1939, to \$36,453,000.

Permits were issued during May for the following important building projects: In West Hartford, Conn., for one-family dwellings to cost nearly \$600,000; in Belleville, N. J., for a factory building to cost \$1,000,000; in Jersey City, N. J., for a nurses' home at the Medical Center to cost over \$2,600,000; in Montclair, N. J., for an apartment house to cost \$700,000; in New York City—in the Borough of the Bronx, for apartment houses to cost nearly \$600,000; in the Borough of Brooklyn, for one-family dwellings to cost over \$900,000, and for apartment houses to cost almost \$950,000; in the Borough of Manhattan, for apartment houses to cost nearly \$600,000 and for school buildings to cost over \$1,000,000; in the Borough of Queens, for one-family dwellings to cost nearly \$3,000,000, and for apartment houses to cost over \$1,700,000; in Haverford Township, Pa., for one-family dwellings to cost nearly \$700,000; in Chicago, Ill., for one-family dwellings to cost nearly \$700,000; in Chicago, Ill., for one-family dwellings to cost nearly \$700,000; in Detroit, Mich., for one-family dwellings to cost nearly \$600,000; in Detroit, Mich., for one-family dwellings to cost nearly \$700,000; in Detroit, Mich., for one-family dwellings to cost nearly \$700,000; in St. Paul, Minn., for one-family dwellings to cost nearly \$700,000; in St. Paul, Minn., for one-family dwellings to cost nearly \$700,000; in St. Paul, Minn., for one-family dwellings to cost nearly \$700,000; in St. Paul, Minn., for one-family dwellings to cost nearly \$700,000; in Wilmington, Del., for an office building to cost searly \$700,000; in Wilmington, Del., for an office building to cost searly \$700,000; in Wilmington, Del., for an office building to co

hotel buildings to cost \$1,000,000; in Atlanta, Ga., for stores and mercantile buildings to cost over \$500,000; in Baltimore, Md., for one-family dwellings to cost over \$800,000 and for apartment houses to cost over \$500,000; in Alexandria, Va., for an electric generating plant to cost nearly \$1,500,000; in Tulsa, Okla., for one-family dwellings to cost nearly \$500,000; in Denver, Colo., for one-family dwellings to cost over \$1,000,000; in Denver, Colo., for one-family dwellings to cost nearly \$600,000 and for a factory building to cost over \$350,000; in Salt Lake City, Utah, for one-family dwellings to cost nearly \$500,000; in Burbank, Calif., for one-family dwellings to cost over \$550,000; in Los Angeles, Calif., for one-family dwellings to cost over \$550,000 and for apartment houses to cost over \$900,000; in Oakland, Calif., for one-family dwellings to cost over \$550,000; in San Diego, Calif., for one-family dwellings to cost nearly \$700,000; in San Francisco, Calif., for one-family dwellings to cost over \$1,400,000; in Portland, Ore., for one-family dwellings to cost over \$1,400,000; in Portland, Ore., for one-family dwellings to cost over \$1,400,000; in Portland, Ore., for one-family dwellings to cost approximately \$800,000. approximately \$800,000.

approximately \$800,000.

Contracts were awarded during May for the following USHA-aided projects: In New Bedford, Mass., to cost approximately \$696,000 (200 d.u.); in Elizabeth, N. J., to cost nearly \$1,254,000 (405 d.u.); in Chester, Pa., to cost approximately \$1,079,000 (350 d.u.); in Detroit, Mich., for three projects to cost approximately \$2,966,000 (715 d.u.); in Cincinnati, Ohio, to cost nearly \$2,489,000 (750 d.u.); in Portsmouth, Ohio, to cost nearly \$822,000 (260 d.u.); in Charleston, S. C., to cost over \$356,000 (129 d.u.); in Birmingham, Ala., for two projects to cost approximately \$4,088,000 (1,393 d.u.); in Denver, Colo., to cost nearly \$1.105,000 (346 d.u.), and in Helena, Mont., to cost approximately \$243,000 (72 d.u.). (72 d.u.).

United States Foreign Trade During May with Geographic Divisions and Countries

Statistics of United States foreign trade for May, made available by the Commerce Department July 5, reveal that while the value of exports to Europe continued to decline as in April, the value of shipments to Northern North America, Southern North America, South America, Asia and Oceania increased over the previous month. Imports from Europe, Asia and Oceania declined in value in May as compared with April, while imports from Northern North America, South America and Africa increased. The Commerce Department also noted:

Department also noted:
Canada, the United Kingdom and France continued to be the leading markets for United States exports. Shipments to Canada in May were valued at \$61,877,000, compared with \$54,373,000 in April; those to the United Kingdom totaled \$49.822,000 against \$53,339.000 in the previous month, and exports to France amounted to \$39,350,000 compared to \$45,990,000 in April.

Norway, most curtailed market for United States exports in May, took only \$11,000 worth of products as compared with \$537,000 in shipments during April. On the other hand, Finland, which took about \$750,000 worth of exports in April, was a market for products valued at \$3,436,000 in May.

in May.

Export figures for Germany, which for purposes of comparison include United States shipments to Austria, Czechoslovakia, Poland and Danzig, show a total of \$70,000 for May against \$35,000 for April.

United States exports to Argentina, valued at \$10.770,000 in May, were about \$730,000 above the average in the first quarter of the year and more than \$2,000,000 in excess of the value of April shipments. Imports from Argentina in May, valued at \$5,067,000, were about the same as for April.

ports from Argentina in May, valued at \$5,000,000, were only slightly in as for April.

Exports to Brazil in May, totaling \$10,384.000, were only slightly in excess of exports in April, while the value of Brazilian imports into this country in May, amounting to \$9,282,000, showed a gain of over \$2,000,000 above the April figure.

May export figures were above those of April for Chile, Cuba, the Dominican Republic, Honduras, Mexico, the Canal Zone, Peru, Uruguay, and Venezuela. South and Central American countries from which imports in May were above those of April include, in addition to Brazil, the Dominican Republic, Ecuador, Haiti, Jamaica, Peru, Uruguay, Venezuela and Colombia.

Export trade to Australia rose sharply in May, shipments during the month being valued at \$6,683,000 compared with \$3,882,000 in April. The May total was, however, under the average in the first quarter of the year. General imports from Australia during May were valued at \$675,000 compared with \$2,262,000 the previous month.

Comparing the five months' total for export trade in 1940 with that of 1939, it is found that the value of shipments in the current year exceeded last year in all seven of the major geographical divisions of the world. Imports for the first five months of 1940 were in excess of those for the same period in 1939 from Northern North America, Southern North America, South America, Asia, Oceania, and Africa.

Following are the complete tabulations covering the month of May:

Thousands of Dollars (000 Omitted)

a For purposes of statistical comparability, trade with Austria, Czechoslovakia, and Poland and Danzig has been combined with Germany for both years.

Summary of Business Conditions in Federal Reserve Districts

Indications of the trend of business in the various Fedral Reserve districts is indicated in the following extracts which we give from the "Monthly Reviews" of the Federal Reserve Districts of Boston, New York, Philadelphia, Cleveland, Richmond, Atlanta, Chicago, St. Louis, Minney apolis, Kansas City, Dallas and San Francisco:

First (Boston) District

First (Boston) District

The downward trend in the volume of general business activity in New England which had prevailed from the first of the year through April was checked during May and, after allowances had been made for customary seasonal changes, the level in May was about the same as that which prevailed during April, the Federal Reserve Bank of Boston says in its "Monthly Review" of July 1. In part, the "Review" states:

Revenue freight car loadings in New England during the four-week period ending June 15 gained 4.3% over the total for the corresponding four-week period in 1939, with a gain of 8.4% reported for the week ending June 15. During May sales of New England department stores and apparel shops were 0.8% smaller than the volume reported for May last year and sales for the five-month period January-May, inclusive, were 0.2% larger than in the corresponding period a year ago.

During May boot and shoe production in this district is estimated to have been 10,552,000 pairs. This was a total 7.0% smaller than in April and 12.2% under production for May last year.

The amount of raw cotton consumed by mills in New England during May was 71,030 bales, as compared with 72,525 bales in April and 72,968 bales in May a year ago.

During May the total number of wage earners employed in manufacturing establishments in Massachusetts was 1.8% less than the number employed in these same establishments during April and the amount of weekly payrolls decreased 0.9%, according to the Massachusetts Department of Labor and Industries. Both employment and payrolls usually have declined between April and May. In May, as compared with May, 1939, there was an increase of 1.6% in the number of wage earners employed and a gain of 6.1% in the amount paid in wages.

Second (New York) District 神經體學院 時後國際

The Federal Reserve Bank of New York, in presenting its monthly indexes in its "Monthly Review" of July 1, states that "the revival of business activity, which was apparent in May, proceeded further during June." The "Review" in May, proceed goes on to say:

that "the revival of business activity, which was apparent in May, proceeded further during June." The "Review" goes on to say:

The stimulation of business activity is perhaps most strikingly illustrated by the rapidity with which steel mill operations have been stepped up during the past two months. In response to an increasing demand for steel and steel products, from domestic as well as foreign sources, together with a larger volume of specifications against orders placed at the time of the temporary price reduction in April, the average rate of mill operations was expanded from about 60% of capacity at the beginning of May to 87½% in the week ended June 22, or to within seven points of the high level reached last November. The rise in steel mill activity in May and June was only a little less marked than in the period of rapid expansion which followed the outbreak of the war last fall.

Reflecting at least in part the influence of the national defense program, orders for textile goods increased sharply around the middle of June. Mill sales of cotton goods in the week ended June 15 were reported to have been the heaviest since last September, and demand for woolen goods expanded markedly. Further evidence of a higher level of business activity in June is revealed in the weekly figures on railroad freight traffic, electric powr production, and department store sales. Retail sales of automobiles rose substantially in the latter part of May and were mainfained in the first part of June, after a temporary decline around the middle of May, and, although field stocks of cars were reported to be unusually high for this time of year, automobile manufacturers reduced their assemblies to only a small extent in June.

In May the general level of business activity reversed the downward course of the previous four months, reflecting chiefly increased activity in the heavy goods industries—induced by orders placed to replenish inventories, by brisk export demand, and by defense preparations. The broad index of production

(Adjusted for seasonal variations, for estimated long-term trend, and where necessary for price changes)

p Preliminary. r Revised. * Not adjusted for trend. x Back figures for the index of Production and Trade and its subordinate group indexes are available upon request (from 1919 monthly).

Third (Philadelphia) District

The Federal Reserve Bank of Philadelphia, in its "Business Review" of July 1, reported that "industrial and trade activity in the Third Federal Reserve District has improved, despite unsettling foreign developments." The Bank also had the following to report:

had the following to report:

Industrial buyers in many important lines are placing larger volumes of orders, production for foreign delivery continues substantial, and the domestic armament program appears to be getting under way at plants in this district. Prices of manufactured goods are generally firm.

Industrial production advanced slightly from April to May and in the first five months averaged 8% above the corresponding period a year ago. Manufacturing activity in the month continued at the April level, but production of coal advanced and crude oil increased more than was to be expected, owing in part to foreign demand. Construction activity again expanded more than usual, but was below the unusually high level prevailing a year ago.

General industrial employment was sustained from April to May and payrolls advanced. Small declines in manufacturing industries in the

month were offset by increases in mining, construction, and services. Preliminary reports indicate improvement in factory employment and wage payments in June. Both employment and payrolls continue well above the levels of early 1939.

Retail trade sales increased more than usual from April to May, and the volume of business at wholesale expanded, following a moderately duli spring season. Early reports for June indicate that business has continued active. Sales at both types of distributing establishments are somewhat above a year ago. Stocks of goods showed little change in the latest month, but are also somewhat larger than in 1939.

Fourth (Cleveland) District

In its June 29 "Monthly Business Review" the Federal Reserve Bank of Cleveland reports that "the proposed defense and armament program, which has grown considerably since its inception, has been stimulating to business, even though little if any actual work has been done." Bank further states:

Bank further states:

Iron ore shipments in the first half of June were at a rate which pointed to a 10,000,000-ton month and practically every lake boat was in service. Steel mills have increased output rapidly; admittedly a large share of the gain represented inventory accumulation, but steel orders have been received at a rate in excess of the industry's capacity to produce. Several steel plant rebuilding programs have been started with the view toward enlarging capacity in most cases.

Auto parts plants and other metal-working companies, especially those which also are producing airplane equipment, have been unusually active for this season of the year.

The latest employment figures are as of mid-May; these failed to reflect the current changed situation, although the index of number of employed in Ohio was steady compared with April, while payrolls increased. Shortages of machinists, tool makers, and other specialized workers are reported, even though large numbers remain on relief or unemployed.

Until early June retail trade figures reflected this situation plus unseasonable weather. May sales were not up seasonally in relation to April, and compared with a year ago the gains were slight. In the first three weeks of June, however, more favorable weather and increased payrolls contributed to an improved retail trade situation whereby gains of 18% to 25% over last year were experienced by department stores, and other lines also reported increases.

The June 30 "Monthly Review" of the Federal Reserve Bank of Richmond reports that "in the Fifth Federal Reserve District, May witnessed a continuation of business on a high level, nearly all indicators showing advances over April and also over May last year." The following is also from the "Review":

from the "Review":

Department store sales in May were 4% above sales in May, 1939, and a representative group of retail furniture stores sold 9% more last month than in the same month last year.

Cotton textile mills continued operations in May at about the same level as in March and April, but sales were slow during the month. However, demand for cotton cloth and yarn rose in the first half of June, and prices recovered most of the decline which had occurred in May. Rayon yarn shipped was 22% above shipments in May, 1939, but production was still larger and consequently reserve stocks of yarn rose 4% during the month.

Bituminous coal mined in the district last month was above seasonal tonnage, and was 3½ times May, 1939, production, during which Fifth District mines were closed two weeks by a labor dispute. Tobacco manufacturing in May was higher than in April, but was slightly lower than in May last year for all products except cigarettes.

cigarettes. . . Agricultural prospects in the Fifth District improved during May, especially in the latter half of the month, when warm weather and rain stimulated plant growth.

Sixth (Atlanta) District

The following regarding business conditions in the Sixth Federal Reserve District is taken from the June 30 "Monthly Review" of the Federal Reserve Bank of Atlanta:

"Monthly Review" of the Federal Reserve Bank of Atlanta: Reversing the April decline, the distribution of merchandise through reporting department stores in the Sixth District increased about 7% more in May than might have been expected on the basis of past experience, and wholesale trade was at about the April level. . . Total construction contracts awarded in the district recorded a further small gain, although those for residential construction were slightly off, and building permits increased substantially. May output of pig iron and coal, and consumption of cotton were higher.

Comparing May, 1940, with that month a year earlier, department store sales were up 9% and wholesale trade was 5% larger. . Substantial gains were reported in pig iron output and coal production, and in building permits, and construction contract awards were also larger.

Seventh (Chicago) District

In the June 27 issue of its "Business Conditions," the Federal Reserve Bank of Chicago states that "district industrial activity has increased notably following early spring declines." The Bank goes on to report:

dustrial activity has increased notably following early spring declines." The Bank goes on to report:

Most marked acceleration has been shown in some of the heavy industries, particularly in primary steel. Automobile production has slackened as this year's model season draws to a close. As yet the Nation's rapidly-growing armament program has had little direct effect on district industry. However, some closely affected industries, like machine tools, are expanding as fast as limits of plant and personnel will permit.

Consumer buying has held up well, and there has been great improvement over the earlier outlook for major district farm crops. Prices of grains and meat animals are sharply lower than the level obtaining before mid-May, but those of dairy products have held relatively firm.

From 60% of capacity in early May the operating rate at Chicago district steel mills rose uninterruptedly to 93% by the third week of June. Demand for steel has been widespread; some of it has been reported to be for the purpose of building up inventories. There has been only a little business received by district mills directly as a result of the war, but such business is increasing steadily.

There were further substantial gains in new orders at steel and malleable castings firms during May, although shipments, particularly of steel castings, declined. Output of stoves and furnaces expanded further. The machine tools industryy continued in May at practically capacity levels, and output is being expanded as rapidly as possible. From 30% to 60% of the current production of machine tools has been for export.

A moderate curtailment took place in automobile production during May, and output was reduced further in June as the end of the 1940

model seeson was approaching. Retail automobile sales had held up fairly well in May in the country as a whole, although reports from district automobile dealers indicate considerable decline in this area. Dealers' stocks of cars in the country remained relatively high.

At district furniture factories new business in May increased by one-third over April. Shipments and production at paper mills expanded considerably, but orders booked failed to gain over the heavy volume placed in April. Additional increases were made in district building operations; the most notable showing continued to be made in residential construction, which for the month was one-third heavier than in May, 1939. Demand for building materials has shown a somewhat better than seasonal expansion. Output of district soft coal mines did not decline as much as is usual for May, while activity at district petroleum refineries increased to new record levels.

Data on total industrial employment show that there was practically no change in the number of workers employed at district firms from April to May, while wages paid declined fractionally. There was a gain of 10% in employment and of 18% in earnings over a year ago.

Sales by district department stores for May were 6% heavier than last year. Among the larger cities of the district, Detroit continued to make the best year-to-year showing. At the end of May department store inventories were only slightly heavier than a year earlier.

Eighth (St. Louis) District

In its June 29 "Business Conditions" summary the Federal Reserve Bank of St. Louis states that "general business activity in the Eighth District during May and the first half of June continued at an accelerated pace, the improvement which began about mid-April." From the "Review" we also quote:

We also quote:

While distribution of commodities was fairly well maintained and above a year ago, relatively the most favorable showing was made in production. Most notable expansion was recorded in manufacturing of durable goods, particularly iron and steel products, lumber, glass and fire clay and quarry products.

Output of steel ingots in this general area rose from 42% of capacity at the end of April to 68% at mid-June. The melt and shipment of pig iron in May were the highest since last February, and reports covering the first half of June indicate that totals for the entire month will exceed those of its predecessor.

Reflecting the high rate of industrial activity and the unusually late spring, May production of bituminous coal in fields of the district was 3% greater than in April and 58% more than in May, 1939.

Owing chiefly to the handicap of unusually cold weather, May sales of department stores in the leading cities decreased 1.0% below April, but the total was 2.5% greater than in May a year ago.

Taken as a whole, Eighth District agricultural prospects underwent distinct improvement during May and the first half of June.

Ninth (Minneapolis) District

Ninth (Minneapolis) District

Ninth (Minneapolis) District

The June 30 "Monthly Review" of the Federal Reserve Bank of Minneapolis reports that "May witnessed a continuance of business on a high level, nearly all indicators showing advances over April and also over May last year. The following is also from the "Review":

Department store sales in the district in May were larger than in May 1939 both at city and country stores. Cumulative sales for all stores for the first five months were 7% larger than during the period of 1939. Country stores recorded a 9% and city stores a 4% cumulative gain. Improvement in sales volume was evenly distributed throughout the district with each state and part state showing an increase over a year ago.

trict with each state and part state showing an increase over a year ago. ? . . The volume of production in this district during May continued the upward trend started in April. Flour production and shipments were larger than in April and slightly larger than in May last year. Shipments of linseed oil increased more than usual and were more than double the May 1939 volume. Shipments of linseed oil cake declined less than seasonally and were nearly double one year earlier. Slaughterings of cattle and calves declined more than usual and were smaller than a year ago but hog and sheep slaughterings declined less than seasonably and were substantially larger than in May last year. The cut of lumber increased and was larger than a year earlier. Lumber manufacturers' shipments also increased but were in about the same volume as a year ago. Mine productions of copper declined less than usual and was more than half again the May 1939 volume. The daily average amount of electric power ultilized during April increased and was the largest for any April in history. The Minnesota employment index rose from 103 in April to 106 in May.

**Tenth (Kansas City) District*

Tenth (Kansas City) District

The following regarding business and agricultural conditions in the Tenth (Kansas City) Federal Reserve District is taken from the June 29 "Monthly Review" of the Federal Reserve Bank of Kansas City:

Rains have continued timely and the southern half of the district now needs dry and clear weather for harvest. The condition of wheat is much better than seemed possible earlier in the year, but this improvement is more than offset by the drastic fall in wheat prices. Otherwise, the farm outlook is favorable. outlook is favorable.

outlook is favorable.

Trade figures are little changed from a year ago. The damp and cool spring has held back buying in some lines. Lumber sales are expanding but are still somewhat below a year ago. Sales of life insurance are much stronger than earlier in the year.

With the exception of hogs, marketings of livestock and grain are much under a year ago. Slaughter of cattle and sheep is less, but that of hogs is higher. Crude petroleum production is 9% under last year. Construction is more active.

tion is more active.

Eleventh (Dallas) District

According to the Dallas Federal Reserve Bank, "distribution of merchandise to consumers in the Eleventh (Dallas) District increased by more than the average seasonal amount in May, and operations in most manufacturing industries were well sustained." In its July 1 "Monthly Business Review" the Bank further commented:

Employment and payrolls increased in May and were appreciably higher

Business Review" the Bank further commented:

Employment and payrolls increased in May and were appreciably higher than a year ago. Retail sales at department stores were much higher than in the preceding month and closely approximated those in May, 1939. Distribution of merchandise through wholesale channels was above that in either comparative month. Activity at cotton textile mills increased sharply in May, and the volume of cotton consumed was larger than the monthly average for the first nine months of the current season. Daily average production of crude petroleum was reduced moderately in May from the high level obtaining in the preceding two months, but refinery operations expanded further to a near record level. The value of construction contracts awarded declined 24% from April to May, chiefly as a result of the smaller volume of awards for publicly-financed projects, and

the total was 4% smaller than in May last year. Physical conditions in the agricultural and livestock industries were improved materially by heavy, general rains during May and the first half of June. In some sections, however, excessive rainfall has damaged crops to some extent and has interfered with field work.

Twelfth (San Francisco) District

"Despite a decline during the first quarter of the year, Twelfth District [San Francisco] industrial activity in April was considerably higher than a year earlier and turned upward in May," it was noted by the San Francisco Federal Reserve Bank in its "Business Conditions" of June 26. According to the Bank "the higher rate of operations in recent months and the upturn in May are traceable principally to developments associated with the war in

June 26. According to the Bank "the higher rate of operations in recent months and the upturn in May are traceable principally to developments associated with the war in Europe and to the sustained high level of residential building in the district as well as elsewhere in the United States." The Bank further reports, in part:

The rise in industrial operations in May was accompanied by advances in factory employment and payrolls, greater than seasonal gains taking place in both the Pacific Northwest and California. At the mid-month, the number of wage earners in the three Pacific Coast States was 13% higher than a year earlier, while payrolls showed an increase of 16%. The year-period gains and the increase in May in Oregon and Washington primarily reflected increased operations in the lumber and the pulp and paper industries, while the gains in California resulted chiefly from expansion in the aircraft industry and in metal-working industries which supply requirements of the aircraft manufacturers. Freight car loadings, which are a rough measure of primary distribution, continued the moderate decline in evidence during recent months, although they remained well above a year earlier. Residential building undertaken in May was lower than in April, but the seasonally adjusted index was somewhat higher than in February and March and considerably above a year earlier. Preliminary data for June, however, point to little change in the index in that month. New automobile registrations increased moderately, although a decline usually occurs at this season, while sales of department stores, on a seasonally adjusted basis, remained as large as in other recent months. In other lines of retail trade for which information is available sales were well maintained or advanced slightly in May.

Bank Debits for Week Ended July 3, 1940, 22.5% Above a Year Ago

Debits to deposit accounts (except interbank accounts), as reported by banks in leading cities for the week ended July 3, aggregated \$10,057,000,000. Total debits during the 13 weeks ended July 3 amounted to \$109,933,000,000, or 7% above the total reported for the corresponding period

a year ago.

These figures are as reported on July 8, 1940, by the Board of Governors of the Federal Reserve System.

SUMMARY BY FEDERAL RESERVE DISTRICTS (In Millions of Dollars)

Federal Persons District	Week	Ended	13 Weeks Ended		
Federal Reserve District	July 3, 1940	July 5, 1939	July 3, 1940	July 5, 1939

Report of Lumber Movement Week Ended June 29, 1940

Lumber production during the week ended June 29, 1940, was 2% less than in the previous week; shipments were 4% greater; new business, 6% greater, according to reports to the National Lumber Manufacturers Association from to the National Lumber Manufacturers Association from regional associations covering the operations of representative hardwood and softwood mills. Shipments were 0.2% above production; new orders, 3% above production. Compared with the corresponding week of 1939, production was 5% greater; shipments 1% less, and new business 1% greater. The industry stood at 73% of the seasonal weekly average of 1929 production and 73% of average 1929 shipments. The Association further reports: ments. The Association further reports:

Year-to-Date Comparison

Reported production for the 26 weeks of 1940 to date was 8% above corresponding weeks of 1939; shipments were 6% above the shipments, and new orders were 5% above the orders of the 1939 period. For the 26 weeks of 1940 to date new business was 3% above production and shipments were 4% above production.

Supply and Demand Comparisons

The ratio of unfilled orders to gross stocks was 19% on June 29, 1940, compared with 19% a year ago. Unfilled orders were 1% heavier than a year ago; gross stocks were 3% less.

Softwoods and Hardwoods

Softwoods and Hardwoods

During the week ended June 29, 1940, 468 mills produced 241,998,000 feet of softwoods and hardwoods combined; shipped 242,557,000 feet; booked orders of 248,507,000 feet. Revised figures for the preceding week were: Mills, 508; production, 247,694,000 feet; shipments, 233,459,000 feet; orders, 233,519,600 feet.

Lumber orders reported for the week ended June 29, 1940, by 384 softwood mills totaled 238,230,000 feet, or 2% above the production of the same mills. Shipments as reported for the same week were 231,938,000 feet, or 1% below production. Production was 234,170,000 feet. Reports from 98 hardwood mills give new business as 10,277,000 feet, or 31% above

production. Shipments as reported for the same week were 10,619,000 feet, or 36% above production. Production was 7,828,000 feet.

Identical Mill Comparisons

Production during week ended June 29, 1940, of 370 identical softwood mills was 232,215,000 feet, and a year ago it was 219,868,000 feet; shipments were, respectively, 229,585,000 feet and 231,682,000 feet, and orders received, 235,829,000 feet and 233,079,000 feet. In the case of hardwoods, 78 identical mills reported production this year and a year ago 6,364,000 feet and 6,323,000 feet; shipments, 8,065,000 feet and 8,493,000 feet, and orders, 8,174,000 feet and 9,484,000 feet.

Lumber Production and Shipments During Four Weeks Ended June 29, 1940

We give herewith data on identical mills for four weeks ended June 29, 1940, as reported by the National Lumber Manufacturers Association on July 8:

An average of 457 mills reported as follows to the National Lumber Trade Barometer for the four weeks ended June 29, 1940:

(T- 1 000 F4)	Production		Ship	ments	Orders		
(In 1,000 Ft.)	1940	1939	1940	1939	1940	1939	
Softwoods Hardwoods	937,792 28,772	897,222 26,573	891,902 32,474	893,703 35,825	873,842 34,226	937,702 36,563	
Total lumber	966,564	923,795	924,376	929,528	908,068	974,265	

Production during the four weeks ended June 29, 1940, as reported by these mills, was 5% above that of corresponding weeks of 1939. Softwood production in 1940 was 5% above that of the same weeks of 1939 and 29% above the record of comparable mills during the same period of 1938. Harawood output was 8% above production of the 1939 period. Shipments during the four weeks ended June 29, 1940, were 1% below those of corresponding weeks of 1939, softwoods showing a loss of 0.3% and hardwoods loss of 9%.

Orders received during the four weeks ended June 29, 1940, were 7% below those of corresponding weeks of 1939. Softwood orders in 1940 were 7% below those of similar period of 1939 and 11% above the same weeks of 1938. Hardwood orders showed a loss of 6% as compared with corresponding weeks of 1939.

On June 29, 1940, gross stocks as reported by 381 softwood mills were 3,457,873 M feet, the equivalent of 104 days' average production (three-year average 1937-38-39) as compared with 3,526,320 M feet on July 1, 1939, the equivalent of 105 days' average production.

On June 29, 1940, unfilled orders as reported by 378 softwood mills were 663,047 M feet, the equivalent of 20 days' average production, compared with 664.516 M feet on July 1, 1939, the equivalent of 20 days' average production, compared with 664.516 M feet on July 1, 1939, the equivalent of 20 days' average production.

Weekly Statistics of Paperboard Industry

We give herewith latest figures received by us from the National Paperboard Association, Chicago, Ill., in relation

National Paperboard Association, Chicago, Ill., in relation to activity in the paperboard industry.

The members of this Association represent 93% of the total industry, and its program includes a statement each week from each member of the orders and production, and also a figure which indicates the activity of the mill based on the time operated. These figures are advanced to equal 100%, so that they represent the total industry.

STATISTICAL REPORTS—ORDERS, PRODUCTION, MILL ACTIVITY

Week Ended	Orders Received	Production	Unfilled Orders	Percent of Activity

Automobile Financing in May

Automobile Financing in May

The dollar volume of retail financing for May, 1940, for the 400 organizations amounted to \$170,151,356, an increase of 2.9% as compared with April, 1940; an increase of 20.0% as compared with May, 1939, and an increase of 79.3% as compared with May, 1938. The volume of wholesale financing for May, 1940, amounted to \$201,068,318, a decrease of 7.3% compared with April, 1940; an increase of 38.2% as compared with May, 1939; and an increase of 134.5% as compared with May, 1938.

The volume of retail automobile receivables outstanding at the end of May, 1940, as reported by the 214 organizations amounted to \$1,021,533,732. These 214 organizations accounted for 95.0% of the total volume of retail financing, \$170,151,356, reported for that month by the 400 organizations.

The following tabulations on automobile financing for 400 organizations, and on retail automobile receivables for 214 organizations for May, 1940, are as reported by the Bureau of the Census, Department of Commerce.

Figures of automobile financing for the month of April, 1940, were published in the June 15, 1940, issue of the "Chronicle," page 3736.

Downhill In June as All Flour Production Slides Sections Share Decrease

Sections Share Decrease

Flour production slid downhill during June, according to reports received by the "Northwestern Miller" by mills which account for about 64% of the flour output of the United States. Figures for the month totaled 5,036,806 bbls. This is over 450,000 bbls. behind the output of the previous month and more than 575,000 lower than that of June, 1939. Rather considerable decreases in production were felt in the major producing sections of the Northwest and Southwest. Northwestern spring wheat mills reported a June, 1940, production of 1,092,070 bbls. This is almost a 140,000-bbl. decrease from the May output. Southwestern proproduction showed a monthly decrease of over 130,000 bbls.—from 1,952,616 in May to 1,821,045 in June. A rather large decrease was reported by Southeastern mills, which dropped from 120,410 bbls. the previous month to 75,354 bbls. in June.

The June, 1940, production is by far the smallest of all the June totals recorded in the following table:

TOTAL MONTHLY FLOUR PRODUCTION
(Output reported to the "Northwestern Miller," in barrels, by mills representing 64% of the total flour production of the United States)

	June, 1940	May, 1940	June, 1939	June, 1938	June, 1937
Northwest	1,092,070	1,230.625	1,173,546	1,191,965	1,036,262
Southwest	1,821,045 812,485	1.952,616 818,352	2,030,510 847,621	2,089,663 834,563	2,181,220 887,583

Gross Farm Income in 1939 Totaled \$9,769,000,000, Says Bureau of Agricultural with \$9,362,000,000 in 1938 Economics-

Farmers in 1939 had a gross farm income of \$9,769,000,000 from farm production and Government payments, it was reported on July 8 by the Bureau of Agricultural Economies, U. S. Department of Agriculture. The estimate includes cash income from marketings, Government payments under conservation programs, and the value of farm products (at farm prices) retained for consumption on the farms. The 1939 total of \$9,769,000,000 compares with \$9,362,000,000 in 1938, \$10,569,000,000 in 1937 and \$9,915,000,000 in 1936. The Bureau further reported: The Bureau further reported:

The 1939 gross income consisted of \$7,733,000,000 cash from farm marketings, Government payments totaling \$807,000,000, and products retained for farm consumption valued at \$1,229,000,000. In 1938 the cash income from marketings was \$7,590,000,000, Government payments totaled \$482,000,000, and the value of products retained for farm consumption was \$1,290,000.000.

\$1,290,000,000.

The Bureau reported gross farm income from all crops in 1939 at \$3,662,000,000. This compared with \$3,541,000,000 in 1938, with \$4,355,000,000
in 1937, and with \$4,021,000,000 in 1936. The increase in 1939 over 1938
was 3%. In 1939, increases in income from grains, vegetables, fruits, and
miscellaneous crops more than offset declines in income from cotton, tobacco,

and sugar crops. Gross farm income from livestock and livestock products totaled \$5,300,-000,000 in 1939. This compares with \$5,339,000,000 in 1938, with \$5,847,-000,000 in 1937, and with \$5,606,000,000 in 1936. The decrease in 1939

under 1938 was 1%. Declines in income from hogs, chickens and eggs, and dairy products more than offset increases in income from cattle and calves, sheep and lambs, wool, turkeys, and miscellaneous products.

Government payments totaled \$807,000,000 in 1939, compared with \$482,000,000 in 1938, with \$367,000,000 in 1937, and with \$287,000,000 in 1936. Gross farm income—including Government payments—in 1939 was higher than in 1938 in 40 States, with largest increases in the Northern Great Plains area. The 8 States where income was smaller than in 1938 were Kentucky, Tennessee, Alabama, Mississippi, Wisconsin, Georgia, Utah, and Virginia.

Petroleum and Its Products—Crude Statistical Outlook Improves—Well Completions Increase—World Oil Output Up in May—Petroleum Stocks Rise—H. D. Collier Heads California Standard

H. D. Collier Heads California Standard

Marked improvement in the statistical position of the producing end of the domestic petroleum industry developed during the intitial week of July as daily average output of crude oil dipped below the market estimates of the U. S. Bureau of Mines for the first time in months. Major factor in the reduced output was sharply lower production in Texas. Daily average production of crude during the week ended July 6 was off 37,150 barrels to 3,602,400 barrels, which is more than 25,000 barrels below the July market demand estimate of 3,628,400 barrels set by the Bureau of Mines. Lower production in Texas and Illinois were sufficient to offset sharp gains in California and Oklahoma production. The American Petroleum Institute report disclosed that daily average production in the Lone Star State of 1,138,350 barrels was off 42,150 barrels from the final week of June. Illinois, where production hit a new high in the previous week, was off 13,400 to a daily total of 503,650 barrels. Louisiana was up 200 barrels to 287,950 barrels while Kansas was off 650 barrels to 182,450 barrels.

Heavy production of crude oil during the July 6 week lifted California's output more than 26,000

650 barrels to 182,450 barrels.

Heavy production of crude oil during the July 6 week lifted California's output more than 26,000 barrels to a daily figure of 625,700 barrels. Oklahoma, where the practice of heavy runs of crude early in the month to be followed by sharp pinch-backs later also prevails, showed an increase of 7,450 barrels in the daily average figure which mounted to 427,900

Oil well completions in the United States for the July 6

oil well completions in the United States for the July 6 week were under the previous week but sharply above the comparable 1939 period. The "Oil and Gas Journal" reported completions at 574, against 595 in the final week of June and 549 in the first week of July, last year. Of the July 6 total, 402 were oil wells, 41 gas wells, and 129 dry holes. Well completions for the year to date are 14,716, against 12,988 in the like 1939 period.

Reflecting sharply higher production in America, world output of crude oil during May rose 7% above the comparable period a year earlier and also showed a gain over the April total. The statistics released by "World Petroleum," which gathers them mainly from Government sources, showed May output of approximately 186,500,000 barrels, up nearly 7,000,000 from the total reported for May of 1939.

A gain of 11% in American output of crude for the first five months of 1940 over last year lifted the total to 119,000,000 barrels, compared with 110,700,000 barrels a year earlier and the March, 1939, record of 120,075,000 barrels. Rumania again moved above the 4,000,000-barrel monthly figure with 4,002,844 barrels in May.

Inventories of domestic and foreign crude oil held in the United States were up 1,168,000 barrels during the final week of June to 262,059,000 barrels. The U. S. Bureau of Mines report showed that stocks of domestic crude oil were up 1,113,000 barrels, while foreign holdings expanded 55,000 barrels. California heavy crude stocks, not included in the "refinable" report, were 13,315,000 barrels, up 222,000 barrels.

barrels.

The Bureau also reported an increase of 8,361,000 barrels in all oil stocks during May, placing the total at 563,794,000 barrels, or 144 days' supply. This compared with 555,433,000 barrels, or a 145-day supply on April 30, last. May domestic consumption was 121,190,000 barrels, against 115,303,000 in the preceding month. Motor fuel stocks of 100,288,000 barrels compared with 120,727,000 a month earlier and were nearly 16,750,000 barrels above a year earlier.

earlier.

H. D. Collier, Vice-President of the Standard Oil Co. of California, climaxed his 37 years of service with the company with his appointment as President to succeed the late W. H. Berg. Mr. Collier, who will return late this month from a business trip to Japan, is a director of the American Petroleum Institute and a member of the board of directors of the San Francisco Chamber of Commerce.

Diminishing export demand for lubricating oils refined from Pennsylvania grade crude oil brought the third reduction of the year in the latter on July 12. The South Penn Oil Co. cut prices 25 cents a barrel, making a net reduction of 75 cents since the start of the year.

Under the new price schedule, Bradford-Alleghany crude oil was cut to \$2 a barrel. Southwest Penn Pipe Line eased off to \$1.65 with Eureka Pipe Line down to \$1.59. Rising holdings due to the lower export demand coupled with overproduction by some distillers were held responsible for the weakness in Pennsylvania grade crude in the past few months. months.

Crude oil price changes follow:

July 12.—South Penn Oil Co. cut Pennsylvania grade crude prices 25 cents a barrel.

Daily Average Crude Oil Production for Week Ended July 6, 1940, Declines 37,150 Barrels

July 6, 1940, Declines 37,150 Barrels

The American Petroleum Institute estimates that the daily average gross crude production for the week ended July 6, 1940, was 3,602,400 barrels. This was a decline of 37,150 barrels from the output of the previous week, and the current week's figures were below the 3,628,400 barrels calculated by the United States Department of the Interior to be the total of the restrictions imposed by the various oil-producing States during July. Daily average production for the four weeks ended July 6, 1940, is estimated at 3,726,150 barrels. The daily average output for the week ended July 8, 1939, totaled 3,529,800 barrels. Further details, as reported by the Institute, follow:

Imports of petroleum for domestic use and receipts in bond at principal United States ports, for the week ended July 6, totaled 2,061,000 barrels, a daily average of 294,429 barrels, compared with a daily average of 186,571 barrels for the week ended June 29, and 245,964 barrels daily for the four weeks ended July 6. These figures include all oil imported, whether bonded or for domestic use, but it is impossible to make the separation in weekly statistics.

Receipts of California oil at Atlantic Coast ports during the week ended

Receipts of California oil at Atlantic Coast ports during the week ended July 6, 1940, amounted to 352,000 barrels, a daily average of 50,286 barrels, of which 203.000 barrels were gasoline received at Philadelphia; 74,000 barrels of crude oil received at Savannah, and 75,000 barrels of other petroleum products received at Baltimore.

Reports received from refining companies owning 85.3% of the 4,533,000 barrel estimated daily potential refining capacity of the United States, indicated that the industry as a whole ran to stills, on a Bureau of Mines' basis, 3,575,000 barrels of crude oil daily during the week, and that all companies had in storage at refineries, bulk terminals, in transit and in pipe lines as of the end of the week, 93,275,000 barrels of finished and unfinished gasoline. The total amount of gasoline produced by all companies is estimated to have been 11,469,000 barrels during the week.

a These are Bureau of Mines calculations of the requirements of domestic crude oil based upon certain premises outlined in its detailed forecast for the month of July. As requirements may be supplied either from stocks, or from new production, contemplated withdrawals from crude oil inventories must be deducted from the Bureau s estimated requirements to determine the amount of new crude to be produced.

b Oklahoma, Kansas, Nebraska, Mississippi, Indiana figures are for week ended 7 a. m. July 3.

c This is the net basic 31-day allowable as of July 1. It was obtained from reliable sources pending publication of official figure. Past experience indicates it will increase as new wells are completed and if any upward revisions are made. It includes a net figure of approximately 404,129 barrels for East Texas after deduction for shutdowns. All fields in the State were ordered shutdown for seven days, namely, July 4. 7, 10, 14, 18, 21 and 28.

d Recommendation of Central Committee of California Oil Producers.

Note—The figures indicated above do not include any estimate of any oil which might have been surreptitiously produced.

Natural Gasoline Statistics for Month of May, 1940

Natural Gasoline Statistics for Month of May, 1940. The production of natural gasoline increased in May, 1940, according to a report prepared by the Bureau of Mines for Harold L. Ickes, Secretary of the Interior. The daily average in May was 6,215,000 gallons compared with 6,180,-000 gallons in April, 1940, and 5,799,000 in May, 1939. The chief increases occurred in the Rocky Mountain, Louisiana, Panhandle, and Osage districts.

Stocks again increased and the total on hand at the end of the month was 273,588,000 gallons, 16,884,000 gallons more than on the first of the month and 12,684,000 gallons more than the total on hand May 31, 1939.

Weekly Coal Production Statistics

Weekly Coal Production Statistics

The current weekly report of the Bituminous Coal Division,
U. S. Department of the Interior, disclosed that production
of soft coal continues to hover around the 8-million-ton
mark. The total output in the week ended June 29 is
estimated at 8,060,000 net tons, as against 7,965,000 tons
in the preceding week—an increase of 95,000 tons, or 1.2%.
Production in the corresponding week of 1939 amounted to
6 628,000 tons.

Production in the corresponding week of 1933 amounted to 6,628,000 tons.

The U. S. Bureau of Mines reported that there was a continued decline in the production of Pennsylvania anthracite in the week ended June 29. The estimated tonnage was 1,034,000 and that for the preceding week was 1,127,000—a decrease of 93,000 tons or 8.3%. In the corresponding week in 1939 the output was 878,000 tons.

Preliminary Estimates of Production of Coal for Month of June, 1940

of June, 1940

According to preliminary estimates made by the Bureau of Mines and the Bituminous Coal Division of the United States Department of the Interior, bituminous coal output during the month of June, 1940, amounted to 32,640,000 net tons, compared with 27,959,000 net tons in the corresponding month of last year and 35,468,000 tons in May, 1940. Anthracite production during June, 1940, totaled 4,366,000 net tons, as against 3,577,000 tons a year ago and 3,957,000 tons in May, 1940. The consolidated statement of the two aforementioned organizations follows:

	Total for Month (Net Tons)	Number of Working Days	Avge. per Working Day (Net Tons)	Cal. Year to End of June (Net Tons)
June, 1940 (Preliminary)—	32,640,000	25	1,306,000	
Bituminous coal_a	4,366,000	25	174,600	25,010,000
Anthracite_b	151,100	25	6.044	888,300
Beehive coke	101,100	20		
May, 1940 (Revised)—	35,468,000	26.4	1,343,000	
Bituminous coal_a	3.957.000	26	152,200	
Anthracite_b	106,100	27	3.930	7 2 2 2 2 2 1 1 1
Beehive coke	100,100			
June, 1939 (Revised)-	27,959,000	26	1.075,000	
Bituminous coal_a		26	137,600	26.925,000
Anthracite_b	3,577,000	26	2.000	317,000
Beehive coke	52,300	20	2,000	2111000

a Includes for purposes of historical comparison and statistical convenience the production of lignite and of anthracite and semi-anthracite outside of Pennsylvania.

b Total production, including colliery fuel, washery and dredge coal, and coal shipped by truck from authorized operations.

Note—All current estimates will later be adjusted to agree with the results of the complete canvass of production made at the end of the calendar year.

June Production and Shipments of Slab Zinc

The American Zinc Institute on July 8 released the following tabulation of slab zinc statistics:

SLAB ZINC STATISTICS (ALL GRADES)-1929-1940

	Produced During Period	Shipped During Period	Stock at End of Period	(a) Shipped for Export	Retorts Operat- ing End of Period	Average Retorts During Period	Unfilled Orders End of Period

Tin Export Quota Raised to 130% for One Year

The International Tin Committee announced in London on July 8 an increase in export quotas for producing nations to 130% of standard tonnages for one year starting July 1. This action revises the committee's announcement made on May 27 fixing the tin quota for the third quarter of 1940 at

100%; this was reported in our issue of June 8, page 3581 It is believed that this action was taken in view of the fact that the United States last week agreed with representatives of the committee to purchase 75,000 tons of tin as part of its program to store needed strategic materials. In our issue of July 6, page 42, we mentioned this agreement.

Non-Ferrous Metals—Domestic Copper Irregular Depite Fair Business—Zinc Holds Firm—Tin Lower

"Metals and Mineral Markets" in its issue of July 11 reports that the first half of the week was a quiet period, due in part to the extended July 4th holiday, but during the last three days buying interest improved moderately in domestic copper, lead, and zinc. Export copper was dull all week. Demand for domestic copper at 10¾c., Valley, was sufficient in volume to bring sellers back to 10½c. on July 10. Zinc was firm and lead steady. Tin prices eased further in anticipation of ample supplies at around 50c. a pound. However, the political situation in the Far East remains a factor in tin. The publication further reported: reported:

Copper

Sales of domestic copper during the holiday week were in fair volume, involving 9,684 tons, against 13,119 tons in the previous week. Sales for the month to date totaled 12,642 tons. Prices, however, were irregular, ranging from 11½c. down to 10¾c., Valley. Sales at the low level were made on July 6,8, and 9, with business also being done at 10.875c., Valley, on those days. Consumers became interested to acquire metal at the 10¾c. basis, but sellers quickly changed their views and on July 10 a fair volume of business was done at 10.87c., Valley, with the market steady. Large mine producers held at 11½c. all week.

Export copper became weaker as the foreign market narrowed, prices ranging from 10½c. to 10.425c. f. a. s. New York. The trade believes that the foreign quotation will part company with the domestic quotation unless export outlets open up again.

Lead

Buying of lead again was on the light side, sales for the last week amounting to 2,579 tons. With consumers about covered so far as their July requirements are concerned, producers have been more or less prepared for a quiet period. August needs, however, are hardly more than one-third covered, and unless consumption declines unexpectedly, some good buying should set in later this month, sellers believe. Actual consumption of lead in the United States has been maintained at about 45,000 tons a month for some time now—a good record.

Quotations continued on the basis of 5c., New York, the contract settling basis of the American Smelting & Refining Co., and at 4.85c., St. Louis. The tone is steady.

The tone is steady.

Zinc

Though sales of the common grades of zinc in the calendar week ended July 6 amounted to only 850 tons, due in part to the holiday, inquiry so far this week has improved, and the turnover since Monday, July 8, has totaled more than 2,000 tons. Shipments of common zinc again were high, amounting to 4,782 tons for the week. The galvanizing rate is holding close to 67% of capacity, and no appreciable slackening in activity is expected for the summer period. The undertone in zinc remains firm. Business in Prime Western booked during the last week was on the basis of 6¼c., St. Louis.

Common zinc of foreign origin, in bond, is nominally 5%c., f.a.s. United States ports.

The June statistics of the domestic industry showed a reduction in stocks

of 4,363 tons.

The Prime Western Division reports sales during June of 25,136 tons, which compares with 30,947 tons in May and 27,111 tons in April.

The export quotas of countries participating in the control of tin production have been raised from 100% of standard tonnages to 130%, effective July 1, and the higher rate is to continue for one year. Whether all countries in the plan are in a position to raise output to the revised basis is not known, but the trade believes that Malaya and the Netherlands East Indies can be counted on to produce tin at capacity to meet the extra demands for stockpile purposes here.

Demand for tin during the last week was quiet and the quotations under-

stockpile purposes here.

Demand for tin during the last week was quiet and the quotations underwent little change. The tone was easier. Straits tin on spot showed a range of 51½c. to 52c. a pound. Tinplate operations for the current week are estimated at 78% of capacity. Because of extra defense needs, tinplate operations are expected to hold up well over the summer months. Straits tin for future arrival was quoted as follows:

	July	August	September	October
July 4	Holiday	Holiday	Holiday	Holiday
July 5	51.500	51.000	50.500	50.250
July 6	51.500	51.000	50.500	50.250
July 8	51.500	51.000	50.250	50.125
July 9	51.000	50.375	50.125	50.000
July 10	51.000	50.e75	50.125	50.000

Chinese tin, 99%, spot, was nominally as follows: July 4, Holiday; July 5, 51.000c.; July 6, 51.000c.; July 8, 51.000c.; July 9, 50.500c.; July

DAILY PRICES OF METALS (E. & M. J." QUOTATIONS)

x 10.525 @ 10.650.

x 10.525 @ 10.650.

Average prices for calendar week ended July 6 are: Domestic copper f. o. b. refinery, 10.708c.; export copper, f. o. b. refinery, 10.542c.; Straits tin, 52.100c.; New York lead, 5.000c.; St. Louis lead, 4.850c.; St. Louis zinc, 6.250c.; and silver, 34.750c.

The above quotations are "M. & M. M.'s" appraisal of the major United States markets, based on sales reported by producers and agencies. They are reduced to the basis of cash, New York or St. Louis, as noted. All prices are in cents per pound.

Copper, lead and zinc quotations are based on sales for both prompt and futural deliveries; tin quotations are for prompt delivery only.

In the trade, domestic copper prices are quoted on a delivered basis; that is, delivered at consumers plants. As delivery charges vary with the destination, the figures shown above are net prices at refineries on the Atlantic seaboard. Delivered prices in New England average 0.225c. per pound above the refinery basis.

Export quotations for copper are reduced to net at refineries on the Atlantic seaboard. On foreign business, owing to the European war, most sellers are restricting offerings to fi.as. transactions, dollar basis. Quotations, for the present, reflect this change in method of doing business. A total of 05c. is deducted from f.a.s. basis (lighterage, 4c.) to arrive at the f.o.b. refinery quotation.

Due to the European war the usual table of daily London prices is not available. Prices on standard tin, the only prices given, however, are as follows: July 4, spot, £265½, three months, £265½; July 5, spot, £266, three months, £266½; July 8, spot, £264½, three months, £264½; July 9, spot, £263½, three months, £264½; and July 10, spot, £264½; £263¼, three months, £264¾, three months, £264.

June Pig Iron at 83.9% of Capacity

The "Iron Age" of July 11 reported that production of coke pig iron in June totaled 3,818,897 net tons, compared with 3,513,683 net tons in May. On a daily basis the gain in June production was 12.3% over that in May, or from 113,345 tons to 127,297 tons in June. The operating rate for the indstry was 83.9% in June, against 74.8% the previous month and 51.7% in June last year. The "Iron Age" further reported:

previous month and 51.7% in June last year. The "Iron Age" further reported:

Production for the first six months this year was 21.083,600 net tons, against 14,025,053 tons in the comparable period last year. The daily rate averaged 115,844 net tons, a gain of 49.5% over the 77,486 tons in the same period last year.

There were 182 furnaces in blast on July 1, operating at the rate of 173,790 net tons a day, compared with 172 on June 1, making 119,905 net tons daily. The United States Steel Corp. blew in three furnaces and took one off blast, independent producers blew in eight furnaces and took one out of operation, and one merchant furnace was blown in.

Among the furnaces blown in were: one Edgar Thomson, one Ohio, and one South Chicago (old), Carnegie-Illinois Steel Corp.; one Harriet, Wickwire-Spencer Steel Co.; one Lackawanna, Bethlehem Steel Co.; one Harciet, one River and one Betty, Republic Steel Corp.; one Grace and one Iroquois, Youngstown Sheet & Tube Co.; one Calumet, Wisconsin Steel Co.; and one Zenith, Interlake Iron Corp.

The two furnaces blown out or banked were a Ford Motor Co. furnace and one Mingo, Carnegie-Illinois Steel Corp.

Half-Year Steel Output 37% Above Year Ago Production during June of 5,532,910 net tons of open-hearth and Bessemer steel ingots brought total output for the first half of 1940 to 28,678,124 tons, according to a report released July 9, 1940, by the American Iron and Steel Institute.

Steel Institute.

The six-month total was 37% greater than the total of 20,958,723 tons produced in the corresponding period of 1939. Steel output in June was 14% above the May total of 4,841,403 tons, and was 57% above the tonnage in June, 1939, when 3,523,880 tons were produced.

During June the steel industry operated at an average of 84.97% of capacity, as against 72.00% in May and 53.71% in June of last year. Over the first six months of 1940 steel operations averaged 72.64% of capacity, compared with 52.98% for the similar period in 1939.

Ingot production averaged 1,289,723 net tons per week in June, which compares with average weekly output in May of 1,092,867 tons. In June, 1939, ingot production

averaged 821,417 tons per week.

PRODUCTION OF OPEN HEARTH AND BESSEMER STEEL INGOTS (Reported by companies which in 1939 made 97.97% of the open hearth and 100% of the Bessemer ingot production)

Note—The percentages of capacity operated are calculated on weekly capacities of 1,517,855 net tons based on annual capacities as of Dec. 31, 1939, as follows: Open hearth and Bessemer ingots, 79,353,467 net tons, and in 1939 are calculated on weekly capacities of 1,529,249 net tons based on annual capacities as of Dec. 31, 1938, as follows: Open hearth and Bessemer Ingots, 79,735,033 net tons.

United States Steel Corp. Shipments 11.6% Above May

United States Steel Corp. Shipments 11.6% Above May
Shipments of finished steel products by subsidiary companies of the United States Steel Corp. for the month of June, 1940, totaled 1,209,684 net tons. The June shipments compared with 1,084,057 net tons in the preceding month (May), an increase of 125,627 net tons, and with 607,562 net tons in the corresponding month in 1939 (June), an increase of 402,122 net tons.

For the year 1940 to date, shipments were 6,288,398 net tons, compared with 4,838,404 net tons in the comparable period of 1939, an increase of 1,449,994 net tons.

In the table below we list the figures by months for various periods since January, 1929:

45 J. J. V	1940	1939	1938	1937	1932	1929

^{*} Decrea

tional Committee Increases Rubber Export Quota to 85% for Final Half of 1940 International Committee

Quota to 85% for Final Half of 1940

The International Rubber Regulation Committee, at a meeting in London on July 5, raised the export quota on crude rubber for the final half of this year to 85% of the basic quotas. The committee had previously fixed 80% as the export quota for the last six months of 1940, as was indicated in our issue of May 25, page 3272.

As was reported in these columns of July 6, page 42, the Reconstruction Finance Corporation and rubber manufacturers of the United States capitalized a new government corporation called the Rubber Reserve Co. to acquire this material as essential to national defense. It was also announced at that time that the company had reached an agreement with the International Committee to buy 150,000 tons of rubber over a period of months and it is understood that this action prompted the committee to increase the quota. quota.

Steady Flow of New Steel Business Assured—Some Plants at Capacity

The July 11 issue of the "Iron Age" reported that a steady flow of new steel business, only slightly interrupted by the holiday period last week, and superimposed on fairly large backlogs that have been accumulating in the past several weeks, assures a continued high rate of steel operations for some time to come. The publication further reports:

It appears that only the complete resistion of hostilities abroad would

It appears that only the complete cessation of hostilities abroad would change the forward picture for the steel industry, and even then the readjustment might be of a temporary character in view of the probability that such an event would accelerate our own defense program.

While some of the current buying is admittedly of an anticipatory nature,

While some of the current buying is admittedly of an anticipatory nature, the significant factor in the situation is that present production is based on demands in which the automobile industry, the railroads and the construction industry, the principal peacetime steel outlets, are taking less than average requirements and the National defense program's requirements are largely still to come.

The automobile industry will be taking more steel as it gets farther along in its 1941 model production schedules, the railroads are considering substantital purchases of equipment and rails, and the construction industry should eventually be stimulated by the many projects earmarked for the defense program. With the expansion to be expected in these lines during the next few months, together with the Nation's defense needs which will be felt in many directions as plans mature, the probability of capacity operations in the steel industry by the beginning of the fourth quarter, if not sooner, becomes a matter about which there can be little doubt.

Even now some plants are working at capacity, or as close to capacity

becomes a matter about which there can be little doubt.

Even now some plants are working at capacity, or as close to capacity as conditions permit. The Chicago district has attained a rate of 95%, highest since 1929 and exceeding by one point the peak rate of last fall. This is a gain of three points over the pre-holidy week. Other districts which this week are exceeding their operations of the week before the holiday are Youngstown, Eastern Pennsylvania and the South. However, on the same basis of comparison there have been losses in other districts, notably Pittsburgh, Cleveland and Southern Ohio. At Pittsburgh the rate is only 79% against 83% two weeks ago, two mills having extended their holiday shutdowns into this week, but operations there will undoubtedly be up next week. The rate for the industry is estimated at 87½%, half a point below the figure estimated for the week before last.

In the first half of the year the industry produced 28,678,124 net tons of ingots, equal to 72.64% of capacity. June output was 5,532,910 tons, which was exceeded in all three of the final months of 1939. The six-months total was 37% over the same period last year, while the June figure was

which was exceeded in all three of the final months of 1939. The six-months total was 37% over the same period last year, while the June figure was 14% over that of May and 57% over that of June, last year. Curiously, the present situation in the steel industry is not marked by any of the frenzied buying which has characterized some of the periods of high activity in the past. It is admitted that some of the current buying is robbing mills of business which they would normally get later on and that consumers' inventories are heavier than they were a few months ago, but these represent steps which buyers are taking to protect themselves against delays that might arise from priorities exercised on behalf of National defense work. Agricultural machinery manufacturers, for example, are buying steel that ordinarily would not be ordered until October, while metal toy makers are anticipating their seasonal manufacturing for the Christmas trade.

trade. While orders were heavy in the first week of July, exceeding by a small margin those of the last week of June and by a large margin those of the first week of June, they may be in lesser volume during the next few weeks because of the extensive specifying that was done against low-priced sheet and strip commitments. The most important new business immediately in sight is from the railroads, which now have 12,000 freight cars pending. Freight car purchases in June, totaling about 4,200 units, were the heaviest since December. The Norfolk & Western has ordered 25,000 tons of rails. Other rail buying is expected.

other rail buying is expected.

While defense preparations have not yet stimulated the construction steel products, makers of reinforcing bars have abandoned the presumably unprofitable price levels of the recent past and have reestablished former resale prices on reinforcing bars, representing an advance of \$5 a ton.

Larger demand for Connellsville beehive furnace coke has resulted in a e advance of 25c. a ton.

Despite continued high steel operating rates, scrap prices continue weak, but the declines are smaller, indicating, perhaps, a point of resistance near at hand. The "Iron Age" scrap composite price has dropped 21c. to \$18.71

Mha American Ivon and	Stool	Institute	on July	8 an-	

The American Iron and Steel The American Iron and Steel Institute on July 8 announced that telegraphic reports which it had received indicated that operating rate of steel companies having 97% of the steel capacity of the industry will be 86.4% of capacity for the week beginning July 8, compared with 74.2% one week ago, 84.6% one month ago, and 49.7% one year ago. This represents an increase of 12.2 points, or

16.4%, from the estimate for the week ended July 1, 1940. Weekly indicated rates of steel operations since June 5, 1939, follow:

1939	1 1939-	1940-	1 1940-
June 554.2%	Sept. 1879.3%	Jan. 185.7%	Apr. 15 60.9%

"Steel" of Cleveland, in its summary of the iron and steel

markets, on July 8 stated:

General observance of Independence Day last week took toll of steel production, idleness on Thursday resulting in loss of 14 points to 75% of

General observance of Independence Lay and the General observance of Independence Lay and the production, idleness on Thursday resulting in loss of 14 points to 75% of capacity.

However, rebound is expected this week to the level of the preceding week, slightly less than 90%. In fact, some producers resumed at the high rate on Friday, in effort to meet delivery requirements and to make progress against the mounting order backlog now accumulating. Some small buying for defense purposes is being done, but full weight of such requirements is still in the future. Many steel consumers are seeking to increase inventories to furnish a supply in case priorities are put into effect. Deliveries in some products, notably bars, are falling several weeks behind. Most low-priced sheets bought last spring have been delivered and this makes way for new demand, which is heavy.

June pig iron output was 3,813,092 net tons, an increase of 9% over 3,497,157 tons in May and was the highest total since January, when 4,024,556 tons were made. The daily rate was 127,103 tons, an increase of 12.7% over 112,811 tons daily average in May, also the highest rate since January. Total output for-six months was 21,042,643 tons, compared with 14,023,668 tons for the comparable portion of 1939. It was the highest first half since 1937, when the total was 22,143,895 tons. Active blast furnaces the last day of June numbered 181, a gain of 10 over the end of May, the highest number since December, 1939, when 191 were in blast.

Structural steel extras have been revised drastically as of July 1, the new schedule succeeding that of July 1, 1938. The changes include size,

Structural steel extras have been revised drastically as of July 1, the new schedule succeeding that of July 1, 1938. The changes include size, quantity and length extras, some new classifications and listings. The new schedule was issued by Carnegie-Illinois Steel Co., Pittsburgh, and is expected to be followed by other producers. The changes are made to take into account developments in steelmaking and fabrication since the former card was formulated.

Automotive production is feeling the seasonal effect more sharply, production last week dropping to 51,975 units from 87,550 the previous week, a sharper shrinkage than has been registered for some time. However, output still is well above the comparable week last year, when 42,784 cars were made.

Iron ore shipments from upper lake ports in June totaled 9,525,494 gross tons, an increase of 3,952,496 tons over the corresponding month

last year. Cumulative tonnage to July 1 aggregated 17,268,690 tons, compared with 9,231,249 tons to the same date last year. This is a gain of 8,037,441 tons, 87%.

Placing of 7,575 freight cars in June indicated the new interest taken by the carriers in providing for expected transportation activity. June placements were the largest for any month since April, 1937, except for September and October, 1939. During first six months this year 16,175 freight cars were placed, largest first-half orders since 1937. Chesapeake & Ohio last week distributed 1,000 box cars and 100 cabooses, and the Pennsylvania awarded 2,545 freight cars and 25 cabooses to its own shops. The Santa Fe is inquiring for 10 steam locomotives in addition to the two large diesel-electric freight road engines awarded a week ago. It is reported the British buying commission has placed 112,000 tons of 90-pound steel rails, half with a Pittsburgh mill, to be shipped by Aug. 15. They are said to be for use in rapid repair in case of air raid damage.

All districts participated in the loss of production, due to Fourth of July shutdowns, though not in equal degree. The 14-point loss to 74% of capacity was normal as compared with other years. Chicago dropped 15 points to 77%, Birmingham 17 points to 71%, Cincinnati 27 points to 54%, St. Louis 18½ points to 52%, Detroit 13 points to 79%, Cleveland 16½ points to 69%, Pittsburgh 18 points to 64%, Wheeling 15 points to 75%, New England 5 points to 80%, Buffalo 18 points to 74%, Eastern Pennsylvania 11 points to 72%, and Youngstown 10 points to 70%.

In absence of general buying scrap shows weakness and supply appears adequate to meet demands, prices yielding further in some instances and remaining nominal in others. The composite of steelworks scrap declined 21c. further last week to \$18,83, and the iron and steel composite yielded 4c. to \$37.72 because of scrap changes. The finished steel composite was unchanged at \$56,60.

Steel ingot production for the week ended July 8, which included the Independence

Steel ingot production for the week ended July 8, which included the Independence Day holiday, is placed at approximately 72% of capacity, according to the "Wall Street Journal" of July 11. This compares with 88½% in the previous week and 87½% two weeks ago. The "Journal" further reported:

U. S. Steel is estimated at about 71%, against 90% in the week be

on 8. Steel is estimated at about 71%, against 90% in the week before and 89% two weeks ago. Leading independents are credited with 72½%, compared with 87½% in the preceding week and 86½% two weeks ago. The following table gives a comparison of the percentage of production with the nearest corresponding week of previous years, together with the approximate changes, in points, from the week immediately preceding:

	Industry	U. S. Steel	Independents

Current Events and Discussions

The Week with the Federal Reserve Banks

During the week ended July 10, member bank reserve balances increased \$27,000,000. Additions to member bank reserves arose from an increase of \$103,000,000 in gold stock and a decrease of \$40,000,000 in money in circulation, offset in part by increases of \$76,000,000 in Treasury deposits with Federal Reserve banks and \$28,000,000 in non-member deposits and other Federal Reserve accounts and a decrease of \$12,000,000 in Reserve bank credit. Excess reserves of member banks on July 10 were estimated to be approximately \$6,830,000,000, an increase of \$20,000,000 for the week.

The statement in full for the week ended July 10 will be found on pages 200 and 201.

Complete Returns of Member Banks of the Federal Reserve System for the Preceding Week

As explained above, the statements of the New York and Chicago member banks are given out on Thursday, simultaneously with the figures of the Reserve banks themselves and covering the same week, instead of being held until the following Monday, before which time the statistics covering the entire body of reporting member banks in 101 cities cannot be compiled.

In the following will be found the comments of the Board

In the following will be found the comments of the Board of Governors of the Federal Reserve System respecting the returns of the entire body of reporting member banks of the Federal Reserve System for that week ended with the close of business July 3:

The condition statement of weekly reporting member banks in 101 leading ties shows the following principal changes for the week ended July 3.

An increase of \$39,000,000 in commercial, industrial and agricultural loans, a decrease of \$171,000,000 in demand deposits-adjusted, and an increase of \$152,000,000 in deposits credited to domestic banks.

Commercial, industrial and agricultural loans increased \$24,000,000 in New York City, \$8,000,000 in the Chicago district, \$4,000,000 in the Boston district and \$39,000,000 at all reporting member banks. Loans to brokers and dealers in securities declined \$15,000,000.

Holdings of Treasury bills increased \$48,000,000 in the Chicago district and declined \$45,000,000 in New York City, \$10,000,000 in the Cleveland district and \$14,000,000 at all reporting member banks. Holdings of Treasury notes increased \$9,000,000. Holdings of United States Government bonds increased \$21,000,000 in New York City and \$5,000,000 at all reporting member banks, and declined \$9,000,000 in the Cleveland district and \$6,000,000 in the St. Louis district. Holdings of "Other securities" declined \$19,000,000, the decrease being distributed among a number of districts.

tricts.

Demand deposits-adjusted declined \$58,000,000 in New York City, \$53,000,000 in the New York district outside New York City, \$24,000,000 in the Chicago district, and \$171,000,000 at all reporting member banks. Government deposits declined \$44,000,000.

Deposits credited to domestic banks increased \$43,000,000 in New York City, \$24,000,000 in the Chicago district, \$18,000,000 in the Philadelphia district, \$12,000,000 in the Kansas City district and \$152,000,000 at all reporting member banks. Deposits credited to foreign banks increased \$7,000,000. \$7,000,000.

A summary of the principal assets and liabilities of reporting member banks, together with changes for the week and the year ended July 3, 1940, follows:

American Union Approves Agenda for Havana Conference, Starting July 20—21 Republics Will Consider Defense of Western Hemisphere—Secretary Hull Comments on Alleged Nazi Influence Incito Meeting

Secretary of State Hull was indicated in Associated Press advices from Washington on July 11 as saying that reported German activities in Latin America in connection with the forthcoming Havana conference apparently was a species of intimidation of nations whose sovereignty was entitled to the fullest respect the fullest respect.

the fullest respect.

The Governing Board of the Pan American Union on July 6 approved the proposed agenda for the Havana conference which will begin July 20. Plans for the conference, designed to promote closer economic, political and military cooperation of the Western Hemisphere, were mentioned in our issue of June 22, page 3900.

Further advices regarding Secretary Hull's comments are taken from a Washington account, July 11, to the New York "Journal of Commerce."

"Journal of Commerce."

The attention of Secretary Hull had been directed to reports that have ome here particularly from Central American countries, he made known. The Havana conference, he said, is an inter-American meeting to be held by agreement of the American nations for the purpose of considering matters relating solely to the American republics.

Nazi diplomatic representatives, according to information reaching Washington, have presented notes to some at least of the participating governments expressing hope that no measure against neutrality or any action aimed directly or indirectly against Germany would be taken at Havana.

This, concluded Mr. Hull, is apparently a species of intimidation of nations whose sovereignty and freedom of action, and integrity are entitled to the fullest respect by every other country, and, he added, there is no theory on which any country should attack such sovereignty and freedom of action.

United States Ambassador to Calle Country and freedom

United States Ambassador to Cuba, George S. Messersmith, in a radio address from Havana July 8, stressed the necessity for complete unity among American nations in preparing for the defense of the Western Hemisphere. A Havana dispatch of July 8 to the New York "Times" quoted him as follows:

quoted him as follows:

"There is reason for believing," he said, "that at no time in the history of the Americas has any conference been held, in which the independent sovereign States on the Western Hemisphere have participated, which is of more transcendental importance to each and every one of them." Years of peace with the width of an ocean between this hemisphere and Europe had brought to the American Republics a sense of security from which they had been abruptly awakened, he asserted. Although desiring peace, "we have learned that if we wish to remain at peace we must be in a position to defend ourselves."

The Ambassador warned that a realistic phint of view must be taken

The Ambassador warned that a realistic point of view must be taken concerning protestations by aggressive European countries that they had no interest in the Americas.

The Ambassador expressed confidence that the American States would not be misled, "either by fair promises or by threats of force" and that every nation attending the conference would come prepared to act in the interest of the Americas as a whole.

"In union there is strength, but union implies common action and common attitudes and cannot be secured without some sacrifice.
"I am sure every country in the Western Hemisphere is interested in the maintenance of the independence and the economic security of every other. I therefore claim no special virtue for my country, but I can assure you that the resources, material and moral, in my country are being devoted in an unprecedented manner to provide for the defense of our country and to the defense, with all our power, of the integrity and sovereignty of our sister republics.

"It is our desire that every one of the American republics and ourselves

"It is our desire that every one of the American republics and ourselves should maintain each its independence and freedom and opportunity to cultivate again freely the arts of peace."

Referring to the agenda for the conference, a Washington dispatch of July 6 to the "Times" said:

The agenda was submitted to the governments of the 21 republics a week ago under three main headings—neutrality, protection of peace, and economic cooperation, and all of the governments have instructed their representatives here to approve it.

Secretary Hull relevated at his press conference his intention of attending the conference. He said that the governments were proposing 20 to 50 specific subjects for discussion by the foreign Ministers or their representatives.

50 specific subjects for discussion by the foreign Ministers or their representatives.

He disclosed that discussions were under way through diplomatic channels on problems pertaining to economic, political and military defense against actual or threatened danger.

Three of the most important subjects to be discussed at Havana are the proposed cartel plan, under which the United States would buy the principal export products of Latin America, as well as Canada, for resale or storage; the obtaining of air bases in Latin-American countries, and the status of the possessions in the New World of European nations conquered by Germany. quered by Germany.

Uruguay Pledges Funds to Pay Loans to Year End

Uruguay Pledges Funds to Pay Loans to Year End
The following wireless message from Montevideo July 5
appeared in the New York "Times" of July 6:
The Ministry of Finance issued a statement this afternoon that, despite
difficulties as a result of the war in Europe, the Uruguayan Government
had taken measures to maintain its interest and service payments on all
foreign and internal loans.
Funds already have been remitted to take care of payments on the dollar
loans until Sept. 1, and further moneys for dollar payments until the end
of December have been earmarked by the Central Bank of the republic for
remittance on such dates as are specified in the loan contracts. In addition,
the announcement said that funds had been remitted to cover payments
until Nov. 1 on five sterling bond issues in London and until Dec. 1 to
cover payments due on the Baring Brothers loan.
Remittances for payments due in France and the Netherlands are awaiting
instructions from the Bank of Paris.

Holders of Three San Paulo (Brazil) Bond Issues to Be Paid 14% of Jan. 1, 1938 Coupons

J. Henry Schroder Banking Corp., as special agent, on July 9 notified holders of State of San Paulo (United States of Brazil) 15-year 8% sinking fund gold bonds external dollar loan of 1921, 25-year 8% secured sinking fund gold bonds external loan of 1925, and 40-year sinking fund gold bonds external dollar loan of 1928, that funds have been remitted to it to make payment in lawful currency of the United States of America on or after July 9, 1940 of 14% of the face amount of the coupons due Jan. 1, 1938. The payments with respect to the 8% loan of 1921 and the 8% loan of 1925 amount to \$5.60 for each \$40 coupon and \$2.80 for each \$20 coupon; and with respect to the 6% loan of 1928, \$4.20 for each \$30 coupon and \$2.10 for each \$15 coupon. The announcement added:

The acceptance of such payment is optional with the holders of the bonds

The admouncement added:

The acceptance of such payment is optional with the holders of the bonds and coupons, but pursuant to the presidential decree of the United States of Brazil, such payment, if accepted by the holders, must be accepted in full payment of such coupons and of the claims for interest represented thereby.

The notice also states that no present provision has been made for the unpaid coupons which matured prior to April 1, 1934, but they should be retained for future adjustment.

Member Trading on New York Stock and New York Curb Exchanges—Figures for Weeks Ended June 15 and June 22

Trading in stocks on the New York Stock Exchange by members, except odd-lot dealers, for their own account amounted to 957,180 during the week ended June 22, it was announced by the Securities and Exchange Commission yesterday (July 12), which amount was 25.56% of total transactions on the Exchange of 3,852,980 shares. During the previous week ended/June 15 (as announced by the SEC on July 8) round-lot/purchases and sales of stocks for the account of members, except odd-lot dealers, totaled 1,405,422 shares; this amount was 23.87% of total transactions for the week of 5,844,140 shares.

The Commission also promulgated figures showing the relation of trading by members on the New York Curb Exchange for their own account to total transactions on the Exchange. During the week ended June 22 the member trading was 141,890 shares, or 24.56% of total transactions of 561,630 shares, while in the preceding week (June 15) the Curb members traded in stocks for their own account in amount of 167,635 shares, which was 22,66% of total volume of 744,065 shares.

The following are the figures made available by the SEC:

The following are the figures made available by the SEC: The data published are based upon weekly reports filed with the New York Stock Exchange and the New York Curb Exchange by their respective members. These reports are classified as follows:

	New York Stock Exchange	June 15, '40 New York Curb Exchange	Week End. New York Stock Exchange	June 22, '4 New York Curb Exchange
Fotal number of reports received 1. Reports showing transactions	1,066	837	1,064	835
as specialists	199	107	193	99
actions initiated on the floor 3. Reports showing other trans-		54	257	57
actions initiated off the floor 4. Reports showing no trans-	240	91	208	76
actions	523	615	552	625

Note—On the New York Curb Exchange, odd-lot transactions are handled solely by specialists in the stocks in which they are registered and the round-lot transactions of specialists resulting from such odd-lot transactions are not segregated from the specialists other round-lot trades. On the New York Stock Exchange, on the other hand, all but a fraction of the odd-lot transactions are effected by dealers engaged solely in the odd-lot business. As a result, the round-lot transactions of specialists in stocks in which they are registered are not directly comparable on the two exchanges.

The number of reports in the various classifications may total more than the number of reports received because a single report may carry entries in more than one classification.

July 1 Coupons on Kingdom of Denmark 20-Year 6%

Bonds Due 1942 to Be Paid

The National City Bank of New York announced July 8 that it has received funds for the payment of the July 1, 1940 coupons on the Kingdom of Denmark 20-year 6% bonds due 1942 and that license to disburse such funds up to July 10 against surrender of the coupons has been obtained pursuant to the executive order of the President of the United States. A further application has been made to obtain license for the payment of the coupons after July 10. The bonds of this issue have been outstanding in the amount of \$30,000,000 since early in 1922. Denmark, in spite of present European conditions, has thus kept intact its excellent record in serving its external loan. serving its external loan.

Market Value of Bonds Listed on New York Stock Exchange June 29 Above May 31

The New York Stock Exchange announced July 6 that as of the close of business June 29, 1940, there were 1,358 bond issues aggregating \$52,879,297,534 par value listed on the New York Stock Exchange, with a total market value of \$47,665,777,410. This compares with 1,369 bond issues aggregating \$53,413,788,592 par value listed on the Exchange May 31 with a total market value of \$46,936,861,020. In the following table, listed bonds are classified by governmental and industrial groups with the aggregate market value and average price for each:

Short Interest on New York Stock Exchange Increased in June

The New York Stock Exchange announced July 11 that the short interest existing as of the close of business on the June 28 settlement date, as compiled from information obtained by the Exchange from its members and member firms, was 446,957 shares, compared with 428,132 shares on May 31, both totals excluding short positions carried in the odd-lot accounts of all odd-lot dealers. As of the June 28 settlement date, the total short interest in all odd-lot dealers accounts was 98,144 shares, compared with 125,475 shares on May 31. The Exchange further reported:

Of the 1,232 individual stock issues listed on the Exchange on June 28,

Off the 1,232 individual stock issues listed on the Exchange on June 28, there were 25 issues in which a short interest of more than 5,000 shares existed or in which a change in the short position of more than 2,000 shares occurred during the month.

The number of issues in which a short interest was reported as of June 28, exclusive of odd-jot dealers' short position, was 384, compared with 384 on May 31.

In the following tabulation is shown the short interest existing at the close of the last business day for each month since March 31, 1938:

1938—		1939-		1939—

New York Stock Exchange to Enforce Rule Forbidding Members to Act as Dealers on Other Exchanges in Listed Stocks

The Department of Member Firms of the New York Stock Exchange yesterday (July 12) sent 27 member firms engaged in odd lot dealings, or specialist dealings on other exchanges in stocks listed on the New York Exchange notice that the rule banning such transactions will become effective Sept. 1. The Board of Governors had directed the Committee on Member Firms last February to enforce this rule when it deems it advisable (noted in these columns of March 2, page 1351) but no action had been taken until yesterday. Thus such firms must discontinue all such present activities. Thus such firms must discontinue all such present activities. The ruling sent to members by Charles E. Saltzman, Vice President and Secretary of the Exchange, was as follows:

President and Secretary of the Exchange, was as follows:

On Feb. 28, 1940, the Board of Governors, upon the recommendation of
the Special Committee on Multiple Exchange Trading, adopted a resolution
directing the Committee on Member Firms to proceed to enforce Section 8
of Article XVI of the Constitution with respect to public dealings by members on other exchanges in securities listed on this Exchange.
Pursuant to this resolution, the Committee on Member Firms has ruled
that after September 1, 1940, any member, allied member or member firm
acting as an odd lot dealer or specialist or otherwise publicly dealing for
his or its own account (directly or indirectly through a joint account or
other arrangement) on another exchange in securities listed on the New
York Stock Exchange, shall be subject to proceedings under Section 8 of
Article XVI.

The foregoing does not limit the right of members, allied members or member firms to execute orders for account of others on an agency basis on other exchanges.

Following is the letter sent out by Howland S. Davis, Director of the Department of Member Firms:

Director of the Department of Member Firms:

As you probably know the Exchange has been giving careful study and consideration to the problem of dealing on other exchanges in securities listed on this Exchange, particularly by members of this Exchange acting as odd-lot dealers or specialists on other exchanges in such securities. The Committee on Member Firms has now determined to issue a ruling on Friday, July 12, 1940, with respect to public dealing by members of the New York Stock Exchange on other exchanges in our listed securities. In view of your known interest in this matter, an advance copy of the proposed circular on this subject is enclosed herewith.

The effect of this ruling is that members and member firms may not act as "dealers," and, more particularly, may not function as "odd-lot dealers" or "specialists" on other exchanges in securities listed on the New York Stock Exchange and must discontinue all such present activities. Members and member firms may of course continue to accept orders from customers for execution on such other eschanges.

The Committee on Member Firms wishes you to be advised that, if the effective date of the ruling creates hardship in your case because it is difficult to adjust your present methods of doing business before September 1, 1°40, it will give prompt consideration to any facts which you may present in connection with a request for a temporary extension of the effective date as it applied to your firm.

as it applied to your firm.

New York Curb Exchange Approves Admission of Two Corporations to Associate Membership

The Committee on Admissions of the New York Curb Exchange on July 9 approved the following corporations for admission to associate membership in the Exchange.

admission to associate membership in the Exchange.

(1) Bodell & Co., Inc. (formerly Bodell & Co., associate members of the Exchange since Dec. 14, 1921). The officers of the corporation are as follows: Joseph J. Bodell, Director and President; Louis C. Gerry, Director and 1st Vice-President; Godfrey B. Simonds, Director and Vice-President, Alfred J. McClure, Director and Vice-President, and T. Dwight Boole, Director, Secretary and treasurer.

Joseph J. Bodell has been an associate member of the Exchange since Dec. 14, 1921. The old company (Bodell & Co.) was formed in 1909.

(2) Dunk-Harbison Co. of Los Angeles, Cal. Young, Clarke & Co., associate members of the Exchange since Aug. 20, 1930, dissolved as of July 1, 1940. John S. Young and Fred L. Clarke became officers in the Dunk-Harbison Co. which will become an associate member corporation effective July 10. The officers of the Dunk-Harbison Co. are: Edward H. Dunk, President and Director; McClarty Harbison, Vice-President and Director; C. W. Geisel, Vice-President; S. H. Ellis, Vice-President J. G. Henderson, Vice-President, and R. L. Wakefield, Secretary and Treasurer.

This is the first time that a corporation has constituted.

This is the first time that a corporation has applied for and been accepted into associate membership in the Exchange since the Constitution was amended on Dec. 21, 1938, permitting corporations to apply for associate membership. The action on amending the Constitution was reported in these columns of Dec. 24, 1938, page 3855.

and Investment Bankers Agree on Amending Securities Act of 1933 by Shortening 20-Day Wait-ing Period Required for New Issues

The Securities and Exchange Commission and represen-The Securities and Exchange Commission and representatives of the National Association of Securities Dealers, Inc. and the Investment Bankers Association of America agreed on July 9 on the principles of an amendment to that section of the Securities Act of 1933 which provides for the 20-day waiting period, to be sought at this session of Congress. The details are being worked out and will be submitted to Congress as soon as possible according to an announcement by the SEC, which stated that those who attended the conference were:

Francis A. Bonner, Chairman, and Wallace H. Fulton, Executive

Francis A. Bonner, Chairman, and Wallace H. Fulton, Executive Director of the National Association of Securities Dealers, Inc.; Emmett F. Connely, President, John K. Starkweather, Chairman of the Federal Legislation Committee, Arthur H. Dean, of Counsel, and R. McLean Stewart, of the Investment Bankers Association of America.

Also, Chairman Jerome N. Frank and Commissioners Robert E. Healy, Edward C. Eicher, and Sumner T. Pike; Chester T. Lane, General Counsel; Baldwin B. Bane, Director of the Registration Division; Ganson Purcell, Director of the Trading and Exchange Division, and Edwin A. Sheridan, Executive Assistant to the Chairman.

The meeting between the SEC and the bankers last week

was noted in our issue of July 6, page IX.

It was also disclosed on July 9 that the National Association of Security Dealers has appointed two committees to cooperate with the SEC on possible further amendments to the securities laws, which would be recommended to Congress in January. 1941. in January, 1941.

Financing of National Defense Discussed in Monthly Review of National City Bank of New York—Urges Attention to Adequate Profits if Private Finance Is to Handle Task—Bank Finds Business Trend Upward

Observing that "the domestic business reports during June have shown little fresh influence of the events abroad," the National City Bank of New York, in its July "Monthly Bank Letter," states that "evidently most of the shock passed off in May, when the impact of events fell upon a public opinion unprepared." As to business conditions, the bank goes on to say, in part:

Neither the Italian entry into the war nor the French surrender had any pronounced effect, possibly because many French contracts for American products are being assumed by the British, in as orderly fashion as possible; and behind the British the United States Government doubtless stands prepared to take many of them over. Sentiment has steadied, and the security and commodity markets have been firmer, with more attention to the home situation.

Even during May domestic business was in an upswing, led by the steel industry, and since the weather became more scasonable the improvement has extended to some extent to retail trade, particularly in the industrial areas, and to the merchandise industries. Department store sales have been better than usual in comparison with the May figures, and substantially ahead of last year. Observing that "the domestic business reports during

The Export Situation

Whether the business uptrend will continue will obviously depend in part upon continuance of export trade, and in part upon the speed and extent of defense preparations. After the defense program is fairly under way, and as long as it lasts, it is hardly conceivable that business can be anything but active. But a drop in exports meanwhile, such as would follow interruption of shipments to Great Britain, would be depressing; and no phenomenal expansion of arms output in a few weeks or months should be expected.

In its "Monthly I."

In its "Monthly Letter," issued July 1, the bank also says that this country's national defense program has been well started, but those in charge should realize that the task planned is huge and "almost inconceivably complex." The review declared that if the program is to be privately financed, allowance must be made for sufficient profits to offset the risk of loss, and added that while profits may seem substantial while they are being earned, they might

eventually be tied up in plants that would be of little value when normal conditions were restored. The survey pointed

when normal conditions were restored. The survey pointed out that bankers have expressed the wish to cooperate with the defense program. It said, in part:

The first—and, it would seem, the most obvious—way of meeting added defense costs is by economics in other forms of Government expenditures. This does not mean that relief to the needy should be curtailed. But Congress should carefully scrutinize all items of expense in the light of the new conditions. In public as in private affairs many forms of activity appropriate to ordinary times become insupportable in periods of extra and unusual obligations. These should be dispensed with, or at least postponed. The objections made in the past to all moves to curtail Government expenses on the ground of aggravating unemployment—always a proposition of questionable validity—now clearly loses force in view of the huge program ahead. Nor does the need for economy stop with the Federal Government. Emphatically, this is no time to be launching forth on costly State, county and city undertakings which will add to the demands upon taxpayers and compete with the Federal Government in the markets for labor and supplies.

The second way to meet defense costs is through increased taxes.

labor and supplies.

The second way to meet defense costs is through increased taxes.

Congress has made a wise move in starting the defense program by meeting a substantial part of the cost by taxes. While it would be easy to criticize the bill in detail, it is well to remember, as indicated earlier, that the putting together of any tax bill under pressure involves doing things that are politically practicable and can be done rapidly. The new program has the virtue not only of adding important sums to the revenues, but also of spreading out the cost and making some 2,000,000 more people tax conscious. tax conscious.

Financing Plant Expansion

In considering this phase of the financing job, two separate types of problems arise.

Financing Plant Expansion

In the first place, there is the question of financing private plant expansion needed to take care of Government orders and eliminate "bottlenecks" of inadequate capacity in industry. By and large we all want expansion to go forward and be financed under private auspices, as this will mean less burden on the Government—less difficit, less Government bonds to be sold—and will tend to preserve and strengthen the system of private enterprise, which our defense program is meant to protect. Bankers, through their State and national organizations, as well as individually, have given expression of their ability and desire to cooperate fully in the Government's program, and high Government officials have endorsed the view that requirements be taken care of so far as possible through the regular banking and investment channels.

In looking to private capital to finance and carry forward an expansion program, it is, however, of prime importance that in the levying of taxes and in the terms upon which Government contracts are placed, adequate allowance be made for enough profits to overcome the risk of loss. Otherwise business would be held back from going full steam ahead, and banks, and even the Government, would incur unjustified and unnecessary risks in financing such undertakings.

Everybody would agree that neither business nor individuals should make large profits out of the national defense program. On the other hand, business men are greatly concerned about the action of Congress in reducing maximum allowable profits on Government contracts to 8% and 7% from 12% in the case of airplane contracts, and from 10% in the case of shipbuilding contracts. If manufacturers were sure of making these profits and no losses there would be little complaint, but there are bound to be losses. Moreover, whether a profit is real or simply on paper depends upon how it is computed—whether it is a real net profit after pr

Discussing Natural Defense Expenditures First National Bank of Boston Stresses Need of Economy in Other Lines of Governmental Activity—Also Declares Shackles Must Be Removed from Busi-

The First National Bank of Boston, discussing "Essentials of National Defense," states that "no one knows how many billions will be paid out for military purposes, but if present schedules are carried out the total will be staggering." The bank goes on to say that "the country is ready and anxious to expend whatever is necessary for adequate defense, but there must be expended in the light of the staggering." and anxious to expend whatever is necessary for adequate defense, but there must be economy in other lines of governmental activity. Otherwise the Nation will break down under the strain." It adds that "no time should be lost in eliminating waste and extravagance, which should now be considered a menace to our security. We should reduce governmental bureaus and commissions and abandon forthwith the philosophy of spending our way into better times." In part, the bank continues:

with the philosophy of spending our way into better times." In part, the bank continues:

The spending policies that have prevailed during the past few years have provided an opening wedge for the pressure groups to make raids upon the Federal Treasury, but these funds for the most part have not been put to productive use. Many billions have been spent to prime the pump to create new jobs, but this process has not been effective, as is shown by the many millions still on relief. No one questions that those in actual need should be provided for, but this should be done as far as possible within the capacities of States and municipalities where it can be more efficiently handled and the responsibility more definitely fixed. The great contribution toward social security would be sound monetary and economic policies all along the line.

Moreover, the tax base should be broadened further, so that all groups will realize directly that the country is carrying a heavy burden. It is

only in this way that brakes will be applied to reckless spending. The larger the share of current outgo that can be borne by taxation or met out of public subscription from savings, the more secure will be our financial foundation, the keystone of our economic defense.

To meet the stupendous tasks before us, industry must operate at the highest level of efficiency.

Red tape must be cut and the shackles removed from business. No social benefit to any group should be permitted to stand in the way of a steady flow of goods for national security. In this connection we should profit from the tragic experience of France. The Battle of France was not lost on the battlefield, but years ago, when she adopted the so-called liberal social philosophy, which was reflected in a breakdown in her economic system. The severe limitation upon production in that country, together with the sharp increase in the wage rates, caused a spectacular rise in prices with consequent reduced domestic consumption and a serious decline in exports as well as in governmental revenue.

With the shadows of the totalitarian governments falling over two-thirds of the earth, it is well for us to realize fully the import upon our economy of the coming struggle for power and markets. We shall be forced to compete with countries of low wages and long hours of labor. To meet this situation we too shall be forced to tighten our belts and to work harder. The strain can be appreciably relieved by adopting sound economic and financial policies and restoring confidence in private enterprise so that jobs may be provided for those out of work.

Decrease of \$7,536,000 in Outstanding Bankers Accept-ances During June—Total June 29 \$206,149,000— \$38,381,000 Below Year Ago

\$38,381,000 Below Year Ago

The volume of bankers dollar acceptances outstanding on June 29, 1940, amounted to \$206,149,000, a decrease of \$7,536,000 as compared with the May 31 figure of \$213,685,000, it was announced July 11 by the Acceptance Analysis Unit of the Federal Reserve Bank of New York. As compared with last year, when the acceptances outstanding amounted to \$244,530,000, the June 29 figure represents a decrease of \$38,381,000.

The decline in the volume of acceptances outstanding on June 29 below May 31 was due to losses in credits drawn for exports, domestic warehouse credits and those based on goods stored in or shipped between foreign countries, while in the year-to-year comparison all branches of credits were under last year.

The following is the report for June 29, as issued by the Reserve Bank:

Reserve Bank:

Sixth Anniversary of Federal Savings and Loan Insur-ance Corporation—Assets Reported Steadily Rising

Six years of operation finds the Federal Savings & Loan Six years of operation finds the Federal Savings & Loan Insurance Corporation with assets steadily mounting, said an announcement, June 29, which at the same time reports 2,600,000 investors of small and moderate means protected up to \$5,000 each. The Corporation also reports that at the close of the year it found 2,234 institutions, with assets of \$2,675,000,000, carrying insurance, as compared with 2,168 institutions, with assets of \$2,318,000,000, a year ago, representing an increase of 66 institutions, \$357,000,000 in assets, and 260,000 more investors whose accounts are now insured. In commenting on the Corporation's record, Nugent Fallon, General Manager, said:

In commenting on the Corporation's record, Nugent Fallon, General Manager, said:

Investments by the general public in insured savings and loan associations increased 20% in the last 12 months, from approximately \$1,600,000,000 to \$2,000,000,000. Such investments increased 9.3% in the first five months of 1940.

Insured associations made new loans of \$642,690,000 in the last year, an increase of nearly 27% over the previous year. In other words, people who want to build homes prefer to deal with progressive institutions which take steps to safeguard their investors, in the belief that such institutions also will have the same interest in their borrowers.

The Insurance Corporation's own assets, capital and reserves, have increased from \$100,000,000 to approximately \$124,000,000 in its six years of operation. Mr. Fallon also

\$124,000,000 in its six years of operation. Mr. Fallon also had the following to say:

During that period it has handled 16 cases which might be classed as emergencies at a cost totaling about \$935,000. Some \$324,000 is involved in additional contingent liabilities.

Three cases are pending settlement, while 13 have been closed. In three of 12 cases settled with financial assistance the associations were voluntarily liquidated; in six the institutions continued operation under new management, and in three the affected institutions were merged with stronger associations. In one case it was found that action by the Corporation was unnecessary.

In the three cases pending settlement one institution is being liquidated under State authorities and another through the Insurance Corporation. Disposition of the third case is being studied.

ings, Building and Loan Associations Distributed \$85,000,000 in Dividends in First Half of 1940

On July 1 the savings, building and loan associations completed the distribution of \$85,000,000 dividends for the first half of 1940, the United States Savings and Loan League reports. These earnings on the associations' long-term mortgage loans to home-owners went to 6,800,000 individuals. als, trustees, benevolent and fraternal institutions, and to the United States Treasury. Amounts earned by individual shareholders ranged from a few dollars to several hundred, according to Morton Bodfish, Executive Vice-President of the League. The League's announcement went on to say:

according to Morton Bodfish, Executive Vice-President of the League. The League's announcement went on to say:

He estimated that at least half a million individuals and trust funds are receiving this return on savings and loan investments for the first time in their existence, having placed the money there during the past six months. In the course of the past year several States have clarified their laws to make shares in insured savings and loan associations eligible for trust fund and other fiduciary investment, and there has been a larger gain in this type of ownership for savings and loan accounts during the past six months than at any previous time. Among the group receiving their first savings and loan dividends are a few of the charter members of "Own-a-Home Savings" clubs in savings and loan associations in various parts of the country who started in May to build up \$1,000 or more for a down payment on a home a few years hence. Those who began two months ago will receive dividends at this half-year distribution, it was pointed out.

A substantial reduction in the proportion of the total dividends paid to the Federal Treasury as a return on the United States Government's 1933-37 investments in the associations is noted this time, as compared with dividends distributed Dec. \$1, or for the previous half-year periods. This is due to the substantial retirement of these investments to the Treasury in the past few months, because of the inflow of private funds from individuals enabling the associations to operate without these emergency funds of a few years ago. The next dividend period at the close of 1940 will see a further marked decrease in the flow of dividends in this direction, Mr. Bodfish said, referring to a recent suggestion of the United States League's Federal Savings and Loan Committee that all associations which new have any of the \$35,000,000 invested by the Treasury retire it by July 31 in the interest of cash operating funds for the Treasury's need.

Dividend Payments in 11 Insolvent National Banks Authorized During June

Comptroller of the Currency Delano announced on July 5 that during the month ended June 30, 1940, authorizations were issued to receivers for payments of dividends in 11 insolvent National banks. Dividends so authorized will effect total distributions of \$1,121,700 to 45,331 claimants who have proved claims aggregating \$13,741,000, or an average percentage payment of 8.16%. The announcement further stated:

The smallest and largest individual dividend percentages authorized were 3.57% and 19.1%, respectively, while the smallest and largest receivership distributions were \$35,500 and \$454,800, respectively. Of the 11 dividends authorized two were for regular dividend payments, eight were for final dividend payments, and one was for a final dividend payment including partial interest. Dividend payments so authorized during the month ended June 30, 1940, were as follows:

DIVIDEND PAYMENTS TO CREDITORS OF INSOLVENT NATIONAL BANKS AUTHORIZED DURING THE MONTH ENDED JUNE 30, 1940

New Offering of \$100,000,000 or Thereabouts of 91-Day Treasury Bills—To Be Dated July 17, 1940

Secretary of the Treasury Morgenthau announced July 12 that tenders are invited to a new offering of 91-day Treasury bills to the amount of \$100,000,000, or thereabouts, to be sold on a discount basis to the highest bidders. Tenders will be received at the Federal Reserve banks and the branches thereof up to 2 p. m. (EST) July 15, but will not be received at the Treasury Department, Washington. The Treasury bills will be dated July 17, 1940, and will mature on Oct. 16, 1940, and on the maturity date the face amount of the bills will be payable without interest. There is a maturity of a similar issue of Treasury bills on July 17, in amount of \$100,246,000. In his announcement of the offering Secretary Morgenthau also said:

They (the bills) will be issued in bearer form only, and in amounts or denominations of \$1,000, \$10,000, \$100,000, \$500,000, and \$1,000,000 (maturity value).

No tender for an amount less than \$1,000 will be considered. Each

denominations of \$1,000, \$10,000; \$100,000, \$500,000, and \$1,000,000 (maturity value).

No tender for an amount less than \$1,000 will be considered. Each tender must be in multiples of \$1,000. The price offered must be expressed on the basis of 100, with not more than three decimal places, e. g., 99.125. Fractions must not be used.

Tenders will be accepted without cash deposit from incorporated banks and recognized dealers in investments temperate and from responsible and recognized dealers in investments.

and trust companies and from responsible and recognized dealers in investment securities. Tenders from others must be accompanied by a deposit of 10% of the face amount of Treasury bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated

are accompanied by an express guaranty of payment by an incorporated bank or trust company.

Immediately after the closing hour for receipts of tenders on July 15, 1940, all tenders received at the Federal Reserve Banks or branches thereof up to the closing hour will be opened and public announcement of the acceptable prices will follow as soon as possible thereafter, probably on the following morning. The Secretary of the Treasury expressly reserves the right to reject any or all tenders or parts of tenders, and to allot less than the amount applied for, and his action in any such respect shall be final. Those submitting tenders will be advised of the acceptance or rejection thereof. Payment at the price offered for Treasury bills allotted must be made at the Federal Reserve Banks in cash or other immediately available funds on July 17, 1940.

made at the Federal Reserve Banks in cash or other immediately available funds on July 17, 1940.

The Treasury bills will be exempt, as to principal and interest, and any gain from the sale or other disposition thereof will also be exempt from all taxation, except estate and inheritance taxes. (Attention is invited to Treasury Decision 4550, ruling that Treasury bills are not exempt from the gift tax.) No loss from the sale or other disposition of the Treasury bills shall be allowed as a deduction, or otherwise recognized, for the purposes of any tax now or hereafter imposed by the United States or any of its possessions.

Treasury Department Circular No. 418, as amended, and this notice prescribe the terms of the Treasury bills and govern the conditions of their

British Under Secretary of Treasury to Confer with Secretary Morgenthau

Secretary Morgenthau

Secretary of the Treasury Morgenthau announced on July
11 that, upon his invitation, Sir Frederick Phillips, British
Under Secretary of the Treasury, will shortly arrive in Washington for a visit. This meeting according to the Treasury
Department will provide the occasion for discussion of technical and other questions of the American and British
Treasuries. Sir Frederick Phillips visited the Secretary of

the Treasury in Washington during the Autumn of 1937; this visit was referred to in our issue of Oct. 2, 1937, page

Conversion of Investment Trust Shares Subject to Taxable Gain or Loss According to Federal Income Tax Decision

Conversion of investment trust shares into the underlying stocks gives rise to taxable gain or loss, under a Federal income tax decision announced by the Chief Counsel of the Bureau of Internal Revenue, according to J. S. Seidman, certified public accountant and tax authority. Mr. Seidman

"The new ruling reverses the previous attitude of the Tax Department on the subject. Heretofore, the Government stand was that the exchange of shares in a fixed investment trust for the underlying stocks was merely a change in the form of the original investment, and no profit or loss resulted. Now, however, the viewpoint taken, following a recent court decision on the point, is that the conversion is just like the sale of the Original investment at the market value of the underlying stocks."

Treasury Offers \$600,000,000 of 21/4% Bonds of 1954-56
—"New Money" Borrowing to Replenish Working
Balance—Small Investors Given Preferential Allotment—Secretary Morgenthau Says Weekly Bill
Offerings Will Not Be Enlarged to Increase Cash
Funds—Subscription Books Closed Except for
Small Investors

Secretary of the Treasury Morgenthau on July 11 offered for cash subscription, through the Federal Reserve Banks, at par and accrued interest, an issue of 21/4% Treasury Bonds of 1954-56. The amount of the public offering is \$600,000,000, or thereabouts, and an additional \$50,000,000 of these bonds may be allotted to Government investment accounts. The bonds will be dated July 22, 1940, will bear interest from that date at the rate of 2½% per annum and will mature on June 15, 1956. For the benefit of small investors, the Secretary said, preferential allotment will be given to subscriptions for amounts up to \$5,000 where the subscribers specify that delivery be made in registered bonds 90 days after the issue date. Subscribers for preferential allotment will be restricted to one subscription.

This was the first "new money" financing by the Treasury since December, 1939, when it borrowed about \$521,000,000 from the public by issuing 2% bonds of 1948-50; this financing was noted in these columns Dec. 2, 1939, page 3479.

The details of the present offering were announced by Secretary Morgenthau following a conference on July 9 with the Executive Committee of the Federal Reserve Open Market Committee. Mr. Morgenthau had previously announced (July 8) that the purpose of the financing was to replenish the Treasury's working balance, which had dropped below the considered safe level of \$1,000,000,000. At this time the Secretary also said that he had changed his original program of enlarging the weekly sale of bills to increase the Treasury's cash funds and that some of the bill issues may be left to run out instead of refunding them as they come due. The subscription books to the current offering were closed at the close of business July 11, except in the case of subscriptions by small investors which will close at the close of business today (July 13). Secretary Morgenthau said on July 11 that announcement of the amount of subscriptions and the basis of allotment will probably be made on July 17. In his announcement of the offering, Mr. Morgenthau said:

The bonds now offered will be dated July 22, 1940, and will bear interest from that date at the rate of 2½% per annum, payable sem Bonds of 1954-56. The amount of the public offering is \$600,000,000, or thereabouts, and an additional \$50,000,000

The bonds now offered will be dated July 22, 1940, and will bear interest from that date at the rate of 2½% per annum, payable semiannually on June 15 and Dec. 15, with the first coupon covering the fractional period from July 22 to Dec. 15, 1940. The bonds will mature June 15, 1956, but may be redeemed at the option of the United States on and after June 15, 1954. They will be issued in two forms: bearer bonds, with interest coupons attached, and bonds registered both as to principal and interest; both forms will be issued in denominations of \$50, \$100, \$500, \$1,000, \$5,000, \$10,000 and \$100,000.

both forms will be issued in denominations of \$50, \$100, \$500, \$1,000, \$5,000, \$1,000 and \$100,000.

The bonds will be accorded the same exemptions from taxation as are accorded other issues of Treasury bonds now outstanding. These provisions are specifically set forth in the official circular issued today.

Subscriptions will be received at the Federal Reserve Banks and Branches, and at the Treasury Department, Washington. Banking institutions generally may submit subscriptions for account of customers, but only the Federal Reserve Banks and the Treasury Department are authorized to act as official agencies. Subscriptions from banks and trust companies for their own account will be received without deposit but will be restricted in each case to an amount not exceeding one-half of the combined capital and surplus of the subscribing bank or trust company. Subscriptions from all others must be accompanied by payment of 10% of the amount of bonds all others must be accompanied by payment of 10% of the amount of bonds

The right is reserved to close the books as to any or all subscriptions or classes of subscriptions at any time without notice. The basis of allotment will be publicly announced. Payment for any bonds allotted must be made or completed on or before July 22, 1940, or on later allotment.

The text of the official circular of the offering follows:

UNITED STATES OF AMERICA

2¼% Treasury Bonds of 1954-56. Dated and bearing interest from July 22, 1940. Due June 15, 1956.

Redeemable at the Option of the United States at Par and Accrued Interest On and after June 15, 1954

Interest payable June 15 and Dec. 15

1940 Department Circular No. 637 Fiscal Service Bureau of the Public Debt

Treasury Department,
Office of the Secretary,
Washington, July 11,1940

I. Offering of Bonds

1. Offering of sonas

1. The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, approved Sept. 24, 1917, as amended, invites subscriptions, at par and accrued interest, from the people of the United States for 2½% bonds of the United States, designated Treasury Borle of 1954-56. The amount of the public offering is \$600,000, 00, or thereabouts. In addition to the amount offered for public subscription, \$50,000,000, or thereabouts, of these bonds may be allotted to Government investment accounts.

II. Description of Bonds

- 11. Description of Bonds

 1. The bonds will be dated July 22, 1940, and will bear interest from that date at the rate of 2½% per annum, payable on a semiannual basis on Dec. 15, 1940, and thereafter on June 15 and Dec. 15 in each year until the principal amount becomes payable. They will mature June 15, 1956, but may be redeemed at the option of the United States on and after June 15, 1954, in whole or in part, at par and accrued interest, on any interest day or days, on 4 months' notice of redemption given in such manner as the Secretary of the Treasury shall prescribe. In case of partial redemption the Secretary of the Treasury shall prescribe. In case of partial redemption the bonds to be redeemed will be determined by such method as may be prescribed by the Secretary of the Treasury. From the date of redemption designated in any such notice, interest on the bonds called for redemption
- association and such notice, interest on the bonds called for redemption shall cease.

 2. The bonds shall be exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, or gift taxes, and (b) graduated additional income taxes, commonly known as surtaxes, and excess-profits and war-profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations. The interest on an amount of bonds authorized by the Second Liberty Bond Act, approved Sept. 24, 1917, as amended, the principal of which does not exceed in the aggregate \$5,000, owned by any individual, partnership, association, or corporation, shall be exempt from the taxes provided for in clause (b) above.

 3. The bonds will be acceptable to secure deposits of public moneys, but will not bear the circulation privilege and will not be entitled to any privilege of conversion.

privilege of conversion.

privilege of conversion.

4. Bearer bonds with interest coupons attached, and bonds registered as to principal and interest, will be issued in denominations of \$50, \$100, \$1,000, \$5,000, \$10,000 and \$100,000. Provision will be made for the interchange of bonds of different denominations and of coupon and registered bonds, and for the transfer of registered bonds, under rules and regulations prescribed by the Secretary of the Treasury.

5. The bonds will be subject to the general regulations of the Treasury Department, now or hereafter prescribed, governing United States bonds.

Department, now or hereafter prescribed, governing United States bonds.

III. Subscription and Allotment

1. Subscriptions will be received at the Federal Reserve Banks and Branches and at the Treasury Department, Washington. Banking institutions generally may submit subscriptions for account of customers, but only the Federal Reserve Banks and the Treasury Department are authorized to act as official agencies. Others than banking institutions will not be permitted to enter subscriptions except for their own account. Subscriptions from banks and trust companies for their own account will be received without deposit but will be restricted in each case to an amount not exceeding one-half of the combined capital and surplus of the subscriptiong bank or trust company. Subscriptions from all others must be accompanied by payment of 10% of the amount of bonds applied for.

2. The Secretary of the Treasury reserves the right to reject any subscription, in whole or in part, to allot less than the amount of bonds applied for, and to close the books as to any or all subscriptions at any time without notice; and any action he may take in these respects shall be final. Subscriptions for amounts up to and including \$5,000 where the subscribers specify that delivery be made in registered bonds 90 days after the issue date will be given preferred allotment. In each such case a subscriber may not enter any other subscription, and payment must be made as provided in section IV of this circular. Allotment notices will be sent out promptly upon allotment, and the basis of the allotment will be publicly announced.

IV. Payment

IV. Payment

1. Payment at par and accrued interest, if any, for bonds allotted hereunder must be made or completed on or before July 22, 1940, or on later allotment. In every case where payment is not so completed, the payment with application up to 10% of the amount of bonds applied for shall, upon declaration made by the Secretary of the Treasury in his discretion, be forfeited to the United States. Any qualified depositary will be permitted to make payment by credit for bonds allotted to it for itself and its customers up to any amount for which it shall be qualified in excess of existing denosits, when so notified by the Federal Reserve Bank of its of existing deposits, when so notified b the Federal Reserve Bank of its

V. General Provisions

1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions, to make allotments on the basis and up to the amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective districts, to issue allotment notices, to receive payment for bonds allotted, to make delivery of bonds on full-paid subscriptions allotted, and they may issue interim receipts pending delivery of the definite bonds.

on full-pad subscriptions another, and they may issue interim receipts pending delivery of the definite bonds.

2. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the offering, which will be communicated promptly to the Federal Reserve

Henry Morgenthau, Jr., Secretary of the Treasury.

Study of Dividends Received by Corporations—Total for 1937 Slightly Higher than 1936

See page 119, July 6 issue.

Treasury Explains Outstanding Debt Subject to Debt Limitation of \$45,000,000,000

Limitation of \$45,000,000,000

The Treasury Department made public on July 3 its monthly report showing that the face amount of public debt obligations issued under the Second Liberty Bond Act (as amended) outstanding June 30, 1940, totaled \$43,219,123,375 thus leaving the face amount of obligations which may be issued subject to the \$45,000,000,000 statutory debt limitation at \$1,780,876,625. In another table in the report the Treasury indicates that from the total face amount of outstanding public debt obligations (\$43,219,123,375) should be deducted \$849,523,507 (the unearned discount on savings

bonds), reducing the total to \$42,369,599,868; and to this figure should be added \$597,931,169, the other public debt obligations outstanding, which, however, are not subject to the debt limitation. Thus the total gross public debt outstanding on June 30 is shown as \$42,967,531,037.

The following is the Treasury's report as of June 30:

Statutory Debt Limitation as of June 30, 1940

Treasury notes \$8,936,036,100
Certificates of indebtedness 1,721,300,000
Treasury bills (maturity value) 1,302,194,000

11,959,530,100 \$43,029,738,175

Face amount of matured obligations on which interest has ceased:

\$63,044,150 39,464,450 3,910,600 82,966,000 Notes______Certificates of indebtedness_____

189,385,200 \$43,219,123,375

Face amount of obligations which may be issued under above authority \$1,780,876,625

*Approximate maturity value. Principal amount (current redemption value) outstanding, \$2,904,699,343.

a in addition to the above, Section 21(b) authorized the issue for National defense purposes of notes, certificates of indebtedness and Treasury bilis under the Act in an aggregate amount not exceeding \$4,000,000,000 outstanding at any one time, less any retirements made from the special fund made available under Section 301 of the Revenue Act of 1940.

*Reconcilement with Daily Statement of the United States Treasury June 30, 1940

President Roosevelt Says Recreation Movement in America Is One of Our Richest Resources

The recreation movement in America was described by President Roosevelt, in a letter made public July 8, as "one of our richest resources." Writing to John G. Winant, Vice-President of the National Recreation Association, the President expressed gratification at the announcement that the 25th National Recreation "Congress is to be held in Cleveland this year. The President said the following in his letter:

The recreation movement in America is one of our richest resources. It is not only a manifestation of our capacity for finding life in the face of pressing problems but is an example of how our normal social forces may be used in time of emergency.

I therefore heartily welcome the announcement of the twenty-fifth National Recreation Congress to be held in Cleveland this year under the auspices of this association. I hope it will serve to interpret anew the meaning and importance of our recreation movement, particularly under present world conditions, and that the discussions there will result in ways and means of enabling our people to enjoy increased satisfactions through recreation.

President Roosevelt Says Lack of British Shipping Is Responsible for Small Number of Refugee Children so far Received Here—Denies American Red Tape Is Cause

President Roosevelt, at his press conference on July 9, inferred that the failure of the British Government to provide ships was responsible for the delay in bringing to the United Ships the provide of British shillers the provided by the Ships of Shi ships was responsible for the delay in bringing to the United States thousands of British children threatened by bombings during the current war. He said that the British are solely responsible for the transportation of those children across the Atlantic Ocean. The President said that the real problem is shipping, and that American entry visas have been issued for many British children who now find it impossible to get passage to this country. He denied that American red tape was responsible for the delay. Under date of July 2 it was reported that the British Government was urged from all sides in the House of Commons to speed its plans to send children to the United States for the duration of the war and if possible get the United States Navy to convoy the floating nurseries across the Atlantic. A London cablegram to the New York "Times" on that date, indicating this, also said: indicating this, also said:

Lady Astor, who urged that children of men in the fighting services should be selected, suggested that professional persons in the United States would be pleased to take the children of similar professions in this country and that this idea could be extended through cooperation between business groups in both countries. Thus, she said, thousands of children could be evacuated wisely and quickly before a Blitzkrieg started.

Lady Astor said she was sure President Roosevelt would not let red tape in the United States stand in the way of this scheme and she urged that all red tape should be eliminated here.

red tape should be eliminated here.

Plans for refugee assistance were described as follows in the New York "Times" of July 10:

The National Child Refugee Committee, 215 Fourth Avenue, announced yesterday the acceptance of membership in its \$5,000,000 fund-raising campaign by American leaders in all walks of life.

Among those who have accepted membership are Mrs. Robert McLean, wife of the president of The Associated Press; Dr. Robert A. Millikan, Dr. Thomas Parran Jr., United States Surgeon General; William Allen White, Mrs. Roberta C. Lawson, President of the General Federation of Women's Clubs; Rabbi Stephen S. Wise, Alfred E. Smith and Thomas J. Watson, President of the International Business Machines Corporation.

Other acceptances, according to Marshall Field, Chairman, included Mrs. John J. O'Connor, President of the National Travelers Aid Association; Edward L. Ryerson Jr., Barry Bingham, publisher of "The Louisville Courier Journal"; James Fitzgerald, President of the National Conference of Catholic Churches; Margaret Culkin Banning, Mrs. Arthur Brin, President National Council of Jewish Women; John W. Davis, President, West Virginia State College; General Robert L. Bullard and Rose Schneiderman.

Also Le roy A. Lincoln, President of the Metropolitan Life Insurance Co.; Henry Rogers Winthrop, Bishop James Bernard Sheil, John Jacob Schiff, Rabbi David Feinschreiber, Rabbi Hanry Coken and Clarence Pickett.

Branches Set Up Elsewhere

The United States Committee for the Care of European Children, the parent body for which the National Child Refugee Committee is to raise the \$5,000,000, announced yesterday through Eric A. Biddle, Executive Secretary, the setting up of local branches in 115 cities throughout the

e local branches are organized among persons representing local child

These local branches are organized among persons representing local child welfare, immigration and fund raising organizations and public relations. Meanwhile, Leonard W. Mayo, Director of the Child Care Division of the committee, which arranges for the placement of children who have no known friends or relatives in this country, said homes and assistance for such refugees were being offered at a rate of more than 500 a day.

In its July 9 issue the same paper had the following to say:

In its July 9 issue the same paper had the following to say:
The campaign to raise \$5,000,000 to provide homes for refugee children in the United States, projected last week, was formally started yesterday under the name of the National Child Refugee Committee.

The creation of this committee as the fund-raising agency of the United States (ommittee for the care of European Children was announced by Marshall Field, Chairman of both committees. Mrs. Franklin D. Roosevelv is honorary Chairman of both committees.

The National Child Refugee Committee thus takes over the fund-raising task which earlier was scheduled to be added to the medical and civilian efforts of the Allied Relief Fund, headed by Winthrop W. Aldrich, Chairman of the Board of the hase National Bank. At various private discussions during the past week it was considered more expeditious to make the child refugee fund the single task of an organization specially created for the purpose.

From London July 10 advices to the New York "Times"

Said:

The evacuation of British children to the United States and the dominions has been postponed, or at least greatly curtailed.

For the present, the situation as to evacuation is extremely confused. The matter has come up before the Cabinet and is now under consideration. No decision has been reached as yet, but British authorities are divided on the practicability and desirability of large scale evacuation.

The problem apparently is primarily one of shipping, and more particularly of convoying ships on which British children leave these islands. The problem, of course, has been intensified by the sinking of the Andora Star with German and Italian prisoners aboard. The British are bound to argue that, if this ship was sunk, it is possible that others might be too.

It is obvious that the question of the evacuation of children is growing into a first-class political and diplomatic issue—something it never was expected to become.

into a first-class political and diplomate issue sometaing to recovered to become.

There also is the problem of how several million children under 15 can be evacuated without raising charges of class distinction and favoritism. Pending the working out of a scheme whereby all children can go regardless of their parents' ability to pay, it would appear that the whole matter must remain more or less in abeyance. That is the problem that faces the Cabinet for the moment. for the moment.

Likewise from the "Times" of July 11 we take the following regarding the developments in New York:

New Plan Proposed Here

New Plan Proposed Here

It was learned yesterday that one of the "red tape" changes most strongly urged by the United States Committee for the Care of European Children would permit the committee, as a corporation, to pay ocean fares and guarantee the continued support of young refugees while here.

Unless such a corporate guarantee is legalized, the mass migration of working class children from England will remain virtually impossible, according to the United States Committee.

As the Immigration Law now stands, an individual guarantee is required from each American who proposes to care for a British child, and the requirements are so high that only middle-class families here can satisfy them. The corporate payment of fares and assumption of patronal responsibility for the continuing support of numbers of refugees, which alone would make it possible to transfer children from working-class homes in England to equivalent homes in America, would be illegal now under laws enacted two generations ago to stop corporations from importing cheap labor.

Pending the cutting of this and similar "red tape," not only in the United States but in England, the controlling principle was agreed upon that the United States Committee for the Care of European Children should have legalized responsibility for the British wards while they reside in the United States, since Parliament has decreed that they may not be adopted abroad. While discussion continued here and in London about the shortage of ships, the barriers of red tape and the upper-class status of the first detachments of refugee children, a statement of confidence in the outcome was issued yesterday by Marshall Field, Chairman of the United States Committee and of its fund-raising arm entitled the National Child Refugee Committee.

J. Roland Robinson, member of Parliament, representing the

Committee.

J. Roland Robinson, member of Parliament, representing the British Overseas Reception Board in liaison with the United States Committee, said yesterday that all possible transportation available for children had been officially booked from England and that about 30.0 0 children ought to reach Canada by the end of August—perhaps half of them expecting to be taken into the United States.

President Roosevelt Says Alien Registration Act Is for Protection of Country and Loyal Aliens Residing

Following his signing of the Alien Registration Act of 1940 (on June 28), President Roosevelt on June 29 issued a statement saying that the Act is "designed not only for the protection of the country but also for the protection of the loyal aliens who are its guests," The bill, which provides for the registration and finger-printing of an estimated 3,500,000 aliens, was passed by the House at the last session of Congress (July 29, 1939), and by the Senate in a totally amended form on June 15. A conference report on the bill was adopted by the Senate and House on June 22. Signing of the bill was reported in our issue of July 6, page 40. In his statement Mr. Roosevelt said that the law does not carry "any stigma or implication of hostility towards those aliens "any stigma or implication of hostility towards those aliens who are loyal to this country and its institutions." He asked for cooperation from citizens and non-citizens alike in completing this task.

The President's statement follows:

The President's statement follows:

The Alien Registration Act of 1940, which I have just signed, should be interpreted and administered as a program designed not only for the protection of the country but also for the protection of the loyal aliens who are its guests. The registration and identification of approximately three and one-half million aliens who are now within our borders does not carry with it any stigma or implication of hostility towards those who, while they may not be citizens, are loyal to this country and its institutions. institutions.

institutions.

Most of the aliens in this country are people who came here because they believed and had faith in the principles of American democracy, and they are entitled to and must receive full protection of the law. It is of the utmost importance to the security of the country that the program of alien control shall be carried out with a high sense of responsibility. It would be unfortunate if, in the course of this regulative program, any loyal aliens were subjected to harassment.

The only effective system of country lever eliens in this cause.

The only effective system of control over aliens in this country must come from the Federal Government alone. This is as true from a practical point of view as it is from a legal and constitutional point of view. Since Congress, by this Act, has attempted to provide a single and uniform method of handling the difficult problem of alien registration in this country, it seems to me that attempts by the States or communities to deal with the problem individually will result in undesirable confusion and dualization. and duplication

and duplication.

I ask that citizens and non-citizens alike cooperate with a full sense of the responsibilities involved so that we may accomplish this task of registration smoothly, quickly and in a friendly manner, our aim being to preserve and build up the loyalty and confidence of those aliens within our borders who desire to be faithful to its principles. With those aliens who are disloyal and are bent on harm to this country, the Government, through its law enforcement agencies, can and will deal vigorously.

President Roosevelt Designates Additional Construc-tion Agencies and Provides for Planning of Federal Construction

President Roosevelt signed on June 26 an Executive Order President Roosevelt signed on June 26 an Executive Order designating additional construction agencies and providing for the planning and programming of construction undertaken or aided by the Federal Government. The Bureau of the Budget and the National Resources Planning Board, after making joint studies for more than six months, recommended the procedure which the President has approved and put into effect by Executive Order.

A memorandum jointly signed and given to the President by the Director of the Budget and Dr. Charles E. Merriam, Vice Chairman, National Resources Planning Board, made public with the Executive Order, says:

In order to assist you in the operation of your Executive Office the at-

Vice Chairman, National Resources Planning Board, made public with the Executive Order, says:

In order to assist you in the operation of your Executive Office the attached draft of a proposed Executive Order has been prepared for your consideration to facilitate the budgeting, planning and programming duties for which you are responsible under the terms of Reorganization Plan No. I. These procedures have been developed as the result of a cooperative study made, by the Bureau of the Budget and the National Resources Planning Board over the past six months.

The Board will be responsible for studying project plans in advance of any proposals from the agency to include these in the Budget. This involves a correlation of agency plans in order to resolve any conflicts as to timing, priority or design. During Budget, making time in the Fall, the Board will then be able to advise you and the Bureau of the Budget as to whether projects included in the agencies six-year programs are correlated with national, regional or State development plans. It is anticipated that the staffs of the Bureau of the Budget and of the Board will work together closely during this period. Coincidental with the preparation of the Budget, the Board will then develop a six-year program which can be reported to the Congress at the time of or immediately following the annual Budget message. Such a six-year program will have as its first year the Budget estimates and a developing program for the balance of the five years.

The proposed order also provides for clearing with the Bureau of the Budget reports on the results of surveys or investigations on proposed construction before such reports are sent to Congress, so that a statement may be included in the agency's report as to the-relationship of any such proposals to the program' of the President. This procedure is similar to the one now followed by the Bureau of the Budget in clearing reports from the Federal departments or agencies to the Congress on proposed legislation.

The necessary rule

sident Roosevelt Asks Congress for Additional \$4,848,171,957 for Defense—Special Message Pro-mises Americans Will Not Be Sent to Participate in European Wars—Urges Universal Military Training —Declares "Partial Defense Is Inadequate De-

President Roosevelt, in a special message to Congress on July 10, asked the authorization of an additional \$4,848,-171,957 for defense, and at the same time pledged that "we

will not send our men to take part in European wars." The new request for appropriations brought to approximately \$10,000,000,000 the amount asked this session of Congress for armament purposes. Previously Congress had voted about \$5,000,000,000 for this class of expenditure. In his message to Congress July 10 the President asked \$2,161,441,-957, which he said "it is estimated would be spent out of the Treasury between now and July 1, 1941," and an additional \$2,686,730,000 for contract authorizations.

"In broad outline" said the President in his message, "our immediate objectives are as follows:

1. To carry forward the naval expansion program designed to build up

2. To complete the total equipment for a land force of about 1,200,000

men.

3. To procure reserve stocks of tanks, guns, artillery, ammunition &c., for another 800,000 men, or a total of 2,000,000 men if a mobilization of such a force should become necessary.

4. To provide the manufacturing facilities, public and private, necessary to produce critical items of equipment required for a land force of 2,000,000 men, and to produce the ordnance items required for the aircraft program of the Army and Navy.

5. Procurement of 15,000 more planes for the army and 4,000 for the navy.

"That we are opposed to war" said the President "is known not only to every American, but to every Government in the world." He added: "We will not use our arms in a war of aggression; we will not send our men to take part in European wars," but he further declared, "we will repel aggression against the United States or the Western Hemisphere." "The principal lesson of the war up to the present time" the President stated, "is that partial defense is inadequate defense. If the United States is to have any defense it must have total defense." "We must be able to defend ourselves wholly and at any time." Referring to the fact that "Congress is now considering the enactment of a system of selective training to develop the necessary man power to operate this material and man power to fill Army non-combat needs" the President said.

In this way we can make certain that when this modern material becomes

In this way we can make certain that when this modern material becomes available, it will be placed in the hands of troops trained, seasoned, and ready, and that replacement material can be guaranteed.

In conclusion the President stated:

So great a sum means sacrifice. So large a program means hard work, the participation of the whole country in the total defense of the country. This Nation through sacrifice and work and unity proposes to remain free.

The President's message follows in full:

To the Congress of the United States.

As President of the United States and as Commander in Chief of its armed forces, I come again to the representatives of the people in Congress assembled, to lay before them an extraordinary estimate of funds and authorizations required for the National defense.

authorizations required for the National defense.

In my opinion, it is necessary now that the people of this Nation and their representatives in Congress look at the problem of the National defense with utterly dispassionate realism.

Never have we as a Nation attempted to define the word "defense" in terms of a specific attack at a certain place at a certain time or with specified land and sea forces. In the long sweep of the century-and-a-half since our defenses have been concentrated and unified under the Constitution, it has been a prime obligation of the President and Commander-in-Chief promptly to advise the Congress with respect to any world circumstances calling for either increased or diminished defense needs.

Previous Advices as to War Danger

Previous Advices as to War Danger

From time to time during the last seven years, I have not failed to advise the people and their representatives of grave dangers threatening the United States and its people, and the institutions of democracy everywhere. From time to time I have availed myself of opportunities to reassert and to implement the right of all the nations of the American hemisphere to freedom from attack or control by any non-American power.

A year and a half ago, on Jan. 4, 1939, in my address to the Congress, I referred to the fact that I had felt it necessary on previous occasions to warn of disturbances abroad, and the need of putting our own house in order in the face of storm signals from across the seas. On that day I said that war which threatened to envelop the world in flames had been averted, but that it had become increasingly clear that peace was not assured. I said then that all about us raged undeclared wars, military and economic. I said then that all about us were threats of new aggression, military and economic. I said then that the storms from abroad directly challenged three institutions indispensable to Americans—religion, democracy and international good faith.

economic. I said then that the storms from abroad directly challenged three institutions indispensable to Americans—religion, democracy and international good faith.

Unhappily, many Americans believed that those who thought they foresaw the danger of a great war were mistaken. Unhappily, those of us who did foresee that danger were right.

A week later, on Jan. 12, 1939, I submitted a program considered by me as Commander in Chief of the Army and Navy and by my advisers to be a minimum program for the necessities of defense, saying that every American was aware of the peaceful intentions of this Government and of this people, and that every American knew that we have no thought of aggression and no desire for further territory. The Congress granted that request for the minimum program then deemed necessary.

At the beginning of September the storm broke, and on the 21st of that month, in a message to the extraordinary session of the Congress, I said that this Government must lose no time or effort to keep this Nation from being drawn into the war, and I asserted my belief that we would succeed in these efforts. We have succeeded. I believe we shall continue to succeed.

In September, last, I increased the strength of the Army, Navy, Coast Guard and the Federal Bureau of Investigation within statutory authorizations made by the Congress. In January, 1940, I submitted a budget to the Congress which included provision for that expansion of personnel, as well as estimates for the national defense, amounting to approximately \$2,000,000,000 for the fiscal year 1941.

as estimates for the national defense, amounting to approximately \$2,000,

as estimates for the national derease, amounting to approximately \$2,000,-000,000 for the fiscal year 1941.

On May 16, in a message to the Congress, I pointed out that the swift and shocking developments of that time forced every neutral nation to look to its defenses in the light of new factors loosed by the brutal force of modern offensive war. I called attention to the treacherous use of the "fifth column," by which persons supposed to be peaceful visitors were actually a part of an enemy unit of occupation, and called especial attention to the

necessity for the protection of the whole American hemisphere from control,

I asked at that time for a sum totaling \$1,182,000,000 for the national

On May 31, 1940, I again sent a message to the Congress, to say that the almost incredible events of the then past two weeks in the European conflict had necessitated another enlargement of our military program, and at that time I asked for \$1,277,741,170 for the acceleration and development of our military and naval needs as measured in both machines and men.

our military and naval needs as measured in both machines and men.

Again today, in less than two months' time, the changes in the world situation are so great and so profound that I must come once again to the Congress to advise concerning new threats, new needs, and the imperative necessity of meeting them. Free men and free women in the United States look to us to defend their freedom against all enemies foreign and domestic. Those enemies of freedom who hate free institutions now deride democratic governments as weak and inefficient.

We the free men and women of the United States, with memories of our

We, the free men and women of the United States, with memories of our We, the free men and women of the United States, with interfact of fathers to inspire us and the hopes of our children to sustain us, are determined to be strong as well as free. The apologists for despotism and those who aid them by whispering defeatism or appeasement, assert that because we have not devoted our full energies to arms and to preparation for war that we are now incapable of defense.

I refute that imputation.
We fully understand the threat of the new enslavement in which men We fully understand the threat of the new enslavement in which men may not speak, may not listen, may not think. As these threats become more numerous and their dire meaning more clear, it deepens the determination of the American people to meet them with wholly adequate defense. We have seen nation after nation, some of them weakened by treachery from within, succumb to the force of the aggressor. We see great nations still galantly fighting against aggression, encouraged by high hope of ultimate victory.

ultimate victory

United States Opposed to War

That we are opposed to war is known not only to every American, but to every government in the world. We will not use our arms in a war of aggression; we will not send our men to take part in European wars.

aggression; we will not send our men to take part in European wars.
But, we will repel aggression against the United States or the Western Hemisphere. The people and their representatives in the Congress know that the threats to our liberties, the threats to our security, the threats against our way of life, the threats to our institutions of religion, of democracy, and of international good faith, have increased in number and gravity from month to month, from week to week, and almost from day to day.

gravity from month to month, from week which day.

It is because of these rapid changes; it is because of the grave danger to democratic institutions, and above all, it is because of the united will of the entire American people that I come to ask you for a further authorization of \$4.848.171,957 for the national defense.

Let no man in this country or anywhere else believe that because we in America still cherish freedom of religion, of speech, of assembly, of the press; that because we maintain our free democratic political institutions by which the Nation after full discussion and debate, chooses its representatives and leaders for itself—let no man here or elsewhere believe that we

The United States is the greatest industrial nation in the world. people, as workers and as businessmen, have proved that they can unite in the national interest and that they can bring together the greatest assembly of human skills, of mechanical production, and of national resources, ever known in any nation.

Lesson of War Is That Partial Defense Is Inadequate

The principal lesson of the war up to the present time is that partial defense is inadequate defense. If the United States is to have any defense, it must have total defense. We cannot defend ourselves a little here and a little there. We must be able to defend ourselves wholly and at any time. Our plans for national security, therefore, should cover total defense. I believe that the people of this country are willing to make any sacrifice to attain that end

to attain that end. to attain that end.

After consultation with the War and Navy Departments and the advisory commission of the Council of National Defense, I recommend a further program for the national defense. This contemplates the provision of funds and authorizations for the material requirements without which the man power of the Nation, if called into service, cannot effectively operate, either in the production of arms and goods, or their utilization in repelling attack

Our Objectives in Present Program

In broad outline our immediate objectives are as follows:

1. To carry forward the naval expansion program designed to build up the Navy to meet any possible combination of hoste naval forces.

2. To complete the total equipment for a land force of approximately 1,200,000 men, though, of course, this total of men would not be in the Army in time of peace.

in time of peace.

3. To procure reserve stocks of tanks, guns, artillery, ammunition, &c. for another 800,000 men or a total of 2,000,000 men if a mobilization of such a force should become necessary.

4. To provide for manufacturing facilities, public and private, necessary to produce critical items of equipment required for a land force of 2,000,000 men and to produce the ordnance items required for the aircraft program of the Army and Navy—guns, bombs, armor, bomb-sights and ammunition.

5. Procurement of 15,000 additional planes for the Army and 4,000 for the Navy, complete with necessary spare engines, armaments and the most modern equipment.

The foregoing program deals exclusively with material requirements. The Congress is now considering the enactment of a system of selective training for developing the necessary man power to operate this material and man, power to fill army non-combat needs. In this way we can make certain that when this modern material becomes available it will be placed in the hands of troops trained, seasoned and ready and that replacement material can be guaranteed.

material can be guaranteed.

I take this occasion to report the excellent progress being made for the procurement of the equipment already ordered under authorization by the Congress. Every week more and more is being delivered. The several branches of the Government are working in close cooperation with each

branches of the Government are working in close cooperation with each other and with private manufacturers.

We are keeping abreast of developments in strategy, tactics and technique of warfare and build our defenses accordingly.

The total amount which I ask of the Congress in order that this program may be carried out with all reasonable speed is \$2,161,441,957, which it is estimated would be spent out of the Treasury between now and July 1, 1941, and an additional \$2,686,730,000 for contract authorizations.

So great a sum means sacrifice. So large a program means hard work—the participation of the whole country in the total defense of the country. This Nation through sacrifice and work and unity proposes to remain free, FRANKLIN D. ROOSEVELT.

FRANKLIN D. ROOSEVELT.

The White House

Hatch Act Extending Political Activity Ban to State
Workers Receiving Pay from Federal Government
Sent to President Following Congressional Approval
The Hatch bill extending the "Anti-Politics" Act to State
employees paid wholly or in part with Federal funds was
sent to the White House on July 11 after the Senate agreed
to changes made by the House when passing it on July 10.
The Senate passed the bill on March 18, as was reported in
our issue of March 23, page 1858.

The House action on July 10 came after two days of
debate and followed many months of dispute in the Judiciary
Committee to shelve the bill. The main provisions of the
legislation would limit individual political contributions to
\$5,000 and would forbid any political committee or party to
spend more than \$3,000,000 a year. The following regarding
House action on the bill is taken from a Washington dispatch
July 10 to the New York "Herald Tribune.":

Advocates of the measure beat back virtually every amendment offered

July 10 to the New York "Herald Tribune.":

Advocates of the measure beat back virtually every amendment offered from the floor except those by Representative John J. Dempsey, Democrat, of New Mexico, House sponsor of the legislation. One of Mr. Dempsey's amendments provided for the measure to become effective as soon as the President signed it, instead of in October, as the Senate had specified. It was approved on a voice vote.

Among many amendments which failed were two which would have applied the Act's provisions to employees of public utilities and to labor organizations. Representative John E. Rankin, Democrat, of Mississippi, offered the former, and Representative Clare E. Hoffman, Republican, of Michigan, the latter.

An amendment by Representative Lee E. Geyer, Democrat, of California, to prohibit States from collecting poll taxes was ruled "not germane" by Representative John W. McCormack, Democrat, of Massachusetts, presiding.

Representative John W. McCormack, Democrat, of Massachusetts, presiding.

Among the House amendments expected to win quick Senate approval was a ban on purchase of any commodity or advertising, proceeds from which go to "furthering, advancing or advocating" nominations or elections. This proposal, written in committee at the instance of Representative Albert L. Vreeland, Republican, N. J., was aimed, he said, at such sales as the Democrat's 1936 "campaign book" which in some cases brought \$100 a copy, to the benefit of the party's war chest.

Both the Vreeland amendment and the \$5,000 limit on campaign contributions carry penalties for non-compliance of imprisonment up to five years and fines up to \$5,000.

Dismissal is the penalty for State or local employees violating the Act. It would follow a determination by the Civil Service Commission that a violation had occurred. If the State or local agency employing the violator failed to dismiss him, the Commission would order the Federal agency concerned to withhold certain funds from the State equal to two years' compensation for the violator.

The measure permits an appeal by the employee to the Federal courts, but an amendment offered by Representative Dempsey and adopted 131 to 82 on a teller vote would remove a guaranty of a jury trial.

Those affected are officers and employees "whose principal employment is in connection with any activity which is financed in whole or in part by loans or grants made by the United States or by any Federal agency."

Previous action on the measure by the House Rules Com-

Previous action on the measure by the House Rules Committee was noted in these columns of June 15, page 3755.

Legislation Authorizing 70% Expansion in Naval Tonnage Sent to President for Signature

Final Congressional action on the bill authorizing an increase over the next six years of 70% in the Navy's fighting fleet at an estimated cost of \$4,000,000,000 was taken on July 11 when the House accepted minor changes made by the Senate, which passed the bill without a record vote on July 10. The House had passed the bill June 22. Following the approval of the Senate changes, the House sent the bill to the White House on July 11 for President Roosevelt's signature. The general purpose of this legislation is to give the United States a "two-ocean Navy" capable of defending its interests simultaneously in the Atlantic and in the Pacific. The bill was reported to the Senate by its Naval Affairs Committee on July-3 and the Senate backed its Committee's recommendations. The measure, as reported by the Committee provides the following, said a Washington dispatch of July 7 to the New York "Times":

1. An increase in the Navy's fighting strength of 1,325,000 tons (about

July 7 to the New York "Times":

1. An increase in the Navy's fighting strength of 1,325,000 tons (about 70% of its present authorized strength) to be distributed as follows: capital ships, 385,000 tons; aircraft carriers, 200,000 tons; cruisers, 420,000 tons; destroyers, 250,000 tons, and submarines, 70,000 tons, with authority to the President to shift allocation of tonnage among the several classes of not more than 30% of each authorized tonnage allowance.

2. Appropriations of \$235,000,000, instead of the House figure of \$220,000,000, would be authorized for expansion of facilities for shipbuilding, armor-plate production and armament manufacture. Patrol and other minor auxiliary vessels could be constructed "as may be necessary," instead of being limited to \$25,000,000 as in the House bill. A top limit of 100,000 tons would be put on such construction.

of being limited to \$25,000,000 as in the House bill. A top limit of 100,000 tons would be put on such construction.

The bill would repeal existing provisions that 10% of the Navy's aircraft and engines must be produced in government factories in case those factories are already operating at production capacity. It would forbid the disposal by sale or otherwise, of any naval vessel built or under construction by contract without the consent of Congress, except for circumstances covered by existing laws—a proviso added by the Senate Committee.

The Navy would be empowered to acquire 15,000 "useful naval airplanes" but the President could acquire more if this figure were deemed insufficient.

Passage of the bill by the House was mentioned in these columns June 29, page 4056.

Legislation to Speed Strengthening of National De-fense Signed by President Roosevelt

President Roosevelt signed on July 2 the bill to expedite the strengthening of the national defense. Action on this bill, which also provides legal authority for the control of exports from the United States of munitions, materials and

machinery essential to our national defense, was completed in Congress on June 22 when the Senate adopted the conference report which the House had approved on June 21. The House had previously passed the bill on May 24 and the Senate on June 11; noted in these columns of June 15, page 3755. This measure removes all limitations on the number of airplanes to be acquired by the Army and increases the authorized strength of the Army Air Corps and the Reserve Air Corps officers. Air Corps officers.

Air Corps officers.

It was under this legislation that the President last week set up under his proclamation, July 2, a licensing system to control exports of munitions, strategic metals, semi-finished products and machine tools; this action was reported in our issue of July 6, page 39.

Along with the proclamation the President also on July 2 signed and issued the following Military Order:

The administration of section 6 of the Act of Congress entitled "An Act to expedite the strengthening of the national defense," approved July 2, 1940, is essentially a military function, and by virtue of the authority vested in me as President of the United States and as Commander-in-Chief of the Army and Navy of the United States, I hereby designate Lieutenant-Colonel Russell L. Maxwell, United States, I hereby designate Lieutenant-Colonel Russell L. Maxwell, United States Army, Administrator of Export Control to administer the provisions of the said section under the direction and supervision of the President as Commander-in-Chief of the Army and Navy of the United States.

FRANKLIN D. ROOSEVELT,

FRANKLIN D. ROOSEVELT, Commander-in-Chief.

The White House, July 2, 1940.

President Roosevelt Signs Bill Expediting Naval Shipbuilding

The legislation to expedite the national defense by speeding up the building of naval vessels and airplanes was signed by President Roosevelt on June 28. Congressional action was completed on June 22 when both the Senate and the House approved a conference report on the bill. The measure primarily modifies or repeals all those safeguards which Congress has legislated through the years for the purpose of protecting the public treasury in the expenditure of vast sums of money. The original bill was adopted by the House on May 28 (noted in our issue of June 1, page 3441), and by the Senate on June 21. Some of the provisions of the speed-up legislation follow: Permits the Navy to negotiate contracts instead of calling for competitive bids on ships, planes or materials; allows the Navy, or Treasury Department in the case of the Coast Guard, to advance up to 30% of the contract price to aid new companies; prohibits the sale or transfer of any vessels, airplanes, weapons or munitions to any foreign governments unless the Chief of Naval Operations or Chief of Staff of the Army shall first certify that such material is not essential to national defense, and reduces the profits which a contractor can make to 8% in the case of competitive hid. tial to national defense, and reduces the profits which a contractor can make to 8% in the case of competitive bidding and to 7% for negotiated contracts, the excess is recaptured and paid into the Treasury.

Senate Adopts Bill Authorizing Federal Government to Pay Up to \$7,000,000 for Super-Drydock in New Pay Up to S York Harbor

York Harbor

The Senate on July 11 passed and sent to the House a bill authorizing the Federal Government to pay up to \$7,000,000 for a graving drydock in New York Harbor estimated to cost between \$11,600,000 and \$14,300,000, to be built in cooperation with the Port of New York Authority. This drydock would be of sufficient size to accommodate the largest naval and merchant ships now in existence or likely to be built in the next few years. President Roosevelt was indicated on June 19 as favoring the project. Under the plan adopted the Port Authority would finance the remainder of the cost on a self-liquidating basis. a self-liquidating basis.

Senate Confirms Nominations of Henry L. Stimson as Secretary of War and Frank Knox as Secretary of Navy—Two Republicans Sworn in as Members of Cabinet

Cabinet

The Senate this week confirmed the nominations of Henry L. Stimson as Secretary of War and Col. Frank Knox as Secretary of the Navy. The confirmations came after three days of debate in which the two Republicans were described by isolationist Senators as "interventionists" and probable leaders of a "war cabinet." Mr. Stimson was approved by the Senate on July 9 by a vote of 56 to 28, with 45 Democrats, 10 Republicans and 1 Independent for confirmation and 14 Democrats, 12 Republicans, 1 Progressive and 1 Farmer-Laborite opposing. On the following day (July 10) Col. Knox received the Senate's approval by a vote of 66 to 16. Voting for confirmation were 48 Democrats, 17 Republicans and 1 Independent while the opposition consisted of 9 Democrats, 5 Republicans, 1 Progressive and 1 Farmer-Laborite.

1 Farmer-Laborite.
Messrs. Stimson and Knox were Nominated by the President on June 20 and they were approved by Senate Committees last week as was reported in these columns July 6,

mittees last week as was reported in these columns July 6, page 41.

Mr. Stimson, (who succeeds Harry L. Woodring resigned) served as Secretary of State under President Hoover and as Secretary of War under President Taft; he was sworn in as Secretary of War on July 10 in the President's office with Mr. Roosevelt as a witness and Percy Nelson, Assistant White House Comptroller, administering the oath.

Col. Knox, Republican Vice-Presidential candidate in 1936 and Publisher of the Chicago "Daily News", took the oath of office at the White House on July 11 with Supreme Court Justice Frankfurter officiating. Col. Knox succeeds as Secretary of the Navy, Charles Edison resigned.

House Rules Group Clears Way for Action on Bill to Regulate Investment Trusts

The House Rules Committee granted a special rule on July 10 for consideration of the bill to regulate investment trusts. It is expected that the measure will be taken up after next week's recess incident to the Democratic National Convention. This bill was favorably reported to the House on June 18 by the House Interstate Commerce Commission, as was reported in our issue of June 22, page 3902. Washington Associated Press advices of July 10 had the following to say:

The bill provides for the registration of investment companies with the Securities and Exchange Commission and that body may require of them the same information required for registering securities under the Securities Act of 1933 and the Securities Exchange Act of 1934. Officials of the SEC said such companies were not included in previous enactments because there had been, until recently, insufficient information about them.

One section of the measure would prevent formation of an investment trust unless it had at least \$100,000 through private subscription prior to any public offering.

any public offering.

House Votes \$40,000,000 Fund to Underwrite Federal System of Marine War-Risk Insurance

An appropriation of \$40,000,000 to set up a revolving fund in the United States Maritime Commission to underrund in the United States Maritime Commission to underwrite the system of marine war-risk insurance and reinsurance for American flag vessels was voted by the House on July 10 and sent to the Senate for action. Passage of amendments to the Merchant Marine Act providing for the establishment of this government-underwriting system was reported in these columns July 6, page 40. Concerning the House action on July 10, a Washington Associated Press dispatch said:

The House trimmed the original request of the Maritime Commission for \$50,000,000 with the explanation that it considered \$40,000,000 ample

for \$50,000,000 with the explanation that it considered \$40,000,000 ample to start the fund and that additional amounts would be provided if needed. Premiums and operating revenue also will go into the fund.

The insurance plan is modeled after the war risk insurance act of the World War, under which \$2,000,000,000 in marine insurance was writtenand from which the government realized a net profit of \$17,500,000.

The system, commission spokesmen explained, is designed as a "buffer' against any inability of the private insurance market to meet the demands of commerce and will not be used to compete against private underwriters. The system permits the commission not only to insure marine risks directly when insurance is not available at reasonable rates in the private market, but to reinsure its risks in the private market, or to reinsure risks assumed by private underwriters, thus affording a three-way protection.

State Department Incident to Reported Remarks of German Consul in New Orleans Advises Embassy That Discussion of U. S. Policies Does Not Come Within Province of Foreign Officials Here

Advises to the effect that "public discussion of questions

Advises to the effect that "public discussion of questions relating to this country's policies . . . do not properly come within the province of foreign officials in this country" were conveyed to the German Embassy at Washington by the State Department on July 5.

The incident arose over an alleged interview given by Baron Spiegel von und zu Peckelsheim, the German Consul General in New Orleans, who was reported as saying that Germany would not forget that the United States had given help to the Allies in the present war. The Consul explained that he had not spoken for publication. The State Department said that it considers the incident closed.

The Department's statement follows:

The Department's statement follows:

The Department's statement follows:
Through the courtesy and assistance of the Governor of Louisiana, the Department of State has now received a report concerning the interview given by Edgar Freiherr Spiegel von und zu Peckelsheim, German Consul General in Newsorleans, to a reporter for "The New Orleans States" on June 14, 1940, excerpts from which appeared in that newspaper and were later reproduced or summarized in other papers.

It would appear that the German Consul General in this instance thought he was not speaking for quotation, and that his statement was not for publication, and that, perhaps due to a misunderstanding, publication was made.

was made.

The matter has been taken up with the German Embassy here, and it has been pointed out that public discussion of questions relating to this country's policies and attitudes does not properly come within the province of foreign government officials in the United States. It was pointed out that permission granted to foreign government officials to continue to remain in this country is dependent on observance of this rule. The incident is considered closed.

Proposed Excess Profits Tax Bill To Embody 5-Year Amortization Provision As to New Facilities— Agreement Reached at Conference Between Presi-dent and Government Heads—Vinson-Trammel Act to be Replaced

Act to be Replaced

The proposed excess profits tax to be imposed incident to the defense program was the subject of a conference in Washington on July 10 between President Roosevelt, Treasury heads, tax leaders in Congress, William Knudsen, and Jesse Jones, following which it was announced that it was agreed to embody in the bill a provision for amortization over a 5-year period of additional facilities, including both plant equipment, certified as immediately necessary for National

defense purposes. With regard to this action the Washington "Post" of July 11 stated:

The agreement, it was explained later, removes a chief source of uncertainty for industrial concerns that had been delaying the defense program. Now such firms as the Packard Motor Car Co., considering a 9,000-engine contract that was rejected by Henry Ford, can know just at what rate they may depreciate, for tax purposes, any new plant or equipment they build to handlejdefense orders.

The Conference also agreed that the proposed bill will be substituted for the provisions of the Vinson-Trammel Act, which now applies only to Army and Navy vessels. Commenting further on the decisions reached at the Conference, the Washington "Post" said:

Also unanimously, they agreed that profit limitations of 7 and 8% on naval construction and Army and Navy aircraft would be dropped in favor of an excess profits tax to apply generally to all industries, whether working for the Government or not.

Agreement on a general excess profits levy to supersede the Vinson-Trammel rates, would generalize a tax that has applied until now only to naval construction and to military aircraft construction.

The Vinson-Trammel rates, as changed by amendments approved June 28, limit such profits to 8% of contract price or 8.7% of cost. These amended rates superseded former limits of 10% on naval vessels and 12% on Army and Navy aircraft.

It was believed yesterday that the World War excess and war profits laws would not serve as a model for the new levy, which is being worked out in conferences with the Treasury.

Precedents Studied

But experts had under study the following precedents: The 1916 law, as amended, imposed excess profits levies ranging from 8 % on salaries in excess of \$6,000 and income over \$6,000 from small businesses to 60% on net income of more than 33% on invested capital.

Corporations, under the 1916 law as amended were allowed credits of \$3,000 plus a "normal" profit based on certain prewar years. Above that, the tax took slices ranging from 25% to 65%.

Under the 1918 war profits tax on corporations the credit allowed was a minimum \$3,000 profit plus a 8% return on invested capital and the tax rates on profits over that were 30% on net income up to a 20% return on invested capital, and a tax of 65% on a return over that figure.

A White House press release with respect to the Conference was issued as follows on July 10:

Was issued as follows on July 10:

With the view of adjusting the defense program to the existing and proposed excess profits tax structures, the President today conferred with the Secretary of the Treasury, Assistant Secretary Sullivan, Mr. Edward H. Foley, General Counsel of the Treasury Department, Senator Pat Harrison, Chairman of the Senate Finance Committee, Congressmen Jere Cooper, Chairman of the Sub-Committee on Internal Revenue Taxation of the Ways and Means Committee of the House (Mr. Doughton, Chairman of the Ways and Means Committee, being out of town for the day), Mr. William Knudsen of the National Defense Advisory Commission, and Mr. Jesse Jones, Federal Loan Administrator.

It was unanimously agreed by those attending that the excess profits tax bill soon to be introduced will incorporate a provision for amortization over a five year period of additional facilities, including both plant and equipment, certified as immediately necessary for national defense purposes by the Army and Navy and Advisory Commission of the National Defense Council.

Army and Navy and Advisory Commission of the National Defense Council. It also was unanimously agreed that the proposed excess profits tax bill, which will apply generally to all industries, will be substituted for the excess profits provisions of the Vinson-Trammell Act which now apply only to Army and Navy aircraft and naval vessels.

The contemplated action is expected not only to simplify the multiple tax problems of prospective contractors but to greatly clarify their future tax liabilities.

tax liabilities

In this manner, any doubts as to the tax position of contractors in the general program of National rearmament will be removed and they will be

able quickly to execute defense contracts.

The conferees were agreed that the plan is certain to result in an appreciable acceleration of the National defense program. At the same time it is intended that there be no substantial sacrifice of revenues accruing to the United States Treasury.

The President's message to Congress on July 1 recommending "a steeply graduated excess profits tax" designed to help finance the National defenses, was given in our

July 6 issue, page 40.

According to Washington advices July 10 to the New York "Journal of Commerce" the Congressional group is not disposed to rush the enactment of new excess profits tax legislation because of the difficulties encountered in the administration of the 1917 law under which there are still 19 tax disputes to be disposed of between the Treasury and tax-payers. From the same advices we quote:

It was declared by Chairman Pat Harrison of the Senate Finance Committee, following the conference, that an excess profits tax law will raise a tremendous amount of money for the Government. He said that the Treasury is ready to present draft proposals to carry out the President's wishes for a steeply graduated levy but that members of Congress want time to study the situation.

Would Hold Hearing

Indications were given that the House Ways and Means Committee would be inclined to hold lengthy hearings, running perhaps as long as two weeks, that the difficulties of the 1917 Act might be rehearsed and means developed for overcoming them. It was said that the Treasury has not yet been able to make the necessary refinements that, therefore, it had but skeleton plans, alternative in character, for the immediate consideration of the Ways and

Means and Finance committees.

Senator Harrison pointed out that this is a big question, in his opinion, and one on which the experts of the Treasury Department have not agreed, except as to principle. He added that members of the National Defense Advisory Commission do not wholly agree as to the amount of profit that is allowed under the Vinson-Trammell Act and this is understood to have led to the determination to "junk" this latter and to substitute therefor the projected excess profits tax law in its general application to all industries. Under existing law, limited to aircraft manufacturers and shipbuilders engaged upon Government contracts, a net profit of 8% onless allowed and where the contracts are entered into by negotiation—without competitive bidding—a profit of 7% can only be taken.

Simplified Procedure for Handling Declarations and Applications Regarding Financial Transactions Under Holding Company Act Announced by SEC— Two New Rules Adopted Making Hearings and Findings Unnecessary

The Securities and Exchange Commission announced on July 10 a simplified procedure for the handling of declarations and applications concerning financial transactions under the and applications concerning financial transactions under the Holding Company Act, designed to cut red tape and save much time and expense for utility companies and the Commission. This, says the Commission, has been accomplished by the adoption of two new rules which make hearings and findings unnecessary except in cases where substantial difficulties are presented. The rules were the subject of discussion at a conference on June 27, 1940, between members of the Commission's staff and representatives of the utility industry who expressed approval of their adoption. The Commission's announcement explained the new rules as follows: follows:

Commission's announcement explained the new rules as follows:

The first of the new rules—Rule U-8—is applicable to practically all applications and declarations involving financial transactions subject to the jurisdiction of the Commission. It does not apply, however, to proceedings under Sections 2 or 3 (exemptions), Section 11 (integrations and reorganizations), or Section 13 (service companies).

Unless a hearing is necessary, a declaration or application subject to the rule will become effective or be granted 30 days after filing. The rule furthermore provides for acceleration so that if no hearing is required, the Commission may shorten the waiting period regardless of the 30-day provision. Amendments will become effective in 15 days, but this period may also be shortened in appropriate cases. To afford interested persons an opportunity to request a hearing, the rule provides for published notices of the filing of declarations or applications.

The second rule—Rule U-9—prescribes the terms and conditions to be imposed in connection with the granting of each application and the effectiveness of each declaration, unless otherwise ordered by the Commission. For the most part, these terms and conditions simply formalize those which the Commission heretofore has imposed as a routine matter by express provisions in its orders as to specific cases. These terms and conditions apply to all declarations and applications whether or not they are subject to the provisions of Rule U-8.

The Commission also rescinded Rule U-687-1 and adopted certain minor amendments to Rule U-12B-1, the principal effect of which is to eliminate any inconsistency which might otherwise exist between the new Rule U-8 and the procedure heretofore specified in those rules.

Certain minor changes also were adopted to Rules U-9C-3 (14) and U-12C-1. The principal change involved is to provide a somewhat broader exemption than is available under the existing rule with respect to acquisition of securities by the issuer for sinking fund purposes.

mediately, except that Rule U-8 will not apply to pending matters timess the Commissions so orders.

Commissioner Healy dissented from the adoption of Rule U-8 and, to the extent related to Rule U-8, from the other action taken by the Commission. His views and those of the other commissioners are set forth at length in memorandums dated April 1, 1940 and June 24, 1940, respectively, which were made public on June 27, 1940.

Department of Commerce Asks Manufacturers to Co-operate in Monthly Industry Survey—Letter Says Business Statistics of Inventories, New and Un-filled Orders and Shipments Are Particularly Essential at This Time

Essential at This Time

Several hundred representative manufacturing companies were asked on July 4 by Under Secretary of Commerce Edward J. Noble to participate in an expansion of the monthly industry survey conducted by the Bureau of Foreign and Domestic Commerce, which provides current information on manufacturers' inventories, new and unfilled orders and shipments. Mr. Noble wrote to the heads of these companies, stating that business data are particularly essential at this time to keep pace with the rapid shifts in the placement of the shipment of goods, and the level of inventories in American factories. An announcement by the Department also said in part: the Department also said in part:

Companies already furnishing data on a voluntary basis for the Industry Survey account for almost 40% of all manufacturing activity in the United States. This large representation of American industry evidences the wholehearted support accorded the Department when the Survey was initiated last December at the instance of business men and economists.

The information already available on a current basis provides estimates

of new orders received by manufacturing concerns, changes in the inventory position and unfilled order backloss of manufacturers and the trend of shipments or deliveries. The data are now being released by the Department not only for manufacturing as a whole but also for 10 major industry groups including iron and steel, machinery, chemical, food, paper and rubber

products.

The Under Secretary said that the current expansion in the Survey is intended to increase the number of industries for which data may be made available and to improve the accuracy of the figures already being released. The manufacturing concerns being requested to participate in the Survey are largely concentrated in the industries where adequate data are not yet

available.

The report form has been made as brief and simple as possible and is limited to four basic items usually maintained on the books of manufacturers. Nevertheless, the Bureau specifically said that it does not want any company to incur the expense of providing figures which are not immediately available from its records.

Along with his letter to heads of companies Mr. Noble attached a summary of a report for May 1940 indicating the type of information currently being made available. From his letter we quote:

I am asking selected companies in your industry to provide the Department with the information on the enclosed schedule which has been made as brief and simple as possible.

It should be made clear that I am not requesting that you make any costly changes in your accounting procedure or fill out this form. All that

is asked is that you let us have those figures which are readily available from your regular records each month. For example, if you maintain a monthly record of your total inventories but not of raw materials, goods in process, etc., simply enter the total inventory figure and write "not available" on the report for the other inventory item.

Secretary Hopkins Says Business Recovery is Widening —Attributes Much of Growth of Movement to De-fense Program—Industrial Orders in May 10% Above April

Stimulated by the national defense program, the business ecovery which began in May spread over a wider front during June, and signs are increasing that the movement is growing stronger, Secretary of Commerce Hopkins announced on July 7. He reported that the unfavorable aspects of the May business situation have, to a large degree, been dispersed. In citing several facts as evidence of a rising trend in industry, Mr. Hopkins was quoted as follows, in a Washington dispatch of July 7 to the New York "Journal of Commerce":

 Business purchasing expanded and consumer buying improved.
 The stock market regained a small part of the heavy losses recorded in May and showed some strength to withstand the continued shocks coming from abroad.

from abroad.

3. Commodity prices were firmer, although the uncertainties of the international situation prevented any marked or consistent rise.

"With many farm prices still low and with our export markets considerably curtailed by recent events, however," the Secretary commented, "it cannot be said that domestic business is as yet wholly secure against European developments in the near future. But it is evident that the eventual repercussions of the vast national defense program upon industrial production and investment are being replicated in sevicion contains. production and investment are being reflected in revised expectations of businessmen."

of businessmen."

The flow of new orders to industry, and in consequence manufacturing production was substantially increased during June, Mr. Hopkins continued, but pointing out that some inventory accumulation is occuring, he did not believe that this is a repetition of last year's inventory boom with its subsequent downturn in the early part of this year, however, because of the increased demand provided by the national defense program.

Holds Situation Differs

"With a sizable increase in production, it is likely that some accumulation in total inventories is taking place," he said. "What should be recognized, however, is that the present situation differs in its essentials from that touched off by the September-October buying wave last year. Last fall inventories were enlarged rapidly in anticipation of increased export business. At a time when increased exports were only a possibility, production expanded to an extent that could not be validated in a short time by any probable increase in demand from abroad, or, in fact, by the increase which later occurred. which later occurred.

"In the present situation, apart from the fact that the volume of new

orders has increased much more moderately, the basic demand arising from the national defense program is likely to require an expansion in the volume of production even beyond present expectations. Should there be moderate inventory accumulation, therefore, to meet requirements that will arise when full demands for defense requirements reach the market, it should

when full demands for defense requirements reach the market, it should not be a serious factor.

"Interruptions to the rising trend of production, such as a quick termination of the war, or readjustments of a technical character, should be of less importance than was formerly the case when a basic demand factor comparable to the defense program was not in the picture."

The Department of Commerce on July 8 made public a monthly industry survey for May, showing manufacturers' new orders almost 10% above April, shipments 2½% higher and inventories unchanged. A Washington dispatch of July 8 to the New York "Times" said:

The May rise in new orders carried incoming business appreciably above the shipment level for the first time since last Fall. The bureau's new-order index advanced from 110.1 in April to 120.5 in May, the rise being largely concentrated in the durable goods industries, although nondurable goods lines also shared in the advance. From October, 1939, through February of this year, the index dropped from 148.4 to 100.5 (January, 1929—100). March and April registered some improvement, but only

1929=100). March and April registered some improvement, but only enough to bring the volume of new orders up to the level of shipments in the latter months. The sharpest advance in new business in May was recorded by the iron and steel industry, with a rise of almost 40%. New orders for electrical and other machinery also gained, with a rise of 7% in May over the April total

With new orders rising in May and shipments not keeping pace with new business, backlogs also increased, particularly in iron and steel, machinery and other durable goods industries. The gain in backlogs ranged from slightly more than 1% for electrical machinery to nearly 7½% for iron and steel. The average backlog increase was just short of 3½% for the entire durable goods group excluding aircraft. The volume of unfilled orders on hand at the end of May was almost 50% over a year ago in the durable goods industries.

The bureau's shipment index for the month was 122.5, compared with 119.4 in April and 118.4 in January of this year. The durable goods shipment index rose from 132.7 in April to 136.5 in May, while nondurables moved from 107.9 to 110.2 in the same period. Substantial increases were recorded in iron and steel, chemicals, paper and rubber products, while the automotive industry reported a seasonal decline. The steadiness of manufacturers inventories in May contrasts with the previous month when a wide spread tendency toward stock liquidation was apparent. Durable goods industries reduced inventories about 1% in April, with no one industry recording an appreciable expansion. In May, on the other hand, increases in iron and steel inventories together with more moderate movements in other industries were recorded. With new orders rising in May and shipments not keeping pace with w business, backlogs also increased, particularly in iron and steel, ma-

more moderate movements in other industries were recorded.

Advices to Merchants' Association of New York Indicate that Changes in Buying Methods of American Imports Might Help in Developing Latin American Trade

Changes in the buying methods of American importers are desired by certain groups in South America and might be helpful in developing United States trade with Latin America according to letters which the Foreign Trade Bureau

of The Merchants' Association has received from persons in South America who are interested in trade with the United States. One such letter which W. H. Mahoney, Manager of The Association's Foreign Trade Bureau, regards as an interesting evidence of sentiment in certain South American countries, was received recently from an exporter in Bogota, Colombia, and read in part as follows:

Since the outbreak of the European war, and even some time before, I have decided to find an outlet for my products in the United States. I am sorry to say that I have done nothing but spent plenty of time and postage money, without achieving any positive results.

The reasons are that American buyers are not accustomed to the specific Colombian conditions of trade, or when they have got accustomed to them they have had neghans too many had experiences in this country. On

Colombian conditions of trade, or when they have got accustomed to them they have had perhaps too many bad experiences in this country. On the other hand, Colombian exporters have never dealt with United States buyers on a large scale, because with the exception of such products as coffee, oil or minerals, which are exploited by big foreign companies, the main quantities of the other exportable products have gone to Europe, during the last few years, most of them to Germany. European buyers have always understood better the psychology of Colombian exporters, treated them with more indulgence, never feared to take normal small risks, and shown always a very good knowledge of Colombian export technique.

Another reason is that we have been accustomed to dealing direct with European importers, while in the United States we have had to depend on brokers, who wish to receive our products put right in their hand, pay lower prices, and impose such terms of payment, as can hardly be ac-

started through your intermediary.

Defense Commission Reveals Progress in Acquisition of Planes—\$100,000,000 in Contracts Let Toward Supply of 25,000 Planes

The National Defense Advisory Commission announced on July 11 that plans have been completed for the acquisition by the Army and Navy of 25,000 planes in the next two years and that contracts have been let for \$100,000,000 worth of the planes since July 1.

Dr. George J. Mead, Aeronautical Adviser to the Commission, told a press conference of cooperative efforts between the airplane manufacturing industry, the Army and Navy, and the Reconstruction Finance Corporation to achieve the goal. In reporting this Washington Associated Press advices of July 11 said: Press advices of July 11 said:

The first planes under the new contracts are expected to be delivered within four or five months with production to be stepped up as rapidly as possible.

One estimate was that all 25,000 could be on hand by July, 1942, if not sooner. Dr. Mead said that the RFC had agreed to lend funds to industrial

sooner. Dr. Mead said that the RFC had agreed to lend funds to industrial companies to finance necessary plant expansion.

In addition, he said, the National Advisory Committee for Aeronautics recently has received \$8,400,000 through a presidential order for the building of an engine research laboratory, probably at Langley Field.

The Army and Navy have pooled their technical work and agreed on joint standards for engines; propellers, designs and other details to facilitate the program. Approximately 25% of the planes to be built will be for the Navy, the remainder being Army bombers, pursuit and reconnaissance planes. Manufacturers have been asked to requote prices on the basis of the new quantities of planes to be manufactured, Dr. Mead declared.

Strike at Babcock & Wilcox Co. Plant at Barberton, Ohio, Halts Work on United States Navy Boilers

Work was halted on July 8, at the Babcock & Wilcox Co., where boilers for the United States Navy are a principal item of manufacture, by a strike of members of the American Federation of Labor, Federal Labor Union. Only office and maintenance workers of an estimated 2,000 employees entered the plant, reported Walter J. Mason, Recording Secretary of the Union.

The organization voted the strike on July 7, after requests for wage increases and extension of vacations to one-year workers had brought a stalemate in contract negotiations, according to a Union spokesman. Pickets assembled at the eight entrances to the plant.

Railway Express Agency Strike Averted by Action of President Roosevelt Ordering Investigation of Dispute

A threatened strike of 30,000 railway express workers was averted, at least for 60 days, when on July 10, President Roosevelt issued a proclamation under authority of the Railway Labor Act, ordering that the dispute be submitted to investigation by an independent board. The parties involved in the controversy are the Railway Express Agency, Inc., and the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees.

George M. Harrison, President of the Union, said the controversy grew out of the agency's refusal to grant the thirty thousand employees involved a forty-four-bour week, although it had granted such a work week to five thousand other employees. He added that he had beef unable to settle the dispute and that the thirty thousand "will not continue to work under this unjustifiable discrimination."

L. O. Head, President of the Company, said the agency estimated the additional cost resulting alone from reduction A threatened strike of 30,000 railway express workers was

of the working hours from forty-eight to forty-four hours at more than \$5,000,000 a year and other changes demanded would at least double the estimated increase.

11, President Roosevelt named the following to

serve on the investigating board:

Henry A. Miles, Professor of Economy and Sociology at the University of Chicago; Dexter M. Keezer, President of Reed College at Portland, Ore., and John P. Devaney, former Chief Justice of the Minnesota Supreme Court, All, it is said, have had previous experience adjusting labor contro-

Following is the text of the proclamation issued July 10 by President Roosevelt:

by President Roosevell:

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA A PROCLAMATION

Whereas, the President, having been duly notified by the National Mediation Board that a dispute between the Railway Express Agency, Inc., a carrier, and certain of its employees represented by Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employes, which dispute has not been heretofore adjusted under the provisions of the Railway Labor Act, amended, now threatens substantially to interrupt interstate commerce to a degree such as to deprive the country of rupt interstate commerce to a degree such as to deprive the country of

the Railway Labor Act, amended, now threatens substantially to meet rupt interstate commerce to a degree such as to deprive the country of essential transportation service;

Now, Therefore, I, Franklin D. Roosevelt, President of the United States of America, by virtue of the power vested in me by the Constitution and laws of the United States, and by virtue of and under the authority in me vested by Section 10 of the Railway Labor Act, amended, do hereby create a board to be composed of three persons not pecuniarily or otherwise interested in any organization of railway employees or any carrier, to investigate the aforementioned dispute and report its findings to me within 30 days from this date.

The members of this board shall be compensated for and on account of such duties in the sum of seventy-five dollars (\$75) for every day acactually employed with or upon account of travel and duties incident to such board. The members will be reimbursed for and they are hereby authorized to make expenditures for expenses for themselves and of the board, including traveling expenses and in conformity with Public No. 212, 72d Congress approved June 30, 1932, 11:30 a. m., not to exceed five (\$5.00) dollars per diem for expenses incurred for subsistence.

All expenditures of the Board shall be allowed and paid for out of the appropriation "Emergency Boards, Railway Labor Act, May 20, 1926, National Mediation Board, 1941" on the presentation of itemized vouchers properly approved by the chairman of the Board hereby created.

Cooperation of Every Business Agency in National Preparedness Program Urged by John Lowry of Merchants' Association of New York

In a message to members of the Merchants' Association of New York, on July 10, transmitting the annual report of the Association for the fiscal year ended April 30 last, John Lowry, President of the Association, declares that the success-Lowry, President of the Association, declares that the successful carrying out of the nation's preparedness program will require the complete cooperation of every business agency. Mr. Lowry advised the members that while the Association will not overlook other problems of pressing importance, its activities during the coming months must be governed "by the needs of national defense." He advises industrial members to guard against sabotage and disloyal influences among their workers and asks all members to cooperate in suppresstheir workers and asks all members to cooperate in suppressing illegal organizations and illegal propaganda of all kinds.

The appointment of a Committee on National Preparedness was mentioned in our issue of July 6, page 89.

Marshall W. Pask of Mackay & Co. Urges Financial Interests to Prepare for Economic Changes Follow-ing War — Suggests Committee to Correlate Statistics

An appeal to the financial industry for unity in preparing An appeal to the financial industry for unity in preparing for drastic world economic changes which might follow the war was made on July 5 by Marshall W. Pask, partner in the New York Stock Exchange firm of Mackay & Co., in the form of a letter to various organizations, associations and exchanges. Mr. Pask, who has watched events in Wall Street for almost half a century, states that never before have financial men been faced with so many bewildering developments. In his letter Mr. Pask says:

Drastic changes in our economic system must be expected to follow this devastating war. This is a time for serious thinking and planning. Unless we make some effort to anticipate these changes and prepare to cooperate in the rewriting of the theory and practice of our business we may find ourselves operating under unforeseen restrictive influences and unworkable rules.

The heart of American commercial life is our interrelated system which, for want of a better name, is called Wall Street. While each branch of the system is dependent on the other, no effort has ever been made to unite

them in a common cause.

I believe the time for unity has arrived. We need all the ideas and practical advice obtainable. If there are men in the business who can even guess at what the aftermath of this war is going to be, we want to

Mr. Pask adds that "we should appoint a commission composed of representatives from all branches of the business to collect, correlate and analyze all available information and statistics for the use and guidance of the industry as a

and statistics for the use and guidance of the industry as a whole." Explaining his reason for this move Mr. Pask said:

A change in Administration in Washington will not solve all the problems in business, as many believe. I believe we must be ready to face new basic and broad changes over which Washington will have no control as a result of this world explosion. Out of necessity new systems of finance and trade will be invented that will strike at the foundation of our business. I don't know what these systems are going to be, but I think we should be looking ahead and using our imagination. We are living in an age when undreamed of events have occurred in incredibly short spaces of time. Almost anything seems possible now.

I am certain that when the changes do come they will be revolutionary enough to upset all our ideas of procedure. We may wake up some day and find that the entire investment picture has changed. A large part of the wealth of the world is tied up in stocks and bonds. These securities have no value unless there is a market for them. It is difficult to see how there can be a market without wealthy classes which are being wiped out everywhere by "wealth drafting" laws. Other countries have been able to sell confiscated securities in New York. Where could we sell them? There are no other free markets.

If there is some sort of new order coming we might as well be realistic about it. If we sit behind a wall of old customs and refuse to see the world changing around us, we will have to take the consequences. Even if we hope for the best we should be ready for the worst. At present the world is numb from shock and no one has yet seriously tried to figure out the appalling desolation that could easily follow this war.

Europe was a big market for our securities. Has the private investor been wiped out in all Nazi-controlled countries? Will all future financial transactions with France, Belgium, Holland, Norway, &c., be handled from Berlin, and do we have to figure on a war with a strong European combine? Where and how can all the American securities captured by the Germans be sold? Will the conquered governments repudiate their debts? If they do, what can we do to protect American bondholders? How about our billions of dollars of investments in Canada and South America if anything happens to those countries? Are we likely to be left holding the bag with \$19,000,000,000 of gold while Europe goes on to commodity money? If we have to feed Europe this winter during a famine, who is going to pay for our commodities? What has happened to the great European insurance companies faced with staggering losses both in claims and investments?

There are only a few questions our customers ask us and which we cannot answer. We have al

and investments?

There are only a few questions our customers ask us and which we cannot answer. We have all thought about them in a hazy sort of way, but we ought to try to get a clearer picture. We are facing stark realism in this business, and we had better face it collectively.

Semi-Annual Survey of Real Estate Market Shows Increased Use of Industrial Space Expected in 58% of Cities

Real estate is little affected by war jitters but showing signs of new movement, some of them contradictory signs, while the preparedness program is the cue for the next act, according to reports from 256 cities made to the National Association of Real Estate Boards in its thirty-fifth semiannual survey of the real estate market, released July 7. Increased industrial activity is expected as a result of the national defense program. As preliminary figures indicated, 58% of the cities, according to confidential reports by their local real estate boards, have prospect of industrial improvement so great as to require a wider use of industrial space. And 74% of all the cities covered in the survey anticipate some rise in industrial activity. The Association's announcement regarding the survey further states:

Association's announcement regarding the survey further states:

Late-coming reports considerably strengthen the indication in the earlier returns as to effect which defense activity may have on housing. In 53% of the cities there is outlook for a considerably increased demand. With the "if" element clearly recognized, in 25% of all reporting cities it is thought the expected industrial drive may give rise to an actual and serious housing shortage. In 9% of the cities it is the judgment of the Real Estate Board that if emergency pressure is put upon defense industries in their locality it may call for temporary housing for industrial workers.

Preparedness aside, market conditions show less change than has appeared in any half-yearly survey of the Association in more than 10 years. The static condition maintained by every major phase of real estate activity during a six months' period in which the whole world outlook was overturned, and, in which we came to a complete redirection of our own national effort . . . testifies to something quite stable in our national economy, Newton C. Farr, Chicago, President of the Association, points out.

Some effect of war-time uncertainties is visible. Forty-seven per centain of the reporting cities show sales movement more active than a year ago, while only 15% are going at a slower pace. But six months ago the showing was even better. The ratio was then 57 to 8. Prices today hold at least to last year's level in 32% of the cities, have topped that in 13% of the cities. But they regressed in 15% of the cities.

of the cities. But they regressed in 15% of the cities.

The survey, it is indicated, also discloses:

1. Rents for both business space and office space in central districts still more frequently going up than going down. But the uptrend is not so widespread as it was six months ago.

2. Office rents in subcenters take a first small step out of the doldrums—are no longer on the falling side. . . . Rents for business space in subcenters . . are up in 16% of cities as against 15% six months ago, but down in 12% of the cities as against 8% at the last survey.

3. The supply-demand situation for houses, apartments, and for business property shows substantially no change from that of six months ago.

4. Residential rents continue a sidewise movement. Single-family dwelling rents are up in 33% of the cities as against 31% six months ago; down in only 8% as against 11% six months ago. The median change up or down has been 5%. Apartment rents are more often up than down, but this is slightly less marked than it was six month ago. The median up movement has been 5%; the median down movement, 10%.

5. Fewer cities now have falling interest rates, though 30% say their rates are still falling and only 2% report rising interest costs. Some indication that rates may be stiffening is shown in the fact that 9% of the cities of over 500,000 population cite_rising rates. Sixty-four per cent of them, however, say they have falling rates.

Ten-Day Recess of Congress Incident to Democratic National Convention in Chicago, Next Week— House Members Sign Petition Urging President Roosevelt to Accept Nomination for Third Term

Roosevelt to Accept Nomination for Third Term
A ten-day recess of Congress was voted on July 11, incident to the Democratic National Convention which will open in Chicago on Monday next, July 15.
While President Roosevelt has thus far failed to make public any information as to his attitude toward the acceptance of a re-nomination for a third term, it is stated that his decision was made known to Postmaster General James A. Farley, National Democratic Chairman, during a talk which the latter had with the President at Hyde Park, N. Y. on

July 7. No inkling of the conversation was given by Mr. Farley, who on that date told reporters:

"I had a very satisfactory talk with the President and I have full knowledge of his thoughts and what he has in mind. But I will not discuss it with any individual."

Following his talk with the President, a week ago, Mr. Farley left on July 8 for Chicago.

Among the rumors current the present week was one to the effect that President Roosevelt was expected to receive the nomination for President, with Secretary of State Hull being named as Vice-President, with the possibility that both might be drafted.

A number of House Democrate are said to have signed a

both might be drafted.

A number of House Democrats are said to have signed a petition on July 11 urging the President to again become a candidate for the presidency.

At his press conference in Washington yesterday (July 12) the President stated that he would not go to Chicago for the Convention, but he avoided all questions designed to disclose his stand on the third term issue. close his stand on the third term issue.

ndell L. Willkie Flies to Colorado tor Vacation— Republican Presidential Nominee Appoints Repre-sentative Joseph W. Martin as Campaign Manager and Republican National Chairman Wendell L.

and Republican National Chairman

Wendell L. Willkie, Republican nominee for President, left New York July 9, spent a few hours in Washington, and then flew to Colorado Springs, Colo., for a three weeks vacation. Mr. Willkie's campaign plans were referred to in our issue of July 6, page 45. Before leaving Washington, Mr. Willkie appointed Representative Joseph W. Martin Jr. of Massachusetts, as campaign manager and Republican National Chairman. On July 5 Mr. Willkie met with a subcommittee of the Republican National Committee and agreed on 12 names for a 16-man Executive Committee to be chosen from national committee members, said the New York "Journal of Commerce" which stated that four others would be chosen later.

would be chosen later.

A dispatch from Colorado Springs on July 9 to the New York "Herald Tribune" from Emmet Crozier said in part:

York "Herald Tribune" from Emmet Crozier said in part: Announcement of Mr. Martin's appointment as national chairman and campaign manager followed a breakfast conference at the Hotel Willard in Washington this morning, attended by Mr. Willkie and the members of the advisory subcommittee of the Republican National Committee. The selection had practically been confirmed the night before, and when Mr. Willkie walked into the morning press conference he said:

"I seen most of you have guessed correctly, demonstrating the subcommittee's wise judgment in the selection of Joe Martin as campaign manager and national chairman."

Mr. Willkie announced that Russell Davenport would act as his personal representative, working with Representative Martin and Oren Root Jr., in charge of Willkie clubs and independent organizations during the campaign.

campaign.

Mr. Wilkie also announced 10 additional names on the campaign advisory committee headed by Governor Harold E. Stassen of Minnesota. They are John E. Jackson, New Orleans; William Stern, Fargo, N. D.; E. G. Bennet, Ogden, Utah; Howard Lawrence, Senator Arthur H. Vandenberg's preconvention campaign manager, Grand Rapids, Mich.; Kenneth F. Simpson, New York, Republican leader who was ousted as national committeeman by the Thomas E. Dewey forces; S. M. R. O'Hara, Secretary of the Commonwealth of Pennsylvania; Roger Straus, New York City; Thomas G. Nutter, Charleston, W. Va.; William King, Chicago; Thomas J. Paolino, of Providence.

Governor Stassen announced that his committee would meet Thursday noon at the Willard Hotel in Washington.

After Mr. Willkie had made his announcement Walter S. Hallanan, Republican National Committeeman from West Virginia and chairman of the Republican National Committee subcommittee advising on the campaign set-up, announced other officers of the Republican National Committee. The appointments were:

Vice-Chairmen: Samuel F. Pryor Jr., Connecticut; Walter S. Hallanan, West Virginia; Mrs. Elsie Fitzsimons, Rhode Island; Mrs. Grace B. Reynolds, Indiana.

Reynolds, Indiana.
Chairman Executive Committee: Sinclair Weeks, Massachusetts.
Members Executive Committee: Robert Burroughs, New Hampshire;
J. Russel Sprague, New York; Daniel E. Pomeroy, New Jersey; Daniel O.
Hastings, Delaware; Mrs. Worthington Scranton,, Pennsylvania; David S.
Ingalls, Ohio; Mrs. Bertha Baur, Illinois; Harrison Spangler, Iowa; Mrs.
Horace Sayre, Oklahoma; William Knowland, California; Ezra Whitla,
Idaho; Mrs. Chris Carlson, Minnesota; Mrs. Della Urquhart, Washington;
B. Carroll Reece, Tennessee; Harvey Jewett, South Dakota.
Treasurer: C. B. Goodspeed, Illinois.
Secretary: Harold W. Mason, Vermont.
General Counsel: Henry P. Fletcher, Rhode Island.

New York World's Fair Has Net Earnings of \$696,118 for First 58 Days, Chairman Gibson Reports—Special Observances Held at Fair

Special Observances Held at Fair

Net earnings for the first 58 days of operation of the 1940

New York World's Fair totaled \$696,118, after payment of
debenture interest, it was announced on July 9 by Harvey

D. Gibson, Chairman of the board of directors of the Fair

Corporation. Mr. Gibson also made known that the Fair
has no indebtedness other than current bills and outstanding
debentures and that it had available for general corporate
use \$651,184. He also stated that the Fair probably will

make a payment on its debentures next month.

Mr. Gibson's prepared statement follows:

The net operating profit of the Fair after all expenses but before debentures.

MIT. CIDSON'S prepared Statement IOHOWS:

The net operating profit of the Fair after all expenses but before debenture interest from May 11, the opening day, to July 7, inclusive (58 days), amounts to \$853,185.

Debenture interest for that period amounted to approximately \$157,067. Net earnings therefore after debenture interest amounted to \$696,118.

Interest payments in full to date have been made to debenture holders. The last payment representing the amount due for the first half year of 1940. \$480.844. was made July 1. 1940.

1940, \$480,844, was made July 1, 1940.

out and the agreement has terminated.

A sum representing 40% of current gate receipts is now being deposited daily with trustee to be applied to the amortization of debentures. The amount in the hands of trustee at the present time accumulated for that purpose amounts to \$250.768

amount in the hands of trustee at the present time accumulated for that purpose amounts to \$359,796.

It has not been necessary for the Fair Corporation to borrow any money since closing day in 1939, and it has no indebtedness other than current bills and outstanding debentures at the present time.

Our operating budget for the period beginning July 4 is lower than for any period of the Fair since its opening.

Mr. Gibson's financial report for the first 16 days of the

Mr. Gibson's financial report for the first 16 days of the Fair this year was given in these columns June 1, page 3450. Some of the special events held at the Fair recently were: the observance of Alaska Day on June 27; rededication of the Mexican Pavilion on June 28, at which Rafael de la Colina, Mexican Consul-General in New York, spoke; Japan Day ceremonies on June 29, commemorating the 2600th anniversary of the founding of the Japanese Empire, the exercises being led by Kensuke Horinouchi, Japanese Ambassador; Canada Day exercises held on July 1, the 73rd anniversary of Canada's union into a confederation of Provinces, at which James A. MacKinnon, Canadian Minister of Trade and Commerce, was the main speaker; and the dedication by Dr. Hu Shih, Chinese Ambassador to the United States, of the pavilion of the American Bureau for Medical Aid to China.

John McDowell Made Assistant Vice-President of Philadelphia Reserve Bank

John McDowell has been appointed Assistant Vice-President of the Federal Reserve Bank of Philadelphia, it was announced on July 3. Mr. McDowell was associated from 1930 to 1932 with the Pennsylvania State Department of Banking, assisting in the liquidation of banks. In 1932 he was made head of the liquidating department and in charge of loan applications at the Philadelphia office of the Reconstruction Finance Corporation struction Finance Corporation.

H. R. Enslow Named State Training Director in Division of Placement and Unemployment Insurance Appointment of Harold R. Enslow, Schenectady, N. Y., as Director of Training in the Division of Placement and Unemployment Insurance, State Department of Labor, was announced on July 11 by Executive Director Milton O. Loysen. Since June, 1933 Mr. Enslow has served as Assistant Director of Local Assessments in the State Department of Taxation and Finance. of Taxation and Finance.

L. A. Lincoln Added to Board of Directors of U. S. Chamber of Commerce

Chamber of Commerce

The naming of Leroy A. Lincoln, President of the Metropolitan Life Insurance Co., to the Board of Directors of the Chamber of Commerce of the United States, gives the insurance industry four members on the Chamber's Board, according to an announcement by the Chamber on July 4. Mr. Lincoln was elected by the Board, which itself names directors at large. Geographical and departmental directors are elected by "bership. The President of the Chamber, James S. Kemper, heads six companies in the casualty field. The other insurance executives on the Chamber's Board are J. H. R. Timanus, Philadelphia, Secretary, The Philadelphia Contributionship, and John C. Harding, Chicago, resident Executive Vice-President, Springfield Fire and Marine Insurance Co. For a number of years Mr. Lincoln has been ance Co. For a number of years Mr. Lincoln has been serving as a member of the Insurance Committees of the Chamber. He also has served on special committees indentified with Chamber affairs. It is stated that as a member of the Insurance Committee, Mr. Lincoln has assisted in developing in the Chamber a program of insurance activities. veloping in the Chamber a program of insurance activities, national in scope, designed to bring about a better understanding of insurance by policyholders.

R. H. Gardiner Made Trustee of Church Pension Fund

The election of Robert Hallowell Gardiner of Gardiner, Maine and Boston as a Trustee of the Church Pension Fund of the Protestant Episcopal Church to fill the vacancy created by the recent death of Judge Origen Seymour of Connecticut, it was recently announced by William Fellowes Morgan, Sr., President of the Fund of which J. P. Morgan is Treasurer Treasurer.

According to its last annual report, the Church Pension Fund has assets of \$34,154,129 and is paying pensions to clergymen or their widows at the rate of \$1,342,455 a year. The Fund was established in 1917.

Two-Week Case-Study Course in Real Estate Manage-ment to Be Given at University of Chicago Starting July 15

Real Estate managers from every section of the country will gather on July 15 for two-week case-study course at the University of Chicago under the auspices of the Institute of Real Estate Management, professional branch of the National Association of Real Estate Boards. A management plan for an actual Chicago apartment building will be worked

out under expert direction. The specific corollary objectives of this course include: giving training in the techniques of neighborhood and market analysis, in the development of rent schedules and budgets and in the writing of detailed '

H. J. Vargas Appointed Colombian Banking Superintendent

According to a cablegram June 28 from Bogota, Columbia, to the New York "Times" Hector Jose Vargas was on that day appointed Superintendent of Banking. He formerly was Finance Minister, Governor of Boyaca and Minister to Panama. The cablegram added:

Panama. The cablegram added:

A recent presidential decree authorized a loan of 20,000,000 pesos to the Government by the Bank of the Republic and conversion of the internal debt. Of this loan \$7,000,000 pesos will be used to increase agricultural, mining and industrial credits, 2,000,000 pesos will start the Institute for Industrial Improvement, 3, 00,000 pesos will go to highway construction, 2,000,000 pesos to railway construction and port improvements, and 3,000,000 pesos will be applied to the debt the Government owes to the National Railway Administration for railway equipment, river improvements and public works. public works.

Fred H. Brown Named Member of United States Tariff Commission

President Roosevelt sent to the Senate on July 1 the nomination of Fred H. Brown of New Hampshire to be a member of the United States Tariff Commission for the term expiring June 16, 1941. Mr. Brown, who was a former Senator from New Hampshire, resigned as Comptroller-General of the United States on June 19 because of ill health; this was reported in our issue of June 29, page 4065.

Ray Atherton Made Acting Chief of European Division of State Department—Will Retain Post as Minister to Denmark

Ray Atherton, United States Minister to Denmark, recently Ray Atherton, United States Minister to Denmark, recently returned to the United States and was appointed Acting Chief of the Division of European Affairs of the State Department. The Division's former director, Jay Pierrepont Moffat, is now United States Minister to Canada; this was noted in these columns of June 1, page 3452. Mr. Atherton will retain his post as Minister to Denmark, but American affairs there will be handled by a Charge d'Affaires.

Department of Agriculture Merges Two Units to Form Surplus Marketing Administration The Federal Surplus Commodities Corporation and the

The Federal Surplus Commodities Corporation and the Division of Marketing and Marketing Agreements were merged on July 1 under a new Department of Agriculture unit called the Surplus Marketing Administration. The shift was made under President Roosevelt's Reorganization Plan No. 3, which became effective July 1. This plan was referred to in these columns April 6, page 2187. With regard to the change, Washington Associated Press advices, July 1 said: July 1, said:

July 1, said:

The Division of Marketing and Marketing Agreements formerly was under the Agricultural Adjustment Administration. The FSCC, a Delaware corporation, will continue to exist, but will operate as the division of distribution and purchase of the Surplus Marketing Administration.

Milo Perkins, who has had general direction of both phases of activity, becomes Administrator of the Surplus Marketing Administration. Dr. E. W. Gaumnitz, former Director of the Division of Marketing and Marketing Agreements, and Philip F. Maguire, Executive Vice-President of the FSCC, are Assistant Administrators and will continue in charge of their respective fields. Mr. Perkins and Mr. Maguire continue as officers of the FSCC.

Division of Commercial Treaties and Agreements Set Up in State Department

On July 1 a new Division of Commercial Treaties and Agreements was created in the State Department at Washington to replace along broader lines the Division of Trade Agreements, which was abolished. In reporting the change, a Washington dispatch, July 1, to the New York "Times" said: said:

Said:

The new division will handle not only reciprocal trade agreements, but commercial modus vigendi, and commercial treaties and agreements.

This was done, Secretary Hull said, "in order most effectively to carry out the Department's function of the protection of American foreign commerce." The new division is staffed by the personnel of the old Trade Agreements Division, under the direction of Harry C. Hawkins.

It will have general responsibility for the Department's correspondence and contracts with American export and import interests, with American representatives abroad, and with representatives of foreign governments in this country, with regard to the negotiation, interpretation and enforcement of the terms of commercial treaties and agreements and problems arising in connection with the importation and exportation of goods.

CAA Now Under Commerce Department at Washington —C. M. Hester Resigns as Administrator and Col. Connally Appointed

Connally Appointed

The Civil Aeronautics Authority became part of the Department of Commerce on July 1, under President Roosevelt's Reorganization Plan No. 4. The text of this order was given in our issue of April 13, page 2344. Prior to this change the resignation of Clinton M. Hester as Administrator of the CAA and the appointment of Colonel Donald H. Connally of the Engineers Corps were announced (June 24) by the White House. The Senate confirmed the appointment of Colonel Connally on July 11. Mr. Hester, in his letter of resignation to the President, expressed a desire

to return to private law practice in Washington. In reply Mr. Roosevelt accepted the resignation with regret, and

Mr. Roosevell accepted and added:

This will bring to a close your splendid record as a career man in Government service, in which you have advanced rank by rank until you became Administrator, two years ago, of the Civil Aeronautics Authority.

To you must go much of the credit for having made the Authority the splendid agency it has become. You, as Administrator, and the members of the five-man board have in a brief space of time brought civil aviation in this country to its highest peak.

American Society of Tool Engineers to Hold Semi-Annual Convention in Cincinnati Oct. 17-19

American Society of Tool Engineers to Hold Semi-Annual Convention in Cincinnati Oct. 17-19

"Tooling with men and machines for national defense" will be the keynote of the semi-annual convention of the American Society of Tool Engineers, scheduled for Cincinnati, Ohio, Oct. 17 to 19, according to an announcement by Ford R. Lamb, Executive Secretary. The three-day session is to be attended by tool engineers from all mass-production industries, the men responsible for converting blueprints into production operations. The program includes both technical sessions and inspection trips to all machine-tool and production plants in the Cincinnati area, a major center of manufacturing equipment for armament production. The sessions will include a symposium on the subject of "Should Industry Assume the Burden of Special Education," with all viewpoints on the question to be presented. The subject is regarded as of immediate vital importance due to the shortage of trained tool engineers and designers in industry.

"Aeronautical Preparedness" will be the subject of the dinner meeting on the 18th, while technical programs will include a symposium on gear production methods.

National Foreign Trade Convention to Be Held in San Francisco July 29-31

The 27th National Foreign Trade Convention will be held in San Francisco with headquarters in the Palace Hotel, on July 29-31, inclusive. On Aug. 1 the delegates will be entertained at the Golden Gate International Exposition, which has proclaimed that date as National Foreign Trade Council Day. Particular interest is being shown in this year's convention of foreign traders and indications point to an attendance of over 1,500 delegates from all parts of the country, according to the announcement issued by the National Foreign Trade Council, Inc. The San Francisco Convention Committee, of which P. A. Kinnoch, Vice-President American Trust Co., is Chairman, and William L. Montgomery, Manager International Trade Department of the San Francisco Chamber of Commerce, is charge of all local arrangements, reports that this year's convention on the Pacific Coast will exceed all expectations as to attendance. The 11 Western States have combined through their respective chambers of commerce to send large delegations representing important foreign trade interests in the Pacific and Latin-American areas. The attendance of representatives of foreign governments will emphasize the broad international outlook reflected in the subjects to be discussed.

An impressive list of speakers has been secured for the three days' sessions. The speakers has been secured for the three days' sessions. The speakers of the World Trade Dinner will include James A. Farrell, Chairman, National Foreign Trade Council; Sumner Welles, Under Secretary of State; Willis H. Booth, Vice-President, of the Guaranty Trust Co. of New York; Thomas J. Watson, President, International Business Machines Corp., New York, who will be presented with the Captain Robert Dollar Memorial Award for his contribution to American foreign trade interests; Paul W. Alexander, President, Wessel, Duval & Co., New York, who will make the perfect Session, in addition to Judge John W. Haussermann, Manila, P.

of the Foreign Trade Council we also quote:

The Australian Minister, Richard G. Casey, P.C., D.S.O., M.C., will speak at the Pacific Session, in addition to Judge John W. Haussermann, Manila, P. I., and E. W. Frazar, Frazar & Co., New York. James A. Moffett, Chairman of the Board, California Texas Oil Co., New York, will preside at this session.

Edward J. Noble will speak at the opening session on July 29; Warren L. Pierson, President, Export-Import Bank, will address the Bankers' Luncheon session; Raymond H. Geist, Chief, Division of Commercial Affairs, Department of State, will speak at the Export Merchandising Session on "Reorganization Changes in Foreign Service." James W. Young, Director, Bureau of Foreign and Domestic Commerce, will take part in the general discussion at this session. Henry F. Grady, Assistant Secretary of State, will address the final session and is expected to clarify the situation in international trade.

national trade.

The theme of the convention: "America's Economic Front," is an indication of the timely and practical character of the program, in view of the sweeping changes that have excluded American trade from European markets. James A. Farrell will take this theme as the subject of his keynote address at the opening session. An address will also be made at this session on "Our Merchant Marine—The Outlook Today," by Roger D. Lapham, chairman of the Board, American-Hawalian Steamship Co., San Francisco. Another address of timely interest is: "Creative Dollars Abroad' by Nicholas Roosevelt.

Some of the important addresses to be delivered are: "What is the Future for our Foreign Trade?": "The Mid West— Our Artery to the South;" "Scanning the Far Eastern Horizon;" and "Trade Relations with China and Japan."

A special train, the Santa Fe Super-Chief, will convey Eastern delegates to San Francisco, leaving Chicago on July 23 and stopping en route at Los Angeles and other places.

What the convention hopes to accomplish is indicated in the call issued to the delegates by Mr. Farrell:

Of especial importance at this time are the views of American business men on the position to be taken by the United States when peace terms are discussed which may change economic boundaries in Europe and compel an adjustment to an altered world economy. The program of the Convention will provide full opportunity for serious study and deliberation concerning the future place of the United States in world trade and shipping, and for guidance in respect to immediate problems arising out of the changed conditions in international commercial relations.

Mortgage Bankers Association to Hold Annual Meeting in Chicago Oct. 2-4

The City of Chicago has been selected as the site for the 27th annual convention of the Mortgage Bankers' Association of America, which will be held Oct. 2, 3 and 4 at the Drake Hotel. More than 1,200 are expected to attend the three-day convention. An added feature of the convention this year will be a series of clinical meetings which will be held each afternoon at which members attending the convention will discuss problems incidental to the conduct of their business. This pahse of the convention is patterned after the successful mortgage clinic which was sponsored by the Mortgage Bankers' Association of America and held in Chicago during February.

ITEMS ABOUT BANKS, TRUST COMPANIES, &c.

Trustees of the Dollar Savings Bank of the City of New York have appointed Fred W. Bennigsen as Auditor. Mr. Bennigsen joined the bank in 1936. He was formerly with the Bank of Manhattan.

John F. Flaacke, Assistant Secretary of Chemical Bank & Trust Company of New York, on July 12 began his 70th year of continuous service with the bank. In point of service, he is the dean of New York bankers and as far as is known, for length of continuous service with one institution he holds the record for the entire country. Mr. Flaacke was born in New York City on Aug. 22, 1855. He entered the bank's employ on July 12, 1871, during the Presidency of John Quentin Jones, and has served under seven of the ten Presidents which the bank has had in its 116 years of existence. Mr. Flaacke was one of the organizers of the Bank Clerks' Building & Loan Co. in 1890 and was also active in organizing the New York Chapter of the American Institute of Banking, of which he was the first Treasurer. He is a member of the Blizzard Men's Club and the Society of Old Brooklynites.

The Corn Exchange Bank Trust Co., New York, reported as at the close of business June 29, 1940, total deposits of \$342,544,006 and total resources of \$378,565,276, compared respectively, with \$334,672,807 and \$371,241,137 on March 26. Cash items totaled \$186,622,098, against \$158,839,011; holdings of United States Government securities (direct and fully guaranteed) amounted to \$94,149,844, against \$115,749,843, and loans and discounts (including overdrafts) to \$44,721,976 against \$44,204,102. Capital is unchanged at \$15,000,000 but surplus and undivided profits have increased to \$21,021,270, compared with \$19,489,381 at the end of March, 1940.

United States Trust Company of New York, at a meeting of its Board of Trustees on July 9 elected G. Forrest Butterworth Jr., a member of the Board. Mr. Butterworth is a member of the law firm of Cadwalader, Wickersham & Taft.

Arthur S. Kleeman, President of the Colonial Trust Company, of New York announces that Carl C. Francis, Vice-President, has been elected a director of the bank. Mr. Francis was formerly President of the Kingsboro National Bank of Brooklyn.

The Fifth Avenue Bank of New York announced July 10 the election of Harry Harkness Flagler to the Board of Directors.

The Irving Savings Bank, New York announced July 10 that Rollin G. Plumb had been elected a Trustee to succeed his father, the late Henry B. Plumb. Mr. Plumb is Vice-President of the Eagle Lock Co. The bank also announced the appointment of Edwin S. Dippold as Assistant Secretary.

Walter Hoving, President of Lord & Taylor, has been elected a Trustee of the North River Savings Bank, New York, Harris A. Dunn, President of the bank, announced on July 9.

Just one year before the 35th anniversary of the Hamburg Savings Bank of Brooklyn, Robert E. Moffett has become President of the institution which was founded by his father, James Moffett, who was its original President. This family tradition was fulfilled at a meeting of the Board of Trustees on July 9, when Mr. Moffett was elected to the office recently vacated by the death of C. William Wohlers. Mr. Moffett has been a trustee since 1913 and Vice-President since 1915. He also served as the bank's counsel. Born in Brooklyn, he attended Adelphi Academy, Williston Academy and Williams College, receiving his degree of LL.B. from New York Law School in 1907.

The Board of Trustees of Kings Highway Savings Bank, Brooklyn, at its regular monthly meeting, elected Thomas

E. Cisney, Chairman of the Board, and Daniel T. Rowe, President. Mr. Rowe, a Trustee since 1930 and First Vice-President since 1935, has been active in the savings bank field for some time. He joined the Kings Highway Savings Bank as Secretary when the charter for the institution was issued in 1923. Prior to that, Mr. Rowe had been associated with the Williamsburgh Savings Bank and the Seaboard National Bank. President of the Brooklyn Bankers Club, Mr. Rowe is also Secretary-Treasurer of Group Five, Savings Banks Association of the State of New York. He was formerly President of the Group Five, Junior Officers Association. William K. Cairns and J. Arthur Seidman, both of whom have been Trustees of Kings Highway Savings Bank for several years, were elected First and Second Vice-Presidents, respectively.

In its condensed statement of condition as of June 29, 1940, covering all offices and foreign branches, the First National Bank of Boston, Boston, Mass., reports total deposits of \$774,051,939 and total assets of \$878,605,395, as compared with \$726,387,290 and \$830,363,259 on March 26, 1940. In the current statement, cash and due from banks total \$470,175,963 (comparing with \$409,488,848 on the earlier date); loans, discounts and investments, to \$247,581,124 (against \$258,190,871); United States Government securities to \$121,263,571 (compared with \$117,860,862), and State and municipal securities to \$12,078,024 (down from \$12,609,654). No change has been made in the bank's capital, which stands at \$27,812,500, but surplus and profits have risen to \$53,813,198 from \$53,624,941 on March 26. The figures of Old Colony Trust Co., which is beneficially owned by the stockholders of the First National Bank of Boston, are not included in the above statement.

Total deposits of \$110,911,496 and total resources of \$122,-364,486 are reported by the First National Bank of Philadelphia, Philadelphia, Pa., in its condition statement as of June 29, 1940, contrasting with \$111,496,982 and \$122,-555,629 as of March 30 last. In the current statement the principal items making up the assets are: Cash and due from banks, \$41,029,290 (comparing with \$45,473,487 on the earlier date); United States Government securities, \$28,728,023 (against \$29,219,350); time loans and discounted paper, \$18,666,786 (comparing with \$17,244,725), and demand loans, \$14,152,637 (against \$13,953,328). Capital account and surplus remain unchanged at \$3,111,000 and \$4,000,000, respectively, but undivided profits have declined to \$1,620,626 from \$1,630,787.

The Mellen National Bank of Pittsburgh, Pa., in its statement of condition as at the close of business June 29 shows total assets of \$435,590,781 (as compared with \$432,209,036 at the close of business March 26 last), of which the principal items are: United States obligations, \$204,623,637 (against \$236,971,548 on the earlier date); cash and due from banks, \$182,638,781 (compared with \$142,050,521), and loans and discounts, \$30,406,863 (against \$35,324,881). On the debit side of the statement, total deposits are shown as \$387,745,997 (against \$385,265,520 on March 26). No change has been made in the bank's capital and surplus, which stand at \$7,500,000 and \$25,000,000, respectively, but undivided profits have risen to \$4,229,613 from \$3,504,713.

The Fifth Third Union Trust Co. of Cincinnati, Ohio, in its condition statement as of June 29, 1940, reports total deposits of \$115,985,830 and total assets of \$128,153,316 (as against \$114,166,721 and \$126,540,286, respectively, on March 26, 1940). The chief items comprising the assets in the present report are: Cash and due from banks and United States bonds, \$66,344,355 (contrasting with \$65,599,504); loans and discounts, \$41,156,506 (against \$40,492,377); and other bonds and securities, \$13,341,312 (comparing with \$12,910,612). On the debit side of the statement, capital debentures are given as \$1,600,000 (down from \$1,700,000 three months ago); capital stock remains the same at \$5,000,000; surplus account has risen to \$3,400,000 from \$3,300,000, and undivided profits are now \$8,000,000 against \$796,609 on March 26.

The Northern Trust Co. of Chicago, Ill., in its condition statement as at the close of business June 29, 1940, reports total deposits of \$378,573,534 and total resources of \$403,275,711 as compared with \$338,869,728 and \$363,802,787, respectively, at the close of business March 26, 1940. The chief items comprising the assets in the current statement are: Cash and due from banks, \$161,523,825 (comparing with \$133,360,640 on March 26); United States Government securities, \$105,461,768 (against \$99,768,592); other bonds and securities, \$94,249,491 (against \$90,259,852), and other loans and discounts, \$26,858,532 (compared with \$23,841,650). No change has been made in the company's capital and surplus, which stand at \$3,000,000 and \$6,000,000, respectively, but undivided profits have risen to \$4,636,869 from \$4,540,592 three months ago.

Total deposits of \$159,365,408 and total resources of \$168,-217,379 are shown in the statement of condition of the City National Bank & Trust Co. of Chicago, Chicago, Ill., as of June 29, 1940, contrasting with \$152,349,468 and \$161,-

057,458, respectively, on March 26 last. The principal items comprising the assets in the current statement are: Cash and due from banks, \$82,100,666 (comparing with \$58,751,213 three months ago); United States Government securities, \$34,578,813 (down from \$54,512,355), and loans and discounts, \$41,304,088 (comparing with \$36,287,982). The bank's capital and surplus remain the same, at \$4,000,000 and \$3,000,000, respectively, but undivided profits have been increased to \$559,906 from \$418,292.

Assets totaling \$166,586,610 are revealed in the statement of condition of the Manulacturers National Bank of Detroit, Detroit, Mich., as at the close of business June 29, 1940, comparing with \$162,553,259 at the close of business March 26, last, of which \$86,462,814 represents cash balances with other banks, including reserve balance, and cash items in process of collection (comparing with \$71,231,814 on the earlier date); \$37,889,541 represents United States Government obligations, direct and guaranteed (against \$48,245,-085), and \$27,368,814 loans and discounts, including overdrafts (against \$30,016,395.) Capital and surplus continue at \$3,000,000 each, but undivided profits have risen to \$2,060,045 from \$2,007,446.

The National Bank of Detroit, Detroit, Mich., in its condition statement as of June 29, 1940, shows total deposits of \$506,015,244 and total assets of \$542,145,755, contrasting, respectively, with \$496,707,097 and \$532,206,903, on March 26, 1940. The chief items comprising the assets in the later statement are: Cash on hand and due from other banks, \$210,996,354 (against \$227,288,359 on March 26); United States Government obligations, direct and or fully guaranteed, \$217,613,530 (comparing with \$202,558,595), and loans, \$76,141,435 (against \$75,943,835). The bank's capital structure is shown as \$32,612,100 (against \$32,327,796 on the previous date. 796 on the previous date.

Total deposits of \$250,399,401 and total resources of \$274,287,789 are revealed in the condition statement of the First Wisconsin National Bank of Milwaukee, Wis., as at the close of business June 29, 1940, contrasting with \$243,692,459 and \$266,055,906, respectively, at the close of business March 26 last. The chief items comprising the assets in the current report are: Cash and due from banks, \$114,765,813 (against \$106,944,979 on the earlier date); United States Government securities, \$96,218,535 (comparing with \$96,218,535), and loans and discounts, \$35,305,987 (against \$36,030,613). No change has been made in the bank's capital and surplus, which stand at \$15,000,000 and \$2,500,000, respectively, but undivided profits are now \$3,156,110, having risen from \$2,966,666 three months ago.

In its condition statement as at the close of business June 29, 1940, the First National Bank in St. Louis, St. Louis, Mo., shows total assets of \$281,769,088 (contrasting with \$280,082,049 on March 26, 1940), of which \$127,073,290 represents cash and due from banks (against \$115,865,071 on the earlier date); \$63,087,046 loans and discounts (compared with \$61,527,760), and \$50,864,235 United States Government securities (against \$61,962,717). On the debit side of the report total deposits are shown as \$260,999,650 (contrasting with \$258,174,945). No change has been made in the bank's capital, which stands at \$10,200,000, but surplus and profits have been decreased to \$8,762,223 from \$9,096,828 three months ago.

The Mercantile-Commerce Bank & Trust Co. of St. Louis, The Mercantile-Commerce Bank & Trust Co. of St. Louis, Mo., in its statement of condition as of June 29, 1940, shows total deposits of \$183,353,276 and total assets of \$201,253,674, comparing with \$184,773,777 and \$202,548,448, respectively, on March 26 last. In the current statement the chief items comprising the assets are: Cash and due from banks, \$105,563,189 (against \$90,037,422 on the earlier date); United States Government obligations, direct and guaranteed, \$33,268,828 (against \$47,488,397), and other bonds and securities, \$31,341,003 (comparing with \$80,411,071). The bank's capital remains unchanged at \$10,000,000, but surplus has increased to \$3,600,000 from \$4,000,000.

A charter was issued by the Comptroller of the Currency on July 3 for the Commercial National Bank of Kinston, North Carolina. The new organization, which succeeds the Kinston Industrial Bank of that place, is capitalized at \$100,000. Leo H. Harvey heads the institution and Haywood Weeks is Cashier.

Substantial increases in both deposits and loans during the month of June over that month a year ago are reported by the First National Bank in Palm Beach, Palm Beach, Fla. Deposits increased \$4,395,000, or 48% over the showing made in June, 1939, bringing deposits to a new summer mark of \$13,512,819. Loans made during this June were \$12,17,000 or 60% more than reported at June 30, 1020 Since October 26, 1937, more than reported at June 30, 1939. Since October 26, 1937, more than 10,000 personal loans, aggregating \$2,800,000, have been made locally by the bank, a large number of these loans having been for assistance in the building of new homes.

In its condition statement as at the close of business June 29, 1940, the American Trust Co. (head offfice San Francisco, Calif.) reports total assets of \$334,412,679 (comparing with \$325,709,133 at the close of business March 26, 1940), of which the principal items are: Loans and discounts, \$141,957,385 (against \$143,687,538 on the earlier date); cash on hand and in banks, \$72,697,593 (comparing with \$60,613,002); United States Government bonds and notes, \$57,661,117 (against \$59,926,853), and State, county and municipal bonds, \$31,401,321 (contrasting with \$32,170,060). Total deposits are shown in the statement as \$303,755,263 (comparing with \$293,587,658 on March 26). The company's capital and surplus are unchanged at \$15,000,000 and \$4,000,000, respectively, but undivided profits are now \$5,481,574, down from \$5,901,526 three months ago.

The Anglo California National Bank of San Francisco, Calif., in its condition report as of June 29, 1940, reports total assets of \$223,223,786 (against \$216,446,160 on March 26, 1940), of which the principal items are: United States Government securities, \$66,256,383 (comparing with \$65,349,318 on the earlier date); loans and discounts, \$64,482,035 (against \$63,892,485), and cash and due from banks, \$58,892,666 (against \$53,024,507). On the debit side of the report, total deposits are shown as \$193,830,082 (comparing with \$187,086,846 on March 26). The capital and surplus of the bank remain the same at \$17,920,000 and \$4,030,000, respectively, but undivided profits have dropped to \$2,215,042 from \$2,236,670 three months ago.

Total deposits of \$159,876,459 and total resources of \$175,-198,895 are revealed in the condition report of the Crocker First National Bank of San Francisco, San Francisco, Calif., as of June 29, 1940, contrasting with \$148,964,949 and \$163,-760,932, respectively, on March 26, 1940. The principal items making up the assets in the later statement are: Cash and sight exchange, \$54,338,850 (against \$39,966,050 on the earlier date); United States bonds, \$40,403,590 (against \$42,854,956), and loans and discounts, \$22,527,731 (contrasting with \$24,501,624). Capital and surplus remain unchanged at \$6,000,000 each, but undivided profits have risen to \$2,270,863 from \$2,261,136 on March 26.

THE CURB MARKET

Curb stocks have moved irregularly upward during the greater part of the present week. Trading has been dull, but there has been a generous amount of speculative attention directed toward the preferred group of the public utility stocks which have been in the forefront during most of the week's trading. Oil stocks have been quiet and the Aircraft irregularly appears and paper and cardward streks. week's trading. On stocks have been quiet and the Aircraft issues, shipbuilding shares and paper and cardboard stocks have moved within a narrow range with the advances and declines largely in minor fractions. The aluminum group has been quiet and the chemical shares have shown little activity.

has been quiet and the chemical shares have shown little activity.

Drifting prices marked the trading on the New York Curb Exchange during the abbreviated session on Saturday. The market movements were without definite trend and the transfers dropped to the lowest trading volume on record, the total sales being approximately 19,645 shares. There were only 111 issues traded in of which 50 closed on the side of the advance, 19 declined and 42 registered no change. Public utility preferred stocks were the most active, the best gains being recorded in this group. In other sections of the list changes were largely in minor fractions. Aircraft issues were irregular, Beech and Brewster showing fractional advances, while Bell and Republic registered little change. Paper and cardboard stocks were lower and shipbuilding shares moved within a narrow range.

Trading was again dull on Monday and transfers were down to approximately 51,955 shares, the lowest full days' turnover in several months. Aircraft stocks were irregular with Bell fractionally higher while Brewster. Fairchild and Republic closed on the side of the decline. Shipbuilding issues moved within a narrow range and were unchanged as the market closed. Public utility stocks were featured by the preferred group which registered gains up to 4 or more points, Ohic Edison pref. moving up 4½ points to 105, while Sioux City Gas & Electric pref. (7) forged ahead 4¼ points to 99¼. In the industrial specialties section prices were slightly higher, Heyden Chemical advancing 2 points to 72; Consolidated Retail Stores moving up 3 points to 88; and Brown Co. pref., 1¼ points to 16¼.

Under the leadership of the public utility shares the market

Retail Stores moving up 3 points to 88; and Brown Co. pref., 1½ points to 16½.

Under the leadership of the public utility shares the market advanced over a fairly broad front on Tuesday and a goodly number of the market favorites recorded gains of a point or more. Aircraft issues continued irregular, Bell and Waco moving down a shade while Republic was fractionally higher and Beech and Bellanca did not appear on the tape at all. Shipbuilding shares were mixed and the paper and cardboard stocks were generally lower. In the industrial specialty group the trend was toward higher levels, Jones & Laughlin Steel advancing 1 point to 22, Monarch Machine Tool 1 point to 38; Pittsburgh Plate Glass, 1½ points to 78; and North American Rayon A, 1½ points to 19¾. The transfers for the day were 98,120 shares against 51,955 on Monday.

Renewed advances marked the curb market dealings on

Renewed advances marked the curb market dealings on Wednesday and while they were most pronounced among the

preferred stocks in the public utility group there was a goodly number of gains registered in all sections of the list. Industrial specialties continued fairly active and the advances ranged from 1 to 5 or more points. Aircraft stocks again moved irregularly within a narrow range, Bell & Fairchild registering minor gains while Bellanca and Vultee were lower and Brewster & Republic were unchanged. Shipbuilding shares were fractionally lower, paper and cardboard issues were down and oil stocks moved within a narrow range. The transfers dropped to 79,340 shares against 98,120 on Tuesday. The trend of prices again pointed upward on Thursday, and as the volume of transfers climbed toward higher levels, a fairly substantial number of the market favorites moved on the side of the advance. Aluminum shares were stronger and

and as the volume of transfers climbed toward higher levels, a fairly substantial number of the market favorites moved on the side of the advance. Aluminum shares were stronger and Aluminum Co. of America both common and preferred moved forward a point. Aircraft issues were irregular, Bell, Brewster and Fairchild moving fractionally higher, while Vultee and Waco were inclined to ease off. Shipbuilding issues were higher with Todd Shipyard Corp. leading the way with a 3½ point gain to 66. Public utility preferred stocks were active at higher prices and there were some modest advances among the industrial specialties and oil shares.

Dull trading and narrow price changes were the dominating characteristics of the curb market dealings on Friday. There were some strong spots scattered through the list but these, in a number of instances, were among the slow moving issues. Aircraft stocks were generally irregular, Bell showing a small gain, Vultee declining, while Waco, Beech and Brewster did not appear on the tape. The preferred shares in the public utility group registered a number of substantial gains, shipbuilding stocks were lower and industrials moved within a narrow range. As compared with Friday of last week prices showed little change, the advances and declines being about equally divided. equally divided.

COURSE OF BANK CLEARINGS

Bank clearings this week show a decrease compared with Bank clearings this week show a decrease compared with a year ago. Preliminary figures compiled by us, based upon telegraphic advices from the chief cities of the country, indicate that for the week ended today (Saturday, July 13) clearings from all cities of the United States for which it is possible to obtain weekly clearings will be 0.3% below those for the corresponding week last year. Our preliminary total stands at \$5,357,213,851, against \$5,373,873,900 for the same week in 1930. At this center there is a loss for the week ended Friday of 18.4%. Our comparative summary for the week follows:

Clearings—Returns by Telegraph Week Ending July 13	1940	1939	Per Cent
New York	\$2,298,490,390	\$2,816,602,474	-18.4
Chicago Philadelphia	245,896,663	255,514,850	-3.8
Philadelphia	312,000,000	292,000,000	+6.8
Boston	174,444,128	177,574,983	-1.8
Kansas City	93,208,575	92,264,736	+1.0
St. Louis	74,200,000	74,300,000	-0.1
San Francisco	143,840,000	122,663,000	+17.3
Pittsburgh	107,397,440	96,119,321	+11.7
Detroit	80.301.246	76,417,677	+5.1
Cleveland	88,545,806	86,863,004	+1.9
Baltimore	64,943,818	59,066,352	+10.0
Eleven cities, five days	\$3,683,268,066	\$4,149,386,397	-11.2
Other cities, five days	781,076,810	779,418,295	+0.2
Total all cities, five days	\$4,464,344,876	\$4,928,804,692	-9.4
All cities, one day	892,868,975	445,069,212	+100.6
Total all cities for week	\$5,357,213,851	\$5,373,873,900	-0.3

Complete and exact details for the week covered by the foregoing will appear in our issue of next week. We cannot furnish them today, inasmuch as the week ends today (Saturday), and the Saturday figures will not be available until noon today. Accordingly, in the above the last day of the week in all cases has to be estimated.

In the elaborate detailed statement, however, which we present further below, we are able to give final and complete results for the week previous—the week ended July 6. For that week there was an increase of 1.5%, the aggregate of clearings for the whole country having amounted to \$5,554,914,219, against \$5,472,428,718 in the same week in 1939. Outside of this city there was an increase of 14.8%,

the bank clearings at this center having recorded a loss of 7.4%. We group the cities according to the Federal Reserve districts in which they are located, and from this it appears that in the New York Reserve District (including this city) the totals show a decrease of 6.4%, but in the Boston Reserve District the totals show an increase of 8.1%, and in the Philadelphia Reserve District of 13.1%. In the Cleveland Reserve District the totals record an expansion of 16.8%, in the Richmond Reserve District of 22.6%, and in the Atlanta Reserve District of 16.5%. In the Chicago Reserve District the totals register an improvement of 17.6%, in the St. Louis Teserve District of 8.5%, and in the Minneapolis Reserve District of 12.7%. The Kansas City Reserve District enjoys a gain of 4.4%, the Dallas Reserve District of 5.1%, and the San Francisco Reserve District of 17.7%.

In the following we furnish a summary by Federal Reserve

In the following we furnish a summary by Federal Reserve districts:

FOOTNOTES FOR PRECEDING PAGE

a Represents capital impairment applicable to fiscal year 1939 but not appropriated by Congress until Aug. 9, 1939.

Volume 151

y Congress until Aug. 9, 1959.

b Excess of credits (deduct).

c Net of reimbursement for administrative expenses under section 201 (f) of the colal Security Act amendments of 1939, amounting to \$6,105,586 for this month and \$12,288,267 for this fiscal year to date.

and \$12,288,267 for this liscal year to date.

d Includes \$43,756,731 representing repayment of amounts paid to the Commodity Credit Corporation for capital impairment.

e This amount is revised on the last day of the month to adjust for changes in classification which were made beginning July 1, 1939, because of the President's Reorganization Plans I and II.

Reorganization Plans I and II.

f The figures for the fiscal year 1940 represent payments and repayments of \$1,953 and \$2,240.831, respectively, on account of adjustments of grants for prior years. The net adjustment is \$2,238.877 excess of repayments.

g Additional expenditures are included in "Departmental" above.

h Additional transactions are included under "Transactions in checking accounts of governmental agencies (net), etc.

j The item Postal Deficiency represents advances from the General Fund of the Treasury to the Postmaster General to meet deficiencies in the postal revenues. These figures do not reflect any allowances for offsets on account of extraordinary expenditures or the cost of free mailings contributing to the deficiency of postal revenues certified to the Secretary of the Treasury by the Postmaster General pursuant to the Act of Congress approved June 9, 1930.

k Includes transactions formerly classified under the caption "Old-age reserve

k Includes transactions formerly classified under the caption "Old-age reserve account."

account."

1 Excess of redemptions (deduct).

m Net of reimbursement to the General Fund for administrative expenses amounting to \$6,105,586 for this month and \$12,288,267 for this fiscal year to date.

n Includes transactions on account of RFC Mortgage Company, Disaster Loan Corporation, and Federal National Mortgage Association.

REDEMPTION CALLS AND SINKING FUND NOTICES

Below will be found a list of bonds, notes and preferred stocks of corporation called for redemption, together with sinking fund notices. The date indicates the redemption or last date for making tenders, and the page number gives the location in which the details were given in the "Chronicle":

DIVIDENDS

Dividends are grouped in two separate tables. In the first we bring together all the dividends announced the current week. Then we follow with a second table in which current week. current week. Then we follow with a second table in which we show the dividends previously announced, but which have not yet been paid. Further details and record of past dividend payments in many cases are given under the company name in our "General Corporation and Investment News Department" in the week when declared.

The dividends announced this week are:

Weekly Return of the Member Banks of the Federal Reserve System

Following is the weekly statement issued by the Board of Governors of the Federal Reserve System, giving the principal items of resources and liabilities of the reporting member banks in 101 leading cities from which weekly returns are obtained. These figures are always a week behind those for the Reserve banks themselves. The comments of the Board of Governors of the Federal Reserve System upon the figures for the latest week appear in our department of "Current Events and Discussions," immediately preceding which we also give the figures of New York and Chicago reporting member banks for a week later.

Commencing with the statement of May 19, 1937, various changes were made in the breakdown of loans as reported in this statement, which were described in an announcement of the Federal Reserve Bank of New York of April 20, 1937, as follows:

The changes in the report form are confined to the classification of loans and discounts. This classification has been changed primarily to show the amounts of (1) commercial, industrial and agricultural loans, and (2) loans (other than to brokers and dealers) for the purpose of purchasing or carrying securities. The revised form also eliminates the distinction between loans to brokers and dealers in securities located in New York City and those located outside New York City. Provision has been made also to include "acceptances of own bank purchased or discounted" with "acceptances and commercial paper bought in open market" under the revised caption "open market paper," instead of in "all other loans," as formerly.

Subsequent to the above announcement, it was made known that the new items "commercial, industrial and agricultural loans" and "other loans," would each be segregated as "on securities" and "otherwise secured and unsecured."

A more detailed explanation of the revisions was published in the May 29, 1937, issue of the "Chronicle," page 3590.

A more detailed explanation of the revisions was published in the May 29, 1937, issue of the "Chronicle," page 3590

eserve bank notes.

* These are certificates given by the United States Treasury for the gold taken ver from the Reserve banks when the dollar was, on Jan. 31, 1934, devalued from 10 cents to 59.06 cents, these certificates being worth less to the extent of the fiference, the difference itself having been appropriated as profit by the Treasury nder the provisions of the Gold Reserve Act of 1934.

Weekly Returns of the Board of Governors of the Federal Reserve System

The following was issued by the Board of Governors of the Federal Reserve System on Thursday afternoon, July 11, showing the condition of the 12 Reserve banks at the close of business on Wednesday. The first table presents the results for the System as a whole in comparison with the figures for the eight preceding weeks and with those of the corresponding week last year. The second table shows the resources and liabilities separately for each of the 12 banks. The Federal Reserve note statement (third table following) gives details regarding transactions in Federal Reserve notes between the Reserve agents and the Federal Reserve banks. The comments of the Board of Governors of the Federal Reserve System upon the returns for the latest week appear in our department of "Current Events and Discussions."

^{* &}quot;Other cash" does not include Federal Reserve notes. † Revised figures.

These are certificates given by the United States Treasury for the gold taken over from the Reserve banks when the dollar was devalued from 100 cents to 59.06 cents on Jan. 31, 1934, these certificates being worth less to the extent of the difference, the difference itself having been appropriated as profit by the Treasury under provisions of the Gold Reserve Act of 1934.

Bond Record-New York Stock Exchange

FRIDAY, WEEKLY AND YEARLY

NOTICE—Prices are "and interest"—except for income and defaulted bonds. Cash and deferred delivery sales are disregarded in the week's range, unless they are the only transactions of the week, and when selling outside of the regular weekly range are shown in a footnote in the week in which they occur. No account is taken of such sales in computing the range for the year.

The italic letters in the column headed "Interest Period" indicate in each case the month when the bonds mature.

e Cash sales transacted during the current week and not included in the year y range No. sales.

r Cash sale; only transaction during current week. a Deferred delivery sale; only transaction during current week. n Odd lot sale, no included in year's range.

\$ Negotiability impaired by maturity. † The price represented is the dollar quotation per 200-pound unit of bonds. Received interest payable at exchange rate of \$4.8484.

The following is a list of the NewlYork Stock Exchange bond issues which have been called in their entirety:

Brooklyn-Manhattan Transit 41/2 1966, Aug. 2 at 103.

General Motors Accept 31/2 1951, Aug. 6 at 103.

Staley (A. E.) Mfg. 4s 1946, Aug. 5 at 103.

Texas Corp. 31/2 1951, Aug. 12 at 103.

Companies reported as being in bankruptcy, receivership, or reorganized under Section 77 of the Bankruptcy Act, or securities assumed by such companies.

Deferred delivery sales transacted during the current week and not included in the yearly range;
No sales.

A Bank Eligibility and Rating Column—x Indicates those bonds which we believe eligible for bank investment.

eligible for bank investment.

y Indicates those bonds we believe are not bank eligible due elither to rating status or some provision in the bond tending to make it speculative.

z Indicates issues in default, in bankruptcy, or in process of reorganization. The rating symbols in this column are based on the ratings assigned to each bond by the four rating agencies. The letters indicate the quality and the numeral immediately following shows the number of agencies or rating the bonds. In all cases the symbols will represent the rating given by the majority. Where all four agencies rate a bond differently, then the highest single rating is shown.

A great majority of the issues bearing symbols ccc or lower are in default. All issues

A great majority of the issues bearing symbols ccc or lower are in default. All is bearing ddd or lower are in default.

Saturday Monday Tuesday Wednesday Thursday Friday	131,870 232,890 303,530 282,140 328,330 255,990	3,515,000 3,636,000 4,053,000	541,000 697,000 708,000 500,000	\$29,000 56,000 285,000 43,000 71,000 54,000	\$1,759,000 4,350,000 4,497,000 4,387,000 4,624,000 4,428,000
Total	1,534,750	\$20,124,000	\$3,383,000	\$538,000	\$24,045,000

Sales at	Week Ende	ed July 12	Jan. 1 to July 12			
New York Stock Ezchange	1940	1939	1940	1939		
Stocks-No. of shares	1,534,750	3,224,430	129,754,805	113,502,725		
Bonds Government State and foreign Railroad and industrial	\$538,000 3,383,000 20,124,000	\$1,705,000 3,136,000 23,098,000	\$26,642,000 128,249,000 730,230,000	\$48,437,000 134,617,000 699,325,000		
Total	\$24,045,000	\$27,939,000	\$885,121,000	\$882,379,000		

Attention is directed to the new column incorporated in this tabulation pertaining to bank eligibility and rating of bonds. See note 4 above.

NOTICE—Cash and deferred delivery sales are disregarded in the week's range unless they are the only transactions of the week and when selling outside of the regular weekly range are shown in a footnote in the week in which they occur. No account is taken of such sales in computing the range for the year.

In the following extensive list we furnish a complete record of the transactions on the New York Curb Exchange for the week beginning on Saturday last (July 6, 1940) and ending the present Friday (July 12, 1940). It is compiled entirely from the daily reports of the Curb Exchange itself, and is intended to include every security, whether stock or bond, in which any dealings occurred during the week covered.

Canadian Crop Conditions Mostly Favorable, Reports Bank of Montreal

"Crop conditions in most parts of Manitoba and Alberta are satisfactory at present, but in Saskatchewan many districts require good rains to prevent deterioration," according to the July 11th crop report issued by the Bank of Montreal, which goes on to say:

Heading of wheat is general throughout the Prairie Provinces and the growth of coarse grains is mainly favorable. Some light damage from hail has occurred in scattered localities. Grasshoppers hav caused serious damage in southeastern Alberta and southwestern Saskatchewan. Pastures are in good condition in most districts.

In the Province of Quebec crops have made only slow progress owing to continuance of unseasonably low temperatures and excessive rains. Warm, dry weather would rapidly improve the outlook. In Ontario satisfactory weather conditions have prevailed during the past week and the general outlook is now good. In the Maritime Provinces the past week has seen a continuance of unfavorable weather conditions and the season generally continues backward. In British Columbia hot, dry weather continues and although in general crop conditions at present are satisfactory, rain is urgently needed to prevent early deterioration.

Study of Current Policies in Personnel Relations in Banks Published by Princeton University
The Industrial Relations Section of the Department of Economics and Social Institutions of Princeton University recently published a study of changes in bank personnel practices between 1935 and 1939 under the title of "Current Policies in Personnel Relations in Banks". This report, written by Helen Baker, Assistant Director of the Industrial Relations Section, discusses "trends and the most apparent changes in personnel relations in banks during the past five years as revealed in comparative data supplied by 50 banks in 1934 and by 48 of the same group in 1939 or 1940." "The changes in bank personnel practices between 1935 and 1939," the study says, "were in part a continuing evolution in fundamental personnel policies due to an increasing recognition of their business value and in part a result of labor legislation. The interaction of both influences was responsible for certain developments, notably with respect to old-age security." Chapters discussing the changes are devoted to the following subjects: The Personnel Organization, Employment Policies and Procedures, Salary Administration, Educational Plans, Plans for Financial Security, The Medical Department and Health Services and Hours of Work and Vacations. This review, covering 50 pages, may be secured from Princeton University, Princeton, N. J., for \$1.00a copy. J. Douglas Brown Director of the Industrial Relations Section, supplies a Foreward in the study.

Paterson (N.VJ.) News Issues 256-Page Edition to

Paterson (N.T.J.) News Issues 256-Page Edition to Commemorate Its 50th Anniversity

A 256-page newspaper, called the largest edition of a daily newspaper ever printed in New Jersey, was issued on June 29 by The Paterson Evening News in celebration of its 50th Anniversary according to the Newark "News," which also said:

In the issue was reproduced in facsimile the four-page first edition of 1890. The edition was dedicated to the late Edward B. Haines, founder of the paper and The Paterson Morning Call.

Employees of the paper received a week's salary as a golden anniversary

Total\$	31,163,348	\$22,159,581

Total. \$31,163,348 \$22,159,581 as The foregoing balance sheet indicates no appraisal value for the common stock, as the priorities of the 1st pref. and preference stocks are greater in amount than the market value of the assets of the corporation. The 1st pref. stock has priority to the extent of \$100 per share and accrued dividends. The preference stock, following the 1st pref. stock, has priority to the extent of \$100 per share and accrued dividends remaining unraid on such preference stock. To June 30, 1940, the total accrued dividends on the 1st preferred stock from Jan. 1, 1940 amounted to \$483,768 or \$3 per share; and accrued dividends on the preference stock from April 1, 1932, amounted to \$11,642,746 or \$49,50 per share. As at June 30, 1940, after allowing for the accrued dividends for 6 months on the 1st preferred stock, the net assets applicable to this priority of the preference stock were \$5,526,561 equal to \$23,49 per share. There were no net assets applicable to the common stock at June 30, 1940 on the basis of valuing the corporation's holdings of securities at market prices on that date.—V. 150, p. 2246.

market prices on that date.—V. 150, p. 2246.

American Utilities Service Corp.—Sells Small Company
The Securities and Exchange Commission has approved the sale of all
the outstanding securities of Petoskey Gas Co., consisting of 15,000 shares
(\$10 par) common stock and \$23,500 unsecured 6% promissory income
note due Nov. 1, 1965, to V. W. Packard, C. Frederick Curtis and T.
Chalmers Curtis for the sum of \$50,000 in cash and interest from Jan. 1,
1940 on the note.
Petoskey Gas Co., a Michigan corporation, is engaged in the distribution
of butane gas within and in the vicinity of the Cities of Petoskey and
Harbor Springs, Mich.
American states that the reason for the proposed sale is to further the
carrying out of its tentative plan of integration. The president of American
testified that he did not deem Petoskey capable of integration with the
other gas utility properties in the system. Petoskey is the only utility
operating property which American owns or controls in the State of Michigan. The only other gas properties controlled by American are located in
Wisconsin, Illinois, Mississippi and Kentucky.—V. 150, p. 3192.

American Viscose Corp.—To Modernize Plant.—

American Viscose Corp.—To Modernize Plant—
Corporation will spend approximately \$1,000,000 to modernize its plant at Marcus Hook, Pa., William H. Brown, Treasurer of the company, announced. The plant, which now employs 2,424 persons, was threatened with a permanent shutdown a year ago, but since has operated successfully on an adjusted wage scale.

Most of the cost will be expended to replace obsolete and worn-out machinery, Mr. Brown stated. The modernizing program will start at once.

Once.
Changeover of machinery will cause only a slight curtailment in production operations, according to Mr. Brown. The work will be done by the company's engineering department.—V. 150, p. 427.

American Water Works & Electric Co., Inc. - Weekly Output-

Arkansas-Missouri Power Corp.—Hearing—
The public hearing on the application (File 70-103) of the corporation regarding the issuance and sale of \$2,350,000 of 4% first mortgage bonds, series A, due 1965 and \$300,000 of serial notes, originally scheduled for July 23, 1940, has been changed, at the request of the company, to July 17, 1940. The hearing will be held at the SEC's Washington offices.—V. 151, p. 98; V. 150, p. 4116.

Arkanses Power & Light Co.—Sells Bonds to REA—
The Securities and Exchange Commission July 10 announced that company had filed an application (File 70-114) under the Holding Company Act regarding the sale to the Rural Electrification Administration of \$200,000 of first & refunding mtge. gold bonds, 2.73% series due 1959, and \$93,000 of first & refunding mtge. gold bonds, 2.83% series due 1959. The proceeds from the sale of the bonds are to be used to finance the construction of electric distribution lines and facilities in rural areas, or to reimburse the company's treasury for expenditures previously made for such purposes.—V. 150, p. 4116.

Associated Gas & Electric Co.—Weekly Output—
The Utility Management Corp. reports that for week ended July 5; net electric output of the Associated Gas & Electric group was 86,467,587 units (kwl.). This is an increase of 8,159,640 units or 10.4% above production of 78,307,947 units a year ago.—V. 151, p. 98.

ical and efficient development of an integrated public utility system. The effect of the transactions embodied in the application is the elimination from the system of a company for which there appears to be no real need. Therefore, we do not find that the acquisition is detrimental to the carrying out of the provisions of Section 11. Accordingly, the Commission finds that the provisions of Section 10 (c) are satisfied and we observe no basis for adverse findings under Section 10 (b).

"With respect to the assumption of the \$150,000 note liability of Associated Investing Corp. by Associated Utilities Corp., the Commission finds that the provisions of Section 7 (c) (1) (C) are satisfied, and observes no basis for making adverse findings under Section 7 (d).

"The acquisition by Associated Investing Corp. of its own capital stock for cancallation is a step in the proposed plan of merger and must be viewed in the light of related transactions. Under all of the circumstances of the transaction the Commission observes no basis for withholding its approval thereof under Rule U-12C-1.

"As to the sale by Associated Investing Corp. of public utility securities which it owns to Associated Utilities Corp., the Commission finds that the terms and conditions of the sale satisfy the requirements of Rule U-12F-1.

"We reserve jurisdiction as to the values at which the assets acquired are to be recorded on the books of Associated Utilities Corp.—V. 150, p. 1589.

New Company Formed as Successor—
A new company Auburn Central Manufacturing Corp. (which see) has been formed to succeed Auburn Automobile Co., and has applied for listing on the New York Curb Exchange.—V. 150, p. 3346.

Auburn Central Manufacturing Corp.—Suburn Automobile Co.—Securities to Go on Curb List--Succeeds Au-

Auburn Central Manufacturing Corp.—Succeeds Auburn Automobile Co.—Securities to Go on Curb List—

An application for listing of 375,000 shares (no par) voting common stock of Auburn Central Manufacturing Corp. has been approved by the Board of Governors of the New York Curb Exchange. Of this total 202,785 shares are expected to be issued initially in consummation of the plan of reorganization of the Auburn Automobile Co., as confirmed by the Federal Court on April 20. Directors of the company approved July 8 certain formalities to expedite listing of the shares.

Under the plan there were issuable 153,449 common shares and 14,433 convertible preferred shares of Auburn Central Manufacturing and 48,108 convertible preferred shares of Auburn Central Manufacturing and 48,108 convertible preferred shares of Auburn Central Manufacturing and 4,077 common shares of Aviation Corp. in exchange for Auburn Automobile's debt to unsecured general creditors.

In addition 2,742 common shares of Auburn Central Manufacturing and 4,077 common shares of common stock of Auburn Automobile and 13,824 common and 1,382 convertible preferred shares of Auburn Central and 4,608 common shares of the Aviation Corp. were issuable to holders of common stock of Auburn Automobile and 13,824 common shares of the Aviation Corp. were issuable to holders of Lycoming Manufacturing Co. preferred shares guaranteed by Auburn Automobile.

Additional common shares of Auburn Central are issuable to a maximum of 115,000 shares isnucle to officers under options at \$5 x share as additional compensation for their services. The application also provides as President and Chairman in the year beginning with May, 1940, and 35,000 as a reserve for issuance to officers under options at \$5 x share as additional compensation for their services. The application also provides for a maximum of 215,000 shares issuable to old security holders and creditors, contrasted with the 202,785 provided for immediately.

The 4% preferred stock is to be convertible into common stock

Registrar for Common and Preferred Stock—
The Continental Bank & Trust Co. of New York has been appointed registrar for 17,500 shares (\$50 par) preferred stock and 375,000 shares (no par) common stock of the corporation.

Baltimore Transit Co.—Improvement Program—
Bancroft Hill, President of this company announced a \$2,000,000 improvement program involving the purchase of 108 new streamlined trolley cars and 15 new buses.

The company already has 68 streamlined trolleys and Mr. Hill said the new ones, to be built by Pullman Standard Car Manufacturing Co., Worcester, Mass., would give this company "one of the largest fleets of modern rail urban transit cars in the United States".—V. 150, p. 4117.

Barnsdall Oil Co.—Purchases Stock—
Company reports that 6,100 shares of common stock were acquired during the month of June for the account of an employees stock purchase plan.—V. 150, p. 3964.

Bausch & Lomb Optical Co.—Decree Accepted—
Federal Judge William Bondy signed a consent decree July 9, terminating the civil complaint filed by the Department of Justice against the company, and three of its officers growing out of earlier government charges of an alleged conspiracy to restrain trade in military optical instruments. The same defendants, on May 27 of this year pleaded nolo contendere to an indictment, based on the same set of facts, filed under the Wilson Tariff Act and the Sherman Anti-Trust Act. Total fines of \$40,000 were imposed and paid by them.—V. 150, p. 3501.

Beau Brummell Ties, Inc.—10-Cent Dividend—
Directors have declared a dividend of 10 cents per share on the common stock, par \$1, payable July 25 to holders of record July 15. Dividend of 15 cents was paid on March 1, last, and one of 10 cents was paid on Dec. 1, 1939.—V. 149. p. 2503.

Bell Telephone Co. of Pa.—Loss in Phones—. Company reports a loss of telephones in service during June, the usual trend during June when many telephones are disconnected when customers go away for the summer. The decrease for June, however, was smaller than in the corresponding months of the two previous years.

Company reports a net loss of 536 stations during June, compared with a loss of 2,170 stations in June, 1939, and 4,415 stations in June, 1938, as of June 30, last, there were were 1,320,548 Bell telephones in service in Pennsylvania.—V. 151, p. 99.

Rurel & Co.—Complaint Filed.

Burel & Co.—Complaint Filed—
The Securities and Exchange Commission July 2 announced the filing of a complaint in the U.S. District Court at Chicago, against Burel & Co., E. J. Burel, Aloise Burel, Fred. Lorch, and Ed. Schwartz, seeking to enjoin the mfrom violating the registration and fraud provisions of the Securities Act of 1933 in the sale of the company's stock. The case involves contracts for the operation and servicing of certain automatic vending machines.

contracts for the operation and servicing of certain automatic vending machines.

The complaint alleged that all the defendants had been selling Burel & Co. class A stock (together with personal holdings of class B stock) without registering either of the securities under the Securities A.

It also alleged that the defendants untruthfully told persons who had previously entered into investment contracts with Burel & Co. (a predecessor corporation) as to the operation and servicing of certain automatic vending machines that it was to their advantage to exchange their contracts for the class A shares and that such an exchange was contingent upon the purchase of shares in an amount equivalent to their investments in the vending machines. The complaint charged that no such requirement existed.

In the sale of the class B stock, the complaint charged that the individual defendants represented that the shares being offered for sale were owned by the defendant corporation and that the proceeds were to be used for corporate purposes, when in fact the shares were being sold from the personal holdings of E. J. Burel and Aloise Burel, and they were to receive the proceeds.

Business Capital Corp.—12½-Cent Dividend—
Directors have declared a quarterly dividend of 12½ cents per share on the class A common stock payable July 31 to holders of record July 22. This compares with 10½ cents paid every quarter since October 1938.

Carpenter Paper Co., Omaha, Neb.—Stock Offered—Kirkpatrick-Pettis Co., Burns, Potter & Co. and the National Co. of Omaha, Neb., are offering at 104 (in Nebraska only) the unsold or unexchanged portion of 10,000 shares of 4½% cumulative preferred stock (par \$100).

only) the unsold or unexchanged portion of 10,000 shares of 4½% cumulative preferred stock (par \$100).

In connection with the offer to sell the 10,000 shares of 4½% cumulative preferred stock, the holders of the outstanding 6,706 shares of series A 6% preferred stock were given the privilege of exchanging said shares for the new stock on a share-for-share basis at par (\$100)\$. All shares of series A 6% preferred stock not exchanged are to be called for redemption on Aug. 1, 1940, at par and accrued dividends, and all shares of 4½% cumulative preferred stock not exchanged are to be sold at 104.

Prior to July 1, 1940, the holders of the presently outstanding series A 6% preferred stock and the holders of the presently outstanding common stock had the option to purchase the stock offered at \$100 per share.

History and Business—Company was incorp. in Delaware Nov. 22, 1937, as successor to the Carpenter Paper Corp. Company is engaged in the warehousing for sale at wholesale of paper and paper products of various descriptions. While its principal business is dealing in paper, it also warehouses and sells at wholesale such kindred products as wrapping paper, paper bags, paper cups, household papers, toilet papers, towels, tissues, way paper, stationery, school supplies, floor coverings, twine, corrugated cartons, paper containers and other lines usually handled by wholesale paper merchants. Company's merchandise is distributed in 17 States west of the Mississippi River.

Company enjoys a diversification of source of supply on account of its extensive distribution, which has enabled it to establish business relationships with the important paper manufacturers in this country. Company is an agent of the Hammermill Paper Co. of Erie, Pa. Other important nationally-advertised brands are distributed by the company. A few of these are listed as follows: Champion Papers, Mosinee Kraft, Gilbert Rag Papers, Strathmore, Crane, Westvaco, Cellophane, Northwest. Dixiered Papers, Champion Papers under the register of "Rodicha o

a Less returns and allowances.

The company has no funded debt. As at Dec. 31, 1939, its total current assets were \$3,678,872, its total current liabilities \$713,769, a ratio of approximately 5 to 1.

Purpose—Pursuant to a plan of recapitalization, there was offered to the holders of the company's series A 6% cumulative preferred stock the right to exchange said stock for 4½% cumulative preferred stock at par on a share-for-share basis. All shares of series A 6% cum. pref. stock not exchanged are to be called for redemption on Aug. 1, 1940, at par and accrued divs. The shares of 4½% cum. pref. stock not exchanged are offered for sale.

The total net proceeds from the sale of the shares are estimated not to exceed \$1,012,396, in which event \$670,600 will be used to redeem the Series A 6% cum. pref. stock resembly outstanding, and the balance, \$341,796, will be added to working capital and used to acquire additional inventory stocks and to finance increased receivables occasioned by increased sales. The calculation of net proceeds is made on the basis that no shares of series A 6% cum. pref. stock will be redeemed by cash on Aug. 1, 1940.

Capitalization—The capitalization of the company is as follows:

Authorized

Series A 6% cum. pref. stock (par \$100)

6,706 shs.

a All shares of series A 6% cum. pref. stock not exchanged for 4½% pref. stock are to be called for redeemption on Aug. 1, 1940.

Underwriting—Of the 10,000 shares of 4½% cum. pref. stock, 6,706 shs.

a All shares of series A 6% cum. pref. stock not issued in exchange are to be sold by the company. Company will be assisted in the distribution of said shares by Kirkpatrick-Pettis Co., Burns, Potter & Co., and the National Co. of Omaha, Neb., who will act as sales agents for the company, except as to such number

Celanese Corp. of America--Listing-

The New York Stock Exchange has authorized the listing of 26,266 additional shares (no par) common stock on official notice of issue, as a stock dividend, making the total number of shares applied for 1,076,891.

Directors at a meeting held June 3 declared a dividend payable on Aug. 15 in common stock of the corporation to the holders of the outstanding shares of common stock of record June 14, at the rate of one share for each 40 shares held. There are presently outstanding 1,050,625 shares of common stock, so that payment of the dividend will require the issue of 26,266 shares.—V. 151, p. 100.

Central Foundry Co.—Seeks Extension of Maturities—
The company is asking holders of its general mortgage bonds and convertible notes to agree to a five-year extension of maturity so the company may refund its \$350,600 of 6% convertible first mortgage bonds with a 4% serial bank loan.

The company's funded debt, all of which matures Sept. 1, 1941, consists of the first mortgage bonds, which are convertible at \$8 to \$10 a share: \$648,200 of 5% general mortgage bonds, convertible at \$10 a share, and \$97,200 of 4% notesic convertible at \$6.25 to \$7.75 a share.

Under the proposed plan the company would prepay 10% of the principal amount of the general mortgage bonds and notes on Sept. 1, 1940, change the conversion rate to \$5 a share, and increase the interest rate on the notes to 5%.—V. 150, p. 3815.

Conversion rate to \$5 a snare, and increase the interest rate on the notes to \$5%.—V. 150, p. 3815.

Central Kansas Power Co.—Private Sale of Bonds—
The Securities and Exchange Commission on July 8 approved the application of the company field pursuant to Section 6 (b) of the Public Utility Holding Company field pursuant to Section 6 (b) of the Public Utility Holding Company Act of 1935 for exemption from the provisions of Section 6 (a) thereof, of the issuance and sale of \$900,000 first mortgage 4½% 25-year bonds, series A, due July 1, 1965.

It is proposed to sell the bonds, at principal amount, to six insection companies as follows: Bankers Life Co., Des Moines, Iowa, \$200,000; Great-West Life Insurance Co., Bos Moines, Iowa, \$200,000; Great-West Life Insurance Co., Uninipeg, Man., Canada, \$100,000; Indianapolis Life Insurance Co., Indianapolis, Ind., \$60,000; The John Hancock Mutual Life Insurance Co., Boston, \$200,000; Modern Woodmen of America, Rock Island, Ill., \$90,000.

The proceeds from the sale of the bonds will be applied by Central Kansas in the following manner:

(1) To the redemption on Sept. 1, 1940, at principal amount and accrued interest, of \$780,000 first mortgage 6% gold bonds;

(2) To the payment of \$22,000 3½% note, due June 15, 1940, held by City National Bank & Trust Co., Kansas City, Mo.

(3) To payment of the expenses of the proposed transaction, estimated at \$22,500 and

(4) The balance, estimated at \$69,500, to be used to reimburse the company's treasury for expenditures previously made for additions, betterments and improvements.—V. 150, p. 3815.

oldings.

Debentures of the 5% issue in the principal amount of \$296,000 purchased, a accordance with the terms of the indenture, during the first six months this year have been retired. There was a credit to surplus of \$195,398 sulting from the purchase of these debentures.

Century Shares Trust—Dividend—
Company will pay a dividend of 40 cents per share on Aug. 1 to holders of record July 18. This dividend will be paid from net investment income of the trust for the first half of 1940. Dividend of 46 cents was paid on Jan. 19 last.—V. 150, p. 2872.

Chesapeake & Ohio Ry.—Equipment Trust Issue—
The company will receive bids on an issue of \$2,500,000 of 1 ½ % equipment trust certificates to finance in part the purchase of new equipment already ordered by the road. Bids are to be submitted, according to the announcement by July 15 at 2 p. m. The equipment, which will cost about \$3,400,000, consists of 1,000 all-steel box cars and 100 all-steel cabooses. The certificates will be dated Aug. 1, 1940, and will be payable in 10 equal instalments.—V. 150, p. 4120.

Chicago & Eastern Illinois RR. Co.—New Officers—
At the first meeting of the directors of this newly organized company held
at Chicago on July 2 the following were elected executive officers: Chas. T.
O'Neal, President; James B. Ford, Vice-President; Geo. A. Burget, Secretary and Treasurer; William A. Ragel, Comptroller, W. M. Templeton,
Assistant Secretary; J. C. Sites, Assistant Comptroller and N. E. Helme,
Assistant Treasurer.
Assistant Treasurer.
As executive committee was appointed consisting of Kenneth D. Steere,
Chas. T. O'Neal, William D. Fowler, Barrett Wendell and J. W. Barriger,
Third.—V. 151, p. 100.

Chicago & Southern Air Lines, Inc.—Passenger Revenue D. D. Walker, Vice-President of this company announced on July 3 an increase of 69.6% in revenue passengers carried for the first six months of 1940 as compared with the same period of 1939.

The report was that Chicago & Southern Air Lines flew 6.516,059 revenue passenger mites during the first six months of 1940, an increase of 65% over the same period of 1939 when the air line, operating between Chicago and New Orleans, serving Springfield, St. Louis, Memphis and Jackson, flew 3,949,270 passenger miles. During the period from Jan. 1 to June 30, 1940, a total of 16.791 revenue passengers were carried against 9,901 for the same months of 1939. This is an increase of 69.6%.

The total number of passengers carried in June, 1940, showed an increase of 5.6% over May and an increase of 118% over the month of June, 1939. Chicago & Southern flew a total of 1,725,390 revenue passenger lies in June, 1940, against 1,597,871 in May, 1940 and 829,465 in June, 1939. The tremendous increase in number of passengers carried during the month of June, 1940, as compared with the same month a year ago was brought about through the inauguration of 21-passenger Douglas service between the Great Lakes and the Gulf Coast.—V. 150, p. 4121.

Church Schools in the Diocese of Virginia—Bonds Offered—Galleher & Co., Inc., and Miller & Patterson, Richmond, Va., are offering \$750,000 2½%, 3%, 3½% and 3½% first mortgage bonds (closed issue).

The amounts, maturities, prices and yields are as follows: (a) \$105,000 2½% bonds, due \$15,000 semi-annually Jan. 1, 1941-1944, priced at 100.75-101.48 to yield from 1% to 2.25% according to maturity.
(b) \$90,000 3% bonds, due \$15,000 semi-annually July 1, 1944-Jan. 1, 1947, priced at 100.59-102.47, to yield from 2.35% to 2.90% according to maturity.
(c) \$90,000 3½% bonds, due \$15,000 semi-annually July 1, 1947-Jan. 1, 1950 priced at 100-103.14, to yield from 3% to 3.50% according to maturity.

(C) \$90,000 32% bonds, due July 1, 150 priced at 100.

Jan. 1, 1950 priced at 100-103.14, to yield from 3% to 3.50% according to maturity.

(d) \$465,000 334% bonds due July 1, 150 priced at 100.

Bonds are dated July 1, 1940, and are to mature serially in the amount of \$15,000 on Jan. 1 and July 1, 1941-1949, incl., \$15,000 Jan. 1, 1950, and \$465,000 July 1, 1950. Both principal and interest (J-J) are to be paid at principal office of State-Planters Bank & Trust Co., Richmond, Va., trustee. The bonds are to be issued in coupon form, payable to bearer, in denom. of \$5,000, \$1,000 and \$500. Corporation will have the right on July 1, 1943, and at any time thereafter, upon 30 days' prior published notice, to redeem as a whole all of the bonds then outstanding at their principal amount, plus a premium of ½ of 1%. Corporation will also have the right on July 1, 1943, and at any time thereafter, upon 30 days' prior notice, to redeem less than all of the bonds outstanding in multiples of not less than \$5,000 at their principal amount and without a premium, provided that if and whenever the corporation so elects to redeem only a portion of the bonds, the bonds so to be redeemed shall be selected first from the bonds maturing July 1, 1950, and if all bonds of said maturity shall have been redeemed, then in the reverse order of the remaining maturities.

Purpose—To refund at a lower rate of interest the corporation's present bonded indebtedness aggregating \$655,000 July 1, 1940, and to provide funds for the erection of a new administration building at St. Christopher's School.

Mortgaged Property—The Church Schools in the Diocese of Virginia (corporation) is a non-profit corporation organized under Chapter 151 of the Code of Virginia, without capital stock. It is controlled by a board of trustees whose membership is selected by the Council of the Protestant Episcopal Church in the Diocese of Virginia. It operates a system of five schools in Virginia, as follows:

(1) St. Catherine's School was founded in 1890 by Virginia Randolph Ellett, being acquired by the corporation in 1920. It is a country resident and day school for girls, located at Westhampton, near Richmond, Va.

(2) St. Christopher's School founded in 1911 as the Chamberlayne School was acquired by the corporation in 1920 and name changed to St. Christopher's. It is a country boarding and day school for girls, located at Westhampton.

(3) St. Margaret's School founded in 1920 as a boarding and day school for girls, is located in Tidewater Va., on the Rappahannock River. It was established as an institution of the Episcopal Church, designed primarily to meet the need in Virginia of an inexpensive girls' school of high standards.

(4) St. Anne's School was founded in 1910 and acquired by the corporation in 1920. The school is located near Charlottesville, Va., having recently moved from its former site within the city to "Greenway Rise." This is a day and boarding school for girls.

(5) Christopher School founded in 1920 as a country boarding school for boys, is located in Middlesex Country, Va. on the Rappahannock River. Security—Bonds are to be secured by a closed indenture of deed of trust. Mortgage will create a first lien on the real estate, buildings, furniture, security—Bonds are to be secured by a closed indenture of deed of trust. Mortgage will create a first lien on the real estate, buildings

Chrysler Corp.—New Sales Records—
Sales reports by three Chrysler Corp. divisions—Plymouth, De Soto and Chrysler—showed new records established for the final week of June. Plymouth retail deliveries for the week ended June 29 totaled "more than 19,000 cars against 9,000" in the like 1939 period, according to D. S. Eddins, General Manager of this division. This substantially exceeded the previous record for this period, made in 1936, he said. Each of the past four weeks has shown a strong rise over the previous week, he declared. Deliveries by dealers of the Chrysler division were the highest for any week in history, it was stated by C. J. Jacobson, Sales Manager. He said Chrysler deliveries were up 50% and Plymouth deliveries up 80% from a year ago. Also, he stated Chrysler, sales established a new high for the full month.

For the De Soto division, L. G. Peed, Vice-President, reports new records for both new and used car sales in the last week in June, with combined deliveries of De Soto and Plymouth cars 40% greater than the previous peak week in De Soto's experience.—V. 150, p. 3043.

1

(D. L.) Clark Co.—20-Cent Dividend—
Directors have declared a dividend of 20 cents per share on the common stock, no par value, payable Aug. 1 to holders of record July 22. This compares with 5 cents paid on Dec. 18, 1939, and dividends of 25 cents paid on Dec. 28, 1938 and Sept. 1, 1938.—V. 149, p. 3712.

Collins Co.—To Pay \$2 Dividend—
Directors have declared a dividend of \$2 per share on the common stock, payable July 15 to holders of record July 9. Dividend of \$1 was paid May 29 last; dividends of \$2 were paid in the three preceding quarters; previously, regular quarterly dividends of \$1.50 per share were distributed.—V. 150, p. 3656.

Commonwealth Edison Co.—Weekly Output—
The electricity output of the Commonwealth Edison Co. group (intercompany sales deducted) for the week ended July 6, 1940 was 129,388,000 kilowatt hours compared with 130,192,000 kilowatt hours in the corresponding period last year, a decrease of 0.6%.

The following are the output and percentage comparisons for the last four weeks and the corresponding periods last year:

—Kilong Whour Output—

wa ttHour Outnut-

Week Ended—	1940	1939	Per Cent	
July 6	129.388.000	130.192.000	0.6 Dec.	
June 29	148,040,000	140.652,000	5.3 Inc.	
June 22	151,467,000	139.317.000	8.7 Inc.	
June 15	147.124.000	132.571.000	11.0 Inc.	
-V. 151, p. 100.	,			

Commonwealth Investment Co.—Asset Value—
The company reports that on June 30 the net asset value of its capital stock, adjusted for dividends, was 2.6% above the value on the same date a year ago. Dividend disbursements of 16 cents per share were made during the past 12 months period.—V. 150, p. 3044.

Commonwealth & Southern Corp.—Weekly Output—
The weekly kilowatt-hour output of electrical energy of subsidiaries of
the Commonwealth & Southern Corp., adjusted to show general business
conditions of territory served, for the week ended July 4, 1940 amounted
to 137,632,074 as compared with 117,370,767 for the corresponding week
in 1939, an increase of 20,261,307 or 17.26%. The 1939 figure does not
include the output of the Tennessee Electric Power Co., the electric properties of which were sold on Aug. 15, 1939 to the Tennessee Valley Authority
and other governmental agencies.—V. 151, p. 100.

Community Gas & Power Co.—SEC Ruling—
The Securities and Exchange Commission on July 5 issued an order declaring that American Utilities Associates and Lowell Gas Light Co. are subsidiary companies as defined in Section 2 (a) (8) of the Public Utility Holding Co. Act of 1935 of Community Gas & Power Co. and American Gas & Power Co., and each of them, and as such subject to the obligations, duties, and liabilities imposed upon subsidiary companies of holding companies by said Act.—V. 149, p. 3713.

Community Natural Gas Co.—Proposed Acquisition—
The Securities and Exchange Commission has announced that this
company, has filed an application (File 70-92) under the Holding Company
Act regarding the proposed acquisition of the utility assets of Gainesville
Gas Co. of Gainesville, Texas, for \$124,500. The properties consist of a
natural gas distribution system in and around Gainesville, which, it is
stated, Community Natural Gas Co. proposes to operate as part of its
natural gas business.—V. 141, p. 1929.

Community Public Secret.

Community Public Service Co.—Dividend—
Directors have declared a dividend of 50 cents per share on the common stock payable Aug. 15 to holders of record July 29. Stock dividend of 30% was paid on May 31, last, cash dividend of 65 cents on May 15, and Feb. 15, last, and on Nov. 15, 1939, and previous regular quarterly dividends of 50 cents per share were distributed.—V. 150, p. 3044.

Consolidated Edison Co. of New York, Inc .- Weekly

Consolidated Edison Co. of New York announced production of the electric plants of its system for the week ending July 7, 1940, amounting to 121,900,000 kwh. compared with 128,000,000 kwh. for the corresponding week of 1939, a decrease of 4.8%.—V. 151, p. 101.

Consolidated Film Industries, Inc. - Stockholders Lose Suits

Two minority stockholders' suits against certain present and former directors were dismissed July 3, by Supreme Court Justice Carroll G. Walter. The complaints charged the defendants with wasting and misapplying assets and funds of the corporation, and asked for an accounting. Observing that the majority of stockholders had not complained of the acts assailed by the plaintiffs, Justice Walter said "as neither fraud nor concealment is here alleged or provided, the acquiescence of the majority is conclusive upon the plaintiffs."—V. 150, p. 3816.

Crosse & Blackwell Co.—Pays Accumulated Dividend—Company paid a dividend of 25 cents per share on account of accumulations on the \$1 partic. 1st pref. stock on July 1 to holders of record June 9. Like amount was paid a year ago.—V. 149, p. 411.

Crown Drug Co.—Sales—
Sales for the month of June were \$699,797 as compared to \$632,922 for June, 1939, an increase of \$66,875 or 10.6%.—V. 150, p. 3817.

Cuban-American Sugar Co.—To File Briefs—
Vice-Chancellor Charles M. Egan at Jersey City on July 8 reserved decision and ordered briefs filed in injunction proceedings brought by two stockholders to prevent the company from putting a recapitalization plan in operation. Vice Chancellor Egan set July 18 as the limit for filing briefs. Stockholders voted for the plan June 19.

The readjourned special stockholders' meeting to consider any further details incident to the recapitalization plan is scheduled for July 17. This will probably be further postponed.—V. 150, p. 3971.

Denver & Rio Grande Western RR.—RFC Asks Approval of ICC Plan—Objections to Proposal Are Filed by Road, Individuals and Several Organizations

Individuals and Several Organizations—

The Reconstruction Finance Corporation has asked the U. S. District Court at Denver to approve the Interstate Commerce Commissoin's plan for reorganization of the road.

Objections to the plan were filled by individuals and organizations.

Among the objectors were the railroad itself, Guy A. Thompson, trustee a bankruptcy for the Missouri Pacific RR., which owns stock in the D. & R. G. W. and \$1,000,000 of ref. & impt. mtge. bonds; the United States Trust Co., New York; insurance companies, and the Central Hanover Bank & Trust Co., New York.

The RFC, to which the railroad is indebted for loans said in its petition that the proposed reorganization plan was "not perfect in every detail" and that it might well "strongly urge objections," but it recognized the desirability of "getting railroads out of bankruptcy" and it was not objecting "on the theory that the plan will be speedily approved and the distribution of securities will be in accordance therewith.

The road itself asked that the plan be returned to the ICC for modification "so as to cure defects." It asked that the plan be "recast and remodelled and amended" to conform with a plan filed by the road July 28, 1936.

Other objectors contended the plan was neither fair nor equitable and was

1936. Other objectors contended the plan was neither fair nor equitable and was discriminatory in favor of the RFC. Mr. Thompson and the insurance concerns objected on the ground that the plan would have an adverse effect on creditors.—V. 150, p. 4124.

Dome Mines, Ltd.—Production—
Company reports bullion output for June at \$659,952 against \$661,091 in May and \$600,985 in June, 1939.
For the first six months bullion output amounted to \$3,974,237 against \$3,625,178 in same 1939 period.—V. 150, p. 3658.

Douglas Aircraft Co., Inc.—Vacations for Employees—Thirty-six thousand checks, totaling nearly \$900,000 were recently presented to 18,000 employees of this company, comprising mass vacation compensation in addition to regular pay for the week.

President Donald W. Douglas said that together with vacations for administrative workers, the special vacation pay being distributed by the company, to all other employees will amount to nearly half-million dollars.—V. 150, p. 3972.

Douglas Oil & Refining Co.—Organized—
It is reported that articles of incorporation for this company listing capitalization of \$650,900 in preferred stock and 740,000 shares of capital stock without par value, were filed with the California Secretary of State's office on June 22.

The corporation's principal office is in Los Angeles County. Directors are Donald W. Döuglas, Santa Monica; G. W. Stratton, Beverly Hills; William P. Andrews, Long Beach; A. L. Bergere, Beverly Hills; Willam W. Wallace, San Marino; David C. Moore and D. N. Grunwald, both of Los Angeles.

El Paso Natural	Gas Co.	Sells Be	onds Priva	tely—The

company has sold privately to a group of five insurance companies an additional \$2,500,000 3½% 1st mtge. bonds, due 1953, at 98½.

1953, at 98½.

The company has made arrangements, contingent upon approval of the stockholders at a special meeting to be held on July 23, to sell the same purchasers another \$500,000 of these bonds. The bonds sold are of the same series as the original issue of \$6,000,000 which was sold privately late in 1938.

The amount of 3½% is presently limited to \$8,500,000 and with authority from stockholders to raise this limit to \$10,000,000, there will be \$9,000,000 outstanding. No plans are under consideration for the sale of the additional \$1,000,000 of bonds.

With the funds received from sale of the \$2,500,000 3½s, company has prepaid \$1,500,000 of the 3% serial notes held by Chase National Bank, which totaled \$2,680,000 after payment of the June 15 instalment, leaving \$1,180,000 outstanding of the \$4,000,000 originally sold in 1938.

The balance of funds received from sale of the additional bonds will be used for working capital and to reimburse the treasury for more than \$4,000,000 spent on improvements and expansion since Nov., 1938. The company is to complete a \$3,500,000 improvement program this year, which supplemented a \$2,500,000 pipeline enlargement undertaken last year.

Erie RR.—Interest Payments on Bonds—

The New York Stock Exchange has received notices regarding interest payments on the following bond's of the Erie RR. System:

(a) Genessee River RR. 1st mtge. 6% 50-year sinking fund bonds, due 1957: Interest from Jan. 1, 1940, through June 30, 1940 (\$27,31 per \$1,000 bond) on such securities as may be issued to holders of these bonds under the plan of reorganization of Erie RR. is now being paid on presentation for stamping of the coupon due Jan. 1, 1938. Interest is payable at office of City Bank Farmers Trust Co., New York.

(b) Erie RR. 1st consol. 4% prior lien bonds, due 1996: Interest from Jan. 1, 1940, through June 30, 1940 (\$22 per \$1,000 bond) on such securities as may be issued to holders of these bonds, under the plan of reorganization is now being paid on presentation for stamping of coupons due Jan. 1, 1938 and July 1, 1938. Interest is payable at office of City Bank Farmers Trust Co., New York, N. Y.

(c) Erie & Jersey RR. 1st 6% 50-year sinking fund bonds, due 1955: Interest from Jan. 1, 1940, through June 30, 1940, (\$23 per \$1,000 bond) on such securities as may be issued to holders of these bonds under the plan of reorganization is now being paid on presentation for stamping of the coupon due Jan. 1, 1938. Interest is payable at office of City Bank Farmers Trust Co., New York.

(d) New York & Erie RR. third mortgage bonds extended at 4½%, due March 1, 1938: Interest from March 1, 1938, through June 30, 1940, (\$105 per \$1,000 bond) on wo being paid on presentation for stamping of the coupon due Jan. 1, 1940. The blank Farmers Trust Co., New York.

Reorganization Plan Modified by ICC—

The blan of reorganization approved by the order of the Interest Com-

(\$105 per \$1,000 bond) is now being paid on these bonds. Interest is payable at office of City Bank Farmers Trust Co., New York.

Reorganization Plan Modified by ICC—

The plan of reorganization approved by the order of the Interstate Commerce Commission April 6, 1940, is modified in the following particulars:

Consolidation—Consolidation of the Nypano with the debtor is permitted.

Claims Having Priority Over Bonds—These claims would be paid in cash or assumed by the reorganized company, the relative priority to which they are entitled being maintained.

Date of New Securities—The rights of security holders with respect to both interest and dividends are protected, if securities are issued as of a date later than Jan. 1, 1940.

Maturity of Collateral Trust Notes—Maturity of the notes is to be fixed by the reorganization managers, the date to be not earlier than Jan. 1, 1940.

Extension or Refunding of Bonds of Subsidiaries—The extension or separate refunding of only two issues of bonds are specifically provided for, but such treatment of other bonds may be arranged for by the reorganization managers.

Capital Expenditures Fund—The capital expenditures fund would be used only for such part of the cost of capital investment as would remain after deducting all retirements of roadway and structures which were charged against income. Use of the fund for retiring bonds is limited to payment or acquisition first of any fixed interest indebtedness senior to the income bonds and then to any indebtedness bearing fixed interest, issued under the income mortgage.

Sinking Fund—Payments into the sinking fund on emergency first mortgage bonds are given priority over payments into the sinking fund on the first mortgage bonds.

Preferred Stock—Full accumulation of dividends for preferred stock is disapproved, but partial accumulations are approved. Back dividends on

preferred stock must all be paid before any dividends can be paid on common stock. Before any provision of preferred stock can be materially altered there must be affirmative approval of two-thirds of the preferred stock. In dissolution, winding up or liquidation, preferred stockholders would receive the par value of the shares, plus accumulated dividends, before there would be any distribution to common stockholders. Warrants—One share of stock is made the unit in any drawing by lot of escrowed stock.

Consolidation—Consolidation of a subsidiary with the debtor may be properly a port of the stock of one publishing it owned by a carbonidar be

Warrants—One share of stock is made the unit in any drawing by lot of escrowed stock.

Consolidation—Consolidation of a subsidiary with the debtor may be brought about if the stock of such subsidiary is owned by a subsidiary of the debtor.

Compromising or Settling Claims—Reorganization managers to have power, subject to approval of court to compromise or settle claims of lessors or holders of securities of lessors if there are or may be counter claims of debtor against lessor.

Par Value Stock—Reorganization managers a lowed in their discretion, to provide for par value stock at \$40 per share instead of no par value stock at \$40 per share instead of no par value stock stock required to be paid before any dividends are declared on preferred stock. Affirmative approval required of at least two-thirds of preferred stock before any material charter or by-law amendment in made. More particular statement made of priority of preferred stock over common stock as to assets and dividends.—B. 150, p. 4126.

Fidelity & Deposit Co. of Maryland—Extra Dividend—Directors have declared an extra dividend of \$1 per share in addition to the regular quarterly dividend of \$1 per share on the common stock, par \$20, both payable July 31 to holders of record July 16. Extra of like amount was paid on Dec. 30 and on July 31, 1939.—V. 149, p. 4028.

Hearst Corp.—New Director, &c.—
John W. Hanes, former Under-Secretary of the Treasury, has been elected Chairman of the Finance Committee and a director of this corporation and American Newspapers, Inc.
Richard E. Berlin, Executive Vice-President of Hearst Magazines, Inc., has been chosen President of this corporation, parent operating company of the Hearst organization, it was announced on July 4. He will continue as head of the magazine company.
Martin F. Huberth has been elected President of American Newspapers, Inc. John Brookes has completed his work with the organization and has resigned to continue law practice in Washington, D. C.—V. 133, p. 1460.

has resigned to continue law practice in Washington, D. C.—V. 133, p. 1460.

(R.) Hoe & Co., Inc.—Tenders—
Company has invited tenders up to noon on July 25, good for acceptance on or before July 29, of its 4½-6½% first mortgage bonds maturing Oct. 1, 1944, at prices not to exceed 81½% of the face amount of the bonds plus accrued interest at the fixed rate of 4½%.

The notice to stockholders points out that while \$100,000 has been reserved for the purchase of bonds on tender, this amount may be increased or decreased at the discretion of the directors provided offers to sell such bonds at satisfactory prices are received.

The management has informed the security holders that these bonds have ranged in price since Jan. 1, 1940, between 70% and 80% of face amount. The last recorded sale before the date of the notice, July 2, was at 76% and the current bid at that time was 74% of face amount.—V. 150, p. 3203. p. 3203.

Hudson Motor Car Co.—Sales—
Retail sales of new Hudson cars continued to show strong seasonal gains with an increase of 57% for June compared with the same month a year ago, it was reported by George H. Pratt, general sales manager of the company. Total retail sales for the period amounted to 7,824 units, representing the best June sales since 1937, Mr. Pratt disclosed.—V. 150, p. 4128.

Hutchins Investing Corp.—Accumulated Dividend—
Directors have declared a dividend of \$1 per share on account of accumulations on the \$7 cumulative pref. stock, no par value, payable July 15 to holders of record July 3. Like amount was paid on April 15 and Jan. 15, last; 65 cents paid on Dec. 22, 1939 and dividends of \$1 per share paid on Oct. 14 last and in preceding quarters.—V. 150, p. 2426.

Imperial Chemical Industries, Ltd.—Dividend—Directors have declared a final dividend of 11 9-10 cents per share on the American Depository Receipts for ordinary shares payable July 8 to holders of record April 25.—V. 150, p. 2426.

Indiana Pipe Line Co.—Unlisted Trading—
The old capital stock, par \$10, has been removed from unlisted trading by the New York Curb Exchange and the new capital stock, par \$7.50 has been admitted to unlisted trading. The new capital stock was issued in exchange for the old capital stock, on the basis of one share of new capital stock plus a cash distribution of \$2.50 in exchange for each share of old capital stock.—V. 150, p. 3513.

Indianapolis Power & Light Co.—Bonds Offered—A banking group headed by Lehman Brothers, Goldman, Sachs & Co. and The First Boston Corp. offered July 11 \$32,000,000 1st mtge. bonds, 3½% series due 1970. The bonds were priced at 10½.

bonds were priced at 104½.

Business—Company is a public utility operating in and about the City of Indianapolis, and engaged principally in the generation, distribution and sale of electric energy. It also is engaged in the production, distribution and sale of steam for heating and general industrial purposes. Company sells electric appliances and cooperates with dealers in the sale and financing of major load-building appliances to its customers.

Company has two wholly-owned subsidiaries, Mooresville Public Service Co. and Electric Building Co., Inc.

There are no privately owned electric public utility companies or municipally owned electric light and power plants in competition with the company within the City of Indianapolis. Of the 1939 consolidated operating revenue of the company and its subsidiaries, totaling \$11,823,311, approximately 90.71% was derived from the electric departments, about 8.80% from the steam department, about 0.09% from the water department, and about 0.40% from building rentals.

At Dec. 31, 1939 the company and its utility subsidiary rendered electric service to 127,147 customers in the City of Indianapolis and adjacent villages, towns and rural areas, all within the State of Indiana, the most distant point being about 55 miles from Indianapolis. Of these customers, 112,705 are classified as domestic, 14,430 as commercial and industrial, 11 as municipal street lighting, and one as an electric company. At the same date, steam service was rendered to 819 customers in the City of Indianapolis in an area of approximately 42 square miles. The total population of the area served by the company and its utility subsidiary is estimated to be approximately 468,692. Of this total, it is estimated that approximately 91% is in Indianapolis and surrounding towns and villages, and the remaining 9% is in rural areas.

Net income \$1,751,689 \$1,934,812 \$2,183,746 \$2,284,337 a Company did not make any provision for Federal income tax for 1938 because the tax return filed showed a loss after making certain special deductions relating to funded debt, including the redemption premium and the unamortized discount and expense applicable to the first mortgage gold bonds called for redemption in that year. If such deductions had not been available, Federal tax would have amounted to approximately \$355,000.

The annual interest on the \$32,000,000 first mortgage bonds, 3¼ % series due 1970, and the \$5,400,000 of 2½% notes initially to be outstanding upon completion of this financing, amounts to \$1,040,000 and \$135,000, respectively.

Use of Proceeds—The company will deposit the net proceeds from the sale of the \$32,000,000 bonds (estimated at \$32,511,658 after deducting expenses but excluding accrued interest), together with an estimated amount of \$1,088,341 of other funds of the company with the trustee, in trust, for the redemption on or before Sept. 16, 1940 of the company's outstanding \$32,000,000 1st mtge. bonds, 3% % series due 1968 (due Aug. 1, 1968), at 105%.

The \$5,400,000 bank loan together with additional funds from the treasury of the company for the payment of accrued interest and premiums, will be used to discharge \$5,400,000 serial notes of the company presently outstanding.

Securities Offered

First Mortgage Bonds, 31% Series due 1970 dated May 1, 1940, American National Bank & Trust Co., Chicago, Trustee. Bonds shall be issued as coupon bonds in the denom. of \$1,000, registerable as to principal, and as fully registered bonds in denom. of \$1,000 and \$5,000, and, at the option

of the company, in any multiple or multiples of \$5,000. Principal of and interest (M & N).

**Sinking Fund—Mortgage provides that, so long as any of the 1970 series bonds remain outstanding, company will on or before Dec. 1 of each year, beginning with 1949, deliver to the trustee an amount in cash or principal amount of 1970 series bonds equivalent to 1% of the greatest principal amount of the 1970 series bonds theretofore at any one time outstanding, cash so deposited shall be applied by trustee to the purchase of 1970 series bonds outstanding, at public or private sale at not exceeding the redemption price (or to redemption thereof if requested by company), and, if any balance of such cash remaining with the trustee on March 20 of any year beginning with the year 1950 shall aggregate \$25,000 or more, the trustee shall apply the same to the redemption of 1970 series bonds on the succeeding May 1. Company has the right to tender 1970 series bonds for sale by it to the trustee. Company will pay to trustee the amount of accrued interest and premium paid, if any, upon all such bonds purchased or redeemed pursuant to section 20.

**Maintenance and Improvement Fund—Mortgage provides that while any 1970 series bonds are outstanding the company will for the period beginning May 1, 1940 and ending Dec. 31, 1940 and for each calendar year thereafter, pay to the trustee on or before the May 1 next succeeding the end of such calendar year, as and for a maintenance and improvement fund, a sum in cash equal to the sum of 10% of the gross steam operating revenues, as defined in the mortgage, and 15% of the gross operating revenues, as defined in the mortgage, and 15% of the gross operating revenues (other than steam), as defined in the mortgage of the company. In lieu of depositing cash, the company upon delivery to the trustee the required certificates, is entitled to the following credits: (a) expenditures during such sequent to April 30, 1940, for property additions, the aggregate of the credits under such clause, (b) no

4% thereafter to and inci. April 30, 1875 (and the company of the respective remaining periods specified in following paragraph).

In case, however, of redemption of 1970 series bonds in case substantially all the company's electric property is sold to any governmental body or agency or is taken by power of eminent domain, &c., the following redemption premiums will be payable:

International Match Realization Co., Ltd.—Dividend

International Match Realization Co., Ltd.—Dividend Directors have declared a fifth liquidating dividend of \$10 per share on the company's capital shares, payable on Aug. 14, 1940, to holders of voting trust certificates of record July 12 1940. Payment is contingent upon receipt of a 2% dividend in bankruptcy of the International Match Corp. and is further subject to applicable exchange control regulations. Holders of unexchanged certificates of deposit of either protective committee for debentures of International Match Corp. must exchange them for voting trust certificates for capital shares of International Match Realization Co., Ltd., in order to receive payment.—V. 150, p. 280.

Interstate Department Stores, Inc. - Sales-

Iowa Electric Light Co.—Asks Authority to Refund \$12,600,000 in Bonds—Plans Private Sale of New Securities—
The refunding of three series of 7%, 4½% and 4% first mortgage bonds, totaling \$12,600,000, was proposed July 11 by the company in a revised application to the Interstate Commerce Commission. Previous plans of the company as outlined in an application already on file with the ICC called for the refunding ot this time of only \$6,000,000 first mortgage 7% bonds.

In a revised proposal, the company asks authority to issue \$12,600,000 new first mortgage 3½% bonds, to effect the retirement of \$6,000,000 first mortgage 7% bonds.

In a revised proposal, the company asks authority to issue \$12,600,000 new first mortgage 3½% bonds, to effect the retirement of \$6,000,000 first mortgage 7% along \$3,3000,000 first mortgage 20-vear 4½% Due May 1, 1955, and \$3,600,000 first 4s, due Dec. 1, 1955. Company also asks permission to issue \$1,980,000 of general mortgage serial notes to pay expenses of the refunding and to refund only \$6,000,000 of the outstanding bonds at this time had been changed to order to take advantage of the prevailing low interest rates on securities.

The company operates some electric railway properties in Iowa and the question of whether the ICC has jurisdiction over its security issues has not yet been determined. The application was filed so company would be protected in the event the ICC is found to have jurisdiction, it was pointed out.

The new bonds would be sold at not less than par and accrued interest to the following parties: Equitable Life Assurance Society of the United States, Metropolitan Life Insurance Co., Northwestern Mutual Life Insurance Co., John Hancock Mutual Life Insurance Co., Teachers' Insurance & Annuity Association of America, Equitable Life Insurance Co. of Iowa, New England Mutual Life Insurance Co., Lincoln National Life Insurance Co. and Armour & Co. Employees' Pension Fund.

The \$1,980,000 general mortgage serial notes would be sold to the Equitable Life Assurance So

Kirkland Lake Gold Mining Co., Ltd.—Extra Div.—
Directors have declared an extra dividend of one cent per share in addition to a semi-annual dividend of five cents per share on the common stock, par \$1, both payable Nov. 1 to holders of record Sept. 30. Like amounts were paid on May 1, last. Previously regular semi-annual dividends of four cents were distributed. In addition extra dividend of one cent was paid on Nov. 1, 1939 and on May 1, 1939.—V. 150, p. 2429.

Knudsen Creamery Co. of Calif.—Pref. Stock Offered—G. Brashears & Co., Los Angeles, recently offered 65,000 preferred shares (no par) at \$8.50 per share.

preferred shares (no par) at \$8.50 per share.

Holders of preferred shares are entitled to receive preferential cumulative dividends of 60 cents per share per annum prior to any payment of dividends on common shares. In the event of voluntary or involuntary dissolution or liquidation, holders of preferred share are entitled to receive out of the assets, if sufficient, the sum of \$10.50 per share plus any unpaid accumulated dividends before any amount shall be paid to the holders of the common shares. No representation is made that \$10.50 per share, or any other amount, will be available upon dissolution or liquidation to holders of preferred shares. Provided the 65,000 shares offered are all sold, the preferred shares will at the completion of this financing have a preference in liquidation or dissolution over common shares in an aggregate amount of \$1,329,496, plus any accumulated but unpaid dividends over an aggregate of common stock with a capital liability of nil. As of Oct. 31, 1939, assuming these 65,000 shares to have been outstanding at such date and further assuming liquidation at the aggregate stated value of preferred shares without considering surplus or any accured dividends, the above aggregate shares without considering surplus or any accured dividends, the above aggregate shares in an aggregate share of 24 months and no voting rights in connection with the issuance of additional preferred shares or any secured or unsecured obligations at any time.

Business—Company was incorporated in California Sept. 19, 1935, and was formed for the amount of the summer of the preferred of the preferred obligations at any time.

time. Business—Company was incorporated in Caiffornia Sept. 19, 1935, and was formed for the purpose of acquiring the business of its predecessor corporation, Knudsen Creamery Co. (Del.). Company and subsidiaries are engaged in the general business of buying and selling milk and its derivatives, processing and marketing milk and products derived from milk, manufacturing, buying, and selling, butter, cheese, cream, butter-milk, cottage cheese, cards, whey paper and composition containers, ice cream, cream cheese, salad dressing, salads, milk powder, operating farmlands and properties, maintaining and operating facilities for the storage, refrigeration and transportation of certain of the above-mentioned commodities and products, and maintaining and operating facilities for the

distribution and marketing of certain of the above-mentioned commodities and products, and in some localities products manufactured by others, including products not derived from milk.

Company and subsidiaries own and maintain processing and distributing plants in Visalia, Calif: Santa Maria. Calif, and Los Angeles, Calif.

Knudsen Creamery Co. (Del.), predecesser, was incorporated in May, 1929, for the purpose of acquiring the assets of Knudsen Laboratories, Inc.

Capitalization—Company has an authorized capitalization of 500,000 common shares (no par) and 250,000 preferred shares (no par). As of Feb. 27, 1940, there were 124,647½ common shares outstanding and 61,618½ preference shares outstanding and 61,618½ preference shares outstanding and are all sold, there will be 126,618½ preference shares outstanding. Company has a funded debt of \$318,500 outstanding as of Oct. 31, 1939. This funded debt is evidenced by 1st mtge, conv. 5½% sinking fund bonds dated Nov. 1, 1935, maturing Nov. 1, 1950.

Underwriting—By agreement dated Dec. 28, 1939, company has granted to G. Brashears & Co. the exclusive right to sell for it as its agent 65,000 shares of its preferred stock for a period of four months after the public offering date (May 16, 1940) which shall be as soon as practical after an effective date of the registration statement filed with the Securities and Exchange Commission.

Purpose—These proceeds will be devoted to the retirement of bank loan; retirement of automotive and equipment contracts; retirement of purchase trust deeds; purchase of additional automotive equipment, land, &c.; retirement of 5½% sinking fund bonds, and for general working capital.

Madison Square Garden Corp.—25-Cent Dividend—
The directors have declared a dividend of 25 cents per share on the common stock, no par value, payable Aug. 30 to holders of record Aug. 15. This compares with 35 cents paid on May 21; 25 cents paid in the three preceding quarters; 60 cents paid on May 19, 1939 and 25 cents paid on Feb. 28, 1939 and on Nov. 30, 1938.—V. 150, p. 2732.

Magazine Repeating Razor Co.—Preferred Dividend—Directors have declared a dividend of \$2.50 per share on the account of accumulations on the preferred stock, payable July 25 to holders of record July 18.

Majestic Radio & Television Corp.—To Be Suspended from Dealings-

from Dealings—

U. S. District Court for the Northern District of Illinois, Eastern Division, has confirmed the plan of reorganization.

Pursuant to the plan and the order of the Court, for each share of present stock of the corporation, the holder of record thereof at the close of business on June 25, 1940, (or any person or persons to whom any of such stock may be transferred prior to July 25, 1940,) has been offered the right to subscribe at 30 cents per unit to one unit consisting of 30 cents face value of debentures and one share of new common stock of the corporation.

In order to exercise the subscription right stockholders of Majestic are required to execute the subscription agreement furnished by the corporation for such purpose and forward same to the corporation, Room 603, 15 Exchange Place, Jersey City, N. J., accompanied by (a) the subscription price, and (b) the certificates for the present stock of the corporation with respect to which the rights to subscribe are exercised.

The right to subscribe becomes void after July 25, 1940. Corporation has advised its stockholders that "while no stockholder is required to subscribe for units, his interest in the corporation as a stockholder will cease unless he shall exercise his right to subscribe."

In view of the foregoing, dealings in the present capital stock of Majestic will be suspended by the New York Curb Exchange July 25.—V. 150, p. 4131.

Whobile & Ohio RR.—Deposits Under Plan Urged—

✓ Mobile & Ohio RR.—Deposits Under Plan Urged—

✓ The reorganization committee has notified holders of the company's ref. & impt. mtge. 4½% bonds, due 1977, 5% secured gold notes due 1938 and Montgomery Division 1st mtge. 5% bonds due 1947 that foreclosure sale of the company's properties has been ordered to be held at Mobile on Aug. 1, 1940. As upset prices have been set by the court all bonds favoring the freorganization and consolidation plan should be deposited not later than July 25, 1940 with the New York Trust Co., depositary.

The committees notice states that "under equity receivership only those bonds deposited under the plan are entitled to obtain the new securities. The only alternative is to receive in cash the distributive share of the proceeds of sale. Although the exact amount thus to be paid to non-assenting bonds cannot be determined prior to the completion of the sale, the reorganization committee estimates that upon the basis of upset prices already fixed by the court the amount applicable to the securities involved will not exceed approximately \$182 per \$1,000 ref. & impt. 4½% bond due 1977; \$218 per \$1,000 5% secured note due 1938; and \$163 per \$1,000 Montgomery Division 1st mtge. 5% bond due 1947."

Bondholders who have not already deposited their securities, the committee proposes, should obtain letters of transmittal and copies of the plan

of reorganization immediately from the depositary or the committee representative, John E. Morrison Sr., 20 Pine St., N. Y. City. Frederic W. Ecker, Vice-President of Metropolitan Life Insurance Co. is chairman of the committee, which includes Edward H. Leslie of Wood Struthers & Co. and John K. Olyphant Jr., Vice-President of Central Hanover Bank & Trust Co.—V. 151, p. 109.

Modern Die & Tool Co., Detroit, Mich.—Stock Offered-P. H. Hastings & Co., Detroit, recently offered at pa (\$1 per share) 80,000 shares of common stock. This stock This stock

(1) per snare) 8U,000 shares of common stock. This stock is not being offered by the company.

Company—was incorp. Jan. 12, 1934 in Michigan. At the time of organization company acquired the assets and business of a partnership of the same name and carrying on a like business, of which John C. Aldridge and Clyde H. French were the partners. These partners, together with Mabel L. Rector and Anna M. Evans, were the incorporators of this company.

and Clyde H. French were the partners. These partners, together when Mabel L. Rector and Anna M. Evans, were the incorporators of this company.

Since incorporation company has been engaged in the business of building, usually according to plans and specifications furnished by its customers, tools, dies, jigs, fixtures, stampings, special production machinery and in designing, doing special machine work, and other such work as is usual in, or incidental to the tool and die business.

The market for company's services and products is found among a varied line of mass production industries such as the automotive, manufacturers of refrigerators, stoves, washing machines, and other home applicances, and manufacturers of toys.

The largest and best customer for company's products is the automotive industry and company has had orders from most of the large companies in that fields. It is not, however, wholly dependent on the automotive industry. In 1939, nearly 35% of the company's output was taken by a single large manufacturer of refrigerators. It also has had substantial orders from the manufacturers of stoves.

Sales and Earnings—The gross annual sales of company for each year since its incorporation have been as follows:

1934. \$152.607 [1937. \$342.959]
1935. \$145.564 [1938. \$28.861]
1936. \$29.528 [1939. \$31.325]

The net profit for each of these six years, after provision for Federal

1936 299,528 | 1939 31,325

Morristown & Erie RR.—Bonds Called—
All of the outstanding first mortgage 6% bonds due Sept. 1, 1943 have been called for redemption on Sept. 3 at 105. Payment will be made at the National Iron Bank, Morristown, N. J.—V. 150, p. 1444.

Munsingwear, Inc.—To Repurchase Own Stock—
Directors have authorized the purchase by the corporation of up to 10,000 shares of its stock (of which 150,000 shares are now issued and outstanding at price of \$14 a share.

In letter to stockholders company states that, in order that all stockholders may have an opportunity to sell a proportionate part of their stock, directors fixed July 10 as the date of stockholders of record to receive letters of invitation to make tenders on or before Aug. 12 of any shares which they may wish to sell at this price.

On or about July 17 letters of invitation will be mailed to stockholders of record July 10 giving details and instructions and submitting balance sheet as at June 30, 1940, and comparative income statement for 6 months ended June 30, 1939 and 1940.

"The purchase shares," the company states, "will be held in the treasury subject to later determination as to any different use to which they will be put. The best interests of the corporation will then control. Whatever course of action is later pursued will only be followed after approval by stockholders.—V. 150, p. 1141.

National Investors Corp.—Report—

National Investors Corp.—Report—

Marking an innovation in investment trust reporting practice, corporation with the June 30 report has furnished its stockholders a booklet entitled "Growth Companies" which gives a one-page description of each company represented in the portfolio, with earnings and dividend records for the past 10 years. National Investors has been a pioneer in the "growth" investment policy, that is the selection of younger and less well-known companies for investment while their growth phase is largely ahead of them.

For the six months ended June 30, the report indicates, the asset value declined from \$6.05 to \$4.95 per share, a decline of 18.18% compared with a decline of 18.88% in the Dow-Jones Averages of Industrial Stock Prices during the same period. Approximately 94% of the net assets were invested in common stocks at June 30. A first-half dividend of 8 cent per share—a 66% increase over the corresponding dividend in 1939—is payable July 20.

In the introduction of the "Growth Companies" booklet Fred Y. Presley, President, states:

"In view of the increasing number of companies not generally known to investors which have been acquired by this company under its recently inaugurated "growth" investment policy, it would seem appropriate at this time to acquaint stockholders of the company with the nature of the business of these companies and their earnings and dividend records. It is believed that this report will serve a useful purpose for those stockholders particularly who desire to follow more closely the policies and objectives of this company."

In the course of an explanation of this "growth" investment policy, Mr. Presley goes on to state:

"The greatest opportunities for investment consistent with sound procedure are to be found at some point in the growth phase of a company. In the early or intermediate stages of the growth phase of a company in the early or intermediate stages of the growth phase of a company this early aggressive and alert to its competitive problems and is s

National Union Radio Corp.—Substantial Interest Purchased by Philco Corp .-

National Union Radio Corp.—Substantial Interest Purchased by Philoc Corp.—

A substantial interest in the corporation, manufacturers of radio tubes for equipment of new sets and replacements, has been purchased by Philoc Corp. as the first step in a program to expand the scope and activities of National Union Radio Corp., it was announced July 9 by S. W. Muldowny, President.

"Corporation will continue as a separate company to manufacture its products and distribute them nationally under its own trademark, as in the past," Mr. Muldowny said in discussing the transaction. "The greater financial strength resulting from our connection with Philoc Corp., together with additional working capital which has been raised, will enable National to make a larger place for itself in the radio tube industry. It is planned to invest substantial amounts of money in our plant further to modernize equipment and increase our tube-making capacity to take care of anticipated demands.

"Since the engineering and research experience of the Philoc Research Laboratories will be placed at the disposal of National, this company's products will give practical application to the latest scientific achievements in the radio receiving art."

National Union Radio Corp. was formed in 1929 and in the past 11 years has become an important factor in the manufacture and sale of radio tubes for initial equipment in receiving sets. Among its customers are Sears-Roebuck, General Motors, Motorola, Emerson, Zenith, Colonial Radio, and Philo. National was the first manufacturer to concentrate on the establishment of small parts jobbers and serviceman's dealers for the sale of replacement radio tubes, so that today it has a well-established system of distribution for its products.

In connection with the expansion program which National is now undertaking, it is expected the following persons will constitute the board of directors: S. W. Muldowny, President; Henry L. Crowley (Pres. Henry L. Crowley (Pres. Henry L. Crowley (Pres. Henry L. Crowley (Pres. He

New England Gas & Electric Association-System

Output—

For the week ended July 5. New England Gas & Electric Association reports electric output of 7,239,286 kwh. This is an increase of 249,030 kwh., or 3.56 % above production of 6,990,256 kwh, for the corresponding week a year ago.

Gas output is reported at 85,258,000 cu. ft., an increase of 8,673,000 cu. ft., or 11.32% above production of 76,585,000 cu. ft. in the corresponding week a year ago.

For the month ended June 30, New England Gas & Electric Association reports electric output of 34,825,622 kwh. This is an increase of 1,706,033 kwh., or 5,15% above production of 33,119,589 kwh. for the corresponding month a year ago.

Gas output is reported as 388,979,000 cu. ft., an increase of 18,568,000 cu. ft., or 5,01% above production of 370,411,000 cu. ft. in the corresponding month a year ago.—V. 151, p. 111.

New York Lake Erie & Western Docks & Improvement -Tenders

Holders of first mortgage 5% bonds dated June 1, 1883, due, as extended July 1, 1943 are being notified that pursuant to Order No. 209, dated and filed March 14, 1940, made by the District Court of the United States for the Northern District of Ohio, Eastern Division, in Proceedings for the Reorganization of a Railroad, In the Matter of Eric RR Co., Debtor, No. 45839, Commercial Trust Co. of New Jersey, successor trustee under Mortgage dated June 1, 1883, made by The New York Lake Erie and Western Docks and Improvement Co., will purchase from the holders thereof at the lowest price available, not to exceed the principal amount and accrued interest thereon to the date of purchase, bonds outstanding of the issue above mentioned to such extent as may be practicable with the funds received from the condemnation by the Port of New York Authority of property of this company (leased to Erie RR. Co.) less certain payments therefrom, which funds are in the possession of the Trust Co. and available for that purpose. On and after date of purchase, interest on the bonds so purchased shall be cancelled.

Commercial Trust Co. of New Jersey will receive tenders of bonds from the holders thereof at 15 Exchange Place, Jersey City, N. J. to and including Sept. 9, 1940. Promptly thereafter the bondholders whose tenders are accepted will be motified of acceptance of their tenders and of the date when payment will be made for such bonds as are designated for purchase, upon surrender of the same, and interest on bonds so designated on which tenders have thus been accepted, shall cease on the date so fixed for payment. If any bonds so designated are not surrendered for purchase on the prescribed date, then other bonds tendered at the lowest prices may be designated and the holders thereof duly notified.—V. 148, p. 2130.

Norfolk Southern RR.—Equipment Trusts—
The Interstate Commerce Commission on June 29 authorized the company to assume obligation and liability in respect of not exceeding \$136,000 equipment trust certificates, series C, to be issued by the Pennsylvania Co. for Insurances on Lives & Granting Annuities, as trustee, and sold at par and accrued dividends to the Reconstruction Finance Corporation in connection with the procurement of certain equipment. The ICQ at the same time approved the purchase of the certificates at par and div. by the RFC.—V. 151, p. 111.

North American Aviation, Inc.—Bonus to Employees—
Company announced that, coincident with payment of a 50-cent dividend to stockholders on July 1. directors had voted a mid-year appreciation employees' salary bonus amounting to one week's salary, to those on an hourly basis and to salaried employees whose rate is less than \$200 per month. The bonus, going to 2,651 employees, is given those who have been continuously employed since June, 1939.

The company now is operating two nine-hour shifts at its plant here, with a backlog of approximately \$84,000,000. Production records attained new highs in both April and June this year, according to company officials.

Construction already has started on the first unit of another expansion program.—V. 150, p. 3834.

Oregon Chromium Gold Pre-Organizing Syndicate-Promoter Indicted-

Promoter Indicted—

The Securities and Exchange Commission and the Department of Justice July 2 reported that William Mark Muchow of Evanston, Ill., has been indicated on charges of violating the fraud and registration provisions of the Securities Act of 1933 and of the mail fraud statute, in the sale of securities in the Oregon Chromium Gold Pre-Organizing Syndicate and U. S. Chromium, Inc. The 10-count indictment was returned in the United States District Court for the Northern District of Illinois, at Chicago. Bail was fixed at \$5,000.

The indictment charged Muchow with the fraudulent sale of the securities through misrepresentations as to the properties of the Syndicate and of its successor company, U. S. Chromium, including the size of the ore deposits and the type of ore available for commercial production. The indictment also charged that Muchow used the mails for the purpose of sale and delivery after sale of the securities without a registration statement having been in effect as to such securities.

Loses Rate Case—
The Public Service Department of the State of Washington has disallowed rate change applications of this company pending for two years, it was announced on July 8. The ruling rejected \$508,529 of operating expense charges made by the company and established a rate base of \$39,552,520, on which a return of \$2,088,389, or 5.28%, was calculated by the department.

552,520, on which a return of \$2,000,000, or \$1,200,000.

The company had petitioned the department for permission to include occupational taxes now assessed in Seattle, Spokane and other Washington centers, in its rates. The company also declared that its rate of return in Washington was insufficient for its needs.

Gain in Phones—
Company and subsidiaries report for June a preliminary net loss of 261 telephones, compared with net loss of 476 in June, 1939. Net gain for six months this year totaled 40,086, against 34,970 for same period of 1939.—V. 150, p. 3835.

V. 150, p. 3835.

Packard Motor Car Co.—Defers Plane Engine Contract—
What action company will take on the offer of a Government contract to build 9,000 Rolls-Royce aircraft motors—6,000 for Great Britain and 3,000 for the United States—remained undetermined on July 8 after a meeting of the company's board of directors.

It was revealed, however, that the contract has not yet been accepted by Packard, despite previous negotiations on the part of company officials with governmental agencies which resulted in a tender of the contract.

That some obstacles have arisen in connection with acceptance of the order and the beginning of a vast production program was indicated in a terse statement issued by M. M. Gilman, President of this company, "The matter of a possible contract for the building of Rolls-Royce motors for England and the United States was discussed at a meeting of all the board of directors of the Packard Motor Car Co. today," Mr. Gilman said, "The company is anxious to be of public service and is hopeful that a satisfactory agreement can be reached, but there are many matters that require further study."

Mr. Gilman said he would go to Washington in a few days to confer further with Government officials. After that, he said, there would be another meeting of the directors.

He added that if and when Packard accepted the contract, efforts would be made to add refinements to the British specifications. Increased horse-power and reduction of weight were other considerations, he said.—V. 150, p. 3670.

ne made to add refinements to the British specifications. Increased horsepower and reduction of weight were other considerations, he said.—V. 150, p. 3670.

Peerless Bottlers, Inc.—Stock Offered—An issue of 110,000 shares of capital stock (par \$1 per share) is being offered at \$5 per share by F. S. Yantis & Co., Inc., and Dempsey Detmer & Co., Chicago; Scott, McIntyre & Co., Cedar Rapids, Iowa; Crowell Weedon & Co., Los Angeles, Calif., and Webber, Darch & Co., Chicago.

Company and Properties—Company was incorp. April 3, 1940 and on April 20, acquired all the issued and outstanding shares of capital stock of Pepsi-Cola Bottling Co. of Des Moines, Inc., which, on the same date, acquired the property and good will of an unincorporated business known as "Pepsi-Cola Bottling Co of Des Moines," consisting of the business of the manufacture, sale and distribution in Des Moines, Ia., and adjoining territory, of soft drink beverages, including "Pepsi-Cola."

Company has entered into a contract providing for the purchase by the company of all the issued and outstanding shares of capital stock of Pepsi-Cola Bottling Co. of Kanssa City, Mo., organized May 13, 1940, to acquire a "Pepsi-Cola" bottling contract for Kansas City, Mo., and certain adjoining territory, and also certain bottling equipment and other assets formerly owned and used by Serenaders Club Ginger Ale, Inc., and Pepsi-Cola Distributing Co. (both Missouri corporations) in connection with a business which included the manufacture, sale and distribution of soft drink beverages in that territory. The "Pepsi-Cola" bottling contract and the "Pepsi-Cola" bottling equipment and other assets were acquired by the new corporation on June 1, 1940.

Company has entered into a contract with W. S. Routt of Memphis, Tenn., providing for the purchase by company of all the issued and outstanding shares of capital stock of Orange-Crush Bottling Co., both Tennessee corporations, engaged in the business of manufacturing and distributing soft drink beverages, including "Pepsi-

authorized shares were subject to issuance under the provisions of the underwriting agreement, of which 16,259 shares were issued on June 1, 1940, and 13,750 additional shares are to be issued concurrently with or prior to acquisition of the shares of capital stock of Pepsi-Cola Bottling Co. of Kansas City, Mo.

(b) The 15,000 outstanding shares now offered are included in the 40,000 have purpose—The cash proceeds from the sale of the entire 110,000 shares (but not including proceeds from the exercise of warrants or from sale of estimated expenses of \$11,000, will be \$40,0718. Included in the 110,000 shares are the 80,000 shares with respect to which there is no purchase commitment but which may be purchased from time to time by the several underwriters of the 80,000 shares are not purchased by the several underwriters the above estimate will be reduced \$1,125; for each share received, estimated as above stated, will be used, so far as determinable, for the following amounts:

(1) Acquisition of 45,000 shares of capital stock (par \$10) to the proceeds of the 16,250 shares purchased by the several underwriters on June 1, 1940, have already been applied to the 10,000 shares of capital stock (par \$10) to the proceeds of the 16,250 shares purchased by the several underwriters on June 1, 1940, have already been applied so the 10,250 shares of capital stock (par \$10,000 construction of 6,000 shares of capital stock (par \$10,000 construction of 6,000 shares of capital stock (par \$10,000 construction of 6,000 shares of capital stock (par \$10,000 construction of 6,000 shares of capital stock (par \$10,000 construction of 6,000 shares (par \$10,000 con

(J. C.) Penney Co.—Sales—
Sales for the month of June, 1940, were \$24,737,449 as compared with \$22,236,919 for June, 1939. This is an increase of \$2,500,529 or 11.24%. Total sales from Jan. 1 to June 30, 1940, inclusive, were \$125,305,051 as compared with \$115,655,858 for the same period in 1939. This is an increase of \$9,649,193 or 8.34%.

Listing—
The New York Stock Exchange has authorized the listing of 200,000 additional shares of common stock (no par) on official notice of issuance in accordance with the terms of a profit-sharing retirement plan for the management staff, making the total number of shares of such common stock applied for 2,743,984.—V. 150, p. 3835.

Pennsylvania RR.—Equipment Trusts Offered—A group headed by the First Boston Corp. were on July 8 awarded a new issue of \$7,995,000 2½% equipment trust certificates, series K, with a bid of 102.65 and interest. The certificates were reoffered to yield from 0.30% to 2.25%, according to maturity. Associated with the First Boston Corp. in the underwriting group are F. S. Moseley & Co., Kean, Taylor & Co., R. W. Pressprich & Co., Estabrook & Co. and Harris, Hall & Co. (Inc.).

The certificates (non-callable) are due \$533.000 on each July 1. from

Hall & Co. (Inc.).

The certificates (non-callable) are due \$533,000 on each July 1, from July 1, 1941, to July 1, 1955, both dates incl. Prin, and divs. (Jan. 1 and July 1), payable at office of Fidelity-Philadelphia Trust Co., trustee, Philadelphia, or at option of bearer or registered holder at its agency in New York. Dividends payable without deduction for any Pennsylvania taxes not exceeding in the aggregate four mills per annum on each dollar of principal which the railroad company or the trustee may be required to pay or to retain from such dividends. Issued under the Philadelphia plan. These certificates will be guaranteed unconditionally as to principal and dividends by the Pennsylvania KR.

The issuance of these certificates is subject to approval by the Interstate Commerce Commission. In the opnion of counsel for the bankers, these certificates qualify as legal investments for savings banks in New York.

These certificates are to be issued under an agreement to be dated July 1, 1940, which will provide for the issuance of \$7,995,000 equipmenc trust certificates. The agreement will provide that there will be subjected to thrust the following new standard guage rolling stock, estimated to cost not less than \$9,993,750, to wit: 200 all-steel mill type gondola cars; 1,900 all-steel mill type gondola cars; (25 all-steel covered hopper cars 20 all-steel heavy duty flat cars; 200 all-steel abin cars; 25 steam locomotive tenders; 24-44-4 type high speed steam passenger locomotives complete with tenders, and 8 lightweight passenger train cars.

The aggregate principal amount of the certificates will not exceed 80% of the cost of the equipment to be subjected to the trust.—V. 151, p. 113.

Pennsylvania Salt Mfg. Co.—To Pay \$1.75 Dividend—

Pennsylvania Salt Mfg. Co.—To Pay \$1.75 Dividend—
The directors have declared a dividend of \$1.75 per share on the common stock, par \$50, payable Sept. 14 to holders of record Aug. 31. Dividend of \$3.25 was paid on June 15, last; \$2 was paid on March 15, and on Dec. 15, last; dividend of \$1.25 was paid on Merch 15, 1939; \$1.25 was paid on June 15, 1939; one of \$1 was paid on March 15, 1939; \$1.25 was paid on Dec. 15, 1938; dividends of \$1 were paid on Sept. 15 and on June 15, 1938 and \$1.25 paid on March 15, 1938.—V. 150, p. 3370.

Perry Fay Co.—Initial Dividend—
Company paid an initial dividend of 10 cents per share on the new common stock now outstanding on June 29 to holders of record June 20. Dividend of 25 cents was paid on the old \$30 par shares on March 30, 1939.—V. 147, p. 2253.

Philco Corp.—Common Stock Offering Oversubs cribed—First public offering of securities of the corporation, the largest radio receiver manufacturers in the United States and a principal factor in the manufacture or sale of other electrical products, including refrigerators, air-conditioning units, and radio-phonographs, was made July 11 by an investment banking group headed by Smith, Barney & Co. The offering, consisting of 325,000 shares of common stock, (representing 150,000 shares offered for the account of the

company and 175,000 shares for the account of certain stockholders), was oversubscribed. The stock was priced

company and 175,000 shares for the account of certain stockholders), was oversubscribed. The stock was priced at \$15 per share.

Company has agreed to make application in due course for the listing of its common stock on the New York Stock Exchange and for its registration under the Securities Exchange Act of 1934.

Company—Company was incorp. Oct. 11, 1892 in Pennsylvania as The Helios Electric Co. In July, 1906 name was changed to Philadelphia Storage Battery Co. and in Jan., 1940 to the present title. Company is one of the largest producers of radio receiving sets of the type in general public use and has sold approximately 13,500,000 such sets, including approximately 3,000,000 automobile radio receiving sets. It is presently engaged and intends to continue in the manufacture or sale, or both, of home and automobile radio receiving sets, radio-phonograph and record players which are built or operated in combination with such receiving sets household electric refrigerators, portable air conditioning units, storage batteries, dry cell batteries, radio receiving tubes, parts and accessories for such products, and miscellaneous and sundry products.

Company has not yet produced television receiving sets or high frequency modulation receiving sets for sale, but is prepared to do so whenever it believes conditions warrant. In addition, it expects from time to time to extend its present line of products may be developed.

Company and its subsidiaries operate manufacturing plants in Philadelphia and Watsontown, Pa.; Sandusky, O.; Newark, N. J.; and Toronto, Canada, all of which are owned except the Toronto plant and a portion of the Newark plant, which are leased. A subsidiary leases a building in Detroit where well equipped and staffed laboratories for automotive radio engineering are located. A subsidiary also leases warehouses in New York, Newark, Philidelphia and Detroit and owns a building in Chicago used as a warehouse and sales offices.

Corporation announced on July 9 that it had purchased a "substantial interest" in the National Union Radio Corp. of Newark, N. J., which will continue as a separate company to manufacture and distribute its products under its own trade mark.—V. 150, p. 3984.

Peoria & Eastern Ry .- Plan Confirmed by Court-

Peoria & Eastern Ry.—Plan Confirmed by Court—
Plans for the adjustment of certain obligations of the company were approved July 9 by a specially constituted Federal statutory court of three judges. The plans had been approved by the Interstate Commerce Commission, as well as three-fourths of the road's bondholders.

The plan provides for a 20-year extension of an agreement under which the New York Central RR. operates the road, and a 20-year postponement of the maturity date of about \$8,000,000 in bonds, as well as the refinancing of three mortgages amounting to \$6,500,000. Judge Learned Hand of the Circuit Court of Appeals presided in the statutory court with District Judges John M. Woolsey and Murray Hulbert.—V. 150, p. 3984.

Rayonier Inc .- New Term Loans-

Edward M. Mills, President in the annual report states:
The term loans, referred to in the last annual report, were reduced \$1,500,-000 during the year by payment of the four maturities (\$375,000 each) due Oct. 31, 1939 to April 30, 1941. As of April 30, 1940 there remained a balance of \$6,500,000 which was paid in full on July 3, 1940. New term loans aggregating \$6,500,000 were made on substantially similar terms, except or lower interest rates and a somewhat different arrangement of maturities

The new term loans mature in amounts of \$500,000 semi-annually from Aug. 1, 1941 to Aug. 1, 1946 and the balance of \$1,000,000 matures on Feb. 1, 1947. Maturities to Feb. 1, 1944 bear interest at the rate of $2\frac{1}{4}\%$ per annum and the balance bears interest at the rate of $2\frac{3}{4}\%$.

per annum and the balance bears inter	est at the ra	te of 2%%.

Reserve for contingencies, \$25,000; convertible 1st pref. stock (3,478 no par shares), \$34,780; conv. 2d pref. stock (par \$1), \$200,000; common stock (par \$1), \$959,750; excess of stated value of shares of conv. 1st pref. stock over par value of shares of common stock issued in exchange therefor, \$55,467; capital surplus, \$430,255; earned surplus (deficit) since April 30, 1939, 193,282; total, \$5,032,601.

Capital reorganization—Pursuant to the approval of stockholders at a special meeting held June 30, 1939, the earned surplus (deficit) as at April 30, 1939, in the amount of \$4,001,960 was eliminated and charged to capital surplus. Certain reductions in the capital also were approved by stockholders to make the amount of common stock conform to the par value of outstanding shares.

Corporation's outstanding debt was eliminated by the conversion of \$770,000 of its outstanding conv. demand notes into 219,998 shares of common, stock and the conversion of outstanding demand notes in the amount of \$1,822,324 into 200,000 shares of conv. 2d pref. stock.

On June 27, 1939, corporation sold publicly 28,000 shares of conv. 1st pref. stock, series A, at a net cash return to corporation of \$484,966. As at Dec. 31, 1939, 24,522 shares of its conv. 1st pref. stock, series A, at an except the stock pref. stock, series A, had been surrendered for conversion and 159,752 shares of corporation's common stock had been issued in exchange therefor, leaving 3,478 shares of conv. 1st pref. stock, series A, then outstanding.

Since Dec. 31, 1939 the balance of these shares have been surrendered for conversion and 25,558 shares of corporation's common stock issued in exchange therefor, so that there are no shares of conv. 1st pref. stock, series A, now outstanding.

On Oct. 13, 1939, the name of corporation was changed from Seversky Alircraft Corp. to Republic Aviation Corp.

During the year corporation exercised its option to purchase the plant and flying field at East Farmingdale, N. Y., which it heretofore occupied under lease from

Reserve Investing Corp.—Accumulated Dividend-

Directors have declared a dividend of \$1.25 per share on account of accumulations on the \$7 cum. pref. stock, no par value, payable July 15 to holders of record July 9. Similar payments were made on April 15 and Jan. 15, last, and on Dec. 22 and on Oct. 14, 1939, and in preceding quarters.—V. 150, p. 2436.

Romec Pump Co., Elyria, Ohio—Stock Offered—Gassman & Co. and Cunningham & Co., Cleveland, Ohio, are offering 85,000 shares of common stock (par 50 cents per share) at 90 cents per share. The shares included in the present offering are offered only to residents of Ohio.

History—Company was incorp. March 16, 1914 in Ohio as "The Martell Packings Co."

From time of incorporation until March 17, 1931 company was primarily engaged in the business of manufacturing and selling metallic packings. On the last mentioned date it sold its entire line of business, including the right to use the word "Martell." Company since that time has been engaged in the business which it is presently conducting, namely, the manufacture and sale of the Romec pump, which is suitable for all general pumping purposes and has been most successfully used in aircraft. Shortly after the sale of its metallic packings business the company's name was changed to Romec Pump Co.

Reorganization—Due to various causes resulting in operating deficits and depreciation of working capital company found it increasingly difficult to pay its debts promptly as they matured and on May 8, 1939 an involuntary petition in bankruptcy was filed against the company in the U. S. District Court for the Northern District of Ohio, Eastern Division. A consent to adjudication was filed by company on the same day and company was thereupon adjudicated as bankrupt. The matter was referred to Wm. B. Woods, Referee in Bankruptcy, and King Fauver, of Elyria, O., was placed

in charge of company's property and affairs as receiver in bankruptcy with authority to continue company's business.

On July 1, 1939 company filed in the Bankruptcy Court a petition for an arrangement under Chapter XI of the Bankruptcy Act. The terms of the arrangement may be briefly summarized as follows:

(1) Costs, fees and expenses of the bankruptcy proceedings, claims of unsecured creditors whose individual claims do not exceed \$50 and taxes are to be paid in cash in full.

are to be paid in cash in full.

(2) Claims of unsecured creditors whose individual claims are \$50 or more are to be satisfied by the issuance of income debentures in principal amounts equal to their respective claims.

(3) Company's articles of incorp. by appropriate corporate action are to be amended. [Amendment filed with Secretary of State of Ohio June 1, 1940.]

(a) To authorize company to issue 300,000 shares of common stock (par \$.50).

(b) To change previously outstanding stock into the newly authorized stock on the ratio of one share of the new stock for each seven shares of the old stock previously outstanding.

(c) To reduce company's stated capital from \$203,291 to \$14,521.

(4) To provide working capital and funds for the payment of the items above set forth which are to be paid in cash the company will issue 85,000 shares of common stock to the public at a price of 90 cents per share, such offering being underwritten by Chas. D. Gentsch, his heirs, administrators.

(5) Company will grant to Chas. D. Gentsch, his heirs, administrators, executors and assigns, an option to purchase an additional 80,000 shares of common stock at \$1 per share, such option to be exercisable in whole or in part and from time to time for a period of three years after July 25, 1939.

executors and assigns, an option to purchase an additional 80,000 shares of common stock at \$1\$ per share, such option to be exercisable in whole or in part and from time to time for a period of three years after July 25, 1939.

Income Debentures—The principal terms and provisions of the income debentures to be issued to creditors pursuant to the above plan are as follows: Income debentures mature Oct. 1, 1945 but are red. at any time prior to maturity either by pro-rata partial payments or by redemption fo all debentures, at their principal amount plus accrued interest. Debentures bear interest payable semi-annually on A. & O. 1, beginning April 1 1940, at rate of 4% per annum; provided that if company does not have net earnings in the preceding calendar year (or portion thereof with respect to the months of 1939) after all charges at the rate of \$20,000 per year, such interest shall not be due but shall cumulate and be payable at such later date as the company's board of directors may determine but in any event shall be payable not later than Oct. 1, 1945 or at the prior payment in full of the debentures.

Debentures have the benefit of a sinking fund into which company sets aside not less than one-third of the amount of its net earnings for each year, beginning with the year ending Dec. 31, 1941, as shall exceed \$20,000, also one-third of the net proceeds received from the sale of any shares purchased pursuant to the option granted to Chas. D. Gentsch.

Debentures have the benefit of covenants by company restricting dividends on its shares to not more than one-third of its net earnings in excess of \$20,000 per year; and the holders of the debentures as a class are empowered to elect two members of the company's board of seven directors.

Necessary consents from creditors having been obtained, extensive hearings were had thereon, and certain amendments to the plan having been ordered by the referee in bankruptcy and confirmed by the District Court (and an appeal from such confirmation having been dismissed by

(2) Funds to accomplish such call of debentures are to be provided by the exercise by Chas. D. Gentsch and (or) his assigns of his option rights by acquiring from the company 23,000 shares of common stock at \$1 per share.

share.

Business—Company is engaged in the manufacture of vacuum pumps and hand and power operated air compressors, liquid pumps and high-pressure hydraulic pumps. Practically all of the company's business presently done is the manufacture and supply of the above articles to manufacturers and users of aircraft. Company's customers include the principal aircraft and aircraft engine manufacturers and users in the United States, including the Government services, and also include certain foreign governments.

Directors are Henry D. Stecher. Richard Perry, H. B. Harsch, Frank H. Grace, and William H, Hill. [Two other directors are to be elected by debenture holders.]

Grace, and william H. Hill. [1 wo other directors are to be elected by debenture holders.]

Offering and Underwriting—The present offering consists of 85,000 shares of common stock which is to be sold to the public at 90 cents per share. The offering was originally underwritten by Chas. C. Gentsch pursuant to an agreement dated July 25, 1939 which provided for an underwriting discount to Mr. Gentsch or his assigns of 8% of the total of the sale price or an aggregate of \$6,120. As a further consideration for such underwriting, company agreed to grant to Mr. Gentsch, his heirs, administrators, executors and assigns, the option to acquire from time to time and at any time during a period of three years at the price of \$1 per share 80,000 shares of company's stock. As already set forth Mr. Gentsch has agreed to exercise such option to the extent of 23,000 shares, leaving subject to the foregoing option agreement 57,000 shares of company's common stock. These 23,000 shares are not included in the present offering.

Rutland RR .- Bondholders' Advisory Committee Submits Proposal-

Proposal—

A plan of a bondholders' advisory committee to reorganize the road, calling for sacrifices by holders of securities and employees alike, was proposed July 9 in Federal District Court at Rutland, Vt.

The plan proposes sacrifices of about 67% by holders of securities valued at \$9,250,000 on which \$1,350,000 in interest is overdue, and acceptance of wage reductions of 15½% by 1,300 employees, to whom the receiver already owes \$344,000, withheld on a percentage basis by a court order recently voided.

Judge James P. Leamy recessed court until July 22 when further consideration of the plan may be given.—V. 150, p. 4138.

Ryan Aeronautical Co.—Listing and Registration-

The New York Curb Exchange on July 12 admitted to listing and registration the company's common stock, par \$1.—V. 151, p. 114.

Balance to surplus...\$1,630,850 \$138,171 \$1,249,861 \$2,650,880 Note—Above figures includes combined net profits of the English and Canadian branches (after foreign exchange adjustments). as follows: 1936, \$251,720; 1937, \$480,324: 1938, \$219,123, and 1939, \$280,387. The greater part of such foreign profits was attributable to the English branch at the present time England and Canada have exchange restrictions in effect and the English branch is under control of the British Government. Purpose—Net proceeds (estimated at \$9,936,450, exclusive of accrued interest, and after deducting expenses and underwriting discounts or commissions) will be applied (1) to the retirement of the company's outstanding \$7,850,000 principal amount of 5½% convertible debentures, due 1945, which the company intends to call for redemption on or about Sept. 16, 1940, at 104 (\$8.164,000) plus accrued interest, and (2) to general corporate purposes including particularly additions to machinery and equipment.

Debentures—The debentures will not be secured by any lien. They will be issued under an indenture dated as of July 1, 1940 between the company and J. P. Morgan & Co., Inc., as trustee. No additional debentures must be issued under the indenture. The indenture does not limit the amount of other securities, secured or unsecured, which may be issued by the company. With certain exceptions the indenture provisions may be modified with the consent of holders of not less than 66 2-3% of outstanding debentures; and certain other action may be taken or permitted by smaller percentages, all as set forth in the indenture.

Underwriters—The names of the several underwriters and the severa aounts underwritten by them respectively, are as follows:

Seaboard Oil Co. of Delaware—New Director—
Company has notified the New York Stock Exchange that Carl N.
Osborne has been elected a member of the board of directors. At a meeting of directors on June 27, the company's by-laws were amended to increase the number of directors to a maximum of 11.—V. 150, p. 3675.

Sears Roebuck & Co.—Sales—

Period End. June 30— 1940—Month—1939 1940—5 Mos.—1939 Sales.——\$63,312,911 \$56,768,082 \$277398,030 \$252285,448 —V. 150, p. 3675.

Seton Leather Co.—To Pay 50-Cent Common Dividend—Directors have declared a dividend of 50 cents per share on the common stock, payable Aug. 1 to holders of record July 19. Like amount was paid on Dec. 21, 1939 and on Aug. 1, 1939, and compares with 30 cents paid on Dec. 29, 1938, and payments of 50 cents per share made on Aug. 1, 1938; Dec. 22, 1937; and on Dec. 22, 1936.—V. 150, p. 2116.

Siscoe Gold Mines, Ltd.—June Production—
Company reports June production of \$150,964 against \$150,237 in May and \$157,211 in June, 1939.
For six months ended June, 1940 production amounted to \$890,574 compared with \$981,356 in same period a year ago.—V. 150, p. 3373.

Skelly Oil Co.—50-Cent Dividend—
Directors have declared a dividend of 50 cents per share on the common stock, payable Aug. 28 to holders of record July 25. Dividends of 25 cents were paid on Jan. 30. last, and on Dec. 22, 1939, and compare with 50 cents paid on Nov. 15, 1939, and on Dec. 15 and July 25, 1938.

New Official—
Company has notified the New York Stock Exchange that Dow Williams has been elected Assistant Secretary of the commany to fill the vacancy caused by the resignation of J. D. Powell. Mr. Powell was elected to the newly created office of Vice-President of the commany.—V. 150, p. 2897.

Southeast Telephone Co.—Initial Dividends—
Directors have declared an initial dividend of 30 cents per share on the common stock and an initial semi-annual dividend of 75 cents per share for the 6% convertible preferred stock, both payable July 1 to holders of record June 25.

Southeastern Electric & Gas Co.—Merger Allowed Without Hearing—SEC Exercises the Retroactive Feature of New Rule on Holding Companies—Debentures in Financing—

Without Hearing—SEC Exercises the Retroactive Feature of New Rule on Holding Companies—Debentures in Financing—
The Securities and Exchange Commission exercised July 11 the retroactive feature of its new Rule U-8 to permit the Southeastern Electric & Gas Co. to effect a consolidation without a hearing.
The SEO'S move was at the request of the company, which filed an application before the rule became effective this week.
The Commission made the proceeding subject to the new rule, which is expected to eliminate about 75% of the hearings formerly held under the Holding Comcany Act.
Southeastern Electric & Gas Co. and its subsidiary, Southeastern Investing Corp., filed with the SEC an application (File 70-169) under the Holding Commany Act in connection with a proposed plan to merge the companies and to permit the parent company to make cash advances to other of its subsidiaries.
Florida Public Service Co., a su.sidiary of Southeastern Electric & Gas Co. also filed an application (File 70-110) regarding the issuance and private sale of \$2,750,000 of 4½% serial debentures, due 1943-1955, to the John Hancock Mutual Life Insurance Co., at 100 and accrued int. The proceeds are to be used for the redemption on or before July 27, at 100 and accrued interest, of a like amount of 5% serial debentures, due 1940-1947. all of which are owned by Southeastern Investing Corp.
Southeastern Investing Corp, will use the funds so received to repay a loan to the Chase National Bank of New York in the amount of \$1,100,000.
The remaining \$1,650,000 will be paid to Southeastern Electric & Gas Co. on account of the 5% convertible obligations of Southeastern Investing Corp, due the parent company.
Southeastern Electric & Gas Co. and Southeastern Investing Corp. Southeastern Electric & Gas Co. and Southeastern Investing Corp. Southeastern Electric & Gas Co. and Southeastern Investing Corp. Southeastern Electric & Gas Co. and Southeastern Investing Corp. Southeastern Electric & Gas Co. and Southeastern Investing Corp. Southeastern Electric

parent company.—V. 150, p. 3065.

Southeastern Gas & Water Co.—Delistina Hearing—
Hearing on application of the company to withdraw its 6% first lien gold bonds, due 1941, from listing and registration on the Chicago Stock Exchange will be held by the Securities and Exchange Commission on Aug. 14. The application states, among other things, that there has been no trading in the bonds on the Chicago Stock Exchange since 1931, and that due to the present unsatisfactory financial condition the company is making every effort to avoid expenses incurred by the continuance of the listing and registration of the bonds on the Exchange.—V. 150, p. 3989.

Weekly Uutput—
Electric output of the public utility operating companies in the Standard Gas & Electric Co. system for the week ended July 6, 1940, totaled 112,058,-128 kwhs., as compared with 103,661,352 kwhs. for the corresponding week last year, an increase of 8,1%.—V. 151, p. 114.

Standard Oil Co. of California (Del.)—New President-

Directors elected H. D. Collier President on July 8 to succeed W. H. Berg, who died recently. Mr. Collier joined the company in 1903 in Seattle as a salesman.—V. 151, p. 114.

Standard Oil Co. (N. J.) - Six Months Earnings Estimated at \$85,000,000-

The company agreed with the New York Stock Exchange last fall to make a six month's statement of earnings as soon as possible after midyear, such statement to incorporate an estimate of items not definitely ascertainable. At the annual meeting on June 4, President W. D. Farish was asked by a shareholder about current earnings. He then said that he had "a pretty good" estimate of the earnings for the first four months of 1940 and that if he were to venture a forecast of the business for May and June, for which they were no figures yet in hand, the earnings for the first half-year looked to be in excess of \$75,000,000.

Since the estimate given at the annual meeting, it has been impossible to maintain communication with representatives on the European Continent, so that for some months now no reports of business still being done in the various countries affected by the war have been received. The company has, however, received estimated returns for the month of May from companies located in the Western Hemisphere. Forecasting June, and including a proportionate allocation of estimated dividends to be received from the company's 50% interest in Standard-Vacuum Oil Co., indications are that the first six months' figures will be above those forecast five weeks ago, or approximately \$85,000,000.

It is not to be expected that the second half-year will produce any such earnings. Although in the United States the volume of sales has increased, profit margins have been reduced. In Europe the volume of business has recently been greatly curtailed. Exports both of crude and products have progressively declined. The company has been unable to learn what losses it has sustained because of military operations, but it is believed that inventory stocks, storage plants and refineries have suffered. No account of such losses has been taken into this estimate of the half-year's earnings

Considering all these factors, the outlook for the second half of the year is definitely less attractive.—V. 151, p. 114.

Balance Sheet Dec. 31, 1939 Balance Sheet Dec. 31, 1939

Assets—Mineral properties, at cost (less provision for depletion of \$148,573), \$48,422; plant and equipment, at cost, (less provision for depreciation of \$104,889), \$20,281; mining investments, at cost, \$97,908; cash, demand deposits, \$28,687; metal in transit (at net realizable value), \$4,808; marketable securities (at lower of cost or market), \$5,260; accounts receivable, \$7,051; supply inventory, (at lower of cost or market), \$5,514; deferred charges, \$1,674; total, \$219,606.

Liabilities—Notes payable, \$30,000; accounts payable, trade, \$4,866 wages payable, \$3,855; taxes accrued, \$2,447; earned surplus, \$178,438; total, \$219,606.—V.145, p. 2407.

Sterchi Bros. Stores, Inc.—Sales—
Net sales for the month of June, 1940 were \$481,807 as compared with 528,051 for June, 1939. This is a decrease of \$46,244 or 8.76% under me last year.

\$528,051 for June, 1939. This is a decrease of \$40,277 of 5.70% and June last year. Net sales for the six months ended June 30 this year were \$2,886,827 as compared with \$2,693,166 for the same six months of 1939. This reflects an increase of \$193,721 or 7.19% over the 1939 figure.—V. 150, p. 3838.

Sterling Aluminum Products, Inc.—Dividend—
Directors have deciared a dividend of 40 cents per share on the common stock, par \$1, payable July 27 to holders of record July 20. This compares with 50 cents paid on Dec. 11, last; 25 cents paid on July 10, 1939; 50 cents paid on Dec. 15, 1938; one of 45 cents paid on Dec. 29, 1937; 25 cents paid on Oct. 11, July 10 and on May 10, 1937, and an initial dividend of 25 cents per share distributed on Dec. 22, 1936.—V. 151, p. 115.

(J. B.) Stetson Co.—Bonds Called—
All of the outstanding 1st mige. s. f. 7% bonds due Aug. 1, 1943, have been called for redemption on Aug. 1 at 103. Payment will be made at the London. England, and Montreal and Toronto, Canada, offices of the Royal Bank of Canada.—V. 151, p. 115.

(Hugo) Stinnes Corp.—Extension of Notes Proposed-

(Hugo) Stinnes Corp.—Extension of Notes Proposed—
The \$2,010,500 10-year 7% gold notes matured as to principal and deferred interest on July 1, 1940. At that time there became payable thereon (a) current interest at the rate of 4% per annum for the six months ended July 1, 1940, or \$20 per \$1,000 notes: and (b) principal and deferred interest in the amount of \$1,220 per \$1,000 note. The current interest at the rate of 4% per annum has been paid to the joint paying agents (Halsey, Stuart & Co., Inc. and A. G. Becker & Co., Inc., New York and Chicago) and may be collected by noteholders against presentation of the appropriate coupons. The principal and deferred interest cannot be paid at this time because of conditions in Europe.

In order to protect the interest of its noteholders corporation has proposed a plan of extension which in the opinion of the management offers the best hope of ultimate payment of the notes. Noteholders are urged if they approve the plan to send their notes, accompanied by letter of transmittal properly filled out and executed, to Central Hanover Bank & Trust Co., agent of the corporation and depositary, 70 Broadway. New York.

The specific treatment under the plan to be accorded to each assenting \$1,000 note is as follows (notes of the denomination of \$500 each being given proportionate treatment):

(1) The time for payment of current interest thereon is to be extended to July 1, 1946 and payment of current interest thereon is to be continued at the rate of 4% per annum, payable semi-annually on Jan. 1 and July 1 in each year, such interest to be represented by coupons to be attached to the note.

(1) The time for payment of the principal of the note is to be extended to July 1, 1946 and payment of current interest thereon is to be continued at the rate of 4% per annum, payable semi-annually on Jan. 1 and July 1 in each year, such interest to be represented by coupons to be attached to the note.

(2) There is to be attached to the note a deferred interest certificate for \$400, payable July 1, 1946—\$220 representing the balance of the deferred interest certificate for \$400, payable July 1, 1946—\$220 representing the balance of the deferred interest certificate for the period from July 1, 1940 to July 1, 1946.

The deferred interest certificate is to provide that if and when restrictions imposed by German governmental authorities upon the corporation and its debtors on the acquisition and transfer of foreign exchange are removed, noteholders will be notified by the corporation of such withdrawal by publication and by written notice to known holders, and thereupon the noteholder is to have the right to have the deferred interest certificate detached by the American trustee and to have attached to the note in place thereof:

(a) Two interest coupons in equal amounts, representing together the sum of \$220 (being the unpaid balance of deferred interest due July 1, 1940 referred to above) plus interest at the rate of 3% per annum on the principal of the note from July 1, 1940 to the interest payment date next succeeding the distribution of the provided of the corporation of the payable six months, and the second one year, after the date of such official notice by German governmental authorities of the removal of such foreign exchange restrictions to July 1, 1946, the extended maturity date of the note from the interest apyment date next succeeding the date of official notice by the German governmental authorities of the removal of such foreign exchange restrictions to July 1, 1946, the extended maturity date of the note, payable semi-annually on Jan. 1 and July 1 of each year, so that thereafter the note will b

V. E. Chaney, President, in his report to stockholders states:
During 1939 and in January of 1940, Continental Telephone Co., a direct subsidiary, completed a number of refinancing transactions, whereby Continental Telephone Co. sold at face amount or at a premium the bond issues of its subsidiary companies owned by it. The proceeds of these sales

were applied to retire its outstanding bonded indebtedness. These refinancing transactions resulted in an improvement in the cash position of Continental Telephone Co. and should also enable the subsidiaries of Continental Telephone Co. to finance in a more direct manner the requirements for replacements and improvements in their properties when necessary.

Continental Telephone Co. to finance in a more direct manner the requirements for replacements and improvements in their properties when necessary.

Other subsidiary companies of Telephone Bond & Share Co. also completed financing and refinancing transactions during the year 1939 and early in 1940. The brincipal transactions were as follows:

(1) The Wabash Telephone Co, during 1939 refunded its outstanding issue of \$963,000 of 4½% first mortgage bonds by issuing 4% first mortgage bonds in the principal amount of \$1,000,000. The indenture of this new issue makes provision under certain conditions for the issuance of additional bonds for the conversion of certain exchanges to automatic equipment.

(2) The Durham Telephone Co. during 1939 issued an additional \$250,000 of 4% first mortgage bonds and \$50,000 additional preferred stock, the proceeds being used to fund capital additions made and to be made on account of the rapid expansion in the operations of the company.

(3) In Jan. of 1940 the Illinois Valley Telephone Co. issued \$600,000 of 4% first mortgage bonds, the proceeds being used to retire \$285,000 first preferred stock, to retire \$250,000 10-year notes payable and to provide the necessary cash to convert one of its exchanges from magneto to automatic equipment. The preferred stock and notes payable were held by Telephone Bond & Share Co.

(4) Texas Telephone Co. early in 1940, refunded its \$463,000 6% first mortgage 20-year sinking fund bonds by issuing \$500,000 4% bonds under an indenture which will permit the issuance of additional bonds under an indenture which will permit the issuance of additional bonds under an indenture which will permit the issuance of additional bonds under an indenture which will permit the substance of additional bonds under an indenture which will permit the issuance of additional bonds under an indenture which will permit the issuance of additional bonds under an indenture which will permit the issuance of additional bonds under an indenture which will permit the issuance

Taylorcraft Aviation Corp.—Files Amendment—
The corporation filed July 9 with the Securities and Exchange Commission an amendment to its registration statement stating that its 30,000 shares cum, conv. series A pref. stock would be offered publicly at \$10 a share. Principal underwriters are Hoit, Rose & Troster and Mackubin, Legg & Co.—V. 150, p. 4143.

(2) Corporation has agreed with Far Eastern Petroleum Co., Ltd. (a non-affiliated company) to make certain payments, including a maximum of \$18,000,000 payable quarterly when and as oil or other products are produced from certain foreign concessions, based on the quantities thereof so produced. At Dec. 31, 1939, under the latter obligation \$777.854 had been paid and a quarterly payment of \$312,200 was included in liabilities.

(3) Corporation and Socony-Vacuum Oil Co., Inc., have jointly and severally guaranteed \$15,000,000 1½ % notes due Oct. 2, 1944, of Colombian Petroleum Co., a corporation which they jointly control.

(4) The outstanding capital stock includes 20,182 shares held by a trustee for the benefit of certain employees.

Purposse—Net proceeds to be received by the corporation from the sale of the debentures due 1965 will amount to approximately \$60,369,280, exclusive of accrued interest and after deducting \$230,720 as the estimated amount of expenses payable by the corporation in connection with this issue. Such net proceeds are to be used, together with treasury funds of the corporation, to redeem on or about the 30th day after the issue of the debentures due 1965, at 103% and accrued interest, the \$60,000,000 of 3½% debentures now outstanding.

Transcontinental & Western Air, Inc.—Civil Aeronautics Board Denies T. W. A.— Iarquette Deal—

The Civil Aeronautics Board laid down July 3 a rule against transfer of air line certificates at "inflated or speculative prices."

Denying an application by Transcontinental & Western Air, Inc., to purchase Marquette Airlines, Inc., for \$350,000, the Board said that the price "would be more than 15 times the value of the tangible property to be transferred."

"It would be clearly adverse to the public interest, as defined by the Civil Aeronautics Act." the Board declared, "to allow a certificate of convenience and necessity to be treated as if it were a speculative security, to be sold by the holder to the highest bidder, or as if it were possessed of a value of its own

United States Steel Corp.—June Shipments— See under "Indications of Business Activity" on a preceding page.—V. 150, p. 3840.

United Stockyards Corp.—Delisting Hearings—
Hearing on the application of the corporation to withdraw its 70-cent cumulative convertible preferred stock (no par) from listing and registration on the New York Stock Exchange will be held before the Securities and Exchange Commission Aug 12. The application states, among other things, that since the security was admitted to trading on the exchange, the overthe-counter investment houses have almost entirely withdrawn their interest and activity in it. It further stated that the security "is decidedly lacking in sponsorship, inasmuch as such sponsorship, by the over-the counter investment houses has not been supplanted by sponsorship, or interest of New York Stock Exchange member houses,"—V. 150, p. 3840.

U. S. Cold Storage Co. (Chicago)—Bonds Called—

The above statement includes provisions for Federal and State income taxes in the approximate amount of \$365,000. Provisions of approximately \$615,000 would have been required except for such extraordinary deductions.—V. 150, p. 3840.

Waterloo Cedar Falls & Northern Ry .--Committee to Institute Foreclosure Proceedings—Receiver Appointed-

Institute Foreclosure Proceedings—Receiver Appointed—

E. V. Kane, chairman of the bondholders' protective committee in a letter dated July 3 states:

At meetings of the committee held on June 13 and June 20, 1940, it was unanimously agreed that the committee should institute foreclosure proceedings under the mortgage securing the 1st mortgage bonds, and proceed immediately with the formulation of a plan of reorganization. Accordingly, a bill in equity was filed in the U. S. District Court in and for Black Hawk County, Iowa, on June 29, and C. M. Cheney, President and General Manager of the company was appointed receiver.

As previously stated it was anticipated that no definite plan of reorganization should be formulated until actual results of the power change were available for at least one full year of operation. The present condition of the company however makes it possible to proceed at once, and the committee believes that such action is definitely in the best interests of bondholders. Any plan formulated by the committee will give due consideration to estimated savings anticipated from the power change, and an early consummation of a reorganization should enable the bondholders to regularly receive some return on their investment.

It is impossible to forecast accurately the length of time which may be required to consummate a plan of reorganization, due to the humerous problems which will arise in this connection, such as the approval of the courts and the Interstate Commerce Commission to those phases of the reorganization over which they have jurisdiction.

The most recent statement of the road, as of May 31, 1940, indicates a current position which should enable the company to meet the cost of reorganization, together with all payments required for the addition and betterment program now in process or immediately contemplated.

A comparison of the earnings and expenses of the first five months of 1939 and 1940 as as follows:

1940 \$557,374 451,265 1939 \$511,379 421,245 Total revenues_____Total operating expenses_____ Net revenues from operation_____*Taxes_____ \$106,109 24,720 \$90,134 23,724 \$81,389 1,760 \$66,410 Operating income______Non-operating income______

Gross income available for rentals, fixed charges. \$83,149 \$68,116

Gross income available for rentals, fixed charges, \$83,149 \$68,116

* Includes railroad retirement and unemployment insurances taxes. In connection with the foregoing earnings, it should be noted that normally between 70 and 75% of the railway's annual gross income is produced in the first five months of the year, and also that the operating expenses above include provision for depreciation of equipment only, while the committee contemplates that the plan of reorganization will provide additional charges in respect of depreciation of other property. The definite amount of the additional charges for depreciation cannot be ascertained until a study has been made of the property accounts and rates of depreciation for various items of property, which rates must receive the approval of the Interstate Commerce Commission.

The committee will bend every effort toward presentation of a plan of reorganization at an early date. If the plan is approved by the bondholders, it will be consummated as soon as is physically possible.—V. 149, p. 2710.

Waukesha Motor Co.—Extra Dividend-

Directors have declared an extra dividend of 15 cents per share on the common stock, payable July 31 to holders of record July 15. Regular quarterly dividend of 25 cents was paid on July 1, last.

Current dividend is subject to Wisconsin tax of 2.858%.—V. 150, p. 3682.

Wichita Falls & Southern RR.—Files Merger Program-

The company has applied to the Interstate Commerce Commission for authority to acquire all the properties of the Wichita Falls & Southern Ry. and the Wichita Falls Ranger & Fort Worth RR. The company now owns all the stock of the Wichita Falls & Southern and all the stock and bonds of the Ranger & Fort Worth, and operates the two properties under lease.

The two lines to be acquired and merged own a line of railroad extending from Wichita Falls to Dublin, Texas, a distance of 168 miles.—V. 146, p. 4134.

Wilcox-Gay Corp., Charlotte, Mich.—Stock Offered—Van Grant & Co., Detroit, Mich., are offering 37,640 shares of common stock (par \$1) at \$5 per share.

The offering consists of 6,640 shares outstanding and owned by Van Grant & Co., 16,000 shares outstanding and owned by certain stockholders, and 15,000 shares unissued under option to C. M. Wilcox and P. S. Gay.

Of the company's common stock (par \$1), 35,970 shares were publicly distributed subsequent to March 1, 1940, at \$2.78 per share, or \$99,996, Van Grant & Co. being the underwriter. Company is to make an offer to rescind such sales to original purchasers. Any such shares as to which the rescission offer is accepted will be reoffered to the public, probably through Van Grant & Co., at not more than \$5 per share.

Van Grant & Co., at not more than \$5 per share.

Van Grant & Co., on or about Nov. 24, 1939 acquired a 4% 15-year debenture in the principal amount of \$10,000 and 166 2-3 shares of company's stock (par \$10) then outstanding, for the sum of \$10,000. No allocation of the purchase price between the debenture and the stock has been made. Subsequently and on or about Mairch 15, 1940, 7, 500 shares of company's common stock (par \$1) were issued to Van Grant & Co. in exchange for the 166 2-3 shares. The 6,640 shares of stock owned by Van Grant & Co. and now offered are a part of the 7,500 shares so acquired.

Company—Corporation was incorporated in Michigan June 9, 1932. Company is engaged in the manufacture and sale of wireless record players, recording phonographs, combination radio and recording phonographs made and recording phonographs and combination radio and recording phonographs are manufactured and sold under the company's own name. Company's products are sold through independent distributors, approximately 100 in number, located throughout a large portion of the United States. There is no particular concentration of sales.

Company's plant and office in Charl

plant and is not owned in fee by the company. It is being purchased on a land contract. The total available floor space for plant and office is approximately 40,800 square feet.

COMMERCIAL EPITOME

Friday Night, July 12, 1940

-On the 8th inst. futures closed 1 to 5 points net Coffeehigher. Trading was light, though the market for Santos futures was firmer, influenced apparently by the prospect that quotas reportedly fixed by the Pan American Coffee Conference will ultimately spall higher coffee prices. definite word that quotas had been fixed was heard in New York, but over the week-end one news report filed from Brazil referred to Brazil's quota in a way that implied it was generally known here as being 9,300,000 bags. On the 9th inst. futures closed 2 to 4 points net lower. Transactions totaled 70 lots, all in the Santos contract. Most of the business was in the form of switches, principally. from July to September at eight points difference and July to December Traders were a bit disappointed at the news at 26 points. from the Pan American Coffee Conference in that definite export quotas were not announced and the plan appeared only in its formative state. However, there are many who have believed from the beginning that any export quota plan would be tied to the proposed Western Hemisphere cartel and consequently would have to wait on the coming Havana conference. On the 10th inst. futures closed 5 to 7 points net lower for the Santos contracts, with sales totaling 81 Twenty-one transferable notices were issued against July Santos contracts, bringing the total so far to 61. The spot month dipped 8 points to 5.66c., but the notices were stopped at that point. Two "A" notices were issued covering West African (Portuguese Angola) coffee. The balance of Santos months were 3 to 5 points lower in early afternoon trading. About 12,000 bags had been traded to 1 o'clock. In the actual market there was little news to report. routine trading was going on. The serious loss of markets in Europe would be the cause of further concession in price were it not for the contemplated plans to support prices and the possibility of an end of the war.

On the 11th inst. futures closed 4 to 5 points net lower for the Santos contract, with sales totaling only 8 lots. Trading was virtually nil, the trade apparently awaiting the Havana-Pan-American conference, believing that it might supply the clew to the question of export quotas agreed upon in principle by the Pan-American conference here just concluded, and, also the status of the hemisphere-cartel plan. Actuals were steady, with roasters picking up lots here and there. Today futures closed 1 point net lower for the Santos contract, with sales totaling only 3 lots. Santos coffee futures were unchanged to 1 point lower on only a few sales. The December value is but 10 points above the low made the middle of May, and 37 points above the top price paid early in June. Today was a notice day, but no notices were issued. Next day for tenders will be Wednesday, July 17th. Actuals were quiet and steady. Nothing further was heard regarding the Pan-American proposals. Traders were interested in the steps being taken by the United States State Department to insure an impartial meeting in Havana among the various American nations. Some believe coffee will be one of the first products discussed when it comes to talk of a hemisphere cartel.

Cocoa—On the 8th inst. futures closed 5 to 7 points net lower. Moderately heavy exchanging of Sept. futures for actuals featured an otherwise dull session. The actual commodity was taken for a total of 81 Sept. futures, transactions of 37 lots being done at 4.61c., and the balance at 4.62c. It was reported without confirmation that a leading manufacturer had taken most of the cocoa. Local closings July, 4.55; Sept., 4.63; Oct., 4.67; Dec., 4.76; Mar., 4.85; May, 4.94. On the 9th insta futures closed 1 point off to 1 point up. Transactions totaled 32 lots. Trading in cocoa futures was sluggish, only 22 lots changing hands to

early afternoon. At that time the market was 2 to 3 points higher, with Sept. at 4.67c., up 3 points. A scarcity of offerings, due to low prices, was the reason for the firmness of the market. Warehouse stocks decreased rather heavily overnight. The loss was 10,800 bags. It brought the total certificated stocks down to 1,071,547 bags compared with 1,420,364 bags a year ago. Local closing: Sept., 4.64; Oct., 4.67; Dec., 4.75; Mar., 4.86. On the 10th inst. futures closed 3 points off to unchanged. Transactions totaled 78 lots. Cocoa futures were steady during most of the session. Trading was dull, sales to early afternoon totaling only 55 lots. The steady tone reflected hedge covering following business done in actuals. Warehouse stocks decreased 5,000 bags. They now total 1,066,990 bags against 1,420,364 bags a year ago. Local closing: Sept., 4.62; Oct., 4.64; Dec., 4.74; Mar., 4.86.

On the 11th inst. futures closed unchanged to 1 point Transactions totaled 76 lots. Stalemate conditions in the cocoa market continued. Prices during early afternoon were 1 to 3 points higher. Sales to that time totaled only 35 lots. Neither producing interests nor consumers showed any interest in the proceedings. Warehouse stocks decreased 2,400 bags. They now total 1,064,506 bags compared with 1,418,564 bags a year ago. Cocoa arrivals continue to accumulate. Since the first of the year they have aggregated 2,076,156 bags, while to the corresponding time last year, they aggregated 2,753,768 bags. cently arrivals were fully a million bags under those of last year, they now are only 700,000 bags lower. In other words arrivals have picked up 300,000 bags over last year. Local closing: Sept., 4.62; Dec., 4.73; Mar., 4.85. Today futures closed unchanged to 1 point net lower, with sales totaling 106 lots. The stalemate in the cocoa futures market continued. Prices during early afternoon stood 1 to 2 points lower, with September selling at 4.59, off 3 points. was dull, sales to early afternoon totaling only 60 lots. A little scattered liquidation was absorbed by manufacturers, but most traders stood on the sidelines. Warehouse stocks decreased 2,200 bags. They now total 1,062,397 bags, compared with 1,414,892 bags a year ago. Local closing: Sept., 4.61; Dec., 4.73; Mar., 4.85; May, 4.93.

Sugar-On the 8th inst. futures closed unchanged to 1 point lower for the domestic contract, with sales of only, 52 World sugar contracts while somewhat more active than the domestic contracts, were weaker. September selling, which was entered through a Wall Street trade house with Puerto Rican producing connections and which was believed to be liquidation, forced a decline of 51/2 points in that month. The rest of the list followed the September trend to close 4 to 51/2 points net lower. There was nothing new to account for the world market weakness. Of the 129 lots traded in the world contract, 52 were outright in September at prices from .99c. to .94c. An additional 48 were effected in switches from September to March at 5 to 61/2 and to December at 5 points. On the 9th inst. futures closed 2 to 4 points net lower for the domestic contract, with sales totaling 87 lots. The world sugar contract closed 11/2 to 2 points net higher, with sales totaling 100 lots. Sugar markets showed mixed trends today. The domestic contract was heavy, due to light hedge selling of 1941 positions. During early afternoon March, 1941, was selling at 1.88c., off 2 points. About 3,000 tons had been traded to that time. off 2 points. About 3,000 tons had been traded to that time. The raw market was a little easier. Six thousand bags of Puerto Ricos were offered at 2.70c., to be cleared this week. August shipment Cubas could be had at 1.83c., equivalent to 2.73c. a pound duty paid basis. Refiners withdrew firm bids. The refined sugar market was flat but it was said that withdrawals against old contracts had improved with the warmer weather. Beet and offshore cane refined were in small demand at 4.15c. a pound. World sugar futures were stronger on news of sales of raws to European destinations. On the 10th inst. futures closed 1 to 3 points net higher for the domestic contract, with sales totaling 251 lots. The world sugar contract closed 6 to 5½ points net higher, with sales totaling 116 lots. The sugar markets were firm today. The raw sugar market was unchanged. Several additional lots of nearby raws became avialable at 2.70c. a pound. Offerings included 6,000 bags of Puerto Ricos clearing

July 18, 10,000 bags of Puerto Ricos clearing July 25, and 1,000 tons of Philippines due July 25. Refiners bid 2.70c. a pound for August sugar, but did not enter bids for July sugars. In the late session the world sugar market was very strong, influenced largely by good business in actuals. Russia and Great Britain, which appear to be the only European countries in the sugar market, were reported to have made additional purchases of Cubas and Perus.

On the 11th inst. futures closed 1 point up to unchanged for the domestic contract, with sales totaling 359 lots. The world sugar contract closed 3½ to 2½ points net lower, with sales totaling 79 lots. Sugar markets were mixed today. The domestic market acted as if oversold. Prices advanced 1 to 2 points in active trading in the Sept. position and switching of contracts by Cuban interests from that position into Mar. and May, 1941, at differences of 10 to 14 points respectively. Up to early afternoon 350 lots, representing 17,500 tons, had been done. The raw sugar market was quiet and unchanged. Two lots of nearby Puerto Ricos were on offer at 2.70c., with refiners willing to pay that price for Aug. sugars. Cubas for that position were at 1.83 to 1.85c. The United States Department of Agriculture reports a slightly smaller acreage planted to sugar beets this year—982,000 acres against 990,000 acres last year. Today futures closed 1 point net lower for the domestic contract, with sales totaling 128 lots. The world sugar contract closed 1 to 1½ points net lower, with sales totaling only 19 lots. The overnight announcement in Washington that deficits in sugar quotas this year would not be reallocated to other producing countries, caused an early rally in the domestic The overnight announcement in Washington that deficits in sugar quotas this year would not be reallocated to other producing countries, caused an early rally in the domestic sugar futures market of 2 to 3 points. However, buyers failed to follow the rise through, with the result that this afternoon's gains were lost, prices then standing unchanged. In the raw sugar market sellers raised their asking prices 3 points to 2.73c. for two lots of Puerto Ricos and one lot of Philippines due July 25. Two thousand tons of Philippines due Aug. 2 were held for 2.75c., while Cubas were quoted 2 points over Sept. futures. The movement of refined sugar has been good, according to reports in the trade. World sugar futures also lost early gains of about a point, standing unchanged at the end of the third hour. Only about 1,000 tons were sold to that time.

Cuban Sugar Production in Current Crop Year Above That of Last Season

Total sugar production in Cuba during the current crop year which ended May 30, 1940 amounted to 2,777,230 Spanish long tons (19,141,506 bags of 325 pounds each), compared with 2,721,492 tons (18,757,339 bags) produced during the 1939 crop year, according to the Cuban Sugar Stabilization Institute. This is learned from a report to the Department of Commerce from the American Consulate General at Havana, which goes on to state:

Exports of sugar during the period January to May 15, 1940 totaled 952,650 Spanish long tons compared with 996,091 tons during the corresponding period of last year. Shipments to the United States aggregated 703,114 tons during the 1940 period against 646,390 tons during the similar 1939 period, while exports to "world" markets amounted to 249,536 tons and 349,701 tons respectively during the 1940 and 1939 periods.

Stocks of sugar on hand in warehouses throughout Cuba aggregated 2,385,145 Spanish long tons on May 15, 1940, compared with 2,427,190 tons on the same day last year.

Lard—On the 6th inst. futures closed 5 points lower to 2 points higher. Trading was light and price fluctuations narrow. Hog prices at Chicago were 10c. higher. Sales ranged from \$6.50 to \$6.65. Western hog marketings today were light and totaled 14,200 head, against 8,775 head for the same day last year. On the 8th inst. futures closed 12 to 25 points net lower. The strength in hogs had very little influence on the action of lard futures at the start of the week at Chicago. Futures remained unchanged until a short while before the close. Heavy realizing developed, probably stimulated by the late weakness in grains. Receipts of hogs at the principal packing centers in the West today totaled 77,200 head, against 84,600 head for the same day a year ago. The forecast of a 10% drop in the 1940-41 pig crop is expected to result in 250,000,000 pounds less lard in the United States than during 1939-40. On the 9th inst. futures closed unchanged to 7 points lower. The market was fairly active today, with prices showing a steadier trend after the setback recorded on Monday. However, in the afternoon values eased slightly under light realizing, probably influenced by the lower action of grains. The opening range was 2 to 5 points higher, with prices later advancing 10 to 12 points over previous finals. Hog quotations at Chicago were mostly 25c. lower. Hog receipts at Chicago today totaled 23,000 head. At other Western centers receipts totaled 81,600 head, against 66,400 head for the same day last year. No lard clearances have been reported from the Port of New York in recent weeks and the recent large purchases by the United Kingdom have not as yet been reflected in exports. On the 10th inst. futures closed 2 points lower to 2 points higher. There was very little in the way of news to encourage heavy trading in either direction in lard at Chicago today and after declining slightly during the morning, the market rallied late in the session, and on the close values showed little net changes. Lard-On the 6th inst. futures closed 5 points lower to 2

Hog receipts at 11 markets, including Chicago, last week were 268,126 head. As a result of the heavier marketings than expected, prices at Chicago declined 10c. Hog sales today ranged from \$5.75 to \$6.65. Western hog marketings today including Chicago, totaled 69,800 head, against 45,700 head for the same time last year.

On the 11th inst. futures closed 2 to 5 points net higher. Trading was light and without special feature. The undertone of the market was steady during most of the session. Chicago hog prices closed 15 to 25c. higher. Hog sales ranged from \$6 to \$6.90. Receipts at the principal packing centers in the West totaled 57,400 head against 42,700 head for the same day a year ago. The forecast for a 10% reduction in hog supplies for 1940-41 compared with last season, and the fact that hogs have been running light in weight means that production of lard in 1940-41 will be considerably below last year, observers state. Today futures closed 7 to 12 points net lower. Lower grain markets and bearish news concerning hogs, influenced some liquidation of lard contracts, and the market showed little or no rallying power during the day.

Turpentine: 32½ to 34½. Rosins: \$4.15 to \$7.00.

Rubber—On the 8th inst. futures closed 5 to 37 points net higher. Transactions totaled 560 tons, including 180 tons which were exchanged for physicals. The market ruled quiet during most of the session, and reflected somewhat the inactivity of the spot market. Some shipment rubber was in, but little business was reported done. Spot standard No. 1-X in cases advanced to 21½c. per pound. Local closing: Old Contract: July, 20.70; Sept., 19.11; Dec., 18.30; Mar., 18.05. On the 9th inst. futures closed 9 points up to 5 points net lower. Transactions totaled 5 lots. Rubber futures were irregular. They opened 5 to 11 points lower under scattered dealer selling of July, which sold down to 20.60. Later, the market rallied when other dealer interests appeared as buyers. During early afternoon July was back to 20.70c., last night's closing price, while Sept. stood at 19.26c., up 15 points. The London market closed unchanged to ½d. higher. In Singapore prices were ½ to 3-16d. lower. Local closing: No. 1 standard, July, 20.70; Sept., 19.20; Dec., 18.25; Mar., 18.05. On the 10th inst. futures closed 20 to 10 points net lower. Transactions totaled 31 lots. Trading in rubber futures today was slow, with prices showing a sagging tendency. Indifference of factories to the market and more liberal shipment offerings at attractive prices were responsible for the easier tone. Cer-Rubber-On the 8th inst. futures closed 5 to 37 points with prices showing a sagging tendency. Indifference of factories to the market and more liberal shipment offerings

with prices showing a sagging tendency. Indifference of factories to the market and more liberal shipment offerings at attractive prices were responsible for the easier tone. Certificated stocks now total 240 tons. The London market closed quiet and unchanged. Singapore was unchanged to 1-32d. lower. Local closing: July, '20.50; Sept., 19.01; Dec., 18.15; Jan., 18.05.

On the 11th inst. futures closed 4 to 5 points net higher. Transactions totaled 50 lots. Rubber futures were quiet, sales to early afternoon totaling only 21 lots. Prices were firm, December standing at 18.20c., up 5 points, in early afternoon. The new standard contract opened 5 points higher to 10 points lower, but no sales were effected. Mixed dealer and commission house trading took place, featured by switches. The London market closed quiet, unchanged to 1/3d. lower. Singapore closed steady, unchanged to 1-16d. higher. Local closing: Sept., 19.05; Dec., 18.20. Today futures closed 20 to 25 points net higher. Transactions totaled 52 lots. Reports of better inquiry for actual rubber in the outside market and firmness in the Singapore market, contributed to the firmness of the rubber futures market's tone. Prices this afternoon were 15 to 18 points net higher, with September at 19.20c. Trading was slow, only 15 lots

changing hands to early afternoon. Ten tons were tendered on July contracts. Singapore was firm, closing 1-32 to 3.32d. higher. Local closing: Sept., 19.25; Dec., 18.45; Mar., 18.20.

higher. Local closing: Sept., 19.25; Dec., 18.45; Mar., 18.20.

Hides—On the 8th inst. futures closed 11 to 12 points net lower. Trading was light and without feature. Transactions totaled only 19 lots. Certificated hides decreased by 13,923 today to 763,775. There were 16,400 Chicago packer spot hides sold by Wilson at 10½c., 3,200 June native steers went at 11¾c., a gain of ½c., and Colorado steers, May take-off, at 10c., while June take-off sold at 10½c., a total of 12,000 pieces. There were 4,400 butt brands at 10c., June take-off, an advance of ½c. Local closing: Sept., 10.34; Dec., 10.53; March, 10.73; June, 10.93. On the 9th inst. futures closed 3 points net lower. Transactions totaled 24 lots. The opening range was 10 to 5 points higher. This was followed by a sagging tendency. Transactions amounted to only eight lots during the morning session. Certificated stocks decreased by 7,028 hides to 756,747 hides. In the domestic spot markets sales totaled 16,400 hides, including June butt branded steers at 10¾c. Also 4,000 June steer hides sold at 10¾c. a pound, a steady price. Sept., 10.31; Dec., 10.50; March, 10.76; June, 10.96. On the 10th inst. futures closed 15 to 14 points net lower. Transactions totaled 66 lots. Raw hide futures opened 6 to 10 points lower. Prices were easy during most of the session and closed slightly above the lows of the day. September at one time sold at 10.15, off 16 points; December at 10.35, off 15 points. Transactions up to early afternoon totaled 32 lots. In the domestic spot market sales totaled 14,950 hides, including June-July light native cows (River Points) at 12¾c., and June Colorado steers at 10¼c. Local closing: Sept., 10.16; Dec., 10.36.

On the 11th inst. futures closed 11 to 14 points net lower. Transactions totaled 55 lots up to early afternoon. The initial rise was ascribed to an advance of ¼ of one cent in spot hides. Local closing: September sold at 10.05, off 11. Transactions totaled 55 lots up to early afternoon. The initial rise was ascribed to an advance of On the 8th inst. futures closed 11 to 12 points net

Ocean Freights—Business in the freight market in general showed a marked improvement during the latter part of the week. Charters included: Grain: Australia to North Atlantic, \$15.50 per ton. Plate to North Atlantic, \$9 per ton (heavy grain), basis Buenos Aires. Scrap Iron: Atlantic range to Japan, \$14.25 per ton. Gulf to Japan, \$14.50 per ton. Pacific Coast to Japan, \$13.50 per ton. West Indies to Japan, \$15 nominal. Time: Two to three months Pacific trading, July; \$3.75 per ton. Round trip Far East trade, delivery Hatteras, July. Round trip Far East trade, delivery Hatteras, prompt loading. Steamer reported "gone" period, no other details given. West Indies or Canadian trade, \$3 per ton. North of Hatteras-South African trade, \$3.50 per ton. North of Hatteras-South American trade, \$3 per ton. Round trip Pacific trade \$4 per ton. Trip down, Canada to North of Hatteras, early August, \$3.25 per ton. Round trip, Canada-West Indies trade, July, \$3.75 per ton. Two to four months, West Indies trade, July, \$3.50 per ton (incomplete yesterday). Round trip Far East trade, July, \$4.50 per ton (incomplete yesterday).

-With an increase in orders and inquiries in anticipa tion of another seasonal step-up of 10c. a ton in prices on July 15th, the Pennsylvania Anthracite Emergency Committee has fixed coal production for the week July 13 at 960,000 tons, equal to four days' working time. Production in the preceding week was set at 480,000 tons, in the June 29 week at 720,000 tons, in the week of June 22, at 960,000 tons. Operators have notified the trade that another monthly step-up of 10c. a ton on domestic sizes is to be made as scheduled on July 15th, making the third of such monthly step-ups since the spring reduction of 50c. a ton was made on April 15th. Additional increases of 10c. per ton will be made on Aug. 15th and Sept. 15th, which will recover the amount of the spring reduction. of the spring reduction.

Wool Tops—On the 8th inst. futures closed barely steady at 8 to 24 points net lower. Forward positions showed the greatest weakness. Spot tops were unchanged at 99c. a pound. Sales in the futures market were estimated at about 85 lots, or 425,000 pounds. Local closing: July, 93.0; Oct., 88.8; Dec., 86.8; Mar., 86.1; May, 85.0. On the 9th inst. futures closed 4 to 2 points net higher. Transactions totaled 175,000 pounds of tops up to noon, according to reports from the trade. Total sales for the day were estimated at 55 lots. At 99c. the spot price was unchanged. Local closing: July, 93.0; Oct., 89.2; Dec., 87.2; Mar., 86.3; May, 85.3. On the 10th inst. futures closed 4 points up to 2 points down. Wool top futures were moderately active and steadier today. Estimated sales were about 55 lots, about the same as the previous day. The spot price at 99c. a pound was unchanged. Advices from Boston stated that the only wools moving in that market appeared to be those sold against Wool Tops-On the 8th inst. futures closed barely steady

Government orders. New business in the East and in the West was practically nil. Local closing: July, 93.4; Oct., 89.0; Dec., 87.0; Mar., 86.3; May, 85.3.

On the 11th inst. futures closed 24 to 7 points net lower. More aggressive liquidation of July in wool top futures resulted in a break of 24 points in that month to 9.10c. to-day, while the later months were off 7 to 10 points. Spot and local commission houses were offering in moderate volume and the only demand was of a scale down character entered for the account of Boston interests. The spot price at 97½c. was 1½c. lower. The wool market in Boston was showing no change from the dulness that prevailed earlier in the week. Quotations were showing little change, but they were largely nominal because of the lack of opportunities to trade. Graded combing three eighths and one quarter blood fleeces tended slightly easier on small sales at prices in the range 39c. to 41c. in the grease. Good French combing length fine territory wools in original bags were quoted at 80c. to 83c. scoured basis by Boston houses but offerings of similar wools by country dealers were reported at prices soc. to 83c. scoured basis by Boston houses but offerings of similar wools by country dealers were reported at prices irregularly lower than 80c. scoured basis, delivered to users. Local closing for wool tops: July 91.0; Oct. 82.2; Dec. 86.3; March 85.3; May 84.5. Today futures closed 12 to 1 point net lower. Wool top futures moved in better volume to-day, with most of the dealings consisting of switching from the October position to the near distant contracts. Prices opened October position to the more distant contracts. Prices opened easier and continued to sag in subsequent trading. Total sales on the New York exchange to midday were estimated in the trade at approximately 375,000 pounds of tops. Trading prices held within a narrow range throughout the session. Local closing: July 89.8; Oct. 88.0; Dec. 86.2; March 85.2; May 84.2 May 84.2.

May 84.2.

Silk—On the 8th inst. futures closed 4 to 2½c. net lower for the No. 1 contract. Transactions totaled only 220 bales, all in the No. 1 contract. Trade switching and local operations made up the bulk of the activity. The primary market reports were mutilated somewhat. What was readable showed Yokohama 15 yen lower to 11 yen higher on futures, while at Kobe futures were 33 to 17 yen higher. Grade D at Kobe advanced 10 yen to 1,380 yen. Spot sales to Kobe amounted to 225 bales, while futures transactions totaled 1,625 bales. Local closing: No. 1 Contract: July, 2.55; Aug., 2.54; Oct., 2.49½; Jan., 2.45; Feb., 2.44. On the 9th inst. futures closed 2 to 4½c. net lower. Transactions totaled 28 lots, all in the No. 1 contract. Heaviness of the Japanese markets, where prices were scraping bottom, caused the local silk futures market to open 3 to 5c. lower. Trading was largely confined to switching, with some liquidation in near months. Most operators were disposed to stay on the side-lines for the present. During early afternoon tion in near months. Most operators were disposed to stay on the side-lines for the present. During early afternoon the Sept. contract was quoted at \$2.48, off 2c. Sales to that time totaled 17 lots, all on the No. 1 contract. In the uptown spot market crack double extra silk declined 2½c. to \$2.55¼ a pound. Sixty bales were tendered on contract. The Yokohama Bourse closed 24 to 38 yen lower. Grade D silk in the spot market declined 12½ yen to 1,362½ yen a bale. Local closing: No. 1 Contract: Aug., 2.50½; Sept., 2.48; Oct., 2.45; Nov., 2.44½; Dec., 2.43. On the 10th inst. futures closed 1 point off to 1 point net higher. Transactions totaled 29 lots, all in the No. 1 contract. Moderate overnight demand sufficed to hold prices of silk futures firm. The market during early afternoon was 2c. higher, with Oct. quoted at \$2.47 and Dec. at \$2.45 on sales futures firm. The market during early afternoon was 2c. higher, with Oct. quoted at \$2.47 and Dec. at \$2.45 on sales of four lots, all on the No. 1 contract. The price of crack double extra silk in the uptown spot market was unchanged at \$2.55½ a pound. The Yokohama Bourse closed 3 to 11 yen higher. Grade D silk in the spot market declined 2½ yen to 1,360 yen a bale. Local closing: No. 1 Contracts: Aug., 2.51; Sept., 2.47; Oct., 2.46; Nov., 2.44½; Dec., 2.43; Jan., 2.41.

Aug., 2.51; Sept., 2.47; Occ., 2.12,
2.43; Jan., 2.41.
On the 11th inst. futures closed unchanged to 1½c. net lower. Transactions totaled 23 lots, all in the No. 1 contract. Raw silk futures were easier in sympathy with lower markets. In Yokohama prices hovered around the primary markets. In Yokohama prices hovered around the low levels of the season. Here Nov. No. 1 stood at \$2.43½, up 1 cent, and Feb. at \$2.40, unchanged, this afternoon. Sales to early afternoon totaled 11 bales. Ten bales were tendered on contract. The price of crack double extra silk in the uptown spot market declined ½c. to \$2.55 a pound. The Yokohama Bourse closed 11 to 17 yen lower. Grade D silk in the spot market was 2½ yen lower at 1,357½ yen a bale. Local closing: No. 1 contracts: Sept., 2.47; Oct., 2.45; Nov., 2.43½; Dec., 2.42½; Jan., 2.40; Feb., 2.38½. Today futures closed ½ to 1c. net lower. The market was a rather dull affair, with only 65 contracts traded. Local closing: No. 1 contracts: Aug., 2.49; Oct., 2.44; Nov., 2.42½; Dec., 2.41½; Jan., 2.40.

COTTON

Friday Night, July 12, 1940.

The Movement of the Crop, as indicated by our telegrams from the South tonight, is given below. For the week ending this evening the total receipts have reached 19,555 bales, against 27,653 bales last week and 40,690 bales the previous week, making the total receipts since Aug. 1, 1939, 7,083,335 bales, against 3,488,138 bales for the same period of 1938-39, showing an increase since Aug. 1, 1939, of 3,595,197 bales.

The exports for the week ending this evening reach a total of 6,859 bales, of which 3,187 bales were to Great Britain, 3,111 to Japan, and 561 to other destinations. In the corresponding week last year total exports were 20,203 bales. For the season to date aggregate exports have been 5,954,689 bales, against 3,277,713 bales in the same period of the previous season. Below are the exports for the week:

* Estimated.

Speculation in cotton for future delivery during the past week did not show any spectacular changes. Trading has been relatively light and fluctuations continue narrow. There has been little in the news to serve as an incentive for large operations either way. Southern spot markets show a falling off in demand.

for large operations either way. Southern spot markets show a falling off in demand.

On the 6th inst. prices closed 8 points net lower for the July delivery, while the later deliveries finished the session at net gains of 6 to 10 points. The latter were the best levels of the day. Further July liquidation in contrast with demand for new crop months, resulted in a sharp narrowing of the July cotton futures premium in the local market today. As a result of the weakness of July, that month closed at a premium of only 33 points over October, compared with 51 points Friday and a recent wide spread of 107 points. The decision this week of July longs to liquidate the remainder of their holdings, seemed to be responsible for the downturn in the near month, in which trading interest centered. There were reports in the trade that Southeastern spot interests long of cotton had obtained actual supplies in the South and were disposed to sell out their July position. Some hedging in October was noted. As a result of Friday's near month liquidation, open interest in old and new contracts in July was reduced by 28,500 bales, leaving a remaining open interest of 74,200 bales in these two positions. On the 8th inst. prices closed 7 points higher to 6 points lower. The opening range was 8 to 12 points net higher. The July position was firmer, due more to technical strength after recent drastic liquidation than to any impressive buying. The advance in new crops brought out more hedge selling through leading spot houses. The weather over the week-end was construed as unfavorable. There were unwanted rains in the central and parts of the Eastern belt. Private reports in the trade indicated crop damage in the central valley. The Government acreage report hardly caused a stir in the market. It showed that there were 25,077,000 acres planted to cotton, an increase of 1.6% over last year. It was estimated that a 5-year average yield an acre would produce a crop of 11,599,000 bales. Washington failed to confirm any of the recent rumors

bales, against 9,265 bales on Saturday and 3,330 bales a year ago.

On the 9th inst. prices closed 20 to 23 points lower on the July contract, but 7 to 8 points lower on other months. Continued liquidation in the July position and uncertainty regarding the Government loan price for the new crop season, disturbed the local cotton market today. Early Liverpool cables had no influence on the market, because of the small foreign interest here. Bombay prices were slightly higher. The local market opened 3 to 10 points lower and continued to move in a narrow range for all the new crop months, but the July position turned weak. July sold down to 9.60c. for old contracts, off 25 points, and new July at 9.80c., off 30 points. The market for July is rather thin, because there remains but about 50,000 bales open interest. Meanwhile, the certificated stock was increased 1,390 bales to 42,273 bales. There were 10 July notices issued in New York and 25 in New Orleans, and they were all reported stopped by the same interests who have been liquidating July. On the 10th inst. prices closed 9 to 12 points net higher. Buying of cotton, influenced by favorable weather reports—gave the market a decidedly firm tone today. Prices during early afternoon ranged from 9 to 17 points higher on new crop months, while old July stood 13 points higher, reflecting scattered demand from the trade and local short covering. New crop positions were 2 to 3 points higher. Trading was limited to a narrow range. Price fixing by mills furnished the chief support of the market, while hedge selling and liquidation credited to the South, provided the offerings. A certain amount of switching was in evidence. Information from Texas spot cotton circles state that demand for the staple is at a low ebb.

On the 11th inst. prices closed 5 to 3 points net higher. The cotton market idled along at a slightly higher level than last night's close prices dwing couly afternoon stand.

staple is at a low ebb.

On the 11th inst. prices closed 5 to 3 points net higher. The cotton market idled along at a slightly higher level than last night's close, prices during early afternoon standing one point higher on old July, and four to five points higher on new crop months. The market was steady on the opening, but failed to follow yesterday's rise through. Initial prices were two to five points above the previous close, but after the opening July began to ease off under further liquidation. The old July position will expire in a week. Open interest this morning was down to 37,800 bales net. It looks as if the exit of the position will be orderly. Certificated stocks of cotton have been increasing. This morning they totaled 43,808 bales. A Southern spot house writes that spot cotton demand from mills in the Eastern belt has been small. The disposition is to substitute qualities in an effort to reduce carryover in the consuming establishments to a minimum.

ties in an effort to reduce carryover in the consuming establishments to a minimum.

Today prices closed three points lower to two points higher. Today's cotton futures market was an uninteresting affair, due to lack of interest. Prices fluctuated within a narrow range, standing one point higher to one point lower during early afternoon. The opening was quiet, trading failing to lift the market out of its rut. Southern spot firms offered cotton for sale while mill accounts were buyers. Firmness of the July position was a feature. It sold at 9.75, up five points. On the other hand, new crop months were about a point lower because of light hedge selling. Steadiness in the Bombay and Liverpool markets may have influenced sentiment here. Trade firms continued the best buyers after the opening, while spot houses were sellers of October. Demand and supply continued pretty evenly balanced, with the result that the price movement was quite narrow. Prospects of a higher loan rate tended to hold selling in check, although traders felt that the situation is not fundamentally bullish.

The official quotation for middling upland cotton in the New York market each day for the last week has been:

July 6 to July 12—

Sat. Mon. Tues. Wed. Thurs. Fri. Middling upland % (nominal)... 10.71 10.60 10.48 10.58 10.58 10.58 10.50 Middling upland 18-16 (nom1).10.91 10.80 10.68 10.78 10.78 10.70 Premiums and Discounts for Grade and Staple—The firms offered cotton for sale while mill accounts were buy-

Premiums and Discounts for Grade and Staple-Premiums and Discounts for Grade and Staple—The table below gives the premiums and discounts for grade and staple in relation to the base grade. Premiums and discounts for grades and staples are the average quotations of 10 markets designated by the Secretary of Agriculture.

Old Contract—Basis Middling 1/8-inch, established for deliveries on contract on July 18, and staple premiums represent 60% of the average premiums over 1/8-inch cotton at the 10 markets on July 11.

New Contract—Basis Middling 15-16 inch established for

New Contract—Basis Middling 15-16 inch, established for deliveries on contract on July 18, and staple premiums and discounts represent full discount for ½-inch and 29-32-inch staple and 75% of the average premiums over 15-16-inch cotton at the 10 markets on July 11.

Agricultural Department's Report on Cotton Acreage -The Agricultural Department at Washington on July 8 issued its report on cotton acreage as of July 1. This report

issued its report on cotton acreage as of July 1. This report placed the acreage of cotton in cultivation in the United States on July 1 as estimated by the Crop Reporting Board at 25,077,000 acres, which is 1.6% more than the acreage on July 1, 1939. The report in full follows:

The acreage of cotton in cultivation in the United States on July 1 was estimated by the Crop Reporting Board to be 25,077,000 acres, which is 1.6% more than the 24,683,000 acres in cultivation on July 1, 1939, but 28.2% less than the 10-year (1929-38) average. If abandonment in 1940 is equal to the 10-year (1930-39) average percentage of abundonment, an acreage of 24,616,000 is indicated for harvest in 1940. This acreage is only slightly higher than the acreage harvested in 1939, but smaller than the cotton acreage harvested in any year since 1899 except 1938 and 1939. Total plantings are well below the Agricultural Conservation Program allotments, but some farmers whose plantings are in excess of their allotments will undoubtedly remove excess acreage.

The change from 1939 in the total cotton acreage us smal for the United States as a whole, and in most of the important cotton-producing States. In Georgia, Alabama, Missispipi and Arkansas the acreage is estimated to be the same as last year. In Texas, there was an increase of 1%; in South Carolina and Tennessee, 2%; in Louisiana, 3%; and in Oklahoma, 4%. An increase of 10% took place in North Carolina, however, where a shift from tobacco to cotton has taken place. This shift in 1940 offsets a shift from cotton to tobacco in 1939. In New Mexico, the acreage in cultivation increased by about 14%, and in California, by 4%. A substantial increase of 20% is shown in Arizona, largely as the result of the material increase in the acreage of long-staple, American Egyptian cotton.

The acreage of American Egyptian cotton increased in New Mexico The acreage of American Egyptian cotton increased in scattered localities throughout the cotton Belt The acreage in cultivation in 1940 is given at 2

COTTON REPORT AS OF JULY 1, 1940

The Crop Reporting Board of the Agricultural Marketing Service, from the reports and data furnished by crop correspondents, field statisticians, the Agricultural Adjustment Administration and cooperating State agencies, makes the following estimate of cotton acreage in cultivation Jury 1, 1940. United States acreage in cultivation, total, 25,077,000 acres. United States acreage in cultivation compared with last year, 101.6%.

State	10-Yr.Aver Abandonm't	A	creage in Cr	litivation Jul	y 1

Returns by Telegraph-Telegraphic advices to us this evening denote that sunshine is needed in the northern portion of Texas. Progress, however, has been mostly satisfactory. In central northeast cool weather has been just right for weevil activity.

The above statement shows: (1) That the total receipts from the plantations since Aug. 1, 1939, are 6,847,665 bales; in 1938-39 they were 4,410,631 bales and in 1937-38 were 8,431,142 bales. (2) That, although the receipts at the outports the past week were 19,555 bales, the actual movement from plantations was nil bales, stock at interior towns having increased 26,446 bales during the week.

Alexandria Receipts and Shipments—The following are the receipts and shipments for the past week and for the corresponding week of the previous two years, as received by cable:

Alexandria, Egypt, July 11	193	39-40	193	38–39	193	37–38
Receipts (cantars)— This week Since Aug. 1	8,4	1,000 147,054	7,8	13,000 394,643	10,3	16,000 350,312
	This Week	Since Aug. 1	This Week	Since Aug. 1	This Week	Since Aug. 1
Exports (bales)— To Liverpool To Manchester, &c To Continent and India To America	===	242,798 168,742 582,746 48,069	$\frac{4,700}{11,350}$	174,169 184,254 691,455 28,664	13,700	179,81 733,93
Total exports		1042,355	21,650	1078,542	17,850	1126,30

Note—A cantar is 99 lbs. Egyptian bales weigh about 750 lbs.
This statement shows that the receipts for the week ended July 11 were 1,000 cantars and the foreign shipments nil bales.

Manchester Market—Our report received by cable tonight from Manchester states that the market in both yarns and cloths is steady. Demand for yarn is poor. We give prices today below and leave those for previous weeks of this and last year for comparison.

BREADSTUFFS

Friday Night, July 12, 1940.

Flour—A moderate decline in flour prices followed the break in wheat futures the latter part of the week. Leading mills dropped bakery grades 10c. per barrel, while clears and rye were lowered by half that amount. Family grades were also reduced 10c. per barrel. Deliveries are reported to have picked up slightly the past few days, and while shipping instructions are far from the level which had been hoped for by this time, most mills expect to operate on a 14-day basis this week.

Wheat—On the 6th inst. prices closed ½ to ½c. net lower. Scattered rain in the spring wheat belt, where moisture is badly needed, and forecast of more precipitation possibly this week-end and later next week, depressed the wheat prices here today. Chicago wheat fell as much as a cent at times and closed at or about the lows of the day. Prices at Minneapolis, the principal spring wheat terminal, were off as much as 1½c. at one time. The 12 principal terminals received 4,500,000 bushels of wheat compared with 2,463,000 a week ago and 5,618,000 a year ago, this playing quite a part in the market's weakness. Mills were reported buyers in some instances. Some No. 2 red and No. 1 and No. 2 hard wheat sold at 80c. here, slightly under the loan rate. Chicago handlers received 24 cars and booked 33,000 bushels to arrive. About half the receipts represented new grain, most of which went into storage. Trade reports indicated about 600,000 bushels of Pacific Coast wheat had been sold to China under the Government subsidy program. On the 8th inst. prices closed ½ to 1c. net lower. The largest wheat marketings of the season and possibility of showers in the Northwest more than offset sensational crop damage reports from the spring wheat belt today and prices closed about a cent lower. Earlier in the session prices had advanced as much as 2c. on the basis of the pessimistic crop news. In the final hour, however, quotations tumbled 3c. from today's highs and closed ½ to 1c. lower than Saturday. Minneapolis prices fell to net losses of as much as 2c., but rallied slightly before the close. Scattered moisture was received over the week-end in both the domestic and Canadian spring wheat belts, but much more rain is needed. H. C. Donovan, crop expert, who traveled along the Red River Valley and in southeastern North Dakota, reported wheat has gone back fully 50% from the promise of two weeks ago, although there are some "reasonable" fields. Rain is urgently needed everywhere, he stated. On the 9th inst. prices closed ½ to 1c. net

and that after four days of high temperatures the wheat and corn fields needed general soaking rains urgently. On the 10th inst. prices closed ½c. lower to ½c. higher. Wheat prices fluctuated nervously over a range of more than a cent a bushel today, and closed with little net change for the session. Hedging sales, some rain mainly in North Dakota and Minnesota, and prospects of showers and cooler weather in the North American spring wheat belt offset pessimistic crop reports. Most traders confined operations to evening up of accounts pending release of the Government crop

in the North American spring wheat belt offset pessimistic crop reports. Most traders confined operations to evening up of accounts pending release of the Government crop report after the close. Many traders who expected the Government crop report this afternoon to show some deterioration of spring wheat, were on the buying side. This together with official figures showing moderately lower condition of wheat in Canada, brought about rallies that lifted prices as much as ½c. higher at times. Some selling came from hedgers, but there were reports of scattered mill buying, which tended to offset this.

On the 11th inst. prices closed 1¼ to 1%c. net lower. Rains, which grain men said gave much of the Nation's spring wheat crop a new lease on life, helped to depress wheat prices here more than 1c. a bushel today. Closing quotations were at or near the lowest levels since last Sept. 1. Hedging sales in connection with the movement of new winter wheat added to the market's selling burden, although this type of activity was restricted due to the fact that much grain is going into storage for Government loans. Official confirmation of larger harvests in important producing States like Kansas and Oklahoma also created trade bearishness. The Government's winter wheat crop estimate of almost 524,000,000 bushels represented a gain of about 125,000,000 bushels from the preliminary figure issued last December, an improvement which crop experts here regarded as phenomenal. It was 35,000,000 bushels greater than the forecast of just a month ago and figure issued last December, an improvement which crop experts here regarded as phenomenal. It was 35,000,000 bushels greater than the forecast of just a month ago and almost 25,000,000 bushels greater than the average of six private estimates released earlier this month.

Today prices closed unchanged to %c. lower. Wheat prices declined fractionally today and closed at the lowest level since the first day of the European war, last Sept. I. Solling came from dealers hadging new grain and from in

level since the first day of the European war, last Sept. 1. Selling came from dealers hedging new grain and from interests who based their action on improved moisture conditions in the domestic spring wheat belt. Earlier in the session forecast of clearing weather caused purchasing, which lifted values almost 1c. at times. Clearing weather in the spring wheat belt and receipt of little or no moisture after yesterday's rain, with prospects of rising temperatures, believed to strongly wheat prices. Cron experts evid that while helped to steady wheat prices. Crop experts said that while this week's moisture checked deterioration in many sections of the Northwest, continued good precipitation is needed. Because of high temperatures which usually prevail in July, and the early luxuriant growth of crops, more than normal moisture is needed, they said.

DAILY CLOSING PRICES OF WHEAT FUTURES IN WINNIPEG Sat. Mon. Tues. Wed. Thurs. Fri.

July 73½ 73½ 73½ 73½ 73½ 73½ 73½ 73½ 73½

Corn—On the 6th inst. prices closed 1c. to 13%c. net lower. Corn futures fell as much as 13%c. to 15%c. at one stage. This weakness was attributed largely to prospects of loosening up of supplies in view of the Government offer to permit farmers to redeem 150,000,000 bushels of 1937 and 1938 corn under loan substantially cheaper than the previous redemption rate. The redemption rate of 58c. for 1937-38 corn is expected to release corn whenever that price can be redemption rate. The redemption rate of 58c. for 1937-38 corn is expected to release corn whenever that price can be paid to the producer. Quotations are not far out of line, as No. 1 yellow brought 64½ to 65½c. here, but spot prices are well over futures. Harris-Upham & Co., grain firm, said this may result in marketing of some old corn, particularly from sections when the new corn prespects are good and sile this may result in marketing of some old corn, particularly from sections where the new crop prospects are good and crib space limited. On the 8th inst. prices closed ½c. to ¾c. net higher. The market dipped as much as 1c. in the early trading. A sharp decrease in corn receipts at principal markets helped to strengthen prices. The 12 terminals had only 498,000 bushels, compared with 1,077,000 a week ago. Grain men said the recent upturn of almost \$2 in hogs, restoring a more favorable feeding ratio might stimulate consump-Grain men said the recent upturn of almost \$2 in hogs, restoring a more favorable feeding ratio, might stimulate consumption and producers were believed to be holding back livestock. Farmers' reaction to the Government offer for redemption of 1937 and 1938 loan corn was awaited. On the 9th inst. futures closed unchanged to \$\frac{3}{2}c\$. higher. The market was unsteady during the early session. The subsequent firmness being attributed to strength of the cash market and failure of marketing to develop as a result of the Government concession on corn in storage under Government loan. On the 10th inst. prices closed \$\frac{3}{2}c\$. to 1c. net higher. Corn strength was attributed to reports of crop deterioration and failure of receipts to expand. Crop reports generally were bullish.

On the 11th inst. prices closed ¼ to 1%c. net lower. Helping to depress corn was the Government estimate of July 1 stocks on farms at 862,474,000 bushels, largest on record, although traders pointed out more than half this supply is sealed under Government loans. Today prices closed % to %c net lower. This market ruled heavy in sympathy with wheat. Rather favorable weather for corn also had a bearish influence. Open interest in corn tonight was 22,033,000 bushels.

DAILY CLOSING PRICES OF CORN IN NEW YORK

Sat. Mon. Tues. Wed. Thurs. Fri.

No. 2 yellow 77¼ 78 77½ 80 79¾ 79½

DAILY CLOSING PRICES OF CORN FUTURES IN CHICAGO

Sat. Mon. Tues. Wed. Thurs. Fri.

Oats—On the 6th inst. prices closed ¼ to ¾c. net lower. There was very little trading in this market, prices sagging in sympathy with the declines in other grains. On the 8th inst. prices closed ¼c. net lower. Trading was light and without feature. Shippers sold 62,000 bushels of oats. On the 9th inst. prices closed ¼ to ⅙c. net lower. Cash interests were moderate buyers, but the market was small. On the 10th inst. prices closed unchanged to ⅙c. higher. There was very little to the trading in this grain, though prices were steady.

On the 11th inst. prices closed ¾ to ⅙c. net lower. Oats

On the 11th inst. prices closed % to ½c. net lower. Oats reached new lows for the year despite shipping sales of 84,000 bushels. Today prices closed unchanged to ½c. higher. Trading was light and was devoid of special

feature.

Rye—On the 6th inst. prices closed 5%c. off to 1/4c. up. Trading was light and without particular feature. However, the market was relatively firm considering the weakness in wheat and corn markets. On the 8th inst. prices closed 3% to 5%c. net higher. The rye futures market was fairly active, though fluctuations were within a very narrow range. The undertone was firm. On the 9th inst. prices closed 1/8 to 1/4c. net lower. Trading was very light, and was without special feature. On the 10th inst. prices closed 3/4 to 1c. net higher. Rye strength was associated with unfavorable crop reports.

% to 1c. net higher. Rye strength was associated with unfavorable crop reports.

On the 11th inst. prices closed % to 1c. net lower. As a result of the slump in wheat and continued bearish weather and crop reports, rye futures fell off. However, in view of all bearish developments, the rye market was regarded as having held up relatively well. Today prices closed % to ¼c. net higher. The firmness of rye was in sharp contrast to the other grains, and was attributed to bullish weather and crop reports, which influenced considerable short covering.

Closing quotations were as follows:

All the statements below regarding the movement of grain—receipts, exports, visible supply, &c.—are prepared by us from figures collected by the New York Produce Exchange. First we give the receipts at Western lake and river ports for the week ended last Saturday and since Aug. 1 for each of the last three years. of the last three years:

Agricultural Department's Official Report on Cereals Agricultural Department's Official Report on Cereals &c.—The Crop Reporting Board of the United States Department of Agriculture made public late Wednesday afternoon, July 10, its forecasts and estimates of the grain crops of the United States as of July 1, based on reports and data furnished by crop correspondents, field statisticians and cooperating State Boards (or Departments) of Agriculture. We give below the report:

We give below the report:

Crops have made a good start and better-than-average yields are indicated by July 1 conditions, the Crop Reporting Board states. Reports on July 1 crop prospects average substantially higher than on the same date last year and nearly as high as two years ago; but yields are not expected to be as high as in those years—1938 and 1939—unless the weather during the growing season after July 1 should be equally as favorable. During the first 10 days of July rainfall has been reported to be deficient in most of the area from Illinois westward, and a large part of the South reports to much rain. much rain.

too much rain.

With the good yields now in prospect, total crop production is expected to be fully up to the average of the pre-drought years, and only slightly below production last year. But total crop production will not be as much above average as yields per acre because of the small acreage of crops being grown. After making an allowance for late plantings, for average abandonment of cotton, and for loss of other crops, the acregae to be harvested is expected to be only about 2% above the small acreage of last year and 3% below the average of the last 10 years—a period that includes the great droughts of 1934 and 1936. The acreage planted for harvest appears to be the fourth smallest since 1915. Potential crop production is also lessened by the reduction in the acreage planted to cotton and corn and the substitution of hay and legume crops of lower value per acre.

production is also lessened by the reduction in the acreage planted to cotton and corn and the substitution of hay and legume crops of lower value per acre.

While crop production has not been increasing in proportion to population, requirements and markets are changing, and stocks of some commodities are so large that supplies of major products are expected to be ample. Present indications are that the production of the various crops this year will give a well-balanced total that will permit utilization of some of the reserves on hand and add little to farm stocks, except hay.

Wheat production—estimated at 729,000,000 bushels—will be a little below average, but with a larger than usual carryover on farms from last year there will be about the usual supply. Production of rye and beans is expected to be about average, and substantially larger-than-average crops of rice, sugar and peanuts are in prospect. There will be about an average supply of potatoes and sweet potatoes, and somewhat more than the usual per capita production of rruits and commercial vegetables.

Tobacco production will probably be 30% below last year's record crop, but only 5% below average. Flaxseed was planted on a greatly increased acreage and shows good yield prospects. The July 1 indications point to a crop of nearly 29,000,000 bushels—more than double average production. The acreage in soybeans has also been increased—by more than a million acres, or 14%—and a large crop is probable.

Feed grain production still depends largely upon how favorable the weather is for corn, but judging from conditions on July 1, the combined production of corn, oats, barley and grain sorghums should be about 34.000,000 tons, or about 3% below production in 1938 and 1939. As reductions in the numbers of hogs and chickens are expected to reduce the total units of grain-consuming livestock on the farms about 4% during the current year, the prospective production of fedg grains would provide the usual utilization of grain per unit without drawing on the large

particularly good in the important northern dairy area from Wisconsin castward.

A larger-than-average production of the major fruit and nut crops is in prospect for the 1940-41 season, though combined production is expected to be smaller than last year. Larger crops of pears, plums and citrus fruits are expected to be more than offset by smaller production of commercial apples, peaches, grapes, cherries, pryunes, apricots, walnuts and almonds. Citrus crops from the 1940 bloom developed under favorable conditions in all important areas, and it now seems likely that total production may approach the record 1938-39 crop.

Commercial vegetable crops in areas that supply markets during July show an increase of 13% over last year's production. The increase is also 13% over the average of the past 10 years. Marked increases are looked for in the production of cantaloupes, tomatoes and watermelons. Lima beans, beets, carrots, sweet corn, lettuce, onions, pepppers and spinach are also expected to be available in larger quantities than a year ago. But lighter supplies of cabbage, celery, excumbers, eggplant and peas are indicated.

Northern areas that will begin harvesting vegetables in August show increases of late cabbage, late controlled.

are indicated.

Northern areas that will begin harvesting vegetables in August show horthern areas of late cabbage, late cantaloupes, cauliflower, cucuminereased acreages of late cabbage, late cantaloupes, cauliflower, cucumbers, peppers, and tomatoes. Acreages of intermediate cantaloupes that will be ready for harvest the last part of July, and late onions, are reported to be smaller than last year.

275

The 1940 acreages of vegetable crops for canning and processing is out 20% larger than in 1939 and almost 11% above the average of the

The 1940 acreages of vegetable crops for canning and processing is about 20% larger than in 1939 and almost 11% above the average of the past 10 years.

A review of the acreages in crops this year shows some important shifts between crops. The harvested acreages of cats and barley, and probably of grain sorghums, will be larger than they were last year, but the acreage of corn shows a further reduction of nearly 3%. The total acreage of these feed grains, though slightly higher than in 1939 and higher than in the two drought years, 1934 and 1936, is 7% below the 20-year average, and the third lowest during the last 30 years. There will be smaller acreages of winter wheat and rye than were harvested last year, but more spring wheat, and a little more rice. With flaxseed increased to more than 3,000,000 acres, the total acreage in all grains and flaxseed will be about the same as a year ago.

Potatoes show nearly a 2% increase and sweet potatoes an 8% decrease in acreage compared with last year, indicating about the same total acreage in the two crops. Tobacco shows a large reduction of 29% from last year's large acreage—a reduction of about half a million acres. Cotton, on the other hand, shows a 1.6% increase in plantings, and with average abandonment the increase at harvest time would be about half a million acres. Increases in the acreages of hay and forage crops and legumes appear to be general. With a 4% increase in tame hay, a 1% increase in wild hay, and a 27% increase intended in sweet sorghum cane for ferage, these crops together show a 5% increase over last year's acreage and a record high total. Likewise, the 13% increase in beans, the 3% increase in peanuts (excluding interplanted), and the largely increase plantings of cowpeas and soybeans, and probably of velvet beans, make it seem probable that the combined acreages of these legume crops harvested will show an increase of more than 1,000,000 acres, or more than 10%.

With conditions favorable in most areas the production of milk and than 10%.

than 10%.

With conditions favorable in most areas the production of milk and eggs continued heavy through June. On July 1 milk production per cow and egg production per 100 hens were reported substantially above average and only about 1% below previous high records for the date.

Wheat

Mheat

A 1940 wheat crop off 728,644,000 bushels is indicated by the July report of condition and probable yield. This is 3.5% less than both last year's crop of 754,971,000 bushels and the 10-year (1929-38) average production of 754,685,000 bushels. The July 1 acreage for harvest of all wheat is 52,680,000 acres, a net decline from last year of approximately 1,000,000 acres. There was an increase of nearly 2,000,000 acres in spring wheat and a decrease of nearly 3,000,00 acres in winter wheat.

The estimate of winter wheat production is 523,990,000 bushels, which is 7% lower than last year's crop of 563,431,000 bushels and about 8.5% below the 10-year (1929-38) average production of 571,067,000 bushels. This prospective production is being harvested on an estimated 34,922,000 acres, nearly 11% less than the average harvested acreage, but with an expected yield 5% above average.

Conditions were good for plant growth over most of the soft red winter wheat territory east of the Mississippi River, but rust and scab have developed and have reduced yield prospects considerably in the northern part of this section. However the indicated yields in most of the States, excepting in Delaware, Maryland and Ohio, where scab damage is reported, and in Indiana and parts of Illinois, where rust already has caused serious damage and further damage may occur to the late maturing began unevenly and late. This increased the threat of rust damage on the acreage that has been harvested yields and quality are generally good. In the area in Nebraska, Kansas and Oklahoma, where the final outcome of the crop has been the most uncertain, the continued improved sufficiently during May and June to warrant harvesting. However, shortage of precipitation and water reserves during June lowered yields in the Northern Plains section, and in the Mountain and West Coast States compared with 14.9 bushels last year and the 10-year average of 14.3 bushels. The July 1 harvested acreage is 34,922,000 acres, compared with 137,802,000 acres harvested i

winter wheat yield per narvested acre is now placed at 15.0 bushels. Compared with 14.9 bushels last year and the 10-year average of 14.3 bushels. The July 1 harvested acreage is 34,922,000 acres, compared with 37,802,000 acres harvested in 1939, and the 10-year average of 39,453,000 acres.

All spring wheat production (including durum) is estimated at 204,654,000 bushels. This compares with 191,540,000 bushels raised on a smaller acreage in 1939 and the 10-year (1929-38) average of 183,619,000 bushels. Yields per acre are expected to exceed average in all the important spring wheat producing States.

Rainy, cold spring weather delayed seeding in much of the Mid West area, but apparently did not prevent farmers seeding up to their March intentions. In parts of the Dakotas the straw is short and heads have been damaged by drought and excessive heat during June. Grasshoppers have hatched in large numbers, but are late compared with small grain crops, so that little damage is anticipated from this source. The large proportion of rust resistant varieties has reduced the probability of widespread damage from rust this year. The seeded acreage of all spring wheat is estimated at 19274,000 acres, 10.5% more than in 1939. July 1 conditions indicate an abandomment of 8.3%, leaving 17,758,000 acres for larvest. This is about 12% more than harvested last year and exceeds the 10-year average of 17,416,000 acres harvested by nearly 2%.

Production of durum whent in 1940 is estimated at 34,954,000 bushels. This compared with 34,360,000 bushels in 1939 and the 10-year average of 29,619,000 bushels. Yields are forecast below last year, but well above average, particularly in North Dakota, which has about four-fifths of the acreage and prospective production. The seeded acreage in 1940 was 3,554,000 acres. 11% above that of 1399, but 3% below the 10-year average of 154,000,000 bushels. Indicated by July 1 conditions, would leave 3,330,000 acres for harvest, which is 9% more than harvested in 1939 and 10% above the 10-year avera

Corn

A corn crop of 2,415,998,000 bushels is indicated by July 1 conditions. This production would be about 8% shorter than the 1939 crop of 2,619.-137,000 bushels, but 5% larger than the 10-year (1929-38) average pro-

duction of 2,299,842,000 bushels. July 1 prospects indicate a yield of 28.0 bushels per acre as compared with 29.5 bushels in 1939 and the 10-year (1929-38)) average yield per acre or 23.2 bushels per acre. In the corn belt and the Northeastern States planting was delayed first by dry and later by wet weather, with the result that most of the acreage in these sections of the country was planted 10 days to two weeks later than average. Insects and adverse weather caused more than the usual replanting. Wet weather from eastern Illinois through the Northeastern States prevented timely cultivation. The season to date has been cool and growth has been delayed. The cool weather has tempered the effects of continued shortage of moisture in the area comprising western Illinois. Southern Iowa and northern Missouri. Chinch bugs are numerous in this area. Grasshoppers constitute a serious threat to the crop in South Dakota, where infestation is centered in the main corn area of that State. The uneven prospects in the corn belt are offset to some extent by an increased acreage by hybrids which usually outyield open-pollinated varieties by 10% or more.

In most of the Southern and Western States indicated yields are above either last year or the 10-year average, with some States reporting the best prospects in years.

The acreage of corn for harvest is estimated at 86,306,000 acres. This is a decreage of 2.8% from the 88,803,000 acres harvested in 1939 and is 12.8% below the 10-year (1929-38) harvested acreage of 89,980,000. It is the smallest harvested acreage since 1894, when 80,069,000 acres were harvested and when corn acreage was still being expanded on new lands. In the corn belt where an average of about 60% of the total acreage of the United States was harvested, in the 10-year period 1929-38 and where 50% of the United States acreage is being grown this year, acreage changes vary from a decrease of 9% in Iowa and 7% in Illinois to slight increases in the Dakotas, Kansas, Wisconsin and Michigan. A reduction of 6% is

A 1940 cats crop of 1,031,622,000 bushels is indicated by July 1 condition. This is about 11% above the 1939 crop of 937,215,000 bushels and slightly in excess of the 10-year (1929-38) average production of 1,024.852,000 bushels. The forecast of yield this year is 29.8 bushels. compared with 28.3 bushels in 1939 and 27.4 bushels the 10-year (1929-38) average. Onto generally showed improvement during June in the East North Central group of States, but deteriorated in the West North Central group. Weather conditions were favorable for the crop in the Atlantic groups of States and the outturn in South Carolina and Georgia was better than expected. Rains at harvest caused some loss and reduced quality from Alabama west to Arkansas. In the East North Central States the stand is good, but the straw is so heavy that some lodging is feared. Much oats in the Dakotas, Nebraska, Montana, Idaho, Wyoming and Colorado is heading short on account of lack of moisture. The Kansas. Oklahoma and Texas crops are good. Hot dry weather is reducing prospects in Washington and Oregon. Except for some rust, conditions for the 10-year (1929-38) average harvest as grain this year is 34,585,000 acres. 4.6% above the 33,079,000 harvested in 1939, but 6.5% below the 10-year (1929-38) average harvest of 37,005,000 acres. The increase over last year's acerage amounted to 4.8% in the North Central group of States, which has over three-fourths of the total oats aceraze of the country. All the North Central States shared in the increase except Ohio, with a decrease of 4%. largely on account of wet soil at planting time. Missouri showed no change in acerage from 1939. Increases in the South Atlantic and Western groups. Abandonment, mostly in the South Atlantic and Western groups. Abandonment, mostly in the South Atlantic and Western groups. Abandonment, mostly in the North Atlantic States. There was practically no change in acerage in the South Atlantic and Western groups. Abandonment, mostly in the South Atlantic and Western groups. Abandonment,

Barley

Barley

A barley crop of 287.377.000 bushels in 1940 is indicated on July 1. This production would be about 4% more than the 276,298,000 bushels produced in 1939, about 27% above the 10-year (1929-38) average of 225.486,000 bushels, and has been exceeded only by the crops of 1928. 1930, and 1932.

Growing conditions have been favorable in most of the North Central States where more than 70% of the acreage is located, but less favorable in dryland farming areas of the Western States. Most of the crop in the winter burley area was at or near the harvest stage on July 1 with good yields indicated. Chinch bugs in Iowa and grasshoopers in several West North Central States are menacing, but hatched too late to threaten greatly the crop.

North Central States are menacing, but hatched too late to threaten greatly the crop.

A yield of 21.6 bushels per acre harvested is indicated by July 1 conditions. This is slightly below the 21.9 bushels per acre harvested in 1939, but exceeds the 10-year average of 20.6 bushels. Yields of winter barley are turning out better than expected.

The acreage seeded to barley was 14.779.000 acres, which exceeds the previous record set in 1939 by 1.6% and is nearly 17% above the 10-year average of 12.655.000 acres. With a loss of 10.1% of this acreage indicated by July 1 condition. 13.290.000 acres will be left for harvest, which is 5.5% more than in 1939, about 23% more than the 10-year average of 10.795.000 acres, and is exceeded only by the record of 13.526.000 acres in 1929.

While many States reduced their seeded acres of barley this year, among them such maior States as Wisconsin, Iowa, Minnesota, California, and others, increases in other major States such as the Dakotas, Nebraska, and Kansas, as well as in States of normally smaller acreages, more than offset these reductions. Because of lateness of the planting season some shift in acreage toward barley has been apparent; furthermore, barley is apparently gaining favor as a feed crop in both old and new producing areas.

Rue

A crop of 36.848.000 bushels of rve is in prospect this year, compared with 39.249.000 bushels last year and the 10-year (1929-38) average production of 38.095.000 bushels. Although yield prospects declined during the past month in North Dakota, which has the largest rve acreage of any State, and in several other States to the west, the indicated yield for the entire country is still half a bushel above the 10-year average. The indicated yield of 11.9 bushels per acre this year compares with 10.3 bushels last year and 10-year average of 11.4 bushels.

The acreage for harvest in 1940 is 3.086.000 acres, which is 19% less than last year and 5% below the 10-year average. All of the States with large acreages show declines from a year ago. Both the acreage and production of rye this year are the lowest since 1936.

In some of the North Central States where rainfall has been heavy the straw is unusually large and some lodeing has occurred. However, prospective yields in this area are well above average.

Potatoes

Total potato production in the United States in 1940, as indicated by e July 1 condition of the main crop and reported yields of early

potatoes, is 2% larger than production in 1939 and is 1% above the 10-year (1929-34) average production. Present indications point to a total crop of 371,263,000 bushels in 1940 compared with 364,016,000 bushels in 1939 and with the 10-year (1929-38) average of 366,949,000

potatoes, is 2% larger than production in 1939 and is 170 above in 10-year (1929-36) average production. Present indications point to a total crop of 371,263,000 bushels in 1940 compared with 364.016.000 bushels in 1939 and with the 10-year (1929-38) average of 366,949,000 bushels. The acreage of potatoes for harvest this year is estimated to be 3.087,400 acres, which is 2% larger than the 3,026,000 acres harvested in 1939, but 6% smaller than the 1929-38 average of 3.295,700.

Indications on July 1 point to an average yield of 120.3 bushels per acre compared with 120.3 bushels in 1939 and the 10-year (1929-38) average of 111.5 bushels per acre.

Total production of sour cherries in 1940 is now placed at 99,980 tons, which is about 1% smaller than the 1939 crop of 101,110 tons. Increases in Michigan and Wisconsin are more than offset by decreases in New York, Pennsylvania and Ohio. In the six western states an increase of 11% over last season is indicated for sour varieties. Most of this increase is in Washington and Utah. The indicated production of "sours" in Colorado is smaller than last year. A crop of the same size as last year is indicated in Oregon.

In New York, Pennsylvania, and Ohio there has been much dropping of fruit and cool moist weather has resulted in considerable brown rot damage. Prospects for both sweet and sour cherries declined sharply from June 1 to July 1 in New York, Prospects for sour cherrics are relatively more favorable in Chautauqua County and the Hudson Valley than in the Lake Ontario region, while for sweet cherries the outlook is more favorable in Chautauqua County and the Lake Ontario region than in the Hudson Valley. A good set of cherries is reported in Michigan, although the "sour" crop is somewhat variable in the important Grand Traverse region until late in July. A large crop is in prospect in Wisconsin. In Colorado the sour cherry crop was severely damaged by April freezes in the Ft. Collins, Loveland and Fremont County areas, but prospects are good in the important weste

heen very favorable for harvesting and cullage has been less than usual. In California production of both Royal Ann and shipping varieties has been light.*

Pastures

Improvement of pastures east of the Mississippi river during June more than offset declines in portions of the Great Plains, central Rocky Mountain and far Western States, so that the condition of farm pastures for the country as a whole on July 1 averaged somewhat above that a month earlier and the third highest for the date in the current decade. Cool weather and frequent showers in the Northern States east of the Mississippi afforded excellent conditions for growth of grass, and pastures in this area on July 1 averaged the best for the date in more than a dozen years. In the Western half of the country abnormally warm June temperatures accompained by only limited rainfall resulted in a rather general early curing of pasture and range feed with some decline in condition.

However, except for sections in the Central Plains and Eastern Rocky Mountain States, there appears to be generally sufficient feed for present livestock requirements. In a belt extending from eastern North Dakota southwestward to western Oklahoma and northern New Mexico, and including sections of adjacent States, pastures ranged from fair to poor, with an area of severe drought centering in south central Nebraska and northwestern Kansas.

As compared with July 1 a year ago, pastures in the southern New England and the central Atlantic States as far south as the Virginias were much improved, with condition in the important dairy States of Connecticut, New York, New Jersey, and Pennsylvania more than 20 points higher. Moderate improvement from a year ago was also noted in most of the East North Central States except Illinois, in South Dakota, in South Carolina, in Texas, and in scattered Western States including Wyoming, Colorado, New Mexico, Oregon, and California. On the other hand in several states pastures were not so good as on July 1 last year, particularly in Nebraska and

GENERAL CROP REPORT AS OF JULY 1, 1940

The Crop Reporting Board of the Agricultural Marketing Service makes the following report from data furnished by crop correspondents, field statisticians, and cooperating State agencies.

UNITED STATES

Crop	Harve	ested		•
			For	1940

Loans on Farm Stored 1937 and 1938 Corn Made Redeemable at 58 Cents-The Department of Agriculture announced on July 5 that farmers may redeem their loans on farm-stored 1937 and 1938 corn at 58 cents per bushel

U. S.__ 98,986 88,803 86,306 23.2 29.5 28.0 2,299,342 2,619,137 2,415,998

between July 5 and Oct. 1, 1940. This action, made possible, says the Department, when the Commodity Credit Corporation adjusted 1937 and 1938 corn loan redemption values from about 67 cents to 58 cents a bushel, places stored corn on the last three crops on virtually the same redemption basis basis.

In commenting on this action Secretary of Agriculture Wallace said:

This adjustment will strengthen the ever normal granary by enabling farmers to redeem their older corn for feeding to livestock and to retain in storage on their farms corn which was produced more recently and which has better keeping qualities. Redemption of 1937 and 1938 corn at approximately the same rate as that prevailing for 1939 corn is in accordance with the established policy of not selling corn locally for less than the loan value plus accrued charges for the current crop.

The Department's announcement also stated:

The Department's announcement also stated:

Many corn loan borrowers prefer to repay their loans on 1937 and 1938 corn and retain their 1939 corn under seal but have been discouraged from doing so by the fact that accrued charges against 1937 and 1938 corn amount to about 67 cents per bushel, while accrued charges against 1939 corn amount to only about 58 cents per bushel.

Farmers who redeem their 1937 and 1938 loan corn will be paid a storage allowance of seven cents per bushel for 1939-40 storage in case the allowance was not advanced to them for constructing additional storage facilities at the time they extended their loans last fall. Under original loan extension terms, this storage allowance was to have been paid only to farmers who delivered corn to the Corporation in settlement of loans at the close of the loan period.

Extended loans on both 1937 and 1938 corn mature Aug. 1, 1940. Under terms of the extension farmers agreed to provide storage on their farms until Oct. 1, 1940.

About 15,000,000 bushels of 1937 corn and about 135,000,000 bushels of 1938 corn were resealed on farms under corn loan extensions last fall.

Grain Futures Trading 41% Above Previous Fiscal Year—An increase of 41% in the volume of trade in grain futures on the Chicago Board of Trade during the fiscal year ended June 30 over that of the previous year was announced on July 2 by Dr. J. W. T. Duvel, Chief of the Amouncement that approximately 85% of all trade in grain futures in the United States is conducted on the Chicago Board of Trade. Trading in four principal grains (wheat, corn, oats and rye) totaled 8,832,000,000 bushels, an increase of 41% over the 6,235,000,000 total for 1939. The 1940 total, however, was only 71% of the 12,506,000,000-bushel average for the 10-year period 1930-39. Further details were given as follows in the announcement:

Wheat futures transactions increased 57%, from 4,372,000,000 bushels in 1939, to 6,850,000,000 bushels in 1940. Corn futures transactions decreased for the 1940 to 6,850,000,000 bushels in 1940. Corn futures transactions decreased for the second control of the second contr

were given as 10Hows in the announcement: Wheat futures transactions increased 57%, from 4.372,000,000 bushels in 1939, to 6.850,000,000 bushels in 1940. Corn futures transactions declined (the only one to decline) 12%, from 1.494,000,000 bushels in 1939 to 1.312,000,000 bushels in 1940. Oats futures transactions increased from 271,000,000 bushels in 1939 to 359,000,000 bushels in 1940, an increase of 32%. Rye transactions increased from 117,000,000 bushels in 1939 to 311,000,000 bushels in 1940, or 166%.

t and Wheat Flour Export Programs Con-Continuation into the 1940-41 fiscal year of the Wheat tinued—Continuation into the 1940-41 listal year of the wheat and wheat flour export programs was announced on July 2 by the Surplus Marketing Administration of the Department of Agriculture. The continuing programs, it is stated, will follow the provisions and plan of operation of the programs which have been in effect during recent months. The programs will be operative to assist exportation from the Pacific Northwest, to help meet the special problem of accumulated wheat surpluses in that area. The Department further announced: ment further announced:

Payments under the programs will be made in connection with exports of wheat from the Pacific Northwest to China, Hongkong, Dairen, the Philippine Islands and Europe; and for exports of wheat flour from that area to China, Hongkong, Dairen and the Philippine Islands. These are the same destinations as those for shipments under the program during

recent months.

As of July 1, contracts for export under the 1939-40 programs amounted to 35,079,356 bushels, of which 16,507,002 bushels represent wheat sold for export in the form of flour.

Weather Report for the Week Ended July 10-The general summary of the weather bulletin issued by the Department of Agriculture, indicating the influence of the weather for the week ended July 10, follows:

The week was characterized by persistently cool weather in Eastern and Southern States, although near its close there was a reaction to aboutnormal temperatures. In the Northwest and West warm weather persisted. Rainfall was frequent over a large southeastern area and showers were general in the Atlantic States, but much of the interior had but little rainfall.

sisted, Rainfall was frequent over a large southeastern area and showers were general in the Atlantic States, but much of the interior had but little rainfall.

The Lake region and upper Ohio Valley had about-normal warmth but elsewhere over the eastern half of the country the weekly mean temperatures ranged generally from 4 degrees to as many as 10 degrees subnormal. In the northern Great Plains the plus departures were substantial, while high temperatures continued west of the Rocky Mountains, with the week averaging from 4 degrees to 9 degrees warmer than normal. The West has had probably an unprecedented persistence of high temperatures. For example, for the last 36 weeks, beginning with November last year. Utah has had three weeks with below-normal temperatures, three exactly normal, and 30 above normal, many of them having plus departures of 8 degrees to 10 degrees or more.

Maximum temperatures during the past week were relatively low nearly everywhere east of the Mississippi River, but in the Great Plains, some high readings were reported, with a number of stations experiencing 100 degrees or above. A large far Southwestern area had high temperatures, the maximum reported being 115 degrees at Phoenix, Ariz., on the 4th.

Rainfall was heavy from the lower Mississippi Valley eastward, and in most of the Atlantic area. On the other hand, the Lake region, the Ohio and middle and upper Mississippi Valleys, and central and northern Great Plains had very little precipitation. There were some heavy local falls in the central Rocky Mountain section. The Far West had a practically rainless week.

Recent weather conditions have affected crops oppositely in different sections of the country. In the South, where June rainfall was heavy, frequent showers so far in July have been detrimental to agricultural interests to a considerable extent, especially in preventing the cultivation of row crops, which are becoming weedy. Dry, sunshiny weather is urgently needed throughout the entire South. On the other hand, good rai

and northwestward. Cultivated crops continue to make mostly satisfactory progress, but there is a general need of rain, especially for pastures. West of the Rocky Mountains dry weather is being increasingly felt, especially in the Pacific Northwest, where there has been no rain of consequence for a whole month. Some local areas in the central Rocky Mountain States had beneficial rains during the week.

SMALL GRAINS—With generally favorable weather conditions the harvest of winter wheat progressed rapidly during the week. Cutting has begun in northern Ohio and northern Illinois, and about one-half of the crop has been harvested in Iowa. In Kansas nearly ideal harvest weather prevails; about 90% of wheat had been cut at the close of the week in the eastern two-thirds of this State and 50% in the west. Farther north harvest was beginning to eastern South Dakota.

In the spring wheat belt conditions were less favorable, with the effect of the lack of moisture beginning to show, especially on light soil. In Minnesota the lack of rain in extreme western and northwestern counties has been unfavorable; some early seeded grain is beginning to turn color. In South Dakota there are scattered reports of heads filling quite well in the east, but some grain is being prematurely harvested where grasshoppers are menacing.

In North Dakota progress was poor to only fair, because of heat and drought, with the general condition variable, ranging from poor to good; some of the most favorable fields will need rain soon. In Montana spring wheat is heading and needing rain, with some local abandonment reported, while in Washington the crop had definitely deteriorated together with some late winter wheat. Reports on oats continue generally optimistic, although there is considerable chinch-bug damage in parts of the upper damage.

CORN—While rain would be helpful in much of the interior, especially from the Ohio Valley westward, the corn crop continued to make good to

Mississippi Valley; in Iowa some fields are being cut green to stop further damage.

CORN—While rain would be helpful in much of the interior, especially from the Ohio Valley westward, the corn crop continued to make good to excellent progress rather generally. Some local curling is reported from the western Ohio Valley and the Great Plains, but no permanent damage is yet in evidence. In much of the eastern belt, especially the Ohio Valley and more eastern States, temperatures were too low, especially at night, for good growth, but beneficial warmer weather set in near the close of the week.

In Missouri soil moisture is still ample and progress of corn good. Fair to good advance is reported from the southern Great Plains, although parts of Texas have persisted too wet. In the central Plains good advance is indicated, except for some deterioration in Nebraska. In Minnesota growth is reported as rapid. In Iowa progress is good, with most corn laid by and much is fence tall, with tassels showing locally; some chinchbug damage is reported locally in central and southern counties.

COTTON—In the cotton belt temperatures were abnormally low everywhere, with a continuation of frequent rains in central and eastern portions of the belt. In general, the weather was decidedly unfavorable, being too cool for good growth, too wet for cultivation in many places, and favoring weevil activity.

In Texas progress was poor in the central and northeast, where wet weather has prevented cultivation, with weevil activity favored, but in other parts of this State progress was mostly satisfactory; sunshine is needed, especially in the north.

In Oklahoma progress was fair to good, but the crop is late, with weedy fields in south-central and eastern counties; some blooming is reported. Throughout the central and eastern States of the belt sunshine and warmth are needed ba 'lv. The weekly progress of cotton was good only locally, and was generally poor to only fair; weevil activity was favored.

The weather bulletin furnished the follo

The weather bulletin furnished the following resume of conditions in different States:

COMMITTONS IN different States:

Virginia—Richmond: Subnormal warmth; sufficient rain, but scattered. Crops late, but good color. Pastures good. Cutting second alfalfa. Sweet potatoes excellent. Potatoes damages by dry weather. Threshing wheat and oats. Cotton nearly one foot high. Tobacco sets advancing nicely. Peanuts excellent stands. Apples sizing. Early peaches being larvested.

sweet potatoes excellent. Potatoes damages by dry weather. Threshing wheat and oats. Cotton nearly one foot high. Tobacco sets advancing wheat and oats. Cotton nearly one foot high. Tobacco sets advancing micely. Peanuts excellent stands. Apples sizing. Early peaches being harvested.

North Carolina—Raleigh: Progress of cotton poor account cold nights and too little sunshine. Condition and progress of corn good, due rains of 3d-4th. Moderately favorable for tobacco; fair progress harvesting in east. Sweet potatoes, peanuts and truck fairly good progress. Pastures excellent progress in west, fairly good elsewhere.

South Carolina—Columbia: Cloudy; windy; cold unfavorable for best growth. Too much rain locally in east, but more needed in places in west. Cotton bloom increasing in west; retarded in east; condition fairly west. Cotton bloom increasing in west; retarded in east; condition fairly crally good condition, except some of truck, surveits.

Georgia—Atlanta: Adequate rain in east, too much in west. Progress of corn good; condition, except some cellent. Progress of cotton good; moderately favorable in cast to very favorable in west for weevil; blooming freely and bolls abundant; large areas need cultivation. Rain rotting peaches. Too much rain for peanuts, watermelons and tomatoes in southwest. Peach curculio and mexican bean beed eactive.

Florida—Jacksonville: Favorable warmth; too much rain; soil moisture ample. Progress and condition of cotton fair; favorable for checking weevil; blooming and bolls forming. Corn maturing. Sweet potatoes, good growth. Truck scarce. Citrus good new crop sizing and holding well.

Alabana—Montzomery: Too cold; general rains daily; too much except locally. Cotton deteriorating; condition fair; grassy, and fruiting retarded. Corn, sweet potatoes, gardens and truck mostly fair. Pastures good.

Mississipp—Vicksburg: Nights too cold; cloudy; almost daily rain; totals excessive to locally flooding, with soil too wet to work; fields becoming raiss. Little farm work; considerable ac

fell; unfavorable for threshing in southeast. Rice satisfactory progress. Beans, cucumbers and truck crops satisfactory harvest.

Tennessee—Nashville: Progress of cotton poor account unfavorable cold; plants small; well cultivated; condition fair; warm days needed. Condition of corn very good; progress good; some grassy, much late. Slow progress harvesting winter wheat; condition mostly very good; too much rain locally. Hay crops good to excellent; unfavorable for haying. Tobacco good progress; stands uneven. Potatoes, truck and vegetables very good.

Kentucky—Lonisville: Heavy rain in southeast classical conditions.

very good.

Kentucky—Louisville: Heavy rain in southeast, elsewhere light to none; too dry in north-central; moisture sufficient elsewhere. Threshing; grain fairly dry. Oat harvest favored; near end. Tobacco mostly fair to good; small; some late settings poor and irregular. Condition of corn very good; progress fairly good; somewhat delayed by coolness; earliest tasseling; cultivating earlier plantings. Cutting second alfalfa crop; curing favored. Gardens fair to good; improving slowly. Pastures generally good. Cotton fair growth; too cool.

THE DRY GOODS TRADE

New York, Friday Night, July 12, 1940

The volume of post-holiday retail business during the period under review received an impetus through the advent of real summer weather in the early part of the week, which stimulated the sale of seasonal apparel lines as well as vacation and travel items. Another favorable factor was the continued improvement in industrial employment and the receiving larger busing power of the public under the continued improvement in industrial employment and the resulting larger buying power of the public, under the influence of the carrying out of the national defense program. Department store sales, the country over, for the week ended June 29, according to the Federal Reserve Board, increased 5% over the corresponding period of last year. New York and Brooklyn stores revealed a loss of 0.1%, but in Newark establishments a gain of 7.1% was

O.1%, but in Newark establishments a gain of 7.1% was shown.

Trading in the wholesale dry goods markets experienced a moderate seasonal revival, although it was noted that buyers generally limited their purchases to rather small quantities, preferring to await a clarification of both the domestic and foreign situations before entering the market for the bulk of their fall requirements. Prices ruled firm, notably for wash goods, sheets, towels, and blankets, but on the other hand, the anticipated general advance in percales failed to materialize. Business in silk goods was fairly active as more interest manifested itself in offerings for the fall season. Trading in rayon yarns continued to make a satisfactory showing. The slight drop in shipments during June was ascribed to requests for deferred deliveries encountered by some of the smaller producers, and predictions were made that a shortage of yarns may develop early in the fall, as many producers are reported to have booked their entire output for August, and also because the forthcoming vacation and plant repair period will cause a substantial curtailment in operations.

Domestic Cotton Goods—Trading in the gray cloths

Domestic Cotton Goods—Trading in the gray cloths markets continued in its previous desultory fashion, with seasonal considerations, such as inventory taking and vacation influences, proving an obstacle to any expansion in business. Despite the mild reaction in raw cotton values, cloth prices held fairly steady, however, predicated in the main on the belief that continued large Government orders in connection with the defense program will ultimately result in stimulating covering purchases by private interests. A feature of the week were reports that Great Britain was in the market for substantial quantities of duck. Business in fine goods remained inactive, and sales were restricted to occasional small fill-in lots for immediate delivery. Some interest was shown in combed fancies for spring, and Some interest was shown in combed fancies for spring, and an increasing amount of sample orders on fancy shirtings came into the market. Closing prices in print cloths were as follows: 39-inch 80s, 6½c.; 39-inch 72-76s, 6¾c.; 39-inch 68-72s, 5¼c.; 38½-inch 64-60s, 4¾c.; 38½-inch 60-48s, 4½c.

Woolen Goods—Trading in men's wear fabrics turned somewhat less active than heretofore, mainly under the influence of a mild reaction in the raw wool market. As influence of a mild reaction in the raw wool market. As a result, clothing manufacturers resumed their cautious attitude and limited purchases to immediate needs. Sentiment, however, remained cheerful as further Government purchases in connection with the defense program were received by producers. An increased call for lightweight materials made itself felt, following the advent of real summer temperatures in many sections of the country. Mill operations were further accelerated, under the impact of recent large army purchases. Reports from retail clothing centers made an improved showing as high temperatures served to hasten public purchases of hot weather apparel. Business in women's wear fabrics expanded moderately, and buyers showed more interest in fall offerings due to the expected enhancement in public purchasing power as a result expected enhancement in public purchasing power as a result of better industrial employment.

Foreign Dry Goods—Trading in linens remained inactive and, as heretofore, sales were confined to occasional small spot lots. The foreign supply situation is becoming increasingly serious, and reports concerning efforts of stimulating the growth of fiber flax in other areas, and the search for linen substitutes, continue to reach the market. Business in burlap had an irregular trend. After early firmness, due to a larger than expected reduction in Calcutta stocks during June, prices broke rather sharply under the influence of reports forecasting a record jute acreage for the coming season. Domestically lightweights were quoted at 5.15c., heavies at 7.30c.

Alabama—Current Fiscal Position Reviewed—The State debt of Alabama is analyzed and the efficiency of the State's present governmental set-up is reviewed, in an article written by M. H. Sterne, of Ward, Sterne & Co., Birmingham municipal dealers, which appears in the current issue of "The Southern Banker."

Canadian Tax System Revision Proposed-The recent report of the Canadian Royal Commission on Dominion-Provincial Relations, dealing with the country's fiscal structure, proposes to remodel a tax system that parallels the American system in several ways, the Federation of Tax Administrators pointed out on July 11.

Administrators pointed out on July 11.

The percentages of total taxes collected by the three levels of government in Canada, for example, stand in the same relation to one another as they do in the United States, the Federation said.

The Canadian national government in 1937—the year on which report figures are based—took in the largest amount of taxes, 47.4% of the total, compared with the United States Federal collections of 42.3% in the same year. The Canadian Provinces collected 21.0%, while the States in the United States took in 23.1%. Local government revenues in Canada amounted to 31.6%, while in the United States they totaled 34.6% of all taxes.

As in the United States, property taxes in Canada provide the largest single source of tax revenue. The Provinces, however, rely on them to a lesser degree than do the States in the United States.

Although the Canadian study is entirely on finance, the changes recommended would result in an actual redistribution of powers and duties between the Provinces and the Dominion, and would have far-reaching social and economic effects, according to the Federation.

Under the recommendations, the Dominion would take over the debts of the Provinces, and would be made responsible also for the relief of unemployed employables. To enable the National Government to meet the increased cost resulting from these transfers, the Provinces would give it a monopoly on the personal income, corporation and inheritance tax fields, and would also give up all existing subsidies received from the Dominion. The Dominion not only would assume responsibility for the provincial debts and for unemployment relief, but would make two new types of grants to the Provinces. "National adjustment grants" would be for the purpose of equalizing the levels of governmental services such as education, health and welfare, which the several Provinces now grovide in varying amounts. "Emergency grants" would provide temporary funds when they are needed because of abnormally poor economic conditions brough

Louisiana—State and Local Units Show Debt Decreases—In contrast with an increase of \$24,938,004 in the State of Louisiana's bonded debt in the year 1938, representing the last phase of the rapid-fire spending of the late Long-Leche-Maestri administration, the State debt in 1939 showed a net decrease of \$3,481,904, it was reported in the New Orleans "Times Picayune" of July 1.

"Times Picayune" of July 1.

These figures represent the net changes in the State funded debt including the city of New Orleans and all various subdivisions and agencies.

The total debt of the State and its subdivisions at the end of 1939 totaled \$379,244,391 as compared with \$382,726,295 as of Jan. 1, 1940.

The big net increase in the total State debt in 1938 of almost \$25,000,000 was only about \$3,000,000 more than the increase between 1933 and 1939. Thus more than 90% of the State debt was added in 1938 and more than 77% was accounted for in increases by four principal State agencies, the State proper, including the highway commission; Louisiana State University, the State board of education and the Charity hospital at New Orleans.

Municipal Bankruptcy Act Extension Applies to About 1,500 Governments—Approximately 1,500 cities, counties and other local governments will be authorized to take advantage of the extended "municipal bankruptcy" act which President Roosevelt signed on June 28, information from the Municipal Finance Officers Association showed

on July 9.

The current amendments to the municipal bankruptcy act make it possible for local governments, with the consent of creditors, to adjust their debts until June 30, 1942. The most significant change, according to the Association, is the inclusion of special assessment districts and county governments, hitherto omitted. The amended Act also specifies that the fiscal agent, attorney or other person promoting the composition of debts under the Act shall not receive double compensation for his services—that is from both the governmental unit and the bondholders.

The number of localities struggling with debt default is fewer by several hundred than it was when the Federal Municipal Bankruptcy Act was first approved in 1934, and almost 200 fewer than even a year back, exclusive of special assessment districts. This was shown in a survey made several months ago by "The Bond Buyer," municipal bond trade journal. As of Feb. 1, 1940, a total of 734 cities and counties were in default, while at that date in 1939 the number stood at 824. Six hundred school districts and 137 other districts—water, sanitation, &c.—were also listed as being in arrears with their bonded debt payments, although the actual number is probably much larger, the Association said.

As late as 1938, it was estimated that 3,100 local governments—about 2% of all the units in the United States—were in default. Only a few however, have reduced the principal of their debts, the Association said.

Not all defaulting governmental units settle their difficulties by applying the bankruptcy act, the Association pointed out. A number of them have taken advantage of the recent favorable interest rates on bonds and have provided for refundings and readjustments. The majority of defaults are adjusted by direct dealings between the interested parties. Other factors, such as "cash basis" legislation in New Jersey and improvemed economic conditions in Florida cities, have aided recovery in the worst default areas.

New Jersey—Municipalities Reduce Some Taxes But Increase Others—New Jersey's 566 municipalities have levied

taxes for 1940 which in the aggregate will be \$3,135,187 less than the 1939 levies, the State Chamber of Commerce reveals. However, while the municipal purpose tax levy is showing a downward trend, the total all-purpose levy, which includes municipal, county, State, school and other imposts, will be \$332,780 higher than in 1939.

Municipal taxes alone, against real and personal property aggregate \$114.278,529 for 1949 against \$117.413,715 in 1939. The total of all local government levies for the current year is \$259,036,032 against \$258,703,251 last year. The peak levy for the combined governments was \$260,413,615 and was set in 1931.

Nineteen of the State's 21 counties showed cuts in municipal-purpose levies of slightly less than \$6,000,000. These reductions were partly offset by municipal-purpose tax rises in Hudson and Mercer counties, according to report.

Governor Signs Bills Passed by Legislature—Governor Moore signed on July 8 a total of 23 bills which were passed during the closing hours of the legislative session and plugged the

the closing hours of the legislative session and plugged the gaps in the new Unemployment Relief Act, that was adopted over his veto, according to Trenton news advices.

Among the 23 measures approved by Governor Moore was the \$42,900.000 highway appropriation bill, which provides \$12,938.000 for financing new highway construction and \$5,519.000 for unemployment relief. Another bill empowered the State Highway Department to simplify highway route numbering. The Muir bill appropriated \$94,858.19 to reimburse school districts for one-half the excess cost of educating crippled children for the last year.

As a result of a decision by legislative leaders and State officials at a conference called in Trenton on the 8th by Governor Moore to devote an unexpended balance of \$300,000 to \$400,000 in 1939 State relief funds to relief projects, which will preserve the jobs of 8,000 to 14,000 persons, it is expected that no emergency session of the Legislature will be called this summer or fall. A demand had been predicted for a special session to appropriate money for the relief projects omitted from the unemployment Relief Act.

New Jersev—State Financial Outlook Termed Good. New

New Jersey—State Financial Outlook Termed Good—New Jersey's State government completed the fiscal year on June 30 with the expectancy that final reports will show a good financial outlook and the prospect that the new fiscal year will close in June, 1941, with a sizable balance in the State account and a drastically lowered State debt.

State account and a drastically lowered State debt.

State fiscal officers are unable to estimate definitely the State's present financial condition because final reports of spending and receipts have not yet been submitted by the various departments of State government.

At the close of business on June 29 State Comptroller Frank J. Murray reported that there was a cash balance of \$1,975.857 in the State treasury, or nearly \$500,000 more than was on hand at the end of the previous year. This balance is likely to disappear when final reports are submitted. Finance officers admit that the State will be lucky to break even because revenues are not reaching estimated heights and spending in some cases exceeded budgeted amounts.

The outlook for the close of the present 1940-41 fiscal year is better, nowever, because the State Legislature approved the Loizeaux Senate plan, which estimates a balance of \$4,500,000 in the treasury on June 30, 1941. This plan, prepared by a Senate committee under Temporary Senate President Charles E. Loizeaux, Republican, of Union, among other things, is supposed to "free" about \$10,500,000 in cash for State spending by shifting "frozen" assets in possession of the State government.

Meeting various large obligations such as relief, education deficiencies and other spending, the moneys would be secured by various transfers between the general State fund and the State highway system and teachers' pension and annuity fund.

The financial manipulations include the transfer of \$4,300,000 cash from the highway fund to the State fund in exchange for bonds held by the State fund; the "borrowing" of \$3,250,000 from the teachers' pension and annuity fund in exchange for other obligations which are due the State fund, and diversion of \$3,019,000 from the highway system fund to the State fund.

Financial officers explain that the plan encompasses transfer of funds not

and diversion of \$3,019,000 from the highway system rund to the State fund.

Financial officers explain that the plan encompasses transfer of funds not immediately needed to the hard-pressed general State fund, in exchange, in some cases, for assets of the State fund which cannot immediately be turned into cash.

The Loizeaux plan supplements the regular State and highway fund budgets, which total \$80,000,000. Spending plans of the New Jersey State government contemplate the raising of about \$108,000,000 and the spending of \$104,000,000 in the next 12 months.

The State gross bonded debt stands at \$149,396,000, which is a drop from the \$195,820,000 record high level set in January, 1935. According to present arrangements, the total debt of New Jersey may be reduced by by some \$30,000,000 more by next June 1, as this amount of bonds are scheduled for retirement during the current fiscal year.

New York State—Securities Held by State Now Put at \$559,553,122—The State now holds under the joint custody of Morris S. Tremaine, State Controller, and Mark Graves, President of the State Tax Commission, \$559,553,122 in bonds and other securities, the officials announced on July

bonds and other securities, the officials announced on July 10.

The amount was arrived at in the course of an independent physical count made by Meech, Harmon, Lytle & Blackmore, certified public accountants, of Buffalo.

It was indicated that in the last 10 years the account of these securities has more than doubled, the figures in June, 1930, being \$241,583,229. In 1936 the total reached \$443,474,342.

The greatest increase in any one fund was represented by the growth of securities invested on benalf of the State Employees Retirement System. In June, 1936, the total invested in that fund amounted to \$75,798,196. Whereas now the total is \$130,052,910.

Another fund that showed considerable increase was the State insurance fund, which grew from \$22,499,487 in June, 1936, to \$54,044,835 at present. The State Teachers Retirement System fund also showed an increase from \$62,401,720 in June, 1936 to \$93,458,244.

Of the total securities held in the joint custody of the Controller and the Commissioner of Taxation and Finance, \$115,123,186 represented collateral lodged with the State by various banks to secure State deposits.

New Bonds Made Legal Investments—Following the offering on July 10 of the \$60,000,000 3% debentures of the Texas Corporation, William R. White, State Superintendent of Banks, said the State Banking Department had authorized the new issue as legal investment for savings banks. He added that the board "does not presume to pass upon the question whether the obligations constitute suitable investment media for any particular savings bank."

Texas—Validity of Housing Authorities Law Upheld—

Texas—Validity of Housing Authorities Law Upheld—

Texas—Validity of Housing Authorities Law Upheld—Hailed as facilitating national defense by speeding response to urgent demand in the South and Southwest for adequate housing for families of enlisted personnel and civilian employees, a decision just announced by the Supreme Court

of Texas upholds the validity and constitutionality of the Texas Housing Authorities Law which permits Texas communities to participate in the slum clearance and low-rent public housing program of the United States Housing

munities to participate in the slum clearance and low-temp public housing program of the United States Housing Authority.

This decision adds another link in a chain of 34-public housing victories in 25 States where the highest tribunals have passed upon local public housing programs assisted by the USHA. In these suits the local housing programs have been unsuccessfully attacked from virtually every possible legal angle.

Commenting on the Texas decision, USHA Administrator Nathan Straus today said:

"The USHA public housing program in connection with the national defense program has received new impetus through the Texas decision. There is urgent need throughout the country in the vicinities of Army and Navy bases and in industrial districts for thousands of new safe and sanitary dwellings which can be rented to married members of enlisted personnel and civilian employees who are being concentrated at these points in the upbuilding of our national defense.

"The preparedness program has emphasized the importance of providing adequate housing facilities within the financial reach of workers in industries essential to national defense. Further, the increasing number of military posts and naval bases in the South and Southwest has rekindled judicial and public interest in the necessity for standard low-rent dwelling accommodations for the families of enlisted men."

Mr. Straus pointed out that, with the Texas decision, the judiciary of more than half of the States of the Union now have accepted the fundamental public purposes and character of low-rent public housing and slum clearance.

The States whose highest courts have sustained their local public housing acts which permit participation in the USHA program are:

Alabama, Arizona, California, Colorado, Florida, Georgia, Illinois, Indiana, Kentucky, Louisiana, Maryland, Massachusetts, Michigan, Missouri, Montana, Nebraska, New Jersey, New York, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee, Texas and West Virginia.

Only 10 States now lack Stat

United States Housing Authority—Additional Funds Earmarked for Projects—Moving swiftly to carry out the mandate of Congress contained in the national defense housing amendment providing for the construction of low-rent homes for enlisted men and employees of the Army and Navy and civilian employees, Nathan Straus, Administrator of the United States Housing Authority, on July 3 earmarked \$13,500,000 in USHA funds for eight defense housing projects.

\$13,500,000 in USHA funds for eight defense housing projects.

At the same time, Administrator Straus announced the rescinding of \$17,153,000 which had been earmarked for three large projects in Philadelphia. These funds, which were withdrawn after the Philadelphia City Council turned down approval of the projects, were immediately diverted into new earmarkings as follows:

For strictly defense housing projects:

Beaver County, Pa. \$2,100,000
Chester, Pa. 1,000,000
Erie, Pa. 900,000
McKeesport, Pa. 1,100,000
Pittsburgh, Pa. 3,400,000
Pittsburgh, Pa. 3,400,000
Corpus Christi, Texas 1,000,000
Portsmouth, Va. 3,000,000

\$13,500,000

\$13,500,000

Under the National Defense Housing Amendment, the USHA and military arms of the Government will cooperate in providing housing for the families of enlisted and civilian personnel, and of workers in industries essential to the national defense program. Such projects will be undertaken only upon direction of the President, after his determination that the defense program is being impeded by a shortage of housing in a locality.

Two loan contracts to house defense workers under the USHA program already have been approved by President Roosevelt. One is \$1,305,000 for Montgomery, Ala., primarily to serve Maxwell Field, Army air base, and the other is \$643,000 for Pensacola, to meet the needs of low-income enlisted and civilian personnel at Corry Field, Naval air station.

Demands for such projects are coming from all parts of the country, but with virtually all available funds previously committed, only a very few of the applications can be granted until such time as Congress increases the USHA's loan authorization, Mr. Straus pointed out.

United States Housing Authority—Local Unit Note Issues Awarded—Officials of 10 municipal housing authorities sold on July 10 a block of \$31,137,000 of notes maturing in six months. Of the total, a banking group headed by the Chemical Bank & Trust Co. bought \$26,010,000 at 0.57% and the balance of \$5,127,000 went to other firms.

The offerings consisted of six-month notes of the housing authorities of the following: Boston, \$16,000,000: Bridgeport, Conn., \$4,500,000: Lowell, Mass., \$2,200,000: Fall River, Mass., \$2,200,000: Glizabeth, N. J., \$1,500,000: Jersey City, N. J., \$1,300,000: Chester, Pa., \$1,127,000; Harrison, N. J., \$860,000: Brunswick, Ga., \$750,000, and Spartanburg, S. C., \$400,000.

\$400,000.

Salomon Brothers & Hutzler bought \$2,000,000 of the Boston issue at 0.48% plus a premium of \$1 and \$500,000 of the Elizabeth, N. J. issue at 0.49% plus a premium of \$1. R. W. Pressprich & Co. received the award of \$500,000 of the Bridgeport, Conn., issue at 0.49% plus a premium of \$3. The Girard Trust Co. of Philadelphia bought the entire issue of Chester, Pa., at 0.49% plus \$1 premium and \$1,000,000 of the Elizabeth, N. J. issue, also at 0.49% plus a premium of \$1.

The remainder of the notes went to the Chemical Bank group.

Bond Proposals and Negotiations

PINE BLUFF, Ark.—BOND ELECTION—An election is said to have been called for Aug. 6 in order to have the voters pass on the issuance of \$200,000 in municipal airport bonds.

CALIFORNIA (State of)—WARRANTS OFFERED—Sealed bids were received until 11 a. m. on July 12, by Harry B. Riley, State Controller, for the purchase of \$2,645,181 general fund registered warrants. Dated July 17, 1940. Due on or about July 29, 1941.

MONTEREY COUNTY (P. O. Salinas), Calif.—SCHOOL BOND OFFERING—It is stated by C. F. Joy, County Clerk, that he will receive sealed bids until 10 a. m. on July 15, for the purchase of \$5,000 Pfeiffer

School District bonds. Interest rate is not to exceed 5%, payable F-A Dated Aug. 1, 1940. Denom. \$500. Due \$500 Aug. 1, 1941 to 1950 Prin. and int. payable in lawful money at the County Treasury. Bidders will be permitted to bid different rates of interest for different maturities of the bonds. No bid for less than par and accrued interest will be considered. A satisfactory legal opinion approving the legality of the bonds will be furnished without charge to the purchaser. Enclose a certified check for not less than 10% of the par value of the bonds bid for, payable to the Board of Supervisors.

check for not less than 10% of the par value of the bonds bid for, payable to the Board of Supervisors.

SAN MATEO COUNTY (P. O. Redwood City), Calif.—SCHOOL BOND OFFERING—Sealed bids will be received until 11 a. m. on Aug. 6, by W. H. Augustus, County Clerk, for the purchase of \$55,000 Ravenswood Elementary School District bonds. Interest rate is not to exceed 5%, payable M. S. Dated Sept. 1, 1940. Denom. \$1,000. Due \$5,000 Sept. 1, 1941 to 1951. Bidders may make one or more alternative bids or offers for the bonds at different interest rates. Split rate interest bids will be received and it shall not be accessary that all bonds offered for sale bear the same rate of interest, but such interest shall be in multiples of ¼ of 1%. The best bid will be determined by deducting from the total amount of interest which the district would be required to pay up to the maturity of the bonds, at the coupon rate or rates specified in the bid, the amount of the premium, if any, bid therefor, and the award will be made at the lowest net interest cost to the district. Prin. and int. payable in legal tender at the county Treasurer's office. Bids may be made for either the whole issue or for parcels thereof, and must be for not less than the par value of the bonds bid for. These bonds were authorized at the election held on June 25, by a vote of 610 to 436. The purchaser will be required to furnish his own legal opinion as to the legality of the bonds. Enclose a certified check for \$1,000, payable to the Chairman Board of Supervisors.

COLORADO

ADAMS COUNTY SCHOOL DISTRICT NO. 14 (P. O. Brighton) Colo.—PRE-ELECTION SALE—A \$60,000 issue of 2½% semi-annua building bonds has been purchased by Bosworth, Chanute, Loughridge & Co. of Denver, subject to an election held on June 28. Dated June 1, 1940. Denoms. \$1,000 and \$500. Due Dec. 1 as follows: \$5,000 in 1943, \$1,000 in 1944, \$500 in 1945 to 1947, \$1,000 in 1948, \$7,000 in 1949 and 1950, and \$7,500 in 1951 to 1955. Principal and Interest payable at the County Treasurer's office, Brighton. The bonds, in the opinion of counsel, will constitute a general obligation of the entire district, payable from unlimited ad valorem taxes. The proceeds of this issue will be used for the construction and furnishing of a new building to provide auditorium and gymnasium facilities. Legality approved by Pershing, Nye, Bosworth & Dick of Denver.

CONNECTICUT

BRIDGEPORT, Conn.—TO ISSUE REFUNDING BONDS—Perry W. Rodman, City Comptroller, reports that no decision has been made as to the date of sale of the \$780,000 refunding bonds recently approved by the City Council.

COUNTECTICUT (State of)—NOTE SALE—Joseph E. Talbot, Stat Treasurer, reports that \$450,000 was borrowed from the National City Ban of New York on a one-year note at a cost of 7-100 of 1%. *The loan wa contracted following the unsuccessful offering on Jan. 22 of \$450,000 University of Connecticut self-liquidating dormitories construction bonds.—V. 150, p. 719. The legislation authorizing the bond issue did not carry a full faith and credit clause, which the note issue does carry. The next session of the General Assembly is expected to correct the act and the proceeds of the bond issue will be used to retire the note loan.

HARTFORD COUNTY METROPOLITAN DISTRICT (P. O Hartford), Conn.—BOND SALE—The \$1,000,000 coupon or registered East Branch additional water supply bonds offered July 8—V. 150, p. 4160—were awarded to a group composed of Goldman, Sachs & Co., New York, Mercantile-Commerce Bank & Trust Co., St. Louis, and Eldredge & Co. of New York, as 148, at a price of 100,779, a basis of about 1,70%. Dated July 15, 1940 and due \$25,000 annually on July 15 from 1941 to 1980, incl. in re-offering the bonds the bankers priced the maturities to 1970, incl. to yield from 0.15% to 1.75%; the remaining bonds were priced from 99.50 to 97.50. Other bids:

Notes will be authenticated as to genuineness and validity by the National Shawmut Bank of Boston, under advice of Storey, Thorndike, Palmer & Dodge of Boston. Only sealed or telegraphic bids will be accepted.

BONDED DEB'T SHARPLY LOWER—Coincident with the announcement of a reduction in the city's tax rate, Mayor Henry Toepfert of Holyyoke, stated July 8 that the bonded indebtedness of the city at the end of 1940 will be reduced to about \$734,000, compared with \$2,833,000 in 1932. The bonded indebtedness figure has been successively reduced for the past eight years with no sacrifice to any public function, he said. Good news for the city's tax payers was indicated by the Mayor's announcement that the tax rate would be lowered by \$1.30 to \$32.30 per \$1,000. A reserve fund of \$35,000, equivalent to a further reduction in \$75,000,000 in 1932. Money is borrowed in anticipation of taxes at less than 1,000 and \$70,000,000 in 1932. Money is borrowed in anticipation of taxes at less than 4,001 ft, according to Mayor Toepfert. Holyoke's gas and electric department and the city's water department are self-financed and are not supported by taxation. Coupled with the improvement in the city's linancial position a revival in industrial activity is evidenced at Holyoke, the Mayor announ

Gibbons & Co., Inc., New York, as 1.10s, at a price of 100.052, a basis of about 1.08%. Dated June 1, 1940 and due June 1 as follows: \$4,500 in 1941 and \$6,000 from 1942 to 1945 incl. Other bids:

Issue \$6,000 water system bonds was defeated at the election on June 25.

TRIBOROUGH BRIDGE AUTHORITY, N. Y.—DEFINITIVE BONDS AND LEGAL OPINION READY FOR DELIVERY—Members of the underwriting group which distributed the \$98,500,000 Triborough Bridge Authority 2¾ %, 3% and 3¼ % bonds last February—V. 150, p. 1163—have been advised by Dillon, Read & Co., Group Manager, that arrangements have been made with the Chase National Bank of New York, for the delivery by it, upon the exchange of each lot of definitive bonds for the temporary certificates, of a certified copy of the approving legal opinion of Messrs. Hawkins, Delafield & Longfellow. It is believed that this is the first time that legal opinions have been distributed in this way, the custom having been for each investor to look to his investment dealer for his copy. Members of the underwriting group will each receive one original copy of the opinion and may secure additional uncertified copies if desired. On an issue of such size and widespread distribution as this one, it is believed that the handling of the legal opinions in this manner will prove helpful to both the bond owners and the members of the underwriting group. The definitive bonds will be ready for delivery on and after July 15.

WESTMORELAND AND WHITESTOWN CENTRAL SCHOOL DIS-

WESTMORELAND AND WHITESTOWN CENTRAL SCHOOL DISTRICT NO. 1 (P. O. Westmoreland), N. 1942 to 1955, incl. Second high bid of 100.35 for 2½s was made by Warren W. York & Co. of Allentown.

Pennsylvania Turnpike COMMISSION (P. O. Harrisburg), Pa.—\$5,000,000 BONDS PUBLICLY OFFERED.—Further financing for the new Pennsylvania Turnpike, now nearing completion, is announced today by a banking group headed by B. J. Van Ingen & Co., Inc. and Blyth & Co., Inc. with the public offering of an additional \$5,000,000 3¾ % revenue bonds due Aug. 1, 1968, at a price of 100 and accrued interest. This offering brings to \$35,000,000 the principal amount of these bonds taken down and sold by the Reconstruction Finance Corporation out of the total \$40,800,000 authorized for purchase by that body to provide funds to pay a portion of the cost of the new 160-mile highway. Remaining cost of the highway, which covers most of the distance between Harrisburg and Pittsburgh, is absorbed by the Public Works Administration grant of not to exceed \$29,250,000, or about 45% of the construction cost. A revised budget based on a revised engineering estimate made necessary by increased construction costs places the cost of completion of the project at \$66,679,000. According to the latest prospectus, the roadway has been entirely completed and readied for paving and approximately 135 miles of four-lane concrete nine inches thick had been laid as of July 8, 1949. The paving contracts now in operation have a combined daily capacity of 3 to 3½ miles of four-lane pavement. An unprecedented amount of rainy weather during the past spring has retarded paving operations and the final completion depends upon weather conditions.

Other members of the offering group include Blair & Co., Inc.; A. C. Allyn & Co., Inc.; E. H. Rollins & Sons, Inc.; Stifel, Nicolaus & Co., Inc.; John Nuveen & Co.; Welsh, Davis & Co.; Yarnall & Co.; Eastman, Dillon & Co.; tois & Co.; Paine, Webber & Co.; E. W. Clark & Co.; Eldredge & Co.; Morris, Mather & Co., Inc.; Union Securities Corp.; Singer, Deane & Scribner. Final reports of \$468,000 increasing to \$453,000 in

SCOTT TOWNSHIP (P. O. R. D. No. 5, Crafton Branch, Pittsburgh), Pa.—BOND SALE—The issue of \$25,000 bonds offered June 26—V. 150, p. 3864—was awarded to Singer, Deane & Scribner of Pittsburgh, 82 ½s. Dated July 1, 1940 and due \$5,000 on July 1 in 1944, 1948, 1952, 1956 and 1960. Price paid by purchaser not indicated in report. Moore, Leonard & Lynch of New York City bid 101.05 for 2½s. Other bids, for 2½s, were as follows:

WEST VIRGINIA

WEST VIRGINIA

OHIO COUNTY (P. O. Wheeling), W. Va.—BONDS VOTED—
Regarding the result of the voting at the primary election held on May 14, we are advised as follows by I. T. Killeen, Clerk of the Board of County Commissioners, in a letter dated July 5:

In response to your inquiries relative to the bond issue we wish to inform you that more than three-fifths of the voters of Ohio County, W. Va., voted in favor of incurring debt in a sum not to exceed \$500,000, to provide funds for the purpose of erecting constructing and equipping in conjunction with the City of Wheeling, a court house to be known as city-county building and levy taxes sufficient to pay the interest and principal of said bonds. The validity of such bond issue was approved by the Attorney General of West Virginia.

However, before offering the bonds to the public, it is mandatory that said bonds be offered to the Secretary of State or other governmental agencies of West Virginia, authorized to purchase said bonds. If the bonds are not purchased by the State, the same shall then be advertised for public sale once a week for three weeks.

For your information we wish to inform you that it will probably be four weeks before we will be in a position to determine whether or not the bonds will be offered for public sale.

WISCONSIN

CRAWFORD COUNTY (P. O. Prairie du Chien), Wis.—BOND SALE POSTPONED—The \$27,500 not to exceed 1½% semi-annual refunding bonds scheduled to be offered on June 25—V. 150, p. 3560—were not sold as the sale was postponed indefinitely, according to the County Clerk. Dated June 1, 1940. Due on June 1 in 1941 to 1950, incl.

MILLTOWN UNION FREE HICH SCHOOL DISTRICT (P. O. Milltown), Wis.—BOND OFFERING—It is stated by J. M. Hammer, District Clerk, that he will receive sealed and oral bids up to July 16, at 8 p. m., for the purchase of \$36,000 refunding bonds. Interest rate is not to exceed 2½%, payable F-A. Dated April 1, 1940. Denom. \$1,000. Due Feb. 1, as follows: \$2,000 in 1941 to 1952, and \$3,000 in 1953 to 1956. Prin. and int. payable at the District Treasurer's office. In the opinion of counsel these bonds are to be direct and general obligations of the district, payable from unlimited ad valorem taxes against all taxable property in the district. The purpose of this issue is to provide funds to refund a like amount of school building indebtedness, and refunding bonds may be issued bearing a lower rate of interest, thus effecting a saving to the district. All legal proceedings have been handled by Fletcher. Dorsey, Barker, Colman & Barber of Minneapolis, whose approving opinion the district will furnish as well as the blank bonds, both without cost to the purchaser Delivery of the bonds is expected to be made on or about July 25, at a bank in the city containing the principal office of the purchaser. All bids must be unconditional except they may be conditioned on delivery to the purchaser on or before July 30. A certified check for 2% of the par value of the bonds bid for is required.

(These are the bonds that were offered for sale without success on April 9.)

(These are the bonds that were offered for sale without success on April 9.)

OCONTO COUNTY (P. O. Oconto), Wis.—BOND OFFERING—It is stated by Josie M. Cook, County Clerk, that she will receive both sealed and auction bids until July 24, at 2 p. m. (CST), for the purchase of the following 3% semi-annual non-taxable highway improvement bonds, aggregating \$100,000: \$70,000 series H-B bonds. Dated July 1, 1940. Denom. \$1,000. Due Jan. 1, 1945. Prin, and int. payable in lawful money at the County Treasurer's office. The bonds are subject to the favorable opinion of Chapman & Cutler of Chicago, which will be furnished together with the executed bonds without charge to the purchaser. A certified check for 2% of the par value of the bonds, payable to the County Treasurer, is required. (This notice supplements the offering report given in our issue of July 6—V. 151, p. 138.)

BOND SALE POSTPONED—It was stated subsequently by the above named County Clerk that the sale of the said bonds has been postponed indefinitely.

SPENCER, Wis.—BONDS SOLD—The Village Clerk reports that \$35,000 4% water system revenue bonds approved by the voters in April, have been purchased by Bell & Farrell of Madison.

WYOMING

WYOMING, State of—ARRANGEMENTS COMPLETED FOR BOND PURCHASE—Mart T. Christensen, State Treasurer, said recently that all arrangements have been completed for the State to purchase its entire outstanding highway bond issue totaling \$2,800,000.

Mr. Christensen said that final details of the transaction were worked out at a conference in New York City with officials of the Chase National Bank. The New York bank, which purchased a large number of the bonds for its clients, is handling details of turning them back to the State. The holders of the bonds will be paid interest to the maturity date, April 1, 1941, without premiums. "On April 1, 1941," Mr. Christensen said, "the issue will be refunded at a lower rate of interest (2% as compared to the present rate of 4%)."

CANADA

CANADA (Dominion of)—TREASURY BILLS SOLD—An issue of \$35,000,000 Treasury bills was sold on July 2 at an average cost of 0.733%. Dated July 2. 1940 and due Oct. 1, 1940.

GRANBY CATHOLIC SCHOOL COMMISSION, Que.—BOND SALE—The \$46,500 improvement bonds offered July 8—V. 151, p. 138—were awarded to the Banque Canadienne Nationale of Montreal, at a price of 96.34. Due serially from 1941 to 1960, incl.

MONTREAL, Que.—NEW BUDGET OMITS SINKING FUND PAY-MENTS—The 1940-41 budget of \$58,913,429, which provides \$2,000,000 for direct relief for 10-month period to April 30, 1941, makes no provision for payments into the municipal sinking fund or for payment of interest on city bonds held by the fund, according to Montreal press sources.

QUEBEC (Province of)—SALES TAX IN EFFECT—Quebec's provincial sales tax of 2% went into effect July 1. At Montreal, a staff of 150 malled out informatory documents to the 70,000 merchants throughout the Province affected by the tax.

Residents of Montreal and of Quebec City, who already pay a 2% municipal sales tax, will pay 4% in taxes on purchases other than groceries from now on. The 4% will be collected by the Province, which will pass half the proceeds back to the cities. Meanwhile, a 4% provincial tax on soft drinks and aerated waters caused confusion among small retailers, with every storekeeper advancing his own idea of how the tax should be met
