PURPOSE—Proceeds from the sale of the other 147,228 shares will be used by the company to reimburse its treasury for the cost of U. S. Treasury bonds recently deposited under operating contracts with New York City's Board of Transportation and for the cost of expansion of its business. In addition, the company plans on adding to its general corporate funds.

They operate in the more populous communities of 28 states, including such cities as New York, Boston and Philadelphia, and in the District of Columbia. Other merchandise sold includes soft drinks, food, tobacco products, newspapers, magazines, novelties and miscellaneous items.

CAPITALIZATION—Consists of an authorized issue of 1,200,000 shares of the common stock, of which 850,000 shares will be outstanding after giving effect to the new financing operations.

EARNINGS—For the 39 weeks ended Sept. 25, 1949, the company and its subsidiaries report a consolidated net income of $952,059, or $1.35 a share, earned on a sales volume of $23,794,627.

Aeronca Aircraft Corp.—Conversion Price—

A published notice dated Jan. 16 stated that the conversion price of its common stock (par $1), issuable upon conversion of its issued and outstanding cumulative convertible preferred shares, has been increased from $4.65 per share to $6.12 per share. If preferred shares are surrendered for conversion after Dec. 31, 1949 (and on or before Dec. 31, 1954) the original conversion price shall be $10 per share, an increase of $2.50 per share over the price theretofore prevailing.

However, the conversion price of $10 per share must be adjusted by reason of the issuance by the corporation of certain shares, options and promissory notes convertible into common shares. By reason of these dilutions the price of $10 per share provided in the Articles of Incorporation is reduced to $6.12 per share.

The conversion price has been accordingly adjusted as follows:

No. of common shares isued and outstanding Aug. 3, 1948	1,803,383
Shares subsequently issued upon conversion of preferred shares at currently effective rates	117,430
Number of optioned shares treated as if issued and outstanding at option price of $1.625	69,875
No. of shares issued upon conversion of notes to creditors	8,393
New shares issued June 13, 1949 at issue price	39,000
Shares issuable upon conversion of convertible promissory notes issued June 13, 1949, treated as if issued and outstanding	49,993
Shares issuable upon conversion of $50,000 convertible promissory notes issued Dec. 30, 1949, treated as if issued and outstanding	50,000
Total	2,143,574

Accordingly, the new conversion price of the common stock is $6.12 per share. Each share of presently outstanding cumulative convertible preferred stock having, for purposes of conversion a value of $10 per share, each share of such preferred stock is now convertible into 1.63 shares of common stock.

In accordance with the provisions of the stock purchase warrants issued by the corporation the price of its common stock, par value $1 per share, issuable upon exercise of its issued and outstanding stock purchase warrants, has been increased from $4.65 per shares to $6.12 per share by reason of the increase in the warrant price after Dec. 31, 1949 and adjustment because of dilution. Each warrant to purchase one share of common stock at $10 per share now entitles the holder thereof to purchase 1.63 shares at $6.12 per share.—V. 171, p. 357.

This company has contracted to purchase from the Delhi Oil Corp. its Barker Dome gas leases and leasehold interest in New Mexico, according to C. W. Murchison, President of Delhi, who said the contract to purchase the properties was signed on Feb. 20.

Under the terms, El Paso was to pay Delhi $250,000 on Feb. 27 and will pay Delhi $2,750,000 within 35 days following receipt by El Paso of Federal Power Commission permission to build its San Juan pipeline, a proposed 24-inch gas carrier from northwestern New Mexico to a point south of Needles, Calif., near the Arizona border. The purchase contract will be canceled if the FPC certificate has not been granted by July 15, 1950, and Delhi will retain the $250,000 initial payment. The contract covers only natural gas production and reserves from the leases. Delhi reserves rights to all oil that may be produced.

In addition to the immediate cash payments, the announcement stated, Delhi will be paid a royalty by El Paso of five cents per 1,000 cubic feet on all gas produced from the leases during the first five years. This royalty will rise to six cents per 1,000 during the second five years; seven cents during the third five years, and thereafter a minimum of seven cents per 1,000, or higher if the total gas taken plus the remaining reserves exceed 600 billion cubic feet and if the then "fair market" value of gas in the San Juan Basin increases, it was added. The contract calls for El Paso to take a minimum daily average of 60 billion cubic feet and up to a maximum average of 110 million cubic feet daily. Delhi, under terms of the contract, has agreed to construct and operate a natural gasoline plant on the leases and pay El Paso a royalty of 10% of gross sales of all liquid hydrocarbons from the plant. El Paso has an option to purchase this plant at cost after two years and pay Delhi a royalty of 20% of the plant's gross sales. Natural gasoline is obtained from natural gas. It is in dew form as the natural gas comes to the surface from a well. El Paso has agreed to drill additional wells and to construct a gathering system on the leases, it was stated. Idaho Power Co.—Plea Denied—

The Federal Power Commission has denied the company's petition for rehearing of the FPC order of Oct. 13 which contained several special conditions relating to use of two of the company's transmission lines to carry electric energy for the United States. The Commission, however, modified the October order by reducing from 30 to 24 months the period of notice required before the company may repossess line capacity in use by the United States, and by providing that any agency of the United States using Idaho Power's lines must provide reciprocal accommodations if it has the capacity available. The FPC denied a request by the Secretary of the Interior for inclusion in the license of a condition that the company's transmission facilities should not interfere with reclamation projects but that if necessary the licensee should move or adapt obstructing facilities at its own expense. The FPC's October 13 order superseded its March, 1948, authorization of a license to Idaho Power for its Eliss hydroelectric development on the Snake River in Idaho and brought under the license two 138-kilovolt transmission lines which previously had not been included. The lines lead from the project to Boise and American Falls, and cross several tracts of public lands. The company's petition for rehearing asked FPC to delete from the order the entire section relating to the carrying of electric energy for the United States.—V. 170, p. 2584.

We expect to receive these funds not later than March of 1950."—V. 170, p. 2584.

Kansas Gas & Electric Co.—New 4½% Preferred Stock Approved—Exchange Offer Underwritten—

The stockholders and the directors on Jan. 24 voted to authorize an issue of 200,000 shares of 4½% preferred stock, par $100, with full voting rights and to be callaole by the company at any time upon 30 days' notice at a price of $112.50 per share for the first year which price reduces to $110 per share after March 1, 1953. A total of 82,011 shares of the 4½% preferred stock were authorized to be issued at this time and an offer of exchange will be made to the holders of the present preferred stocks. The company now has outstanding 82,011 shares of preferred stock, consisting of 66,500 shares of preferred stock (7%) and 15,511 shares of $6 preferred stock.

The company will offer to the holders of its preferred stock (7%) and $6 preferred stock the privilege of exchanging their stock, share for share, contingent upon the exchange offer becoming effective and will pay to the holders of the preferred stock (7%) upon deposit of their shares for exchange a cash adjustment of $5 per share. Quarterly dividends were also declared for the first quarter of 1950 or $1.75 per share on the preferred stock (7%) and $1.50 per share on the $6 preferred stock, payable on April 1, 1950 to holders of record on Feb. 28, 1950. Stockholders who deposit their shares of old preferred stock for exchange will be paid on or before April 1, 1950 the full amount of dividends due on deposited shares, less the amount of the dividend to be paid on or about April 1, 1950 on the new issue of 4½% preferred stock. Thus each stockholder who exchanges shares of preferred stock (7%) and $6 preferred stock will receive full quarterly dividends up to April 1, 1950 at the present rates of 7% and $6 per annum.

If the plan of exchange becomes effective, all shares of the old preferred stock which are not deposited for exchange will be called for redemption on April 1, 1950 at $115 per share for preferred stock (7%) and $110 per share for $6 preferred stock. Full quarterly dividends will be paid to such stockholders on or about April 1, 1950.

The exchange offer begins Feb. 7, 1950 and expires at 3 p.m. (CST), Feb. 28, 1950. The First National Bank in Wichita has been named exchange agent.

The company has entered into an underwriting agreement with a group headed by Kidder, Peabody & Co. and Merrill Lynch, Pierce, Fenner & Beane for the solicitation of exchanges and for the purchase of 5,650 shares of the new 4½% preferred stock which the company will receive in exchange for reacquired shares of the old preferred stock now held in its treasury, plus a number of shares equal to the number of shares of the old preferred stock not exchanged under the exchange offer. The underwriters will offer these shares to the public at $110 per share plus accumulated dividends shortly after March 1, 1950. Funds received from such sale will be used by the company in connection with the redemption and exchange offer and for other corporate purposes.

The company offered a special issue of 75,000 common shares to workers on Nov. 8, 1949, with purchases payable on a monthly instalment plan. Under the first of two purchase options, the price was set at $71 per share. Market value of the stock at the time was $86.

The first option, known as "Plan A," provided for the purchase before Dec. 31 of a specific number of shares at $71 each, payable in 36 monthly instalments by payroll deduction.

"Plan B," the second purchase method, provided for accumulating credit for the same three-year period, with interest paid by the company at 2%. In this arrangement, the employee may decide to apply his accumulated funds toward a stock purchase at any time during the three years.

The price formula under "Plan B" stipulates that shares will sell for 10% below the market value at the time of the actual purchase transaction.

Under any leasing arrangement Pennroad would receive rental for use of the railroad property by Nickel Plate. Pennroad owns 225,879 shares of capital stock of the P. & W. Pacific Telephone & Telegraph Co.—To Increase Stock

The stockholders at the annual meeting on March 2 will be asked to approve an increase in the authorized common stock from 5,000,000 to 6,500,000 shares, par $100.

The directors last month approved the issuance of 814,694 common shares to be offered at the rate of one new share for each six shares of common or preferred stock held. The date for the offering has not yet been determined.

The American Telephone & Telegraph Co., the parent company, owns 3,732,493 shares of Pacific Telephone's 4,068,165 outstanding common shares.—V. 171, p. 363.

Panhandle Eastern Pipe Line Co.—Proposes Expansion

The company has applied to the Federal Power Commission for authority to expand its pipeline system capacity to enable it to transport 250,000,000 cubic feet of natural gas per day which would be purchased from Trunkline Gas Supply Co. The latter last November asked the FPC to authorize a 740-mile Louisiana-to-Illinois pipeline designed to carry the gas for delivery to Panhandle. This proceeding is still pending before the Commission. The proposed Panhandle project is estimated to cost $14,689,500. The new facilities, to be located in Illinois, Indiana and Michigan, would include 170 miles of pipeline and installation of 16,000 horsepower in compressor units at existing stations. Panhandle said the new facilities, when completed and in operation in connection with its other facilities, would increase the system peak day design capacity to 800,000,000 cubic feet. The proposed facilities are necessary to make available additional volumes of gas for the rendition of service to the City of Indianapolis, Panhandle's present customers, and others, the application says. The Panhandle pipeline system originates in Texas and extends through Oklahoma, Kansas, Missouri, Illinois, Indiana and Ohio to its northern termini in Michigan.—V. 171, p. 363.

Pennsylvania Power Co.—Plans New Financing—

The company on Jan. 23 requested SEC authorization to issue and sell at competitive bidding $3,000,000 of first mortgage bonds, due 1980.

The company also proposes to sell 40,000 additional shares of its common stock ($30 par) to its parent, Ohio Edison Co., for $600,000.

Proceeds of the financing will be used by Pennsylvania for property additions and betterments.—V. 171, p. 363.

Pennsylvania Power & Light Co.—Bonds Placed Privately—

The company on Jan. 25 announced it has sold to a group of institutional investors $33,500,000 of 2¾% 30-year first mortgage bonds on a 2.7% yield basis.

The proceeds are to be used to retire all the outstanding short-term debt represented by $15,644,000 of promissory notes due banks, to redeem its outstanding $10,000,000 of 3¼% first mortgage bonds, and to provide approximately $8,000,000 for the company's construction program.

Charles E. Oakes, President, says he thinks it will be necessary for the company to sell approximately $18,000,000 of additional new securities to finance the remaining portion of the three-year construction program as now set up. The remainder of cash requirements will come from earnings or through other cash reserves.

Mr. Oakes further stated that the directors have authorized a construction budget of $28,500,000 for 1950. This, he estimates, will lift total capital expenditures for the three years through 1952 to approximately $60,500,000.

The expenditures will complete the company's postwar construction program, which includes an additional 100,000 kilowatt steam generating plant at Sunbury, Pa., now under construction and scheduled to be completed by early 1951. A total of 150,000 kilowatts of additional capacity was placed in service at Sunbury during November and December, 1949.

A preliminary report of operations for 1949 shows net income equal to $2.13 a share on a larger number of common shares, compared with $2.02 a share for the previous year. Gross operating revenues totaled $69,908,851, an increase of $3,456,363 over 1948.

The certificates were offered Jan. 6, subject to authorization by the ICC, to bankers headed by Halsey Stuart & Co. on a bid of 99.434 with an interest rate of 2¼% (see offering in V. 171, p. 106).—V. 171, p. 195.

Peoria & Pekin Union Ry.—Correction—

The company has called for redemption on Feb. 1, next, at 104⅛ (not 104½ as previously reported) and interest, all of its $2,500,000 outstanding first mortgage 5½% gold bonds, series A, due Aug. 1, 1974.

Phillips Petroleum Co.—Discovers New Oil Field—

The company, it was announced on Jan. 20, has discovered a new oil field in its No. 1 Willclo well which is located on the west rim of the Anadarko Basin in section 15, block 3-1, T&NO Survey, Sherman County, Texas Panhandle. This new discovery well pumped 225 barrels per day of 40-degree gravity oil through perforators in the Pennsylvania zone at 5,844 to 5,880 feet. Another potential oil zone was also encountered in the Pennsylvania beds immediately above the new producing horizon.

The Willclo No. 1 is two miles south of the Phillips No. 1 Kathryn well which recently discovered a new deep gas-producing horizon in beds of Pennsylvania age some 2,300 feet below the regular Hugoton Field Gas pay zone. The new Willclo discovery also found gas in the Pennsylvania zone in which the No. 1 Kathryn well is completed, as well as in the regular 3,000 foot Permian zone of the Hugoton Field.

Phillips owns oil and gas leases on approximately 20,000 acres in a nearly solid block surrounding the new discovery. This development is significant because Phillips has extensive refining, chemical and other operations in this locality, the announcement concluded. —V. 170, p. 2439.

Playboy Motor Car Corp.—Creditors Approve Plan—

A plan for reviving this corporation received creditors' approval in Federal Court at Buffalo, N. Y., on Jan. 13. Judge John Knight directed attorneys to prepare a formal order confirming the plan, which calls for manufacture of a small automobile marketable at about $800.

Meanwhile, he permitted Allen H. Gardner, trustee for the corporation, to proceed with an auction sale of machinery and other physical assets at the company's plant. Reorganization proceedings had been postponed from Dec. 12 at Mr. Gardner's request. The trustee said the new plan was drawn after discussions with a group of engineers identified with the Lytemobile Co., recently organized in Delaware. —V. 170, p. 2228.

Remington Rand Inc. — General Aniline Case Set for Trial Feb. 6—

The way has been paved for establishing American ownership of the General Aniline & Film Corp., one of the world's largest chemical companies seized by the U. S. Government during the war, through a decision of the U. S. District Court in Washington, D. C.

The decision, rendered by Judge David A. Pine on Jan. 17, refused to dismiss the complaint of intervention filed by Remington Rand Inc., in a suit brought against the U. S. Government by Interhandel, a Swiss corporation formerly known as I. G. Chemie, which held approximately 93% of the shares of General Aniline.

Chemie has asked the Alien Property Custodian to restore the shares of General Aniline which it alleges were wrongfully taken from it.

Last year Chemie and the U. S. Government sought to settle this action out of court. Remington Rand immediately intervened in the action to enforce by specific performance the option which it obtained in 1947 from Chemie, and which it exercised on May 5 of that year. The decision of Judge Pine virtually assures that, whether or not the U. S. Government wins its case against Chemie, the huge chemical company will become American-owned.

The decision was on two motions, one a motion for a declaratory judgment that Chemie and the U. S. Government should settle Chemie's suit without Remington Rand's concurrence, and the other a motion to dismiss Remington Rand's complaint on jurisdictional grounds. In denying both motions, Judge Pine said:

"By this agreement alleged between Chemie and Remington Rand, if established, this equitable interest of Chemie under well-known principles of equity, became lodged in Remington Rand and could only be defeated upon Remington Rand's failure to pay $25,000,000 upon restoration of legal title (to the shares of General Aniline) to Chemie, and in such a case Chemie would have a lien to enforce that payment."

In a previous opinion in the case, rendered on Dec. 21, 1949, Judge Pine said: "If the intervenor's claims are established, it is entitled to an equity in the stock. How then can this court adjudge that the plaintiff (Interhandel) and defendant (U. S. Government) are entitled to stipulate for a settlement and dismissal, with prejudice, of the cause of action, regardless of any right the intervenor may have, prior to a determination of his claim.

"In my view, to do so would be the taking of his property without due process of law."

The hearing on Remington Rand's action has been set for Feb. 6. If Remington Rand sustains its position, and Chemie recovers the stock, Remington Rand will then be in a position to compel Chemie to deliver these shares to it.

If the suit of Chemie to recover the shares from the Alien Property Custodian is decided in favor of the Swiss company and ownership is then taken over by Remington Rand, no anti-trust situation will be involved, because General Aniline will retain the existing competitive situation in the chemical field, according to the announcement.

General Aniline is one of the "Big Four" in the chemical field, competing with Du Pont, Allied Chemical and American Cyanamid, and also is a competitor of Eastman Kodak through Ansco, the photographic division of General Aniline.—V. 170, p. 402.

Rheem Manufacturing Co.—Secondary Offering—Blyth & Co., Inc. on Jan. 9 made a secondary distribution of 14,000 shares of common stock (par $1) at $20.50 per share, net, for the account of the Trustees of the Officers' and Directors' Stock Bonus Fund. Complete and exact details for the week covered by the foregoing will appear in our issue of next week. We cannot furnish them today, inasmuch as the week ends Saturday and the Saturday figures are not available at time of going to press. Accordingly, in the above the last day of the week in all cases has to be estimated.

In the elaborate detailed statement, however, which we present further below we are able to give final and complete results of the week previous — the week ending Jan. 21. For that week there was an increase of 2.9%, the aggregate of clearings for the whole country having amounted to $14,995,572,884 against $14,577,121,518 in the same week in 1949. Outside of this city there was a gain of 1.8%, the bank clearings at this center having recorded a gain of 4.0%. We group the cities according to the Federal Reserve Districts in which they are located and from this it appears that in the New York District (including this city) the totals show record a gain of 4.3% and in the Philadelphia Reserve District of 3.8% but in the Boston Reserve District the totals register a loss of 1.2%. In the Cleveland Reserve District the totals show a decline of 10.7% and in the Atlanta Reserve District of 5.5% but in the Richmond Reserve District the totals show an improvement of 12.5%. The Chicago Reserve District has managed to enlarge its totals by 7.4%, but in the St. Louis Reserve District the totals are smaller by 1.4% and in the Minneapolis Reserve District by 7.2%. In the Kansas City Reserve District there is a decrease of 1.1% but in the Dallas Reserve District there is an increase of 5.9% and in the San Francisco Reserve District of 2.0%.

In the following we furnish a summary by Federal Reserve Districts:

QUEBEC

Quebec (Province of)

Files With SEC—The Province on Jan. 26 filed a registration statement with the Securities and Exchange Commission covering an issue of $15,000,000 debentures to mature on Feb. 1, 1955. The rate of interest, offering price and underwriting terms are to be supplied by amendment. The issue will be underwritten in the United States by a syndicate composed of First Boston Corp., Harriman Ripley & Co., Inc., Smith, Barney & Co., A. E. Ames & Co., Inc., Wood, Gundy & Co., Inc., Dominion Securities Corp., and McLeod, Young, Weir, Inc. Proceeds of the financing, along with other funds, will be used by the Province in the payment of $15,000,000 2% debentures dated March 1, 1945 and maturing on March 1, 1950. The maturing obligations are payable, at holder's option, either in United States or Canadian funds, and a sinking fund of $14,888,311 was available for their redemption on Nov. 30, 1949. However, it is deemed to be in the best interest of the Province, considering that the current official rate of the U. S. dollar is 1.105 Canadian dollars, to refund the issue rather than apply the sinking fund for redemption as latter course would involve a substantial purchase of U. S. dollars at a premium.
