Gas Industry Establishes New Records in 1950

By D. A. HULCY*

President, American Gas Association
President, Lone Star Gas Company, Dallas, Texas

Reporting on operations of gas industry in 1950, Mr. Hulcy observes that new records were achieved in numbers of customers served, volume of gas sales and total revenues, while capital expenditures reached a new high. Says gas industry has grown uninterruptedly since close of World War II and, if peace prevails, expects that further gains will be attained in 1951. Reveals that natural gas revenues for the past year amounted to almost \$1.4 billion, a gain of 25% over 1949, as contrasted with a 4.3% decline in manufactured gas revenues.

Each year since the end of World War II has seen the gas industry registering substantial gains in customers served, in volume of utility gas sold and in the amount of capital invested in plant and facilities. The gas industry has grown from a five billion dollar industry to an 8 1/4-billion dollar industry at the end of 1950.

This spectacular growth was particularly emphasized in 1950 when the gas industry achieved new records in numbers of customers served, in total volume of sales of utility gas, in total gas revenues and in numbers of gas appliances shipped. Capital expenditures for construction and plant expansion reached a new high level in 1950. The transmission and distribution systems of the gas industry today measure more than 375,000 miles, a record mileage for any of the nation's transportation systems.

If peace prevails there is every reason to believe the gas industry will enjoy a successful year in 1951. At the same time, our industry stands ready now, as it has in the past, to do its full share in helping our nation to meet any emergency that may arise.

The gas utilities at the end of 1950 were serving approximately 24,362,000 customers, including about 331,000 customers receiving LP-Gas directly from utility gas mains. This was a gain of 3.3% over 1949 when there were 23,580,000 customers on gas utility mains. Of the total number of customers served, 14,894,000 were receiving natural gas, a gain of 12.7% over the previous year. Manufactured gas customers declined about 14.8% during the year to total about 7,197,000 at the year end; while mixed gas customers on Dec. 31, 1950, totaled an estimated 1,940,000, a gain of 24.8% over 1949. The decline in the manufactured branch of the industry reflects the effect of the changeover by several large gas utility companies to the dis-

*From a year-end statement issued by Mr. Hulcy.

tribution of straight natural gas or to mixed gas distribution during the year.

Residential gas customers registered an impressive gain during the year, while commercial gas customers also increased substantially. In addition to the customers reported above it is estimated that nearly 6,000,000 customers now are being served with LP gas in territories not served by gas utility companies.

Total sales of gas in 1950 amounted to about 4,266,000,000 M.c.f., a gain of about 15.8% over 1949. Utility sales of natural gas were about 3,694,000 M.c.f., a gain of 18.9%; manufactured gas sales dropped to 412,400,000 M.c.f., a decline of 2.7%, and mixed gas sales were about 159,600,000 M.c.f., a rise of 14.4% over the previous year.

Revenues from the sale of gas reached an all-time record in 1950, almost to the \$2 billion mark. Utility revenues for the year were \$1,958,000,000, a gain of 16.0% over 1949. Natural gas revenues staged a spectacular rise of 25% to total about \$1,363,000,000 for the year. Manufactured gas revenues were \$458,700,000, a decline of 4.3% under 1949, and revenues from sales of mixed gas were \$114,600,000, a gain of 18.8% over the previous year. The balance in revenues is accounted for by revenues from sales of LP gas through utility mains.

Sales of gas appliances reached new high levels in 1950 exceeding the record heights achieved in 1947 and 1948 when the industry was filling the tremendous backlog of appliance orders that had accumulated during the war years. Sales of gas ranges last year totaled over 3,100,000 units, compared with 2,100,000 units in 1949 and a previous record of 2,800,000 units in 1948. Automatic gas water heater sales climbed to a total of 2,250,000 units in 1950, compared with a previous record of 1,800,000 units in 1947 and 1,350,000 units in 1949.

Central heating units also reached a new high level of more than 1,000,000 units, an indication of the tremendous demand that still exists for gas house heating. Gas refrigerator sales were about fifty per cent ahead of a year ago, while sales of the new gas appliances such as the gas laundry dryer and the gas incinerator advanced substantially in 1950. Gas air-conditioning equipment sales also made new records in 1950.

The American Gas Association resurveyed the gas industry's expansion program last year and estimates indicated that about \$3,154,000,000 would be spent in the five year period 1950-1954, with approximately \$2.75 billion of this amount being devoted to construction and expansion of natural gas facilities. While it is believed that 1950 will be the peak year of this program, it is estimated that more than \$875,000,000 will be spent on gas industry expansion in 1951 if no restrictions are placed on vital materials.

The natural gas industry reached new peaks in 1950 and

showed every indication that it will progress further in the year ahead. Natural gas pipeline systems added record mileage, customers, sales and revenues as the natural gas branch of the industry reached new high levels, with natural gas supplying a record-breaking total of 20% of the total energy consumed in the United States in 1950.

In the first nine months of 1950, the Federal Power Commission had approved construction of 5,750 miles of new natural gas transmission lines and had applications pending for an additional 12,400 miles. Construction of the approved lines will bring the total mileage of the nation's natural gas transmission lines to more than 265,000 miles.

Natural gas reserves continue to appear ample to serve the nation for many years to come, even with the rapidly increasing production of natural gas. The Association's Committee on Natural Gas Reserves estimated at the beginning of 1950 that proved reserves of natural gas totaled 180.3 trillion cubic feet, an increase of 6.5 trillion feet over proved reserves at the beginning of 1949. Natural gas production during 1949 was estimated at 5.9 trillion cubic feet, so new discoveries and extensions of estimates of known fields continue to exceed the yearly production.

Despite the tremendous growth of our natural gas transmission systems, the manufactured gas branch of the industry continues to be of the utmost importance in the nation's economic picture. Demand for gas services continues to exceed the ability of the industry to serve this demand in many areas. This is particularly true as regards house heating and its attendant peak-load problems.

While some of the territories receiving or about to receive natural gas will change over to straight natural gas distribution, there are many companies that will continue to manufacture gas and will use natural gas only as one of the production materials. Other companies will mix manufactured and natural gas to be served, perhaps at higher Btu levels, but still relying heavily on the manufactured gas plants.

*Odd lot transaction selling outside of the year's range. †Registered bond transaction.

NOTE—The tabulation shown above is not a record of all the Treasury bonds listed on the Big Board. It is simply a compilation of each and every issue in which any dealings were transacted during the course of the year. The issues still listed and in which no dealings occurred during 1950 are as follows: 3 1/2s due 1949-52; 2 3/4s due 1951-54; 2 3/4s due 1956-59; 2 3/4s due 1960-65; 2 1/2s due 1949-53; 2 1/2s due 1952-54; 2 1/2s due 1956-58; 2 1/2s due 1962-67; 2 1/2s due 1963-68; 2 1/2s due 1966-71; 2 1/2s due Sept., 1967-72; 2 1/2s due 1951-53; 2 1/2s due 1952-55; 2 1/2s due 1954-56; 2 1/2s due 1956-59; 2s due 1951-53; 2s due June, 1952-54; 2s due Dec., 1952-54; 2s due 1953-55.

The following three issues were called for redemption during the current year: 2s due March 15, 1950-52 on March 15 at 100; 2s due Sept. 15, 1950-52, on Sept. 15 at 100; 2 1/2s due Sept. 15, 1950-52, on Sept. 15 at 100; and the 1 1/2s due Dec. 15, 1950 were paid off on the maturity date at par.
