Beech Aircraft Corp.—To Acquire Air Base—

It was announced on Oct. 2 by this corporation and the City Commission of the city of Liberal, Kan., that Beech Aircraft soon will take over a major portion of the existing facilities of the Liberal Air Base for Beechcraft's military aircraft production activities.

This is the second satellite plant placed in operation within the past year by Beech Aircraft Corp. The first satellite plant was opened last year at the Herington Air Base, between Herington and Council Grove, Kan., and now employs approximately 500 workers. The opening of these two satellite plants to Defense Production is in accordance with Beechcraft's policy of restricting the expansion of its own buildings to an absolute minimum. The restoration of these lod war facilities outside the Wichita, Kan., area also helps to reduce the burdens of defense expansion on the city facilities of Wichita and spreads the work among outside areas where it is more greatly needed.

At the outset, work will be concentrated on the supervised to the concentrated on the supervised to the supervised of the supervised on the supervised to the supervised on the supervised of the supervised on the

At the outset, work will be concentrated on the overhaul of the two largest hangar-buildings for the purpose of putting them in condition for productive work. As soon as both buildings and equipment are rehabilitated, Beech production work will begin, devoted to certain types of military contracts of a nature the manufacturer is not disclosing at this time.—V. 174, p. 274.

Foote Bros. Gear & Machine Corp. — To Maintain 25-Cent Quarterly Dividend Rate on Common Stock After Split-Up—

Split-Up—

If stockholders approve the 3-for-2 "split" of the common shares at the special meeting to be held Oct. 25. "it is the belief of the management and of the directors that the regular quarterly dividend rate of 25 cents a share can be maintained on the split stock," W. A. Barr, President, stated on Oct. 3.

While the results for the current fiscal year cannot be accurately foretold at this time," he said, "it is the best judgment of the management that net income for the current fiscal year which ends Oct. 31 will materially exceed the net income for the preceding fiscal year. The current backlog of unfilled orders amounts to approximately \$24,000,000, thus indicating that operations during the coming year will continue at a high rate.

At the Oct. 25 meeting stockholders w.ll be asked to approve the retirement of the 28,927 shares of common stock recently acquired by the company from the Reconstruction Finance Corporation and the increase of the authorized common stock to 500,000 shares to make available the additional shares required for the stock "split" and to provide for the conversion of the outstanding 15,271 shares of convertible \$10 par preferred stock. The "split" of the common shares, if approved, will be effective Nov. 15, 1951. After the retirement of the RFC stock there would be 205.398 common shares remaining outstanding to be split 3-for-2. The preferred stock is convertible on a share-for-share basis.—V. 174, p. 1195.

Glen-Gery Shale Brick Corp.—Registers With SEC-

The corporation on Sept. 28 filed a registration statement with the SEC covering \$2,000,000 of first mortgage bonds, 5½% series due 1971, with detachable warrants for the purchase of common stock attached.

The bonds are to be offered for public sale through an underwriting group headed by Lee Higginson Corporation, P. W. Brooks & Co., Inc., and Warren W. York & Co., Inc. The public offering price and underwriting terms are to be supplied by amendment.

Of the net proceeds of the bond sale, approximately 352,185 will be applied to the redemption of \$831,400 of 6% general mortgage bonds, due Dec. 1, 1957, at 102½%. An additional \$500,000 will be applied to the prepayment of a like amount of bank indebtedness incurred to finance the cost of a tunnel kiln and related facilities now under construction at Watertown, Pa.

Each \$1,000 and \$500 bond will carry warrants expiring Dec. 31, 1958, for 80 shares and 40 shares, respectively, of the common stock, 50 cents par, of the company, entitling the holder to purchase such shares at \$4.75 per share through Dec. 31, 1952, the price increasing 50 cents per share on Jan. 1 of each year thereafter to a maximum of \$7.75. Any proceeds received upon exercise of the warrants will be added initially to the general funds or the company available for general corporate purposes, including expansion and improvement to plant.—V: 173, p. 1071.

Golden Crown Mining Co., Prescott, Ariz.—Stock Offered—Singer, Bean & Mackie, Inc., as selling agent, on Sept. 24 offered 35,000 shares of capital stock (par 50¢) at the market (approximately \$1.25 per share) benefit of a selling group. without

The proceeds are to be used for exploration and developm properties, and for additional working capital.—V. 174, p. 1195.

Goodall-Sanford, Inc.—Financing Approved—

Stockholders on Oct. 2 approved a new issue of 80,000 shares of \$50 par value preferred stock designed to yield about \$4,000,000. The management proposes further to sell \$3,000,000 of debentures, thus raising long-term capital to \$7,000,000.

raising long-term capital to \$7,000,000.

Elmer L. Ward, President, stated that once the company has in hand the proceeds of long-term financing approved at the meeting, he would recommend payment of a cash dividend on the common stock. The amount, he said, would be determined by conditions at the time but in any event not in excess of 50% of earnings. Profits in recent years, Mr. Ward said, have been used as working capital and to finance the rapid expansion of the business. No dividends have been paid since 1949.—V. 174, p. 859.

Missouri Pacific RR.—Hearing Nov. 27—
The Interstate Commerce Commission will hold a public hearing Nov. 27 on the company's plan for reorganization.
The Commission acted on a petition of several interested parties who asked that the plan be reviewed in the light of developments since August, 1949, when the Commission approved the present reorganization plan.
The petition for the new hearing was filed by the first and refunding institutional group. Answers to the petition have been filed by the Alleghany Corp. and other parties, who contend the railroad is solvent and that the receivership should be terminated by an adjustment of obligations without a complete reorganization.
Under the present reorganization plan the Missouri Pacific RR. would have a capitalization of \$612,000,000. The plan also wipes out the present common stock, most of which is held by the Alleghany Corp.

tures and compounds, is now in picture of the control instruments Division at Mount Vernon, N. Y., it was anmounced on Oct. 1.

The company introduced the first Fluorescence Analysis equipment to the inarket in 1843 and the present model reflects many new ideas acquired as the result of field testing and experience.

The output of the special volume-sensitive Gelger counter is processed in electronic circuits for the purpose of driving a strip chart recorder or a count register. The chart instrument is used for normal qualitative and quantitative analysis, and the register is employed where extreme quantitative precision is required.

As distinguished from X-ray diffraction which gives precise data about atomic structure, Fluorescence Analysis provides precise quantitative and qualitative data with respect to the elements present. Difficult analyses involving solids, semi-solids and liquids can be carried out in much less time than when ordinary chemical methods are employed. Moreover, Fluorescence Analysis is entirely non-destructive and permits analysis of very small speciments.

Textron Incorporated-Sales Estimated-

Royal Little, Preisdent, on Oct. 1 said in part:

"The company estimates third quarter sales of \$20,500,000 and a net loss of approximately \$325,000 after taxes and minority interests. This estimate brings sales for the nine months' period ended Sept. 30, 1951 to \$69,697,000, and net profits after taxes and minority interests to about \$3,600,000.

"Since it now appears that the corporation's 1951 carnings will not be subject to excess profits taxes, the tax provision for the nine months' period has been adjusted to an amount based upon the normal and surtax rates in the new tax bill presently undergoing consideration by Congress. This has improved estimatesd earnings by about \$200,000.

"Textron's current unfilled orders exceed \$27,500,000, of which about 70% is for various defense agencies.
"In view of existing conditions, the sheet and blanket operations

at Nashua, N. H., will be run out prior to end of this year.
"It is contemplated that all short-term bank borrowings will be retired prior to the end of the year, and that the corportaion will enter the new year in good finacial condition."-V. 174, p. 407.

Thermoid Co., Trenton, N. J .- Acquisition-

The company has acquired control of one of the oldest Mercer County (N. J.) rubber manufacturing companies, the Essex Rubber Co., according to Fred E. Schluter, President.

The Essex plant occupies four acres and is engaged in the manufacture of molded rubber products, including soles and heels, items which will supplement Thermoid's line. Additional capacity may be used to increase output of Thermoid's standard items for automotive and other industrial uses. The Essex rubber reclaim plant will become a new local source of raw material for Thermoid.

The announcement added that sales of Essex Rubber are running at the rate of \$3,000,000 annually. Thermoid's cash outlay will not exceed \$500,000 including purchase of the controlling shares as well as liquidation of a substantial part of the smaller company's indebtedness. dation of a sul V. 172, p. 2129.

Toledo Edison Co.—Preferred Stock Offered—The First Boston Corp. and Collin, North & Co. headed an investment banking group which publicly offered on Oct. 3 a new issue of 50,000 shares of 4.56% cumulative preferred stock at par (\$100 per share), plus accrued dividends from Sept. 1, 1951.

The new stock is redeemable on or prior to Sept. 1, 1956 at 104 and thereafter at prices scaling down to 101.

PROCEEDS—The net proceeds will be applied to construction expenses.

BUSINESS—Supplying electricity in an area of approximately 2,500 square miles in and around Toledo, Ohio, the fourth largest city in the State, the company is required to expand the generating capability of its system substantially as the area continues to experience rapid industrial growth. With the oil and glass industries in this large railroad center alone earmarking \$90,000,000 for postwar expansion, the utility through construction expenditures of \$C0,500,000 during the next five years, will increase its system's capability from 368,000 kilowatts to 475,000 kilowatts.

While approximately one-half of the estimated \$60,500,000 for utility expansion will come from additional financing in the future, the balance will be derived from the proceeds from the current sale, from funds on hand and derived from depreciation reserves and retained earnings, and from a revolving credit agreement.

It is anticipated that about \$30,000,000 of the \$80,500,000 required to complete the company's program through 1955 will have to be raised from the sale of securities of types and in amounts which will be determined in the light of then existing conditions. It is expected that the balance will be provided from funds on hand, funds derived from depreciation reserves and retained earnings during the period, the net proceeds of the sale of the new preferred stock, and proceeds from the revolving credit agreement.

Complete and exact details for the week covered by the foregoing will appear in our issue of next week. We cannot furnish them today, inasmuch as the week ends Saturday and the Saturday figures are not available at time of going to press. Accordingly, in the above, the last day of the week in all cases has to be estimated.

In the elaborate detailed statement, however, which we present further below, we are able to give final and complete results of the previous week—the week ended Sept. 29. For that week there was an increase of 4.6%, the aggregate of clearings for the whole country having amounted to \$17,483,201,954 against \$16,715,428,049 in the same week in 1950. Outside of this city there was a gain of 6.4%, the bank clearings at this center having recorded a gain of 2.7%. We group the cities according to the Federal Reserve Districts in which they are located and from this it appears that in the New York District (including this city) the totals show an improvement of 2.7%, in the Boston Reserve District of 7.3% and in the Philadelphia Reserve District of 0.4%. In the Cleveland Reserve District the totals are larger by 0.8%, in the Richmond Reserve District by 13.0% and in the Atlanta Reserve District by 14.2%. The Chicago Reserve District has to its credit an increase of 6.1%, the St. Louis Reserve District of 2.6% and the Minneapolis Reserve District of 7.5%. In the Kansas City Reserve District the totals record a gain of 7.4%, in the Dallas Reserve District of 12.0% and in the San Francisco Reserve District of 10.6%.

Tung-Sol Lamp Works, Inc.—Name Changed—
The name of this corporation was changed to Tung-Sol Electric, Inc. effective Oct. 1. The change has been approved by the stockholders on March 26, 1951.

Although still an important producer of the original miniature lamps, Tung-Sol now also manufactures a wide variety of items for the automotive, communications, transportation, and electronic industries. The company's principal products include cathode ray tubes for television, sealed beam headlights, automobile direction signal flashers, radio tubes and highly technical devices used by the armed forces.

The diversification of Tung-Sol is well illustrated by the fact that of its plants, two produce electron and cathode ray tubes, one makes miniature incandescent lamps, another sealed beam headlights, and another signal flashers. The company's sixth and newest plant will soon be ready to produce subminiature electron tubes.—V. 174, p. 456.

Ultrasonic Corp.—Stock Offered—Coffin, Betz & Co. on Oct. 1 publicly offered 100,000 shares of \$5 par value common stock at \$14.75 per share on a "best efforts basis."

common stock at \$14.75 per share on a "best efforts basis."

PROCEEDS—If all of the stock is sold, proceeds will be used to purchase stock of the S. A. Woods Machine Co. on which Ultrasonic Corp. has acquired options to purchase over 95% of the outstanding capital stock at an aggregate price of \$2,200,000 for all of the outstanding Woods stock. If only 25,000 shares are sold the company intends to apply the proceeds either to the purchase or construction of a plant having at least 25,000 square feet of floor space suitable for the company's intended operations, in or near Boston, Mass., or to the purchase of the assets or stock of some other manufacturing concern which owns such a plant.

BUSINESS—Ultrasonic Corp., incorporated in Massachusetts on Oct. 11, 1945, is engaged in the development and manufacture of sound generating mechanisms and processes adapting such mechanisms to industrial use, and in the development and manufacture of computers for navigational control of guided missiles and of associated gun-fibre control equipment for the armed services.

Woods was incorporated in Massachusetts in 1873. It is a principal

gun-libre control equipment for the armed services.

Woods was incorporated in Massachusetts in 1873. It is a principal manufacturer and distributor of precision machinery and electric motors for use in the lumber and machine tool industries. The company presently has no manufacturing facilities in which to fabricate the equipment which it designs, and accordingly, has been subcontracting an expanding volume of such manufacturing work, concerning itself solely with final assembly and test of such equipment. The present business operations of Woods, which the company intends to continue (through Woods as a subsidiary) after the purchase, have no direct connection with its own business operations.

NOTE—On Aug. 31, 1951, the company had outstanding \$74,000 of 5% convertible debentures, due Jan. 1, 1960. The debentures are are deemable by the company at any time at 110% of their principal amount plus accrued interest. They are convertible at any time at the option of the holders into common stock of the company at the rate of 13½ shares of common stock for each \$100 principal amount of debentures. Since this rate is the equivalent of approximately \$7.50 per share and since the market price of the common stock of the company is substantially in excess of that sum, the company anticipates that all its debentures will be converted into common stock prior to their redemption. The company has agreed with the underwriter that it will call such debentures for redemption within 30 days after the company has received the net proceeds of the sale of 25,000 shares of the new common stock. To the extent, if any, that debentures are presented for rdemption and not converted, the net proceeds of the sale of the new common stock will be applied to the redemption of such debentures.—V. 174, p. 943.

United Wallpaper, Inc.-To Diversify Operations

United Wallpaper, Inc.—To Diversify Operations—At the 24th annual meeting of stockholders, William H. Yates, President, told stockholders that, as a result of the alternating years of profit and loss under the two year line policy followed by the company since the end of World War II, it was obvious that the company must return to the pre-war practice of issuing new lines of wallpaper on a year basis instead of every two years. With this, and the expected effect of the company's diversification program, he hoped profit potentials will be leveled out so that the payment of dividends on the company's common stock can be resumed.

Mr. Yates further said in part: "The management and board of directors concluded that it is of the utmost importance for the company to diversify its operations. Intensive efforts are being made to develop and acquire other items in the paper and kindred fields, such as specialty paper coatings, containers and color products. The company has made promising developments with a pastic coated paper container which will have a field test shortly."—V. 173, p. 765.
