Allied Electric Products, Inc.—Notes Offered—Hill, Thompson & Co., Inc., on Nov. 9 offered "on a best efforts basis" $225,000 of 3-year convertible 6% notes, dated Nov. 1, 1951, and due Nov. 1, 1954, at 100% and accrued interest. The preferred and common stockholders were given the first opportunity to purchase the notes at the offering price on a first-come, first-served basis, subject to allotment.

These notes will be in denominations of $100, $500 and $1,000; will be fully registered; convertible into common shares at the rate of 20 shares per $100 note; callable on 30 days' notice at 110% during the first year, at 107½% during the second year, and at 105% during the third year, whether such call is in entirety or in part or for sinking fund purposes. If any notes are called prior to Nov. 1, 1952, the holder will receive a warrant entitling him to subscribe to common shares on the same terms as the conversion terms until Nov. 1, 1952.

The notes will be entitled to the benefit of a sinking fund equivalent to 25% of annual net earnings of the company after taxes, calculated from July 1, 1951, but not to exceed $75,000 in any one year, such sinking fund to be applied to the purchase or call of notes within four months after the end of the fiscal year. It is probable that the company within a short time will register with the SEC a larger issue of long-term convertible debentures. If so, such issue will provide that holders of the notes presently offered may exchange their notes for such new debentures, if they desire.

PROCEEDS—The net proceeds are to be used as working capital. During the past fiscal year, the company has expended over $1,000,000 for new equipment and improvements.

STOCK OPTIONS—Nathan Chirelstein, Chairman of the Board, has agreed personally to sell to the underwriters on certain conditions at five cents per share, total $750, options to purchase up to a total of 15,000 common shares owned by him at $5 per share, such option to be exercisable after Dec. 1, 1952 and prior to June 1, 1053.—V. 174, p. 1689.

Bausch & Lomb Optical Co.—Earnings Higher—

Joseph F. Taylor, President, on Nov. 20 said:

"Based on present estimates, the consolidated earnings for the current year will exceed those reported for any year since the peak of World War II. Higher sales volume and increased Federal income taxes cause a considerable drain on the cash resources of the company, making it essential to retain a substantial amount of current earnings in the business. However, it is desired to establish a regular dividend policy on the common stock and it is hoped that payments may be augmented from time to time if conditions warrant."

A dividend of 15 cents per share was declared on the common stock, payable Jan. 15 to holders of record Jan. 2.—V. 174, p. 1736.

Chicago, Rock Island & Pacific RR.—Conversion—

The company on Nov. 23 accepted delivery of the last of 15 locomotives which will make possible the complete dieselization of the suburban system by Dec. 17, when new schedules will become effective. All the new engines were manufactured by American Locomotive Co. and General Electric Co. in Schenectady, New York, and have been delivered during November.

The changeover from steam to diesel service will affect some 25,000 to 30,000 Rock Island commuters who make the daily round trip between Chicago, Blue Island and Joliet.

The 15 new diesels, each capable of 80 m.p.h. speed, cost more than $2,600,000. The new equipment, plus two others already in service, will replace 28 steam-type locomotives which originally powered the suburban service.—V. 174, p. 1787.

Chicago & Southern Air Lines, Inc. — Plans to Terminates Voting Trust Agreement—

Plans have been made to terminate the voting trust agreement, under which Carleton Putnam, Chairman of the Board, has been the sole voting trustee of the certificate holders. Mr. Putnam also announced that transfer taxes involved in the exchange of outstanding voting trust certificates for the underlying common shares, where the common is reissued without change in the name of the present voting trust certificate holders, will be borne by the company for all holdings exchanged through March 5, 1952. —V. 174, p. 1402.

The company has drawn by lot for redemption on March 1, 1952, $496,000 of first and refunding mortgage 4½% series D, sinking fund bonds, due Sept. 1, 1962. Payment in the principal amount plus accrued interest will be made at the Bankers Trust Co., New York City.—V. 173, p. 2387.

Capital Flotations in the United States in September And for the Nine Months of Calendar Year 1951

New corporate issues brought out in September totaled $356,892,272, compared with the much smaller sum of $267,557,336, placed in August of this year and the somewhat larger sum of $334,822,984 in September, 1950.

A perusal of the figures for the current month shows a sharp upturn in long-term bond and note financing as well as short-term undertakings as compared with the total for August, last, but with respect to stock financing the trend was in the opposite direction and amounted to a little less than half of August's stock volume. For the month of September a year ago the difference is not so pronounced.

The total of all corporate issues to come upon the market in September of this year, including those placed privately that have come to light, revealed that $337,157,272, or 94.47% represented new funds, while only $19,735,000, or 5.53%, was raised for refunding purposes. It is a coincidence that the refunding total for September closely approximates that of August, last.

Breaking down the over-all total for September of the current year, we find that $293,070,000, or 82.12%, represented long-term bonds and notes, while stock offerings amounted to only $62,532,272, or 17.52%. Studying the stock total further, it is found that $36,914,860, or 10.34%, comprised the month's preferred stock placements and $25,617,412, or 7.18%, made up the common stock total.

Short-term bond and note financing during September was small with respect to the number of issues placed and insofar as dollar volume was concerned, amounting to only $1,290,000. Nonetheless, it was substantially higher than the August total, which aggregated only $250,000.

Public utility financing in September recaptured its leadership by a slim margin from the other industrial and manufacturing category and totaled $148,569,050, or 41.63%, of the month's over-all financing. The latter group amounted to $141,342,003, or 39.60%. Railroads came next in order totaling $33,320,000, or 9.34%, of the month's total; miscellaneous, $15,629,969, or 4.38%; oil, $14,125,000, or 3.96%; land, buildings, etc., $3,350,000, or 0.94%, and iron, steel, etc., the minute sum of $556,250.

Supplementing our own figures on utility financing for the nine months of this year, we present for our readers' interest, an analysis of the American Gas Association, which reports that "the total volume of new capital financing by gas utilities in the first nine months of 1951 already has exceeded the total amount raised in the entire calendar year of 1950, the previous peak for the gas industry. A recent tabulation by the A.G.A. Bureau of Statistics indicates that construction expenditures during the current year are running ahead of last year's despite shortages of steel pipe and other vital materials. Capital raised from internal sources will not change substantially from that in 1950.

"New capital financing during the first nine months of 1951 by straight gas utilities and pipeline companies aggregated $799 million, with $751 million of this amount being raised by natural gas companies. This represents a gain of $43 million, or 5.7%, for straight gas companies in nine months over the $756 million raised by these companies in the full year 1950. New capital raised by straight natural gas companies in nine months this year was $42 million, or 5.9%, ahead of the $709 million raised by natural gas companies in the calendar year 1950.

"These totals exclude the financing activities of combination companies which distribute electricity as well as gas, since there is no way to determine amounts required for the respective operations of these companies. During the first nine months of 1951 the combination utilities raised $551 million. It is probable that the total financing of these companies in 1951 will reach the $811 million raised in 1950."

Large corporate offerings in September were lacking for the most part and the few outstanding issues for the month, that is as to size, included the $45,000,000 issue of the Tennessee Gas Transmission Co. 3½% first mortgage pipe line bonds; $20,000,000 Texas Eastern Transmission Corp., 3⅛% first mortgage pipe line bonds, and the $20,000,000 offering of 4½% 15-year sinking fund debentures of the National Container Corp.

Corporate issues placed privately with insurance companies and others in September comprised 35 in number for an aggregate total of $136,949,360. This represented 38.37% of the month's total and compared with $104,885,750 made up of 37 issues in August of the current year.

Corporate issues placed privately in the nine months of 1951 follow:

	No. of Issues	Total Amount	% of Total
January	31	$67,758,250	26.26
February	30	169,016,591	42.64
March	32	131,971,250	15.02

August	37	104,885,750	39.20
September	35	136,949,360	38.37

Municipal financing in September amounted to $268,915,210, reflecting a sharp increase over the August total of $151,422,908.

One Canadian Government offering was placed in the United States in September and consisted of the $50,000,000 issue of the Province of Ontario, 21-year 3¼% debentures, due Sept. 1, 1972. The proceeds of this offering are to be used for construction purposes.

No financing by United States Possessions was undertaken in this country during September.

Total municipal financing for the nine months of 1951 is set forth below:

	New	Refunding	Total
January	$153,524,409	$19,394,000	$172,918,409

Total	$2,142,205,182	$50,868,015	$2,193,073,197

Below we present a tabulation of figures since January, 1949, showing the different monthly amounts of corporate financing. Further revisions in the 1950 and 1951 figures may be necessary, particularly as additional private financing is brought to light.

The Secretary of the Treasury announced on Sept. 14 that $582,994,000 subscriptions were received and allotted to the offering of 1⅞% Treasury Certificates of Indebtedness of Series C-1952 in exchange for 3% Treasury Bonds of 1951-55, in the amount of $755,429,000, which were called for redemption on Sept. 15. The balance of the Treasury Notes outstanding were redeemed for cash.

Secretary of the Treasury Snyder announced on Sept. 26 that subscription books opened on Oct. 1 for the exchange of the 1¼% Treasury Notes of Series F-1951, maturing Oct. 15, 1951, in the amount of $5,940,578,000, and the 1¼% Treasury Notes of Series G-1951, maturing Nov. 1, 1951, in the amount of $5,253,075,000.

The holders of these securities were offered a 1⅞% certificate of indebtedness dated Oct. 15, 1951, and to mature Oct. 1, 1952. In the case of the November 1 notes exchanged, interest will be adjusted to Oct. 15.

The Secretary of the Treasury announced on Aug. 13 that all outstanding 2¼% Treasury Bonds of 1951-53, dated Dec. 22, 1939, due Dec. 15, 1953, are called for redemption on Dec. 15, 1951. There are now outstanding $1,113,051,100 of these bonds.

The 2% Treasury Bonds of 1951-55, which are also callable on Dec. 15, 1951, will not be called for redemption on that date.

The Treasury Department in September outside of the above, confined its operations to the usual weekly sale of Treasury Bills, Savings Bonds, Tax Anticipation Notes and Depositary Bonds.

Columbia Gas System, Inc.—Stock Offering—The corporation is offering its common stockholders rights to subscribe to 1,501,826 additional shares of common stock (no par) at $14.25 per share on the basis of one additional share for each 10 shares held on Nov. 26, 1951. Each common shareholder is entitled at the time of the exercise of his warrants to subscribe for any additional shares covered by outstanding warrants which are not exercised, subject to allotment in the event that the total issue is oversubscribed. An underwriting group headed jointly by Merrill Lynch, Pierce, Fenner & Beane, White, Weld & Co. and R. W. Pressprich & Co. will purchase any of the unsubscribed shares when the rights expire on Dec. 12. The bankers were awarded the issue on Nov. 26 naming an underwriting compensation of $389,474, or approximately 25.93 cents per share.

Morgan Stanley & Co. and associates asked for an underwriting compensation of 92½ cents per share.

PROCEEDS—Proceeds from the sale of these additional common shares will be applied toward the cost of the company's 1951 construction program which is presently estimated at $73,600,000. In order that the system's construction program might not be delayed, the corporation has arranged with commercial banks whereby it may borrow from time to time, prior to Dec. 15, 1951, amounts aggregating up to $15,000,000. In connection therewith, the corporation will issue 2¾% notes due June 15, 1952. Such amounts as may be borrowed under this arrangement may be repaid prior to maturity and the corporation intends to utilize promptly a portion of the proceeds from the sale of the new common stock for this purpose.

BUSINESS—The corporation is an interconnected unit which, at Dec. 31, 1950, operated 32,560 miles of gas transmission, distribution and field gathering pipe lines, 125 gas compressor stations with a total of 230,926 horsepower, 12 liquefied petroleum gas plants, 32 underground storage reservoirs and 9,718 gas wells (including storage wells). In connection with its gas utility business, the system also conducts gasoline and oil operations and, at Dec. 31, 1950, operated 14 gasoline extraction plants and 1,512 oil wells.

The system sells gas at retail in 1,250 communities to approximately 1,127,000 residential, commercial and industrial customers. In the aggregate the utility companies which purchase gas at wholesale from the System serve approximately 1,400,000 retail customers.

Ford Motor Co., Dearborn, Mich.—To Start Mining Operations—

This company and the Cleveland-Cliffs Iron Co., Cleveland, Ohio, soon will begin mining operations to produce 400,000 tons of concentrated iron ore a year from the Marquette Range at Humboldt, Mich., on a property which has lain dormant to commercial mining since 1920.

The crude ore will be mined from an open pit and passed through concentrating units which will produce a product substantially higher in iron content than the ores now being commercially mined in the Lake Superior region.

First of the concentrating units will be capable of producing 200,000 tons annually. Development of the property will begin immediately and capacity production is expected by late in 1953. A second unit of similar capacity is scheduled to be in operation by 1955.

It is also planned to build another plant at a later date to agglomerate the ore concentrate into pellets suitable for use in both open hearth and blast furnaces. However, shipments of iron ore concentrates to Ford will begin as soon as the first concentrating unit is completed. Ford will mix these concentrates in its new sintering plant to produce enriched sinter which will be used for the production of iron and steel. Ford uses 2,000,000 tons of ore a year.

A new company, owned jointly by Ford and Cleveland-Cliffs, will be formed to undertake the development and operation of the property which will be known as the Humboldt Mine.

Approximately 1,100,000 tons of direct shipping ore were mined from the Humboldt property between 1865 and 1920.—V. 174, p. 1788.

The corporation on Nov. 23 filed a registration statement with the SEC covering $2,500,000 convertible sinking fund, debentures, due 1966, and 100,000 shares of common stock, 50 cents par value.

The debentures are to be offered for public sale by the company at 100% of principal amount. The public offering price of the common shares, and the underwriting terms for both issues, are to be supplied by amendment. Barrett Herrick & Co., Inc., New York, is named as the principal underwriter.

The company is said to be one of the three leading producers of oil filtration equipment for use on internal combustion engines. It proposes to use the proceeds of the debenture sale to retire approximately $1,530,000 of notes, bank loans, and other indebtedness, and to use the balance for working capital and general corporate expenditures.

Discussing military work, Mr. Fruehauf said:

"Because of security regulations it is difficult to say much about the defense work we have contracted for, except that actual contracts so far are in excess of $50,000,000 with more to come.

"This is in addition to, and not substituting for, our civilian business. For civilian business the industry is working on allocation."—V. 174, p. 1989.

Ratio of current assets to current liabilities is better than 4-to-1. During the year under review additions to fixed assets aggregated $3,033,382, bank loans of $3,300,000 were paid off and shareholders received $11,544,592, or $4 a share, in dividends. Earned surplus at Aug. 31, 1951, totals $131,216,523. The $3,072,500 funded debt of the Scottish subsidiary is the company's only long-term obligation.—V. 174, p. 188.

Hooker Electrochemical Co.—To Build New Plant—

The company plans to build a new $10,000,000 plant for the manufacture of chlorine and caustic soda at Montague, Mich., it was announced on Nov. 28 by R. L. Murray, President. The new plant is expected to be in operation by the end of 1953, with a yearly production rate of approximately 100,000 tons of all products, the announcement stated. Output of this plant is intended to serve midwest industry. Total plant area, including a brine field, comprises over 400 acres.

Natural gas discovered during the exploratory drilling indicates a possibility of sufficient gas to meet fuel requirements of the plant. The gas field is being proven by Taggart Brothers Gas Co. of Big Rapids, Mich. If a commercial gas field develops, arrangements have been made whereby Hooker will have first rights to its use.—V. 174, p. 1297.

BUSINESS—The company was organized on Oct. 31, 1951, in Delaware for the purpose of acquiring all of the issued and outstanding stock of Hycon Mfg. Co. (Calif.). The California company and the Delaware company will be merged and the surviving Delaware corporation will thereby have acquired all of the assets and liabilities of the constituent California corporation. At that time the name of the Delaware corporation will become Hycon Mfg. Co.

The California corporation was organized on Aug. 22, 1946. Its business consisted of the manufacture of aircraft parts and accessories until June of 1948. At that time the present management assumed control of the company. The company then began a program of design and manufacture of electronic and radar equipment, guided missile components, aerial photographic equipment and ordnance products. A number of products developed by the company since July, 1948, are considered to have valuable proprietary patent rights.

The company owns and operates a plant facility at 2961 East Colorado St., Pasadena, Calif., consisting of a modern concrete and steel factory building of approximately 35,000 square feet of floor area. At present the factory building, land and equipment are pledged as security for a Reconstruction Finance Corporation loan of $230,000, dated April 2, 1951.

The company also participates, under a joint venture ordnance program described below, in the operation of two additional plants occupying leased premises. One of these plants is in a modern building with a floor area of approximately 35,000 square feet at 707 South Raymond St., Pasadena, while the other is at 321 South Arroyo Parkway, Pasadena, occupying approximately 22,000 square feet.

The backlog of orders and letter awards held by the company at present exceeds $10,000,000, of which approximately $6,000,000 represents the company's half interest in an ordnance manufacturing program held jointly by Hycon and Oedekerk & Ludwig, Inc. Other items in the company backlog include prime contracts with the U. S. Navy, Air Force, Army, Civil Aeronautics Authority and other government agencies, in addition to contracts with Consolidated Vultee Aircraft Corp., Gilfillan Bros., Inc., Johns Hopkins University Applied Physics Laboratory and Consolidated Engineering Corp.

At present the company is manufacturing products which are either directly or indirectly for use by the United States Government. A normal flow of additional orders both directly from the government and from other prime contractors is regularly received, although no assurance can be given as to additional orders. Existing orders are subject to the standard terms of cancellation and termination clauses found in government contracts.

The company's sales in 1948 were $260,222, upon which losses of $87,321 were incurred. In 1949, sales amounted to $404,428 with a net profit of $11,587. Sales during 1950 were $1,411,739 with net profit of $103,298 after taxes of $1,900. Sales for the first nine months of 1951 were $1,485,045 with estimated net profit of $32,724 after various reserves including taxes.

Hycon Mfg. Co. owns a 50% interest in: Hycon-Oedekerk & Ludwig (joint venture) as follows—50% is owned by the company, 50% is owned by Oedekerk & Ludwig, Inc., a California corporation. Obligations of the joint venture are jointly guaranteed by the two corporations, principal obligations being $155,000 in two-year notes outstanding dated June 7, 1951, and due in June, 1953. The present stockholders of Hycon Mfg. Co. have jointly and severally guaranteed these obligations.

Hycon-Oedekerk & Ludwig is engaged in manufacturing and engineering related to ordnance devices including rockets.—V. 174, p. 1990.

The company also seeks authorization to issue and sell, or renew, unsecured notes in the aggregate amount of $3,400,000 outstanding at any time; such notes will not be part of a public offering.

The company states that its cash working funds have been reduced below a satisfactory level by reason of substantial construction expenditures out of its working funds; that the proceeds from the sale of new notes will be used for new construction or to repay notes whose proceeds were so used, or to reimburse the company's treasury for construction expenditures.

The company also states that it has had protracted negotiations, now in prospect of early consummation, for the sale of its gas properties; and that the net proceeds of such sale are expected to approximate $15,000,000, which would be deposited with the indenture trustee under the mortgage covering the company's physical properties.

The SEC has given interested persons until Dec. 3, 1951, to request a hearing upon the application.—V. 174, p. 1990.

Kaiser Aluminum & Chemical Corp.—Registers With Securities and Exchange Commission—

The corporation on Nov. 27 filed a registration statement with the SEC covering 350,000 shares of cumulative preferred stock ($50 par), convertible through 1961.

The stock is to be offered for public sale through an underwriting group headed by The First Boston Corporation and Dean Witter & Co. The public offering price and underwriting terms, as well as the conversion rate, are to be supplied by amendment.

The company is engaged in a major two-part expansion program. The first, estimated to cost $89,350,000, was commenced early in 1951, and includes the construction at Chalmette, near New Orleans, La. of a 100,000 ton reduction plant which, including power generating facilities, is estimated to cost $74,800,000. The second part, estimated to cost $100,000,000 includes the construction at Chalmette of additional reduction facilities, also to have an annual capacity of 100,000 tons of primary aluminum and, estimated to cost, including power generating facilities, $73,500,000; the construction of additional facilities, estimated to cost $16,000,000, at the Baton Rouge alumina plant; the installation, at a cost of $2,000,000, of additional equipment in Jamaica to increase the production of bauxite; and installation at the Mead reduction plant of an eighth potline, estimated to cost $8,000,000.

Net proceeds of the preferred stock sale will be used to finance in part the second phase of the expansion program. The company expects that of the amount required to meet the balance of the cost thereof, $33,500,000 will be obtained from the sale to institutional investors of first mortgage bonds, series due 1976, and $50,000,000 will be obtained from borrowings under a bank loan agreement under which the present bank borrowings will also be refinanced.

In February, 1951, the company contracted to sell $75,000,000 of first mortgage bonds, 3⅜% series due 1976, to institutional investors, and borrowed $40,000,000 from banks. Out of the bank loans it paid $33,394,250, plus accrued interest, which, together with a $4,000,000 promissory note, satisfied the then unpaid balance of the purchase price of certain of its aluminum plants. The balance of the proceeds from such financing, together with retained earnings and provisions for depreciation and amortization, is considered sufficient to finance the first phase of the expansion program.—V. 174, p. 1990.

Kalamazoo Stove & Furnace Co.—May Sell Stove Operations—

The directors have "under serious consideration" a proposal by another company to acquire the stove portion of Kalamazoo's business, A. L. Blakeslee, President, announced on Nov. 28. The sale would require approval of a majority of the firm's shareholders.

If this portion of the company's business is sold, it will leave a complete line of furnaces. The Kalamazoo firm also has a substantial volume of war work, a major part of which is processing armour plate for tanks.—V. 170, p. 107.

(M. W.) Kellogg Co.—Unit Awarded Contract—

The great importance of phenol to Canada's rapidly expanding industrial economy was underlined on Nov. 23 by the announcement that the Canadian Kellogg Co., Ltd., a subsidiary, has been awarded a multi-million dollar contract for a unique phenol plant at Montreal, Canada, for B. A.-Shawinigan Ltd., a new company jointly owned by the British American Oil Co., Ltd. and Shawinigan Chemicals Ltd.

According to the Kellogg Company, the new plant, which will produce 13 million pounds of phenol annually, will be the first commercial unit of its type. It employs a process under license from the Hercules Powder Co., of Wilmington, Del., and Distillers Ltd., London, by which cumene, a petroleum derivative, is oxidized to produce both phenol and acetone. Cumene will be piped from the Montreal refinery of British American Oil Co., Ltd.

Both phenol and acetone, upon completion of the unit, will be available for sale to Canadian industry and for export. Both are used in the manufacture of plastics and many other commercial products. —V. 173, p. 1377.

Niagara Mohawk Power Corp.—Registers With SEC—

The corporation on Nov. 27 filed a registration statement with the SEC covering its bond and common stock financing proposal, under which the company proposes to issue and sell $15,000,000 of general mortgage bonds, series due 1981, and 1,000,000 shares of no par common stock, at competitive bidding. Net proceeds will be used to finance in part the company's 1951-52 construction program and to pay $35,000,000 of loans borrowed for construction in 1951. —V. 174, p. 1992.

Northern Indiana Public Service Co.—Stock Offering

—Mention was made in our issue of Nov. 26 of the offering of 240,000 shares of 4.56% cumulative preference stock (par $25) at $24 per share to common stockholders of record Nov. 9 at the rate of one preference share for each 12½ shares of common stock held. Rights expire at 2 p.m. (CST) on December 3.

The 4.56% preference stock is junior to the preferred stock; is convertible at any time to and including Dec. 1, 1961 into common stock on a share-for-share basis; and is redeemable, all or in part, at $25.50 per share on or before Dec. 1, 1952; at $25.37½ per share thereafter and on or before Dec. 1, 1953; at $25.25 per share thereafter and on or before Dec. 1, 1954; at $25.12½ per share thereafter and on or before Dec. 1, 1955, and at $25 per share thereafter, plus in all cases accrued dividends. There is no sinking fund provision.

PROCEEDS—The net proceeds from the sale of the $25 par cumulative preference stock will be applied to the cost of the construction program in which the company is engaged, including the prepayment of bank loans of $3,000,000. The proceeds of the bank loan were added to working capital, thereby enabling the company to carry on the construction program.

CONSTRUCTION PROGRAM—The latest revision of the construction program, based on current prices, contemplates expenditures for construction estimated at $20,000,000 in 1952 and $21,000,000 in 1953. It is estimated that about $15,000,000 of the $41,000,000 required to carry out this program will be provided out of cash resources, the proceeds from the sale of shares of the new $25 par cumulative preference stock, depreciation accruals and undistributed earnings over the period. The balance of approximately $26,000,000 will be obtained from the sale of additional securities of the company. Neither the kind of additional securities nor the time or times at which they will be offered for sale has as yet been determined. The nature of such financing will depend on conditions at the time such financing is undertaken. It is believed that a substantial part of the funds will be raised by the issuance and sale of bonds, notes or other securities having priority over the securities now offered.

M. W. Clements, Chairman of the Board, will retire from that position at the end of this year after serving the company for more than half a century.—V. 174, p. 1993.

Pennsylvania Salt Mfg. Co.—New Chlorine Unit—

Beginning the second major step in the development of its Calvert City, Ky., works, this company on Nov. 29 announced it will add new facilities, including an electrolytic chlorine-caustic soda unit, at an estimated cost of $8,000,000.

As the first step, Pennsalt completed a hydrofluoric acid and sulfuric acid plant in 1949 on its Tennessee River location near TVA's Kentucky Dam. These facilities have been expanded by the addition, in 1950, of a unit to produce and products from captive hydrofluoric acid and, now nearing completion, a 33% increase in hydrofluoric acid capacity.

Addition of the new unit will combine at one works four basic chemicals—hydrofluoric acid, sulfuric acid, chlorine and caustic soda, the first combination of these four products in one works in the United States.

In the development of Calvert City as an integrated center of chemical industry, it was pointed out that Air Reduction Co., Inc., is building a calcium carbide and acetylene plant in the same area. Availability of such basic chemicals in combination will probably attract further chemical production to the area. The B. F. Goodrich Chemical Co. also has announced plans to build a vinyl chloride plant on property adjacent to that of both Pennsalt and Air Reduction.

In addition to production of chlorine and caustic soda, the new unit will also include facilities for producing anhydrous hydrochloric acid, and additional facilities designed for further expansion.

Preliminary work has already started and it is expected that the new plant will go into operation in early 1953.—V. 174, p. 1895.

Pubco Development, Inc. (N. M.)—Warrants Issued—

See Public Service Co. of New Mexico below.—V. 174, p. 1199.

Public Service Co. of New Mexico—Common Stockholders Given Rights to Pubco Stock—The company on Oct. 11 offered to the holders of its common stock the right to purchase one share of common stock of Pubco Development, Inc., for each share of Public Service owned and held of record at the close of business on Oct. 1, 1951, on the basis of one share of Pubco stock for each Public Service common share held. Such right is exercisable between Jan. 1, 1955, and March 31, 1955, inclusive, subject to the right of the directors to change the date or dates for the exercise of said warrants. The subscription price is at par ($1 per share). The warrants were issued at no cost to common stockholders of Public Service.

Pubco Development, Inc. was incorporated in New Mexico on June 4, 1951, primarily for the purpose of producing, transporting and selling natural gas within the State of New Mexico.

Pubco is authorized and intends to acquire by purchase, lease, or otherwise, lands in New Mexico for the purpose of prospecting for and obtaining gas, oil, or other minerals, and to that end to drill gas and/or oil wells thereon, and acquire drilling rigs and other

gitized for FRASER

machinery or apparatus necessary to fully accomplish these purposes. When gas, oil, or other minerals are found, Pubco is authorized and intends to market same to the best advantage. In connection with its business as an oil and gas producing company, Pubco is also authorized and intends to engage in a general gas and oil business by buying, selling, or otherwise trading in mineral leases, lands, and/or the products or by-products of mineral lands.

As of Aug. 17, 1951, the company had acquired 6,495 acres of undeveloped oil and gas leases in San Juan and Rio Arriba Counties, New Mexico, of which 3,078 acres may be considered as situated in proven areas and 3,417 acres may be considered as situated in possibly productive areas for natural gas production. Pubco is now engaged in negotiations for additional oil and gas leases in San Juan and Rio Arriba Counties, New Mexico. Pubco's development program is just now being initiated. Its first well, which is now being drilled, is located in the Blanco—La Plata Field in San Juan County, N. M., and is expected to be completed during 1951. The company plans to drill two additional wells in the Blanco—La Plata Field during 1951.

Pubco does not anticipate any difficulties in marketing gas developed on its leases, as preliminary investigation reveals that connections with the company's wells can be had with gas pipelines in the area. Any oil production which may be developed incident to the company's initial efforts to develop gas production can, in the opinion of the officers of the company, be readily marketed subject to applicable regulations of all governmental agencies having jurisdiction; however, as yet no oil has been discovered in any Mesaverde wells in this area.

CAPITALIZATION OF PUBCO GIVING EFFECT TO EXERCISE OF RIGHTS

	Authorized	Outstanding
Common stock (par $1)	1,000,000 shs.	605,978 shs.

Public Service Co. of New Mexico now owns the entire 605,978 shares of Pubco's $1 par common stock outstanding. Public Service intends to own and hold the entire 605,978 shares until Jan. 1, 1955, or such earlier date as may be determined by the directors of Public Service. The New York Trust Co., New York, N. Y. and Albuquerque National Bank, Albuquerque, N. M., have been designated as transfer agents and the Irving Trust Co., New York, N. Y. and the First National Bank in Albuquerque, N. M., as registrars to handle the issue and distribution of these warrants.

PROCEEDS—All of the proceeds from the sale of shares have already been recieved by Pubco and the capital obtained by Pubco through this issue of 605,978 shares of said stock will be expended for retirement of existing indebtedness, acquisition of additional oil and gas leases, development of such leases and leases presently owned and for operating expenses. The following is a rough estimate of the probable division of such expenditures: repayment of Loan from Public Service, $200,000; acquisition of leases, $150,000; development of leases, $205,978; and operating expenses, $50,000. These figures are necessarily estimates and are subject to change from time to time by the directors as the best interests of the company may require. Pubco at present has no definite plans for any additional financing; however since the above figures would permit the drilling of not more than three wells, additional financing will be necessary in order to drill more than three Mesaverde wells.—V. 174, p. 1199.

St. Louis Southwestern Ry.—Declares $1 Dividend—

The directors on Nov. 26 declared a dividend of $1 per share on each share of preferred and common stock, payable to stockholders of record Nov. 26, 1951.

On account of a controversy which exists between certain preferred and common stockholders as to whether the preferred stock is participating, the directors provided that the dividend just declared should not be paid until a final judicial determination of the persons entitled thereto. The company immediately filed an interpleader suit in the Circuit Court for the City of St. Louis, Mo., to obtain such a judicial determination and named as defendants certain substantial holders of common and preferred stock as class representatives of the two classes of stock. A total of $5 has already been declared and paid on both the preferred and common this year.—V. 174, p. 1697.

Sladen-Malartic Mines Ltd.—To Distribute Assets—

The shareholders on Nov. 21 ratified a by-law authorizing the distribution of the company's assets in specie or otherwise.

M. A. Thomson, President, on Nov. 15 stated:

At the present time the assets of the company consist of: (a) approximately 2,135,000 shares of Barnat Mines, Ltd.; (b) advance to Barnat Mines Ltd. of approximately $1,000,000; (c) plant and equipment under option to Barnat Mines Ltd. for $800,000; and (d) cash and other securities having an approximate value of $100,000.

It is reasonable to assume that the option on the plant and equipment will be exercised in the near future. At the present market price for Barnat ($1.10) the total value of the assets to be distributed is approximately $4,248,500, or at the rate of $1.21 per share.

Under the plan, 1,750,000 shares of Barnat stock will be immediately distributed on the basis of one share of Barnat for each two shares of Sladen held.

It is expected that the advances to Barnat and the option price of the plant will be consolidated into some form of interest-bearing debentures, totaling $1,800,000. These debentures will be distributed on the basis of $1 for each two shares of Sladen-Malartic stock.

Upon completion of the proposed distribution there will remain in the hands of the company: (a) 385,000 shares of Barnat stock; (b) $50,000 Barnat debentures; and (c) cash and other assets having an approximate value of $100,000. At present prices these items will have a total value of $520,000.

The directors propose to divide these assets among the shareholders by issuing to each shareholder one share of stock in a new company, Sladen (Quebec) Co., for each ten shares of Sladen Malartic now outstanding.

In making the distribution of its assets at this time, the directors consider that Barnat is now well established as a profitable mining venture.—V. 167, p. 2138.

Complete and exact details for the week covered by the foregoing will appear in our issue of next week. We cannot furnish them today, inasmuch as the week ends Saturday and the Saturday figures are not available at time of going to press. Accordingly, in the above the last day of week in all cases has to be estimated.

In the elaborate detailed statement, however, which we present further below, we are able to give final and complete results of the previous week—the week ended Nov. 24. For that week there was an increase of 12.5%, the aggregate of clearings for the whole country having amounted to $16,008,303,881, against $14,226,189,069 in the same week in 1950. Outside of this city there was a gain of 10.8%, the bank clearings at this center having recorded an increase of 14.5%. We group the cities according to the Federal Reserve Districts in which they are located and from this it appears that in the New York District (including this city) the totals show an improvement of 14.3%, in the Boston Reserve District of 1.6% and in the Philadelphia Reserve District of 3.0%. In the Cleveland Reserve District the totals are larger by 10.4%, in the Richmond Reserve District by 12.7% and in the Atlanta Reserve District by 18.8%. The Chicago Reserve District has to its credit a gain of 7.3% and the Minneapolis Reserve District of 7.9%, but the St. Louis Reserve District records a loss of 0.8%. In the Kansas City Reserve District the totals show an increase of 11.6%, in the Dallas Reserve District of 62.1% and in the San Francisco Reserve District of 18.7%.

The Ohio P. U. Commission has authorized this company, a subsidiary of Ohio Fuel Gas Co., to borrow $500,000 from Northern Trust Co. of Chicago at 3½% interest, payable May 29, 1953.

The funds will be used to reimburse the company for capital expenditures already made.—V. 172, p. 1736.

Western Carolina Telephone Co.—Rights—Merger—

The stockholders of record July 16, 1951 were recently given the right to subscribe on or before Aug. 16, 1951 for 2,109 additional shares of capital stock at par ($50 per share) at the rate of one share for each two shares held. The company reserved the right to re-offer for sale, at a price or prices in no event less than $60 per share, any shares not subscribed for by stockholders. The proceeds are to be used to repay bank loans and for the company's construction program. Approximately 35% of the outstanding stock is owned by Southern Bell Telephone & Telegraph Co.

A plan for the merger of this company and of Western Carolina Telephone Co. has been arrived at between the management of the two companies and the Southern Bell Telephone & Telgraph Co., the Western Carolina Telephone Co. to be the surviving corporation. The Western Carolina stock will be split up on a basis of five new $10 par shares for each present $50 par share held. The consolidation of the two companies would be on the book value basis for each company. The Carolina Mountain company has outstanding 300,000 shares of common stock of $1 par value and the Western Carolina company has 6,327 shares of $50 par value stock outstanding.—V. 174, p. 279.

Western Leaseholds, Ltd. — Stock Sold—

The offering in the United States on Nov. 20 to 625,000 shares of common stock (no par value) at $9.60 per share (U. S. funds) was heavily oversubscribed and the books closed. Western Light & Telephone Co., Inc.—Plans Financing—

Arthur L. Mullergren, Chairman, and E. P. Hennek, President, in a letter to common stockholders on Nov. 23 said in part:

To enable this company to meet the increased requirements for utility services in the territory served, it appears that the company will have to raise about $2,000,000 through new financing to carry its construction program through the year 1952. In order to provide a portion of these funds, the company plans to offer at an early date additional shares of its common stock for subscription by the holders of its outstanding common stock on the basis of one additional share for each 22 shares held of record on a date to be set shortly before the offering is made. It is expected that the additional requirements will be secured from the sale of approximately $1,000,000 of first mortgage bonds later this year or early next year and from bank loans to be incurred from time to time as the funds are needed. [The stock offering will amount to about 14,194 shares—Ed.]

The subscription price of the additional common stock has not yet been fixed, but it is expected that it will be somewhat below the market price of the common stock prevailing at the time the offering is made to the stockholders. The rights of the holders of outstanding common stock to subscribe for the additional shares will be evidenced by transferable warrants and it is the present intention to fix a period of approximately ten days during which subscription blanks may be made.—V. 174, p. 457.

Westinghouse Electric Corp.—Places $250,000,000 Loan—The corporation has arranged to borrow $250,000,000, wtih an option for an additional $50,000,000, from a group of institutional investors, Gwilym A. Price, President, announced on Nov. 28.

The loan will finance the company's $296,000,000 expansion program and provide necessary working capital for an increased volume of business. The group of institutional investors includes insurance companies, pension funds, savings banks and universities.

"Borrowing will be made in instalments as funds are needed for the expansion program. The terms of the loan provide for issuance by Westinghouse of 3½% 30-year debentures due Dec. 15, 1981, redeemable as a whole or in part, with premium beginning in 1956," Mr. Price said, adding:

"Sinking fund payments—without premium—to provide for retirement of the debentures will amount to 5% of the total loan and will begin in 1962. However, beginning in the same year, the company may at its option redeem—without premium—up to 20% of the total loan annually."

Mr. Price pointed out that the borrowing arrangements are subject to approval by stockholders on Dec. 14 of a proposal to increase the company's authorized indebtedness from $150,000,000 to $500,000,000.

The expansion program, extending beyond 1953, is the second undertaken by Westinghouse since the end of World War II. The first program, announced in 1945 and completed by 1950 at a cost of approximately $150,000,000, increased manufacturing facilities by 50%.

The new expansion plan, which includes 37 projects, will increase productive capacity by another 50%. Major projects already undertaken as part of the new program include:

A jet engine plant at Columbus, O.; five new lamp plants; purchase of a plastics plant at Hampton, S. C.; an expanded plant for generator production at East Pittsburgh, Pa.; an aircraft-armament plant at Baltimore, Md.; electronic tube plants at Elmira and Bath, N. Y.; plants at Raritan Township, N. J., and Union City, Ind., which soon will begin manufacture of electronics equipment and small motors, respectively.

The corporation on Nov. 27 filed a registration statement with the SEC covering 500,000 shares of $12.50 par common stock to be offered under its "Restricted Stock Option Plan" to certain officers and other executive employees of Westinghouse and its subsidiaries. —V. 174, p. 1502.

White Motor Co., Cleveland, O.—4% Stock Dividend—

Robert F. Black, President, on Nov. 28 said: "The company is growing and it is necessary to retain a substantial amount of cash earnings to finance its growth, and it is likely this condition probably will continue. The payment of a stock dividend in addition to cash dividends will be considered toward the close of each year in which cash payments have been substantially less than the company's earnings." The company is paying out $2.25 per share of its 1951 earnings and is currently paying at the annual rate of $2.50 per share. A stock dividend of 4% is payable after Jan. 24, 1952, to stockholders of record Jan. 10, 1952, in addition to a cash dividend of 62½ cents per share on Dec. 24 to stockholders of record Dec. 10, 1951.—V. 174, p. 1936.

$90,550,000 Turnpike Bonds Scheduled For Sale—A syndicate headed by Bear, Stearns & Co., and Byrne and Phelps, Inc., both of New York City, has been formed to underwrite a new issue of $90,550,000 West Virginia Turnpike Commission series A revenue bonds. Public offering of the issue is scheduled to be made within the next fortnight. The bonds will be dated Dec. 1, 1951 and mature on Dec. 1, 1989. They will be subject to call prior to maturity at various dates, although not earlier than Dec. 1, 1954. Principal and interest (J-D) payable at the Charleston National Bank, Charleston, or at holder's option at the Guaranty Trust Co., New York City. Bonds will carry legal opinions of Masslich & Mitchell and Vandewater, Sykes, Heckle & Galloway, both of New York City, and will be secured by a Trust Agreement between the West Virginia Turnpike Commission and Guaranty Trust Co. of New York, as Trustee. The Commission was established as an agency of the State pursuant to Chapter 139 of West Virginia Act of 1947, with authority to issue bonds to finance construction, etc. of turnpike projects in the State as defined in the enabling act. Exhaustive engineering studies have demonstrated the feasibility and need if the proposed turnpike and the contribution it will make toward furthering the industrial and agricultural development of the State. Moreover, study of income to be derived from tolls and other sources indicates that the project will be fully self-supporting. The forthcoming bond issue has been approved by the Regional Volunta Credit Restraint Committee.
