### Aluminium Ltd.—Cancellation of Contract Sought—

Ward Van Alstyne, President of Aluminium Import Corp., New York, a subsidiary, announced on July 31 that instructions have been given to the company's lawyers to apply to the U. S. District Court for the Southern District of New York for Aluminium Import Corp. to be made a party in the case arising from the petition filed by the U. S. Department of Justice on July 20, 1953. This petition seeks cancellation of Aluminium Co. of America's contract with Aluminium Import Corp. for the purchase of 600,000 tons of aluminum during the period 1953 to 1958.

The Alcoa contract under attack is the largest of numerous long-term contracts which the company has made for the delivery of aluminum, almost all from Canada during the next six or seven years. The next largest single contract is one for 186,000 tons with Kaiser Aluminum & Chemical Corp., while the remaining contracts, totaling more than 350,000 tons, have been made with various United States independent fabricators and users.

Mr. Van Alstyne recalled that Aluminium Ltd. about two weeks ago stated its conviction that the Alcoa contract is not in violation of the U. S. Anti-Trust laws nor of the court's previous decisions. "By filing application to become a party to the suit," he said, "we seek the opportunity to make our own case in court in support of the legality of the contract and of our continuing efforts to assure further long-term supplies of Canadian aluminum for the U. S. market."—V. 177, p. 2449.

The wet-mix plant consists of an 80 x 200-foot clear-span, steel-frame structure, 19½ feet high to the eaves; a connected 50 x 70-foot clear-span steel-frame structure, 41 feet high to the eaves, and a 20 x 240-foot lean-to.

### American-Marietta Co. — Expands Further in Concrete Products Field—

The company on July 29 announced that it has acquired the Concrete Products Co. of America with manufacturing plants located in Pittsburgh, Pottstown, and Williamsport, Pa.

Established in 1912, Concrete Products Co. is a volume producer of concrete pipe and prestressed concrete bridge sections. In May of this year, American-Marietta acquired the Lamar Pipe & Tile Co. which operates three plants specializing in the production of concrete products used in the construction of municipal sewers and highways. Concrete Products Co. will be merged with Lamar and the Pennsylvania plants will be equipped for the production of Tunneliner and Lo-Hed Pipe which are exclusive Lamar developments. Lamar's Michigan plants will be able to supply customers with prestressed bridge sections and beam designs developed by Concrete Products.

The six plants of American-Marietta's Lamar Division will now make it possible to provide economical deliveries of an extensive line of concrete building products in the territory from the Atlantic seaboard to the Great Lakes.

American-Marietta looks forward to the possibility of having 10 or more concrete products plants in operation before the end of the year, the announcement said.—V. 178, p. 382.

### American Natural Gas Co.—Forms New Unit—

This company plans to form a new subsidiary under the name of American Louisiana Pipe Line Co. to build and operate the new approximately 1,000-mile natural gas pipe line to supply the system's markets in Michigan and Wisconsin.

An application for permission to form the new subsidiary has been filed with the Securities and Exchange Commission.

American Natural Gas Co. estimates that the total cost of its expansion program, including extension of distribution facilities in the service territories, will involve expenditures of about \$200,000,000.

The company contemplates handling the financing step by step as funds are needed and in such manner as not to cause dilution per share earning power. William G. Woolfolk, Chairman of the company, announces in a letter to stockholders.

"We are convinced that the gas reserves are needed," he added, "that the new pipe line will add to the strength of the system and that the additional available gas will readily find a market in the company's distributing territories on a basis which should materially improve the per share earnings when the facilities are in full operation."

American Natural Gas expects to raise the needed funds through issuance of senior securities of the various operating units, through retained earnings and through selling about \$25,000,000 of additional common stock.

The new line will make available to system distributing companies the large reserves of Louisiana Gulf Coast natural gas obtained through purchase agreements with Stanolind Oil & Gas Co. and with The Superior Oil Co., which were announced on July 21.

It is expected that an application will be filed with the Federal Power Commission next month for the necessary certificates of convenience and necessity to build the line. Capacity initially will be from 250 to 300 million cubic feet of gas daily, which may be expanded to 550 million cubic feet a day.

The recent acquisition of additional storage fields in Michigan, which more than doubles the company's potential storage capacity to a total of 110 billion cubic feet, makes possible an operation similar to that which has been so successfully conducted in the past several years by Michigan-Wisconsin Pipe Line Co., another subsidiary, Mr. Woolfolk said.—V. 178, p. 382.

#### Bailey Selburn Oil & Gas Ltd.—Reports Progress—

This corporation in an interim report to stockholders covering the five months from Jan. 1 to May 31, 1953, states that the period was one of development during which intensive seismic, gravity meter, magnetometer and photo-geological surveys have been conducted on the company's acreage. As a result of this work, several wells will be drilled on the company's holdings between now and the end of the year, the report pointed out.

In addition, the report continued, "negotiations have been completed with major companies whereby they have taken over our obligations on approximately 1,000,000 acres of Crown Reservations. Under these deals the major companies concerned undertake to conduct geophysical and/or drilling operations on the acreage concerned at a cost to themselves of about \$1,000,000 for a 50% interest in the acreage. Thus these large blocks will be evaluated and developed at no present cost to this company.

"During the period, the company has also acquired approximately 50,000 acres of leases and 60,000 acres of Crown Reservations in favorable areas. These blocks are now either being worked over by seismicograph or will be drilled this year.

"The company participated in the drilling of eight wells during the period. Of these four were gas wells and four were dry holes. This increased the company's estimated gas reserves to over 72,000,000 MCF. Our oil reserves are now over 7,000,000 barrels.—V. 178, p. 146.

#### Beech-Nut Packing Co.—Expands Baby Food Facilities—

The company is launching a baby food plant expansion program as a result of constantly increasing sales, it was announced July 31 by J. S. Ellithorp, Jr., President.

Ground-breaking ceremonies for the new facilities, which will be used exclusively for refrigerating and producing Beech-Nut baby foods, will be held on Aug. 10. The expansion will add 80,000 square feet to Beech-Nut's Canajoharie, N. Y., plant.

Beech-Nut's present Canajoharie facilities add up to 650,000 square feet, which includes 70,000 square feet of facilities added during the past two years.

"Beech-Nut's expansion has been made necessary by constantly increasing sales of its baby foods," said Mr. Ellithorp. "Our business has expanded to the point where we would otherwise be unable to fill all our orders with present production facilities. This big new concrete addition was the only answer."

Beech-Nut recently reported unaudited net earnings for the first six months of 1953 of \$1,656,021, equivalent to \$1.08 a share, as compared with a net of \$1,416,275 or \$0.92 a share in the same period last year. In 1952, Beech-Nut's total sales were \$81,498,803, an increase of approximately 8% over the year before.

In addition to the plant at Canajoharie, the company operates large manufacturing plants in Rochester and Brooklyn, N. Y., and in San Jose, Calif. In addition to baby foods, Beech-Nut products include chewing gum, coffee, and old-fashioned peanut butter.

The new Canajoharie plant is scheduled for completion early next year.—V. 177, p. 1898.

#### Bendix Aviation Corp.—Division to Expand—

The largest single expansion of this corporation's North Jersey manufacturing facilities since 1942 was announced in Teterboro on July 30 by Raymond P. Lansing, Vice-President.

A new building adding 103,250 square feet to the company's Eclipse-Pioneer Division will be constructed at the Bergen County Industrial Terminal to relieve heavy pressure on the Division's main manufacturing plant located nearby on Route 6, Mr. Lansing said. The new structure, to be known as Plant No. 2, will be ready for occupancy in September.

Eclipse-Pioneer, large producers of aircraft instrument and accessory products—including automatic pilots, flowmeters, starters, generators and similar devices—has increased production to more than 700% of its June, 1950 level, Mr. Lansing explained. This increased output required six smaller plant expansions in the Teterboro area as well as establishment of new facilities in Eatontown, N. J., Utica, N. Y., and Davenport, Ia.—V. 177, p. 2782.

#### Bethlehem Steel Corp.—New Comptroller—

The retirement of Frederick A. Shick as Comptroller and a director of this corporation and Vice-President and Comptroller of Bethlehem Steel Co., effective July 31, 1953, was announced on July 30 by E. G. Grace, Chairman. He was elected Comptroller of the corporation in 1907.

In addition it will be the duty of the Commercial Products Department to aid in the development or acquisition of new products so that the goals in the long range plan may also be met in this category.

"The Commercial Products Department will function as a staff organization reporting through H. A. Coward, Vice-President to the President. **California Water & Telephone Co.—Stock Sold—Mention** was made in our issue of Aug. 3 of the public offering on July 30 of 120,000 shares of common stock (par \$12.50) at \$15 per share. The entire offering was quickly placed. Further details follow:

**PROCEEDS**—In January, 1953, the company sold 60,000 shares of common stock (\$25 par value) at an aggregate net price, after deducting expenses of sale, of \$1,728,526. Of these proceeds \$550,000 was applied to the repayment of short-term bank loans (which had been entered into to finance in part the company's 1952 construction program) and the balance was applied to finance, in part, its 1953 construction program. The net proceeds from the sale of the 120,000 share of common stock (\$12.50 par value) just offered will be used (a) to repay \$1,000,000 of short-term bank loans incurred to temporarily finance, in part, said 1953 construction program and (b) to finance, in part, said 1953 construction program.

It is expected that the remaining funds required for the completion of said construction program will be obtained from (a) internal sources, the principal items of which are accruals for depreciation (expected to approximate \$875,000), (b) unappropriated earnings, and (c) the sale of additional securities. The amount and nature thereof will be determined in the light of future circumstances and conditions which cannot be forecast at present.

It is estimated that such expenditures for extensions, additions and improvements to the company's properties during 1953 will exceed \$5,250,000.

**Central Hudson Gas & Electric Corp.—Financing Plan Approved—Debentures Called for Redemption—**

The stockholders on Aug. 4 approved the company's 1953 financing program, under which it proposes to offer, early in September, 160,000 shares of common stock for subscription by stockholders and employees, and \$6,000,000 face amount of debentures convertible into common stock for sale to the public. With respect to the common stock, it is planned that approximately 140,000 shares will be offered to holders of common stock at the rate of one share for every 15 shares held on or about the offering date, and 20,000 shares will be offered to employees. The company will use the proceeds from the sale of these securities to pay off short-term bank loans and to meet construction expenditures.

Because of the company's plan to issue new convertible debentures, the balance of the outstanding issue was called for redemption on July 31, 1953. Until the close of business on that date the holders of the convertible debentures had the right, at their option, to convert any of the debentures into shares of the company's common stock at the conversion price of \$10.50 per share. As of July 24, 1953, all except \$20,000 principal amount of the debentures had been surrendered for conversion.

A secondary offering of 400,000 shares of common stock (par \$5) was made Aug. 4 by Smith, Barney & Co., at \$36.50 per share. It was oversubscribed and the books closed.

PROCEEDS—The shares did not represent new financing by The Dow Chemical Co. and it will receive no part of the proceeds from the sale. The stock was sold for the account of the Estate of Grace A. Dow, who died on June 28, 1953. Mrs. Dow was the widow of Herbert H. Dow, founder of the company.

BUSINESS—The company and its subsidiaries manufacture a diversified line of inorganic and organic chemicals used by substantially all major industry groups as well as by agriculture; a comprehensive list of plastic products; and magnesium metal.

EARNINGS, ETC.—Sales of the company and subsidiaries during the fiscal year ended May 31, 1953 totaled \$430,385,000 and net income amounted to \$35,857,000, equal to \$1.58 a share on the common stocks.

RECENT DEVELOPMENTS—Since World War II the company has made, and is continuing to make, large capital expenditures on facilities for the production of new products and to increase the capacity for production of existing products. During the past five fiscal years (ended May 31) expenditures of this character have totaled approximately \$402,000,000, as follows: 1949, \$43,000,000; 1950, \$29,000,000; 1951, \$91,000,000; 1952, \$145,000,000; and 1953, \$94,000,000.

Funds for these expenditures have been provided from company funds and from the proceeds of the sale of securities during the period covered as follows: Notes and debentures—\$290,000,000; common stock—approximately \$48,000,000. Capital expenditures for the current fiscal year are estimated at \$75,000,000.

The company contemplates a continuance of capital expenditures, but the total amount to be spent and its particular allocation and the sources of additional funds, if any, which may from time to time be required may vary substantially, being dependent upon unpredictable factors such as changing business and economic conditions, developments in the industry, and the results of the company's operations. If and when additional funds are needed, the company may obtain them from its own resources; from the proceeds of bank borrowing or the creation of additional funded debt; the sale of preferred or common stock; or a combination of the foregoing.

During the last three years the company has received Certificates of Necessity covering emergency facilities which the company has constructed or intends to construct aggregating approximately \$300,000,000. These certificates entitle the company to take five-year depreciation on approximately \$170,000,000 of such amount.

## (Allen B.) Du Mont Laboratories, Inc.—Large Contract

More than 3,800 television receivers, specially designed and produced by this corporation for hotel use will be installed in Statler hotels in New York City, Boston and Hartford, it was announced July 30. This is the largest single transaction to date involving television receivers for hotel use and confirms a trend already underway on a large scale with leading hotel chains.

The New York Statler with 2,200 rooms will be the largest 100% television-equipped hotel in the world.

Installations in New York and Boston Statler hotels are expected to be completed this fall. The Statler Hotel in Hartford, currently under construction, will be completed the summer of 1954 and will be fully television-equipped.

## Television Receiver Shipments Up 134%—

Shipments of television receivers by the corporation's receiver division, during the seventh fiscal period (covering June 18-July 12) were 134% greater than in any other comparable period in the company's history, it was announced on Aug. 3.

The previous company high for shipments in the seventh period was registered in 1950, the largest production and sales year experienced by the television industry to date.

Dan D. Halpin, receiver division general sales manager, declared the increase was due to over-all acceptance of the six new additions to the current Du Mont receiver line, introduced June 19, and increasing demand by the public for Du Mont quality receivers.

Mr. Halpin declared that the television receiver sales picture was excellent for the remainder of the year. Reasons for his optimism, he said, are based on the increasing replacement and two-set-in-the-home markets, increases in power of existing video stations, making television available to more of the population, and opening of new television markets.

Mr. Halpin stated that new markets will be stronger this fall than in the past. —V. 178, p. 240.

## Duke Power Co.—Bonds and Stock Registered—

Net proceeds of the financing will be applied by the company to the cost of its continuing construction program, including reimbursement in whole or in part of the treasury for expenditures made subsequent to May 1, 1953, and payment of any short-term borrowings made for such purposes. —V. 178, p. 384.

## Eastern Air Lines, Inc.—Net Earnings Higher—

Captain E. V. Rickenbacker, President and General Manager, reported on Aug. 1 that in the first six months of 1953 this corporation made a net profit of \$2,482,313, or \$1 a share after normal Federal income taxes, as compared with the adjusted net profit of 63 cents a share for the same period in 1952.

This adjustment of last year's net from 66 cents as reported to 63 cents reflects the distribution of 83,029 shares of capital stock through the Employee Stock Purchase Plan completed in December of last year, bringing the total stock outstanding to 2,478,601 shares.

The provision for Federal income taxes for the first six months of 1953 was \$8,046,000, compared with \$4,496,000 covering the same period a year ago. Gross revenue of \$76,908,474 showed a 29.5% increase over the \$59,386,436 for the comparative period of 1952.

Operating expenses for the six months total \$66,380,161, contrasted with \$53,319,866 for the first two quarters a year ago. Depreciation charges of \$8,658,000 for the six months were 54% greater than the \$5,617,000 allocated to this account during the first two quarters of 1952.

Captain Rickenbacker noted that the net profit as reported did not include profits realized from the sale of the balance of aircraft replaced by the 60 new 40-passenger Silver Falcons which, with 14 new 88-passenger Super-Constellation airliners, are now in regular operation. —V. 177, p. 2006.

## Elgin National Watch Co.—To Diversify Into Miniature Electronics and Production Instruments—

This company on Aug. 5 announced it intends to diversify into two new fields—miniature electronic components and precision production instruments. The company is launching an intensive search program to locate concerns in these specific fields "with a view to affiliation," according to J. G. Shennan, President.

This company, Mr. Shennan said, has no intention of minimizing its jeweled watch business and expects to continue devoting every effort to maintaining its sound position in that market. Through diversification Elgin hopes to increase total sales substantially, but even more important objectives are higher return on investment and greater long-term stability, he explained. Sales in 1952 totaled \$50,400,000.

As a first step in the diversification program, he revealed, Elgin has prepared an "enterprises wanted" brochure which tells in detail the objectives of the program, the type of operations Elgin is interested in, and the advantages accruing to concerns affiliating with the 89-year-old firm.

Among the electronic possibilities Mr. Shennan listed the transistor, which he described as being "at least twice as large as it should be for the ultimate in sub-miniaturization." The reason, he said, is that the case is too big. But an even more important goal, he explained, should be similar reductions in the size of resistors, capacitors, transformers, printed circuits, and other electronic components. This can be accomplished at low cost by applying the same precision techniques used at Elgin, he asserted.

Turning to the second field, precision production instruments, Mr. Shennan noted a "direct relationship" between this business and Elgin's present operations because the function of both is the same—design and manufacture of instruments for measurement purposes. —V. 178, p. 148.

"CONELRAD" is a plan designed to enable standard (AM) radio broadcasting stations to remain in service immediately before and even during an air attack to keep the public informed, reassured and advised of events during the emergency, while simultaneously preventing the use of radio as a navigational aid to hostile aircraft. —V. 178, p. 148.

Also, the total excess profits tax refund of \$1,384,208 for 1951 arising from carryback of unused 1952 excess profits tax credit was ignored because in the company's opinion any reallocation of this refund other than as a year-end adjustment will not provide a true interim comparison. This well is a five-eighths of a mile southeast stepout from the discovery well for Devonian production in the Maguex Field of Andrews County, Texas. The Fasken CB No. 1 was bottomed at 12,609 feet in the Devonian formation and completed through perforations from 12,486 to 12,538 and from 12,554 to 12,590 feet. About two miles east, in the recently discovered Hutex Field, on an adjacent block of some 3,100 acres in which Texas Eastern Production also has a one-quarter interest, the Magnolia Fasken FA No. 1 was recently completed in the Devonian lime. After flowing 434 barrels of 41 G gravity oil through a 13/64 choke on a Railroad Commission 24-hour test, that well was also assigned an allowable of 375 barrels per day.

**Wellington Fund, Inc.—Reports Record Sales—**

Record sales of Wellington Fund shares for July and the first seven months were reported Aug. 6 by A. J. Wilkins, Vice-President. The expansion in sales, according to Mr. Wilkins, was accompanied by an unusually low rate of redemption shares. He added that the effect of sales was to boost total net assets of the fund to an all-time high of \$261,066,000 on July 31, 1953.

The fund's July sales amounted to \$4,277,814, largest in its 25-year history and up 15% over the same month last year. For the first seven months, sales amounted to \$32,682,856, also largest for any similar period in the fund's history and up 12.6% over the like period of 1952.

Redemption of shares in July declined to 17.7% of that month's sales and for the seven months were 18.5% of sales.—V. 178, p. 392.

**Western Light & Telephone Co., Inc.—Stock Subscriptions—Earnings, Etc.—**

During the early part of July, the company completed the sale of 78,202 shares of 5 1/2% \$25 par value convertible preferred stock. This stock was initially offered to the common stockholders under the preemptive rights provision of the charter at \$25 per share. Of the 78,202 shares offered for subscription, 58,790 shares were subscribed for through the exercise of rights. The remaining 19,412 shares were purchased by the underwriters at \$25 per share and thereafter sold to the public at \$25 3/4 per share.

On July 20, 1953, the company sold \$3,000,000 of 30-year 4 1/4% first mortgage bonds.

The proceeds from the sale of the above securities, aggregating approximately \$4,830,000, will be used to retire the short-term bank loans in the amount of \$3,000,000, incurred since the first of this year to temporarily finance the unusually heavy construction program this year amounting to \$3,925,000, and to complete the said construction program.

This financing, together with the common stock financing in December of 1952 (amounting to approximately \$1,400,000) will complete the permanent financing requirements of the company for its anticipated construction and improvement program for at least a year and a half.

On May 1, 1953, the company concluded the deal with the Southwestern Bell Telephone Co. and commenced the operation of the nine larger telephone exchanges acquired from the Southwestern Bell in the trade for 27 smaller exchanges of the company. Work on the new 15,000 kw electric generating plant and the 185 mile cross-state 115,000 volt transmission line is progressing nicely and both projects are scheduled for completion this year.

Complete and exact details for the week covered by the foregoing will appear in our issue of next week. We cannot furnish them today, inasmuch as the week ends Saturday, and the Saturday figures are not available at time of going to press. Accordingly, in the above the last day of the week in all cases has to be estimated.

In the elaborate detailed statement, however, which we present further below, we are able to give final and complete results of the previous week — week ended Aug. 1. For that week there was a decrease of 5.6%, the aggregate of clearings for the whole country having amounted to \$16,557,430,770 against \$17,539,049,450 in the same week in 1952. Outside of this city there was a gain of 3.6%, the bank clearings at this center showing a decrease of 13.4%. We group the cities according to the Federal Reserve Districts in which they are located and from this we note that in the New York District (including this city) the totals record a falling off of 12.8%, in the Boston Reserve District of 1.9% and in the Philadelphia Reserve District of 2.9%. In the Cleveland Reserve District the totals register a gain of 14.6%, in the Richmond Reserve District of 6.6% and in the Atlanta Reserve District of 5.0%. The Chicago Reserve District has to its credit an improvement of 5.8%, the St. Louis Reserve District of 12.1% and the Minneapolis Reserve District of 7.2%. In the Kansas City Reserve District the totals are smaller by 4.1%, in the Dallas Reserve District by 5.3% and in the San Francisco Reserve District by 1.4%.

In the following we furnish a summary by Federal Reserve Districts:

This corporation has recently completed a construction project involving 145.4 miles of main line, 82.8 miles of lateral lines and one 2,200 h. p. reciprocating compressor station, according to an announcement July 31 by Harry W. Bass, President. The system, planned to begin operation on Aug. 1, has a designed delivery capacity of 125,000 mcf of gas per day.

The new main line construction begins at the Hagist Ranch gas field in Duval County, Texas and extends in a northeasterly direction through McMullen, Live Oak, Bee, Goliad, DeWitt and Lavaca Counties to a connection point with Texas Eastern Transmission Corp.'s 24-inch line at Provident City, Texas.

The company's gathering facilities provide for the gathering of gas from the following fields: Hagist Ranch, Loma Alta, Rhode Ranch, Clay West and Tom Lyne, Maxine, South Karon, North Karon, Rudman and Maley, Minoak, North Minoak, West Yoward, Yoward, Goree, North Mineral, San Domingo and Strauch Wilcox, West Corden, Dial, South Runge, Angel City and Riverdale, Nordheim, Henze, Brandt Field Extension, Meyersville, Cottonwood Creek, and North Arnekeville.

On Dec. 12, 1952, the Federal Power Commission gave approval to Wilcox Trend for the construction and operation of a natural gas gathering system and pipeline in the Wilcox Trend area of Southwest Texas. Construction was begun immediately thereafter.

During 1951 and 1952 Wilcox Trend entered into contracts with over 30 gas producers covering the purchase of approximately 100,000 mcf of gas per day. These gas purchase contracts have been assigned to Texas Eastern Transmission Corporation, and Wilcox Trend will transport the gas from the fields to Provident City under a cost-of-service agreement.—V. 177, p. 1414.

Of said treasury shares, 35,000 shares are reserved for delivery upon exercise of the option held by Will Ward, a director.

The transfer agent for the capital stock is First Security Bank, Exchange Place Branch, Salt Lake City, Utah.

WARRANTS—In the underwriting contract, the company has granted to J. A. Hogle & Co., the principal underwriter, the right to purchase from it at 1c per warrant share, warrants for the purchase of a maximum of 150,000 shares of the capital stock of the company at the exercise price per share equal to the initial public offering price of the stock now being offered plus 4c. The warrants may be purchased and/or exercised by the underwriter at any time or from time to time, but not earlier than one year following the date of commencement of the public offering hereunder and not later than five years following said date. The underwriter has the right to purchase said warrants at the rate of 15 warrant shares for each 100 shares of stock which it actually purchases under the terms of the underwriting contract.

BUSINESS—The company was incorporated in Utah on Feb. 21, 1916, under the name Pioche-Bristol Mining Co. Its name was changed to Williston Basin Oil Exploration Co. on Nov. 30, 1951. Except for the acquisition and maintenance of certain mining properties and oil and gas leases and mineral rights, it was non-operating until June 30, 1953, when it acquired the assets and assumed the liabilities of Williston Basin Oil & Gas Lands Ltd., a corporation organized under the laws of the Dominion of Canada with its principal offices at Calgary, Alberta.

Commencing June 30, 1953, the company proposes principally to engage in producing oil and gas and exploring for, acquiring and developing prospective, proven, and producing oil and gas properties. The company is not an integrated oil and gas business. It is of the type generally termed in the industry a small "independent producer."

In consideration for the assets of the Canadian company, the Williston company issued to the Canadian firm 3,812,518 shares of its capital stock, of which the company received back 250,000 shares pursuant to liquidation of the Canadian company and under surrender of 100,000 shares of the common stock of the Canadian company which were owned by the company. Said assets included 25,000 shares, constituting the entire issued and outstanding shares, of the capital stock of Texas Dominion Oil Co., a Delaware corporation, which corporation owns certain oil producing properties in Texas and Oklahoma and non-producing oil and gas properties.—V. 177, p. 2788.

## Wisconsin Motor Corp.—Acquires Sterling Plant—

This corporation, manufacturers of heavy-duty air-cooled engines, has announced the purchase of a plant formerly occupied by Sterling Motor Truck Co., Milwaukee, Wis., which was absorbed by White Motor Company who subsequently moved the Sterling operation to Cleveland, Ohio.

The Wisconsin Sterling-White deal comprises six acres of real estate, including railroad sidings and 143,000 sq. ft. of plant facilities under roof. In addition, Wisconsin Motor has acquired an option covering the acquisition of 123,000 sq. ft. of land situated close to the Sterling plant.

According to Harold A. Todd, President, the new plant will provide facilities for a 60% increase in production.

Mr. Todd reports that Wisconsin Air-Cooled Engine sales have increased more than 2,000% since 1940, and the company looks forward to continued increased volume both in domestic and export markets. The company's products are currently distributed throughout 63 countries, in addition to the United States and Canada.—V. 171, p. 886.

The bonds are offered for public sale at competitive bidding. The preferred stock is to be offered for subscription by record holders of outstanding preferred stock on Aug. 14, 1953, subject to allotment, the dividend rate, subscription price and underwriting terms to be supplied by amendment. The common stock is to be offered for subscription by record holders of outstanding common stock on Aug. 14, 1953, on the basis of one share for each seven shares then held. The subscription price and underwriting terms to be supplied by amendment. Principal underwriters for the preferred and common stock offerings are Smith, Barney & Co. and Robert W. Baird & Co.

Of the proceeds, \$4,010,000 is to be used for the prepayment of bank loans; \$2,359,730 for the purchase of all of the outstanding capital stock of Interstate Power Co. of Wisconsin; and the balance to pay for a part of the company's construction program, estimated at \$38,800,000 for the period July 1, 1953 to Dec. 31, 1955 (including the cost of the Interstate stock).
