#### Alabama Gas Corp.—Earnings Estimated—

Given normal weather experience during December, this corporation should report for 1953 net income approximating the \$1,209,333—\$1.32 a common share after preferred dividends—earned in 1952, Joseph N. Greene, Chairman of the Board of Directors, said on Dec. 2.

October and November of this year were unseasonably warm, he added, and gross revenues in both months fell below the level of the corresponding months a year ago. If December proves to be another warm month, he pointed out, the management expects 1953 earnings to fall somewhat below last year's level.

To take care of this growth the company during the past decade made \$23,000,000 gross additions to its utility plant, these new additions representing better than 60% of the \$36,000,000 property on the books at Sept. 30, 1953.

Mr. Greene estimated 1954 construction at approximately \$4,000,000, and said it would be financed by means of bank loans having maturities which would give the management latitude in timing a refinancing plan to the advantage of the company. A decision on the type or types of securities to be offered will be based on market conditions and the needs of the company at the time.

As of Sept. 30, 1953 the company's capital structure comprised 58% long-term debt, 5% preferred stock and 37% common stock and surplus. A substantial part of the \$215,000 saving to result from expiration of excess profits taxes at the coming year-end will be offset by increased operating costs, Mr. Greene said.

He added that the question of dividend policy has been discussed informally from time to time by directors but that no action has been taken to change the present 80-cent per share annual dividend rate on the common stock.—V. 178, p. 1765.

#### Alabama Power Co.—Hydroelectric Development—

An application has been filed with the Federal Power Commission by this company requesting a preliminary permit for a proposed hydroelectric development, to include several dams, on the Coosa River in Alabama and Georgia.

The proposed plan of development would include several dams on the Coosa River which would develop power both below existing Jordan dam, and in the 180-mile reach of the river between the existing Lay reservoir and Rome, Ga. The development would be located in Elmore, Shelby, Talladega, St. Clair, Calhoun, Etowah and Cherokee Counties, Ala., and Floyd County, Ga.

The initial proposed installation of the generating facilities would be approximately 321,000 horsepower which would make available about 1,155,000,000 kilowatt-hours annually. The energy would be utilized through Alabama's Power's transmission system in Alabama and through interconnections with utilities operating in Georgia, Florida and Mississippi, and with the Tennessee Valley Authority.

A preliminary permit is issued solely for the purpose of giving the holder priority while conducting the necessary surveys and investigation for the preparation of an application for a Federal Power Commission license.—V. 177, p. 2245.

**Algemene Kunstzijde Unie N. V. (United Rayon Manufacturing Corp.), Netherlands—American Shares Offered—**With the offering on Dec. 3 of 180,000 American shares of A. K. U. at \$23.75 per share, by an underwriting syndicate headed by Lazard Freres & Co., there becomes available the common stock of the first leading European industrial corporation to register under the Securities Act of 1933 and to publish a prospectus.

A deposit arrangement with the Chase National Bank in effect makes the American shares created resemble the usual form of common stocks in the United States and facilitates dividend distribution in dollars.

Beginning June 10, 1953, all holders of ordinary shares were offered the opportunity of depositing such shares with The Chase National Bank of the City of New York as depositary or Nederlandsche Handel-Maatschappij, N. V., Amsterdam, the Netherlands, as sub-depositary under the deposit agreement. Depositors receive 20 American shares for each ordinary share deposited. No American shares were offered at that time for sale for cash.

**PROCEEDS—**None of the proceeds of the sale of the American shares above offered will be received by the company. The proceeds to the company of the sale of 10,000 ordinary shares to the selling shareholders or their predecessors in interest amounting to Hfl. 13,600,000 (before deduction of estimated expenses paid and to be paid by the company) were added to the general funds of the company to be expended from time to time for such purposes as the management might determine. While no allocation of such proceeds has been made, general funds of the company have been and will continue to be spent among other things for capital additions to plants and facilities to meet the demand for products now being manufactured and to manufacture new products, for meeting the increased cash requirements of the company's operations and for making funds available to other members of the Group for similar purposes.

**BUSINESS—**The Dutch parent company, A. K. U., and its affiliates together constitute one of the world's leading rayon producing organizations, having produced over 12% of the free world's 1952 rayon output besides producing their own type of nylon fiber plus other

#### American Airlines, Inc.—Signs New Lease—

This corporation in one of the largest real estate transactions in airline history, has leased approximately 3,300,000 square feet of ground space at New York International Airport from the Port of New York Authority for a 22-year period it was announced on Nov. 30. Rentals paid by American for the 76-acre area, which borders Idlewild's main entrance road, will amount to more than \$3,363,000 over the term of the lease, the announcement said.

The signing of the lease coincided with the inauguration of American's DC-7 non-stop transcontinental flights between New York and Los Angeles from Idlewild Airport, and permits American to expand its operating facilities to accommodate its growing fleet of Flagship equipment.

Under the terms of the contract, American will be required to spend a minimum of \$5,000,000 in improving the property prior to March 31, 1960. These improvements will include construction and installation of hangars, office space, concrete aprons, aircraft and automobile parking areas, roads, fencing, etc.—V. 178, p. 1565.

During recent months the company has had partial cancellation of several defense contracts. In certain instances the partial cancellation

has been combined with an extension of delivery dates for the remaining portions of the contracts. The railroad equipment market has been slow, with new freight car orders few in number and quantity. The company has, however, taken additional passenger car orders. Inasmuch as new orders have been relatively small and production has been on schedule, its backlog of orders has declined to \$200 million as of Nov. 20, 1953, consisting of \$110 million defense and \$90 million regular products.

Despite the drop in order backlog, but barring unforeseen developments, the outlook is that earnings of the current fiscal year, while they may not quite equal last year, will nevertheless be very satisfactory.—V. 178, p. 945.

#### Atlantic Gulf & West Indies Steamship Lines—Plans Sale of Holdings in Subsidiary—

Jerome A. Newman, President, on Nov. 30 announced that the directors unanimously had acted favorably upon, and will present to the stockholders of the corporation for their approval at a special meeting to be called for that purpose, an offer to purchase all of the common stock and the preferred stock of New York & Cuba Mail Steamship Co. held by the corporation. The maximum price is \$6,000,000 in cash and \$3,000,000 in 4½%, 12-year debentures, but subject, under certain conditions, to possible adjustment downward.

Among other things the offer provides for calling for redemption at \$27.50 a share all of the preferred stock of New York & Cuba Mail Steamship Co. held by the public.

With the call for the meeting, will be presented in adequate form the essential terms of the offer to be acted upon.

The offer was made by Thomas J. Stevenson and Richard Weininger. Mr. Stevenson is Chairman of the Board and President of the Stevenson Co., Inc., operators of the Stevenson Line, a privately owned line operating between the United States East Coast and the Mediterranean and Persian Gulf areas, and also Chairman of the Board of the Ocean Freight & Brokerage Corp., which does a general brokerage and shipping agency business. Richard Weininger, a private investor, is a director of the Consolidated Royalty Oil Co. of Caspar, Wyo., and Vice-President and director of National Phoenix Industries, Inc., holding company for Nedick's, Inc. and for Cantrel & Cochrane Corp.

One of the matters which the board of directors considered in arriving at its decision, was the difficulty being encountered in obtaining an extension of its subsidy agreement with the Federal Maritime Board.—V. 178, p. 1565.

#### Beech Aircraft Corp.—Signs New License Agreement

The signing of a license agreement between this corporation and Fuji Heavy Industries, Inc., Tokyo, Japan, for the building of the Beechcraft "Mentor" military trainer in Japan was announced last week.

This 1953 license-contract marks the second contract made by Beech Aircraft with the Japanese, the first being nearly 20 years ago, in the first few years of Beechcraft history, when the Japan Air Transport Co. was licensed by Beech Aircraft to build the Beechcraft Model C17E high-performance civilian biplane.

Present day Beech officials saw many similarities between the previous agreement and the agreement completed this week. There was one major difference, however. **Carborundum Co.—Affiliate to Expand—**

Three well-known companies have united forces to expand the activities of the Borolite Corp., which was recently formed to pursue research and development of various metal borides ("Borolites") for high temperature military and civilian applications, according to a joint announcement by the Presidents of the three cooperating companies—Kenneth D. Mann, of Firth Sterling Inc.; Dr. Paul Schwarzkopf, of American Electro Metal Corp., Yonkers, N. Y.; and Maj. Gen. Clinton F. Robinson, of The Carborundum Co.

All three companies had previously engaged in separate research and development programs for atomic age materials. American Electro Metal Corp. has assigned to the Borolite Corp.

To reach the plant, C&O will build five miles of track at an estimated cost of \$500,000. Construction will begin within 30 days and the line is expected to be completed in four weeks.

The plant is expected to produce 25,000 barrels daily of petroleum products, mostly high-octane gasoline. Planned expansion later on to cost \$60 to \$70 million, will bring production up to a maximum of 100,000 barrels per day.—V. 178, p. 1984.

**Chicago Great Western Ry.—Plans Bond Sale—**

The company plans to negotiate sale of \$6,000,000 in bonds it previously offered at competitive bidding. The company is seeking Interstate Commerce Commission permission to exempt the collateral trust securities, due Nov. 1, 1978, from competitive bidding requirements this time.

In April, the road rejected a bid for the bonds that named a 5.90% net interest cost. It now says it will not sell for less than 99, or at an interest rate higher than 5 1/2%.

The company has borrowed \$4,000,000 of temporary money since April. It said it has offers to negotiate sale of the bonds from several investment banking firms.—V. 178, p. 1776.

**Cincinnati & Suburban Bell Telephone Co.—Stock Offered**—The company is offering to its common stockholders of record Nov. 27 the right to subscribe on or before Jan. 8, 1954 for 312,812 additional shares of common stock at par (\$50 per share) on the basis of one new share for each three shares held. The offering is not underwritten.

The American Telephone & Telegraph Co., which owns 29.79% of the presently outstanding shares, has informed the company that it intends to subscribe for the 93,189 shares which represent its production of the offering. The company does not intend to sell shares not subscribed for through the exercise of subscription rights.

**PROCEEDS**—The net proceeds will be used to reimburse the company's treasury for expenditures made for extensions, additions and improvements to its telephone plant. Its treasury having been so reimbursed, the company will repay its borrowings from various banks to the extent that such proceeds are sufficient therefor. Such borrowings, which were made for extensions, additions and improvements to telephone plant of the company and for other general corporate purposes, are presently outstanding in amount of \$16,250,000.

The company's construction expenditures during recent years have been requiring substantial amounts of new money. Since Dec. 31, 1947 the company's total capital, including temporary borrowings from banks, has increased about 71%. Since that date the company has sold \$11,693,350 par value of capital stock through an offering to shareholders in 1950 for subscription at par and increased its temporary borrowings by approximately \$16,000,000. It is expected that it will be necessary for the company to raise additional amounts of new money in connection with its construction activities.

Practically all of the equipment, apparatus and materials used in constructing plant other than buildings of the company is purchased from Western Electric Co., Inc., a subsidiary of American Telephone & Telegraph Co.

#### C. I. T. Financial Corp.—Dividend Payment Increased

The directors on Nov. 25 voted to increase the annual dividend rate on the common stock to \$2 a year. The new rate will be effective with the quarterly dividend of 50 cents per share declared today payable Jan. 1, 1954 to stockholders of record on Dec. 10. The previous dividend payment was 45 cents quarterly or \$1.80 a year.

Arthur O. Dietz, President, said the new 50-cent quarterly payment established the highest regular dividend rate in the corporation's history.

After the meeting of the board, he commented as follows:

"Our earnings are most satisfactory and the outlook is excellent. Deferred income and unearned premiums continue to increase, reflecting the record volume of business we are handling."

"In recent years there have been marked increases both in our dividend payments to stockholders and in earned surplus. In the five-year period ended Sept. 30, 1953, earnings applicable to the common stock aggregated \$135,486,000. Of this amount \$77,075,000 was distributed in dividends to common stockholders. The balance of \$58,411,000 was retained in the business as earned surplus, thereby increasing the capacity of the corporation to expand its volume and earnings."—V. 178, p. 567.

#### Columbia Gas System, Inc.—Construction Progresses

Construction of a new natural gas pipeline from the Southwest to the gas-hungry territory served by this System pushed well beyond the half-way point last week, it is announced. The 500th mile of an 860-mile line was laid which will bring gas to this area from southern Louisiana.

George S. Young, President, said construction is proceeding "on schedule" at various points between the Louisiana Gulf Coast and the Kentucky-West Virginia border.

Gulf Interstate Gas Co., owners of the \$129,000,000 pipeline, estimate it will be completed by next November. Work began in May.

When completed the Gulf Interstate line will deliver up to 375 million cubic feet of natural gas daily to the United Fuel Gas Co. of Charleston, W. Va., where it will become a part of the pooled supply of the Columbia Gas System.

The company will soon file the issue with the SEC and the Michigan P. S. Commission.

#### Detroit Steel Corp.—Expansion Soon Completed—

M. J. Zivian, President, on Dec. 3 pointed out that since Jan. 1, 1951, this corporation has expended more than \$56,000,000 on its expansion program, now about 95% completed, with no equity financing and with a net increase in outstanding debt of less than \$25,000,000.

Mr. Zivian expressed no opinion with respect to the possibility of resuming cash dividends, but indicated that the directors favored a policy of stock dividends during the interim. A 2½ stock dividend is payable on the common stock on Dec. 30 to holders of record Dec. 14.

The current market value of the dividend stock is approximately equal to 25 cents a share. This is the same as the quarterly rate per share which the corporation has paid in cash for the past eight years, on the basis of the present shares. The corporation has paid dividends every year in an unbroken record beginning in 1925, Mr. Zivian said.

Payment in stock in lieu of cash was prompted, Mr. Zivian added, by the substantial amounts of cash required during the coming months for the payment of Federal taxes on 1953 income and for current principle payments on the first mortgage notes to the Reconstruction Finance Corporation, now outstanding in the amount of \$39,970,000.—V. 176, p. 1975.

The balance of 3,457 unsubscribed shares have been placed by Gloré, Forgan & Co. and Hornblower & Weeks on behalf of the underwriting group.**

"Clapp's purchase was made entirely from the company's current resources, and will not require outside financing. For several years we have been planning to add a line such as Clapp's, which fits into Mott's production and buying organizations," explained Mr. Meinhold.

"Our plants," continued Mr. Meinhold, "are located at Hamlin, Holley, Ravenna, Voorheesville, and Williamson, N. Y. The latter opened on Nov. 1, 1953. Our plant at Aspers, Pa., bought in 1950, contains quick-freezing equipment. The San Jose, Calif., prune juice plant is located in the heart of the famed Santa Clara prune growing district."

"Duffy-Mott is owned largely by those in its active management. Our dollar and unit sales in 1953 topped and previous year in our 112-year history. Sales were more than triple the volume of 1944, having gained for 21 successive years. Through acquisition of Clapp's we expect to further increase our sales. We do not, however, contemplate any additional acquisitions—at least not until we have integrated Clapp's into Mott's operations."—V. 173, p. 1171.

Sales for the Sept. 30, 1953 year totaled \$23,500,000. Lyman B. Frieze, President, told stockholders "During the year we absorbed the large expense involved in moving more looms and throwing equipment to southern locations and the cost of a two months' strike in the Pennsylvania plants. The synthetic textile industry is still suffering from over-production which has caused us to curtail our weaving activity to some extent. Our throwing plants are operating on a satisfactory basis at near capacity."—V. 178, p. 665.

**Elgin National Watch Co.—Bonus to Employees—**

A \$241,371 "year-end dividend" was divided on Dec. 3 among eligible employees of this company at Elgin, Ill., and at Lincoln, Neb. It was their second such bonus this year and the 36th consecutive payment since the profit-sharing plan was started in 1936.

This dividend represents the second instalment of a \$490,977 bonus on 1952 wages and salaries. The first instalment was paid last June, just before the plants shut down for a two-week vacation period. All told, \$5,675,367 has been distributed in wage dividends since the plan was started, according to John M. Biggins, Vice-President and Treasurer. A total of 4,324 employees are participating this year. —V. 178, p. 2091.

**Erie Mining Co.—Arranges Large-Scale Financing—**

Elton Hoyt 2nd, President, on Dec. 3 announced that this company has completed plans for financing the initial development of its program for the construction of facilities in Minnesota for ultimately producing taconite pellets at the rate of 7,500,000 tons a year.

This was the first official statement that Erie Mining is definitely going ahead with its large-scale taconite program. Work has already begun and may lead eventually to a total annual taconite pellet production of up to 10,500,000 tons involving the investment of more than \$300,000,000.

The company has arranged to sell \$207,000,000 of first mortgage 4½% bonds, due 1983, to a group of nine insurance companies and Bethlehem Steel Corp. The sale of bonds to the insurance companies was arranged through Kuhn, Loeb & Co. Substantial equity capital has also been subscribed by Erie's four stockholders—Bethlehem Steel Corp. (45%), Youngstown Sheet & Tube Co. (35%), and Interlake Iron Corp. and The Steel Co. of Canada, Ltd. (10% each).

Erie Mining Co. is managed and operated for the stockholders by Pickands Mather & Co., of which Mr. Hoyt is senior partner.

Last year the Defense Production Administration awarded Erie Mining a certificate of necessity covering the project on a basis of up to 10,500,000 tons annual production, the cost of the entire project then being estimated at approximately \$298,000,000.

The immediate development calls for the largest initial ore concentrating plant ever to be built, located near Aurora, Minn., and also includes the construction of housing facilities for the plant's employees and their families, a 73-mile railroad from the plant to Two Islands, Minn., on the north shore of Lake Superior, and a harbor, docks, and a large electric power generating station at Two Islands.

Erie Mining has under its control properties on the Mesabi Range sufficient for the production of ample raw material to protect the maximum requirements of the plant for more than 50 years.

Erie has employed the Engineering Department of Anaconda Copper Mining Co. to do the engineering, prepare plans and specifications, and be responsible for construction of the new concentrating plant. It will be located five miles north and east of Aurora and about two miles from the initial pit from which the crude taconite will be mined. The ore will be hauled to the plant by a mine railroad and unloaded directly into the primary crushers. —V. 175, p. 810.

**Heyden Chemical Corp.—Sale Completed—**

John T. Remensnyder, Chairman, and Simon Askin, President, said in a joint statement to stockholders that American Cyanamid Co. paid \$12,000,000 for the antibiotic division of Heyden Chemical Corp. The price is about \$6,000,000 in excess of the book value of assets sold. Heyden also has sold to American Cyanamid most of the inventories of its antibiotics division for a price to be paid in cash which it is estimated will approximate 85% of the book value and will result in a net realization in excess of \$1,500,000.

The proceeds from the sale of Heyden antibiotics division and antibiotic inventory will increase net working capital to approximately \$21,000,000 and its cash or equivalent assets, not required to pay accrued taxes, to approximately \$18,000,000.

The Heyden management intends "to use this excellent position to take advantage of opportunities to extend further its basic chemical

business in existing and related lines either internally or by acquisitions.

The assets sold to American Cyanamid included Heyden's Princeton (N. J.) plant and all intangible assets of the antibiotic division, including all patents, patent applications and inventions relating to antibiotics.

Assets sold to American Cyanamid Co. did not include Heyden's stock interest and royalty arrangement in the French antibiotic company, Societe Industrielle pour la Fabrication des Antibiotiques. Heyden now is engaged in disposing of these assets.

The corporation for some time has been considering the discontinuance of its antibiotic business because of substantial losses incurred during the past two years.

These losses resulted primarily from sharp price declines caused by excess capacity in the entire penicillin and streptomycin industry. These price declines affected most severely bulk producers like Heyden which do not have the extensive distribution system of many of the established pharmaceutical houses.

The statement to the stockholders said:

"While Heyden has derived a substantial net profit from its antibiotic division over the 10-year period of its operation, the elimination of the current losses of this division should be helpful to our overall earnings during 1954.

"We are advised by counsel that in their opinion under the present tax law the gain from the sale of our antibiotic division to American Cyanamid is taxable at the capital gains rate rather than at the higher rate on ordinary corporate income.

"Our joint methanol venture with Monsanto Chemical Co. is progressing at a very satisfactory rate and earnings from this venture should be reflected in our operations during 1955." (Wall Street Journal of Dec. 2)—V. 178, p. 1877.

Howard W. Sams, Chairman, on Nov. 19 also stated: "Expanded volume for the first six months of this calendar year required additional capital at a faster rate than provided by profits. To meet this need, the balance (523 shares) of the initial preferred stock authorized was sold for \$52,300. The beneficial results to the company's sound financial condition is illustrated by the increase in the ratio of 'Current Assets' to 'Current Liabilities' from 1.42-to-1 on Dec. 31, 1952 to 2.21-to-1 on June 30, 1953."

The directors on Oct. 15 declared the fifth cash dividend of 10 cents per share on the common stock payable Nov. 16, 1953 to stockholders of record Oct. 31, 1953. The company has paid dividends on its common shares continuously since 1950.

New record high sales, year after year, necessarily require larger working capital. Consequently, the directors voted a 1,000 share increase in the \$100,000 5% cumulative preferred stock capitalization and a 60,000 share increase in the common stock capitalization, both being approved by the Secretary of the State of Indiana on Oct. 7, 1953. The sale of the preferred stock will be sufficient to meet capital requirements for the immediate future.

Stockholders will be given the first opportunity to subscribe for these new preferred shares at \$100 per share when and as required approvals have been obtained. Dividends have been paid on preferred shares continuously since their issuance in 1948.

The declaration of a 100% common stock dividend was voted by the directors on Nov. 19. This dividend was payable on Nov. 30, 1953 to common stockholders of record Nov. 19, 1953. This is the second common stock dividend paid by the company.

Arrangements have been made with Collett & Co., Inc., Fletcher Trust Building, Indianapolis, Ind., whereby they will give quotations on Howard W. Sams & Co., Inc. common stock and are interested in having buying or selling orders.

The company plans to consolidate administration and engineering activities in the present location. Printing, warehousing and shipping activities will be housed in a new 30,000 square foot single floor building to be completed next Spring. The company has contracted to purchase land, has building plans completed, and has let bids for the construction of this building. Work will start as soon as title is clear. It is anticipated that this will be accomplished shortly. A contract has been entered into whereby the building will be financed by an insurance company.—V. 178, p. 2096.

The proceeds from the sale of these securities will be applied toward the financing of the company's construction program which is estimated to cost approximately \$6,385,000 for the period Sept. 1, 1953 to the end of 1954.—V. 177, p. 1906.

## Studebaker Corp.—Credit Agreement—

The corporation has set up a \$25,000,000 revolving credit for "general corporate purposes."

At the same time, a similar-size loan agreement for defense work has been terminated.

E. E. Richards, Treasurer, stressed that there is no prospect of immediate borrowing under the new arrangement with Studebaker's principal depository banks.

The previous credit line started out as a \$100,000,000 V-loan arrangement in April, 1952. Later it was reduced to \$25,000,000. It was solely for the financing of defense contracts under a formula permitting borrowing against the company's investment in such work.

Last spring the Air Force cancelled orders for 100,000,000 of J-47 jet engines, resulting in a slash of one-third in planned production of these engines by Packard Motor and Studebaker. Late in August Studebaker turned out its last military truck under then-existing defense contracts. Harold S. Vance, President of Studebaker Corp., has said Studebaker will wind up its work in the next few months on current defense contracts for production of J-47 jet engines.—V. 178, p. 1165.

**Indiana Toll Road Commission, Indiana**

**\$280 Million Issue Expected on Dec. 17**—Details of one of the largest public offerings of toll road bonds on record \$280,000,000 of Indiana Toll Road Commission Revenue Bonds—were sent Dec. 1 to the approximately 460 members of the nation-wide underwriting syndicate.

The offering has been tentatively set for Thursday, Dec. 17, and principal underwriters serving as co-managers of the group will be Smith, Barney & Co.; The First Boston Corporation; Drexel & Co.; Halsey, Stuart & Co. Inc.; City Securities Corporation; Collett & Company, Incorporated; Indianapolis Bond & Share Corporation and Raffensperger, Hughes & Co., Inc.

Proceeds from the sale of the bonds will be applied toward the construction of the East-West Toll Road, the first project to be undertaken by the Indiana Toll Road Commission; together with financing and other related costs.

The bonds and interest payable on them do not constitute an obligation of the State of Indiana or of any of its political subdivisions, but are payable solely from revenues earned by the Toll Road, in accordance with the Trust Agreement between the Indiana Road Toll Commission and the Indiana National Bank of Indianapolis, as trustee, and Merchants National Bank & Trust Company of Indianapolis, as co-trustee. In the opinion of counsel, interest on the bonds is exempt from present Federal Income taxes.

The East-West Toll Road will be approximately 156 miles in length and will extend across the northern part of Indiana in a general easterly direction from the western terminus at a point providing connections with U. S. Routes 20, 12 and 41 and the Indiana-Illinois State line at the boundary line between the cities of Chicago, Ill., and Hammond, Ind., to a connection at the Indiana-Ohio line with the western terminus of the Ohio Turnpike now under construction.

Construction of the four-lane divided highway of modern expressway type construction is expected to start in the fall of 1954, and it is expected to be open for traffic late in 1956. It is estimated, on the basis of engineering projects of probable traffic and revenues, that as of 1956-1957 a total of 17,661 vehicles, consisting of 12,371 passenger cars and 5,290 commercial vehicles, will use the Toll Road daily. For the first full year of operations, the Toll Road is expected to have a daily usage of about 2,000,000 vehicle miles of travel, with the average trip approximately 113 miles in length.

On the basis of proposed toll charges applied to the anticipated traffic using the road in its first year of operation, gross revenues for the year ending 1957, have been estimated at \$16,340,000.

Schedules of annual maturities on the basis prescribed in the official Notices of Sale at various interest rates and also proposal forms will be furnished to bidders upon request addressed to the local authorities or to the General Counsel of the PHA, Longfellow Building, Washington 25, D. C., or to the Field Office Directors of the PHA in the Cities of New York, N. Y.; Atlanta, Ga.; Fort Worth, Texas; Chicago, Ill.; San Francisco, Calif.; and Sauter, P. R.

The schedule of maturities at any specified interest rate is so arranged that on the delivery of the bonds of any issue the PHA obligation under the Annual Contributions Contract is fixed in an amount which will be sufficient to provide for the payment of each installment of interest and principal on the basis that any amount of the fixed and uniform annual contribution not needed for the payment of principal and interest in any year will be carried over and used to supplement the annual contribution in the succeeding years.

The bonds of each issue will be secured by a first pledge of annual contributions unconditionally payable by the PHA pursuant to the Annual Contributions Contract in an amount which, together with other funds of the local authority actually available for such purpose, will be sufficient to pay the principal of and interest on each issue of bonds when due and, unless otherwise specifically stated in the official Notice of Sale, will be general obligations of the local authority. The annual contributions will be paid by the PHA direct to the fiscal agent of the issuer. Section 10(e) of the United States Housing Act of 1937, as amended, provides that "The faith of the United States is solemnly pledged to the payment of all annual contributions contracted for pursuant to this section, and there is hereby authorized to be appropriated in each fiscal year, out of any money in the Treasury not otherwise appropriated, the amounts necessary to provide for such payments."

Section 5 (e) of the United States Housing Act of 1937, as amended, provides that the bonds, including interest thereon, "shall be exempt from all taxation now or hereafter imposed by the United States." In most instances the bonds are also tax-exempt in the state under the laws of which the local authority was created.
