Admiral Corp.—Government Contract—

The wraps of military secrecy have just been taken off a radio receiver-transmitter than can be tuned to 1750 Very High (VHF) and Ultra High (UHF) frequencies, which this corporation is producing for U. S. bombers and fighter planes, it was announced on Aug. 16.

The unit, first of its kind, is the airborne all-channel VHF-UHF transceiver being built for installation in such Air Force planes as Boeing's B-47 Stratojejt bomber and its new B-52 8-jet global bomber and North American's new F-100 Super Sabrejet. All Navy aircraft, including McDonnell's F-28 Banshee and F-3H1 Demon, Douglas' F-3D2 Sky Night and F-4D1 Sky Ray, Chance Vought's F-70 Cutlass and North American's F-J2 Fury, also carry this radio equipment.

The transceiver, which operates between 225 and 400 megacycles on the UHF band, can be set for automatic tuning to any 20 of the 1750 VHF and UHF channels. An entirely different set of 20 channels can be selected each day for transmission and reception. When used in conjunction with other equipment in the plane the unit becomes an automatic direction finder.—V. 179, p. 2589.

Aeroquip Corp.—To Redeem Preferred Stock—

This corporation has called for redemption on Jan. 1, 1955 all shares of its 5% cumulative preferred stock now outstanding at par ($100 per share), plus accrued dividends to Jan. 1, 1955.

Peter F. Hurst, President, has recently announced record nine months earnings. He commented at that time that "If business should continue at its present rate, we feel that 1954 earnings may possibly exceed $1,000,000 for the second consecutive year."

The corporation produces flexible hose lines, fittings and self-sealing couplings.—V. 180, p. 529.

Affiliated Gas Equipment, Inc.—Contract Extended—

Lyle C. Harvey, President, on Aug. 18 announced that negotiations between Northrop Aircraft, Inc. and the Day & Night Aircraft Division of Affiliated Gas Equipment, Inc., have culminated in letters of intent extending production of F-89D Wing Tip Fuel Pods another 24 months in the Monrovia A.G.E. plant.

This extension, amounting to several million dollars worth of defense production, covers spare-part wing pod sets as well as those intended for scheduled production of the famous F-89D Northrop Scorpion.

While Day & Night's aircraft division has been closely identified with the F-89D Northrop program for more than three years, its production facilities during that period have been devoted to a number of other defense contracts as well—plus experimentation with advanced production techniques such as resistance welding on titanium. Currently this A.G.E. west coast plant also sub-contracts parts and sub-assemblies for such well-publicized defense items as the Douglas C-124 Globemaster, the Firestone Wac Corporal missile, and the Northrop Snark B-62 missile.—V. 179, p. 1717.

Export sales of this corporation's thousands of different types of products are now being handled by the newly formed international division, it was announced on Aug. 12 by J. E. Ashman, President.

Products which will be sold abroad through the new international division include over two thousand different types of aviation supplies classified under hardware, seat belts, accessories, maintenance chemicals, raw materials, and electrical and radio equipment; also the new division will handle the special-purpose products of the Aircraft Products Division at Teterboro, N. J. and the Electronic Equipment Division at Orange, N. J. Equipment designed and manufactured by these divisions include a.c. and d.c. linear and rotary actuators, motors, gear boxes, screw jacks, hydraulic and pneumatic valves and regulators, LF, HF, VHF, and UHF communication and navigation systems, special-purpose receivers, radio ranges, and missile guidance systems.—V. 178, p. 1565.

American Louisiana Pipe Line Co.—Proposed Construction—

This company has asked the Federal Power Commission to reconsider its original procedural ruling and authorize prior to Oct. 1, next, construction of American's proposed $130,000,000 pipe line system to supply an additional 300 million cubic feet of natural gas daily from Louisiana Gulf Coast fields to markets in Michigan, Wisconsin, Iowa and Missouri.

American Louisiana told the Commission that a mere legal technicality which it created unnecessarily will deprive 375,000 homes and thousands of industries of additional supplies of natural gas.

The issue which would block the construction of the American Louisiana pipe line centers around the time when its gas suppliers will be required to submit to FPC regulation. The Commission contended in an order dated Aug. 12 that this must be done prior to Sept. 13. The company in its application for rehearing to the FPC stated that its gas producers would not agree to submit to regulation by that date since under the law they need not apply to the Commission until shortly prior to the time deliveries under their contracts commence, which is many months away.

American Louisiana pointed out, however, that the gas producers are bound by contract to supply gas and obey all Federal laws if the FPC authorizes construction of the new pipe line prior to Oct. 1, 1954. If the Commission does not grant its approval by that date, the gas producers may cancel their contracts.

If approved by the FPC, the American Louisiana project will result in a total expenditure of approximately $500,000,000, for it will require the drilling of gas wells, the building of gathering lines, the expansion of gas distribution systems and the sale of hundreds of thousands of gas appliances in more than 160 communities. The actual construction of the line will provide 150,000,000 man hours of employment and thousands of other jobs will be created by the production of 600,000 tons of steel and the manufacture, sale and installation of gas furnaces.—V. 179, p. 1261.

The terms of this loan have been substantially agreed upon, and it is expected that the arrangements will be concluded and the loan closed as of Sept. 1. The funds provided by this loan will be used to retire the present interim loan of $45,000,000; to take up the balance of the presently outstanding long-term loan on the Carthage properties, and to provide funds for the installation of a catalytic cracker and platforming unit in the Enid refinery.

The task of coordinating operations of the Champlin and Peppers companies with those of The Chicago Corporation is proceeding satisfactorily. The plans for the refinery addition are nearing completion, and it is expected that construction will begin in the near future.

In announcing net earnings for the first quarter R. L. Tollett, President stated that the increase in gross operating income for the quarter had amounted to only 4% and that the higher percentage of increase in net earnings was not the result of a lower effective income tax rate, which was the same in 1954 as in 1953; but that the increase followed reductions in operating costs and related expenses. Mr. Tollett further stated that short-term prospects for increasing net earnings were not as good at this time as a year ago, but that Cosden expects its gross operating income to be maintained at a higher level this fiscal year than last.—V. 179, p. 2806.

Consolidated earnings for the quarter which ended on June 30 were the best for any first quarter since 1950. Before Federal income taxes they were $881,767 as against $702,219 a year ago. After providing for Federal income taxes, earnings were $405,767, equal to 65 cents per share. In the same period a year ago, we earned $324,219 after taxes, or 52 cents per share.

An upward trend in orders for printing presses and equipment over the past four months was reported on Aug. 18 by Edward G. Williams, President of American Type Founders, Inc.

A subsidiary of Daystrom, Inc., American Type Founders is one of the world's largest suppliers of printing equipment, manufacturing letterpress, offset and rotogravure presses and foundry type.

Mr. Williams said orders for presses and equipment were running about 10% above expectations for the last four months with orders for June and July exceeding April and May figures. "While new orders for printing equipment are increasing, continued shipments against major defense contracts are, at the same time, reducing ATF's backlog of defense business," he said.

Sales and earnings figures for American Type Founders are consolidated with the parent organization, Daystrom, Inc., which also has major operations in the electronics and furniture fields. Daystrom recently reported first quarter (April-June) earnings after taxes of $405,767 or 65 cents per share compared with $324,219 or 52 cents per share a year ago.

Detrex Corp.—New Million Dollar Plant—

The corporation will soon begin construction of a million dollar plant located in Bowling Green, Ky., to house the manufacturing of its rapidly expanding Drycleaning Division.

A. O. Thalacker, President, explained that the expansion was necessitated by a 54% increase in the company's drycleaning equipment business during the past six months, overtaxing production facilities.

Detrex entered the drycleaning equipment field in 1938, integrating its Drycleaning Division's manufacturing operations with the production of Detrex industrial metal-cleaning machinery in the main plant in Detroit.

Mr. Thalacker pointed out that "growth of our drycleaning business has been so tremendous that it is no longer practical to continue both operations under one roof."

Scheduled for completion on June 1, 1955, the new Ketnucky plant will contain over 100,000 square feet, and cost an estimated $1,000,000. Other Detrex subsidiary plants are located in Ashtabula, O., and Tacoma, Wash.

Lincoln Electric Co.—New Method Simplifies Welding

A new method of welding that eliminates skills normally required, and claimed to be as easy as turning on a light switch, promises to make it possible for the rapidly growing number of home fix-it-yourself and hobby craftsmen to work with metals as readily as with wood. It is expected that the method will also be useful to business and service establishments such as bakeries, hotels, bottling plants, hospitals, body shops, repair shops and other users of metal equipment and machinery that occasionally need a quick, easy method of repair or maintenance fabrication.

This company has developed the new method, called "SELFWELD," to create a quick, fool-proof method, usable by everyone, of joining metals for repairing and making such things as metal furniture, household and business equipment, tools, toys and automobiles. Lincoln has also developed a new 100 ampere welding machine, called the "Lincwelder," for use with "Selfweld." The machine, complete with electrodes, Selfweld holder and accessories, costs less than $100. —V. 180, p. 254.

Lockheed Aircraft Corp.—Receives New Jet Order—

A new order for Shooting Star jet trainers, earmarked for friendly nations and for the United States Navy, will extend production of the world's most widely used jet into 1956, this corporation reported Aug. 18.

Marking the tenth reorder since the Lockheed trainer was introduced in 1948, the new contract calls for additional quantities of the two-seat school jet to be delivered to various Mutual Defense Assistance Pact countries, besides Navy forces.

The only jet trainer used by U. S. military services, the Shooting Star trainer (designated TV-2 by the Navy and T-33 by the Air Force) brings the realism of combat performance into the advanced tactical training of jet pilots.

Ranked as the largest producer of turbine aircraft, now approaching its 7,000th jet, Lockheed is currently turning out the advanced, 600-miles per hour trainer with fewer hours per pound of airframe than the industry-wide average for propeller fighters during World War II peak production. Exact figures could not be disclosed, officials said.

Now in its 11th year of jet production, Lockheed currently is flight-testing another new combat plane, the U. S. Air Force's new XF-104 "air superiority" fighter.—V. 180, p. 441.

Merritt-Chapman & Scott Corp. — Plans to Increase Authorized Common Stock Capitalization—

Plans to increase the authorized common stock capitalization of this corporation from 3,000,000 to 6,000,000 shares will be voted on by the stockholders on Oct. 6, 1954, Louis E. Wolfson, President and Board Chairman, announced on Aug. 17.

Mr. Wolfson pointed out that 2,153,142 of Merritt-Chapman & Scott's currently authorized 3,000,000 shares may soon be outstanding as a result of recently announced plans to acquire the Marion Power Shovel Co. and its majority owned subsidiary, the Osgood Co., both of Marion, Ohio, through an exchange of shares.

The proposed increase in Merritt-Chapman & Scott's authorized capitalization is designed to provide for future expansion and other corporate purposes, Mr. Wolfson said.

At present, 1,697,977 M-C&S shares are outstanding, including those issued early this year during acquisition of a greater than 92% interest in the Newport Steel Corp., of Newport, Ky. It is estimated that complete acquision of Marion Power Shovel Co. and its subsidiary would entail the issuance of 455,165 additional shares.

Under an agreement announced late in July between M-C&S and The Ohio Company, of Columbus, Ohio, investment bankers holding a substantial share of Marion stock, Merritt-Chapman & Scott will offer to acquire Marion through an exchange of shares on the basis of three shares of Merritt common for two of Marion common. M-C&S will propose to acquire at least an 80% interest in Marion, one of the nation's leading manufacturers of excavating equipment and cranes, but will reserve the right to accept a lesser percentage.

The approximately 13,000 shares of Marion preferred stock now outstanding are expected to be called for redemption prior to the effective date of Merritt-Chapman & Scott's offer.

Conditional upon its acquisition of a substantial interest in Marion, M-C&S also will offer to acquire shares of the Osgood class A and B common stock not held by the parent company, on the basis of two shares of Merritt for three shares of Osgood. The latter company manufactures a line of smaller power shovels and cranes, and also engages in a foundry business for the manufacture of steel castings.

M-C&S shareholders of record Sept. 6, 1954, will be eligible to vote at the special meeting called for Oct. 6.—V. 180, p. 442.

Brief descriptions of standard components including horse-power ratings, reductions and pinion speeds handled by units carried in stock are included.

Even where some modifications such as fan cooling and water cooling are required by a particular installation, standard components are available that keep costs down while service requirements go up. A condensed chart gives typical horsepower ratings at 100 and 1750 pinion rpm and weights of units from 2-inch to 18-inch center distance.—V. 178, p. 1988.

Pressed Metals of America, Inc.—Reports Profit—

J. W. Leighton, President, on Aug. 13 said in a letter to the stockholders:

"Total sales and other income for the second quarter of 1954 were $2,402,684 or a total of $4,650,759 for the first six months of 1954, compared to $7,862,435 for the first six months of 1953.

"The operations for the first six months show a loss of $5,032.10 based on the inventory taken July 23, 1954. This would indicate a profit of $20,473.28 for the second quarter as compared to the $25,505.38 estimated loss for the first quarter shown on the Interim Report dated April 28, 1954.

"In considering the results for the next six months it must be borne in mind that the loss of the Chevrolet business and the general curtailment because of model changes will have an adverse effect.

"With reference to the resolution passed by the board of directors and quoted in our letter of June 26, the possibility of a merger has been discussed but we have nothing definite to report at this time."

Other bids, also for a 3% interest rate, were 99.93% by a syndicate headed by Blyth & Co., Inc.; 99.7099% by Halsey, Stuart & Co. Inc. and 99.6991% by Kuhn, Loeb & Co.

PROCEEDS—The net proceeds will be used for construction, expected to cost approximately $128,282,000 for 1954 and 1955. Of this amount, expenditures of $39,628,000 will be made for steam electric generating plants, and $62,551,000 for electric distribution lines and substations.

BUSINESS—The company provides electric service in portions of central and southern California with a population of approximately 3,400,000. Areas served include 82 incorporated cities or portions thereof and more than 150 unincorporated communities and outlying rural territories.

EARNINGS—For the 12 months ended June 30, 1954 the company had consolidated total operating revenues of $146,036,865 and net income of $24,889,058.

Authorized to Increase Rates—

The California P. U. Commission on Aug. 18 authorized this company to increase its electric rates for the first time in 33 years. The new schedules are estimated to produce $9,835,000 in additional gross revenue annually, when the rate increase is fully effective. This will occur when all special contracts and special service arrangements have been renegotiated or terminated.

This is approximately 53% of the company's request for an annual increase of revenue of $18,627,000 based on estimated 1954 revenues.

Out of the $9,835,000 additional revenue the company will pay taxes amounting to $5,336,000, leaving a net increase in annual revenue of $4,499,000. As the Commission announced in other decisions on Aug. 18, "It is a rule established by the U. S. Supreme Court that income taxes, both State and Federal, are a proper charge to operating expenses," and that "this Commission is bound by the rule laid down by the Supreme Court." The Federal income tax is computed at the 52% rate now effective.

The Commission estimated that the higher rates will make it possible for the company to earn a 5.9% rate of return on its investment devoted to public service, which the Commission found to be just and reasonable. The company had sought a 6.29% rate of return. The new rates are to become effective on Sept. 13.—V. 180, p. 670.

Southern Pacific Co.—To Purchase Equipment—

Authorization for acquisition of another 1,500 large size railroad box cars was announced on Aug. 19 by D. J. Russell, President. The cars will be built in the railroad's own shops, he said.

Announcement of this large new authorization for freight equipment comes just as the first cars on a previous order for 1,250 box cars are starting to roll off Southern Pacific's shop assembly line.

Addition of these 2,750 cars now authorized or under construction will raise to 25,400 the number of new box cars acquired by Southern Pacific since the end of World War II, Mr. Russell said, and will bring the total number of all types of new freight train cars acquired or authorized by the company to almost 43,000.

Most of the box cars now being built, or authorized, will have doors that are 15 feet wide.

Southern Pacific's postwar expenditures for equipment purchases, including the latest authorization, have now risen to more than $524,000,000, it was stated. This improvement program has included freight and streamlined passenger cars, diesel locomotives and SP's half of the cost of 10,500 new refrigerator cars for the jointly owned Pacific Fruit Express Co.—V. 180, p. 578.

This division will manufacture klystron tubes, which are used in a variety of military and civilian applications. The demand for these tubes now exceeds the capacity of the corporation's available facilities

Plans Stock Split—

The directors on Aug. 18 voted to split the capital stock on a 2-for-1 basis, subject to the approval by stockholders of an appropriate amendment to the company's certificate of incorporation at a meeting scheduled for Sept. 30, 1954, which will include an increase in the number of authorized shares from 3,000,000 to 6,000,000. The board also voted a cash dividend for the third quarter of $1 per share on the present stock, payable Sept. 24 to stockholders of record on Sept. 7, against 75 cents per share paid in recent prior quarters.

If approved by the stockholders, the record date for determining stockholders entitled to the additional shares resulting from the proposed split-up will be approximately ten days after the date of the stockholders' meeting.—V. 179, p. 1935.

(A. E.) Staley Manufacturing Co.—Buys Glidden Plant

Sale to this company of The Glidden Co.'s live stock and poultry feed business was announced on Aug. 12 by both companies. The sale price was not disclosed.

The Glidden Co., headquartered at Cleveland, Ohio, said it was selling its feed business because the company needed the property and buildings of the feed division at Indianapolis The facilities will be used by its rapidly expandng chemurgy division, which processes vegetable oils and manufactures a wide variety of oil seed products, including industrial protein, lecithin, soya meal, flour and flakes, edible emulsifiers and steroid chemicals.

The Staley company has been manufacturing feeds since it began operations as a corn refiner here in 1912. It has processed soy beans since 1922. It recently completed a new million dollar feed mixing plant at Decatur with a capacity of 100,000 tons per year.

While the sale is effective Aug. 21, officials of both companies pointed out that the Glidden feed manufacturing facilities at Indianapolis would be used by the Staley company on a toll basis until arrangements could be made for production of the Glidden lines of feed in Staley's Decatur plant.

A. E. Staley, Jr., President of the Staley company, said that it is taking over the complete servicing of Glidden feed division sales and dealer organization. The Staley company has leased Glidden warehouse facilities at Indianapolis and other points.

In addition to its feed line, the Staley company manufactures starches, syrups, vegetable oils, monosodium glutamate, grocery products and chemical derivatives. It processes more than 100,000 bushels of corn and soy beans daily. In 1953 the company sales exceeded $130 million.

The Glidden Company, founded in 1917, operates 40 plants throughout the United States and Canada and has sales volume of more than $200 million annually. Glidden products include paints and varnishes, chemicals, pigments, metals, food, soy bean products, vegetable oils, minerals, and naval stores.—V. 179, p. 2146.

Standard Coil Products Co., Inc.—Registers With SEC

The corporation filed a registration statement with the SEC on Aug. 17, 1954 covering 189,655 shares of its common stock, $1 par value, to be publicly sold by Robert E. Peterson, one of the three principal stockholders of the company, and by the trustees of certain trusts created by him. The shares being sold represent the entire interests in trusts in the company of Robert E. Peterson and the trustees and they will receive all of the net proceeds of the offering, which will be made through an underwriting group headed by A. C. Allyn and Company and Dempsey & Company at a price to be determined by agreement between the selling stockholders and the representatives of the underwriters.—V. 179, p. 2601.

Standard Oil Co. (Indiana)—Unit Merged—

This company on Aug. 17 made effective the merger into its organization of its eastern subsidiary, Pan American Petroleum & Transport Co. Final action on the marger has been postponed until some uncertainties regarding the new Federal tax legislation had been cleared up by its enactment.

In accordance with the merger agreemnt, earlier approved by stockholders of both companies, the number of Standard directors is increased from 15 to 16 and Jacob Blaustein of Baltimore, Md., becomes the new director. Mr. Blaustein has been a director and member of the executive committee of Pan American.

The directors on Aug. 17 also declared the usual quarterly cash dividend of 62½c a share and a special dividend of one share of Standard Oil Co. (New Jersey) stock for each 60 shares of stock of Standard Oil Co. (Indiana). At closing prices for the Jersey stock on Aug. 16 this special amounts to about $1.59 per share of Standard of Indiana.

The divedends declared are payable Sept. 30, 1954 to stockholders of record at the close of business Aug. 27, 1954. These dates are about three weeks later than usual, because, as announced July 14, the merger agreement barred the declaration of dividends while the merger was pending.

Standard already owned about 78% of Pan American's stock. Substantially all of Pan American's assets and liabilities have been transferred to The American Oil Co., which has been a Pan American subsidiary since 1933. American Oil is a major marketer in 18 eastern states and the District of Columbia. It is now directly and wholly-owned by Standard.

Minority stockholders of Pan American will receive Standard stock on the basis of 0.777 of a share of Standard for each full share of Pan American. The entire minority interest of Pan American will be entitled to receive 777,716 additional shares of Standard's capital stock.

The major part of the minority stock interest in Pan American is owned by the Blaustein interests, which include Jacob Blaustein, the Louis Blaustein estate, and American Trading & Production Corp., all of Baltimore, Md.

To Build New Terminal in Indiana—

Standard Oil Co. (Indiana) on Aug. 19 announced plans to build a distribution terminal about six miles southwest of Dearborn, Mich., to serve part of eastern Michigan, including the western edge of Detroit.

The terminal will be on a 53-acre plot about two miles south of Inkster, Mich., in Wayne County.

The terminal will be served by Standard Oil's new products pipeline running from the company's biggest refinery at Whiting, Ind., 232 miles southwest, to River Rouge, 11 miles east. The pipeline runs through the terminal property.

Construction has been started in the last week. Standard said the terminal probably will start operating about Dec. 15.

Besides western Detroit, the terminal will supply 19 Standard Oil bulk plants in an irregularly-shaped area reaching about 35 miles east and west and 80 miles north and south. At present the area is served from the River Rouge terminal.

Running 24 hours a day, the terminal is expected to handle nearly 134,500,000 gallons of refined products yearly.

United Corp.—Committee's Application Denied—

The SEC on Aug. 18 announced a decision denying an application by the committee for option warrant holders of this corporation to reopen the hearings in proceedings with respect to a plan of reorganization filed by United Corporation designed to bring it into compliance with Sections 11(b)(1) and (2) of the Public Utility Holding Company Act of 1935. The application also requested leave to adduce additional evidence and sought modification of a prior order and related relief.

The plan, approved by the Commission on June 26, 1951, provided for cancellation of United Corp.'s outstanding option warrants without compensation. In issuing its order approving the plan, the Commission stated that it could not find a reasonable expectation that United's foreseeable earnings and assets would be such that the market price of its common stock would increase to the extent needed to give the warrants a recognizable value. This order was affirmed by the Court of Appeals for the District of Columbia. However, the Supreme Court subsequently held that the Court of Appeals had no jurisdiction over this provision of the plan and the review proceedings were dismissed. Further proceedings to secure enforcement of the provisions of the plan have been deferred pending the determination of the application to reopen the hearings before the Commission. In its decision denying the application the Commission concluded that it could find no basis for reexamining the case on its merits at this time in order to determine whether its prior action was based on substantial evidence and the correct application of the statutory standards, and further stated that under the circumstances it would be inappropriate for it to readjudicate the issue, noting that the enforcement court is the appropriate forum for any further contentions of the warrant holders attacking the Commission's previous order approving the plan.—V. 179, p. 1616.

United States Air Conditioning Corp.—Offering Completed—Mortimer B. Burnside & Co., Inc. and George F. Breen on Aug. 17 announced that their initial offering of 100,000 shares of common stock (par 10 cents) has been sold. They were priced at $2.87½ per share.—V. 180, p. 579.

The proceeds from these bank loans, together with other available cash, will be used to carry on (but will not be sufficient to complete) a 1954-1955 construction program of the company and its wholly-owned subsidiary The Western Colorado Power Company; which program will require, according to present estimates, approximately $25,300,000 in 1954 and $21,900,000 in 1955. It is the company's intention to issue and sell, during the second half of 1955 such additional securities as may be required to provide funds for paying the bank loans and financing in part the remainder of the 1955 program.—V. 180, p. 161.

This company's consolidated net earnings after taxes for the quarter ended June 30, 1954, were $1,395,000, or 34 cents per share, Edward O. Boshell, President and Chairman of the Board, announced on Aug. 11. This compares with net earnings of $992,000 or 22 cents per share in the first quarter of 1954.

Mr. Boshell said that although sales for the first half of 1954 were below those for the same period in 1953, he was optimistic over the company's long-range earning prospects. He explained that his optimism was based on the possibilities for growth and earnings of the diversified businesses Westinghouse Air Brake has acquired in the last two years.

Until there is a marked improvement in railroad equipment purchases, which have been drastically curtailed over the past few months, Mr. Boshell felt that no appreciable increase in earnings could be expected in the near future.—V. 179, p. 2417.

Willys Motors, Inc.—Resumes Output—Backlog Up—

This corporation resumed operations on Aug. 16 after a two weeks' vacation for plant and administrative workers, with the heaviest backlog of orders for Jeeps and other utility vehicles that it has had in many months, the company announced.

Production of Jeeps, trucks and station wagons will be raised 25% over July in order to take care of the increasing demand for the utility line by both foreign and domestic consumers, said S. A. Girard, General Manager of Kaiser-Willys.

The company had to reactivate a second assembly line in late July in order to take care of the increasing demand for the Willys utility line, he pointed out.

"Kaiser-Willys domestic sales carried over into August the heaviest backlog of orders in more than a year for the Jeep, truck, station wagon and sedan delivery," Mr. Girard said. "Our export division, which sold a record-breaking 22,954 passenger and utility vehicles during the first six months of 1954, also has a backlog of orders 35% above normal."—V. 180, p. 161.

Tentative Route For Superhighway — The Authority has announced a tentative route for a $224,000,000 north-south toll superhighway running from Kawkawlin, north of Bay City, to Sylvania, Ohio, just west of Toledo. Chairman William T. Slaughter said the route finally chosen probably would deviate from the tentative route at many points due to such problems as condemnation costs and physical features.

The tentative route, as drafted by the J. E. Geiner Co., would run slightly west of US-24 past Monroe, then cut to the east of US-24 alongside Rockwood, Trenton and Wyandotte, through the heart of Dearborn, pass Pontiac on the east, hit the southeast corner of Flint, and go through western Saginaw.

A traffic revenue survey for the projected pike is being made by the engineering firm of Coverdale and Colpitts. If the potential traffic is found sufficient, the authority has the power to issue revenue bonds for the superhighway.

Debt Base Expanded — Comptroller Lawrence E. Gerosa issued his first report commenting on the City's financial condition and advising as to the maximum amount of debt the City may incur for capital projects during each of the six succeeding calendar years commencing Jan. 1, 1955.

Comptroller Gerosa stated, "... the changes in the State equalization rates will increase the debt-incurring power of The City of New York for the next six years by approximately $250,000,000."

He further stated that the gross funded debt as of July 1, 1954 was $3,488,594,445 and the debt service in the 1954-1955 expense budget payable from all sources amounted to $276,550,000.

Comptroller Gerosa emphasized, "The credit of The City of New York is good." He explained he was utilizing the gains in the State equalization rates and the expected continued increases in assessed valuations for two purposes—

"(1) to provide funds for capital improvements in a sum larger than has been available heretofore, and

"(2) to maintain and improve the credit position of the City."

Comptroller Gerosa also pointed out the close relationship between the capital budget and the expense budget by stating — "The citizens pleading for public improvements must realize that the operation and maintenance and the principal and interest on all public improvements must be borne by the taxpayer, whether it is in the form of real estate taxes, rent, or nuisance taxes."

He felt assured that the available funds would be utilized to the best advantage of all the citizens of The City of New York.
