#### ACF Industries, Inc.—To Redeem Preferred Stock—

The directors on May 26 voted to redeem 21,694 of the cutstanding shares of \$50 par value 5% cumulative convertible preferred stock of this corporation. The redemption which is in accordance with the amended charter adopted at a special stockholders meeting in November 1954 will be at the rate of \$55,31¼ per share, representing 110% of the par value per share, or \$55 plus an amount of 31¼ cents per share which is equivalent to 5% dividends accrued from June 1 to redemption date.

trom June 1 to redemption date.

The redemption date and place have been fixed at July 15, 1955 at the Gurianty Trust Co., of New York, redemption agent, 140 Broadway, New York 15, N. Y. Shares to be redeemed will be chosen by lot after the close of transfer books on the record date of June 6. Transfer books will remain closed during the ensuing days while lot drawing is in progress and reopen on June 10. Holders whose shares are drawn retain the option to convert their shares into common stock at a rate of 1½ shares of common for each share of preferred only until the close of business July 15, 1955. Since a dividend of \$1 per share is payable on the cemmon stock June 15, 1955, to holders of record on June 1, 1955 holders of preferred stock who convert their shares into common after June 1 will not be entitled to such dividend.

chividend.

Charles J. Hardy, Jr., Chairman of the Board of directors, said, after the meeting, "Last year, when the stockholders voted to change the preferred stock and make it cumulative, redeemable and convertible, they also provided that a sinking fund be established for such redemption. The present redemption represents the maximum amount of money that could be set aside in the sinking fund, While our final audited figures are not yet available it appears that the earnings of the company during the fiscal year which ended on April 30 justified the directors in allocating the maximum amount required for the sinking fund, for the purpose of preferred redemption."

1955 was \$41.19 compared with \$39.22 a year ago.

Sales for March and April, 1955, the first two months of the company's current fiscal year which began March 1, were ahead of the same two months a year ago. William G. Kornes, President, said on June 1. Dollar sales were 4% greater, he said, and unit sales were up in all major departments except butter. Profits, both beiore and after taxes, were about the same as a year ago.

Profit margins in some departments, principally ice cream and milk, are slightly below a year ago, according to Mr. Karnes. This is due, primarily, to competitive conditions in various parts of the country. However, it is too early to indicate profit trends for the entire year.—V. 181, p. 106.

## Bethlehem Steel Corp.—New Canadian Development

Bethlehem Steel Corp.—New Canadian Development The Marmoraton Mining Co., a subsidiary operates the mine at Marmora and will be holisting 1,250,600 tons of ore and rock from the pit annually when full production is reached. This will yield 500,000 tons of high grade concentrates which will be pelletzed and carried by the Canadian National Ry. over a 64-mile line to the dock side at Picton, Ont., Canada, for shipment.

The first shipment of iron concentrates was made from the Marmora Mine on May 12 when the S. S. Powell Stackhouse, a 9,600-fon ore carrier, moved off from the Picton dock with the first load of pellets bound for the steel forges of Lackawanna, N. Y.

The steel company started diamond drilling operations in the Marmora area in 1950. By August, 1951, the existence of sufficient quantities of ore to justify open-pit mining operations was established. While the mining company was developing its property the railroad was busy modernizing and extending its rail facilities between Marmora and Picton, an undertaking which involved \$1,000,000 and another

million is invested in the 75 hopper cars and two diesel locomotives required for the operation. There will be luriner renovations this year.—V. 161, p. 2458.

## Brush Electronics Co.-New Industrial Control-

With industry daily becoming more alert, to the necessity for sound control, both in its products and in its plants, sound measurement and analysis. has been simplified by the recently developed Third Octave Spectrum Analyzer Model B L-2103, distributed in the United States and Canada by this company.

This instrument, through the use of a narrow frequency band analysis, provides, physical measurement data that is easily correlated to subjective tests for loudness of sound or the intensity of vibration.

## Bullion Monarch Uranium Co., Inc.—Operations—

Bullion Monarch Uranium Co., Inc.—Operations—
The stockholders, at their annual meeting recently, were told that one being taken from one of the company's claims has diviored some areas of vein assaying as high as 4.5% to 5% uranium oxide. This particular claim and, three others are being operated by Vasinathum-Corp. of America, to which corporation these claims are leased on a royalty arrangement.

Bullion Monarch has been encouraged to begin drilling o erations on two of its nine remaining claims, stockholders were accused by company officials.

Bullion Monarch was formed in Utah in 1948 through private subscription. Prior to the learing of four of its claims to Vana.hium Corp. of America in June, 1854, Bullion Monarch shipped about \$20,000 worth of ore to the Atomic Energy. Commission from a fraction o. only one claim. About 90% of this ore came from an open pit surface operation.

## Burgess-Manning Co.—New Development—

The first outdoor, doorless, acoustically treated Acousti-telephone both ever installed is being tested amid traific din, with excellent results, it has been reported.

The test is being made cooperatively by the Midland States Telephone Co. and Burgess-Manning Co., designers of the new booth. The booth is a modification of the recently designed Model 45 Acousti-Bocta, but is someward larger to withstand outdoor, conditions and to give added protection to the telephone user and the instrument. Installation of the booth is very simple as it may be clamped to any convenient, light or yard pole, or to a special steel pole with adequate concrete footing.

The booth was developed in response to request for the second of the control of the clambed to any convenient, light or yard pole, or to a special steel pole with adequate concrete footing.

pole with adequate concrete footing.

The booth was developed in response to requests for an acoustically efficient "walk-in" telephone booth for all types of noisy o'tdoor locations where telephones are used including streets, super highways roadsides, refinery yards, large manufacturing plants, shipping yards, construction projects and similar locations.—V. 181, p. 643.

## Cornell-Dubilier Electric Corp.-Profits Up 23%

Higher earnings were reported on June 2 by this corporation for the six months ended March 31, 1955, first half of its fiscal year. Nets earnings after taxes for the period amounted to \$1,036,649, equal to \$1.96 a. share on £12,390 outstanding shares of common stock. These earnings compare with net income of \$847,953, or \$1.59 per share, for the six months ended March 31, 1954. Net sales for the first half of the current fiscal year totaled \$19,026,350 compared with \$21,562,445 for the similar period of the previous year.

Noting that prefits for the latest six months period rose 23% while sales declined 12%, Octave Blake, President, attributed the higher earnings to increased efficiency and better production methods. The lower sales volume was due to more competitive conditions, he noted.—V. 181, p. 1202.

Kenneth C Long, President, in his quarterly report to stockholders issued Saturday.

issued Saturday.

"This is the first step in a program that will give this station an ultimate capacity of 400,000 kilowatts," said Mr. Long.

By October, 1957, the company expects to have a new 125,000 kilowatt General Electric high pressure turbine in operation. This turbine will be served by a Combustion Engineering-Sulzer Monotube boiler. It will be the first in this country for operation at less than a pressure of 3,200 pounds per square inch. It will supply steam for a pressure of 1,800 pounds per square inch super-heated and re-heated to 1,000 degrees.

degrees.

When the first unit is completed the nation will have a capacity of 275,000 kilowatts. The company's total generating capacity, including the O. H. Hutchings generating station, will then be 635,000 kilowatts. At that time the company expects a peak system demand of 555,000 kilowatts.

555,000 kilowatts.

Also revealed in the quarterly report was the company's 1955 total construction program of \$12.675,000. The total is divided as follows: For electric facilities, \$9.616,000; for gas facilities, \$2,506,000; and for steam and water divisions, \$553,000.

The total expenditures for the year include \$550,000 for the beginning of the work at Tait station.

The total revenue for the 12 months period ending March, 1955 rose (5.63,70),000. This is an increase of 3% over the previous 12 months. The company's expenses also rose 8%.

The earnings per share of common stock for the 12 months period was \$3.01 as compared to \$2.98 per share for the previous year.—

## DeJur-Amsco Corp., Long Island City, N. Y.—Develops

DeJur-Amsco Corp., Long Island City, N. Y.—Develops New Dictating Machine—

This corporation announces the development of an entirely new concept in dictation machines which will prove of great assistance to camera and professional men in recording activities and events. This new compact machine, named the DeJur Stenorette, is a pushbutton machine which can be used for either dictation and transcription. This is the first magnetic tape machine designed specifically for recording and transcribing. Weighing only 11 pounds, the Stenorette will retail for only \$169.50, including a combination microphone-speaker and enough tape for 30 minutes of continuous recording.

The Stenorette, termed an electrical marvel, employs tone and volume controls to produce a fidelity of reproduction heretofore not possible in conventional type dictating machines. Five push-buttons provide simple automatic control of the tape for recording, listening, forward and reverse speed winding, and stopping.

Dictation corrections or playback are facilitated by an automatic scale indicator which gives accurate positioning when winding the tape forward or backward. The microphone-speaker is equipped with a start-stop button to control the tape during pauses or interruptions while dictating. The Stenorette is now available in camera stores.

The tape can be used and reused repeatedly for the life of the machine. Accessories available include transcribers' earphones, foot pedal controls, telephone attachments and many others.

Detroit Steel Corp.—To Pay 4% in Stock—

The directors on May 27 declared a dividend payable June 30, 1955 in common stock at the rate of 4% (one share for each 25 shares owned) to shareholders of record at the close of business June 8, 1955, it was announced by M. J. Zivian, President.

Mr. Zivian pointed out that the current market value of the dividend stock is approximately equal to 50 cents a share. This is the first dividend by Detroit Steel since Dec. 30, 1953, when a 2% stock dividend was distributed. Previously, he said, the company had paid cash dividends for 29 consecutive years beginning in 1925.

Mr. Zivian explained that the declaration of a stock dividend at this time follows the company's previously announced policy of distributing earnings to shareholders through the payment of stock dividends on a semi-annual basis, pending refinancing of the existing first mortgage note to Reconstruction Finance Corporation. He said, "The company's steadily improving earnings picture strengthens the outlook for this refinancing at an early date," adding that the company's sales for the first five months of this year are running 96% ahead of the corresponding period of 1954 and that earnings through April exceed those for all of last year.

Pointing out that the company is virtually sold out on hot and cold rolled sheets through the third quarter with many customers eager to get on the books for the fourth quarter, Mr. Zivian commented, "We expect our company to make a good showing this year even though ther might be a moderate seasonal let-up in the third quarter. Of course, much will depend upon the outcome of the current bargaining negotiations in the automobile industry."—V. 181, p. 1559.

#### Liquid Carbonic Corp.—Sells Durables Division-

The corporation on June 1 announced that the remaining assets of its durables division would be disposed of. This division, which includes bottling machinery and contract manu acturing and which formerly included the soda fountain business, liquidated in 1953, has been unprofitable for several years.

While it has been impossible to find a single buyer who would pay a reasonable price for the entire division as a unit, the company will follow a plan which provides for the orderly disposal of the assets after completing, shipment of backlog orders. Continuous service on space parts will be provided to bottling machinery customers, most, of whom are also buyers of the company's carbon dioxide. The company also intends to continue as selling agents in its foreign subsidiaries for bottling machinery equipment produced by other manufacturers.—V. 179, p. 2474.

The company now has a total of 23 research and development contracts that are in various stages of completion.

A substantial amount of research end development work has been done over the period of the last three years and a number of projects are now nearing completion. Resultant production to his in so is expected to boost the company's sales volume greatly in the next several years.

The other contracts, aggregating approximately \$4,500,000, are for the production of radio compasses, airborne recives and mile llaneous electronic devices for military uses. The c.m.a.y's plesent backlog of orders for such equipment amounts to a proximately \$22,500,000.—V. 181, p. 547.

## Marquardt Aircraft Co.-Sales Up Slightly-

Marquardt Aircraft Co.—Sales Up Slightly—
Sales for the first 16-week period of 1955 were \$3,160,000, up slightly over the same period a year ago.
Roy E. Marquardt, President, said that profit after taxes amounted to \$70,500 for the 16-week period.
In response to a query regarding published reports that United Aircraft Corp. was negotiating to acquire Marquardt, stockholders were told that United Aircraft had initiated informal discussions and that no negotiations had transpired.

Marquardt's management studied the situation, it was stated, and it

was concluded that the best interests of the corporation for growth and development in its areas of interest for defense production lie in continuing. Marquardt's activities as an independent entity, and negotiations looking toward a merger-with United Aircraft Corp. should not be pursued.—V. 181, p. 2120.

## Merritt-Chapman & Scott Corp.—Plans Expansion—

Merritt-Chapman & Scott Corp.—Plans Expansion—
Negotiations by this corporation to acquire two conscruction companies through an exchange of shares were reported in a proxy statement mailed to shareholders in advance of the special meeting called for June 22 to vote on a broad proposal to increase the company's authorized common stock capitalization.

Upon acquisition, the two companies would operate as members of Merritt-Chapman & Scott's Construction Division. The company's diversified activities in other industrial fields are conducted through five other divisions: Steel, Manufacturing, Shipbuilding; Equipment, and Chemical, Paint & Metallurgical.

Names of the two contruction companies, which have headquarters in New England and operate nationally, were not disclosed, since negotiations are still in progress. While terms of the exchange remain to be finalized, acquisition of the two companies will not entail issuance of more than 325,000 shares of M-C & S stock, the proxy statement said.

Merritt-Chapman & Scott shareholders will vote June 22 on a proposal to increase the company's authorized common stock capitalization from 6,000,000 to 10,000,000 shares.

The proxy statement sent to M-C & S shareholders printed out that 4,995,737 shares were now outstanding, including 3,310,057 shares issued to effect various acquisitions included Mar.on Power Shovel Co. and its subsidiary. The Osgood Co., C. A. Pitts General Contractor Ltd., Devoe & Raynolds Co., Inc., New York Shipbuilding Corp., and Tennessee Products & Chemical Corp.

Co. and its subsidiary. The Osgcod Co., C. A. Pitts General Contractor Ltd., Devoe & Raynolds Co., Inc., New York Shipbuilding Corp., and Tennessee Products & Chemical Corp.

Management con iders it in the best interest of the company to have a larger number of shares available for future use than the balance presently unissued, the proxy statement said. It outlined future plans which could entail the issuance of approximately 1,650,000 shares, including the 325,000 listed as the maximum purchase price of the two can truction companies.

Referring to previously announced plans, the proxy statement said that pre-iminary discussion with prospective underwriters indicates that a \$2,000,000 convert.b. edbenture issue contemplated by Merritt-Chapman & Scott will call for the availability of approximately 1,000,000 share. The company also plans, it said, to renew its exchange offers of early this year to remaining shareholders of Devoe & Raynolds, New York Shipbuilding, Tennessee Products & Chemical, Newport Steel Corp. Marion P.wer Shovel Co. and The Ogood Co. Compiete acceptance of these offers would entail the i.suance of approximately 225,000 M-C & S shares, the proxy statement noted.

The corporation otherwise h s n present plans for the issuance of approximately 225,000 M-C & S shares, the proxy statement noted.

#### To Modify Indenture-

To Modify Indenture—
The company filed an application with the SEC on May 20, 1955, for qualification of an indenture in respect of five series of outstanding first mortgage bonds aggregating \$107,202,000 in principal amount. The application relates particularly to the proposed modification of certain provisions of this indenture, if the necessary consents of the holders of the outstanding bonds are obtained; and although no physical exchange of new bonds for the outstanding bonds is contemplated, the making of such amendments "might constitute such a change in the outstanding bonds as would, as a matter of law, result in the issuance under the Indenture as so amended of new bonds in exchange for a like principal amount of bonds outstanding under the Indenture on the effective date of the making of such amendments." Thus, the application for qualification of the indenture, as amended. The company claims that such issuance and exchange of bonds is entired to exemption from registration under the Securities Act of 1933.—V. 178, pp. 669 & 2577.

Indenture—

The company filed an application with the SEC on May 20, 1955, for qualification of an indenture in respect of six series of outstanding first mortgage bonds aggregating \$59,750,000 in principal amount. As in the case of Southern California Gas Co. above, the application relates to the proposed modification of certain provisons of athis indenture, which might, as a matter of law, constitute the issuance of new bonds in exchange even though no physical exchange of new bonds for old is contemplated. Thus, the application for qualification of the indenture, as amended; and exemption from registration under the Securities Act of 1933 is claimed.—V. 179, p. 2476.

## Southern New England Telephone Co.—Registers With Securities and Exchange Commission—

The company, filed a registration statement with the SEC on May 26, 1955, covering \$20,606,000 of 34-year debentures, due June 1, 1989, to be offered for public sale at competitive bidding.
