American Automobile Insurance Co.—Sub. Merges—

The stockholders on Sept. 14 approved the merger of American Automobile Fire Insurance Co., wholly owned subsidiary, into the parent company, it was announced by Robert Z. Alexander, President. The passage of so-called multiple line laws has eliminated the need for the fire company subsidiary, and it is expected that substantial economies will result from the simplified operation, he said.

The merger will take effect as of the close of business Dec. 31, 1955, at which time all liabilities of the subsidiary will be taken over by the parent company, and beginning Jan. 1, 1956, the parent company will underwrite all of the classes of insurance previously carried in the subsidiary company. American Automobile has another wholly owned subsidiary, Associated Indemnity Corp., which will not be affected by the pending merger.

The stockholders also approved certain modifications in the company's retirement plan which will provide increased benefits for participating employees who will continue to contribute a substantial share of the cost of the plan.—V. 181, p. 1549.

The company operates 20 retail outlets in different cities in the States of Florida, Alabama, Louisiana, Texas, Oklahoma, Mississippi, Arkansas, Tennessee and Kansas, consisting of 17 stores and three leased departments in department stores. The leased departments are located in Richard's Department Store, Miami, Fla.; Belk's Department Store, West Palm Beach, Fla.; and a department (opened Aug. 22, 1955) in B. Lowenstein and Bros., Inc., Memphis, Tenn.

Kaplen and Daniel Huffman, who were the sole stockholders in the then following corporations: Leased Departments of Florida, Inc. (Miami, Fla.); Acme Stores, Inc. (Pensacola, Fla.); Acme Stores, Inc. of Jacksonville, Fla. (and its wholly-owned subsidiary, Acme Stores, Inc. of Orlando, Fla.); Acme Stores, Inc. For administrative convenience and uniformity, the names of all the subsidiaries of the Atlas Sewing Centers, Inc. have been changed prior to the effective date of this stock offering so that the name of each corporation (except the corporations operating stores in Louisiana, where the law requires that the designation "Inc." must come at the end of the name) begins with the phase "Atlas Sewing Centers, Inc. of" followed by the name of the city in which the respective subsidiary has its store—excepting in the case of the parent corporation, Atlas Sewing Centers, Inc., which itself operates a leased department in Memphis and a store in Knoxville; and in the case of "Atlas Sewing Centers, Inc. of Oklahoma," which operates a store in Oklahoma City, one in Tulsa and one in Wichita.

Each of the other subsidiaries operates only one store, excepting Atlas Sewing Centers, Inc. of Houston, which operates one store in Houston, one in Beaumont and one in Lubbock; and Atlas Sewing Centers, of New Orleans, Inc., which operates a store in New Orleans and one in Baton Rouge.

Atlas Sewing Centers, Inc. of Jacksonville has a wholly-owned subsidiary, Atlas Sewing Centers, Inc. of Orlando, which operates a store in Orlando and recently opened a leased department in West Palm Beach.

For purposes of administrative convenience, a corporation was organized in April, 1954, under the name of Acme-Atlas Stores, Inc. Ten shares of no par value capital stock with a stated value of $100 per share, were issued to the following constituent corporations: Acme Stores, Inc. Barry Controls, Inc.—Earnings Increased—

Net income increased in the first six months of 1955 to $180,515 or 61 cents a share from $168,926 in the first half of 1954, it was reported on Aug. 15 by Ervin Pietz, President. Earnings before taxes were $392,058 for the 1955 first half, compared with $362,000 in the like period of last year.

Mr. Pietz pointed out that the company is increasing sales to industrial customers of its line of machinery mounts, thereby lowering the ratio of sales for military end-use to total sales. Mr. Pietz declared that this "is an important factor in the continued growth of the company."

Citing the progress of Barry in the first half of 1955, Mr. Pietz noted that during that period the company made its first public offering of common stock. Prior to March of this year all of the stock was closely held. At approximately the same time, the name of the company was changed from the Barry Corp. to its present form.

Recently, he pointed out, Barry acquired the Insco Co., a specialist in the field of electro-mechanical control and testing instruments. The Insco products are a "natural supplement" to the Barry line, he said.

Another sign of progress brought out by Mr. Pietz was that the company has launched a $300,000 expansion program which includes the construction of a new two-story building to increase capacity and research engineering facilities.—V. 182, p. 1010.

Beryllium Corp.—Announces Expansion Program—

This corporation has announced virtual completion of a major expansion program that will significantly increase the quantity, quality and variety of beryllium copper wrought products available to industry.

Cited by company officials as a major step in the coming of age of the beryllium copper industry, the two-year $2,000,000 expansion—most of it in new processing equipment now in operation—modernizes and increases by 60% the wrought alloy finishing capacity of the most completely integrated producer of beryllium and beryllium alloy products.

According to Lawrence F. Boland, Vice-President, the physical expansion adapts for the first time to the beryllium copper industry advanced mass-production and quality control equipment that has been successfully applied in steel and aluminum mills.

Production of wrought beryllium copper strip, rod and wire for the first six months of this year has already outstripped that of the comparable period in 1954. Sales for the first six months of 1955, Mr. Boland reports, reached an all-time peak—40% higher than the same period in 1954.

The expansion of wrought alloy capacity is but one phase of an overall program that calls for eventual enlarging of company facilities for production of beryllium master alloys and commercial casting ingot, as well. As part of its current modernization program, Beryllium has already stepped up its capacity for production of beryllium aluminum master alloy.—V. 177, p. 2782.

Chicago, Rock Island & Pacific RR.—To Split Stock—

The directors on Sept. 12 adopted resolutions splitting the common stock now outstanding on a two-for-one basis, subject to the approval of the holders of a majority of the common stock. The common stock will continue to be shares without par value.

The board called a special meeting of the stockholders to be held on Dec. 1, 1955, for consideration of the proposal, and fixed the close of business on Nov. 1, 1955, as the record date for the determination of stockholders entitled to notice of and to vote at the special meeting. The stock transfer books will not be closed.

The proposal requires the approval of the affirmative votes of the holders of at least a majority of the outstanding shares of common stock, and the split-up of such shares requires authorization by the Interstate Commerce Commission. If the proposal is approved by the stockholders and the Commission, certificates for the additional shares will be issued to the record holders as soon as the amendment becomes effective without the surrender for exchange of any of the certificates then outstanding. It is expected that the split will become effective in January, 1956.

It is the present opinion of the board that if conditions remain substantially as at present the dividend on the new stock will initially be at the rate of 67½ cents per quarter. It is expected that the split will be accomplished in January, 1956.—V. 182, p. 1011.

latches which hold doors securely locked, faster acting brakes, and many other devices specifically developed by Chrysler to provide the maximum margin of safety.

The push button drive is standard on all Chrysler Corp., cars equipped with PowerFlite automatic transmissions. Located on the instrument panel to the left of the steering wheel, the selector unit consists of buttons for neutral, low, drive and reverse which are illumniated for night driving. With the new device it takes only a gentle touch of the finger to shift gears.

Chrysler's new approach to passenger car styling embodies the use of an exciting fin treatment for the rear fenders and quarter panels. Dramatic taillight units which, integrated into the fins, carry out the contemporary aircraft motif evident in the over-all styling. New highsweep fenders accentuate the low, ground-hugging silhouette of all five lines of cars.

Other highlights of the 1956 models include an optional "Highway Hi-Fi" record player, new power brakes, new center-plane drum brakes, four-door hard tops in all lines, new and more efficient engines, improved sealed beam headlights, plus a number of other important under-the-hood mechanical advances, including 12-volt electrical systems.—V. 182, p. 811.

Consolidated Freightways, Inc.—Proposed Acquisition

Investment of more than $800,000 in new equipment by Foster Freight Lines of Indianapolis is reported by Consolidated Freightways, which is managing Foster pending Interstate Commerce Commission approval of its purchase.

Foster operates as a motor common carrier in the States of Illinois, Ohio, Kentucky, Indiana and Missouri and provides service to such important industrial centers as Chicago, Indianapolis, St. Louis, Dayton, Louisville, and Cincinnati. Agreed purchase price is $300,000 in cash or 15,000 shares of Consolidated common stock, at the option of the seller.

Consolidated's President J. L. S. Snead, Jr. said that if approval of purchase is received, Foster would be operated as a wholly-owned subsidiary. The two companies have interchanged freight for a number of years.

Under Consolidated's management, Foster has ordered 24 diesel-powered tractors of latest design and 50 high capacity trailers. Some are already in service and the remainder are scheduled for early delivery.

Expands in Canada—

This corporation has purchased all of the capital stock of Canadian Freightways, Ltd., with headquarters in Calgary, Canada, and the latter is now being operated as a subsidiary.

Consolidated has had a small minority interest in the Canadian company for a number of years. The remaining shares were purchased for 15,154 shares of the former's common stock and $137,500 in cash.

Canadian Freightways operates throughout Alberta and into British Columbia. Its service area extends from Grand Prairie south to Edmonton, Calgary and Lethbridge in Alberta and west to Vancouver, B. C. The newly acquired subsidiary serves the oil benefited regions of Alberta.

The two companies have long worked closely with one another providing a through service from points served in the United States by Consolidated to points in Canada served by Canadian Freightways. The two interconnect at Coutts, Alberta.

Canadian Freightways is launching an equipment improvement program that involves an expenditure of approximaely $1,100,000. On order are 45 semi-trailers of latest high capacity design and 36 propane-powered tractors. Some of these units are already in service and the company is benefiting from the more modern equipment.

A new terminal has been built at Edmonton representing an investment of $225,000, and was occupied Aug. 26. A large terminal is to be erected at Calgary at a cost of about $500,000, and a new $70,000 freight facility is planned for Red Deer in Alberta.

Copperweld Steel Co.—Expansion Program Set—Plans to Raise Funds From Sale of Securities—

This company on Sept. 12 disclosed details of its proposed modernization and expansion program at each of its main manufacturing divisions. The complete program will cost approximately $12,000,000 and is scheduled for completion in 1957. Its objective is aimed at increasing capacity, improving quality, reducing costs and broadening the range of products offered for sale, thereby enabling Copperweld to better meet the increasing demands of users of quality alloy and carbon steel billets and bars, tubing and copper-covered steel wire products.

The company proposes to finance the program by obtaining approximately $5,500,000 from the sale of common stock to the public, up to $5,500,000 from borrowing on a long term basis and the balance from retained earnings. Stockholders at a special meeting Oct. 10 will vote on proposals to increase authorized common stock from 900,000 to 1,500,000 shares; authorized serial preferred from 114,605 to 214,605 shares; and authorized long term debt to $15,000,000. The number of additional common shares to be sold publicly will depend on market conditions at the time of offering.

According to Frank R. S. Kaplan, President, the increased earnings anticipated from the program should materially benefit the present shareholders after allowing for interest on the additional debt and the increase in the outstanding number of shares of stock to be issued to finance the program.

Approximately $10,000,000 is to be spent at the company's steel division located at Warren, Ohio. Melting facilities will be improved and enlarged to a capacity of 660,000 tons of ingots a year. When completed, the company will have seven electric furnaces (four 65-ton units and three of 50-ton capacity).

Additions will be made to rolling and finishing facilities to give the company increased volume and a broader range of products. A 35-inch two-high reversing primary mill will be installed together with soaking pits with sufficient capacity to heat steel for this mill. The addition of annealing and straightening equipment is also contemplated. Upon completion of this project, it is estimated that shipments from this division could be increased about 40%.

At the wire and cable division at Glassport, Pa., approximately $1,000,000 will be expended for improvements. At this plant, the company makes a wide variety of copper-covered steel wire products used by the telephone, power, railroad, electronics and construction industries.

Close to $1,000,000 is ear-marked for the Ohio seamless tube division at Shelby, Ohio, for auxiliary equipment to provide a wider range of seamless steel tubing products.

Crescent Corp. — Semi-Annual Operations — W. H. Garbade, President, on Aug. 11, said in part:

Earnings for the first six months of 1955, profit from the sale of assets and special adjustments arising therefrom aggregate $3,178,000 before income taxes. The corporation has provided $1,000,000 for Federal and State income tax liabilities, leaving a net of $2,178,000 for the six six months ended June 30, 1955, or $5.11 for each share of common stock outstanding before the exchange offer (see below.) Substantially all of the amount of earnings and profits arose from the sale to Kerr-McKee Oil Industries, Inc., the sale of General American Oil Co. of Texas stock, and refining, marketing, and pipeline operations during the first quarter, all of which is nonrecurring.

Crescent's net crude oil production amounted to 1,300 barrels a day on June 30 compared with 1,200 barrels at the end of March, 1955.

Extensive development work continues on company properties in Cass and Marion Counties, Texas with five wells producing and three wells drilling. The wells completed to date are excellent producers, and should add substantially to Crescent's production during the remainder of the year.

Crescent sold its marketing, pipeline, and refining facilities effective April 1, 1955, together with trade name, trade marks, certain undeveloped leases, accounts and notes receivable, materials, supplies and equipment, and $5,000,000 in cash. It received as consideration 674,880 shares of Kerr-McGee 4½% cumulative, convertible preferred stock (par $25). Operations of the properties were conducted on behalf of the buyer in April and transferred to them on May 1, 1955.

Audit work in connection with the sale and operation for the

month of April, 1955, has been completed, and the amount due Kerr-McGee was paid during July.

On July 12, 1955, stockholders voted to change the name of the corporation from Deep Rock Oil Corp. to Crescent Corp. This name change became effective on July 13, 1955.

Crescent offered to its stockholders the privilege of exchanging 150,000 shares of Crescent common stock for 450,000 shares of the Kerr-McGee preferred stock. This exchange offer terminated on July 15, 1955, and was oversubscribed. As a result, Crescent now has reacquired 212,574 of its shares as treasury stock.

Effective May 1, 1955, Crescent Corp. acquired a 90% working interest in 28 producing oil wells located in Barton County, Kansas for a cash consideration of $351,000. The purchase is subject to oil payments which will require approximately 80% of the net proceeds from the sale of oil for the next two years. The properties are producing approximately 400 net barrels a day to the interest acquired before deducting for oil payments.

Siboney Development & Exploration Co. was formed on May 31, 1955 for the purpose of exploring for and developing oil and gas properties in the Republic of Cuba. Crescent and Sterling Oil of Oklahoma, Inc. have transferred their jointly owned interest in approximately 5,200,000 undeveloped acres in Cuba in exchange for 2,550,000 shares of common stock of Siboney, which was divided equally between Crescent and Sterling. On July 26, 1955, after the stock had been registered with the SEC, Siboney sold 2,000,000 shares, representing 40% of the total outstanding common stock, to three underwriting firms who offered these shares to the public at a price of $1 a share. Crescent now owns a 25½% interest in Siboney. Proceeds from the sale of stock to the underwriters will be used by Siboney to carry forward its planned geological, geophysical, and exploratory drilling program. Results of work done to date have been encouraging and it is anticipated that the first exploratory well will be drilled early this fall.

American Independent Oil Co. has acquired an interest of .832% in the Iranian Consortium for approximately $1,500,000. Its interest in the Iranian daily crude production is approximately 2,500 barrels based on current production rate. In addition, it will participate in the Iranian refinery operations. Aminoil acquired half of its interest as an original participant in the Consortium offering and acquired the remaining half of its interest from another participant subject to a 50% net profit interest. Crescent owns an equity interest amounting to 3.17% of American Independent.—V. 182, p. 312.

Crown Zellerbach Corp.—Proposed Consolidation—

The directors of this corporation and of Gaylord Container Corp. on Sept. 7 adopted an agreement of merger of the two companies, according to J. D. Zellerbach, Crown Zellerbach's President, and Edwin J. Spiegel, Gaylord's President.

The agreement provides for the merger of Gaylord into Crown Zellerbach, following approval of both companies' stockholders at special meetings Nov. 22. Gaylord's 2,695,519 shares of common stock would then be converted into a like number of shares of Crown Zellerbach common stock after Nov. 30, the contemplated effective date of the merger.

Mr. Zellerbach said: "At present each company largely produces different products and sells in separte markets," he said. "Our principal productive facilities are on the Pacific Coast and Gaylord's are in the south, mid-west and east. The merger would permit both companies to achieve the broad geographic coverage, product diversification, and manufacturing and merchandising efficiencies which are essential in our dynamic and expanding economy."

Principal provisions of the merger agreement are:

(1) Crown Zellerbach, as the surviving corporation, would assume all obligations and ownership of the properties and other assets of Gaylord Container Corp.

(2) A new "Gaylord Container Corporation" is to be formed by Crown Zellerbach, and its directors and officers will be selected from Gaylord's present active management and operating personnel.

(3) The membership of Crown Zellerbach's board of directors would be increased from 15 to 19 members. The four additional board members would be Joseph M. Arndt, Vice-President of Gaylord; A. Conger Goodyear, Chairman of the Board of Gaylord; Charles W. Goodyear, First Vice-President of Gaylord; and Edwin J. Spiegel, President of Gaylord, who would also become a Vice-President of Crown Zellerbach and a member of its Executive Committee. Vertrees Young, Executive Vice-President of Gaylord, would become a member of Crown Zellerbach's Management Committee.

(4) The autohrized number of shares of Crown Zellerbach common stock would be increased from 15,000,000 to 30,000,000 shares.

The agreement approved on Sept. 7 implements the Crown Zellerbach-Gaylord merger announced on June 29. Proxies and proxy statements will be mailed to both companies' stockholders of record as of Oct. 24.

Upon completion of the merger, Crown Zellerbach intends to increase its annual dividend rate to $1.80 per share on common stock. —V. 182, p. 7.

Cuban American Oil Co., Dallas, Tex.—Registers With Securities and Exchange Commission—

This company filed a registration statement with the SEC on Sept. 9, 1955, covering 2,000,000 shares of its 50c par common stock, to be offered for public sale through an underwriting group headed by Dallas Rupe & Son, Inc. The public offering price and underwriting terms are to be supplied by amendment.

The company was organized under Delaware laws on Aug. 5, 1955, for the purpose of conducting exploration for and development and production of oil, gas, and other hydrocarbons; and, according to the prospectus, it holds under option and intends to purchase certain mineral rights in lands situated in Texas, Arkansas, and Louisiana, on which are located producing oil and gas wells. It has outstanding 1,000,000 common shares, held by Herbert W. Klein and Grady H. Vaughn, Jr., of Dallas, and Tevis F. Morrow, of Los Angeles. The shares were issued in consideration for $1,000 and all the capital stock and notes of Compania Perforadora Y Exploradora Cubano Americana, S. A. (Cuban American Drilling & Exploration Co.). The subsidiary is engaged in the business of exploring and drilling for oil in the Republic of Cuba. The prospectus states that the cost of acquisition of such stock and notes to the sellers was the sum of $597,844.38.

Net proceeds of the present financing will be used to the extent of $1,014,076 to purchase the oil, gas, and mineral rights in the working interest in 873.75 net acres of land and the royalty interest in 936.25 net acres of land situated in the Nick Springs field in Union County, Ark., the Lisbon field in Claiborne Parish, La., and the Parks field in Midland County, Texas. The remainder will be advanced by the company to the subsidiary to enable it to pay the expenses of drilling an aggregate of at least 42,800 feet of exploratory wells at an approximate cost of $560,000, and the sum of $500,000 for paying the expenses of geological and geophysical surveys in addition to those heretofore made. If the exploration program of the subsidiary results in the finding of oil or gas in commercial quantities, additional financing will be necessary.

Dresser Industries, Inc.—Reports Improved Sales—

R. E. Reimer, Vice-President, Secretary-Treasurer, in reviewing the company's substantial growth in recent years and discussing the outlook for the current year's sales and earnings, said on Sept. 8 that total sales for Dresser Industries for the current fiscal year, including the operations of the company's most recent acquisition, Lane-Wells Co., will be approximately $160,000,000. He estimated that net earnings after taxes in 1955, again inclusive of Lane-Wells, will be approximately $5 per common share. This compares with $5.05 for the 1954 year, of which $0.33 was non-recurring. Mr. Reimer pointed out that the estimate reflects the fact that nearly 100,000 more shares of stock will be outstanding by the end of 1955 by virtue of the conversion of the company's preferred stock, together with a stepped-up progam of development and research, particularly in the fields of electronics and nuclear activity as applied in oil field operations. Mr. Reimer pointed out that the consumption of oil and gas has been increasing rapidly in recent years to the point where these vital natural resources supply approximately 70% of the nation's mineral energy. The various Dresser companies manufacture equipment and supplies and render services to the oil and gas industries for drilling, oil and gas production, transmission, processing, refining and distribution. Mr. Reimer noted that approximately 80% of the company's sales volume went to these natural resource industries, with the balance of Dresser's sales going to a wide variety of industrial and chemical industry applications.

Dresser's new product research and development program during 1955 is budgeted at approximately $3,000,000, according to Mr. Reimer. Approximately half of this amount will be spent for electronic and nuclear research in developing new techniques for oil and gas well logging.—V. 181, p. 2927.

The company has decided to discontinue weaving operations in its plants at Grottoes, Va. and Burnsville, N. C., and is now offering the two plants for sale as going concerns.

The throwing machinery located in one-half of the Burnsville plant has shown a satisfactory profit. The company will maintain the throwing operations there, or if that plant is sold, will move this machinery to its other throwing mills. The drapery and upholstery division and its operations in Canada, both of which have been profitable for the last year, will also be continued.

The proceeds from the sale of the weaving machinery will add substantially to working capital and the liquidation of the fabric inventories will release further funds which may be used in the company's throwing operations, for retirement of long term debt, or for investment in any sound diversification of our business in which it may become interested.

George Friedlander has been elected President. He has been with the company since 1919 and has been a Vice-President since 1945. —V. 182, p. 715.

York & Co., Inc. Priced at 100% and accrued interest, the debentures mature Sept. 1, 1970. The common stock is priced at $10 per share.

The debentures are convertible into common stock until Sept. 1, 1965, or until the dates fixed for redemption, at the following arbitrarily determined conversion prices per share of common stock: $11 per share for the first $100,000 of debentures to be converted; $12 per share for the second $100,000 of debentures to be converted; and $15 per share for all debentures to be converted thereafter. They are redeemable at the option of the company at prices ranging from 105 to 100 and entitled to annual fixed and contingent sinking fund payments each year beginning Sept. 1, 1957.

PROCEEDS—The net proceeds to be received by the company from the sale of debentures and common stock, will be applied in part to prepay in full all of the company's short term notes payable to banks amounting to approximately $150,000. Of the balance of such net proceeds, the company will apply approximately $800,000 to the establishment of a new quarry at the Oley property, including the cost of plant construction, the acquisition and installation of machinery and equipment, and the initial stripping necessary to place the quarry in production. Any remaining balance will be added to the company's general funds.

BUSINESS—The company is engaged in the operation of a quarry at Kutztown, Pa. for the production of chemical grade limestone for cement companies, crushed stone for ready mix concrete and highway construction, and agricultural limestone. Additional limestone deposits have been acquired in the Oley Valley, southeast of Reading, Pa. on which the company plans to conduct additional quarrying operations.

PROCEEDS—Net proceeds from the sale of the units together with other funds will be used by the company to buy two tracts of land from Food Fair Stores, Inc., operators of approximately 220 supermarkets in seven states, and to develop, improve and operate these tracts as shopping centers. The other funds include $2,022,222 to be received from Food Fair Stores for 20,000 shares of Food Fair Properties 6% preferred stock and 2,222,222 shares of common stock.

BUSINESS—The company will engage primarily in the business of acquiring, developing and improving sizable tracts of land as fully planned and coordinated shopping centers for occupancy by retail stores, offices and commercial and industrial establishments of diverse types. It will also engage generally in the business of investing in, developing and improving other types of real estate and may also engage in real estate financing.

These activities were originally conceived and initiated by Food Fair Stores, both the management of that company deemed it inadvisable for a company whose principal business is the operation of food supermarkets and the retail distribution of food products to engage in real estate projects on the scale contemplated or invest its capital in fixed assets to the extent necessary to carry out properly the shopping center program. In consequence, Stores is selling the two tracts it had acquired to Properties.

Ford Motor Co., Dearborn, Mich.—New Models—

Ford's 200 new 1956 truck models with greater engine performance and payload capacity go on display in 6,800 Ford dealer showrooms throughout the country Sept. 23.

Two new models have been added to the Ford truck line— a T-750 tandem axle model in the heavy truck series, and a new, longer wheelbase pickup.

Gross vehicle weights extend from 5,000 pounds on the pickup to 42,000 pounds on the heavy duty tandem axle models.—V. 182, p. 914.

Four Wheel Drive Auto Co.—Reports Profit—

The company earned a profit of $184,927 after taxes for the fiscal year ended June 30, 1955, compared with a loss of $397,429 in the previous year, Ben W. Heineman, Board Chairman and Robert A. Olen, President, announced on Aug. 25.

The profit in the 1955 year is equal to 62 cents per share of capital stock as compared with a loss of $1.32 in 1954. On July 19, the company renewed a dividend policy suspended since April 15, 1953, by declaring a quarterly dividend of 15 cents per share of capital stock payable Sept. 15.

Current assets as of June 30, 1955, were $7,794,714 as against $2,182,029 current liabilities, a 3.57 to 1 ratio that is well above the 2.29 to 1 ratio of 1954. Cash and accounts receivable alone exceeded all current liabilities by $738,200 at the close of the 1955 fiscal year, after being $1,136,700 less than current liabilities at the end of the 1954 fiscal year. The improvement in the current position is due in large part to a reduction in inventory.

The advance from the loss to the profit side was made despite the fact 1955 sales declined to $12,808,616 compared with $14,111,751 in the previous fiscal year.

The report shows unfilled orders totaling $9,613,000 as of June 30, 1955, up $4,287,000 from 1954.—V. 168, p. 1254.

Fresnillo Co.—To List Stock—

The directors on Sept. 12, decided that the time had come to comply with the request of many stockholders that the company's capital stock be listed on a national exchange. Consolidated net income amounted to $1,327,812 equivalent to $1.41 per common share compared with $1,435,590 or $1.47 per common share last year.

The company attributed the drop in earnings to reduced sales, lower malt prices and increased operating costs.

Net working capital increased from $8,449,338 in 1954 to $8,524,447 for the 1955 fiscal year.—V. 180, p. 2082.

General Cable Corp.—To Build New Plant—

This corporation will construct a modern manufacturing plant in Tampa, Fla., where it already operates a warehouse and sales office, it was announced on Sept. 13 by I. T. Bennett, Chairman of the Board and J. R. MacDonald, President.

Approximately nine acres are being purchased from the Seaboard Airline RR. Co. The initial unit will have approximately 50,000 square feet and will be equipped with completely modern equipment for the manufacture of paper telephone cable and other wires and cables for the constantly growing requirements of Peninsular Telephone Co., Inter County Telephone & Telegraph Co., Southeastern Telephone Co .and other rapidly expanding telephone companies operating in the Southeast.

Mr. MacDonald said: "Although the initial unit will be equipped primarily for the manufacture of telephone wires and cables, we are purchasing sufficient land to enable us to construct additional units for the manufacture of wires and cables for the utility, industrial and building markets."

Construction of the new plant will begin in October and it is expected to be in operation by March, 1956.

Upon the completion of the Tampa plant, General Cable will be operating nine plants in the United States. The other plants are located at Bayonne and Perth Amboy, N. J.; Emeryville and Los Angeles, Calif.; Monticello, Ill.; Providence, R. I.; Rome, N. Y., and St. Louis, Mo. It is also constructing a plant in Winnipeg ,Canada in association with Canadian and British interests.—V. 182, p. 508.

Corporation directors recently declared the 2% stock dividend on the common stock payable Oct. 1, to stockholders of record Sept. 9. At the same time the directors expressed the intention of paying 2% stock dividends in April and October, 1956, and, possibly, 1957, in lieu of cash. Cash dividends will be paid at the July and December dividend dates.

The corporation is a banking, finance, and insurance institution serving mid-America.—V. 181, p. 2118.

General Dynamics Corp.—Peruvian Contract—

A contract to build two diesel-powered submarines for the Republic of Peru has been awarded to this corporation's Electric Boat Division. Design and prefabrication work on the new submarines has already started and the keel layings will take place this fall. The contract calls for completion of the two ships in 1957.

The Peruvian contract brings to five the number of new submarines under construction in the Electric Boat shipyard. The others include the atomic sub Seawolf, just recently launched; the diesel-powered Darter; and a third nuclear submarine, the name of which has not yet been announced by the Navy. Electric Boat has also been designated as the construction yard for two other nuclear submarines.—V. 182, p. 1013.

General Mills, Inc.—To Expand Research Facilities—

Expansion of this corporation's research facilities to a campus-like setting on the outskirts of Minneapolis, Minn., will begin in 1956. The new site is 104 acres in size.

The move from existing facilities near downtown Minneapolis is made necessary by overcrowded conditions and lack of room for expansion. The company's steadily growing work in food and chemical research, plus the development of new food and industrial chemical products has created a pressing need for more space. The present research staff consists of more than 300 men and women.

The new Research Center will consist of several buildings constructed over a three to five year period, incorporating the newest principles of design in research facilities. The area eventually will take on the appearance of a small college campus. It is within two miles of the suburban site recently selected for a new General Mills general office building, scheduled for completion within three years.—V. 182, p. 814.

General Motors Corp.—Passenger Car Sales Up—

Retail sales of new General Motors passenger cars in the United States for the month of August were the highest in history for that period, Harlow H. Curtice, President, announced on Sept. 8.

Retail deliveries of new GM cars last month totaled 337,956 or 146.1% of the total for the same month of 1954.

Retail sales of both new and used General Motors passenger cars in the United States during the first eight months of 1955 were by far the highest for any similar period in history, Mr. Curtice said. The record eight-month sales totals reached by GM dealers were 2,597,332 new cars and 3,353,471 used cars.

Used car sales by GM dealers during the month of August totaled 437,595 or 131.7% of the total for the month of August last year.

Every GM passenger car division—Chevrolet, Pontiac, Oldsmobile, Buick, and Cadillac—posted new all-time sales records for new and used cars during the month of August and for the first eight months of the year.

To Vote on Savings and Stock Purchase Plan—

The proposed General Motors Savings—Stock Purchase Program for Salaried Employees in the United States is being submitted to GM stockholders for approval at a special meeting to be held on Sept. 23, 1955. If the program is approved by the stockholders, it will become effective Oct. 1, 1955.

During the year of formation an employee may pay into the program through such payroll deductions as he may authorize from time to time, savings of up to 10% of his eligible salary. Such payroll deductions must be in even dollar amounts and may not be at a rate of less than $5 a month. He may suspend his savings, or withdraw his savings.

At any time during the year of formation an emloyee may pay into the program through payroll deduction or otherwise in even dollar amounts all or any part of the additional savings required to bring his cumulative savings for such year up to 10% of his eligible salary for such year less any savings for such year which he may have previously withdrawn.

The corporation will contribute, out of current or accumulated earnings and profits, an amount equal to 50% of the amount of the employee's savings paid into the program for each month. The corporation's contribution will be made as soon as practicable after the end of each month.

Employe savings shall be invested 50% in direct obligations of the U. S. Government and 50% in General Motors common stock.

Corporation contributions shall be invested in General Motors common stock.

Interest received on direct obligations of the U. S. Government. Dividends received on General Motors common stock shall be invested in General Motors common stock.—V. 182, p. 612.

General Telephone Corp.—Secondary Offering—A secondary offering of 19,600 shares of 4¼% convertible preferred stock (par $50) was made on Sept. 13 by Blyth & Co., Inc. at $60.50 per share, with a dealer's concession of $1.10 per share. It was continued.—V. 182, p 814.

General Waterworks Corp.—Acquisition—

The corporation has acquired control of The Citizens Water-Supply Co. of Newtown, which serves Great Neck, L. I., N. Y., and six contiguous communities. General Waterworks also has purchased 15 water companies in Maine from Northeastern Water Co. These latter serve Skowhegan, Caribou, Eastport, Orono, Veazie, Ellsworth and Southwest Harbor among others.

Since General acquired 23 Pennsylvania water companies in April and has sold only one (Brinkley, Ark.), so far this year it has added to its group 38 water subsidiaries. General also sold all its North Dakota Telephone properties in March of this year.

Howard Butcher, III, President, stated that several more properties are under consideration for purchase, and that a couple of small sales are likely. These purchases and sales, he said, complicate the budgeting of earnings but the net effect should be a large increase in net income, a more moderate increase in per share earnings and an increase in total asset to almost $50,000,000. Annual gross revenues are expected to be about $7,500,000 and net income should be not far from $900,000.—V. 182, p. 814.

Affiliate's Operations Increased—

W. L. Burt, President of Goodrich-Gulf Chemicals, Inc., on Sept. 12 said that in the first three months of that company's operations, production in the butadiene plant had increased 88% over the similar period in 1954 and synthetic rubber output was up 87% over the same span. The butadiene plant is operated jointly with Texas-U. S. Chemical Co., while the synthetic rubber plant is exclusively Goodrich-Gulf.

"Both plants are being operated at maximum capacity," Mr. Burt said, "and even now we are studying engineering surveys that may lead to a major expansion program in the foreseeable future in order to meet the tremendous increase in national demand for synthetic rubber."

Mr. Burt outlined plans for diversification of activities with the announcement that the company plans to begin production of latex immediately. Latex is used in the production of a wide range of household articles, principal of which is foam rubber for mattresses and upholstery. "Initially," Mr. Burt said, "we plan to produce approximately 1,000,000 pounds per month. However, we are installing the necessary facilities to triple this amount within the very near future," he added.

Goodrich-Gulf had previously announced that its scientists have finally succeeded in reproducing the true molecule of crude, or tree-grown rubber. In discussing this development, Mr. Burt said that although this process was still in the pilot plant stage, and commercial production not yet assured, it is hoped that this discovery will ultimately lead to rubber self-sufficiency of the United States. This country is the world's largest consumer of natural rubber, but it has to import every pound it uses from the Far East, South America, or Africa.

Mr. Burt pointed out that even though the synthesizing of "natural" rubber may one day be commercially possible, it will in no way conflict with the GR-S (or synthetic rubber) industry. "GR-S rubber is a very valuable material and is better for many uses than crude, or tree rubber," he said. However, there is an area of usage where crude rubber is the preferred material, apart from the economics of the two materials. Today, natural rubber accounts for about 30% of the total annual tonnage of new rubber consumed in the United States."—V. 182, p. 612.

(The) Halle Bros. Co.—Plans Expansion—

A modern, full-size suburban branch department store will be constructed and operated by this company in the Middleburgh Heights-Parma Heights area of Greater Cleveland, Ohio, it was announced on Sept. 9 by Walter M. Halle, President of Halle's. Target date for the store's completion is late summer of 1956.

The store, to be named Middleburgh-Parma, will be virtually the same size as Halle's Westgate store, approximately 150,000 square feet.

At the same time Halle's is expanding its suburban branch operation.

Announcement also was made that the Canton, Ohio store and branch of Halle's have been sold to A. Polsky Co. of Akron, Ohio. The new owners will take possession at the close of business on Oct. 1 and will be open for business on Oct. 3.

In addition to its branch store, Halle's also has had a smaller branch in Canton's Country Fair shopping center. This also has been sold to Polsky's, it was announced.—V. 181, p. 2118.

In a letter accompanying the company's 58th consecutive quarterly dividend, Laurens Hammond, Chairman, said that net earnings amounted to $852,114, equal to $1.14 a share, as compared to $604,146, or 81 cents a share, for the quarter ended June 30, 1954.

Mr. Hammond informed stockholders that the company had granted a general wage increase to all employees, effective Sept. 5, of 10 cents an hour or 5%, whichever was greater. The hike will boost annual costs by approximatly $425,000, he said.

Digitized for FRASER
http://fraser.stlouisfed.org/

In discussing first quarter earnings, Mr. Hammond said that "We cannot maintain this rate of increase over last year for the balance of the fiscal year." During the quarter reported, he said, "We shipped all of the organs we could make, whereas last year we bgan to accumulate an inventory which was sold during the fall selling season." He said that the company is increasing production substantially in order to produce all the organs "we will need for the fall selling season."

Declaring that "business continues to be very good," Mr. Hammond reported that "our order backlog is higher now tnan it has ever been before." He noted that an addition to one of the company's four Chicago plants, when completed next month, "will give us additional manufacturing facilities, thereby enabling us to further expand production when there is an indicated need."

Based on current operations and an outlook that is favorable, Mr. Hammond said that indications are such that "we will pay an extra dividend later in the fiscal year."—V. 182, p. 9.

The expansion in organization, which becomes effective Jan. 1, 1956, continues the decentralization of operations started in 1946 and backed by a continuing plant expansion program in which about $20,000,000 has been invested each year since the end of World War II, according to L. Since that time, the corporation has made extensive capital improvements in the plant. Capacity has been raised to 24-million pounds of extrusions per year, substantially in excess of its previous rated capacity.

With purchase of the plant Kaiser Aluminum intends to nearly double its capacity—to 46.2 million pounds of extrusion per year—by installation of four new presses, three of 2,750 ton and one of 3,250 ton capacity.

The Halethorpe GGSA plant produces extruded components for military and civilian aircraft, parts for the military, tubing and extruded shapes for the building and transportation industries.

Lake Central Airlines, Inc.—Hearings Oct. 17—

Public hearings in the Lake Central Airlines acquisition case get under way Oct. 17 before the Civil Aeronautics Board in Washington, D. C.

The CAB investigation is being held to determine disposition of Lake Central Airlines, under contract for purchase by North Central Airlines. North Central—America's largest local airline—contracted to buy Lake Central (LCA) in 1952 after the CAB found that LCA was not being operated in the public interest and directed the major stockholders to divest themselves of all interest in the company. The major shareowners, holding 96% of the stock (80,000 of 83,000 shares outstanding), agreed to sell to North Central.

Since all airline mergers must be reveiwed by the CAB, North Central Airlines filed an application before the board requesting approval of the contract to buy LCA. All LCA stock was put in trust with trust certificates issued to new management.

In January of this year, a group of LCA employees entered into a secondary agreement to buy the 80,000 shares and requested CAB approval of the transaction. The board permitted issuance of trust certiiicates to the employee group on condition that the agreement be subject and subordinate to the rights of North Central Airlines under its earlier stock purchase agreeemnt.

In other words, if the CAB approves North Central's contract to buy Lake Central, the employee trust certificates would be delivered to North Central for the originally agreed-upon purchase price. On the other hand, if the board denies North Central's request to buy LCA, it may consider the LCA empolyee plan, among other expedients.

Lake Central, among the smaller of the nation's 13 local airlines, operates some 1,600 route-miles serving 28 cities in Illinois, Indiana, Michigan, Ohio and Pennsylvania. North Central, headquartered in Minneapolis-St. Paul, Minn., operates a 2,661-mile system and serves 43 cities in Michigan, Indiana, Illinois, Wisconsin, Minnesota and North Dakota.

Libbey-Owens-Ford Glass Co.—New Labor Plan—

A new employees' security benefit plan has been negotiated for 23,000 employees in major flat glass plants in seven states under a three-year extension of labor contracts of this company and the Pittsburgh Plate Glass Co., with the United Glass and Ceramic Workers of North America, CIO-CCL, it was announced jointly by companies and union on Sept. 9.

The new security program, applicable to each of the two companies separately, is effective Sept. 25 ,1955.

The outstanding feature of the new agreements, which now have an expiration date of Sept. 25, 1958, is the introduction of the "Security Benefit Plan" which will provide payments in event of unemployment due to layoff or protracted illness.

The plan provides for a total accumulation up to $600 for each employee from which he may make weekly withdrawals of 10% or up to a maximum of $30 a week, during any period of unemployment. Since it is a security savings plan, any payments from the fund would be in addition to state unemployment compensation beneifts and any health and accident benefits.

Funding of the plan will begin after approval by respective boards of directors of the companies and governmental agencies. Company contribution will be at the rate of five cents per actual hour worked by employees in the bargaining unit. Withdrawals for unemployment will not be permitted in the first year of the program, enabling the build-up of security funds.

The three-year agreement also provides for subsequent annual wage increases on the contract anniversary dates in 1956 and 1957.

The new agreement sets the minimum hourly wage at $1.80 an hour for the glass companies.

Louisiana Power & Light Co.—SEC Decision—

The Securities and Exchange Commission on Sept. 13 announced a decision denying the request of the Louisiana P. S. Commission for reconsideration of an SEC order of March 20, 1953, under the Holding Company Act, directing that this company, a subsidiary of Middle South Utilities, Inc., dispose of its gas and water properties.

The SEC held that an offer of proof made by the Louisiana Commission ins support of its position did not show any grounds for questioning the SEC's earlier conclusion or any changed circumstances justifying a modification of the order. The main contention of the Louisiana Commission was that independent operation of the gas system would result in a substantial loss of economies. The SEC held that this issue had been fully considered in its earlier findings and opinion.

The petition of the Louisiana Commission was filed in connection with a pending application-declaration of Louisiana Power proposing the transfer of its non-electric properties to a new subsidiary, Louisiana Gas Service Corp., and a related financing program. The proposal was advanced with a view to ultimate compliance with the Commission's divestment order. A hearing with respect to this application-declaration will be set later.—V. 182, p. 316.

This corporation filed a registration statement with the SEC on Sept. 12, 1955, covering 500,000 shares of 6% non-cumulative convertible preferred stock ($2 par), to be offered for public sale at $2 per share through M. S. Gerber, Inc., of New York. The offering is to be made on a "best efforts" basis, for which the underwriter will receive a selling commission of 35c per share plus $37,500 for expenses. The company has also agreed to sell to the underwriter (or to its designees, who may be co-underwriters or dealers), at the price of 1c per warrant, at the rate of one warrant for each two shares of preferred stock sold, common stock purchase warrants to purchase a maximum of 250,000 common shares at $2 per share, the warrants to be exercisable until Aug. 31, 1957. The proscetus further indicates that Harley A. Sill, a promoter and director of the company, has sold to Morris S. Gerber, President of the underwriter, 250,000 common stock purchase warrants at 1c per warrant and 133,333 shares of common stock at 1c per share.

The company was organized under Delaware law on June 6, 1955. It has no operating history, the purpose of its formation being to treat cobalt-copper concentrates through the application of a process invented by Sill. According to the prospectus, this process is in the development stage and its commercial feasibility is not known or proven. The company issued to Sill 400,000 common shares and 500,000 common stock purchase warrants in consideration of his assignment of the process to the company. Sill resold to other promoters of the company an aggregate of 266,666 common shares for 1c per share and 375,000 common stock purchase warrants for 1c per warrant. The company also sold to other company officials and their associates 62,500 common stock purchase warrants for 1c per warrant; and to 14 other persons, firms and corporations 200,000 common shares for $1 per share and 200,000 prefered stock purchase warrants for 1c per warrant. —V. 182, p. 917.

This railroad earned net income of $7,001,682 after all charges and taxes in the seven months ended July 31, 1955. The results, reported by Patrick B. McGinnis, President, include adjustments previously reported. Net income of $1,683,416 was earned in the same period of 1954.

Gross revenues for the first seven months of 1955 were $90,812,328, or 3.4% above the $87,786,625 volume for the corresponding months the year before. Net railway operating income amounted to $7,367,495 compared with $3,479,977 last year.

The net income of the railroad for the first seven months this year is equal after sinking fund requirements to $12.90 per share on the 491,540 shares of preferred stock outstanding on July 31. It is equal to $4.57 per share on 1,073,046 shares of common (which includes 542,466 shares not yet distributed) after allowing for sinking fund and preferred dividend requirements. Net income in the first seven months of 1954 was equal to $2.15 per share on the preferred stock.

Net income after all charges and taxes for the month of July, 1955 was $1,011,221 compared with net income of $1,010,996 earned in July, 1954. Gross revenues for the month were $14,356,850, an increase of 14.2% over the $12,572,357 volume for July last year. Net railway operating income was $1,009,431 against $1,223,125 the year before.

July 1955 net income includes one month's proportion of the estimated charges of $590,000 due to a derailment experienced in July. Extraordinary costs involved in this derailment are being apportioned in equal monthly instalments over the last six months of the 1955 accounts. In addition, it is estimated here was a decrease in passenger revenue of 5% due to curtailment in main line opertaions during the period the derailment damage to the railroad was being repaired.

July freight revenue increased $1,862,918 or 27.6% over July, last year. Expenses for hire of freight cars during the month increased $570,874, or approximately 150% over last year's charges. Transportation expenses last month increased $1,269,260 or approximately 23%. Both of these non-recurring increases were the result of handling without placing any embargo on less than carload freight business suddenly thrust upon the railroad by the truck strike throughout Southern New England which extended from June 14 through July 27. —V. 182, p. 917.

Norbute Corp.—Has Diversification Program—

Details of the major diversification program of this corporation were revealed on Sept. 1 by Nicholas M. Salgo, President.

Recent acquisitions of the company, which include Jackson & Church Co., of Saginaw, Mich., and Metalab Equipment Co., of Hicksville, L. I., N. Y., have formed an "umbrella" of activity under which the company plans to "build a major service organization for all types of industry," he stated.

The diversification program has changed the character and activities of Norbute to such an extent, he said, "that in a sense, we now have a new company under an old name."

An immediate result of the widened activities of Norbute, he said, has been higher sales and earnings in the first half of 1955.

He declared that Norbute's estimated annual sales volume is now about $8,000,000 and estimated annual return is approximately $1,000,000. Intensive efforts are being made, he declared, "to increase these figures both from within, by increasing sales; and also, through further diversification by the acquisition of good-growth earnings divisions."

Net income of Norbute in the six months ended June 30 was $199,737, compared with net of $28,672 in the comparable period of 1954. Sales in the first half of 1955 totaled $1,426,428. These sales and earnings figures, showing gains for the first half of this year, were produced primarily in May and June since the acquisition of the Jackson & Church and Metalab divisions.

During the first six months of this year, the total assets of Norbute have increased to $7,133,557 from approximately $1,144,000 as of June 30, 1954.

As an example of the developments which are expected to boost the company's earnings in the future, Mr. Salgo pointed to a new lightweight building product material which is being put into production by Jackson & Church. The material, known as Calsi-Crete, has been developed from a European process to which J & C holds exclusive rights in this country.

Calsi-Crete originally was being considered for use as a building block, Mr. Salgo said, but after extensive research and testing, the qualities of the material showed that it is adaptable to wide range of structural building uses and as a core material. In addition, it has potential uses in the insulating and packaging fields.

In addition to lightweight building products, Jackson & Church is engaged in the development and production of machinery for food, pulp and textile processing; manufactures the widest line of warm air heating equipment of any firm in the field; produces plastic injection molding machinery, and through a 50% owned affiliate is engaged in production of plastic valves and fittings; and carries out special machine shop projects such as a government contract for naval airplane catapults which is being worked on at present. Jackson & Church was called upon by the Navy to construct the giant steam catapults for the new aircraft carrier, the USS Forrestal.

Tube Turns Plastics, Inc., the company in which Jackson & Church holds a 50% interest along with National Cylinder Gas Co., has recently come out with the first 3-inch and 4-inch pipe fittings of unplasticized polyvinyl chloride to be injection molded on a commercial scale. Included are 90 degree and 45 degree elbows, tees, couplings and flanges.

Tube Turns manufactures a complete line of plastic valves and fittings, from ½ inch in size up. The company's PVC fittings are made by the exclusive Hendry injection molding process.

Metalab offers through a nationwide sales staff a complete line of laboratory equipment and furniture. Metalab clients include an impressive list of major industrial organizations, in addition to many research and educational institutions.

In addition to manufacturing the equipment, Metalab is prepared to provide complete laboratory engineering services.

Metalab also manufactures and installs a complete line of educational laboratory equipment for secondary schools, colleges and universities. This equipment comprises such basic items as laboratory tables, benches, chemical fume hoods, chemical and apparatus storage cabinets, laboratory ovens and drying equipment, chemical resistant sinks and tanks, specialized equipment for the laboratory use of radioactive materials, darkroom and photographic laboratory units. Specialized plumbing, electrical and mechanical appliances are used in connection with this type of equipment.

The original division of Norbute, Western Mining, of Grand Junction, Colo., is engaged in production of uranium from leases in the Yellow Cat area of Colorado Plateau. In addition, the company holds leases on other prospective uranium properties in the Western United States, and holds an interest in a producing oil property in Canada. —V. 182, p. 317.

Radio Corp. of America — Demonstrates New Color Television Camera for Medical Use—

A new color television camera—developed by this corporation specifically for medical use—provided more than 1,000 American and Canadian surgeons with vivid, scalpel-edge views of a major operation in Philadelphia, Pa., on Sept. 12 in RCA's first public demonstration of the advanced pickup device.

Theodore A. Smith, Vice-President and General Manager of the RCA Engineering Products Division, described details of the new RCA color camera as the heart of a compatible color television system designed by RCA primarily for the medical profession.

"One of the chief advantages of this new color camera," Mr. Smith said, "is its compactness. It approximates the weight and size of standard black-and-white studio TV cameras. Reduction in size is achieved by use of three Vidicon pickup tubes similar to the type used widely in our industrial television systems.

"The three Vidicon tubes in the medical color camera handle the three primary colors of red, green and blue. Light from the televised scene is divided into the three separate colors by a system of dichroic mirrors. Each of the Vidicon tubes has its own lens, and the camera can be focused remotely by a small reversible motor.

"The particular advantage of the Three-V system to medical science," Mr. Smith continued, "stems from its compatibility with commercial standards which broadens its usage for medical research and education. Close-up details, in color, of operations or experiments thus can be transmitted over commercial relay facilities direct from the surgery or research laboratory to doctors and scientists throughout the country.

"The compatible color camera also can be used with a light microscope, for color transmission of microscopic studies essential in pathological and biological studies.

"The new RCA compatible color system incorporates, in addition to the Vidicon camera, compact packaged units for camera control, monitoring, sync generation, and regulated power supply. The system also includes a compact colorplexer and an r-f system to feed signals into standard home color receivers without alteration. The entire equipment, designed in portable form for compactness and ease of setup and operation, weighs approximately 300 pounds.

"RCA expects to begin production of a medical TV system next year. The equipment is now undergoing further development to broaden its uses in industry, business, and government, as well as in medicine."—V. 182, p. 1017.

Sabre Uranium Corp.—New Discovery Announced—

Discovery of a uranium ore deposit was announced on Aug. 17 by Hugh M. Craigie, President.

The discovery was made in a section 17 miles northwest of Grants, N. M., and 38 air miles northwest of the Jackpile mine owned by Anaconda Mining Co.

The Grants area is located on the southern edge of the Colorado Plateaus, a region embracing some 130,000 square miles in Colorado, Utah, Arizona, and New Mexico. Earlier in August, Pinon Uranium Co., drilling on two sections which it has taken on a far-out from the Sabre holdings, found indications of further valuable deposits. Sabre retains a 50% working interest and exclusive mining rights to any uranium ore found by Pinon. When Pinon completes the blocking-out of their discovery, it could mean Sabre will have two mines in operation in New Mexico within the next several months.—V. 181, p. 2697.

Scott-Atwater Mfg. Co.—New Development—

This company, a leading producer of outboard motors, will offer a unique built-in water-ski tow ring on two of its models for 1956, it was announced recently by H. B. Atwater, President.

Atwater said the tow ring, built into the lower unit of the two largest horsepower motors as standard equipment, is now being offered as an accessory for the company's popular 1955 model 30-horsepower outboard. He said the new built-in tow ring—the first to be developed in the outboard industry—will not only be a boon to water skiers, but can also serve as a form of "trailer hitch" to tow small craft.—V. 181, p. 2519.

Seaboard & Western Airlines, Inc.—Interline Agreem't

This company and British Overseas Airways Corp. have entered into an interline cargo agreement. The latter serves all six countries on its world-wide routes, and in addition through its affiliates and subsidiaries reaches almost every principal city in the British Commonwealth.

Sheraton Corp. of America—Takes Over Big Resort—

The French Lick Springs Hotel at French Lick, Ind., one of the nation's most popular convention centers and health resorts, on Sept. 12 became the 31st member of the nationwide Sheraton Hotel system.

Ernest Henderson, President, on Sept. 12 announced that this company has bought the property from Tishman Realty & Construction Co., Inc. of New York, for $1,600,000 with what he called "very advantageous terms."

Mr. Henderson said that the hotel, which will be called the "French Lick-Sheraton," occupies a 1,772-acre tract about 60 miles northwest of Louisville, Ky. The seven-story brick and steel building, has more than 600 guest rooms.

Takes Over McAlpin Hotel—

Mr. Henderson on Sept. 7 announced that his company has taken over operation and control of the 1,500-room McAlpin Hotel, located at 34th Street and Broadway, New York City.

Plans for a complete transformation of the McAlpin "from top to bottom" are already underway, he said, adding that it will be called the "Sheraton McAlpin." He said that some $2,000,000 will be invested in the renovation program.

The McAlpin was acquired by Sheraton in October 1954, from the Jamlee Hotel Corporation, headed by Joseph Levy, President of Crawford Clothes. The hotel was under lease to Tisch Hotels, Inc., until its takeover by Sheraton.

The hotel brings to 30 the total in the nationwide Sheraton system, which now has 19,000 guest rooms, and an estimated $180,000,000 worth of assets, of which some $40,000,000 are in Manhattan real estate. In New York City, in addition to the McAlpin, Sheraton owns the Park Sheraton, the Sheraton Astor, and the Sheraton Russell Hotels, totaling 4,000 guest rooms. The company also operates the Sheraton-Whitehall building in lower Manhattan.—V. 182, p. 657.

Complete and exact details for the week covered by the foregoing will appear in our issue of next week. We cannot furnish them today, inasmuch as the week ends Saturday, and the Saturday figures are not available at time of going to press. Accordingly, in the above, the last day of the week in all cases has to be estimated.

In the elaborate detailed statement, however, which we present further below we are able to give the final and complete results for the week previous — the week ended Sept. 10. For that week there was an increase of 3.2%, the aggregate of clearings for the whole country having amounted to $14,759,124,492 against $14,295,979,327 in the same week in 1954. Outside of this city there was an increase of 7.0%, the bank clearings at this center having registered a loss of 0.6%. We group the cities according to the Federal Reserve Districts in which they are located and from this it appears that in the New York Reserve District (including this city) the totals show a falling off of 0.2%, but in the Boston Reserve District the totals show an improvement of 10.2% and in the Philadelphia Reserve District of 7.3%. Southern Nitrogen Co., Inc.—To Build Plant—To Place Securities Privately—

The company, which was organized to establish a modern petrochemical plant at Savannah, Ga., has completed arrangements for financing the new facilities, according to John R. Riley, President. The company will raise $18,000,000 in part by long-term loan from a life insurance company and in part through the direct placement of other securities. Of this amount $14,000,000 will be applied to construction, with the balance to be used for pre-operating expenses and working capital. The plant, on which construction will start in the Fall, is the first of its kind in the southeast. It will manufacture 250 tons per day of ammonia which it will convert into nitrogen solutions used in fertilizer mixtures and prilled ammonium nitrate. The plant is expected to be completed in late 1956.

In addition to Mr. Riley, organizers of the new company include Malcolm Smith, Chairman of the Board, and George V. Taylor, Vice-President. Mr. Riley was formerly Vice-President in charge of sales and a director of Spencer Chemical Co. Mr. Smith, a limited partner of Dean Witter & Co., was formerly a partner of J. H. Whitney & Co. and Glore, Forgan & Co. and a director of Spencer Chemical Co., Rexall Drug Co. and Byron Jackson Co., Mr. Taylor was formerly director of product sales for Spencer Chemical.

The project will include facilities for the production of ammonia, nitric acid, urea, nitrogen solutions, and fertilizer grade ammonium nitrate. The company expects to sell its products to fertilizer manufacturers and other industrial customers. Natural gas, the principal raw material to be used by the plant, will be supplied by the Southern Natural Gas Company of Birmingham, Alabama.

According to Mr. Riley, the new plant will make it possible for agriculture and industry in the southeast to save as much as $3,000,000 annually on nitrogen material costs alone.

Swan-Finch Oil Corp.—Acquires Mining Leases—

The corporation on Sept. 13 took title of 98 mining leases on producing uranium properties in the Poison Canyon area near Grants, New Mexico, it was announced by Robert F. Six, Chairman.

The leases, from which more than 2,000 tons of uranium ore already have been removed, were acquired in an exchange of stock with the Colamer Corp. which owned the leases. All the Colamer stock was acquired by Swan-Finch.

The deal was originally negotiated last June, and the intervening period was devoted to clearing various details, including title to the leases, in preparation for the closing. During the month of August, 600 tons of ore were mined. Complete mining equipment was also acquired by Swan-Finch in the transaction.

In addition to present production, substantial additional quantities of ore already have been blocked out under a drilling program approved by the Atomic Energy Commission. Further exploration in a number of sections is going on under Defense Minerals Exploration Administration contracts totaling in excess of $125,000.—V. 182, p. 1059.

See Westinghouse Electric Corp. below.—V. 181, p. 1922.

Westinghouse Electric Corp.—Increases Stock Interest in Canadian Firm—

This corporation and the Westinghouse Air Brake Co. announced jointly on Sept. 12 that the Electric company has purchased from the Air Brake company 137,480 shares of the Canadian Westinghouse Co., Ltd., for $54 a share. The Electric company now owns 70% of the common stock of the Canadian firm.

Gwilym A. Price, Chairman and President of Westinghouse Electric, and E. O. Boshell, Chairman and President of the Westinghouse Air Brake Co., explained that for many years each company had owned approximately two-fifths of the common stock of the Canadian company, which manufactures and sells in Canada products of both American companies. The American companies were both founded by George Westinghouse, but in ownership and management they are independent of each other.

In recent years, the joint statement added, the electrical manufacturing portion of the Canadian Westinghouse Co's business has grown faster than its sales of air brake equipment because of the very rapid increase in the use of electricity in Canada. The sale of stock to the Westinghouse Electric Corp. represents an adjustment of the interests of the two American companies in the Canadian firm more nearly to reflect the ratio of their respective products manufactured and sold by the Canadian firm. The Air Brake company retains approximately 10% of the common stock of Canadian Westinghouse and about one-fifth of the common stock is publicly held.—V. 182, p. 962.

The standard industrial trucks are often equipped with special attachments, for transporting, loading, lifting, stacking and storing raw materials, semi-finished and finished products, machinery and foodstuffs which, because of their size or shape, can not be handled in standard unit loads. The company is one of the largest manufacturers of this type of equipment.

Export sales from the United States accounted for 8% of total 1954 net sales, and the company's plants in Canada, England, and Western Germany contributed approximately 15% of total net sales. The expanding economy of Western Europe has led to a significant increase in the activities of the British and German divisions of the company.

Powered Metal Products Division Expands—

The purchase of a new plant at Addison, Ill., to be added to the facilities of Yale & Towne's Powdered Metal Products Division, was announced on Sept. 12 by Gilbert W. Chapman, President.

The newly acquired plant will be principally devoted to the production of ferrite components used by the manufacturers of radio, television, and other electronic equipment. The transfer of Yale & Towne's ferrite operations to the new plant will make available the greater production capacity needed to meet the increasing demands of the electronics industry, Mr. Chapman said.

Located on a two-acre plot, the new plant was constructed in 1954. It contains 12,300 square feet of floor space.

Production at the Addison plant is scheduled to begin on Oct. 1, advancing gradually to full operations as the installation of tools and equipment is completed.—V. 182, p. 862.
