Allentown Portland Cement Co.—Stock Offered—Public offering of 200,000 shares of class A common stock (par $1.25) was made on Sept. 26 by an underwriting group headed by Kuhn, Loeb & Co. The stock was priced at $26.50 per share.

Stockholders on Sept. 24 approved a reclassification of the company's stock as a result of which the outstanding stock consisted of 1,156,750 class B common shares. The class B stock is convertible share for share into class A common stock. Both classes of stock have equal voting rights and are identical except that cash dividends may be declared on the A stock with or without such dividends being declared on the B stock. The company has declared a dividend of 28 cents a share on the class A common stock payable Oct. 31, 1956, to stockholders of record Oct. 22, 1956, and expects to pay dividends quarterly on the class A stock.

PROCEEDS—The shares being offered do not represent new financing by the company. They are being acquired by the underwriters through conversion of a like number of shares of class B stock purchased from two stockholders, C. Thomas Fuller and James W. Fuller. The Fullers will continue to own over 70% of the outstanding common stock.

BUSINESS—Company, which with its predecessor dates back to 1906, has two plants, one at Evansville, Pa., and the other at West Conshohocken, Pa., with aggregate annual capacity of approximately 4,500,000 barrels. Sales for the year 1955 totaled $12,969,370.

CAPITALIZATION GIVING EFFECT TO RECLASSIFICATION

Class B common stock (par $1.25)	‡1,156,750 shs.	§956,750 shs.

*These notes are held by C. Thomas Fuller and James W. Fuller, Vice-Presidents and directors of the company, and by The National Bank of Catasauqua, as trustee of two trusts of which the Messrs. Fuller are income beneficiaries.

‡The authorized class A common stock includes 1,156,750 shares reserved for conversion of the class B common stock, which is convertible into class A common stock on a share for share basis. Shares of class B common stock surrendered upon such conversion shall not be reissued.

§This amount does not reflect any conversions by holders of class B common stock other than the underwriters. It can be reasonably expected that many holders of class B common stock will convert their holdings into class A common stock. If all such holders of class B common stock, other than the selling stockholders, were so to convert their shares, the number of shares of class A common stock outstanding would be increased to 305,550 shares and the number of shares of class B common stock outstanding would be reduced to 851,200.

UNDERWRITERS—The underwriters named below have severally agreed to purchase, and the selling stockholders have agreed to sell to them, severally, the respective numbers of shares of class A common stock set forth below opposite the names of the respective underwriters:

American Can Co.—Buys Plastic Tube Firm—

This company has purchased the Bradley Container Corp. of Maynard, Mass., manufacturers of extruded plastic tubes and bottles, William C. Stolk, President, announced on Sept. 26.

The Bradley concern, formerly a subsidiary of Olin Mathieson Chemical Corp., has been primarily concerned with research and development in the plastics field, Mr. Stolk said. It began commercial production of tubes and bottles last year.

American Can Co will maintain the acquired firm as a wholly-owned subsidiary operating under the Bradley name.

Mr. Stolk will serve as President of the new subsidiary.—V. 184, p. 721.

American & Foreign Power Co. Inc.—Earnings Higher

The rapid growth and satisfactory investment experience in most of the 11 countries in which it operates indicate that this company's corporate earnings this year will be at least $1.50 per share, a 10% increase over its previous high of $1.37 reported last year. This prediction was made on Sept. 26 by Henry B. Sargent, President, in a talk to the New York Society of Security Analysts.

Whether this will result in an increase in dividends, Mr. Sargent went on, is dependent on the company's cash position after such level of earnings has been attained. He then referred to the $527,000,000 construction program now under way to increase capacity of the Foreign Power System some 80% by the end of 1960, which is required to keep pace with the soaring demand for power in the areas served.—V. 184, p. 2.

American Insurance Co., Newark, N. J.—Makes Offer to Stockholders of St. Louis Firm—Kidder, Peabody & Co. has been named by The American Insurance Co. as dealer-manager to form a group of soliciting dealers for soliciting tenders of American Automobile Insurance Co. capital stock. American Insurance is offering to exchange shares of its $2.50 par value capital stock for all of the 1,750,000 outstanding shares of American Automobile Insurance capital stock on a share for share basis after certain adjustments in the capitalization of American Insurance. The exchange offer, which is conditioned upon the tendering of at least 1,400,000 shares (80%) of American Automobile's outstanding stock, expires at 3:00 p.m. (CDT) on Oct. 15, 1956.

Authorized capitalization of The American Insurance Co., consists of 6,000,000 shares of capital stock, of which 2,000,000 shares are presently outstanding. Providing that the exchange offer is accepted by holders of the minimum number of shares but prior to the consummation of the exchange, the American Insurance stock will receive a special cash dividend of 20 cents per share on the 2,000,000 shares presently outstanding and a stock dividen of 20% thereby increasing the shares outstanding prior to the exhange to 2,400,000 shares. Thus, after consummation of the exchange offer and payment of the 20% stock dividend, The American Insurance Co. will have outstanding capital shares ranging from a minimum of 3,800,000 to a maximum of 4,150,000 depending upon the number of shares exchanged.

At June 30, 1956 on a combined basis the assets of American Insurance and American Automobile totaled $319,650,594, policyholders surplus was $119,601,259, and net premiums written for the 12 months ending June 30, 1956 totaled $168,710,591.

At a special meeting held Sept. 19 stockholders of American Insurance Co. voted approximately 78% of outstanding shares in approval of two proposals whereby:

(1) The company will issue not in excess of 1,750,000 shares of its authorized but unissued capital stock on a share-for-share basis in exchange for capital stock of American Automobile Insurance Co., upon acceptance of the exchange offer by the holders of at least 80% of the outstanding shares of capital stock of American Automobile Insurance Co. Also, The American Insurance Co. will issue 400,000 shares of the authorized but unissued capital stock of the company as a 20% stock dividend, payable to stockholders of record on a date prior to consummation of the exchange offer, but subject to the acceptance of such offer by the holders of at least 80% of the outstanding capital stock of American Automobile Insurance Co.

(2) The maximum number of directors permitted by The American Insurance Co.'s charter will be increased from 20 to 26.

In a separate action the directors of The American Insurance Co., declared a special cash dividend of 20 cents per share on the 2,000,000 shares now outstanding, payable to stockholders of record at the close of business on Oct. 15, 1956. This dividend will be paid only if this proposed exchange offer of American Insurance Co. stock for American Automobile Insurance Co. stock is accepted by at least 80% of the stockholders of the latter company.

American Natural Gas Co.—Dividend Increased—

The directors on Sept. 26 increased the quarterly dividend on common stock from 55 to 65 cents per share. The dividend is payable Nov. 1 to holders of record Oct. 15.

The company announced that the increased dividend reflected increasing earnings which will be further augmented by the new source of gas supply from American Louisiana Pipe Line Co., the newest subsidiary of American Natural. This company recently placed in service a natural gas pipe line from southern Louisiana to Michigan and the pipe line's initial capacity of 300 million cubic feet per day is soon to be expanded to 400 million cubic feet per day. The construction of the American Louisiana pipe line has doubled the gas supply of Milwaukee Gas Light Co. and increased the supply of Michigan Consolidated Gas Co. by more than 70%. Both of these American Natural subsidiaries are now adding large numbers of space heating consumers and supplying other classes of customers with all of the gas they desire. The expansion of the American Louisiana pipe line will further increase the gas supply and earnings of American Natural subsidiaries, including Michigan Wisconsin Pipe Line Co., which serves its affiliates and 14 other non-affiliated utilities.—V. 183, p. 2070.

HIT PARADE is a new cigarette blend. It is a unique development of the so-called "Burley blend" (a combination of Bright, Burley, Maryland and Turkish tobaccos) for which American smokers have shown an overwhelming preference. It is believed that HIT PARADE is the first cigarette to deliver this preferred taste through a filter tip.

HIT PARADE Cigarettes are full king size—85 millimeters in length—with a new white filter tip developed exclusively for the company. The Hit Parade introductory campaign is scheduled to open in October in the state of California.—V. 184, p. 914.

Construction began last week on a new $500,000 Armco Drainage & Metal Products, Inc. steel fabricating plant at Atlanta, Ga., S. R. Ives, President, announced on Sept. 26.

Armco Drainage, a subsidiary of Armco Steel Corp., manufactures a wide variety of steel products for agriculture and the construction industry.

It will serve customers in Georgia, Alabama, Florida, North Carolina, and South Carolina, the states which make up the company's Dixie Division.

The plant will also have facilities for converting corrugated metal pipe to the company's new SMOOTH-FLO sewer pipe and for coating and paving pipe with asphalt. It is expected, Mr. Ives said, that facilities for manufacturing Armco prefabricated steel buildings will be added at some time in the future.

The new plant will also serve as a regional warehousing and distribution center for other products which Armco Drainage produces at other points. Stocks of Armco Multi-Plate, Helcor, and spiral welded pipe and Flex-Beam highway guardrail will be kept on hand, Ives said.

Production space at the new plant will total 60,000 square feet. It will be located on a 52-acre site three miles south of the College Park section of Atlanta.

Aro Equipment Corp.—Plans Expansion—

Marquard J. Anderson, President, on Sept. 24 said in part:

"The directors have just approved a five-year expansion program submitted by the management after a thorough analysis of the company's operation, products, physical equipment and future development pattern. The program has already started. Its main purpose is to enlarge manufacturing capacity, increase efficiency and thereby achieve higher volume and profits in the succeeding years.

"Total cost of new facilities and replacement of obsolete and worn equipment over the next five years is expected to total approximately $2,500,000. In line with the company's conservative financial policy in practice since its inception, it is hoped that this expansion can be financed mainly out of earnings.

"Both sales and earnings continue to show gains in the third quarter and it now seems certain that second-half earnings will substantially exceed those of the first half of this year. The volume of orders received in all Divisions is gratifying.

"The company's expanded engineering program insures that a steady number of new products will be introduced in each quarter of 1957."—V. 182, p. 1110.

The debentures carry warrants entitling the holder of each $1,000 principal amount to subscribe to 50 common shares at 110% of market price of the common at the time of issuance for the first five years, and 120% of the market for the following five years.

The proceeds from sale of the debentures are expected to satisfy all of Baird Associates-Atomic Instrument's capital needs for probably the next year.

The company's sales currently are running at about a $4,000,000 annual rate and the backlog of orders now on the books is approximately $2,500,000.

Bendix Aviation Corp.—Affiliate Expands—

Bendix-Westinghouse Automotive Air Brake Co. has arranged to purchase Servel, Inc.'s assets and facilities for the manufacture of refrigeration compressors, it was announced on Sept. 21. These facilities will be operated by Bendix-Westinghouse in two former Servel buildings at Evansville, Ind. for the production of electric motor-compressors of one-quarter to 7½ horsepower for use by air conditioning and refrigeration manufacturers.

Included in the purchase are 12.27 acres of land and buildings, machinery and equipment, inventories, patents, trade marks and technical information used in the production of these products. The price was not revealed.

In making the announcement, Duncan C. Menzies, President of Servel, Inc., stated the company would use the additional working capital for its program of greater concentration on the manufacture and merchandising of gas refrigerators, "all-year" gas air conditioners, and automatic ice-makers.

Bendix-Westinghouse will sell its products to other manufacturers and will not make consumer products, the announcement stated. Bendix-Westinghouse, a leader in the field of compressor-manufacturing for the automotive industry, has recently expanded into refrigeration and air conditioning component fields.

Bendix-Westinghouse announced plans to be in production on refrigeration compressors during the month of November.

The proceeds from the sale will be used in part to finance the capital expenditures of a subsidiary, British Columbia Electric Co., Ltd., and the initial operations of Western Development & Power, Ltd., a recently incorporated subsidiary.—V. 178, p. 1978.

British Petroleum Co., Ltd.—Develops Low Temperature Corrosion Control System—

The elimination of low temperature corrosion in air heaters or economizers resulting from sulphuric acid, is the latest achievement of this company's extensive research in the field of steam producing equipment.

The new development, according to the company, means that a limiting factor in the utilization of heat from flue gases has been overcome and boiler plants can now be operated with low exist gas temperatures and greater thermal efficiencies without the prospect of expensive and frequent replacements.

From laboratory tests carried out over a period of many years at the company's Research Station at Sunbury, near London, England, followed by full scale trials, an inexpensive corrosion inhibition process has been developed (patents applied for) whereby ammonia neutralizes sulphuric acid-forming elements in the flue gases and the resultant non-corrosive compounds are easily removed from metal surfaces by water washing.—V. 184, p. 319.

(Charles) Bruning Co., Inc., Chicago, Ill.—Expansion

This company, on Sept. 25, broke ground for its new manufacturing plant and office building in Mount Prospect, Ill., a suburb of Chicago. The cost, including land, is estimated at $3,000,000, Herbert F. Bruning, President, said.

The new plant, with a total of 307,100 square feet of space, will be one of the world's largest plants devoted to the manufacture of copying machines and sensitized papers for diazotype copying. Occupancy is scheduled for July 1, 1957, Mr. Bruning said.

The structure will more than double the size of the company's two separate Chicago plants, which it will replace. It will consist of a one-story manufacturing building connected to a combination one and two story office building. The plant site consists of 30 acres at Central and Arthur avenues in Mount Prospect, a suburb of Chicago.—V. 183, p. 2287.

The company proposes to offer these shares for subscription by its common stockholders at the rate of one share of additional stock for each five shares held of record at the close of business on Oct. 1, 1956. The First Boston Corp. is named as the principal underwriter.

The net proceeds from the financing will be added to the company's general funds and will be used to finance the construction and equipment of a new plant in the Indiana-Illinois area at a cost of approximately $12,000,000. This plant is scheduled for completion during the latter part of 1957 or early 1958. The remainder of the proceeds will be used for working capital and such other corporate purposes as the company may determine.

This company, the leading producer of power cranes and excavators in the United States, will apply the proceeds for expansion purposes.—V. 184, p. 619.

The corporation on Sept. 7 filed a letter of notification with the SEC covering 5,000 shares of class A common stock (par $1) to be offered at $5 per share, without underwriting. The proceeds are to be used to establish additional offices.—V. 182, p. 1335.

Capital Flotations in the United States in November And for the First Eleven Months of 1955

Total financing in the domestic corporate market in November, 1955, amounted to $601,557,784, a substantial decline from that of October, the month preceding. However, in the latter period the single $637,165,800 convertible debenture offering of the American Telephone & Telegraph Co. was responsible for that month's heavy dollar volume. A comparison of the November, 1954 total of $502,608,722 with that of November, 1955, reveals that the latter was greater by $98,949,062.

New capital issues in November, 1955, amounted to $549,323,693, or 91.32% of that month's gross dollar volume, while refunding issues totaled $52,234,091, or 8.68%.

Long-term bonds and notes in November, 1955, stood at $310,451,800, or 51.61% of the grand total for new capital issues, while refunding totaled only $24,311,000, or 4.04%. Short-term financing was limited to the low figure of $2,000,000.

New capital stock issues in November, 1955, added up to $236,871,893, or 39.38% of the month's gross dollar volume, while refunding issues totaled $27,923,091, or 4.64%.

The total of all common stock offerings in November, 1955, reached 77 in number and $179,152,096, or 29.78% of the month's gross dollar volume, while preferred stock issues amounted to 27 in number, totaling $85,642,888, or 14.24% of the month's grand total for all financing.

Among the various categories given in our five-year table each month, we find that the public utility group, in keeping with the customary pattern of financing, continued to rank first in dollar volume during November, 1955, by totaling $220,424,523, or 36.64% of the grand total. This was followed by other industrial and manufacturing in the amount of $155,334,420, or 25.82%; miscellaneous, $103,584,991, or 17.22%; investment trusts, $50,745,091, or 8.44%; iron, steel, coal, copper, etc., $44,559,783, or 7.41%; land, buildings, etc., $13,613,000, or 2.62%; railroads. $7,752,000, or 1.29%, and oil issues, $5,543,976, or 0.92%.

Offerings of large size floated during November, 1955, included the $41,770,309 common stock issue of the Commonwealth Edison Co. Next in order was the $30,000,000 placement of Michigan Consolidated Gas Co., 3½% first mortgage bonds, due Nov. 15, 1980 and a like amount of 36-year 3¼% debentures of the New England Telephone & Telegraph Co., due Nov. 15, 1991; $26,377,303 common stock offering of the Southern Co.; Continental Can Co. Inc., 40-year 3¾% notes, due Nov. 1, 1995, totaling $25,000,000; United Aircraft Corp. 4% cumulative convertible preference stock ($100 par) in the amount of $24,346,900; United Gas Corp., 3⅜% first mortgage and collateral trust bonds, due Nov. 1, 1975, in the sum of $20,000,000, and a like amount of $4.36 cumulative preferred (no par) stock of the Pacific Lighting Corp.

Private offerings in November, 1955, totaled 42 in number and amounted to $193,406,200, or 32.15% of the month's grand total. For October of last year a total of 43 issues were placed through the private route, aggregating $201,670,000, or 17.65% of that month's gross dollar volume. The current figure also compares with the November, 1954 total of $304,393,500 made up of 30 issues, equaling 60.56% of that month's over-all dollar volume.

† Revised.

Treasury Financing in November

The Treasury Department announced on Nov. 25 that the subscription books will open on Nov. 28 for an optional exchange of its December maturities into 2⅝% one-year Treasury Certificates of Indebtedness, or 2⅞% two and one-half-year Treasury Notes, maturing June 15, 1958.

These securities were offered in exchange for $12,212,000,000 of securities which became due on Dec. 15. These securities consisted of $5,359,000,000 of 1¼% certificates of indebtedness and $6,853,000,000 of 1¾% Treasury notes. Holders of the maturing securities had the option of exchanging for either of the issues now offered.

The new certificates and the new notes were dated Dec. 1, 1955, and exchanges were made at par with an adjustment of interest as of that date. Delivery of the new securities were made on Dec. 8, following acceptance of the securities to be exchanged.

The Treasury Department in November, outside of the above, confined its operations to the sale of Treasury Bills, Savings Bonds and Depositary Bonds.

In the comprehensive tables on the following pages we compare the November and the eleven months' figures with those for the corresponding periods in the four years preceding thus affording a five-year comparison.

Commonwealth Edison Co.—Plans Preferred Issue—

The directors on Sept. 25 authorized the filing of a registration statement covering the issuance of $40,000,000 of new $100 par value preferred stock, Willis Gale, Chairman, announced.

A definitive time schedule for the offering has not been set. The registration statement is being filed at this time in order to be prepared to make an offering promptly when and if market conditions are such as to make possible a dividend rate and price satisfactory to the company.

The filing with the Securities and Exchange Commission was made on Sept. 27. At the same time application was made to the Illinois Commerce Commission for authority to issue the stock.

Arrangements have been made for the underwriting of the 400,000 shares of new preferred stock by a nation-wide group headed by The First Boston Corp. and Glore, Forgan & Co.

If this financing is carried out, it will be the first non-convertible preferred stock ever issued by the utility.

Net proceeds from the sale of the stock will be used to help finance the utility's current $600,000,000 construction program for the four-year period, 1956-1959.

Property additions will aggregate an estimated $140,000,000 in 1956; $180,000,000 in 1957; $160,000,000 in 1958 and $120,000,000 in 1959. Of the $600,000,000 total, electric generating facilities account for $275,000,000; transmission and distribution facilities $310,000,000 and general plant $15,000,000.

It is now estimated that approximately $280,000,000 of financing, including the $40,000,000 of new preferred, will be required to carry out the program. The balance will come chiefly from cash resources on hand plus undistributed earnings and depreciation accruals.

The company is building six new generating units totaling 1,415,000 kilowatts of net capability. When they are completed, and after giving effect to the retirement of 151,000 kilowatts of older equipment, the net generating capability of the system is scheduled to be 5,123,000 by the end of 1959.

In addition to these conventional facilities, a 180,000 kilowatt nuclear power plant, to be known as Dresden Station, is being built for Commonwealth by General Electric Co. The atomic power station is scheduled for completion in 1960.—V. 183, p. 3007.

Consolidated Diesel Electric Corp.—New Directors—

James A. Russell, a partner in Van Alstyne, Noel & Co., New York investment firm, and Gerald Rosenberg, a director of Jerrold Electronics Corp., Philadelphia, Pa., have been elected directors.—V. 184, p. 916.

Consolidated Edison Co. of New York, Inc.—Registers Bonds With SEC—

This company filed a registration statement with the SEC on Sept. 21, 1956, covering $40,000,000 of first and refunding mortgage bonds, series M, due Oct. 1, 1986, to be offered for public sale at competitive bidding.

Net proceeds will be applied (1) to the payment of short term bank notes (expected to aggregate $38,000,000 at the date of issue of the bonds) issued in connection with the interim financing of the company's construction program and (2) the balance, if any, toward payment for additions to utility plant on or after Aug. 1, 1956. The company and its subsidiaries are engaged in a construction program which it is estimated will involve expenditures of approximately $650,000,000, on the basis of present price levels and conditions, for the years 1956 through 1960. This is expected to require an additional $260,000,000 of financing in the future.

Sets Up $100 Million Credit With 15 Banks—

This company on Sept. 27 announced completion of arrangements with 15 local banks for a $100,000,000 credit to run until Oct. 8, 1957.

Notes for not more than 90 days will be used, with interest at the prime rate at the time of each borrowing. The borrowings will be used in connection with financing of expansion and in anticipation of long-term financing.

This is the 11th successive credit of this type which the giant utility has arranged in line with its postwar construction program, which cost about $810,000,000 from 1946 through 1955.

The budget places expenditures for the 1956-60 period at an additional $650,000,000, of which $120,000,000 is to be spent this year. This is the largest outlay ever projected by the company in any 12-month period and, according to company officials, reflects the utility's confidence in the continued load growth in the city and its suburbs.

The First National City Bank of New York will act as clearing agent for this latest credit, with the following participants: Bankers Trust Co., The Bank of New York, The Chase Manhattan Bank, Chemical Corn Exchange Bank, The County Trust Co., Federation Bank & Trust Co., Guaranty Trust Co. of New York, The Hanover Bank, Irving Trust Co., Manufacturers Trust Co., The Marine Midland Trust Co. of New York, J. P. Morgan & Co., Incorporated, The New York Trust Co., and United States Trust Co. of New York.—V. 184, p. 916.

Cook Electric Co.—Banker Elected to Board—

Cott Beverage Corp.—To Pay Dividends in Stock—

The directors have adopted a new policy of paying dividends in capital stock in place of cash payments, it was announced by John J. Cott, President.

A stock dividend of one share of capital stock for each 33⅓ shares held of record at the close of business on Sept. 28, 1956, was declared payable Oct. 15, 1956. It is the intention of the board to continue this method of stock payment semi-annually. Whenever possible cash dividends will be paid in addition to scheduled stock dividends, the announcement said.

Although the cash position of the corporation is the strongest in its history, this move was made to conserve the company's cash reserve in order to carry out an extensive program of internal integration and global expansion of franchised bottlers.

The company's purchase of Mission Dry Corp. of California created substantial non-recurrent costs. In the consolidation of Mission of California into existing and new facilities at the company's headquarters in New Haven, Conn., the Los Angeles plant has been liquidated, and its heavy manufacturing equipment moved to a new extract and concentrate plant in New Haven. This move will effect tremendous economies in manufacturing and selling as well as provide direct management control, it was stated.—V. 184, p. 621.

Counsellors Investment Fund, Inc., Los Angeles, Calif.—Registers With Securities and Exchange Commission—

This investment company filed with the SEC an amendment on Sept. 25, 1956 to its registration statement covering an additional 300,000 shares of capital stock, $1 par value.—V. 176, p. 1264.

The issuance and exchange of the securities are considered exempt from the registration requirement of the Securities Act of 1933.

The debentures are to be issued under the company's plan of reorganization and recapitalization in exchange for present $4 dividend prior preferred stock. The plan calls for the issuance, in exchange for each share of $4 dividend prior preferred stock, $40 principal amount of the new debentures and one share of $1.60 dividend prior preferred stock. As of July 10, 1956, 612,734 shares of the $4 dividend prior preferred stock was outstanding.—V. 184, p. 916.

The report shows new orders and backlog of work at an all-time high during this fiscal year.—V. 183, p. 403.

Dayton Rubber Co.—Definitive Debentures Ready—

$50 Million Investment Foreseen at Louisiana Division

The company expects to have a near-future investment of more than $50,000,000 at its Louisiana Division at Plaquemine, Dr. Leland I. Doan, President, announced on Sept. 18.

Dr. Doan added that the proposed investment reflects plans and estimates that have been firmed-up since the original announcement of plans for a Louisiana manufacturing operation was made last February. At that time the investment was estimated at $20,000,000.

The development projected for the new investment figure will call for a total payroll of 700 administrative, production and service employees when the plant starts operations, scheduled for the spring of 1958.

Engineering on plant units and the Plaquemine site layout has now advanced to the point where contracts can soon be let and work begun. Construction employment is expected to climb to exceed 1,500 people at the peak of the building program.

When in full operation, the Louisiana Division will produce caustic soda in regular and rayon-grade solutions; chlorine; glycols and oxides of ethylene and propylene; chlorinated solvents including carbon tetrachloride, ethylene dichloride, perchloroethylene and trichloroethylene; vinyl chloride; hydrochloric acid and other products.—V. 184, p. 1227.

Presently sold through chain and variety stores, the Plasteel line includes more than a dozen different items—towel bars, soap dishes, hooks, etc.—and each item is available in a choice of four colors.

Ekco will begin immediately to service accounts handled by the Mallory sales organization, said Mr. Keating.

Other truck features include a simplified lift mechanism and the elimination of lift chain, an extra heavy-duty frame for long uninterrupted service under even the most severe operating conditions, and caster-type trailing axle for maximum efficiency and safety of operations.—V. 184, p. 1017.

Ero Manufacturing Co.—Reports Increased Sales—

Net sales amounted to $5,613,987 for the six months ended July 31, 1956, as compared with $5,506,088 for the same period in 1955.

Howard F. Leopold, President, ascribed the drop in profits to lower-than-anticipated sales during the second quarter which caused operating expenses to overshadow profits from sales. Net sales for August 1956, however, rose about 9%; $1,130,017 compared with $1,038,224 in August 1955.

"The August figures," says Mr. Leopold, "give a sound basis for predicting increased sales for the remaining six months of fiscal 1956."—V. 183, p. 770.

This corporation on Sept. 24 filed a registration statement with the SEC covering 200,000 shares of class A common stock (50c par), to be offered for public sale at $4.50 per share. The offering is to be made on a best efforts basis by Vickers Brothers, of New York, for which it will receive a selling commission of $.675 per share. In addition, the issuer will reimburse the underwriter for expenses in an amount not exceeding $50,000; and the issuer has agreed to sell to the underwriters at 1c per warrant, warrants to purchase one share of class A common at $4.50 per share for each 2 shares sold pursuant to the underwriting agreement.

The company was formed on May 25, 1953, under Louisiana law "for the purpose of developing a source of supply and marketing a long life incandescent electric light bulb." It is still in the development stage. The lamps are made in Europe according to company specifications and are made available to the company under exclusive purchase contracts. Robert C. Smith is founder and President of the company.

In the event all the 200,000 shares of stock are sold, the estimated net proceeds will approximate $699,000. Of this, the company proposes to apply $24,000 to the repayment of a loan by The Andrew Jackson Life Insurance Co. and use $525,000 for maintenance of and increase of inventory. $45,000 would be used for advertising and promotional purposes; $70,000 for working capital; $25,000 for development of branch offices and recruiting of full-time salesmen; and $10,000 for research, laboratory tests, and testing equipment.

In the event all the 200,000 class A shares are sold, 44.14% of the capital stock of the company will have been sold through private and public sales prior to this offering for $1,200 in services and $202,000 in cash, and the public will have acquired 55.86% of the capital stock for $900,000.—V. 183, p. 1857.

Flintkote Co.—Continues Expansion Program—

Another phase of the expansion and diversification program of this company was completed on Sept. 26 with the purchase by it of the Van-Packer Corp., Bettendorf, Iowa, manufacturers of pre-fabricated chimneys for use in residential, institutional and industrial construction.

All of the outstanding shares of the Van-Packer Corp., were acquired in an exchange for Flintkote common stock, according to I. J. Harvey, Jr., President of Flintkote. Van-Packer Corp., with current sales running at approximately $2,500,000 a year, will be operated as the Van-Packer Division of The Flintkote Co.

Incorporated in April, 1946, Van-Packer manufactures pre-fabricated chimneys from special light weight heat resistant materials, and are made in cylindrical sections that permits a conventional exterior appearance. Some of these are encased in metal jackets and some are encased in asbestos cement jackets. The company's plant for the manufacture of chimney units is located in Buda, Ill., and clay pipe is made at Carbon Cliffs, Ill., where there is also a clay mine and kilns. Van-Packer units are sold throughout the United States and Canada and sales are made through Flintkote's existing trade channels.

Acquisition of the Van-Packer Corp. is the latest in a series of moves by The Flintkote Company in a $ 20,000,000 planned program of expansion and diversification. The initial step in the program was taken in February when Flintkote purchased the "Insulrock" business. This was followed in March with the disclosure that the company planned to erect a building materials plant in Ennis, Tex.; in June by the announcement of the company's entry into the gypsum field with acquisition of gypsum properties at Sweetwater, Tex., and the projected building of a gypsum processing plant there; in August by the announcement that a third "Insulrock" producing plant would be built at North Judson, Ind., and, last week's revelation that Flintkote has acquired the United States Lime Products Corp., the largest producer of lime products in the West. See V. 184, p. 1227.

Forty Wall Street Building, Inc. (N. Y.)—Earnings Up 23.6 Percent—

Record earnings, up 23.6% over last year, a dramatic change in the market's evaluation of securities, purchase by Zeckendorf interests of 33% of the common stock and 31% of the land underlying the financial district's tallest skyscraper, plus a record reduction in debt were all reported on Sept. 23 to stockholders of this corporation by John H. G. Pell, President.

For the fiscal year ending June 30, the building's rental income was $4,135,560, up $177,176 over the previous year, and net income, after taxes, depreciation and interest payments on debentures, was $310,893, or 82 cents a common share, compared with $251,552, or 67 cents a share. This was the best year in the skyscraper's history.

During the year the company retired a record $658,500 principal amount of debentures, bringing the amount outstanding June 30 to a new low of $6,589,000. This represents a debt reduction of 43% since the building first began making a profit in 1944.

Mr. Pell also reported that "interests closely identified" with William Zeckendorf and Webb & Knapp had purchase 31% of the land underlying the skyscraper and 33% of the corporation's stock.

Mr. Pell explained that the bid price of the common, which was $18.75 per share at the end of 1955, had risen by Sept. 1 to $27.50, "a rise of almost 50% in eight months." A $1,000 debenture with stock attached, which was selling at $108.50 at the time of reorganization, was now bid at $2,100, an appreciation in value of 1,843%.—V. 177, p. 2248.

Freeport Sulphur Co.—To Mine Humble's Offshore Sulphur Deposit—

The first completely offshore sulphur mining operation in history will be undertaken by this company at a deposit discovered in the Gulf of Mexico by Humble Oil & Refining Co., it was announced on Sept. 20.

The deposit, located off Louisiana in 45 feet of water six miles from the nearest land, represents a "major new source of sulphur," according to a joint announcement by Hines H. Baker, President of Humble, and Langbourne M. Williams, President of Freeport.

Under a contract signed by the two companies Freeport will design, install and operate a mining plant to produce sulphur by the Frasch hot water process. Construction is required to begin by the latter part of 1958 and is expected to take two years to complete.

"The deposit, known as Grand Isle—Block 18, was discovered by Humble in the course of offshore oil exploration," the announcement stated. "It ranks among the most important sulphur discoveries of recent years."

The sulphur was found approximately 1,700 feet below the floor of the Gulf in the caprock of a salt dome, a geological formation commonly found in the Texas and Louisiana Gulf coastal area.

"Grand Isle will be the first sulphur mining operation to be conducted in the open waters of the Gulf of Mexico," the announcement continued. "It will be a new and novel undertaking, but one for which Freeport is especially qualified because of its experience in mining sulphur at marshland and partially submerged locations.

"Freeport has developed and successfully operated three sulphur mines in the coastal marshes. Two of the mining plants were erected on 75- to 95-foot piling, and the third was built on a barge, floated to the site, and sunk in place. The company also pioneered the use of seawater in the Frasch process and marine transportation of sulphur in molten form, innovations which will greatly facilitate offshore operation."

The contract also involves sulphur rights in two other offshore domes, known as Grand Isle Block 16 and West Delta Block 30, the announcement stated. Block 16, where sulphur has been discovered by Humble, is about five miles west of the Block 18 deposit. Block 30, where Freeport will continue prospecting begun by Humble, is 12 miles to the east.

Under the contract Freeport will pay basic royalties to the Federal Government and will pay to Humble certain royalties the effect of which is that Humble and Freeport will each receive after taxes approximately 50% of the net profits from Freeport's operation of the properties.

The sulphur rights are held by Humble under leases originally executed by the State of Louisiana and later confirmed by the U. S. Government pursuant to the provisions of the Outer Continental Shelf Lands Act, it was stated. Approval of the Department of Interior of an assignment of these leases to Freeport has been requested.—V. 183, p. 2073.

(Robert) Gair Co., Inc.—Schedules Merger Vote—

The stockholders of this company are to meet on Oct. 26 to vote on the merger of Gair with Continental Can Co., Inc., George E. Dyke, President, announced on Sept. 18.

The merger is subject to approval by stockholders of both companies. Gair stockholders of record as of the close of business Sept. 28 will be eligible to vote.

Mr. Dyke said a merger agreement approved on Sept. 18 by the Gair directors, and scheduled to be voted upon tomorrow by directors of Continental, provides that George E. Dyke, Raymond F. De Voe, Robert L. Fitts, and Parker Newhall, all presently directors of the Gair company, will become directors of the surviving corporation when the merger is effected.

Approval of the merger by Gair's stockholders, he said, will require the affirmative vote of holders of two-thirds of the outstanding common and preferred stock voting together and also of two-thirds of the outstanding preferred stock voting separately as a class.—V. 184, p. 725.

General Aniline & Film Corp.—Plans Reclassification

John Hilldring, President, on Sept. 21 announced that a special meeting of stockholders has been called for Oct. 4, 1956, to vote upon a reclassification of stock of the corporation.

The presently outstanding stock consists of 592,742.1 common A shares and 2,050,000 common B shares. Title to 540,894 of the common A shares and to all of the outstanding common B shares is vested in the Attorney General of the United States under the Trading With the Enemy Act.

Under the proposed reclassification, each existing common A share would be changed into four shares of new class A common stock and each existing common B share would be changed into 4/10ths of a share of the new class A common stock. Upon the reclassification becoming effective, there would be outstanding 3,190,968.4 shares of the new class A common stock. The new class A common stock would be fully transferable.

There would also be authorized 5,000,000 shares of new class B common stock. The new class B common stock would be restricted as to ownership and transferability to American nationals in accordance with the regulations of the Office of Alien Property and a special order of the Attorney General. The shares of new class A common stock issued as a result of the reclassification would be convertible into new class B common stock on a share for share basis. Except for the differences as to ownership, transfer and convertibility, both new classes of common stock would be identical.

A proxy statement distributed by management to stockholders states that the corporation is advised that the Attorney General is considering the sale of certain of the vested shares. Prior to a sale of any vested shares owned by the Attorney General, he will convert the shares to be sold into shares of the new class B common stock which are to be restricted as to ownership and transferability.

Interhandel, Swiss investment corporation, and two groups of Interhandle stockholders on Sept. 26 obtained an injunction preventing the Alien Property Office from going ahead with an announced plant to split stock and issue new stock in General Aniline & Film Corp.

Interhandel's 90% stock interest in General Aniline has been held by the Alien Property Office since 1942, and the Swiss company's eight-year lawsuit for recovery of the property is still before the courts. Some 1,500 Interhandel stockholders, known as the Attenhofer and Kaufman groups, have become parties to the suit as intervenors.

Judge David A. Pine of the U. S. District Court in Washington, D. C., granted a temporary restraining order on the showing made by Interhandel and the stockholder groups that the proposed stock transactions would reduce Interhandel's share of stock ownership contrary to the requirements of the law that the Alien Property Office not change the status of vested property while litigation is pending.

The order forbids the Alien Property Office to vote Interhandel's vested stock at a General Aniline special stockholders meeting called for Oct. 4. This means that the proposed stock split and new issue could not be approved at the meeting for lack of a majority vote.

The court will hold a hearing for all parties to the dispute on Oct. 5, to determine whether a further preliminary injunction should be granted.—V. 184, p. 623.

General Electric Co.—Gas Turbine Order—

The Orlando (Fla.) Utilities Commission has ordered two gas turbine-generator sets with a combined capacity of 33,000 kilowatts from this company's Gas Turbine Department in Schenectady, N. Y., it was announced by C. H. Stanton, Utilities Commission Manager.

The first unit is scheduled to be shipped in July, 1957, and the second one in October 1957. They will both be installed in the Commission's Municipal Power Station.

Operating together, the gas turbine-generator sets could supply enough electricity to adequately satisfy the average yearly needs of over 55,000 persons.—V. 184, p. 821.

General Guaranty Insurance Co.—Stock Offered—

The company is offering to its common stockholders of record Aug. 31, 1956, the right to subscribe on or before Oct. 9, 1956, for 42,850 additional shares of common stock (par $2.50) at $7 per share on the basis of two new shares for each seven shares held (with an oversubscription privilege). The offering is underwritten by Grimm & Co., New York; First Florida Investors, Inc., and Clement A. Evans & Co., both of Orlando, Fla., and Security Associates, Inc., Winter Park, Fla.

The net proceeds are to be used for working capital and general corporate purposes.—V. 184, p. 1122.

General Steel Castings Corp.—On Big Board—

Stock of this corporation, a major producer of large precision-machined steel castings, was listed on Sept. 27 on the New York Stock Exchange. The company designs and produces massive, integral castings for railroad freight cars, passenger cars and locomotives and for heavy industry.

A steady increase in General Steel's sales and earnings, begun in late 1954, has continued into the present year, according to Charles P. Whitehead, President. Net income for the first six months of 1956 rose to $1,513,132 on sales of $24,213,985 from net income of $902,586 on sales of $12,881,047 for the same half-year period of 1955. Per share earnings for the first half of 1956 increased to $2.80 over $1.74 for the first six months of 1955. (Latter figure calculated after provision for preferred stock requirements of $1.50 per share for the 1955 first quarter. This amount was included in the redemption price of the preferred which was called on April 1, 1955.)

Figures for General Steel's latest full year of operations also show a sharp increase over the previous year. Sales of $32,068,612 for the year ended Dec. 31, 1955, resulted in net income of $2,338,106 and per share income of $4.72 for the year, compared to sales of $28,815,324, net income of $1,879,197 and per share earnings of $3.05 for the year ended Dec. 31, 1954.

The company's stockholders received four quarterly dividends of 30 cents per share each and one special dividend of 60 cents per share.

General Telephone Co. of Indiana, Inc.—Makes Exchange Offer—This company is offering 95,000 shares of its $2.50 preferred stock, no par value, in exchange for preferred shares of two other Indiana telephone companies. General of Indiana will exchange one share of its $2.50 preferred stock plus $2 in cash for each share of series A 5% cumulative preferred stock of The Home Telephone & Telegraph Co., and one share of its $2.50 preferred stock plus $2.50 in cash for each share of series A 5% cumulative preferred stock of Citizens Independent Telephone Co. The exchange offer expires 3:30 p.m. (Chicago Time) on Oct. 11, 1956. Paine, Webber, Jackson & Curtis and Stone & Webster Securities Corp. have been named dealer managers to form a group of securities dealers to solicit the exchange of shares.

CONTROL—General Telephone Corporation owns all of the outstanding common stock of General of Indiana, 75% af all outstanding common stock of Home Telephone, and all outstanding common of Citizens. The exchange offer is part of a proposed plan of merger of Home and Citizens into General of Indiana that would combine the three subsidiaries into a single integrated telephone operating company.

Any shares of Home and Citizens not exchanged under the offer have been called for redemption on Oct. 26, 1956.

PROPOSED MERGER—The exchange offer is part of a proposed plan of merger of Home and Citizens into General. All three companies are part of the General Telephone System. Their parent, General Telephone Corp., owns all of the outstanding common stock of General, 76% of the outstanding common stock of Home and all of the outstanding common stock of Citizens. The objective of the proposed plan of merger is to combine the three Indiana subsidiaries into a single, integrated telephone operating company.

The exchange of General preferred for the 5% cumulative preferred stock of Home and Citizens is a step in the proposed plan of merger. Unexchanged shares of the 5% cumulative preferred stock of Home and Citizens are being redeemed at par plus a $2 and $2.50 premium, respectively, and accrued dividends. Funds to provide for the cash payable upon exchanges and for the redemption of unexchanged preferred stock of Home and Citizens will be initially obtained from advances by the parent company to the extent required.

Under the proposed plan of merger, General will issue 1 1/10 shares of its common stock for each share of Home common stock and 4 7/10 shares of its common stock for each share of Citizens common stock.

It is proposed that General will issue a new series of its first mortgage bonds in exchange for the presently outstanding first mortgage bonds of Home and Citizens (except for $224,000 principal amount of Citizens bonds which are to be purchased for cash and retired).

It is contemplated that in connection with the proposed merger (now scheduled for November 1956) General will sell 28,125 shares of its common stock for $900,000 to its parent for $450,000 cash and in liquidation of $450,000 advances and will sell debentures to obtain funds to repay the additional advances to be received from its parent incident to the merger and to repay funds borrowed for 1956 construction purposes. The total cash requirements to be funded through sale of debentures are not determinable at this time.

The proposed plan of merger is subject to the necessary approvals of the boards of directors and shareholders of the respective companies and of the Public Service Commission of Indiana.

Recently developed products of the company include vinyl sewer liners, thin walled tubing and vinyl floor runners.—V. 184, p. 1122.

Georgia-Pacific Corp., Portland, Ore.—Registers With Securities and Exchange Commission—

This corporation filed a registration statement with the SEC on Sept. 25, 1956, covering a maximum of $17,500,000 of its $1 par common stock. The number of shares is dependent on market conditions at the time of the offering, and will be determined with a view to providing the company with net proceeds of approximately $15,000,000 after the deduction of underwriting discounts and commissions and other expenses of issuance and distribution; but the number of shares to be offered would not exceed 500,000 shares based on present market conditions. Blyth & Co., Inc., is named as the principal underwriter; and the public offering price and underwriting terms are to be supplied by amendment.

The company intends to use approximately $8,000,000 of net proceeds, in conjunction with additional funds, for the acquisition of all of the assets (except cash) of Hammond Lumber Co. Purchase of the common shares by the underwriters is contingent upon the simultaneous acquisition of such assets by the company and Hammond-California Redwood Co., a wholly-owned subsidiary organized for that purpose. The balance of the proceeds of the financing will be available for general corporate purposes, including the construction of a new mill at Toledo, Ore., for the manufacture of unbleached kraft (sulphate) pulp, paper and containerboard.

An agreement for the sale of the assets of Hammond for a net purchase price of approximately $75,388,800, plus the assumption of certain liabilities, is to be voted on by stockholders of Hammond on Oct. 15, 1956. Of the purchase price, $60,000,000 is to be paid in cash and $15,388,800 by the delivery of 5% subordinated debentures due 1976 of Georgia-Pacific. In addition to the $8,000,000 proceeds of this financing, $46,500,000 is to be obtained from the proceeds of $45,000,000 of 20-year 4½% timber purchase term loans from two insurance companies to Hammond-California and of $3,500,000 of 25-year 5% notes of Hammond-California purchased by the same companies; and approximately $5,500,000 of the purchase price will be represented by U. S. Government securities owned by Hammond at the time of the sale. Hammond is engaged primarily in the manufacture and sale of California redwood lumber and specialties, and in the sale through its retail lumber yards of Douglas fir lumber, other forest products and building materials.

Georgia-Pacific also has filed an application under the Trust Indenture Act of 1939 for qualification of a trust indenture pursuant to which it proposes to issue the $15,388,800 of 5% subordinated debentures due 1976 as part consideration for the purchase of the assets of Hammond.—V. 184, p. 218.

The company proposes to offer these shares for public sale at $5 per share, through an underwriting group headed by All States Securities Dealers, Inc. who will receive a commission of 62½ cents per share. The underwriter is reserving 15,000 shares of the class A stock for sale to employees of the company at $4.55 per share, the underwriter waiving 45c of its commission with respect to such sales. The underwriter also is entitled to receive $10,000 for its expenses; and Joseph, Charles and Oscar Weissglass, President, Vice-President, and Treasurer, respectively, are selling from their individual holdings to the underwriter at 10c per share, 10,000 shares of Class B stock of the company, and are paying a finder's fee of 1,000 shares of Class B stock to each of H. Grand Union Co.—To Decentralize Operations—

Operations of this company is central New York state and northern Pennsylvania will be decentralized as of Dec. 1, 1956, it was announced on Sept. 25 by William F. Dempsey, Vice-President in charge of store operations for the Eastern food chain. Grand Union has 56 supermarkets in the area, served by its Food Distribution Center in Waverly, N. Y.

This is the second move made by Grand Union this year to decentralize its operations. Decentralization of the company's Northern Division of 86 stores in Northern New York, Vermont and Massachusetts served by the chain's Food Distribution Center in Waterford, N. Y. was effected in March.

The company on Sept. 26 opened a "birthday store" in Babylon, L. I., N. Y., as a part of its 84th anniversary celebration. The 350-store Eastern food chain was founded in September, 1872, as The Jones Brothers Tea Co.

The "birthday store," a 33,000-square-foot supermarket in the $12,000,000 Great South Bay Shopping Center in Babylon, is the chain's first store in Suffolk County.—V. 184, p. 1228.

Great Basin Uranium Corp., Las Vegas, Nev.—Files—

The corporation on Aug. 27 filed a letter of notification with the SEC covering 600,000 shares of common stock (par $1) to be offered at 50 cents per share, without underwriting. Gulf Interstate Gas Co.—To Increase Facilities—

The Federal Power Commission has granted temporary authorization to this company to construct natural gas facilities in Louisiana, Mississippi, Tennessee, and Kentucky at an estimated cost of $8,965,000.—V. 183, p. 2898.

Gulf Oil Corp.—Develops New Leak Finder—

The Gulf Research & Development Co. reported on Sept. 26 it has developed an instrument that successfully locates borehole leaks in drilling wells. The invention is expected to mean the savings of millions of dollars yearly to the petroleum industry.

To drillers, it forecasts the end of the 50-year-old nightmare which has bedeviled wild cat operations in particular ever since the rotary drill rig came in at the turn of the century.

To insure national benefits from this basic drilling advancement, the company has licensed the new "oil well leak detector" to service organizations which will make it available to the industry at large.

The importance of the detector lies in the decisive role it plays in halting the loss of drilling mud through apertures in the drill hole wall commonly referred to as "lost circulation" or "lost returns." Such apertures may be pre-existent as in the case of porous limestone rocks or they may be produced by rupture of the formations during drilling.—V. 184, p. 918.

Hawaiian Electric Co., Ltd., Honolulu—Registers Stock With Securities and Exchange Commission—

The company filed a registration statement with the SEC on Sept. 21, 1956, covering 77,000 shares of its $20 par common stock. The company proposes to offer these shares for subscription by common stockholders at the rate of one additional share for each ten shares held. The record date and subscription price are to be supplied by amendment. No underwriting is involved.

Net proceeds of the sale of the stock will become part of the general funds of the company and will be applied toward the cost of its construction program. The company's plant expansion program for the period 1956-1960 calls for an estimated total expenditure of $41,047,000.—V. 184, p. 1228.

Holiday Oil & Gas Corp., Arkansas City, Kan.—Registers With Securities and Exchange Commission—

This corporation filed a registration statement with the SEC on Sept. 21, 1956, covering 500,000 shares of its 10c par common stock.

Organized under Delaware law on May 25, 1956, for the purpose of engaging in the exploration for, and the development and production of, oil and gas, the company proposes to make a public offering of these shares at $3 per share.

The offering is to be made on a "best efforts" basis by Whitehall Securities Corp., for which it will receive a 45c per share selling commission plus reimbursement of expenses up to $15,000.

The company on June 1, 1956, acquired from its organizers, A. W. Holiday, President, and his associates, all their interest in certain producing and non-producing oil and gas properties and other assets including production equipment and supplies, trucks, geological data, furniture and fixtures. In exchange therefor, Holiday and his associates received 346,719 shares of common stock and the company assumed certain outstanding liabilities. Officers and directors of the company also were permitted to purchase 10,000 common shares at $1.50 per share, excepting Holiday. A total of 60,000 shares were subscribed and paid for. According to the prospectus, the properties and assets had a cost to the organizers of $816,000.77, after deducting depreciation and depletion. The liabilities assumed by the company approximately $347,362, so that the net assets received by the company had a book value of $468,638, equivalent to $1.35 per share for the 346,719 shares issued therefor. Assuming sale of the 500,000 shares, the public will have invested $1,500,000 and hold approximately 55.1% of the voting power.

Of the net proceeds of the financing, $300,000 will be used to pay off existing bank loans; approximately $700,000 will be used to drill some 36 proven locations on now producing leases; and the balance of some $275,000 will be added to working capital.

Holly Minerals Corp.—Sells Certain Holdings—

S. B. Harris, Jr. Chairman, on Sept. 21 announced that this corporation has completed arrangements to sell to Phillips Petroleum Co. an interest which it acquired only last winter in two sections, of uranium lands in New Mexico. The $1,750,000 sales price is based on presently known ore reserves indicated by recent test drilling on these sections. Holly Minerals' many other uranium activities, both in exploration and production of ore, are in no way affected by sale of its rights in these two sections of Phillips.

Mr. Harris further went on to say:

"The properties being sold are still in process of development. Holly Minerals' engineers have estimated that very substantial investments will have to be made in these two sections prior to the shipment of any ore. In their opinion at least two years' work will be required before any cash flow will be realized from these properties and it may be more than five years thereafter before operating profits comparable to the sales price would accrue to Holly Minerals.

"By converting its long-range interests in these sections into cash the Holly corporation expects to be able to increase appropriate development of its other very valuable mineral properties which include copper, asbestos and mercury as well as uranium. Among the uranium properties are several in the near vicinity of the sections being sold to Phillips. Holly Minerals' wholly-owned Beacon Hill, Flat Top and Mesa Top uranium mines are situated approximately five miles to the southwest and have been steadily increasing production. Their shipments for the month of August totalled 4,224 tons of ore with a value in excess of $75,000.

"About six miles to the northwest of the Phillips properties Holly Minerals owns a lease on an additional 640 acres of land on which to date 147 test holes have been drilled. Of these holes 22 have indicated better than commercial grade ore, averaging 0.319% uranium oxide for an average thickness of 5.15 feet and at a depth of between 320 and 350 feet. Numerous additional holes have also shown mineralization. Drilling is continuing to test this and other areas owned by the corporation."—V. 183, p. 2651.

Hope Natural Gas Co.—To Increase Facilities—

The Federal Power Commission has granted a certificate to this company authorizing it to constuct and operate a 5400 horsepower compressor station in the Fink storage field in West Virginia at an estimated cost of $2,138,761.

The company stated that the proposed facilities will enable it to cycle an additional 10,000,000,000 cubic feet of gas annually. With storage inventories of 35,000,000,000 cubic feet, the proposed facilities enable the company to deliver safely an additional 110,000,000 cubic feet per day from the storage area. The proposed additional facilities will enable the company to increase its deliveries to 160,000,000 cubic feet daily while maintaining a storage inventory of 26,000,000,000 cubic feet.

The FPC on June 20 granted Hope temporary authorization for the construction and operation of the compressor station. Hope is one of five companies comprising the Consolidated Natural Gas Co. system serving customers in Ohio, West Virginia, Pennsylvania, and New York. Each of the other four companies depend on Hope to furnish gas required in excess of their own supply. Increased demands in Consolidated's market area, Hope said in its application, make it necessary to increase the delivery rate of the Fink field.—V. 184, p. 219.

Natural gas for 30 counties in southern Idaho became a realty on Sept. 26 when Ralph F. Gibson, President of this company, formally accepted a check from H. L. Remmel, a partner of White, Weld & Co., representing the proceeds from the sale of $2,500,000 of securities offered to the public through an investment banking syndicate managed by White, Weld & Co. The sale of these securities was part of a total financing program of $8,200,000, which included a $5,000,000 loan from leading banks and insurance companies.

Proceeds from the financing are being used by Intermountain Gas Co., for a construction program to introduce natural gas in 23 communities located in 30 counties in southern Idaho, and to serve local industries. Supplies of natural gas will be obtained by the company from the Pacific Northwest Pipeline Corp., which has brought natural gas to the Pacific Northwest, the last major economic area of the country to enjoy the benefits of natural gas. Pacific Northwest plans to have gas available in Intermountain's service area later this year. Communities to be served by Intermountain Gas are—Boise, Twin Falls, Nampa, Payette, Gooding, Emmett, Buhl, Soda Springs, American Falls, Glenn's Ferry, Parma, Wendell, Kimberly, Filer, Lava Hot Springs, New Plymouth, Grace, Fruitland, McCannon, Bancroft, Hensen, Inkon, Georgetown and Declo.

The service area of Intermountain Gas Co. is rich in raw materials including silica deposits, phosphates and salts, lime and rock. Payment was made partly in cash and partly in a short-term note of the purchaser.

Howard Butcher, III, President of International, stated that, although long-term prospects were good, the propane operations had proved to be highly competitive and quite unrelated to its main public utility business. He added: "The offer from Canadian Hydrocarbons was attractive and resulted in a profit. It was felt that efforts of the management and proceeds of the sale could be more profitably employed in its rapidly expanding natural gas and electric business and in other projects more closely related thereto, such as Trans-Canada Pipe Lines."—V. 183, p. 2357.

The new facilities will enable the company to produce larger and more complex forgings with closer tolerances. Emphasis will be on no-draft forgings, which are increasingly in demand by the aircraft industry.

The Erie forging plant is located on a 57-acre site and presently has nine buildings covering 328,000 square feet. The plant is currently producing forged parts for aircraft, ordnance and a variety of general industrial applications.

Kentucky West Virginia Gas Co.—Pipeline Project—

Undertaken by this company, the 36-mile of underground pipeline links Orsburne Gap in Virginia with Mayton, Ky. Through it will flow 40 million cubic feet of natural gas and 10 million feet of propane, methane, butane, and other by-products sorely needed by the expanding industries in Eastern Kentucky.

The Ranier Construction Company, contractors for the project, were not only faced with the problem of laying pipeline in one of the most tortuously mountainous areas of this region, where the terrain darts upward at perpendicular heights and then plunges down into sharp gulleys; but discovered that about 90% of this terrain was solid rock.

The project began in August 1955 and is expected to be completed by the summer of 1958.—V. 169, p. 2420.

Both dividends are payable on Nov. 30, 1956 to holders of record Nov. 15, 1956.

Although manufacturing schedules and efficiencies were adversely affected by the steel strike, net earnings of Koehring and subsidiaries for the third quarter, ended Aug. 31, 1956, were the second highest in the company's history, being exceeded only by this year's previous quarter and were the highest for any third quarter; amounting to $1.64 per share for each of the 395,032 outstanding common shares; and after providing for the preferred stock dividend.

Prior to giving effect to the two months shipments of The Hydraulic Press Manufacturing Co. Division, merged into Koehring on July 1, Keohring's third quarter shipments were $11,745,517 and the second largest in the company's history. Including the two months of H-P-M, shipments were $13,959,000 and exceeded the company's second quarter—previously its largest.

Outlook for the fourth quarter continues good despite the usual seasonal decline and is expected to exceed the fourth quarter of 1955 for both Koehring and H-P-M, according to Mr. Steelman.

(E. J.) Korvette, Inc.—Leases Brooklyn Store—

William Willensky, President, on Sept. 26 announced that this corporation has leased from the Oppenheim Collins interests the land and building located on Fulton Street, between Lawrence and Bridge Streets, in Brooklyn, N. Y. The property now is occupied by Oppenheim Collins as a specialty store which for the past half century has been a familiar retail landmark in that area. The lease is for a period of 25 years, with renewal provisions. The building, consisting of four sales floors and a storage basement, contains 150,000 square feet, including a 30,000 square foot storage area.

The Korvette organization will take possession of the Oppenheim Collins site on Jan. 15, 1957, following which the properties will be completely renovated. The modernization program will involve a new layout design for the entire store and the installation of escalators as well as new fixtures and lighting facilities. Present plans contemplate opening of the store on March 15, 1957.

It is estimated that the Korvette department store in Brooklyn will add upwards of $25,000,000 to the consolidated company's present annual sales rate of approximately $70,000,000. The corporation's sales for the fiscal year ended Sept. 30, 1956, are expected to be $55,000,000, compared with sale of $36,292,393 reported for the preceding year. This year's indicated sales will be more than 27 times the $2,005,235 reported just six years ago.

The acquisition of the Brooklyn store, Mr. Willensky said, brings closer the realization of the Korvette management's sales goal of $100,000,000 for the fiscal year commencing Oct. 1, 1956. The company's current expansion program contemplates the addition of many more department stores, both in the New York metropolitan area and within a radius of roughly 200 miles, including locations in Massachusetts and Pennsylvania. Where feasible, the department stores to be opened will incorporate supermarkets carrying not only foods but many hardware and soft goods products. Further plans are progressing to establish department stores at convenient locations in all parts of the New York metropolitan area, and increased emphasis will be placed on apparel in all new units, he added.—V. 184, p. 522.

O'Connor, Chairman of the Board, and Frank Freimann, President, announced that pre-tax earnings after deducting prior years' price redetermination losses under government contracts and other prior years' adjustments were $6,220,442, an increase of 36% over the $4,571,087 in the previous fiscal year. After-tax earnings amount to $3,100,442 as compared with $2,426,087 in the fiscal year ended June 30, 1955. The current year's earnings were equivalent to $3.54 per share on the 841,234 shares of common stock outstanding at June 30, 1956 after allowing for the payment of dividends on the preferred stock. The number of shares of common stock outstanding was increased by 44,620 shares during the year largely as a result of the payment of a 5% stock dividend. On the basis of the increased number of shares outstanding net earnings for the previous year were equivalent to $2.88 per share.

Sales of products during the fiscal year ended June 30, 1956 were $70,529,646 as compared with $55,071,765 during the preceding fiscal year. The increase in sales were the result of a 35% increase in shipments of television, high-fidelity phonographs and radios.

Mr. Freimann stated, "There is every indication that the company's volume of business will continue to expand during the current year. Orders received for high-fidelity phonographs since July 1 are more than double those received in the same period last year, and orders for television sets are substantially ahead of the same period last year. Shipments of all products for the three months ending Sept. 30, 1956 should be more than 25% ahead of the same period last year with shipments of television and high-fidelity phonographs accounting for the increase. This increase," Mr. Freimann stated, "has been accomplished in the face of a reported general decline in industry TV sales."—V. 184, p. 220.

Hydrogen is used extensively in the electronics, aviation and petroleum industries, in brazing operations and in heat treating various metals. The company produces the gas at its Los Angeles plant by the electrolysis of water, which creates hydrogen of the highest degree of purity.—V. 184, p. 728.

National Distillers Products Corp.—U. S. I. Division to Produce Titanium in Ashtabula, Ohio—

U. S. Industrial Chemicals Co., a division of National Distillers, will put into operation by the end of 1957 a 10,000,000-pound-per-year plant for the production of high-quality titanium sponge, it was announced on Sept. 24 by John E. Bierwirth, President of National Distillers. This step will make U. S. I. the first company to enter the titanium field without a government procurement guarantee.

The multi-million dollar titanium plant will be located in Ashtabula, Ohio less than a mile from U. S. I.'s existing sodium and chlorine plant. Both the titanium plant and U. S. I.'s 1,500,000 pound-per-year zirconium plant, announced a short time ago, will be located inside a 175,000 square foot building recently purchased from Lake City Malleable Co. The building, built 12 years ago as a production-line foundry, will have ample space for both plants. By utilization of the existing building, U. S. I. expects to cut six months to one year from its construction timetable.

Metallic sodium will be used in the new plant to reduce titanium tetrachloride to titanium sponge by a new process developed in U. S. I.'s research laboratories. The new process will, according to Dr. Robert E. Hulse, Vice-President in charge of chemical activities, produce a higher purity titanium sponge than the conventional magnesium reduction process, at a cost lower than that of any existing commercial technique.

The sodium used in the process will be supplied from U. S. I.'s nearby plant, while the titanium tetrachloride will be produced by Stauffer Chemical Co. in a new plant which it plans to build nearby. Chlorine from U. S. I.'s sodium-chlorine plant will be used by Stauffer for this process.

Engineers and constructors of U. S. I.'s new titanium sponge plant will be the Bechtel Corp. of San Francisco, Calif. Engineering and design work on the plant is already under way and construction is scheduled to start as soon as the foundry equipment can be removed from the building. Construction of a 10,000 square foot control laboratory is already under way.—V. 184, p. 921.

North Central Airlines, Inc.—To Appeal—

This corporation will promptly appeal the Sept. 20 U. S. District Court finding at Indianapolis, Ind., in which the Court declared that North Central had breached its contract for the purchase of Lake Central Airlines.

North Central's officials indicated that they believe the Court's interpretation of the contract is in error and that the decision was based solely upon a misinterpretation of the law as it applied to the contract. They stated they will appeal immediately to the U. S. Court of Appeals, and anticipate a final decision within six months.

Civil Aeronautics Board Examiner Paul N. Pfeiffer recommended in July that the Board approve the contract.

The judgment to declare the contract breached was sought by a Lake Central Airline employee group which, in January, 1955, had entered into a secondary agreement to purchase the LCA stock, subject to the prior rights of North Central.

North Central Airlines contracted for the purchase of 96% of the stock of LCA in October, 1952, when the Civil Aeronautics Board found the management of LCA unfit and directed the major stockholders to liquidate their interests. Major holders were brothers John W. and W. W. Weesner and their father Roscoe Weesner who owned about 80,000 of 83,000 shares outstanding.

This purchase agreement between the Weesners and North Central was filed immediately with CAB, since all airline purchases and mergers must be approved by the Board. The LCA stock was put in trust with trust certificates issued to a new interim management.

In public hearings held by the CAB last fall, North Central demonstrated how it can provide greatly improved service to the cities on the LCA system—26 cities in Indiana, Illinois, Michigan, Ohio and Pennsylvania. North Central said it can provide 48% more flight service and at the same time save the taxpayers over $400,000 annually in airmail subsidy, an advantage corroborated by Examiner Pfeiffer in his June 17 recommendation that the CAB approve the purchase. A final decision is expected before the end of the year.

The LCA employee group charged that North Central had violated itscontract by unduly delaying CAB proceedings and by filing an application, apart from the purchase contract, for Lake Central routes.

North Central says there was no time limit specified in the contract and that, except for two or three separate requests for brief inconsequential postponements, it did not delay the case but rather moved on five separate occasions to expedite proceedings.

If there was a delay, it was created by a sweepig investigation instituted by the CAB itself to review the overall airline service in the Lake Central area and to consider the applicatiors filed by other airlines for the LCA routes. Moreover, says North Central, the CAB is the best judge of its own process and not once did it find that the case was unduly delayed. In fact, the Examiner found there was no undue delay by North Central.

In response to the LCA employee group charge that North Central

filed separate application for the LCA routes, whole or in part, North Central says this action was expressly authorized in the contract and, since two other airlines—Allegheny and Ozark—had filed for the LCA routes, North Central was forced to file to protect its interests. As it developed, none of the airlines' applications for the routes was heard, all other carriers were excluded and the merger case was heard exclusively.

Today's court ruling serves only to delay the improvement of airline service in the Lake Central area, North Central's officials stated. —V. 184, p. 1125.

This company has filed an application with the Federal Power Commission seeking authorization for $1,300,000 principal amount of first mortgage bonds and $1,500,000 principal amount of short-term promissory notes.

The company requested that the bond issue be exempted from competitive bidding requirements. It plans to negotiate for private sale of the bonds. The promissory notes will be issued to evidence a loan or loans from a commercial bank or banks.

The proceeds obtained from the proposed issuance would be used to pay outstanding bank notes, defray costs of routine additions to Northwestern's existing electric system in South Dakota and gas distributing ssytem in Nebraska, to convert boilers in its Aberdeen and Mitchell, S. D., generating plants for burning either natural gas or coal, to convert and extend its existing gas distributing systems in Aberdeen, Huron and Mitchell, S. Nuclear-Chicago Corp.—Proposed New Name—

See Nuclear Instrument & Chemical Corp. below.

Nuclear Instrument & Chemical Corp.—To Change Name—

This corporation, which manufactures radioactivity measuring instruments for peacetime applications of atomic energy, is planning to change its corporate name, it was announced on Sept. 28. The new name, if approved by stockholders, will be Nuclear-Chicago Corp.

Dr. E. B. Tilton, Chairman of the Board and President, said that the name change, to be voted on at the annual shareholders meeting Nov. 14, was suggested because most of the company's customers now know the corporation by its trade name, "Nuclear-Chicago."

Dr. Tilton also announced that corporate profits for the fiscal year ended Aug. 31 were the highest in the company's history due to a substantial increase of commercial sales.

"The radioactivity measuring business is potentially one of America's greatest growth industries," said Dr. Tilton, "and we have built up a substantial cash reserve in order to quickly take advantage of any new industrial, medical, or biological research applications which present themselves."—V. 184, p. 1231.

Oakite Products, Inc., New York, N. Y.—Files With Securities and Exchange Commission—

The corporation on Sept. 14 filed a letter of notification with the SEC covering not to exceed 7,400 shares of common stock (par $5) to be offered to employees at $16.15 per share on a cash basis and $14.45 per share on an installment basis.

The proceeds are to be used for working capital.—V. 180, p. 723.

Ohio Edison Co.—To Increase Plant Capacity—

Walter H. Sammis, President, on Sept. 20 announced that the company will double the size of the new steam-electric power plant now under construction at Stratton, Ohio, on the Ohio River. Total capacity will be 680,000 kilowatts, with the addition of two 170,000 kilowat units to the two of similar size originally projected when ground was broken for the new plant last May.

The expanded plans will increase the total cost from $62,000,000 to approximately $116,000,000. The first unit is scheduled for operation late in 1958. The second unit will go into service in late 1959, with the other two following in 1960 and 1961.

This plant, together with a 90,000 kilowatt addition at the Edgewater plant near Lorain, Ohio, and another 90,000 kilowatt unit at the New Castle plant of Pennsylvania Power Co., a subsidiary, and scheduled for operation in 1957 and 1958 respectively, will add 360,000 kilowats to the system. This will represent an increase of approximately 50% above the present system capability of 1,700,000 kilowatts.—V. 184, p. 1231.

Ohio Power Co.—Registers Securities With SEC—

This company, filed a registration statement with the SEC on Sept. 20, 1956, covering $28,000,000 of first mortgage bonds, due 1986, and 60,000 shares of cumulative preferred stock, $100 par. These securities are to be offered for public sale at competitive bidding.

The company proposes prior to, or concurrently with, the issuance and sale of the bonds and preferred stock to issue to American Gas & Electric Co. 110,000 additional shares of its common stock for a cash consideration of $11,000,000.

Of the net proceeds of this financing, $18,000,000 will be applied to the prepayment of a like amount of bank notes, issued for construction purposes, and the balance will be used to pay for further property additions and improvements. The cost of the company's construction program for the 18 months ending Dec. 31, 1957, is estimated at $104,853,000.—V. 184, p. 9.

Outboard Marine Corp.—Evinrude Unit to Expand—1957 Line of Motors Introduced—

Increased facilities in a million dollar plant expansion program this year may even fall short of the demand for Evinrude outboard motors in 1957, it was disclosed on Sept. 18 by W. J. Webb, Division Manager of Evinrude Motors, Milwaukee, Wis. and Vice-President of Evinrude's parent organization, Outboard Marine Corp., Waukegan, Ill.

Mr. Webb described the tremendous sale of outboard motors at the introduction of Evinrude's 1957 line of motors at a press conference at the Waldorf-Astoria, New York City.

"Two years ago when we figured a 35% increase in dollar volume for 1956 production, I just hoped we wouldn't have too many motors left over," Mr. Webb said. "But thanks to the best selling job the industry has ever seen, we were able to sell out completely—something that hasn't ever happened before."

Mr. Webb credits the sell-out for 1956 to engineering and sales planning which was initiated in 1952.

Mr. Webb sees Evinrude selling at least as many, if not more, motors in 1957 as the company did this year. An even higher projection for sales in 1958, he said, will necessitate a further increase in plant facilities.

Greater horsepower, an automobile-type generator and slip clutch propeller which eliminates changing shear pins are the leading features of the 1957 Evinrude outboard motor line.

In addition, the 1957 line has 43 major and minor refinements and innovations. The Big Twin features a new air silencer and a new system of reduced compression which makes it as easy to start as motors half its size.

Heading the nine motor line of the world's oldest outboard motor manufacturer are three new 35 horsepower units, two of which will be electric-starting with generator as optional equipment. These are the rope-starting and electric-starting Big Twins and the electric-starting Lark, which replace the three 30 h.p. motors of the 1956 line.

The Lark, which was outstandingly popular in its introduction as the 1956 deluxe motor, returns as one of the 35 h.p. models with a new and even more attractive "dress."

Also introduced are two new 18 h.p. motors, a rope and an electric-starting unit, both with the new slip clutch. These replace the two 1956 15 h.p. models.

Close to a billion dollars will be spent by Americans on outboard boats and boating equipment in 1957, according to Howard F. Larson, Director of Sales and Marketing for Evinrude Motors.

Mr. Larson said that boating has become the country's biggest dollar volume recreation and will continue as such largely because of the swing to higher horsepower by all major outboard motor manufacturers. The 10 motor Evinrude line now ranges from three to 35 horsepower, an increase of five horsepower in the company's biggest models.

Some 5,000,000 outboard motors are now in use in the United States, Mr. Larson revealed. By the end of the year, the industry will have sold approximately 600,000 motors for a retail dollar volume of $226,000,000. In 1957 the industry is expected to sell approximately 700,000 units for a dollar volume of $280,000,000.

Evinrude, the oldest and largest producer of outboard motors in the country, will record an increase of 35% in sales by the end of its fiscal year, Sept. 30, Mr. Larson said. This is the largest single increase in the company's 47 year history. Evinrude's entire 1956 production had been sold out by June 1. According to Mr. Larson, the company sould again shw an increase of close to 35% in dollar volume in 1957.

The sale of boats, trailers and boating equipment will rise proportionately with the sale of motors in 1957, Mr. Larson predicted. In 1954 some 223,000 outboard boats were sold. This figure rose to 258,000 boats in 1955 and by the end of 1956 it should exceed 275,000.

Boat trailer sales totalled 103,000 in 1954. In 1955 trailer sales climbed to 129,000. Some 150,000 trailers should be sold by the end of 1956.

Marketing research by Evinrude indicates that an average outboard motor sale by an Evinrude dealer results in an additional expenditure of $625 by the new motor owner on accessories and equipment.

If this holds true for dealers of all manufacturers, Mr. Larson estimates that $437,500,000 will be spent next year at the retail level on boats, trailers, water skis, marine hardware and accessories.

In addition upward of $10,000,000 will be spent on outboard motor oil, over $4,000,000 on gear grease and about $55,000,000 on gasoline to power the growing outboard fleet. There is no available estimate on the additional money to be spent for slip and mooring rentals, storage, maintenance and routine dockside purchases of the outboard skipper.—V. 184, p. 1231.

Owens-Illinois Glass Co.—Merger Approved—

Merger of this company and National Container Corp. was approved by shareholders of both companies on Sept. 17. Owens-Illinois had its meeting here, and National Container met in Neew York City.

According to J. P. Levis, Owens-Illinois Board Chairman, the merger is scheduled to be completed, and consolidated operations begun on Oct. 1. The business of National Container Corp. will be operated under that name as a wholly-owned subsidiary of Owens-Illinois.—V. 184, p. 922.

Oxford Loan Co., Philadelphia, Pa.—Files With SEC—

The company on Sept. 17 filed a letter of notification with the SEC covering $250,000 of 6% renewable debentures payable (upon demand) Sept. 10, 1961 to be offered in denominations of $100 and $500 each at face amount, through Walnut Securities Corp., Philadelphia, Pa. The proceeds are to be used for working capital.—V. 184, p. 1020.

Pacific Lighting Corp.—Unit Sells Stock to Parent—

The Pacific Lighting Gas Supply Co., a subsidiary, has been authorized by the California P. U. Commission to sell, at par ($25 per share) 325,867 shares of common stock to its parent company. The proceeds from the sale, with an aggregate value of $8,146,675, will be used to pay outstanding indebtedness and to finance the cost of additions and improvements.—V. 184, p. 922.

Pan-Coastal Life Insurance Co., Mobile, Ala.—Files With Securities and Exchange Commission—

The company on Aug. 24 filed a letter of notification covering 33,017 shares of common stock (par $1) to be offered at $8.25 per share, without underwriting. The proceeds are to be used to pay the cost of writing and acquiring additional insurance business.

Panhandle Oil Corp.—Merger Approved—

The stockholders on Sept. 27 approved the management's proposal to merge the corporation into American Petrofina, Inc. Under the plan each share of Panhandle common stock will be converted into 1.3 shares of American Petrofina class A common stock.

With the merger, American Petrofina, the surviving company, acquires all of the oil properties and other assets of Panhandle and in addition will have substantial new funds for purposes of expansion. American Petrofina is an affiliate of Compagnie Financiere Belge des Petroles (Petrofina of Belgium), an international organization engaged in the production, refining, marketing and transportation of petroleum.

Capitalization of American Petrofina, upon completion of the merger, will consist of $9,640,000 of 3½% subordinated convertible debentures and 2,999,278 shares of class A common stock and 1,000,000 shares of class B common stock outstanding. It is expected that the class A common stock will be admitted for trading on the American Stock Exchange on Oct. 1, 1956.

See also American Petrofina, Inc. above.—V. 184, p. 1126.

Peabody Coal Co. — Debentures Offered — The First Boston Corp. and associates on Sept. 26 offered to the public $35,000,000 of 5¼% sinking fund debentures, due Oct. 1, 1976, at 100%, plus accrued interest from Oct. 1, 1956. This offering was oversubscribed and the books closed.

The new debentures are entitled to a sinking fund sufficient to retire $1,950,000 principal amount annually commencing Oct. 1, 1959, which is calculated to retire $33,150,000 or 94.7% of the issue by Oct. 1, 1975.

PROCEEDS—Of the proceeds from the sale of these debentures, the company expects to use approximately $28,180,000 for the payment of outstanding debt and the remainder for other corporate purposes, including expenditures for property developments and additions, the acquisition of additional coal reserves, the development of new mines and the purchase or extension of related transportation facilities, all of which are expected to cost about $38,600,000 during the period 1956-59.

BUSINESS—Company is the second largest commercial producer in the bituminous coal industry, selling primarily to electric utilities in the Midwest area, largely under long-term contracts. Its mining operations involve both underground and strip mining methods, with mines in six states for the most part accessible to the Mississippi, Ohio, Green and Illinois Rivers.

EARNINGS—For the first six months ended June 30, 1956, net sales amounted to $48,957,865 and net income to $3,024,375 compared with sales of $41,081,992 and income of $1,942,946 for the

The company intends to use a portion of the proceeds of this sale to retire the notes to be issued by its subsidiaries to Fannin's Gas & Equipment Co. and to pay obligations incurred in connection with the recent acquisition of properties at Prescott, Ariz., and Blythe, Calif.; the balance will be added to the general funds of the company, to be available for general corporate purposes, including replenishment of working capital.—V. 184, p. 1273.

Utah-Idaho Consolidated Uranium, Inc.—Stock to Be Distributed by Six Companies to Their Stockholders—

Five of the six Kellogg mining companies originally associated in U. & I. Uranium, Inc., will "spin off" part of their stock holdings in Utah-Idaho Consolidated Uranium, Inc., to their respective stockholders on Oct. 5, it was announced recently.

The distribution will be on the basis of 30 shares of Utah-Idaho for each 100 shares held in Caledonia Silver-Lead Mining Co., which has 2,000,000 shares of outstanding, and 20 shares for each 100 held in Coeur d'Alene Silver Giant, Inc., Nancy Lee Mines, Inc., New Era Mines, Inc., and Signal Mining Co., each of which have 3,000,000 shares issued. It will go to stockholders of record Oct. 1.

Silver Bowl, Inc., the sixth company in the coalition, will make its release of Utah-Idaho shares at a later date.

Each of the six firms owns 1,000,000 shares of Utah-Idaho stock. The Oct. 5 spin-off will leave five of them with 400,000 shares remaining in their treasuries.

Utah-Idaho Consolidated is the successor firm to U. & I. Uranium Inc., which was merged early last year into Federal Uranium Corp., of Nevada. It took over all the U. & I. assets not included in the merger deal, including substantial cash and property holdings.

Earlier this year, in March, Utah-Idaho joined with Rimledge Uranium & Mining Co. of Utah in the exploration and development of the Moki lease, held by Moki Mining Co. and the adjoining Nighthawk group, owned by Nighthawk Uranium, Inc., in San Juan County, Utah, on a profit-sharing basis.

The Utah-Idaho distribution will be the third in which stockholders in the associated companies have shared. In April of this year they received Federal Uranium stock (three shares per 100 for Caledonia shareholders and two shares per 100 for Coeur d'Alene Silver Giant, Nancy Lee, New Era and Signal shareholders), and shortly thereafter received one-half that number of shares in Radorock Resources, Inc., Federal subsidiary.

Silver Bowl officials were unable to authorize the Federal or Radorock distribution because of an outstanding bond obligation, and the same situation now prevents the Utah-Idaho stock release.

As of June 1, 1956, the Utah-Idaho company owned 20,000 shares of Federal Uranium Corp. stock and 10,000 shares of Radorock Resources, Inc., a Federal subsidiary.

The company has announced that it will construct a modern industrial lift truck sales and service branch in Los Angeles, Calif., as the first step in a widespread western expansion plan to meet the demands for Yale products.

In announcing plans for the new branch which is operating in temporary quarters pending completion of the new building, Paul R. Minch, Jr., Yale Materials Handling Division General Sales manager predicted a 150% increase in the demand for Yale products in California and the West during the next 10 years.

In order to meet this demand, he said, Yale will be more than doubling the number of its sales and service outlets through branch and representative organizations in the very near future.

The new distribution plan he outlined was as follows: Establishment of a representative in San Diego, establishment of sub-branches in Fresno and Sacramento to be administered from the Yale branch in San Francisco; appointment of representatives for Phoenix, Ariz.; Albuquerque, N. M.; and El Paso, Texas; appointment of a new representative in Portland, Ore., with a sub-office in Medford; establishment of a representative office in Yakima, Wash.; and strengthening representation in Seattle, Spokane and Salt Lake City to include the setting up of a sub-office in Missoula, Montana.

The territory to be covered by the new branch includes the Counties of Los Angeles, Orange, Riverside, San Berrardino, Inyo, Ventura, Santa Barbara and San Luis Obispo and a portion of southern Nevada.

...because they went to their doctors in time

Many thousands of Americans are being cured of cancer every year. More and more people are going to their doctors *in time*. That is encouraging!

But the tragic fact, our doctors tell us, is that every third cancer death is a needless death... *twice* as many could be saved.

A great many cancers can be cured, but only if properly treated before they have begun to spread or "colonize" in other parts of the body.

YOUR BEST CANCER INSURANCE is (1) to see your doctor *every year* for a thorough checkup, no matter how *well* you may feel (2) to see your doctor *immediately* at the first sign of any one of the 7 danger signals that may mean cancer.

For a list of those life-saving warning signals and other facts of *life* about cancer, call the American Cancer Society office nearest you or simply write to "Cancer" in care of your local Post Office.
