Affiliated Fund, Inc.—To Reduce Capitalization—The stockholders on Feb. 7 will consider and act upon a reduction of capital of the company.

Any stockholder of the company is entitled to tender his shares to the company for redemption, and the company, to the extent that it has surplus available for such purpose, is obligated to redeem such shares at their net asset value. The company also buys any of its shares offered by dealers to it at its daily bid price. As blocks of stock repurchased by the company accumulate, stockholder action is needed and must be maintained to restore these repurchased shares to the authorized but unissued stock of the company. Furthermore, unless repurchased shares are retired by stockholders' action within a reasonable time after their acquisition, stock transfer taxes are payable by the stockholders on the repurchase.

As of Oct. 31, 1956, 3,814,653 shares of the company's capital stock, with a par value of $1.25 per share, were held by it as a result of repurchases by the company of its capital stock. The board of directors has resolved to retire said shares and to reduce the capital of the company (as of Oct. 31, 1956) from $79,940,260 to $75,171,943.75, an aggregate reduction as of said date of $4,768,316.25, and has recommended to the stockholders that they adopt supplemental resolutions approving said reduction of capital.

At the close of business on Dec. 21, 1956, the date as of which the record of stockholders entitled to vote at the annual meeting is determined, 62,430,956 shares of the capital stock of the company, all of one class, were outstanding.—V. 183, p. 205.

Alleghany Corp.—Withdraws Application to Sell IDS Holdings—

The SEC on Dec. 31 announced that, following withdrawal by this corporation and Murchison Brothers of their application for an exemption order under the Investment Company Act to permit the sale by Alleghany to Murchison Brothers of 53,000 shares of class A common stock of Investors Diversified Services, Inc., proceedings upon the application have been discontinued.

Because of intercompany affiliations, the transaction is prohibited by the Investment Company Act unless the Commission by order grants an exemption from the prohibition on the basis of a Commission finding that the transaction involves no overreaching on the part of any person involved, that its terms are fair and reasonable, and that it is consistent with the purposes of the Act. The application for such an order was filed Sept. 14, 1956; and, following an interchange of requested findings and briefs by the parties and participants, including counsel for the Division of Corporate Regulation which opposed the granting of the application, the Commission heard oral arguments on Dec. 6, as requested by the applicants, in view of their stated desire to consummate the transaction, if approved, prior to Dec. 31, 1956, in order to secure certain tax benefits.

Although the Commission anticipated that difficulties would be presented in disposing of the application in the short time available before the year-end, it advised the parties at the Dec. 6 argument that it would issue its decision promptly; and special efforts were made to assure a prompt decision notwithstanding a heavy workload and other pressing matters.

After the preparation of its opinion had reached an advanced stage and the issuance of a final opinion was almost at hand, and despite advice from Alleghany counsel that an extension of the Dec. 15 expiration of the contract could be expected, the Commission received telephonic advice on Dec. 19 from counsel for Murchison Brothers that the contract was no longer in effect as a result of its expiration and the refusal of the parties to extend it. This advice was later confirmed by telegram, received Dec. 27 and 28 from counsel for Alleghany and Counsel for Murchison Brothers, in which they also requested that the joint application be deemed withdrawn.

The opposing stockholders objected to discontinuance of these proceedings, contending that termination of the contract should not act as a bar to a determination of questions they have raised respecting the asserted illegality of earlier transactions between the applicants. However, the Commission concluded that withdrawal of the application makes discontinuance of these proceedings appropriate. —V. 184, p. 2437.

The original list contained the names of 135, the first supplement contained the names of 14 such companies, and the second supplement contained 19 names.

Arcoa, Inc., Portland, Ore.—Registers With SEC—

This corporation filed a registration statement with the SEC on Dec. 26, 1956, covering $3,000,000 of U-HAUL FLEET OWNER CONTRACTS. The contracts provide for the operation of fleets of automobile-type rental trailers in the U-Haul Trailer Rental System. The trailers are marketed under the name "U-Haul" and are leased to the public for local use and for one-way trips throughout the country. The Fleet Owner receives 35% of the gross rental income from his trailers and pays certain trailer operation expenses. The contracts are offered to any person, group of persons or corporation having the legal ownership of a fleet of rental trailers each accompanied by a clamp-on automobile hitch.

The present offering of contracts is being made to increase the number of trailers available for rent in the system, in order that the system may adequately serve the public as well as to maintain its competitive position.—V. 183, p. 2.

Associated Fund, Inc., St. Louis, Mo.—Registers With Securities and Exchange Commission—

The corporation on Dec. 26 filed with the SEC an amendment to its registration statement covering 25,000 additional full paid accumulative certificates.—V. 183, p. 2758.

Atlas Corp.—To Acquire Stanrock Securities—

This New York investment company, it was announced on Dec. 31, has applied to the SEC for an exemption order permitting its acquisition of $500,000 of securities of Stanrock Uranium Corp; and the Commission has given interested persons until Jan. 14, 1957, to request a hearing thereon.

Stanrock owns certain mining claims in the Province of Ontario, Canada. Pursuant to a contract with Eldorado Mining & Refining Ltd., an agency of the Crown of Canada, it proposes to sell to Eldorado uranium concentrates produced from a mill to be built by Stanrock. In order to provide the initial temporary financing for these mining operations and the proposed mill, Stanrock has arranged to sell to a small group of investors, including Atlas, $3,000,000 of 5¼% first mortgage bonds due June 1, 1957, and 450,000 shares of common stock for a total consideration of $3,000,000. Of this amount, Atlas has agreed to purchase $500,000 of the bonds and 75,000 shares of the common stock for $500,000. Negotiations are now in progress for the purpose of establishing a permanent financing program which is expected to provide approximately $24,500,000.—V. 184, p. 2322.

Bethlehem Steel Corp.—Seeks Dismissal of Suit—

This corporation and the Youngstown Sheet & Tube Co. on Jan. 3 filed denials of the U. S. Justice Department's allegation that the proposed merger of the two organizations would constitute a violation of Section 7 of the Clayton Act.

The companies called upon the Federal Court for the Southern District of New York to dismiss the Attorney General's suit.

On Dec. 12, the Justice Department filed a complaint seeking to enjoin the proposed acquisition of Youngstown by Bethlehem, alleging that it "may . . . substantially . . . lessen competition or . . . tend to create a monopoly" in violation of Section 7 of the Clayton Act.

In separate answers filed on Jan. 3, the two companies stated "that there is not any substantial competition between Bethlehem and Youngstown in any section of the country."

Furthermore, the two companies assert, the effect of the proposed merger will ". . . be substantially to stimulate competition in the steel industry in various sections of the country."—V. 184, p. 2618.

(Sidney) Blumenthal & Co. Inc.—Debt Conversions—

Announcement was made on Dec. 27 by William Heller, President, and David Berdon, Chairman of the Board, that a total of $900,000 of indebtedness has been converted into 225,000 newly issued shares of the corporation's common stock. This conversion was made pursuant to the agreement executed Feb. 21, 1956, which was approved by stockholders at the annual meeting held March 29, 1956. As a result of the aforementioned conversion, outstanding shares of common stock have been increased from 359,111 to 584,111. Warrants for 225,000 additional shares provided for in the agreement of Feb. 21, 1956, were purchased on Dec. 27 by the same interests. These warrants are exercisable between Jan. 2, 1958 and Dec. 31, 1959.

Messrs. Heller and Berdon further stated that this corporation looks forward with great confidence to 1957 operations. Expanded new lines will shortly be ready to be shown. A $640,000 program has been approved and started for the modernization and expansion of the Corporation's spinning plant in Valley Falls, R. I.—V. 184, p. 1014.

Braniff Airways, Inc.—Loan Arrangements Approved

The shareholders on Dec. 20 voted 1,996,845 shares, representing 99% of the shares voted and 68% of all shares outstanding, in favor of the plan approved by its board of directors to issue up to $40,000,000 of 4¾% equipment mortgage sinking fund bonds due July 1, 1976, Chas. E. Beard, President, has announced. Favorable action by the holders of a majority of the shares outstanding was necessary for approval.

The bonds will be sold in installments, as funds are needed by the company, prior to April 29, 1961, to a group of insurance companies composed of The Mutual Life Insurance Co. of New York, The Equitable Life Assurance Society of the United States, The Prudential Insurance Co. of America., New England Mutual Life Insurance Co., The Northwestern Mutual Life Insurance Co., Connecticut General Life Insurance Co., and The Connecticut Mutual life Insurance Co.

Sale of the bonds is an integral part of Braniff's plan to finance its aircraft acquisition and facilities improvement program the total cost of which is estimated to be $83,227,000. In the second quarter of 1955, Braniff sold to its shareholders, through the issuance of transferable rights, 460,644 common shares. The issue was oversubscribed 127% and proceeds of the sale added $5,626,142 to its paid-in capital and surplus. In August, 1956, Braniff shareholders were offered the right to subscribe for an additional 1,105,545 shares of common stock. This issue was oversubscribed 110% and added $10,892,392 to paid-in capital and surplus. William A. Blakley, Chairman of the Executive Committee of the Board of Directors, and the company's largest share-

holder, guaranteed the sale of both issues by agreeing to purchase all unsubscribed shares.

At Oct. 31, 1956, total assets of the company were $45,241,647 and total capital, paid-in surplus and earned surplus was $35,548,832.

"We have no present plans for further financing either by equity or debt," Mr. Beard said. "The management anticipates that the proceeds from the sale of the 1976 series bonds, together with general funds of the company, will be sufficient to enable the company to meet its present commitments under its equipment and facilities program.

"We have received, to date, four of the Douglas DC-7C El Dorado and three of the Convair Metropolitan 440 aircraft," Mr. Beard stated. "Both types have been introduced into our operation with fewer problems than any new aircraft in our history. Two more Convair 440's will be received by mid-January and three additional Douglas DC-7C El Dorados will be received in the spring of 1957. With the addition of these aircraft, Braniff now operates a fleet of aircraft second to none throughout the world in speed, beauty and passenger comfort.

"Traditionally we do not make public forecasts of prospective earnings," Mr. Beard continued, "however, the four DC-7C El Dorados and two of the Convair 440's have been placed in operation with only minor increase, if any, in general overhead expense and with no adverse effect on our load factor."

In addition to the aircraft listed above, Braniff has on order nine Lockheed Electra turbo-prop and five Boeing 707 turbo-jet aircraft which will be delivered in 1959 and 1960.

Braniff's long-range financial program was developed by a special committee of its board of directors composed of William A. Blakley, Chairman of the Executive Committee of the Board; Chas. E. Beard, President; and C. G. Adams, Vice-President-Finance, with F. Eberstadt of F. Eberstadt and Co. of New York City, acting as advisor, underwriter of the stock issues and negotiator of the bond sales.—V. 184, p. 2736.

Buffalo Forge Co.—Has Good Backlog—

The company closed its fiscal year on Nov. 30, 1956 with the largest backlog of orders for any year end in its history, W. R. Heath, Executive Vice-President, announced on Dec. 31.

"Sales were substantial in 1956. Expanded research and intensified sales activities will help us register increased sales again in 1957, barring some worsening of the international situation," Mr. Heath said.—V. 184, p. 1791.

A. M. Byers Co.—Elects Two Directors—

This company announced on Dec. 21 the election of L. A. McQueen and Frank W. Knowlton as new directors. Mr. McQueen is associated with General Tire & Rubber Co. as a director and Vice-President in charge of sales. Mr. Knowlton, also a dircetor of General Tire, is Secretary and General Counsel of that company.

Two vacancies were created on the Byers board when Sidney Newman and N. H. A. Rodman resigned as directors of the company last October. Mr. McQueen takes Mr. Newman's seat on the board and the vacancy created by Mr. Rodman's resignation is filled by Mr. Knowlton.—V. 184, p. 1119.

Central Maine Power Co.—Plans Financing in 1957—W. F. Wyman, President, on Dec. 31, said in part:

During the year construction work has proceeded on schedule on the company's new steam-electric generating plant on Cousins Island in Yarmouth, near Portland, Me. The present schedule calls for the completion of the first unit of 44,000 kilowatts late in 1957, with the completion of a second unit of the same size to follow in 1958. Construction expenditures for 1957 are now estimated at between $19,000,000 and $20,000,000, of which the largest item is the continuation of the work at Cousins Island. It is estimated that $5,500,000 of the amount needed for this 1957 program will be supplied from internal cash with the balance to be supplied from outside sources. No permanent financing was undertaken in 1956, and bank credit was used to meet part of the company's requirements. Bank loans outstanding at the year-end totaled $10,500,000. While the company expects to do some permanent financing in 1957, no definite plans have yet been worked out.

Columbia Gas System, Inc.—Simplification Program—

Two important steps in the cimplification program of this System became effective Jan. 1, 1957, George S. Young, President, announced today.

In one step, the Natural Gas Co. of West Virginia was merged into The Ohio Fuel Gas Co. Natural Gas operated entirely within the State of Ohio, serving Alliance, Salem and about 90 other communities in the eastern part of the State. As of Jan. 1, it became a part of Ohio Fuel, which serves Columbus, Toledo, Springfield, Zanesville and about 300 other Ohio communities.

In the second step, Kentucky Gas Transmission Corp., a new company, acquired all of the transmission and storage operations of Central Kentucky Natural Gas Co., which will become solely a distribution company, serving Lexington, Frankfort, Winchester and seven other communities in the area. Kentucky Gas Transmission will supply gas at wholesale to Central Kentucky and that company's present wholesale customers.

All companies involved are subsidiaries of The Columbia Gas System, Inc.

Mr. Young explained that the steps in the simplification program are being taken after approval by the Federal Power Commission, the utilities commissions in the States affected, the Securities and Exchange Commission and the Internal Revenue Bureau, which investigates tax aspects of the program.

Formation of Kentucky Gas Transmission Corp. is a temporary measure. When the transmission and storage properties of each of the System's companies have been similarly separated, the transmission companies will be merged to form a single, System-wide transmission company.

In another simplification move, a hearing has been set for mid-January by the New York P. S. Commission on the merger of Binghamton Gas Works and The Keystone Gas Co., Inc. Both are retail distribution companies serving natural gas to some 53,000 customers in the Southern Tier Counties of New York. If their merger is approved, the new company will be named Columbia Gas of New York, Inc.

Columbia's simplification program will have the ultimate effect of reducing the number of retail gas utility subsidiary companies to one in each of seven States. There will be one interstate transmission company selling gas at wholesale.

At present, Columbia has 14 operating subsidiaries, some of which are subject to the jurisdiction of as many as three State commissions, plus the Federal Power Commission. The purpose of the simplification program is to reduce the many problems involved in the System's regulatory proceaures.—V. 184, p. 2623.

Commonwealth Edison Co.—Plans $50,000,000 Bonds—

The company is planning to sell $50,000,000 of 30-year first mortgage bonds through competitive bidding on March 12, Willis Gale, Chairman, announced on Jan. 3.

Plans call for the filing in February of a registration statement with the SEC and a petition with the Illinois Commerce Commission covering issuance of the bonds.

The proceeds of the proposed sale will be applied toward the company's construction program, estimated at $460,000,000 for the three years 1957 through 1959. The expenditures will be made for electric generating facilities, for transmission and distribution facilities and for a general plant.—V. 184, p. 1689.

Concord Fund, Inc., Boston, Mass. — Registers With Securities and Exchange Commission—

This investment company filed with the SEC an amendment on Dec. 28, 1956, to its registration statement covering an additional 250,000 shares of its common stock.—V. 183, p. 207.

Consolidated Edison Co. of New York, Inc.—Proposed Offering of Convertible Debentures—

A special meeting of stockholders will be held on Feb. 5, 1957, for the purpose of voting on a resolution consenting to the conversion into common stock of the company of not to exceed $125,000,000 principal amount of convertible debentures to be authorized by the Board of Trustees from time to time in such amounts as they may determine.

On Dec. 14, 1956, there were outstanding 13,704,551 shares of common stock and 1,915,319 shares of $5 cumulative preferred stock, both classes entitling the holders thereof to one vote per share. An affirmative vote of the holders of 66⅔% of the outstanding shares of the common and preferred stock, voting together, will be required for the adoption of the resolution authorizing the conversion into common stock of the convertible debentures.

The proxy statement, dated Dec. 28, 1956, said in part:

"During the years 1952 to 1956 (the latter estimated in part) the company and its merged subsidiaries have expended or will expend approximately $500,000,000 in additions to utility plant, and the company is engaged in a construction program which during the next five years is estimated to require $650,000,000. Of this, approximately $350,000,000 will be secured principally from the provision for depreciation and retained earnings and the remainder from the sale of securities, the type of which it is impracticable to determine at this time. However, the Board of Trustees believes that from time to time it will be advantageous to the company and its stockholders to issue debentures convertible into the common stock of the company and accordingly requests the consent of the stockholders to the conversion of an aggregate principal amount of $125,000,000 of debentures. Such debentures, upon authorization by the Board of Trustees, will be offered pro rata to the common stockholders, pursuant to their preemptive rights.

"The convertible debentures will be issued from time to time in such amounts and have such characteristics as the Board of Trustees may determine depending on the financial requirements of the company and market conditions at the time. It is contemplated, however, that the company will issue, as soon as practicable, convertible debentures aggregating not exceeding $55,087,300 principal amount, to be offered to holders of the common stock of the company, pro rata, on subscription warrants which will be at the rate of $4 principal amount of convertible debentures for each share of common stock held.

"The convertible debentures will be unsecured obligations of the company, are to mature not more than 15 years from their date, to bear interest at such rate and to be redeemable at such rates and dates as may later be determined by the Board of Trustees of the company. The interest rate will be fixed by the Board at a rate determined shortly before the offering date in the light of market conditions at such time and will be subject to the approval of the New York P. S. Commission. It is not contemplated that the convertible debentures will have any amortization, sinking fund or other similar provisions or contain restrictions on the payment of dividends.

"The convertible debentures are to be convertible into common stock of the company at any time after the issuance thereof at the

option of the holder at rates to be determined by the Board of Trustees. It is intended, however, that the conversion price of the convertible debentures will range from approximately the market price of the common stock at about the time of the offering of such debentures to not more than 15% above such market price. The indenture will provide for adjustment in the basis of conversion in the event, among other things, of any increase, decrease, reclassification, subdivision or combination of the shares of the common stock of the company.

"The proceeds from the sale of the first issue of convertible debentures are to be applied to the payment of short-term bank notes issued in connection with the interim financing of the company's construction program, and the balance, if any, toward payment for further additions to utility plant."—V. 184, p. 2737.

Cortez Uranium & Mining Co., Denver, Colo.—Stock Offering Temporarily Suspended—

The Securities and Exchange Commission, it was announced on Dec. 27, has vacated its order of Sept. 4, 1956, temporarily suspending the Regulation A exemption from registration under the Securities Act of 1933 with respect to the public offering by this company of 3,000,000 shares of its common stock at 10c per share.

In its Sept. 4th suspension order, the Commission asserted that Cortez Uranium stock was being offered and sold without disclosing certain facts with respect to Columbia Securities Co., the underwriter. Subsequently, Cortez Uranium furnished the Commission information to the effect that it no longer has any relationship with its former underwriter, Columbia Securities; that the only relationship ever existing with that concern involved that of underwriter and issuer pursuant to contract; and that Cortez Uranium intends to obtain a new underwriter and proceed with the offering of its securities and its exploration program after appropriate amendments have been made to its Regulation A filing.

Accordingly, the Commission adopted an order determining that the basis of the suspension order no longer exists and vacating said suspension order.—V. 184, p. 1120.

Ford Motor Co. (Mich.)—Lincoln Reports Record Year

"The company's Lincoln Division has concluded the most successful year in its 34-year history," Ben D. Mills, Vice-President and Division General Manager, reported on Dec. 30.

The year saw new records in both sales and production. The new production peak was achieved on Dec. 5, when the 43,689th Lincoln was built. Lincoln finished the year with a production total of about 47,600, well above the previous record of 43,688 set in 1948.

Sales records fell in every month through the 1956 model run, which ended in August. Total retail deliveries, not completely tabulated as yet, will top the previous high of 38,587 set in 1953, by approximately 8%.

"Successful as 1956 was for the Lincoln Division and Lincoln dealers, public reaction indicates the new Lincoln will be even more successful," Mr. Mills said.

"We expect to meet this prestige demand for our cars with facilities and personnel equipped to build the finest quality car on the American road," he added.

Lincoln's new general office building and manufacturing plant is nearing completion in Novi Township, Mich. The move to the new headquarters will begin early in the spring.

"Production capacity in the new plant will be increased to 90,000 units on a straight time basis, more than double anything we have had in the past," Mr. Mills said.

Mercury Schedule Increased—

Unprecedented demand for new 1957 Mercury cars has caused the company's Mercury Division to increase its production schedule for January 43% over December totals, according to F. C. Reith, General Manager of Mercury and a Ford Vice-President.

"We will produce 40,000 new Mercurys in January, compared with 28,000 cars in December," Mr. Reith said. "Popularity of the new Mercury ever since its introduction has left a great many of our 3,100 dealers with no inventory and dealers are delivering cars as fast as they get them."

To meet the demand for new Mercurys, the Division recently set an all-time high in employment, even higher than when Mercury and Lincoln were together in one division. In recent weeks all Mercury plants have worked overtime and Saturdays to speed up production.

In Mr. Reith's opinion, the expanding market for cars in the medium price class should boost sales in that field alone well over 2,000,000 units in 1957. Mercury, he pointed out, expects to increase its share by 100,000 cars.

"We are aiming at an increase of 45% in Mercury sales next year, compared to 1956," Mr. Reith said. "We are entering the new year with more manufacturing facilities, more dealership sales outlets, more employees and a distinctively different car with more styling and more performance than ever before.—V. 184, p. 2836.

ments will begin from General Electric's Locomotive and Car Equipment plant in Erie, Pa., in about four months.

St. Louis Car Co. will manufacture the completed cars, each of which will hold 200 passengers maximum. They can be operated in trains of up to 11 units.

The electrical order is a result of a contract for nearly $48,000,000 that the New York City Transit Authority has placed with the St. Louis Car Co. for 450 cars. Delivery of the units, at the rate of 40 a month, will begin early next summer.

Division Has Record Sales—

The company's Chemical and Metallurgical Division achieved the highest sales level in its history during the past year, it was announced on Dec. 31 by Robert L. Gibson, Vice-President and Division General Manager.

With total sales doubling since 1949, increases from 50 to more than 200% were experienced in 1956 by such new products as Alkanex wire enamel, Methylon resins, vacuum melted alloys, magnets, specialty grades of silicone products, and Irrathene irradiated polyethylene.

Mr. Gibson noted the continuing trend toward development of new organic chemical materials to make possible design improvements in electrical equipment. He pointed out that many such developments have resulted from General Electric's contributions to product and process technology based on research in chemistry and metallurgy.

Indicative of increased emphasis on external markets, the Chemical and Metallurgical Division's external business has increased three-fold in the past six years.

Mr. Gibson said that his organization had increased 1956 research and development expenditures by $1,000,000 over those of 1955, and that another million-dollar increment has been budgeted for 1957.—V. 184, p. 2836.

General Mills, Inc.—Acquires Mexican Firm—

C. H. Bell, President, on Dec. 20 announced that this company has purchased Protex, S. A., of Mexico City, Mexico—producers of steroid compounds used in the manufacture of cortisone and other pharmaceuticals. The acquisition marks General Mills' third business venture outside of the United States and the first in Latin America.

Protex operates a plant at Mexico City. It produces steroid hormone intermediates from root of barbasco, a vine-like plant that grows abundantly in Mexico.

"For several years," Mr. Bell said, "General Mills has been producing steroid intermediates at its plant in Kankakee, Ill., and this operation will continue. Protex products differ chemically from those we now make and are widely used by pharmaceutical producers of cortisone and related hormones. They will strengthen and broaden General Mills' position as a supplier to the pharmaceutical industry."

Protex, purchased for an undisclosed price, has recently completed facilities which give it the second largest capacity for steroid intermediates in Mexico. It gives General Mills a basic position in the field of pharmaceutical chemicals, most rapidly growing portion of the growing chemical industry.—V. 184, p. 1690.

General Motors Corp.—Buick Output Maintained—

Buick produced 535,504 cars during the calendar year 1956 for the third best year in its 54-year history, it was reported on Dec. 29 by Edward T. Ragsdale, General Manager of Buick and Vice-President of General Motors Corp.

"This was the third consecutive year that Buick produced and sold more than a half million cars," Mr. Ragsdale said. "It missed being our second best year of all time by only some 17,000 cars."

Mr. Ragsdale said he expected Buick would show a total of about 520,000 deliveries for the year 1956.—V. 184, p. 2625.

The work of the new laboratories will also extend into all areas of remote control by electronic and electro-mechanical means.

In addition, the new laboratories will undertake a comprehensive program of quality analysis and measurement for all units of the General Telephone System, and Mr. Power expressed the opinion that the results of such studies will be of increasing value to the entire independent telephone industry in this country.—V. 184, p. 2739.

(W. R.) Grace & Co.—Purchases Cuban Plant—

The company on Dec. 28 announced the purchase by a subsidiary of the properties and other physical assets of Industrias M. J. Diaz y Cia. of Havana, a leading Cuban converting plant, as part of the company's $46,000,000 expansion program in the paper industry in Latin America.

The Diaz firm has been in business in Cuba for about 30 years and produces a wide variety of paper containers and cellophane wrappers. Grace intends to continue the present line of products and may add others in the future.

A new corporation was formed under Cuban law, named Envases Industriales y Comerciales, S. A., to produce and operate the Diaz plant. It is a subsidiary of Grace Internacional, S. A., a corporation wholly owned by W. R. Grace & Co.

Possession of the plant was effected immediately.

Purchase of the Cuban converting plant marks the second step in Grace's paper expansion program in Latin America. The company is also planning the construction of a pulp and paper mill in Cuba using bagasse, the residue of ground sugar cane as the raw material. Part of the production of the pulp and paper mill would supply the converting plant and the remainder would be sold in the Cuban market.

Recently Grace purchased a bag and box plant and is completing arrangements to construct a pulp and paper mill in Puerto Rico which will use bagasse as the raw material.

Grace also has under active consideration pulp and paper operations in Colombia, Brazil, and Mexico.

The company pioneered in the production of pulp from bagasse and was the first to produce bagasse-made paper on a commercially successful basis. For the past 17 years it has been operating a bagasse pulp and paper mill at its 17,000-acre sugar estate in Paramonga, Peru, which supplies the Grace bag plant, also at Paramonga, and a box plant and a paper converting plant, both in Lima.

The Diaz plant produces corrugated containers, multi-wall and grocery bags, counter rolls, wrapping paper, waxed paper, and cellophane packing materials.—V. 184, p. 1794.

Greyhound Corp. — Enters U-Drive-It Field on a Nationwide Basis—

The Greyhound corporation, the country's largest inter city passenger carrier, enters the nationwide U-Drive-It passenger car rental service today (Jan. 7) it was announced by Richard J. Fencl, President of Greyhound Rent-A-Car, Inc.

Among the unique and distinctive features which Greyhound U-Drive-It will offer customers for its all-new 1957 cars is a standard nationwide rate of $8 a day and eight cents a mile, no return charges to the customers if they desire to return the car to a Greyhound U-Drive-It station other than the one from which they rented the vehicle. The company also will give immediate confirmation for all its rental cars including those which are to be picked up in cities other than the one from which the order is placed as well as credit card and charge privileges. Arrangements may also be made at any Greyhound Bus Terminal in the country to reserve a rental car from one of the company's new U-Drive-It stations.

In inaugurating a no return charge for rental cars left at Greyhound U-Drive-It stations other than the one from which the rental originated the company is bringing a new low cost convenience to the passenger car rental business. Under this feature of the company's operations it will be possible for a Greyhound car to be rented, for example, in Miami, Florida and driven to Chicago, Illinois and left there for the one-way rate of $8 a day and eight cents a mile. It is general practice in the industry to make a charge for returning rental cars to the originating stations.

The first Greyhound U-Drive-It stations to be opened today (Jan. 7) will be in New York City, Chicago, Detroit, Miami and Cleveland. The company also has plans for immediate expansion into all other major cities throughout the United States, Mr. Fencl said. He also pointed out that Greyhound will be the only U-Drive-It company which will wholly own its nationwide passenger car rental service and it will not specialize in a franchised auto renting operation.

New 1957 Chevrolets, Fords and Plymouths in both the two-door and the four-door hardtop models, all equipped with automatic transmission, radios and heaters, will be available at Greyhound U-Drive-It stations. Mr. Fencl emphasized that Greyhound U-Drive-It plans to offer the finest equipment available in each model and the widest possible selection of new cars for the public to choose from and, for those who may prefer to reserve them, special models such as Thunderbirds, Cadillacs and Lincoln Continentals also will be available.

Greyhound currently owns or has on order $6,000,000 in new 1957 automobiles and under its fleet leasing operation also now has 9,500 new cars under contract.—V. 184, p. 2836.

H & B American Machine Co., Inc.—Expansion—

A 17-acre site for a new $1,000,000 plant for this corporation's Midwest Division has been acquired at Indianapolis, Ind. The new plant will be constructed by Samuel Banowit, Chicago industrialist and President of the Josa Corp., Indianapolis.

H & B has entered into agreement with the Josa Corporation to construct the building and lease it to H & B American Machine Co., Inc. for a 20-year period.

The new building will contain 115,000 square feet as compared to the 60,000 square feet presently in use.

Victor Nemeroff, President of H & B American Machine Co., Inc., announced that the new building will enable H & B's Midwest Division to add the equipment necessary to handle accelerating schedules and meet increasing customer demand. Mr. Nemeroff also noted that sufficient land will remain for substantial future plant expansion.

H & B's Midwest Division is engaged in the production of complex contour machined aircraft parts and assemblies. Its customers include most of the major airframe manufacturers in the United States.

Mr. Banowit of Josa Corporation announced that ground breaking will take place within the next two weeks and completion of the building is scheduled for June 1957.—V. 184, p. 2625.

Hamilton Watch Co.—Unveils First Electric Watch—

A new era in timekeeping was ushered in on Jan. 3 with the introduction of the world's first electric wrist watch, perfected after 10 years of research, development and testing by this company.

No larger than a conventional wrist watch, the electric watch offers the highest accuracy and dependability ever achieved, and incorporates the first basic change in watch construction in almost five centuries, according to Arthur B. Sinkler, President.

Unveiled at a New York press luncheon, the watch will be available to consumers sometime this month. The first model, cased in 14 karat gold, retails for $175. A gold-filled model, at $89.50, will be available next month. (Both prices include Federal tax.)

The radical structure of the electric watch completely eliminates the mainstring. The new watch is the only one in existence which runs without winding or without periodic agitation, Mr. Sinkler added.

"The watch movement," he pointed out, "is so exquisitely engineered that a tiny Energizer the size of a small shirt button will run it for more than 12 months. In fact, Hamilton's electric watch would run for more than 20 years on energy that would operate a 100-watt bulb for no longer than one minute."

Mr. Sinkler called the electric watch a "milestone in Hamilton's program of research and expansion," and predicted it would in time completely replace present-day automatic watches.

The electric watch operates on chemical energy stored in a tiny Energizer according to Dr. John Van Horn, Hamilton's director of research and development. This energy is converted into electrical power as it releases a stream of electrons through a coil of fine wire fixed on a balance wheel. The electrical energy through interaction with permanent magnetic fields causes the balance wheel to oscillate. This oscillation is the mechanical energy which runs the watch.

Hamilton presently has more than 35 patents pending on this operation, he added.

Dr. Van Horn reported that Hamilton researchers and engineers worked closely with the National Carbon Co. to develop a power unit which would release its energy in the most frugal fashion possible to accommodate the "fraction of flea-power" needed by the delicate mechanism.—V. 184, p. 918.

Hawaiian Pineapple Co., Ltd. — Stock Offered — The company is offering for subscription to its common stockholders of record Dec. 28, 1956, the right to subscribe on or before Jan. 21, 1957, for 413,920 additional shares of common stock (par $7.50) at $10 per share on the basis of one new share for each four shares held. A group of investment bankers, headed by Dean Witter & Co. of San Francisco, Cal., has underwritten the offering.

The subscription agents are Hawaiian Trust Co., Ltd., 120 South King Street, Honolulu 2, Hawaii, and Wells Fargo Bank, Market at Montgomery Streets, San Francisco 20, Calif.

PROCEEDS—The net proceeds of sale of the common stock will be added to working capital. Initially such proceeds will be applied toward payment of short-term bank loans which aggregated $25,500,000 at Oct. 31, 1956 and are expected to aggregate approximately $25,000,000 at the time such net proceeds are received. For many years the company has been a substantial borrower from banks. The approximately $21,000,000 proceeds from bank loans incurred from May 31 to Oct. 31, 1956 have been used principally to finance packing and carrying in inventory of products of the company and its subsidiaries during the peak canning season. Bank loans usually reach a maximum during the Fall coincident with the seasonal inventory peak and are normally liquidated during the Spring as seasonal inventories are sold. As of Oct. 31, 1956, the company had established lines of credit at various banks aggregating $27,275,000 and it is expected that it will continue to finance peak inventory requirements in future years with bank borrowings.

PLANS PRIVATE FINANCING—The company may in the future obtain additional funds for working capital or other purposes by the issuance and sale of stock or by the creation of new funded indebtedness. The company is presently negotiating for an additional long-term loan in the principal amount of approximately $4,000,000 and has received a tentative commitment from one lender for $1,000,000 of this amount. The company hopes to consummate such additional borrowing within the next few months.

DIVIDENDS—The company has paid cash dividends on its common stock in each fiscal year since 1936. In each of the last three fiscal years and during the current fiscal year to date, the company has paid quarterly dividends of 20 cents per share on its common stock on or about the 25th days of August, November, February and May of each year to holders of record about the middle of each such month. It is the present intention of the company to pay quarterly dividends on the 2,069,600 shares of common stock to be outstanding.

International Business Machines Corp.—To Provide Computing Facility for Project Vanguard—

The Navy Department on Dec. 20 announced that this corporation will provide a high-speed electronic computing facility to calculate and predict the orbit of the scientific earth satellite to be launched during the International Geophysical Year (IGY) by Project Vanguard.

Scientists will try to place the satellite in an orbit from 200 to 300 miles above the earth sometime during the IGY, which begins July 1, 1957 and continues through Dec. 31, 1958.

The Vanguard IBM computing facility, located in Washington, D. C., will be directly connected by Teletype and telephone with the Project Vanguard Communications Center, also located in the nation's capital. A secondary computing facility, however, will be made available at some other location and maintained on a standby basis, the Navy said.

Following the launching of the satellite, the Computation Center will go into action on a "round-the-clock" basis calculating orbital information using data obtained from a number of radio tracking stations to be established in the Western Hemisphere, and from numerous other observation points located in various parts of the world.

Technical and methods know-how will be provided to customers by a field force of sales representatives and applied science specialists who have just completed a comprehensive training program.

Applications, both commercial and scientific, suitable for processing on giant brains will be handled by a scientific computing center in New York City equipped with an IBM 704 electronic data processing machine. Similar centers are planned for other locations to provide a nationwide network of high-speed data processing.

Kawneer Co.—New Type of Lock—

A radically new type of lock now makes narrow stile aluminum-and-glass doors much more secure than in the past, it was announced by this company on Dec. 26. For the first time this lock is available as a feature of a standard door.

The secret of the new lock, known as Maximum Security 1850, is a hardened steel bolt specially-poised in a hanging-down position.

Unlike the ordinary lock whose bolt vacates the lock chamber as it slides over, the MS 1850 holds just as much bolt within the lock chamber as is projected. Thus the opening is blocked with a solid bar of hardened steel—making it impossible to spring or force the lock without destroying the door itself.—V. 184, p. 1914.

Kentucky Power Co.—Bank Borrowings Authorized

This company, it was announced on Dec. 31, has received SEC authorization to make $2,000,000 of additional bank borrowings during 1957.

Proceeds, together with the proceeds of $2,100,000 of previously authorized borrowings, are to be used in connection with the company's construction program, estimated to involve expenditures of $2,945,000 in 1957.—V. 184, p. 2740.

La Consolidada, S. A.—Expands Activities—

Expansion of ingot capacity through the company's recently installed new blast furnace and additional installations at its Piedras Negras plant will result in an estimated tonnage gain of approximately 60% in 1957 and additional sales of more than $7,500,000, Robert Ayres, President, announced on Dec. 31. This marked stepping up of production results in part from the new modern furnace which is scheduled to provide a 30% tonnage increase, resulting from the installation of additional equipment scheduled for 1957.

At the same time, Mr. Ayres announced that the company's estimated net profit after taxes for the 11 months ended Nov. 30, 1956, totaled $1,851,517. This compares with $819,798 in the corresponding period of 1955.

New equipment at the company's Mexico City and Lecheria plants, recently installed, including machinery for the production of wire mesh, a new product in Mexico, are also important developments for La Consolidada, and orders are so far in advance of present production that additional equipment is now scheduled for installation.

Copper and aluminum wire is also being sold in sizable quantities to utilities, telephone companies, government agencies and industrial users generally. Present orders from utility companies for aluminum cable, steel reinforced, will necessitate capacity operations at least through March, Mr. Ayres said.—V. 184, p. 1914.

Leeds & Northrup Co., Philadelphia, Pa.—Contract—

A contract for the complete control system for a 1,000-KW nuclear reactor to operate in South America has been awarded to this company by the Babcock & Wilcox Co. The swimming pool-type reactor is being constructed by Babcock & Wilcox for Sao Paulo University, near Sao Paulo, Brazil. It will be used by the university for various nuclear research projects.

According to Leeds & Northrup, the system will be a complete "package" which controls all reactor functions at all power levels. It will be similar to the system the Philadelphia instrument company is supplying for the Livermore Pool Type Reactor, in California.

L&N has been chosen to supply instrumentation for numerous reactors, including the Penn State Reactor, the University of Michigan Reactor, the Boiling Water Reactor at Argonne National Laboratory, and others.—V. 184, p. 427.

BUSINESS—Company was organized in California in March of 1929. It has its executive offices and place of business at 3972 North Mission Road, Los Angeles 31, Calif.

The company owns all of the shares of capital stock of Ladco Building Co. and Ladco Laboratories, Inc. These two subsidiaries were organized on Dec. 19, 1945, in California.

The company, since its organization and continuously to the present has been and is engaged in the wholsale drug and sundry business.

The products that the company sells and distributes are purchased from as many as 2,200 suppliers. There is no concentration of purchases from any single supplier or small group of suppliers. Approximately 1½% of the merchandise sold by the company is purchased from Ladco Laboratories, Inc. During the year 1955 Ladco Laboratories, Inc. expanded its operations by the packaging of various types and kinds of vitamins. A considerable portion of these vitamins are packaged for retail druggists under the individual label of each druggist.

Ladco Building Co. has acquired by purchase 3½ acres of land located in Anaheim, Calif., at a cost of $27,500,000. Funds were advanced to the said subsidiary by the company as a short-term loan. It is planned to have a new building constructed on this property which will cover an area of approximately 50,000 square feet. It is expected that the proposed building will be ready for occupancy early in 1957 and that the construction cost will approximately $180,000. New England Mutual Life Insurance Co. have given verbal assurance that they will finance the construction of the new building through a building loan secured by a deed of trust thereon. Said financing will cover the entire cost of construction. The final commitment is subject to the completion and approval of plans for the building.

Midland Commercial Corp., New York — Registers With Securities and Exchange Commission—

This corporation on Dec. 28 filed a registration statement with the SEC covering $480,000 of 10-year 7% subordinated debentures (convertible), together with 187,500 shares of 10c par common stock. The debentures are to be offered for public sale at 100% of their principal amount. The offering is to be made on a "best efforts" basis by A. J. Grayson & Co., Inc., A. J. Grayson & Co. of New Jersey, Inc., and A. J. Grayson & Co. of Maryland, Inc., for which they will receive a selling commission of 10%. Each of these three firms is controlled by Albert J. Grayson, who also is a controlling stockholder of Midland.

Organized in April 1954, the company is engaged primarily in a general financing and loan business. Net proceeds of this financing are expected to be used primarily for additional working capital; and the company expects that it will thereby be able to purchase a larger volume of retail time sale obligations from its subsidiary, Northern Appliance Stores, Inc., as well as to finance the expansion of its subsidiary's business and to increase Midland's borrowing potential from banks.

With respect to the 187,500 common shares, all of which are outstanding, 52,500 shares are to be offered by Grayson for cash at 10c per share. The remaining 135,000 shares are to be offered by Grayson to stockholders of Ramie Corp. and South Canada Uranium Corp. in exchange for common shares of those corporations which were previously sold to the public. The rate of exchange is one share of Midland common for one share of Ramie common, and one share of Midland common for five shares of South Canada common. Mr. Grayson, holder of 187,500 shares (32.2%) of Midland common, received in consideration for services rendered, acted as underwriter for the 1954-55 stock offering by South Canada and was a member of a firm which acted as underwriter for the 1953 stock offering by Ramie. The exchange offer is being made by Mr. Grayson for the reason that some stockholders of Ramie and South Canada, in purchasing their shares, "may have based their judgment as to merits of the investment, to some extent, at least, upon the fact that Mr. Grayson participated in the underwriting. In view of the fact that they may have been disappointed in their judgment, because of subsequent events, he now desires to give such stockholders an opportunity to exchange their shares for stock of another corporation for which Mr. Grayson acted as underwriter, which they may regard as a more promising investment. It will also give such stockholders an opportunity to trade their stock for a security which is more readily marketable," according to the prospectus.

The offering of the 52,500 shares is to be made by Grayson "to a selected group of persons who, for the most part, are, or have been associated with him as sales representative. The offering is made at a price below the market because of the special relationship of the purchasers to the seller."—V. 182, p. 2251.

Mississippi Power & Light Co.—Borrows From Banks

This company, it was announced on Dec. 28, has received SEC authorization to make bank borrowings aggregating $9,000,000 during the 13-months period ending Jan. 31, 1958.

The proceeds will be used to defray a portion of the cost of the company's construction program, presently estimated to result in expenditures of $14,000,000 in 1957 and $20,000,000 in 1958, and for other corporate purposes. The company expects to refund the notes from the proceeds of the sale of additional bonds in 1958.—V. 183, p. 2671.

Mississippi Valley Portland Cement Co., Jackson, Miss.—Registers Stock Offering With SEC—

This company filed a registration statement with the SEC on Dec. 26, 1956 (not Dec. 27) covering 1,600,000 shares of its no par capital stock. Of this stock, according to the prospectus, 1,250,000 shares were first offered exclusively to residents of Mississippi on March 30, 1956, at $3 per share. As a result of that offering, which was withdrawn on Sept. 12, 1956, 464,261 of the 1,600,000 shares were outstanding and fully paid as of Sept. 30, 1956, and 244,250 more were then the subject of time payment subscription contracts, on which $347,244.97 had been paid and the unpaid balance was $385,535.03. An offer of rescission is now to be made with respect to those 708,511 shares. The remaining 891,489 shares, together with any shares as to which the rescission offer is accepted, will be offered to the public generally. The offering is to be made, at $3 per share, through the company's own agents.

The company was organized under Mississippi law on Feb. 17, 1956. It proposes to construct and operate a plant for the manufacture of Portland cement, oil well cements and other special cements on properties which it owns near Vicksburg, Miss. It is organized as a cooperative; its charter gives every stockholder a "patronage right" to purchase cement in proportion to the number of shares held, and to assign his patronage right if he does not wish to exercise it. Several of the company's directors plan to organize a separate corporation to act as a selling agency through which those stockholders who have no use for cement will be able, at a charge, to sell the cement to which they are entitled.

The incorporators of the company were David W. Adams, Kent B. Diehl, Sr., and Calvin C. Huffman, who purchased the first 1,500 shares at $2.40 per share. (Robert W. Hyde, Jr., of Jackson is President). The company then issued 500,000 shares to Vicksburg Properties, Inc., organized by the three incorporators, in exchange for all its assets, including the 1,140 acres of land which the company owns. In connection with that transaction, another 40,645 shares were issued in part payment of the land for engineering and legal services. Thus, a total of 1,006,406 shares are now outstanding, including the 464,261 shares issued under the March offering (and an additional 244,250 shares were the subject of time payment subscription contracts).

The March offering of 1,250,000 shares, which was limited to residents of Mississippi in reliance on the so-called intrastate exemption from registration under the Securities Act, was initially made through George Sims & Associates as best-efforts underwriter at a commission of 66 cents per share. However, a salesman who was a sub-agent of Sims, in violation of the terms of the offering, made a number of sales to residents of Louisiana who had used Mississippi "dummies" to sign their subscription contracts. The company immediately terminated its relationship with Sims and refunded the monies paid in by the Louisiana purchasers; and upon being advised by the SEC that the exemption from registration was not available, it immediately discontinued the offering. Assuming the sale of the 1,600,000 shares, at $3 per share, the public will have contributed 96.65% of actual cash paid in for a 76.22% interest in the company. Proceeds of the financing will be applied to completion of the plant, provide for general creditors, and have the company begin operations.—V. 184, p. 2838.

*Under the Chase Credit Agreement the company was indebted at Oct. 31, 1956, in the principal amount of $2,300,000. This indebtedness is evidenced by two installment notes dated Oct. 4, 1956 and Oct. 31, 1956, respectively, and secured by chattel mortgages covering all of the company's flight equipment. Under the Chase Credit Agreement and subject to the conditions contained therein, the company has the right to borrow up to and not exceeding $2,800,000. A loan of $2,200,000 was made thereunder, subject to the company's having received at least $1,200,000, less reasonable commissions and expenses, in proceeds from the sale of additional subordinated debt. To the extent of $1,515,000 the loan represented an extension and modification of existing indebtdeness to the bank. A further loan in the amount of $100,000 was made thereunder on Oct. 31, 1956. Additional borrowings by the company under the agreement, not to exceed $500,000 (in multiples of $50,000), are subject to the company's having received net proceeds from the sale of additional subordinated debt in an amount at least equal to the amount of the new borrowings and to the delivery to the bank of a supplemental chattel mortgage covering additional Convair-240 aircraft and related equipment, if any, acquired by the company under the Swissair Agreement and not theretofore specifically mortgaged to the bank.

†This promissory note, dated Nov. 18, 1955 and due Jan. 7, 1957, is renewable to June 30, 1957. The note is secured by a chattel mortgage dated Nov. 18, 1955, covering flight equipment of the company, junior in lien to a prior chattel mortgage dated March 18, 1955 and supplements thereto held by The Chase Manhattan Bank, as described in above. The note is subordinate and subject in right of payment to the prior payment in full of indebtedness and liabilities of the company to the Chase Manhattan Bank not exceeding $2,800,000 at any one time outstanding, whether now existing or hereafter incurred. Principal payments on the note, however, will be permitted in an aggregate amount equal to the amount that retroactive mail payments hereafter received from the U. S. Government in respect of the period subsequent to July 1, 1955, exceed $298,000, provided, however, that all amounts used in making such computations shall be net amounts determined after setting up a proper reserve for or making payment on account of the company's income taxes allocable thereto.

‡Of which 470,588 shares are reserved for issuance upon conversion of the debentures at the initial conversion price thereof, and 23,529 shares are reserved for issuance upon conversion of the convertible subordinated serial notes.

UNDERWRITERS—The underwriters named below have agreed to purchase $694,000 principal amount of unissued debentures from the company and such of the $1,206,000 principal amount of debentures heretofore sold by the company to residents of the State of New York as may be acquired by the company by reason of the offer to rescind described below. The commitments of the several underwriters are set forth in the following table:

	New Issue	% of Debs. Acquired Through Rescission

Dempsey-Tegeler & Co.	269,000	33.7
Mohawk Valley Investing Co., Inc.	150,000	21.7

The commitment of the underwriters is to purchase all of the debentures listed in the column entitled "New Issue" if any is purchased.

The commitment of the underwriters with respect to the debentures which may be acquired through rescission of prior sales made by the company is to purchase such debentures from time to time as they may, pursuant to the terms of the underwriting agreement, be delivered by the company to the underwriters. The obligations of the several underwriters with respect to this commitment are subject to their having purchased the $694,000 principal amount of debentures not previously sold and each purchase by the underwriters of debentures acquired by reason of the offer to rescind is further conditioned on there having been no substantial adverse change in the condition of the company, financial or otherwise, except as may have occurred in the ordinary course of business, from the date of purchase of the $694,000 of debentures to the date of such purchase of debentures acquired on rescission.

Of the $1,206,000 of debentures previously sold in the intrastate offering, $700,000 were sold directly by the company to a small number of stockholders, directors, officers and other interested persons without the payment of any discounts or commissions and $506,000 were placed through Gregory & Sons and Mohawk Valley Investing Co., Inc.

The company proposes to offer to repurchase from the holders thereof the $1,206,000 of debentures and to return the purchase price with interest from the date of purchase. Each such offer will be accompanied by a copy of this prospectus and the holder will be requested to elect within 30 days to affirm or cancel his purchase.—V. 184, p. 1915.

Nic-L-Silver Battery Co., Santa Ana, Calif.—Registers Stock Offerings With SEC—

This company on Dec. 27 filed a registration statement with the SEC covering 75,000 shares of 5% cumulative participating preferred stock ($10 par) and 7,500 shares of common stock, $10 par. The company proposes to offer these shares for public sale at their respective par values ($10 per share each). No underwriting is involved.

Organized under California law on Feb. 11, 1954, the company is engaged in the wholesale distribution of batteries, parts and accessories thereof, under the trade mark of "NIC-L-SILVER" Batteries. It maintains no retail outlets.

It is proposed that proceeds of the sale of the 7,500 common shares will be applied to replace certain rolling stock that has become uneconomical to operate. The proceeds of the sale of the 75,000 preferred shares will be added to the general funds of the company, to be applied as follows: liquidation of a note in the amount of $178,635 held by Bank of America; increase in inventories; and additional working capital.

The company now has outstanding 10,000 common shares, held by President C. George Lippincott (Sr.) (51%); Richard L. Lippincott, Vice-President (43%); and Percy F. Baines, Secretary-Treasurer (1%).

Northern Pacific Ry.—Has Record Peacetime Earns.—

Robert S. Macfarlane, President, on Dec. 28 announced the railway's 1956 net income will approximate $20,800,000, equal to $4.19 per share of stock—the company's highest earnings since the war year 1943, and the best peacetime earnings since 1929.

In a year-end statement, Mr. Macfarlane also said that operating revenues for the year, estimated at $187,651,000, set an all-time high, exceeding 1955, previous record year, by $4,617,670 and that NP is looking forward to another prosperous year in 1957.

"While these figures are favorable in comparison with those of recent years," Mr. Macfarlaine said, "the fact remains that the return on our investment in railroad property continues to be unreasonably low—only 2.41%—and it is hoped the Interstate Commerce Commission will correct this situation in the current proceedings.

"Although we face difficult problems created by a rapidly rising wage level and increasing cost of everything we buy, which have been only partially offset by freight rate increases, we believe our 1957 traffic volume should approximate that of 1956—and on that basis, with improved facilities, increased efficiency in operation, and substantially increased non-operating income, we should make a favorable earnings record.

"In the meantime we are proceeding on a new equipment and improvement program which calls for an expenditure of more than $30,000,000 in 1957. In addition we are completing a 500-box car building program, delayed in 1956 by the steel strike."

The year's program, Mr. Macfarlaine said, includes: purchase of 80 additional diesel locomotive units, costing nearly $14,000,000; construction at company shops or purchase from manufacturers of 1,100 freight cars; relaying 87 miles of main line track, including 50 miles of continuous welded rail; and purchase of passenger equipment costing in excess of $3,000,000.—V. 184, p. 2785.

K. S. Adams, Chairman, and Paul Endacott, President, on Jan. 3 announced that Phillips has entered into a contract with Westcoast Transmission Co., Ltd., for sale of up to 125 million cubic feet of natural gas per day from the Savanna Creek area in the foothills of southwestern Alberta for ultimate delivery to the United States at the Idaho border through a new pipeline.

"This transaction," officials stated, "will bring the highest prices of any Canadian gas sales we know of and will furnish an outlet for gas discovered on the 78,000-acre block which Phillips and others are developing at Savanna Creek." According to contract terms, Phillips will receive prices at the wellhead escalating progressively from 10¼ cents to 19 cents per thousand cubic feet of pipeline gas, plus one cent more per thousand starting at the time the new line attains a sales volume of 250,000,000 cubic feet per day. Westcoast will gather the gas at the wells and will treat and otherwise condition the gas for pipeline delivery.

Westcoast has contracts with Pacific Northwest Pipeline Corp. calling for the expansion of its pipeline presently under construction in British Columbia and the construction of a new pipeline from the Savanna Creek area to the U. S. border at the northeast corner of Idaho, near Kingsgate, British Columbia. Pacific Northwest Pipeline Corp. will extend its present system from Spokane to the international border at Kingsgate to take delivery from this new pipeline which will be a source of supply for the towns of Cranbrook, Fernie, Kimberly, Blairmore and Coleman, as well as serving other demands in southwestern Canada. In addition, the new project is designed to supplement the gas supplies Pacific Northwest will receive from Westcoast's 30-inch gas pipeline system from the Peace River area of British Columbia to Vancouver and to Sumas, Wash. From its Peace River area reserves, Phillips has contracted to supply up to 187.5 million cubic feet of gas per day to this system which will start operations in 1957.—V. 184, p. 2786.

Under the merger proposal, Republic's outstanding 96,746 common shares are to be converted into a like number of shares of Iroquois common; and Republic's common is to be cancelled. Iroquois will then acquire Republic's assets and assume its liabilities; and National will acquire the additional 96,746 shares of Iroquois common.—V. 178, p. 151.

The stockholders on Dec. 20 approved an increase in the authorized capitalization from 30,000 shares of $50 par preferred stock to 100,000 shares; and from 2,000,000 shares of $1 par class B common stock (non-voting) to 4,000,000 shares. No change was made in the class A (voting) common. The shareholders also overwhelmingly approved an increase in the authorized indebtedness of the company from $6,000,000 to $20,000,000.

R. A. Ritter, President, stated that the company had no immediate plans for any additional financing at this time but that the increase was desired in order to enable the company to be in a position to take advantage of such financing opportunities as would be required in the continued growth and expansion of the company's operations. He further stated that 1956 has been the best year in the company's history, both from the standpoint of earnings and growth. He pointed out that in the year 1956 the branch offices of the company and its subsidiaries increased from 22 to 31.—V. 184, p. 222.

Rohr Aircraft Corp.—Registers Debs. With SEC—

This corporation on Dec. 27 filed a registration statement with the SEC covering $7,500,000 of convertible subordinated debentures due 1977, to be offered for public sale through an underwriting group headed by The First Boston Corp. and Lester, Ryons & Co. The interest rate, public offering price and underwriting terms are to be supplied by amendment.

The company's business consists of the manufacture, assembly and sale of component parts of aircraft to airframe manufacturers, including the engine installation, known as the "power package," for multi-engine aircraft.

Net proceeds of this financing will be added to its general funds and will initially be applied in part to reduce short-term bank loans. The additional funds available to the company are desirable principally to finance the increased working capital requirements of a greater volume of both military and non-military business, and to a lesser degree to modernize, consolidate and expand its plant and equipment from time to time as required.—V. 184, p. 2839.

Complete and exact details for the week covered by the foregoing will appear in our issue of next week. We cannot furnish them today, inasmuch as the week ends Saturday, and the Saturday figures are not available at time of going to press. Accordingly, in the above the last day of the week in all cases has to be estimated.

In the elaborate detailed statement, however, which we present further below, we are able to give final and complete results of the previous week—the week ended Dec. 29. For that week there was an increase of 0.2%, the aggregate clearings for the whole country having amounted to $20,176,530,042 against $20,138,158,969 in the same week in 1955. Schick, Inc.—Listed on Big Board—

Effective at the opening of business on Jan. 3, 1957, the 1,200,000 outstanding shares of $1 par value common stock of this corporation were admitted to trading on the New York Stock Exchange.

The corporation is a leader in the electric shaver industry. Sales for the first nine months of 1956 were $18,987,560 as compared with $15,135,152 a year earlier. The management looks for another record year in sales and profits when complete figures are audited for 1956. —V. 184, p. 1956.

Scovill Manufacturing Co. — Securities Offered — An issue of $10,000,000 25-year 4¾% debentures was offered for public sale on Jan. 4 by an underwriting group headed by Morgan Stanley & Co., and concurrently the company is issuing to holders of its common stock of record Jan. 3 rights to subscribe for 176,450 shares of additional $25 par value common stock at $28½ per share for the 176,450 new shares at the rate of one share for each eight shares held on the record date. The subscription offer expires at 3:30 p.m. (EST) on Jan. 21, 1957. The Morgan Stanley group is also underwriting the common stock subscription offering. The debentures, due Jan. 1, 1982, are priced at 98½% and accrued interest to yield approximately 4.85% to maturity.

The debentures can not be redeemed prior to Jan. 1, 1967 as part of a refunding by the application of borrowed moneys having a lower interest cost. The debentures are redeemable at the option of the company at 104½% to and including Jan. 1, 1962, at 103¾% to and including Jan. 1, 1967 and thereafter at prices decreasing to the principal amount after Jan. 1, 1979. A sinking fund beginning April 1, 1960, is calculated to retire the entire issue by maturity. The sinking fund redemption price is 100%.

PROCEEDS—The net proceeds of the combined offerings will be added to Scovill's general funds. The company's capital improvement program calls for expenditures of about $25,000,000 during the next two years, including a major project involving an estimated $8,000,000 for a new tube mill to be built in New Milford, Conn., which will substantially expand the company's line of tube products.

BUSINESS—The company is one of the five largest brass producers in the United States. It produces a wide variety of mill products such as sheet, strip, rod, extruded shapes, wire and tube. In 1955 these products accounted for 35% of sales. It has pioneered in the continuous casting of flat bars and cylindrical billets. The company is the principal supplier in the world of certain pneumatic devices, chiefly tire valves, and tire pressure gauges. It is the principal supplier in this country of certain types of straight pins, safety pins tack-fastened buttons and laundry-proof snap fasteners, and also produces a complete line of fasteners for the apparel trades. The company manufactures among other products, special parts of brass and other metals on a contract basis, plumbing fittings, hose fittings and a line of household electric appliances.

EARNINGS—During the 10-year period ended in 1955, Scovill's net sales and other income increased from $63,146,000 to $147,406,000 and net earnings increased from $3,311,000 to $5,508,000.

For the 10 months ended Nov. 4, 1956 net sales and other income were $127,006,000 compared to $118,346,000 for the same period in 1955. Net earnings in 1956, before special items, were $4,071,000, and were $4,538,000 in the 1955 period.

Earnings per common share after preferred dividends (based on the average number of shares outstanding during each period) were $3.86 for the year 1955, $3.22 for the first 10 months of 1955 and $2.73 before special items for the first 10 months of 1956.

CAPITALIZATION—Giving effect to the sale of the additional common stock and debentures the company will have outstanding $14,400,000 of long-term debt, 1,588,054 shares of common stock of $25 par value and 77,585 shares of preferred stock of $100 par value.

UNDERWRITERS—Associated with the Morgan Stanley & Co. underwriting groups are: Clark, Dodge & Co.; Dominick & Dominick; Drexel & Co.; Harriman Ripley & Co., Inc.; Hornblower & Weeks; Kidder, Peabody & Co.; Paine, Webber, Jackson & Curtis; Chas. Siegler Corp.—Division Favored by Court—

The Holly Manufacturing Co., a division of The Siegler Corp., announced on Dec. 28 that The Coleman Co. has lost any chance of further appeal from the Federal Court judgment holding The Coleman Co. to be an intentional and deliberate infringer of Holly's NarroWall wall heater patent.

J. S. Johnson, President of Holly Manufacturing Co., made the announcement when he received word that the Supreme Court refused to review the judgment of the Court of Appeals for the 9th Circuit. The action of the Supreme Court confirms the previous 9th Circuit Court ruling that Coleman infringed the Holly NarroWall patent No. 2,602,441.

The Court of Appeals' opinion which the Supreme Court refused to review points out "that the Holly patent . . . is valid and that all of Coleman's wall heater models Nos. 64, 67, 68 and 69 infringe" and "that such infringement is and has been intentional, conscious and deliberate. . . ."

The case originated in the Federal District Court in Los Angeles, Calif., on Holly's complaint for patent infringement against The Coleman Co. After trial, the District Court found Holly's patent to be valid and infringed, ordered an accounting to determine Holly's damages, and issued an injunction enjoining The Coleman Co. from manufacturing and selling the four infringing models. The Coleman Co. appealed, posted bond, and, pending appeal, was allowed to continue to manufacture and sell the infringing heaters.

Mr. Johnson explained that the effect of the refusal of the Supreme Court to review the case further, would be to reinstate the Federal Court injunction against the manufacture and sale of Coleman's infringing wall heater models Nos. 64, 67, 68 and 69.—V. 184, p. 1062.

Socony Mobil Oil Co., Inc.—Plans Stock Rights Offer —Sale of Debentures Put Off—

The company plans to file a registration statement on Jan. 10 with the SEC for an offering of stock to present stockholders in the ratio of one new share for each 10 shares held, it was announced on Jan. 3.

The latest report shows the company has outstanding 43,727,585 shares of capital stock, so the offering will amount to at least 4,372,758 shares.

The company said the directors were of the opinion that the issuance of that amount of stock would provide sufficient funds from outside sources to meet the company's near term capital requirements and consequently no debentures will be issued as a part of the financing.

In November, the company had announced that it planned to offer stockholders rights to subscribe to additional stock and possibly would sell up to $100,000,000 debentures.—V. 184, p. 2330.

Sterling Investment Fund, Inc., Charlotte, N. C.—Registers With Securities and Exchange Commission—

Sunset Country Club, Snappington, Mo. — Registers With Securities and Exchange Commission—

This club filed a registration statement with the SEC on Dec. 26, 1956, covering $643,800 of 1% first mortgage bonds, due Dec. 1, 1986. The bonds are to be offered at their face principal amount of $1,850. No underwriting is involved. They are to be offered for sale to stockholders of the club.

The proceeds are to be used as follows: retirement of a $55,000 mortgage bond; demolition or removal of the existing main clubhouse and ladies' locker room at the club; and erection, equipping and furnishing of a new clubhouse and ladies' locker room, all as authorized by the club's stockholders at a special meeting held June 29, 1955.

Textron, Inc.—Earnings Disappointing—

Royal Little, Chairman of the Board, on Jan. 1 said in part:

"Sales for the year ended Dec. 29, 1956 will amount to approximately $240,000,000. Earnings are not yet available for the full year but profits for the first 11 months amounted to approximately $5,937,000.

"Although these earnings are disappointing there must be borne in mind the problems with which we have been involved since the merger on Feb. 24, 1955 of American Woolen Co. and Robbins Mills, Inc. into Textron. In 1954, the year prior to merger, the combined losses of those two companies aggregated over $26,000,000, including a $7,000,000 provision for loss on disposal of certain mill properties. In order to put an end to such large losses and convert the merged textile operations to a profitable basis, it has been necessary for us in the period since merger to dispose of 36 textile plants and five textile converting divisions and to start up a large new woolen mill at Barnwell, S. C.

"While the losses on the sale of American Woolen and Robbins Mills fixed assets involved in this program have been written off against reserves established as at the merger date, we have had to charge against operating profits during this period over $13,000,000 arising from losses incurred in the operation of plants and divisions now disposed of and from run-out costs, and also arising from the starting-up expenses in the new woolen mill and other non-recurring charges. In other words, during the 21 months ended Nov. 30, 1956 the company has earned an aggregate of $10,024,000 after these heavy expenses. Except for starting-up expenses which will continue during 1957 at the Barnwell planta, we foresee no further losses of the kind caused by the drastic changes made during the past two years."

For comparable periods, 11 months sales were $166,420,000 in 1953 against $217,816,000 for 1956. During this period in 1955 on 2,895,000 shares outstanding at Dec. 3, 1955 the profits were $4,484,000 or $1.20 per share. The same period in 1956 with 3,529,000 shares outstanding at Dec. 1, 1956 reflected profits of $5,937,000 or $1.44 per share, showing an increase of approximately 30% in dollar earnings. —V. 184, p. 2330.

The company commenced operations on Jan. 1, 1956, purchased its first contract Feb. 15, 1956, and at the end of its fiscal year, June 30, 1956, had a total of $207,323 in loans outstanding, with total admitted assets of $210,797. This gave it a ratio of $2.28 in assets to each $1 of current liabilities. The company shows an earned surplus of $791.

During the month of July the corporation increased its total assets to $254,134 had a net profit before taxes of $1,097, and increased its ratio to $2.70 in assets for each $1 in current liabilities.

Reason for the expansion, according to F. W. Poulton, plant Manager, is the rapid growth of the flashlight battery business.

Plans for the expansion are being drawn and construction, scheduled to begin early next year, is expected to be completed late in 1957.

United Fruit Co.—To Develop Guatemalan Lands—

Early in November the Government of Guatemala and this company signed a contract by which United Fruit will rehabilitate 5,000 acres of undeveloped land on the east coast and at the same time turn back to the government 111,000 acres of land granted under previous contracts. Also under terms of the agreement, the company will pay up to 30% of profits earned in the country to the government and invest a minimum of $5,000,000 in developing the east coast land along the Motagua River. The 111,000 acres to be turned over to Guatemala for its rural development program is in addition to 100,000 acres on the west coast ceded to Guatemala in 1954. (Guatemala is one of four Middle American Republics which has a 30% participation contract with the company.)

Payments to Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, Guatemala, Honduras, Jamacia, and Panama amount to about $130,000,000 per year. Of this amount governments receive approximately $22,500,000; payrolls average $75,000,000, and another $33,000,000 goes for the purchase of local commodities and materials, for rentals, fuel purchase, and the like. Included in this $33,000,000 is some $10,000,000 for the purchase of bananas from citizen farmers. In a partnership atmosphere, governments cooperate with the company helping overcome local obstacles and to reduce hazards of banana agriculture.—V. 182, p. 722.

United States Rubber Co.—New Product—

An outsized collapsible rubber cylinder inflated with liquid such as water, oil or gasoline instead of air, may provide the Army Transportation Corps with the first major improvement in transportation of bulk fluids since the development of the steel drum, it was announced on Dec. 31.

Component parts of the transporter are a series of collapsible fabric reinforced cylinders called Sealdbins which were developed and are now being produced by this company. Each rubber cylinder, which has a capacity of 500 gallons of fuel, is centered on axles, in turn, connected to a towing yoke. Several of the cylinders are towed tandem fashion behind Army equipment with no loss of cargo space in the truck body and there is no requirement for heavy equipment to lift them aboard.

Begins Deliveries of Air Springs—New Tire—

The company has begun delivery of the first air springs to be used on an American passenger car—the 1957 Cadillac Eldorado Brougham, it was announced on Dec. 27.

The new springs will be put on the Brougham in place of metal coil and leaf springs which have been standard in the automotive industry for many years. They are being shipped to meet production schedules for the luxury car which is slated to come out after February 1, next year. A Brougham was exhibited at the New York auto show early in December.

Air springs are being made at the tire division's Indianapolis plant.

The company also announced first deliveries of a new tire engineered especially for the Brougham. Although it is a 15-inch tire, the U. S. Royal 140, as it is called, lowers the height of the car more than a comparable present day 14-inch tire would. It has been built to take the maximum speed of the car under continuous operation.—V. 184, p. 2675.

West Penn Electric Co.—Plans Financing—

Earle S. Thompson, President, on Dec. 27, said in part:

"Keeping pace with the demands of our customers, the company added about $30,000,000 of new facilities during the year 1956. This amount would have been larger but for the delay in obtaining certain equipment, the cost of which being carried over into 1957 will produce a new record high amount for this important measure of growth. Our present estimate of gross property addition expenditures for 1957 is $57,000,000.

"Nearly half of the 1957 construction program is related to the addition of three new generating units, two of which, totalling 240,000 kilowatts, are to be ready for operation in 1958, and the third, of 165,000 kilowatts, in 1959. At that point total system capability will be approximately 2,155,000 kilowatts. Two of the units are being installed by West Penn Power Co. at its new Armstrong Station; the third unit is being added at the R. Paul Smith Station of The Potomac Edison Co.

"This growth will require some public financing. The West Penn Electric Co. itself plans to issue during the first quarter of 1957 additional common stock for subscription by stockholders, probably in the ratio of one new share for each 16 outstanding shares. Also, in 1957 two subsidiaries, The Potomac Edison Co. and West Penn Power Co., will undertake the public sale of additional senior securities. As now scheduled, the total amount to be raised by these separate operations should provide for the system's construction needs throughout 1957 and 1958.

"The proposed issuance of West Penn Electric common stock will represent the first such offering since 1953. Our forecasts indicate that even allowing for the new shares to be issued, earnings per share for the year 1957 will increase over those for 1956. The latest available earnings are for the 12 months ended Oct. 31, 1956, and amount to $2.13 per share. For the whole year 1956, a moderate gain in this figure may be expected.—V. 182, p. 1614.
