Estimated Federal taxes on income	2,110,000	*1,160,000

Frank H. Bishop, President, pointed out that 1956 sales increased almost 40% over 1955, and that net income for 1956 increased approximately 60% over 1955.

Mr. Bishop attributed a major portion of these improvements to the fact that Allied increased its large die, tool, prototype and short-run stampings facilities coincidentally with the largest usage of these services ever recorded by the automotive and appliance industries in any one year.

It was predicted by Mr. Bishop that Allied's business will continue at a high level of activity in 1957, barring an unusual change in the existing state of economic conditions during the year.—V. 184, p. 721.

American Can Co.—Sun Tube Foundry Processes Record Amount of Aluminum—

A record amount of aluminum—six million pounds—was processed last year in the foundry of the Washington, N. J., plant of Sun Tube Corp. of Hillside and Washington, N. J., a subsidiary, it was revealed by Kenneth M. Leghorn, President of Sun Tube, on Feb. 18.

Last year's processing represented the highest in the four-year history of the foundry. Sun Tube, which manufactures collapsible metal tubes, aerosols and impact extrusions, is one of the few companies in its field to operate its own foundry.

Mr. Leghorn predicted that as a result of ever improving extrusion techniques, increasing amounts of ferrous metals will be fabricated by this method in the immediate years ahead. At present, non-ferrous metals, particularly aluminum, are the staple metals of the impact extrusion industry.—V. 185, p. 714.

American Enka Corp.—Opens New Tennessee Plant—

The new multi-million dollar rayon staple fiber plant of this Corporation began operation at Lowland, Tenn., on Feb. 18 when the first commercial production line was spun-in.

Capacity of the new plant will be more than 50,000,000 pounds of staple fiber annually. Experimental spinning has been in process since the latter part of December. Commercial production will be increased by stages until summer, when the plant is scheduled for full operation.

J. E. Bassill, president of the company, said that American Enka's entry into the rayon staple field opens an important new source of domestic supply for the fiber, and has broadened the company's base for increased service to the textile industry. The fiber will be produced for apparel, home furnishings, carpets, industrial fabrics, and other end uses.—V. 184, p. 1789.

American Export Lines, Inc.—Changes in Personnel—

The election of Frazer A. Bailey as Managing Director and John F. Gehan as President was announced on February 20.

Mr. Bailey was formerly President of Matson Navigation Co. and The Oceanic Steamship Co. and for six years head of the National Federation of America Shipping, and Mr. Gehan has been associated with Export in various executive capacities for the last 32 years.

Mr. Gehan succeeds John E. Slater, President of the company since 1949. Mr. Slater retired Dec. 31, 1956, upon reaching retirement age. —V. 181, p. 1305.

American Machine & Foundry Co.—Reactor Contract

Union Carbide & Carbon Corp., has awarded a contract to AMF Atomics Inc., a subsidiary of American Machine & Foundry Co., to design and build a nuclear research reactor as the "heart" of a nuclear research center to be constructed in Sterling Forest, N. Y.

In addition to the five megawatt pool-type reactor, the center will include a radioactive materials laboratory, an ores and engineering laboratory, and a building for allied research operations and administrative functions. Located approximately 40 miles from New York City, the center will serve as the focal point for nuclear research activity within Union Carbide.

Awarding of the Union Carbide & Carbon Corp. contract brings to 10 the number of reactors AMF Atomics Inc., the world's largest producer of nuclear research reactors, has been retained to design and build. One research reactor, built for the Battelle Memorial Institute in Columbus, Ohio, went critical on Oct. 29, 1956.

Five research reactors are to be built outside of the United States. One is for McMaster University, Hamilton, Ontario, and the others are for installation in Greece, Germany, the Netherlands, and Japan.

In addition to Union Carbide & Carbon Corp., AMF Atomics Inc. will design and build research reactors in this country for Industrial Reactor Laboratories, Inc., in Plainsboro, New Jersey, and the University of Buffalo.

In the nuclear power field, AMF's proposal to design and build a closed cycle boiling water reactor for the Rural Cooperative Power Association, Elk River, Minn., has been accepted by the Atomic Energy Commission and final contract negotiations are proceeding. Another major activity in this field is the investigation of the adaptation of the closed cycle boiling water reactor to commercial ship propulsion under contract with the U. S. Martime Commission.

Kelvinator and Leonard sales of major household appliances set an all-time January record during the past month, according to Homer L. Travis, Vice-President in charge of Kelvinator sales.

Billings to dealers were 12% above the same month a year ago, the best January, Mr. Travis said.

Automatic washers, clothes dryers and room air conditioners all recorded new January highs. Automatic washers gained 14% over 1956 and dryers 6%. Room air conditioner billings were more than double Kelvinator's best previous January.

Although they did not set all-time records, Mr. Travis said, freezer and refrigerator sales showed important gains over the comparable 1956 period, with freezers up 35% and refrigerators up 11%.—V. 184, p. 2730.

The offering is to made by Peoples Securities Co. on a best efforts basis, for which the underwriter will receive a selling commission of 40c per share.

The company was organized under Delaware law on June 11, 1956, and has not yet commenced business. It plans to operate primarily through controlled subsidiaries to be acquired or organized by it. American Telephone & Telegraph Co.—Earnings Up in 1956—Construction Expenditures of Bell System Totaled Over $2.2 Billion—Earnings of the Bell System in 1956 were equal to $13.16 per share of this company's stock compared with $13.10 in 1955, Frederick R. Kappel, President, said on Feb. 19. The 1956 earnings were on 57,423,000 average shares outstanding, an increase of 6,717,000 from the average number of shares in the previous year. Bell System earnings on total capital were 6.8%, the same as in 1955.

The company's annual report was mailed to about 1,500,000 share owners, nearly 2½ times as many as those in any other company. It summed up a year of record financing and construction by the Bell companies.

The Bell System spent more than $2.2 billion for construction last year and will need to spend more in 1957, Mr. Kappel reported.

"In these times of unprecedented growth, with the need to obtain billions of dollars of new capital from investors," Mr. Kappel said, "earnings above the present levels are required."

Increases in telephone rates are needed in many areas, he said.

"Right now, in common with all other business, we are experiencing higher costs of operation, including higher wage costs. We cannot escape this, for we must have able people and pay to get them.

"We have continuously better equipment and operating methods. But the costs that arise from inflation are much greater than these savings."

The report further pointed out that the Bell System last year added 3,227,000 telephones—almost as many as the record gain in 1946. By the end of the year, the number of Bell telephones in service was nearly 49,500,000.

Share owners last year, Mr. Kappel noted, received valuable rights which entitled them to subscribe for one new share at par, $100 a share, for each 10 shares held. Some 5,715,000 shares, 99.8% of those offered, were purchased. More than half the share owners used their rights to buy stock and bought more than two-thirds of the issue.

"The average market value of the rights was $6.93," Mr. Kappel said. "This is the eighth time since 1946 that our share owners have had rights to subscribe to new securities. The market value of such rights for each share has totaled about $22."

In 1956, the Bell System added 41,000 employees, for a total of 587,000.—V. 185, p. 606.

Anaconda Co.—Stock Offering—Mention was made in our issue of Feb. 18 of the offering by this company to its stockholders of record Feb. 14 of 1,734,865 additional shares of capital stock at par ($50 per share) on the basis of one new share for each five shares held. Rights will expire at 3 p.m. (EST) on March 5, 1957. The offering is underwritten by a banking syndicate headed by Hallgarten & Co. Further details follow:

The City Bank Farmers Trust Co., New York, is subscription agent.

Capital Flotations in the United States in March And for the Three Months of Calendar Year 1956

Aggregate corporate offerings placed in the domestic market in March of 1956 reached the figure of $769,644,757. This total was greater than February's over-all volume by $208,390,755. Compared with the total of $1,228,659,237 for March of 1955, the volume for March, 1956, fell far short by $459,014,480. It should be pointed out, however, that the heavy March, 1955, volume resulted from a number of large offerings floated during that month, particularly, the common stock offering of General Motors Corp. in the amount of $328,551,225. This issue alone constituted an all-time record for equity financing.

New capital dollar volume for March, 1956, amounted to $749,432,217, or 97.37%, contrasted with $20,212,540, or 2.63%, for refunding issues.

Long-term bond and note financing in March, last, stood at $624,533,300, or 81.15%. Of this amount $606,461,900 or 78.80% constituted new capital and $18,071,400, or 2.35%, refunding operations.

No short-term bond and note financing came to light during the month under review.

Stock offerings during March, last, aggregated $145,111,457, or 18.85% of the gross dollar volume for the month. The foregoing total contrasted with the much larger sum of $205,350,002 placed in February and $530,284,237 or 43.16% of the grand total for March of 1955.

The total for March, 1955, as pointed out above, included the single offering of General Motors Corp. in the amount of $328,551,225.

New stock offerings in the current month totaled $142,970,317, or 18.57%, while refunding issues amounted to $2,141,140, or 0.28% of the over-all total.

Common stock issues during March, 1956 totaled 73 in number and accounted for a total dollar volume of $107,008,457, or 13.90%, while preferred placements were confined to only 19 issues, and totaled $38,103,000, or 4.95% of the months gross dollar volume. For the month of February, common stock issues constituted 61 in number and amounted to $85,224,574, or 15.18% of the month's dollar volume, while preferred stocks comprised 18 issues, but aggregated $120,125,428, or 21.40% of that month's aggregate dollar volume. A check of the figures for March, 1955, shows that 73 common stock issues totaled $494,349,327, or 40.23% of that month's over-all dollar volume, while preferred offerings stood at 16 and amounted to $35,935,000, or 2.93%.

Reviewing the various categories given here each month we find that the public utility issues for March once again assumed the leadership insofar as dollar volume was concerned by totaling $260,260,483, or 33.82% of the month's over-all volume. Next in order were the oil issues which aggregated $177,448,910, or 23.06%. They were followed by the other industrial and manufacturing category amounting to $173,207,372, or 22.50%, and which by the way, held first place in February. Miscellaneous volume in the amount of $76,906,113, or 9.99%, was next in line, followed by railroads comprising $38,954,700, or 5.06%; iron, steel, coal, copper, etc., $15,247,880, or 1.98%; equipment manufacturers, $15,000,000, or 1.95%; investment trusts, etc., $9,299,999, or 1.21%, and concluding with land, buildings, etc., in the sum of $3,319,300, or 0.43%.

Included among the larger offerings to come upon the domestic market in March were the following: Union Oil Co. of California 3¼% 25-year subordinate convertible debentures totaling $120,000,000; the New York Telephone Co. in the amount of $55,000,000, comprising 3⅜% refunding mortgage bonds, series I, due April 1, 1996; $50,000,000 30-year 3½% sinking fund debentures of the Tide Water Associated Oil Co., due April 1, 1986; Fruehauf Trailer Co. 4% convertible subordinated debentures in the amount of $37,500,000, and due March 1, 1976; the $35,000,000 offering of Bell Telephone Co. of Pennsylvania, consisting of 3¼% 40-year debentures, due March 1, 1996; $30,000,000 3¼% first mortgage bonds of the Houston Lighting & Power Co., due March 1, 1986, and a like amount of 3½% sinking fund debentures of the Whirlpool-Seeger Corp., due Aug. 1, 1980; $25,000,000 Pacific Gas & Electric Co., 3⅜% first and refunding mortgage bonds, series Z, due Dec. 1, 1988, and a similar amount of (Canadian) 4⅜% sinking fund debentures of the Household Finance Corp., due March 1, 1981, and placed privately with United States and Canadian institutional investors through Lee Higginson Corp. and A. E. Ames & Co., Ltd.

Private offerings in March of 1956 reached 35 in number and totaled $245,144,338, or 31.85% of that month's over-all total. During February, the month previous, a total of 34 issues were placed through the private route and they amounted to $213,179,000, or 37.98% of that month's total volume. A comparison of the current month's total with that for March, 1955, reveals, that in the latter period, a total of 23 offerings amounting to $172,766,875, or 14.06% of that month's grand total were placed privately.

Corporate issues placed privately in the first quarter of 1956 by months follow:

	No. of Issues	Total Amount	% of Total
January	31	$296,649,571	58.67
February	34	213,179,000	37.98
March	35	245,144,338	31.85

Municipal financing in March of the current year showed a sharp drop in dollar volume below that for February last, declining to $396,821,760 from the substantial figure of $636,448,990 the month before.

The total volume for March last, compares with the total for March, a year ago, of $526,209,055, or a decline of $129,387,295.

A breakdown in the total of municipal financing for March of this year shows that $382,681,475 represented new capital offerings, while $14,140,285 comprised refunding obligations.

Two of the larger offerings to come upon the market in March were the $50,000,000 issue of school aid bonds of the State of California and the $28,500,000 placement of school bonds for the Denver School District No. 1, of Colorado.

There was one small offering by United States Possessions comprising the $300,000 emission of electric revenue bonds of Seward, Alaska, due on Feb. 1 from 1975 to 1982 inclusive. No financing on the part of the Dominion of Canada, its provinces or municipalities was undertaken during March.

Total municipal financing for the first quarter of 1956 is set below:

	New	Refunding	Total
January	$396,446,750	$4,175,290	$402,622,040
February	618,493,786	17,955,204	636,448,990

Total	$1,399,622,011	$36,270,779	$1,435,892,790

Treasury Financing in March

The Secretary of the Treasury announced on March 1 an offering of 2⅝% Treasury certificates of indebtedness maturing Feb. 15, 1957, and an additional amount of the 2⅞% Treasury notes maturing June 15, 1958 (originally issued December 1, 1955), in exchange for the 1⅝% Treasury Notes of Series A-1956 maturing March 15.

Holders of the 1½% Treasury Notes of Series EA-1956 maturing April 1 were permitted to exchange their holdings only for the new certificates.

Cash subscriptions were not received. There were outstanding $8,472,000,000 of the Treasury notes maturing March 15 and $1,007,000,000 of the Treasury notes maturing April 1.

The new certificates were dated March 5, 1956, and matured Feb. 15, 1957. Interest was adjusted as of March 5 with respect to exchanges of the maturing notes of either series, and accrued interest to that date was paid to subscribers following acceptance of the notes.

In the case of the additional amount of 2⅞% notes of Series A-1958, accrued interest from Dec. 1, 1955, to March 5 was charged, interest accrued to that date on the notes maturing March 15 was credited, and subscribers paid the difference.

The Treasury Department on March 14 announced the results of the exchange offering of 2⅝% Treasury Certificates of Indebtedness of Series A-1957, dated March 5, 1956, due Feb. 15, 1957, open to holders of $8,471,880,000 of 1⅝% Treasury Notes of Series A-1956 maturing March 15, 1956, and $1,007,043,000 of 1½% Treasury Notes of Series EA-1956 maturing April 1, 1956; and an additional amount of the 2⅞% Treasury Notes of Series A-1958 maturing June 15, 1958 (originally issued Dec. 1, 1955) open only to holders of the maturing Series A-1956 notes. Subscriptions for the new issues amounted to $9,342,819,000, leaving $136,104,000 of the maturing issues for cash redemption. $6,229,950,000 A-1956 notes and $1,004,782,000 EA-1956 notes were exchanged for the 2⅝% Treasury Certificates of Indebtedness of Series A-1957 and $2,108,087,000 A-1956 notes were exchanged for the 2⅞% Treasury Notes of Series A-1958.

The Treasury Department in March, outside of the above, confined its operations to the sale of Treasury Bills, Savings Bonds and Depositary Bonds.

*Average rate on a bank discount basis. a Comprised of three separate series, all of which were changed as follows:

SERIES E—Beginning May 1, 1952. Over-all interest rate raised from 2.9% to 3% compounded semi-annually when held to maturity. Higher rate achieved by shortening the maturity of the Series E Bond from 10 years to 9 years, 8 months. Interest starts accruing at the end of six months instead of one year. Also the yield is higher in each intermediate year. Individual limit on annual purchases has been doubled from $10,000 to $20,000 maturity value.

SERIES H (NEW)—New current income bond, Series H, available beginning June 1, 1952, bearing 3% interest, compounded semi-annually, when held to maturity. Issued at par, Series H will mature in 9 years and 8 months, with interest paid by check semi-annually. Redeemable at par any time after 6 months from issue date, on one month's notice. Series H has individual limit on annual purchase of $20,000.

SERIES J AND K—These replaced Series F and G Bonds, respectively, as of May 1, 1952. Series J and K yield a return of 2.76% when held to maturity, instead of the former rate of 2.53% for F Bonds and 2.50% for G Bonds. Intermediated yields of Series J and K will be higher than those of F and G. Annual purchase limit of Series J and K combined is increased to $200,000.

For previous data on Savings Bonds, see footnote on page 2637, June 30, 1952 "Chronicle."

c Sale of Treasury notes of Series A was terminated on May 14, 1953. Sales of Treasury notes of Series B began on May 15, 1953. Notes are sold at par and accrued interest to the 15th of the month and if held to maturity or two years interest approximates 2.47%. Sale of Treasury notes of Series "C" began on Oct. 1, 1953; the notes are sold at par and accrued interest to the 15th of the month and if held to maturity or two years, interest approximates $2.20 per month for each $1,000 note. The sale of Series C Treasury Savings notes was suspended on Oct. 23, 1953. For previous data on Treasury notes, see footnote on page 1470, Oct. 19, 1953, "Chronicle."

In the comprehensive tables on the following pages we compare the March and the three months' figures with those for the corresponding periods in the four years preceding thus affording a five-year comparison.

The company's general offices and two warehouses are located in buildings constructed for those purposes at 770 West Goodale Blvd., Columbus, Ohio, Said office and warehouse buildings and all of the company's supermarkets are located on leased property.

A group of 11 United States insurance companies has agreed to take up $14,000,000 in 20-year 5% sinking fund first mortgage bonds, series C, dated May 1, 1958 and due May 1, 1978, in financing arranged by Morgan Stanley & Co., investment bankers. British Petroleum Co., Ltd.—Plans $30,000,000 Refinery

BP (Canada) Ltd., a subsidiary, on Feb. 8 announced the acquisition of a 600-acre site near Montreal, Canada, on which the company plans to build a refinery, which will process imported crude oil and manufacture high grade petroleum products for the Canadian market.

These plans represent the first venture of the international BP Group into marketing and refining in North America.

While no final decision has yet been taken on processing details, it is expected that the refinery, when fully commissioned, will have a capacity of approximately 30,000 barrels per day. The total investment in the refinery when fully commissioned—and this may be in one or more stages of development—is likely to be in excess of $30,000,000.

The company also plans to begin marketing petroleum products in Canada under the BP trademark within the next year. A number of sites for service stations in Montreal and elsewhere in the Province of Quebec have already been purchased. Construction will begin in the Spring, to a new design which has been specially developed for the Canadian market, and marketing is scheduled to start this summer.

The announcement points out that in December 1953, The British Petroleum Co. Ltd. of London, England, acquired a considerable interest in the Triad Oil Co. Ltd., of Calgary, Alberta. This interest is now being increased to 50%. Triad is actively engaged in oil exploration in Western Canada and now has a substantial interest in 6,000,000 acres in Alberta, British Columbia, Saskatchewan and Manitoba.—V. 185, p. 339.

The company's 1956 annual report, signed jointly by Mr. Whittemore and A. E. H. Fair, President, states the growth in the common shareholders total ownership in net assets of Brown Co. has grown from $5,743,461 on Nov. 30, 1946; to $20,421,867 in 1951; to an all time high of $56,586,815 on Nov. 30, 1956, the end of the company's latest fiscal year. The report shows that on Nov. 30, 1956, the company had 2,592,451 shares of common stock outstanding in the hands of the public on which $2,611,504 was earned from sales of $59,682,935 an increase of 29% on earnings and 11% on sales over the previous year. This corporation, it was announced on Feb. 18, has joined with three of its subsidiaries in the filing of financing proposals with the SEC; and the Commission has given interested persons until March 1, 1957, to request a hearing thereon.

Under the proposal, Central and South West would issue and sell at competitive bidding 600,000 additional shares of its $5 par common stock.

Net proceeds would be applied to the payment of $7,500,000 of bank loan notes and to the purchase of an additional $2,500,000, $4,000,000, respectively of the common stock of Central Power & Light Co., Public Service Co. of Oklahoma, and Southwestern Gas & Electric Co. The three subsidiaries plan to use the additional funds to finance in part the cost of their construction programs.—V. 185, p. 313.

Chesapeake & Ohio Ry.—Reports Record Earnings—This company announced on Feb. 18 that in 120 years of railroading it never earned more for its services, paid more wages, or set a higher dividend rate than it did in 1956. "A year ago 1955 was reported as Our Best Year, but all the revenue and earnings records of that year have now been surpassed," Cyrus Eaton, Chairman of the Board, and Walter J. Tuohy, President, who signed the annual report jointly, told shareholders.

Net income was $67 million, equal to $8.23 a common share, a 15% gain over 1955's record $58 million, or $7.25 a share. Total revenues were $419 million, a $39 million increase over the record $380 million in 1955. "The outlook for 1957 is excellent, with continued growth in traffic and earnings indicated," Messrs. Eaton and Tuohy said.

In 1956 also, the annual report says, C&O extended its interests "in the air—through an investment in Slick Airways, Inc.; on the sea—by participation in American Coal Shipping Inc., and on the land—by purchase of the Washington and Old Dominion RR."

"Coal continued its advance with the speed and force of a long coal train rolling down the Allegheny slopes to tidewater," Messrs. Eaton and Tuohy state. C&O originated coal reached a new high percentage, 13.2% of all bituminous mined in the country, or slightly more than C&O's usual one-eighth of national production. C&O coal carried to tidewater for shipment abroad was at an all-time high of 20 million tons, up one-third from the year before, and compared with total national overseas export of over 48 million tons, up from 34 million tons of 1955.

The report points out that not a day's production was lost at a mine on the C&O for lack of C&O coal cars. In 1956, the railroad acquired 2,327 additional coal hopper cars and will add another 7,500 in 1957.

Along with the record year for coal, new tonnage marks were set by C&O merchandise traffic, most of it carried in fast manifest trains that made better than 99% of their scheduled connections. "Continuing the diversification of the railroad's traffic sources, 98 new industries located plants on C&O during the year, which when in full production, will ship an estimated 27,200 carloads annually and produce about $3,250,000 in new annual revenues," the report says.

To handle this growing merchandise freight business, C&O in 1956 acquired 1,241 freight cars and ordered 1,700 more for 1957. Over 700 cars already acquired are "damage free" loaders and 500 of the ones ordered will be so equipped.

C&O spent $68 million in 1956 for locomotives, freight cars and other rolling stock; another $22 million went for roadway improvements, which included part of the cost of the new $8 million ore pier at Newport News, Va., the new coal pier there, new yards and the addition of 117 miles of electronic traffic control.

The $90 million was the greatest amount spent in one year to better the railroad. Over half of this expenditure was in cash from the company's treasury, the remainder came from sale of equipment trust certificates. And in 1957, the report says, C&O will spend even more on additions and improvements—$70 million alone for new freight cars.—V. 185, p. 716.

Chicago & North Western Ry.—No Interest on Second Mortgage Bonds—

The company has informed holders of its second mortgage 4½% income bonds that no interest payment will be made now for the year 1956 "because of a deficit in available net income."

Accumulated unpaid interest on the issue now totals 7.79%. This represents the full 4.50% for 1956 plus 3.29% for 1954. On April 1, 1956, the road paid the full interest for 1955 plus 1.21% for 1954. Interest on the second mortgage bonds is cumulative to the extent of 13.5%.

Ben W. Heineman, Chairman, in a letter to second mortgage bondholders, said: "While the results in 1956 were disappointing, substantial progress is being made in effecting permanent improvements through application of the most modern and efficient procedures in the operation of this company. We look forward to more favorable results in 1957."—V. 185, p. 819.

Dresser Industries, Inc.—Plans Financing—Acquisition

The directors on Feb. 18 approved the issuance of $20,000,000 of subordinate convertible debentures, the final terms of which will be fixed within the next few weeks. The debentures will be convertible into common stock of the company at a price in excess of the market price of the common stock at the time the debentures are issued.

The proceeds from the sale of the debentures will be added to the company's general fund and will be available for all corporate purposes, including increased working capital required by an expanding business and funds for capital expenditures.

The company recently acquired the assets of the Hermetic Seal Transformer Co., Inc., of Garland, Texas, in consideration of the issuance of 10,000 shares of the company's capital stock. Hermetic is a small manufacturer of electronic equipment, such as transformers, filters, reactors, amplifiers and other products used in the manufacture of communications equipment, computers, control systems and radar and sonar devices. Hermetic Seal will become a division of Southwestern Industrial Electronics, a company which Dresser acquired early in 1956. The operations of Hermetic and S. I. E. complement one another to the extent that a substantial portion of S. I. E.'s basic product line requires components of the type produced by Hermetic.—V. 185, p. 717.

(E. I.) du Pont de Nemours & Co. (Inc.)—To Build Third Titanium Dioxide Plant—

The company will build its third plant for manufacturing titanium dioxide, the whitest white pigment known, on a 1,500-acre site near New Johnsonville, Tenn., it was announced on Feb. 6.

The plant, employing an important new process for making the pigment, will have a capacity of 125 tons of titanium dioxide a day. The white pigment is widely used in paint, floor coverings, paper, plastics, and many other products because of its outstanding hiding power and high opacity.

Actual construction work will get under way soon, and the plant is expected to be in operation early in 1959, Frederick H. Weismuller, General Manager of du Pont's Pigments Department, said. The new facility, to be known as the Johnsonville Plant, will be operated by the Pigments Department.

The department's other titanium dioxide plants—at Baltimore, Md., and Edge Moor, Del.—are both undergoing expansion of facilities to meet the rising demand for the pigment.

The Johnsonville plant will be located on a site along the east bank of the Tennessee River, about two miles south of the Town of New Johnsonville in Humphreys County. The site lies just north of the Tennessee Valley Authority's recently expanded Johnsonville steam plant.

A recently developed chemical process for making titanium dioxide, known as the chloride process, will be used at the Johnsonville Plant. Raw material for the Johnsonville Plant will be ilmenite, a black sand high in titanium content, which will be shipped by rail from du Pont's two ilmenite mines at Starke and Lawtey, Fla.

For the Pigments Department, the plant at New Johnsonville represents the second major project announced in a week. On Jan. 30, the Department said it would build, near Brevard, N. C., the world's first full-scale plant for manufacturing hyper-pure silicon, an essential element of many new electronic and electrical devices.

It will be the sixth du Pont plant in Tennessee. The others are: two at Old Hickory, near Nashville, one manufacturing rayon and the other cellophane; Chattanooga, nylon yarns; Memphis, sodium cyanide and hydrogen peroxide; and Columbia, cellulose sponges.—V. 185, p. 144.

This corporation, it was announced on Feb. 18, registered record sales of $6,030,312 last year.

The annual consolidated report listed the sales total as 8.1% above the previous high of $5,577,167 in 1955. Earnings were $414,665, equal to $1.35 per share, as compared to $400,138 and $1.33 per share a year earlier on a lesser number of shares.

Grant S. Diamond, President, said peak sales were chalked up despite the steel industry strike in July and August which adversely affected sales in the third-quarter. Spar Mica Corp., Ltd., of Baie Johan Beetz, Quebec, managed and partly-owned by Electro Refractories, is expected to begin making boatload shipments of feldspar to the United States and to Europe in the Summer shipping season. Spar Mica is using a new electrostatic process developed by Mr. Diamond for feldspar and other minerals.

The company reached the break-even point on manufacture of vitrified grinding wheels and continued sales are expected to contribute materially to earnings, according to Mr. Diamond. He said incoming orders and general business activities indicate 1957 sales volume should equal or better that of 1956.—V. 184, p. 1351.

This company has undertaken a program to design, build, test and install a guided missile launching system for U. S. Navy submarines, it was revealed on Feb. 18 by Leonard K. Firestone, President of the Firestone Tire & Rubber Co., of California, who said that the Firestone Engineering Laboratory, Guided Missile Division, in Monterey, Calif., was in charge of the project. The assistance of the various other technical divisions of the parent company will be co-ordinated with the project as required, Mr. Firestone said.

The launching system is for the Regulus, the 30-foot-long, seven-ton, surface-to-surface, jet-powered missile which is capable of carrying an atomic warhead.

Principal components of the system on which his company is working, Mr. Firestone said, are the "launcher," the handling and stowage and their many intricate parts.

The first two launching systems will be installed on the submarines "Grayback" and "Growler."

"This new launching system will extend the Navy's submarine capabilities into the realm of supersonic missiles of tremendous strategic importance," Mr. Firestone said.

Firestone also produces the Corporal guided missile, another powerful surface-to-surface weapon, at its plant in Los Angeles, Calif. The plant where the Corporal is produced is located adjacent to Firestone's main tire plant in Los Angeles. Facilities for its manufacture were expanded in 1954.—V. 185, p. 484.

CAPITALIZATION GIVING EFFECT TO PRESENT FINANCING

	Authorized	Outstanding
Common (par $1)	50,000 shs.	47,250 shs.

BUSINESS—The company was incorporated in Colorado on April 13, 1956, and is duly qualified to do business in the states of California and Illinois. Its principal and executive offices are located at 436 First National Bank Building, Denver, Colo.

A franchise from Frommes Metnod, Inc. of Minneapolis, Minn., was assigned to Frommes Metropolitan Co. on April 14, 1956, licensing the latter to operate a hair and scalp clinic in the Metropolitan Chicago area, utilizing the formulae and methods of treatment developed by Frommes Method, Inc.

On Aug. 31, 1956, the company purchased the Frommes San Francisco Co., a hair and scalp clinic, located in 340 Flood Building, 870 Market St., San Francisco, Calif., and on Nov. 1, 1956, it opened its Chicago clinic which is located at 1408 Mallers Building, 5 South Wabash Ave., Chicago, Ill.

The Frommes Method, Inc. operates no clinics of its own, but franchises various companies to use its methods, formulae and name.

Briefly, under the terms of the company's franchise agreements, Frommes grants the company the exclusive right to advertise and sell the Frommes services and materials within the Metropolitan Chicago and San Francisco areas for a period of 10 years, with option to renew for a like period. The agreements also provide that the company maintain a uniform price on all sales of products and treatments as determined by Frommes (the fixed charge for each treatment is currently $6), that the company make no deviation from the established business principles of Frommes, and that the company pay 15% monthly of the gross receipts from treatments.

For its immediate plan, the company intends to expand the operations of its Chicago and San Francisco clinics and to open a new clinic in Dallas, Texas. Each clinic is equipped with seven treatment booths in which seven treatments can be given simultaneously. The clinics are sufficiently large to enable additional booths to be installed. —V. 185, p. 718.

The corporation is currently producing equipment for the Redstone, Regulus, Thor, Nike, Matador and Ding Dong missile programs. It is also engaged in design and proto-type phases for a number of additional missile operations.

Conversion of the Delphos plant to defense production brings to three the number of Fruehauf plants fully occupied with government prime and sub-contract work. The two other plants are in Los Angeles, Calif.—V. 185, p. 610.

Fruehauf Trailer Co.—Official Resigns—

Frederick E. Burnham has resigned as Executive Vice-President—Finance, but will continue to serve as a consultant to the company. —V. 185, p. 610.

General Industrial Enterprises, Inc., Philadelphia, Pa. —Payment of Fees Approved—

The SEC on Feb. 19 announced the issuance of a decision permitting the payment of $150,000 of fees for services rendered in connection with the 1955 sale of certain assets of this corporation.

The fees in question are payable to Drexel & Co., of Philadelphia, and Philip A. Roch, of New York, in the amount of $75,000 each. General (formerly The Midvale Company) is controlled by Baldwin Securities Corp., Philadelphia investment company. Drexel is an investment banker. One of its partners, Edward Hopkinson, Jr., and Mr. Roth are directors of both General and Baldwin. Because of the intercompany affiliations, the fee payments are prohibited by the Investment Company Act unless the Commission finds an exemption in the public interest and consistent with the protection of investors.

Because of a downward trend in its sales and indications that the trend would continue, General's management authorized discussions looking to a merger, sale or assets, or other arrangements which would resolve the company's difficulties. After various unsuccessful discussions and negotiations by Messrs. Hopkinson and Roth, conducted for two years prior to August 1955, they entered into negotiations in August 1955 which resulted in a purchase agreement dated Dec. 2, 1955, for the sale of General's assets to Midvale-Heppenstall Co., of Philadelphia, for a base consideration of $6,100,000, subject to stockholder approval. The transaction was consummated Dec. 30, 1955, after objecting stockholders had lost a court action to enjoin its consummation.

Payment of the $150,000 in fees to Messrs. Drexel and Roth was opposed before the Commission by certain stockholders of Baldwin and General. They contended among other things that Messrs. Hopkinson and Roth did nothing more than they should have done as officials of Drexel and that, in any event, the fees requested were excessive.

After reviewing the evidence and the various contentions of the objecting stockholders as well as the arguments advanced in opposition thereto by the applicant companies and Mr. Roth, the Commission concluded that the requested exemption was appropriate in the public interest and consistent with the protection of investors, and that the compensation proposed to be paid is reasonable and fair and does not involve overreaching. In reaching this decision, the Commission stated, "we have given consideration to the extraordinary and extensive character of the services performed and the necessity therefore, the modest compensation received by Hopkinson and Roth as officers and directors of Baldwin and General during the period of their special services, and the circumstances which dictated the inadvisability of employing outside persons to negotiate and effectuate a satisfactory resolution of the problems faced by General."—V. 184, p. 114; V. 182, p. 2687.

General Public Utilities Corp.—Net Earnings Up 8.9% in 1956—A. F. Tegen, President, on Feb. 8, announcing the results of 1956 operations, said:

(1) Gross revenues of domestic subsidiaries were $166 million in 1956—an increase of about 8% over 1955. Gross revenues of the Philippine subsidiaries were approximately $23 million—an increase of about 13% over 1955.

(2) The consolidated common stock earnings for 1956 were $29,637,420, or $3.05 per share compared with $2.81 per share for 1955, an increase of 8.9%. Income from domestic sources in 1956 accounted for $2.50 per share as against $2.38 per share from domestic subsidiaries in 1955. The 1955 figures here reported are 10c per share higher than those previously reported, namely, $2.71 per share consolidated and $2.28 per share domestic, and have been restated to give effect to a retroactive election of accelerated depreciation so as to place such earnings on a basis comparable to those for 1956. Income from Philippine sources accounted for 55c per share in 1956 as against 43c per share in 1955.

(3) The net receipts from Philippine sources amounted to 11c per share as against 22c per share received in 1955. This reduction reflects the effect of regulations of the Central Bank of the Philippines limiting to 40% the portion of annual profits permitted to be licensed for transmission in dollars to U. S. stockholders of Philippine public utilities. In addition, the Philippine subsidiaries paid dividends to GPU in pesos equivalent to 8c per share after Philippine withholding taxes.

(4) Dividends paid during 1956 amounted to $17,707,640, an increase of almost $1 million over those paid in 1955. The dividend rate was increased from $1.80 to $1.90 per share on an annual basis with the Nov. 15, 1956 dividend.

(5) Domestic subsidiaries expect to spend approximately $75 million for new construction in 1957 and the Philippine subsidiaries expect to spend approximately $6.3 million. As announced on Feb. 4, GPU expects to make a common stock offering to its stockholders in March on a 1-for-15 basis, to finance a part of such construction cost.—V. 185, p. 718.

Net sales, gross profits and earnings, both before and after income taxes, were at record levels.

The estimated earnings for 1956 are equal to $3.40 per share of common stock compared with $3.13 per share in 1955. The preliminary earnings for 1956 compare with $29,031,290 in 1955.—V. 185, p. 718.

Glen Alden Corp.—Plans to Acquire Maremont—

Details of a proposed plan whereby this corporation will acquire the major assets and substantial earnings of Maremont Automotive Products Co., Inc., were disclosed on Feb. 14.

Frank J. Manheim, Glen Alden director and Chairman of a Special Committee of the Board, and Arnold Maremont, President of Maremont, gave the following details of the proposed acquisitions:

Glen Alden will acquire the earning-power of Maremont, which in 1956 amounted to approximately $2,479,000 before taxes.

Glen Alden will acquire major physical assets of Maremont, having a total book value of $10,661,000, for approximately $3,400,000 in Glen Alden stock and cash, and the assumption by a new Glen Alden subsidiary of $4,266,000 of Maremont liabilities. Included in the purchase price will be 250,000 shares of Glen Alden stock valued for the purposes of the acquisition at $10 per share, plus $909,000 in cash.

The assets to be acquired include Maremont's business, name, management, receivables, inventories, machinery and equipment.

The new Glen Alden subsidiary, to be named Maremont Automotive Products, Inc., will operate the businesses being acquired from the present Maremont company, and will lease from Maremont 552,724 square feet of plant and office space on a long-term net lease.

The present Maremont Automotive Products Co. after the transaction is completed, will change its name to Maremont Investment Co. Its assets will consist of $3,000,000 in cash and securities, 256,000 shares of Glen Alden stock, and four wholly-owned plants.

As a condition of the acquisition, Glen Alden shareholders will be asked to approve an increase in the size of its board from seven to 12 members, and to elect five top officials of Maremont to the expanded board. The proposed new Glen Alden directors are: Howard E. Wolfson, Chairman of the Maremont Board; Arnold H. Maremont, President; Jerome M. Comar, Executive Vice-President; Charles A. Klaus, Vice-President of Sales, and John P. Buck, Vice-President of Manufacturing.

The acquisition proposal will be voted on by shareholders of Glen Alden at a meeting on March 12; and by shareholders of Maremont on March 13.

In a review of the Maremont company's significant growth, Mr. Maremont stated that in the last 11 years, from Sept. 30, 1945 to Dec. 31, 1956, Maremont's pre-tax earnings had increased from $133,762 to $2,479,000; net proptery, plant and equipment from $773,939 to $3,054,000; net current assets from $1,024,850 to $9,400,000; net worth from $1,879,516 to $7,875,000; and net sales from $6,919,046 to $27,033,000.

Acquisition Is Opposed by Stockholder Group—

A stockholder committee has been formed to oppose the Glen Alden's proposal to acquire Maremont Automotive Products, Inc., it was announced on Feb. 13.

Charles Mathes, Vice-President of the Mathes Company of Fort Worth, Tex., a subsidiary of Glen Alden Corp., said that although the subsidiary declined to be identified with the stockholder committee, it "definitely opposes the proposed acquisition of Maremont by Glen Alden." At a Glen Alden board meeting earlier this month three of seven directors voted against the acquisition.

In a letter date Feb. 18, 1957, to Francis O. Case, President of Glen Alden Corp., a copy of which was mailed to the other directors, Wentworth P. Johnson, a director of Glen Alden Corp. and Senior Vice-President and a director of Fidelity-Philadelphia Trust Co., requested that his name be removed from the proxy material to be sent to stockholders because he is at this time opposed to the merger of Maremont Automotive Products, Inc., with Glen Alden Corp.

"In all good faith," Mr. Johnson said, "I must, at this time, vote against recommending to the stockholders acquisition of Maremont assets."

As stated by Mr. Case, Mr. Johnson's name appeared on proxy material sent out earlier by the committee of Glen Alden directors advocating the acquisition of Maremont.

Originally it was claimed that Mr. Johnson approved the merger which is opposed by the Chairman of the Board Gilbert S. McClintock and the President, Francis O. Case.—V. 184, p. 623.

Glidden Co., Cleveland, Ohio—Sells Georgia Plant—

The company has sold its Southeast table margarine and salad products plant and business at Macon, Ga., to J. H. Filbert, Inc., of Baltimore, it was disclosed on Feb. 15.

The sale, which is effective March 1, 1957, also includes licensed use of Durkee brand names for table margarine, mayonnaise and salad products in the Southeast, and all buildings and equipment at this location. The consideration involved in this transaction was not disclosed.

The announcement emphasized that only Durkee's Southeastern table margarine, mayonnaise and salad products business was involved. The sale does not include spices, extracts, food colors, coconut, Durkee's Famous Sauce or Durkee's Worcestershire Sauce.

Durkee's West Coast margarine and salad products operations at Berkeley, Calif., are in no way affected by the transaction and will continue unchanged. Also unaffected are all of Glidden's refining facilities for production of bulk shortenings, specialty edible oil products and refined oils for sale to bakers, food processors and mass-feeding establishments. These bulk sales constitute nearly three-fourths of the sales volume of Glidden's Durkee Division.

Dwight P. Joyce, Chairman and President, stated that this sale is in line with "Glidden's policy of concentrating on production of bulk and intermediate products for the food, chemical and other industries."

The Filbert company is long established and identified as a leading manufacturer of "Mrs. Filbert's" margarine, mayonnaise, salad dressing and beverage syrups, and presently maintains one of the industry's most modern plants in Baltimore. Heretofore its products have been distributed from its Baltimore plant throughout an expanding distribution area. The acquisition by Filbert of the Durkee Famous Foods facilities at Macon, Ga., it was announced by Alvin B. Filbert, President of J. K. Filbert, Inc., fills a pressing need for additional manufacturing capacity in order to meet the progressively increasing demand for its products in the fast growing Southeastern part of the country.

Mr. Filbert explained that the output of its Baltimore operations is being more and more required to satisfy the increasing sales volume of its products in the Mid-Atlantic, Mid-Western and New England States, and for some time the Filbert company has been seeking additional manufacturing sites.—V. 185, p. 342.

(B. F.) Goodrich Co.—Institute Plant of Affiliate to Be Converted to "Cold" Rubber—

Plans for conversion of a production line to the manufacture of Ameripol "cold" rubber in Goodrich-Gulf Chemicals, Inc.'s man-made rubber plant in Institute, W. Va., were announced on Feb. 18 by William I. Burt, President.

Changeover from the rubber-making process now used there will cost more than $2,000,000 and is scheduled for completion early in 1958, Mr. Burt said. He added that the conversion to "cold" rubber is another step in the company's modernization program for the Institute plant announced when Goodrich-Gulf purchased the facility from the Government for $11,000,000 in February, 1956. It will have a capacity of 50,000 tons a year.

Construction of a new power house costing $1,500,000 and designed to supply 100,000 pounds of steam an hour, was started in August, 1956.

The Institute plant, built by the government during World War II was in standby from September, 1953 until Goodrich-Gulf acquired it last year and began production of rubber in April, 1956. The plant, under government operation, had capacity for producing 122,000 long tons of American rubber annually when in full operation.

Goodrich-Gulf, owned by The B. F. Goodrich Co. and Gulf Oil Corp., also operates a man-made rubber plant in Port Neches, Texas, purchased from the government in 1955.—V. 185, pp. 611 and 44.

Gulf Oil Corp.—Cut-Back in Refinery Runs—

The corporation on Feb. 8 announced a cut-back of 29,000 barrels per day in refinery runs of crude oil. The action is designed to ease the oil shortage in Europe. The company simultaneously made public a number of other operating adjustments which were described as "a 100% contribution to the Government's oil for Europe program."

The cut-back in refinery runs include a reduction of 10,000 barrels per day at Port Arthur, Texas; 10,000 barrels per day at Philadelphia; and 9,000 barrels per day at Toledo. Taese reductions have resulted in a similar amount of crude being diverted from domestic refineries for export overseas. Also, at the Port Arthur refinery, runs have been changed to reduce gasoline manufacture and increase distillate yield.

Gulf, which does not normally export any crude oil, has been responsible, either directly or indirectly, for a total of 6,806,000 barrels being diverted to foreign countries since last October. The company also said it has directed to Europe 60,000 barrels per day of Middle East crude normally scheduled for this country.

A Gulf official said the company has sold 4,406,902 barrels direct to foreign sources since last October, largely to Europe. In addition, it sold 2,400,000 barrels of crude oil (October 1956 to Jan. 1, 1957) to other domestic purchasers to enable their operations to release crude to foreign markets.

The official also said Gulf has made commitments to sell a total of 1,144,000 barrels of petroleum products to foreign countries between last Oct. and next March 31. These products include gasoline, gas oil, kerosene, and heavy fuel oil.

Also, in cooperation with other oil companies, savings in tanker time have been made through rearrangement and substitutions of ships and sources of crude, both domestic and foreign. This made shorter hauls to Western Europe possible.

Earlier in the emergency, caused primarily by the Suez Canal crisis, Gulf temporarily reversed one of its pipelines used to move crude oil from the Southwest to its Midwestern refineries. This made available 1,000,000 barrels of Oklahoma crude on the Gulf Coast for export to Europe.—V. 185, p. 719.

Jones & Laughlin Steel Corp.—Receives Top Awards for Best Corporate Identification Program and Industrial Packaging—

The new corporate identification program adopted by this corporation has received the unusual distinction of two first awards in the Package Designer's Council awards competition, it was announced on Feb. 18. J & L's objective was quick, easy identification of all company products and services. This is probably the foremost example—to date—of heavy industry's increasing recognition of the importance of modern corporate identification.

Jones & Laughlin felt that their previous identification was not sufficiently distinctive in appearance nor did it convey the feeling of a modern, progressive company. Not until this dramatic corporate identity program was begun did they realize the numerous factors involved.

Gerald Stahl Associates, of New York City, industrial designers with experience in the development of effective corporate identification, was selected to evaluate all J & L packaging and product identification, and in December the J & L management approved the entire program.

The company's uniform package design program probably never will be completed as long as new products are being developed and new and better methods of packaging introduced. Continued control of the program's development is provided by a packaging committee now that it has moved into the long-range stage.—V. 185, p. 822.

Kerr-McGee Oil Industries, Inc.—Completes Contract

The second giant submersible offshore drilling device of the Rig 46 type has been placed in service by this corporation.

The new mobile unit, Rig 47, is starting a well on OCS-0474 No. 3 in Block 129-A of the Eugene Island Area, off St. Mary Parish, La., under contract to the Phillips Petroleum Co.

Rig 47, built by American Bridge Co. at Orange, Texas, and outfitted by the Ingalls Shipoulding Corp., Pascagoula, Miss., is an identical twin to Rig 46. The device is built of 14½-foot tubular members with outside dimensions of 242 by 202 feet, and has a weight on bottom of 5,000 tons. Overall height, with mast erect, is 268 feet.

Designed to operate in water up to 70 feet in depth, Rig 47 is powered by three 875-horsepower Electro-Motive diesel engins, ach driving two 500-kilowatt d.c. generators. The full-view drilling mast is mounted on a substructure that projects over the end of the barge and which can be skidded to make possible drilling of six wells without moving the barge. The mast is capable of being tilted for use as a construction boom.

The prototype of the design, Rig 46, will be moved within the next few days to the location of its second well for the CATC (Continental-Atlantic-Tidewater-Cities Service) Group.—V. 185, p. 146.

(James) Lees & Sons Co.—Increases Debt Limit—

The stockholders at the annual meeting April 24 will be asked to approve increasing the company's long-term debt limit to $15,000,000 from the present $10,000,000.

He described the move as "a precautionary measure," with the proposed higher debt limit considered a more reasonable one in view of the company's expansion program. Present long-term debt totals about $9,000,000.—V. 184, p. 2626.

Lehigh & New England RR.—Unit Buys Six Ships—

Penn Navigation Co., a newly formed subsidiary, has purchased six ships from Pan-Oceanic Navigation Corp., of New York, it was announced on Feb. 18 by C. M. Dodson, President of The Lehigh Coal & Navigation Co., of which the railroad is a wholly-owned subsidiary.

Five of the ships acquired by Penn Navigation are of the Liberty type, and one is a tanker of the T-2 class. In line with the "Trade Out" and "Build" program of the U. S. Maritime Administration, four of the Liberty vessels are intended to be operated under foreign flag and to this end Penn Navigation will build a 32,600 ton tanker. A contract for construction of the new tanker has been signed with a subsidiary of Bethlehem Steel Corp.

Incident to the transaction, the security holders of Pan-Oceanic acquired notes of Penn Navigation Co. which may at a future date be converted into 45% of the common stock of that company. Penn Navigation and Webb & Knapp, Inc., of New York, one of the principal security holders of Pan-Oceanic, have also agreed to cooperate with each other in such new shipping activities as may develop from time to time.

Entry into the shipping business was seen as being in conformity with previously announced plans to expand into fields related to the company's present area of operations.—V. 185, p. 823.

Lynn Gas & Electric Co.—Hearing on Exchange Offer

The SEC on Feb. 18 announced the granting of a petition filed by a stockholder of this company to reopen the hearing with respect to a pending proposal of New England Electric System to acquire the outstanding common stock of Lynn through an offer of two shares of NEES common for each share of Lynn common. The hearing is to be reconvened on Feb. 28, 1957.

The hearing was held on Jan. 3, 1957, at which evidence was offered by NEES as to the fairness of the exchange offer. There was no active participation at the hearing by or on behalf of Lynn stockholders. However, written statements of views submitted by a number of Lynn stockholders were filed in the hearing record.

Subsequently, John F. Cremens, of Boston, Mass., a Lynn stockholder, petitioned to reopen the hearing; and in an argument before the Commission on his petition he outlined the nature of the evidentiary matter which he proposed to present, relating principally to the value of certain real estate owned by Lynn. NEES opposed the granting of the petition.

In granting the petition, the Commission stated: "We recognize that the reopening of the record after the close of hearings could represent a disruption of orderly and expeditious procedure, ordinarily should be avoided, and should be ordered only for compelling reasons. We have given consideration, among other things, to the fact that although Lynn advised its stockholders of the exchange offer and that it would become effective after its approval by the Commission, Lynn's letter to its stockholders did not inform the stockholders that they might have an opportunity to be heard in proceedings before us with respect to the fairness and other aspects of the proposed exchange offer . . . We have concluded that under the circumstances and in keeping with our policy to accord opportunity for adequate stockholder participation, we shall exercise our discretion to reopen the record so as to extend such opportunity in this instance.

"We do not anticipate that the delay of the proceedings entailed in such reopening will be prolonged or will result in any prejudice to any interested person. Upon the conclusion of such reopened hearing, at which all interested persons and particularly the stockholders of Lynn desiring to, will have the opportunity to participate, the record thus completed will be received by us for final disposition free of any further questions respecting the opportunity accorded for such participation."—V. 185, p. 2443.

National Distillers Products Corp.—Proposes Change in Name—Record Sales Reported—Earnings Also Rise—

Subject to the approval of stockholders at their annual meeting to be held on April 17, this corporation proposes to change its name to National Distillers & Chemical Corp. in recognition of the company's substantial progress in recent years in the field of industrial chemicals, John A. Bierwirth, President, informed shareholders in the corporation's annual report for 1956.

If approved, the change will mean that the beverage division of the company will be operated under the name of National Distillers Products Co. The chemical division will continue as U. S. Industrial Chemicals Company.

Under the new name, according to Mr. Bierwirth, the corporation will continue its policy of promoting vigorously its two principal activities—alcoholic beverages and chemicals.

Net sales for 1956 were the highest in history, amounting to $543,099,524, an increase of 9% over the preceding year's volume of $500,191,691. Net income was $20,103,816, equal, after preferred dividend requirements, to $2.11 per share on the outstanding common stock, compared with net income of $15,514,127 or $1.60 per share in 1955.

Mr. Bierwirth reported that operations during 1956 reflected increased sales and profits in both the beverage and chemical divisions.

Mr. Bierwirth also disclosed that the corporation in 1956 made capital expenditures of $28,500,000 of which $24,000,000 were in the chemical divisions. Capital expenditures in the chemical division will approximate $31,000,000 in the current year.

In 1956 an aggregate of $6,798,000 of company and subsidiary long-term debt was paid or purchased for sinking fund requirements and 20,095 shares of preferred stock were purchased for retirement. At year-end, working capital totaled $211,249,000 and net worth was $264,937,000. Book value per share of common stock rose to $25.57 from $24.93 in 1955.—V. 185, p. 721.

National Research Corp.—Sells Interest in Unit—

This corporation and Columbia-Southern Chemical Corp. have become associated as equal stockholders in NRC Metals Corp., which was formerly a wholly owned subsidiary of National Research Corp.

According to the announcement by Richard S. Morse, President of National Research, and E. T. Asplundh, President of Columbia-Southern, both companies will in the future employ NRC Metals as a vehicle for their activities relating to the manufacture and sale of zirconium and hafnium metals and chemicals.

NRC Metals Corp. currently has under construction in Santa Rosa County, near Pensacola, Fla., a plant designed for the production of zirconium and hafnium. The new plant is scheduled for production toward the end of 1957.

NRC Metals has a contract with the Atomic Energy Commission for the supply of 3,500,000 pounds of zirconium and hafnium metals and will supply other industries when the new operation reaches capacity production.

The new Florida plant will be the nation's first fully-integrated facility for the production of the high-purity metals, which will be sold in sponge form to melters and fabricators. The zircon sand to be used as raw material in the new plant is available from ore beds also located in Florida.

National Research Corp. of Cambridge, Mass., is engaged in the development of new processes, products, and equipment in the metallurgical, petrochemicals and applied physics fields. The company has extensive background in metal processing and in new metal and alloy development work.

Columbia-Southern Chemical Corp., a wholly owned subsidiary of Pittsburgh Plate Glass Co., is one of the nation's important manufacturers of chlorine and alkalies. The company has extensive experience in the field of chemical processing of metal ores and in the administration of chemical manufacturing operations.

Both zirconium and hafnium have very important uses as components in nuclear reactors. For the chemical processing industries, corrosion-resistant qualities of zirconium are outstanding and the metal is finding constantly increasing acceptance.—V. 185, p. 721.

National Telefilm Associates, Inc.—Concludes Contract

Ely A. Landau, President, on Jan. 30 said in part: "A contract has been concluded between the NTA Film Network, Inc. (50% owned by National Telefilm Associates, Inc.) and the Warner-Lambert Pharmaceutical Co. for the sponsorship of feature films on the NTA Film Network.

"The contract covers sponsorship for an initial, firm 39 week period, starting the week of April 1, 1957, of outstanding features selected from the 20th Century-Fox library of 390 feature films acquired for television distribution by National Telefilm Associates late in 1956. The network programming will be the first showing of these features on television.

"The Warner-Lambert sponsorship covers one hour per week on a network of 128 stations. Sponsorship of the balance of the program still available is expected to be announced shortly. The total revenue to be derived from full sponsorship of the program is expected to approximate $4,000,000.

"The contract calls for options on the part of Warner-Lambert to continue their sponsorship for 1958 and through 1959."—V. 185, p. 824.

This corporation on Feb. 13 observed groundbreaking ceremonies for a new $1,000,000 research engineering center at Johnstown, Pa. The center, to be located in a 8.7-acre tract of heavily wooded land, will be completed early in 1958.

Natural Gas Pipeline Co. of America—Seeks Rate Incr.

This company, a subsidiary of The Peoples Gas Light & Coke Co., on Feb. 8 filed an application with the Federal Power Commission seeking a $5,300,000 annual rate increase.

Joseph J. Hedrick, President, stated that this increase was necessary because of the higher cost of natural gas purchased as well as increased labor and material costs and taxes.

The proposed increase provides for a 6½% rate of return based on property as of Sept. 30, 1956, the company pointed out.

March 11 is the proposed effective date for the higher rates which will apply to all of Natural's utility company customers, including Peoples Gas in Chicago.

Peoples Gas share would amount to $2,300,000 which would eventually be passed on to its customers.

This increase is subject to possible future refund depending upon the ultimate decision of the FPC regarding Natural Gas Pipeline's proposed rate hike, it was stated.

Mr. Hedrick said that Natural Gas Pipeline's last request for a rate increase was filed in September 1954. That increase, which amounted to $10,700,000 on an annual basis, became effective March 2, 1955, subject to review by the Commission and possible refund, and is presently awaiting decision by the Commission.—V. 184, p. 2671.

New York Rubber Corp.—Elects New President—

Herschel G. Harris has been elected President to succeed Mark H. Stratton, who is retiring on April 1. Mr. Stratton has been President since 1932.

Mr. Harris was formerly Vice-President in charge of sales of the "Airubber" division, and has been with the company since January 1937.

C. Bradley Allen, formerly Vice-President in charge of sales of the mechanical rubber goods division, who joined the company in April, 1932, has been elected Executive Vice-President and a director of the corporation.

This corporation, founded on Staten Island in 1851, specializes in the design and manufacture of rubber conveyor belts and power transmission belting. The first rubber conveyor belt ever manufactured in this country was made by this company at the plant at Beacon, New York, to which it moved in 1853, being cured by the heat of the sun on the roof because there were no belt-vulcanizing presses such as are used now. This belt was shipped to a grain elevator in Great Britain.

Another of its conspicuous recent achievements is the development of a fire-resistant rubber conveyor belt for a major coal mine.

The company was also a pioneer in the development of the inflatable rubber life rafts and dinghies and the widely-known "Mae West" inflatable life vests which together were responsible for saving the lives of many pilots and crews of airplanes forced down at sea during World War II. It now makes a varied line of inflatable rubber boats, floats, beach mattresses, and other sporting goods.

The headquarters and the principal plant of the company are still at Beacon, with a branch plant at Sarasota, Fla. Sales offices are at 100 Park Avenue, New York City.—V. 121, p. 1471.

Northwest Airlines, Inc.—Arranges Bank Borrowings

The corporation has arranged a $38,500,000 line of credit with 15 banks. The 4¼% loan, dated last Nov. 15, will help the carrier purchase 24 aircraft costing $55,000,000. Funds will be taken down as the planes are delivered.

The corporation drew $13,800,000 of the total in January for the first delivery. The last of the planes is scheduled to arrive during the spring of 1958.

The balance of the money for the aircraft will be supplied by depreciation, earnings and the sale of present planes.

The new agreement replaces, in part, a $29,500,000 credit negotiated with the same banks on June 30, 1955. The maximum withdrawal on this loan was $15,500,000 during February, 1956.—V. 184, p. 728.

Operator Consolidated Mines Co. (Nev.)—Hearing by SEC March 13 on Delisting—

The Securities and Exchange Commission announced on Feb. 19 the entry of an order and notice of hearing under Section 19(a) (2) of the Securities and Exchange Act of 1934 to determine whether it is necessary or appropriate for the protection of investors to suspend for a period not exceeding 12 months, or to withdraw, the registration on the San Francisco Mining Exchange of the common stock of this company.

The basis for the order is that the Commission has reason to believe that this company made certain false and misleading statements in a Form 8-K report filed with the Commission on Jan. 10, 1957 relating to the acquisition by Operator Consolidated of certain mining claims and equipment in Inyo County, Calif., from Ajax Tungsten Corp. The order charges that Operator Consolidated falsely claimed an exemption from registration under the Securities Act of 1933 for 1,360,000 shares issued to California Uranium Corp. in connection with the transaction; that the value of the property acquired and the consideration paid therefor are not fully disclosed; and that it was falsely stated that there was no material existing or prior relationship between Operator Consolidated and the other companies involved except for one common officer.

The hearing for the purpose of taking evidence with respect to the foregoing matters, is scheduled for 10:00 a.m., on March 13, 1957, in the Commission's Los Angeles Branch Office.

Owens-Corning Fiberglas Corp.—Registers With SEC

This corporation plans to offer to the public next month a new issue of 300,000 shares of common stock (par $1), Harold Boeschenstein, President, has announced. A registration statement covering the shares to be offered was filed on Feb. 18 with the SEC.

The proposed issue will represent the first financing by the company since its common stock was initially offered to the public five years ago this month. The offering will be made through a nationwide group of underwriters to be headed by Goldman, Sachs & Co., Lazard Freres & Co. and White, Weld & Co.

The capitalization of the company at Dec. 31, 1956, consisted of $26,150,000 of long-term debt and 6,296,358 shares of common stock. The proposed issue will represent an increase of slightly less than 5% in the outstanding shares of common stock.

The purpose of the proposed offering is to replenish and maintain the company's working capital position, which has been reduced by major capital expenditures during 1956. Capital expenditures aggregated approximately $31,000,000 in 1956 and are presently expected to be about $21,000,000 in 1957.

The corporation was formed in 1938 by Owens-Illinois Glass Co. and Corning Glass Works to continue the development of fibrous glass products and is today the leading manufacturer of these products. Its sales, which totalled $173,065,000 in 1956, comprise a wide variety of products including Fiberglas "wool" and Aerocor, used for thermal and acoustical insulation; textile products, consisting of strands, yarns, mats and rovings used by other companies as electrical insulation and in the manufacture of decorative and industrial products, insect screening, reinforced plastics and other products; bonded mat products, used in built-up roofing and protective wrapping for underground pipes; and fiber packs, used in various types of filters.—V. 182, p. 1341.

Pacific Northwest Power Co.—Renews Claim—

This company on Feb. 14 renewed its claim before the Federal Power Commission that the four-company proposal to build a $234,000,000 hydro-electric project on the Snake River below Hells Canyon was "fully adaptable to a comprehensive plan" of water resource development.

At the same time, the company criticized the delaying tactics of the National Hells Canyon Association and other public power intervenors, charging them with causing a multi-million-dollar economic loss to Pacific Northwest electric customers and "exposing them to a serious and disastrous power shortage."

In a 140-page legal brief the four-utility generating company urged the Commission to disqualify the public power groups from further intervention in the PNP application for a Federal license to build its Mountain Sheep and Pleasant Valley dams which have a potential capability of 1,446,000 kilowatts.

PNP counsel said in the company's brief that there was "uncontradicted evidence in the record" that the project is "fully adaptable to a comprehensive plan of development and would provide as much power, flood control, navigation and recreation benefits as any other alternate plan of record in this reach of the Snake River."

Organized by Washington Water Power, Pacific Power & Light, Portland General Electric and Montana Power companies, PNP filed its application for license to build the two-dam project between Idaho and Oregon, Sept. 7, 1955.

The generating firm has long been on record that it was "ready, willing and able to build the Snake River project," which it says is "the only project that could be in production in time to relieve critical power shortages of 1960."

Officials said the project was located above the mouths of the Salmon and Imnaha River tributaries to protect important fish runs. The 534-foot-high Pleasant Valley dam would back water 34 miles to the Heils Canyon site, already licensed to Idaho Power Co. Pleasant Valley would be the third highest dam of its type in the world.

PNP pointed out that a year's delay on its construction program has already necessitated increasing cost estimates some $20,000,000 to a present estimate of $234,000,000. More than $10,000,000 of the increase is in the two dams themselves, and the balance in increased transmission and other costs.

FPC hearings extending over six months were concluded Dec. 19, 1956.

Next step in the PNP case is the filing by March 15 of reply briefs by the intervenors and by the FPC legal staff.—V. 184, p. 2785.

Philadelphia Electric Co.—Plans Financing—

R. G. Rincliffe, President, on Feb. 14, said that about 60% of the company's anticipated capital spending of $460,000,000 in the next five years would come from sale of securities. The remaining 40% will be financed from internal sources, he stated.

Mr. Rincliffe added: "The company will thus call upon the financial markets for about $260,000,000 over the next five years." The company is not yet sure what type of securities will be sold, he said, but "we expect to make several offerings of bonds and probably two offerings of common stock over this five-year period."

For the initial steps, Mr. Rincliffe continued, "our tentative plans for this year, subject to market conditions, include a common stock offering about the middle of the year and a bond issue later in the year. The common stock, to be offered through rights, probably will be on the basis of one new share for each 20 shares outstanding. "Based on the company's outstanding 12 million, this would indicate an initial offering of about 600,000 shares.—V. 185, p. 825.

Popular Plastic Products Corp.—Completes Stock Issue—Enters Toy Field—Plans Licensing Tie-Ups—

Leonard E. Elterman, President, announced on Feb. 13 that the public offering of 150,000 shares of class A common stock to be sold at $2 per share through the underwriting firm of Lepow Securities Corp. of New York City, has been over-subscribed.

The decision to become a publicly owned corporation after 12 years of private ownership, Mr. Elterman said, was motivatd in large by the increased business of Popular Plastic Products Corp. and its newly formed wholly-owned subsidiary, Dewl Plasti-Toy Corp. Popular Plastic Products' primary business is that of custom injection molding and the creation of ideas and product development.

During the past year Popular Plastics has developed a line of clear and durable socket meter covers for modern electric meters and street lighting controls. One of the meter covers is currently being tested on various installation applications representing extremes of temperature and weather conditions by over sixty of the major utility companies in the country.

Through the operations of Dewl Plasti-Toy Corp., Popular Plastics has entered the toy field through the production of its own proprietary items.

Dewl Plasti-Toy Corp., wholly-owned subsidiary of Popular Plastic Products Corp., which last year introduced the LINK-KIT construction set to the toy world with tremendous success, has announced that 20 new items of its quality line will be formally presented to the public at the Annual Toy Show in the early part of March, 1957.

Mr. Elterman, also President of the Toy unit announced that present plans of the company include licensing tie-ups with Walt Disney Productions and Music Corp. of America.

The contemplated tie-up with Disney is for the use of the Disney name and Disney characters in association with a number of the company's new products to be introduced this March at the Toy Fair.

Plans are being formulated with MCA for the use of many of their stars such as Harry Belafonte, Doris Day and Ernie Kovacs in the endorsement of part of the new line.

Franklin D. Roosevelt, Jr. has been appointed as consultant to the management of Popular Plastic Products Corp. He is a senior partner of the New York City law firm of Roosevelt & Freidin, attorneys for the corporation.

In addition to serving as General Counsel, Mr. Roosevelt will act as a consultant to the management in matters of expansion, development and acquisitions for the company.

The company is now in production on baby carriage bodies and lily pools. The new factory will be temporarily housed in East Northport, L. I., N. Y.—V. 184, p. 729.

Producers Fuel Co., Pittsburgh, Pa.—Stock Offering Suspended by SEC—

The Securities and Exchange Commission, it was announced on Feb. 18, has issued an order temporarily suspending a Regulation A exemption from registration under the Securities Act of 1933 with respect to a public offering of stock by this company. The order provides an opportunity for hearing, upon request, on the question whether the suspension order should be vacated or made permanent.

In its Regulation A notification, filed in July, 1956, Producers Fuel proposed the public offering of 60,000 shares of its capital stock at $5 per share. The Commission asserts in its suspension order that it has reasonable cause to believe that the terms and conditions of Regulation A have not been complied with; that the offering circular contains false and misleading representations of material facts; and that the use of said offering circular in the offer and sale of Producers stock "would operate as a fraud or deceit upon the purchasers."

More particularly, the Commission challenges the accuracy and completeness of information contained in the offering circular concerning 1) the leases, and interests therein, which are to be owned by the issuer; (2) the extent of the proven oil and gas reserves on properties covered by such leases; (3) the actual production of oil and gas from such properties; and (4) the oil and gas recovery methods to be employed thereon by the issuer. In addition, the order asserts that the notification does not disclose sales of stock within one year of the filing of the notification by the predecessor and affiliate of the issuer; and that the aggregate amount of such stock (sold in violation of the registration requirement of the Act), plus the offering price of the 60,000 shares the subject of the notification, exceeded the $300,000 limitation prescribed by Regulation A.—V. 184, p. 430.

Public Service Co. of Oklahoma—Fuel Contract—

bonds to be issued by Transok to provide funds for the construction of additional pipe lines and related facilities. The Commission has issued an order giving interested persons until Feb. 28, 1957, to request a hearing.—V. 185, p. 723.

Raytone Screen Corp., Brooklyn, N. Y. — Files With Securities and Exchange Commission—

The corporation on Feb. 15 filed a letter of notification with the SEC covering 50,000 shares of common stock (par 10 cents) to be offered at $3.25 per share, through J. P. Emanuel & Co., Inc., Jersey City, N. J. The proceeds are to be used to reduce debt, for purchase of inventory and for working capital.—V. 184, p. 430.

Republic Aviation Corp.—To Reduce Employees—

The corporation on Feb. 18 announced a projected reduction of production personnel of approximately 4,000 employees between March 1 and June 1 of this year. A company spokesman stated that a further reduction by the end of the year may be necessary. No engineers will be included in the projected reduction.

Reasons given for the reduction in employment included the phasing-out of manufacture of the F-84F Thunderstreak (which, as previously announced, goes out of production in August), and the fact that production build-up of the new F-105 Thunderchief will not reach full-scale proportions until late next year.

In addition the company said that thorough surveys are being made of all production facilities now used by the plant away from the Farmingdale location to determine whether all or part of their floor space will be continued in operation. These include plants at Port Washington, Greenlawn and Hicksville. With the lowered production requirements it is possible that much of the work now being carried out in the above plants can be moved to Farmingdale. These surveys will not be completed for a month or six weeks.

It was also said that "reduction in strength of certain types of combat equipment, due to modernization of war materiel as stated in the President's Budget Message, plays a small part in the present situation. As our planes and missiles attain greater performance potentials, the unit numbers tend to decrease. However, increased complexity and size of the new 'Century Series' fighters will require us to maintain a large production force when production on these models gets fully under way."

The company presently employs 18,000 people.—V. 185, p. 188.

Southern Co.—Registers With SEC—

The company filed a registration statement with the SEC on Feb. 15, 1957, covering 1,507,304 shares of its $5 par common stock. As previously reported Southern proposes to offer these shares for public sale at competitive bidding, subject to the prior subscription rights of its stockholders (exercisable on the basis of one additional share for each 13 shares held of record March 13, 1957; rights to expire on April 4, 1957).

Net proceeds of the financing, together with treasury funds to the extent required up to approximately $2,500,000, will be applied to the investment during 1957 of up to $9,250,000 in the common stock of Alabama Power Company and up to $19,750,000 in the common stock of Georgia Power Company. Each of the latter two companies is investing during 1957 $750,000 of the funds thus to be received in common stock of Southern Electric Generating Company and they propose to use the balance of such funds for their own property additions and improvements. The total construction expenditures of Southern's operating affiliates for 1957 are estimated at $140,200,000. There is now pending before the SEC a proposal of Georgia Power Company to acquire the properties of Georgia Power and Light Company for an estimated cash payment of approximately $11,000,000 and the asumption of $7,705,000 of outstanding bonds.—V. 185, p. 868.

Sterling Drug Inc.—Suit on Pre-War Agreements Dismissed—Anti-Trust Case Limited—

A suit for damages based on pre-war agreements, brought by Farbenfabriken Bayer A. G. against Sterling Drug Inc., in the U. S. District Court, District of New Jersey, has been "dismissed without prejudice" by Federal Judge William F. Smith, it was announced on Feb. 18.

In a companion case, on alleged violation of anti-trust law, Judge Smith simultaneously held that the action instituted by the German company could continue, but that it must be based upon acts committed during the six years preceding the filing of Farben's complaint on Sept. 28, 1955.

Judge Smith's ruling in the action on the pre-war agreements held that, since under a joint resolution of Congress the property rights claimed by Farben were in existence on Jan. 1, 1947, the German company was still an enemy alien with respect to those claims and could not prosecute an action based upon them. As to the anti-trust suit, the Court held that "the claim asserted in the instant case is necessarily limited by the statute of limitations."

The dismissed suit was brought by the German company for an accounting of profits resulting from a 1920 contract. In 1941 the Federal Court held this contract to be in violation of the anti-trust laws and therefore illegal.

Judge Smith in his decision pointed out that any rights which might have arisen out of the alleged breach of contract were subject to seizure and vesting by the United States. He also cited the following quotation from an earlier case: "In the reservation of the power to seize the property of German nationals Congress may have had in mind that such seizures would tend to serve as a deterrent to a third war with Germany, but it is certain from the legislative history of the joint resolution, that the proceeds of the property seized were to be used to remedy the evils which had arisen from the war; that the proceeds of the seized property were to be used to pay the just and legitimate claims against the United States arising from the war in accordance with the War Claims Act of 1948. Seizure of the property of enemy aliens for this purpose was clearly a proper exercise of the war powers."

The Court held that "the only relief to which the defendant (Sterling) is entitled at this time is a dismissal of the action without prejudice; if and when the disqualification incident to the enemy status of the plaintiff is lifted, either by treaty or otherwise, the plaintiff may have a right to maintain its action in a court of competent jurisdiction."

Judge Smith also held that the ruling applicable to the first case was inapplicable to the second, because the acts on which the second complaint was based must necessarily have occurred within the six-year period of the statute of limitations. This ruling, according to Sterling's counsel, "is especially significant since it will preclude Farben from asserting any claim in its anti-trust action based on acts which occurred prior to Sept. 28, 1949."

The cause of action on which the claim in the anti-trust case is predicated, Judge Smith ruled, "accrued within six years next preceding the commencement of the action. This cause of action was

igitized for FRASER

not subject to seizure and vesting prior to Jan. 1, 1947. The Joint Resolution, is therefore, not applicable. It may be argued that the plaintiff had a cause of action based upon the alleged conspiracy in restraint of trade prior to Jan. 1, 1947, but it must be noted that this cause of action, if it existed, is not the basis of the present claim. The claim asserted in the instant case is necessarily limited by the statute of limitations."

The firm of Cahill, Gordon, Reindel and Ohl, New York, are representing Sterling Drug Inc. Arnold, Fortas and Porter, Washington, D. C., are representing Farbenfabriken Bayer A. G.—V. 185, p. 385.

Sterling Precision Corp.—Investigation Into Losses—

The American Stock Exchange has received notification from this corporation that a special examination of its instrument divisions has disclosed unrecorded losses in the period since the last audited report; that it is estimated that these unrecorded losses may amount to $750,000; that the personnel responsible have been relieved of their duties, and there is no evidence that any one profited personally; and that the investigation is being continued, and the results will be announced as soon as available.—V. 184, p. 1481.

Texas Co.—Makes Brazilian Loan—New Contract—

It was reported that this company on Feb. 8 had agreed to lend the national oil monopoly in Brazil, Petrobas, $6,000,000 for the new refinery to be erected in Rio de Janeiro, which is to have a capacity of 90,000 barrels per day.

In inviting bids late in 1956 to supply crude oil for the projected refinery, Petrobras suggested that financing proposals also be made by the foreign companies. It thus conveyed the idea that those prepared to do so would receive more favorable treatment in the allocation of contracts.

It is understood that Petrobras granted the Texas company a contract to supply 15,000 barrels per day.

The loan is to be for five years at 6%. It is said to be fully guaranteed by the Bank of Brazil.—V. 184, p. 2228.

Texas Eastern Transmission Corp. — Registers With Securities and Exchange Commission—

This corporation filed a registration statement with the SEC on Feb. 14, 1957, covering $40,000,000 of first mortgage pipe line bonds, due 1977. The bonds are to be offered for public sale through an underwriting group headed by Dillon, Read & Co., Inc. The interest rate, public offering price and underwriting terms are to be supplied by amendment.

Of the net proceeds of the financing, $27,000,000 will be used to prepay outstanding revolving credit notes and the balance will be used in connection with the company's gas expansion and reconversion program. $11,000,000 principal amount of the said notes was incurred in connection with such gas expansion and reconversion program. The total cost of the company's gas expansion and reconversion programs is estimated to be $238,000,000.—V. 185, p. 385.

Thew Shovel Co.—Undertakes New Product—Initial Investment Calls for Issuance of Common Stock—

The company is about to undertake manufacture of a new product in the field of material handling and construction, it was announced on Feb. 13 by C. B. Smythe, President.

The acquisition of the designs, patents and drawings of the new product, which is allied to but not directly connected with Thew's present products, is part of Thew's diversification program, Mr. Smythe said.

The product will be introduced to the trade around mid-year, and its manufacture and sale should be well underway by late 1957.

The initial investment calls for expenditure of about $650,000, partly in cash and partly through issuance of 10,974 shares of presently unissued $5 par common stock. Of these shares 9,072 are to be issued immediately and the remainder will be issued on completion of various phases of the design development.

Thew now has outstanding 455,946 common shares. At the completion of the transaction, outstanding shares will be increased to 466,920.—V. 184, p. 2489.

The company has outstanding 900,000 common shares, not including 150,000 shares reserved for issuance under its restricted stock option plan. The selling stockholders, and the number of shares to be sold by each, are as follows: Harry H. Borun, President, 75,000 of 116,868 shares held; Robert Borun, Executive Vice-President, 75,000 of 107,675 shares held; and Norman Levin, 50,000 of 50,000 shares held. (All three selling stockholders reside in Beverly Hills)—V. 179, p. 1523.

Tidewater Oil Co.—Alkylation Unit "On Stream"—

An alkylation plant that enables this company's new Delaware refinery to manufacture the highest quality aviation gasoline has been placed "on stream," company officials announced on Feb. 11.

With a capacity of 5,000 barrels per day, the alkylation plant is the fifth unit to go into the operation at the 130,000-barrel-per-day Tidewater refinery, 15 miles south of Wilmington, Del. The remaining units will begin operations shortly.

Helps Ease European Shortage—

This company on Feb. 14 listed several steps it has taken to help ease the European oil shortage from the closing of the Suez Canal to Feb. 1:

(1) Scheduled imports of Middle East crude oil were reduced by 1,440,000 barrels.

(2) Company tankers carrying 970,000 barrels of crude scheduled for delivery to the U. S. East Coast were diverted to Europe.

(3) Scheduled refinery runs on the East and Gulf Coasts were reduced by 900,000 barrels. Refinery yields were changed to increase distillate and fuel oil output, while product stocks were reduced to minimum levels.

(4) To assist in accomplishing the above, tanker space was made available for European service by substitution of 400,000 barrels of Canadian crude oil and the use of oil from storage in West Coast operations.—V. 185, p. 490.

Tri-Continental Corp.—Phillips Purchase Exempted—

It was announced on Feb. 18 that an exemption order has been issued by the SEC permitting the acquisition of $4,900,000 of 4¼% convertible subordinated debentures, due 1987, of Phillips Petroleum Co. by Tri-Continental Corp., Tri-Continental Financial Corp., Broad Street Investing Corp., and Whitehall Fund, Inc. Under a registration statement which became effective Feb. 7, 1957, Phillips Petroleum made a public offering of $171,720,200 of such debentures. The four investment companies propose to acquire such debentures in the respective amounts of $2,000,000, $2,000,000, $750,000, and $150,000. Because one of the directors of each of the four investment companies is a limited partner of one of the underwriters for the offering, their acquisitions of the debentures are prohibited by the Investment Company Act unless the Commission issues an exemption order.—V. 185, p. 869.

Union Carbide & Carbon Corp.—To Build Nuclear Research Center in Sterling Forest—

Plans for the construction of a nuclear research center in Sterling Forest, N. Y., were announced on Feb. 19 by Morse G. Dial, President. The Sterling Forest region is located in the southern part of Orange County, N. Y., approximately 40 miles from New York City.

The major facilities on the site will include: a five megawatt pool-type reactor, a radioactive materials laboratory, an ores and engineering laboratory, and a building for allied research operations and administrative functions. The architect-engineer for the center is the Osborn Co. in Cleveland. The Research Center will be operated jointly by Union Carbide Nuclear Co. and Union Carbide Ore Co., two of the corporation's divisions. It will serve as the focal point for nuclear research activity within Union Carbide. Research programs will be geared to the study of the effects of radiation on products and processes involving plastics, gases, metals, carbons, and chemicals.

Completion of the Research Center is scheduled for late 1958 or early in 1959. It will occupy a site in the Sterling Forest region under an agreement with the Sterling Forest Corp., a subsidiary of City Investing Co. It will be the first of several research centers planned for the area by City Investing. In this type of development, employees of a research organization will be given the opportunity to live in residential communities planned by City Investing for the surrounding area. Initially, approximately 150 persons, including scientists, engineers and metallurgists, will be employed in the Research Center.

Union Carbide Nuclear Co. has already established temporary research quarters, approximately four miles from the Research Center site, on Long Meadow Road near Route 210, in the Sterling Forest Research Building where Sterling Forest Corporation maintains field offices. Special investigations involving chemical analysis and ore processing have already started in the temporary laboratory.

Union Carbide Nuclear Co. mines and processes uranium and other metals at installations in Colorado, Utah, and California. Its operations extend to the gaseous diffusion plants at Oak Ridge, Tenn., and Paducah, Ky., and to Oak Ridge National Laboratory, all of which Union Carbide manages for the U. S. Atomic Energy Commission.

Union Carbide Ore Co. procures domestic and foreign ores used by the corporation for metallurgical and other purposes. The company also is active both in this country and abroad in the search for new mineral deposits.

The number of preferred stockholders continued to decline, reaching 8,743 at the year-end, a decrease of 3.6%. The decline is due largely to an increase in holdings of the preferred stock by foundations, trusts, funds and similar large holders.

The company has 9,461 more common stockholders than five years ago—an increase of 55%.

Vertol Aircraft Corp. — Merger Proposal Withdrawn—Sales and Earnings Reached All-Time High in 1956—

Don R. Berlin, President, on Feb. 14, in a letter to the stockholders, said that Northrop Aircraft, Inc. on Feb. 13 notified Vertol that it considers its merger proposal withdrawn.

Mr. Berlin further stated: "Northrop Aircraft, Inc., had indicated two prerequisites to the approval by its board and the submission to its shareholders of a merger proposal. The first of these was the placing of the Vertol stock owned by Piasecki Aircraft Corp., in a voting trust. The second was an agreement that the Rockefeller family group would place its Vertol stock in a similar voting trust, if the Rockefeller group, in the judgment of the Northrop board of directors, ever assumed control of a company competitive with Northrop. When the directors of both companies met on Jan. 16, the Rockefeller agreement had been signed but the Piasecki Aircraft Corp. voting trust had not been executed. It was therefore necessary for both boards to postpone action on the proposed merger.

"During this period of enforced delay, conditions naturally changed. Fluctuations are inherent in the aircraft industry. More than four months have passed since the merger proposal was made and announced. The Northrop company on February 13 notified Vertol that it considers its merger proposal withdrawn.

"In view of these developments, no further action by the Vertol company toward consummating a merger is anticipated at this time."

Sales in 1956 reached an all-time high of $90,025,000 and net earnings after taxes were also at an all-time high of $3,437,000 or $6.34 per share of stock presently outstanding. The backlog of unfilled orders at Dec. 31, 1956 was approximately $117,000,000 compared with $125,000,000 at the end of 1955. Operations during 1957 are expected to continue at approximately the same level as in 1956, according to Mr. Berlin.

To Acquire Property in Eddystone, Pa.—

Vertol Aircraft Corp. has made an agreement to acquire a 291-acre industrial plot which once was part of the Baldwin-Lima-Hamilton plant at Eddystone, Pa. The property was purchased from Edly, Inc., at an undisclosed price. W. R. Frysztacki, Vertol Vice-President and Secretary, said plans had not yet been completed for developing the new site, but stated definitely that no move from the present Morton, Pa., plant is contemplated. He indicated the Eddystone property is for long-range growth.—V. 185, p. 529.

Virginia Electric & Power Co.—Plans Financing—

A two-for-one split of the common stock was recommended on Feb. 15 by the directors. It is subject to the approval by stockholders at a meeting on April 17 and by regulatory commissions. It would be expected to become effective April 26.

The directors also approved a plan to sell additional common stock in June to raise about $22,000,000. The money would be used to pay for construction.

Donald C. Barnes, Chairman said the stock split was proposed to broaden the number of stockholders. There are now 6,600,000 shares of common stock outstanding of $10 par value. Under the split the par would be changed to $8 per share.—V. 184, p. 1958.

As a result of the expansion, the plant's production capacity, recently announced by the Atomic Energy Commission as 550 tons per day, will be increased, the announcement said.

Washington Natural Gas Co.—Plans Refunding, etc.—

The directors on Feb. 18 authorized financing totaling $21,500,000, the largest "package" in the company's history, Charles M. Sturkey, President, has announced.

Expansion of the company's system to meet demands for natural gas accounted for most of the total, including $5,500,000 for construction in 1957. Present outstanding bonds and bank loans will be refunded, he said.

Action by the directors approved the sale of the bonds, for which commitments have been made to insurance companies. They also authorized application to the Washington P. S. Commission for certification to permit the transaction.

The new bond issue will be voted upon by stockholders in a meeting called for March 18.

The new financing will be used to expand the company's natural gas distribution system throughout the service area which extends from Marysville to Centralia-Chehalis, inclusive. Marysville is scheduled to receive natural gas in late summer or early fall.—V. 184, p. 2673.

The SEC on Feb. 19 announced the issuance of an order authorizing this company to issue and sell, through an underwritten offering to its stockholders, 528,000 additional shares of its $5 par common stock, at the rate of one additional share for each 16 shares held on the record date. Warrants evidencing such subscription rights are to be issued on or about Feb. 27 to stockholders of record at the close of business on the day before. West Penn will use the net proceeds of its stock sale to purchase additional common stock of its subsidiary companies in the approximate amount of $13,400,000. The subsidiaries will use such funds together with other cash resources and the proceeds from the sale of about $34,000,000 of senior securities, to finance their construction programs during 1957 and 1958, estimated at $101,500,000.

The SEC also authorized The Potomac Edison Co., a subsidiary of West Penn, to increase its authorized shares of common stock from 800,000 to 1,500,000 shares. Action was deferred on Potomac's proposal to issue and sell an additional 100,000 common shares to West Penn for $2,000,000 by the Commission pending further orders of authorization by the Maryland P. S. Commission and the Interstate Commerce Commission.—V. 185, p. 764.

West Penn Power's construction expenditures for 1957 and 1958 are estimated at $61,000,000. To carry out this construction program the company expects to use its cash resources, the proceeds of this common stock financing, and the proceeds from the issue in 1957 of about $20,000,000 of senior securities.—V. 185, p. 190.

THE FOLLOWING STATEMENT HAS BEEN MADE BY THE SECRETARY,

BRITISH-AMERICAN TOBACCO COMPANY, LIMITED

1. At a Meeting of the Directors held today, it was decided to recommend to the Stockholders at the Annual General Meeting, which was fixed to be held on the 29th March next, the payment on the 31st May next of a final dividend for the year ended 30th September, 1956 of eleven pence per 10/— of Ordinary Stock (free of United Kingdom Income tax) (1955—9d.) on the Issued Ordinary Stock, making with the interim dividends already paid, a total of two shillings (1955—1/9d.) for the year.

2. If the payment of the dividend is confirmed, transfers received in order at the registered office of the Company up to 29th April next will be in time to be passed for payment of the dividend to the transferee. In the case of Bearer Warrants the dividend will be paid against the deposit of Coupon No. 229.

3. The Directors also decided to declare a first interim dividend in respect of the year to 30th September, 1957 of seven pence per 10/— of Ordinary Stock (free of United Kingdom Income Tax) on the Issued Ordinary Stock, payable on the 29th March next.

4. Transfers received in order at the registered office of the Company up to the 25th February will be in time to be passed for payment of this interim dividend to the transferee. In the case of Bearer Warrants the dividend will be paid against the deposit of Coupon No. 228.

5. The Directors have authorized the following announcement of the results of the Group's operations for the year:—

	Years to 30th September	
	1956	1955
The total consolidated profit, before taxation (see Paragraph 8 below), was	£51,878,873	£51,960,942
from which must be deducted:—		
United Kingdom Taxation	£ 7,388,272	£ 6,672,479
Overseas taxation	20,630,122	18,288,357
Outside Shareholders' interests in profits	2,301,845	2,999,266
Leaving Group Net Profit	21,558,634	24,000,840

The proportion of the Group Net Profit dealt with in the Accounts of British-American Tobacco Co. Ltd., including dividends from Subsidiaries, was £8,527,919 (1955—£7,639,555). From the Group Net Profit £3,400,000 (1955—£2,000,000) has been transferred to Fixed Asset and Stock Replacement Reserves (see Paragraph 6 below). Of this transfer the British-American Tobacco Co. Ltd. proportion was £50,000 (1955—Nil). Thus Group Available Net Profit was £18,158,634 (1955—£22,000,840), of which the British-American Tobacco Co. Ltd. proportion was £8,477,919 (1955—£7,639,555).

Appropriations by the Holding Company are as follows:—

	1956	1955
Preference dividends (net)	£ 336,375	£ 332,813
Interim Ordinary dividends paid—		
6d. per 10/— Stock paid 29/3/56	1,781,832	3,563,664
7d. per 10/— Stock paid 28/9/56 (1955—1/— per 10/— Stock)	2,078,804	
Transfer to General Reserve	1,000,000	950,000
Final dividend proposed	3 266 692	2,672,748
Increase in balance carried forward	14,216	120,330
making, with the balance brought forward	2,462,942	2,448,726

6. The transfers to Fixed Asset and Stock Replacement Reserves represent an estimate of the amounts which, having regard to changes in price levels, should, in the opinion of the Directors, be retained out of Group profits towards maintaining over the year that part of the real capital of each company in the Group represented by Fixed Assets and Stocks.

7. There have been changes over the year in the rates of exchange applicable to the conversion to sterling for consolidation purposes of the current assets and liabilities of certain of the Overseas Subsidiaries. The Holding Company's proportion of the net resulting difference on exchange of £1,355,105 (1955—£797,222) has been charged to Currency Conversion Adjustment, the balance of which is deducted from Reserves and Undivided Profits in the Consolidated Balance Sheet.

8. Owing to the present unsettled situation in the Middle East, certain subsidiaries in that area have not been included in the consolidated figures in respect of the year to 30th September, 1956 and full provision has been made for the investment in those subsidiaries in the books of the relevant sub-holding company out of reserves and undivided profits at 1st October, 1955. As a result of these steps the Consolidated Balance Sheet at 30th September, 1956 will reflect a net reduction in the Reserves and Undivided Profits as at 1st October, 1955 of £5,756,685.

9. At the above-mentioned Board Meeting it was also decided to pay, on the 29th March next, the half-yearly dividend due on the 5% Preference Stock amounting to 6d. for each £1 unit of Preference Stock, less United Kingdom Income Tax. Transfers received in order at the registered office of the Company up to 25th February will be in time to be passed for payment of this dividend to the transferee. In the case of Bearer Warrants the dividend will be paid against the deposit of Coupon No. 107.

10. The Directors have also decided to pay, on the 30th April next the half-yearly dividend due on the 6% Preference Stock amounting to 7.2d. for each £1 unit of Preference Stock, less United Kingdom Income Tax. Transfers received in order at the registered office of the Company up to the 5th April next will be in time to be passed for payment of this dividend to the transferee. At the above Board Meeting the Directors also authorized the issue and publication of the following special announcement.

It is proposed to convene an extraordinary general meeting of the Company to be held immediately following the conclusion of the above mentioned Annual General Meeting on the 29th March next for the purpose of increasing the authorized capital of the Company to £60,000,000 by the creation of 29,000,000 new Ordinary Shares of ten shillings each. It is further proposed to capitalize the sum of £11,878,880/10/0 (part of the reserve and undivided profits) and to apply the same in paying up in full 23,757,761 of the unissued Ordinary Shares of ten shillings each for distribution to the existing Ordinary Stockholders in the proportion of one new ten shilling Ordinary Share for every £1/10/0 of Ordinary Stock held by them respectively. Any of the new shares which would fail to be allotted in fractions as the result of the proposed distribution will be allotted to trustees or a trustee to be appointed by the Directors and sold and the net proceeds divided amongst the Ordinary Stockholders entitled to such fractions.

The above mentioned shares, which will all be issued in registered form, will immediately on issue be converted into stock and it is the Board's intention to apply to the Stock Exchange for permission to deal in and for quotations for the new Ordinary Stock.

The consent of the Capital Issue Committee to the above proposals has been obtained.

If the necessary resolutions are passed authorizing these proposals the new shares will be allotted about the middle of June next and they will not rank for any dividends declared prior to the date of allotment. Arrangements will be made to enable holders of Ordinary Stock represented by warrants to bearer to obtain an allotment of the new shares to which they will be entitled.

The Board desires to emphasize that this proposed capitalization of Reserves and Undivided Profits, which are already fully employed in the business, does not carry any implication whatsoever that the total amount to be distributed by way of dividends will be any greater than if the capital had not been increased.

Further details of the proposals will be set out in the letter and notice convening the Extraordinary General Meeting which will be sent to stockholders early in March with the Annual Report and Accounts for the year ended 30th September, 1956.
