Alco Products, Inc.—Large Locomotive Shipment—

The growing importance of export markets to American industry was underscored at Weehawken, N. J., on Sept. 23 at a ceremony marking the largest single shipment of diesel-electric locomotives ever to leave the Port of New York.

The locomotives—20 in all—are the first of 100 streamlined, 1800-horsepower units being built by ALCO Products, Inc. for the Government of India. In addition to comprising the largest shipment of its type from the port, the Schenectady-built locomotives are the first of an order totaling 100 from India, and they will be the first broad-gauge main-line diesels in that country.

The 100-unit order held by ALCO is the largest ever placed from India with any locomotive builder.

The ALCO "World" locomotives making up this shipment represent the first production on orders totaling \$56,000,000 that were announced by the manufacturer last May. Those orders were for 100 "World" units for India, 18 similar locomotives for Pakistan and 130 road-switching locomotives for Argentina.

The Argentine and India orders are the two largest ever placed with a single locomotive manufacturer by any railroad outside the North American continent.—V. 185, p. 2909.

The expansion will include increased production facilities for melamine and urea compounds and a wing on the administration building. The added production facilities will increase capacity by about 50%. Building construction will be completed by mid-Fall, this year, and the installation of production equipment will make the anticipated new quota available next year.

Construction of the administration building wing is now underway and is expected to be completed by Spring, next year. The expansion will add more than 20,000 square feet to present facilities.—V. 186, p. 937.

They will also consider and act upon the adoption of a proposed employee Stock Option Plan pursuant to which a maximum of 180,000 shares of the corporation's stock would be available for optioning, with no more than 500 shares optionable to any one person.

There are presently 3,896,035 shares (including 55,250 shares in the treasury) of issued stock. The effect of the proposed change would be to increase the issued shares to 7,792,070 (including 110,500 shares in the treasury).

The proposed reclassification would result in the charging of \$3,896,035 (the aggregate par value of the additional issued shares) to "capital surplus" and the crediting of a like amount to the "capital stock account" of the corporation.—V. 186, p. 1258.

Gross revenues and net earnings of this company for the first six months of 1957 were substantially higher than those for the comparable half year of 1956, Murray A. Schultz, Executive Vice-President, announced on Sept. 23.

Gross revenues of American Northland and its Canadian subsidiary, Wainwright Producers & Refiners Ltd., amounted to \$1,870,438 for the half year ended June 30, 1957, compared with \$1,196,375 for the like period a year ago. American Northland's consolidated net profit for the first six months, which includes its 60% share of the earnings of its subsidiary, was \$102,071 compared with \$34,016 for the corresponding months last year. There are currently 1,488,018 shares of common stock outstanding.

During the month of July, oil deliveries from the 73 wells in which the company has interests reached an all-time high. Together with the profits from its refinery subsidiary, July was American Northland's most profitable month up to that time, Mr. Schultz commented.

The drilling of three wells in the northeast portion of the Wainwright Field in Alberta, Canada, has successfully extended that portion of the field, Mr. Schultz said.—V. 171, p. 749.

American Potash & Chemical Corp.—New Affiliate—

Formation of a new company to participate in the government's high energy fuel program was announced on Sept. 25 by Peter Colefax, President.

The new company, AFN, Inc., is owned one-third each by American Potash, Food Machinery & Chemical Corp. and National Distillers & Chemical Corp. American Potash has been appointed operator of the company, whose initial work will be carried on at Henderson, Nev.

AFN, Inc. has been awarded an Air Force contract covering process development and semi-pilot plant work in the high energy fuel field. The fuel will be boron-based, but details beyond that are classified.

American Potash is a large producer of boron chemicals, lithium, chlorates, perchlorates and many other products. Food Machinery & Chemical produces alkalis, phosphates, peroxygen chemicals, insecticides and many other compounds. National Distillers' U. S. Industrial Chemicals division products include sodium, titanium, ethyl chloride, ethylene and a large variety of other chemicals.

American Potash's participation in AFN is a further step in its active program in boron chemicals, which has included extensive research in behalf of the military services both as a subcontractor to Callegary Chemical Co. in the Navy's high energy fuel program and as a prime contractor for the Air Force.—V. 186, p. 521.

American Window Glass Co.—To Increase Output—

This company last week began preheating a new furnace which, when it begins producing glass about Oct. 15, will raise output by 21%. This increase in the company's production, according to Otto G. Schwenk, President, is in line with the improving demand situation in window and other sheet glass.

This new unit will give the company a total of five clear glass furnaces of which four will be in production in addition to its operating gray glass furnace. The newest furnace has a rated daily capacity of 85 tons and is served by three 100-inch drawing machines. It was completed early this year, but put on standby awaiting an upturn in demand, Mr. Schwenk said.

With the start of production of the furnace, the second at the company's Jeannette plant, American's output of clear sheet glass will be increased from an operating rate of 54% up to 65% of clear glass capacity.—V. 186, p. 938.

Arkansas Fuel Oil Corp.—Minority Stock May Be Acquired by Cities Service Co. See latter company below.

—V. 185, p. 2442.

Assembly Products, Inc., Chesterland, Ohio — Stock Offered—

L. B. Schwinn & Co., Cleveland, Ohio, on Sept. 26 offered publicly 30,000 shares of common stock (par \$1) at \$10 per share.

The net proceeds are to be used to make payment on land contract, purchase equipment, increase working capital and for other general corporate purposes.—V. 186, p. 1258.

Associated Dry Goods Corp.—Acquisition—

Arrangements were completed on Sept. 25 and the final papers exchanged under which Sibley, Lindsay & Curr, largest and leading department store in Rochester, N. Y., became a member of the Associated group of major department stores.

Late in August, the board of directors of Sibley, Lindsay & Curr unanimously recommended to their stockholders that the offer of Associated Dry Goods Corp. to purchase all of the Rochester store's common stock for \$40 a share be accepted. 250,903 shares, or 99.2% of all the 253,084 shares of Sibley's outstanding stock was deposited and this was acquired by Associated on Sept. 25 by the exchange of 100,694 shares of common stock of Associated and \$6,864,259 in cash.

Robert J. McKim, President of Associated, stated that "Sibley, Lindsay & Curr will operate as an autonomous subsidiary of Associated Dry Goods."

"Sales of Sibley's last year amounted to \$30,677,000, to mark the fourth consecutive year of record sales. The store is currently operating two suburban branches and building two additional branch stores in the area surrounding Rochester," Mr. McKim added.

In the transaction, Associated also acquires a substantial stock interest in the Erie Dry Goods Co., the leading department store in Erie, Pa.—V. 183, p. 1226.

Automatic Canteen Co. of America—Denies Monopoly

The public generally, including competitors of this company, has benefited from Automatic's merger with The Rowe Corp., Nathaniel Leverone, Chairman of the Board of Automatic, stated on Sept. 18.

Discussing his company's reply to the Federal Trade Commission's complaint that acquisition of Rowe constituted a violation of the Clayton Act, Mr. Leverone asserted that the merger will in no way lessen competition or tend to create a monopoly and revealed that Automatic had requested the complaint be dismissed.

Supporting the company's claim that acquisition of Rowe will not result in manipulation of the supply of vending machines manufactured by Rowe and formerly available to Automatic's competitors, Mr. Leverone pointed out that in each year since the merger Rowe has sold increasing percentages of machines to customers other than Automatic and itself. He added that "present orders indicate that such sales in 1958 will likely double the 1957 figure."—V. 186, p. 522.

Barker Bros. Corp.—To Redeem Preferred Stock—

The corporation has called for redemption on Oct. 24, 1957, all of its outstanding 4½% cumulative preferred stock at \$52.50 per share and accrued dividends. Payment will be made at The Chase Manhattan Bank, 43 Exchange Place, New York, N. Y.—V. 186, p. 939.

Net sales for this period ended June 30, 1957 were \$62,589,000; net profits, after taxes, for this period were \$2,451,000, or \$1.97 per share based on the increased amount of shares outstanding on that date.

This compares with net sales of \$52,546,000, or \$1.93 per share during the same period last year based on fewer number of shares then outstanding.—V. 186, p. 1041.

Bellanca Corp.—Listing Suspension Continues—

The Securities and Exchange Commission on Sept. 20 announced the issuance of an order pursuant to the Securities Exchange Act of 1934, suspending trading on the American Stock Exchange in the \$1 par capital stock of this corporation for a further ten-day period, Sept. 22 to Oct. 1, 1957, inclusive.—V. 186, p. 1146.

Bettinger Corp.—Correction—

Net income for the first half of 1957, calculated on a per share basis, is slightly better than 22 cents per share, compared with 22 cents per share for the first six months of 1956, based on the 212,307 common shares outstanding on June 30, 1956, not 1957 as previously reported in V. 186, p. 726.

Blacksmith Shop Pastries Inc., Rockport, Mass.—Files With Securities and Exchange Commission—

Boston & Maine RR.—Directors Approve Plan—

The directors on Sept. 25 voted to proceed with the company's plans for offering income bonds in exchange for outstanding preferred stock. The exchange plan, which would reduce the company's income tax liability, was approved recently by the Interstate Commerce Commission.

No exchange of stock for bonds will be made this year since the full preferred dividend payable in 1957 out of 1956 earnings was previously ordered by the board. A date for the exchange will be fixed, however, at the October board meeting. While the Commission authorized the company to issue bonds dated Jan. 1, 1955, due Jan. 1, 2005, the railroad intends to ask the Commission to change the issue date of the securities to Jan. 1, 1957, with a Jan. 1, 2007, due date.—V. 183, p. 1146.

British American Oil Co. Ltd.—New Product—

M. S. Beringer, President, on Sept. 24 introduced "B-A Velvet 98," as the greatest gasoline ever to be produced by this company—a powerful gasoline, high in octane containing a new exclusive compound, giving performance as smooth as velvet.

The result of several years of intense research, the new gasoline became available at service stations on Sept. 25.—V. 186, p. 522.

The SEC. it was announced on Sept. 26, has authorized this company and Fall River Electric Light Co. to make additional bank borrowings during the period ending Sept. 30, 1958, as interim financing of their construction programs. Maximum aggregate borrowings during the period for each company will not exceed \$10,000,000; and the maximum amounts to be outstanding at any one time for each company will not exceed \$2,500,000. Prior to Sept. 30, 1958, permanent financing by the two companies is contemplated in the respective amounts of \$8,686,000 and \$3,976,000.—V. 186, p. 1259.

Buckeye Pipe Line Co.—Acquisition—

The company has subscribed to a substantial stock interest in the Everglades Pipe Line Co. which is building a 65-mile petroleum products pipeline from Port Everglades on the east coast of Florida to Miami International Airport and other points south. This line will be operated by The Buckeye Pipe Line Co.

Furthermore, Buckeye is planning the construction of a 70-mile products pipeline from the Detroit area to central Michigan. These projects are scheduled for completion during 1958.—V. 186, p. 522.

Cargill, Inc.—To Operate Georgia Grain Unit—

This corporation on Sept. 26 announced that it will operate a grain elevator in Perry, Ga.

The 320,000-bushel structure, acquired under lease from the Southeastern Seed & Elevator Co., is located in the heart of an important growing area that produces grain, principally corn, for the needs of the giant poultry industry in north Georgia.

H. Robert Diercks, Vice-President in charge of Cargill's grain division, said the elevator will complement the company's nationwide grain-handling system, which presently serves Georgia by low-cost barge movement of Midwestern grain via the Tennessee river and elevators at Chattanooga, Tenn., and Guntersville, Ala. The firm also operates elevators in North Carolina at Wilson, Washington and Belhaven, and at approximately 90 other terminal and country points in the United States.—V. 186, p. 1259.

Expects Good Year—Walter J. Tuohy, President, on Sept. 19, said in substance:

Based on the results of the first eight months, another good year is anticipated for this railroad.

August net income was 86 cents a share, compared with 78 cents a year ago. This brought eight months' net income to \$5.34 a share, compared with \$5.20 in the same period in 1956.

Overseas coal traffic in August amounted to 2,000,000 tons, 5% ahead of the same year-ago month. For the first eight months this traffic totaled 15,700,000 tons, 25% better than the same 1956 period.

An innovation important to this railroad went into operation in June. It is C & O's new Car Location Information Center—CLIC for short. Its job is to keep track electronically of any freight car anywhere on the C & O system. This development provides a service of tremendous importance to our shippers. It also will enable C & O to carry more traffic with fewer cars, which means lower operating costs.

Construction has been started of a new Great Lakes coal pier at the railroad's Presque Isle dock, near Toledo, Ohio. When placed in operation next summer, it will be the fastest, most modern facility of its kind. It is designed not only to load lake vessels but also the largest ocean-going ships that may eventually use the St. Lawrence Seaway.—V. 186, p. 1147.

Chicago & Eastern Illinois RR.—New General Counsel

Patrick C. Mullen, 41, Assistant General Solicitor, has been elected the road's General Counsel by the board of directors, it was announced on Sept. 20 by David O. Mathews, President. Mr. Mullen succeeds Mr. Mathews who served as General Counsel prior to being named President last month.—V. 186, p. 1147.

Chrysler Corp.—New Auto-Pilot System—

Auto-Pilot, a new pushbutton automatic driver assist, will be offered as optional equipment on new 1958 Chrysler and Imperial automobiles, E. C. Quinn, Chrysler Division President, announced on Sept. 27.

The device provides automatic throttle control, acts as a speed reminder, and enables the motorist to cruise on the nation's expanding network of super-highways without his foot on the accelerator if he desires.—V. 186, p. 1260.

Cities Service Co.—Ordered by SEC to Acquire Minority Stock, or Sell Its Holdings in Arkansas Fuel Oil Corp.

The SEC on Sept. 20 announced the issuance of an order under the Holding Company Act directing this company to comply with the Section 11(b) (2) of that Act by the elimination of the public minority stock interest in Arkansas Fuel Oil Corp. or the disposition of 51.5% stock interest in Arkansas Fuel held by Cities.

In a decision issued on Aug. 31, 1955, the Commission denied an application of Cities for exemption of itself and its subsidiaries from the Holding Company Act. Such denial was based on a finding by the Commission that the existence of a 48.5% publicly held common stock interest in Arkansas Fuel constitutes a complexity and results in an inequitable distribution of voting power within the meaning of Section 11(b) (2) of the Act. In that decision, the Commission also ruled that this condition can be satisfactorily remedied only by the elimination of the public minority interest in Arkansas Fuel or by the disposition by Cities of its interest in Arkansas Fuel. However, the Commission withheld the entry of an order at that time directing compliance with Section 11(b) (2) so as to afford Cities and Arkansas Fuel a reasonable opportunity to submit an appropriate program of compliance.

The Commission's decision was appealed to the U. S. Court of Appeals for the Second Circuit and was affirmed by that court on Aug. 14, 1957. Cities filed a motion in the Court of Appeals and thereafter made application to Associate Justice John M. Harlan of the United States Supreme Court, requesting a stay of execution of the order of the Court of Appeals of Aug. 14, 1957, and of any action by the Commission thereunder pending a final disposition of the matter by the Supreme Court. Said motion and application were denied.

More than a year having elapsed since the entry of the Commission's order denying Cities' exemption application, and Cities and Arkansas Fuel not having submitted a program of compliance with the requirements of Section 11(b) (2) of the Act, the Commission concluded that entry of an order requiring such compliance was necessary and appropriate in the public interest and for the protection of investors, particularly in view of the requirement of the law for compliance "as soon as practicable."—V. 186, p. 1260.

Columbia Gas System, Inc.—Deb. Offering Cleared—

The SEC. it was announced on Sept. 26, has authorized the corporation to issue and sell at competitive bidding \$25,000,000 of debentures, series I, due 1982.

This debenture issue constitutes the third step in Columbia's 1957 financing program, the funds from which will be used to meet expenditures estimated as follows: (1) 1957 construction program, \$84,000,000; (2) advance to Gulf Interstate Gas Company, a non-affiliated pipeline company which transports gas to the system from the southwest, \$6,000,000; (3) construction of facilities for extracting and fractionating the heavier hydrocarbon components of the system's Appalachian natural gas reserves, \$4,000,000, or approximately one-third of the total estimated expenditures for such purpose.

Makes Advances to Two Units—

The SEC. it was announced on Sept. 24, has issued an order authorizing this corporation to make additional open account advances in the respective amounts of \$2,600,000 and \$400,000 to The Ohio Fuel Gas Co. and Home Gas Co. for purchases of inventory gas. Total advances will thereby be increased to \$20,600,000 to Ohio Fuel and \$2,000,000 to Home Gas, and are based on revised estimates of the gas storage requirements of the subsidiaries.

To Purchase Additional Preston Oil Stock—

The Columbia Gas System, Inc., it was also announced on Sept. 24, has joined with another subsidiary, The Preston Oil Co., of Columbus, Ohio, in the filing of an application with the SEC for an order authorizing an additional common stock investment by Columbia Gas in Preston Oil; and the Commission has given interested persons until Oct. 4, 1957, to request a hearing thereon.

Preston is engaged primarily in the oil business. According to the application, it proposes to issue and sell to Columbia Gas from time to time during the balance of 1957 and 1958, up to an aggregate of 10,000 shares of its \$100 par common stock, the proceeds to be expended in acquiring leases in the Southwest (Texas and Louisiana) and in exploratory drilling. Of the \$1,000,000 proceeds of the stock sale, it is estimated that \$300,000 will be expended for acquisition of leases and \$700,000 for exploratory drilling.—V. 186, p. 1147.

This being the first full fiscal year that the company's TV subsidiary, Screen Gems, has been renting Columbia's features for television, income therefrom has been recorded on an accrual basis to conform to the company's regular accounting policy.—V. 186, p. 1147.

Commonwealth Edison Co.—To Build New Unit—

The directors have authorized the addition of a big 305,000-kilowatt generating unit at Crawford Station in Chicago, Ill., Willis Gale, Chairman, announced on Sept. 19 in connection with the filing of a registration statement with the Securities and Exchange Commission covering the proposed sale of a nonconvertible preferred stock issue.

Scheduled for service early in 1961, the new unit will bring the Edison system's net generating capability by the summer of that year to 5,608,000 kilowatts, or nearly 2½ times the 2,303,000 kilowatts at the end of World War II. Present capacity is 4,116,000 kilowatts.

The registration statement covers the proposed public offering on Oct. 9 of \$25,000,000 of \$100 par value preferred stock. Application was also made to the Illinois Commerce Commission for authority to issue the stock.

The new preferred will not be redeemable prior to Nov. 1, 1967 through debt or preferred stock refunding at a lower interest or dividend cost.

Arrangements have been made for the underwriting of the 250,000-share preferred stock issue by a nationwide group headed by The First Boston Corp. and Glor, Forgan & Co.

Commonwealth already has under construction three units of the 305,000-kilowatt size now authorized for Crawford Station. One is being installed at Waukegan, Ill., another at Joliet, Ill., and a third at Fisk Station in Chicago. The Waukegan and Fisk units are to be completed in 1958 and the Joliet in 1959.

In addition, a 205,000-kilowatt unit, to be finished in 1958, is now under construction at Crawford Station. Work is also progressing on the 180,000-kilowatt Dresden Nuclear Power Station which is scheduled for completion in 1960.

Commonwealth's construction program for the four-year period, 1957 through 1960, will require an estimated expenditure of \$650,000,000 of which approximately \$200,000,000 is being spent in 1957.

It is estimated that \$280,000,000 additional new money, including the proceeds from the new preferred stock issue just announced, will be required to help finance the four-year construction program. The balance will come chiefly from cash resources on hand plus undistributed earnings and depreciation accruals.

Consolidated Denison Mines Ltd., Toronto, Canada—Opens New Uranium Operation—

The world's largest uranium operation has been officially opened at Quirk Lake, Ontario, Canada; it was announced on Sept. 23. Over 500 guests of this company, including high Canadian government officials, mining experts, and businessmen from both Canada and the United States, saw over 4,000 tons of high-grade uranium ore being mined and processed—roughly 65% of the rated daily capacity of the operation.

The Consolidated Denison property comprises approximately 22 square miles in the Blind River uranium mining area of Ontario. The orebody itself is 2½ miles long and about 1½ miles wide and has been estimated by the company to contain a minimum of 136,787,400 tons of ore grading 0.339% uranium or 2.78 lbs. per ton. Consolidated Denison's orebody has a value of approximately \$4 billion at current prices and has a lifetime of over 60 years at a production rate of 6,000 tons a day, according to the announcement.

Consolidated Denison has contracts with the Canadian Government to supply \$201,895,000 of uranium concentrates by March 31, 1963. Deliveries have already commenced and it is anticipated that the contract will be completed well in advance of 1963.

Commercial operations were begun in June this year when the mill was sufficiently completed to commence processing the uranium ore. Initial production was at the rate of about 2,000 tons daily. Recently it has averaged about 4,000 tons daily, and it is expected that the rate will be up to 6,000 tons a day by the end of the year.

Consolidated Edison Co. of New York, Inc.—Registers Bond With SEC—

This company filed a registration statement with the SEC covering \$60,000,000 of first and refunding mortgage bonds, series N, due Oct. 1, 1987, to be offered for public sale at competitive bidding.

Net proceeds of the sale of the bonds will be applied (1) to the payment of \$43,000,000 of bank notes issued in connection with the interim financing of the company's construction program and (2) the balance, if any, toward payment of additions to utility plant on or after Aug. 1, 1957. The company estimates that its construction expenditures for the remainder of 1957 will amount to \$60,000,000 and that they will continue through 1961 at the rate of approximately \$150,000,000 a year, exclusive of the proposed acquisition of the New York City power plants.

According to the prospectus, the company has submitted a proposal to the City of New York for the acquisition of the City's three power plants which supply electricity to the "BMT" and "IRT" divisions of the City's transit system. The proposal contemplates that the company will pay \$9,000,000 upon taking possession of the plants but will not take title thereto until it has completed payment of a total of \$90,000,000 in equal installments over 10 years. Purchase by this corporation of Model Truck & Storage Co. was announced jointly on Sept. 19 by R. O. Wilke, President of Model, and J. L. S. Sneed, Jr., President of Consolidated.

Model's interstate authority permits transportation of general commodities between Seattle and points along U. S. Highway 99 to the Canadian border at Blaine, Wash., as well as to off-route points in Whatcom and Skagit Counties, Wash. Intrastate authority parallels the interstate and also includes authority to serve a number of additional points in northwestern Washington.—V. 186, p. 727.

Stockholders will be entitled to subscribe for the debentures at the rate of \$100 of debentures for each 25 shares held on the record date.

Net proceeds of the sale of the debentures, together with the net proceeds of the sale of \$35,000,000 bonds under a registration statement which became effective Sept. 18, will be used for property additions and improvements and for the discharge or lawful refunding of obligations, including short-term bank loans, or to reimburse the company's treasury for expenditures made for such purposes. Continental Materials Corp.—Sales Up 300%—

An interim report for the first half of 1957 shows a net profit of \$123,117 on sales of \$1,810,531, an increase of 300% at present rate of sales over 1956.

The company's other gains comprise the following: long-term debt decreased by over \$3,800,000; book net worth increased by more than 40%; net working capital increased by \$144,538.

The reduction in long-term debt by over 55% was largely the result of its acquisition in May of this year of the assets of Old Texas Mining & Oil Co. of Dallas, Texas. Included among the assets were 775 uranium claims covering 15,000 acres in Colorado, New Mexico and Utah. Also transferred was a receivable of \$3,781,196 due Old Texas from a subsidiary of Continental.

Gerald Gidwitz, Board Chairman, reported that gross income from monthly uranium ore shipments rose from \$153,000 in January to \$402,000 in August of this year. He also revealed that Continental is actively seeking to acquire new companies in the building materials industry as part of its program to expand company operations in that direction.—V. 185, p. 2670.

Continental Screw Co., New Bedford, Mass.—Registers Common Stock Offering With SEC—

This company on Sept. 24 filed a registration statement with the SEC covering 300,000 shares of \$1 par common stock, to be offered for public sale through an underwriting group headed by Lee Higginson Corp. The public offering price and underwriting terms are to be supplied by amendment.

Continental was organized under Massachusetts law on Aug. 8, 1957, to acquire and carry on, under the same management and with the same personnel, the business conducted by a Massachusetts corporation of the same name which has been engaged in the manufacture of screws and other fasteners since its organization in 1904. After purchase of the common stock by the underwriters and the purchase by the new company of the operating assets of the old company and its subsidiary, Hy-Pro Tool Company, the old company and Hy-Pro will each adopt a dissimilar name and change its purposes. Hy-Pro is said to produce taps and other metal-cutting tools.

Net proceeds of the sale of the common stock of the new company, plus the net proceeds of an issue of \$1,500,000 of 6% bonds with common stock purchase warrants, will be applied to the purchase of the operating assets and business of the old company and Hy-Pro. The purchase price thereof is to be supplied by amendment. The balance of the proceeds will be used for general corporate purposes.

Dr. Cutter pointed out that it was only two years ago that disaster heaped itself upon the company, resulting in a serious loss in 1955. Dr. Cutter said, "The 1957 year promises to be an all-time high sales year for us. We fully expect the substantial improvement in profits reported at the end of six months to continue, not only this year, but next year and in the future."

Dr. Cutter said that the Laboratory's product lines have been strengthened and augmented by continued research and that the completion of the new research building, now under construction, will become an important research step forward for the company.—V. 186, p. 316.

In addition, Argentina intends to expand its investment banking operations and engage actively in underwriting security issues of Argentine corporations as well as the distribution of these securities throughout the interior of that country. "The consolidation of Diamond Black Leaf operations and the addition of the extensive research and production facilities of Diamond Alkali will enable Diamond Black Leaf to provide better service to customers of both farm and home products," he said.

Diamond Gardner Corp.—Proposed New Name—

See Diamond Match Co. below.—V. 186, p. 1261.

Diamond Match Co.—To Vote on Merger—

A special meeting of stockholders will be held on Oct. 29 to vote on a company plan to acquire the assets and properties of The Gardner Board & Carton Co. of Middletown, Ohio, and to change the name of the company to Diamond Gardner Corp.

According to the proxy statement, terms of the acquisition call for the issuance to Gardner stockholders of 745,550 shares of Diamond common stock, representing a market value of approximately \$23,000,000. On the basis of 20,150 shares of Gardner common stock outstanding, the acquisition will represent the issuance of 37 shares of Diamond common for each share of Gardner common. Gardner Board & Carton Co. is a privately owned firm, with controlling interest held by the Gardner family.

Sales of Diamond Match in 1956 totaled \$133,716,000, and net income amounted to \$9,034,000, equivalent to \$3.07 per common share. For the first half of 1957, the company reported sales of \$63,802,000 and earnings of \$3,410,000 or \$1.13 per common share.

Gardner Board and Carton sales last year amounted to \$36,578,000 with net income totaling \$1,869,000. For the first six months of 1957 Gardner sales were \$21,014,000 and net income \$1,114,000.

On a pro forma basis, combined earnings of Diamond and Gardner for 1956 would amount to \$2.95 per common share, and for the first six months ended June 30, 1957 would equal \$1.21 per share.

In addition to its business of paperboard and folding cartons, Gardner owns a 50% interest in Dairypak Inc., which, with its subsidiaries, produces and sells milk cartons, ice cream cartons, frozen food cartons and butter and margarine cartons. Formed in 1947 by Gardner and The Champion Paper & Fibre Co., Dairypak's sales have increased from \$9,725,000 in 1952 to \$21,462,000 in 1956. For the first half of 1957 sales of Dairypak were \$14,282,000.

Since its inception, Dairypak earnings have been reinvested in the development and expansion of its business and no dividends have been paid, these payments being presently restricted by terms of an existing mortgage note agreement.

Including Gardner's equity in earnings of Dairypak, pro forma earnings of Diamond and Gardner combined for 1956 would amount to \$3.09 per common share, and for the first six months of 1957 would total \$1.30 per share.

Commenting on the proposed name change, the statement points out that the company's present name "has become a misleading and restrictive title for a company whose business has become as diversified as Diamond's." In view of the proportion of the company's total sales represented by matches as opposed to other substantial segments of the business, "continued use of the word 'Match' in the corporate name gives rise to misconception on the part of the public as to the nature of the company's business."—V. 186, p. 1261.

Dilbert's Quality Supermarkets, Inc.—Securities Sold—

The offering of the 180,000 units of preferred and common stock, made on Sept. 17 by S. D. Fuller & Co. at \$10.10 per unit, was completed the same day. For complete details, see V. 186, p. 1261.

Durox was organized under Colorado laws on July 2, 1957. It has no operating history; its business will be the manufacture and sale of a light-weight cellular concrete building material under the trade name "DUROX" in the State of Minnesota and part of the State of Wisconsin. The business will be carried on pursuant to a license agreement granted by Swedish-American Industries, Inc., a Colorado corporation. This license agreement was first entered into between the latter and Dean Roland, promoter and president of Durox, and at a cost to him of \$1,000. Roland assigned this license agreement to Durox for 37,500 shares of the latter's stock, of which 1,000 shares were transferred by Roland to each of the other four directors of the company. Durox, as one of the obligations of the agreement, has also made 11 sales of 20,000 shares which netted the company \$20,000.

Of the proceeds of the sale of stock, \$14,000 is to be used for payment of the \$14,000 cash balance due under the license agreement, and \$60,000 for purchase of a plant site, Minneapolis-St. Paul area. Construction of a plant and purchase of related equipment and raw materials are estimated at \$689,446.39. An additional \$75,000 is slated for advertising and promotion. \$100,000 for distribution yards in eight other localities in the area, and the balance of \$251,583.61 will be used for general corporate expenses and working capital purposes.

About 200 employees were notified that operations will be suspended about the first of the year.

Empresa Electrica, Quito, S.A. (Ecuador)—Power Loan

The World Bank on Sept. 20 made a second loan of \$5,000,000 to this company to help finance a project for the expansion of facilities to supply electric power to Quito and its suburban area.

An earlier loan of \$5,000,000 was made in March, 1956 for a project comprising a 14,480-kilowatt hydroelectric plant, a 3,000-kilowatt diesel plant, transmission lines and the expansion of the distribution system. The project has now been revised to provide more power both for immediate needs and for the future. The revised project consists of a hydroelectric plant located at a new site to develop 20,000 kilowatts of power, a 6,000-kilowatt diesel plant instead of one of 3,000 kilowatts, transmission lines of greater capacity than in the original project and expansion of the distribution system to accommodate the increased generating power.

The larger diesel plant will alleviate the serious shortage of power while the hydroelectric plant is being built. Thereafter, it will be used as standby capacity for peak loads and for emergencies when service from hydroelectric power plants might be disrupted. The new site of the hydroelectric plant is capable of developing 40,000 kilowatts of power and provision is being made for the installation of another 20,000 kilowatts of capacity at a later date. When the 20,000-kilowatt hydroelectric plant is in operation there will be sufficient power to meet the needs of the area until 1962; and with the additional 20,000 kilowatts of capacity, until 1967. The cost of power under the revised project will be about the same as under the original project. When the second 20,000 kilowatts of generating capacity is installed, however, the cost will be substantially lower.

The total cost of the revised project is estimated at \$16,000,000, an increase of \$5,000,000 in foreign exchange and of \$1,000,000 in local currency over the original project. The Bank's loans totaling \$10,000,000 will be used to pay for imported equipment, materials and services.

The Sept. 20, 1957 loan is for a term of 20 years and bears interest of 5¼% including the 1% commission which is allocated to the Bank's Special Reserve. Amortization will begin Feb. 1, 1962. The loan is guaranteed by the Government of Ecuador.

Ero Manufacturing Co.—Sales and Earnings Off—

The company on Sept. 17 announced net sales of \$5,137,861 for the six month period ended July 31, 1957. This compared with \$5,613,967 for the same period last year. This corporation on Sept. 25 filed a registration statement with the Securities and Exchange Commission covering 316,814 shares of 50¢ par common stock and \$2,754,900 of 6½% first mortgage sinking fund bonds.

The directors of the company have approved a plan under which holders of the company's \$4.50 prior preferred stock will be offered in exchange for each preferred share either of the following: (a) 1½ shares of 50¢ par value common stock, or (b) \$100 principal amount of 6½% first mortgage sinking fund bonds plus 1½ shares of 50¢ par value common stock.

If holders of at least 85% (or less at the option of the company) of the \$4.50 prior preferred stock accept the offer of exchange, it will be effective upon certain conditions, including approval by stockholders of a proposal to split each share of \$1 par common stock into 10 shares of 50¢ par common stock.

A special meeting of the stockholders will be called at a later date to reduce the par value of the common stock, to approve the stock split, to increase the authorized number of shares of common stock and to mortgage certain properties of the company to secure the proposed bond issue. Webb & Knapp, Inc. which controls Gulf States Land & Industries through a wholly owned subsidiary, will vote its shares in favor of these proposals.

The underwriters will not forward any funds to the corporation until such time as all shares of the offering have been sold.

BUSINESS—This company was incorporated in Colorado on April 8, 1954, under the name of Hegwer Drilling & Remedial, Inc. to engage

primarily in drilling and remedial work in connection with oil wells. On Dec. 15, 1956, the name of the company was changed to Hegwer Drilling Co., Inc. It is the present intent of the board of directors to limit the scope of operation exclusively to the drilling of oil wells either on a contract basis or by joint venture, should the directors feel that any such venture would have merit.

The company, since its inception, has engaged primarily in the business of contract drilling in the Rangely, Colo. area. In addition, it has entered into joint ventures, where it has agreed to perform certain drilling requirements in exchange for an economic interest in the drilled properties.—V. 186, p. 1263.

In response to numerous inquiries, Mr. Jacobs said: "The Hertz Corp. and American Express Co. are considering the creation of a new jointly owned subsidiary which will conduct large-scale car rental operations outside the United States. If our present discussions reach a conclusion the existing Hertz car rental operations in France, Mexico, Cuba, Puerto Rico and Hawaii would be transferred to the proposed new company."

Mr. Jacobs continued: "In addition to joint financing of the new subsidiary, the proposed transaction would include the sale to American Express of 25,000 shares of Hertz common stock at the Sept. 11, 1957, market price, the date of the last meeting of the board of directors of The Hertz Corp., plus options to purchase additional shares in the future."—V. 186, p. 1150.

Holiday Oil & Gas Corp., Oklahoma City, Okla.—Name Changed—Acquires Interest in Washington Properties—

This corporation has changed its name to White Star Oil Co., according to an announcement on Sept. 20, by Richard F. Taylor, President.

White Star has recently acquired majority interest in Utah Consolidated Oil Co., which holds substantial interests in 10,500 acres of mineral interests near Ocean City, Wash. These holdings virtually surround and offset the Sunshine Mining Co. property whose new well has focused attention on this area, highlighting the first oil production in the State of Washington.

Utah Consolidated also wholly owns the North Coast Drilling Co. They have a rotary rig, all equipment and tools already on site at Ocean City, Grays Harbor, Wash.

The White Star Oil Co. has also acquired the assets of Hallmark Petroleum & Drilling Co., adding four drilling rigs, and all required rolling stock and field equipment to enable the company to carry forward exploration development and production of oil and gas properties. White Star Oil is currently drilling a 50 well program on fifty 160 acre parcels in Osage County, Kansas. Each of these wells, Mr. Taylor said, is supported by substantial dry hole money. In Kansas and Oklahoma White Star owns 21 producing oil and gas wells. The company has just brought in a new well, known as Dean "A" No. 3. This had an initial free flow of about 250 barrels per day of 40-gravity oil. Indications are that there are approximately five offsets to this well which will soon be drilled.

White Star is currently located at 1607 Liberty Bank Building, Oklahoma City, Okla., and will locate its new headquarters in the new Petroleum Club Building there. The company is also opening a new office in the Finch Building, Aberdeen, Wash., where it has already established a field house and equipment yard.

Mr. Taylor was elected to the White Star board on Aug. 20, 1957, and shortly afterwards elected President. He indicated that farmouts on the leaseholds neighboring on the Sunshine Mining Co. properties are being negotiated by Utah Consolidated Oil Co., the controlling interests of which now belong to White Star Oil Co.—V. 184, p. 2014.

Homestake Mining Co.—Debentures Sold—The \$12,000,000 of debentures offered on Sept. 18 by Eastman Dillon, Union Securities Co. and associates were quickly sold. For details, see V. 186, p. 1263.

Hooker Electrochemical Co.—To Jointly Explore High Energy Fuel Venture—

This company and Footo Mineral Co., Philadelphia, Pa., on Sept. 25 jointly announced that they are together exploring possibilities for the development, production and sale of components of high energy fuels. Currently, their interests are confined to lithium perchlorate and ammonium perchlorate, materials which act as oxidizers in fuels for rockets and missiles, but studies may be extended to other high energy fuel components later. The joint announcement was made by R. Lindley Murray and Gordon H. Chambers, Board Chairmen of Hooker and Footo.

Hooker last year acquired Oldbury Electro-Chemical Co., believed to be the world's largest manufacturer of chlorates which include sodium perchlorate, potassium perchlorate, sodium chlorate, potassium chlorate and perchloric acid. Thus Hooker has basic chlorate-perchlorate production facilities and technology.

Footo, understood to be the largest producer of lithium metal and its salts, has a basic position in owning extensive lithium ore deposits as well as lithium salt and metal production facilities. Footo has research background and pilot plant production experience with lithium perchlorate and ammonium perchlorate.—V. 186, p. 112.

Hycalog, Inc.—Offering of Debentures—Mention was made in our issue of Sept. 23 of the offering by this company of \$280,000, 6¾% convertible debentures, due Oct. 15, 1967, at 99% of principal amount. Further details follow:

The debentures are initially convertible at their principal amount into common stock at a conversion price of \$3 per share and are entitled to the benefit of a sinking fund.

PROCEEDS—The company intends to expend approximately \$150,000 of the net proceeds in purchasing well-logging equipment and approximately \$50,000 thereof in purchasing new machine tools. The remaining net proceeds will be used to retire or reduce presently outstanding bank loans or will be added to the general funds of the company. There are no arrangements for the return of funds to subscribers if all of the debentures are not sold.

Net assets of this Fund, adjusting for capital gains distributions, increased 9.5% during the nine-months period ended Aug. 31, Coleman W. Morton, President, announced on Sept. 23.

Net assets on Aug. 31, 1957 totaled \$19,897,855, equal to \$4.72 per share, as compared to \$14,337,722 or \$4.61 per share on Nov. 30, 1956, the close of the last fiscal year.

Shareholders currently number 17,045, a gain of 26.4% in nine months. Over 48% of all shareholders are now using the company's plan for automatic reinvestment of all dividends, according to Mr. Morton.—V. 186, p. 1092.

International Sales Co. of Washington, D. C., Inc.—Files With Securities and Exchange Commission—

The company on Sept. 20 filed a letter of notification with the SEC covering \$250,000 of 10-year 8½% debentures to be issued at par in denominations of \$500 each, without underwriting. The proceeds are to be used to reduce outstanding loans and for working capital.

International Telephone & Telegraph Co.—Semi-Annual Report—Edmond H. Leavey, President, on Sept. 11, said in part:

FARNSWORTH DIVISION EXPANDING—A new and completely modern plant for Farnsworth Electronics Co., comprising 160,000 square feet of floor space, is scheduled to go into operation at Fort Wayne, Ind., in April 1958. The new plant, located on a 71-acre tract, will be Farnsworth's third in Fort Wayne and its fourth in Indiana, increasing total floor space of this IT&T division to 580,000 square feet, with ample land available for further expansion as necessary.

WEST COAST ACTIVITIES—The IT&T Components Division, with headquarters at Clifton, N. J., has launched a new manufacturing operation in Palo Alto, Calif., where it will produce hermetic seals and selenium and other semi-conductor types of rectifiers for radio, television, industrial and aircraft applications. Other components now under development will be added to the line. The new plant will facilitate the Components Division's sales and service activities on the West Coast.

Federal Telecommunication Laboratories' West Coast branch has moved into its own research and development facility, a 22,400-square-foot unit, in San Fernando, Calif. Previously it had been occupying space in the Federal Telephone and Radio building on an adjacent site.

RECORD SALE OF STOCK IN CUBA—The Cuban Telephone Co. recently sold 175,000 shares of common stock (par \$100), of which 72,835 shares were subscribed by this corporation and 102,165 shares were sold exclusively in Cuba for an aggregate amount of \$19,216,500. This represents the largest sale ever made to the Cuban public of equity securities of a company operating in Cuba. The new financing was made possible by an agreement signed with the Cuban Government in March amending the company's franchise and authorizing telephone rates producing a net return of not less than 7% on total capital invested in the company. A program of expansion now being undertaken calls for the installation of 61,000 new telephones by the end of 1960, at a total expenditure of approximately \$60,000,000. This will represent an increase of about 42% over the telephones now in service (see V. 186, p. 419).

AUTOMATIC TELEX EXCHANGE—The corporation's manufacturing subsidiary in Norway, Standard Telefon og Kabelfabrik A/S, recently completed the manufacture and installation in Oslo of Norway's first automatic telex exchange. The success of the new 500-line installation has already prompted inquiries from the Norwegian Telegraph Administration regarding an extension of 300 lines, and STK is now at work on additional automatic switching equipment to establish outgoing international telex service with six other countries.

NOTES—The accounts of the corporation's subsidiary, American Cable & Radio Corp., are excluded from the statement of consolidated income because of the large minority stock interest held by the public.

The accounts of subsidiaries located in foreign countries, which are reflected in the statement of consolidated income, have been translated into U. S. dollars from foreign currencies in accordance with established principles of translation of foreign currencies. The undistributed net income of foreign subsidiaries should not be understood to represent U. S. dollars immediately available since the amount of such earnings available to the corporation is dependent upon its ability to obtain U. S. dollars from the respective foreign countries. Furthermore, the earned surplus of certain subsidiaries is subject to restrictions on the payment of dividends and to taxes payable on declaration of dividends.—V. 186, p. 319.

Jefferson Lake Sulphur Co.—Offering Postponed—

The company on Sept. 24 announced that its offering of additional common shares, originally scheduled for Sept. 20, has been postponed.

In a letter to its shareholders, the company attributed the postponement to a decline in the market value of its common shares, following reductions in sulphur prices by the Texas Gulf and Freeport Sulphur companies, followed by a general stock market decline.

The company stated that, in its opinion, "there could have been no economic or other justification whatever for these decreases in the price of sulphur," which, the company's letter continued "seems to have been engendered only by a determination to continue to dominate this vital natural-resource industry within the United States."

The letter concludes that notice of new arrangements for the share offering will be given as soon as such arrangements shall have been completed.

The company remains confident that it will continue to maintain

its competitive position throughout domestic and world markets, according to Eugene H. Walet, Jr., President.—V. 186, p. 1263.

Johnson & Johnson—Trend Toward New Product—

This company's current attempt to divert annual roll bandage sales of about \$10,000,000 a year to its new "RED CROSS" Improved Bandage is being watched closely in the bandage-making industry for a trend that may indicate standard roll gauze is finally bowing to progress, after 70 years.

The company claims its new self-clinging, conforming bandage "is the first advance in sterile bandages since 1886, and should eventually replace all existing roll gauze bandages." The product was developed from basic patents held by the U. S. Government and has no connection whatever with American Red Cross.

The introduction of the new bandage puts J&J in the unique position of competing primarily with itself, since the company has the major share of regular roll bandage business.

"Nevertheless," says I. M. Kisseberth, product director for the new bandage, "we had to market this new gauze because it is so superior as to make regular gauze bandage obsolete. This is the first sterile gauze wrapping that is self-fitting, self-tightening and non-slipping and which can snap back to its original shape without losing elasticity."—V. 185, p. 1044.

Kaiser Aluminum & Chemical Corp.—Navy Contracts

The U. S. Navy is solving a costly maintenance problem by re-roofing two huge airship hangars at one of its key West Coast air bases with industrial corrugated aluminum sheet, according to an announcement made on Sept. 25.

More than 600,000 pounds of Kaiser Aluminum corrugated aluminum roofing and flashing sheet is being installed on the roof of two big hump-backed hangars at Moffett Field on the shores of San Francisco bay near Palo Alto, Calif. Each hangar has a roof area of approximately 9½ acres and enough floor area to hold 9 Navy blimps.

The project is part of a Navy program to save the wood frame structures from rot and deterioration caused by leaks in the old composition roofing and at the same time put a sturdy cover over vital aircraft maintenance and repair shops.

The new roofing material is being applied by Dale Benz, Inc., of Phoenix, Arizona, under the supervision of the Navy's Bureau of Yards and Docks and Leo W. Ruth, consulting engineer and general partner of the firm of Water, Ruth and Going, San Jose, Calif., with the technical assistance of Kaiser Aluminum & Chemical Corp. engineers.

The contract also calls for the installation of an all-aluminum obstruction lighting system and an all-aluminum lightning protection system.—V. 186, p. 730.

Frable, Vice-President. It brings together two firms with a combined record of 237 years in the producing and selling of anthracite.

Loew's, Inc.—Meeting Scheduled for Oct. 15—

Chancellor Collins J. Seitz of the Delaware Court of Chancery ruled on Sept. 19 he would not prohibit a meeting of Loew's, Inc., stockholders scheduled for Oct. 15.

A petition to enjoin the meeting had been filed by Ralph Campbell, a supporter of Joseph Tomlinson, who is trying to unseat Joseph Vogel as President of Loew's.

The Chancellor ruled that the Loew's management may not solicit proxies with specific intent to remove Mr. Tomlinson and Stanley Meyer, an independent television producer, as directors, at the Oct. 15 meeting.

The Chancellor also barred the recognition of proxies held by individual defendants unless board members and stockholders aligned with Mr. Tomlinson were supplied with a complete list of stockholders.

The Court refused to prohibit the use of corporate funds to solicit proxies. Chancellor Seitz said the corporation would not be stopped from paying reasonable sums incurred by the Vogel faction in soliciting proxies. But he forbade the corporation to use its personnel or facilities for such solicitations.

Chancellor Seitz said stockholders had the right to elect directors between annual meetings to fill newly created places on the board.—V. 186, p. 1151.

(P.) Lorillard Co.—Newport Nationally Distributed—

With stepped-up Newport cigarette production now meeting "unusually large re-orders" in all areas opened during four months of market-by-market distribution, this company on Sept. 25 announced that national distribution of its new "hint of mint" filter brand (initially launched last May in New York) has been completed, with shipments of Newport to 28 Midwestern and Southern States. Initial nation-wide advertising for Newport will include heavy use of Sunday supplements, daily newspapers, network radio and TV.

"We expect big things of Newport," President Lewis Gruber said in making the announcement. "The brand already has racked up an enviable sales record and, despite the fact that its distribution has been strictly limited heretofore, it has contributed strongly to the growth of the rapidly developing new menthol filter market, which already accounts for 6% of the entire cigarette market. While Lorillard market research had indicated this new sales potential, Newport sales are exceeding even the company's own projections and, with national distribution now complete, Newport should add substantially to the company's over-all sales for the year."—V. 186, p. 215.

(M.) Lowenstein & Sons, Inc.—Moves Towel Division

Leon Lowenstein, Chairman of the Board, on Sept. 23 announced that the towel manufacturing division of Wamsutta Mills was being moved to Columbia, S. C. from Roxboro, N. C.

A modern manufacturing building is being erected in Columbia where new machinery is being installed. This machinery, together with the machinery being moved from Roxboro, will give the company substantially increased production of Wamsutta towels.

This move results in large measure from the increased demand in the market for "high quality" towels.—V. 185, p. 2100.

Lunn Laminates Inc.—Acquires Fourth Plant—

This corporation has recently acquired a fourth plant in Huntington Station, N. Y. to accommodate a large order for Navy landing craft, 68 of which are scheduled for production now. These 36-ft. reinforced

plastics boats are patterned after the successful prototype launched by Lunn last year.

The new plant covers 32,000 sq. ft. and has its own railroad siding. Lunn's executive offices, formerly housed at Oakwood Road, have been moved to the new location. Smaller reinforced plastics parts will continue to be manufactured at the previous address as well as the new orders coming in representing a backlog of over \$1,000,000.—V. 184, p. 920.

Mack Trucks, Inc. — To Build Major Manufacturing Plant On West Coast—

This corporation announced on Sept. 20 it will build a major manufacturing plant on the West Coast.

P. O. Peterson, President, said this new plant will be located at Fremont, Calif., about 33 miles southeast of San Francisco on the East Shore Freeway. It will be constructed on a 50-acre site.

"The corporation also has taken an option on an additional 50 acres of land adjoining the plant site to permit expected future expansion needs," Mr. Peterson stated.

He said future plans call also for construction at the Fremont location of a large west coast parts depot, executive offices and extensive service facilities. He stressed, however, that the new manufacturing plant will be the initial project, and that the other facilities will be erected as needed. Construction of the new manufacturing plant will get underway as soon as the building plans are completed.

Mack, whose sales have more than doubled in the past two years, already has six sales and service branches in the Far West. They are located at Los Angeles, San Francisco, Portland, Seattle, Salt Lake City and Eugene, Oregon.

Currently, manufacturing operations are conducted at Plainfield and New Brunswick, N. J.; Allentown, Pa.; Cortland, N. Y., and Sidney, Ohio. The Fremont plant will be on the company's first Western manufacturing facility.

Enters Long-Distance Bus Market With New Luxury Model—

The corporation on Sept. 19 entered America's fast-growing intercity bus market with introduction of a new long-distance luxury bus. Elliott G. Ewell, Vice-President-sales, said the new vehicle will accommodate 41 passengers and contains many advanced engineering and comfort features such as air conditioning, airride suspension, foam rubber reclining seats and individually-controlled double reading lamps.

The new luxury bus was developed in line with intentions announced by Mack a year ago to compete in the expanding market for cross-country type buses. Although America's oldest active bus manufacturer, Mack had confined its bus production to suburban and intracity or transit type buses.—V. 186, p. 731.

Metallurgical Resources, Inc.—Dr. Sill Elected President—Progress Report Issued—Patents Granted—

This corporation today (Sept. 30) announced the election of Dr. Harry A. Sill, Los Angeles metallurgist, as President of the company. Dr. Raymond F. Baugor, Assistant Professor of Chemical Engineering, M. I. T., has been re-elected a director, and Marino N. Hicopco, consultant on foreign investment to the U. S. Department of Commerce has become a new board member.

Mr. Sill is the inventor of the revolutionary Sill process for treating cobalt and other complex, arsenical ores that has been in talked at the company's plant on a 20-acre Hudson River waterfront site at New Windsor, N. Y. near Newburgh.

The company has been granted patents covering the process by Rhodesia, Belgian Congo, Morocco, Belgium and Canada, and applications are pending in other countries that mine, process or are principal users of cobalt.

In the progress report that shareholders will receive this week, Dr. Sill reports that all equipment has been installed and dry runs are now being made to adjust each unit and acquaint plant personnel with their operation and specific function. Most plant employees had pre-training in helping to install the equipment under direction of Ernest A. Lado, General Manager.

This procedure will be followed by feeding cobalt concentrates into the processing circuits for a final tune-up, after which the company will start production on a commercial basis. Ores containing cobalt, nickel, copper and silver are being obtained from Canadian sources.

Because of their complexity and high content of arsenic, ores of this type have posed problems of recovery and purity when Dr. Sill claims his process has solved.

Instead of using conventional pyrometallurgy, requiring treatment of the ore under high temperature in electro-furnaces, the Sill process is a revolutionary hydrometallurgical process under which the ore is treated under 90 lbs. pressure and temperature of only 130 degrees.

The heart of the Sill process is a battery of autoclaves, which may be likened to pressure cookers, in which arsenic and sulfur are made water soluble and precipitated as marketable grade calcium arsenate insecticide, and sulfur is produced as pharmaceutical Glauber salt for which a market exists in the paper industry. Glauber salts are also used in detergents.

Copper, nickel and silver, also contained in the ore are precipitated separately along the recovery circuit after which they are treated by conventional methods. The company claims that its cobalt and secondary metals will have 99% plus purity from arsenic and sulfur. Government and industrial buyers of cobalt require 99.2% purity.—V. 185, p. 2805.

Metropolitan Mines Corp., Ltd., Wallace, Idaho—Files With Securities and Exchange Commission—

The corporation on Sept. 13 filed a letter of notification with the SEC covering 1,000,000 shares of common stock (par 10 cents) to be offered at 15 cents per share, without underwriting. The proceeds are to be used for expenses incidental to mining operations.

It was noted that this will be the last equity sale the company will need to make until some time in 1959. The stock offering will raise Middle South's outstanding common stock from 7,598,106 to 8,050,000 shares.—V. 186, p. 114.

Minute Maid Corp.—Arrangements With Seabrook—

According to an announcement made jointly on Sept. 25 by John M. Fox, President of this corporation, and John M. Seabrook, President of Seabrook Farms Co., effective Nov. 1, 1957 the Snow Crop brand of frozen fruits and vegetables will be processed and sold in most of the United States by Seabrook Farms.

The agreement does not cover frozen citrus juices which Minute Maid will process and distribute under its own name and the Snow Crop label.

Minute Maid will continue to market the full Snow Crop line in the 11 Western states that now make up its Western sales division, in

Canada and in the export, institutional and government markets. Minute Maid also will operate its plant in Lewiston, Idaho, one of the largest pea packing plants in the world.

Minute Maid purchased the Snow Crop division of Clinton Foods, Inc. in November, 1954. Since then it has marketed frozen juices for both Minute Maid and Snow Crop labels as well as a line of frozen fruits and vegetables under the Snow Crop label. Minute Maid also markets Hi-C canned fruit beverages.

Seabrook Farms, with headquarters at Seabrook, N. J., processes and distributes a line of frozen fruits and vegetables, as well as certain canned vegetables. Part of its production is sold under the Seabrook Farms brand and part under "private labels." New York Central RR.—Continues Improvement—

Despite disappointing business results in August, the company intends to proceed with its major improvement program, Alfred E. Perlman, President, said on Sept. 25.

Mr. Perlman also announced that the Central last month had a net deficit of \$1,155,689 on gross revenues of \$61,797,370 compared to a net profit of \$3,660,847, or 36 cents per share, on gross revenues of \$64,344,716 in the similar period last year.

He pointed out that for the first eight-months of 1957, maintenance of way expenditures amounted to \$61,058,799 compared with \$55,853,058 for the similar period last year, due to the system-wide improvement program. This program includes construction of new electronic freight yards at Elkhart (Ind.) and Youngstown (Ohio) and several major Centralized Traffic Control projects. The two big new yards are due to begin operations in December.

Unfavorable factors during August included a strike at the Central's Toledo coal and ore docks, which resulted in loss of more than 450 carsloads per day, and the Central's continuing heavy passenger deficit, now approximating \$4,500,000 a month, Mr. Perlman said. He pointed out that the passenger deficit still includes heavy losses from "wasteful services" no longer needed and not in the over-all public interest, which the Central has been unable to get permission to discontinue. These include obsolete branch line passenger services, such as heavily-losing operations as the Weehawken-Manhattan ferry, whose discontinuance, authorized by the Interstate Commerce Commission, has been halted by a Court suit filed by the State of New Jersey, and the West Shore and Putnam Divisions in the New York City commutation area, both high-deficit services.—V. 186, p. 1153.

New York, New Haven & Hartford RR. — Seeks Increase in Fares—

To offset higher labor and material costs, this railroad on Sept. 23 filed a request for increased regular and commutation fares.

Under the proposed schedules, commutation fares in the New York-Connecticut area will be increased by 10%. The railroad also asked for increases of 5% for regular coach, parlor and sleeping car tickets. The request was filed with the ICC and with various State commissions.

In requesting the fare increases, the railroad pointed to increased expenses of over \$12,000,000 a year which, it said, have more than offset increased freight and passenger increases granted during the past year.

Wage costs have risen another \$10,610,000 per year, material costs \$982,006 a year, and retirement and unemployment taxes have increased by \$446,006 a year, the railroad said.

The last increase in commutation fares, averaging 22½%, became effective in August last year and prior to that had been increased only since 1925. Basic fares other than commutation were raised 5% in May 1956 and another 5% in February 1957.

Despite previous increases, the New Haven in 1956 sustained a loss of \$14,834,000 on its passenger service, which loss absorbed 85.3% of its income from freight operations and resulted in the line ending the year with a rate of return of only 0.59% on its investment, the railroad said.

Only one other railroad in the country has a larger percentage of its freight income nullified by its passenger deficit.

In filing new tariffs with the Massachusetts Department of Public Utilities, the New Haven is asking for increases within that State of 16 cents per ride, with a minimum of increase of 10%.—V. 186, p. 1153.

Northland Chemical Co., East Grand Forks, Minn.—Files With Securities and Exchange Commission—

The company on Sept. 18 filed a letter of notification with the SEC covering 725 shares of class A common stock and 1,000 shares of class B common stock to be offered at par (\$100 per share), without underwriting. The proceeds are to be used to pay for a fertilizer plant, building and equipment and for working capital.

This corporation recently announced the "d/M-Gauge," a new, completely portable field instrument for rapidly measuring moisture content or density in a wide range of organic and inorganic materials.

Simplicity of operation and speed of measurement are primary advantages of the new system. Time-consuming laboratory procedures necessary with conventional methods have been eliminated; the d/M-Gauge provides immediate measurements at the site of application. A single operator using the d/M-Gauge can obtain accurate moisture or density determinations in two minutes—less than 1/10th the time required by other systems.—V. 186, p. 1094.

Nuclear Science & Engineering Corp., Pittsburgh, Pa.—Files for Common Stock Offering—

This corporation filed a registration statement with the SEC on Sept. 20, 1957, covering 100,000 shares of 25¢ par common stock. The company has agreed to grant Hayden, Stone & Co., for a cash consideration of \$1,000, an option to purchase all or any part of 10,000 common shares (at a price to be supplied by amendment).

Nuclear Science was organized in July, 1954 by a group of seven scientists and engineers acting in conjunction with Norden-Ketay Corp., which owns 100,000 shares (76%) of its outstanding common stock. Its business "consists of commercial exploitation of a basic phenomenon of atomic energy—radioactivity," and it provides a wide variety of specialized radioactivity services. Net proceeds of this financing will be added to the general funds of the company; and it intends to use \$235,000 to prepay its indebtedness to Norden-Ketay and an estimated \$30,000 to purchase additional capital equipment. The balance will be added to working capital to finance the company's expanding business volume. (Mr. Gordon Dean is listed as Board Chairman.)—V. 182, p. 1017.

Oasis is the operating company for Libyan concessions totaling some 47,000 acres in which Ohio Oil, Continental and Amerada Petroleum each have an undivided one-third interest. This first exploratory well for the group in Libya is located on a 1,270,000-acre concession approximately 75 miles south of the Gulf of Sirte, on the Mediterranean seacoast.

The SEC, it was announced on Sept. 24, has issued an order giving interested persons until Oct. 7, 1957, to request a hearing upon the bond financing proposal of this company.

Of the net proceeds, \$4,500,000 will be applied to the payment of bank loans and the balance, together with cash on hand and to be derived from operations, toward its cash requirements during 1957 and 1958 for property additions and improvements, estimated at \$24,367,000.

The company also proposes to issue \$773,000 of its first mortgage bonds, 3¼% series due 1982, to satisfy the sinking fund provisions of the mortgage for the years 1957, 1958 and 1959. In addition, it proposes to issue and deliver 50,000 shares of its \$30 par common stock to Ohio Edison Co., its parent. Peoples Gas Light & Coke Co.—Seeks Rate Rise—

Hearings on the new schedule of higher rates filed by this company on July 1, began on Sept. 18 before two examiners of the Illinois Commerce Commission in Chicago.

The proposed rates are designed to provide additional gross monthly gas sales revenues averaging about \$340,000 which, after deducting Federal income taxes and State and municipal taxes on revenues, should produce additional net earnings of about \$416,000 per month, assuming expenses are maintained at the current level, Peoples Gas stated earlier.

In an opening statement, Atty. Joseph H. Mueller of the legal firm of Ross & O'Keefe, representing Peoples Gas, pointed out that continuing inflation and constantly increasing costs have prevented the company from realizing in any year since the company's last general rate increase in 1953 the 5.8% return approved by the Commission.

"On the basis of the commission's valuation, plus net additions to utility plant since 1952, the company's return declined to 4.5% in 1956," Mueller stated. "A further decline to 4.2% is estimated for the current year. If effect is given to increases in price levels and construction costs which have occurred since 1952, as the company's evidence will show, the decline in the company's return is even greater."

Mr. Mueller pointed out that since 1952, the test year used by the commission in its 1953 rate order, the company's payroll has increased 36%, or \$8,000,000. Real and personal property taxes have risen about 16%, he added. Substantial increases have also occurred in commodity prices for materials and supplies and in general construction costs, he said.

He also pointed out that during the same period, there has been a significant advance in the cost of capital for gas and other utilities. "Since January, the cost of bond money for gas utilities has ranged up to 12% or more. This figure exceeds the overall rate of return of 5.8% allowed by the commission for Peoples Gas in 1953."

In this connection he said, "The evidence will show that the company is faced with the necessity, in the near future, of raising \$44,000,000 of new capital to finance substantial construction requirements for its distribution system."—V. 186, p. 2103.

Pine Street Fund, Inc., New York—Registers With SEC

The stockholders also authorized an application for the listing of the common stock on the New York Stock Exchange.

The stockholders were informed that Dr. Edwin H. Land, President, will recommend to the board payment on Dec. 24, 1957 of a quarterly cash dividend of 5¢ per share in the common stock then to be outstanding and, in the absence of unforeseen contingencies, a quarterly dividend at the rate of 5¢ per share thereafter. Such cash dividends, at the annual rate of 20¢ per share, would represent an increase of 60% over the dividend of 50¢ per share heretofore paid annually on the smaller number of shares outstanding.—V. 186, p. 732.

F. N. Belgrano, Jr., President and Chairman of the Board, on Sept. 19 announced that the directors had approved a plan for reorganization of this corporation in order to comply with the Bank Holding Company Act of 1956.

The plan will be promptly filed with the Federal Reserve Board for approval, and will then be submitted to the Internal Revenue Service for appropriate tax rulings prior to its submission to the Transamerica stockholder for their approval at the annual meeting to be held on April 24, 1958.

The plan contemplates that the corporation will continue to own and manage its insurance and other non-... businesses, but will cease to be a bank holding company. It will turn over to Firstamerica Corp., a new corporation created for that purpose, all of the stock it directly holds in each of its majority-owned banks together with cash in exchange for all of the common stock of the new corporation. The common stock of the new corporation, which will be the only class of securities outstanding, will then be distributed immediately share-for-share pro rata to Transamerica stockholders of record as of a date to be subsequently determined. If all necessary authorizations, rulings, and approvals are obtained, it is contemplated that the distribution to Transamerica stockholders will take place on or about July 1, 1958.

The new company will function independently of Transamerica. Application will be made to list its stock on the Pacific Coast and New York Stock Exchanges. Distribution of the shares of the new company to Transamerica stockholders will not subject them to Federal income tax liability.

Mr. Belgrano emphasized that various other corporate steps must be taken in order to make the plan acceptable under the requirements of the Act. The plan is necessarily subject to modifications and changes which may be required for regulatory reasons and may, of course, be affected by other developments.—V. 186, p. 1096.

Truly Nolen Products, Inc., Miami, Fla.—Stock Offering Temporarily Suspended—

The Securities and Exchange Commission, it was announced on Sept. 24, has issued an order under the Securities Act of 1933 temporarily suspending a Regulation A exemption from registration with respect to a public offering of stock by this corporation.

In its order, the Commission asserts that it has reasonable ground to believe (1) that a Regulation A exemption is not available for the offering of Truly Nolen stock; (2) that the terms and conditions of Regulation A have not been complied with; and (3) that the company's offering circular is misleading. The order provides an opportunity for hearing, upon request, on the question whether the suspension should be vacated or made permanent.

Truly Nolen filed its Regulation A notification with the Commission on July 19, 1957. It proposed the public offering of 100,000 shares of common stock at \$2 per share. According to the Commission's suspension order, the aggregate offering price, computed as required by the regulation, exceeds the \$300,000 maximum permitted in respect of exempt offerings under the regulation; and Alfred D. Laurence & Co., of Miami, the person named as underwriter, is defendant in a court action instituted by the Commission based upon an alleged violation of the Commission's net capital rules.

The Commission's order further asserts that the company's offering circular failed to contain certain required information. Furthermore, the offering circular is said to be misleading, in that (1) it fails to state the extent of review by the accountant, whether the accountant made an independent audit, and whether the accountant gave the issuer any certificate as to the financial statements contained in the offering circular; (2) the balance sheet included therein fails to state the analysis of the capital surplus reflected therein; (3) the offering circular states that the contract described therein (a licensing agreement relating to the manufacture and sale of certain insecticides) is not assignable, whereas it later states that it has been assigned; and (4) the offering circular describes a contract as providing for the payment of \$100 a month as rent under a 14-year lease, whereas apparently the same payment is described in an exhibit as being compensation for the use of a name for 15 years.—V. 186, p. 465.

The public offering price and underwriting terms are to be supplied by amendment.

Net proceeds from the sale of the new common will be added to the general funds of the company and used for payment of \$4,900,000 of notes, the proceeds of which were used for construction purposes in 1957, and to further the construction program. Construction expenditures are estimated at \$12,000,000 for 1957, \$9,600,000 for 1958, and \$11,750,000 for 1959.—V. 184, p. 964.

United States Leasing Corp.—Plans Borrowings

William R. Heins, President, states in part: "The first seven months of 1957 were months of growth and progress. Our present unused credit position is about \$15,000,000, although we have commitments from new leases to utilize almost half of this in the immediate future. Plans are being formulated for the procurement of substantial additional long-term debt financing."

Universal Marion Corp.—Acquisition Approved

Acquisition by this company of Southern Pipe & Supply Co., which was approved by the stockholders on Sept. 19, is expected to add \$700,000 annually to the Universal company's earnings and may prompt an extra dividend this year, James Mullane, President, announced.

Mr. Mullane reported that the corporation had earned \$3,239,760 in the seven months ended July 31, and projected that earnings for the full year of 1957 would be approximately \$4,400,000. He pointed out that because of the company's tax loss carry-over, these earnings would not be subject to Federal income taxes, and added:

"If our expectation of earnings is realized, it is my intention to recommend to the board of directors a year-end extra dividend. Our backlog is substantial, and we expect our operations in 1958 to continue on a profitable level similar to that experienced in 1957."

Universal Marion, a manufacturer of power cranes and shovels and allied equipment, has paid three quarterly dividends of 40 cents a share each this year. One additional payment in the same amount already has been declared, payable Dec. 27.

Miami, Florida

Revalues. All Real Property—Miami now has the first billion dollar city assessed valuation in the southeastern United States, according to G. N. Shaw, Director of Finance.

The City has completely reassessed all real property on an item-by-item basis, with a resulting total assessment roll for 1957, both real and personal property, of \$1,011,255,310, 46.68% above the 1956 roll of \$689,441,010.

Homestead exemption totals \$214,982,970, leaving a valuation of \$796,272,340 taxable for operations and service of debt incurred subsequent to the Homestead Exemption Amendment to the Florida Constitution in 1934.

The re-assessment work covered an 18-month period, and was accomplished by the City's Tax Assessor and his personnel, augmented by temporary additional employees. Two outstanding Miami appraisers were employed as consultants. The two appraisers also test-checked the results by appraising for comparison many properties of different categories in various sections of the City.

The cost of the re-assessment, over and above the regular costs of the Assessor's office, was less than \$150,000, an average of about \$2.00 per parcel.

Despite the great increase in valuation, only 55 of the owners of the more than 80,000 parcels on the roll registered complaints with the Board of Equalization, and all such requests for lower valuation were denied.

As a result, a tax rate of \$16.86 (average) per \$1,000 for 1957 produces \$13,928,253, while the \$24.97 (average) per \$1,000 tax rate produced only \$13,150,250 for 1956. Miami has six separate tax districts for debt service, resulting from annexations at various times, with 1957 rates varying from \$15.58 to \$18.17 per \$1,000.

Miami's net general obligation debt is now only 4.025% of its net taxable assessed value (after homestead exemptions), and the margin for additional debt within its legal limit is \$90,375,000.

May Invest in State Road Bonds—The following appeared in the Louisville "Courier Journal" of Sept. 19:

"The city is studying the possibility of investing some of its reserve funds in Kentucky's proposed \$100,000,000 road-bond issue, Mayor Broadbudd disclosed yesterday.

"Although Broadbudd would not say so directly, it was understood that his Administration feels such an investment would help speed the start of interstate and other highway projects proposed for Louisville under the State bond-issue program.

"Primary purpose of the State bond issue, which was approved by the voters last November, is to provide money to match increased Federal highway funds now available to the states.

"Broadbudd and three other members of the City's Sinking Fund Commissioners discussed the possibility of the city's investment in the State bonds at a luncheon yesterday with Governor Chandler and his financial advisers at the Executive Mansion in Frankfort.

"The Mayor was reluctant to discuss the matter with reporters. 'I don't want to talk about it until we get more information, especially as to the legal technicalities involved and the effect the investment would have on sinking-fund assets and earning capabilities.'

"The State has had some difficulty in preparing to market its bond issue, mainly because of a 3% limit placed on the interest.

"In recent weeks State officials have been trying to interest bankers, insurance firms, and others in committing themselves to buy some of the tax-free bonds when they are issued.

"Plans now are to put up \$35,000,000 worth of bonds in the initial offering.

The city funds involved in the discussions are reserves that have been built up over the years and are still being assembled to pay off term bonds issued in the past by the city.

"Because these municipal bonds do not become due for payment until future years, the city's sinking fund has invested the reserves in United States Government securities.

"Accompanying Broadbudd to the conference with Chandler were Thomas Graham, President of the fund commission, Merle E. Robertson and W. S. Milburn, members."

Mr. Graham is President of Bankers Bond Co., Inc., Louisville, investment bankers.
