Acme Industries, Inc.—Reports Record Sales—

For the fiscal year ended July 31, 1957, this corporation reported the largest sales and the second largest earnings in its history. Net sales were $9,235,862, or 9.5% above the 1956 fiscal year's sales of $8,428,223. For the 1957 fiscal year, net earnings after Federal income taxes were $340,903, equivalent to 93 cents a share on the 364,995 common shares outstanding. This compares with the previous fiscal year's net earnings of $384,761 or $1.05 a share. The reduction in earnings was caused by increased sales promotion expenditures and costs of moving into its new plant which approximately doubled the company's manufacturing floor space, according to K. A. Weatherwax, President.

The report shows that property additions aggregating $1,112,712 were financed from operations to the amount of $935,158.—V. 185, p. 1509.

Aconic Mining Corp., Ltd. (Canada)—Receives Loan—Bankruptcy Petition Withdrawn—

A loan of $400,000 for this corporation has been arranged and a petition of bankruptcy withdrawn, Guy Falla of London, England, President, announced on Sept. 26.

The announcement said the company had borrowed $400,000 from Thomas H. Jones of Cleveland, Ohio, and Albert A. List of New York, on a 5% promissory note due Oct. 1, 1962. It said the investors have a right to use the money for the purchase of 1,178,995 shares of Aconic until Oct. 1, 1962.

Mr. Jones has been elected Chairman of the Board and Treasurer. Royal B. Lord of New York also has been elected a director.

The announcement said Mr. Jones and Mr. List intended that the working capital they provided should finance further studies to determine the economic feasibility of putting the Aconic properties in production. Aconic was organized in 1952 to mine iron ore sands in the Natashquan, Quebec, area.

Mr. Jones is Chairman of Scurry-Rainbow Oil, Ltd., and President of Ungava Developments, Ltd., the second largest shareholder in the International Iron Ore Co. and Atlantic Iron Ore Co., both controlled by Cyrus Eaton of Cleveland, Ohio.

Allied Chemical & Dye Corp.—To Expand Plant—

The corporation is proceeding at once to double the capacity of its caprolactam plant at Hopewell, Va., according to a week-end announcement by Glen B. Miller, President.

The present expansion will increase capacity at Hopewell to 60,000,000 pounds a year, and is necessitated by increased sales of the product. This is the second expansion of the Hopewell plant, which was originally designed to produce caprolactam only for the Company's own requirements.

The plant is operated by the company's National Aniline Division.

Best known to industry as the monomer for Nylon 6, caprolactam is sold by Allied, Mr. Miller stated, to producers of synthetic fibers, and molding polymers for injection molding and extrusion. It is used by the company in the manufacture of "CAPROLAN," Allied Chemical's new fiber. "CAPROLAN" is finding new applications in industrial textiles and home furnishings fabrics, such as carpeting, upholstery, automotive fabrics, rope and safety belt webbing.

"PLASKON" nylon molding resins, produced from caprolactam and sold by Allied's Barrett Division, are being used in the manufacture of many essential industrial products, such as coil forms, cams, valves and automotive gears, bearings and pressure tubing.

Along with caprolactam, the Hopewell plant makes cyclohexanone, cyclohexanol and adipic acid.

The corporation on Oct. 2 announced the appointment of Benton & Bowles, Inc. to handle its corporate advertising account. The appointment is effective Jan. 1, 1958.—V. 186, p. 829.

Alouette Mines, Ltd. (Canada)—On Restricted List—

The Securities and Exchange Commission on Sept. 24 announced the addition of 16 Canadian companies to its "Canadian Restricted List," as follows: Alouette Mines Ltd.; Atlas Gypsum Corp. Ltd.; Bellechasse Mining Corp. Ltd.; Cabanga Developments Ltd.; Comet Petroleums Ltd.; Consolidated Easter Island Mines Ltd.; Diadem Mines Ltd.; Jilbie Mining Co. Ltd.; Lynwatin Nickel Copper Ltd.; New Spring Coulee Oil & Minerals Ltd.; Normalloy Explorations Ltd.; Quinalta Petroleum Ltd.; Stackpool Mining Co. Ltd.; Trenton Mines Ltd.; Trojan Consolidated Mines Ltd.; and Vico Explorations Ltd.

At the same time, on the basis of information furnished to the Commission, Nu-Age Uranium Mines Ltd. was deleted from the List.

The Canadian Restricted List is composed of the names of Canadian companies whose securities the Commission has reason to believe recently have been, or currently are being, distributed in the United States in violation of the registration requirements of the Securities Act of 1933.

The original revised list issued April 24, 1956, contained the names of 135 such companies. Since that time, in seven supplements (including this one), 82 names have been added and 11 have been dropped from the list, leaving a total of 206 as of this date.

American Business Shares, Inc.—Earns $3.64 a Share—

American Enka Corp.—Announces New Process—

A patent covering an important commercial process for bulking or texturizing yarns of all kinds has been issued to this corporation, according to an announcement on Oct. 1.

It is understood that the process covered by the new patent has proved its value in a number of commercial applications now in use by several producers of bulked yarns.

In view of these various applications and of the growing popularity of the so-called bulked or textured yarns, the patent is expected to create considerable interest in the textile industry.

In the process covered by the new patent a multi-filament yarn is passed into a stream of air and the general direction of travel of the filaments is changed just as they enter the air stream. This has proved to be a superior technique for increasing the bulkiness of the resulting yarn.

The corporation recently announced that it had commenced the manufacture of bulked rayon yarn utilizing the new process. Sold under the trademark "Skyloft," this yarn is said to be particularly well suited for application in tufted carpets, automotive, upholstery and drapery fabrics. "Skyloft" is now available in natural rayon and will soon be offered in a range of Jetspun solution-dyed colors.

American Machine & Foundry Co. — Canadian Plant Starts Operations—

Commencement of operations and the completion of the first fuel rod at the new Port Hope, Ontario, Canada, plant and nuclear laboratory of AMF Atomics (Canada) Ltd., a subsidiary, was announced on Sept. 30.

This is Canada's first privately owned and operated plant and laboratory, organized solely for nuclear research, development, engineering and manufacturing. The initial unit, which is expected to develop into a large nuclear facility, is 36,000 square feet and is located on a 30-acre site.

The AMF Atomics (Canada) Port Hope plant and laboratory have three primary objectives:

(1) To manufacture fuel elements for the NRX and NRU reactors at Atomic Energy of Canada's Limited's Chalk River project, and other atomic installations. The 40,000 kilowatt NRX reactor has been operating since 1947; the 200,000 kilowatt NRU reactor, the world's largest nuclear research reactor, is expected to go "critical" shortly.

(2) To design and develop new types of fuel rods for Chalk River and other research and power reactors.

(3) To conduct research, development and production on research and power reactors and to undertake special assignments in the broad field of nucleonics, such as engineering, feasibility and other studies leading to production.

The new Port Hope plant will take Canada a step further in being self-sufficient in its atomic energy program. Uranium ore mined in Canada is refined at Port Hope by Eldorado Mining & Refining Ltd. The Eldorado plant is being expanded to carry the refining process through to the natural uranium metal state.—V. 186, p. 621.

American Northland Oil Co.—Plans Issuance of Preferred Shares in Payment of Contingent Dividends—

Shareholders of capital stock on Oct. 3 were offered a plan whereby they will receive shares in a new issue of 5% cumulative convertible preferred stock in exchange for cancellation of contingent dividends on the capital stock.

"If approved, the plan will remove a deterrent to further financing and to listing the company's shares on a recognized exchange," Murray A. Schutz, Executive Vice-President, said.

The California Corporation Commissioner granted American Northland an offering permit on Sept. 16, allowing the company to present

Digitized for FRASER
http://fraser.stlouisfed.org/

its plan to the capital shareholders. The plan is subject to favorable action by shareholders at a special meeting called for Nov. 1 and to final approval by the Commissioner.

In a letter to shareholders, Mr. Schutz explained the contingent dividends have arisen as a result of a provision in the original permit from the Commissioner at the time of the organization of the company in 1950. This provision called for the payment of an annual dividend of 10 cents a share on the capital stock, unless waived by the Commissioner, prior to the release from escrow of the organizers' shares in the company. The dividends now amount to 70 cents a share, and the Commissioner has held that this same sum is payable on each share, regardless of the actual date of acquisition, Mr. Schutz said. In view of this provision, the company has done no equity financing since 1954, he commented.

Under the proposal, each shareholder (exclusive of organizers' shares) would receive one share of 5% cumulative convertible preferred stock, par value $7, for each ten shares of capital stock held. As there are currently 913,013 capital shares in the hands of the public, about 91,300 preferred shares would be issued. Under the plan, the capital stock would be changed to $1 par value common stock. The preferred stock would be convertible initially into common at the ratio of 1¾ shares of common for each share of preferred.

The offering permit from the California Corporation Commissioner places an evaluation of $2.88 a share on the common stock, after the payment of 70 cents a share in dividends in the form of the preferred stock. This evaluation was in accordance with recent engineering estimates on the company's developed oil reserves and its controlling interest in its refinery subsidiary and other assets.

"Since the application for the permit was filed, the company has developed extensive oil reserves in the northeastern and southern areas of the Wainwright field which are not fully reflected in the $2.88 valuation figure," Mr. Schutz said.—V. 186, p. 1373.

American Photocopy Equipment Co.—Sales and Earnings Rise—Stock Option Exercised—

A 21.3% increase in net income on a 23.4% rise in net sales was reported on Sept. 30 by this company for the nine months ended Aug. 31, 1957. This includes Apeco's wholly-owned Canadian subsidiary, Apeco of Canada, Ltd.

Net sales increased to $10,786,906 from $8,741,909 in the comparable 1956 period. Net profit rose to $1,374,820 from $1,133,457. Earnings per share of common stock increased to $1.72 based on 800,000 shares outstanding in the 1957 period, from $1.42 per share on the same number of shares outstanding in the 1956 period.

Third quarter, 1957, earnings increased to $451,885 from $394,435 in the 1956 quarter. Sales increased to $3,484,029 from $3,096,569. Earnings were equal to 57 cents per share in the recent quarter based on the 800,000 outstanding shares. This compares with 49 cents per share on the same number of shares outstanding in the 1956 period.

Samuel G. Rautbord, Apeco President, stated that substantial increases in sales and earnings during the months ahead will be realized following the company's introduction of new products at the National Business Show in New York in October.

At the same time, Mr Rautbord announced that Lehman Brothers, on Sept. 27, exercised their option to acquire 25,000 shares of Apeco common stock, under an option provided for in a stock option agreement made with the underwriting firm at the time the stock was originally offered for public sale.

Discussing the forthcoming new products, Rautbord said that they are completely diversified from the photocopy field. Mr. Rautbord also stated a third new product, allied to the present line, will soon be announced. The latter machine will have "unusual and exclusive automatic features," according to Mr. Rautbord.

In addition, he disclosed that Apeco has organized a wholly-owned Mexican subsidiary, known as Apeco de Mexico, S.A., with headquarters in Mexico City.—V. 186, p. 418.

Anglo-Canadian Pulp & Paper Mills, Ltd. — Plans Financing—

The company plans to issue $5,000,000 of debentures. A special meeting of common stockholders will be held Oct. 29 to increase the concern's borrowing authority.—V. 180, p. 1429.

Anita Cobre U. S. A., Inc., Phoenix, Ariz. — Registers Common Stock Financing Proposal—

This corporation filed a registration statement with the SEC on Sept. 30, 1957, covering 85,000 shares of common stock, $3.75 par. The securities are to be offered for public sale at par by Selected Securities, Inc., of Phoenix, on a "best efforts" basis, for which it will receive a selling commission of $0.735 per share. No sales will be made for less than 100 shares.

According to the prospectus, the corporation was organized to develop and work a Mexican copper, gold and silver mine near Fundicion in the State of Sonora, Mexico. A Mexican corporation, Anita Cobre, S.A., was created to do the actual exploration, development and owning of this mine. Registrant has acquired a 51% interest in its stock, representing its only property.

Net proceeds to the registrant, assuming sale of the 85,000 shares, are estimated at $256,275. Of this, $115,218.75 is reserved as a contingent liability fund in respect of 30,725 common shares sold in Arizona under the erroneous impression that such sales, to Arizona residents, was exempt from the registration requirements of the Securities Act. An offer of rescission will be made to the holders of these shares. Of the balance, $101,250 will be paid as the maximum balance due on the purchase of the subsidiary's stock; and $39,806.25 will be added to working capital. Registrant has paid $44,500 for the 51% interest in the subsidiary, and has agreed to pay up to $101,250 more therefor. The subsidiary will use the funds for purchase of equipment, development and other related work.

Registrant has outstanding 10,896 shares (in addition to the 30,725 sold to Arizona residents), all held by promoters, among whom are Conrad J. Kleinman, of Phoenix, President, and F. G. Quiroga, a director, of Obregon, Sonora, Mexico. The subsidiary's properties were conveyed to it by Quiroga. In addition to their holdings of registrant's stock, Quiroga and Kleinman, together with John L. Alexander, of Corborca, Sonora, Mexico, and Robert C. Smith of Phoenix, each owns a 12½% interest in the subsidiary's stock.

Archer-Daniels-Midland Co.—Expands in Spain—

This company again is expanding its foreign operations, it was announced on Sept. 22.

The latest move abroad, the eighth announced by the company in less than a year, will establish ADM in the chemical manufacturing business in Spain.

New facilities are being installed by REGRASA to manufacture, under ADM's technical supervision, many of the industrial chemical products developed and produced by ADM in this country. These include foundry core oils and other foundry supplies and intermediate products used in the paint, textile, printing ink, adhesive, lubricant and plastics industries.

REGRASA is firmly established in Spain as a processor of fats and oils.

The other ADM foreign enterprises, all announced by ADM since September 1956, include a whaling station in Peru, a formula feed plant in Mexico, a chemical plant under construction in Belgium, resin and plasticizers manufacturing enterprises in Holland and West Germany, and an arrangement with one of Italy's largest resin manufacturing concerns to produce a number of ADM products in that country. ADM also has established a commodities trading subsidiary in Europe.

ADM is one of the leading processors of agricultural commodities. It is a major producer of vegetable oils, wheat flour, chemicals, industrial cereals, foundry products, resins and plasticizers with 143 plants and elevators in the United States and Canada.—V. 186, p. 1041.

The Chase Manhattan Bank holds funds to pay the semi-annual interest (at the rate of 5% per annum) due April 1, 1957, on the abovementioned debentures.—V. 184, p. 1474.

Avco Manufacturing Corp.—Reports Profit—Resumes Dividend—

The corporation on Sept. 30 announced that consolidated earnings and special credit for the nine months period ended Aug. 31, 1957, amounted to $8,586,374, equal after preferred dividends to 92c per common share.

Second and third quarter earnings this year were seriously affected by a four month strike at the company's New Idea farm implement division. The strike, longest in Avco history, affected both Spring and Fall selling seasons. It was settled Aug. 11, with the signing of a new contract with a three no-strike clause.

On Sept. 27 the directors announced resumption of dividend payments on common stock. A dividend of 10c per share payable Nov. 20, 1957 to stockholders of record Oct. 29, 1957, was declared.

In the comparable nine months of the 1956 fiscal year, the company had an operating loss of $3,499,529, equal after preferred dividends to a loss of 41 cents per common share, exclusive of a $16,000,000 reserve provided for discontinuance of a major part of the company's appliance operations.

No provision for Federal or Canadian income taxes was required during the nine month period this year because of the loss carryforward from the previous year; and, during the current period, settlement of litigation relating to prior years' income and excess profits taxes resulted in a special credit of $2,363,193.

Consolidated net sales for the 1957 nine months period were $238,983,886, compared with $246,168,438 for the comparable period of 1956, which included sales of certain consumer products busihesses since discontinued.

Continued satisfactory results in Avco's businesses, including aircraft engines, research and development on the nose cone of the intercontinental ballistic missile, and electronics and air frame manufacture, as well as broadcasting and telecasting operations, were reported.—V. 186, pp. 938 and 109.

Beacon Associates, Wichita, Kansas—To Issue Partnership Interests—

Beacon Associates, together with F. James Antkies and Jerome Asher, individual partners thereof, filed a registration statement with the SEC on Sept. 30, 1957, covering 186 limited partnership interests in Beacon Associates, a New York limited partnership. It is proposed to offer the partnership interests for sale at $4,000 for each such interest. No underwriting is involved.

Beacon Associates intends to admit a sufficient number of additional limited partners so that the total contributed capital shall be $800,000. It further proposes to purchase the land and building located at 114 South Main Street in Wichita, known as The Beacon Building, at a cost of $513,750 (plus closing and other charges which will increase the total cost to $530,535). This is to be paid in cash and the property will be owned by Beacon Associates free and clear of any mortgage. Immediately upon acquistion of the property, Beacon Associates will take steps to modernize the building, at an approximate cost of $250,000. Simultaneously with the purchase, it will execute a 25-year net lease of the entire premises, renewable for two like terms, to Wichita Associates, a partnership comprised of Leon Slade, Gilbert Gertner, Alan S. Feldman, Joseph A. Weinberger, Bernard S. Meyer and Arthur C. Fink. The lessee will pay an annual net rent of $80,000 to Beacon Associates, adjustable on the occurrence of certain events. Beatrice Foods Co.—Sales Continue to Climb—

The company on Sept. 30 reported record dollar sales of $92,202,907 and increased earnings for the three-month period ending Aug. 31, 1957.

Dollar sales climbed to $2,792,424, a rise of 3% above the corresponding second quarter last year, William G. Karnes, President, reported. Profits increased $113,773 to $3,346,241 before taxes, and $81,773 to $1,633,241 after taxes for the quarter.

Earnings adjusted to reflect a one-for-two stock distribution March 5, 1957, amounted to 75 cents per common share for the quarter compared to 73 cents per common share for the same period in 1956.

Dollar sales for the six-month period ended Aug. 31 reached an all-time high of $179,970,519. This represents a 4% increase amounting to $7,590,350, Karnes said. The six-months' profit of $5,977,960 before federal taxes reflects a gain of $201,172 over the comparable period in 1956. Profits after Federal taxes increased $124,172 to $2,896,960 for the period.

Adjusted earnings after taxes also were in excess of the corresponding six-month period last year. Earnings were $1.32 per common share after provision for preferred dividends compared to $1.29 in 1956.—V. 186, p. 210.

Beckman Instruments, Inc.—Reports Record Sales—

This corporation achieved record high sales of $38,088,730 for the fiscal year ended June 30, 1957, representing an increase of $8,726,599, or 30%, over the previous year, it was revealed on Oct. 1.

Lower net income of $209,432, equivalent to 16 cents per share after taxes on the 1,325,843 shares outstanding, as compared to 1956 fiscal year earnings of $1,744,856, or $1.36 per share was described by Dr. Arnold O. Beckman, President, in his message to shareholders as the result of a deliberate and heavy investment in research and development activity in two new areas of interest, semiconductors and data processing systems, and the unexpected non-recurring loss on government contracts. This loss, he said, was completely absorbed during the fiscal year.

Research and development costs totalled $5,330,104, equivalent to 14% of sales and $1.93 per share of net income after taxes, according to the report.

Beckman Instruments sales for fiscal 1958 should show a substantial increase over 1957, Dr. Beckman said.

"Sales of new products and systems, the result of past research investments, should more than offset any reduction in sales of current products caused by a slow-down in defense spending as Beckman products are predominantly non-military.

"During the past ten years the company has invested heavily in new plants and facilities which now provide greater productive capacity and should result in manufacturing economies which will yield greater gross profit margins. The ratio of research and development expenditures to sales undoubtedly will diminish as the peak requirement for new activities appears to have been met. These factors indicate that we may confidently expect net earnings to set a new record high."—V. 185, p. 2442.

Beech Aircraft Corp.—Receives $10,600,000 Order—

A follow-on order for a large quantity of 1,700-gallon jettisonable fuel tanks for the six-jet USAF B-47 medium bomber was announced on Sept. 23 by this corporation, following completion of contract negotiations with Air Materiel Command, Wright-Patterson Air Force Base, Ohio.

Dollar volume of the new contract is approximately $10,600,000. The order follows a design, development and initial production contract awarded Beech early in 1956. The original B-47 fuel tank contract was valued at approximately $7,500,000.

*Average rate on a bank discount basis. a Comprised of three separate series, all of which were changed as follows:

SERIES E—Beginning May 1, 1952. Over-all interest rate raised from 2.9% to 3% compounded semi-annually when held to maturity. Higher rate achieved by shortening the maturity of the Series E Bond from 10 years to 9 years, 8 months. Interest starts accruing at the end of six months instead of one year. Also the yield is higher in each intermediate year. Individual limit on annual purchases has been doubled from $10,000 to $20,000 maturity value.

SERIES H (NEW)—New current income bond, Series H, available beginning June 1, 1952, bearing 3% interest, compounded semi-annually, when held to maturity. Issued at par, Series H will mature in 9 years and 8 months, with interest paid by check semi-annually. Redeemable at par any time after 6 months from issue date, on one month's notice. Series H has individual limit on annual purchase of $20,000.

SERIES J AND K—These replaced Series F and G Bonds, respectively, as of May 1, 1952. Series J and K yield a return of 2.76% when held to maturity, instead of the former rate of 2.53% for F Bonds and 2.50% for G Bonds. Intermediated yields of Series J and K will be higher than those of F and G. Annual purchase limit of Series J and K combined is increased to $200,000.

For previous data on Savings Bonds, see footnote on page 2637, June 30, 1952 "Chronicle."

c Sale of Treasury notes of Series A was terminated on May 14, 1953. Sales of Treasury notes of Series B began on May 15, 1953. Notes are sold at par and accrued interest to the 15th of the month and if held to maturity or two years interest approximates 2.47%. General Corporation and Investment News

(Continued from page 2)

The new work will extend 1,700-gallon tank production through the middle of 1959.

Sales Soar Upward—Outlook Bright—

An expanding market for business aircraft combined with an increasing diversification of military production promises a bright future for this corporation, the St. Louis Society of Financial Analysts was told on Sept. 24 by John A. Elliott, Secretary-Treasurer, who expressed his company's belief that projected sales would keep pace with the growth rate over the past seven years, during which period the annual volume soared from approximately $16,500,000 in fiscal 1950 to more than $100,000,000 in fiscal 1957.

Celebrating its silver anniversary this year, Beech Aircraft's total sales of commercial and military aviation products to date have already topped the $1 billion mark.

"Our current backlog stands at more than $112,500,000," said Mr Elliott. "As our sales have increased from year to year, so has our backlog which provides that healthy condition of selling more each period than we deliver."

Total sales in 1950 were $16,454,000; in 1951, $32,798,000, and in 1956, $74,539,000. He said that total sales in fiscal 1957, which ends Sept. 30, will represent an increase of approximately 35% over 1956, adding that Beech Aircraft expected to do business at about the same rate during fiscal 1958.

Pointing out that private planes are rapidly coming into greater use by business and industry, Mr. Elliott noted that in the commercial field alone Beech sales increased from $8,041,000 in 1950 to approximately $36,000,000 in fiscal 1957. Business aircraft sales account for about a third of the company's total annual volume, he said.

Mr. Elliott declared that stockholders equity as of Sept. 30, 1956, amounted to a total of $15,266,834, compared with a 1950 figure of $8,661,625. Stockholders equity per share increased from $10.52 in 1950 to $20.35 as of June 30, 1957.

Discussing working capital, Mr. Elliott said the company's current position shows substantial progress during the past five years. Working capital rose from $5,694,546 at the end of fiscal 1952 to $13,060,985 as of June 30, 1957.—V. 135, p. 1150.

Bendix Aviation Corp.—Buys Poroloy Equipment Stk.

This corporation has purchased from the National-Standard Co., of Niles, Mich. the latter's stock interest in Poroloy Equipment, Inc., of Van Nuys, Calif., manufacturer of metals that "breathe" and filter, Malcolm P. Ferguson, President, announced on Sept. 25. Poroloy will continue to be operated by its present management, headed by H. L. Wheeler, Jr., President.

The California firm was started in 1953 by a group of engineers who had been associated with the Jet Propulsion Laboratory at the California Institute of Technology. They developed "Poroloy" as a new porous metal of stainless steel which has found many useful applications in meeting "heat barrier" and filtration problems in guided missiles, jet engines and other aircraft and industrial applications, Ferguson said.

"Its principal application has been in solving very fine filtration problems in guided missiles, aircraft engines and industrial situations where high temperatures and pressures are involved," Mr. Ferguson said. "The new metal also has shown much promise in the ability to cool burner-chamber walls and turbine blades in jet engines and extend their operating life."

The company also makes a sintered, stainless steel-wire cloth material known as "Poromesh" which can be tailored to special filter applications which also involve heat and pressure

British American Oil Co. Ltd.—Sales Improve—

"Sales of all B-A products for the third quarter have continued to show a good improvement over last year, and indicated earnings for the nine months will be in line with the increased volume of business," M. S. Beringer, President, reported on Oct. 1.

In Western Canada during the third quarter, B-A's average net crude oil production after royalty is estimated at 36,900 barrels daily. The company participated in the completion of 15 gross wildcat and 71 gross development wells during the quarter, bringing the total to 60 gross wildcat and 187 gross development wells for the first nine months.

Mr. Beringer reports that B-A has acquired a 50% interest in an additonal 92-000-acre block immediately adjacent to recent discoveries in the Kaybob area of Alberta. An important B-A discovery in the Wimbourne area of Alberta flowed between 14 and 15 million cubic feet of gas per day and 216 barrels of oil per day. In southeastern Saskatchewan, the company recorded two oil discoveries.

A contract has been let for additional construction at the Pincher Creek, Alberta plant, where present facilities will be expanded to make residue gas available for sale to Trans-Canada Pipe Line late in 1958.

In the United States, B-A's production of oil and gas continued at record high rates. The company now has 30 wells in San Juan County, New Mexico, where a pipe line market for B-A's oil is expected within the next sixty days. Third quarter oil well successes included five in Banner County, Nebraska; three in Cheyenne County, Nebraska; and seven in Nueces County, Texas.

Mr. Beringer reports that construction is completed on additional crude facilities at B-A's Clarkson, Ontario, refinery and that preliminary work is progressing satisfactorily on the new refinery at Port Moody, B. C.—V. 186, p. 1374.

Burroughs Corp.—Announces New Accounting Board

A new general accounting board with a unique modular design adaptable to 80 different sizes and shapes of forms has been announced by the Todd Company Division.

Known as the Todd "Write it Once" board, the unit is composed of six sections which can be assembled to meet the specifications of an almost limitless variety of paproll, accounts payable and accounts receivable systems.

According to Todd systems engineers, this new concept means that now, instead of designing an accounting system to fit the limitations of a board, a board can be custom-designed—without additional cost—to fit virtually any desired forms or systems.—V. 186, p. 726.

Canadian Export Gas Ltd.—Proposed Exchange Offer

See Canadian Prospect Ltd. below.—V. 186, p. 3.

Canadian Prospect, Ltd.—Proposed Exchange Offer—

This company filed a registration statement with the SEC on Sept. 27, 1957, covering 4,851,810 common shares, 16⅔c par. The company proposes to offer these shares in exchange for shares of the capital stock of Canadian Export Gas Ltd. in the ratio of 2½ shares of Canadian Prospect for each share of Canadian Export.

Canadian Prospect owns 595,950 shares of Canadian Export stock, or 25% of the outstanding shares. Certain directors and officers of Canadian Prospect are also directors and officers of Canadian Export. Canadian Prospect now desires to acquire all of the outstanding shares of Canadian Export and thus enable Canadian Prospect to operate Canadian Export as a subsidiary under the combined management of the two companies. The exchange offer is contingent upon its acceptance by holders of sufficient shares of Canadian Export to give Canadian Prospect at least an 80% interest in Canadian Export (including its present holdings). According to the prospectus, management officials of the two companies (and related interests) now hold 603,000 shares of Canadian Export stock which they intend to exchange for Canadian Prospect stock. After acceptance of the exchange offer it is proposed to change the name of Canadian Prospect to Canadian Export Gas & Oil Ltd.—V. 186, p. 3.

Cardwell Manufacturing Co., Wichita, Kan. — New Product Introduced—

A dramatically new innovation in mud pump design for drilling oil wells has been announced by this company. Cardwell's new V-1500 Mud Pump is approximately one-third the weight of any mud pump in the large horsepower class. It is capable of operating under pressures of 3,500 pounds per square inch and delivering volumes up to 1,114 gallons per minute.

Among the unique features of the new V-1500 pump are such engineering innovations as four-cylinder, V-type construction, high

speed operation and two-piece crankshaft. The pump is of plunger design eliminating the pistons and fluid liners commonly associated with mud pumps.

In addition to materially reducing weight in their pump, Cardwell has also reduced the overall size of the pump. By reducing the space required to accomodate the unit, Cardwell officials pointed out that its use in marine drilling applications would prove to be a valuable asset in saving expensive deck space on off-shore barges and platforms.

Carter-Jones Drilling Co., Inc., Kilgore, Texas—Registers Stock Offering With SEC—

This company on Sept. 27 filed a registration statement with the SEC covering 300,000 shares of its 10 cent par capital stock, to be offered for public sale. The offering terms are to be supplied by amendment. No underwriting is involved.

The company was organized under Texas laws on June 27, 1957, to provide a corporate organization to acquire, further develop and operate interests in oil and gas properties and a contract drilling business owned by J. K. Maxwell, H. C. Jones and W. T. Maxwell, Messrs. J. K. and W. T. Maxwell and Jones, as of July 1, 1957, transferred six drilling rigs and other equipment and oil and gas properties to the company in exchange for 344,509 shares of its capital stock, and the assumption by the company of indebtedness totaling $894,650 and of the contractual obligations of the transferors with respect to the properties transferred.

The company's producing properties are located in East, North and South Texas, and the company also owns wildcat acreage in these areas and in Louisiana. The company is engaged and proposes to engage principally in acquiring, in conjunction with others, leases on prospective, semi-proven and proven oil and gas properties, exploring and developing such properties with its own drilling equipment, and in the production and sale of crude oil and natural gas from such properties. The company has been engaged and intends to continue to be engaged to a lesser extent in drilling oil and gas wells for others on a contract basis.

Net proceeds of the stock offering, assuming all shares are sold, are estimated at $1,472,000. The remainder of the proceeds will be used primarily to participate in the acquisition and exploration of oil properties in joint-venture arrangements with other persons in which the company does not propose to retain more than a 25% interest or assume more than 25% of the risk, and for general working capital. In the event that not all of the stock offered is sold, the company will apply the proceeds from time to time as received in the proportion of approximately 70% to pay off debt and 30% to be retained, for working capital, and intends to negotiate with banks and other lenders for a loan or loans to refinance all or part of the present indebtedness on a long-term basis, the amount to be sought to depend upon the amount of proceeds realized from the sale of stock. No such negotiations have as yet been conducted.

P. H. Danly, President, on Sept. 27, said in part: "During the latter months of the year there was a marked reduction of new business being placed for equipment required by the metal stamping industry. This change became especially noticeable very recently, and since deliveries continued to be largely in excess of new orders received, the backlog of unfilled orders has declined materially. It appears that operations in the first quarter of the current fiscal year were unsatisfactory and at the moment there is no reliable indication of improvement for the second quarter.

"In view of these uncertainties with respect to earnings, and taking into account also cash requirements for the plant expansion program in the next few months and the provisions for working capital maintenance contained in the indentures relating to our long-term debt, the directors deem it important to conserve cash at this time.

"In lieu, therefore, of the cash dividend which would ordinarily be paid on Oct. 15, a stock dividend of 2% has been declared payable Oct. 15, 1957 to holders of record Sept. 30, 1957."—V. 185, p. 1272.

Dayton Power & Light Co.—Proposed Financing—

A $25,000,000 offering of 30-year first mortgage bonds was approved on Sept. 26 by the directors.

Kenneth C. Long, President of DP&L, announced that the sale would take place early in November. Proceeds will be used to repay temporary bank loans and defray a part of the cost of the 1957-58 construction program.

Since the end of World War II up to Dec. 31, 1956, the company had spent $175,000,000 for expansion. The 1957 program calls for an additional expenditure of approximately $32,885,000.

The post war financing program has included:

Two issues of preferred stock in 1947 and one in 1950 to net a total of $24,685,000.

Two issues of bonds at 3% in 1948 to net $22,933,000, one of 3¼% in 1952 to net $15,157,000, and one in 1954 at 3¾ to net $14,832,000 These issues totaled $52,922,000.

Common stock issued during the post war period amounted to 1,425,266 shares for a net total to the company of $44,219,000.

From this program the company has realized a total of $121,826,000. Part of these proceeds were spent to redeem 100,000 shares of 4½% cumulative preferred stock and the balance was used to partially finance the company's expansion program.

Mr. Long announced after the board meeting that the sale would be open to competitive bidding and as usual would be subject to a registration statement filed with the Securities and Exchange Commission becoming effective, and approval of the Ohio P. U. Commission. —V. 186, p. 1875.

Now in its final construction stages, this project is scheduled to be operating within the next few months. The construction costs for the new building addition which houses the Sendzimir mill operation is included in the $6,000,000 installation total.

Ford Motor Co. (Mich.)—New Continental Series—

Introduction of a full line of four models in a new Continental series for 1958, to be offered by this company was revealed in New York City on Oct. 3.

Two all-new four-door sedans and a unique retractable-top convertible will be added to the previous two-door hardtop to give the Continental an across-the-board choice of four body styles in the famed classic prestige car line, the company announced.

The company had said in May that production of the Mark II Continental had ended with completion of a model run of 3,000 units —a sales total never before approached in the ultra-high priced car field. Despite a great many inquiries about product plans for the Continental, the company made no further public announcement.

James J. Vance, Vice-President of Ford Motor Co. and General Manager of the Lincoln and Mercury Division, said that merchandising plans for the new 1958 full-line Continental will bring the luxury car line within the reach of a much larger number of car buyers at a cost which reflects the economies of increased production.

Prices of the new Continentals, which will be announced when the new models appear in dealer showrooms in November, will be substantially lower than the Mark II, Mr. Nance said.

He added: "This achievement results from two factors—increased production made possible by our new plant at Novi, Mich., which was designed expressly for the type production we are using for the Continental, and secondly, the fact that the Lincoln for 1958 will incorporate Continental styling and performance, thus enabling the company to spread the costs of luxury car design and manufacture over an increasing number of units.—V. 186, p. 1049.

Gulf Oil Corp.—Two New Units on Stream—

The corporation on Oct. 1 announced that it has placed on stream at its refinery at Philadelphia, Pa., two new Gulfining units which use a hydrogenation process to super-refine home heating oils.

The new units each have a design capacity of 20,000 barrels a day of heating oil; but they are expected to exceed these figures on the basis of performanee of the two original Gulfiners, which have been operating for several months at Port Arthur, Texas.

The Port Arthur units, built on the same plan as those at Philadelphia, are producing at well above design capacity, the company revealed.

One of the Port Arthur Gulfiners is processing light catalytic gas oil from the refinery's catalytic cracking units at a rate of 25,000 barrels per day. The other is processing straight run (or virgin) distillate stock at 27,000 barrels per day.

Further, the Port Arthur Gulfiners are operating at somewhat lower temperature than anticipated, which will serve to extend catalyst life and reduce the frequency of catalyst regeneration. Operationwise, it permits extending the production period, after the catalyst begins to deactivate, by raising the temperature.

Gulfining was developed at the company's Research Center, near Pittsburgh, Pa., to utilize hydrogen, produced by Gulf's recently installed catalytic reformers, for the purpose of removing sulfur and other undesirable compounds from fuel oil distillates by hydrogenation.—V. 186, p. 1050.

International Business Machines Corp. — Announces Powerful Office Machine—

The corporation's Data Processing Division has announced the 705-III, one of the most powerful electronic systems on the market for the processing of business data. It is the latest addition to the IBM 700-series of large-scale electronic data processing systems now at work in scores of business, scientific, and government installations.

One of the outstanding features of the new system is a completely transistorized magnetic tape unit with an input-output rate fast enough to read or write the equivalent of a full-length novel once every 15 seconds. This ultra-high speed tape unit, the IBM 729 Model 3, can read or write business information at the rate of 90,000 characters per second, automatically checking the information for validity and readability at the same time. By increasing tape density, the Model 3 is able to store up to three times as much information on each tape reel.

The system also utilizes the new 767 Data Synchronizer which controls magnetic tape input and output so that the 705-III can read problem data, compute, and write answers simultaneously.

In addition to the new tape unit, the 705-III features several other advances which permit the system to handle large masses of data much more rapidly and in a more versatile fashion than ever before. Calculating time on many applications will be reduced by as much as 40%.—V. 186, p. 1263.

Mississippi River Fuel Corp.—New Producer—

This corporation, Ocean Drilling & Exploration Co., Hope Natural Gas Co., and others on Oct. 2 announced the completion of another multiple sand producer on state lease 1172, located in block 4, Gulf of Mexico, off Cameron Parish, La. This well, state lease 1172 well No. 2, is a 160 acre north offset confirmation test to the No. 1 wildcat well, which was also successfully completed as a dual producer in early 1957.

This recently completed well was tested from pipe perforations 12,804 to 12,824 feet for a daily flow of 5,150,000 cubic feet of gas which yielded approximately 17 barrels of high gravity liquids per million. Additional tests from pipe perforations from 12,492 to 12,532 feet yielded 6,000,000 cubic feet of gas per day with a liquid content of 12 barrels to the million.

Another well is planned to commence immediately to further develop and evaluate this 2,500 acre offshore lease, in which each of the above-named partners owns 25% working interest.

Mississippi River Fuel Co. serves as operator of this property and the wells were drilled by Ocean Drilling & Exploration Co.'s mobile barge "John Hayward." Plans are being considered to construct facilities and market the production from this property.—V. 186, p. 946.

BUSINESS—The company was incorporated in Delaware on June 1, 1920 and is engaged in manufacturing and mining operations. The manufacturing activities consist of processing molybdenum, tungsten, rare earths, boron and columbium mineral concentrates and producing therefrom various alloys, chemicals and manufactured metal products, which are sold principally to the steel industry and to a lesser extent to the electrical and other industries. The mining activities consist of operating a rare earths property and exploring other properties which contain molybdenum, columbium, tungsten and other minerals.

The major portion of the company's sales and profits has been derived from the manufacturing phase of the business. In order to broaden its earnings base and to acquire sources of supply for existing and future requirements and expansion of products, the company has for many years searched for mining properties.

The company conducts its manufacturing operations at plants located in Washington, Pa.; York, Pa.; and Cleveland, Ohio. All of the plants are owned in fee.

The company owns a mine and mill at Mountain Pass, Calif., in the Clark Mountain mining district in the northeast corner of San Bernardino County, Calif. The mining claims owned by the company cover 1120 acres and are directly adjacent to U. S. Highway 91.

The company holds 18 patented mining claims and 53 unpatented mining claims comprising approximately 1,423 acres six miles from Questa, in the Red River mining district, Taos County, New Mexico. —V. 186, p. 841.

Plans for the construction of a new unit at the El Dorado, Ark., refinery of the Monsanto's Lion Oil Co. Division have been announced by T. M. Martin, Lion President.

The reformer will convert low octane straight-run gasoline into higher octane material. Mr. Martin said that the new additions will place the company in a position to meet anticipated future demand for even higher octane gasolines.

Plans have already been submitted for bids and several contractors are expected to present their proposals with in the next two weeks, Mr. Martin stated. Anticipated construction costs were not revealed.

The location for the new units is within the present refinery area. Site clearance and other preliminary work will start immediately. Actual construction will begin shortly after the first of the year, with completion in the latter part of 1958.—V. 186, p. 527.

Murphy Corp.—Reports Record Earnings—

Net income of this corporation and its subsidiaries for the first quarter ended Aug. 31, 1957 was the highest of any summer quarter in the company's history, Charles H. Murphy, Jr., President, told stockholders at their annual meeting on Oct. 2.

Consolidated net income was $905,000, equivalent to 39c a share on 2,351,160 shares outstanding, compared with $232,000, or 10c per share on 2,347,160 shares outstanding in the quarter ended Aug. 31, 1956. Consolidated gross income was $7,061,000 for the quarter, compared with $3,423,000 for the first quarter of the previous fiscal year.

Mr. Murphy told stockholders he did not anticipate that the sharp rate of increase in earnings in the first quarter would carry through the year.

During the quarter, he said, 25 net wells were completed of which 18 are producers and 7 were dry holes. This compares with 26 net wells in the similar 1956 quarter, of which 15 were producers and 11 were dry.

He reported the sinking of a discovery well in the Lake Maracaibo tract near the Bolivar coastal fields, which appear to comprise the largest crude oil reserve in the Western Hemisphere, and added that the company is preparing to start a second well in the area and has staked out a third. The company holds a 15% interest in the Venezuelan concessions.—V. 185, p. 344.

National Airlines, Inc.—Plans $115 Million Outlay—

This corporation will spend $115,000,000 on expansion through 1960, it was announced on Sept. 30.

No equity financing will be necessary, according to the company, but between $50,000,000 and $45,000,000 will be raised through bank loans and depreciation and sale of equipment.

The corporation said it had received delivery of four new Douglas DC-7E aircraft and four Super H Constellations.

The annual report for the fiscal year ended June 30, 1957 also announced that 23 Lockheed Electra turbo-prop jet aircraft were to be delivered from April, 1959, to December, 1960. Six Douglas DC-8 turbo-jet transports are scheduled for delivery from December, 1959 to November, 1960.

The company's investments and special funds, principally cash deposits under aircraft and engine purchase agreements, totaled $9,078,160 in the fiscal year ended June 30, compared with $3,082,894 in the preceding fiscal year, G. T. Baker, President and Board Chairman, reported.

Current assets were $11,079,814 at June 30, 1957 compared to $16,643,606 at the same date a year ago. This difference is due to the purchase of three Convair 440 planes and advance payment of $5,900,000 on the new equipment on order.

Current liabilities at June 30, 1957 were $10,462,209 compared with $11,733,585 a year previous. Ratio of current assets to current liabilities at June 30, 1957 was 1.06 to 1, compared with 1.42 to 1 a year ago.

At June 30, 1957, earned surplus was $18,874,538 compared to $16,522,353 at the end of fiscal 1956, a gain of 14.24%.

Shareholders' equity was $25.55 per share in fiscal 1957, compared to $23.51 the previous year.—V. 186, p. 946.

National Distillers & Chemical Corp.—Affiliate Builds

Houston, Texas has been chosen by National Petro-Chemicals Corp. as the site for its second polyethylene plant, it has just been announced by Dr. Robert E. Hulse, Vice-President. Plans for building the plant had been announced about a month ago, but the site had not been chosen at that time.

The new 75 million pound-per-year plant will be located on a 200-acre site on the Houston Ship Channel, in an area which has been set aside for industrial development by Phillips Petroleum Co., not far from the San Jacinto monument. High-purity ethylene will be supplied by Phillips under long-term contract from its new ethylene plant at Sweeny, Texas, whence it will be piped about 70 miles to the Phillips Chemical Co. Adams Terminal plant for final purification before delivery to National Petro-Chemicals' polyethylene plant. Phillips will also supply the natural gas requirements of the plant.

Phillips has extensive storage facilities for ethylene in a salt dome at the Clemens Terminal, which is located on the Sweeny-Houston pipeline, from which it will be possible to supply National Petro-Chemicals' plant with ethylene during turnarounds at the Sweeny plant. Dr. Hulse pointed out that the continuity of supply which this underground storage system will provide was a major factor in locating the new polyethylene plant on the Phillips ethylene pipeline system.

The new polyethylene plant is scheduled for operation for late 1958. M. W. Kellogg is handling the engineering and construction of the plant.

The new plant will produce 75 million pounds-per-year of intermediate-density polyethylene resins by a modification of the conventional high-pressure process which is already in operation at the company's Tuscola, Ill., plant. The intermediate-density resins will have properties somewhere between those of the original "squeeze bottle" polyethylenes and the new high-density resins produced by the so-called "low-pressure" processes.

The polyethylene production at the new plant will be sold under the trade mark "Petrothene" by U. S. Industrial Chemicals Co., a division of National Distillers & Chemical Corp. National Petro-Chemicals Corp., which is building the new plant, is a subsidiary of National Distillers and Panhandle Eastern Pipeline Co.

National Petro-Chemicals is now producing polyethlene at the rate of 100 million pounds-per-year at its Tuscola, Ill., plant. The new plant will bring the company's total capacity to 175 million pounds-per-year.—V. 186, p. 1093.

Unger, who has been Executive Vice-President, was named President; Harold Goldman, who has held the post of Vice-President in Charge of Sales, was moved up to Executive Vice-President; and Edythe Rein, Vice-President in Charge of Operations and Administration, has become Senior Vice-President, continuing her previous functions.—V. 186, p. 1377.

Pakistan Industrial Credit & Investment Corp., Ltd.—Loan Approved—

The World Bank has approved a loan of $4,200,000 to help finance the development of private industry in Pakistan. The loan will be made to this corporation, which is being formed by private Pakistani, British, American and Japanese investors. The Bank will enter into a formal loan agreement when the corporation is established a few months hence.

The initial share capital of the corporation will be 20,000,000 rupees ($4,200,000). Arrangements have been made for the Pakistani investors to subscribe to 60% of the shares, American and British investors to 15% each, and Japanese investors to 10%. The Government of Pakistan will make a 30-year interest-free advance of 30,000,000 rupees to the corporation; so that the capital resources initially available to the corporation, from capital subscription, the Government advance and the Bank loan, will be 70,000,000 rupees ($14,700,000).

The principal objectives of the corporation will be to assist in the expansion or modernization of small and medium-sized industries and to help create new ones. To achieve these objectives, the corporation will make loans and equity investments, and underwrite and distribute securities. It will also help private industries to obtain managerial, technical and administrative services and advice. As rapidly as is prudent, the corporation will sell its loans and share holdings to other investors to recover its own capital for further investment.

It is expected that the initial board of directors of the corporation will comprise 14 directors: 10 prominent Pakistani industrialists, businessmen and bankers to represent the Pakistani shareholders, one director each to represent the British, American and Japanese investors, and one Government director. Headquarters of the corporation will be in Karachi and branches will be established in Lahore and Dacca.

The authorized capital of the corporation will be 150,000,000 rupees ($31,500,000), divided into 2,000,000 ordinary shares (common stock) and 13,000,000 unclassified shares, all with a par value of 10 rupees ($2.10) each. Initially the corporation will issue only the 2,000,000 ordinary shares with an aggregate par value of 20,000,000 rupees ($4,200,000) which will be offered for subscription at par. The Pakistani Steering Committee is arranging for the sale of 1,200,000 shares (12,000,000 rupees) of capital in Pakistan: 800,000 shares through private placement and 400,000 by public offering. The British investors—some of the Eastern Exchange Banks, a number of insurance companies, four industrial concerns and the Commonwealth Development Finance Co. Ltd.—intend to subscribe 300,000 shares (3,000,000 rupees). American investors—Bank of America, Henry J. Kaiser Co., International Basic Economy Corporation, Transoceanic Development Corp., Ltd., and others—intend to subscribe 300,000 shares (3,000,000 rupees). The Japanese investing group, consisting of the 12 Japanese foreign exchange banks, intend to subscribe 200,000 shares (2,000,000 rupees).

The Government's 30-year interest-free advance of 30,000,000 rupees will be repayable in 15 equal installments, beginning in the 16th year. This advance will be provided out of funds derived from the sale of commodities provided to Pakistan under United States Government aid.

The proceeds of the $4,200,000 World Bank loan will be used to pay for imported materials, equipment and services required to carry out industrial projects financed by the corporation. The loan will be for a term of about 15 years and interest will be determined at the time the loan documents are signed. The Government of Pakistan will guarantee the loan.

In the settlement, Robertshaw-Fulton obtained license rights for controls in the laundry machine field and Dole, likewise, obtained rights under Robertshaw-Fulton owned patents charged to be infringed.

The suit, which was pending in the District Court of the United States for the Northern District of Illinois, is being dismissed without costs to either party.—V. 186, p. 1154.

While 1957 sales were 12% above those of 1956, Allan A. Ryan, Chairman of the Board, said that earnings, especially during the second half of the year, suffered from increased expenditures for expanded research and development activities, increased staff and personnel, broader advertising and sales promotion coverage, and expense incident to the introduction of a new model typewriter.—V. 186, p. 1154.

Royal Dutch Petroleum Co.—Plans Large Stock Offering Early in 1958—

This company and the "Shell" Transport & Trading Co., Ltd., on Oct. 3 confirmed that for some time they have been actively exploring the possibilities of raising new capital by means of share issues to be made early in 1958. These issues would be for the purpose of meeting the needs of the Royal Dutch/Shell Group of companies for additional funds required for future capital expenditure.

It is expected that the Royal Dutch offering would be in the form of a "rights" issue to shareholders and would be for an amount of between Fls. 800 million and Fls. 1,000 million (equivalent to $211,000,000 and $263,000,000). The price would not be related to nominal value but would be governed by market conditions prevailing at the time of the issue.

The "Shell" Transport & Trading Co., Ltd. would make a similar offering to shareholders for an amount of between £40 million and £55 million (equivalent to $112,000,000 and $154,000,000), subject to approval by the capital issues committee.—V. 184, p. 2851.

Safeway Stores, Inc.—Profits Up 31%—

Net income for the first 36 weeks of 1957 increased 31% over the same period of last year, the company reported on Oct. 1. Net earnings, after preferred dividends, amounted to $5.24 per share of common stock.

"Improved company earnings mostly have resulted from our continuing emphasis on decentralization of operating functions and decisions," President Robert A. Magowan said. "We are proud of the way that our local executives have responded to this new challenge."

For the 36 weeks ended Sept. 7, 1957 net income after taxes amounted to $21,609,803 on a fully consolidated basis, a gain of 31% over the same period last year when net income was $16,462,979 for the same period of 1956 and $7,896,023 in 1955. Income taxes were $24,317,584 thus far in 1957 as compared to $18,527,725 at the same time in 1956.

After deducting preferred stock dividends of $997,353 the earnings for the first 36 weeks of 1957 amounted to $5.24 per share of common stock on 3,933,195 shares, the average number outstanding during the period. This compares to $4.18 in 1956 when shares then outstanding averaged 9% fewer—3,598,820.

Safeway's 1957 sales for the 36 weeks were $1,448,207,869—6.60% greater than for the same period of 1956. And 1957 sales during the last and third 12-week period were the highest in the company's history.

Consolidated net income for this third 12-week period, also ended Sept. 7, was $7,631,793 which, on the basis of the average of outstanding common stock, amounted to $1.83 per share. For the comparable 12-week period in 1956, net earnings were $1.67 on the smaller average number of shares then outstanding.

During the first 36 weeks of 1957, Safeway added 134 retail outlets and closed 96 old stores. In addition, 81 new modern retail markets were under construction. As a result of this replacement program, the company had 2,020 retail stores in operation as of Sept. 7, 1957 as compared to 1,985 at the same time last year.—V. 186, p. 949.

Seminole Oil & Gas Corp.—Offering Withdrawn—Progress Reported—Preferred Stock Being Converted—The company, in an interim report to stockholders, dated Sept. 27, comments on the highlights: (1) the consummation of the transaction with Milestone Drilling Co. concerning a joint venture drilling operation; (2) the withdrawal of the public offering (underwriting) of common stock; (3) the status of the conversion of preferred stock into common; (4) the Oklahoma properties; and (5) other highlights. The report says in part:

TRANSACTION WITH MILESTONE ON JOINT DRILLING OPERATION—On Sept. 13, 1957 a contract was signed between Seminole and Milestone Drilling Co. of Midland, Texas (presented by Messrs. Collins and Brinson of Dallas and Midland), whereunder drilling operations will be undertaken by Milestone on Seminole's Crane County, Texas, property. As the first step in the program, six wells will be drilled—30 days apart—work to begin immediately. Oil & Gas Property Management and other experts who have been consulted have endorsed the deal. It is expected that these first six wells should uncover an additional reserve of about 250,000 barrels in which Seminole will enjoy a full one-half interest. Seminole will have charge of the whole operation subject to Milestone's collaboration with Oil & Gas (Seminole's agents in Dallas). It is estimated that the aggregate cost will run to $250,000 of which the share of Seminole will be advanced by Milestone to be recouped out of production should the operation prove to be successful. Except for Seminole's initial obligation limited to $10,000 in cash. Seminole's share may, at the option of Milestone, be paid in common stock at the market price at the time of settlement. This is designed to conserve Seminole's working capital.

The contract further provides for a limited amount of exploration and drilling on the easterly half of Seminole's project into the same formation after completing the first six wells. Production on the easterly half will open a new field of reserves and at least two wells will be drilled there.

Together with Milestone Seminole will drill and operate a total of eight wells.

WITHDRAWAL OF PUBLIC UNDERWRITING—The proposed underwriting had been submitted to the SEC on June 22, 1957, pending which none of the negotiations comtemplated by management had been suspended. The SEC had indicated the need for corrective statements and on Sept. 3, 1957, forwarded us their formal letter of deficiency. On account of the many changes that had occurred since June 22, 1957, including the now closed Milestone deal (which calls for a stock option as indicated); it was felt that (a) the offering price of 75 cents was too low; (b) the need for capital to the extent theretofore indicated was not pressing; (c) the remedial work has reflected itself in increased monthly income since May 1957—the highest in many years; (d) of the 10,444 preferred shares outstanding, approximately 2,000 shares had already been converted or are in process of being converted into common in the ratio of 8 for 1, thus increasing our capital surplus considerably, and (e) Seminole has improved its borrowing capacity considerably.

Thus, it would be manifestly unfair to allow subscription to new stock below the intrinsic value just at a time when new horizons are opening up for Seminole stockholders. The withdrawal of the underwriting and the news breaking of the progress of the company on all fronts will undoubtedly reflect itself in an increased market price of the stock.

CONVERSION STATUS OF PREFERRED STOCK—It is expected that many stockholders will convert t ir preferred stock before the expiration date—Oct. 17, 1957. After that date the conversion rate will go back to 3 for 1. Indications are that this year may produce a net profit from which some arrears on the preferred stock may be paid. It is in the interest of Seminole and all the stockholders that there be no arrears at all. As a reminder to the holders of preferred stock we may say that it would be unfair to the holders of the common stock that such arrears be paid concurrently with a conversion privilege of eight for one. We, therefore, urge that this matter be given immediate attention by the holders of the preferred stocks.

OKLAHOMA PROPERTIES — Management is considering a small drilling program in our Sancho Field, Okla., in order to bring production up from the approximately $30,000 per annum to perhaps $65,000 or $75,000. There are some drilling operations on offsets as well as some remedial work which should pay off. In order to limit the capital outlay for such operations Seminole may engage in a modified farm-out patterned after the Milestone transaction.

OTHER HIGHLIGHTS—The management has been negotiating several acquisitions for stock or for cash-and-stock and has been guided in this respect by Oil & Gas and other engineers and geologists. Many offers have been rejected. Two are being investigated, one of which may be consummated in the very near future on an all-stock basis.

This should add substantial reserves as well as an immediate income from producing wells. The contracts which may be entered into for the delivery of stock will generally provide for the valuation of the stock at or close to the market price at the time of the closing of any transaction.—V. 186, p. 116.

Shamrock Oil & Gas Corp.—Debentures Offered—The First Boston Corp. and associates on Oct. 3 offered publicly an issue of $17,500,000 5¼% convertible subordinated debentures, due Oct. 1, 1982, at 100% and accrued interest.

The sinking fund will be sufficient to retire 94% of the debentures prior to maturity.

PROCEEDS—Of the net proceeds to be received by the company from the sale of the debentures, $12,000,000 will be applied to the prepayment of an outstanding bank loan. The remainder will be added to general funds and will be available for working capital and general corporate purposes, including construction or completion of additional facilities for processing liquid hydrocarbons, additions to the sulphuric acid plant, pipelines and terminal and other marketing facilities, and the acquisition and development of oil and gas properties.

Silvray Lighting, Inc.—New Development—

This corporation on Sept. 20 announced the development of a new outdoor lighting unit which features a shatter-resistant Plexi-glass shield to help combat vandalism in city parks and streets.

An added feature of this new unit is its use of two CIRCLINE (circular) lamps—one 32 watts, the other 40 watts. The higher rated efficiency of these tubular lamps provides greater brightness at street levels with no increase in power consumption.

The unit may also be used with a Silvray processed (silvered) incandescent lamp—150 watts, 200 watts or 300 watts—to concentrate light on roadways, while shielding the house side of the unit.

It is reported that the circular design greatly reduces the overall size, as well as cost, as compared with conventional 48 inch lamps now appearing in street lighting installations.—V. 186, p. 1309.

Solar Refining Co.—Receives Generator Contract—

The company has received a $4,500,000 contract for gas-turbine-powered airborne generator sets and spares from the Air Force's Air Materiel Command, according to Herbert Kunzel, President.

The sets will be powered by Solar's 50 horsepower Mars gas turbine engine and will be installed in the Boeing KC-97 Stratotanker. The new contract supplements existing orders for the units, now being manufactured on Solar's recently installed gas turbine assembly lines in San Diego, Calif.

The Strategic Air Command now has seven air refueling squadrons fully equipped with the unit.

The Solar auxiliary power unit, designed to function as an independent power source for SAC tankers when they are not flying, also furnishes auxiliary electrical power in flight. Its installation doubles the d-c power formerly available to operate necessary equipment when aircraft are on the ground.

The APU also furnishes power for the aircraft's engine heaters which keep the KC-97's piston engines operable in extreme arctic temperatures. The gas turbine unit is equally efficient under tropical conditions. This makes it possible for the tanker force to operate under extreme climatic conditions from forward bases where only a minimum of ground support is available.

Solar also manufactures the 500 horsepower Jupiter gas turbine engine. Presently under development at Solar is a new 1,000 horsepower gas turbine, the Saturn engine, with widespread potential for small boat propulsion. In addition, Solar has designed the smallest gas turbine aircraft engine ever built to power a one-man helicopter. Only 20 inches high, the tiny turboshaft engine will produce 55 shaft horsepower. A variable speed model of this 50-pound engine is also being designed by Solar for flying platforms under study by the Army.—V. 133, p. 2448.

Sperry Rand Corp.—Announces New Development—

Classic precision—required by supersonic jets to reach their targets with great accuracy and demolish them with latest toss-bombing techniques—has been achieved in a lightweight, versatile gyro system announced on Oct. 3 by the Sperry Gyroscope Co., a division of Sperry Rand Corp.

The new system can do the work of a wide range of special-purpose gyro equipment now used on both military and commercial aircraft, Sperry's aeronautical equipment division said. First of the new systems soon will be delivered to the Air Force's Wright Air Development Center.

Fundamentally, the Sperry system couples two identical directional gyros to create a fixed plane or "stable platform" in space. The "platform" is used to provide heading and attitude data necessary to control the aircraft under all flight conditions.—V. 186, p. 1309.

Standard Coil Products Co., Inc.—Operating at Profit

In a special review mailed on Sept. 30 to stockholders, James O. Burke, President, said that "commencing with July of this year, this company has been operating at a substantial profit."

Mr. Burke put the net profit for July and August at about $160,000, and indicated that this should accelerate during September and thereafter. In the first six months of 1957 the company reached the break-even point, reporting net profit of $777. A net loss of $1,487,000 was registered in 1956.

He attributed the improvement mainly to success in the company's comprehensive program to end losses in Standard's Tuner Division. This aggressive program, he said, included cutting overhead, expenses and salaries, but more important, it included finding new markets for Standard tuners. In the past year new customers added included Magnavox, Westinghouse and Sylvania, he reported, stressing that this program was carried out in the face of a decrease of about 20% in TV set sales so far this year.

To further improve operations, Mr. Burke disclosed that Standard Coil has licensed a British manufacturer to make Standard tuners for the Commonwealth and is negotiating similar arrangements on the Continent and in South America.

Mr. Burke noted that Standard's Electronic Protection Division (traffic control and synchronization devices) is operating successfully and that the major subsidiary, Kollsman Instrument Corporation, continues to operate profitably. Shipments this year at Kollsman, where current backlog is $63,000,000, should be considerably greater than last year, he indicated.—V. 186, p. 734.

Standard Oil Co. (Indiana)—New Unit—

A second new large-volume Ultraformer at the company's refinery at Whiting, Ind., is operating successfully on its first run. Capacity is 21,000 barrels per day.

Arthur F. Endres, Whiting refinery manager, said today the new high-octane gasoline manufacturing unit has been in round-the-clock operation since Aug. 19 on its initial run.

Steelwork is being raised for a third Whiting Ultraformer, similar to the unit just started up, Mr. Endres added. Whiting Ultraformer No. 1, with a capacity of 14,000 barrels per day, was put in operation a year ago.

Mr. Endres said the new Ultraformer is one of several large-scale facilities put into operation recently at the Whiting refinery. Among them are:

(1) A new 60,000 barrel-a-day pipe still, increasing Whiting refining capacity to about 220,000 barrels a day and permitting shutdown of several small crude running units.

(2) A modern 6,000 barrel-a-day lubricating oil plant, replacing obsolete facilities.

(3) A modernized alkylation unit, also a large-volume high-octane gasoline manufacturing plant.

The company is creating 48 new district sales offices in its 15-state Midwest marketing area in continuing efforts toward more efficiency and closer customer relations, Dwight F. Benton, Sales Vice-President, announced on Sept. 27.

The new district offices, an expansion of 23 sales division offices, will operate under the jurisdiction of the present eight regional offices. The new district offices will be in operation Oct. 21. Each district manager will report to his respective regional manager.—V. 186, p. 1309.

at which shares will be offered have not yet been determined. The offering will be made only by means of a Prospectus, following registration with the Securities and Exchange Commission—Morgan Stanley & Co. will be asked to form a nationwide group to underwrite this financing.

During the postwar period, Jersey has made very large expenditures for capital equipment and in the search for oil. The proceeds of the proposed issue are intended to enable the company to continue to meet these capital requirements.—V. 186, p. 530.

Standard Railway Equipment Manufacturing Co.—Sale

The Norfolk & Western Ry. has purchased a Standard wheel truing machine, it was announced on Sept. 27 by W. E. Olds, Vice President. Installation of the machine, scheduled for delivery in December, will be made in the railroad's diesel locomotive shop in Roanoke, Va.

With the new machine the railroad will be able to restore worn wheels to contour without removing wheels or truck assemblies from diesel engine or railway cars, thus attaining substantial advantages in speed and economy of repair, said Mr. Olds.

This transaction represents the 39th machine sold by Standard to leading U. S. and Canadian railroads as well as the National Railways of Mexico.—V. 186, p. 530.

Mr. Huguenin, who succeeds John F. Maher, resigned, is President of Stokes & Smith Co., a subsidiary of Food Machinery & Chemical Corp., which owns 50,000 shares of Thermal stock, together with options on 100,000 additional shares of stock at prices ranging from $5 to $7 per share. Three States Natural Gas Co.—Reports Profit—

John A. McGuire, President, on Sept. 24 reported consolidated net income of $524,534 for the fiscal year ended May 31, 1957. This is an increase of $828,780 over the previous year's adjusted loss of $304,246. Oil and gas sales for the year ended May 31, 1957, were $4,918,512. The company had cash on hand and negotiable U. S. Treasury securities totaling $2,259,260 at the close of the fiscal year. Future oil and gas revenues will be increased by additional runs anticipated from five completed Paradox Basin wells beginning in January, 1958. From the annual report it seems reasonable to forecast that total revenues for the coming fiscal year will exceed $5,200,000.

The company inaugurated drilling projects over 300,000 acres of properties in New Mexico, Colorado, Utah, Texas and Mississippi during the 1956-1957 period. The report also revealed an average daily excess of 3,250 barrels of oil and 42,900,000 cubic feet of gas. This represents an approximate 2% increase in oil deliveries and twenty-one percent increase in natural gas runs over comparable 1955-1956 figures.

Principal operations were in: The Paradox Basin, San Juan County, Utah, and several counties in Southwestern Colorado, where Three States holds more than 200,000 net acres, and which is one of the major centers of attention of the petroleum industry. Drilling operations included completion of Arrowhead No. 1 for initial potential of 707 barrels of oil daily. The new well was more than a mile from westernmost development in the prolific Aneth field. In San Pete County, Utah, Well No. 3 was completed on the 70,000 acre Joe's Valley Unit. It had potential of more than 4,000,000 cubic feet of gas per day from the Ferron sand, and 1,000,000 per day from the Dakota zone. This well extends the developed proved Ferron producing area.

In the San Juan Basin of New Mexico, Angel's Peak area of San Juan County, a newly completed Dakota sand oil well is the fourth producer in an area six miles in length. Three earlier wells were completed by conventional methods prior to oil-sand frac treatment. The company has a total of 5,000 net acres on the structure. Three States has also completed a Gallup sand well small producer on the South Huerfano block with Reynolds Mining Co. as operator. Arrangements have been made with Gulf Oil Corp. and Reynolds for drilling and completion of four more wells in this area at Gulf's expense.

In Crane County, West Texas, a discovery well was recently completed for production of 1,892 barrels per day. An arrangement with Gulf Oil Corp. provides for development of Three States acreage without cost and a 50% working interest in this new Wolfcamp reserve after recovery by Gulf of their development cost.—V. 185, p. 656.

Transition Metals & Chemicals, Inc., Wallkill, N. Y.—SEC Institutes Stop-Order Proceedings—

The Securities and Exchange Commission, it was announced on Sept. 30, has instituted "stop order" proceedings under the Securities Act of 1933 to determine whether to suspend the effectiveness of a registration statement filed by this corporation for alleged failure to comply with the disclosure requirements of that Act. The hearing therein is scheduled for Oct. 10, 1957, in the Commission's Washington office.

• Transition's registration statement was filed Jan. 22, 1957, seeking registration of 1,615,000 of its common stock and 1,126,500 wararnts, of which 250,000 shares and 250,000 warrants are proposed to be initially offered. The 250,000 common shares and 250,000 warrants were to be offered in units of one common share and one warrant, and at an offering price of $2.01 per unit. Each warrant would entitle the holder thereof to purchase an additional common share at $2 per share through Feb. 28, 1959. The offering would be made on a "best efforts" basis by M. S. Gerber, Inc., of New York, for which it would receive a selling commission of 35c per unit, plus $20,000 for expenses; and the underwriter also would be entitled to purchase, at 1c per warrant, 4 warrants for each 5 shares sold in this offering. Morris S. Gerber, President of the underwriter, previously acquired from Jean A. Lamoureaux and Clarence F. Hiskey, promoters of Transition, a total of 87,500 warrants at 1c per warrant and 87,500 common shares at 1c per share, which Gerber agreed to hold for investment. The company now has outstanding 676,500 common shares and a like number of warrants. A total of 487,500 shares were issued to officers, directors and promoters for patents, processes and good will.

According to the prospectus, Transition was organized in February 1956 and proposes to engage in the production of columbium and tantalum alloys, chemicals and metals and in the manufacture of powders and chips of magnesium and magnesium alloys. The prospectus states that the plant at Wallkill is presently being set up for the production of ferrotantalum-columbium and ferrocolumbium, master alloys used by the stainless steel and other industries.

In its order for proceedings, the Commission challenges the accuracy and adequacy of various informational disclosures contained in Transition's registration statement and prospectus. Among these are disclosures with respect to (1) the prior sale to 14 persons of 189,000 common shares at $1 per share, together with 189,000 warrants at 1c per warrant, including the failure to state that such sales may have been made in violation of the registration requirement of the Securities Act; (2) the intended use of the proceeds of this financing, including the failure to disclose that the estimate of the cost of construction of the beneficiation plant and the equipment for production of high purity columbium and tantalum products were made without relation to the costs and experiences of other producers in the field and the failure to state that there is no assurance that the proceeds will be sufficient to enable Transition to produce high purity columbium and tantalum products or even to perform the necessary prior experimental work; (3) the description of the business in which Transition proposes to engage, including particularly the failure to point out the limited market for ferrotantalum-columbium and ferrocolumbium, that consumption largely depends on the production of certain types of stainless steel, and the volume of production of such types of stainless steel, the failure to state that Transition's proposed production of 96 tons per year of ferrotantalum-columbium and ferro-columbium will be approximately one-third of that consumed in 1955 and approximately one-fourth of that consumed in 1956 by the steel industry, and the failure to state various other competitive factors involved in the production and sale of these products; and (4) the officers and directors of Transition, including the failure to disclose their lack of experience in the ferro-alloy industry, particularly with respect to the production of ferrotantalum-columbium and ferro-columbium.—V. 185, p. 1932.

W. W. Miller, Vice-President, Industrial Relations and Legal, Stewart-Warner Corporation, also announced that the same benefits will be available to the spouse of an employee who dies and to children as they reach the age limit for coverage or become married before that age. Employees having dependent insurance also secure a policy covering dependents.—V. 185, p. 386.

Union Oil Co. of California—Offshore Drilling—

A revolutionary new procedure for drilling oil wells offshore in water depths up to 1,000 feet or more with virtually the same ease and cost as drilling on land has been developed and patented by the CUSS Group, consisting of Continental Oil Co., Union Oil Co., Shell Oil Co., and The Superior Oil Co., it was announced on Oct. 2.

The system, for which U. S. patents were issued on Oct. 1, has world-wide application in opening up vast new underwater areas for developing oil and other mineral resources locked far beneath the ocean's surface.

The CUSS Group, with Union Oil as operator, has already used the patented techniques successfully to drill over 300,000 feet of hole, some many miles off the California coast in water depths long believed impossible to explore. Holes have been drilled in water depths up to 1,500 feet even though the comparatively small vessel containing the equipment rose, fell and swung about under the impact of high waves and strong ocean currents. In recent months an average of 450 feet a day have been drilled under such conditions.—V. 186, p. 570.

United States Coconut Fiber Corp., Washington, D. C. —Files for Common Stock Offering—

This corporation filed a registration statement with the SEC on Sept. 30, 1957, covering 735,000 shares of its $1 par common stock. The stock is to be offered for public sale at $4 per share on a "best efforts" basis by Southeastern Securities Corp. of New York, for which it will receive a selling commission of 15%. In addition, the underwriter will receive $100,000 for its expenses; and it has received an option to purchase 45,000 shares at $4 per share, for a period of three years.

The company was organized under Delaware law on July 25, 1957, for the primary purpose of manufacturing and selling bags, carpet yarns, and various other course textile products to be produced from coconut husk fibers pursuant to United States patents issued to B. G. H. Vanderjagt, which have been assigned to the company. It contemplates commencing operations in the Philippine Islands, employing the processes described in the Vanderjagt patents. The right to make, use and sell the processes was assigned by Vanderjagt to Michael J. Banuvar, President of the company, and by Mr. Banuvar in turn assigned to the company for 745,000 shares of stock and $10,000. Mr. Banuvar has assigned 445,000 of these shares to 12 other persons.

The company has a commitment to purchase a jute mill located at Davao, Mindanao; and it proposes to acquire this plant and convert it to the production and spinning of textiles from coconut fibers. It also proposes to erect a new plant on the Island of Luzon, near Manila, to increase its productive capacity. The proceeds from the sale of the common stock will be used in large part for the acquisition and conversion of the existing plant and the construction and equipment of the proposed plant. However, a total of $225,000 is to be paid to Mr. Vanderjagt, in three instalments, for grant of the exclusive license under the patents and for his services in placing the two plants in operation (Vanderjagt is also to receive out-of-pocket expenses in traveling to the Philippines and/or to Europe in connection with the erection of the plants and securing of the necessary machinery). The other promoters, in addition to Mr. Banuvar and Mr. Vanderjagt, are Alexander Leggin, John B. Hull, and Donald J. Pryor, all of Washington, D. C. The company's outstanding 765,000 shares were issued to the promoters and eight other individuals for $20,000 in cash, patents and services.

Universal Products Co. Inc.—No Financing Contemplated—Plans Change in Name—Earnings Show Gain—M. Mac Schwebel, President, on Sept. 13, in his remarks to The Philadelphia Securities Association, said in part:

Our company is seeking no financing whatsoever and does not contemplate the sale of securities in the foreseeable future. We have ample cash to take care of any projected programs.

It has been suggested that our corporate name should include one or more of the words "Automation." "Electronics" "Totalisator".

Universal engaged in the manufacture of automotive products for many years until late in 1955 when all of Universal's assets were sold to Chrysler Corportaion leaving over $10,000,000 cash in the treasury, and the Company was destined for liquidation. In March 1956 most of our present directors and a group of friends bought a block of the company's shares from the family of its founders. In June 1956 we acquired about 99½% of the capital stock of American Totalisator Co., Inc., known as "AMTOTE" for about $10,000,000.

Among the properties of AMTOTE was approximately 24% of the issued and outstanding capital stock of C. P. Clare & Co., a closely held corporation.

In June 1956, our company acquired all of the capital stock of General Register Corp. for the equivalent value of $2,000,000 or 37,736 shares of stock.

In July 1956, our shares were split 3 for 1.

Effective April 1 of this year, C. P. Clare & Co. was merged with our company through the issuance of 161,605 shares of which 38,916 shares have been issued to and are now held by AMTOTE. All the property and assets of C. P. Clare & Co. obtained by reason of this acquisition were transferred to a new Delaware corporation, C. P. Clare & Company, and is now being operated as a wholly owned subsidiary of our company.

AMTOTE manufactures, owns and services the totalisator equipment and control systems which are used at the majority of the thoroughbred, harness and dog tracks throughout the country, under contracts with over 145 racing associations, written for 5 year terms. These represent over 75% of those conducting such racing and parimutuel betting in this country.

AMTOTE's wholly owned subsidiary, Canadian Totalisator Co. Ltd. of Canada, conducts a similar business in the Province of Ontario.

Recently, Western Union placed substantial contracts with Clare for equipment units designed to fit into a communictaions switching system to interconnect all our Air Force bases. Next year, this system will be extended to encompass also our Air Force bases overseas. This system—known as The Plan 55 Switching System—may be used either fully automatic or semi-automatic by manually operated push buttons as conditions may require.

Plans are already getting under way for similar communications switching systems for private use by far-flung business enterprises.

In view of the heavy demand on its facilties and backlog of orders, Clare is now operating full force in three plants. Our board has authorized the construction of a modern plant on part of its 77 acre tract in Fairview, North Carolina adjoining its present leased facilities which will be moved to the new plant expected to be completed by the middle of next year.

About 34% of Clare's production is for ultimate military use and the balance for industry and commerce. Clare has been maintaining this balance in order that it would not be affected should there be any material curtailment in military spending. (Although I must say that our backlog for Government use has been growing with no cutback.)

General Register Corp. our "Know-How Division", is engaged in the business of creating and manufacturing various cash control systems which represent automatic speed, mechanical accuracy and time and money-saving economies.

Since the advent of our new management in 1956, our company paid cash dividends totalling $1,477,012 which represented an initial 30c cash dividend and an increased regular 40c quarterly dividend along with an aggregate of 7% in stock.

Net income after taxes in 1956 was equivalent to $2.58 per share on the 727,321 shares then outstanding compared with $2.48 per share in 1955. Non-recurring expenses and write-off of goodwill for 1956 was equal to about an additional 21c per share.

There are now 929,768 shares outstanding of which 38,916 shares are owned by Amtote.

The company on Sept. 25 filed a letter of notification with the SEC covering $300,000 of 5½% subordinate convertible debentures to be offered for subscription by common stockholders of record Oct. 4, 1957 at par on the basis of $100 of debentures for each 100 shares of stock held. Victoreen Instrument Co.—Buys Electronics Firm—

This company on Sept. 23 purchased for an undisclosed amount the assets, trade name and goodwill of Jordan Electronics, Inc., located in Alhambra, Calif., according to David H. Cogan, President and Chairman of the Board.

Jordan Electronics manufactures nuclear radiation instruments, area monitoring systems and industrial radiation detection equipment. The Victoreen Instrument Co. manufactures and distributes a broad line of medical, research, industrial and military radiation measuring instruments, reactor control systems and electronic component parts.

Acquisition of Jordan Electronics, Inc. will afford Victoreen a widely expanded product base and a much-needed West Coast engineering and production facilitiy which the expanding program of Victoreen has made necessary, Mr. Cogan said.

The present Jordan management will continue operations in a modern plant built for Jordan's expanding requirements in 1955. According to Mr. Cogan, Victoreen's backlog of business is the largest in the company's history and as of Aug. 31, 1957, stood at approximately $3,000,000.

The acquisition of the assets of Jordan Electronics, Inc. is a step in the expansion program of Victoreen in keeping with the new management policies, Mr. Cogan said.—V. 186, p. 1310.

Mr. Pantas added that sales of Yale locks and builders' hardware are currently at the highest level in the company's 89 year history "despite a decline this year in new housing starts."

As a result of its policy of broad diversification within product lines, Yale & Towne now regularly produces hundreds of different hardware items for all segments of the construction market. This variety of product, supported by stepped-up marketing activities and expanded production facilties, was credited by Mr. Pantas for making it possible "to obtain an increasingly larger share of the hardware market."

Mr. Pantas pointed out that increased production of the highly diversified lines of Yale hardwarde has been made possible by recent substantial increases in the company's manufacturing capacity. A new hardware plant has just been completed at Monroe, N. C., and extensions added to the hardware plants at Salem, Va., and Gallatin, Tenn.

Introduces Smaller Capacity Fork and Ram Trucks—

The company's Yale Materials Handling Division has announced the extension of its K-48 line of medium capacity, electric powered metals handling trucks to include smaller models of 15,000 and 16,000 pound capacities.

Introduced last year in capacities from 18,000 to 30,000 pounds, the lower limit of the line was extended primarily to meet increasing needs for lightweight coil handling in the non-ferrous metals industry.

The outstanding feature of the Yale K-48 line is smaller overall dimensions to facilitate operattions in congested areas. The new lower capacity models measure just 124 inches from rear of counterweight to the face of the fork carriage and 61 inches in width.

San Leandro Plant Produces Trojan Tractor Shovels—

Trojan tractor shovels are now in full production at Yale & Towne's new West Coast materials handling equipment plant in San Leandro, Calif., it was announced on Oct. 2 by Robert G. Allan, General Manager, Contractors Machinery Division. The 2-cubic yard capacity and the 1½-cubic yard capacity Trojans are being produced at this plant. —V. 186, p. 1310.

Lost Needlessly?

Although more than 70,000 Americans were cured of cancer last year, the tragic truth is that at least 70,000 others—who might have been saved—lost their lives because their cancers had spread and "colonized" in other parts of their bodies before proper treatment could be started.

That's why we keep reminding you that, since most early cancers can be cured, your best "insurance" is:

FIRST: *To have a thorough health check-up every year no matter how well you may feel (twice a year for women over 35)*

SECOND: *To learn the 7 danger signals that may mean cancer, and go straight to your doctor at the first sign of any one of them—(1) Any sore that does not heal (2) A lump or thickening, in the breast or elsewhere (3) Unusual bleeding or discharge (4) Any change in a wart or mole (5) Persistent indigestion or difficulty in swallowing (6) Persistent hoarseness or cough (7) Any change in normal bowel habits.*

For more lifesaving facts about cancer, phone the American Cancer Society office nearest you, or address your letter to "Cancer"—in care of your local Post Office.
