Allegheny Ludlum Steel Corp.—New Development—

The use of magnetic force for automatic control of soldering iron temperature is the principle employed in a new iron being manufactured by Weller Electric Corp. of Easton, Pa. Called the Magnastat, the iron is believed to be the first to employ this unusual principle to maintain a constant temperature.

The unusual feature of this iron depends on the magnetic quality of a special alloy which gains and loses magnetic qualities with changes in temperature. At certain predetermined temperatures, the alloy loses its magnetic qualities and at other predetermined temperatures it regains these qualities.

The soldering iron is made of a series of stainless steel tubes which protect the sensing mechanism and make the iron stronger and longer lasting. The stainless steel and parts of the interior workings of the new iron are supplied by Alleghany Ludlum Steel Corp.

About 150,000 of the new irons are expected to be built the first year. —V. 188, p. 441.

This corporation on Aug. 5 announced that it is planning to discontinue operations at its plant in Roanoke, Va. Henry H. Bitler, Vice-President and General Manager of the Fibers Division, stated that an orderly curtailment of manufacturing is being planned to be effective as soon as practical. No specific dates have been established. A total of 1,750 employees are now working at the plant. A plan for the termination of the employment of these people is being studied. It was pointed out, however, that some employees will be furloughed within the next few weeks.

American Viscose has adequate production facilities at its plants in Lewistown, Pa., and Parkersburg, W. Va., to fill customers' requirements for continuous filament yarns. These two plants have also been operating on a curtailed basis for the last few years. The over-all effect on the Roanoke shutdown will be to consolidate productive capacity.

No decision has been made as to ultimate disposition of the Roanoke plant property.

Brown Co., Berlin, N. H.—Omits Dividend—

Decision of the directors to postpone action on the third quarter dividend on the common stock, normally payable Sept. 1, was announced on Aug. 1 by A. E. H. Fair, President.

The mid-year report of the company, issued recently, indicated that while a loss was sustained in the first quarter it was slightly more than made up in the second quarter but not enough to cover the 30 cents already paid in dividends.

Mr. Fair said, "It was decided, before declaring more dividends, to see what the earnings picture will be in the remainder of the year."

Quarterly dividends of 15 cents each were paid on the common stock on March 1 and June 1, last.—V. 188, p. 442.

(Charles) Bruning Co., Inc.—Quarterly Earnings—

Sales and net profit were at favorable levels for the six months ended June 30, 1958, Herbert F. Bruning, President, reported on July 29. Mr. Bruning noted that while both sales and net profit decreased from last year's operations for the first six months, they both increased over the last six months of 1957. Based on this trend and the more favorable general business outlook, Mr. Bruning said he expects a further improvement in sales and profits during the last six months of this year. He said he expects that this will come during the last quarter after the usual summer slowdown due to vacation periods.

Sales amounted to $19,108,097 for the first six months of 1958, compared with sales of $20,426,730 for the first half of 1957 and $17,898,886 for the last six months of last year.

Earnings were $1,018,526 for the 1958 first half, compared with $1,519,912 for the first six months of 1957 and $920,391 for the last half of 1957. After preferred dividends, the latest earnings were equal to $1 per share, compared with $1.50 in the 1957 first half and 90 cents in the last six months of 1957.

Earnings in the 1958 second quarter amounted to $505,963, equal to 50 cents per common share, compared with $759,798 or 75 cents per share in the like quarter of 1957. Sales for the second quarter were $9,408,137 compared with $10,215,983 in the June quarter of 1957. —V. 187, p. 2547.

California Electric Power Co.—Plans Financing—

This company now expects to sell securities in October, 1958, the proceeds to apply on the repayment of bank loans then outstanding. The type of securities to be issued will depend on market conditions at the time of the offering.

Net earnings for the second quarter of 1958 were equal to 30 cents a common share compared with 31 cents in 1957, both based on 3,500,000 shares outstanding at the end of each period and on average shares outstanding during each quarter. For the year ended June 30, 1958, earnings were $1.01 a share on outstanding common stock, compared with $1.07 for the prior year. Based on average shares outstanding during each annual period, earnings for the year ended June 30, 1958, were $1.01, compared with $1.14 for the preceding year.

It should be noted that the increased rates allowed by the California P. U. Commission (estimated at $2,032,000 annually) were effective for only approximately half of the latest quarter, Carl C. Ernst, President, said,

On July 1, the second 60,000-kilowatt unit of San Bernardino Steam Plant was placed in commercial operation. Construction of an 80,000-kilowatt unit at the Yuma Axis Steam Plant on the Lower Colorado River is on schedule and the plant is expected to be placed in operation in April, 1959.—V. 188, p. 243.

Central Oils, Inc., Seattle, Wash.—Registers With SEC

This corporation filed a registration statement with the SEC on July 30, 1958, covering 1,000,000 shares of its 10c par common stock. The stock is to be offered for public sale at 10c per share. The offering is to be made on a "best efforts" basis by A. R. Morris and H. C. Evans, who are president and vice-president, respectively, and promoters of the company, for which they will receive a selling commission of 1c per share.

Central Oils was organized in 1956 as an oil exploration company and is said to have acquired oil and gas leases covering 18,620 acres in Jefferson and Crook Counties, Oregon. Net proceeds of this financing are to be used to drill one test well on its lands, or to deepen the present depth of another well.

The company now has outstanding 1,001,380 shares. Of these, the founders, promoters, officers and directors (including Earl Gene Godfrey, secretary-treasurer, in addition to Morris and Evans, all of Seattle), own 800,000 shares, for which they will have paid the company nothing in cash but assigned to the company oil and gas leases which cost them $1,500 in cash, plus time and effort to acquire them. The remaining 201,380 shares were heretofore sold to the public for which they paid $11,075.90 in cash.—V. 187, p. 2000.

Central Public Utility Corp. — Files for Exemption From Holding Company Act—

This corporation has applied to the SEC for an order exempting it and each of its subsidiary companies from the Holding Company Act; and the Commission has scheduled the application for hearing on Sept. 10, 1958.

The application further requests that the Commission's 1952 order directing Central to terminate the existence of its subsidiary, The Islands Gas & Electric Co. be modified to eliminate such requirement.

According to the application, Central has 14 subsidiaries, all of which are exclusively operating companies, except Islands Gas & Carolina Coach Co., both of which have subsidiaries. The subsidiaries operate in eight states as well as Puerto Rico, Canary Islands, Haiti and the Philippine Islands. Central has outstanding a single class of capital stock of 1,000,100 shares, $6 par. The application further states that in February, 1957, N. V. Amsterdamsche Bankierskantoor V/H Mendes Gans Co., through Burnham & Co., as agent, purchased 259,492 shares; and that, subsequently, Burnham became the record holder of 431,924 shares including 29,750 shares purchased by Altay Corporation, 56,210 shares purchased by Melosine Corporation, and 85,472 shares purchased by Schuyler Corp. Burnham is said to hold these shares subject to any voting instructions that may be given to it by the beneficial owners thereof; that all but 1,000 of the 431,924 shares are now subject to commitments of sale in blocks varying in size from 2,500 to 40,000 shares to approximately 33 Dutch and Belgian investors. Mendes Gans is engaged in the banking business in The Netherlands. It further appears from the application that an agreement providing for the merger of Central and two or more other corporations (unnamed) is in the course of negotiation, which, if effectuated, would be governed by the laws of Delaware.—V. 186, p. 346.

Chrysler Corp.—Sales Off—Earnings Show Loss—

This corporation's dollar sales for the first six months of 1958 were $1,075 million as compared with $2,061 million for the same period last year, L. L. Colbert, President, announced on July 24 in a report to shareholders.

First half operations of Chrysler Corp. and all wholly-owned subsidiaries resulted in a net loss of $25.2 million, equal to $2.89 a share. For the like 1957 period, net earnings were $89.7 million, equal to $10.28 a share.

"The financial results for the first six months of 1958 were adversely affected by the general business recession and the consequent impact on automobile demand," Mr. Colbert said.

The company had reported a loss of $15.1 million, or $1.74 a share, for the first three months of 1958. Results for the second quarter showed a loss of $10.1 million, or $1.15 a share.

The company's defense business for the six-month period this year increased to $126 million, equal to 12% of total sales, compared with $58 million, or 3% of sales, in the same 1957 period. Most of the gain resulted from work on the Redstone and Jupiter missile programs and output of M-48-A2 medium tanks. Deliveries under a recent $72 million contract for 900 additional medium tanks will begin in January, 1959, the report noted.

Net current assets as of June 30, 1958, were $403 million, compared with $315 million a year ago, and $425 million at the 1957 year-end. Cash and short-term marketable securities were $364 million as of June 30, compared with $430 million a year ago and $532 million at the 1957 year-end.

Capital expenditures for improvements and additions to land, buildings, machinery and equipment were $29 million in the first six months of 1958, compared with $66 million in the same period last year. Depreciation charges were $39 million in the first half of this year and $44 million in the like 1957 period.—V. 188, p. 347.

Mr. Picker said the C.I.T. offer had been accepted by himself and his father, James Picker, founder of the company.

C.I.T. is also acquiring the controlling interests held by the Picker family in various subsidiaries engaged in the manufacturing and marketing of radiation equipment.

It was announced that Picker stockholders will receive 341,063 shares of C.I.T. common stock the value of which, based on recent market quotations, is approximately equivalent to the adjusted book value of the Picker stock being acquired by C.I.T.

James Picker founded his original X-ray company in 1915. Today Picker X-Ray Corp. and its subsidiaries operate throughout the United States, with sales outlets in more than 70 countries. Its home office is at 25 South Broadway, White Plains, N. Y., and its main manufacturing plant is in Cleveland, Ohio. It also owns 50% of a newly established company in Germany for the manufacture of radio-logical equipment for the international market.

Picker X-Ray Corp. is one of the largest organizations in the world devoted to the manufacture and distribution of radiation equipment. To the medical profession, clinics and hospitals, it offers a complete line of X-ray apparatus and supplies for diagnosis and treatment. It has recently announced a new machine for treating cancer patients with radioactive cesium 137 and is one of the largest suppliers of apparatus for utilizing cobalt 60 for radiation treatments. The company has recently expanded into the fast-growing field of nuclear instrumentation and has just announced a completely new line of devices for clinical diagnosis and biological research with radioactive isotopes.

In the industrial field, the company offers a wide range of apparatus for using X-rays or radioactive isotopes, such as iridium 192 and cobalt 60, for analyzing materials and parts. These devices are employed for testing the soundness of materials and components in such fields as the airplane and missile industry. Picker also offers to industry devices which will allow experimentation on the effects of gamma radiation on apparatus, materials, and organisms. The company is at present constructing a large research laboratory for radiation and nuclear research at Cleveland.—V. 187, p. 2798.

Commercial Credit Co.—Semi-Annual Report—

Consolidated net income from the operations of this company and its subsidiaries for the six months ended June 30, 1958, was $13,351,009, or $2.64 per share compared with $13,419,032, or $2.66 per share for the relative period of 1957, both computed on the shares outstanding at the end of the respective period.

Consolidated net income for the second quarter of 1958 was $7,087,529, or $1.40 per share compared with $6,263,480, or $1.24 per share for the first quarter.

Consolidated gross income for the six months' period ended June 30, 1958, was $84,493,763 compared with $84,340,787 for the same period of 1957.

Net income of the company's finance subsidiaries for the six months ended June 30, 1958, was $7,603,384 compared with $8,722,231 for the similar period of 1957. This decline in the profit of the company's finance subsidiaries is almost entirely a reflection of the reduction in sale of cars by automobile manufacturers to dealers and by dealers to consumer customers. While the volume of automobile receivables acquired during this six months of 1958 showed a substantial reduction when compared with the same period of 1957, increased activity in the financing of farm equipment and of fleet leasing and in the company's direct loan subsidiaries offset some of this loss of business with the result that total outstanding retail receivables on June 30, 1958, were approximately 98.66% of the amount outstanding on the same date in 1957. Net income of insurance subsidiaries was $4,881,166 for the six months ended June 30, 1958, compared with $2,719,457 for the same period in 1957. The operations of the insurance companies showed an improvement due in part to the rate increases on fire, theft and collision insurance granted in some of the states and to the continued successful operation of the life insurance subsidiary.

Net income of the manufacturing companies for the six months ended June 30, 1958, was $866,459 compared with $1,977,344 for the similar period of 1957. Net sales of these manufacturing subsidiaries for the six months ended June 30, 1958, were $64,544,814 compared with $66,931,761 for the same period of 1957. The decline in the profit of the company's manufacturing subsidiaries reflects to a certain degree the general situation prevailing in the manufacturing industry where fixed costs cannot be reduced in proportion to the shrinkage in net sales. Two of these individual manufacturing companies suffered a net loss for the period; while the other manufacturing subsidiaries continued to produce a consistent profit. On an overall basis the earnings of these manufacturing subsidiaries for the six months period ended June 30, 1958, showed a return of 4.95% per annum on the amount of capital that the company had invested in them on that date.

Reserves for unearned income on finance receivables and unearned premiums of the insurance companies on June 30, 1958, were $106,166,420 compared with $109,716,182 on June 30, 1957. Reserves for losses on receivables on June 30, 1958, were $18,244,539 compared with $19,139,379 on June 30, 1957. The aggregate of these reserves was $124,410,959 on June 30, 1958, compared with $128,855,561 on June 30, 1957.—V. 187, p. 2115.

Commonwealth Investment Co.—Net Assets Rise—

"Dividends from investment income paid by Commonwealth to its shareholders in the first half of 1958 totaled 16 cents per share," said S. Waldo Coleman, President, in the company's semi-annual report released to over 44,000 of its shareholders.

In spite of lower over-all corporate dividend payments this year, Mr. Coleman added, 16 cents per share is the same amount as that paid in the first half of 1957 by Commonwealth, one of the largest and oldest balanced mutual funds in the country.

The net asset value per share rose to $8.74 on June 30, 1958, he reported. This amount together with the capital gains distribution of four cents a share on March 25, 1958, is equivalent to $8.78, Mr. Coleman said, and compares with the Dec. 31, 1957 net asset value of $7.90 per share.—V. 187, p. 2331.

Controls Co. of America—Earnings Show Decline—

The company on July 22 reported sales of $12,767,273 and after-tax earnings of $317,954 in the six months ended June 30, compared with $14,446,658 and $578,711 respectively, in the first half of 1957.

On the basis of the 686,300 shares of common stock currently outstanding, the latest earnings were equal to 46 cents a share as against 84 cents a share in 1957.

Louis Putze, President, told the New York Society of Security Analysts on July 22 that during the period the company had a non-recurring profit of nearly 14 cents a share on the sale of an old plant, but also absorbed non-recurring costs of transferring certain operations to a newly-built plant and of starting up a second new plant. "There has not yet been time to realize the advantages to be forthcoming from higher production in these new plants," he said, adding that the general business recession also had a drastic effect on company business.

The company is spending at a rate of $1,600,000 a year for the engineering and development of new products and improvement of established products, Mr. Putze told the analysts. A new policy of producing controls packages or systems, instead of traditional individual components for washers, driers, air conditioners and other end products, is opening up new markets and gaining new customers, he added. Net income for the six months ended June 30, 1958, amounted to $3,577,000, equivalent, after preferred dividends to 93 cents per share on 3,465,218 outstanding common shares. Both periods include operating results of The Gardner Board & Carton Co. which was merged with Diamond (formerly The Diamond Match Co.) in October, 1957.

Not included in these figures is the company's equity in earnings of non-consolidated subsidiaries. For the first six months of 1958 this amounted to 17 cents per common share, compared with 15 cents per share in the first half of 1957.

Sales for the second quarter of 1958 was $41,748,000 as against $43,048,000 for the same 1957 period. Net income for the three months ended June 30, 1958, was $1,792,000, or 46 cents per common share, compared with $2,083,000 or 55 cents for the 1957 quarter.—V. 187, p. 1784.

The number of shareholders rose from 10,261 to 11,866 and shares outstanding from 3,309,300 to 3,772,451. Both June 30 figures represent new highs for the fund.—V. 187, p. 676.

(E. I.) du Pont de Nemours & Co. (Inc.)—Divestiture of Stock Held Not Necessary—

Divestiture of the Du Pont company's General Motors stock "is neither necessary nor appropriate nor equitable," the U. S. District Court was told on Aug. 7 by Andrew J. Dallstream, Chicago attorney appointed by Judge Walter J. LaBuy to represent the interests of Du Pont stockholders in the Du Pont-General Motors antitrust suit.

In a report filed with the Court, Mr. Dallstream said that any program of forced distribution and sale of Du Pont's 63,000,000 shares of General Motors stock, as has been proposed by the Department of Justice, "would produce harsh and confiscatory tax consequences to large groups of stockholders of Du Pont" and would be "likely to have disastrous market consequences and inflict incalculable losses on vast groups of innocent persons."

Even if the Court should disagree that divestiture is unnecessary, he said, it should not be ordered while there is a reasonable prospect of remedial tax legislation, such as the bill now pending in the U. S. Senate, S. 3962, known as the Frear bill. (The Frear bill provides that stock received through involuntary distributions required by antitrust proceedings would be given the same tax treatment that Congress has provided by law with respect to involuntary distributions to stockholders in public utilities and bank holding companies. There would be no exemptions from capital gains tax upon the subsequent sale of the stock, but its receipt would not be subject to tax as ordinary income.)

"If and when S. 3962 or similar legislation were enacted," Mr. Dallstream said, "it would presumably be limited to orders of divestiture thereafter entered, and it would be indeed ironic and tragic—like contracting polio just before the discovery of the Salk vaccine—if serious tax burdens and market losses should be brought on by a decree of divestiture entered shortly before passage of the remedial legislation."

Presenting a comprehensive plan for dealing with the case, Mr. Dallstream endorsed the Du Pont company's proposal that the company's General Motors stock be voted on a pro rata basis by its more than 185,000 stockholders, and that Christiana Securities Co. and Delaware Realty & Investment Co., which own in the aggregate 29% of the Du Pont common stock outstanding, also pass the right to vote their pro rata shares to their more than 4,000 stockholders.

He also recommends the same "pass-through" of voting rights of Christiana's direct holdings of General Motors stock; and that officers and directors of Du Pont, Christiana, and Delaware and their spouses, and Du Pont employees engaged in selling automotive finishes and fabrics to General Motors be enjoined from exercising any "pass-through" voting rights or soliciting in regard to voting.

In addition, Mr. Dallstream proposed restrictions on future acquisitions of General Motors stock by these companies; restrictions on their right to have common directors, officers, or employees with General Motors or to nominate directors; and restrictions on trade agreements and relations between du Pont and General Motors.

Mr. Dallstream also recommended a program for voluntary "take-down" of General Motors stock, whereby a Du Pont stockholder might exchange Du Pont shares for an equal number of new Du Pont shares plus a pro rata number of General Motors shares. The new Du Pont shares would represent no interest in the remaining General Motors shares allocated for "take-down."

Obtaining General Motors stock through take-down presumably would have the same tax consequences as obtaining it through distribution, Mr. Dallstream said, but it would have "the great virtue that each stockholder could individually appraise from time to time the tax consequences on the basis of his or its own situation and could at any time make an informed, independent decision in light of those consequences as to whether and when and how often to apply for take-downs." Also, it would create a means whereby the present 63,000,000-share block of General Motors stock "could be divided into smaller and more manageable parts."

This proposal, Mr. Dallstream said, is contingent on obtaining a satisfactory tax ruling that income will be realized only at the time of actual "take-down."

Purchase of Flying Field Cleared by SEC—

The SEC, it was announced on Aug. 5, has issued an exemption order under the Investment Company Act permitting E. I. du Pont de Nemours and Co. to purchase, for $464,000, approximately 116 acres of improved land, known as the "Du Pont Flying Field," located about one mile from Wilmington, Del., from Atlantic Aviation Corp. The seller is wholly-owned by Henry B. du Pont, a director and Vice-President of du Pont de Nemours and Co. He is also a director of Delaware Realty and Investment Co. and a director and President of Christiana Securities Co., an investment company. Du Pont de Nemours and Co. is said to be presumptively controlled by Christiana, which in turn is presumptively controlled by Delaware Realty.—V. 188, p. 348.

Eastern New York Power Corp.—To Dissolve—

William K. Jacobs, Jr., President, on Aug. 5 announced that the directors have adopted a plan of dissolution of the corporation and has called a special meeting of stockholders to be held on Sept. 22, 1958, to vote on the proposed plan.

The plan provides for the liquidation and distribution of all of the assets of the corporation remaining after reserves for expenses are set up. The distribution is estimated to be $3.72 per share. All of the Eastern New York Power Corp. stock was recently distributed as a dividend to the shareholders of Abacus Fund on a share for share basis.

The board of directors fixed the close of business on Aug. 19, 1958 as the record date for the special meeting of stockholders.—V. 178, p. 147.

BUSINESS—This company was incorporated in Idaho on March 22, 1952, and maintains its office at E. 12, 707 Valleyway, Opportunity, Wash.

The company has entered into an agreement with Dr. James A. Baker, permitting it to enter upon, drill and develop 36 leases to property totalling 2,849.82 acres located on the Quinault Indian Reservation near the coast of the Pacific Ocean in Grays Harbor and Jefferson Counties, Washington.

Harold M. Kincaid, President, previously entered into an operating agreement with another company for the exploration and development of the property contained in 52 state leases approximately 2,000 acres in Jefferson and Clallam Counties. Mr. Kincaid now contends that the operating company is in default, and if he is successful in obtaining clear title to the leases, the Evergreen company has a verbal agreement with Mr. Kincaid where by it will be permitted to explore and develop these properties.

The company proposes to drill a test wildcat well to a depth of 3,500 feet near the Queets River in Jefferson County, Washington. —V. 187, p. 2659.

Fairchild Camera & Instrument Corp.—Reports Profit

A profit of 22 cents per share in the second quarter has reduced a first quarter loss of $209,000 or 44 cents per share to $104,000 or 22 cents per share on the 476,247 shares outstanding for the six months period ending June 30, 1958, it was announced on July 29 by this corporation. Both figures are net after taxes.

John Carter, President, explained that a $268,000 provision for the new Fairchild Semiconductor Corporation and the integration cost of the Teletypesetter acquisition, equivalent to 56 cents per share, accounted for the loss figure. Actual operating profits for the six month period were $164,000 or 34 cents per share. He added that the company anticipated profitable operation for the second half of 1958, and a year end figure "in the black."

The Fairchild Semiconductor Corp., organized a year ago to develop, manufacture and sell silicon transistors, has already commenced limited production ahead of schedule. This earlier than expected sales income will now reduce the financial support previously required in this new venture.

Net sales and machine rentals for the six month period totalled $15,388,000 as compared to $19,956,000 in 1957. New orders booked were $14,455,000 compared to $18,400,000 in 1957. Operating profit for the first six months of 1957 was $266,000 or 56 cents per share. —V. 188, p. 245.

Fields' Louisiana Corp., Baton Rouge, La. — Registers Financing Proposed With SEC—

This corporation filed a registration statement with the SEC on July 31, 1958, covering 400 shares of no par common stock, $500,000 of 6% debenture bonds, and $50,000 of promissory notes. The securities are to be offered in $7,500 units each consisting of four shares of common for $2,000 and debenture bonds of $5,000 and a promissory note of $500. No underwriting is involved.

Organized on May 22, 1958, the company proposes to take over a contract for the purchase of the Bellemont Motor Hotel in Baton Rouge. It intends to enter into a management agreement with Fields Management Corporation of New York at an annual fee of 3% of gross income.

Proceeds of the financing are to be used as follows: $75,000 to recompense the assignor for money advanced on the contracts; $525,000 to pay the balance due under the contracts; and the balance for equipment, expenses of the offering, and operating capital.

The prospectus lists Herman Fiedelbaum of New York as President and Board Chairman, Irwin Fields of New Rochelle as Vice-President and Secretary, Leo A. Fields of Scarsdale as Vice-President and Treasurer, and Bertram Fields of Scarsdale as Vice-President and Assistant Secretary. The Bellemont Motor Hotel is to be acquired from Arthur C. Lewis, Jr., and Patricia Ann Lewis, his wife. The purchase price is $3,564,745, payable $50,000 on signing of the contract; $525,000 in cash or certified check upon delivery of the deed; and the balance to be paid by promissory note of the purchaser. The purchaser will take title subject to a mortgage made by the Lewises to an insurance company in the amount of $479,500, the obligation to pay being that of the seller with the privilege in the purchaser, in the event of default by seller to pay same as due, deducting the amount paid from the payments on the purchase money mortgage securing the promissory note.

Fields also has entered into an agreement with Continental Hotel Corporation providing for the leasing of a 100-unit motel to be built by Continental on property situated in the Parish of East Baton Rouge.

Fort Pierce Port Terminal Co.—"Stop Order" Proceedings Instituted by SEC—SEC Challenges Fort Pierce Port Filing—

The Securities & Exchange Commission, it was announced on Aug. 6, has instituted "stop order" proceedings against a registration statement filed by this company which proposed a public offering of 2,138,500 shares of $1 par common stock at $1.25 per share.

The Commission's order challenges the accuracy and adequacy of various informational disclosures contained in the company registration statement and prospectus and schedules a hearing in Washington on Aug. 19, 1958, for the purpose of taking evidence with respect thereto. If, after opportunity for hearing, the Commission issues a stop order suspending the effectiveness of the registration statement, such order will bar the public offering and sale of stock by the company until and unless the registration statement is corrected to comply with the disclosure requirements.

The registration statement was filed May 23, 1958. It proposed the public offering of the 2,138,500 shares at $1.25 per share, the offering to be made on a "best efforts" basis by Atwill & Co., Inc., of Miami, for which the latter would receive a selling commission of $0.1875 per share. The company was organized Oct. 16, 1956, primarily for the purpose of acquiring harbor front property at Fort Pierce which would be developed and operated as a deep-water port facility, including stevedoring and ship agencies. Of the $2,239,000 estimated net proceeds of the stock offering, $69,000 would be used to pay an installment on indebtedness secured by mortgages on the properties, $105,000 to pay short-term promissory notes, and the balance to complete the first phase of the company's proposed port development plan, estimated to cost $1,425,248.

The company's properties, consisting of 3,000 feet of harbor front and certain other properties on nearby Causeway Island and on the mainland, were acquired on Aug. 13, 1956, by promoters of the company (including Joseph C. Mackey, Board Chairman, and M. A. Ramsey, President) with the intention of selling same to the company. Their cost was $155,000 in cash and the assumption of mortgages aggregating $608,750. The properties were transferred by the promoters to the company on Feb. 25, 1957, at an appraised value of $1,838,500, the company assuming the $608,750 of mortgages and issuing $1,229,500 par value of stock to the promoters. Subsequently, the company acquired 64.4 acres of submerged lands from the State of Florida for $3,220.

Various references in the prospectus to the appraised value of the company's properties are questioned by the Commission, including the $430,000 appraised value of the property acquired from the State of Florida for $3,220. According to the Commission, there appears to be a lack of adequate basis for the values determined by the appraisal. Furthermore, the properties acquired from the promoters are carried in the company's balance sheet at the appraised valuation ($1,838,250), which is contrary to generally accepted accounting principles.

In addition, according to the Commission's order, the prospectus fails to contain proper disclosures with respect, among other things, to (1) the competitive traffic situation in relation to the port development project, including the results of a study of the facilities made in 1957 by the U. S. Army District Engineer; and (2) the speculative features of the proposed offering.—V. 187, p. 2447.

Frito Co.—Acquires Philadelphia Franchised Licensee

The company on July 31 announced acquisition of Frito Tri-State Corp., a franchised licensee with headquarters in Philadelphia, Pa., according to C. E. Doolin, President.

Mr. Doolin did not disclose the purchase price, but said the acquisition was on an exchange of stock basis.

Frito Tri-State's sales in 1958 are expected to exceed $1,000,000. Originally franchised in 1947, it serves 11 counties in New Jersey, 28 counties in the central, eastern and southern portions of Pennsylvania and all of Delaware, covering a population of 8,500,000. The acquired territory will be incorporated into the company's eastern division operations, Mr. Doolin said.

At the same time, Mr. Doolin announced that sales of Frito and its consolidated subsidiaries amounted to $22,855,110 during the first 24 weeks of 1958, a 14% gain over the previous year.

Net profits were $564,994, a 10% decrease over 1957. Earnings per share amounted to 75 cents compared to 83 cents in 1957, based on 753,409 shares now outstanding.

Mr. Doolin said current earnings reflect the substantial increases in the costs of raw materials, particularly potatoes, during the first 24 weeks. He said more favorable raw material costs were expected during the remainder of the year, and the outlook for the year as a whole was good.—V. 188, p. 246.

Future Planning Corp., New York—Registers With SEC

Gamble-Skogmo, Inc.—Buys Western Auto Stock—

This corporation has acquired 1,256,000 shares of common stock of Western Auto Supply Co., Kansas City, Mo., out of the 3,005,472 shares outstanding.

While the purchase price was not disclosed, it was stated that it was approximately at book value.

The stock was purchased from John C. Udd, Board Chairman of Western Auto Supply Co., and Robert O. Denman, a director of Western Auto and President of Denman Enterprises, Ltd.

Western Auto Supply is a national retail and wholesale distributor of auto supplies, household appliances, sporting goods and hardware. The company operates over 350 stores and has over 3,600 dealers that distribute merchandise from 16 warehouses. The company has total assets of approximately $88,000,000. Western Auto sales for 1957 totaled $217,366,164 with earnings of $6,654,051.

Gamble-Skogmo, with headquarters in Minneapolis, also distributes through both retail and wholesale channels, operating over 300 company-owned stores and 1,800 authorized dealers. The company distributes household appliances, auto supplies, hardware, sporting goods, housewares, home furnishings and furniture and also distributes in some of its stores, ladies' ready-to-wear, men's furnishings and children's clothing. Sales for 1957 of Gamble-Skogmo were $108,678,638, with after-tax earnings of $4,001,178. Thus the combined sales for the two companies totaled $326,044,802, with combined earnings of $10,655,229 and total assets of approximately $153,000,000. As of June 30, 1958, Gamble-Skogmo had outstanding 2,495,456 shares of common stock.

Last year, Western Auto common stock paid a dividend of $1 a share. Thus the acquisition of the Western Auto stock could mean the addition of approximately $1,250,000 to Gamble-Skogmo earnings if the present rate of earnings and dividends for the Kansas City firm continues.

Mr. Udd, who will continue as Chairman of the Board and Director of Western Auto, has retained a portion of his personal holdings of Western Auto stock. It is reported that Mr. Udd decided to relinquish his large block of stock because of the great demands upon his time in his metallurgical activities and interests and the financial requirements of these interests.

Gamble-Skogmo, Inc. and Western Auto Supply Co. together now have national distribution in 48 states, plus Canada, Hawaii and Puerto Rico, through over 6,000 outlets.

Gardner-Denver Co.—New Press Unit Assembled—

The largest forge and trim press unit in the Denver Colo., area has been assembled at the company's new factory site there.

The unit, arriving in three parts, was shipped from Erie Pa., on a 16-wheel flat car, one of only two such cars currently in operation in the United States for transporting heavy loads of this type.

The base of the forge alone weighs approximately 230,000 pounds and the total weight of the forge is 352,000 pounds. The trim press adds another 35,000 pounds to the shipment.

Serving the new 30-acre site will be the new railroad siding extension from the Union Pacific main line, natural gas and power transmission lines, a 700-foot deep well and pump, a 75,000-gallon water tank and a 40 x 80 foot boiler house with two 200 hp boilers. —V. 188, p. 246.

General American Transportation Corp.—Signs Piggy-Back Lease Agreement—

This corporation has signed a lease agreement with one of the nation's major freight forwarders to supply it with the company's new piggy-back "Clejan-type" car, it was announced on Aug. 5 by William J. Stebler, President.

The first of the unique specialized cars will be delivered to the United States Freight Co. within the next ten days at Chicago, marking the first time forwarders will move freight extensively by piggy-back instead of the conventional box car. The United States Freight Co. is the holding company controlling the largest freight forwarding operation in the nation.

Acquisition of Piggy-Back, Inc., by General American last April gave the nation's largest operator of privately owned freight cars Piggy-Back's patent rights covering the "Clejan-type" rail car, projected containers for use on it and loading and unloading equipment designed for highway, railroad and sea transport.

The car, of 79 feet 6 inches length, will provide unusual and substantial savings to carriers in their piggy-back operations. Similar length conventional flat cars for piggy-back service not only cost 30% more, but also weigh 75,000 to 80,000 pounds as compared with 49,000 pounds for the "Clejan-type" car. Each Clejan car can carry one 40-foot and one 35-foot, three 24-foot trailers, or two to four containers, and, it was emphasized, can also carry containers or trailers interchangeably.

Because of the light weight of the cars, less motive power is required to move the same number of trailers. In some cases, the adoption of Clejan equipment has made it possible to reduce the number of trains required to transport a given number of trailers. As piggy-back in general grows, this factor by itself becomes of increasing importance and may ultimately set the type of equipment adopted, the announcement noted.—V. 187, p. 2333.

General Contract Corp.—Plans Spin Off—

In line with our desire to expand its operations, the company recently opened two promising loan operations, one at Kansas City, Mo., and another at Hattiesburg, Miss. Two additional operations in Mississippi and one in Missouri are under consideration at this time, and surveys of additional locations are being conducted.

Reorganization plans providing for two holding companies, one for banks and one for non-banking operations, and for the elimination of preferred stocks, are in the hands of the Federal Reserve Board for approval. Early Federal Reserve Board assent would clear the way for retirement of preferred stocks Oct. 1 and for spin-off at year end.

Total resources of General Contract Corporation's banks, finance, loan and insurance companies are $368,000,000—up from $361,000,000 at the end of 1957.

Operating earnings in the first half of 1958 were 60c per common share, after payment of preferred dividends, or the same as for the first half of 1957, Arthur Blumeyer, President, said in his six months' report to stockholders. The operating earnings amounted to $1,439,232 in the first six months of 1958, as compared with $1,448,307 for the first half of 1957. In addition, the company earned 5c per share from sale of securities, etc., compared to 10c a share for the corresponding period of 1957.

Mr. Blumeyer stated that operating earnings for 1958 should compare favorably with 1957's results of $1.22 per common share.

"Deferred income (unearned discounts) are now $8,401,000—up $110,000 over a year ago," he pointed out.

"Our insurance operations continue at about the same level as they were a year ago, and earned premiums show an increase of about 5% over last year's figure.

"Bank deposits for our eight banks increased roundly $20,000,000 during the past year.

"Total outstandings of loans and discounts continue at an all-time high of $189,000,000. Retail receivables and personal loans outstanding—the amount of funds in use by consumer borrowers—declined to $104,000,000—off 5%, occasioned by a decline in automobile production of 33.3% in the first half of this year."—V. 187, p. 2116.

General Electric Co.—New Laboratory Completed—

The Silicone Products Department of this company has announced the completion of another step in its multimillion dollar expansion program—a new laboratory building housing unexcelled facilities for the development of new silicone products.

The new building is being occupied ahead of schedule. The new laboratory provides about double the space previously available for product development work.

A two-story brick structure, the laboratory houses complete equipment and services required for study of new silicone gums and rubber compounds, silicone fluids, resins and emulsions. Also located there are advance development laboratories, complete library facilities, management offices and conference rooms.

A considerable portion of the department's analytical services activity will also be performed in the new laboratory as soon as supplementary equipment now on order is delivered and installed.

Other major items in the Operation Upturn program for G-E silicones are the completion and equipping of a new process development laboratory and conversion of the original product laboratory into a marketing technical center. These projects are expected to be completed during 1958-59, along with further expansion of production facilities.

Total costs for the current expansion of silicone facilities will exceed $5,000,000, reports Dr. Reed. This figure includes the purchase of an additional 89 acres of land acquired at Waterford, N. Y., two years ago. Most of this land has been earmarked for growth expected in the 1960s.

The corporation disposed of the assets of its electronics division in July. Management concluded that profit potentials in this area of operations did not justify the capital expenditures necessary to expand the division's scope of operations in the electronics field to the level required for profitable operations.

In disposing of these operations, which accounted for less than 2% of annual sales volume, the corporation is eliminating further losses being reported by this division.—V. 188, p. 445.

A backlog of $25,000,000 in contracts for electronic equipment for the military will increase personnel by 250 men and women by the end of this year at the corporation's plant, Alex Lewyt, President, said on August 7.

The personnel will increase even more during 1959 as present contracts go into full production and new ones are received from the military, Mr. Lewyt said. He added that anticipated sales for the Lewyt vacuum cleaner on big wheels will keep the machine's production lines moving at capacity.

Lewyt now employs about 1,000 men and women in the production of military electronic equipment and vacuum cleaners.—V. 187, p. 2907.

Part of the proceeds was used to retire all short-term bank loans and the remainder was used to increase working capital.—V. 187, p. 1207.

Ling Electronics, Inc.—Acquires Massachusetts Firm—

This corporation on Aug. 1, 1958, acquired all of the common stock of The Calidyne Co., Inc., of Winchester, Mass., according to an announcement released jointly on Aug. 4 by James J. Ling, Chairman of Ling Electronics, and Robert C. Lewis, President of Calidyne.

Both companies are important factors in the field of electronically-driven vibration testing systems. These systems are used principally for pre-flight testing of components and parts for aircraft and missiles which will be involved in supersonic flight. Mr. Ling estimated his company's sales volume for the fiscal year ended July 31, 1958, was about $6,500,000, including United Electronics only from the time of acquisition, June 1. In the last quarter of fiscal 1957-8, volume was at the annual rate of more than $10,000,000, he added. Calidyne, operating as a limited partnership in calender 1957, had sales of $3,231,639 and pre-tax profits of $230,148. It has become incorporated in 1958 so that earnings now are subject to normal corporate income taxes.

Mr. Lewis stated that the new arrangement was logical from Calidyne's viewpoint because of the integration it afforded his company, which manufactures shakers but has been purchasing amplifiers and power systems. Ling also will supply additional financial resources to Calidyne. It will undertake to furnish it with working capital and to complete the new 50,000 square foot plant near Winchester, scheduled for operation in mid-December of the current year.

Ling Electronics, in addition to its vibration systems, manufactures as well, through several divisions, special purpose power vacuum tubes, closed circuit TV camera systems, microwave relay systems, cable and harness systems, electronic instrumentation systems and also engages in electrical engineering and contracting.

Combined backlog of both companies was estimated by Mr. Ling at more than $10,000,000 as of July 15.—V. 186, p. 436.

Litton Industries, Inc.—Acquisition—

Completion of the exchange of 100% of the outstanding stock of Airtron, Inc., for an undisclosed amount of the common stock of Litton Industries, Inc., was announced on July 31 by Charles B. Thornton, Litton President. Airtron, one of the electronics industry's leading producers of ferrite devices, waveguides and related components and equipments for radar and microwave communications, will take over a portion of Litton's Components Division plant in Los Angeles, Calif. as a west coast manufacturing facility and sales headquarters.

Airtron President David Ingalls, who has been named a Litton vice-president, will continue as President and Chief Executive Officer of Airtron as it becomes an operating division of Litton, with headquarters at Linden, N. J.—V. 188, p. 446.

Lone Star Steel Co.—Earnings Show Decline—

Despite drastically curtailed operations during the first half of 1958, this company showed net profit before taxes of $1,006,929 for the period ended June 30.

Commenting on the company's activities during the past six months, E. B. Germany, President, said, "This has been an exceptionally difficult period caused by a tremendous cut in oil country drilling and exploration work. Reduced activity in the oil fields was directly responsible for Lone Star's cutback in production."

Mr. Germany said, however, that the company is now back to normal operating levels, and that all personnel in layoff status have been recalled.

6 Months Ended June 30—	1958	1957
Earns. per share (on 3,194,400 shares)	$0.15	$2.09
Current ratio	487%	473%
Steel operating rate	66%	122%
Deprec. and depl. included in costs	$2,320,818	$1,963,597

Lone Star officials said the cutback which began early in the year at one time threw close to 2,000 employees out of work. Even so, Lone Star's operating rate of 66% for the period, was higher than the industry average.

Due to have a considerable impact on the company's production during the last half of the year are new facilities covered by an $8,000,000 expansion program. The first of these, a stretch reducing mill, already is in operation. A fifth open hearth furnace is virtually completed and probably will be started up in the near future. The third facility in the expansion program is a rod mill which will manufacture reinforcing bars for the construction trades. This mill also is virtually complete and as soon as it is put through the usual "shakedown" run, will go into full production. Lone Star's rated annual ingot capacity was increased from 550,000 net tons to 660,000 net tons on Jan. 1, 1958.—V. 187, p. 2335.

Nevada Monarch Consolidated Mines Corp., Elko, Nev.—SEC Orders Delisting of Stock—

In a decision announced on July 31, the Securities and Exchange Commission ordered withdrawal from listing and registration on the Salt Lake Stock Exchange of the $1 par common stock of this corporation for failure to file annual reports and for filing a false and misleading report.

The company was organized in 1947 for the purpose of engaging in the mining business. Its stock was listed and registered on the Exchange in 1948 and was suspended from trading by action of the Exchange in October, 1949. It has been substantially inactive since 1950 and all of its properties have been leased since 1951.

According to the Commission's decision, Nevada Monarch failed to file the required annual reports for the years 1951 through 1955; failed to file its 1956 annual report, due April 30, 1957, until September 1957; and failed to file, until March, 1958 (after the Commission's proceedings were instituted), a current report disclosing that in June, 1957 the company had executed a three-year lease of all of its properties which gave the lessee an option to purchase the properties.

Furthermore, the decision states, the balance sheet of Nevada Monarch included in its annual report for 1956 listed as an asset the sum of $50,000 which was stated to be the proceeds of a government loan expended for the development of a tungsten ore body by the lessee. The balance sheet further states that this item was based on information furnished by the lessee. This item was overstated. Although the lessee applied for a government loan of $50,000, he actually received a loan of only $4,875 and in addition expended "in connection with" such loan a maximum of $18,000. "Nevada Monarch's asserted belief that the loan had been granted in the full amount cannot absolve registrant of responsibility for the overstatement," the Commission observed, "and we find that its annual report for 1956 was false and misleading in this respect."

In concluding that withdrawal of the Nevada Monarch stock from listing and registration on the Exchange is necessary and appropriate, the Commission stated: "The purpose of the reporting provisions is to inform existing and potential investors of material corporate activities and the corporation's financial condition. The evidence shows that registrant ignored its obligations under these provisions by its persistent failure to file annual reports, the late filing of an annual and current report, and a substantial overstatement of an asset in a financial statement contained in its annual report."—V. 187, p. 575.

New England Electric System — Proposes Exchange Offer for Minority Stocks of Five Subsidiaries—

The borrowings would be made in the principal amount of $34,234,000 from banks and $25,450,000 from NEES during the period ending Dec. 31, 1958, for which the subsidiaries would issue their promissory notes. The maximum amount of notes to be outstanding at any one time during the period is stated at $47,094,000. Proceeds of the borrowings are to be used to pay then outstanding notes due to banks and/or NEES (amounting to $33,979,000 at July 1, 1958) and to provide new money (estimated at $13,115,000 for the period) for construction expenditures or to reimburse treasuries therefor.—V. 188, p. 352.

North American Car Corp.—Notes Sold Privately—This company, it was announced on Aug. 7, has placed privately, through Glore, Forgan & Co., an issue of $6,500,000 subordinated sinking fund notes due July 15, 1973.

The corporation is calling its outstanding 62,475 shares of 5⅛% cumulative preferred stock for retirement as of Aug. 30, E. C. Lasher, President, announced.

He said the change in capital structure would provide savings that would add about 30 cents to common share earnings in the first 12 months after the bonds are issued.

At the same time, Mr. Lasher reported increased revenues and earnings in the second quarter. For the three months ended June 30, the company reported gross revenues rose to $3,956,651, from $3,833,482 a year earlier. Net earnings totaled $685,259, or 99 cents a share, compared with $663,811, or 94 cents a share.

The second quarter results brought first half revenues up to $7,891,713 from $7,539,171 the year before. Earnings for the first six months slipped, however, to $1,333,717, or $1.90 a share, from $1,357,746, or $1.92 a share. The decline was due to a non-recurring capital gains of $46,236, or 7 cents a share, enjoyed in the first half of last year.—V. 187, p. 2004.

North Carolina Natural Gas Corp., Fayetteville, N. C.—Registers Financing Proposed With SEC—

This corporation filed a registration statement with the SEC on July 31, 1958, covering $5,200,000 of subordinated income debentures due Aug. 15, 1983, and 520,000 shares of its $2.50 par common stock. The securities are to be offered for public sale in units, each consisting of $20 of debentures and two shares of stock. The public offering price and underwriting terms, as well as the interest rate on the debentures, are to be supplied by amendment. Kidder, Peabody & Co. is listed as the principal underwriter.

Organized in 1955, the company proposes to construct and operate a pipeline system for the transportation of natural gas to be sold in south, central and southeastern North Carolina, including sale through 22 distribution systems which the company plans to construct and operate. The transmission system will consist of approximately 635 miles of pipeline, and the distribution systems will include some 335 miles of mains. The initial construction, estimated to be completed about March 31, 1959, will include completion of the transmission system and most of the mains required in the distribution systems. The cost of the transmission system is estimated at $15,386,000 and the cost of the distribution facilities to be constructed during the initial construction period is estimated at $3,139,000. In addition, the company estimates its working capital requirements at $540,000. During the four years after completion of the initial construction, the company plans to spend approximately $3,200,000 in extending the distribution systems, including customer service. The company intends to provide funds for this program from the balance of the proceeds of its financing program and earnings from operations during the period.

The financing program includes, in addition to the sale of the units of debentures and stock, the sale to institutional investors of $13,750,000 of first mortgage pipeline bonds, 5⅜% series due June 1, 1979. The company also intends to make unsecured bank loans from time to time in the aggregate principal amount of $13,750,000 to finance construction costs temporarily until payment with the proceeds from the sale of the bonds.

The company now has outstanding 114,180 shares of stock. The prospectus lists P. McDonald Biddison as President. Officers and directors of the company and members of their families own 14% of the outstanding stock. Colonial Natural Gas Corp., which organized the company, owns 27.2%.

Norwich Pharmacal Co.—Granted Injunction—

The U. S. District Court for the Northern District of New York has granted an injunction to this company, restraining Sterling Drug, Inc., New York, N. Y., from simulating the pink color of Norwich's Pepto-Bismol in Sterling's Pepsamar, or, if the pink color is continued, Sterling must distribute its product in a container concealing the color.

In the decision, U. S. District Judge Stephen W. Brennan said, ". . . we inevitably come to the conclusion that Sterling is competing unfairly. Its admitted intention is to simulate Pepto-Bismol as nearly as the law would allow. Free competition, so necessary in our economic life . . . does not countenance the assumption of a competitor's identity. Pepsamar's pink color was not adopted because of its alleged therapeutic value, its soothing qualities or its uses in similar remedies. The undisputed evidence is that it was adopted for the sole reason that it was an attribute of Pepto-Bismol."

"It is therefore concluded," the decision continued, "that the plaintiff (Norwich) is entitled to an injunction restraining the defendant (Sterling) from simulating the pink color of Pepto-Bismol in its product, Pepsamar. If Sterling, however, desires to continue to use the pink color of its product, Pepsamar, same shall be distributed in the blue colored glass bottle, (or other colored container concealing the pink color of its contents) which is used by Sterling in the marketing of many of its products. The injunction so granted shall restrain the defendant from the use of the descriptive pink color in the advertising of its Pepsamar product.

In his decision, Judge Brennan noted that Norwich has been producing and selling Pepto-Bismol continuously since about 1900 and has been using the name "Pepto-Bismol" since early in 1919. "It is fair to say," the decision notes, "that in the advertising . . . the pink color of the Pepto-Bismol has been emphasized."

Sterling introduced its pink-colored new Pepsamar in 1955 and Norwich brought suit in February, 1956, charging unfair competition and seeking injunctive relief.—V. 187, p. 1897.

Complete and exact details for the week covered by the foregoing will appear in our issue of next week. We cannot furnish them today, inasmuch as the week ends Saturday and the Saturday figures are not available at time of going to press. Accordingly, in the above the last day of the week in all cases has to be estimated.

In the elaborate detailed statement, however, which we present further below, we are able to give final and complete results of the previous week—the week ended Aug. 2. For that week there was a decrease of 3.9%, the aggregate clearings for the whole country having amounted to $21,305,208,075 against $22,172,711,036 in the same week in 1957. Olin Mathieson Chemical Corp.—Plans Joint Venture in Africa to Develop Bauxite Deposits—

A new international corporation to develop vast bauxite deposits in French Guinea (French West Africa) and to produce alumina there was announced on Aug. 7 in the United States by this corporation.

Known as FRIA Compagnie Internationale pour la Production de l'Alumine, the corporation involves:

(1) An estimated total cost of $135,000,000.

(2) Participation by five corporations from four nations of the free world.

(3) Plans to build the world's largest alumina plant in French Guinea.

(4) Development of one of the world's largest known bauxite deposits.

Representing one of the largest international efforts for the development of a metals raw material in an underdeveloped industrial area, the FRIA group consists of Olin Mathieson Chemical Corp.; two French companies, Pechiney Compagnie de Produits Cihmiques et Electrometallurgiques and Societe d'Electrochimie, d'Electrometallurgie et des Acieries Electriques d'Ugine; Aluminum Industrie Aktiengesellschaft of Zurich, Switzerland; and The British Aluminium Co. Ltd.

Percentages of ownership of FRIA are: Olin Mathieson, 53½%; Pechiney and Ugine, 26½%; AIAG, 10%; and The British Aluminium Company, 10%.

The shareholders in FRIA will have the right to purchase alumina from the company in proportion to their respective percentages of ownership.

Total cost of the project will be provided as follows:

	Equity
OMCC	$21,000,000
Pechenery and Ugine (French)	10,000,000
British Aluminium	4,000,000
AIAG (Swiss)	4,000,000
Total equity	$39,000,000
	Debt
Loan funds from U. S. institutional investors	$40,000,000
FRIA obligations sold to French public	20,000,000
Loan by British Aluminium	7,000,000
Loan by AIAG	7,000,000
Long-term French Government loan	22,000,000
Total debt	$96,000,000

Loan funds from the U. S. institutional investors have been arranged through Lazard Freres & Co., New York. Olin Mathieson is negotiating with the International Cooperation Administration for a U. S. Government guarantee covering both its equity contribution to the project and the loan funds from the U. S. institutional investors.

Each of the shareholders has already contributed most of its share of the equity financing of the project.

A long-term agreement has been executed by FRIA and the government authorities of French Guinea, relating to the stabilization of taxes and other fiscal matters.

The FRIA plant, which is being constructed and will be operated by Pechiney, Europe's leading aluminum producer, will have an initial capacity of 480,000 tons of alumina per year, but is designed for possible expansion to 1,200,000 tons per year (which would make it the world's largest alumina plant).

Omaf Corp.—Notes Placed Privately—

This company, it was announced on Aug. 7, has arranged for the sale, through Lazard Freres & Co., of $40,000,000 of secured notes, due Dec. 1, 1984, to certain institutional investors. These notes are secured by an equal amount of dollar mortgage notes issued FRIA, Compagnie Internationale pour la Production de l'Alumine.

Joseph G. Rayniak, President, said that about $2,000,000 of the increase in total sales volume for the quarter was accounted for by its Cushman Motor Works subsidiary, acquired last year. Cushman's operations were not included in the first eight months of 1957.

He also stated that fourth quarter sales and earnings should be close to the corresponding period for 1957.

"We expect to effect considerable savings," Mr. Rayniak stated, "through the recent transfer of Pioneer Saws Ltd. from Vancouver, British Columbia, to Peterborough, Ontario. This will result in a cost reduction through the integration of manufacture with Outboard Marine Corp. of Canada Ltd., in Peterborough and will place Pioneer much closer to its primary Canadian market."

Outboard Marine's recently completed plant in Bruges, Belgium, is now producing outboard motors and because of Belgium's participation in the European Common Market alliance this will result in an increase of sales in many countries.

The corporation's products include Evinrude, Gale-Buccaneer and Johnson outboard motors, Lawn-Boy rotary power lawn mowers, Pioneer chain saws and Cushman industrial and personal two and three wheel vehicles.

Peoples Gas Light & Coke Co.—Gas Contract Canceled—Eskil I. Bjork, Chairman, on Aug. 4, said:

Natural Gas Pipeline Co. of America, long distance pipeline subsidiary of The Peoples Gas Light & Coke Co., and Colorado Interstate Gas Co. have by mutual agreement canceled their contract under which Colorado Interstate would have supplied Natural with gas for its Beatrice expansion project. This is the first step in the cancellation of a significant portion of that project as originally contemplated.

Although initially contemplated for completion in 1957, prolonged hearings before the Federal Power Commission necessitated a rescheduling into 1958. Following a decision of the U. S. Court of Appeals for the District of Columbia in the Memphis case last November, the parties agreed that construction could not begin until 1959.

In the opinion of the management, it is no longer reasonable to assume that this project can be contemplated for construction and completion in 1959, if certificated. The continued deferment of an expansion project of such magnitude finally becomes an interference in the proper and orderly development of the market.

Moreover, the suppliers of gas for such a large project can not be expected to withhold indefinitely such gas from a market.

Under the circumstances, therefore, cancellation of the underlying gas contract appeared to be in the best interests of the parties thereto and, in their opinion, in the public interest.

The Peoples Gas System will strive to develop and process another, or other, projects in substitution for the Beatrice project, and will diligently proceed with the expansion project currently under construction by Natural Gas Pipeline Company.

Plans Offering to Stockholders—

The directors on Aug. 1 approved a program for the offering of approximately $17,000,000 of additional capital stock of the company to its stockholders later this year, it was announced by Eskil I. Bjork, Chairman.

The stock would be offered to stockholders at a price which would be determined later by the directors. The issuance of this stock would be subject to approval of the Illinois Commerce Commission and registration with the Securities and Exchange Commission.—V. 188, p. 89.

(August) Thyssen-Huette, A. G. (Germany) — Completes Reconstruction Program—

One of the most extensive reconstruction and modernization programs ever undertaken by a private European company has been completed. The success of the five-year rebuilding activities, which brought August Thyssen-Huette back to its leading position in the West German steel industry from almost complete war-time destruction and postwar dismantlement, is reflected in the sales and production figures revealed in the company's latest annual report, just released in English in New York.

Substantial sales, income and production growth was achieved by Thyssen-Huette, located in Duisburg-Hamborn in the heart of the Ruhr Valley and considered by U. S. Steel experts to be Europe's most modern and efficient steelmaker.

In the five-year period of Thyssen's reconstruction program, the company allocated $207,000,000 for rebuilding activities of which $160,000,000 has already been spent for new coke ovens, blast furnaces, steel mills, rolling mills, other installations and shipbuilding program. An additional $28,000,000 has been spent mainly for the expansion of the Hamborn power plant and the transport facilities in the company's inland railroad-harbor facilities. Thyssen-Huette launched its second ship, the MS "Fritz Thyssen," a 15,000 ton motorship which will join its sister ship, the SS "August Thyssen," in the Thyssen private fleet of freighters.

In the last fiscal year, outstanding capital stock valued at about $60,000,000 at par was increased to $72,500,000 by the issuance of new shares out of authorized capital in two separate transactions. The first step involved the acquisition of a majority interest in Deutsche Edelstahlwerke against new ATH shares in the amount of $8,500,000. Subsequent to this Thyssen-Huette offered minority shareholders of Deutsche Edelstahlwerke an exchange of stock which was widely accepted. The second transaction, was the acquisition of 34% of the stock of Huettenwerke Siegerland for about $4,800,000 in new ATH shares.—V. 187, p. 1253.

The increase was partially offset by declines aggregating $3,904,083 in revenues from gasoline and processing of natural gas, crude oil and sulphur and potash.

There was an increase in expenses in the six-month period amounting to $8,499,916, most of which resulted from an increase in the unit cost of gas purchased and the purchase of additional gas supplies.

Zenith Radio Corp.—New Device Announced—

The new amplifier, characterized by Zenith as "a scientific breakthrough that is expected to have tremendous impact on radar and space communications," can also be effectively used in receivers designed for long-range communications between the earth and interplanetary space ships.

Like most radio tubes, the Zenith unit and its auxiliary components form "a small package." It requires no cumbersome refrigeration equipment and can be used in connection with existing UHF and microwave receivers.

Zenith plans commercial production of the amplifier "as rapidly as possible."—V. 187, p. 2380.
