American Smelting & Refining Co.—Brings Multi-Million Dollar Aluminum Alloy Plant Into Production

A major new plant to produce aluminum alloys has been brought into production by this company at Alton, Ill.

Operated by the Company's Federated Metals Division, the new multi-million dollar facility has a rated capacity of 72,000,000 pounds of alloys annually. The Alton plant, which virtually doubles Asarco's capacity to produce a range of aluminum alloys, is reported to be the largest single unit designed and constructed solely to refine and alloy secondary aluminum.

The Alton site was selected because it is favorably located in terms of the availability of raw material. It also is adjacent to major alloy consuming centers.

The plant refines secondary aluminum from a variety of sources. It contracts with manufacturing industries for such materials as trimmings from aluminum stampings, castings, turnings and borings, and residues from die-cast and foundry operations. It also melts and refines so-called obsolescent scrap—for example, discarded kitchen utensils, appliance parts and automotive crank cases.

A constant flow of secondary aluminum scrap is fed to the Alton plant not only from nearby sources but also from points as distant as Dallas and Seattle. In turn, shipments of the finished Asarco alloys are being made primarily to major consumers—such as the automotive, aircraft and fabricating industries—throughout the midwest. Other sections of the country will continue to be served by Asarco's aluminum alloy plants at Perth Amboy, New Jersey and Los Angeles, Calif.—V. 189, p. 341.

During the last five years construction expenditures have averaged some $1,037,682 per year; and expenditures for 1959 are estimated at $1,336,325.—V. 187, p. 2114.

This Washington (D. C.) investment company, has applied to the SEC for a modification of its decision and order of June 9, 1958, under the Investment Company Act declaring that its corporate name is deceptive and misleading; and the Commission has issued an order scheduling the application for hearing on April 20, 1959.

These changes, in general, are that sales of Fund shares will be restricted to employees of the Federal, State or local government and members of the armed forces of the United States, and that no sales load will be made in connection with such sales.—V. 187, p. 2904.

The stockholders will be asked to approve a reduction of capital in the amount of $2,394,536 in respect to the 598,634 shares of common stock outstanding, which would have a par value of $1 instead of $5. The reduction is necessary to permit the exchange of common and preferred stock for the debentures.

The debentures, which would be limited to $3,000,000, would not be secured. They would carry a 5½% interest rate and would mature in 10 years. Starting in 1961, a sinking fund would become operative with 20% of the net earnings set aside for the retirement of the debentures.

Under the terms of the exchange offer, each share of preferred and class B preferred (originally issued in lieu of dividends on the common stock) could accept a $20 principal amount of debenture. Each share of common could be exchanged for $7.50 principal amount of debenture.

The two classes of preferred stock have arrears equal to $6 a share which would be eliminated in the exchange. There are outstanding 68,838 shares of preferred. Owners of the controlling common stock interest (65.7%) do not intend to exchange for the debentures. —V. 188, p. 2245.

Hinsdale Raceway, Inc., Hinsdale, N. H.—Disclosures in Filing Challenged by SEC—

The Securities and Exchange Commission has ordered "stop order" proceedings under the Securities Act of 1933 to determine whether a registration statement filed by this corporation contains false and misleading representations of material fact and, if so, whether an order should be issued suspending its effectiveness.

Hinsdale was organized in April 1958 for the purpose of conducting night harness racing with parimutual betting. It owns a track at Hinsdale, N. H. The prospectus lists Alf Halverson of Berlin, N. H., as President and one of the promoters. In a registration statement filed Dec. 29, 1958, Hindale proposed the public offering of capital trust certificates evidencing 1,000,000 shares of capital stock and $1,000,000 of 6% debenture notes. Proceeds are to be used for the construction of various track facilities.

In its order authorizing the proceedings, the Commission challenges the accuracy and adequacy of various informational disclosures contained in the Hinsdale registration statement and prospectus, including the failure to disclose in the forepart of the prospectus "the many speculative aspects" of the company's business and the securities to be offered for public sale. Among these were the failure to disclose the amount of loss sustained in prior operations; the fact that there is no firm underwriting commitment, no assurance that sufficient funds will be raised to operate the raceway during the coming harness racing season and no provision for return of funds to investors if insufficient funds are raised to operate the track; the fact that stock previously was sold in violation of the Securities Act registration requirements, giving rise to contingent liabilities; the intention of the management to maintain control of the company through the voting trust for a period of ten years; that the management group lacks experience in race track management, and that it has an existing 20-year management contract which may be extended for 20 additional years; that substantially all the risk capital has been or is to be contributed by the public, despite the retention of control by the management; and the possible dilution of the interest of investors upon the exercise of options for 300,000 shares granted to promoters.

The Commission also questions the adequacy and accuracy of other information in the prospectus, including (1) statements relating to the intended use of the proceeds of the stock offering and the cost of all items for which the proceeds are to be used, the order of expenditure, and similar information; and (2) statements relating to Hinsdale's business and property, particularly in view of the omission of information concerning the total estimated cost of necessary facilities, the amount expended to date thereon, the estimated amount remaining to be expended and the type of facilities to be constructed, the size of the track, the type of construction and the capacity of grandstands and other facilities, the number of days of proposed track operation each season, the nature of state regulation, the distance from and population of nearby urban areas, and the extent, type and location of competition.

At a hearing scheduled for April 20, 1959, in the Washington office, inquiry will be conducted with respect to the foregoing and other matters to determine whether the Hinsdale registration statement fails to comply with the Securities Act disclosure requirements and, if not, whether a stop order should be issued suspending its effectiveness.—V. 189, p. 46.

Home Insurance Co.—Shows Underwriting Profit—

Kenneth E. Black, President, on April 6 announced that in 1958 the company showed a substantial improvement in underwriting operations. The Board also noted that the company had failed to advise the Exchange of changes in officers and directors as called for in its listing agreement.

Metal & Thermit Corp.—New Development Contracts

This corporation has entered into development contracts for the use of its organic chemicals with B. F. Goodrich Chemical Co.; Mobay Chemical Co (jointly owned by Monsanto and the German Bayer interests); Dow Chemical Co. and Permachem Corp., H. E. Martin, President, announced on April 8.

He also revealed that the company's development work with the U. S. Air Force at Wright Field has resulted in the production of one compound now flying experimentally in jet airplanes as an additive to the lubrication. "It acts as a stabilizer for high temperature service, permitting full throttle operations heretofore unattainable because of the inability of other compounds to withstand the high temperatures encountered," he said.

It is expected that these developments will in time materialize into substantially increased business for the company's chemical plant in Carrollton, Ky.. "We forsee real growth for this part of our business," Mr. Martin said.

Net sales for the three months ended March 31, 1959, are expected to be in the neighborhood of $9,750,000, and earnings per common share will be at least 27 cents per share.

This would compare with net sales of $8,453,345 and net income of 21 cents per common share in the first three months of 1958.

Earnings' forecasts for 1959 indicate an ascending curve for each succeeding quarter with a total for the year estimated at $1.50 per common share, compared with $1.12 in 1958. However, "a steel strike will certainly cause a dip in our earnings which may or may not be reflected in our year-end results," he said.

The B. F. Goodrich Chemical Company is working with M & T vinyl tin monomers to produce polymers for new type Goodrich plastics. The Mobay Chemical contract covers the development of catalysts for cellular urethanes used in insulation and airplane and automobile seat upholstery. The Dow Chemical contract covers development of M & T's fungicidal materials for use in agricultural chemicals and water base paints. Permachem Corp. is using M & T's tributyltin oxide, TBTO, in its Permachem, the trade name for formulations used as bactericides which have undergone successful hospital tests. Similar Permachem formulations using TBTO are being used in celanese yarn fabrics to preserve them from deterioration from perspiration.—V. 188, p. 1927.

Foster, Jack R. Foster Realty, Inc., Homer W. Forrester, National Land, and Armed Forces are affiliates and that Foster Realty is to act as real estate agent for both companies ,the intended use of the proceeds of the respective offerings, and similar matters.—V. 189, p. 918.

North American Exploration Co., Inc., Spokane, Wash. —Stock Offering Suspended by SEC—

The Securities and Exchange Commission has issued an order temporarily suspending a Regulation A exemption from registration under the Securities Act of 1933 with respect to a proposed public offering of stock by this company, which has offices at 417 Paulsen Building, Spokane, Wash.

Regulation A provides a conditional exemption from Securities Act registration for public offerings of securities not exceeding $300,000 in amount. The issuer filed a notification on Feb. 26, 1959, proposing the public offering of 3,000,000 common shares at 10c per share. The Commission's order asserts that the issuer's offering circular is false and misleading in respect of various material facts and that the offering would violate Section 17 (the anti-fraud provision) of the Act. The order also provides an opportunity for hearing, upon request, on the question whether the suspension should be vacated or made permanent.

The issuer was formed for the purpose of acquiring mineral leases from Palmer and Associates, a limited partnership, whose members are the promoters of the issuer. William H. Palmer is listed as President. In its suspension order, the Commission challenges the failure of the issuer to make adequate disclosure in its offering circular of the nature and outcome of its operations and those of its predecessors and others on the issuer's properties; the terms of the issuer's mining leases and purchase agreements, particularly the amount of royalties payable thereunder and the total costs to the issuer of these mining properties and the payments due thereon; the background and capabilities of the management officials who are to direct its operations; information about the type, condition and capacity of the issuer's mill and the justification for the proposed expenditures on the mill in light of the amount of known ore; and that since 1942 there have been substantial increases in the costs of operating mines and mills similar to those on the issuer's properties while the price of gold has remained at $35 an ounce. Moreover, the Commission questions the failure to include adequate financial statements, particularly a statement of cash receipts and disbursements of the predecessors, and the inclusion as an asset in the financial statement of $149,215, a substantial portion of which represents the par value of shares issued to promoters and predecessors for mineral property rights, such amount being arbitrary and having no relation to the nominal cost actually paid for such leases by the promoters and predecessors.—V. 189, p. 1350.

Pursuant to this policy, the company has recently purchased (a) two units (each representing a one-hundredth interest) in Office Building Associates, which owns five office buildings in Los Angeles, (b) one unit (representing a one-twelve-hundredth interest) in Motors Building Realty Co., which owns a long-term lease on the General Motor Building in New York City, and (c) one-fourth unit (representing a one-four-hundredth interest) in Military Park Building Co., which owns the Military Park Building in Newark. The company also proposes to purchase income producing properties with a view to resales, and has recently executed an agreement to purchase the Wiss building in Newark for $76,500 (subject to mortgages and liens of $511,211). It has entered into an agreement for the sale of the Wiss Building to Wiss Building Associates for $150,000 (subject to the indebtedness) and for the lease of the building to the company for 21 years at a rental of $15,000 per year.

Net proceeds to the company from its proposed stock sale will be added to its general funds to be available for investment in real estate syndicates and other real estate. The company has outstanding 8,190 shares of class A and 910 shares of class B stock, all owned by its promoters, officers and directors. The prospectus lists Leonard P. Weinstein of Metuchen, N. Philadelphia Electric Co.—Plans Stock Offering—

This company's sales and revenues followed an upward trend during 1958, despite the slackened pace of the general economy in the early months of last year, R. G. Rincliffe, President, announced on April 8. Total revenues from electric, gas, and steam services rose 5%. Common stock earnings amounted to $2.76 a share in 1958, compared with $2.60 in 1957. The annual dividend was raised from $2 to $2.24 a share beginning with the March, 1959, payment.

The company's construction expenditures in 1958 totaled $118 million, Mr. Rincliffe reported, stating that about half of this outlay was associated with the utility's new Eddystone station and its related transmission lines.

"Our current construction program will continue at substantially the same level as last year," Mr. Rincliffe said. "In order to finance part of this program, we are at the present time taking the necessary steps to make an offering in June of rights to our stockholders to subscribe for one new share of common stock for each 20 shares held, provided conditions are satisfactory for such an issue.

The first 325,000-kilowatt generating unit at Eddystone station is scheduled for service the latter part of this year, and a second unit of like capacity is being readied for operation in 1960. Requiring less than two-thirds of a pound of coal to produce a kilowatt-hour of electricity, Eddystone will be one of the world's most efficient power plants.

A proposal by Philadelphia Electric and 31 other investor-owned utilities to build a high-temperature, gas-cooled nuclear power plant on the P. E. System has been accepted by the Atomic Energy Commission as a basis for the negotiation of a contract. The $24,500,000 plant, to be built on the Susquehanna River at Peach Bottom, Pa., will have a capacity of 40,000 kilowatts and will serve as a prototype for a full-scale plant designed to operate at to-day's high steam temperatures and pressures.—V. 189, p. 1470.

The offering is to be made on a best efforts basis by Charles Plohn & Co. and Netherlands Securities Co., Inc., both of New York, for which a $1 per share selling commission is to be paid. The company also has agreed to pay $30,000 of the expenses of the underwriters; and the underwriters have acquired from one stockholder of the company, for $75, 75,000 shares of the company's common stock which, according to the prospectus, they intend to hold until after 15 months from the initial offering of stock. Precon was organized under Delaware law on Feb. 9, 1959. In exchange for all of its then outstanding stock, this company acquired from Photographic Analysis, Inc., a California company, of North Hollywood, assets consisting of certain patents and inventions in the electro-mechanical, electronic and photographic fields which that company is said to have developed. The company intends to put into production certain devices and systems based upon these assets, and to continue developmental and research work conducted by the predecessor since 1953. Among these are three devices said to be "ready to be tooled up for production," an automation controller, a TV programmer and a data recording pulse camera. Net proceeds of the sale of stock, assuming all shares are sold, are estimated at $620,000. The company proposes to subcontract the work of fabricating and assembling the three devices. Of the net proceeds, $155,000 will be supplied to the subcontractors for tools, jigs, dies and models; $244,000 will be used for working capital; $31,000 will be used to reimburse the predecessor for certain development expenses; $96,000 for inventories and work in process; $66,000 for continuing research and development; and $28,000 for advertising and sales promotion.

The issuing company now has outstanding 325,000 common shares, of which 250,000 were issued to Photographic Analysis for its assets. The latter is said to have expended $342,145 in research and development costs to Dec. 31, 1958. The prospectus lists Theodore C. Robinson of Northbridge, Calif., as President and Treasurer. Photographic Analysis owns 250,000 of the issuer's outstanding shares, Charles Plohn & Co., 50,000, and Netherlands Securities 25,000. (James) Talcott, Inc.—Factoring Volume Rising—

The annual volume of receivables purchased by the corporation's Factoring Division, could easily amount to more than $500,000,000 by 1970, Herbert R. Silverman, President, predicted on April 7, as the company celebrated its 105th anniversary.

"In the past 10 years alone, our factoring volume has increased 72%," he said. "Sales purchased by this division in 1958 amounted to $297,939,000, compared to $172,759,000 in 1949. A similar rise in the next 10 years will bring volume to more than $500,000,000, and there are many reasons why such an increase is likely," he declared. —V. 189, p. 1395.

is $6,000,000 which will be paid partly in cash but mostly in convertible debentures, Mr. Davidson said.

Power Equipment Co. was founded in 1935 and quickly became a leader in the power supply field. Its line of PECO transformers, battery eliminators and other regulated power supply devices serve the computer, communication and electronic industries. Its 100,000 square foot plant, completed in 1956, is located in Galion, Crawford County Ohio, about 60 miles north of Columbus. PECO recently opened a new research laboratory at 2070 West Henderson Road, Beechwood Station, Columbus, Ohio, which will concentrate on automatic controls for industrial automation.

Formerly privately owned, Power Equipment had sales of $7,500,000 in 1958 and volume for the current year is estimated at $9,000,000. Pre-tax earnings were $600,000 last year, and have averaged about $1,000,000 annually for the last five years, the peak having been reached in 1957 when $1,600,000 was earned before taxes.—V. 189, p. 1514.

Transamerica Corp.—Consolidates Fire and Casualty Interests—

This corporation completed the consolidation of all of its fire and casualty insurance operations March 31 with the merger of its subsidiary Paramount Fire Insurance Co., into Pacific National Fire Insurance Co.

F. N. Belgrano, Jr., Board Chairman and President, said the consolidation had brought under one subsidiary, Pacific National Fire, the business conducted formerly by six individual fire and casualty companies owned directly or indirectly by Transamerica. This latest merger increases Pacific National Fire's assets to an amount in excess of $65,000,000.

The consolidation was initiated last September when the insurance activities of Manufacturers Casualty Insurance Co. and its subsidiary, Manufacturers Fire Insurance Co., both Transamerica owned, were brought into the Pacific National group. Pacific National Fire also owns Automotive Insurance Co. and Premier Insurance Co., both of which write basically similar lines of automobile insurance.

The merger of Paramount Fire into Pacific National Fire was approved by Paramount's stockholders on Feb. 9, 1959, following the recommendation of the company's board of directors.—V. 189, p. 1069.

Union Colliery Co.—To Pay Liquidating Dividend—

This company, a subsidiary of Union Electric Co. of St. Louis, Mo., has filed a proposal with the SEC for a reduction in its stated capital and the payment of a partial liquidating dividend to the parent; and the Commission has issued an order under the Holding Company Act giving interested persons until April 20, 1959, to request a hearing thereon.

Union Colliery ceased its operations in June, 1958, following the sale of its coal mine near DuQuoin, Ill., and its coal reserves in Perry and Jackson Counties, Ill. It still holds extensive coal reserves in Gallatin County, Ill., but has no plans for resumption of operations in the foreseeable future. All of Union Colliery's 12,500 outstanding shares are owned by Union Electric. It is proposed to reduce the par value thereof from $100 to $56 per share, or by $550,000, and to pay Union Electric a partial liquidating dividend in that amount.—V. 171, p. 1611.

Variable Annuity Life Insurance Co. of America—Temporary Exemption Sought—

This company and The Equity Life Insurance Co., Washington, D. C., have filed applications with the SEC seeking exemption from all provisions of the Investment Company Act for a period of 90 days from the date of the requested order; and the Commission has issued orders giving interested persons until April 22, 1959, to request a hearing upon the respective applications.

Each of the companies has been engaged in the issuance and sale of so-called "variable annuity contracts" with related life and disability insurance. On March 23, 1959, the U. S. Supreme Court in an SEC action against the two companies in effect determined that the variable annuity contracts which they are issuing and selling are securities and that the two companies are investment companies as defined in the Investment Company Act.

In support of the requested temporary exemption, each of the companies points out that its operations pose novel, and as yet unresolved questions of compliance or lack of compliance with various provisions of the Act, and that the interests of investors and the public will be best served by allowing adequate time for their resolution. It further points to provisions of the insurance laws as affording protection to these same interests. Each has undertaken to comply with the provisions of the Securities Act of 1933 with respect to the offering for sale, and sale, of its variable annuity contracts and to comply with standards adopted by this Commission with respect to literature employed in connection with the sale of securities of investment company securities.—V. 189, p. 1618.
