Accurate Electronics, Inc., North Hollywood, Calif.—Files With SEC—

The corporation on Dec. 16 filed a letter of notification with the SEC covering 150,000 shares of common stock (par 25 cents) to be offered at \$1.50 per share, through Amos Treat & Co., Inc., New York, N. Y. and Arthur B. Hogan, Inc., Los Angeles, Calif. The proceeds are to be used for research and development, advertising, and for working capital.

Al-Dun Amusement Co.—Suspension Vacated—

At the request of the West Point, Ga., company, the SEC has vacated an order which temporarily suspended a Regulation A exemption from registration under the Securities Act of 1933 with respect to its public offering of stock.

In a Regulation A notification filed Dec. 8, 1958, Al-Dun Amusements proposed the public offering of 250 shares of class A preferred at \$100 per share and 500 shares of common stock at \$100 per share which included options to purchase 250 common shares for an aggregate of \$75,000. By reason of its failure to comply with a condition of Regulation A requiring the filing of semi-annual reports of stock sales pursuant to the offering, the Commission on Nov. 6, 1959, ordered the temporary suspension of the exemption from registration.

Subsequently, such a report was filed reflecting that 166 shares of class A preferred and 392 shares of common had been sold as of Nov. 25, 1959, and the unsold portion was withdrawn from offering. Under the circumstances, the Commission concluded that its suspension order might be vacated.—V. 190, p. 2037.

Aldens, Inc.—Signs \$23,000,000 Loan—

R. W. Jackson, President of this Chicago mail order house, has announced the signing of agreements which provide for \$23,000,000 of long-term promissory notes to be issued during the next six months. The notes, maturing Dec. 1, 1976, will bear interest at 5 1/4% and 5 1/2%, and have been placed with a group of insurance companies headed by Equitable Life Assurance Society, Mutual Life Insurance Co. of New York, and Massachusetts Mutual Life Insurance Co. Negotiations were handled by Lehman Brothers.

Of the \$23,000,000 principal amount, \$18,000,000 represents new financing by Aldens, and \$5,000,000 is a refunding of an existing loan. The new money will be used to finance the company's expanding credit sales, though initially the funds will be used to repurchase accounts receivable previously sold to a group of banks, and to retire short-term bank loans.

Recently published figures show an increase of 18% in sales for the company for the first ten months of the current fiscal year. "Early in the fall season we introduced a new and simplified credit plan which has been well accepted by our customers," Mr. Jackson said. "Our credit sales are showing very satisfactory growth, having increased 29% over last year for the first ten months of fiscal 1959. This financing will add to our working capital and will enable us to continue our aggressive credit promotions."—V. 190, p. 2037.

This corporation has announced that arrangements have been made for it to acquire 51% of the shares of The Montrose Exploration Co. It was reported by Reuters and other British news services and confirmed in New York that the Parsons & Whittemore/Lyddon Organization of New York, London, and Paris has closed a contract with Technashimport, Moscow, for two highspeed newsprint machines to be manufactured by the company, for delivery to Russia in 1962 and 1963. The machines and auxiliary equipment will be manufactured substantially at the foundry and machine works of Black-Clawson International in Newport, England. The value of the order exceeds \$12,000,000 and was obtained for Black-Clawson against competition from other major paper machine builders in the United States, Germany, England, Sweden, and Finland. Soviet economic planners are said to have studied the international machinery building industry for many months before making their choice. Identical machines, they will be the largest in Russia—each, 284 inches wide. Designed mechanically for speeds up to 3,000 f.p.m., they will operate initially in the 2,000-2,500 f.p.m. range, producing 330

metric tons per day of standard newsprint, trimming 265 inches.—V. 190, p. 255.

Being registered are interests which will be acquired by all co-owners if said agreements are entered into providing for the maximum aggregate commitments contemplated by the offering. Such commitments of co-owners would be to make successive deposits totalling \$1,250,000 per quarter and to pay certain other costs. Under said agreements Callery will engage on behalf of the co-owners in the exploration for oil and gas on a continuing basis, using funds supplied pursuant to the co-owner's commitments. As compensation for services, Callery will receive a one-third interest in all properties acquired. Central Soya Co., Inc.—Net Down—

First quarter net profits of \$848,390, after provision for federal and state taxes, have been announced by the Fort Wayne, Indiana, company on sales of \$64,325,017 for the three-month period ending Nov. 30, 1959. This compared with sales of \$65,428,983 and net profits of \$1,526,539 during the same period a year ago.

Net profit for the three-month period just past was 31 cents per share as compared with 56 cents per share in the same quarter last year, based upon the 2,733,898 shares currently outstanding.

The profit drop reflects a continuation of market conditions that prevailed during the latter part of the previous fiscal year, according to Edward Schele, vice-president of Central Soya. These conditions have resulted in narrow profit margins in the soybean processing industry as well as in some areas of livestock and poultry production, he said. Current evidence indicates that conditions in certain segments of the feed industry may be correcting themselves. Meanwhile, Mr. Schele noted, the company's chemistry and grain merchandising divisions have continued to show satisfactory progress.—V. 190, p. 1732.

"After providing \$148,158 for preferred stock dividends, earnings on the common stock amounted to \$1.02 per share for the fiscal year ended Oct. 31, 1959, contrasted to a loss equal to 45 cents a share for the 1958 fiscal year."—V. 189, p. 2780.

The major items in the program are five generating station projects aggregating 1,895,000 kilowatts of new capacity. These generating units, which have been previously announced, are in various stages of construction or on order.—V. 190, p. 1936.

Continental Copper & Steel Industries, Inc.—New Plant

One of the largest plants in the country devoted exclusively to the production of all types of natural and synthetic rubber insulated wire and cable for the electrical industries is scheduled for completion early in 1960, at Linden, New Jersey. The plant is being built for Hatfield Wire & Cable Division of Continental Copper & Steel Industries, Inc., 120 Broadway, New York, N. Y. Frank Grad & Sons of Newark, N. J., architects and engineers designed the new structure.

The new plant will add 240,000 square feet to Hatfield's present facilities at Hillside and Union, New Jersey. Production of rubber insulated wire products will begin early next spring, with full produc-

tion expected by year-end. New product lines will include higher voltage cables for utilities and larger multi-conductor cables. The Hillside plant then will concentrate exclusively on the manufacture of plastic insulated types of wire and cable products and will develop new plastic insulated lines.

The warehouse facilities available in the new plant will be tripled over the present. The greater stock carried will enable Hatfield to give faster service directly to customers and also will provide faster warehouse replacement to the 22 regional warehouses maintained by Hatfield for national distribution.

Hatfield Wire & Cable is the largest of five divisions of Continental Copper & Steel Industries, Inc., an important producer of diversified metal products. Copymation, Inc.—Common Stock Sold—Simmons & Co. has announced that their public offering on Dec. 17

Corporate and Municipal Financing Ahead

The estimated demand for capital funds in the form of corporate common and preferred stocks and bonds, and municipals with sales dates set at this time for the forthcoming period of Dec. 29-Jan. 22 aggregates \$669,588,000. The totals for all corporates alone come to \$174,411,000 and that for tax-exempts \$495,177,000.

In the week ahead, after Christmas until New Year's Day, total corporates scheduled may raise only \$5,037,000 and tax-exempts \$6,285,000. The biggest week in the four-week projection for corporates is Jan. 4-8, and Jan. 11-15 for municipals (see the table below).

Last week's four-week projection for corporates was \$72,950,900—an increase of about 31 million, and for municipals was \$364,985,000—an increase of about \$130,000,000.

HIGHER ESTIMATE LAST YEAR

Last year, however, for the first three weeks of January, projections made for corporates at about this time were higher by about \$290 million. Corporate bonds were then estimated at about \$310 million compared to this week's estimate of \$103 million, and last year's equity issues at \$153 million as against this week's figure of \$61 million.

LOOKING FURTHER AHEAD

Nevertheless, looking beyond the next four weeks, the market is swelling. Corporates show Consolidated Natural Gas will come in Feb. 8 with \$25 million in debentures, Duke Power Co. with \$50 million mortgage bonds on Feb. 18, and Duquesne Light & Co. \$20 million debentures on Feb. 24. As for municipals in the month of January, over \$400 million is already contemplated including Montreal Metropolitan Corp. \$30 million debentures on Jan. 26. On Feb. 9, New Housing Authority bonds (PHA's) will seek \$102 million. The Federal Treasury is set to raise \$1.5 to \$2 billion of its January cash requirements by auctioning tax bills and it is anticipated that a note issue at the end of January will be scheduled for \$11.4 billion refunding.

DECEMBER TO DECEMBER STOCK PRICE CHANGES

The SEC's composite Stock Price Index indicates that December prices will average about a 9% increase compared to December, 1958. Indications are that the largest gains will be in trade, finance and service stocks (about 17%) and greatest decrease in mining issues (about 13%). Transportation in the year's interval may fall off negligibly, if at all; total manufacturing up by about 10% with 6% rise for non-durable goods as compared to 4% rise for durables; and utilities may show a 6% gain. In view of the fears following the past April-July highs, December, 1959, may prove to look better than the views expressed so optimistically for 1959 at the end of 1958.

FORTHCOMING CALENDAR

The table below presents the data for the corporate and municipal calendar in the next four-weeks. At the same time, Mr. Evans announced that Crane directors have approved acquisition of the Autronic Division of Swartwout Co. of Cleveland, Ohio, maker of electronic controls. H. Garbade, President of Crescent. This compares with a price of 10.5 cents a thousand cubic feet currently being received by Hugoton Plains from Northern Natural Gas Co. The contract calls for the new price to cover a six-year period beginning Jan. 1, 1960, but will require the approval of the Federal Power Commission before being put into effect. When approved, the new price could result in raising Hugoton Plains' net income to over \$1,000,000 a year before U. Fedders Corp.—Earnings—News—

Sales and earnings for the three months ended Nov. 30, 1959—the first quarter of the 1960 fiscal year—not only were very substantially above the levels of a year earlier, but also exceeded those for the entire first six months of fiscal 1959. Sales for the quarter were \$26,199,743 an increase of \$15,694,667 over those for the corresponding period of fiscal 1959 and \$2,885,624 above those for the first half of that year.

Operations for the Nov. 30th quarter were affected to a very considerable degree by the exceptionally heavy orders placed for the earlier-than-usual delivery of room air conditioners by Fedders distributors. This created an abnormal situation that resulted in a marked shift from the normal pattern of demand. The great preponderance of this increase in orders was in anticipation of the imposition of a 10% manufacturer's excise tax on all room units under a revised Internal Revenue Service Regulation, effective Dec. 1, 1959. Although the increase in room unit volume was the principal fac-

tor responsible for the large first quarter gains, progress was also registered by the company's other air conditioning products. Sales of our residential and commercial heating equipment remained at satisfactory levels, while shipments of radiators and heater cores were at the rates of a year earlier despite the steel strike.

For the quarter ended Nov. 30, 1959, net sales of the company amounted to \$26,199,743 as compared with \$10,505,076 for the same months of a year earlier. Profit before taxes for the fiscal 1960 first quarter was \$4,347,185 as against \$947,930 for the corresponding period of the preceding year.

Net income, after taxes, totaled \$1,932,185 and was equivalent to \$1.01 per share on 1,907,352 shares of common stock—the average number outstanding during the period. This compares with the previous fiscal year's first quarter net earnings of \$428,730, or 23 cents per share, based on the 1,829,188 average shares of common stock then outstanding, after preferred dividends.—V. 190, p. 669.

The remaining 55,000 shares to be offered by Gallahue will be delivered in escrow to be held until Dec. 31, 1961, for purchase by holders of transferable warrants to be issued by Gallahue to each original purchaser of original shares on the basis of one share for each purchased at the offering price.

The company was organized in February, 1959 under Indiana law and is qualified to transact business in Florida. It was organized for the purpose of acquiring and holding for possible appreciation real estate located in Naples, Fla. The real estate was conveyed to the company by Gallahue in consideration of the issuance to him of 104,589 shares of class A stock and 25,000 shares of class B stock, both of the par value of \$5 per share, representing all but 1,000 shares of class A stock of the issued and outstanding shares.

Net proceeds of the company's sale of the additional 35,000 class A shares will be used for the payment in full of the existing mortgage obligations of the company, amounting to \$152,900 at Nov. 30, and the payment of a loan from Gallahue in the amount of \$50,000. The remainder of the proceeds will be added to general funds and applied to liquidation of the remaining indebtedness of the company.

Heli-Coil Corp.—Acquisition—News—

Approval of the acquisition of the Grip Nut Co. of South Whitley, Ind., was announced on Dec. 17 by Eduard Baruch, President of Heli-

Coil. The announcement was made following formal approval of the acquisition by Heli-Coil stockholders at a meeting held in Danbury, Conn. A total of 78,750 shares of Heli-Coil common stock, par value \$1.00, will be exchanged for all of the outstanding stock of Grip Nut.

In reviewing the progress of the company during the past year, Mr. Baruch cited several new applications of Heli-Coil inserts in the rare metal fields. Most significant is with the Brush Beryllium Co. of Cleveland, Ohio, who have been experimenting with Beryllium for the McDonnell Aircraft Co. on rockets for Project Mercury.

Mr. Baruch further announced that the stockholders approved a two-for-one split, effectuated through a stock dividend to be payable one week after the effective date of Amendments to the Certificate of Incorporation to all Heli-Coil stockholders of record at the close of business on Dec. 15.

Grip Nut Co. was founded in 1904 and has operated since that time as a closely-held corporation. Grip Nut produces a complete line of specialty fasteners including lock nuts, weld nuts and clinch nuts at its plant at South Whitley, Ind. It holds many patents in the fields of lock nut design and manufacturing methods.

For its fiscal year ending Sept. 30, 1959, Grip Nut had sales and other income of \$3,801,284 and earned \$380,833 after taxes. Heli-Coil Corp. had sales and other income of \$4,230,837 and net income of \$675,082 after taxes for the 12 months ended Oct. 31, 1959, on a pro forma basis.—V. 190, p. 2140.

Hinsdale Raceways, Inc.—Stop Order Lifted—

The Securities and Exchange Commission has lifted the "stop order" which suspended the registration statement filed by Hinsdale Raceway, Inc., Hinsdale, N. H.

The company's registration statement originally proposed the public offering of voting trust certificates for 1,000,000 shares of Hinsdale common stock and underlying 1,000,000 shares and \$1,000,000 of 6% debenture notes. In a decision and order issued Oct. 1, 1959, suspending its effectiveness, the Commission ruled that the registration statement and prospectus contained false and misleading statements and omitted required informational disclosures. The registration statement has now been amended to correct deficiencies reflected in the stop order decision and the Commission has lifted the stop order.

The amended registration statement relates to a proposed public offering of certificates for the 1,000,000 shares of Hinsdale stock, 290,730 shares of stock, and 712 10-year debenture notes (\$500 face value, 6%). The company was formed in April 1958 for the purpose of conducting night harness racing in New Hampshire at a track near the town of Hinsdale. Proceeds of the financing are to be used for payment of balances due on 1959 construction costs, payment of mortgage notes, and bank and insurance loans, unpaid management fees, fees and expenses of registering securities and to provide working capital.

In its earlier decision, the Commission ruled that the Hinsdale registration statement and prospectus were materially deficient in their disclosures with respect to the company's business and properties, the speculative features of the offering, the intended use of the proceeds of the sale of securities, the company's financial statements, and other matters.—V. 190, p. 1523.

Hayden B. Kline, President of this Cleveland corporation, announced on Dec. 21 that the board of directors had approved a plan for the combination of Industrial Rayon and Texas Butadiene & Chemical Corp. The combination will take the form of an acquisition of Texas Butadiene by Industrial Rayon for approximately 1,675,000 shares of common stock of Industrial Rayon. Industrial Rayon has 1,851,255 shares of common stock presently outstanding.

Mr. Kline will become Chairman of the Board of Directors and John Fennebreque, President of Texas Butadiene will become President and Chief Executive Officer of the combined company.

A meeting of stockholders of Industrial Rayon to pass to the proposal will be called early in 1960.—V. 190, p. 1629.

(F. L.) Jacobs Co.—Stock Ban Lifted—

The SEC announced on Dec. 17 that it would not issue further orders under the Securities Exchange Act of 1934 for the temporary suspension of trading in the common stock of this Detroit company.

The last ten-day suspension order expired at the close of business Dec. 17. Commencing Dec. 18, 1959, trading in Jacobs Co. stock in the over-the-counter market was resumed. Trading in the shares on the New York Stock Exchange, where the stock is listed and registered and on the Detroit Stock Exchange, where it is admitted to unlisted trading privileges, is dependent upon the lifting of the trading suspension by the Exchanges.

Proceedings are still pending before the Commission under the Securities Exchange Act to determine whether Jacobs Co. violated the reporting and disclosure requirements of that act and, if so, whether the Commission should order the withdrawal of its stock from listing and registration on the New York Stock Exchange. The hearing therein is now scheduled for Jan. 18, 1960.

Jacobs Co. is undergoing reorganization pursuant to Chapter X of the Bankruptcy Act in the U. S. District Court in Detroit. Trustees of the debtor, through their counsel, requested that resumption of trading in Jacobs Co. stock in the over-the-counter market be permitted before the close of the year 1959 so that shareholders who wish to do so may effect sales for tax or other purposes. The Commission concluded that this was appropriate in light of the nature and extent of financial and other information concerning Jacobs Co. which was recently published and mailed to shareholders by the Trustees.—V. 190, p. 1630.

Kaiser Steel Corp.—Seeks Strike End—

United Steelworkers of America and the corporation announced on Dec. 22 the formation of a joint six-man committee with responsibility

for finding solutions to the work practices issue which has been a major stumbling-block in the industry-wide steel negotiations. The new committee to study problems resulting from "automation, technological change and local working conditions" was announced by Charles J. Smith, District Director of United Steelworkers of America, AFL-CIO and Jack L. Ashby, Kaiser President.

This plant-level committee was created by the agreement signed by the union and the company on Oct. 26, 1959. The group will hold its first meeting early in January to study mutually satisfactory solutions to work practice problems. The committee is charged to "apply themselves conscientiously to these problems to the end of achieving continued economic progress."

The committee represents a new approach to labor-management relations and is seen by both parties as a major step toward the solution of work practice problems in an atmosphere of mutual goodwill. It will function as needed but will not become involved in any way in the handling of grievances under the grievance procedure provided for in the contract.

This is the second committee to be named by the company and the union in recent weeks. As an outgrowth of the same labor agreement, a long-range committee was announced Dec. 9, 1959, to recommend ways of sharing the company's future economic progress equitably among stockholders, employees, and the public. In addition to representatives of the company and the union, this earlier announced committee includes three nationally prominent labor relations authorities.—V. 190, p. 2241.

Lease Plan International Corp.—Forms Sub.—News.

Formation of a wholly-owned subsidiary, LPI Leasing Corporation, to specialize in industrial equipment financing is announced by Lease Plan International Corp., one of the biggest firms in the finance leasing field. The new company has already received contracts totaling approximately one-half million dollars from Leibmann Breweries, Inc., according to H. L. Meckler, President of both the parent firm and the subsidiary.

Mr. Meckler said LPI Leasing will deal with non-mobile equipment, such as production machinery, air conditioners and computers, "and places no floor under the size of its contracts." Lease Plan International contracts, on the other hand, involve mobile fleets with a minimum value of about \$100,000.

"With the new subsidiary the LPI organization now offers a fully rounded service that includes finance leasing, truck rental, contract carriage, purchasing and marketing and now industrial equipment," Mr. Meckler said.

Nine contracts negotiated by LPI itself in recent weeks were disclosed by Mr. Meckler. They include finance leasing, contract carriage and purchasing-marketing agreements, which, excluding LPI Leasing's new business, represent an additional million-dollar annual volume, he said.

One is an exclusive contract carriage agreement with CBS for hauling television scenery and props in New York City. LPI is already serving NBC in the same way, Mr. Meckler said.

The nine contracts also include augmented finance leases for Cleveland Electric Illuminating Co. and Tintex division of Schenley, equipment purchasing and marketing services for Gulf Oil Co., and the Gardner-Denver Co., and contract carriage service augmenting existing business for Grand Union.—V. 190, p. 2041.

Magellan Petroleum Corp.—Activities—

Importance of the rapidly accelerating oil search in Australia, which is being pressed by major and leading independent United States and foreign oil companies, was emphasized in a stockholder report released on Dec. 23 by the Brisbane, Australia, based corporation, international oil exploration and development company active in Australia and many other world areas.

The report from the President of the A. S. E.-listed company, Benjamin W. Heath, pointed out that Australia's expanding economy and high per capita ownership of automobiles have resulted in a 30% increase in that nation's crude oil needs over the past four years. Estimating Australia's crude requirements in excess of 200,000 barrels daily, the report also directed attention to the fact that, with nearly two-thirds of Australia's population of 11 millions concentrated in five major cities, a substantial market exists for potential domestic natural gas discoveries.

Magellan, a Panamanian corporation, holds two concessions in Australia of 3,200,000 and 27,000,000 acres, respectively. Both lie within the Great Artesian Basin which, the report added, has recently attracted such widespread industry attention that all desirable acreage is now held under lease.

Summarizing Magellan's activities in Australia since issuance of its last progress report to its 22,000-odd stockholders in July, the company reported that data collected as a result of a 30,000 square mile aerial magnetometer survey earlier this year, are now being studied.

Referring to the interest which Magellan has in Canada Southern Petroleum Ltd. acreage in the Northwest Territories, (Canada) the report stated that as a result of a farmout agreement concluded last July with Signal Oil & Gas, Home Oil Co., Kern County Land, Alminex and United Oils, drilling equipment is being moved in and set up at two sites on the 1,200,000-acre concession. The report stated that these wells will be drilled on a 250,000-acre seismic structure, the largest known to have been mapped in the sedimentary basin of Western Canada, east of the Rockies. It was explained that an earlier than usual freeze-up had enabled the operator to proceed with drilling plans ahead of schedule. This fact, it was pointed out, could make possible the drilling of as many as five wells before the Spring thaws set in.

It was reported, further, that Magellan, directly and through its subsidiaries, now has interests varying from 25% to 50% in 903,366 acres in the Peten Basin of Guatemala, with like interests in an additional 139,201 acres on which applications are pending.

Mercast Corp.—Subs. In Merger—

According to plans announced Dec. 21 by Floyd B. Odum, Chairman of Atlas Corp., and Rawson L. Wood, President of Arwood Precision Casting Corp., it has been agreed in principle that two subsidiaries of the Mercast Corp. will merge with the Arwood Precision Casting Corp., to form the new Arwood Corporation. Atlas Corp. is the principal stockholder of Mercast. The new Arwood Corp. would have had combined assets in excess of \$4,500,000 in 1959 and plants in California, Connecticut, New Hampshire, New York and Ohio with precision castings sales of approximately \$10,000,000 in that year.

According to merger plans already approved by the boards of directors of Mercast and Arwood, and slated for action by Arwood stockholders early in January, Mercast will receive 20% of the new common stock of Arwood plus an undisclosed amount of notes in exchange for the entire stock of Mercast's wholly-owned subsidiaries, Mercast Manufacturing Corp. and Alloy Precision Castings Co. In addition to this debt and shareholding in the new merged company, Mercast will continue to hold the basic Mercast patents and receive royalties from Arwood as a licensee as well as from Thompson Ramo Wooldridge, Inc. Mercast will also hold approximately \$300,000 of convertible notes of the Summers Gyroscope Co. and 100% of the stock of Gray & Hulegard, a concern which is showing a rapid expansion in several phases of the missile electronics business. Due to the proposed change in character of the business, the directors are considering a change in the name of Mercast.

Mr. Odum explained that Mercast will obtain a substantial position in a corporation that has an excellent growth record. Mr. Wood, a former chairman of the Council of Profit-sharing Industries, stated that, "By offering the Mercast process plus Arwood investment and shell castings, the new company will have the most complete line of precision castings in the industry."

Arwood Corp. will have its main offices at 321 West 44th Street, New York City, and will be under the general direction of the present Arwood Precision management. The new company will be able to supply both ferrous and non-ferrous castings ranging from a fraction of an ounce to over a hundred pounds.

Arwood has long been active in the small and medium size casting field using the lost wax (and plastic) method. A recent development has been the perfecting of a shell process for intermediate size castings. Mercast and Alloy Precision have been prominent in larger castings using the patented frozen mercury process.

The new company will have seven major divisions—foundries in Tilton, N. H.; Groton, Conn.; Brooklyn, N. Y.; and Los Angeles, Calif., for conventional investment and shell castings; a foundry in La Verne, Calif., for frozen mercury and shell castings, and a large central tool shop and research laboratory in Brooklyn, N. Y.—V. 190, p. 1181.

Minneapolis-Honeywell Regulator Co. — V.-P. Sees More Electronics Spending—

The increased complexity of weapons systems and the challenge of space are expected to give the electronics industry a bigger share of the government's military and space dollars in 1960, according to Stephen F. Keating, Vice-President in charge of Minneapolis-Honeywell's Military Products Group.

"Although we do not look for substantial increases in the federal budgets for defense and space," Keating said, "it is apparent that more money must be spent for research, development and production of electronic components and systems."

"At the present time," he noted, "electronics accounts for approximately 20% of the military equipment dollar, compared with 10% at the time of Korea. The coming year will probably show an increase to more than 25%."

During 1959 military and space spending for electronics amounted to a little over \$4 billion, and in the coming year this figure is expected to increase by \$1 billion or more, the Honeywell executive said. He said his forecast was based on the fact that advances in weapon

systems complexity depend on electronics to a point that more than compensates for decreased volume, and on the fact that electronics equipment is a major part of any space program.

Keating cautioned, however, that the changing nature of the business will cause unsettled conditions in the military electronics industry, with "significant fluctuations" in the fortunes of many companies.

He said the shift from aircraft to missiles and space vehicles and from volume production to highly specialized systems development will continue and its effects will become more pronounced.—V. 190, p. 1837.
