Aluminum Co. of America — Reports Auto Use in Uptrend—

America's auto makers, using more aluminum at a faster clip than ever before, now require a million pounds of the light metal daily, Alcoa reported last week.

The company's fifth annual industry-wide survey discloses that cars bearing 1960 model numbers continue a trend evident during the past decade. This year's cars will require 81 million pounds more aluminum than their 1959 counterparts. About half of this increase results from greater aluminum usage, half from increased auto production.—V. 190, p. 1518.

Airfreight ran almost 10% above a year ago, to 103,231,000 revenue ton miles, the first time that a domestic airline had topped 100 million ton miles in scheduled service.

Airmail ton miles increased more than 11% to 20,130,000 ton miles, while regular first-class mail, moving by air over certain routes on a continuing Post Office experiment, climbed about 9% to 2,559,000 ton miles. Anheuser-Busch, Inc.—Sales Set Record—

August A. Busch, Jr., President, told his board of directors in Tampa, Fla., on Jan. 9 that 1959 was the biggest year in the company's 108-year history.

The meeting took place during the annual sales convention of the St. Louis, Mo.-based brewery, attended by approximately 400 of the company's regional and district sales officials.

Mr. Busch said sales in excess of eight million barrels of beer established a new record not only for Anheuser-Busch, but for any single brewery in the world.

Mr. Busch added that while complete industry figures had not yet been compiled, he estimated Anheuser-Busch sold about two million more barrels of beer in 1959 than its closest competitor. This was the fifth year Anheuser-Busch produced and sold more than six million barrels of beer, another new record for the industry.

Last year (1958), Anheuser-Busch also was the industry's leader, with 6,982,000 barrels sold. Sales in 1959 represent an increase of about 15% over 1958. The company markets Budweiser, Michelob, Busch Bavarian and Regal beers.

Mr. Busch also told the board of directors that signs for 1960 looked very good for sales. He warned, however, that the problem of rising costs was still one of the biggest the company must face.

"The cost of practically everything in our business is rising, and this means that every effort must be made by Anheuser-Busch to operate with the highest degree of efficiency and economy," Mr. Busch said.

Mr. Busch also said the company plans to expand its operations in the future to keep up with the increased volume of business and the potential in the brewing industry.

Recently the company had announced it had taken an option on 50 acres of land in Houston. No immediate plans for Houston were disclosed.

Mr. Busch also said the board had voted to postpone listing the company's stock on the New York Stock Exchange.—V. 188, p. 2738.

Arkansas Louisiana Gas Co.—Dirs. Approve Merger—

The Boards of Directors of this company and Consolidated Gas Utilities Corp. approved in principle on Jan. 8 the proposed merger of Consolidated into Arkansas, subject to the approval of the stockholders of each company and the approval, to the extent required, by regulatory agencies having jurisdiction. If the merger is approved, stockholders of Consolidated will receive for each one share of Consolidated stock one share of a new class of cumulative convertible preference stock of Arkansas, carrying an annual dividend of 90 cents, which for two years from the date of issuance will be convertible into three-fourths of a share of common stock of Arkansas. The new preference stock shall be non-callable for the first two years and shall be callable thereafter at the option of the company at $23 per share.

The plan for merging the two companies contemplates that the facilities of Consolidated will continue to be operated by those now actively employed by that company, and that the present stockholders of Consolidated will be represented on the Board of Directors of the merged company.

Both companies operate integrated natural gas systems; that of Arkansas Louisiana serves approximately 280,000 customers in Arkansas, north Louisiana, and east Texas, and the Consolidated system serves in excess of 90,000 customers (some at wholesale) in Oklahoma and Kansas. Last year's projection for the comparable period was about five times larger. These data exclude tentative offering dates or periods but, of course, are subject to any last minute postponements. or the opposite, as well as withdrawals.

With the issuance of the recent municipal offerings of $102 million New York State Power Authority bonds and the previously postponed State of California $100 million bonds, this week's (Jan. 18-22) municipal calendar looks light in comparison. Nevertheless, it aggregates $126,217,000 and is five times larger than that for corporates. The succeeding two weeks of Jan. 25-Feb. 5, however, now have offerings listed aggregating about $75 million, which includes the Montreal Metropolitan Corp. $30 million debenture of Jan. 26. A tentative scheduling of $15 million Province of New Brunswick for the end of January would still, if it went through, leave the two-week total below that for the first week of the four-week period surveyed. The four-week slate is considerably strengthened in the last week (Feb. 9) by $102.8 million PHA's and $10 million Washington Suburban Sanitary District, Md. bonds. As a result, the four-week municipal projection (including the Montreal Metropolitan Corp. and excluding the Province of New Brunswick, since no specific date is at hand at the time of this writing) comes to $287,435,000. Last week's estimate was $516,060,000 for municipal issues of $1 million or more. This drop in offerings should not be construed as indicative of the pace for 1960, according to the plethora of forecasts made that 1960 will exceed the record high achieved in 1959.

Total corporate and municipal financing in the week ahead amounts to $151,352,000 and the four-week total for both types of financing is $439,585,000.

LARGER ISSUES SLATED

Among the larger issues coming up are: Jan. 19—200,000 shares of Kansas Gas & Electric Co., and $7.5 million Louisiana Gas Service Co. bonds; Jan. 20—there are in municipals $10 million City of Sacramento Unified School District, Calif, $11,106,000 State of North Carolina, $15 million State of Louisiana, and $28 million State of Washington; Jan. 25—$25 million General Acceptance Corp. debentures; Jan. 26—$20 million Home Oil Co., Ltd. debentures, $30 million Montreal Metropolitan Corp. debentures, and $30 million Southern California Edison Co. bonds; Jan. 27—$9,800,000 Houston, Texas; Feb. 4—$22 million New York City bonds; and Feb. 9—the $102 million PHA's and the $10 million Washington Suburban Sanitary District, Md., mentioned above.

DOLLAR TOTALS WITH TENTATIVE OFFERING DATES

Corporate issues tentatively scheduled for the rest of January and for February, as well as those with set dates beyond the above four-week study, total slightly above $400 million. Thus, out of the total backlog of corporates from Jan. 18 on, there is reasonable expectation that the market will be tapped for about $518 million. The addition of municipals brings this up to approximately $800 million.

The data on corporate and municipal financing are obtained by the *Chronicle* from private and public sources and are recapitulated in the table below for the forthcoming four weeks.—S. B.

FRASER

Century Chemical Corp.—Forecast—Finances—

Formed in 1958 with a capitalization of $350,000, this company on Jan. 12 reports gross annual sales of some $10,000,000, according to President Theodore S. Hodgins. He added that he "expects to double gross sales to $20,000,000 by the end of the year."

Since its formation, Century has taken over Wilson Organic Chemicals, Sayreville, New Jersey; Chemo Puro Manufacturing Corp., Oil & Chemical Terminals, Inc., and the Asphalt Division of Oil & Chemical Products, Inc., all of Newark; plus Chemo Puro AG, a European sales organization with headquarters in Zurich and offices in Amsterdam, Hamburg, and Florence, Mr. Hodgins reported. Each subsidiary (Asphalt is a division of Century) implements one or more phases of Century's operations.

Originally launched by private financing, subsequent expansion included a stock issue of some $300,000 placed on the market on June 25, 1959, representing 5% of the authorized capital. Stock is now held by some 500 stockholders in 43 States. Century has since secured additional capital through private placement, entirely outside the chemical industry. Subsequent expansion is expected to be financed, in part, through expanded sales.

Sales of Chemo Puro increased 5% during the month of December, the company's first month as a Century subsidiary.—V. 190, p. 48.

Chesapeake & Potomac Telephone Co. of Md.—Debentures Offered—

The First Boston Corp. and Merrill Lynch, Pierce, Fenner & Smith Inc. head an underwriting group which offered for public sale on Jan. 13 a new issue of $25,000,000 of 36-year 5¼% debentures of The Chesapeake and Potomac Telephone Co. of Maryland. The debentures, due Jan. 1, 1996, are priced at 101% and accrued interest to yield approximately 5.19% to maturity. The issue was awarded to the group at a competitive sale on Jan. 12 on its bid of 100.27% which named the 5¼% coupon.

OTHER BIDS—Halsey, Stuart & Co., Inc., bid 100.07 for the debentures also as 5¼s. Bids on a 5⅜% coupon came from Morgan Stanley & Co., 101.70999, and from White, Weld & Co., 101.389.

PROCEEDS—The company, a wholly-owned subsidiary of American Telephone and Telegraph Co., will apply the proceeds of the sale to the repayment of advances from the parent company. These are expected to exceed $25,000,000 at the time the proceeds are received.

REDEMPTION—The new bonds are redeemable at 107% to and including Dec. 31, 1960 and thereafter at prices decreasing to the principal amount after Jan. 1, 1991.

CAPITALIZATION—Capitalization of the company outstanding at Sept. 30, 1959 consisted of $55,000,000 of long-term deebentures and 2,050,000 shares of common stock at $100 par value. In October, 1959 the par value of the common stock was changed from $100 to $20 per share, and the outstanding shares were correspondingly increased. On Dec. 31, 1959, the company sold an additional 1,000,000 shares of common stock at par, $20 per share, to its parent company to apply toward repayment of advances.

BUSINESS—The company's service territory is in Maryland with nearly 57% of its 1,216,000 telephones operating in the city of Baltimore, and adjacent territory. About 24% of the company's telephones are in the counties of Prince Georges and Montgomery in the Washington area.

REVENUES—For the nine months ended Sept. 30, 1959 the company reported total operating revenues of $99,191,486 and total income before interest deductions of $16,279,900 compared with $91,026,186 and $14,457,414 in the like period of 1958 and $123,173,281 and $20,030,750 for the 1958 calendar year.

Cities Service Co.—Sub. Leads Research Project—

The most comprehensive research project ever undertaken to release liquid hydrocarbons from the Athabasca oil sands of northern Alberta was announced on Jan. 15 coincident with the formation of a four-company partnership to carry forward the enterprise.

The four companies are Imperial Oil Limited, Cities Service Athabasca, Inc., a subsidiary of Cities Service Co., which will operate the project, Richfield Oil Corp. of Los Angeles, and Royalite Oil Co., Ltd.

Imperial, Cities Service and Richfield will each hold a 30% interest in the partnership. Royalite's interest will be 10%.

The Athabasca oil sands comprize the world's largest known reserves of hydrocarbons. They are located some 300 miles north of Edmonton along the banks of the Athabasca River. Areas in which these sands are at or near the surface contain in excess of 40 billion barrels of recoverable oil, about the same amount as the proved crude oil reserves of North America. In other areas, these sands, deeper under the surface and with varying depths of overburden, contain vast additional reserves.

Existence of tremendous hydrocarbon deposits along the Athabasca River has been known to petroleum scientists for many decades. Many unsuccessful efforts have been made to separate oil from the sands on a basis which would be commercially competitive with other means of producing oil. The new partnership believes the problems can be solved by new techniques.

Research activities have been carried on individually by the partners for several years, searching for a method of extraction of oil from the Athabasca sands on a commercially feasible basis. The present research program was begun two years ago by Cities Service. Subsequently, a $3,500,000 pilot plant was built at Mildred Lake, roughly 30 miles north of McMurray.

The plant includes a 3,000-barrel-per-day distillation unit, extensive separation equipment and numerous collateral facilities. A unique mining "wheel," which has proved highly successful in the surface mining of coal in Europe, strips the sand from the surface. In the Athabasca project, the sands are put through a series of processes which remove the oil and return clean white sand to the mined areas.

As operator of the project, Cities Service Athabasca, Inc., has established headquarters in Edmonton. President of this subsidiary is A. P. Frame, Senior Vice-President of Cities Service Co. Lee N. Haugen, for many years a leading Cities Service executive in refinery construction and operation and recently Vice-President in charge of research, will be Vice-President and General Manager, with headquarters in Mildred Lake and Edmonton.—V. 190, p. 152.

Clinton Engines Corp.—Registers With SEC—

This corporation, of 250 Park Avenue, New York, filed a registration statement with the SEC on Jan. 11 covering 350,000 shares of common stock, to be offered for public sale through an underwriting group headed by Bear, Stearns & Co. and H. M. Byllesby and Co., Inc. The public offering price and underwriting terms are to be supplied by amendment.

The registration statement also includes 25,000 additional shares under five-year option to the managing underwriters, which options were acquired at 10c per optioned share and are exercisable at the public offering price, together with an additional 86,000 outstanding shares which may be sold from time to time in the future by the present holders thereof.

Clinton is primarily engaged in the manufacture and sale of small general purpose air-cooled gasoline engines; and it also manufactures and sells chain saws and air-cooled outboard motors. It has outstanding 973,990 common shares and certain indebtedness. Net proceeds of the sale of additional stock will be applied to the reduction or retirement in full of indebtedness aggregating $3,260,000 and owing to Walter E. Heller & Co. If such proceeds are not sufficient to effect such retirement in full, a bank has agreed to extend a short-term loan up to the amount of $500,000 to enable the company to effect such retirement. Any excess of proceeds over the amount required for such retirement will be used for general corporate purposes.

The prospectus lists eight selling stockholders, none of whom is an officer or director of the company.—V. 190, p. 868.

Collins & Aikman Corp.—Sales, Net Up—

Net sales of this maufacturer of fabrics and yarns for the first nine months of the current fiscal year, the period ended Nov. 28, 1959, totaled $36,368,543, compared with $32,741,357 in the corresponding 1958 period, a gain of approximately 11%, Ellis Leach, President, announced Jan. 14.

Income from operations for the period was $2,013,549 as against $1,162,649 last year. Net income after taxes for the nine months ended Nov. 28, 1959 amounted to $944,549 compared with $684,180, including proceeds from life insurance in the comparable period of the previous year. This was equivalent to $1.82 per share of common stock compared to $1.31 per share a year earlier, based on 520,400 shares now outstanding.

Net sales in the third quarter totaled $12,947,286, compared with $13,058,653 a year earlier. Reflecting the effects of the steel strike, net income after taxes totaled $298,818 against $389,810.

Now that the steel strike is ended, "sales and results for the balance of our fiscal year should be satisfactory," Mr. Leach said. 'Modernization of our yarn division by the installation of new equipment is moving along satisfactorily. This program will consolidate our yarn production in one modern spinning plant at Norwood, N. C., and should materially contribute to our results during our next fiscal year."—V. 190, p. 1417.

Colorado Interstate Gas Co.—Files Thrift Plan—Rate Refunds—

This company of Colorado Springs, Colo., filed a registration statement with the SEC on Jan. 6, 1960, covering $1,250,000 of contributions by Participating Employees under its Thrift Plan, together with 28,090 shares of common stock which might be acquired pursuant thereto.

The Federal Power Commission has approved a proposed settlement agreement under which Colorado Interstate Gas Co., of Colorado Springs, Colo., will refund $5,377,885, plus interest of $119,750, to its wholesale natural gas customers for the period from Feb. 5, 1958, through Dec. 31, 1958. Additional interest will be paid from Jan. 1, 1959 to the date of refund.

The settlement also provides that the company must file new and lower rates, to be effective retroactively to Jan. 1, 1959, and make refund with interest of excess charges collected in 1959. The settlement agreement did not contain any estimate of the total dollar amount of the refunds to be made for this period.

The settlement terminates a proceeding involving a proposed $2,540,000 annual rate increase by Colorado, effective subject to refund since Feb. 5, 1958, after being suspended by an FPC order issued Oct. 18, 1957. This proposed $2,540,000 increase was in addition to rate increases totaling $23 million which were settled in 1958 and thus was in addition to the higher rates in prior dockets. The refunds represent the difference between this proposed increase plus the higher rates in the three proceedings and the rates agreed to in the settlement.

In approving the settlement, however, the FPC suspended a proposed change in Colorado's form of rate from a peak demand basis to a contract demand basis. The company filed this proposed rate form change with the FPC last September, together with a proposed $4,500,000 annual reduction in its wholesale rates. Since the settlement will produce rates lower than those proposed in the September filing, the only remaining issue is the proposed change in rate form.

The settlement was agreed to by all of Colorado's jurisdictional resale customers which would have been affected by the company's $2,540,000 annual increase, and by all the principal intervenors in that proceeding. Colorado serves 14 wholesale customers in Colorado, Oklahoma, New Mexico, Texas, and Wyoming. The FPC's staff also concurred in the terms of the settlement.

The Commission's order requires that Colorado complete the refunds within 30 days, and also that any jurisdictional revenues collected by the company in 1959 which are in excess of a 6% rate of return must be refunded in a manner agreed upon by all parties. The settlement also provides for Colorado to pass on to its customers any refunds it may receive from its gas suppliers for the Feb. 5, 1958-Dec. 31, 1959 period.—V. 189, p. 1792.

Community Investment Corp., Lawrence, Mass.—Files With Securities and Exchange Commission—

The corporation on Dec. 30 filed a letter of notification with the SEC covering $295,000 of debentures, 8% series, due 1974 to be offered at face amount in denominations of $500 each, without underwriting.

The proceeds are to be used for loans to its subsidiaries and working capital.

Consolidated Edison Co. of New York, Inc.—$60,000,000 Preferred Filing—

The company announced that it filed a petition with the Public Service Commission on Jan. 15 seeking approval for the sale of a new series of preferred stock aggregating 600,000 shares or $60 million aggregate par value.

The proposed issue will be designated cumulative preferred stock, 5¾%, series A, of $100 par value per share and will rank pari passu with the outstanding $5 cumulative preferred.

Charles B. Delafield, Consolidated Edison finance Vice-President, said arrangements were completed on Jan. 14 through The First Boston Corp. for the direct placement of the new preferred with seven large institutional investors.

Mr. Delafield said that the sale of the new preferred would provide part of the equity capital essential to the orderly financing of the company's expansion program now estimated to total $1,200,000,000 for the five years through 1964.—V. 190, p. 2340.

Consolidated Foods Corp.—Net Up 33%—News—

This Chicago food processor and distributor reported net earnings of $3,113,610 for the 24 weeks ended Dec. 12, 1959, compared with earnings of $2,334,039 for the same period a year ago, an increase of 33%. The report of earnings issued Jan. 13 by S. M. Kennedy, President, also stated that sales for the 24 weeks equaled $191,417,738, a 23% increase over the previous year's sales of $155,866,292 for the similar 24 weeks.

Earnings per common share for the 24 weeks amounted to 98 cents compared with earnings of 76 cents per share a year earlier, after adjusting for the 5% stock dividend paid on Oct. 15, 1959. As of Dec. 12, 1959, there were 3,173,453 shares outstanding. A year ago 2,786,304 shares were outstanding. The increase in outstanding shares has resulted from the full conversion of the preferred stock and the shares issued for the 5% stock dividend.

"The improvement in sales and earnings is reflected throughout the divisions of Consolidated Foods," Mr. Kennedy said. "This has been especially true of our Sara Lee subsidiary. The gratifying public acceptance of our new Sara Lee products and constantly increasing demand for those previously introduced, has led us to revise our estimate of Sara Lee sales in the fiscal year ending June 30 to close to $25,000,000 compared with $15,500,000 the previous years."

Mr. Kennedy said that overall retail volume of Consolidated Foods was up 70%, including the Lawson Milk Division which was acquired on Dec. 31, 1958.

The corporation now operates 98 super markets under the Piggly Wiggly name in Illinois, Iowa, Wisconsin and Minnesota, compared with 74 stores a year ago. Lawson operates 215 stores compared with 173 when Consolidated acquired that division a year ago.

A further entry into the retail field has just been consummated with the acquisition of May's Drug Stores, Inc., headquartered in Cedar Rapids, Iowa. It is planned to expand these stores in the same area served by Consolidated's Piggly Wiggly group.—V. 191, p. 100.

Consolidated Natural Gas Co.—Registers With SEC—

Consolidated proposes to issue and sell by competitive bidding $25,000,000 principal amount of debentures due Feb. 1, 1985. The interest rate (to be a multiple of ⅛ of 1%) and the price to be paid to Consolidated (to be not less than 98½% nor more than 101½% of the principal amount thereof, exclusive of accrued interest) will be determined by the bidding. The debentures will be issued as the third series under the indenture dated as of June 1, 1957 between Consolidated and The Chase Manhattan Bank, as Trustee, as supplemented by a First Supplemental Indenture dated Sept. 1, 1957 and as to be further supplemented by a Second Supplemental Indenture to be dated as of Feb. 1, 1960.

The proceeds from the proposed sale of debentures will be used by Consolidated to repay a short-term construction bank loan of $10,000,000 which was obtained in 1959 and $15,000,000 will be used to finance in part the 1960 construction programs of the subsidiaries, estimated to aggregate $64,500,000. Consolidated contemplates the temporary financing of the balance of the subsidiaries' 1960 capital requirements by means of a one year bank loan, which will be the subject of a subsequent filing, and with funds generated from internal sources. Until construction funds are required by the subsidiaries Consolidated proposes to use, temporarily, a portion of the proceeds from the above sale of debentures to reduce its outstanding seasonal gas storage bank loan in anticipation of companion loan repayments by the subsidiaries and to make short-term investments in U. S. Treasury bills.

The fees and expenses to be incurred in connection with the proposed transactions are estimated to aggregate $100,000, and include printing costs of $41,000; trustee's charges of $5,000; legal fee of trustee's counsel $1,000; accountants' fees and expenses $6,000; engineering fees and expenses of $10,000; original issue tax of $27,500 and miscellaneous expenses of $3,925.—V. 189, pp. 2781 and 2672.

Electro-Voice, Inc.—Net Down—

Albert Kahn, President of Electro-Voice, Inc., Buchanan, Mich., stated on Jan. 8 in his report to shareholders for the nine months ended Nov. 30, 1959, that sales were $7,738,375 compared with $8,493,419 for the same period last year. Net earnings were $167,792 compared with $415,826 a year ago.

"Despite holding or improving our industry position in every major product line," stated Mr. Kahn, "our shipments were reduced by 8.9% due to many factors influencing the electro-acoustic industry this year. Concurrent with this reduction of billing, we have embarked on a heavy developmental program, which is further reducing profits. We believe, however, that this will substantially increase our volume and earnings in 1960."

Mr. Kahn also stated that the company's annual report will outline these new major products which will be in production next year. —V. 190, p. 1833.

Ford dealers delivered almost 1½ million cars in 1959, a 469,700 unit increase over the previous year.

Sales of the Falcon since its introduction Oct. 8 through the end of the year reached more than 1,000 a day.

Sales of Ford trucks in 1959 topped the 300,000 mark, up 39% over the previous year.

Ford led its nearest competitor in car sales for the year just ended by a substantial margin.

Ford is utilizing a heavy overtime schedule to produce a record number of cars and trucks in the first quarter of 1960.

Mr. Wright said that Ford's record share of the domestic market for 1959 represented an increase of 3.3 "penetration points" over the previous year.

The Ford executive also pointed out that, despite the steel shortage, the Division's sales for 1959 were second only to 1955, the industry's record year.—V. 191, p. 101.

General Dynamics Corp.—New Process—

The first successful conversion of heat directly into alternating current electricity in significant amounts, without use of rotating machinery or DC-AC converter, was reported on Jan. 12 by scientists of the corporation's General Atomic Division.

Prior to the announcement, direct current had been obtained from experimental thermoelectric devices in several of the country's research laboratories, but scientists had been unable to produce an appreciable quantity of alternating current. The utility companies require alternating current for home and most industrial uses.

Scientists at General Atomic Division's John Jay Hopkins Laboratory for Pure and Applied Science in San Diego, Calif., used a high temperature cesium cell converter in their successful experiments which produced sufficient alternating current to illuminate a series of small light bulbs. The cesium cell is one of several direct conversion methods under study at General Atomic.

The steadily expanding General Dynamics program of thermoelectric research, which has been underway since 1957, is partially supported by nine investor-owned utility companies of the western states. Eight of the companies are members of the Rocky Mountain-Pacific Nuclear Research Group. The other is the San Diego Gas & Electric Co.

Member companies of the Rocky Mountain-Pacific Group are: Arizona Public Service Co., California Electric Power Co., Pacific Power & Light Co., Portland General Electric Co., Public Service Co. of Colorado, Public Service Co. of New Mexico, Utah Power & Light Co., and Washington Water Power Co.

Dr. Frederic de Hoffmann, Senior Vice-President of the corporation and President of General Atomic Division said: "This discovery brightens the prospects that direct conversion equipment, including the cesium cell, may eventually be used in future generations of power plants instead of steam boilers, turbines and generators. It may prove possible, in future plants, to bring about reductions in both the capital and operating costs of electric power generation through the use of simpler and more compact equipment."

"However, a great amount of research and development work lies ahead of us before we can begin to speak of large-scale commercial applications of direct conversion of heat into electricity.

The electric generating industry in the United States long ago generally abandoned the production of direct current power because alternating current—at high voltages—is required for efficient transmission. Direct current must be converted to alternating current before it has widespread commercial value.

Dr. de Hoffman said General Dynamics has a particular interest in thermoelectric power because of the corporation's role in the development of advanced, high temperature nuclear reactor systems.

"High temperature reactors are eminently suited to exploit the potential of high temperature thermoelectric direct conversion, as exhibited by the cesium cell," he explained.—V. 191, p. 102.

General Foam Corp.—Registers With SEC—

This corporation, of 640 West 134 St., New York, on Jan. 7 filed a registration statement with the SEC covering 175,000 shares of common stock, to be offered for public sale at $4 per share. The offering is to be made on a best efforts basis by Brand, Grumet & Seigel, Inc., and Arnold Malkan & Co., Inc., for which a 40c per share selling commission is to be paid. The underwriters also will receive, if all the shares are sold, five-year options to purchase an additional 32,000 common shares at $4 per share, which shares also are included in the registration statement. The two underwriters or their affiliates have purchased for investment an additional 15,000 shares from certain stockholders at $1 per share. An additional 5,000 shares were purchased by two other individuals from the stockholders at 50 cents per share. These additional 20,000 shares also are included in the registration statement.

The company in December, 1959 acquired all the outstanding stock of the Schwab Rubber Co., Inc., and The Schwab Latex Co., Inc., which subsidiaries were under common ownership and management with the company. The company and subsidiaries have been principally engaged in the business of purchasing, processing and distributing foam rubber and synthetic foam products. It also expects to engage in the business of manufacturing urethane and other synthetic foams. The company now has outstanding 197,000 common shares. It expects to apply the greater part of the proceeds of the sale of additional stock to financing the company's entry into the synthetic foam manufacturing business. The cost thereof will include a loan of about $90,000 to the company's lessor, The Greater Hazleton Community Area New Organization, Inc., which will construct for the company's occupancy a new building at an estimated cost of $500,000, to adjoin the present processing plant in Hazleton, Pa. Machinery and equipment to be installed in the new plant will cost about $215,000. With the proceeds the company also will apply $30,000 to cancellation of an indebtedness and $265,000 to general working capital. Of the outstanding stock, Alfred Schoen, President, owns 40% and he and other management officials 78.68%.

General Instrument Corp.—New Highs —

For the fiscal nine months ended Nov. 30, 1959, the corporation recorded net profits of $1,378,233, higher than in the entire fiscal year ended last Feb. 28 (when profits totalled $1,317,828); set an all-time sales record of $41,277,875 for the period; and entered the fourth quarter with a backlog of $33,238,000, highest in the electronics company's 37-year history, Board Chairman Martin H. Benedek reported on Jan. 12. For the three months ended Nov. 30, he stated, both pre-tax and net profits were the highest ever for any quarter in the company's history.

"With nine-month pre-tax earnings more than double those of the same 1958 period, profit-to-sales margins rose sharply," he said, "thanks to a more profitable product mix, leaning more strongly on semi-conductors and military equipment, while radio-TV component sales held firm." Semi-conductor sales for the nine months were more than double those in the same period last year and semi-conductor backlog, as of Nov. 30, was more than triple the year-earlier figure.

For the nine months ended Nov. 30, 1959, net sales were $41,277,875, up 20% from sales of $34,161,392 in the 1958 period. Earnings before Federal taxes were $2,991,433, an increase of 124% over pre-tax earnings of $1,335,600 in the comparable year-ago nine months. Net profits were $1,378,233, up 43% from the 1958-nine-month figure of $960,717. Per share earnings equalled 90 cents on 1,529,473 shares outstanding, compared with 70 cents on the lesser number of 1,373,273 shares in the 1958 nine months. (Reported earnings in the 1958 period also included tax benefits principally derived from the acquisition of Radio Receptor Co.)

For the three months ended Nov. 30, 1959, sales hit a new high of $15,896,621 for the quarter, topping last year's record of $15,085,325 by approximately 5%. Thanks largely to a more profitable product mix, pre-tax profits increased by 75% to $1,662,333, compared with $948,700 for the comparable 1968 quarter. Net profits for the quarter were $764,623, up 26% from the $606,240 earned in the comparable 1958 period. Per share earnings equalled 50 cents (on 1,529,473 shares) compared with 44 cents (on 1,373,273 shares).

The sales and earnings increases were all developed internally, Mr. Benedek stressed, and the figures do not include those of Harris Transducer Corp., producer of military and industrial ultrasonic and sonar equipment, which was acquired by General Instrument earlier this year.—V. 190, p. 1295.

Harvester proposes to offer shares of its stock in exchange for outstanding common shares of Solar Aircraft Co., at the rate of one share of Harvester stock for 2¼ shares of Solar stock. The offer is conditioned upon its acceptance by the holders of at least 80% of the outstanding Solar shares. On Dec. 31, 1959. Solar had outstanding 576,752 shares, plus options covering 26,767 additional shares.

Solar has two major manufacturing plants, one in San Diego and the other in Des Moines, the latter having been closed on Oct. 31, 1959. For many years the largest segment of Solar's business has been the design, development and manufacture of components and assemblies for reciprocating and jet aircraft engines and for other aircraft applications. Harvester seeks to acquire the shares of Solar in the belief that the gas turbine engines produced by Solar may be capable of successful adaptation as motive power for certain uses of many products of Harvester and that its research and development work is potentially useful in Harvester plants. Of particular interest is Solar's development of heat and corrosion resistant materials, its work with industrial coatings and its work in the electronics field "The association of Solar with Harvester," according to the prospectus "would be expected to contribute to future development of Solar's research and general growth, to the benefit of both companies." —V. 190, pp. 1296 and 2342.

The annual report will show income from sales and services has increased from $3,464,000 in 1958 to approximately $25,000,000 for the fiscal year ending Sept. 30, 1959. Net earnings are up sharply, with the consolidated figure expected to run in the neighborhood of approximately 57 cents per share on the 838,797 shares of common stock outstanding as of Sept. 30, 1959.

Three major acquisitions for the year—Photostat Corp., Rochester, N. Y.; the Flofilm Division of Diebold, Inc., Norwak, Conn.; and Vidya, Inc., Palo Alto, Calif.—have been successfully integrated and are operating profitably.

"In support of these divisions," President Leghorn said, "Itek, as the research-based parent corporation, was able to plow back an amount equivalent to 29 cents per share for each outstanding share of common stock at year-end into company-sponsored research programs directed toward producing new, or improving existing, product lines."

Leghorn also indicated that the present proportion of sales, currently running at an annual rate of $30,000,000, is approximately one-third defense to two-thirds commercial. "This represents a desirable balance between military and commercial business, giving stability to sales, and providing the extensive base needed for company-sponsored research in support of new product and systems development," he added.

Itek, formed in 1957, specializes in "Information Technology," or the creation of system concepts, equipment, supplies and services designed to enable management, military or civilian, to cope more effectively with the ever-increasing paper-handling, or information problems of business, as well as with the new and more complex administrative problems of industry and government in the space age.

Itek facilities in the Greater Boston area are located at 700 Commonwealth Avenue, Boston; 226 Crescent Street, Waltham; and Route 128, Waltham, Mass.—V. 190, p. 1296.

(D.) Kaltman & Co., Inc.—Sales, Net at Record High—

Earnings of the Jersey City, N. J., corporation rose 18% on a sales increase of approximately 2% during the fiscal year ended Sept. 30, 1959, it was stated by Albert Fisher, Jr., resident, in the annual report mailed to shareholders last week. Both sales and earnings set new high records for the 40-year old company, fifth largest full-line service wholesale druggist in the nation.

Sales for the year reached approximately $26,133,000, compared with the previous record of about $25,649,000 set in the year ended Sept. 30, 1958. Volume for the final three quarters showed an increase of almost 5%, more than offsetting a decline in the early months of the 1959 fiscal year.

Net income after taxes for the year ended Sept. 30, 1959 was $479,377, or 29.4 cents a share on the 1,632,513 shares outstanding at the year-end. In the preceding year, net income after taxes was $405,775, equal to 26.2 cents a share on the 1,549,618 shares outstanding. The increase in the number of shares during the year resulted from a 5% stock dividend paid in December 1958.

"The marked improvement in profit in the past fiscal year was due largely to tighter control over expenses," Mr. Fisher stated. Smaller inventory write-downs, improved collections of receivables and a stable total payroll despite higher wages were cited as factors contributing to the better profit margins.

Working capital rose during the year to $4,567,300 from $4,391,700 and net worth increased to $3,922,600 from $3,706,300.

The firm serves approximately 2,600 retail pharmacies through three divisions in New Jersey and one in New York City. Products sold include pharmaceuticals, proprietary products, toiletries, cosmetics and many other items sold in retail drug stores.

The majority of the common stock, traded on the American Stock Exchange, formerly was owned by Noma Lites, Inc., which sold its holding of 1,406,141 shares through a public offering in June 1959. —V. 190, p. 566.

This Huntington Station, L. I., N. Y., reinforced plastic producer of custom molded products, reports that 1959 was a successful year in which increasing Navy orders helped the corporation expand into a three-shift operation.

Other contracts for commercial and industrial products kept Lunn active in various fields, but their production was largely centered around marine components and in the construction of new vessels for the Navy in production quantities.

"In the past few months," H. T. Douglas, Vice-President said, "we have doubled our output and currently have in production several components for operational missiles. We have just completed the duplication of assembly tooling to enable us to accelerate deliveries on these critical components which call for extremely close tolerance and precision work. In addition to expanding our labor force to meet the urgent deliveries, we have also hired more supervisory personnel." —V. 190, p. 1422.

Metal & Thermit Corp.—Forecast—

President H. E. Martin stated on Jan. 7 that the ten-year projection upon which the company bases its long-range plans "indicates approximately $75,000,000 in sales in 1969 as compared with $40,000,000 estimated for 1959, and of course with corresponding (although perhaps not proportionate) rises in income and dividends."

Mr. Martin's estimate of $40,000,000 sales for 1959 compares with net sales of $38,282,290 reported for the 12 months ended Dec. 31, 1958.

Mr. Martin stated that this projected growth is based solely upon the company as it is now constituted and does not include any sales gains as a result of possible acquisitions.

However, he said that in addition to growth by research and development of products from the company's own laboratories, "we must grow by acquisition. This growth by acquisition has been slower than we would like to have it, but we believe the roadblocks that we have encountered are now behind us."

C. J. Beasley, Vice-President for Finance, reported that net earnings for 1959 will be in the vicinity of $2.10 per share on the slightly less than 800,000 common shares outstanding. This compares with a revised figure of $1.36 per share for 1958. He explained that a recent decision by management to revise its methods of recording depreciation had the effect of increasing 1958 earnings by approximately 24 cents a share from the $1.12 reported a year ago. The change also increased 1959 earnings by approximately 22 cents a share.

Although the company in the past has been largely identified with detinning and welding, sales are now divided roughly into one-third chemicals, metals and minerals; one-third welding products and one-third detinning.

Because the detinning operation is a conversion type of business, the sales figures of this division are affected by the prices of steel scrap and tin which fluctuate widely, whereas the profit comes from a conversion fee based on the tonnage handled, Mr. Beasley explained. He said that the tonnage handled can be expected to increase by approximately 4% a year. The real barometer of the company's growth, he said, is to be found in the sale of all other products which have increased from $17,500,000 in 1951 to approximately $27,000,000 in 1959.—V. 190, pp. 1182 and 773.

(John) Morrell & Co.—Record Earnings—

The company recorded the highest sales and earnings in the history of the 132 year old meat packing firm during the fiscal year ended last Oct. 31, W. W. McCallum, President, reported to stockholders on Jan. 9.

McCallum reported earnings of $7.10 per share as compared with $2.80 per share for the previous year. Net earnings for 1959 totaled $6,143,237 as against $2,313,186 a year ago. Record breaking sales were $436,315,469 as compared with $401,684,903 for 1958.

The Morrell President reported a $5,150,000 net increase in working capital despite expenditures of $3,810,000 for property, plant and equipment during the year. At Oct. 31, 1959 net working capital was $24,456,000 and the ratio of current assets to current liabilities was 2.22 to 1.

McCallum's letter to shareholders described expansion of Morrell operations and told of new acquisitions which he predicted will increase 1960 sales by $65-70 million. He anticipates that "based upon the past earnings records of the companies acquired, they will contribute a profit which will compare most favorably with the historical return from our other investments."

The acquisitions referred to included Saratoga Meat Products Co., Scott Petersen & Co., and the Illinois Meat Co., all of Chicago; Tom Sawyer Meat Products, Inc. of Minneapolis; and the Hunter Packing Co. of East St. Louis, Ill.

During the fiscal year 1959 the Morrell company paid 65c per share in cash dividends and in June paid a 2% stock dividend. On Dec. 19 a 25% stock split-up was declared, payable Feb. 15, 1960 to shareholders of record Jan. 22. This will result in the issuance of one additional share for each four shares now outstanding.

Commenting on the outlook for 1960, McCallum said operating results for the first nine weeks of the new fiscal year have been favorable and declared that "our continued efforts to improve operating efficiencies and to increase the sale of consumer identified products, coupled with a return from our new acquisitions, should enable our company to show a satisfactory profit for the year 1960."—V. 189, p. 2787.

Murphy Corp.—Files for Exchange Offer—

This corporation, of El Dorado, Ark., on Jan. 11 filed a registration statement with the SEC covering 95,800 shares of common stock. Murphy proposes to offer its common shares in exchange for Amurex Oil Co. stock on the basis of one share of Murphy common for eight shares of Amurex class A common and one share of Murphy common for 80 shares of Amurex class B common. Of the Murphy stock being registered, 93,925 will be offered in exchange for 751,400 shares of Amurex class A and 1,875 in exchange for 150,000 shares of Amurex class B stock. The offer is conditional upon its acceptance by holders of at least an aggregate of 571,400 shares of class A and class B shares of Amurex. This number of shares when added to the 648,600 class A shares and 100,000 class B shares of Amurex now owned by Murphy would constitute Murphy the owner of Amurex stock possessing at least 80% of the total combined voting power of all classes of Amurex stock entitled to vote. Murphy's present voting power is about 46% and it wishes to increase same to at least 80%. A. G. Becker & Co., Inc., has entered into an agreement with Murphy to form and manage a group of dealers to solicit acceptances of the exchange offer.—V. 191, p. 104.

Nalco Chemical Co.—U. S. Water Use—

Water use in the United States in 1959 approached 300 billion gallons per day, according to the Nalco Chemical Company, Chicago. Nalco is a pioneer producer of water treatment chemicals and other specialized industrial chemical products.

More water is used for industrial and power generating purposes than for any other, according to a spokesman for the company. It accounts for about 46% of the total.

Agricultural irrigation uses about 45%. Only 8% goes into municipal water systems.

In the large industrial plants, water usage is divided into: cooling, 54%; processing, 32%; power generation, 9%; with fire protection, sanitary services and miscellaneous uses making up the other 5%.

Among the various industries, steel is the biggest water user, with oil second and paper products third. It takes about 65,000 gallons of water to make one ton of steel and about 45,000 gallons to make one ton of paper.

Projections of future water requirements made by the Department of Commerce and by the President's Materials Policy Commission indicate that by 1975 the total U. S. water usage will exceed 450 billion gallons a day.

The Nalco researchers say that, except in a few areas, the quantity of water available will be adequate for the years ahead. They predict, however, that the quality of water will be an increasingly complex problem.

This will probably involve more stringent laws to control wasteful use and to require the return of water after treatment to original sources for re-use. They note that such laws already are in effect in California and some other areas, and look for them to be widely adopted by other states and cities.—V. 189, p. 1576.

National Aeronautical Corp.—Reports New Highs—Dividends—

James M. Riddle, Jr., President of the Fort Washington, Pa. corporation, stated on Jan. 14 that sales and net earnings in the fiscal year ended Nov. 30, 1959, set new records. Net sales for the year reached a new high at $6,100,000, an increase of 43% over net sales of $4,300,000 in the previous fiscal year.

Net earnings in the 1959 fiscal year rose to $719,000 from $370,000 in the previous year for a gain of 94%. The 1959 fiscal year earnings were equal to 87 cents per share on 825,598 shares of common stock outstanding compared with 45 cents per share in the previous year, adjusted to reflect the number of shares now outstanding.

Mr. Riddle stated that a recently completed expansion program has doubled the company's manufacturing space and vastly increased its engineering laboratory. "With these increased facilities we anticipate another record year in 1960," Mr. Riddle stated.

Directors have declared a regular quarterly dividend of five cents per share on the common stock, payable Jan. 29 to stockholders of record Jan. 21.

The cash dividend was increased to five cents per share in October last year and a year-end stock dividend of 2% was also paid in December. Prior to a two-for-one stock split on Aug. 1, 1959, quarterly dividends of eight cents per share were paid.—V. 190, p. 1526.

National Semiconductor Corp.—Private Placement—

National Semiconductor's private placement of $500,000 in convertible notes was announced Jan. 18 by Dr. Bernard J. Rothlein, President of the Danbury, Conn. semiconductor firm. These funds will be added to the $650,000 raised privately six months ago at the founding of the company and will be used for expansion.

Dean Witter & Co. acted as an advisor to the company during the just completed private placement. Draper, Gaither & Anderson, a California venture capital firm, subscribed to a portion of the issue. Midwest Technical Development Corp., a Minneapolis venture capital firm and an original investor, subscribed to the remainder of the issue, along with three other private investors.

National Semiconductor was formed in May 1959 by Dr. Rothlein and several other semiconductor development and production engineers. Since that time the company has added substantially to its management and technical staff and has grown to approximately 150 employees. The company occupies two plants in Danbury, Conn.

Last month the company introduced its first products, a line of high performance silicon alloy transistors which are now in quantity production. These transistors are used in airborne military electronics. The company plans to announce the production of several new types of silicon transistors in the next 30 days.—V. 190, p. 158.

National Video Corp.—Earnings—News—

This corporation, in its first interim report since the initial public offering of its securities, announced net sales of $8,290,672 for the six months ended Nov. 30, 1959. Net income for the period amounted to $530,926, equivalent to 86 cents per share on 616,667 shares of class A and class B stock outstanding.

Asher J. Cole, President of the nation's third largest manufacturer of cathode ray tubes (picture tubes) for television set manufacturers, said sales and earnings include operation of Rico Electronics, Inc., an affiliate company located in Puerto Rico and exempt from Puerto Rican income taxes until Feb. 1, 1963.

Comparable figures on the combined operations of both companies for the six month period ended Nov. 30, 1958, are not available.

Mr. Cole said operations in the first half year were highlighted by the development of a new manufacturing process whereby the protective safety plate incorporated in all television sets is bonded to the picture tube. The new tubes, which eliminate the need for implosion plates and provide dust-free, clearer tubes, are gaining wide acceptance within the industry.

Mr. Cole also announced that directors have declared a dividend of 22½ cents per share on the class A shares, payable Feb. 15, 1960 to shareholders of record Jan. 29.

National Video, founded in 1949, is headquartered in Chicago and operates a 162,000 square foot plant with a manufacturing capacity of 1,250,000 picture tubes annually. Rico Electronics manufactures electron guns, a component part of cathode ray tubes, for sale to National Video.—V. 190, p. 2713.

The stockholders also authorized the board of directors to effect a split of the stock by distributing the additional shares in the form of a stock dividend on the basis of four additional shares for each share held on the record date.

The board of directors have declared a cash dividend of $2.25 per share payable Feb. 2nd to stockholders of record on Jan. 22, 1960. This dividend will be paid on the present stock before giving effect to the split in the form of the stock dividend.

The directors also put into effect the stock split by declaring a stock dividend of the 397,680 additional shares on the basis of four additional shares of common stock for each common share outstanding, payable on Feb. 9th to stockholders of record on Jan. 22, 1960. Application is being made to the New York Stock Exchange for listing of the additional shares.

At the same meeting, the directors elected Joseph S. Sinclair to the office of Vice-President.—V. 190, p. 2451.

Pacific Automation Products, Inc.—Contracts—

This Glendale, Calif., corporation has received contracts for electronic systems engineering and electronic cabling valued in excess of $500,000, President Arthur P. Jacob announced on Jan. 12.

The orders include an initial contract for approximately $172,000 from Lockheed Missile Systems Division in connection with the Samos-Midos satellite program. The contract includes systems integration and systems engineering on the Satellite Tracking and Data Acquisition Station at Vandenberg Air Force Base and the Satellite Test Center (formerly the Development Control Center) at Lockheed's Sunnyvale, Calif., facility.

Other orders were for electronic cabling and equipment for missile and advanced weapon projects of which the majority were placed by Convair, Fischbach & Moore, Lockheed and Sperry-Utah.

The systems engineering task as well as production and installation of cabling has already commenced on these contracts, Mr. Jacob stated. —V. 190, p. 2451.

Pacific Lighting Corp.—Budget—News—

This San Francisco-based corporation's three subsidiaries, which provide natural gas service to a Southern California population of 8,000,000, have budgeted $86,500,000 for additions and improvements to facilities in 1960, it was announced on Jan. 8.

The plant budget, which does not include money for operating expenses, exceeds by $8,000,000 the greatest addition to plant in any one year in Pacific Lighting Corp.'s 73-year history.

At the same time, the integrated system's two distribution companies —Southern California and Southern Counties Gas Cos.—disclosed that they expect to add 90,000 new customers in 1960, thereby continuing a growth pattern established at the end of World War II. Since 1945 the two companies have averaged additions of more than 90,000 customers every year, with number of meters having more than doubled from 1,137,000 at year-end 1945 to an anticipated 2,400,000 at year-end 1959. Surveys show an average of 3.5 persons served per meter.

More than 40%, or $36,000,000, of the $86,500,000 budget for 1960 is slated to be spent on two major gas transmission projects which over the next few years are expected to swell deliveries of out-of-state gas to southern California to two billion cubic feet of gas a day. Present deliveries of out-of-state gas are 1.143 billion cubic feet daily. The Pacific Lighting System also purchases large amounts of California-produced gas.

One of the new supply projects, with an initial certificated delivery of 300,000,000 cubic feet of gas daily from Transwestern Pipeline Co. of Houston, Texas, already is under construction. Pacific Lighting Gas Supply Co.—the third Pacific Lighting Corp. subsidiary—is now scheduled to take substantial deliveries from Transwestern at the California border by the fall of 1960. Cost of the California portion of the Transwestern project is expected to be $17,300,000.

Southern California and Southern Counties Gas Cos. recently received approval from the California Public Utilities Commission to construct a 115-mile, 36-inch-diameter pipeline from Newberry to Placentia, through the Cajon Pass. This proposed pipeline, construction of which is expected to cost $19,100,000, will (1) tie into the P.L.G.S. line carrying Transwestern gas, and (2) be part of another out-of-state project, when—with approval of regulatory agencies—it is tied in at the California-Nevada border with a proposed new transmission line of El Paso Natural Gas Co. The proposed line will originate at Rock Springs, Wyo.

Breakdown of the total system's budget is as follows: Southern California Gas Co., $37,700,000; Southern Counties Gas Co., $23,400,000; and Pacific Lighting Gas Supply Co., $25,400,000.

The upward trend in the cost of meeting energy requirements of Southern California homes, commercial establishments and industry is reflected in the system's budget. At the end of 1945, the gas companies' average investment per meter served was $200. At the end of 1960, the average investment is expected to be $352, a 76% increase in 15 years. —V. 189, p. 813.

Immediate payment will be made at The Chase Manhattan Bank, 18 Pine Street, New York 15, N. Y.—V. 188, p. 1616.

Pantasote Co.—Registers With SEC—

The company, of 26 Jefferson Street, Passaic, N. J., filed a registration statement with the SEC on Jan. 8 covering 350,000 shares of common stock, to be offered for public sale through an underwriting group headed by Bear, Stearns & Co. The public offering price and underwriting terms are to be supplied by amendment. The company also has agreed to sell the Bear, Stearns firm, at 10c for each share covered, five-year options covering an aggregate of 25,000 common shares which will be exercisable at the said offering price.

It has outstanding 593,823 common shares in addition to certain indebtedness. Of the net proceeds of the sale of additional stock, the company will use about $1,700,000 to build and equip a new polyvinyl resin plant with facilities which it is estimated upon completion will triple the company's present capacity for producing resin; $50,000 as starting up expenses of the new plant; $150,000 for plant rearrangements and miscellaneous equipment to improve and centralize inventory storage and to furnish additional boiler capacity and stand-by power facilities; and the balance for additional working capital. The new plant is to be constructed by Scientific Design Co., Inc. —V. 190, p. 976.

Parsons & Whittemore-Lyddon—New Mill—News—

The beginning of construction of Mandya National Paper Mills Ltd. in Mysore State, India, is announced jointly last week by this organization of New York, London and Paris and Bedf & Co. (Private) Ltd. of Bangalore. It will be an integrated pulp and paper mill with an initial capacity of 35 tons per day of high grade writing and printing papers produced from sugar cane bagasse pulp.

Technical services, including supervision of construction and initial operation, are being performed by the Parsons & Whittemore/Lyddon Organization. Bedi & Co. and Parsons & Whittemore will act jointly as managing agents. Parsons & Whittemore is also supplying the complete package of production machinery, orders for which have been placed with equipment manufacturers in France and the United States.

Financing of the mill has been obtained with the help of credits granted by the French Government to India and with the assistance of the Industrial Finance Corp. of India. Ground has been broken on the mill site and erection of the plant buildings is underway. The mill is expected to go into production during 1961.

The Parson & Whittemore/Lyddon Organization will furnish Mandya an integrated plant which will be self-sustaining except for electric power and some chemicals obtainable locally at favorable rates. Abundant quantities of sugar cane bagasse, the primary raw material, will be made available by Mysore Sugar Co. Ltd., located near the paper mill site at Belagula between the cities of Bangalore and Mysore.

The bagasse pulp mill will employ a combination of moist depithing at the sugar mill and wet depithing at the pulp mill for elimination of all dirt and non-fibrous material from the raw bagasse. This treatment, carried into commercial operations by Parsons & Whittemore in other sugar producting areas, yields an easily bleachable fibre suitable for the manufacture of the highest quality white papers. The pulping operation will be conducted in a Black-Clawson Pandia continuous digester in accordance with techniques applied by Parsons & Whittemore to the pulping of a wide variety of agricultural fibers.

A 138-inch wide fourdrinier paper machine and all auxiliary papermaking equipment, as well as a liquor burning and chemical recovery system will be supplied.

The Mandya mill will produce substantial quantities of writing and printing papers for the Indian market. At present, the annual per capita consumption of all papers in India is only two pounds as against 420 pounds in the United States. Literacy is on the rise, and industrialization is spreading rapidly.

Major markets for Mandya papers already exist within a 100 mile radius of the mill. The project plans have made allowance for ready expansion of the mill to meet an expected rising demand for its output. —V. 183, p. 2654.

Pillsbury Co.—Earnings—News—

The Minneapolis company reported on Jan. 12 earnings after taxes of $3,262,000 and net sales of $181,800,000 for the six months ended Nov. 30, 1959.

Net earnings after taxes, although second highest in company history, were 21% below earnings for the same period a year ago. Net sales for the first six months were 1.2% ahead of the same period last year.

Net earnings per share of common stock were $1.52 compared with $2.01 a year ago.

"Pillsbury and the milling industry as a whole," said President Paul S. Gerot, "did not benefit during the past six months from the unusually favorable markets for milling by-products which existed a year ago.

"Earnings were also adversely affected," he said, "by a four-week work stoppage in August at the company's largest multi-product plant in Springfield, Ill.

"Intensified competitive pressures caused reduced prices on some products and additional advertising and sales promotion expenditures for others."

The company introduced 12 new products during the first six months.

Capital expenditures will total a record $10,000,000 this year, a $2,000,000 increase over the previous fiscal year. A major part of this program is modernization of plants and equipment for reduction of manufacturing costs.

During the first six months, Pillsbury announced plans for construction of a new flour mill in East Los Angeles, Calif. A refrigerated products plant and research center was put into operation at New Albany, Ind., and an option was obtained on land for a new baking mix plant near St. Louis, Mo. A new feed plant at Jasper, Ala., is expected to be completed this spring.—V. 190, p. 1183.

BUSINESS—Pioneer Finance Company, Incorporated under the laws of Michigan in 1938, has been engaged principally since its inception in the financing of sales of new and used mobile homes (trailer coaches). Commencing in January, 1959, the company has also financed sales of "shell housing." This diversified Pittsburgh-based industrial manufacturing concern, has recently purchased over 90% of the stock of Patterson-Sargent Co. of Cleveland, Ohio, manufacturers of "BPS" paints for home and industry, it was announced Jan. 13 by T. M. Evans, Porter Chairman.

Public Service Electric & Gas Co.—Construction—News—

Keeping pace with continually increasing demands for electric and gas service this company, according to an announcement by President Donald C. Luce, contemplates expenditures of about $140,000,000 to $150,000,000 for new construction during 1960. This will mark the fifth consecutive year the Company's construction expenditures have exceeded $100,000,000 and will bring to more than a billion dollars the amount expended since 1951 for additions and improvements to plant and equipment.

In spite of some delays resulting from strikes, work is progressing on three major additions to the company's generating facilities. The Bergen Station in Ridgefield, New Jersey, estimated to cost nearly $110,000,000, already has one 290,000-kilowatt turbine generator in operation and the second unit of similar capacity will be placed on the line early in 1960. The Mercer Station, located in Hamilton Township near Trenton, in the heart of the Delaware Valley, will cost approximately $130,000,000. The first of two 320,000-kilowatt turbine generators is expected to be placed in operation in 1960, and the second, of similar capacity, in 1961. At the existing Sewaren Generating Station, near Perth Amboy, a fifth turbine generator is being installed. This huge 342,000-kilowatt unit, to cost more than $66,000,000 and scheduled for service in 1962, will raise the station's capacity to 817,000 kilowatts, largest in the company's system. Upon completion of these new facilities and after retirement of some older generating units at Marion Station, the company's total installed capacity will be 4,054,000 kilowatts, an increase of almost 60% over the capacity on Jan. 1, 1959.

Construction and reinforcement of major high-tension transmission lines and switching facilities, at a cost of almost $40,000,000, is under way or planned in order to insure the most effective use of the company's immense generating facilities and to maintain high standards of reliability of service. Among the new switching stations under way or scheduled for the near future are those located in Gloucester and East Rutherford for service in 1960, and Aldene switching station in Clark Township, scheduled for service in 1961. Just placed in operation is the $6,000,000 Newark switching station with an ultimate capacity of 330,000 kilovolt-amperes located close to the city's central business district.

In addition, the President points out, the company will expand its distribution facilities with the installation of 22,000 new electric meters, 2,000 miles of overhead and underground wires, 5,000 additional distribution transformers, 5,000 new street lights, and 8,500 additional poles during this year.

The company's program of converting customers' appliances from mixed gas operation to the use of straight natural gas in certain areas will be continued in 1960. About 42,000 additional customers will be affected, principally in the New Brunswick area, and by the end of 1960 more than 560,000 customers, or nearly one-half of all customers in the company's territory, will be served with straight natural gas.

More than 30,000 gas heating customers were added during 1959, bringing the total number to approximately 275,000, and it is anticipated that by the end of 1960 the company will serve more than 300,000 heating customers. Plans for gas facilities to meet the increased demands of present customers and to provide service to an expected 29,000 additional gas heating customers include the installation of approximately 285 miles of gas mains, 22,000 services, and 27,000 meters during 1960. To provide more efficient service to customers, a new distribution headquarters will be constructed at Oradell, in the northern portion of the company's service area, and, in the southern area, the Gas Department will renovate and occupy the recently vacated Electric Department distribution headquarters in Camden.—V. 190, p. 2662.

Red Owl Stores, Inc.—Record Earnings—

Sales and earnings of Red Owl Stores, Inc. for the nine months ended Nov. 28, 1959 established new records, Ford Bell, Chairman of the Board, and Alf L. Gergerud, President, said in the quarterly report to shareholders.

Sales for the first nine months of the fiscal year amounted to $164,464,564, an increase of almost 12% over the previous year's sales of $147,344,044. Earnings of $1,770,757 were up 11% over income of $1,588,819 in the preceding year. Per share earnings amounted to $2.70 on the 656,841 shares outstanding at the close of the period compared with $2.50 a year earlier when 634,296 shares were outstanding. The number of shares increased primarily as a result of conversions of subordinated debentures.

Sales for the quarter ended Nov. 28, 1959 were $55,936,937 compared with $50,391,979 in the same period last year. Earnings were $677,566 compared with $457,695, which on a per share basis amounted to $1.03 and 72 cents respectively. It was reported last year that extraordinary costs affected earnings materially and therefore the quarterly comparison is not indicative of an earnings trend.

Shareholders were told that the company has purchased the assets of H. A. Marr Grocery Co. and certain of its subsidiaries, which included 17 supermarkets and a wholesale business in Denver, Colo., and surrounding territory. Red Owl took over operation of these facilities on Jan. 2, 1960. Sales of the Marr organization have been approximately $40,000,000 annually.

Five supermarkets were opened in the third quarter, of which four were in the metropolitan Twin Cities area and one in Sioux Falls, South Dakota.

While the construction of two supermarkets in Chicago was completed within the third quarter, they were not opened until Dec. 15. However, an aggressive third quarter advertising campaign was carried out to announce Red Owl's entry into the Chicago metropolitan market. At this time it is too early to evaluate their long-range potential, but the initial consumer acceptance of these two stores was gratifying, the report said.—V. 190, p. 2452.

FRASER

Schenley Industries, Inc.—Earnings Off—

Earnings for the quarter ended Nov. 30, 1959 totaled $4,780,460, equal to 81 cents a share, 26 cents a share lower than the previous year's results, due in part to a long strike at one of the company's principal plants that deprived the plant of practically all of its pre-holiday bottling and shipping.

Lewis S. Rosenstiel, Board Chairman and President, estimated the pre-tax cost to Schenley of these dislocations in excess of $3,000,000.

He said the closing of one of the company's principal bottling plants at Schenley, Pa. had necessitated the costly transfer to other locations of bottling and shipping operations during the pre-holiday delivery period.

For the three months ended Nov. 30, 1958 the company reported net profit of $6,318,376, equal to $1.07 a share, adjusted for the 5,894,196 shares outstanding at Nov. 30, 1959 (vs. 81 cents in this year's quarter as above). The 1959 quarterly figure of $4,780,460, being for an interim period, is unaudited and subject to adjustment at the close of the company's fiscal year which ends Aug. 31, 1960. —V. 190, p. 2662.

Accordingly, in the above, the last day of the week in all cases has to be estimated.

In the elaborate detailed statement, however, which we present further below we are able to give the final and complete results of the week previous—the week ended Jan. 9. For that week there was an increase of 11.9%, the aggregate of clearings for the whole country having amounted to $29,584,876,313 against $26,440,719,661 in the same week in 1959. gether with a $6,000,000 cash contribution to be made by its parent, Texas Utilities Co., and other available funds will be used to cover 1960 construction expenditures and for other corporate purposes. Construction expenditures approximated $25,000,000 in 1959 and are estimated at $35,000,000 in 1960 and $31,000,000 in 1961.—V. 190, p. 95.

Texas Industries, Inc. (& Subs.)—Earnings—News—

The corporation and its consolidated subsidiaries had net income of $427,136 for the six months ended Nov. 30, 1959, compared with $581,603 for the same period in 1958, President Ralph B. Rogers announced.

Earnings, after preferred stock dividends, amounted to 33 cents a share on 1,213,955 common shares outstanding. This compares with 48 cents on 1,161,258 shares last year. Consolidated net sales were $8,606,525, as against $8,885,076 for the period last year.

Rogers said the reduction in net sales was due principally to price softening, particularly in the housing field. In addition, the company absorbed certain losses, expected to be non-recurring, in developing new structural products.

During the six-month period the company's reserves of sand and gravel were materially increased and a new sand and gravel plant was placed in production in New Orleans, Rogers said.

Construction work on the company's new cement plant at Midlothian, Texas, slated for completion in December 1960, is progressing ahead of schedule, Rogers announced.—V. 190, p. 1673.

Transwestern Pipeline Co.—Financing—Construction

More than $200 million in financing for the the construction of the major pipeline from the West Texas and New Mexico Permian Basin and the Texas and Oklahoma Panhandle was reported complete in the Houston company's first progress report to stockholders.

Th report, signed by Board Chairman W. K. Warren and President Mills Cox, also stated that Transwestern and its gas suppliers had accepted all FPC certificates necessary to complete approval of the 1,809-mile project.

The financing, which provides sufficient funds to complete the pipeline and construct additional facilities costing in excess of $5 million announced recently, was broken down as follows:

(1) Paid in capital by organizers	$10,000,000
(2) Sale of 400,000 units to the public ($40,000,000 5% 10-year debs. and 2,000,000 shares of com. stock)	59,660,000
(3) Sale of 5¼% first mortgage bonds	102,742,500
(4) Five-year 5% bank loans	28,000,000
Total	$200,402,500

The company said that as of Jan. 1, 1960, a total of $97,100,000 had been committed for construction materials and approximately $84,000,000 paid out. All pipe required for the total project has been purchased and delivered to locations in the field, either stacked on railsiding along the pipeline route or is in the process of being strung along the right-of-way. All compressors have firm delivery dates and field work on compressor stations has been progressing better than expected. It is estimated that the pipeline will be completed in July, 1960. Progress in the field has been better than anticipated, with 475 miles of right-of-way cleared and 178 miles of the main system consisting of 30-inch, 24-inch, and 20-inch pipe having been welded and lowered in the ditch as of Jan. 1. Construction of the field lateral and gathering systems is progressing satisfactorily. Construction of a carbon dioxide removal plant in the Puckett Field in Pecos County, Texas, has been completed and the plant placed in "moth balls" pending completion of the pipeline. This plant is capable of treating 180 million cubic feet of gas per day and can be easily expanded if necessary.

Reporting on construction progress the report said at the present time 11 spreads are at work in the field with a total of 3,613 people directly employed in construction and supervision. More spreads can be employed if necessary, but with the progress being made to date it appears these will not be required. (A "spread," as used in the pipeline industry, is an integrated pipeline crew having all equipment necessary for complete construction.)

Regarding the status of construction of the receiving end of the line, Transwestern's officials said that Pacific Lighting Gas Supply Co., its customer, had informed the company that necessary pipe for the facilities had been acquired and that completion of its pipeline

from the Colorado River to their existing system is on schedule and coinciding with Transwestern progress.

"The company's gas purchase contracts in the Texas and Oklahoma Panhandle in addition to covering large developed reserves also cover approximately 800,000 acres of undeveloped oil and gas leases. Since the signing of these contracts substantial additional gas reserves have been discovered by our gas suppliers on some of the undeveloped oil and gas leases committed to our gas purchase agreements," the report said.

On Dec. 16, 1959, Transwestern filed a certificate application with the Federal Power Commission covering the construction of $5,834,000 of additional facilities. This application is to make available to Transwestern and the California consumer approximately 557 billion cubic feet of gas from some 50 additional gas purchase agreements on which producer certificate applications are pending. The current DeGolyer and MacNaughton reserve report filed with this certificate application brings Transwestern's dedicated and recoverable gas reserves as of Oct. 15, 1959, to 3.642 trillion cubic feet. Gas purchase agreements entered into subsequent to that date, together with additional development will, when computed, add to this reserve figure. Transwestern has requested the Federal Power Commission to grant temporary authorization to it and to the producer applicants involved so that these facilities can be constructed simultaneously with the certificated facilities. This will result in substantial savings in construction costs of the additional facilities, it was said.—V. 191, p. 47.

Union Pacific RR.—Review and Forecast—

A year-end report of "good in spite of the obstacles" was offered for the railroad's 1959 operations in Omaha on Jan. 13, by President A. E. Stoddard.

He also presented a hopeful forecast of "stepped up activities" for 1960.

Counted a major factor in the 1959 picture was the nation-wide steel strike that resulted in a carloadings drop ranging up to 10% during the latter part of the year.

"In terms of revenue," Mr. Stoddard reported, "We have calculated the steel strike cost us $20,000,000. Notwithstanding the strike, however, total traffic handled during the full year was approximately 3% greater than in 1958 and freight revenues will show an increase of about 1.7%."

The company's President pointed out that Union Pacific established a new all-time peak in freight revenues during the first six months of the year, with traffic up approximately 14%. The last six months, however, showed a 5% decrease over the 1958 figures.

The road during the year carried 1,555,000 carloads of revenue freight.

"For 1960," Mr. Stoddard continued, "we are looking for a traffic increase, primarily in freight, but expect the first six months will be only fractionally better than the peak period of 1959 against which these comparisons are drawn.

"We expect rather marked increases in the latter months when comparisons are drawn against the strike-hampered months of 1959."

Depicting his company's optimistic attitude on the future of railroading, the President pointed out, is the 1959 equipment expenditures that hit a total of over $51 million. Included in the list of equipment were seven 8,500 horsepower gas-turbine locomotives, 80 diesel-electric locomotive units, 10 lunch counter diners and 1,851 freight cars.

"We hope to continue our purchase program through 1960 to keep pace with demands of modernization and maintain our position as a leader in the industry," he stated.

Passenger revenue for the year was practically unchanged from the 1958 levels but mail and express revenues increased providing an over-all revenue increase of 2%.

Continuous travel inducement programs—package tours, the rail-auto plan, provision of the latest equipment, special trains, group fares, and improved through train schedules—were credited with keeping U. P. high on the list of top transcontinental passenger carriers.

Construction projects, extension of communications services and special equipment replacement programs held top billing in the railroad's 1959 business scene.

Most recently publicized is the start of construction on a new major span in the American Falls bridge—located on the road's main line linking the Pacific Northwest with all points East. The two 247-foot trusses, each weighing 250 tons, have been slipped into place and work is progressing on completing the construction and transferring the load from the old span to the new. The program is scheduled for completion in mid-1960.

Long distance dialing—allowing direct contact between points on the railroad—will be completed system-wide in February with the tie-in of facilities in Los Angeles.

Latest improvement in the railroad's communication network is the programmed installation of a microwave system between Omaha and Laramie, Wyo. The system has received management approval and construction will begin early this year. The new network will carry all important transcontinental circuits between the two points.

Two of the three mammoth freight houses, slated to speed freight transfer along the system, have been completed. The Kansas City facility was operating the first of 1959 and the unit at Portland, Ore., started operations in December. The third freight house—located at East Los Angeles—is scheduled for completion late next year.

Development of industrial properties along the line continued throughout the year with concentration centering on areas at Portland, Los Angeles and Denver. Nine new industries were located in the Denver tract during 1959, and steady growth of all such areas is expected in 1960.

Another major project started during the year was the installation of centralized traffic control on 80 miles of track between Denver and Carr, Colo. The new signaling facilities will give U. P. a total of 2,095 miles of centralized traffic control on its lines.

Average employment figures for the year showed a slight drop from the previous year but total wages paid increased.

Wages hit a total of $242,365,800 during 1959, an increase of $5,500,000 over the 1958 figures.

Taxes took their usual big bite, with records showing an estimated $78,000,000-plus to be paid. A breakdown lists $56,000,000 of that figure going to the Federal Government, and $22,500,000 going to state and local governments along the road's system.

Heavy gains were recorded in the area of trailer freight on flat cars, or so-called "piggyback" operation, for U. P. in 1959. Volume of traffic involving railroad-owned trailers and flatcars increased about 20% during the year and traffic using customer-owned equipment more than doubled.

To provide highway truck service this company operated 51 trucks, 172 tractors and 519 trailers during 1959, and in expanding its trailer freight operations placed in service 200 85-foot flat cars, each of which accommodates two 40-foot trailers.

A "no change" report from Pacific Fruit Express Co. indicates shipments of 1959 were about the same as the previous year, and that business of that company—jointly owned by Union Pacific and Southern Pacific Railroads—is expected to hold that level during 1960. PFE is presently involved in a car construction program that will add another 1,025 multi-purpose cars to its fleet.

"It is difficult to predict the business picture a year in advance," concluded Mr. Stoddard. "So many factors can alter the expected situation and it then becomes an unexpected situation. To this point, however, we look for a good year ahead. We certainly intend to continue our construction programs and take advantage of any improved procedures and equipment developed in the railroad industry.

"We need less governmental regulation, more rate making freedom to give shippers true economy of rail transportation and the opportunity to price our services realistically in the face of heavily subsidized competition."—V. 191, p. 48.

Weyerhaeuser Co.—Executive Comments—

The parable "A rose is a rose is a rose" no longer applies to wood products, a forest industry executive says in discussing wood used by the public in 1959.

F. K. Weyerhaeuser feels his company's increasing production of new products of wood is indicative of the changing face of the timber industry. New forms of wood are no longer recognizable as the traditional two-by-four.

Gluing and jointing advances, including a three-finger joint announced by the Tacoma-based company in 1959, are strengthening markets for wood in competition with non-wood products. Pieces of lumber previously of low value are being processed at new plants which trim defects prior to end-and-edge gluing into Nu-Loc lumber of any length, width or size.

A wood veneer and pulp board "sandwich" called Ply-Veneer was used in 1959 as a core for fiber glass boats and swimming pools. Titan, Jupiter and Dyna-Soar missiles are being packaged in Ply-Veneer. Do-it-yourself blue prints launched this wood product into the homeowner market through retail lumber dealers.

The history of the Weyerhaeuser Company in 1959 was typical of leaders in the industry. To indicate the wide range of products now manufactured, the firm dropped the word "timber from its name its name in mid-1959. At the same time, a new corporate identification symbol was adopted.

Six new Weyerhaeuser paper products plants began production in 1959 while pulp and paper research was also increased.

Plywood received increased emphasis by Weyerhaeuser in 1959. The company began plywood production in a new plant and announced construction of additional facilities at an existing plant which doubled capacity.

Hardboard, a pressed wood fiber panel, received new surface treatments by Weyerhaeuser this past year. Striated and grooved patterns, plus smooth, combed and colored surfacing have been applied for all-weather outdoor and indoor paneling uses.

The company's Silvatek division announced a floor underlayment performance guarantee for a product called Versabord. Made from particles of wood and wax bonded with resin, the panels are more dense than oak flooring.

Weyerhaeuser Economist, Charles E. Young says the forest products industry in the Pacific Northwest is growing and remains the number one payroll. "Despite a possible drop in housing starts, the construction industry should realize a $1 billion increase in 1960 and lumber production will remain near 1959 levels. Plywood production will probably increase 10% while pulp and paper is expected to increase 6%.

"Industry growth is expected to result from better utilization of each log harvested. More wood will be converted into products of higher value."

Electronic and optical devices have been developed in lumber and plywood research laboratories. More accurate and efficient sawmilling is resulting from the measuring devices, the company reports.

Pulp and paperboard research is directed to development of improved products. In 1959 paper research resulted in a cold wax sealing process called Polarpac. This new packaging method is replacing former styles of packaging in the frozen food industry.

Weyerhaeuser's new product research efforts were significantly increased during 1959, the company reports. The company is continually testing new products of wood in the laboratory and market.

Research resulted in development of a moldable wood fiber called Pres-Tock. In late 1959 the company announced opening of a technical service center for a market requiring special skills in the Weyerhaeuser organization. The center will provide consultation to the automotive industry. Pres-Tock is used for interior door panels, package trays and other automobile components.

Research in the forests is resulting in development of tree growth stimulants, animal and insect repellents and genetic improvements promising faster growing trees of higher quality. Tools of modern science, including radioactive isotopes, will help develop methods of growing more wood to meet tomorrow's needs.

Weyerhaeuser Managing Forester Royce O. Cornelius said the year 1959 was "the year of the big cone crop." Fall 1959 produced a record 227,000-bushel seed cone harvest for the company. The resulting 50 tons of seed will be planted from helicopters on recently logged areas and land lost to tree production because of brush encroachment and fire.—V. 190, p. 1022.

Yuba Consolidated Industries, Inc.—Awarded Seven-Million Dollar Contract—

"This new job," McGara said, "raises Yuba's backlog of new business to $62,000,000 with which to start the new year. We look forward to a very successful 1960 for Yuba."

Bert S. Turner, Vice-President and General Manager of the Division, said that this latest of Yuba's large contracts provides for work to begin Feb. 24, 1960, and to continue for 24 months.

Construction details include 13 bridge and grade separation structures, approximately 2,500 tons of reinforcing steel and approximately 3,700 tons of fabricated structural steel.
