Corporate and Municipal Financing Ahead

By SIDNEY BROWN

Unabated marked corporate and municipal financing activity is still in prospect for issues with posted selling dates. The calendar for the week of April 18-22 contains \$175 million in equities and debt corporate securities and \$222.6 million in municipals. The four-week period of April 18-May 13 may tap the market for slightly over \$1 billion for both corporates and municipals.

\$1 billion for both corporates and municipals.

The first week and a half of April recorded sales of corporates amounting to \$309,-575,000 (\$77.9 million in stocks and \$231.7 million in bonds). According to SEC data of all corporate offerings, the total for the very active whole month of April 1959, came to \$868,796,000. From all indications, despite many of the not-too-booming indicators, it appears as though this April will hurdle last year's figure. Our last year's estimate of corporate financing for the comparable period this year was lower than our present projection by \$100 million. This and the first quarter's slowness in approaching the market, which checked the rise and even created a decline in the interest rate, are the two factors that support the conclusion of an active spring calendar. The postponed demand apparently is taking advantage of available funds at a price that could have been higher if the boom predicted for this year had materialized. materialized.

Last week's four-week projection of corporates was \$590 million—which was about \$75 million higher than this week's estimate. The present four-week estimate for municipals which still doesn't show the usual spring pick-up is, however, about \$100 million higher than last week's computation. \$100 million higher than last week's computation.

LOOKING AT THE BACKLOGS GROOM ARW

The figures for all corporates and municipals with dates set, which in the case of corporates extend to November 3 and for municipals until June 21, inclusive from April 18, add up to \$1.6 billion out of the total backlog. The dollar volume of corporate issues with no dates set comes to \$1.2 billion and excludes the balance of T.V.A. financing over the \$50 million already announced and does not include the \$190 million probable private placement by T.W.A. over and above the announced \$100 million. In short, the dollar volume estimated for corporates and municipals, commencing April 18, comes to over \$3 billion.

It may be of interest to note that this week's 41 issues include 19 which are \$300,000 or less. The following week (April 25-29) contains 10 issues of \$300,000 or less out of 32 scheduled. Our calendar of last week listed 59 issues for the week of April 8-14. Out of this number, 36 were postponed. Yet the corporates that went through helped to account for the substantial financing pace.

(W. R.) Grace & Co.-Annual Report-

(W. R.) Grace & Co.—Annual Report—

Earnings for 1959 of \$14,827,290 were 48% higher than in 1958, according to this firm's annual report to scockholoers. Net income per common share was \$3.04 compared with \$2.07. The principal iactor in the improvement was a substantial rise in the earnings of the chemical division, which contributed 68% of total pretax operating prolits.

Including the company's share in the undistributed earnings of non-consolidated units, principally Grace National Bank, Panagra, and Gulf & South American Steamship Co., earnings were \$3.44 per share versus \$2.38.

Net sales and revenues were \$469,695,671 compared with \$434,234,391 in 1953, an increase of 8.2%.

Chemical profits rose 44%, with all chemical divisions surpassing their results of 1958.

Latin American earnings also increased substantially from the previous year, as economic conditions were generally better and exchange rates more stable. However, Grace Line earnings were well below historic levels, the report stated, as achievement by Latin American governments of more stable exchange rates was accompanied in some cases by increased import restrictions, and because of the continued world surplus of shipping capacity.

Citing the major cevelopments of 1959 and early 1960, President J. Peter Grace noted the purchase of 53% of the stock of Cosden Petroleum Corp., an important independent retiner and producer with a strong postion in petrochemicals; entry into the manufacture of synthetic jet lubricant esters, as well as plasticizers, by the new Hatco Chemical Division; and the successful completion of three wells in the Libyan oil exploration venture in which Grace is associated with Texas Gulf Producing Co. and Standard Oil Co. (New Jersey).

Commenting on the important changes brought about in the company in the past decade, the report pointed out that in 1950-1952 over 5% of Grace's operating earnings before taxes were contributed by its steamship and Latin American activities, compared with the 88% contributed in 1959 by chemi

Hughes Tool Co.—Subsidiary Financing—

Howard Hughes has announced me plans to raise the funds to pay for the expanding jet fleet of Trans World Airlines, Inc., subsidiary of his Hughes Tool Co., through the development of a \$340,000,000 aprogram. The filer-industrialist will contribute up to \$150,000,000 as his part of the largest single piece of financing in airline history.

Mr. Hughes described the three-part program as the combination of his own resources plus loans from banks, insurance companies and other institutional lenders. "First," he said, "up to \$190,000,000 is to be sought through private placement with banks, insurance companies and other institutional lenders. TWA's investment bankers, Dilloh, Read & Co., Inc., Lazard Freres & Co., and Lehman Brothers are presently discussing this program with institutional lenders. "Second, to support the senior borrowing TWA presently plans to offer to its stockholders \$100,000,000 of subordinated income debentures with detachable common stock purchase warrants, and Hughes Tool will purchase not only its pro rata portion (\$78,000,000) but also enough of any debentures not taken up by others to provide TWA with the \$100,000,000. At the TWA annual meeting in Kansas City on April 28, stockholders will consider a proposal to increase the authorized number of common shares from 10,000,000 to 15,000,000. There are currently 6,674,155 shares outstanding." he continued.

Finally, Mr. Hughes further agreed to provide whatever sum of money may be required, up to \$50,000,000, to make good any amount by which TWA may fall short of this mark from its own cash flow. This money will be in a position subordinate to all senior lenders.

Lease Plan International Corp.—Acquisition—
Acquisition of Lee Fleet Management Corp., Cleveland, Ohio, by Lease Plan International Corp., a lessor of motor vehicles and other equipment, has been announced by H. L. Meckler, President of LPI. As a result of the acquisition, consummated for an undisclosed cash sum, Mr. Meckler said, LPI becomes one of the three largest commercial purchasers of automobiles and trucks.

In addition to acquiring vehicles owned by Lee through the acquisition, LPI also obtained a new \$10,000,000 credit line from the Guardian Life Insurance Co. of America, he said.

"This is particularly important in view of the current tight money market," Mr. Meckler said. "Our previously established lines have been of great assistance to us in making it possible for industry to obtain equipment it might otherwise have had to do without since the tight money market developed last year."

Augmenting the present fleet of Lease Plan, Inc., another whollyowned subsidiary of LPI, the Lee operation brings to approximately 20,000 the fleet components presently out on lease to various industrial and commercial users throughout the country, he said.

The announcement said LPI purchased all stock of Lee for an undisclosed each sure.

The announcement said LPI purchased all stock of Lee for an undisclosed cash sum.

Founded in 1954, Lee operates nationwide and is predominantly a lessor of automobiles. S. J. Lee, President of Lee Pleet, is being retained on a consulting basis. Though the identity and operating policies of Lee will be maintained, operations will be consolidated in the New York office of Lease Plan.

"As a result of the acquisition, the programs offered by both compa-nies will be broadened, and substantial economies will be accomplished," Mr. Meckler said. He added:

"Previously, Lease Plan would handle only large fleets, the minimum contract being \$100,000. With completion of the acquisition of Lee, this policy no longer holds and we will aggressively exploit the small fleet leasing market for both automobiles and trucks."

In addition to leasing motor vehicles, LPI also has a contract carrier division which handles highway transportation for many major companies. It also leases to industry all types of equipment for production, maintenance and record keeping, including the latest electronic computers.—V. 190, p. 2712.

(Philip) Morris Inc.—Net Up—News—

Philip Morris Inc.'s sales for the first quarter of 1960 set "a new record high" and Joseph F. Cullman, 3rd., President, told stockholders at the annual meeting he estimated the company would show an "8½% increase in earnings on a 3½% sales improvement" for this period compared with the initial quarter of the previous year. Approval of the acquisition of A.S.R. Products Corp. was voted by stockholders of the major cigarette company at the meeting.

Pointing out that sales of the company's filter brands, Marlboro, Parliament, Alpine and Benson & Hedges, are improving steadily, Mr. Cullman said that "in the first quarter of this year Philip Morris Inc.'s sales increased to approximately \$109,000,000 from \$105,500,000 in the corresponding period of 1959. Net income based on this volume is estimated at about \$1.13 a share in the first three months of 1960, according to our preliminary data." Per share earnings of the company for the first quarter a year ago amounted to \$1.04. The earnings are based on 3,299,087 outstanding shares of Philip Morris Inc. \$5 par value common stock at the close of the 1960 first quarter and 3,284,346 outstanding common shares at the close of the like 1959 period.

He noted that with the Jan. 15, 1960 payment, Philip Morris Inc. increased its quarterly common stock dividend from 75 cents to 90 cents a share to establish a new amnual rate of \$3.60.

The acquisition of A.S.R. Products Corp., a diversified company in the razor, blade and precision metal manufacturing field, will be accomplished on the basis of one share of Philip Morris common stock for each four and one-third (4½) shares of A.S.R. Products common stock Stockholders of A.S.R. Products held their annual meeting last week in Staunton, Va., at which time they approved the acquisition. On April 12, 76,011 shares of MO common were registered with the SEC so that the A. S. R. acquirers thereof may resell them.

Mr. Cullman told stockholders: "I am advised that preliminary estimates of first quar

serves to establish a broad base for further gains."

The Philip Morris President also noted several parallels in the results and operations of A.S.R. Products and the cigarette business. "Sales and earnings of A.S.R. Products show an upward trend during the past five years. A.S.R.'s sales last year totaled \$32,000,000 compared with under \$20,000,000 in 1955. Net income climbed to \$1,679,000 from \$552,000 five years ago," he stated. A.S.R. Products is a major producer of shaving accessories, including razors and single edge, double edge and injector blades in both the United States and England under the trade marks of Gem, Pal and Ever-Ready. It also has several subsidiaries, the largest of which is Supreme Products of Chicago, a business which combines consumer products such as home hair clippers, electric knife sharpeners, electric can openers and power tool accessories, precision parts and gears.

Mr. Cullman also expressed optimism about the outlook for the com-

sories, precision parts and gears.

Mr. Cullman also expressed optimism about the outlook for the company's subsidiaries, Milprint, Inc., a leader in flexible packaging which was acquired in July, 1957, and Polymer Industries, Inc., which makes adhesives and textile chemicals, acquired in May, 1958. Milprint has acquired considerable property in Milwaukee for future expansion needs. Nicolet Paper Corp., a Milprint subsidiary, will complete this month a multi-million dollar plant expansion which will double glassine and related paper capacity. Polymer also is expanding its physical plant and its capacity for research into new and better uses for polymers.—V. 191, p. 104.

Utah Oil Co. of New York, Inc.—Offering Suspended

The SEC issued an order temporarily suspending a Regulation exemption from registration under the Securities Act of 1933 wit respect to a public offering of stock by this company of 25 North St Rochester, N. Y.

exemption from registration under the Securities Act of 1933 with respect to a public offering of stock by this company of 25 North St., Rochester, N. Y.

Regulation A provides a conditional exemption from registration with respect to public offerings of securities not exceeding \$300,000 in amount. In a notification filed in May 1958, Utah Oil proposed the public offering of 300,000 shares of common stock at \$1 per share pursuant to such an exemption. In its suspension order, the Commission asserts that certain terms and conditions of Regulation A were not complied with, that Utah Oil's offering circular is false and misleading in respect of certain material facts, and that the offering and sale of Utah Oil shares by means thereof would violate Section 17 (the anti-fraud provision) of the Securities Act. The order provides an opportunity for hearing, upon request, on the question whether the suspension should be vacated or made permanent.

The alleged misrepresentations relate primarily to Utah Oil's failure to disclose in its offering circular (1) the cost to the company; (2) the dates, terms and material provisions of such leases, which are the company's only properties* (3) the distances of the properties from production and dry holes, the fact that the company's acreage was chosen at random without benefit of favorable geological data or information, and the fact that the leases alone are too small in area to justify the cost of geophysical work or expenditures for a wildcat test; (4) a reasonably itemized statement of the purposes for which the proceeds of the stock offering are to be used, as well as the provisions for refunding amounts paid by purchasers if all of the shares are not sold; and (5) the method by which the securities are to be offered and the fact that the named underwriter has withdrawn from the offering. It is also asserted that the company failed to furnish appropriate financial statements.—V. 187, p. 2273.

Victoreen Instrument Co.—News—

Sales of the Cleveland company and its subsidiaries, major producers of radiation detection equipment and electronic components, are at a current rate of \$13 million a year, and by the year's end will increase to a rate of \$20 million, David H. Cogan. President, told the company's annual stockholders' meeting held in Cleveland on April 12. He predicted that the company's sales would total \$50 million by 1965, and that profits would increase proportionately.

"These substantial increases will result chiefly from internal growth," Mr. Cogan said, "but will be augmented by acquisitions of compatible electronic companies."

He told the company's stockholders that 1959 sales and earnings did not benefit from the new financing carried out during the year, nor the acquisitions that were made in 1959.

"These important developments," he said, "will be reflected in 1960," and he added. "The company does not intend to do any additional financing in the foreseeable future."

Victoreen reported net income of \$390,940 on 1959 sales of \$7,776,761, both substantially higher than in 1958.

Mr. Cogan said that as of the year's end, Victoreen had \$3½ million in cash and government bonds "earmarked for both internal and external expansion programs. This cash reserve will be further augmented by present earnings," he said.

"The uses of radiation and radiation equipment for peaceful purposes are growing steadily," he said, "and the type of detection and measuring equipment in which Victoreen has pioneered promises to be increasingly important. Victoreen is currently working on international radiation detection and measuring equipment in connection with possible world-wide monitoring of nuclear testing facilities."

Mr. Cogan told the Victoreen stockholders that the company was in a basic growth industry "whose detection instrument sales alone will reach \$100 million this year."

Mr. Cogan said that during 1959 Victoreen added approximately 390,000 square feet of manufacturing space to its facilities
