The prospective demand for capital stemming from corporate and municipal issues with announced offering dates is summarized as follows: (Data in parentheses are last week's projection).

ultra-modern bowling center outside London. A proposal for a second European construction has been submitted by BarChris for a 32-lane bowling center near the site of the Clympic Stadium in Rome. The center is to be called Clympia Bowl.

The domestic contracts include the construction of four centers in Massachusetts, two in Boston, and two in Brockton. The fifth center will be in Brooklyn for the Fifty-Fifth Bowling Corpo.

The bowling center in London will be started within three months. It will be the largest bowling emporium of its kind in Europe and something of a pilot model for the entire continent. The Rome center, still under negotiation by BarChris, will be completely integrated in architecture and design with the Olympic Stadium. Both European contracts are an outgrowth of BarChris' recently formulated plans for the establishment of a subsidiary in Switzerland to handle bowling center construction in Western Europe.—V. 192, p. 495.

Bigelow-Sanford, Inc.-Legal Action-Dividend-

The company filed a complaint Aug. 10 in the U.S. District Court for the Southern District of New York against The Bemporad Carpet Corp. for infringement of Bigelow's "Valley Weave" patent (U.S. Patent No. 265594).

The suit sought an accounting for profits and damages, also an injunction against further infringement. Bigelow estimated that about 75% of all Wilton carpets made today, both domestic and foreign are made under its "Valley Weave" patent. The majority of this production is under license from Bigelow.

The suit had special interest in view of the rapidly increasing Wilton imports, particularly from Belgium and Japan. It is believed that this was the first instance of legal acton involving Wilton imports taken by a major American carpet company.

Cornucopia Gold Mines—SEC Decision—

In a decision announced on Aug. 12 the SEC ordered withdrawal of the common stock of Cornucopia of Pittsburgh, from listing and registration on the ASE, because of numerous violations of the reporting and disclosure requirements of the Securities Exchange Act of 1934.

The Exchange suspended trading in Cornucopia stock on May 20, 1958, by reason of the company's failure to distribute its 1957 annual report to stockholders; and during the period July 25, 1958, to 11, 1958, trading on the during the period July 25, 1958, to 11, 1958, trading on the company's failure to distribute its 1957 annual report to stockholders; and during the period July 25, 1958, to 11, 1958, trading on the company from 1941 until May, 1957, Cornucopia was adjudicated a bankrupe in Cotober 1958.

A dormant mining comeany from 1941 until May, 1957, Cornucopia had outstanding 3,978,800 common shares as of the latter date, of which 2,001,600 shares were cwned by A. A. Franks of Boston, In that month Franks sold 1,000,000 shares to Eastern Investment & Development Corp., the latter agreeing to pay \$150,000 in cash and \$99,000 by promissory note. The cash payment was made in part from the proceeds of a later loan of \$100,000 which Eastern obtained in May, 1957 from Urion Bank & Trust Co. of McKeesport, Pa. At this time Franks also placed another 1,000,000 shares in a ten-year voting trust, the voting trustees being Franks, Murray and Burton Talenfeld, and Earle Belle. Eastern, a real estate company organized in July, 1956, was owned and controlled by the Talenfeld sand Bell.

The latter had been introduced to Franks by Kalman Greenhill, representing Frank Proctor and Associates, Inc., which was owned by Greenhill, acting a behalf of the subsidiaries under the agreement, the Greenhill group was to receive 1,500,000 shares

nary stages.

In April or May, 1958, a disagreement between the Talenfelds and Belle resulted in Belle gaining sole control of Cornucopia and Fastern, including agreement by the Talenfelds to relinquish their voting trusteeships over the 2,900,000 common shares. In April, 1958 Belle gained control of the Manufacturers Bank of Edgewater, N. J., through Mitchell Ostwind, following which he obtained nine loans of \$12,500 each from the bank, represented by notes of certain of the subsidiaries and others; and the proceeds of seven of these loans in the total amount of \$87,500 were deposited with Feoples National Bank in Cornucopia's name and eventually \$50,000 from this account was used for Belle's personal benefit, In May, 1958, Belle obtained two additional loans of \$25,000 each from the Edgewater Bank in the names of Eastern and Belle, each secured by a deposit of 200,000 shares of Cornucopia stock.

Eastern and Belle, each secured by a deposit of 200,000 shares of Cornucopia stock.

In May, 1958 Alabama Acceptance (one of the Greenhill group) was adjudged a bankrupt and in June, 1958 the trustee filed an action against Greenhill, Proctor, Murray and Proctor Associates which challenged the right of Greenhill to negotiate the sale of the subsidiaries in exchange for Cornucopia stock. At about the same time the New Jersey state banking examiners requested the Edgewater Bank to remove the loans to Belle, Ostwind, Eastern and the subsidiary companies. Early in July, Belle arranged to cash checks for \$42,000 at the First National Bank of Saltsburg, Pa., which he controlled, and left the United States. Later, in July, 1958, creditors petitioned to, have both Cornucopia and Eastern declared bankrupt and both were subsequently adjudicated. In March, 1960 an indictment was returned against Belle and the Talenfelds in the U. S. District Court at Pittsburgh charging them among other things with violating the antimanipulative provisions of the Securities Exchange Act and the false statement, mall fraud and conspiracy provisions of the Criminal Code in connection with their transactions and dealings in Cornucopia stock and the filling of proxy soliciting and other material with the Commission, as well as violating other Federal statutes in connection with transactions with the Peoples Union Bank and the Security National Bank.

The Commission expected that in violating the terminal Convertions and the filling of proxy soliciting and the security National Bank.

The Commission concluded that in view of the serious nature of the false and misleading disclosures contained in Cornucopia's annual report and proxy statement with respect to many of the above and other developments in the affairs of the company, as well as the company's failure to file required current reports disclosing the events as they occurred, it was necessary in the public interest and for the protection of investors that Cornucopia's stock be withdrawn from listing and registration on the Exchange.—V. 188, p. 2028.

Emerson Radio & Phonograph Corp.—News—
DuMont Emerson Corp. sales and marketing subsidiary of Emerson Radio & Phonograph Corp., Aug. 15 announced a new financing plan for DuMont and Emerson dealers whereby the company will use a commercial finance organization on an exclusive basis rather than set up its own financing facilities.

Benjamin Abrams, DuMont Emerson President, said a contract signed with James Talcott, Inc. will provide inventory financing for nearly 10,000 dealers and will finance the sales of approximately 200 regional distributors. Advantages of the new plan are that it provides a single scurce of funds to finance dealers' inventories and eliminates much of the paper work required when local imancing is used.

The move is significant for Talcott in that it marks the first time that this 106-year-old commercial finance and factoring organization has undertaken to finance the distribution of non-income-producing goods at the wholesale level. The company has been active for several years in financing instalment sales of income-producing equipment.

Herbert R. Silverman, Talcott President, noted that within the past year his company had negotiated exclusive financing plans with Pettibone-Mulliken Corp., manufacturers of construction equipment, and Dorsey Trailers, Inc.—V. 192, p. 497.

In announcing the first half figures for 1960, Frank A. The remaining 40% was over 10 years old. Nearly all Lowell producers, maintaing inadequate depreciation allowances are hoboling growth of the domestic industry, cited rising foreign competition. It was chanimously agreed that Lowell plants have not, as yet, obtained the "very latest machinery they need." They said any increase in depreciation allowances would be channeled at once into new machine orders.

One Lowell executive said in footwear the small manufacturers can compete with large companies and urged that such enterprise be backed "to the fullest" by favorable action of public officials.

In Fhiladelphia, spokesmen for the trade insisted they could not afford to be without up-to-date equipment. Many reported sizable acquisitions of shoe-making machines during the past two years, Faster depreciation allowances during the past two years. Complete and exact details for the week covered by the foregoing will appear in our issue of next week. We cannot furnish them today, inasmuch as the week ends Saturday and the Saturday figures are not available at time of going to press. Accordingly, in the above the last day of the week in all cases has to be estimated.

In the elaborate detailed statement, however, which we present further below, we are able to give final and complete results of the previous week—the week ended Aug. 13. For that week there was an increase of 5.4%, the aggregate clearings for the whole country, having amounted to \$24,689,767,673 against \$23,429,331,739 in the same week in 1959. Outside of this city there was a loss of 2.9%, the bank clearings at this center showing an increase of 14.4%. We group the cities according to the Federal Reserve Districts in which they are located and from this we note that in the New York: Reserve District the totals record an expansion of 13.6%, but in the Boston Reserve District the totals register a decline of 0.9% and in the Philadelphia Reserve District of 3.7%. In the Cleveland Reserve District the totals are smaller by 6.2% and in the Richmond Reserve District by 3.4%, but in the Atlanta Reserve District the totals are larger by 1.1%. The Chicago Reserve District shows a loss of 1.6%, the St. Louis Reserve District of 3.1% and the Minneapolis Reserve District of 2.7%. Offshore Co.-Buys Equipment & License-

The company of Baton Rouge, owners and operators of deep-water mobile drilling units, on Aug. 15 announced the purchase of two deep-water offshore drilling barges from the DeLong Corp.

The company also has acquired the world-wide exclusive license from DeLong to make, use, sell, and rent jacking mechanisms, platforms and structures utilizing DeLong patented designs and inventions, for

exploration for and production of cil, gas, and minerals lying under bodies of water. This will enable Oifshore to contract for drilling in offshore waters in all parts of the world.

One of the newly acquired drill barges is drilling for Pan American International Oil Co. in the Persian Gulf, and the other is under contract to Texaco-Trinidad, operating offshore from Trinidad, B.W.I. in the Gulf of Paria.

The Fersian Gulf drill barge is a sister drill barge to one owned by Offshore operating in the Gulf of Paria, and another operating in the Gulf of Mexico. These three are among the largest units of their kind in operation. The Persian Gulf drill barge is equipped with a drilling rig capable of drilling a 20,000-foot-deep well, air conditioned quarters and dining facilities for 50 crewmen, a helicopter landing deck, and all equipment necessary to enable it to operate self-sufficiently in remote areas. This giant barge, measuring 200 feet by 104 feet, and having eight towers or jacks 240 feet long—each of which is equipped with two 400-ton capacity DeLong, Jacks—is currently probing the floor of the Persian Gulf in waters in excess of 100 feet deep.

Other Offshore mobile deep well, deep water drilling rigs are operating in the Gulf of Mexico and in the Gulf of Paria, while a tendertype rig is drilling in Lake Maraceiho, Venezuela.

In addition to the DeLong self-elevating drill barges, Offshore also operates self contained platform rigs, tender-type rigs, submersible barge rigs, floating drill barges, as well as inland shallow water barges and land rigs.

Stone Container Corp. (& Subs.)—New Highs—News. Consolidated net sales of this corporation and its subsidiaries reached a new first half peak in the six months ended June 30, 1960, while per share earnings, despite competitive pressures on profit margins, almost equeled the first half figure attained in 1959, Norman H. Stone, Chairman and President, announced on Aug. 4.

The Chicago-based corporation is active in the paperboard and container industry. In 14 plants, it produces a wide variety of paperboard, corrugated containers, folding cartons, set-up boxes and fibre cans and tubes. These are used in the packing and shipping of such diverse items as foods, furniture, drugs, household and electrical equipment, luggage and auto parts.

Consolidated net sales in the first six months of 1960 amounted to \$22,841,752, an increase of 16% over \$19,710,469 in the corresponding period lost year, First-half consolidated net income, after provision for taxes; was \$956,786, equal to \$1.18 per common share, compared with \$977,426, or \$1.21 per common share in the year earlier period. The earnings per share for both years are based on 803,917 common shares presently outstanding; reflecting the 4% stock dividend paid in January, 1960.

Mr. Stone attributed the 16% sales gain to the acquisition of tha

Acme Carton and Delmar Paper Box companies in the latter part of 1959, and the start of operations in April at the new North Chicago facility, as well as to a general improvement in other segments of the business.

Greater competition in the paperboard industry, non-recurring expenses at the Coshocton and North Chicago plants, and a general increase in operating costs had an adverse effect on earnings. he noted.

Mr. Stone said that all plants are currently operating at good levels, and some at near capacity. "We are confident that we will have a satisfactory year in 1969."—V. 191, p. 1817.

Stylon Corp.—Earnings Triple—

The Milford, Mass., corporation, fourth largest v. S. ceramic tile manufacturer, has on Aug. 11 reported record earnings for the fourth straight quarter. For the three months ended June 30, 1960, net income rose to \$285,304 from \$132,807. in the second quarter of 1959. Net income for the six months ended June 30, 1960, rose to \$548,777 from \$175,926 in the first half of 1959. Figures for 1959 are on a pro forma basis, giving effect to a merger of Redondo Tile Co. into Stylon in April of this year.

On a per share basis, earnings for the second quarter were 13 cents compared with 6 cents last year, and six months earnings of 25 cents compared with 8 cents in the similar period in 1959.

Sales for the six months ended June 30, 1960 were \$6,03,3820, up from \$5,492,975 pro forma in 1959. Sales for the June quarter were \$3,038,568 compared with \$3,065,776 in 1959.

"It is particularly gratifying." said President Joseph Mass, "that these results were accomplished despite a 17% drop in home building this year and increased imports from low wage countries abroad. Our ability to hold and improve our share of the ceramic tile market and to produce good earnings in the face of intense price competition in our industry is the natural outcome of low cost production of our quality product and its intensive promotion and marketing."

Directors of Stylon voted the regular quarterly dividend of 6'4 cents per share, payable Sept. 15 to stockholders of record Aug. 25, marking the third such dividend declared this year in line with their plan to place Stylon on a 25 cents annual dividend basis.—V. 191, p. 2096.

Summers Gyroscope Co.—Stock to Be Offered—
David A. Stretch, President of Atlas Corp. announced on Aug. 4 that all of the stock of Summers Gyroscope Co. owned by Atlas will be offered pro rata to the common stockholders of Atlas at a price substantially below the current market price of Atlas at a price substantially below the current market price of the Summers stock.

In making this announcement, Mr. Stretch said that a registration statement covering this offering is expected to be filed with the SEC before the end of August and that the offering will be made as soon as the registration becomes effective, which will probably be in October, Mr. Stretch said that prior to the offering, all the debt of Summers Gyroscope owned by Atlas will be converted into common stock of Summers. The Atlas offering will involve about 5,700,000 shares. Each holder of one share of Atlas common stock will have transferable subscription rights representing the primary right to buy at least one-half share of the Summers stock and the secondary right, if the primary right is exercised, to buy the stock not subscribed for by all other stock-holders under the primary right, with pro ration among secondary subscribers in case of an over subscription.

This offering is being made to meet a problem before the Civil Aeronautics Board arising out of the control by Atlas Corp. of Northeast Airlines, Inc., based on the fact that Summers Gyroscope Co. is regarded as engaged in a phase of aeronautics, Atlas Corp. last winter proposed to the Civil Aeronautics Board a plan of divestiture of its Summers holdings, it being in effect the plan now to be carried out.

The plan to sell the Summers stock to the Atlas common stockholders at a price below its present market price would not divest Atlas Corp. of control of Summers Gyroscope Co., if, for any reason, the offering were not subscribed in full. To meet this point, Atlas has negotiated a firm commitment from Floyd B. Odlum to buy all of the Summers stock when it converts into stock the debt of

The corporation on Aug. 10 broke ground in Mexico City for a new plant for the production of pigments which is expected to be the largest facility of its kind serving Latin America's growing printing ink textile, coating and finishing industries.

A ground blessing ceremony was held on the 26-acre site of the new plant, at Toluca, about 25 miles south of the capital city, following which Sun's Vice-President Eric Llackstead turned the first spade of earth in the presence of the Mayor of Toluca, officials of Sun Chemical Corp. and other prominent persons. ing which Sun's Vice-President Eric Llackstead turned the first spade of earth in the presence of the Mayor of Toluca, officials of Sun Chemical Corp. and other prominent persons. A luncheon was held afterwards.

Sun's President, Norman E. Alexander, said in New York that the venture will make Mexico independent of pigment imports from other countries and will provide the proposed Latin American Common Market with its own source of a full line of organic and inorganic pigments. "Sun will back its new Mexican plant with more than 100 years experience in the manufacture and scientific development of dry, dispersed and flushed colors gained by its subsidiary, Ansacher-Siegle Corp., which operates a pigment plant at Rosebank, Staten Island," Mr. Alexander said.

"The industrial development of Mexico and the near-term growth opportunities existing in many South American countries have created a demand for facilities operated by an experienced high-quality producer of Sun's character. Sun has been encouraged by the business and economic climate existing in Mexico and the company looks forward to healthy growth in harmony with the advances being made by America's good neighbors to the South."

Sun's plant will be the first in Latin America to manufacture a complete line of organic and inorganic pigments conforming to world-recognized standards. Heretofore, some of these products were produced by a few small plants in Mexico, but almost all of the present consumption is imported from the United States and Europe.

Mr. Alexander indicated that a substantial investment of capital will be required for the new facility which is expected to be in operation by Dec. 1. An estimated 25 workers will be employed at the start with the number to increase as volume grows.

The plant will operate under the name of Ansbacher-Siegle de Mexico S. A., as part of Sun's International Operations froup headed by William P. Eittenbender. E. W. Clayton will be General Manager of the new plant.

Telecomputing Corp.—Contracts Awarded—
Orders totaling approximately \$300,000 were awarded to corporation of Los Angeles, Calif. for tracking antennas, including the first contracts for its new and unique "Tetrac" antenna, Wm. R. Whittaker, President, announced.

Naval Research Laboratory has order an 85-foot "Tetrac" antenna for 'ts radio telescope installation at Maryland Point Observatory, Md. A 60-foot one is being built for Naval Electronics Laboratory, Pt. Loma, Calif. Both units will be used in tracking objects in space, and are scheduled for delivery for the latter part of the year.

Mr. Whittaker stated that the "Tetrac" contracts, which are in excess of \$300,000, are highly significant because "they represent acceptance of what Telecomputing considers a major breakthrough in lower cost production of highly accurate large antennas, which have been under development for over two years at company expense at Telecomputing's Narmco Industries' manufacturing division."

Special design feature or "Tetrac" antennas is its simplicity of fabrication and assembly. Produced and shipped in modular components, it is designed to be assembled and adjusted in the field.

The remaining contract is for smaller precision antennas utilizing sandwich structure materials of metal and fiberglass. Also being produced by Narmco manufacturing division, this order calls for 22-foot dishes to be made with another Telecomputing development, the multi-wave sandwich core, which is flexible, and easily formed to the necessary curve of these dishes.—V. 192, p. 349.

In his report to shareholders, Mr. Carpenter said, "A good portion of these increased revenues both for the six months and the latest quarter are attributable to higher rates for natural gas put into effect on Dec. 1, 1959, subject to refund." He added that there were no further developments in the company's two pending rate cases.

During the quarter, the company filed an application with the Federal Power Commission to expand its natural gas system capacity by approximately 50 million cubic feet per day, primarily for delivery to 15 present customers. The program, estimated to cost \$17.5 million, will consist principally of additional loop lines and expanded compressor horsepower for the present system.

Mr. Carpenter noted the steady progress in build-up of traffic through the Little Big Inch petroleum products pipeline system during the quarter.

A new terminal on the Little Big Inch, constructed by Phillips Petroleum Co. at Arcadia, La., was placed into operation in March. Another terminal at Arcadia and one at Norris City, Ill., are under construction by two other oil companies. Existing terminals have also experienced substantial increases in shipments.

Mr. Carpenter added that construction will begin in the near future of 89 miles of 10-inch diameter pipeline between Lebanon and Lima, Ohio, to connect the Little Big Inch system with the products pipeline system of Euckeye Pipe Line. The joint venture, which is expected to be completed by fall, will tie Little Big Inch shippers in with vast new markets in the Ohio-Michigan area.—V. 192, p. 542.

Six months sales and earnings of this manufacturer of electrical fittings and accessories were the best in the company's history for such a period. This is cited by President N. J. MacDonald in an interim report to stockholders. The sales gain was registered, he said, in spite of unsettled conditions and consequent pressure on prices in some markets, and the earnings gains were scored in spite of further increases in labor, material and other operating costs.

The progress being made in equipping and staffing its new Pos-E-Kon division also augurs an early contribution to the company's sales. This division manufactures precision connectors for flat conductor cable required in missile and space age applications in which miniaturization is a prime requisite. Additional laboratory equipment has been installed which will enable the company to intensify research and development in many of the new and sensitive products required by electronic and space age applications. Sales agencies specializing in the electronics field have been added in order to give concentrated sales efforts.

The company's net sales for the six months ended June 30, 1960, amounted to \$11,571,000, compared with \$10,547,000 sales in the first half of 1959.
