Arco Electronics, Inc.—Record Highs—

Sales of Arco Electronics, Inc., sales and marketing agency for manufacturers of electronic products and itself a manufacturer of a complementary line of capacitors and related components, rose to $2,530,221 for the fiscal year ended Sept. 30, 1960, according to unaudited figures. This produced net income of $280,304, or 33 cents a share on 845,000 shares outstanding.

"Both volume and profit for the year set all-time records," Albert I. Rothenstein, President of the New York company, said, "and sales in September were the best for any month in Arco's history."

Arco, which recently became publicly owned, changed the date of its fiscal year in 1959. For comparative purposes, therefore, sales and profit figures for the previous year were calculated on a projection of the first nine months of 1959. These showed total pro-forma profit, for the year ended Sept. 30, 1959, of $168,121, or 20 cents a share, on sales of $1,999,309. Thus, Mr. Rothenstein said, profit in fiscal '60 rose 64% on a sales increase of 26.3% from the previous year.—V. 192, p. 593.

Two new Driam pipe machines also will be installed in the new layout

Concentration of spiral welded pipe production at the newer plant completes a program of transferring the operations which was started in 1956, Mr. Johnston explained. The removal of spiral welded pipe facilities from the main fabricating plant will provide additional space there for the manufacture of formed products and new products.

Construction work will begin shortly after the first of the year.—V. 192, p. 1607.

Beckman Instruments, Inc.—Forecast—

Beckman Instruments, Inc., expects sales of $65 million and earnings near the $4 million mark for the current fiscal year ending next June 30, Dr. Arnold O. Beckman, President, stated on Nov. 16 at the annual shareholders meeting in Fullerton, Calif.

Dr. Beckman said the estimated reflected earlier predictions by the company of increases of at least 20% in sales and earnings for the year. He based his estimate on a record backlog, increasing sales of new products, company-wide cost reduction programs, and the sale last April of an unprofitable subsidiary, the Shockley Transistor Corp.

For the fiscal year ending last June 30, Beckman reported record sales and earnings of $54,257,282 and $3,092,915, respectively, compared with sales of $44,872,768 and earnings of $1,771,689 for fiscal 1959. Per-share earnings were $2.24 in 1960 and $1.30 in 1959.

Dr. Beckman told shareholders new products are accounting for a substantial portion of the company's increasing sales. Among the new items, he cited a physiological gas analyzer which measures oxygen directly in the human body, a new laboratory Pycnometer which cuts the process of computing density of materials from hours to less than a minute, a new line of digital voltmeters for missile checkout sys-

Corporate and Municipal Financing Ahead

By SIDNEY BROWN

The alternate play of corporate bonds publicly offered this week and municipal issues next week promises to make the first half of December an active financing period. The large securities coming out are identified at the end of this column for the week they are scheduled to appear. Details regarding these and all other issues expected to be offered may be found in the Monday and Thursday issues of the *Chronicle*.

The immediate weeks ahead mark, of course, the last opportunity for capital financing in 1960 before the holiday season commences and the year ends. Estimated corporate public offerings now slated for the market add up to slightly more than $400 million and of this amount fixed debt obligations comprise about 70% of the total. Last year's December corporate sales came to $185.9 million for bonds and $277.2 for corporate stocks—or a total of $463 million. Last year we underestimated this amount by about $13 million.

A quick grasp of what the financing now tentatively scheduled for the remaining weeks of December looks like may be obtained from the following table. Data making up the totals for each of the respective four weeks are obtained from private and public sources ranging from federal commissions to underwriters and syndicate managers.

INDECISIVENESS OF THE MARKET

Capital and credit market conditions at the end of last year were certainly quite different than what they are now. Interest rates were high as were, too, the generally held business prospects about the economy. In view of present-day bearish sentiments being expressed, and in view of the drop in the D-J stock market index, it is surprising that November encompassed more corporate financing than last year's comparable month and that this December's financing appears to come close to that of a year ago (bullish feeling). As seen here the bond investors have not yet made up their minds as to the outlook's direction. The stock market investor, on the other hand, has made up his mind, but he takes a shorter-run view of the economy than does the bond investor. The latter is principally concerned about the longer-run picture. The individual and institutional bond investor offers an indeterminate prognosis of the long run—if we take the New York Stock Exchange dealings in bonds as our measuring stick. Our tabulation of bonds on the NYSE for the most part of the month just ended shows 90 lows and 87 highs. The indecisiveness of this performance, insofar as it is a guideline as to attitudes expressed or held regarding the economy's direction, belies readings obtained from our unemployment and excess capacity rate. Further evidence of indecisive views held may be gathered from the contradictory drop in the stock market and persistent refusal for bond yields to drop significantly and customarily. The interest rate decline is still less than what one should expect from a reading of all the economic barometers of our lead and lag business cycle indicators.

In recent financing, those bond issues that paid an attractive interest rate or accepted a discount from par to induce acceptance were successfully floated and helped stimulate interest in the bond backlog of unsold issues willing to follow the trend. An example of this is the last minute change in the Federal National Mortgage Association's flotation the other day for its $100 million 6-year 4⅛% debentures. The bonds were brought out at a discount of 99¼% from par.

Another example should reveal, even more clearly, the present state of a relatively high short-term interest rate which, in turn, is keeping intermediate and long-term rates high. The $12.5 million Texas Veterans G.O. was scheduled for today, Dec. 5. The incoming State Land Commissioner, who will be Chairman of the Texas Veterans Land Board on the first of next year, apparently objecting to present-day yields on municipals, rescinded the issue. He prefers to wait until the new Administration takes over in Washington. He expects a change in Federal economics will improve the market conditions for the issuance of municipals. It may very well be that what he expects may not transpire. This is so in view of the still higher yields for short terms in Europe, the prospect that our budget will run into the red next year, and the fact that the bond investors may be correct about the revival prospects of the economy by mid-1961.

Bendix Corp.—Completes British Sale—

The company on Nov. 28 announced completion of the sale of its holding in Elliott-Automation Ltd., an English manufacturer of a wide variety of instruments and industrial type equipment.

Bendix decided to dispose of its holding because its investment, which represented approximately a one-third equity interest when originally made in 1953, has now been reduced to approximately a 7½% interest. The principal reason for this reduction has been the rapid expansion of the Elliott Group through mergers with and acquisitions of other English companies, Bendix said.

According to Malcolm P. Ferguson, President of Bendix, this sale in no way affects the close cooperation which has been developed between Bendix and Elliott in the licensing, technical and commercial fields. C. C. Tillinghast, Jr., a Vice-President and Director of Bendix, will continue as a Director of Elliott.—V. 191, p. 1490.

Ben Hur Gold, Inc.—Hearing Scheduled—

Upon request of Ben Hur Gold Inc., Boise, Idaho, the SEC, it was announced on Nov. 28, was scheduled a hearing for Dec. 1, 1960, in the Federal Building, Boise, Idaho, on the question whether to vacate, or to make permanent, an earlier order of the Commission temporarily suspending a Regulation A exemption from registration under the Securities Act of 1933 with respect to a public stock offering by the said company.

The stock offering was made pursuant to a notification filed in March, 1959 and involved 200,000 shares of stock to be offered at ten cents per share. The Commission's suspension order, issued on April 16, 1959, asserted that certain terms and conditions of Regulation A had not been complied with; that the company's offering circular was false and misleading in respect of various material facts; and that, because thereof and the further fact that statements were made implying the existence of commercial quantities of ore and successful mining operations, the stock offering would violate Section 17 (the anti-fraud provision) of the Securities Act.—V. 189, p. 1923.

Boeing Airplane Co.—Forms Canadian Subsidiary—

The company on Nov. 17 announced formation of Boeing of Canada, Ltd. as an expanded subsidiary with headquarters at Arnprior, Ont., following a meeting of shareholders on Nov. 16. Wellwood E. Beall, Boeing Senior Vice-President, said the new company would "broaden the interests" of Boeing in Canada.

Creation of the new company was through reorganization of Canadian Vertol Aircraft, Ltd., a Boeing affiliate, and expansion of its board of directors.

Boeing acquired the Canadian company through the purchase of its parent organization, the Vertol Aircraft Corp., Morton, Pa., early in 1960. The reorganization represents the first appearance of the Boeing name in Canadian industry since World War II, when Boeing Aircraft of Canada, Ltd. manufactured B-29 bomber sub-assemblies and other components in a Vancouver, B. C. factory leased from the Canadian Government.—V. 192, p. 1910.

The underwriters will receive a commission of 60 cents per share, and, in addition, the company has agreed to pay the underwriters an amount of $18,000 for expenses. The prospectus states that the company has sold to the underwriters a total of 15,000 shares of its class B common stock at $1 a share subject to repurchase at the same price if the shares of class A common stock now proposed to be offered are not sold. It also converts into, alters, and modernizes bowling establishments and is itself a bowling center operator. The net proceeds from the sale of class A and class B stock will be added to general working capital, which may be used to obtain options or to make payments on real property upon which the company intends to build. Such working capital may be used for material and labor costs incurred in constructing buildings although the company plans to rely primarily on mortgage financing for such purpose wherever possible.

The company has outstanding 60,000 shares of class A common stock and 22,000 shares of class B stock. Arnold Malkan, Treasurer owns of record as trustee 18,000 class A shares, and Hartley Lord, President, and Marion Lord own 15,000 class A shares each. The underwriters own 15,000 class B shares. The registration statement also includes 37,500 class A common shares which underlie five year options to purchase such shares at $5 per share which have been granted to the management officials as part of their employment contracts. According to the prospectus, the present holders of class A common stock will have a total cash investment in the company of $70,250. After the sale of shares offered, they will own about 33⅓% of such stock then outstanding.

Cerro de Pasco Corp.—Subsidiary Expansion—

The $10 million-expansion program at the Fairmont Aluminum Co. rolling mill is progressing on schedule, President Robert T. Farrell reported on Nov. 22. He added that he expects the new facility to be in operation sometime in the spring of 1961.

A subsidiary of Cerro de Pasco Corp., New York City, Fairmont Aluminum will have one of the largest plants of its type in the United States, when the addition is completed. Mr. Farrell said that the existing mill also is undergoing an extensive modernization program as part of the $10 million program. This involves the installation of highly efficient, up-to-date machinery.

The Fairmont expansion, designed to increase coil and sheet aluminum production nearly 150%, will give the plant a yearly capacity of 66 million pounds of aluminum, as compared with the present 25 million pounds.—V. 192, p. 1300.

Chattanooga Glass Co.—Acquired—

This major manufacturer of soft drink bottles, has sold all of its outstanding capital stock to the Dorsey Corp., a holding company, Reginald Armour, Dorsey President announced on Nov. 29.

Dorsey, which owns the Dorsey Trailer Co., manufacturers of commercial truck trailers, revealed the following purchase agreement:

The total purchase price is represented by a cash payment of $5,805,625 and 150,000 shares of Dorsey common stock at a price of $7.9625 per share.

The major seller of the Chattanooga stock was a group represented by J. Frank Harrison, the company's Vice-President. This group owned 1,300 of the 3,000 shares of outstanding stock and received about 43% of the consideration paid. All former stockholders of Chattanooga now own collectively 19.6% of Dorsey's voting securities.

Mr. Armour emphasized that his company would retain the present management of Chattanooga to run the new Dorsey subsidiary.

Chattanooga Glass, a privately owned company, was incorporated in Tennessee in 1901 and last year showed yearly sales of approximately $9,500,000. In addition to its main plant in Chattanooga, since 1956 it has maintained a wholly-owned susbidiary in Corsicanna, Texas.

Both the Tennessee and the Texas factories are devoted to the manufacture of glass containers with special emphasis on returnable soft drink bottles. About 70% of the company's total production is Coca-Cola bottles made in the United States. In addition, the company manufactures bottles for 12 other major soft drink producers.

The sales of Chattanooga Glass in 1959 represented approximately 12% of the entire national production of returnable glass bottles. The company has maintained this share of the market—between 10 and 12%—over the past 10 years.—V. 191, p. 2303.

Cincinnati Gas & Electric Co. (& Subs.)—Net Up—

Net earnings of this utility and its subsidiaries for the 12 months ended Sept. 30, 1960, totaled $17,577,483, or $2.26 a common share, after preferred dividends, on the outstanding 7,747,215 shares. This compares with net earnings for the same period in 1959 of $14,144,714, or $1.84 per share on the 7,665,705 shares then outstanding, reported Ernest S. Fields, President, in a quarterly report to shareowners. Net income per common share for the quarter ended Sept. 30, 1960, was 20 cents compared to 19 cents for the same quarter of 1959, both based on the outstanding shares at the ends of the respective periods.

Mr. Fields stated that although electric and gas operating revenues were higher than for the corresponding periods of last year, operating expenses and taxes were also much greater. For the year ended Sept. 30, taxes alone increased over $5 million.

During the 12 months ended Sept. 30, the company's investment in property, plant and equipment increased $34,504,060. Gas franchises have been obtained in the villages of Mason, Millville, Terrace Park, Milford, Cleves and North Bend, and gas service has been initiated in those communities.

The new 168,000-kilowatt generating unit No. 6 at the company's Miami Fort Generating Station now is in commercial operation. The addition of this unit brings the total generating capacity of the company's three stations up to 1,228,000 kilowatts. Substructure work on a new 225,000-kilowatt unit No. 5 at the Walter C. Beckjord Station is substantially complete. This unit is scheduled for operation late in 1962.—V. 191, p. 2088.

Columbia Gas System, Inc.—Applies for SEC Order—

This N. Y. holding company, has applied to the SEC for an order authorizing the company to execute a surety bond for its wholly-owned gas utility subsidiary company, United Fuel Gas Co., and the Commission has issued an order giving interested persons until Dec. 5, 1960, to request a hearing on the proposal, it was announced on Nov. 25.

United Fuel Gas Co. has filed with the Public Service Commission of West Virginia an application for increased gas rates estimated to produce increased annual revenues of approximately $4,682,000. Under applicable West Virginia law, United is collecting the higher rates provided for in the rate filing subject to the obligation to refund, with interest, any portion of the higher rates which may ultimately be determined to be excessive. This refund obligation is now guaranteed by two bonds in the amounts of $1,600,000 and $100,000, executed by United with Columbia as surety. On Nov. 2, 1960, the West Virginia Commission issued an order requiring the posting of an additional bond of $1,000,000 as security for the obligation to refund. Columbia proposes to act as surety on said bond without fee or other charges to United in order to relieve United of paying the customary fee of an insurance company.—V. 192, p. 1911.

Commercial Credit Co.—Appointments—

The United States Trust Co. of New York has been named trustee, paying agent and registrar for $50,000,000 of the company's 4¾% notes due Nov. 1, 1980.—V. 192, p. 1812.

Compo Shoe Machinery Corp.—New Activity—Sub. Officer—

The 30-year-old Waltham, Mass., corporation has entered the electronics industry with the development of equipment for use in the processing of electronic printed circuitry. The announcement of this diversification follows the recent election of George J. Schwartz, formerly of the Minneapolis-Honeywell Regulator Co., as President of Compo.

Mr. Schwartz announced the formation of a Special Products Division to develop and market automatic conveyorized soldering and fluxing equipment and related products for the processing of electronic printed circuitry. The engineering and marketing skills needed for this diversification already exist within the company because of its long experience in the design and production of conveyorized and highly automatic shoe machinery, Mr. Schwartz said.

The Special Products Division will be managed by Joseph A. Vitka, also a former executive of Minneapolis-Honeywell, and the research will be directed by Cal Isaacson, founder and former President of Wellesley Engineering, Inc. Mr. Schwartz said that a substantial number of electronic equipment makers have already installed Compo's soldering equipment, which is being marketed under the trade name "Adawave."

Daniel M. Lamb has been appointed Vice-President and General Manager of Compo Chemical Co., wholly-owned subsidiary of Compo Shoe Machinery Corp. Mr. Lamb was formerly technical director and Treasurer of Better Finishes and Coatings, Inc. He was educated at the University of Minnesota and Rutgers University and began his career with American Cyanamid.—V. 192, p. 2016.

Consolidated Electronics Industries Corp.—Earnings—

Net sales and revenues of the company for the nine-month period ended Sept. 30, 1960, were $69,558,327, with income of $3,118,149, or $1.10 per share after provision for Federal income taxes, Pieter van den Berg, President, reported on Nov. 22.

"The many changes in the activities and structure of the company in 1959 make a comparison with last year difficult," Mr. van den Berg told stockholders in an interim report. "Despite the economic leveling off throughout the United States, sales of the company have continued to increase over last year. Profit margins, however, have decreased because of competitive pressures, and also because during the year considerable expense has been incurred in the development of the pharmaceutical activities of our subsidiary, Philips Electronics and Pharmaceutical Industries Corp."—V. 191, p. 2200.

The company has outstanding 40,200 shares of class B stock, of which Bernard L. Glass, President, owns 15,580 shares; Saul Lebow, a Vice President, owns 11,560 shares, and management officials as a group own 100% of such shares.

Electric Bond & Share Co.—Net Down—News—

Net income for the nine months ending Sept. 30, 1960 was $4.837,610, or 92 cents a share, compared with $5,968,459, or $1.14 a share, for the corresponding period of 1959, a decrease of 19%, according to the company's financial statements released on Nov. 18.

Decreases in dividends received from American & Foreign Power Co. and Ebasco Services Inc. were offset in part by a 50% increase in dividends from Chemical Construction Corp., increased income from short-term securities, and interest received on notes of Escambia Chemical Corp.

The reduction in Foreign Power's dividend rate was attributable to the loss of earnings from Cuba. The reduction in the Ebasco dividend in the third quarter was due principally to a slowing down in utility plant construction, contracts received in both 1959 and 1960 being below the average of the past ten years. The long-term outlook for Ebasco is favorable.

Bond and Share paid a third quarter dividend of 30 cents a share on Sept. 29, bringing dividends for the first nine months to 90 cents a share. The company is advised by counsel that, on the basis of a tentative determination, dividends paid in 1960 are not subject to taxation as dividend income under United States income tax law and regulations.

Net asset value of the common stock at Sept. 30, 1960 was $143,952,600, or $27.42 a share, 3% less than at the end of the second quarter and 10% less than the corresponding period of 1959. The decline from a year ago was caused mainly by the drop in the market price of Foreign Power common stock as a result of developments in Cuba.

The securities portfolio, the largest segment of Bond and Share's assets, had a value at Sept. 30 of $63 million which, together with net current assets and short-term investments, amounted to $88 million and represented 61% of total net assets. Holdings of Foreign Power common stock amounted to 18% of assets and the investment in Escambia Chemical to 12%.

Market value of stocks acquired since the start of the investment program in 1954 was $43 million, 32% above cost. In addition, $5,300,000 has been realized in gains from sales of portfolio securities since 1954, of which $1,300,000 has been realized so far in 1960.

Preliminary unaudited corporate net income of Foreign Power for the first three quarters of 1960 was 75 cents a share as compared to 84 cents a share for the same period in 1959. It was pointed out that the loss of income from Cuba, amounting to $5,628,000 for the first nine months of 1959, had been offset to a substantial extent by increased income from Chile and Mexico. The new turn of Foreign Power's activities in Mexico and similar prospects in other countries should improve stability and add profits by shifting part of Foreign Power's investment from the utility business to industrial and commercial businesses.

Chemical Construction Corp.'s business continues to expand. Considerable growth is indicated in Japan and other countries in the Far East and there is increasing interest in Chemico's processes in Europe. Chemico engineers are currently working on 18 projects in the United States and in nine other countries throughout the world. A significant new process for the production of alum, an important chemical in paper production and water treating, has been perfected at Chemico's research and development center at New Brunswick, N. J. The process results in substantial savings in capital and operating costs. This should prove a valuable addition to Chemico's increasing range of processes offered to industry.

In reporting on its subsidiary, Ebasco Services Inc., the company stated that Ebasco's backlog of contracts at the end of September was 10% higher than, and its construction backlog about the same level as, at the end of the year. As a result of a slowing down in utility plant construction, contracts received in both 1959 and 1960 are below the average of the past ten years and earnings are less than the annual dividend of $2,500,000 paid for the last eight years. To be conservative, the dividend rate was brought in line with reasonably expectable earnings for the near future. The long-term outlook for Ebasco remains good. The dollar requirements for power plant construction are forecast to be over 50% greater in the '60s than in the '50s. The outlook for the Management Consulting Division is also favorable.

Of particular importance, the company reported, was the recent announcement by the Atomic Energy Commission that a contract is being negotiated with Ebasco for performance of complete architect-engineering services in connection with an advanced test reactor planned for the Commission's National Reactor Testing Station in Idaho. The proposed reactor will have a capacity of 250,000 kilowatts of heat. The largest existing nuclear testing facility has an operating power level of 175,000 kilowatts of heat.

Ebasco has joined with Vandeburg-Linkletter Associates, Inc., and Walter Kidde Constructors, Inc., the latest addition to the Bond and Share family, to form a group known as V-E-K Associates, to provide services for exhibitors at the 1964-65 New York World's Fair. Each organization has recognized talents in its field—Vandeburg-Linkletter in conceptual planning, programming of shows and special events; Ebasco in facilities planning and design; and Kidde in design and construction.

On Nov. 9, Bond and Share acquired all the stock of Walter Kidde Constructors, Inc., thereby expanding the scope of engineering and construction services offered to industrial and other clients by Bond and Share subsidiaries.—V. 192, p. 1491.

Electro Instruments, Inc.—Sells Facilities—

Narmco Industries, Inc., a wholly-owned subsidiary of Telecomputing Corp., purchased Electro Instruments, Inc.'s research facility, it was jointly announced by Jonathan Edwards and Wm. R. Whittaker, respective presidents of the two corporations.

The newly acquired facility is 43,000 square feet on approximately 11 acres in San Diego's Research Park. It is immediately adjacent to Narmco's Research & Development division.

After modification, it will be utilized to expand the company's studies in the fields of materials and structures, Whittaker said.

"Obtaining this facility," according to Whittaker, "enables Telecomputing to utilize its established site in Research Park for its growing corporate research programs which are under the direction of Dr. Charles L. Critchfield."—V. 191, p. 1004.

Electro-Science Investors, Inc.—Buys Interest—

Electro-Science, on Dec. 1 announced the acquisition of a potential equity in excess of 65% in Rawco Instruments, Inc. ESI's total commitment of nearly $440,000 is in the form of convertible debentures and common stock.

SEI recently registered as one of the nation's largest federally licensed small business investment companies, with assets in excess of $14,000,000. With the investment in Rawco, ESI's total investment commitment has reached nearly $1,500,000 since its public offering on Oct. 27 of this year.

Rawco manufactures a line of micro-miniature dc-ac choppers, electro-mechanical switches for modulating, demodulating and switching dc or ac information. The choppers are used in electrical equipment for data handling, missile guidance, detections and countermeasures.—V. 192, p. 2121.

Electronic Specialty Co.—Net Down—

Unusually high expenditures for research and development during the first half of the current fiscal year caused a decline in sales and earnings of Electronic Specialty Co. of Los Angeles, William H. Burgess, President, has reported.

Sales of $5,079,000 and profits of $7,000 or .01 per share for the first half ending Sept. 30, 1960 compared with sales of $5,554,000 and earnings of $265,000 or .49 per share last year.

Mr. Burgess estimated that sales in the second half of the current fiscal year will increase by 50%. He pointed out that as of Oct. 1, operations were again on a profitable basis, and that as a result of the intensive research and development program, which is now integrated into the company's traditional profit pattern, the company had a backlog of unshipped orders totalling $9,700,000 as of Sept. 30, 1960. The executive announced that this is the highest in the company's history and compares with $4,600,000 in unshipped orders on the same date last year, an increase of 110%.

Company sales, Mr. Burgess observed, have increased at an average rate of 50% during the past 10 years from $173,000 in 1950 to $11,001,827 in the fiscal year ended March 31, 1960. The company designs and makes specialized electronic controls, microwave components and motors and actuators for aircraft, missile and space vehicles. Reorganized in 1950, it now has seven divisions, five in Southern California and two in Connecticut: Avionics acquired in 1955, Radiating Systems acquired in 1956, Relay Division acquired in 1958, Electrical Engineering and Manufacturing Corp., Systems Laboratories and Technicraft Laboratories (Thomaston, Conn.), all acquired in 1959 and Electric Specialty Co. (Stamford, Conn.) acquired in 1960.—V. 192, p. 992.

Mermaid Lane, Philadelphia, Pa., filed a registration statement with the SEC on Nov. 28, 1960, covering 100,000 shares of common stock, to be offered for public sale through a group of underwriters headed by Harrison & Co. In addition to a maximum of $6,000 for expenses, the company has agreed to sell to the underwriters, for $500, transferable warrants to purchase 10,000 shares of common stock at the public offering price. The public offering price and underwriting terms are to be supplied by amendment.

The company designs, manufactures and sells single gun and multiple gun cathode ray tubes, single channel and multiple channel cathode ray tube oscilloscopes, and associated electronic devices, for use in the aircraft, missile, ballistic and other industries requiring testing of electronic data, including the medical field. Of the net proceeds from the stock sale, $100,000 will be used to acquire equipment and to begin production of high resolution magnetic tubes and cathode ray storage tubes; $50,000 will be used in the oscilloscope division, and applied toward the purchase of equipment and components for the development of new specialized types of multi-channel cathode ray tube oscilloscopes; $66,300 will be used to repay existing indebtedness to Kenneth C. Highway Trailer Industries, Inc.—Air-Lifts Cargo—

An improved technique of bulk cargo movement, 20-foot "Flying Cargo Vans" designed for transfer from truck-trailer wheels to rail flatcar to ship to shore or dock by big helicopters, was disclosed on Nov. 22 by the company.

Robert A. Hitch, engineering vice-president, said that this development would extend the use of standardized cargo containers to many applications, both military and commercial, where lack of heavy-duty handling equipment had blocked previous attempts to move large volumes of containerized cargo.

Mr. Hitch pointed out that many of the areas rich in vital raw materials have only primitive transportation facilities. Even those countries with deep sea or ocean coastlines have few natural harbors suitable for large ships, and still fewer have dock facilities adequately equipped to handle large containers.

"Flying Vans make it possible for a ship to stand well off shore and still load and unload large volumes of freight rapidly and economically by helicopter," he said. "The same principle applies to rugged terrain both for commercial cargo and for military purposes such as locating and supplying complete radar installations in remote areas."—V. 192, p. 898.

Hudson & Manhattan RR.—Seeks Order—

The company, of 30 Church Street, New York City, filed with the SEC on Nov. 22, 1960, an application under the Trust Indenture Act seeking an order qualifying an indenture pursuant to which $10,038,100 of first mortgage 6% bonds are to be issued. The bonds are to be issued pursuant to a plan of reorganization of the company which was confirmed by an order of the United States District Court for the Southern District of New York dated June 29, 1960, in proceedings pursuant to Chapter X of the Bankruptcy Act. By the terms of the plan, two corporations will succeed to the business and property of Hudson & Manhattan Railroad Co. One of these will be the same corporate entity as that company, which will change its name to Hudson and Manhattan Corp. The other will be a newly-formed wholly-owned subsidiary of the company to be known as Hudson Rapid Tubes Corp. The new Hudson & Manhattan Corp., in exchange for each $1,000 original principal amount of Hudson & Manhattan Railroad Co. first mortgage 4½% gold bonds or first lien and refunding mortgage 5% bonds outstanding in the hands of the public, will issue $340 principal amount of bonds and 20 shares of its class A stock.—V. 191, p. 1985.

International Nickel Co. of Canada—Files Stock Plan

The company of Copper Cliff, Ontario, Can., filed a registration statement with the SEC on Nov. 28, 1960, covering 674,417 common shares to be offered pursuant to options granted or to be granted to employees of the company and its subsidiaries under the company's Key Employees Stock Option Plan.—V. 191, p. 797.

Kaiser Industries Corp. (& Subs.)—Net Down—

Kaiser Industries Corp. consolidated net earnings were $4,342,000 or 13 cents per common share for the nine months ended Sept. 30, 1960, as compared with $11,802,000 or 46 cents per common share for the same period a year ago, Edgar F. Kaiser, President, reported on Nov. 17.

The sharp decline in 1960 earnings reflects the elimination of the dividend on Kaiser Steel Corp. common stock; losses incurred in the engineering and construction business of Henry J. Kaiser Co., a wholly-owned subsidiary; and lower profits of Willys Motors, Inc., also a wholly-owned subsidiary.

Mr. Kaiser noted that for the various Kaiser companies and divisions the sales volumes for the first nine months of 1960 compared well with volumes of a year ago. However, these favorable 1960 sales volumes resulted generally in lower profits due to the added expense of expanded facilities not fully required for production this year and due to rising costs. The major expansion programs of recent years were designed to take care of the greatly increased demands of the 1960s which did not materialize in the proportions anticipated this year. In some cases, such as Willys Motors, price increases were withheld until recently on account of the competitive market even though costs had risen appreciably.

Nuclear Engineering Co., Inc., Pleasanton, Calif.—Files With Securities and Exchange Commission—

The corporation on Nov. 17, 1960 filed a letter of notification with the SEC covering 30,000 shares of common stock (par 33⅓ cents) to be offered at $10 per share, through Walter C. Gorey Co., San Francisco, Calif.

The proceeds are to be used to repay a bank loan, for accounts payable and for working capital.—V. 191, p. 1882.

Oil, Gas & Minerals, Inc.—SEC Suspends Statement

In a decision announced on Nov. 30 the SEC suspended the effectiveness of registration statements filed by Oil, Gas & Minerals, Inc., and American Investors Syndicate, Inc., both of New Orleans, La. The Commission ruled that the registration statements were materially false and misleading and failed to disclose certain information and that financial reports filed with the registration statements were inadequate.

The registration statement of Oil, Gas & Minerals covered 260,000 shares of common stock offered at $2 per share. American's registration statement covered a $2,400,000 public offering of 600,000 shares of common stock and 200,000 shares of $9 stated value convertible preferred stock in units of three shares of common and one share of preferred at an offering price of $12 per unit. The principal assets of Oil, Gas & Minerals were a 1/24th working interest in a Louisiana oil field and a plot of land located in New Orleans which it had leased to American so that American might construct and operate an apartment hotel thereon. James A. and Joseph D. Lindsay are officers, directors and shareholders of both companies and own Lindsay Securities Corp., formerly known as Assets Investment Co., Inc., the underwriter for both proposed issues.

Both prospectuses were found to be deficient in failing to include a clear summary of the speculative features of the offerings, including, in the case of Oil, Gas & Minerals, operating losses, a restriction on the transferability of its shares, the arbitrary determination of the $2 offering price of its stock which had a book value of $.67 per share and was recently offered to the public at $1 per share, and a contingent liability of $166,800 to purchasers of shares sold without compliance with the Securities Act. In the case of American, disclosure should have included reference to the company's reliance on the proceeds of the offering to provide the funds for the construction of the proposed apartment hotel, earnings after taxes of $108,000 to meet the annual 6% cumulative dividend on its preferred stock, the arbitrary offering price of $1 per share for the common stock (which had a book value of $.20 per share, was sold to organizers at $.10 per share, and was recently offered to the public at $.50 per share), and the reliance of Oil, Gas & Minerals, the lessor of the proposed site, upon the proceeds of its offering to retire a $125,000 mortgage on the property.

The registration statements were also found to be deficient in their descriptions of the properties, the leasing arrangements, and the proposed construction. Oil, Gas & Minerals failed to disclose the pertinent information concerning its oil field interest, and its statement that the wells may produce oil for the next six years, amounting to 45,784 barrels having a present worth of $100,000, was without support. Both prospectuses failed to state that the proposed construction site was in a neighbhood whose residential qualities were deteriorating and failed to disclose the present physical condition of the property, the fact that American was a corporation recently formed by the promoters of Oil, Gas & Minerals and its management had had no experience in the construction or operation of an apartment hotel, and that the estimated cost and construction period were not based on detailed plans or arrangements. American's prospectus referred to a report of an engineering company which had stated that there was a demand for the housing, but the prospectus failed to reveal that the apartments to be constructed were not of the same type as those mentioned in the report, and the report was characterized in the prospectus as a "preliminary analysis of a feasibility survey," whereas the report stated that no consideration had been given to the economic feasibility of the project.

Both prospectuses failed to reveal that the underwriter had been recently formed to distribute the shares of the companies, and the Oil, Gas & Minerals prospectus did not state that part of the underwriter's compensation consisted of an option to purchase at $1 per share a number of shares equal to 10% of the shares issued for cash and did not describe the consequences of such option.

The financial statements of both companies filed with the registration statements had been certified by accountants who were not independent, did not contain certain required schedules, and did not present information in the manner required.—V. 191, p. 2093.

Ostheimer & Co., Inc., Philadelphia, Pa.—Files With Securities and Exchange Commission—

The corporation on Nov. 22, 1960 filed a letter of notification with the SEC covering 480 shares of common stock (par five cents) to be offered at $20 per share, without underwriting.

The proceeds are to go to a selling stockholder.

Permanent Filter Corp.—Reports Loss—

Operations of the corporation, of Los Angeles, for the six months ended Aug. 31, 1960, resulted in sales of $1,386,057 and a loss of $141,698, Jan Oostermeyer, board chairman, and Gen. Roger M. Ramey, president, disclosed on Nov. 22 in the semi-annual report.

Sales and earnings for the recent six months period were adversely affected by unusually soft market conditions, due to restricted defense funding, the report stated. However, it noted that the situation has been easing, and the company is already experiencing an improvement in the markets for its products.

No comparison is available with the similar period a year ago as the company did not issue a semi-annual report. For the fiscal year ended Feb. 29, 1960, Permanent Filter reported sales of $4,310,156 and a net loss of $604,290.—V. 192, p. 308.

Royal McBee Corp.—Net Down—News—

Allan A. Ryan, Chairman, reported on Nov. 15 that corporation sales in the first quarter ended Oct. 31 amounted to $26,687,000 and earnings after taxes and preferred dividend requirements were $325,000 or 16 cents a common share.

The figures were included in Mr. Ryan's statement to stockholders at their annual meeting at the Biltmore Hotel in New York City.

During the comparable quarter last year, sales were $26,751,000 and net earnings were $467,000 or 25 cents a common share.

Mr. Ryan reported that Royal McBee had a backlog of orders for 77 Royal Precision electronic computer systems. These include a substantial number of the recently introduced RPC-9000 and the RPC-4000, on both of which deliveries have begun, as well as the established LGP-30.

The company shares with General Precision Equipment Corp. a growth potential in the electronic computer market "which could exceed in volume and earnings anything we have ever experienced in the typewriter business," Mr. Ryan stated.

He said that together the two companies have invested approximately $13,000,000 in their jointly owned computer company. Royal Precision Corp., and have made "remarkable progress in establishing ourselves as an important factor in the electronic computer industry."

Mr. Ryan noted that the company's sales of electric office typewriters in the first quarter were 20% higher than those of the same period a year ago. Royal McBee continued to gain a larger share of the total electric typewriter market, a trend the company has maintained over the past three years, he said.

He said the U. S. typewriter industry will continue to suffer from the impact of duty free importations of typewriters manufactured in relatively low cost labor markets abroad "so long as the Tariff Commission refuses to recognize that we are at a distinct competitive disadvantage which warrants relief."—V. 192, p. 1402.

Saber Boats, Inc.—Offering Suspended—

The SEC has issued an order temporarily suspending a Regulation A exemption from registration under the Securities Act of 1933 with respect to a public offering of stock by Saber Boats, Inc. (formerly Light House, Inc.), incorporated under the laws of the State of Maryland and formerly located at Accokeek, Md. Batten & Co., Washington, D. C., was named as underwriter for this offering.

Regulation A provides a conditional exemption from registration with respect to public offerings of securities not exceeding $300,000 in amount. In a notification filed Jan. 27, 1960, Saber proposed the public offering of 106,875 shares of its ten cents par value class B nonvoting stock at $2 per share and 2,500 shares of its ten cents par value class A voting common stock at $2 per share. The Commission's suspension order asserts that the offering circular and other material used in connection with the offering contained untrue statements of material facts and omitted to state material facts with respect to (1) the statement in the offering circular that the public offering price was $2 per share when in fact the stock was offered to some members of the public at $2 per share and to other members of the public at varying higher prices, (2) the statement in the offering circular that Saber was owner of the "property and plant facilities" described therein when, in fact, legal title thereto was incomplete and was not completed until July 18, 1960, and (3) the financial statements were not prepared in accordance with generally accepted accounting principles and practices in that the issuer represented ownership in the balance sheet of the land and building, when in fact the issuer did not have legal ownership of the assets represented therein. The Commission's order also asserts (1) that the terms and conditions of Regulation A were not complied with in that sales were made to the public without the use of an offering circular and the issuer and the selling stockholder failed to file a complete and accurate report of sales, in that the report, filed May 12, 1960, incorrectly stated that the offering was completed on May 2, 1960, at $2 per share and failed to disclose the actual commissions paid and received and (2) that the offering was made in violation of Section 17(a) (the anti-fraud provision) of the Securities Act. The Commission's order provides an opportunity for hearing, upon request, on the question whether the suspension should be vacated or made permanent.—V. 191, p. 1265.

Schenley Industries, Inc.—Annual Report—

Earnings of Schenley Industries, Inc., for the fiscal year ended Aug. 31, 1960, including a special credit of $4,705,000, amounted to $8,044,918, equal after preference stock dividends to $1.30 a share on 5,904,051 shares outstanding at the year-end.

Earnings for the fiscal year ended Aug. 31, 1959 amounted to $18,085,454, or $3.06 a common share adjusted to an equivalent number of shares.

The 1960 annual report mailed to stockholders on Nov. 16 signed by Lewis S. Rosenstiel, Chairman and President, notes that "field reports shows that sales of our products by wholesalers to the retail trade were substantially in excess of our shipments to wholesalers. This year's earnings performance is, therefore, not indicative of the earning power of the company based on its consumer business. We may anticipate that the current fiscal year will show substantial improvement in net income over the results of the 1960 year."

The report adds that, as of its date of issuance, Schenley has indications "that sales volume for the first quarter of our 1961 fiscal year will be satisfactory."

Lower sales in fiscal 1960—$381,549,350 vs. $460,038,891 in fiscal 1959—resulted, according to the report, mainly from "a management program to reduce sharply, taxpaid inventories in the hands of our wholesalers, to improve the ratio of wholesalers' taxpaid inventories to sales and to reduce accounts receivable from wholesalers."

The report points out that trade receivables at Aug. 31 reflect a reduction of $43,754,983 compared with last year. This inventory control policy will result in considerable savings in interest charges, it is stated.

Bank loans were reduced from $75,000,000 to $55,500,000, and, in addition, payments amounting to $836,500 were made on long-term loans.—V. 191, pp. 948 and 844.

"Total new orders received in 1960 are currently running 20% ahead of the same period in 1959," Mr. Simmonds said. "New orders received in October were approximately $1 million, and the backlog as of Oct. 31 stood at $3.5 million, the highest level since April, 1959. Sunset International Petroleum Corp.—To Acquire—

The Los Angeles company took its third major step in California land development yesterday when Morton A. Sterling, President, announced plans to acquire the Sun Gold real estate organization and its Hacienda Hill project for $3,100,000 in cash and notes.

The transaction, to be accomplished without the issuance of Sunset stock, would add to the oil and gas producer's land complex the 1,000-acre planned community in the Whittier-La Habra Heights area with an ultimate total value of $60 million, Sterling said.

Sun Gold, nationally known for its award-winning Friendly Hills development, has built more than 7,000 homes from Whittier to the Colorado River in less than 11 years. It would become a division of Sunset, according to Sterling, and Sun Gold President, Robert Walter, would be appointed Sunset's Vice President in charge of real estate merchandising.

"The addition of Hacienda would conceivably make Sunset the largest active land developer in California," Sterling stated. Earlier this year, the company purchased a 12,000-acre site in the Roseville-Sacramento area, to be developed as Sunset City, and a 4,000-acre super-city in San Diego currently under development as San Carlos.—V. 192, p. 2065.

The principal underwriter will purchase from two of the selling stockholders a total of 12,000 shares at 10 cents per share and will resell 4,200 shares to Tucker, Anthony and R. L. Day, at its cost, as a finder's fee. In addition, the said selling stockholders have granted to the principal underwriter an option to purchase a total of 20,000 shares at $6 per share until 1962. The underwriters will receive $5,000 for expenses and a 50 cent per share selling commission.

Syndication Investors Management Co., Inc. — Property Deal—

Completion of one of the largest real estate syndications ever conducted of upstate New York properties was announced on Nov. 21 by J. M. Bess, President of Syndication Investors, underwriters of the $1,300,000 offering of six properties in the Syracuse-Binghamton area.

The syndication of limited partnership shares in the package of six commercial buildings was oversubscribed exactly three weeks following its announcement to the public at a Syndication Symposium conducted Oct. 25 in New York City by his organization, Mr. Bess said.

Title will be taken on Dec. 1 by the new ownership group, Empire State Realty Associates. The purchase price is $4,045,000, representing one of the largest realty transactions in recent Central New York business history, and one of the largest packages of diversified properties ever offered syndicate investors.

Properties involved in the sale include: Sears Roebuck warehouse in Binghamton, a Sears Roebuck store in that city, Grand Union shopping center in Owego, New York, a new Sears Roebuck warehouse in the DeWitt Industrial Park of East Syracuse, J. M. Fields shopping center in north Syracuse, and a 40,000 square foot office building—already fully rented—to be built in the heart of downtown Syracuse. These properties possess rent rolls totalling $458,000 annually—V. 192, p. 1860.

Tampa Electric Co.—Revenues Up—

Revenues for the first nine months of 1960 were $30,799,000, a 16.2% increase over the $26,501,000 for the same period of last year, W. C. MacInnes, President of the utility firm has announced.

Mr MacInnes pointed out that this increase is due primarily to a gain to total customers, greater use of electricity by existing customers and to higher electric rates in force since Sept. 21, 1959.

"Residential and commercial kilowatt-hour sales were up 14.9% and 11% respectively. Sales to industries were up 14%. During the last quarter it is expected each classification will continue to show satisfactory gains over a year ago," he said.

Mr. MacInnes stated that earnings per common share for the first nine months of this year were 90 cents, based on 5,020,282 shares outstanding. This was an increase of 23 cents over the 66 cents earned last year on 4,780,282 shares outstanding. The difference of 240,000 shares represents the issue of common stock sold in February of this year. The figure also reflects the effect of the two-for-one stock split in November, 1959.

"On the same basis, earnings for the 12 months ending Sept. 30, 1960, were $1.20 per share compared with 92 cents per share for the period ending Sept. 30, 1959," Mr. MacInnes said.

He pointed out that these figure include the cost of hurricane "Donna," which was absorbed in September earnings. This storm, which passed through Tampa Electric's service area on Sept. 10 and 11, did damage costing just under $400,000.

Mr. MacInnes said that "Business, in general, continues at a level exceeding that of last year."

"Our best yardstick indicating business conditions in our service area is the company's kilowatt-hour output, which for the first three-quarters of 1960, was up 12.8%. This was exactly double the 6.4% figure for the nation as a whole. Corresponding figure for the third figure alone was an increase of 13.3%."—V. 192, p. 12.

Techno Fund, Inc.—Acquires Interest—

This small business investment company of Columbus, Ohio, has acquired an interest in a new foundry mold manufacturing process that is expected to revolutionize foundry production, Dr. Clyde Williams, President of the Clyde Williams Investment Management Co., the Fund's management agency, announced on Nov. 22.

Through investment equity in the Taccone Corp., North East, Pennsylvania, it will participate in the production, marketing, and further development of the Taccone hydra-pneumatic molding machine and the other products of the Taccone line.

The molding machine, which is currently in production, has been described as a major breakthrough in foundry mold technology. It is being investigated by major automotive companies and other manufacturers of castings, both in this country and abroad, as the basis for new, high-speed, high-precision production lines.

Terms of the transaction, according to Dr. Williams, call for Techno Fund to invest $300,000 in the firm's convertible debentures and $100,000 in its common stock. On exercise of the conversion privileges, Techno Fund would have a one-third equity in the company.—V. 192, p. 1916.

PROCEEDS—An aggregate of $380,000 of the net proceeds (after deduction for certain expenses) will be retained to discharge a total of $120,000 in short-term indebtedness, and be added to its general working capital to improve the ratio of available capital to the amount of installment sales contracts to be discounted with financial institutions.

In addition, approximately $1,000,000 will be made available by the parent company to its wholly-owned subsidiary, Tenax Discount Corp., of which $250,000 will be devoted to the repayment of a short-term bank obligation. The company's management believes that, based upon normal banking practice, the receipt of this $1,000,000 will enable Tenax Discount to raise an additional amount of money, thereby rendering it able to discount a portion of the several sales corporations

Texstar Corp.—Acquires Interest—

The Texstar Petroleum Co., oil and gas division of the Texstar Corp., has acquired the full working interest in approximately 7,500 acres of proven, gas-productive leases in Marion County, Kansas, from the Can-Am Petroleum Co. of Wichita, Kansas, and others.

Announcement of the acquisition on Nov. 22 was made jointly by Dr. Robert V. West, Jr., President of Texstar Petroleum Co., and Harold D. Beckwith, President of Can-Am Petroleum Co. Purchase price was not disclosed.

The 7,500 acres acquired are situated in the East Antelope Gas Field. Gas production in the Field is from Mississippian lime at a depth of approximately 2,400 feet.

The Texstar Corp., Dr. West announced, plans to immediately initiate a drilling program to fully develop the leases. Markets for the gas production are currently being negotiated.

Acquisition of the Marion County gas field, said Dr. West, was in line with Texstar's policy to acquire semi-proven, rather than wildcat prospects with emphasis on gas; to develop and get these prospects into production.

Under the acquisition terms, Can-Am and others retained an overriding royalty which will revert to a working interest at a later date. Included in the transaction was one shut-in gas well drilled earlier by Can-Am and others.—V. 192, p. 1442.

Textron, Inc.—Subsidiary Acquires—

Townsend Co. of Beaver Falls, Pa., Nov. 22 disclosed it had acquired assets and the business of the Boots Aircraft Nut Corp. of Norwalk, Conn.

President F. R. Dickenson of Townsend said no changes in sales or other policies are planned. All personnel will continue in their present capacities.

Townsend Co., itself a subsidiary of Textron Inc. of Providence, R. I., is one of the nation's oldest and largest manufacturers of cold formed fasteners and special parts. It has seven operating divisions with eight plants in the United States and Canada.

Mr. Dickenson said the new Boots Division will strengthen the Townsend product line and make an important contribution to Townsend's expansion and diversification program.

Boots, founded in 1949, was the first manufacturer to introduce all metal lightweight lock nuts to the aircraft engine and electronics industries. Its products include a complete range of lock nuts, manufactured to ANNAS and M.S. specifications, in addition to a specialized line of engine nuts and self-locking inserts, called Banc-Lok. The new division will be aided in its own expansion program by the research and development facilities of Townsend and by using multiple manufacturing, marketing and warehouse facilities of the parent company.—V. 192, p. 1861.

Thiokol Chemical Corp.—Division Contract Extended

A continuation contract in the amount of $4,920,002 for production of rocket motors and plant maintenance at the Longhorn Ordnance Works at Marshall, Texas, has been awarded the Longhorn Division of Thiokol Chemical Corp., by Army Ordnance Ammunition Command, Joliet, Illinois.

Thiokol has operated the Longhorn Division since 1952 and has produced rocket motors for such operational missiles as the Falcon, Nike Hercules, Sargeant and LaCrosse. Changes in the plant facilities at Longhorn are nearing completion to permit production of the Pershing propulsion system.—V. 192, p. 1957.

Thomas & Betts Co.—Record Highs—

Sales and earnings for the nine months ended Sept. 30, 1960, were the highest in the company's history. This is cited by N. J. MacDonald, president, in an interim report to stockholders. The sales gains were accomplished in spite of a softening in the nation's economy and in the electrical industry in the September quarter. The record high earnings were achieved despite increased costs involved in the company's stepped up program of new product promotion and in its accelerated research and development programs in all divisions. The results lead management to predict that sales and earnings for all of 1960 will surpass slightly the record highs of 1959, he said.

Nine months sales for the manufacture of electrical fittings, terminals and related accessories were $17,261,000. Net income amounted to $2,042,000 or $1.34 a share on 1,480,153 shares of common outstanding. In the comparable period a year ago sales totaled $16,144,000, and net income was $1,987,600, or $1.30 a share on 1,479,296 shares.

T & B's net sales for the September quarter were $5,690,000, and net income was $600,000, or 39 cents a common share. This compares with sales of $5,570,000 in the third quarter last year when the net income amounted to $661,000, or 43 cents a share.—V. 192, page 747.

United States Rubber Co.—Agreement—News—

The United States Rubber Co. and Rumianca, S.p.A., of Torino, Italy, have announced the signing of a technical service agreement for the production of polyvinyl chloride resins at a plant to be built by Rumianca at Pieve Vergonte, Italy, near the Swiss border.

Under the terms of the agreement, the Italian firm will construct a facility to produce annually 10,000 metric tons of resinous copolymers and polymers of vinyl chloride. The plant is expected to cost about $3,000,000, and is to be in production in mid-1962.

U. S. Rubber will furnish technical information and engineering services from its Naugatuck Chemical division for the design of the plant and its initial operation. In addition, Rumianca personnel will receive special training in the Naugatuck Chemical division plants.

The agreement also provides for patent licenses to the Rumianca firm for the manufacture and sale of the vinyl resins in Italy, and for the use and sale of the products in other parts of the world.

After extensive engineering studies, the Borden Company and the United States Rubber Company have selected a site in the Greater Baton Rouge area for the construction of a $50,000,000 complex of chemical plants which will convert hydrocarbons into more than a dozen chemical products.

The companies jointly acquired about 850 acres of land near Geismar, La. It is understood that the option price was about $1,400 an acre.

It is on this site that the jointly-owned chemical company to be called Monochem, Inc., will erect a major chemical manufacturing unit using hydrocarbons as a starting point for the production of acetylene and vinyl chloride monomer. This project has been approved by the boards of directors of both companies. Borden's and U. S. Rubber are to erect adjacent individually owned plants which will use the output of the Monochem plant for the manufacture of other chemical products.—V. 192, p. 1245.

They also provide complete automatic control over the conventional ticket-selling machines and extend the functions of the self-service Amteller ticket-issuing machine with an improved electronic currency identifier.

Universal Controls developed the new features in cooperation with the TRA's Liaison Committee on Totalisation and Automation.—V. 191, p. 550.

Subsequently, the request for hearing was withdrawn, and, by operation of the provisions of Regulation A, the suspension order has now become permanent.—V. 192, p. 1958.

Utilities & Industries Corp.—Dividend—News—

The Board of Directors of Utilities & Industries Corp. (formerly New York Water Service Corp.) has declared a year-end dividend of 31 cents per share, consisting of 2% per share payable in stock and 5 cents per share in cash. The dividends are payable on Dec. 27 to stockholders of record on Dec. 12. The stock dividend declaration is the subject of a filing with the New York State Public Service Commission.

Richard L. Rosenthal, Utilities & Industries' President, advised that the current declaration was the first stock dividend by the corporation and was intended to take cognizance of the consequences in the current year of the corporation's non-utility activities. He said that the Board of Directors of Utilities & Industries hoped in the future to continue the policy currently established of the payment of a combination of cash and stock dividends on an annual basis.

The aggregate of the current declaration and earlier payments in cash brings Utilities & Industries' total payments in the current year to 46 cents per share, of which 20 cents is in cash. In 1959, the aggregate dividends paid were 30 cents per share, all in cash.

The corporation's current activities include the operation of water utility properties, principally in Nassau, Rockland and Queens Counties in New York State, as the New York Water Service Division of the parent company, and the conduct of enterprise acquisition and special financing operations with a Fund principally resulting from the proceeds of condemnations of water utility properties formerly operated in other sections of New York State. The Fund aggregates in excess of $32,000,000. The corporation has private commitments in a number of fields including coastal containership operation, oil and gas porduction in certain sections of the Argentine and Southwestern Colorado, publishing, distilling, community antenna TV service, etc., and substantial temporary investment available for other acquisitions and special financing.—V. 192, p. 2065.

of sales) invested in 1959, and represents a per-share investment of 86 cents as against the 1959 per-share investment of 65 cents.

"The past year saw our volume of orders and backlog grow to record proportions," president Stearns said. "To meet this challenge, and prepare ourselves for opportunities in the future, we have undertaken the greatest expansion of our research and development, plant facilities and marketing effort in the history of the company."

A plant and facility expansion program currently underway will increase total plant space to 840,000 square feet by the end of 1961. —V. 192, p. 2066.

Victoreen Instrument Co.—New Product—

A portable survey meter capable of detecting extremely low levels of radiation, particularly designed for use around radar and microwave installations and X-ray laboratories, has been developed by the company.

David H. Cogan, Chairman and President of Victoreen, a Cleveland-based firm which pioneered in developing radiation detection instruments, said the new instrument, the Victoreen 440, resulted from unique solutions of circuitry and design problems that previously made a device of this type commercially unfeasible.

At the heart of the transistorized circuitry, Mr. Cogan said, is a new type of vibrating capacitor, or "vibrating reed." This and other features make possible the measurement of extremely low level or "soft" radiation and portable operation with a minimum drain on a power package of four ordinary flashlight "D" batteries. The instrument will operate over 100 hours on one set of batteries.

Mr. Cogan said that the new Atomic Energy Commission ruling which cuts the amount of accumulated radiation to which workers in AEC-licensed plants can be exposed makes the new meter especially important. The new maximum of five rem (roentgen equivalent man), effective Jan. 1, 1961, as one-third the prior maximum.—V. 192, p. 1536.

Video Corp.—New Contract—

This included a non-recurring gain of $41,000, or 10 cents a share from the sale of property and compared with a net loss of $551,000, after income tax credit, incurred in the same 1959 quarter.

Sales for the latest fiscal quarter totaled $12,636,000 compared with $12,627,000 in the comparable 1959 three-month period. Baker noted, however, that during the initial fiscal quarter of 1959, substantial costs were incurred which were not experienced this year.

Directors on Nov. 16 declared a 5% stock dividend (one share for each 20 held), payable Dec. 23 to stockholders of record Nov. 25, 1960. Fractional interest will be paid in cash based on the closing price of the stock Nov. 15, 1960.—V. 192, p. 1755.
