Corporate and Municipal Financing Ahead

By SIDNEY BROWN

If two corporate offerings announced for this week go through as scheduled they can be expected to raise more capital than the senior corporate debt issues set for the same period. The former consists of two rights offerings, today's Illinois Bell Telephone Co. and Thursday's Varian Associates issue. The latter involves \$92,820,000 and when added to the \$107.7 million state and local tax-exempt issues set for appearance, the week's financing should come to the fairly heavy sum—particularly so for a holiday week—of a bit over \$300 million.

The Federal Reserve's mettle will be tried next week in the face of \$550 million corporate and municipal debt securities already scheduled which includes A.T.&T.'s \$250 million refunding and New York City's \$60,400,000 bond issues. This comment assumes the Federal Reserve is not too happy with the about face in bond yields which occurred at the start of two weeks ago—or, does not like being prodded at joint high level Administration meetings where it keeps its "independent hat in hand" and tries to see where it can protect the soundness of the banking-credit structure of the economy and yet help the New Frontier's economics. Backyards do adjoin but who decides the height of the fence? One yard belongs to Congress and the other to the Executive. Let's hope that cool, sound economic heads will prevail.

Bond yields stopped narrowing, particularly for governments, when shifting took place into higher corporate yields, into the greatly increased short-term yields, into the stock market until the DuPont-General Motors Supreme Court and the A.T.&T. anti-trust inquiry news was used to justify the stock market's weakness, and into cash to be used for loans and financing the start of the business recovery. In turn this and the volume of issues affected the yields of corporate bonds, and municipals already are beginning to feel some weakening.

To what lengths are the Federal Reserve and the Treasury willing to go to keep interest rates down in the face of recovery sentiment—for the ostensible purpose of not nipping the recovery bud? In the first three weeks of May, bonds on the N.Y.S.E. hit 142 highs and 106 lows. This may mark the turning point in the bond market if present trends continue.

28-DAY VISIBLE SUPPLY SWELLS

In the 28-day period commencing today through June 23, corporate financing with coming out dates is at the \$1 billion level and this figure liberally discounts, as usual, the prevailing expectations. It has been our custom to project minimum capital demand figures, not maximum ones. The municipal float is up \$60 million for the next four weeks.

The total backlog of issues with and without assigned dates, having every expectation of coming into the market, remains at the \$2 billion level for corporates—hugely boosted by the Ford Motor and Gulf Oil secondaries. The municipal total backlog is up also by \$135 million. These figures are quite impressive in view of the sizable sales that have caused cuts in the calendar. Calendar replacements are holding their own for corporates, and municipal offerings are increasing in dollar volume and number.

The backlog of indeterminate issues, consisting of rumored financing and that not firmed up as yet, has taken somewhat of a fall. This is due to the exit of several large issues into the formal backlog without replacements of similar scale. The tables below should provide a quantitative picture of what the future financing demand looks like:

CHANGES IN THE PAST WEEK

Corporate issues added to the *Chronicle's* calendar of May 25 are impressively large at \$469,507,000 million. Sales for the week through May 24 were almost as large at \$438,169,630—not including FNMA's \$150 million refunding—and \$313,185,900 of this consisted of senior debt issues.

Municipals added to the *Chronicle's* municipal calendar of larger issues came to \$269,765,000 and sales in the May 18-24 week were \$119,063,000. This figure does not include two secondaries for \$1,833,000 and \$14,361,000 each.

HAVE BOND ISSUERS MISSED THE BOAT?

One of the grievous post-mortem questions facing issuers, underwriters, *et al* who pose as oracles in investment banking, is whether they missed the boat in taking advantage of what may have been the current last opportunity to float issues at lowest annual net interest cost. According to the calculations of Eastman Dillon, Union Securities & Co., the new issue index for corporate utility bonds reached its lowest point in the past twelve months last March at 4.35 with a spread of .03%. Unless the Federal Reserve massively intervenes in the money-capital markets, where admittedly it can check the effect of the increased municipal and corporate new issue supply now weakening yields, or the recovery peters out, its looks as though we have seen the lowest yields for this cycle. The effective interest rates for the past recession have been unusually high relative to other recessionary experiences and can be attributed to the high liquidity state of the economy. Corporations have been able to generate much of their relatively needed financing internally. Banks have entered the intermediate loan market strongly with term loans. As soon as there is a wisp of a recovery, banks and other investors quickly try to get out of long-term issues to finance inventory buying, and since recoveries are associated with resumption of price inflation, investors are less willing to hold bonds even at generous yields. In the municipal market, the tremendous needs of states and communities to provide facilities crowds the calendar and generally finds them seeking funds rather than the other way around.

There were ample opportunities in the past few months, in between the weeks of heavy financing, when many contemplated issues now coming out could have appeared. Instead, they missed the less active flotation weeks and now they are facing a weakening of bond prices and numerous competing offerings at the same time. This reflects poor new issue calendar and market watchfulness. Timing in going to market is crucially important. There is too much rigidity when there should be marketing flexibility in those discretionary instances when investment bankers and issuers can choose the flotation dates.

In view of the Administration's repeatedly avowed intent to lower and keep lowered the interest rate pattern in long terms, those who waited merit some sympathy. But they should have known how high the recession period yields were to begin with, and ought to know that when recovery commences there is only one direction they can go—and that's up, not down or the same. Moreover, the upward changing forecasts of fiscal 1962's budget deficit is well known. Further, they could have watched with more perspicacity the new issue calendar. Municipal issuers on the whole were more alert than corporate's. As yet, municipal prices have not weakened as much as corporates but they have begun to weaken.

N. Y. State Electric & Gas Aa-rated 4½% bonds last Thursday declined from 102.046 to 100 bid in a week's time; Arkansas Power and Light Co. A-rated 4½% bonds declined last Thursday from its initial price of 102.473 of a week earlier to 99½ bid; and, embarrassing to the Administration which is opposed to the issuance of long-term bonds by its family, FNMA's 12-year 4¼% refunding debentures announced suddenly with but a week's notice sold at 99 last Wednesday at a yield of 4.35%. A week ago last Friday, it was expected to sell around 100½. Bonds selling well are those with generous yields—this is the order of the day. By the middle of last week some long-term Treasury bonds were off as much as 2 points as against the beginning of the week. The 4¼s yielded 3.89% on May 25, and the 4% bonds of 1980 were at a yield of 3.83%.

In the meantime, with recovery sentiment, short-term yields have increased significantly. If this prevails, will Western Germany, for example, go back to a higher bank rate?

A QUESTIONABLE INFERENCE

Last April 27, this writer posed the supposition that if the Secretary of the Treasury does not succeed with the new "nudging" policy, most likely our foreign friends would bring their short-term rates down. (After all, with disastrous consequences to us, we pursued such a policy during the 1920's to help Europe in its attempt to keep capital from coming here.) I assumed that our authorities got Europe to agree to lower their rates to repel our funds. A few days later Germany lowered her rate to ours. In reply to our thesis, Under Secretary of the Treasury Roosa wrote, "I imagine that the only inference to be drawn from the German move is that they are trying just as hard to keep short rates down and long rates up as we are to do the converse."

Germany is presently facing inflation, a boom, and a shortage of labor. In view of this, it is difficult to agree with the Under Secretary that Germany lowered its bank rate on its own initiative. More importantly, should our short-term yields continue to go up and Germany again raises its bank rate to cope, as was its custom, with its domestic conditions, what inference would Mr. Roosa then draw?

Tennessee Valley Authority, Tenn.

Bond Offering—Plans for the sale of a \$50 million issue of power bonds on June 28, 1961, were announced on May 24 by the Board of Directors of the Federal Corporation.

The offering, to be sold in New York City at competitive bidding, will be the second made under 1959 Federal legislation which authorized TVA to issue bonds up to a total of \$705 million outstanding at any time. The first issue, also for \$50 million, was sold last Nov. 15.

Terms and conditions of the securities to be sold June 28 will be announced soon.

Proceeds from the sale of the bonds will be used to finance construction of new generating and transmission facilities for the TVA power system. Installed capacity of the system, as of March 31, 1961, totaled 11,885,460 kilowatts. Additional capacity of 2,559,200 kw is currently under construction. This includes the giant Paradise Steam Plant now under construction in western Kentucky which will house two 650,000 kw turbogenerators, and the addition of turbogenerators of 500,000 kw each to the Colbert and Widows Creek steam plants in north Alabama.

In addition, TVA has announced plans to begin construction in 1962 of a new plant near Oak Ridge, Tenn., to be known as the Bull Run Steam Plant. This plant will initially contain a single 900,000 kw generating unit.

The first issue of TVA power bonds was purchased by a nationwide underwriting group managed by The Chase Manhattan Bank; Morgan Guaranty Trust Co., of New York; Chemical Bank New York Trust Co.; C. J. Devine & Co., and The Northern Trust Company.

The underwriting group was awarded the issue on a bid of 99.4159999 for the 4.40% coupon, representing a net interest cost of 4.43894%. Three other bids were received from groups headed by Blyth & Co., Inc.; Halsey, Stuart & Co. Inc.; The First Boston Corp., and other co-managers representing many top names in the underwriting field.

TVA power bonds are payable as to both principal and interest solely from TVA's net power proceeds. For the fiscal year ended June 30, 1960, net power proceeds (essentially net income plus depreciation) totaled \$100 million. For the 12 months ended March 31, 1961, they amounted to \$101.5 million.

TVA is a U. S. Government corporation engaged in a wide range of regional resource development activities, including flood control, navigation, fertilizer research, and forestry, in addition to its power program. The financing of the power program, however, is entirely separate from nonpower activities and the accounts of the TVA power system are kept in conformity with the uniform system of accounts prescribed for electric utilities by the Federal Power Commission. Proceeds from the sale of TVA bonds can be used only for power purposes.

The TVA power system serves an area of 80,000 square miles covering parts of seven states—Kentucky, Tennessee, Mississippi, Alabama, Georgia, North Carolina, and Virginia. The area has a population of 4,500,000.
