Corporate and Municipal Financing Ahead By SIDNEY BROWN

In quite a contrast even to the diminished pace of the past July month, anticipated corporate senior debt public offerings for this week (Aug. 7-12) are extremely light in number and dollar volume (\$25.3 million). They are exceeded by an inauspicious proposed slate of equity issues. State-local securities expected for the week total the moderate sum of \$106.7 million, or a corporate and municipal capital debt aggregating \$132 million.

PENNSYLVANIA GENERAL STATE AUTHORITY IS THIS WEEK'S LARGEST ISSUE

Out of the nine larger corporates announced for this week, seven are equity issues and two are bond offerings and, of these, six have managers, one is a mutual fund, and the remaining two are to be opened to competitive bids. Twenty-seven municipal issues groomed for appearance in these five days coming up will provide the bulk of the demand for capital of the demand for capital.

Among the 18 corporates, which includes 11 Reg. "A's," are these larger issues set for today (Aug. 7): Blair and Co. expects to market 400,000 shares of Automated Merchandising Capital Corp. and so, too, does S. D. Fuller with regard to the May 11 registration of 320,000 shares of Vic Tanny Enterprises common. Competitive bidding for the day will include these two larger municipals: \$3,790,000 Churchill. Area School Authority, Pa., and \$3 million Clark County, Nev.

Tomorrow (Aug. 8) Harriman Ripley and Underwood, Neuhaus plan to offer 1,250,000 shares of Gulf-Southwest Capital Corp. common, and up for competitive bids are \$20 million in Northern States Power Co., bonds. Among a host of state-local issues docketed for that day are: two issues from Anchorage, Alaska, totaling \$7,586,000, \$8 million Mobile, Ala., \$25 million Pennsylvania General State Authority, and \$14,000,000 St. Petersburg, Fla.

Since a year ago last July 22's registration, the newly named Atlantic Fund for Invest-Since a year ago last July 22's registration, the newly named Atlantic Fund for Investment in U. S. Government Securities, Inc. has been trying to come out with \$50 million share offerings (Capital Counsellors). There is the expectation that the Fund may appear publicly on Wednesday of this week. Also on that day are scheduled one million shares of Texas Capital Corp. common through Dempsey-Tegeler & Co., and competitive bidding for \$3,600,000 Gulf Mobile & Ohio RR. equipment trust certificates. Two larger municipals announced for Wednesday bidding are \$9,125,000 Fairfax County, Va., and \$5 million San Juan, Puerto Rico.

The last day for larger issues seems to be Thursday when Clark, Dodge; Alex. Brown; and Rotan, Mosle hope to bring out \$14,300,000 Business Funds—a small business investment company—and Blunt, Ellis & Simmons may offer to the public 180,000 shares of Harper (H. M.) Co. common.

PENDING ISSUES CLIMB TO RECORD HIGH WHILE BACKLOGS. PARTICULARLY BONDS, DECLINE

SEC registered corporate issues still pending as of last July 27 numbered a record high of 527. The comparable figure last year (July 29, 1961) was 318. The lowest figure in the past 12 months was 300 (Dec. 15, 1960). This seems somewhat incongruous in view of the marked decline in the four-week float compared to last week's computation and the downward leveling-off of the total formal backlog.

A lean selection of corporate bonds is in prospect and amounts to but \$80.7 million for the period Aug. 7-31. The total backlog of bonds, with and without dates, likely to be publicly offered has dropped from last week's estimates of \$397 million to \$283 million in a week's time.

The tables below should depict the way the financing wind blows as of this writing.

*\$1 million or more. Note that the second week's estimated financing is largely taken up by the \$225 million State of California issue.

Almost everyone is certain that long-term yields will rise further. The Federal Reserve's efforts to keep credit plentiful unexpectedly has affected mostly the interest rates in the money market and can not, nor should it, cope with investors' expectations—whether correct or incorrect. Pressures acting to lower bond prices are; of course, domestic deficit financing plans, the business recovery pace, and international pressures—especially the U. K.'s bid to enter the European Common Market and a repetition of last Sept. 19, 1957's rise in the Bank of England's discount rate from 5 to 7%.

Investors and the Federal Reserve may find the paucity of new bond issues helping to keep bond prices higher, or yields lower, than that generally being predicted with so much confidence.

The support for the equity backlog, keeping it relatively at last week's total backlog level, came from two recent registrations of sizable proportions. One is the General Public Service Corp.'s 3,947,975 shares for subscription by the closedend investment company's stockholders, managed by Stone & Webster Securities Corp.; and the other is a secondary of 633,400 shares of Upjohn Co. for selling stockholders via Morgan Stanley & Co.

A MATTER OF THROWING STONES

The Investment Bankers Association's sound argument against "industrial aid bonds" is in danger of being used against itself. This would not, however, lessen in any way the correctness of the argument leveled against unfair competition resulting from the abuse of the tax-exemption privilege reserved to state-local government activities failling outside the purview of private enterprise and the Federal Government.

The I.B.A. is to be commended for leading the fight against the extension of the tax-exemption savings to activities of a private character and at the expense of competing private enterprise not privy to the financing-savings. Unfortunately, the I.B.A.'s stand is tainted by its inconsistent application of this worthy principal. The very argument it uses applies with equal fervor to the railroad industry vis-a-vis competitive toll roads, and port, regional and airport tax-exempt authorities. The savings in financing costs in floating tax-exempt issues are for the most part passed on to and are reflected in the tolls, fees, rentals of cars, buses, airplanes, trucks and vendors that use the tax-exempt facilities just as in the case of users of facilities provided by "industrial aid bonds" in the form of leases, etc.

The principal is equally true in the case of municipal utilities which compete with private generation and distribution of electricity, water, etc.

The investment industry knows only too well the plight of the railroad industry and the multifold problems it faces besides the legitimate economies of competing common carriers. But, the I.B.A. should take a stand against the extension of financing savings costs to rails' competing common carriers. Investment bankers know, also, too well the uphill fight of the private power companies against government and REA public power. Savings due to the tax-exemption privilege should be denied to all private activities no matter how disguised.

BUSINESS—The company is a business trust organized under the laws of Colorado under a Declaration of Trust dated as of May 9, 1961. The principal office of the Trust is located in Denver, Colo. The Trust is designed to offer investors an opportunity to participate jointly in large and diversi'ied real estate investments in a manner not normally available to them individually. A special benefit of real estate investment in this form is afforded by a recent amendment to the Federal Internal Revenue Code. Under this amendment a qualified real estate investment trust is treated for the most part

as a conduit of income to its shareholders rather than as a taxable entity. Unlike conventional corporations, it is not taxed on any of its income which it distributes to its shareholders as dividends. The Trust intends to qualify for this special tax treatment.

Trust intends to qualify for this special tax treatment.

The Trust will be under the management and control of its Trustees, subject to annual election by the shareholders (holders of beneficial interests). The success of the Trust will depend to a large extent upon the Trustees ability to invest its assets wisely and prudently, and diversification itself will not remove all risk of investment. Although the Trustees have the ultimate responsibility for all investment decisions and for the conduct of the business and affairs of the Trust, they are required to place the direct management and operation of its real properties in the hands of independent contractors in order that the Trust be qualified as a real estate investment trust. Accordingly, the Trust has retained Van Schaack & Co. of Denver, Colo. as the principal manager and operator of its real properties. Van Schaack has also agreed to advise the Trust on its real estate investments and to act as its principal agent in real estate transactions. The Trust will have perpetual existence unless it is earlier terminated by the Trustees, which can be done by majority vote of the Trustees at any time.

Nuveen Tax-Exempt Bond Fund Series I — Units Offered — Pursuant to a July 24, 1961 prospectus, John Nuveen & Co. (Inc.), 135 So. LaSalle St., Chicago, and 25 Broad St., New York City, is offering publicly 100,000 units in this Fund. The offering price, computed daily during the offering period, is equal to 1/100,000 of the underlying public bonds, plus a loading charge equal to 4.5% of the offering price, as well as accrued interest. The price on the date of the formation of the Fund was \$100.55. A minimum of 10 units has been fixed as the least number which may be purchased by and

interest. The price on the date of the formation of the Fund was \$100.55. A minimum of 10 units has been fixed as the least number which may be purchased by and registered in the name of a single investor.

Tax status—pursuant to a ruling of the Commissioner of Internal Revenue, dated as of July 3, 1961, the Nuveen Tax Exempt Bond Fund, Series 1, here in referred to as the "Fund,"" will not constitute an association taxable as a corporation for Federal income tax purposes and interest on the underlying bonds which is exempt from Federal income tax under the Internal Revenue Code of 1954 when received by the Fund will retain its status as tax-exempt interest when distributed to a Certificateholder.

Under this ruling each certificateholder will be considered the owner of a pro rata portion of the Fund and each certificateholder will have a taxable event when the Fund disposes of a bond (whether by sale, exchange, redemption or payment at maturity), or when the certificateholder redeems or sells his unit. The tax cost of a unit to the holder thereof will be the sum of his per unit tax cost for each of the bond issues held in the Trust Fund. Therefore, as a result of the tax cost reduction requirements of the Internal Revenue Code of 1954 relating to amortization of bond premium, under some circumstances a certificateholder may realize taxable gain when his units are sold or redeemed for an amount equal to his original cost.

Application has been made to the New York State Tax Commission for a ruling that the Fund will be treated as the income of the certificateholders. However, the exemption of interest on municipal obligations for Federal income tax purposes does not result in exemption under the income tax laws or other laws of New York or any other state. The tax laws of several states vary with respect to the taxation of such obligations.

DESCRIPTION OF FUND—The Fund has been crated under the laws of the State of New York pursuant to a Trust Indenture and

DESCRIPTION OF FUND—The Fund has been crated under the laws of the State of New York pursuant to a Trust Indenture and Agreement, dated as of July 21, 1961, herein referred to as the "Indenture," between John Nuveen & Co. in its capacity as the Sponsor and the United States Trust Company of New York, herein referred to as the "Trustee."

Under Section 2.01 of the Indenture the Sponsor has deposited with the Trustee the Public Bonds acquired in the manner set forth below. These bonds initially constitute the underlying securities in the Fund. Simultaneously with such deposit the Trustee, pursuant to Section 2.03 of the Indenture, has delivered to or on the order of the underwriter certificates for 100,000 units representing the entire ownership of the Fund for distribution.

Each of the 100,000 units offered represents a fractional undivided

the Fund for distribution.

Each of the 100,000 units offered represents a fractional undivided interest in the Fund. The numerator of the fraction is 1 and the denominator is the number of units outstanding at any particular time. Initially each unit is to represent 1/100,000 fractional undivided interest in the Fund. Thereafter, the denominator of the fraction will be reduced (and the certificateholder's fractional undivided interest in the Fund increased) to the extent that any units are redeemed by the Trustee.

redeemed by the Trustee.

Each unit will refine outstanding until the termination of the Indenjure, or, its earlier, redemption. The Sponsor will initially, and from time to time thereafter, hold units in connection with their offering, and such units may be tendered to the Trustee at any time for redemption. While it is the intention of the Sponsor to purchase units tendered to the Trustee by others, in accordance with the Indenture, the Sponsor is under no obligation to do so and, accordingly, no assurance can be given that the Fund will retain its original size and composition.

At any particular time the Fund shall according to the standard of the standard o

size and composition.

At any particular time the Fund shall consist of such of the Public Bonds initially deposited therein as may continue from time to time to be held (including certain refunding securities deposited therein in exchange or substitution for any of such bonds in accordance with the Indenture), together with all undistributed interest thereon and all undistributed cash from the sale; redemption, liquidation or maturity thereof. Such amounts as may be deposited in the Reserve Account, hereinafter referred to, shall be excluded from the Fund.

Reserve Account, hereinafter referred to, shall be excluded from the Fund.

ACQUISITION OF UNDERLYING PUBLIC BONDS — The Sponsor has acquired certain tax-exempt obligations of states, counties, municipalities, etc., in the principal amount of \$10,000,000 (including in certain cases contracts for the purchase of bonds on a "When-Issued" basis) for deposit in the Fund. The Sponsor has selected and from time to time acquired the bonds best suited, in its experience and judgment, for initial deposit in the Fund, based upon, in addition to other factors, the following requirements (1) that every bond so selected is the obligation of an issuer which is not in default in the payment of the principal of and interest on any of its obligations outstanding with the public; (2) that the cost price to the Fund of the bonds purchased was reasonable relative to the cost of other tax-exempt securities of comparable quality and maturity available in like amount; and (3) that the bonds are well diversified as to purpose of issue and location of issuer.

Neither the Sponsor nor the Trustee shall be liable in any way for any default, failure or defect in any deposited security.

The price at which the Public Bonds deposied in the Fund were being offered to the public on the date of their deposit has been established by the Trustee on the basis of consultation with dealers in Public Bonds, other than the Sponsor, or by reference to the Blue List of Current Municipal Offerings (a daily publication containing the current public offering prices of Fublic Bonds of all grades currently being offered by dealers and banks). The offering prices of such Public Bonds as were offered in said Blue List on the date of their deposit were not in excess of the highest public offering prices of such Bonds as set forth in said List.

EVALUATION OF UNITS—The Indenture provides that the Trustee shall appraise the value of the; Fund as of 10:00 a.m. New York

prices of such Public Bonds as were offered in said Blue List on the date of their deposit were not in excess of the highest public offering prices of such Bonds as set forth in said List.

EVALUATION OF UNITS—The Indenture provides that the Trustee shall appraise the value of the, Fund as of 10:00 a.m. New York time on the last business day of the months of January and July (the "Semi Annual Evaluation"). The Semi-Annual Evaluation will itemize: (1) cash on hand in the Fund, (2) the value of the bonds held in the Fund, which shall be the current bid price (or, if no bid price is available with respect to any of the bonds, the appraised value determined by the Trustee on the date of evaluation, and (3) accrued but unpaid interest thereon. For each such evaluation there are to be deducted: (1) amounts representing any applicable taxes or governmental charges payable out of the Fund and for which no deduction shall have previously been made for Reserve Account purposes, and (2) amounts representing accrued expenses chargeable to the Fund.

The current bid prices of the bonds in the Fund so obtained by the Trustee will be obtained from Public Bond dealers interested in acquiring such bonds. The Sponsor may be included among the dealers furnishing such prices, but a substantial number of such bids will be obtained by the Trustee from dealers other than the Sponsor. It is likely that bid prices will be available for all of such bonds, but if a bid price should not be available for all of such bonds, but if a bid price should not be available for all of such bonds, but if a bid price should not be available for all of such bonds in the Fund, except for the initial determination of the Trustee that this method of appraisal will be followed for all evaluations of the Fund, except for the initial determination of the offering price which will be made by the Trustee.

REDEMPTION OF CERTIFICATES—Any certificate may be tendered for redemption at the corporate trust office of the Trustee in New York City upon payment of any

to which such unit or units would be entitled. Any amounts paid on redemption representing interest shall be withdrawn from the Interest Account. All other amounts paid on redemption shall be withdrawn from the Liquidation Account. The Trustee is empowered to sell underlying bonds in order to make funds available for such purpose. Any unit or units redeemed in the manner described in this and the preceding paragraphs shall be thereby terminated.

The unit value for purposes of redemption of certificates representing units in the Fund is determined on the basis of the current bid price of the Public Bonds held in the Fund, while the public offering price of such certificates will have been determined on the basis of the current offering price of such bonds. The difference between the bid and offering prices of the Public Bonds may be expected to average one and one-half points. In the case of some actively traded bonds, however, the difference may be as little as one-half point, and in the case of inactively traded bonds such difference usually does not exceed three points. Consequently, the price at which units are redeemed may be less than the original amount invested.

The right of redemption, as set forth above, is subject to suspension for any period during which he New York Stock Exchange is closed, or trading on that Exchange is restricted, or for any period during which he New York Stock Exchange is closed, or trading on that Exchange is restricted or for any period during which an emergency exists as a result of which disposal of bonds held in the Fund is not reasonably practicable or it is not reasonably practicable for the Trustee fairly to determine the value of such bonds, or for such other periods as the SEC may by order permit.

Complete and exact details for the week covered by the foregoing will appear in our issue of next week. We cannot furnish them today, inasmuch as the week ends Saturday and the Saturday figures are not available at time of going to press. Accordingly, in the above the last day of the week in all cases has to be estimated.

In the elaborate detailed statement, however, which we present further below, we are able to give final and complete results of the previous week—the week ended July 29. For the week there was an increase of 8.5%, the aggregate clearings for the whole country having amounted to \$27,991,698,138 against \$25,787,181,418 in the same week in 1960. Outside of this city there was a gain of 5.9%, the bank clearings at this center showing an increase of 10.8%. We group the cities according to the Federal Reserve Districts in which they are located and from this we note that in the New York Reserve District the totals show an improvement of 10.7%, in the Boston Reserve District of 6.2% and in the Philadelphia Reserve District of 5.2%. In the Cleveland Reserve District the totals are smaller by 0.8% but in the Richmond Reserve District the totals are larger by 9.7% and in the Atlanta Reserve District by 6.1%. The Chicago Reserve District registers a gain of 3.6%, the St. Louis Reserve District of 5.2% and the Minneapolis Reserve District of 10.0%. In the Kansas City Reserve District the totals record an increase of 2.7%, in the Dallas Reserve District of 12.8% and in the San Francisco Reserve District of 11.5%.

Condition Statement of Member Banks

Condition Statement of Member Banks

The condition statement of weekly reporting member banks of the Federal Reserve System in leading cities shows the following principal changes for the week ended July 26, 1961: Decreases of \$154 million in loans adjusted and \$618 million in demand deposits credited to domestic banks; and increases of \$2,204 million in holdings of U. S. Government securities, \$889 million in demand deposits adjusted, and \$2,374 million in U. S. Government demand deposits.

Commercial and industrial loans decreased in seven districts for a net loss of \$60 million (of which \$48 million was in Chicago), as compared with a net decrease of \$181 million during the comparable week a year ago. Loans to brokers and dealers for purchasing or carrying U. S. Government securities decreased \$73 million, and their loans for purchasing or carrying "other" securities decreased \$61 million. Loans to nonbank financial institutions decreased \$17 million. Other loans increased \$41 million.

Holdings of Treasury bills increased \$2,282 million, largely reflecting purchases of the new tax anticipation issue maturing March 23, 1962. The combined total of Treasury notes and U. S. Government bonds decreased \$72 million. Holdings of "other" securities increased \$85 million.

Demand deposits adjusted increased \$408 million in New York City, \$182 million in the Chicago District outside the City of Chicago and \$124 million in the Dallas District, but they decreased \$71 million and \$69 million in the San Francisco and St. Louis Districts, respectively. Savings deposits increased \$18 million, and other time deposits of individuals, partnerships, and corporations increased \$62 million.

Borrowings of weekly reporting member banks from Federal Reserve Banks decreased \$130 million and borrowings from others decreased \$530 million. Loans to domestic commercial banks decreased \$372 million.

San Diego Imperial Corp.—To Redeem Debentures—
The board of directors of the corvoration on July 24 passed a
resolution to redeem, on Sept. 15, 1961, all of the company's outstanding 5¼% subordinated convertible debentures due April 1, 1975.
Stanley B. LaRue, financial Vice-President, said the redemption
price, including interest accrued to the redemption date, will be

Science Resources, Inc.—Common Stock Offered—Pursuant to a July 6, 1961 offering circular, Lewis Wolf, Inc., and Marshall, Roberts & Co., Inc., New York City, publicly offered 100,000 shares of this firm's common stock at \$3 per share. The stock was all sold.

BUSINESS—The company was incorporated under the laws of the State of Delaware on March 30, 1961. It maintains its principal office at 1 Story Street, Cambridge, Mass. and also an office at 133 East 54th Street, New York, N. Y. The company is still in the organizational stage and has not yet commenced operations.

The company was organized to engage principally in three related lines of endeavor: (1) to provide business management services to consulting scientists of outstanding professional stature, including physical scientists such as physicists, astronomers, biologists and chemists and management scientists including marketing, statistical and administrative experts; (2) to create for the persons it represents additional income by the organization of consulting projects requiring either the services of other specialists associated with the company or of a staff of assistants to be supplied by the company; and (3) to take advantage of opportunities to perform financing services, such as arranging public and private financing, negotiating mergers, and initiating expansion plans, which opportunities may be expected to be derived from the contact of its consultants with numerous firms, especially science-based companies. There is no assurance that scientists will choose to avail themselves of the company's business management service, that the company will be able to make satisfactory arrangements for the performance of services by such consultants as it may manage, that the company will be able to make satisfactory arrangements for the performance of service by such consultants as it may manage, that the company will be able

activity.

The postwar period has witnessed a considerable technological advance, as a result of which many companies, including some of the largest, have been required from time to time to engage the services of persons of outstanding scientific repute to assist in resolving basic problems which require the highest order of scientific competence. In the same period, there has been substantial progress in the field of management science, and larger industrial organizations in par-

tular have made a practice of employing management consultants the requisite experience, competence, and reputation to advise on sic management functions.

basic management functions.

Many of the persons available to perform such services, particularly university professors, are not able effectively to market their services, and presently rely on prospective clients to seek them out with offers of consulting engagements that are generally performed for a per diem fee not necessarily related to the value of the services to the companies for which they are performed. The company believes that such individual consultants have the same need for representation and for administrative assistance as do other talented persons, such as actors and actresses, and that the company may employ on their behalf substantially the same techniques as are presently employed by talent agencies. To the best of the knowledge of the company, there is no other firm presently offering such management services to consulting scientists.

Sisters of Charity of the House of Providence in the Territory (Now State) of Washington—Serial Notes Offered — Pursuant to a July 11, 1961 offering circular, B. C. Ziegler & Co., West Bend, Wis., publicly offered \$2,000,000 of this order's Providence Hospital direct obligation serial notes, dated June 1, 1961, and due serially to June 1, 1976. The notes were offered at par in denominations of \$500, \$1,000, \$5,000 and \$10,000.

denominations of \$500, \$1,000, \$5,000 and \$10,000.

PROCEEDS—In 1939 the Sisters of Charity of Providence completed construction of the 50-bed Providence Hospital in Anchorage, Alaska. Although the building has been well maintained, and the bed capacity increased to 124, it does not lend itself to additional expansion so badly needed in rapidly growing Anchorage.

For this reason the Sisters are now building a new Providence Hospital at a total estimated cost of aprpoximately \$5.925,000, including equipment. Initially the new hospital will provide 165 beds and 31 bassinets, although the structure is designed for possible future expansion to 400 beds. This new facility is expected to take care of the increased population of the Anchorage area for many years to come. Construction of the new hospital was started in the summer of 1960, and it is anticipated that it will be ready for occupancy by June, 1962.

The Sisters of Charity of Providence, through their Scattle Corporation which holds title to the Providence Hospital property, are issuing the \$2,000,000 of Direct Obligation Serial Notes to pay in part the cost of the constructing and equipping of the new hospital.

Additional funds which will be provided include a Hill-Burton Grant from the Federal Government in the amount of \$900,000 and a grant from the State of Alaska for \$450,000. It is anticipated that pledge payments received or to be received as a result of a building fund campaign conducted in Anchorage amount to not less than \$215,000. The corporation will provide the balance of the funds needed to complete payment of all construction and equipment costs from cash on hand or to be accumulated through additional borrowing by the corporation to the extent and at such time as it may be needed.

DESCRIPTION OF NOTES—The notes bear interest from June 1, 1961, are in coupon form and are registerable as to principal and interchangeable as to denominations at the office of the Corporate Trustee upon payment of expenses incident to such registration or interchange. Interest is payable Sept. 1, 1961 and semi-annually thereafter on March 1 and Sept. 1 of each year at First Wisconsin Trust Co., Milwaukee, Wis., Corporate Trustee, or, at the option of the holders, at the offices of the Paying Agencies in Chicago, Ill. or West Bend, Wis. Both principal and interest of the notes will be payable in lawful money of the United States of America.

Standard Oil Co. (New Jersey)—Six Months' Report—Consolidated earnings of the company for the first half of 1961, released by M. J. Rathbone, President, were estimated at \$335,000,000, equal to 8.6% of total consolidated revenues. The company has 685,000 registered shareholders, and based on the 216,533,000 shares currently outstanding, the consolidated results were equal to \$1.78 per share. The estimated earnings for the first half of this year showed a gain of 22% over the comparable 1960 period but, it was pointed out by Mr. Rathbone, were only 3% above the improved results of the second six months of last year. Comparable earnings for the first six months of 1960 were \$315,000,000, or \$1.45 per share. According to Mr. Rathbone, the improvement for the first half of 1961 over the corresponding period last year reflected principally an improved price structure in the U. S. and volume gains abroad which outweighed continued price weakness there. However, in view of the recent price weakness in the U. S. and continuing intensive competition abroad, Mr. Rathbone pointed out that the 22% rate of earnings improvement for the first half versus 1960 cannot be expected to continued price weakness in the U. S. and volume gains abroad which outweighed continued price weakness there. However, in view of the recent price weakness in the U. S. and continuing intensive competition abroad, Mr. Rathbone pointed out that the 22% rate of earnings improvement for the first half versus 1960 cannot be expected to continued price weakness and investments were estimated at \$4,488,000,000 for the first six months of 1961 compared with \$4,229,000,000 for the comparable 1960 period.—V. 193, p. 749. Webb & Krann Inc.—Recapitalization Plan Effective

Webb & Knapp, Inc.—Recapitalization Plan Effective

Webb & Knapp, Inc.—Recapitalization Plan Effective
The company has completed its previously announced plan to simplify its capital structure, William Zeckendorf, President, said.
The company's second preferred stock including authorized but unissued shares has been eliminated and the outstanding common shares increased.
Under the plan, the 1,000,000 shares of outstanding second preferred stock, almost all of which were held by Mr. Zeckendorf, have been exchanged for 8,000,000 new shares of common stock. Another 1,000,000 authorized but unissued shares of second preferred stock also have been eliminated.
Webb & Knapp now has outstanding 28,000,000 shares of common stock, compared with 20,000,000 common shares is authorized. The company also has 62,780 shares of preference stock outstanding, which, with the common, are now the only two classes of stock. The American Stock Exchange has approved for listing the additional common shares.

Mr. Zeckendorf said the elimination of the second preferred brings the common stock closer to a claim on earnings and substantially reduces the liquidating claims prior to that of the common.

The second preferred shares that were eliminated had a right to cumulative dividends at the rate of \$1.50 a share a year. Accumulated but unpaid dividends on this issue just before it was eliminated were approximately \$5,000,000. These shares had a claim upon liquidation of \$25 a share, or \$25 million, and a redemption price of \$26.875 a share, or \$26,875,000 for the 1,000,000 outstanding sharees that were eliminated.

eliminated.

No common stock dividends can be declared by Webb & Knapp, according to its charter, until accumulated dividends on the second preferred shares have been satisfied (which has now been accomplished by the elimination) and the other issue of preference stock has been retired. The preference stock now outstanding has a redemption price of \$107.50 a share, plus accumulated dividends, which presently total \$45.45 a share. Payments on the arrears, if any, are made annually and are a fixed percentage of earnings, if any, of the previous year.—V. 191, p. 2250.
