A revolutionary new machine that can produce aluminum or tin plated steel cans at speeds more than three times as fast as conventional machines has been developed by the company.

Maximum speeds on current can-making machines are 600 per minute.

"The first new machine will begin producing cans commercially at one of our plants early in 1962," said William F. May, company Vice-President and general manager of the Canco Division.

Materials used and types of cans made will depend on customer requirements, he added. It was pointed out that one machine can handle any type of metal used in making cans, and has replaceable parts for manufacturing different sizes of cans.—V. 194, p. 418.

"While the results for the first three months of 1961 were adversely affected by the poor economic conditions existing at that time, the second quarter results showed an improvement of approximately 10%," Curtiss pointed out. It is expected that this improvement will continue during the remainder of the year and that results for 1961 will compare favorably with those achieved during 1960.

The company's volume of loans was $206,059,583 during the first six months of 1961 compared with $194,220,018 in the first half of 1960. Outstanding receivables at June 30, 1961, were $301,341,746 while a year earlier they were $267,188,847.

"We have been conducting research in the laser field for some time," Mr. Schumacher said. "We have formed this corporation because of the potential in this field. However, despite the promising future of the laser field, much fundamental research remains to be done before lasers can be used for many practical applications."

The term "laser" is derived from the first letters of "light amplification by stimulated emission of radiation." Basically, a laser is a

highly effective device for amplifying electro-magnetic waves like light and radio waves. With such a device, it is believed light beams can be used to carry enormous amounts of information such as telephone calls, television programs and data messages. Because the field is so new, many of the potential applications of lasers have not been fully explored.

American Optical is investigating a sun-powered laser that would use direct sunlight as a power source. A contract for such investigation was awarded by the Wright Air Development Division, Air Research and Development Command. Work on the contract is being done in the Southbridge Research Center.—V. 194, p. 419.

Corporate and Municipal Financing Ahead

By SIDNEY BROWN

The $279,351,840 Pacific Northwest Bell Telephone Co. rights offering set for Sept. 20 is largely responsible for this week's estimated corporate equity financing figure hovering at the $400 million benchmark. Corporate fixed interest rate senior debt issues set for the week total but $2.5 million in three small issues. State-local issues predominate in this week's debt financing calendar in the amount of $183,266,000 as of this writing.

Both the four-week and the total municipal backlogs of offerings with set sales dates have declined compared to last week's tallies (see tables below). The spectacular repeat bidding performance by William S. Morris & Co.'s affiliate, State Street Securities Corp., took out California's $100 million offering from the backlog. So, too, did the syndicate headed by Bankers Trust Co., First National Bank of Chicago, First National City Bank of New York, and First Boston Corp. to the tune of $46,756,000 Massachusetts serial bonds. Other tax-exempt sales in the Sept. 7 thrcugh Sept. 13 period, for $1 million or larger issues amounted to $51,017,000. Additions to the *Chronicle's* Sept. 14 municipal calendar of larger issues came to $80,636,000 —hence. the decline in the floats.

THIS WEEK'S LARGER OFFERINGS

Besides the Sept. 20 Pacific Northwest Bell Telephone Co.'s rights offering, there are these larger demands for capital tentatively set for Sept. 18-23 week: Today (Sept. 15) Shearson, Hammill anticipate clearance so it may offer $15 million of First Mortgage Fund beneficial interests, and New York University, N. Y., will seek bids for $3,446,000.

Kidder, Peabody hopes to come out with 375,000 shares of NuTone Inc., common tomorrow, or possibly the next day. Also, A. C. Allyn & Co. and Westheimer & Co. plan to bring out $5 million Drug & Food Capital Corp. common on Sept. 19. The largest municipal issues scheduled for the same day are: $35.5 million State of Oklahoma; $25,893,000 Pennsylvania State School Building Authority, Pa.; $8 million Sacramento, Calif.; and $7,250,000 Milwaukee. Wisc.

On Wednesday, in addition to the above cited Pacific Northwest Bell Telephone Co. financing, Control Data Corp.'s 300,000 shares of common *via* Dean Witter & Co., and $20 million Flato Realty Fund underwritten by Flato, Bean & Co. (Corpus Christi, Texas) hope to see the light of day. That day's municipal debt offerings will total $87,460,000 in four separate competitive bids which include $42,940,000 New York City and $18 million Los Angeles Dept. of W. & P., Calif.

Other larger corporates which may appear this week are: Van Alstyne's managed 400,000 shares of Lewis (Tillie) Foods, common; Blunt Ellis & Simmons underwritten $5 million Apache Realty Corp., units; and 340,000 shares of Admiral Plastics Corp. *via* Shearson, Hammill & Co.

September 21 has but one larger issue scheduled, a municipal—$9 million Harris County, Houston Naval District, Texas.

NO GAIN AS BACKLOG TABLES LEVEL-OFF

The following tables should provide an insight as to the forthcoming short and long run demand for capital. The pending backlog of statements registered with but not cleared by the SEC dropped ever so slightly from the previous week's record high of 600 to the Sept. 7 figure of 597. The increase in corporate bonds is due to Japan's filing of $20 million 6% guaranteed external loan bonds and Stauffer Corp.'s $7.5 million convertible subordinated debentures. Equities were kept from a greater drop by Pittsburgh Steel Co.'s 1,110,617 shares of a rights offering, and 147,000 shares of Citizens Life Insurance Co. of New York. The fall build-up in corporate bonds, and to some extent in municipals, has not showed its hand as yet.

SOLVING THE MYSTERIOUS RISE IN SHAREHOLDERS VERSUS DECLINE IN INDIVIDUAL HOLDINGS

For the first time since mid-1958 the Securities Exchange Commission has been able to report that individuals increased their holdings ($200 million) of "other preferred and common stock" issues—as distinguished from bonds, notes and investment company shares. This occurred during the second quarter of this year when individuals added $1.3 billion in total corporate securities to their portfolio which included $200 million in "other" equities. This $1.3 billion figure, incidentally, is the largest quarterly increase in the postwar period, during a time of remarkable speculative gambling (shades of 1929) in new issues.

Yet, in the quarter marking a plus $200 million in "other" equities held by individuals, there was a $500 million increase in mutual fund shares held and a $600 million increase in bonds and notes. In the first quarter of 1961, individuals increased their mutual fund portfolio by $600 million and decreased their "other" equity holdings by $500 million—for no net gain in corporate securities held, with $100 million decline in bonds and notes in the first quarter.

** Less than $50 million.*

[1] Marketable governments which includes nonguaranteed Federal agency issues.

[2] Includes both closed-end investment companies and open-end mutual funds.

It might be noted that the $1.3 billion increase in corporate securities almost offset the $1.4 billion decrease in total securities which takes in municipals and governments as well as corporates during the first six months of 1961.

Considering the valiant efforts made by the Wall Street industry—the New York and the American Stock Exchanges, other listed exchanges throughout the country, and broker-dealers in the 50 states—to increase the number of people participating in the direct ownership of publicly-held corporations the figures on direct individual equity holdings provide an amazing contradiction.

The term "people's capitalism" has been widely used in educating people to own shares of companies directly. It is a term that breathes "free enterprise." It conveys a sense of direct ownership and selection of corporations. Not the kind of ownership indirectly or vicariously provided by banks to their depositors, insurance companies to their policy holders, and trust funds to life tenants and remaindermen. What apparently has happened is that "people's capitalism" has taken the form of holdings in mutual funds—indirect ownership of American enterprise.

In 1959 individuals added $900 million to their holdings of total corporates but in doing so they sloughed off $900 million in "other" equities—i.e., direct ownership. They also added $1.7 billion in investment company shares in that same year. In 1960, individuals decreased "other" equities by $1.8 billion and added $1.5 billion to mutual fund share holdings and $1.5 billion in bonds and notes.

This took place despite the voluminous number of shares traded on the exchanges (causing the tape to run late quite often) and on the over-the-counter market, the new records achieved by the stock averages, and the excellent, educational advertising campaigns encouraging American to "Buy a Share in American Enterprise." All this misleadingly conveyed the impression of increased individual holdings.

The lack of interest in direct equity purchases of corporate shares can be judged by what took place in the 1958-June 30, 1961 period. According to the SEC data of individual savings, individuals *reduced* their "other preferred and common stock" ownership shares by $3.3 billion and *added* to their investment company share holdings by $5.9 billion. At no time did Wall Street, coast-to-coast, sell corporates anywhere near the figure of $9.8 billion as was the case for "other U. S. bonds" purchased by individuals in the year 1959.

HAS SHAREHOLDER EDUCATION FAILED?

The puzzling aspect of all this is: (a) where did all the new equity financing in these years go? And (b) how is this decline in individual holdings to be reconciled with the NYSE census of shareholders showing there were 8.6 million shareholders in 1956; 12.5 million a few years later; and 15 million estimated for 1961 according to Mr. Funston in his Exchange's recent (September 15) publication *Stock Plans for Employees?* Neither employee stock plans nor stock options to key management changed the situation.

Here we see an almost doubling in the number of shareholders accompanied by an important decrease in individuals' equity portfolio. What has the shareholder education, the "Peoples' Capitalism," accomplished? Obviously closed-end and open-end funds have gained the attention of individuals. Direct selection of, and participation in, corporate ownership has not benefited. Moreover, institutional investors, including investment companies, have provided the financing of corporate enterprise unaccompanied by a similar trend by individuals. Perhaps future shareholder surveys should concentrate on individual holdings and the refusal of individuals to do their own direct investing, with and without advisory assistance.

Aqua-Chem, Inc.—Rockefellers' Named Largest Stockholders—

The Rockefeller interests were named as the largest public holder of Aqua-Chem stock. The company, an affiliate of Cleaver-Brooks, went to public ownership in May, 1961, and is the pioneer and leading manufacturer of saline water conversion equipment.

The announcement was made at the company's first annual stockholders meeting Sept. 11 at the Avalon Hotel in Waukesha.

In outlining the stockholder base for the company, it was noted that there are over 2,000 stockholders from 40 states and several foreign countries. Fred A. Loebel, President of Aqua-Chem, added that the Laurence S. Rockefeller interests, New York, owned 50,000 shares, the largest single public holding.

At the same time, Mr. Loebel revealed that the Rockefellers have just purchased a large sea water desalting plant for use in a new resort and recreation development on the Virgin Gorda Island in the Caribbean. Utilizing the flash evaporator principle, a technique developed and perfected by Aqua-Chem, this initial sea water desalter will provide all the fresh water needs for guests and employees. Additional conversion units will be installed as these needs increase.

In another development, Mr. Loebel said that, while exact interim figures are not yet available, first quarter results this year are "favorable." He noted that profit looks to be "significantly ahead" of the first quarter for last year while backlog is "impressively improved." —V. 194, p. 419.

Archer-Daniels-Midland—Net Holds—Sales Drop—

The company reported on Aug. 30 that earnings held steady in the year ended June 30, 1961, despite a decline in sales.

Net profit for the year was $3,747,730, equal to $2.35 a share, compared with $3,665,321, or $2.31 a share, a year ago, the company said in its annual report.

Sales and other operating income amounted to $213,115,452, compared with $239,895,380 in 1960.

Thomas L. Daniels, Chairman of the Board, and John H. Daniels, President, said in their letter to ADM shareholders that approximately one-half of the decrease in sales resulted from the disposal or discontinuance of low-margin or unprofitable operations.

They pointed out that earnings had not met expectations, largely because of the industrial recession. The year, however, was one of progress in the expansion and diversification of ADM's agricultural and chemical processing operations.

The company, one of the nation's largest industrial enterprises, operates plants and elevators in 20 states and has manufacturing interests in Canada, Latin America, Europe and Australia.

The ADM executives said the plant expansion program which the company embarked on a year ago is proceeding on schedule.—V. 194, p. 213.

Arkansas Louisiana Gas Co.—Proposed Acquisition—

The company of Shreveport, La., has applied to the FPC for authority to acquire and operate all of the natural gas transmission facilities of MidSouth Gas Co., of Little Rock, Ark.

MidSouth distributes natural gas in eastern Arkansas, and operates interstate pipelines extending into Tennessee. According to the application, MidSouth's total assets as of April 30, 1961, totaled $13,098,443. Its total capitalization was $10,030,297, of which $5,696,000 was debt, the application states.

Arkansas Louisiana proposes to issue 336,000 shares of its common stock to MidSouth for distribution in liquidation to that company's stockholders. Arkansas Louisiana will acquire all of MidSouth's contracts, liabilities and other obligations. The properties and resources of the two companies would then be combined into one corporation. MidSouth's system includes about 225 miles of transmission lines and 706 miles of distribution lines.

Arkansas Louisiana's system is located in Louisiana, Texas, Arkansas, Oklahoma and Kansas. The company said it would continue without change all of MidSouth's operations, services and sales. It also said that it expected the acquisition to result in increased effeciency benefits for MidSouth's present customers, as well as operating economies and improvements.—V. 193, p. 698.

Artnell Corp.—Proposed Merger—

Directors of the Hart-Carter Co., Peoria, Ill., manufacturer of farm machinery components and accessories, and the Day Co., Minneapolis, Minn., manufacturer of dust collecting, air filtering and grain drying and conveying systems, have approved a merger of the two companies, it was announced on Sept. 6, 1961.

W. A. Holtzman, Hart-Carter Chairman, said Hart-Carter would be the surviving company, and that the Day Co. would be operated as a division of Hart Carter. Arthur B. Osgood, President of the Day Co., and J. D. Jensen, Secretary-Treasurer, will become members of the Hart-Carter board.

Shareholders of both companies have been asked to approve the merger at special meetings to be held in Peoria and Minneapolis on Oct. 2. A two-thirds majority is necessary for approval.

Hart-Carter is an affiliate of Artnell Corp., Chicago, of which A. C. Allyn is President. Artnell's other holdings include A. C. Allyn & Co., the Chicago White Sox, and Alco Oil & Gas Co.

Under terms of the merger, the 300,100 outstanding shares of Hart-Carter common stock become outstanding common shares of the surviving company, and the 77,880 outstanding shares of common stock of the Day Co. are converted into 65,000 shares of common stock of the surviving company. The ratio is one share of Hart-Carter for 1.198 shares of the Day Co.

Shareholders of the two companies were told that the merger will provide Hart-Carter with an opportunity to enter into a new but related area of manufacturing.

"The present products of Hart-Carter are incorporated by other manufacturers into equipment used by farmers," the joint proxy statement declared. "The principal products of the Day Co. are used for dust control and air filtering for food processing and other plants and also for processing and handling of grain in storage elevators and mills.

The new firm, to be headquartered at 120 S. LaSalle St., Chicago, will specialize in the leasing of office equipment, machine tools and store fixtures to business and industry in the Midwest, later expanding nationwide.

Behlen Manufacturing Co.—Sales and Net Gain—

The company of Columbus, Neb., reported net earnings of $256,624, after taxes, on sales of $4,879,376 for its second quarterly period ended Aug. 13, 1961. Last year the company's net earnings were $137,817 on sales of $3,729,672 for the same period.

President Walter D. Behlen termed the sales and earnings as very good. He explained that a portion of the increase is due to the poor figures of a year ago when severe weather seriously crippled the firm's operations.

"Generally, farm crops appear very good throughout our sales area which indicates the demand for grain conditioning and storage equipment should continue strong," Behlen stated. "The demand and outlook for commercial and industrial buildings and roof systems continues at a steady rate," he concluded.—V. 193, p. 2431.

These actions have been taken, Wallins said, in line with the company's program of acquisitions and expenditures for research and development work as a means of implementing Cetron's goal for a profitable long-term future.

In his report to shareholders, Wallins also revealed that Cetron has acquired for stock and cash a line of products in the solid state circuitry field. Controls Co. of America—Acquisition—

The Chicago based company, broadly extending its range of gas heating controls through the acquisition of the Thermac Co. of Corona, Calif., has greatly strengthened its position in the rapidly growing gas heating industry, according to Louis Putze, President.

Thermac is a nationally-known manufacturer of manual shut-off gas valves, pressure regulators, and combination control valves for residential, commercial, and industrial gas-fired equipment. Putze said that Thermac was being integrated into the Controls Co. corporate structure as the Thermac Gas Division and it would take over the manufacture and sale of the gas controls and automatic gas ignition systems heretofore manufactured by Controls Company's Heating and Air Conditioning Division in Milwaukee. Combining the two mutually complementary product lines will result in better market coverage, and an intensified engineering and product development effort, he explained.

Controls Company's new acquisition, whose 1961 sales are expected to exceed $3 million, is further developing the market for gas pressure regulators for domestic appliances as well as gas-fired industrial furnaces used for baking, paint drying and a wide variety of other manufacturing and processing operations.—V. 194, p. 845.

Coral Aggregates Corp.—Opens New Plant—

The company, a Florida based building material supplier, opened a new plant at Miami on Sept. 18, which is capable of supplying 4,500 tons of aggregates a day plus an array of profitable by-products. The cost of the new facility was $400,000.

Probably the most modern aggregate producing operation in the country, the new plant can be completely operated from a single tower room which can start, stop or adjust any operation of machinery by remote control. Located four miles from downtown Miami and within two miles of the Tamiami Trail, the unit is in an excellent position to supply aggregates for the rapidly expanding building operations in Southern Florida. (Florida uses more cement block for building purposes than any other state in the Union.) In addition, the Florida Legislature has approved plans to expand the Tamiami Trail from two to four lanes. The importance of this step to Coral becomes apparent when one realizes that a modern highway requires 100,000 tons of aggregates per mile for construction purposes.

According to Murray Levine, President and director of Coral Aggregates, "The new plant was assured of success even prior to its completion. Coral Aggregates has signed a contract with Sampson Concrete Industries, Inc. of Miami, to provide that firm with 300,000 tons of aggregates each year. Over and above the building boom, highway expanding programs and existing contracts, we at Coral feel that our success is assured. It is well known that the aggregates situation in Florida as far as natural resources are concerned leaves a great deal to be desired. Coral is in an excellent position, far better than that of many other companies in the area, since it owns 160 acres of rich quarry land with a rock deposit estimated at over 8½ million tons. Our plant is located on this land with direct access to the Tamiami Trail and railroad sidings of the Seaboard railroad."—V. 193, p. 804.

The company on Aug. 31, 1961 filed a Reg. A covering 10,000 common shares (no par) to be offered at $14.75, through John A. Kemper & Co., Lima, Ohio.—V. 192, p. 399.

Crosby-Teletronics Corp.—Sues GE—

The corporation of Syosset, L. I., instituted a patent infringement suit Sept. 7 against General Electric Co., announced Robert S. Marston, President of Crosby-Teletronics.

The suit—filed in Federal Court, Southern District, New York, charges infrigement by General Electric on a Crosby patent covering the method and equipment necessary for the broadcasting and reception of Stereophonic FM in accordance with the standard adopted by the FCC last April 19. The patent was granted in 1958 to Murray G. Crosby, company board chairman and director of research, and assigned to Crosby-Teletronics.

Exhaustive and repeated patent searches reveal that the 1958 Crosby patent is the only one which relates to the FCC approved Multiplex Stereophonic FM broadcasting method, according to Mr. Marston.

"We are certain of our technical and legal grounds," he said. "We have retained the law firm of Pennie, Edmonds, Morton, Barrows & Taylor and regardless of our relative corporate sizes we intend and are prepared to protect our patent by all available legal means."—V. 193, p. 804.

Curtis Industries, Inc.—Sales Gain, Earnings Off—

Sales continued to rise in fiscal 1961 to $8,483,082, 6% above the 1960 figure of $8,010,523, according to the annual report on Aug. 31.

Net profit was $415,875, the third best showing in Curtis history and "a creditable one in view of several non-recurring costs and the profit pressures we experienced," President Morris Abrams reported. The company develops and distributes automotive replacement parts, fasteners and hardware specialties, and is one of the largest manufacturers and distributors of keys and key machines.

The 1961 earnings amounted to 67.8 cents per share, compared with last year's all-time record of $475,413, or 77.5 cents.

"For the new fiscal year, orders are already running approximately 10% ahead of last year," Mr. Abrams told shareholders. "We think it is reasonable to expect that this improvement will become greater as the new year progresses."—V. 190, p. 869.

Dayjon Explorers Ltd.—Securities Registered—

This company of 85 Richmond St., West, Toronto, Canada, filed a registration statement with the SEC on Sept. 11 covering 2,000,000 shares of $1 par capital stock, to be offered for public sale through Alexander Watt & Co., Limited, of Toronto. The underwriter has agreed to purchase 25,000 of the shares at 20 cents per share within ten days after the effective date of the statement. It has an option to purchase the remaining 1,975,000 shares at prices ranging from 20 cents to 40 cents a share, and averaging about 30 cents per share. The shares are to be offered for public sale at prices arbitrarily fixed by the underwriter from time to time. According to the prospectus, the Canadian over-the-counter market in the stock has been supported solely by the underwriter, and the trading prices largely reflect arbitrary determinations by the underwriter and have not been, and are not, necessarily reflective of the true market value of such shares.

The company (formerly Sumac Explorations Limited) is engaged in exploration for gold ores on its property in Mongowin Township, Sudbury Mining Division, Ontario. Such property consists of 12 patented claims acquired from McMillan Gold Mines, Limited, Toronto, pursuant to an agreement in 1959 whereby the company acquired all of the assets and properties of McMillan, subject to its liabilities, for 200,000 capital shares. In addition, the company owns 18 unpatented claims in Mongowin Township acquired from Alexander Periam Watt, Jr., President and principal stockholder of the underwriter, for 700,000 capital shares of the company. Mr. Watt acquired such claims as a grubstake at a cost of $1,000. An addition 655,005 shares were sold for $80,880. From May through June, 1961, an aggregate of 549,946 shares of the company had been sold to residents of the United States and, according to the prospectus, the company understands that the Commission may be of the opinion that no exemption from the registration requirements of the Securities Act of 1933 was available therefor. The prospectus further states that the company has operated at a loss since its inception (1959). The net proceeds from the stock sale, estimated at $600,000 if all the shares are sold, will be used primarily to carry out a program of exploration as recommended by Scope Mining and Exploration Consultants Limited, which firm the company has contracted with to carry out the early phases of its program. Any balance will be used to defray administrative expenses and provide working capital.

The company has outstanding 1,555,005 shares of capital stock, of which Mr. Watt owns about 45%. William Leonard Hodgson is listed as President.

Diana Stores Corp.—Acquisition—

An agreement has been signed for the corporation to purchase Great Eastern Mills, Inc., a privately owned chain of discount department stores in the New Jersey-New York Metropolitan area, it was announced by Samuel D. May, President.

The acquisition will involve an undisclosed number of Diana Stores common shares. Diana shareholders will be asked to ratify the transaction at the annual meeting on Oct. 23, 1961.

Great Eastern has three large outlets, located on Route 17, Paramus, N. J., Route 46, Little Falls, N. J., and Hempstead Turnpike Elmont, L. I. Combined sales of the three units are currently running at an annual rate close to $45,000,000, including leased departments. Diana's fiscal 1961 sales were $49,414,808.

The Great Eastern stores operate apparel departments, which account for about $10 to $12-million in annual volume, as well as a number of hard goods departments including housewares, toys, luggage, juvenile furniture and others. All of these hard goods operations represent entirely new areas for Diana. The purchase also gives Diana an interest in a leased food department and a linens and domestic operation.

Sales Up—

Sales of this corporation for August, 1961, the first month of the apparel chain's 1961-1962 fiscal year, amounted to $4,181,810, an increase of 5.4% over $3,966,870 in August, 1960.

Stores in operation on Aug. 31, 1961 numbered 288, compared with 302 on the same date a year ago.—V. 194, p. 633.

Dyna-Therm Chemical Corp.—Acquisition—

The corporation of Culver City, Calif., has acquired Highland Stucco & Lime Products, Inc., of Van Nuys, Calif., it was announced on Sept. 6 by George M. Joyce, President of Dyna-Therm, and Gus Jakel, President of Highland Stucco.

The acquisition is subject to the approval of the California Corporation Commissioner. Higaland Stucco would become a wholly-owned subsidiary of Dyna-Therm, with the present management headed by Jakel, and executive Vice-President Donald E. Streich, continuing in active direction of the company.

A privately held corporation, Highland Stucco is the second largest stucco and lime manufacturer in Southern California. Sales for the fiscal year ended Aug. 31, 1960, were $1,014,000, and pre-tax profits amounted to $100,000. For fiscal 1961, earnings are expected to show a gain of about 20% over 1960. Sales will be somewhat lower because of a reduction in operations during the spring necessitated by the installation of new automated equipment.

Dyna-Therm manufactures high temperature and insulated coatings, plastics, specialty building materials and a complete line of consumer, contractor, and industrial paints. For the fiscal year ended Sept. 30, 1960, Dyna-Therm reported sales of $1,400,000 and a net loss of $11,000. Sales for the current fiscal year, including Mathews Paint Co., acquired in January, 1961, are running at an annual rate of $3,000,000. —V. 193, p. 601.

The company, of Plymouth, Mich., announced Sept. 11 that it has received tenders of more than 90% of the common stock and 80% of the preferred stock of Aberdeen Plywood & Veneers, Inc., Aberdeen, Wash., and the exchange has become effective.

Edward S. Evans, Jr., President of Evans Products, said that the exchange in effect consummates the tender offer made by Evans to Aberdeen shareholders on Aug. 14. The exchange was made on the basis of 6/10ths of one share of Evans common for each share of Aberdeen common and 1½ shares of Evans common for each share of Aberdeen $25 par value preferred.

The successful completion of the exchange makes Evans, in addition to its other diversified activities, the third largest fully integrated plywood producer in the U. S.

"The acquisition by Evans of Aberdeen Plywood marks another step in Evans' program of growth and development in plywood and related building products," Mr. Evans said. "It is a major step toward a stronger, more fully integrated plywood operation taking timber from the forest to the plant, to the warehouse, to the dealer."

Aberdeen's net sales for the year ended March 31, 1961, were in excess of $29,000,000. Aberdeen operates an extensive distribution system through 19 strategically located warehouses. It operates two plants whose principal products are plywood specialties, which traditionally are not subject to such wide price fluctuations as are the standard plywood items. The company is the largest producer of marine grade plywood on the Pacific Coast, and the largest producer of medium density overlay plywood in the United States.—V. 194, p. 6.

General Electric Co.—Magnetic Reading Machine Pat'd

An invention on which patent number 3,000,000 was issued Sept. 12 by the Patent Office, U. S. Department of Commerce, is described as "the key to an information-handling revolution, comparable in scope and effect to the industrial revolution."

The invention, an automatic reading system, is assigned to the General Electric Co. It is an electronic device for "reading" numbers printed in magnetic ink.

Clair C. Lasher, general manager of General Electric Co.'s Computer Department at Phoenix, Ariz., said the invention represents "a tremendous technological stride in helping commerce and industry cut through vast paperwork barriers.'

The invention permitted development of a Magnetic Ink Character Recognition (MICR) system now being used by the nation's major banks for processing checking accounts at electronic speeds.

The 3,000,000th patent was granted to the inventor, Dr. Kenneth R. Eldredge, staff scientist, Stanford Research Institute, Menlo Park, Calif. The patent was filed more than six years ago, during early development of an electronic bookkeeping system for the Bank of America. The Bank's system is known as ERMA, for "Recording Methods of Accounting."

The Bank of America in California has been using the system for more than two years and is currently processing checks for more than 2,500,000 depositors on the ERMA system. ERMA was developed by General Electric's Computer Department.

According to Mr. Lasher, development of the MICR electronic bookkeeping system would not have been possible without the "brilliant pioneering efforts of Dr. Eldredge and the combined resources of foresighted organizations such as Stanford Research Institute, Bank of America and the General Electric Co."

The automatic reading system now is in production at General Electric's Computer Department. It is the heart of a computer system installed or planned for installation at some 50 bank sites across the nation for processing checking-accounts at electronic speeds.

United States Commissioner of Patents, David L. Ladd, presented the 3,000,000th patent to Dr. Eldredge during special ceremonies at the Department of Commerce here.

Mr. Lasher, said in a statement honoring the inventor that "history will someday record this invention as the beginning of an information-handling revolution—a revolution comparable in scope and effect to the industrial revolution." He predicted that "within three years every major bank in the nation will be using MICR systems, stemming from this invention, for checking-account bookkeeping."

The invention "reads" a special type font known as E-13B. Developed by General Electric's Computer Department, the type font was adopted by the American Bankers Association as the common machine language for bank check-accounting. The font comprises Arabic numerals from 9 through 0, and four symbols.

The font is imprinted in magnetic ink along the bottom of conventional bank checks. Bank checks bearing the numbers and symbols are already widely distributed by many banks.

Mr. Lasher said more than three million checking accounts are now being processed every working night by General Electric computer systems using the reader described in patent number 3,000,000.—

Globe-Union Inc.—Proposed Acquisition—

The company, of Milwaukee, Wis., announced on Sept. 5 the pending acquisition of Wilrite Products Inc. of Cleveland, Ohio, a pioneer manufacturer of fixed high stability precision resistors using a patented, "Metalloy" metallic dispersion in vacuum. These resistors are sold to electronic manufacturers nationally. The company also acts as a sub-contractor on component parts for prime contractors.

"The company is being acquired through an exchange of stock;" according to C. O. Wanvig, Jr., Globe-Union President, "it is Globe's intention to acquire Wilrite as an operating entity or 'going business' retaining its existing personnel and continuing its operations as a wholly-owned subsidiary at its present location."

Wanvig pointed out that "Wilrite's fixed resistor business and its metalized electronic components will be ideal complements to the components currently produced by our Centralab Electronics Division. While Wilrite's sales are currently less than $500,000 a year, we are enthusiastic about the possibility of developing a major market for these resistors by identifying Wilrite with Centralab's widely-known product line and by utilizing our extensive Centralab sales organization." The acquisition reportedly involves less than 5,000 shares of Globe stock.—V. 193, p. 2543.

(W. T.) Grant Co.—Six Months' Report—

Sales for the six months ended July 31, 1961 were $247,529,212, an all-time high for the first six months of a year, and 10.3% above last year's first half sales of $224,399,502.

First quarter sales were 5.3% above last year, and second quarter sales, with better general economic conditions prevailing, were 14.8% above a year ago.

Net earnings for this year's first half were $90,998 compared to $1,036,629 last year. There were no earnings per common share this year. Last year, the company earned 13 cents per common share.

The lower net earnings in the first half reflect a first quarter loss. Second quarter earnings were above those of a year ago, but not enough to offset the first quarter loss by any significant amount.

Last year, first half earnings of $1,036,629 increased to $9,198,133 for the year. Improving general economic conditions offer the opportunity to turn in good second half results.

Regular quarterly dividends of 93¾ cents per preferred share and quarterly dividends of 30 cents per common share were paid in the first half this year, the same as a year ago. Quarterly dividends at the same rates have been declared payable Oct. 1, 1961.

During the first half of 1961, the company had a stepped up expansion program and has plans for a continuation thereof for the balance of the year. It opened 36 new shopping center stores this year, enlarged six stores, reopened one store closed after a fire, and also opened a new distribution center in Buena Park, Calif. In the first half last year, 28 new shopping center and one downtown stores were opened.

In addition, 23 new stores were opened in August this year, compared to 16 a year ago. In the second half of this year which includes August, approximately 70 to 75 new stores will be opened, which compares with 49 new stores opened in the second half of 1960.

Nine downtown stores were closed this year, and at July 31 1961, there were 891 stores compared to 822 stores a year ago.—V. 193, p. 2543.

Gregory Industries, Inc.—Sale and Net Up—

This Lorain, Ohio manufacturer of Nelson stud welding and stud driving equipment and concrete fastening devices, on Aug. 31, reported net earnings of $36,830, or 27 cents per share, for the first quarter of its fiscal year (May through July). Consolidated earnings for the first quarter of 1960 were $22,867, or 24 cents per share, on the basis of shares then outstanding.

Sales for the period totaled $2,046,329, up 2% over consolidated sales of $2,004,414 in the comparable period last year, with both stud welding and distributor products divisions contributing to this increase.

George E. Gregory, President, stated that a steady upward trend in the markets for stud welding products in the capital goods industry bodes well for operations in the second and third quarters. Sales normally follow trends in the capital goods industry by approximately six months. Sales of powder actuated tool products, he said, continue to gain as the number of independent distributors handling these products expands.—V. 194, p. 743.

Heublein, Inc.—Directors Vote Split—

The board of directors of the Hartford, Conn., company voted Sept. 7 to split the company's stock three-for-one and also approved other changes involving recapitalization. Stockholders of the company which manufactures and imports fine foods, wines and liquors, will meet in Hartford on Oct. 19 to act on the proposals.

John G. Martin, Chairman, announced that Heublein sales and earnings again established new records, a trend that has prevailed for the past 10 years. Consolidated net income for the fiscal year ended June 30 totaled $3,814,410 or $2.40 a share, compared with $3,555,660 or $2.25 a share based in each case on the number of shares outstanding on June 30, after giving retroactive effect to all stock dividends declared.

Consolidated net sales of all company products were $108,281,236 for the year ended June 30, up from $103,168,562 for the preceding 12 months. Net assets applicable to stockholders' equity rose from $22,892,315 to $25,692,133.

The changes proposed by the board in the amended certificate of incorporation and described as essential "to the dynamic expansion and growth of Heublein" were outlined by Mr. Martin, Chief Executive Officer: an increase in authorized common stock to 10,000,000 shares, $1 par value, from the 2,000,000, $5 par value, currently authorized; provision for 500,000 shares of cumulative preferred stock to be used for acquisitions; elimination of preemptive rights, and an increase in the number of shares allocated for future stock options to 100,000 shares (300,000 on the new stock split basis).

The Heublein board of directors proposed the three-for-one stock split in the expectation that this would result in better marketability of the company's securities.

Mr. Martin said that the creation of a new class of cumulative preferred stock and the number of shares of common stock resulting from the recapitalization would permit greater freedom in negotiations for future acquisitions.

The increase in the number of shares allocated for stock options is required, it was explained, because there are only about 8,000 shares available for future options to be granted under the original stock option plan.—V. 191, p. 2215.

Intercontinental Motels, Ltd.—SEC Suspension Lifted

The SEC has vacated its order of July 5 1961, temporarily suspending a Regulation A exemption from registration under the Securities Act of 1933 with respect to a public offering of stock by this company, of Martinsville, Va.

In a notification filed in March 1961, the company proposed the public offering of 150,000 common shares at $2 per share pursuant to a Regulation A exemption from registration. The Commission's order suspending the exemption asserted that its offering circular contained misrepresentations, particularly with respect to the company's proposal to acquire the properties and assets of Fleetwood Motel Corp., of Atlantic City, N. J., which is in Chapter X reorganization proceedings. Subsequently, the company amended its offering circular and made other arrangements which appear to comply with the terms and conditions of Regulation A. It also has undertaken to make a 21-day offer of rescission to all original purchasers of the stock pursuant to the exempt offering and to all other persons shown by the company's records to be present holders of such stock. Under the circumstances, the Commission concluded that it was appropriate to lift the suspension order.—V. 194, p. 319.

International Finance Corp.—Colombian Investments

The corporation announced on Sept. 8 investment commitments totaling US $4 million—$2 million each in two Colombian private financing institutions, the Corporacion Financiera Colombiana de Desarrollo Industrial, of Bogota, and the Corporacion Financiera Nacional, of Medellin.

The investment is represented by unsecured peso notes which are fully convertible into shares. They bear no fixed interest, but IFC will receive interest equal to the dividends paid on capital stock. The notes mature from 1971 to 1973.

This will be IFC's first investment in financial institutions. The two Colombian corporations were organized in 1958 and 1959 to finance the development of industry in Colombia by providing medium and long-term capital, and to stimulate the growth of the Colombian capital market. Up to the present they have engaged primarily in medium-term operations. As a result of the IFC investments, both institutions can now do equity and long-term financing and expand their underwriting activities.

A majority of the stock is held by the country's leading banks, insurance companies, and industrial enterprises, and by individuals.

In order to carry out the purposes more effectively, both institutions have agreed to a program which provides for concentration on industrial enterprises, prudent diversification of investments, and broader ownership by sale of shares or bonds to the public.—V. 194, p. 1055.

Mobile Home Finance Co.—Notes Sold Privately—

On Sept. 12 it was reported that this company, a wholly-owned subsidiary of Detroiter Mobile Homes, Inc., had placed privately with institutional investors a new issue of $3,000,000 of senior subordinated notes due Aug. 1, 1976. The transaction was negotiated by Hornblower & Weeks. Proceeds from the sale will be used by the company to expand its capital base and thus increase its capacity to finance purchase of mobile homes.

Mohasco Industries, Inc.—Six Months' Report—

Net sales and earnings for the first six months of 1961 declined from comparable 1960 totals, with most of the decline occurring in the first quarter of 1961, the low point of the recent recession. However, in the second quarter, earnings staged a gratifying recovery, rising appreciably above the comparable quarter in 1960 and the first quarter of 1961 notwithstanding the fact that sales in the second quarter were slightly below the level of the comparable 1960 quarter and the first quarter of 1961.

For the first six months of 1961, sales were $44,912,124 as against a 1960 first half volume of $50,473,957. Profit before taxes of $1,840,842 compared with a pre-tax profit of $2,577,173 a year earlier.

Net income, after taxes, for the current year's first half amounted to $939,842, or 23 cents per common share after preferred dividends. This compares with $1,722,173, or 46 cents per share for the same months of 1960, when the company benefited from the $1,100,000 tax loss carryforward. In order to establish a better perspective as to the company's operations in the two periods, it should be noted that, without the aforementioned tax benefit, 1960 first half net earnings would have been $1,128,173, or 29 cents per share, as against the 23 cents earned thus far this year.

Net sales for the second quarter ended July 1, 1961, amounted to $21,967,191 and compared with $23,007,233 for the same period of 1960. Profit before taxes was $1,044,861 as against $737,770 a year earlier.

Net income after Federal and state taxes totaled $522,861, and after provision for preferred dividends, was equivalent to 13 cents per share on the 3,392,400 shares of common stock currently outstanding. This compares with 1960 second quarter net earnings of $327,770, or 7 cents per common share, calculated on the same basis.—V. 194, p. 957.

Mon-Art, Inc.—Preferred Stock Offered—Pursuant to an Aug. 22 offering circular, Davis, Rowady & Nichols, Detroit, Mich., publicly offered $300,000 of the company's 6% cumulative convertible preferred stock (par $5) at par. These 60,000 shares are convertible into $1 par common stock at the rate of five shares of common for each share of preferred.

BUSINESS—Mon-Art, Inc. is the parent corporation of two wholly-owned subsidiary corporations (Tu-Way Products Co., formerly Temple Enterprises, Inc., and Tylart, Inc.) It has paid for its stock investment in these corporations by issuing a combined total of 209,845 shares of its $1 par value common stock.

The general offices of Mon-Art, Inc., and its two wholly-owned subsidiaries are in the process of being moved to 1548 E. Grand Blvd., Detroit, Mich.

Tylart was organized primarily for, and has engaged in the business of, importing in bulk, various kinds of mosaic, ceramic, glass and other forms of tile. The tile is then packaged along with the other component parts, into so-called "Do-It-Yourself" tile kits. The tile kits range from the inexpensive beginner ash-tray, serving tray, coaster and jewelry type kits to the more expensive "Tile Top Table" kits.

Tu-Way Products Co. engages in the manufacture and sale of industrial dust mops and related type products on a national basis.

PROCEEDS—The proceeds are expected to be used in the following order: to retire existing indebtedness bearing interest rates in excess of 6% per annum, $41,000; to increase tile and component kit parts inventories, $100,000; to install automation manufacturing equipment, $18,500; to retire existing indebtedness bearing interest rates of 6% per annum or less, $78,500, and for general corporate purposes, $20,000.

It is estimated that the net proceeds of approximately $258,000 will be received by the company from the sale of 60,000 shares of 6% cumulative convertible preferred stock after deducting underwriting discounts and commissions, and other expenses in connection with its offering.

Consolidated net income of the company and subsidiary companies was higher in the 12 months ended July 31, 1961, than in the corresponding period of a year earlier.

Remick McDowell, Chairman, and Leslie A. Net income for the respective periods is after reservations of net income pending conclusion of current rate proceedings of a pipeline subsidiary. The reservations amount to $5,236,500 for the latest 12-month period, $4,692,000 for the corresponding period of a year ago and $5,319,500 for the 12 months ended June 30, 1961.

W. R. Davis, President of corporation, announced on Sept. 7 that in the fiscal year ended May 31, 1961 the company had net operating revenues of $20,190,132 and net income of $2,179,275, equal to 98 cents per common share, based on the 2,220,079 shares currently outstanding.

Mr. Davis stated that these results rose significantly from those of the previous year when revenues aggregated $10,580,906 and net income amounted to $1,445,955, equivalent to 65 cents per common share on the same number of shares.

He pointed out that results for both years include operations of Dakamont Exploration Corp., which was merged into Permian on May 31, 1961. As part of the merger, the common stock of Permian was split three-for-one. The results of another significant acquisition, that of Cactus Petroleum, are included only since the date of acquisition on Nov. 1, 1960, Mr. Davis added.

Permian is engaged in the crude oil marketing business and its areas of operations extend from the Rocky Mountain area on the Canadian border to the Gulf of Mexico.—V. 194, p. 11.

Munzer also told the Security Analysts meeting that Petrolane expects to have sales of roughly $23,000,000 for the 1961-62 fiscal year,

Yokana, President, and his wife will own 205,800 shares (50%) and propose to sell 35,000 shares, and Albert Moss, a Director, and certain members of his family will own the remaining 50% and also propose to sell 35,000 shares.

Suburban Gas—Record Earnings—

Total revenues and earnings of the Pomona, Calif., company in the 12 months ended July 31, 1961, set records for the period, W. R. Sidenfaden, President, announced Sept. 7 in an interim report to stockholders.

Revenues in the 12 months amounted to $19,641,100, compared with $16,190,578 in the like period a year ago.

Net income in the year ended last July 31 totaled $1,994,394, equal to 78 cents a share, after preferred dividends, based on the 2,501,243 average common shares outstanding. In the year earlier period, net income was $1,769,493, or 72 cents a share, after preferred dividends, calculated on 2,386,732 average common shares, adjusted for the two-for-one stock split made in March 1961.

In the three months ended July 31, 1961, the first quarter of the 1962 fiscal year, sales and other operating income amounted to $3,686,741, a record for revenues in the quarter. In the like period of fiscal 1961, revenues totaled $3,350,491.

Earnings in the 1962 first quarter declined slightly from the like period of last year, totaling $87,846, as against $108,320 in the 1961 first quarter. Per share earnings were three cents a share after preferred dividends in the most recent three months' period, based on 2,618,498 average common shares, and four cents a share in the comparable period a year earlier, calculated on 2,393,496 average shares, after preferred dividends.

Mr. Sidenfaden told shareholders that the increased revenues, reflecting the substantial expansion of the company's operations in the past year, were not great enough to offset the high fixed-costs to sales relationship typical of warm months in the LP-Gas industry. He pointed out that this costs-sales relationship is reversed in the colder periods of the year when fuel consumption is highest. For the 1962 fiscal year as a whole, Mr. Sidenfaden said Suburban Gas anticipates that earnings will increase over fiscal 1961 when the company netted $2,014,868, or 81 cents a common share.—V. 194, p. 262.

Joe Friedman, President of this Chicago company forecast record sales and earnings for the first half of fiscal 1961, ending Oct. 31.

Speaking before a luncheon meeting of the New York Society of Security Analysts, Mr. Friedman said that sales for the first six months of this fiscal period will approximate $12,000,000 to $12,500,000, compared with $11,000,000 for the corresponding period a year earlier.

Net profit for the first half, Mr. Friedman estimated, will amount to $300,000, equal to about 31 cents per share, compared with $230,000 and 24 cents per share in the same period last year. The earnings per share are based upon the approximately 963,000 shares which will be outstanding as of Sept. 30, after the 5% stock dividend to stock of record Sept. 15.

Mr. Friedman also noted that sales of home entertainment products manufactured by TraVler in August of 1961 reached an all-time monthly high in excess of $3,000,000. "Perhaps the most encouraging thing about fiscal 1961," he added, "is the increase in our backlog which, as of Sept. 1, amounted to about $8,500,000, compared with $5,000,000 at this time last year."—V. 192, p. 1496.

the $9,317,798 recorded for the same period in 1960. Chairman Carroll Rosenbloom of the diversified industrial company stated net earnings for the quarter were $1,025,000, equal to 9½ cents per share, down some 5% from the $1,077,000 or 11 cents per share recorded in the first quarter of last year.

This decline was substantially less than the company reported for the full year ended March 31, 1961 in figures also released. For the fiscal year ended March 31, 1961 Universal Controls, Inc. reported net earnings of $1,887,197, equal to 19 cents per share, after special charges and non-recurring items of $722,699, equal to 7 cents per share. This was a 55% decline from the $4,174,000, equal to 44 cents per share, recorded in the previous year. Sales for the fiscal year amounted to $35,791,138, down approximately 6% from the $38,028,000 reported for the twelve months ended March 31, 1960.

Mr. Rosenbloom listed four specific reasons for the company's sales and earnings decline in fiscal 1961. They were a slowdown in missile electronics, a 10-month strike in the company's Canadian wire plant, product redesign costs in the Grant Money-Meters division and a severe decline in transistor prices. He stated that defense electronics orders were picking up, the transistor business had been sold, the Canadian strike ended and the Grant division was now operating economically.

Mr. Rosenbloom pointed to five new products which the company expected would create a growth pattern greater than that achieved in the past. They are Uni-Tote, an automated retail control system; the new Clareed relay now in use in space vehicles; Vendaticket, an automatic vending device; Metrofare, a coin-and-token collection system and Metrostile, an unattended subway turnstile.—V. 193, p. 1734.

The subscription offer will expire at 3:30 p.m. (EDST) on Sept. 25, 1961. The subscription price is $40 per share.

BUSINESS—The company with its principal executive offices at 60 Hudson St., N. Y. 13, N. Y., was incorporated under the laws of the State of N. Y. on April 8, 1851. Since its organization the properties of more than 500 companies have been acquired by purchase or for operation under long-term lease. The most important acquisition in recent years was the Postal Telegraph system in 1943.

The company is engaged principally in the business of furnishing communcations services by wire telegraph and microwave radio throughout the U. S. and by ocean cable between the U. S. and foreign countries. It provides the only national telegraph message service and also furnishes direct customer-to-customer services such as custom built private wire systems and facsimile systems on a leased basis, and Telex, a direct-dial teleprinter service. The direct customer-to-customer services have been and are expected to continue to be a major growth segment of the business and it is in this area that the company competes directly with the Bell System.

PROCEEDS—The net proceeds from the sale of the shares of common stock will be used to pay the notes outstanding under the standby credit agreement with banks and for further plant expansion.

The company has embarked upon the largest construction program it has ever undertaken, designed to provide it with new and technologically advanced plant facilities capable of handling the complex and rapidly expanding communications requirements of Government, industry and the public. To accomplish this, the company estimates that it will require capital through 1964 in the amount of $155 million (including the $15,012,000 already borrowed from banks), in addition to funds generated from operations.
