ended June 30, 1961, earnings were \$26,004 or 6 cents a share. These figures include operations of the recently acquired subsidiary, Airpax Electronics, Inc. of California, Deeco Division. No adjusted comparisons with similar past reporting periods are made since Deeco did not practice quarterly accounting.

Sales increased to \$2,390,107 compared with \$2,029,902 for the first six months of 1960. Reduction in earnings was due to two temporary factors. Realignment of functions in the Seminole Division, an expensive undertaking, has been accomplished. Increased productivity is already apparent, with August shipments reaching peak volume. Also completed was substantial engineering to overcome technical problems, which had an adverse effect on profits until July.

Mr. Herbert A. Cook, Airpax president, stated in the report to stockholders, "Earnings for the last two quarters of 1961 are thus expected to be considerably higher and sales should continue their climb to record levels."

The company's backlog rose to \$1.5 million from \$1.13 million in March. Recent significant contracts include a \$175,000 reorder of Servo Amplifiers from RCA, a \$102,000 contract from Martin Denver for Telemetry Discriminators and \$50,000 from Radiation Incorporated.

Airpax Electronics, Inc. has recently been approved by NASD for listing in the over-the-counter eastern regional market.—V. 193, p. 2105.

Allied Maintenance Corp.—Stock Split Approved—

Stockholders at the annual meeting of the corporation Sept. 13 approved a 5-for-4 split of all shares of the firm's capital stock. It was announced in New York by Daniel Fraad, Jr., president. The action increases the number of issued and outstanding shares of capital stock from 644,000 to 805,000.

Also approved was a reduction of the par value from \$3.75 to \$3 per share. The company intends to continue the regularly quarterly cash dividend of ten cents on each share after the stock split takes effect on Oct. 10, Mr. Fraad said.—V. 194, p. 737.

American Broadcasting-Paramount Theatres, Inc.—To Redeem Preferred—

Leonard H. Goldenson, President of the company, announced Sept. 13 that the board of directors approved the redemption on Oct. 20, 1961 of all outstanding shares of the 5% preferred stock (\$20 par) at the applicable redemption price of \$20.50, plus an amount equal to the accrued dividend to such date of five cents per share, or a total of \$20.55 per share. There are now 67,931 shares of preferred stock outstanding, all of which are also entitled to receive the regular 25 cents dividend payable on Sept. 15, 1961 to stockholders of record on Aug. 25, 1961.

The books will be closed on Sept. 20, 1961 to further transfer of all shares of 5% preferred stock. Notice will be mailed on Sept. 20 to preferred stockholders, and payment of the redemption price will be made to holders of preferred stock commencing on Sept. 21 upon surrender of their certificates to Bankers Trust Co., 16 Wall St., New York 15, N. Y.

There was originally issued early in 1953, 608,041 shares of preferred

stock. The elimination of all of the preferred stock is being made in order to simplify the capital structure of the corporation and to eliminate the dividend requirements on such stock.—V. 194, p. 737.

American & Foreign Power Co., Inc.—Common Regis.

This company, of 100 Church Street, New York, filed a registration statement with the SEC on Sept. 18 covering 240,000 outstanding shares of common stock, to be offered for public sale by Electric Bond & Share. The offering is to be made through Lazard Freres & Co. and The First Boston Corp. at a price related to the current market price of outstanding Foreign Power stock at the time of the offering. Underwriting terms will be supplied by amendment. Bond & Share will own 3,607,200 shares (49.3%) of the outstanding Foreign Power stock if all 240,000 shares are sold. Foreign Power is a holding company with utility subsidiaries operating in eight Latin American countries.—V. 191, p. 697 and V. 190, p. 2037.

American Machine & Foundry Co.—License Agree't

An agreement has been entered into between the company and the Chromalloy Corp. whereby AMF will complete the development, manufacture and market Chromalloy's "Smog Burner," a new exhaust afterburner for reducing smog producing elements in automotive gases to an acceptable level.

According to the announcement on Sept. 14 made jointly by Morehead Patterson and Joseph Friedman, Board Chairman of AMF and Chromalloy respectively, under the exclusive, world-wide licensing agreement AMF will put its technical, manufacturing and marketing capabilities behind the "Smog Burner" developed thus far by Chromalloy.

One of seven automotive smog control devices for which applications are presently under consideration for testing by the California Motor Vehicle Air Pollution Control Board, "Smog Burner" is claimed to have a number of advantages over purely catalytic types of exhaust gas control units, including longer life, ease of installation, freedom from periodic inspection, and replacement of catalytic beds. The present unit, made of "Chromalized" carbon steel, is expected to last over 50,000 miles with minor servicing. It will treat not only exhaust but also crankcase emission in a single unit.

The initial market will be California where the use of such a control device soon will be mandatory.—V. 194, p. 841.

Atlas General Industries, Inc. — Offers Common for Preferred Arrears—

A formal offer of common stock in payment of preferred dividend arrears was made by the company to holders of preferred stock, Chas. N. Bellm, President, announced on Sept. 18.

The company expects to resume regular cash dividends on the \$1.25 cumulative convertible preferred stock on Nov. 10, 1961, the next quarterly dividend date, Mr. Bellm said.

Preferred dividends were curtailed since May 10, 1957, due to restrictions contained in the company's outstanding bond indentures. There are 217,427 outstanding preferred shares. Arrearage equals a total of \$5.62 a share, or a total of \$1,223,027.

Terms of the offer provide: "The company offers to each holder of its \$1.25 convertible preferred stock thirty-six one-hundredths of a share of common stock of the company in full satisfaction of all dividends on each share of the preferred stock accrued and unpaid as of Aug. 10, 1961, and release of all rights and claims thereto."

Mr. Bellm said that the shares of common stock to be issued to holders of preferred stock who accept the offer will be issued as of the close of business on Oct. 16, 1961.

"The board of directors has voted to make this offer," Mr. Bellm wrote in his letter to holders of the preferred stock, "in view of

Mr. Bellm recently announced that Atlas General has approximately \$14 million available for acquisition of additional companies.

Kedzie Ave., Chicago, which in July, 1961, issued all of its presently outstanding common stock to Mr. Stergios, the selling stockholder in exchange for all of the outstanding shares of capital stock of seven corporations which are presently its subsidiaries, one of which owned all the outstanding shares of the company's eighth subsidiary.

The principal subsidiary is a common motor carrier which conducts interstate motor carrier operations under authority from the ICC. This subsidiary and four other subsidiaries carry on intrastate contract or common carrier operations under authority granted by appropriate State regulatory commissions, and the principal subsidiary also has authority to operate in the Province of Ontario. One of the other

Corporate and Municipal Financing Ahead

By SIDNEY BROWN

A hectic day of competitive bidding is in store for tomorrow (Sept. 26) involving a \$60 million public utility senior indebtedness and \$84 million in seven municipal issues. The former, Pacific Gas & Electric Co.'s first and refunding mortgage bonds series GG, due 1993, will follow a week of firming bond prices and faces no corporate competition, to speak of, in the next few weeks. Pacific Gas & Electric favorably faces, in short, a bidding environment dominated by second thoughts as to the speed of our cyclical recovery, as to the upward tilt in the interest rate pattern, and as to the build up in the capital demand for external funds. The \$60 million utility bid does face, however, a week of moderately heavy State-local financing in the amount of \$218 million for larger issues.

The following day, Wednesday, the State of Illinois will seek \$100 million. Today (Sept. 25) the Bi-State Development Agency, Ill., will seek bids for \$5.9 million. The municipals slated for Tuesday are: \$22,250,000 Detroit, Mich.; \$10 million Detroit City School District, Mich.; \$31,452,000 Georgia State School Building Authority, Ga.; \$9 million Pasadena, Calif.; \$5 million Independence, Mo., and \$3,850,000 New Castle, Del.

Besides the Illinois \$100 million issue, there are these other tax-exempt coming up on Wednesday: \$4 million Davidson County, Tenn.; \$3,553,000 Spring Branch Independent School District, Tex.; and \$3 million Brookland Sanitary District B, Va. The only larger corporates set for that day is Glickman Corp.'s 600,000 shares via Bache & Co. and Hirsch & Co.

On Thursday, Hornblower & Weeks expects to market 250,000 shares of Jergens, Andrew Co.) common; stockholders of Seeburg Corp. will have a rights offering of 303,812 shares underwritten by White, Weld & Co.; and A. C. Allyn & Co. and Westheimer & Co. plan to offer \$5 million Drug & Food Capital Corp. common.

CORPORATE DEBT IN FLOAT GAINS

Both the corporate four-week and the total backlog of senior fixed interest rate issues with and without dates possessing, however, firm offering intentions have gained slightly in dollar volume compared to last week. Despite this, the four-week float of both municipals and corporates, including corporate equities, has declined below the \$1.2 billion mark of the past several weeks to about \$837 million. The drop is attributable primarily to equities and, next to it, municipals.

The same trend is evidenced in the formal backlog. Incidentally, the past week has been host to a sharp increase in both the number and dollar volume of private placements. The strengthening of bond prices and the stock market's uncertainties are most likely responsible for this avoidance of the public market.

The tables below depict what is scheduled in the way of demand for capital from the public market by corporate and municipal issuers in the four weeks ahead and in the formal backlog. The indeterminate float table deals with issues that are rumored and/or reported to appear and can not be accepted as more than a remote indication of possible financing intentions.

CORPORATE STOCK HOLDINGS BY CONSUMERS AND NON-PROFIT ORGANIZATIONS

Last week, in this space, we endeavored to show that the trend in stocks held by individuals is declining. It was noted that this paracoxical event occurred in the face of an almost doubling in the number of shareholders since 1956 and of an excellent advertising-shareholder education by the stock exchanges and many large broker-dealers.

The data below recapitulate the holdings and the changes therein. Shown are total stocks held by all sectors of the economy and by the sub-total of consumers and non-profit organizations.

The figures offer another approach than that employed in the tables compiled by the writer last week. They are taken from the Flow of Funds/Savings compiled by the Federal Reserve System. One important difference is the inclusion of nonprofit organizations such as the Ford Foundation, Harvard and Yale Universities.

Total corporate stock held as assets by all sectors of the economy increased 305% from \$109 billion in 1947 to \$442 billion in 1960, inclusive. Consumers and nonprofit organizations saw their equity assets increased only 290% in the same period—from \$100.4 billion to \$391.5 billion. The spread in 1947 was but \$8.6 billion and it widened in the declining stock market year of 1960 to \$50.5 billion. The differential for the sectors "other" than the consumer and nonprofit organizations rose almost five-fold.

Corporate stock assets held by mutual savings institutions sector rose from \$100 million in 1947 to \$800 million in 1960. In this period the insurance sector went up from \$4.2 billion to \$24.7 billion—464%—and the finance n.e.c. sector gained \$13.6 billion—\$1.8 billion to \$15.4 billion—for the sharpest rise of all—755%.

If, as the data suggest, individuals invest less and less directly in the shares of American enterprise, the entire personal spirit and character of the American venture economy will have changed. Perhaps investor-shareholder education should be improved much more—at least for the upper two-fifths of our income strata.

THE FED FINALLY TURNS THE VALVE SLIGHTLY

After liberal portfolio purchases, including a 12-year high in bills, the Federal Reserve's average holdings of governments declined \$483 million for the week ending Sept. 20 compared to the previous week. Nevertheless, despite marked increase in GNP and corporate profits, it is still \$825 million larger than last year's comparable week. The float average for the Sept. 20 week was \$657 million larger than the prior week, or \$17 million more than the decline in governments. Moreover, the gold stock stayed the same in the week to week comparison. Last week witnessed, however, a rise in Federal Funds to 3%—the first time in quite some weeks. The gold stock, incidentally, is \$1,377,000,000 less than that for the week of Sept. 21, 1960.

The Sept. 20, 1961 day's holding of governments showed a \$328 million decline—including repurchases—compared to the week before. Government holdings, nevertheless, were \$1,424,000,000 larger than last year's day.

Sept. 21, 1961.

consolidated net earnings were \$7,370,000. Comparable figure for the first half of the previous year was \$8,935,000.

Balance of earnings attributable to the Bowater Paper Corp. Ltd., the parent company, after provision for minority interests and preferred dividends of subsidiary companies, amounted to \$6,166,000. This compared with \$7,865,000 for the first half of 1960.

Sir Eric Vansittart Bowater, chairman, announced that the directors have declared an interim dividend on the common stock of one shilling per share. This amounts to about 14 cents and is payable, less British income tax, on Oct. 31, 1961, to shareholders of record Sept. 15, 1961. There are 41,371,195 common shares issued and eligible for dividends.

The increase in gross earnings, said Sir Eric in a statement accompanying the figures, has been achieved despite continued pressure on profit margins. It is "in the main due to our wide and ever-expanding overseas interest which on this occasion contributed 75% of these earnings."

The organization's world-wide development policy is proceeding on schedule. The latest acquisition, a flexible packaging company in Rome now known as Bowater Europea S.p.A., was taken over as of June 30, 1961, and consequently its accounts are not included in the present consolidated figures.—V. 193, p. 599.

British-American Construction & Materials Ltd.—Securities Offered—P. W. Brooks & Co. Inc., was manager of an underwriting group which offered on Sept. 21 \$3,500,000 (U.S.) debentures, 6% sinking fund series due 1981 with detachable 8-year common stock purchase warrants, and 300,000 shares of this firm's common stock. The debentures were offered at 100% and accrued interest from Aug. 1, 1961, and the common stock at \$15 per share (U. S.). The common shares were sold for certain officers and directors of the company, who continue to hold 653,719 shares, or 65.4% of the outstanding stock.

PROCEEDS—Net proceeds from the sale of the debentures will be used by the company for the construction of a central equipment repair center to replace two smaller facilities; acquisition of additional manufacturing facilities and quarrying and construction equipment; payment of loans from certain individuals and the balance of a bank loan; retirement of current bank loans. The balance will be added to working capital. Except as noted, all dollar figures are expressed in Canadian dollars.

BUSINESS—The company with headquarters in Winnipeg, Manitoba, Canada, is a widely diversified and well integrated enterprise in the construction industry in Western Canada, engaged principally in heavy construction (47%); manufacture and distribution of building supplies (33%), and the sale of improved land (17%). The company owns and operates its own sand and gravel pits, limestone quarries and rock crushing facilities and manufactures ready-mixed concrete, concrete sewer pipe, concrete block, pre-cast and pre-stressed beams, piles and other building members, mortar, stucco and other lime products. The company believes it is the largest construction company in Manitoba engaged in the combined fields of concrete and asphalt paving and the installation of sewer and water lines and that in its other construction activities ranks among the more important heavy construction companies operating in Western Canada.

WARRANTS—Each \$1,000 debenture and each \$500 debenture of the 1981 Series initially will have attached a detachable common stock purchase warrant for 30 shares and 15 shares, respectively, of the common stock, entitling the holder to buy such shares at \$15 (U.S.) per share on or before Sept. 30, 1965 and at \$17.50 (U.S.) per share thereafter on or before Sept. 30, 1969.

DEBENTURES REDEEMABLE—The 1980 debentures are redeemable at optional redemption prices ranging from 106% on or before Aug. 1, 1964 to 100%, plus accrued interest. For the sinking fund, the debentures will be redeemable at prices starting at 103% on or prior to Sept. 1, 1964, and receding to par, plus accrued interest.

EARNINGS—For the fiscal year ended Feb. 28, the company on a pro forma basis had total revenues of \$17,555,016 and net income of \$1,647,043, equal to \$1.65 per common share based on 1,000,000 shares outstanding. For the quarter ended May 31, 1961, revenues aggregated \$5,013,350 and net income was \$529,522, or 53 cents a common share.

British Petroleum Co. Ltd. — Proposed Capital Increase—Stock Dividend

The board of directors of the company on Sept. 14 recommended that the ordinary share capital of the company be increased by 50,000,000 new shares of £1 each, and that a stock dividend in the

proportion of one new ordinary share for each five £1 stock units be distributed to stockholders of record on Sept. 15, 1961.

An extraordinary general meeting of stockholders will be held on Oct. 26, 1961, to give effect to this and other board recommendations.

In regular dividend action, the board also declared, in respect of the results for 1961, an interim dividend of eight pence (approximately nine cents) per ordinary stock unit of £1, payable, free of United Kingdom income tax, on Nov. 4, 1961. A similar interim dividend was declared in September last year.

In its semi-annual statement released in London, England, the company reported that net sales and other income of the BP Group for the first half of 1961 amounted to \$935,726,000, compared with \$895,992,000 for the same period a year ago.

Net income of the BP Group for the six months ended June 30, 1961 totaled \$73,651,000, equivalent to 33 cents on each of 217,801,659 ordinary stock units of £1 currently outstanding. This compares with earnings of \$88,127,000, or 41 cents on each of 210,244,820 ordinary stock units outstanding on June 30, 1960.

Sales of crude oil and refined products of the BP Group for the first half of the year amounted to 286 million barrels as against 261 million for the corresponding period a year ago.

The board recommended that £43,560,332 (\$121,968,930) of reserves be capitalized in the form of fully paid ordinary shares for distribution to shareholders. The new shares will rank equally with the ordinary stock now outstanding and will participate in full in all dividends hereafter declared on the ordinary share capital but not in the interim dividend declared on Sept. 14.

The board said it is unlikely in present circumstances that the interim and final dividends for 1961 will, in total, exceed the dividend distribution for 1960.

The board further recommended that the company's articles of association be amended to provide for an increase in the number of directors from 12 to 16.—V. 192, p. 1114.

Burroughs Corp.—To Manufacture Computers—

The corporation on Sept. 19 announced its entry into the punched card electronic computer business, putting the company into competition for the largest single bloc of the billion dollar a year market for automatic business data processing equipment.

Ray R. Eppert, President, said the company's program includes a new family of four solid-state computer systems, an expanded customer training program, a sizable increase in the company's U. S. data processing sales and technical support force, and a manufacturing program that will utilize resources of four plants in Detroit and Pasadena, Calif.

The basic punched card system in the new Burroughs B200 series called the B260, was described by Mr. Eppert as a "workhorse computer" which will increase productivity significantly in medium and large-scale punched card applications.

In addition to the basic B260 punched card electronic computer system, the new series includes the B280, a magnetic tape system, and the B250, which includes a hard-copy record processor in addition to punched card handling equipment.

First deliveries of B200 systems will be made in the fall of 1962.—V. 193, p. 907.

In the fiscal year ended July 31, 1961, sales and rental income was approximately \$6,000,000, on which the company earned 83 cents a share, based on 600,000 shares of class A and class B common stock.

Coca-Cola International Corp. — Chairman Explains NYSE Delisting—

James A. Farley, Board Chairman and President, in a letter to stockholders said that the action of the New York Stock Exchange in delisting the shares of Coca-Cola International would not inconvenience stockholders in any way. The action has no effect on the common stockholders of the Coca-Cola company.

Mr. Farley pointed out that Coca-Cola International is solely a holding company of common stock of the Coca-Cola Co. and is not otherwise actively engaged in business. It is not to be confused with The Coca-Cola Export Corp., which is an operating company, Mr. Farley said.—V. 192, p. 2120.

Colonial Corp. of America—Capital Increase Approved—Stock Split—

Stockholders of the corporation at a special meeting on Sept. 12 approved an increase in authorized shares from 2 million to 4 million. There are now 992,809 common shares outstanding.

The move clears the way for a 2-for-1 common stock split proposed by the directors of the company on July 11. The company will issue the new stock Oct. 16 to stockholders of record on Sept. 29.

Initially, dividends on each new share will be 30 cents a year based on a quarterly rate of 7 1/2 cents per share. This compares with current annual cash payout of 60 cents a share based on a 15 cents quarterly rate on the present number of shares outstanding.

Stockholders also approved a stock option plan for key employees of the company.

Colonial is a leading maker of popular-priced men's and boys' dress and sport shirts. Also a major producer of popular-priced ladies' dusters and lingerie.—V. 194, p. 845.

Components Corp. of America—Net Up, Sales Down—

A 26% increase in net earnings, after taxes, for the nine months ended July 31, 1961, was reported Sept. 13 by this manufacturer of electronic parts and chemical products.

According to Eugene Powers, president, net earnings for the period totaled \$163,554 and were equivalent to 11 cents per share on the 1,509,002 shares of common stock outstanding. This compares with

earnings of \$129,569, or 8 1/2 cents per share, for the same period last year.

Net profits from operations (before taxes) were \$280,535, and represented a 44% increase over profits of \$194,361 reported a year ago.

Net sales for the period were \$2,424,938 against \$2,911,972 for the same nine months last year.

Powers said the earnings increase, despite a sales decline, was the result of lower manufacturing costs and a reduction in the company's administrative expenses.—V. 194, p. 528.

Computron Corp.—Common Registered—

This corporation of 9330 James Ave. South, Minneapolis, filed a registration statement with the SEC on Sept. 15 covering 500,000 shares of common stock, to be offered for public sale at \$1.15 per share. The offering is to be made on a best efforts basis by Brandtjen and Bayliss, Inc., which will receive a selling commission of 15 cents per share.

Net proceeds of this financing will be used primarily for research and development, purchase and leasing of engineering, testing and production equipment and furnishings, and working capital. The company has outstanding 131,000 common shares and has received a subscription for an additional 5,000 shares. Of this stock, promoters and management officials have or will receive 25,000 shares for which they will have paid \$23,000 in cash and transferred a patent to the company. Scallen as Board Chairman and Wendell Wilson as President. Of the outstanding stock, 12.2%, 10.7% and 10.7%, respectively, is owned by Mrs. Edith Rudick, Glen F. Larsen, and James C. Archer. Management officials own 15.3% in the aggregate.

Consolidated Electronics Industries Corp.—Sales Up—Net Down—

Net sales for the six months ended June 30, 1961 on a consolidated basis amounted to \$67,304,368 as compared to \$46,487,749 reported for the comparable 1960 period, Pieter van den Berg, president, informed stockholders on Sept. 12.

"Improvement in earnings, which became apparent in the month of March, has continued throughout the second quarter, and indications are that this upward trend is continuing," Mr. van den Berg stated. He added that "the earnings of our 66.6% owned subsidiary, Philips Electronics & Pharmaceutical Industries Corp., which have been consolidated in the six months report, lessened as a result of the requirements of the rapid expansion program in its pharmaceutical activity."—V. 192, p. 2220.

Hurleytron Inc.—Earnings—Forecast

This electronics manufacturer for the aero-space and printing industries, expects a 1961 sales increase of 50% over 1960 with a jump in earnings from 25 to 85 cents a share, Carl M. Noble, President, told a meeting of the New York Society of Security Analysts on Sept. 11.

Hurleytron's 1961 sales should be at least \$9,000,000, based on shipments equaling or exceeding those of the first six months, while acquisitions or substantial new business could increase the figure, he said. The company reported first half sales of \$4,472,959 and earnings of 25.1 cents per share.

Mr. Noble told the analysts that a rising sales volume coupled to a sound cost reduction program would account for the earnings increase.

Looking ahead to 1962, he predicted Hurleytron sales would be \$12,120,000—another 50% jump. He said this would come from new electronic devices being introduced by the Electric Eye Equipment Division to improve the quality of newspaper color advertising, and new sub-miniature timing devices and relays introduced by Wheaton Engineering Division and EMS Division for the missile and aircraft industry. This increase, plus further cost reduction programs, and streamlining the operation of Hurleytron's three divisions, would bring 1962 earnings to \$1 or more per share, Mr. Noble predicted.—V. 194, p. 1055.

(Sept. 18) Sidney Martin, President, reported that the company has made initial deliveries of its low cost electrostatic TV camera and found a strong market potential for the product. Shamark Industries which will market the new camera through its 650 dealer Musi-Pak affiliate has been very pleased with the camera and has indicated they expect to increase their present order for 750 cameras to approximately 2,000 the first year.

The company is developing a new low cost stereo-phonetic adapter for F.M. receivers which is compatible with the new standards approved by the F.C.C. Production is expected to start in about six weeks.

Planned for production this winter is a new video intercom for business use and a television camera of higher quality than the low cost electrostatic camera.

The present electronic production facilities are overcrowded and the company is looking for about three times the present floor area to meet the increased production volume. Employment is expected to double or

triple in the next few months to meet the heavier production schedules.

The heavy backlog of orders in the American Tele-circuits Division plus the normal seasonal sales increase and growth in the Jersey Packing Division have greatly improved the company's sales and profit picture over that of the first half when most of its earnings were plowed back into the expansion of the Telecircuits Division.

Mr. Martin indicated that he feels certain the total sales will be higher than last year, coming to about \$4,000,000, and that earnings will be several times those of last year when Marsan earned 18 cents per class A share.—V. 194, p. 957.

Morrison-Knudsen Co.—Earnings Forecast—

Earnings for the company for the year 1961 will reach or exceed \$5 million, J. B. Bonny told a meeting of security analysts on Sept. 21. He said this would be the 14th consecutive year in which M-K has reported net earnings at about the \$5 million range.

The president of this world-wide construction company said that it has a backlog, as of Sept. 1, of \$335 million, of which \$215 million is in domestic work and \$120 million in foreign orders. The Boise-based company is presently engaged in construction work in 36 states and in 23 foreign countries.

"M-K has doubled its net worth every decade for the last 30 years," he said, "and we are confident that this trend of growth will continue in the next decade."

"Net income of M-K and consolidated subsidiaries in 1960 was \$4,525,150 after taxes. Our earnings in the first half of 1961 were \$689,093, but the first half of any year is traditionally the slowest in the construction business because of weather factors and, in our case, the first-half earnings were further reduced by delays encountered in effecting settlements due to sizeable extra work that we have performed and extra costs incurred in making modifications ordered by the government at our missile-base projects. Many of these changes and extras have since been settled and, by the time the year ends, we expect to attain the five-million-dollar range of earnings again for the 14th straight year."—V. 191, p. 1670.

Murphy Corp.—Merger Approved—

Stockholders of Murphy Corp. in a special meeting Sept. 11, approved the merger of Ingram Oil & Refining Co. with and into Murphy. Approval was also given for an amendment to the articles of incorporation of the company to provide for the creation of 50,425 shares of cumulative preferred stock, series A, \$100 par value.

The merger, which was approved by Ingram stockholders on Sept. 6, became effective on Sept. 12. It was accomplished by the exchange of 50,414 shares of Murphy's new preferred stock and 400,000 shares of the common stock of the company for all the outstanding common and preferred stock of Ingram which was privately owned.

Approximately 90% of the outstanding common stock of the company was represented in person or by proxy at the meeting. Of the stock represented 99.8% was voted for the two proposals.

C. H. Murphy, Jr., President, said that the management was gratified at the substantial approval given to the merger by Murphy stockholders. He pointed out that the modern Ingram refinery at New Orleans, which has a capacity of 20,000 barrels of crude oil per day, and the seven product terminals along inland waterways fit well into Murphy's crude oil production in offshore Louisiana and marketing activities throughout the Southeastern United States. Ingram marketed through 212 branded outlets in the seven states of Louisiana, Mississippi, Alabama, Georgia, Florida, Tennessee, and Kentucky. These increase Murphy's total outlets to approximately 850 in 24 states, the District of Columbia, and in Eastern Canada.—V. 194, p. 637.

Sales and earnings of this company should be greater—perhaps far greater—for fiscal 1961 than for 1960, and this rise should continue, Maurice M. Rosen, President, stated on Aug. 29, 1961.

Progress is the world's largest manufacturer of residential lighting fixtures. It also operates in other fields, including building products, bathroom medicine cabinets, brass and copper water tubing, electrolytic copper refining, and printing.

In addition, Progress owns 83.4% of the outstanding stock of Progress Webster Electronics Corp., which produces components, and pioneered in a new field—residential electronics—a field that Mr. Rosen said "offers unusual growth opportunities."

Mr. Rosen based his optimism for Progress Manufacturing Company's increased sales and earnings this year—and beyond—on a number of factors.

Progress' net profits for the first half of the current fiscal year (Jan. 1 through June 30), totalling \$875,000 (equivalent to 55 cents a share), were about the same as last year's comparable period when net profits were \$873,000 (also equivalent to 55 cents a share).

"It should be emphasized, however," Mr. Rosen added, "that in 1960, profits were 31 cents a share for the first quarter but declined to 24 cents in the second. In 1961, however, first quarter profits were 24 cents a share but increased to 31 cents for the second quarter.

"This upward trend will continue," Mr. Rosen added. "Consequently, sales and earnings for the second half of this year (1961) should be better than for the first half. It follows, of course, that total sales and earnings for fiscal 1961 will be greater than for 1960 and perhaps far greater."—V. 192, p. 1094.

"Because of the severe price reductions during the last six months, it became apparent to management at year-end that a re-evaluation and writedown of our inventory was necessary and in the best long-range interests of the company," Dr. Bakalar said, "This is in accordance with a similar decision made by some of our competitors. The year-end inventory was written down approximately \$7,000,000 to reflect the new conditions."—V. 193, p. 2484.
