"As soon as the nation's economy showed signs of recovery from the recent recession, Aeroquip's business promptly began to reflect this improvement."

For the six months ended Sept. 30, 1961, volume aggregated $25,920,792 as compared to $22,116,094 in the initial six months of the year. Volume in the second half also exceeded sales of $23,413,369 in the comparable period of fiscal 1960.

Alside, Inc.—Annual Report—

The company has reported that earnings for the year ended Sept. 30, 1961, amounted to $1,506,683, compared with $1,602,537 a year ago. Sales were $22,712,738, compared with $23,041,045 in 1960.

Jerome J. Kaufman, President, said that manufacturing operations were more efficient and profitable in 1961 but that almost an additional $1 million was spent on general sales and administrative expenses. These costs, he explained, resulted from the purchase of automated administrative equipment, the establishment of new factory depots and the expansion of the company's sales force. All these steps were taken to insure the continued growth of Alside in 1962 and ensuing years, the President observed.

Earnings for 1961, Mr. Kaufman said, also reflected operating expenses incurred in starting up Alside Acceptance Corp., a subsidiary for financing consumer purchase of Alside, Inc. products. The subsidiary is currently operating favorably and is improving consumer paper for purchase at the rate of more than $1 million per month, the President added.—V. 194, p. 1153.

American Data Machines, Inc.—Common Offered—Golkin, Bomback & Co., New York City, made the initial public sale of this firm's common stock through the offering of 150,000 shares, at $4.50 per share.

The balance of the proceeds will be used for other corporate purposes.

BUSINESS—The company, of 7 Commercial St., Hicksville, Long Island, N. Y., produces peripheral data processing equipment which consists of machines designed to supplement centrally located business machines, tabulators, computers and punch card systems by expediting the production, accumulation, conversion and transmission of data from the field (or periphery) to the central system.

American Motors Corp.—Annual Report—

In announcing the corporation's sales and earnings for the fiscal year ended Sept. 30, George Romney, President, said today that a vigorous recovery of sales momentum characterized the final six months, following the sharp industry sales drop in the March quarter.

Mr. Romney reported the company in fiscal 1961 had net earnings of $23,578,894, or $1.31 per share, compared to $48,243,361, or $2.68 per share earned in the 1960 fiscal year.

Net sales for American Motors and its consolidated subsidiaries totaled $875,723,798, compared with 1960 sales of $1,057,716,447.

Mr. Romney cited these factors as accounting for lower fiscal year earnings: the downturn of general business activity earlier in the year, closer competitive pricing which made it necessary for the company to absorb higher labor and material costs, substantially greater outlays for tooling required to produce the new 1961 Rambler American and Ambassador models, accelerated write-offs of recent investments in expanded production facilities, more liberal owner warranty terms, and increased expenditures for sales stimulation at both the customer and dealer level.

American Security Co. of Bedford, Inc.—Tenders for Debentures—

The City Securities Corp., Indianapolis, Ind., will receive tenders for the sale to it of 5¾% sinking fund debentures, due Jan. 1, 1972 to an amount sufficient to exhaust the sum of $15,132 at prices not to exceed 104% plus accrued interest to Jan. 1, 1962.—V. 190, p. 2337.

American Ship Building Co.—Reports Loss—

A labor dispute which continued through most of the first quarter combined with the usual seasonal slowdown to adversely affect sales and earnings of the company during the first quarter ended Sept. 30, 1961, of the current fiscal year, President E. Q. Sylvester reported.

Revenues for the first quarter ended Sept. 30, 1961, amounted to $3,998,997 compared with $7,745,173 for the same period in 1960.

A net loss of $335,555, equal to a loss of 58 cents a share, was sustained for the first quarter, compared with a net profit of $40,989, equal to seven cents a share, for the first quarter a year ago.—V. 192, p. 1394.

American Trailer Rentals Co.—Securities Registered

This company of 1123 Delaware St., Denver, Colo., filed a registration statement with the SEC on Dec. 11, covering $4,000,000 of Fleet Participation Contracts and $2,000,000 of Trailer Investment Contracts, to be offered for public sale at from $370 to $1,080 per contract, depending on type. The offering will be made by company officers and salesmen whom the company may employ. The selling commission is 20% of the face amount of the contracts, aggregating $1,200,000 if all are sold.

The business of the company is that of providing management, operational services and accounting for the owners of utility trailers in the renting of the trailers to the public for either local use or one-way trips throughout the U. S. The company does not own any trailers, but purchases the trailers for the owners, secures their

licensing, and places the trailers with one of its station operators for rental to the public under the name "American Trailers." Of the net proceeds from the sale of the contracts, $3,900,000 will be applied to the purchase of trailers; and of the $900,000 proceeds to the company, $242,683 will be used to pay certain obligations, $135,000 for cost of replacement and repair, $100,000 for cost of transportation of trailers to the station operators, $88,317 for working capital and administrative expenses, and the balance for certain other expenses. The Fleet Participation Contract provides that the trailer owners will participate in 35% of the monthly gross rental income of the fleet of trailers operated by the company after payment of fleet operational expenses, in the proportion which the cost of their Fleet Participation Contracts bears to total contracts sold. The Trailer Investment Contract provides that the trailer owner will be paid monthly 1½% of the cost of his contract, such amount being payable irrespective of the rental income produced by the trailers. The purchase price of either contract includes the cost of the trailer, the 20% underwriting commission and proceeds to the company. Between the period of Jan. 1, 1959 to April 12, 1961, the company entered into trailer rental agreements relating to about 5,866 trailers and the trailer rental agreements had a total value of $3,587,439.02. The prospectus states that none of these agreements were registered under the Securities Act of 1933, and the company may have a contingent liability ($2,400,000 as of Sept. 30, 1961) with respect to a portion of such agreements.

In addition to certain indebtedness, the company has outstanding 438,000 shares of common stock, of which James H. Daly, President, and James W. Monsour, a director, own 23.1% and 10.2%, respectively, and management officials as a group 45.9%. Mr. Daly also owns five-year options to purchase 30,000 shares at 50 cents per share. DeMar, Inc., which has exclusive right to manufacture trailers for the company, has an option for an indeterminate time to purchase 50,000 shares at $1 per share; and Hammond Brothers, a partnership composed of Clark E. Hammond, Secretary, and his brother, own a five-year option to purchase 45,000 shares at 50 cents per share. According to the prospectus, the company suffered net losses for the years ended Sept. 30, 1959, 1960, and 1961 ($238,486). As of June 30, 1961, the company was committed to the payment to trailer owners for the ensuing year ending June 30, 1962, in the amount of $894,457.40.

Corporate and Municipal Financing Ahead

By SIDNEY BROWN

Commanding the capital market's attention this week will be the negotiated $155 million Florida Turnpike 40-year term flotation led by Dillon, Read & Co. The remaining 12 major tax-exempt offerings which are up for bids this week, total $25,538,000. Richmond, Va. will offer a $7.8 million issue on Wednesday (Dec. 20) and Santa Ana Unified S. D., Calif. has $4 million scheduled for tomorrow.

In an otherwise dull financing week, compared to last week when, among other things, Commonwealth Edison Co.'s 50-year debentures ran head on into higher yield pressures that developed markedly (4.65% yield for the Aa debenture), these noteworthy larger corporates are being groomed to appear between today and Friday. On Wednesday (Dec. 20) Blyth & Co., Inc., expects to bring out 210,000 shares of NALLEY's INC. common (filed Oct. 9); F. Eberstadt & Co., and White, Weld & Co. have similar flotation plans for their secondary offering of 57,396 shares of JAMES TALCOTT, INC. common (filed Nov. 17).

Either tomorrow or Wednesday, Eastman Dillon, Union Securities & Co. intend to unveil 240,000 shares of SWIFT HOMES, INC. common (filed Sept. 15). The largest corporate issue tentatively set for Thursday (Dec. 21) is the $2 million 6% subordinated sinking fund debentures and 400,000 shares common stock in 200,000 units of EXECUTIVE HOUSE INC. (filed Aug. 29) under the joint underwriting of Bear, Stearns & Co., and Straus, Blosser & McDowell.

FOUR-WEEK FLOAT DECLINES BUT TOTAL BACKLOG REFLECTS NEW ISSUE FILING STRENGTH

Whether the sudden lift to the upward yield trend will cause proposed registered bond flotations to cancel out or not—particularly when the price of stocks is even more favorable as new financing medium—the fact is that the total backlog at this writing is twice as large as last year's. Moreover, it reveals but slight attrition compared to last week. The stronger category in the backlog is the announced equity financing registration. Municipals in the total and the four-week float are down and the flotation of the Florida Turnpike issue will make mincemeat out of the totals next week unless substantial tax-exempt replacements occur. Corporate registrations can be expected to rise significantly this month to escape SEC's audited financial statement requirements. The tables below should show the contrasts in the dollar volume between this and last week's figures and last year's comparable projections.

CURRENT YIELD TREND AND FUTURE DEBT FINANCING

Generally corporations do not find it difficult to borrow long-term until the business cycle is well advanced. Usually their corporate savings (depreciation, depletion and retained earnings) meet most of their needs until then. The current economic revival is definitely under way. Chairman Wm. McC. Martin of the Federal Reserve stated last Dec. 13 at a press conference on the occasion of receiving the 13th annual Wm. Penn award from the Philadelphia Chamber of Commerce, that last month's physical production rose to an historic high of at least 114% of the 1957 average. This, Mr. Martin added, indicates we have passed from a recovery to an expansion stage.

Incongruously enough, while last week's Federal Funds hovered without takers at one-half per cent at times, the number of government bonds yielding 4% or more rose in number from 15 two weeks ago to 18, as of Dec. 13, and at an overall higher yield level. The 2½s of 1972-67 yielded 4.18% and topped the 3½s of 1990 and 1998 which ranged from 4.15 to 4.12%. The next day, Dec. 14, government bonds rose for the first time in the week. With Federal debt monetization more than offsetting the gold outflow and the increase in currency in circulation, one might surmise that yields would not have behaved the way they did last week. The discernible upward trend of the past several weeks took on some acceleration and may stifle bond financing usually accompanying the business expansion. It may be that the higher than usual yields for a recession have created too high a base, and thus, left little room for maneuvering.

Apparently we are at a transitional point where recovery is being succeeded by expansion. Moreover, we are still afflicted with no change in the Fed's credit largess. Nevertheless, market pressures have made the slowly rising yield level jump. The Dow-Jones average is at a historic high, price-dividend ratio adds up to a still lower yield, and the price/earnings ratio is at a still higher level despite the increase in profits. Equity financing for corporations is becoming more profitable than before. In addition, the Fed's action allowing higher interest payments by banks has at this stage of the business cycle, served to bear down on bond prices and drive the yield up. No one appears to be concerned with whether or not the banks will be able to shift their portfolios into still higher investment earnings in order to pay the interest they are now allowed to advertise. Banks, for example, are reportedly seeking tax-exempts of ten and longer years maturity for the higher yields. How far the banking authorities will allow commercial banks to lock themselves up in longer-term maturities before they believe demand deposits may be adversely affected is a question which will not be answered until the in-flow of time and savings deposits is measured. These deposits may provide sufficient funds for longer-term investments to meet the higher interest payments allowed without damaging bank earnings rate on capital or jeopardizing demand deposits' liquidity.

Last week the Fed shifted slightly out of bills ($205 million) and helped fuel the higher yields in short-terms. In turn, it increased its purchase of government notes and bonds ($54 million). All told, the Fed's portfolio of governments declined $144 million compared to last week (though the weekly average change was an increase of $60 million) but it is $1,906 million more than last year's date. The week to week decline in gold certificates was $54 million (the week's average decline was $14 million) and the year to year decline was $1,021 million.

FEDERAL RESERVE'S PORTFOLIO

(Millions of Dollars)

	Dec. 13, '61	Dec. 6, '61	Dec. 14, '60
Gold Certificates	$16,653	$16,707	$17,674
U. S. Governments	29,259	29,403	27,353

The race between declining gold stock and increasing public debt monetization seems more dangerous than that of "hot-rodders" racing with their eyes closed. The Fed's eyes are wide open and yet no evidence of concern about the outcome is discernible. One should think that Mr. Martin's conclusions about the turn of business cycle and the obviousness of the the yield trend would lead him and the other Governors in the direction of substituting monetization of advances and commercial paper for government securities. At the least, the time has come for the Federal Reserve to whittle down its phenomenal historic record high ownership of government bonds. Its "nudging" fight against higher bonds yields has not succeeded. A shift on its part most likely will not affect the direction of bond yields.

Brown-Forman Distillers Corp.—Six Months' Report—

A report filed by the company with the SEC, showed consolidated net sales of $57,439,467 and earnings after taxes of $3,320,537 for the first six months period, May 1-Oct. 31, 1961, of the company's present fiscal year, as compared to consolidated net sales of $52,299,997 and earnings after taxes of $2,450,455 for the same period of the previous fiscal year.

Geo. Garvin Brown, President of Brown-Forman, said: "Sales in the month of October were abnormally high because of extremely heavy shipments in anticipation of a strike (which has not materialized at this time). A substantial part of the increased profit in the first six months of the fiscal year resulted from these unusually large October shipments. In the last six months of the fiscal year sales and earnings will be reduced to the extent that October shipments were greater than normal."

The company report showed that consolidated net income for the first six months of the fiscal year was equivalent to $0.88 per share. This compares to $0.63 per share for the same period in the previous fiscal year.—V. 191, p. 4.

Y. company, a major independent manufacturer of electronic filter networks, delay lines and related components, totaled $1,542,715 in the fiscal first-half ended Sept. 30, 1961, Norman Burnell, President, reported. Unusual expenses in connection with revamping of the company's Gray & Kuhn, Inc., division, the acquisition and start-up of the GLP Electronics, Inc., division and establishment of the Guillemin Research Laboratory resulted in a deficit of $56,949, he said

Mr. Burnell said, however, that the second half, which started with a backlog of about $900,000, was expected to be profitable. GLP, which produces subminiature tantalum capacitors, and Gray & Kuhn, manufacturer of delay lines, "should both operate profitably for the remainder of the year and make their contribution to our sales and earnings," he said.—V. 194, p. 1380.

Capital for Technical Industries, Inc.—Makes Initial Investments—

The company has completed arrangements for the commitment of $1,320,000 in debentures, notes and common stock to four electronics and technical firms, Ernst H. Plesset, president and chairman reported.

These are the initial investments for CapTech, a Los Angeles based small business investment company licensed under the Small Business Investment Act. Dr. Plesset stated that arrangements for investments in several other companies were nearing completion and would be announced shortly.

The four companies selected by CapTech and its investment commitments are as follows:

Tasker Instruments Corp., Van Nuys, Calif., designer and producer of air traffic control equipment and similar systems. CapTech will purchase $400,000 of 10 year subordinated convertible debentures, and will provide $200,000 in a five year loan. Both debentures and the loans bear a 6½% annual interest rate. Conversion of the debentures would give CapTech 33½% of the common stock then outstanding.

Electrochimica Corp., Menlo Park, Calif., a recently established company devoted to research, development and production in the fields of electro-chemistry, special purpose batteries, fuel cells, thermoelectricity and related aspects of energy conversion. CapTech's commitment is for a total of $500,000 distributed as follows: The purchase of 10,000 shares of common stock at $10 a share for a total of $100,000; $168,000 in 6%, 10 year subordinated convertible debentures, and $232,000 in 6%, 10 year subordinated debentures. Following purchase of the 10,000 shares, and upon exercise of the conversion, CapTech would have 52% of the outstanding common stock of Electrochimica.

California Resistor Corp., Santa Monica, Calif., designer and manufacturer of miniature precision power resistors. CapTech has placed $150,000 in 6½%, five year subordinated convertible debentures. Upon conversion CapTech would hold 33⅓% of the common stock then outstanding.

National Beryllia Corp., Haskell N. J., manufacturer of ceramic materials designed for high temperature requirements. CapTech has purchased $70,000 of 5%, five year subordinated convertible debentures. After conversion CapTech would have 5% of the common shares then outstanding.

"Capital for Technical Industries is extremely pleased to be able to assist these promising young firms which are led by capable and seasoned management. We believe they offer exceptional opportunities for growth and investment appreciation," Dr. Plesset stated.—V. 194, p. 4.

Elgin National Watch Co.—Acquisition—

The company has announced it has purchased "certain assets" of Lohengrin Ring Co., Inc., New York City, and a subsidiary, Syndicate Diamonds, Inc., for an undisclosed amount of cash.

Lohengrin, one of the oldest diamond ring companies in America, was founded in 1871 as part of Blancard & Co., an Eastern manufacturing firm.

Board Chairman Henry M. Margolis and Robert O. Fickes, Elgin's President and Chief Executive Officer, said they expect approximately $3,000,000 in additional volume to result from the purchase over the next 12 months.

Elgin's total sales for the fiscal year ended Feb. 28, 1961, were about $33,000,000, and an additional $6,000,000 volume was added when the watchmaking firm acquired two companies in the clock field.

Margolis and Fickes said the acquisition would give the watchmaking firm several competitive advantages, over and above the increased volume that is expected to result.

"A substantial portion of our present volume in the Watch Division comes as the result of diamond watch sales," they added. "The purchase of Lohengrin and Syndicate means we will become much more competitive in this area as a result of better dollar values.

"In addition, the acquisition of a diamond ring line gives us another jewelry store product that can be merchandised and sold by our present Elgin sales force," they said.—V. 194, p. 1718.

First Scientific Corp.—Class A Registered—

This corporation, of 375 Park Ave., New York, filed a registration statement with the SEC on Dec. 6 covering 200,000 shares of class A stock, to be offered for public sale at $3 per share. The offering will be made on an all or nothing basis by Netherlands Securities Co., Inc., Seymour Blauner Co., and Sprayregen, Haft & Co., which will receive a 36 cents per share commission and $18,000 for expenses. The statement also includes (1) 20,000 class A shares sold to the underwriters at one cent per share and 1,600 shares to Sprayregen, Haft & Co. at $1.58 per share, and (2) 136,450 outstanding class A shares previously sold by the company to management officials (and certain associates) at $1.58 per share.

The company was organized under New York law in September 1961 for the principal purposes of acquiring, investing in and financing patents and new scientific technology. It was organized through the efforts of certain investors including National Patent Development Corp., its parent, and intends to use the facilities and experience of the parent in its activities. The prospectus states that to date the company has only one full-time clerical employee, and its President, James S. Lanigan, and Vice-President, Martin M. Pollak, are serving on a part-time basis. The company has had no income to date and it has not consummated arrangements for acquiring, financing or investing in any patents or new scientific technology. Mr. Pollak will receive an annual salary of $10,000 and the parent will receive an annual consultant's fee of $5,000, which amounts are payable whether or not the company has earnings or prospects of earnings and may be paid from the net proceeds ($490,000) from the stock sale. The balance of such proceeds will be used for office and administrative overhead, professional services, advertising and promotion, and for working capital.

The company has outstanding 158,050 class A and 13,000 class B shares. Globus, Inc. owns 14.2% and menagement officials as a group 18% of the class A shares; and National Patent Development Corp. owns 71.8% and Evelyn Silver 24.4% of the class B shares. The parent had originally purchased 12,500 of the class B shares at one cent per share and members of company counsel 500 shares. Subsequently, the parent sold 3,165 of its shares to Evelyn Silver at $15.80 per share. Each class B share is convertible into 10 class A shares when, as and if the company earns $1 per share or after Nov. 2, 1963. Of the outstanding class A stock 138,050 shares were issued to management officials and others, as indicated above, for $218,119, or $1.58 per share and 20,000 to the underwriters at 1 cent per share. Thus, purchasers of the new shares will suffer a dilution from the $3 per share paid by them (in an amount to be supplied by amendment).

Gulf American Land Corp.—Annual Report—

In the companys' 1961 annual report to stockholders, Leonard Rosen, President, stated that both sales and earnings showed a pattern of accelerated growth during the fiscal year ended Aug. 31. For said fiscal year sales and other operating income including net sales of homesites at Cape Coral, Fla.—the company's principal project at this time—totaled $40,495,898. This represents a 52.7% increase over the preceding fiscal year when total sales and operating income were $26,512,365.

Consolidated net income amounted to $6,157,605, a 88.8% increase over fiscal 1960 income of $3,260,933. Earnings per share equaled $2.94 on 2,093,211 average shares outstanding during the year. In the 1960 fiscal year, earnings amounted to $1.64 per share on 1,986,200 shares, the average number outstanding during the year.

In the principal area of the company's activities—the development and marketing of planned communities designed around today's informal American way of living—the company has made rapid and considerable progress.

Cape Coral, Fla., a planned waterfront community containing the conveniences and facilities for modern urban life and situated at the mouth of the Caloosahatchee River, six miles north of the Gulf of Mexico and 12 miles southwest of Fort Myers on Florida's Gulf Coast, is now a prospering entity.

By the end of the fiscal year, Aug. 31, 1961, 25,000 homesites had already been sold, 500 permanent residences built, and new homes were being constructed at the rate of 25 per month. Under the master concept, a quarter of a million residents will eventually live, work, and play at Cape Coral.

To bring the community of Cape Coral closer to Ft. Myers Beach and the main highways to the south and east, the freeholders of Cape Coral are expected to vote in December on the construction of a toll bridge to be built across the Caloosahatchee at Cape Coral to the south shore of the river. To finance this bridge, it is expected that $2 million of tax free bonds will be sold. When the bridge is in operation, residents of Cape Coral will have direct access to Ft. Myers Beach and U. S. Highway No. 41, at the Tamiami Trail.

The company's second planned community, Golden Gates Estates, a 26,000 acre tract adjacent to Naples in Collier County, Fla., is now in the development stage. Sales of acreages here have far exceeded our original projections and are expected to gain even further in momentum as the community begins to take character. We anticipate that Golden Gate Estates will assume increasing importance in your company's operation and that income from this development will contribute to substantial increments in earnings from Cape Coral and will be an important factor in future financial reports.

Mastercraft Medical & Industrial Corp. — New Food Server—

Foster Monaco, President, announced that his corporation, located in Jamaica, N. Y., has designed and is producing for restaurants, hotels, institutions and the housewife, a new "Hot 'n Cold Food Server" to keep food fresh and sanitary, and at the right temperature, for many hours.

"Our server, the result of several years of research and development, is the food appliance revolution of the so-called roaring sixties," said Mr. Monaco. "In the fifties, we saw housewives and eating places go all-out for the electric rotisserie. In the decade or so previous, the pressure cooker was all the vogue. We believe that the "Hot 'n Cold Food Server" is going to provide the big news in the food serving field for the next 10 years or so, if not longer."

The "Vue-Server" made by Mastercraft is of crystal-clear plexiglas materials and is designed to keep food fresh and sanitary for many hours. It has a bottom compartment that may be filled with hot water, or that will retain ice for many hours, with several compartments for holding the hot or cold foods.

A vacuum-seal effect is created by the transparent dome cover of the server which is set into special shoulders. Cold, or heat, whatever the need may be, is retained for a number of hours. The cover also acts as a germ guard and is made of material which is odorless, bacteria-free and non contaminating to the food. Meals thus are kept fresh looking and attractive, awaiting serving at the informal buffet in the living room, or on the terrace or patio, or in the restaurant, hospital or other institution calling for mass feeding.

Mastercraft's server is patented, and is available in two, three and four unit compartments, at suggested retail prices from $22 to $36 in crystal clear material and from $26 to $40 in color plexiglas. These prices, Mr. Monaco noted, compare with several hundreds of dollars paid currently for stainless steel units for similar use.—V. 194, p. 2119.

Retire long-term debt	24,000
Establish traffic engineering office	16,500
Salaries of officers	24,600
Material for construction contracts	84,000
Labor for construction contracts	64,400

BUSINESS—The company was incorporated under the laws of the State of Colorado on May 29, 1961. The operations of the company will be carried on at 330 west Costilla Street, Colorado Springs, where its principal office is located, and at 612 South Tejon Street, Colorado Springs, Colo., a branch office, in premises which are presently leased by the company.

The company was created with broad general powers; however, it is the intent of management to limit the activities of the company at the outset to the field of electrical construction work including research, design, engineering and management operations without any restrictions as to geographical area. At the present time, the bulk of the company's business is located in the Colorado area.

The company is the successor to an electrical contracting business which was originally owned by Mr. Luther V. Mayfield, the company's President and Director. This business was a sole proprietorship operated by Mr. Mayfield under the name, Belco Electrical Service. Mr. Mayfield had acquired the assets of Belco Electrical Service on April 30, 1961 from Belco, Inc., an Oklahoma corporation, of which Mr. Mayfield had been Vice-President and General Manager in charge of its Colorado operations. Belco, Inc. in turn was the successor in July of 1959 to the business of a co-partnership known as Belco Electrical Service, in which Mr. Mayfield and Mr. F. D. Behringer had been partners since 1956. This partnership was dissolved in July of 1959 and succeeded by the corporation, Belco, Inc. From July, 1959 until April 30, 1961, Mr. Mayfield was Vice-President and General Manager of Colorado operations of Belco, Inc., at which time he resigned his offices and acquired all of the assets subject to the liabilities of the colorado operations of Belco, Inc. The Colorado operations were not conducted as a separate business but were a part of the overall operations of Belco, Inc. of Oklahoma. From April 30, 1961 to June 1, 1961, Mr. Mayfield operated as a sole proprietorship using the trade name, Belco Electrical Service, and on June 1, 1961, he assigned all of the assets subject to the liabilities of Belco Electrical Service for a net worth of approximately $23,878.42 to the company in consideration of 74,000 shares of the company's 10 cents par value common stock.

In addition, other officers, directors and an employee received an aggregate of 26,000 shares of the company's 10 cents par value common stock in consideration of cash and assets valued at $13,000. Subsequently, all the shareholders of the company agreed to contribute back to the company one-half of their outstanding shares on a pro rata basis and there are now outstanding 50,000 shares.

Metro-Goldwyn-Mayer Inc.—Record High—

Joseph R. Vogel, President, reported that the company had established a 15-year record high in the fiscal year ended Aug. 31, 1961, earning a net profit of $12,677,000 or $5.02 per share. This is more than a 30% increase over the $9,595,000 or $3.83 per share earned during fiscal 1960.

"The healthy over-all condition of the company," Mr. Vogel said, "the exceptional quality of finished pictures and those planned and in production, and the encouraging pace of our music, records and TV activities make us confident that our earning capacity is on a sound basis.

"As a demonstration of this confidence, the Board of Directors—after spending two days at the studio previewing some of our important forthcoming productions—has just voted to increase the company's quarterly dividend from 40 cents to 50 cents per share, which is at the rate of $2 per share annually. This is the second increase in 16 months. —V. 194, p. 370.

Micron Plastics Corp.—Common Offered—Pursuant to a Dec. 8, 1961 offering circular, S. Schramm & Co., Inc., 80 Pine St., New York City, offered publicly, 50,000 shares of this firm's common stock at $4 per share. Net proceeds will be used by the company for plant improvement, moving expenses, purchase of additional equipment, and working capital.

BUSINESS—The company was organized under the laws of the State of New York on Dec. 3, 1953. Its offices and manufacturing facilities have since been located at 640 Dean St., Brooklyn, New York. In January, 1962, it expects to move to larger quarters at 34 Ave. A, Bayonne, N. J.

An extruder of polymer films in mill thicknesses, the company has since its inception been engaged in the manufacturing of extruded polyethylene plastic film, which is produced in its plant in the form of flat or gusseted tubing and various types of sheeting, all in varying gauges and widths. The only raw material used, namely, polyethylene resin, is purchased direct from major chemical companies. Though the company has no contracts with its suppliers, it enjoys good relations with them.

The extrusion process involves forcing the resin, which is supplied in pellet or granular form, through a die of the desired shape, under heat and pressure. The resulting film is then cooled and taken up in rolls. As is the case with all plastic products, polyethylene film is a polymer, or giant molecule, made up of countless identical smaller molecules of identical chemical structure, all linked chemically to one another.

Sales are made by direct solicitation of the company's personnel to independent converters, who in turn process, print and make bags or wraps for a wide variety of goods, such as candy, textiles, food and fruit products; quilted and embossed domestic products, such as tablecloths; and industrial materials such as drum liners. The nature of its business requires that it make quick deliveries after it has received orders form its customers. The bulk of the company's output is sold directly to approximately 50 customers, most of whom are located in the New York metropolitan area. The balance of its customers are located in the middle Atlantic area, from Massachusetts to West Virginia, and except for one customer accounting for 15% and another for 11%, no one customer accounts for more than ten percent (10%) of the company's sales.

Molecular Systems Corp.—Common Registered—

This corporation of 420 Bergen Blvd., Palisades Park, N. J., filed a registration statement with the SEC on Dec. 12, covering 140,000 shares of common stock, to be offered for public sale at $3 per share. The offering will be made on an all or none basis by Stone, Ackerman & Co., Inc. and Heritage Equity Corp., which will receive a 36 cents per share commission. The statement also includes (1) 10,000 shares to be sold to the underwriters at 10 cents per share, and (2) 10,000 shares underlying three-year options to be granted to the underwriters, exercisable at $3 per share.

The company was organized under Delaware law in May, 1961, primarily to produce polyethylene materials of varying grades and properties from by-product polymers available from the plastics fabricating industries. Such materials which are said to be in pilot plant production, may be used as ingredients with other materials to form products called "blends," which are said to have a variety of uses including coating for milk cartons. Of the net proceeds from the stock sale, $90,000 will be used for the purchase of facilities and equipment for the production of polyethylene material and $40,000 for research (1) into the possible application of its process for polyethylene production to other thermoplastic polymers, (2) for the development of its process for gas plating graphite with refractory metals and (3) for the development of new and improved processes for the production and purification of semi-conductor materials. The balance will be added to working capital to be used for purchase of materials and in production and sale of the polyethylene material and for general corporate purposes. Plaswax Corp., of New York, subscribed to 150,000 shares of the company for $1,500 and also assigned to the company the process for the production of polythylene products from by-product polymers. Most of the management officials of the company are also management officials of Plaswax and, as a group, own about 88% of the stock of Plaswax. Scientific Ventures Corp. of Delaware, also subscribed for 150,000 shares of the company for $40,000 and agreed to cancel a previous loan of $10,000 to Plaswax. Robert Colton, a company Vice-President, and S. Spencer Grean are management officials of Sicentific and together own 23% of its outstanding stock (and options to purchase additional stock). They are also management officials of Heritage Equity, one of the underwriters, and own about 95% of its outstading stock.

The company has outstanding 300,000 shares of common stock, of which Plaswax and Scientific own 50% each. John Happel is Board Chairman and Charles J. Marsel is President. If all the shares are sold, present stockholders (including the underwriters) will have paid $42,500 in cash for 68.9% of the outstanding stock and public investors $420,000 for 31.1%. Sale of the new stock at $3 per share will increase the Oct. 31 book value of 14 cents per share and will result in a correspondent dilution in the book value of stock purchased by public investors.

Monmouth Electric Co., Inc.—Common Offered—An offering of 200,000 shares of this firm's common stock at $6 per share was made on Dec. 13 by Cruttenden, Podesta & Co., Chicago and Spear, Leeds & Kellogg, New York City. Of the total, 125,000 shares were sold for the company and 25,000 for certain stockholders. Net proceeds from the 125,000 shares will be used by the company for the purchase of additional equipment, repayment of debt and working capital. The issue was oversubscribed.

BUSINESS—The company was incorporated under the laws of the State of New Jersey on May 4, 1951. It maintains its offices and plant at 1802 Corlies Ave., Neptune, N. J.

The company designs and manufactures electronic and electromechanical equipment intended primarily for meteorological use, electronic test equipment and aircraft parts and test equipment. In the fiscal year ended June 30, 1961, meteorological equipment accounted for approximately 70% of sales, the remaining 30% being derived from the manufacture and sale of radar test kits, valve seats for aircraft engines, aircraft propeller testers and other miscellaneous products. In that year about 80% of sales was derived directly from the government and its agencies, and 20% was derived from non-military customers. Approximately 90% of the company's gross revenues are attributable directly or indirectly to government programs, military and civilian.

The company was organized for the purposes of purchasing, developing, and operating telephone facilities in its operating area, and has devoted its operations exclusively to those purposes.

At the present time, the company operates twenty-three (23) exchanges and/or toll facilities in the Florida Counties of Suwannee, Alachua, Putnam, Taylor, Union, Bradford, Clay, Columbia, Gilchrist, Hamilton, Lafayette, Marion, Nassau, and St. Johns, pursuant to Certificates of Public Convenience and Necessity granted by the Florida Railroad and Public Utilities Commission.

The company serves approximately 9,500 subscribers and owns approximately 475 miles of cable, 5,800 miles of aerial wire, 1,900 miles of pole line, and operates 121 miles of micro-wave circuits. Franchises of 30 years duration have been granted to the company by all municipalities in which it operates.

Long-term debt of the company represents 2% notes payable to the Rural Electrification. Administration in instalments through 1936. The debt is secured by a mortgage on substantially all telephone properties owned by the company.

The company operates under a standard contract with the Southern Bell Telephone & Telegraph Co. for the handling of toll messages. The company also acts as the toll center of the Gulf Telephone Co. at Perry, Florida.

The company is continually expanding in all its exchanges by adding outside plant facilities and central control office additions for more subscribers and to up-grade service for existing subscribers. Additions for these purposes will amount to approximately $575,000 in 1962. It is anticipated these additions will be financed by further borrowings from the REA.

North Shore Gas Co.—Bonds Sold Privately—

This Waukegan, Ill., company has announced completion of the sale of $3,500,000 in 25-year Series C first mortgage 5% bonds. The bonds were sold at par. The issue was authorized on Nov. 22 by the Illinois Commerce Commission.

Purchaser names were not announced, but Roy Jones, president, said he was pleased at the speed with which the offer was accepted by interests representing long-range investors, such as insurance companies and trust funds.

The money will be used primarily to repay bank loans incurred during the company's present rebuilding and expansion program. In just the year 1961 and '62, about $6 million will be spent on construction of new gas mains, service extensions, meters and other improvements and replacements.

Besides allowing the company to maintain the fast-growing pace of user requirements, the program anticipates future needs. Currently, it has about 14% more natural gas available than a year ago. Largest project now under construction is a 16-inch feeder main extending 9-miles on highway 41 from North Chicago to Highland Park.

The company serves natural gas to the extreme Northeastern section of Illinois, from Winnetka to the Wisconsin line and west to include Grayslake, Libertyville and Mundelein.

Annual Report—

The company reported earnings of $1.57 per share for the fiscal year ended September 30, 1961, up from $1.50 per share in the previous year.

Roy E. Jones, President, also reported a 10% jump in revenues to $10,558,395, from $9,583,118 in 1960. He pointed out that this was the first time past the $10 million mark and about a 3-times increase since 1951.

The gain in earnings and revenues reflects primarily the company's gain in householding customers which was made possible by increased gas supply and a steadily increasing population. A 20% increase in residential space heating customers more than offset any adverse effects of 5% warmer than normal weather.

During the fiscal year, shareholders were paid an increase of $.10 in dividends over the $1.075 rate a year ago. Most recent quarterly dividend was 30c a share reflecting a $1.20 annual rate.

Pacific Lighting Corp.—Common Offered—Pursuant to a Dec. 12 prospectus, Blyth & Co., Inc., San Francisco, offered publicly, 600,000 shares of this firm's common stock at $59.75 per share. Net proceeds will be used by the company to repay bank loans, and for construction.

BUSINESS—The company was incorporated under California law in 1907 as successor to Pacific Lighting Co. (incorporated in 1886). It is a holding company having its executive offices at 600 California St., San Francisco. The company's public utility subsidiaries, engaged in the natural gas business in southern California, are Southern California Gas Co. and Southern Counties Gas Co. of California and Pacific Lighting Gas Supply Co. A non-public utility subsidiary, Pacific Natural Gas Exploration Co. was organized in 1960. With the exception of Southern California Gas Co., in which the company owns 87% of the equity securities and voting power, the subsidiaries are wholly-owned.

Southern California Gas Co. and Southern Counties Gas Co. of California are engaged principally in the business of distributing and selling natural gas to domestic, commercial, gas engine, industrial and wholesale customers in contiguous territory within 12 counties in southern California. In connection therewith, these subsidiaries also buy, store, handle, and exchange natural gas. Pacific Lighting Gas Supply Co. is engaged in the business of buying, storing, handling, and exchanging natural gas, and selling natural gas solely to its affiliates, the distributing subsidiaries, under contracts, for resale. Pacific Natural Gas Exploration Co. in association with a subsidiary of Southern Union Gas Co. is seeking to develop gas reserves and ultimate production in Rocky Mountain and mid-continent areas adjacent to pipelines connecting with southern California. To date these operations have been limited and there is no assurance that any gas reserves will be developed. It is intended that production of any reserves developed will supplement long-term future supplies for southern California.

The distributing subsidiaries serve the City of Los Angeles with a population estimated at over 2,550,000 (1960 U. S. Census, 2,479,015), 156 other incorporated cities and many unincorporated towns and communities in southern California. The total population in the area served was estimated at 8,600,000 as of Jan. 1, 1961, representing a gain of approximately 21% during the past five years.

Approximately two-thirds of the revenue of the distributing subsidiaries is derived from the sale of natural gas to domestic and commercial customers for cooking, water heating, space heating, refrigeration, air conditioning, clothes drying, and other uses.

Large volumes of gas are sold to industrial customers under firm and interruptible schedules. In addition, wholesale deliveries are made to another utility in San Diego County and to the City of Long Beach to meet the demands for natural gas by their customers, preponderantly domestic and commercial.

UNDERWRITERS—The underwriters named below, severally, have made a firm commitment, subject to certain conditions, to purchase all of the 600,000 shares of common stock at $59.75 per share. Under certain circumstances, involving default of one or more underwriters, less than all of said shares may be purchased.

Offering of the common stock is made for delivery when issued and accepted by the underwriters, subject to prior sale and to the right to modify or terminate the offering without notice. Concession to selected dealers is $1.10 per share, reallowance therefrom to other dealers is 25c per share.

In the third quarter of 1961 consolidated earnings are estimated at $890,000, or $0.53 per share plus special capital gains of $558,000, amounting to $0.33 per share making a total income of $1,448,000, or $0.86 per share. Comparative total income for the same period in 1960 was $2,405,000, or $1.44 per share.—V. 194, p. 1279.

Parkway Laboratories, Inc.—Common Registered—

This company, of 2301 Pennsylvania Ave., Philadelphia, filed a registration statement with the SEC on Dec. 6 covering 160,000 shares of common stock, to be offered for public sale at $5 per share. The offering will be made on an all or none basis by Arnold Malkan & Co., Inc., which will receive a 50 cents per share commission. The statement also includes (1) 35,000 outstanding shares conditionally sold to the underwriter by promoters and principal stockholders for $24,000, and (2) 37,913 shares issuable in connection with the purchase of S. F. Durst & Co. Inc. which the company proposes to acquire.

The company was organized under Pennsylvania law in December 1960 for the primary purpose of engaging in the manufacture and sale of drugs and pharmaceuticals. Its only business to date has been negotiations which resulted in the acquisition of the options to acquire the stock of Durst Co., of Philadelphia, a drug and pharmaceutical manufacturer and of a lease for office space and laboratory facilities, the obtaining of personnel, including medical experts to act as research advisors, the obtaining of approval of the United States Food and Drug Administration of the marketing of two drugs, and the acquisition of the right to exploit two non-pharmaceutical inventions. Of the $701,000 estimated net proceeds from the stock sale, $504,000 will be used to purchase the stock of Durst Co. (at $21 per share), $150,000 for research and development, $50,000 for modernization of the facilities of Durst Co., including purchase of new instruments and equipment for its plant, and for the general funds. In April 1961 the company acquired the options to purchase all the outstanding shares of Durst Co., for a total of $504,000. Of this stock, 80.6% is owned by Richard L. Durst, Vice-President of the company, and Robert B. Durst, Secretary, and 19.4% by 23 minority stockholders. Pursuant to the terms of the option agreement with the latter group, they may purchase 22,913 company shares at 85% of the offering price from the $97,381.20 proceeds of their sale of Durst Co. stock. The contract also grants to each of the two Dursts a 60-day option to purchase 5,000 company shares at 85% of the offering price, and further provides for the issuance to each of 2,500 shares for services rendered. The prospectus indicates that the $504,000 which may be paid for the stock of Durst Co. is about twice the book value of that company.

The company has outstanding 331,375 shares of common stock (after giving effect to a recent 35-for-1 stock split), of which C. Anthony D'Alonzo and Edwin A. Gee, directors, Anthony M. Sindoni, Jr., Treasurer, and Francis W. Sindoni, Jr. own 19% each, and the underwriter 11%. After the sale of new shares (not including shares to be issued pursuant to the Durst Co. acquisition), promoters will have received a 61% interest in the company for an investment of $122,125, the underwriter a 7% interest for $24,000, and the public a 32% interest for $800,000. David G. Abraham is President.

Pelican State Hotels Corp.—To Redeem Debentures—

The corporation has called for redemption on Dec. 20, 1961, all of its outstanding debentures dated April 1, 1959 at 100%. Payment will be made at the National American Bank, New Orleans.

The acquisition, according to Mr. Lewis, is a step in Perkin-Elmer's long range program in optical maser technology. "SSM complements our present activities," he said, "and will provide Perkin-Elmer with a materials capability in solid state optical maser art."—V. 194, p. 1616.

PneumoDynamics Corp.—Proposed Com. Off.—Merger

The company will make a public offering of approximately 100,000 shares of common stock in connection with its proposed merger with Cleveland Pneumatic Industries, Inc., Sam S. Mullin, Chairman of PneumoDynamics and President of Cleveland Pneumatic Industries, said in a letter to stockholders.

Mr. Mullin said, however, that any such public offering would be made only through a formal prospectus, meeting the requirements of the Federal Securities Act.

PneumoDynamics expects to hold a special stockholders meeting before the end of January to consider the acquisition plan and also to consider a proposed increase in the number of authorized shares from 1,000,000 to 1,500,000 shares, the letter said.

The letter also disclosed terms of the exchange of PneumoDynamics shares for those of Cleveland Pneumatic Industries.

Under the proposal PneumoDynamics will purchase all of the stock of Cleveland Pneumatic Industries, now owned by CPI's two profit-sharing trusts, for 200,500 shares of PneumoDynamics stock and $2 million in cash. Trustees of the two trusts already have approved the merger. In addition, Cleveland Pneumatic stockholders, also will become the owners of 375,000 shares of PneumoDynamics now held by Cleveland Pneumatic Industries, the letter disclosed.

PneumoDynamics currently has 550,000 shares of $1 par common stock outstanding, including the 375,000 shares held by CPI. Under the merger terms, Cleveland Pneumatic Industries, Inc., would be operated as a wholly-owned subsidiary of PneumoDynamics.

If PneumoDynamics had owned and operated CPI in the first nine months of the current fiscal year, the effect of the consolidation, based on the Aug. 31, 1961, figures, would have been to increase after-tax earnings of PneumoDynamics from $716,600 to $1,250,700. It also would have increased PneumoDynamics net working capital from $4,398,900 to $11,661,300, and substantially increased the net worth per share of PneumoDynamics, the letter stated.—V. 193, p. 747.

Precision Metal Products, Inc.—Common Offered—Pursuant to a Nov. 21, 1961 offering circular, Armstrong & Co., Inc., New York City, offered publicly 100,000 shares of this firm's common stock at $3 per share. Net proceeds will be used by the company for repayment of debt, increase of inventory, additional equipment, moving expenses, sales promotion and working capital.

BUSINESS—The company of 278 N. W. 27th St., Miami, Fla., is engaged primarily in designing, drafting, engineering and manufacturing of mobile food service equipment. The majority of the company's business is directed to the needs of institutions such as hospitals, schools, prisons, restaurants, bakeries and indutrial caterers. The company also sells its products to the Armed Forces of the United States and other government installations. However, only a small portion of the company's business is derived from direct government contracts and government cancellations would not greatly affect the company's over-all production.

The company works with such materials as ferrous and non-ferrous metals, sheet, plate, bar, tubing, angle, extrusions, castings, plastics, rubber, glass and woods of all descriptions. The company's principal products are made of metal. Some of the company's basic operations include drilling, tapping, shearing, bending, arc-welding, spot welding, gas welding, and heliarc welding.

The company has designed and developed a complete satellite feeding system. This system enables the food to be prepared in a central kitchen and through the use of the company's manufactured equipment, transported to the point of use. The company manufactures all of the allied equipment necessary for a complete installation. This system has been adopted by many schools, universities, prisons, industrial and government installations throughout the United States. Chain restaurants are rapidly adopting central kitchen operations. The main food preparation is done in a central kitchen or commissary then transported to the various restaurants, leaving only short order cooking to be done at the local place. Industrial feeding operations also favor the central kitchen idea. The satellite system consists of component parts that connect to make the complete unit. The size of the system is determined by the needs of the particular institution and can be increased by the addition of other hot and cold units. A typical satellite unit would consist of hot food serving unit, cold food serving unit, milk dispensing unit, ice cream dispensing unit, coffee and beverage dispensing unit and cashier secton. The company has through years of research, testing products, produced a mobile stainless steel low cost unit. The development is concentrated around a series of independent units which meet the most right storage requirements, temperature control as well as satisfying the needs of transportation and serving of prepared foods. The selling price of individual satellite units range from $200 to $600. However, a complete unit consisting of a combination of various individual units has been manufactured and installed by the company for as high as $30,000. The manufacture of the satellite feeding system and its allied products represent approximately 45% of the company's business.

Realty Acquisitions—

By its very nature, the business of developing and marketing planned communities is one requiring vision and foresight. As one community matures, plans for another must be formulated.

The company staked out its claim on the future by purchasing four large tracts of real estate in widely scattered though rapidly growing sections of the United States and abroad. However, due to the ever-increasing sales volume currently being achieved with its Florida properties, the company will temporarily warehouse its new land acquisition as a Land Bank of inventory to bulwark and safeguard the security of its future growth.

One tract acquired consisted of 10,680 acres near Kingman, Ariz., near Lake Mead and on the direct route to Las Vegas. Development of this project, named Golden Vista is still in the planning stage. It is envisioned that acreage in Golden Vista will be offered in small tracts (ranchettes) in the near future. This Arizona acreage was acquired since all indications point to a population explosion in Arizona. Some sections of the state have already experienced 100% growth in population since 1950.

In Utah, Gulf American Land has acquired 5,680 acres located on the Green River, southeast of Price in Emery County. The property is near one of the largest uranium mines in the United States. In addition to having great industrial potential, Utah has also become a popular recreational center in recent years.

The third property bought by the corporation totaled 51,000 acres 25 miles south of Albuquerque, New Mexico. This tract was added to the company's portfolio of land investments because of the spectacular growth in and around Albuquerque in recent years.

The fourth property, 96,822 acres of mahogany forests on the coastal plain in British Honduras was acquired by the corporation as a long-term investment based on the growth and development of Latin America.—V. 193, p. 2435.

It was also reported that although the net earnings for the current period was considerably less than during 1960 ($51,000 vs. $2,478,000), this was to be expected due to the purchase of high priced raw materials which was necessary to keep the corporation's plants running.

Scantlin Electronics, Inc.—New Stock Quotation Board

A new electronic stock quotation board for stock brokers was announced Dec. 14 by John R. Scantlin, President of Scantlin Electronics, manufacturers of Quotron stock quotation systems.

Incorporating the latest electronic developments, the board represents the first major development in quotation boards in 30 years, he said. It is expected that the new board will be available in the third quarter of 1962.

The use of transistorized circuitry and common wiring makes possible substantial cost savings and provides features never before available, Mr. Scantlin said. Cost of new board will be 25% less than prevailing prices for electric boards.

Among the exclusive features listed by Scantlin are numerals twice as large as those on existing boards, permitting easy readability at twice the distance; changeable listings (a stock listing can be changed by office personnel in seconds); colored trend indicators showing direction of price movement of all stocks at a glance; space economy (25% more listings in same wall space, is only four inches in dept with no rear access required); simplicity and economy of installation; and an attractive modern appearance.

Scantlin maintains service centers at 125 cities to care for Quotron, which will permit installations of the board when available to proceed with a minimum of delay, Mr. Scantlin said.—V. 194, p. 12.

Self-Service Shoes, Inc.—Common Offered—Pursuant to a Nov. 20, 1961 offering circular, Amos C. Sudler & Co., Denver, offered publicly, 100,000 shares of this firm's common stock at $3 per share.

BUSINESS—The company was incorporated on Sept. 18, 1958, under the laws of the State of Colorado. At the present time, the company has seven retail outlets located in the States of Colorado, New Mexico, and Texas. The principal office of the company is 504 North Grand Ave., Pueblo, Colo.

The company was organized primarily for the purpose of carrying on the retailing of shoes and other items incidental thereon on a self-service principle of retail sales. Under this system, all shoes are openly displayed on sloping shelves built along the side walls and through the center of the store. The shoes are arranged for display according to size, style, color and price, so that customers may seelct items of their choice without the necessity of being waited on by clerks or salesmen, much as in the supermarket principle of grocery retailing. Such a system is designed to enable the company to take advantage of lower operating costs through the saving of wages to employees, inasmuch as fewer employees are needed than in conventional retail operations.

The savings in low operating costs are reflected by the company's policy of low mark-ups and its generally aggressive pricing policies, i.e., cut rate prices.

Selective Financial Corp.—Common Registered—

This company of 830 North Central Ave., Phoenix, Ariz., filed a registration statement with the SEC on Dec. 8, covering 500,000 shares of common stock, to be offered for public sale at $6 per share. A commission of not to exceed $1.20 per share will be paid to such brokers and dealers as the company may select to participate in the offering. The prospectus states that up to 397,833 of such shares may be purchased until Dec. 31, 1963, by stockholders of Selective Life Insurance Co., an affiliated company, pursuant to warrants issued to them. They may purchase such shares at $5 per share until Jan. 1, 1963 (and at $6 per share thereafter) and pay one-half of the purchase price therefore in Selective Life Stock. Selective Life stock is of three classes, and was originally distributed at fixed purchase prices differing between classes. Warrants are calculated on the basis of such original purchase prices, and entitle their holders to purchase a number of shares of Selective Financial stock equivalent to the number of shares of Selective Life stock to which they are appurtenant.

The company was organized under Arizona law in September, 1961, by the directors of Selective Life to engage in the mortgage, land, investment, finance and related businesses. It is proposed that the company will initially engage principally in the real estate mortgage field, and that to a large extent it will take advantage of investment opportunities offered to Selective Life but not avaliable to it as a matter of law because of restrictive investment provisions of the insurance laws. The company will do business from the home office of Selective Life in Phoenix, and to as great extent as is possible will utilize equipment and personnel of Selective Life. Net proceeds from the stock sale will be used for the purpose of buying residential and commercial mortgages, including second mortgages, in Arizona. Funds may also be invested in equities in land, and in the financing of intangibles and chattels, including life insurance premiums, life insurance agents' balances, real estate sales commission, automobiles and appliances.

The company has offered a total of 14,400 shares to its directors (who are also directors of Selective Life), each receiving the right to purchase not less than 200 nor more than 1,200 shares at $5 per share until Dec. 31, 1962, in cash or up to one-half through transfer of Selective Life Stock at its original purchase price. To date, directors have exercised such rights for an aggregate of 7,600

Steadman Industries Ltd.—President Forecasts Containerization Growth—

"The containerization industry can go completely through the roof during 1962. At the very least, the industry will experience a growth of 200% to become a real industry during the coming year." That's the view of William Steadman, President of Steadman Industries Ltd. of Toronto. "Much of the experimental work and field testing of containers was done during 1961. Now that the results are starting to come in, it seems evident that 1962 will be the year when containerization comes into its own. Just how big the growth will be depends on several factors," Steadman said.

"Most important is the continued high state of the economy." The executive noted that carloadings in the United States continue to run nearly 10% over 1960 levels, and pointed out that increased billings will encourage the railroads to switch more rapidly to the use of containers. "The truckers are already switching," he commented; "and they eventually will press containers on the railroads. The speed with which the railroads adopt containers will determine whether our growth is moderate, about 200% or phenomenal."

Affecting the railroads' decision, he said, would be the availability of capital to buy the necessary handling equipment. "They can raise the capital when times are good, and when the demand from forwarders and trucklines is heavy enough. Continued good times obviously will be a tremendous help.

"Of inestimable help to the railroads, many of which are today undercapitalized, is our recently-concluded licensing agreement with North American Car Corp. of Chicago to produce containers, railroad car bodies and other metal frame products in the United States using our patented 'Modular Interlocking Stitched Panel Process'." North American, whose primary business is the leasing of rail cars to railroads and shippers, said it expects to license the method to United States manufacturers of containers and other products. North American heads a pool of specialized railway equipment called N.TX for use by 13 member railroads, including the Rock Island Line, Southern Pacific, Denver & Rio Grande Western, New York Central, The Milwaukee Road, Erie-Lackawanna, Canadian National, Grand Trunk, Pittsburgh & Lake Erie, Texas & New Orleans, Western Maryland, Monon and the Florida East Coast Lines.

"The trailer industry averages sales of 62,000 units a year, whereas the railroads replace about 160,000 boxcars a year. Qualified railroad men have predicted that from now on 50% of these replacements will be container cars. The significance of NITX is that those railroads who are not presently equipped to buy the cars needed to handle containers can lease them from the pool. As the equipment proves its advantages, these railroads will come around to using containers.

"The trucklines are now in the process of switching from 40-foot containers to 20-foot. The more rapidly this transition takes place, the better off the industry will be." Steadman feels that standardization of the 20-foot container by the buying public will make for more efficient, lower cost handling of goods during the upcoming year—a factor which will make their use even more appealing.

Speaking of his own company, he said, "Of course, our growth is started in 1961, and we can already see our business multiplying during determined in part by the growth of the industry as a whole. We 1962. Like the industry as a whole, however, our business increase could become phenomenal. For example, the Canadian truck lines have been trying out our containers during the past year. Now the largest shipper is reordering, and the second largest is about to do so. We expect the connecting carriers in Canada to join the parade during the year.

White Sewing Machine Corp.—Reports Loss—

Despite profitable operations of three of its four divisions and slightly increased sales the corporation reported a loss for the nine-month period ended Sept. 30

In a statement relased by Board Chairman Vollmer W. Fries and President Edward S. Reddig, it was noted that White's total net sales for the first nine months of 1961 were $18,528,503 compared to $18,393,981 for the comparable period in 1960. Nevertheless, the corporation reported a loss of $223,222 for the nine-month period just ended, compared to a profit of $235,277 for the first nine months of 1960.

Fries and Reddig noted the corporation's Fibre-Glass Products Division, its Home Equipment Division, and its Specialty Valve and Controls Division all operated profitably during the first nine months of this year.

They pointed out, however, that "our Industrial and Mill Supply Division has failed to regain pre-recession sales and earnings levels, and this, plus the heavy carrying cost of our excess idle plant facilities, more than offset profitable operations within the rest of the corporation."

On an optimistic note, the White officers pointed out the Home Equipment Division has, this year, topped each corresponding month of 1960, itself an excellent year for this Division.—V. 194, p. 682.
