OVER 100 ISSUES REGISTERED IN LAST TWO DAYS OF THE YEAR
The SEC was swamped during the closing-Holiday-week-days of last year, The table immediately below recapitulates the record filings in the past three years.
$\left.\begin{array}{ccc} & \text { REGULAR FULL FILINGS } & \\ \text { Calendar Year } & \text { Number } & \text { Volume }\end{array}\right)$ Pending

When one looks at the number of issues registered but not yet cleared, the fantastic increase of privately held, and new, small firms going public for the first time account for the slowed down processing pace. Approximately $70 \%$ of the past six
months' filings had never filed before. In fiscal 1961, about $52 \%$, had not previously filed; and in fiscal 1958 the figure was $28 \%$.
The backlog tables below indicate the extent to which the numerous filings have added to the backlog's figures of previous periods. Increases are registered along the line in each principal sector.

This Week
Corporate stocks and bonds $\$ 840,000,000 \quad \$ 850,000,000$
HOW HIGH WAS THE MUNICIPAL AND CORPORATE FINANCING IN 1961 ? According to the records just compiled, long term municipal financing hit an historic high last year. Based on the good authority of the Bond Buyer, tax-exempt gross capital raised amounted to $\$ 8,329,075,124$. This exceeded the previous peak set in 1959 which added
its $\$ 7,229,500,359$.
Corporate financing for the last quarter of 1961 has not been tallied as yet by the SEC. However, the Commission recently released figures for the first three quarters of last year and the data indicate that 1961 will have come closest to 1957 - the year marking the historic high to date.
The table below depicts new corporate financing data, less refunding, in each of the past eleven years and, also, corporate bond and stock new capital held, less relative to GNP.
A somewhat similar treatment for municipals is provided by the Jan. 2,1962 Bond Market Review, a monthly publication of Salomon Brothers \& Hutzler. Reproduced, in part, in the table below are S.B. \& H.'s data on municipals.
The S.B. \& H 's analysis points out that "In spite of headlines reporting that in 1961 a record volume of state and municipal financing came to market, the growth of state and municipal debt in 1861 and in fact since 1954 has been far from dynamic. It has not kept pace with the growth of the American economy...". The S.B. \& H.
Review's municipal figures show that the estimated increase in net debt was actually Review's municipal figures show that the estimated increase in net debt was actually
below that of 1954 . True, 1954 was an exceptional year but the relationship of net below that of 1954 . True, 1954 was an exceptional year but the relationship of net
increase in debt to GNP is below that for the subsequent years to date. The S.B. \& H . writer keenly observes that the dynamic tax-exempt financing pace between 19461954 "has long since lost its dynamic growth trend."
Our analysis of corporate financing trend reveals a similar behavior pattern except that the turning point in dynamism was 1957. The trend decline since then is unmistakable in terns of GNP
If GNP indicates the extent our economy has grown, and if we assume that statelocal and private corporate services should at least keep pace with it, then our economy has changed the nature of its growth - and the investment banking industry will have less to do. Notwithstanding "hot-issue" turmoil, record D-J averages, and voluminous turnover on the exchanges, the point is that our new financing pace has not had to strain itself. Moreover, it looks as though this will be true for 1962 -barring unforeseen events.
Yields last year but modestly increased even though financing in the market was heavy and we went from recovery to expansion in the economy. This should no GNP, (2) the slowed economo add up: (1) the declining financing record high increase in Federal Reserve monetization of Federal debt which has provided more than ample bank credit despite the gold outflow. The total of these factors compared to the GNP trend should provide a satisfactory explanation as to the relative stability of the yield rate in 1961 as against what one would expect during such a cyclical period.

## THE COURSE OF BANK CLEARINGS

Bank clearings this week will show a decrease compared with a year ago. Preliminary figures compiled by us based upon telegraphic advices from the chief cities of the country, indicate that for the week ended Saturday, Jan. 6, clearings for all cities of the United States for which it is possible to obtain weekly clearings will be $1.6 \%$ below those of the corresponding week last year. Our preliminary totals stand at $\$ 29,193,067,218$ against $\$ 29,661,088,683$ for the same week in 1960 . At this center there is a loss for the week ending Friday of $4.0 \%$. Our comparative summary for this week follows:

## CLEARINGS-RETURNS BY TELEGRAPH

Complete and exact details for the week covered by the foregoing will appear in our issue of next week. We cannot furnish them today, inasmuch as the week ends Saturday and the Saturday figures are not available at time of going to press. Accordingly, in the above the last day of the week in all cases has to be estimated.

In the elaborate detailed statement, however, which we present further below, we are able to give final and complete results of the previous week-the week ended Dec. 30. For the week there was an increase of $4.5 \%$, the aggregate clearings for the whole country having amounted to $\$ 27,551,718,985$ against $\$ 26,361,915,473$ in the same week in 1960. Outside of this city there was a gain of $9.4 \%$, the bank clearings at this center showing an increase of $0.9 \%$. We group the cities according to the Federal Reserve Districts in which they are located and from this we note that in the New York Reserve District the totals show an improvement of $1.1 \%$; in the Boston Reserve District of $9.5 \%$, and in the Philädelphia Reserve District of $5.1 \%$ In the Cleveland Reserve District the totals record an expansion of $17.0 \%$; in the Richmond Reserve District of $5.4 \%$, and in the Atlanta Reserve District of $11.2 \%$. The Chicago Reserve District has managed to enlarge its totals by $2.6 \%$; the St. Louis Reserve District by $5.4 \%$, and the Minneapolis Reserve District of $15.0 \%$. In the Kansas Reserve District the totals register a gain of $3.2 \%$; in the Dallas Reserve District of $13.5 \%$, and in the San Francisco Reserve District of $14.9 \%$.

In the following we furnish a summary by Federal Reserve Districts:

Hudson County, N. J
To Start Deveiopment of Pub lic Market - Nineteen months of and legal study, evaluation and planning by the New Jersey Pub lic Market Commission were re-
warded on Dec. 29 when the Hudwarded on Dec. 29 when the Hud comeonditionally guaranteed the bond issue for the start of development of the 960 -acre inte distribution center in the Hudson County meadowlands.

Action by the Freeholders set in motion a series of steps which the Commission anticipates will operation by 1964 of the first 360 acre phase of the facility. This
first section, known as Tract I, primarily will handle meat, fruit and produce.
Ultimately, the completed food center will be able to handle in one area the storage, marketing,
and distribution of the whole range of perishable foods for the New York-New Jersey metro-
politan region. Market commission experts foresee a profoundly beneficial effect on the economy of the Hudson County area, as
well as providing great advantages well as providing great advantages
to the marketers, distributors and onsumers of food.
Immediate first step is the sale of the bonds through a syndicate of banks which includes several
Hudson County banks. The initial Hudson County banks. The initial
bond issue will mature in two years but will be subject to re funding into long-term bonds after construction has progressed to a
sufficient stage. Proceeds from the
plans for construction of the public market facility, which occupies parts of Jersey C
The Commission came into being in May 1960 , following ernor upon recommendation of the Secretary of Agriculture, Phillip Alampi, and the New Jersey Commissioner of Conservation and Economic Development, then to the two cabinet officers, who are automatically.
virtue of the Market Commission Law, the Governor then appointed three Commissioners, Judge John George H. Fangmann, all of Hudson County, Judge Drewen was elected Chairman by his fellow Chairman, and Fangmañ, Treas.
Later the Commission selected Executive Director. When Judge Drewen resigned due to the pressure of personal business, Governor Meyner appointed who was sher ser the sion as its Chairman. At the
present time H. Mat Adams, is a member of the Commission, having succeeded Bontempo in the tempo accepted a Federal post in Washington.
Through the 19 -month period leading up to this important action on Dec. 29 the Commission studies prepared by Barnett and Herenchak, engineers, of Newark Lehman Brothers, investment bankers, of New York, and bond counsel, of New York.
Last June test borings were Barnett and Herenchak, who made the original feasibility reAugust the Board of Freeholders adopted a resolution of their inent to guarantee the bond issue The proposed food market and distribution center is one mile west of the Hudson River, 10
minutes by truck from the Lincoln and Holland Tunnels, 13 minute from downtown Newark and 20 minutes from the George Wash ington Bridge. It is bounded by the Hackensack River, the New and the New York Susquehanna and Western Railroad. It has major road, rail, water and air accommodations.
It is these factors of accessi bility, plus the fact that the site s in the heart of the rapidly expanding New York-New Jersey
population center, which is expopulation center, which is ex pected to increase by seven to
eight million people by 1985 , oostly in northern New Jersey that convinced the Commission that the proposed public marke s the only practical location for a facility of such magnitude. Contained in the food center will be auction, packing, processing, and fish, agricultural and horticultural

## roducts.

On Dec. 13 the Commission accepted a new Activity, Income, and Engineering renort of Barnett the feasibility of the site as one which will be able to adequately erve the region's food distribu tion needs most efficiently and conomically.
