Corporate and Municipal Financing Ahead

By SIDNEY BROWN

Sealed competitive bids for Pacific Gas & Electric Co., and State of Connecticut issues coming up tomorrow and Wednesday, respectively, will pace this week's fairly active calendar. These two securities comprise approximately \$118 million out of \$290 million senior fixed interest rate debt capital sought, all told, in 31 tax-exempt issues of \$1 million and larger and three corporates. Of the two other corporate debt securities, one is an equipment trust certificate and the other is an underwritten foreign issue seeking dollars.

The exceptionally strong market for top state-local and corporate senior debt issues will begin to feel the effect of the Treasury's need to increase the Federal debt. Secretary Douglas Dillon testified last Feb. 28, in support of a \$2 billion hike in the temporary debt limit to bring it up to \$300 billion, that by Thursday (March 15) the debt would have to be increased by \$2.6 billion bringing it to \$279.9 billion. It was \$296,917,313,845 on the day he testified. He projected a decrease in the total debt to \$293.3 for March 31 but then traced a rise to almost the requested ceiling by June 15 in the amount of \$299.2 billion. This would be \$1.2 billion over the existing debt limitation and, more importantly, leaves little in flexibility even with a ceiling of \$300 billion. Interesting was the fact that on the day he testified before the Senate Finance Committee and submitted a projected debt figure of \$295.3 billion. We actually exceeded that figure by \$1.6 billion. Is this a portent of a faster rising debt than we anticipate?

On March 20 the Treasury will sell \$1.8 billion tax anticipation notes maturing Sept. 21, 1962. This plus the \$600 million already raised in new cash since Jan. 1, is expected to meet Treasury's anticipated need of \$2.4 billion until April.

PACIFIC GAS & ELECTRIC AND CONNECTICUT STATE

OFFER WEEK'S LARGEST ISSUES

The week's earliest barometer reading will be made today (March 12) in the money market when the Treasury will seek another \$100 million new cash. It will do so by selling \$1.8 billion of new short-term bills to replace \$1.7 billion of old bills coming due. This will be the sixth tapping for new cash since Jan. 1, 1962 for a total amount of \$600 million. It is the second in a row for the first two Mondays of this month. Today, also, will find DALLAS, TEXAS in the capital market for \$10,800,000 and NORTH LITTLE ROCK, ARK. will seek \$3 million.

On Tuesday and Wednesday these municipals scheduled: \$53,680,000 STATE OF CONN. general obligation highway system bonds; \$25 million PENNSYLVANIA GENERAL STATE AUTHORITY; \$5.7 million OMAHA, NEB. street and sewer obligations; \$15 million DENVER, COLO.; the first of two parts \$12.5 million PUERTO RICO WATER RESOURCES AUTHORITY; \$7,710,000 ALLEGHENY COUNTY, PA.

Scheduled for Tuesday, March 13, are \$65 million PACIFIC GAS & ELECTRIC CO. first and refunding mortgage bonds, non-callable for the first five years, set for competitive bidding.

Wednesday, March 14, has two debt issues docketed. One is the \$4,830,000 DENVER & RIO GRANDE WESTERN RR. equip. trust certificates, and the other is the Morgan Stanley & Co. and Lazard Freres & Co. jointly-managed \$40 million SOUTH EUROPEAN PIPELINE CO.'s sinking fund debentures (filed Feb. 1).

Thursday's tentatively posted offerings include \$15 million LOUISIANA BOND & BUILDING COMMISSION; 150,000 shares of ROCKOWER BROTHERS, INC. common (filed Jan. 19) via Drexel & Co.

A rights offering of 421,472 shares of LONG ISLAND LIGHTING CO. common to stockholders of March 16 record date is underwritten by Blyth & Co., First Boston Corp., and W. C. Langley & Co.

FEDERAL DEBT MANAGEMENT—A SELF-DELUSIONARY PROCESS?

The Federal debt increased \$6.5 billion on February 28, 1962 as against last year's date. In that span of time, to help finance the fiscal contra-cyclical moves and to raise the yields of short-term government issues, the Treasury floated \$5,175,640,000 in short-term paper. Yet, in terms of constantly meeting and refunding maturing debt and raising more money for net debt expansion, the Treasury finds itself coping with a pronounced increasing trend in marketable interest bearing debt maturing in a year or less. Quantitatively they have grown, despite the success of advanced refunding debt-stretching measures. The latter is supposed to lessen the Treasury's continuous recourse to the market. And no doubt the Treasury's debt-lengthening moves have made it easier to open up dates for additional issues. However, the Treasury is only asking for a \$2 billion temporary increase in the debt so as to bring the ceiling up to \$300 billion. The figures immediately following indicate how closely the Treasury computes its ability to stay within the hoped-for raised debt ceiling. As it was, when the Secretary of the Treasury was testifying as to the need to lift the debt limitation, on February 28 the debt had increased \$1.6 billion more than had been anticipated for that very same day!

ESTIMATED PUBLIC DEBT WITH ESTIMATES BASED ON CONSTANT OPERATING CASH BALANCE OF \$3.5 BILLION

Estimated	Operating Balance Federal Reserve Banks and Depositories (excluding free gold)	Public Debt Subject to Limitation	Allowance to Provide Flexibility in Financing and for Contingencies	Total Public Debt Limitation Required
Feb. 28	\$3.5	\$295.3	\$3.0	\$298.3
Mar. 15	3.5	297.9	*2.1	300.0
Mar. 31	3.5	293.3	3.0	296.3

May 15	3.5	296.3	3.0	299.3
May 31	3.5	296.6	3.0	299.6
June 15	3.5	299.2	*0.8	300.0
June 30	3.5	294.0	3.0	297.0

Data estimated by Treasury Dept. *Temporarily the full \$3 billion flexibility will not be available on these dates.

In view of the closeness between the predicted required ceiling and the actual ceiling of \$300 billion, one should easily see how harassing the increased build-up in one year or less maturing debt can be in denying adequate maneuvering time should a slight unfavorable miscalculation unexpectedly occur.

The data below show the year-to-year changes in the interest-bearing marketable debt. Note the \$7.5 billion increase in the marketable debt.

Of the earnings total, ACF had \$1,160,000 or 81 cents a share, and SHPX had \$489,000 or 34 cents a share. Their respective earnings were \$838,000 or 59 cents a share and \$462,000 or 33 cents a share in the prior fiscal year ended April 30, 1961.

Combined net sales, rentals and services of ACF and SHPX for the third quarter were \$52,411,000. They were \$58,576,000 last year. Of these totals, ACF contributed \$19,298,000 this year and \$55,745,000 a year ago; SHPX \$3,113,000 this year and \$2,831,000 last year.

Mr. Taylor said that net income for the nine-month period excludes the profit on the 214,500 shares of Republic Aviation Corp. common stock which were sold to the public during August, 1961. The after-tax profit of \$3,769,000 on this transaction has been credited directly to earned surplus. It will be more than offset by year-end charges to earned surplus in connection with the announced closing, scheduled for October, 1962, of the American Car and Foundry division plant in Berwick, Pa. He said that neither of these transactions is related to the company's normal business operations and accordingly the results thereof will be charged to earned surplus rather than to the current year's net income, he concluded.—V. 194, p. 1049.

The business of the company consists of the design, manufacture and sale of merchandising equipment for outdoor use by the oil, rubber and beverage industries. Thus far, all such equipment has been fabricated out of steel or other heavy duty metal, but the company has future plans to manufacture certain of its products out of non-metallic substances, such as plastic and wood.

The equipment manufactured by the company consists in large part of so-called "point of purchase" displays, that is, merchandise display racks and containers which are built to hold supplies of the merchandise advertised by the display itself. Thus, sales are made directly from the display racks, and goods are delivered immediately to the buyer therefrom. The bulk of products manufactured by the company are for use by oil and rubber companies in the display sale of automobile tires, batteries and accessories at service stations and automotive distributor stores. These displays are modular in concept, that is, they may be easily combined in multiple or sets, thereby increasing the overall size of the selling and storage facilities as the dealers' needs require. This modular design makes the product flexible and adaptable to all types of service stations. The individual display units vary in size from 10 square feet to 30 square feet capacity each. They are of modern design, contain large sign areas for advertising the products stored and displayed therein and have retractable or sliding doors for locking purposes. The cost of this equipment is substantially less than would be the cost of adding additional space to the station building proper, as would be required for the sale and storage of the merchandise if display racks were not used. The company also manufactures portable display racks for storing and displaying six to 20 tires, and for the storage and sale of batteries and other automotive accessories.

The company's sales are normally made directly to the tire manufacturer or to the oil company operating or licensing the store or station at which the equipment is to be used. The purchaser then arranges for the resale to or lease of the equipment by its own distributors and/or licensees.

Sales of \$57,597,000 for the six months ending Dec. 31, 1961, were reported by Michael Daroff, President.

Net profits (unaudited) for the six months were \$1,476,000, or 39 cents per share on the 3,826,577 shares outstanding as of Dec. 31. Comparisons with previous reporting periods are not meaningful because of a change in the nature of Botany's business. This resulted from the acquisition at the end of 1960 of H. Daroff and Sons, one of the leading manufacturers of men's clothing, under the "Botany 500" and "Worst-Tex" labels, and operators of retail clothing

stores. Consequently, the company changed its business reporting year from a calendar year to a July 1/June 30 basis.

Colonial Pipeline Co.—Proposed Pipeline—Financing

Representatives of nine oil companies met in Atlanta, Ga., on March 8 and organized the Colonial Pipeline Co. In doing so, they launched the largest single, privately financed, construction project in the history of the United States.

Colonial Pipeline will be a common carrier to haul refined petroleum products from the Texas Gulf Coast throughout the south and east to Staten Island, N. Y., in a quantity initially estimated at more than 600,000 barrels—better than 25,000,000 gallons per day.

In order to accomplish this, about \$350,000,000 will be poured into the American economy. The money will be raised by private financing.

Colonial's main line will be 1,600 miles long with another 1,000 miles of spur lines to connect it with cities adjacent to its right of way. Main line pipe will vary in size from 36 to 22 inches.

To keep a yard-wide column of gasoline, furnace oil, diesel fuel and kerosene moving forward at about four miles per hour, the system will have 20 pump stations. Each of these stations will be equipped with electronic control panels, automatic gauging systems, and electrically operated valving equipment, in addition to the big motors and pumps needed to maintain flow. Altogether, Colonial's needs add up to a \$100,000,000 order for the equipment industry.

Colonial Pipeline will require energy equivalent to 1,366,000,000 kwh of electricity yearly.

The stockholders of Colonial Pipeline are: American Oil Co., Cities Service Co., Continental Oil Co., Gulf Oil Corp., Phillips Petroleum Co., The Pure Oil Co., Sinclair Pipe Line Co., Socony Mobil Oil Co., Inc., and Tuxaco Inc.

The general route of the line will be along the Gulf Coast from Houston to Baton Rouge, La.; and then northeastward through Meridian, Miss.; Birmingham, Ala.; Atlanta, Ga.; Spartanburg, S. C.; Charlotte and Greensboro, N. C.; Danville and Richmond, Va.; Washington, D. C.; Baltimore, Md.; Wilmington, Del.; Philadelphia, Pa.; Linden, N. J.; and Staten Island, N. Y.

Construction will start this summer with completion scheduled for the fall of 1963.

Presently the headquarters of Colonial Pipeline are in Atlanta.

Cooper Tire & Rubber Co.—Sales Up 13%—

Net sales for 1961 reached an all-time high of \$40,990,181 as compared to sales for the year of 1960 of \$36,021,094, an increase of 13 3/4%. Despite the extremely competitive price conditions existing throughout the past year, and after absorbing the cost of moving the Industrial Rubber Products Division to its new location, net income for 1961 amounted to approximately \$1,139,769 or \$1.32 per share, which is second only to the year 1959 when earnings totaled \$1,341,116.—V. 191, p. 100.

Consolidated Natural Gas Co.—Annual Report—

Consolidated Natural Gas reports earnings for 1961 of \$25,817,000 or \$2.85 a share. In 1960 earnings were \$28,820,000 or \$3.19 a share including a profit of 1st a share on one sale of property. Sales of natural gas amounted to 572.6 million MCF in 1961, an increase of 2% over the prior year. Gas sales revenues were \$367,582,000, or 4% higher than 1960.

James Comerford, Chairman of the Board, states in the annual report that 1961 earnings were particularly disappointing. He says: "Our basic problem is that the rates collected on our gas sales in Ohio in 1960 and 1961 have proved to be wholly inadequate." Rates on sales in Cleveland and other northeastern Ohio cities served, which represent half of the company's total business, are normally fixed by negotiation with the cities. The company's subsidiary in Ohio has cancelled its contracts with the cities served as of Jan. 31, 1962, and has proposed increased rates for a new contract period. The proposal includes a purchased gas adjustment clause that will adjust rates in the future, either up or down, if and when the cost of pipe line gas goes up or down. An application for the proposed rate increase has also been filed with the Ohio Utilities Commission.

Other causes for the decrease in 1961 earnings were cited. Sales volumes to industrial customers did not recover as rapidly as expected after the business recession, and costs continued to increase in all categories. A rate increase for gas sales in Pennsylvania scheduled for Nov. 1, 1961, was deferred by the Public Utility Commission, with provision, however, for retroactive application of any increase finally approved.

Plant construction expenditures of \$63,600,000 (1961 was \$50,500,000) are planned for 1962 to serve the continuing growth in markets and to improve efficiency of operations. The 1962 program provides for a substantial increase in expenditures for gas exploration and development activities in the Appalachian area. The report notes that many of the country's major oil and gas producers have renewed their Appalachian exploration efforts in an attempt to find gas and oil at greater depths than present producing sands.—V. 195, p. 1095.

Dale System, Inc.—Common Offered—On March 6, 1962, Theodore Arrin & Co., Inc., and Norman, Wolf & Co., Inc., New York City, offered publicly, 100,000 shares of this firm's no par common stock at \$3.25 per share. Net proceeds, estimated at \$251,000, will be used by the company for the opening of additional regional offices.

BUSINESS—The company was incorporated in the State of Connecticut on May 27th, 1935, having succeeded to a partnership which had started business in 1933. Its head office is at 1790 Broadway, New York City.

Initially the company had only one office which was located in New Haven, Conn. In 1939 the company established an office in Worcester, Mass. (since transferred to Boston), and in 1940 it expanded by opening an office in New York City. The company now has branch offices in New Haven, Conn., Rochester, N. Y., Newark, N. J. and Boston, Mass. In connection with its activities, the company is licensed as an investigation agency in the States of New York, New Jersey, Connecticut and Massachusetts.

The company is engaged in a service business, the bulk of which is devoted to protecting its customers against theft from their own employees. The company's business is conducted through five divisions: the Shopping Service Division, the Shortage Control Division, the Business Research Division, the Theatre Division and the Polygraph Division.

Diamond Alkali Co.—Sales Higher, Net Down—

For the third consecutive year, company sales volume reached record levels in 1961. Raymond F. Evans, Chairman and President reported, Earnings, however, declined from 1960, a record year, because of "price weaknesses in most product lines" and "severe competition in the chemical industry."

Diamond's 1961 earnings were \$10,673,485, equivalent to \$3.16 a share on the 3,333,191 shares outstanding at year end after deducting the annual dividend requirement on preferred shares. In 1960, comparable earnings were \$4.02 a share.

(E. I.) duPont de Nemours & Co., Inc.—Ann. Report

Increased sales, which set a new high for the third successive year, accompanied by continued cost reduction efforts, partially offset by lower selling prices, enabled earnings from du Pont operations to move upward in 1961, said Crawford H. Greenewalt, President, in his annual report to the nearly 227,000 stockholders.

Sales of \$2,191 million were up 2% over 1960 and the increase was general throughout the company's product lines. Physical volume was 4% higher while the company's index of selling prices was off 1% for the year, or 11% lower than the peak in 1953, and at the level of the 1947-49 average.

"Profit margins of du Pont, as in industry generally," Mr. Greenewalt said, "continued to be adversely affected by the combined pressures of rising costs and the intensely competitive economy."

Total company earnings as previously announced were \$8.88 per share, of which \$5.72 was from du Pont sources and \$3.16 from du Pont's investment in General Motors Corp., compared with earnings of \$8.10 for 1960, of which \$5.57 was from du Pont and \$2.53 from General Motors.

Earnings from du Pont sources before taxes in 1961 were \$516 million, equivalent to \$11.22 a share of common stock, compared with \$496 million, equivalent to \$10.81 a share, in 1960. After taxes they were \$263 million compared with \$255 million in 1960. Dividends of \$7.50 a share of common stock, compared with \$6.75 paid in 1960, set a new high by surpassing the \$7 paid in both 1955 and 1959.—V. 195, p. 1096.

Electric Autolite Co.—Forms New Subsidiary—

The company has established a new subsidiary, the PrestoRay Infra-red Co., according to Robert H. Davies, President. "This subsidiary represents entrance of Electric Autolite into an entirely new field and is a continuation of the company's diversification program," Mr. Davies said.

PrestoRay Infra-red will be devoted to research and development of infra-red applications and volume production of infra-red gas burners and igniters.

Mr. Davies, who will be President of the subsidiary, has named Ernst R. Koppel as Vice President and General Manager. According to Mr. Koppel, Electric Autolite has purchased all rights to the manufacture and sale of the infra-red gas burners and igniters as developed over a number of years by Rie-Way Fabricating Co., including their adaptation in various fields. Currently Electric Autolite is completing the development and design of the burners and igniters and plans to enter production in the near future.

The gas in an infra-red burner does not burn in a flame; combustion occurs below the surface of a burner mat and heating is primarily by radiation from the high temperature surface of this mat. This radiation is a highly efficient source of heat and with the PrestoRay Infra-red Co., Electric Autolite enters a fast expanding new field of heating and process heat applications.—V. 195, p. 975.

Ford Motor Co.—Ford Foundation Plans New Stock Offering—

On March 7, the Ford Foundation announced that it has initiated preliminary discussions with the company and underwriters for a public offering of 2,250,000 shares of the Foundation's holdings of Ford Motor common stock. The offering, which would exceed \$220,000,000 at current market prices, is expected to be made in the latter part of April.

The Foundation's announcement indicates the proposed offering would precede a planned 2-for-1 split of Ford Motor stock. The split was recommended by Ford directors Jan. 10 and will be voted on by Ford stockholders at a special meeting to be held simultaneously with the annual meeting May 24. If approved, the split would become effective May 31, Ford said.

The proposed sale of 2,250,000 Ford shares would be the Foundation's fifth public offering of Ford stock since 1956. The Foundation acquired 46,348,620 shares of Ford Motor Co. stock through gifts and bequests by the late Henry Ford and his son the late Edsel Ford. Since January, 1956, when its first block of Ford stock was sold, the Foundation has disposed of 18,704,583 shares, of which 16,950,000 were sold through public offerings. The latest offering was made June 27, 1961, when buyers quickly subscribed for 2,750,000 shares offered by the Foundation at \$80.50 a share. That offering carried a total price of \$221,375,000 and, after underwriting discounts and other expenses, net proceeds to the Foundation totaled about \$213,547,000.

The first public offering of Ford Motor stock by the Foundation in January 1956 was of 10,200,000 shares at \$64.50 each, for gross proceeds of \$657,900,000. Subsequent offerings were of 2,000,000

shares at \$56.50 each in April 1959 for gross proceeds of \$113 million; another 2,000,000 shares in December 1959 at \$82 each for gross proceeds of \$164 million; and last June's offering of 2,750,000 shares. An April offering would come out of the 27,644,035 Ford Motor Co. shares presently held by the Foundation. Like previous Foundation offerings, its purpose would presumably be to let the Foundation further diversify its investments. As of Sept. 30, the Foundation reported holdings of over \$90 million in 94 U. S. companies other than Ford Motor and holdings of about \$30 million in securities of foreign governments and corporations.

The Foundation's proposed offering would represent about 4% of the total of 55,017,799 shares outstanding in Ford Motor Co. Dec. 31. The offering would not alter the amount of Ford common stock outstanding. The shares owned by the Foundation are known as Class A shares and are non-voting stock when owned by the Foundation, but become voting stock when owned by the public. In addition, Ford Motor has Class B stock, ownership of which is limited to members of the Ford family and certain closely allied trusts and corporations. In the company's corporate structure, 60% of the voting power rests with the common stock, on the basis of one vote a share; the other 40% rests with the Class B shareholders who have as many votes a share as are needed to make up the 40% and in effect retain working control of the company.

A brief announcement by the Ford Foundation said: "The Ford Foundation has begun preliminary discussions with the Ford Motor Co. and underwriters for the registration under the Securities and Exchange Act of 1933 and the subsequent public offering on behalf of the Foundation of 2,250,000 shares of common stock of Ford Motor Co., expected to take place in the latter part of April. There will be no further announcement until the registration statement is filed with the Securities and Exchange Commission."

The names of underwriters involved in the discussions were not disclosed.

The four previous public offerings of Ford Motor stock by the Foundation were underwritten by groups of securities firms managed in each case by Blyth & Co. Inc., First Boston Corp., Goldman Sachs & Co., Kuhn, Loeb & Co., Lehman Bros., Merrill Lynch, Pierce Fenner & Smith, and White, Weld & Co.—V. 195, p. 864.

Liggitt & Myers Tobacco Co.—Annual Report—

The company has reported that net sales for 1961 were \$516,708,042 compared to \$543,172,587 for the previous year, representing a decline of about 4.9%. The lower sales are largely accounted for by the continuing decline in Chesterfield Regular Size shipments. Sales of Chesterfield King Size and L & M King Size, two of the company's principal brands, continued to show an increase in the year.

Consolidated net earnings for the year 1961 were \$26,760,120 compared to \$28,708,895 for 1960. Based on 3,949,438 shares outstanding at the end of the year, net earnings amounted to \$6.47 per share as compared with \$6.96 in 1960. Of the loss in earnings, 31c per share occurred in the first quarter and the balance of 18c in the last three quarters. The percentage of net earnings after preferred dividends to net sales decreased from 5.05% in 1960 to 4.95% in 1961.

1961 was the 50th consecutive year in which common dividends have been paid by the company. Total payments for the year amounted to \$5.00 per share consisting of four quarterly dividends of \$1.25 each. The total amount of dividends paid in 1961 on both common and preferred stock was \$20,917,553. The balance of the year's earnings amounting to \$5,842,567 was retained for use in the business.

There was declared on Jan. 17, 1962 the usual quarterly dividend

of \$1.25 per share on common stock, payable on March 1, 1962 to stockholders of record Feb. 16, 1962.

The company's over-all financial position continued to grow stronger in 1961. For the third successive year there were no short-term borrowings at the year-end. The surplus cash available during the year was invested in negotiable time certificates of deposit because of high yields. Cash on hand at the end of the year, including negotiable time certificates of deposit, amounted to \$13,923,707 as compared to \$11,059,994 a year earlier.

Long-term debt was reduced by \$5,750,000 in 1961 as a result of retirement debentures through operation of the Sinking Funds. This reduction, together with the addition of \$6,018,332 to net worth, further improved the ratio of funded debt to net worth. The funded debt was only 24.3% of net worth at the end of 1961 as compared with 41.4% six years ago. An over-all reduction of \$42,250,000 in such debt from the high point of \$115,000,000 in 1953 has been accomplished.

Net working capital at the end of 1961 was \$334,920,365 compared with \$333,382,567 a year earlier.—V. 194, p. 1056.

Net earnings for the six months totaled \$7,446,000 after Federal and foreign income taxes of \$6,751,000, 67% more than last year's reported \$4,448,000.

Earnings per share for the first half, ended on Jan. 31, 1962, amounted to \$1.54 for the 4,814,582 shares of common stock outstanding. After adjustment for the 2 1/2% stock dividend paid in October 1961, this is an increase of 54% over the \$1.00 per share earnings reported for the comparable period last year.

At the close of the first half of the year, Litton's working capital amounted to \$92,071,000, as compared to \$59,540,000 a year ago. Total assets were \$233,452,000, up from \$139,542,000 at the same time last year.—V. 195, p. 866.

Roto Cylinders, Inc.—Common Offered—Pursuant to a

Feb. 21, 1962 offering circular, Woodcock, Moyer, Fricke & French Inc., Philadelphia, offered publicly, 60,000 shares of this firm's 10-cent par common stock at \$5 per share. Net proceeds will be used by the company for the repayment of debt, purchase of additional equipment, and working capital.

BUSINESS—The company is a New York corporation organized Dec. 1, 1959 to acquire the stock of Cylinders, Inc., a New Jersey corporation, then engaged in the gravure engraving business in Grenloch, N. J. On Oct. 31, 1960, the company acquired all of the assets of Cylinders, Inc. which was then dissolved. Since early 1960, the company has occupied a modern plant at 701 Public Road, Palmyra, N. J., which replaced the older Grenloch facilities.

Essentially, the company's business is custom gravure engraving. Designs sent in by various customers are prepared and photographed; the photographs are then exposed onto highly sensitized paper. From the paper they are then transferred and etched by skilled workmen onto copper cylinders so prepared that when the customer places them

in a rotary press, the designs are imprinted in any of a number of possible colors on whatever substance the customer is using.

The number of end products is enormously varied, ranging from small sheets of paper or plastic used for trading stamps or gift wrappers to larger cardboard items, such as laundry soap boxes and candy boxes to much larger sheet products of vinyl materials used in the furniture and automotive trades and various kinds of hard surfaced floor coverings. Depending upon the size of the sheet upon which the design is to be imprinted, the cylinder prepared by the company may range from one inch to 13 1/2 feet in face length.

Most of the company's customers are firms in the decorative paper and plastics trades, industrial specialties and packaging trades rather than the ultimate purchasers. However, in the hard surfaced floor covering business, an expanding branch of the company's activities, Roto Cylinders deals directly with the floor covering producers themselves.
