SEC Filings Consolidated

For the convenience of our readers, the Chronicle is publishing separately all security registrations, Regulation A filings, exchange offers etc., filed with the Securities and Exchange Commission during the preceding week. This new method was inaugurated with the issue of February 19.

A. L. S. Steel Corp.—Common Registered—

The company of 126-02 Northern Blvd., Corona, N. Y. filed a registration statement with the SEC on March 29 covering 100,000 shares of common stock, to be offered for public sale at $4.50 per share. The offering will be made on a best efforts all or none basis by Bernard L. Madoff, 40 Exchange Place, New York, who will receive a 45 cents per share commission and $15,000 for expenses. The statement also includes 6,000 outstanding shares sold to the underwriter by principal stockholders at 10 cents per share. The company has sold to the underwriter at 1 cent each 5-year options to purchase 10,000 shares at $4.50 per share. A $10,000 fee is payable by the company to Seymour Launer and Robert Kay for services in connection with this financing.

The company's principal business consists of the sale of processed flat rolled strip steel produced to customer's specifications and requirements. Of the $350,000 estimated net proceeds from the stock sale, $50,000 will be used to pay obligations on its machinery and equipment; $150,000 for the purchase of new machinery and equipment, including new slitting and recoiling and uncoiling equipment; and the remainder of approximately $150,000 as working capital for the carrying of accounts receivable and larger inventories. In addition to certain indebtedness, the company has outstanding 156,000 shares of common stock (after giving effect to a recent recapitalization whereby such shares were issued in exchange for the 60 shares then outstanding), of which Abe Eisenberg, President, Herman Loonin, Treasurer, and Gabriel Sobel, Secretary, own 32.1% each. Sale of new stock to the public at $4.50 per share will result in an increase in the book value of stock now outstanding from 92 cents to $1.93 per share and a corresponding dilution of $2.57 per share in the book equity of stock purchased by the public.

The company was organized in January 1958, under Ohio law and is engaged in the design and development for mass production of sterile disposable hypodermic ampoules for administering medication by subcutaneous injection into humans and animals. Although, in the company's opinion, it should be possible to commence commercial operations by Jan. 1, 1963, there is at present no assurance that the company will commence operations. The company plans to sub-contract the production of the component parts of the ampoules to one or more manufacturers. The actual assembly of the parts, the filling with specific dosages of medication, and the sealing, inspection and packaging of the finished ampoules will be performed by the pharmaceutical manufacturer whose medication is being used or by a custom packager acting on its behalf. The company expects to derive its income, if any, principally from the sale of component parts manufactured for the company to pharmaceutical houses or their custom packagers which may wish to assemble the ampoules, and from the sale or leasing to such houses or packagers of integrated equipment for the assembly of components into completed ampoules, which equipment the company may purchase or lease from the manufacturer thereof. Radio Corp. of America (RCA) has developed for the company and owns semi-automatic prototype integrated machinery for producing completed ampoules. However, the company can give no assurance that the development of fully automatic integrated machinery is possible or economically practical. The company's activities are in the development stage, and has sustained a net operating loss of $220,000 through Dec. 31, 1961. In addition to certain indebtedness, the company has outstanding 647,000 shares of common stock (after giving effect to a recent 4-for-1 stock split), of which management officials as a group own 8.76%. In a notification filed in November 1960, Atlas Copper proposed the public offering of 300,000 common shares at $1 per share. According to the Commission's order, the company failed to comply with requirements of the Regulation calling for the timely filing of a revised offering circular and of a report of stock sales pursuant to the exemption. The order provides an opportunity for hearing, upon request, on the question whether the suspension should be vacated or made permanent.—V. 193, p. 3.

Corporate and Municipal Financing Ahead

By SIDNEY BROWN

This week's slate of offerings almost promised some respite from the hectically heavy outpouring of new issues which transpired last week. One underwritten and three competitive corporate senior fixed interest rate debt offerings totaling $136 million dominate this week's calendar. Thirty state and local tax-exempts of millions of dollars or larger in size, but none of them spectacularly large, are scheduled today through Friday. They aggregate $88 million. Together, the corporate and municipal debt offerings add up to $224 million.

Two investment trust offerings, totaling $31,375,000 worth of common stock and beneficial interests, lead this week's larger equity offerings.

THIS WEEK'S CALENDAR SURPRISED BY U.S. $1 BILLION BOND CASH OFFER

The Treasury suddenly decided to take advantage of the week's relative lull between last weeks' and the next two week's heavy financing schedule, and the strength of the bond market. It will offer $1 billion of 3¾% 6½-year bonds today (April 9) to raise additional cash. Borrowing originally intended for the heavy refunding and expected attrition next May and June has been moved up and, attesting to the unusually strong demand for investments, the news was treated bullishly. Bond prices stayed up—after a brief moment's hesitation.

March ended with historic records achieved in both registration statements filed with the SEC and a mountainous backlog of pending issues awaiting clearance. In view of the astronomical numbers, one would not imagine that it was last spring and not this one which was characterized by the spectacularly alarming flurry in "hot issues." Mr. Keith Funston, for example, warningly spoke out on April 4, 1961, about the danger of investing without investigation and on what might well occur as a result of buying stocks on tips. The Dow-Jones 30 industrials were 678.73 on that date and the National Quotation Bureau index of over-the-counter stocks was 128.11. The D-J a year later was 696.88 (April 4, 1962) and was 5.17% below last year's final level. It has been trending downward since the middle of last month quite persistently. The latest NQB figure for March 30, 1962, is 141.33. So the averages are still higher, but the psychology of the market-place in stocks has reversed itself—much to the advantage of bonds. In the month of March, bonds traded on the New York Stock Exchange hit 467 highs and 131 lows. Government bonds have been uniformally yielding less than 4% in the past two weeks and before then as many as 16 were yielding 4% and higher.

NO CAPITAL SPENDING BOOM SEEN IN FRENETIC SEC REGISTRATION PACE

An examination of the historic high records being made in the number and dollar volume of SEC registrations tends to confirm no preferential trend toward either equity or capital debt offerings. The calendar of statements filed are numerous in smaller issues (Reg. A's are excluded from this discussion) and contains, also, a goodly number of larger offerings and secondaries. Last spring, the larger quantity of smaller issues now being registered would have fueled the flames of the "hot issue" furor higher. Now, the SEC numerous studies on the way, disappointment in the economy's performance, and the swelling of funds anxiously available for investment tend to take the new issue registration volume in stride. The statement figures compiled by the SEC show:

	End of March, 1962	*End of March, 1961*
Monthly registrations	327	269
Nine months ending March	1,877	1,237
Pending	922	474

The backlog of issues still awaiting SEC clearance is almost double the number for this time last year. Nevertheless, the SEC is making good its promise to weed out unacceptable issues instead of retaining them in abeyance awaiting more accurate disclosure, and to give summary dispatch to well known registrations.

An examination of the mounting dollar volume represented in the record registrations filed with the SEC discloses that refinancings, investment companies, secondaries and the Philips N.V. take up a large amount of the data. What this means is simply that with the exception of some utilities most of the filings do not represent new capital accretion to the company. And as for the Philips' issue, this may prove to be a drain on our gold reserves rather than anything else. Feeding this flurry of financing activity which does not add to the capital spending backbone of the economy is the generous activities of the Federal Reserve. The Fed, also, has been instrumental in facilitating an orderly market for the Treasury's financing.

TENNESSEE GAS TRANSMISSION AND PACIFIC POWER & LIGHT WEEK'S LARGEST OFFERINGS

Today, April 9, the Treasury will step into both the capital and the money markets. In the latter, for the tenth week in a row it will raise $100 million cash in bills by auctioning $1.8 billion bills or thereabout for cash and exchange of $1,700,990,000 coming due. The next day, the Treasury will exchange $2 billion 365-day bills for a like amount maturing April 15.

Also, today the Treasury will raise $1 billion new cash in the form of 3¾% bonds. Tentatively set for Tuesday, April 10, are: $75 million TENNESSEE GAS TRANSMISSION CO. debentures *via* Stone & Webster Securities Corp., White, Weld & Co., and Halsey, Stuart & Co.; and competitive bids for $20 million NORTHERN INDIANA PUBLIC SERVICE CO. bonds, and for $5 million BIRMINGHAM WATER WORKS BOARD, ALA.

Wednesday, April 11, is the day scheduled for the $35 million PACIFIC POWER & LIGHT CO. first mortgage bonds for competitive bidding; DAYTON, OHIO will similarly seek $8 million; ALTON, ILL., $6,465,000; HARTFORD, CONN. $6,516,000; and VENTURA PORT DISTRICT, CALIF. $4,750,000.

Thursday, April 12, MISSISSIPPI POWER CO. will sell to the highest bidder $6 million first mortgage bonds. So, too, will the STATE OF KENTUCKY in the amount of $9.9 million.

During this week these corporates may appear: $25 million JAPAN FUND *via* Bache & Co., Paine, Webber, Jackson & Curtis, and Nikko Securities Co., Ltd. filed Oct. 19, 1961; $6,375,000 MUNICIPAL INVESTMENT TRUST FUND, PA. SERIES interests *via* Ira Haupt & Co. filed April 28, 1961; 200,000 shares of PRODUCERS COTTON OIL CO. common *via* Kidder, Peabody & Co.; and 17,000 units of INTERNATIONAL AIRPORT HOTEL SYSTEMS, INC., via Bache & Co. and Robinson-Humphrey Co.

NUDGING WITH A VENGEANCE MAY HAVE DAMPENED THE FIRE

The Federal Reserve may unwittingly be in the position of using its open market operations to an excessive extent similiar to throwing too much coal on the fire and, as a result, smothering it. Business on the whole is in a fairly comfortable position. Moreover, business is being so assiduously courted and looked after that it feels loath to move—as can and has been the case when it was not certain that funds for replacement and expansion needs would be forthcoming on remunerative terms the next day. Today, the Administration is trying to use the tax-cut technique to subsidize business; month after month, the Federal Reserve has not stinted on creating excess member bank reserve credit, institutional savings-flow has been so great that investors are hungry for investment opportunities; and corporate cash flow provides business the equivalent experience of a South Seas island vacation to an individual—satisfaction. This condition, of course, is predicated on the assumption that business will continue to improve slowly. However, in terms of the problems of chronic unemployment, budgetary balance, real economic growth and international competition, this comfortable state of euphoria is lasting too long and may lead to tragic results.

Pushing a string with cheap money is not the reliable medicine. We have had a year and one month of recovery since the recession's turning point. Should the Federal Reserve continue the policy producing the following debt monetization results? The table compares the latest week's holding of governments to three specified periods.

Fed's Holdings of U.S. Governments—	*4/4/62*	*Change Week Ago*	*Change Year Ago*	*Change Feb. 1961*
	(Millions of $'s)			
Bills	$3,211	$480	$588	$615
Certificates	4,972	----	—426	—485
Notes	16,933	46	550	377
Bonds	4,091	53	1,371	1,533
Total Bought Outright	$29,207	$480	$2,083	$2,540

In the recovery-expansion period from the end of February, 1961 through April 4, 1962, we increased the Fed's holdings of governments by $2.5 billion and in that time our gold certificate reserve declined by $742 million.

ISSUES SWELLING THE BACKLOG

Boosting the backlog of corporates with and without dates are: PHILIPS N. V. stockholder rights to common. The offering is not underwritten but will be managed in the United States by Smith, Barney & Co.-led investment group; and 606,450 shares of WIEGAND (EDWIN L.) Co. common *via* Eastman Dillon, Union Securities & Co.; Moore, Leonard & Lynch, Pittsburgh; and Reinholdt & Gardner. These and other newly listed forthcoming offerings are described in the surrounding pages.

Union Electric Co.—Granted Exemption—

On April 3, the SEC issued a decision and order exempting this St. Louis firm from the Holding Company Act. The Commission ruled that Union was "predominantly a public-utility company" and as such qualifies for exemption from the Act.

Union is both a holding and operating company. It engages in the generation, distribution and sale of electricity in Missouri, Illinois and Iowa, sells natural gas in one locality in Illinois and furnishes steam heating service in a section of St. Louis. Its subsidiaries are Missouri Power & Light Co. and Missouri Edison Co., Missouri corporations primarily engages in electric and gas utility operations. Union also owns 40 cents of the capital stock of Electric Energy, Inc., which produces electric energy in Illinois primarily for an installation of the Atomic Energy Commission near Paducah, Ky. The balance of the stock of EEI is owned by three of the utility companies and the four stockholder companies purchase the energy produced by EEI in excess of the AEC contractual requirement.

Since the operations of Union are confined to the state of its organization (Missouri) and contiguous states, a determination whether Union qualifies for an exemption from the Holding Company Act rests on the question whether it is "predominantly a public-utility company." Aside from its interest in EEI, the Commission states, Union would clearly satisfy that test. EFI is obligated to supply to the Paducah installation 735,000 kw of firm power until July 1978, representing about 75% of the rated capacity of EEI's generating station. The balance of EEI's electric power is available to the stockholder companies in proportion to their respective stock investments in EEI, and they are obligated to purchase such power. The Commission stated that EEI does not itself sell electricity to private consumers of the type the Act is designed to protect and does not have any securities outstanding in the hands of public investors. As far as the interests of Union's own consumers and security holders are concerned, the impact of EEI's operations stems primarily from such of its activities as are not attributable to supplying energy to the AEC. In view of these and other considerations, the Commission stated, "In evaluating whether Union's own utility operations predominate . . . EEI's activities attributable to meeting its share of AEC's requirements . . . should not affect Union's ability to qualify for an exemption . . . Accordingly in comparing Union and its subsidiaries we have included as part of the utility operations and assets of the subsidiaries only such portion of EEi's activity as pertains to its non-AEC production."—V. 195, p. 1473.

Admiral Corp.—Sales, Earnings Up—

The corporation has reported consolidated net sales of $192,119,625 in 1961 and profits after taxes of $2,915,255 or $1.21 per share on 2,415,636 shares outstanding. In 1960 the television-appliance manufacturer's sales volume was $187,865,196 and a loss of $1,743,371 was incurred.

Ross D. Siragusa, President, reported in the annual report to shareowners that there were three reasons for the sharp improvement in earnings: completion of Admiral's centralization of all consumer electronics production at Harvard, Ill., continued emphasis on achieving more efficient operations, and a trend to increased sales of merchandise at the upper end of the television, stereo and appliance lines.

Mr. Siragusa said that the wide angle 19- and 23-inch TV sizes pioneered by Admiral now represent 85% of the industry's TV sales. Color TV volume continued to increase, and is at the highest level since the company's first color sets were introduced eight years ago. The outlook is for substantially higher color sales this year.

Despite virtually 100% market saturation of radios, the industry sold more than 16 million home radios in 1961, including five million foreign-made tranistor portables which accounted for one-half of the country's portable sales.—V. 195, p. 517.

Advance Ross Electronics Corp.—Net Up 49%—

This Chicago firm has a substantial increase in sales and pre-tax earnings for 1961, due to the addition of several important new customers and significant improvement in the television industry.

Pre-tax earnings advanced to $562,562, a gain of 49% over the 1960 pre-tax result of $377,279.

Net income after full taxes in 1961 amounted to $267,562, or 41 cents per share. Because of a tax-loss carryover, only $7,500 in Federal income taxes were paid in 1960, and net income was $369,779. Had normal income taxes been paid in 1960, per share earnings would have been 28 cents.—V. 192, p. 1489.

President Charles H. Yalem reported to shareholders earnings of $528,656 for the first fiscal quarter ended Dec. 31, 1961.

Aetna loan receivables were increased $6,500,000 in the quarter, to a record high of $74,700,000. Mr. Yalem added: "Our collection costs have risen and as a result, our increase in earnings has not kept pace with our increased volume. We expect that the continued pickup in business conditions will result in improved collections, which should be reflected in higher earnings."

Mr. Yolem's report accompanied payment of regular quarterly dividend of 10 cents per share to Aetna's 1,600 shareholders. At the end of the quarter, Aetna had 163 operating offices in 143 cities in 27 states.—V. 195, p. 1.

In his letter to the stockholders, Mr. Hill explained that the decline in earnings was due primarily to price deterioration and the constantly increasing level of wages and salaries.

C. R. Smith, President, told shareholders that American's earnings continue to do better than the industry average, but are insufficient for a fair return on investment. The domestic trunklines had earnings of $60 million in 1959, about broke even in 1960 and in 1961 lost about $25 million, he said.

Mr. Smith cited the fact that to earn the 10½% return on investment which the Civil Aeronautics Board has established as reasonable, the industry would require an improvement of more than $300 million annually in earnings before taxes.—V. 195, p. 633.

This Burbank, Calif. corporation, reported to stockholders that its 1961 net earnings were $26,096,000 of $3.46 a share on sales of $1,444,510,000. Unfilled orders rose to $1,638,785,000 at year-end.

In the same five-year period, Lockheed's traditional aircraft business maintained a high volume. Military aircraft and related sales in 1961 were $558,551,000, almost as much as the $592,215,000 in 1957. Commercial aircraft sales dropped, however, to $91,342,000 from $203,202,000 in 1957, which was Lockheed's peak year in the sale of airliners.—V. 194, p. 636.

Mid-Georgia Natural Gas Co. — Preferred Sold Privately—On March 28, 1962, it was reported that 2,500 shares of this firm's $100 par cumulative preferred stock had been sold privately through Robert Fulton Maine Co., New York City.

Miller Bros. Hat Co., Inc.—Common Offered—On April 4, 1962, Eppler, Guerin & Turner, Inc., Dallas, and associates offered publicly 126,000 shares of this firm's $1 par common stock at $12.25 per share. Of the total, 100,000 shares were sold for the company and 26,000 for certain stockholders.

Net proceeds to the company, estimated at $1,055,780, will be used to purchase the office building it is now occupying in Dallas, equip and train personnel for a new fur felt body plant at Corsicana, Tex., and for additional working capital.

BUSINESS—The company of 2700 Canton St., Dallas, was incorporated under the laws of the State of New York in 1911 and adopted its present name in 1917. Its business activities consist primarily of the manufacture and sale of men's and boys' hats.

Miller Bros. has four wholly-owned subsidiaries—Adam Hats, Inc., Adam Hat Stores, Inc., Miller Bros. Hat Sales Corp. and Texas-Miller Hat Corp. The last named subsidiary wholly owns Texas Miller Products, Inc.

The basic raw material for the manufacture of a fur felt hat is called a "body". Bodies for these hats, manufactured by others to the company's rigid specifications, are purchased under purchase orders which normally provide for production and delivery over six to ten months next following. These bodies are delivered to the company's Corsicana, Texas, plant where the company, in a process involving some forty-five operations, manufactures fully styled and finished hats. The company plans to establish its own fur felt body plant which, after it has been in operation for approximately two years, should supply over half of the company's fur felt body requirements.

The basic raw materials for straw hats come to the company in two forms—straw bodies and skeins of braids. These bodies and skeins are obtained from others under purchase orders normally requiring delivery within one to four months. With the exception of a part of the dying and bleaching which is subcontracted, the bodies and braids are completely processed into hats at the Corsicana plant of the company or at the plant of a manufacturing subcontractor who handles approximately twenty-five% of the company's straw hat production.

The fabric hats for casual, sports and rain wear and Armed Forces hats (principally enlisted men's or "sailor" hats for the U. S. Navy) sold by the company are made in its Corsicana plant.

The wool felt hats sold by the company are manufactured by another concern to the company's specifications as to quality, style and color. Western style hats for men, women and children, including "Roy Rogers hats for children, constitute approximately one-half of the wool felt hats sold by the company.

Motor Wheel Corp.—Annual Report—

This Lansing, Mich. corporation, for the year ended Dec. 31, 1961 reported a net operating loss of $96,524, or 11 cents a share as against 1960 earnings of $86,880, or 10 cents a share.

Non-recurring charges consisting of moving and rearrangement expenses amounting to $1,026,120, and provision for loss on disposal of unused facilities of $760,000, increased the deficit to $957,644, or $1.13 a share after applicable reduction in Federal income taxes, M. F. Cotes, President, told stockholders.

Sales in 1961 were $47,958,923, against $55,949,584 in 1960.

Mr. Cotes said that industrial sales were off approximately 19% due largely to lower automotive production in the first three quarters of 1961. He noted, however, that Motor Wheel has added several new important accounts in the heavy duty truck and trailer industries and is developing increased sales volume in the replacement market for passenger car, truck and trailer hub and drum assemblies.

Consumer sales volume increased 16% over 1960, he said, and yielded a profit. Mr. Cotes reported to stockholders that 1961 marked the completion of Motor Wheel's long range program of relocating and modernizing production facilities to lower production costs, improve profitability and provide customers with better service.

"This six-year program cost approximaely $14,000,000," he said, "or about double the amount spent in the prior six year period for additions and improvements to property, plant and equipment."—v. 191, p. 1987.

Morse Shoe, Inc.—Common Offered—On April 5, 1962 an underwriting syndicate headed by Blyth & Co., Inc., and Lehman Brothers, New York City, announced the secondary offering of 630,000 shares of this firm's common stock at $20 per share. This marked the initial public sale of the stock.

The stock was sold for the accounts of certain selling stockholders, and none of the proceeds will accrue to the company. After the offering the selling stockholders will retain 1,066,080 shares, or 58.8% of the outstanding shares.

BUSINESS—Headquartered in Boston, Mass., the company and its subsidiaries retail popular-price footwear for men, women and children. The company operates 151 leased shoe departments in self-serivce department stores and 31 conventional retail shoe stores on leased premises, located in 28 states and two Canadian provinces. Some of the company's outlets also carry hosiery and handbags. The company does no manufacturing of any kind, purchasing all of its merchandise from suppliers.

UNDERWRITERS—The several underwriters named below, have entered into an underwriting agreement with the company and the selling stockholders pursuant to which they have agreed severally to purchase from the selling stockholders the respective numbers of shares of common stock of the company set opposite their names below. Such purchases are subject to the terms and conditions of the underwriting agreement. The nature of the underwriting commitment is such that the underwriters are obligated to purchase all of the shares if any are purchased.

Movielab Film Laboratories, Inc.—Sales Up 15%—

Preliminary figures covering sales and earnings of Movielab Film Laboratories, for the year ended Dec. 30, 1961, indicate a 15% gain in sales of $5,810,000 and a 28% increase in net income, after taxes, to $279,500, as compared to 1960, when sales were $5,047,000 and net income was $218,000.—V. 194, p. 2336.

Murphy Corp.—Net, Revenues Set Records—

Net income, gross revenues and cash generated in 1961 all set records for the corporation, the annual report revealed.

C. H. Murphy, Jr., President, stated that the year 1961 was "A year of important progress for Murphy Corporation." He said that the merger of Ingram Oil & Refining Company into Murphy on Sept. 12, 1961 was "one of the most important events of the year, indeed of recent years."

Total revenues for the year increased to $106,876,003 from $93,836,434 in 1960. Costs and other deductions were $101,827,528, compared with $89,292,657. The report states that a substantial portion of the increase in sales resulted from the addition of Ingram Oil & Refining and higher costs were primarily caused by the growing volume of trade.

Consolidated net income for 1961 amounted to $5,048,745, equal, after preferred dividends, to $1.43 per share on 3,472,657 common shares outstanding during the year. For 1960 net income was $4,453,777, or $1.37 per share on 3,305,773 common shares then outstanding. Results for 1961 include those of the properties of Ingram Oil & Refining from Sept. 12, the date of the merger. Figures stated for 1960 do not include a nonrecurring credit from the sale of properties in the amount of $1,377,420.—V. 195, p. 979.

New York Central RR.—Proposed Merger—

Alfred E. Perlman, President of the New York Central urged the railroad's shareowners to approve the proposed merger of the Central with the Pennsylvania Railroad. The railroad's proxy statements were mailed to shareowners March 26.

Stressing that Chesapeake & Ohio and Norfolk & Western are developing strong competing systems of their own, Mr. Perlman noted, "we believe the public interest demands that Central and Pennsylvania merge their properties so as to be able to compete effectively against the other two."

The Pennsylvania recommended approval of the merger in proxy statements sent to its shareowners last week. Both companies will hold separate annual meetings on May 8.

"The merger," Mr. Perlman said, "will permit improvement of service at lower unit cost so that we can also compete more effectively against private carriage and subsidized forms of transportation." He added the stability gained and the potential growth available should benefit Central's shareowners, customers, employees and the communities the railroad serves.

The proxy statement points out that railroads must avail themselves of every opportunity to reduce costs, improve and modernize rail services, and other wise increase their ability to compete with other modes of transportation. Greater opportunities for achieving these goals can be made possible by joint action to unify and coordinate the rail services of both companies.

The lines of Ceneral and Pennsylvania are well suited for integrated and unified operation since they complement and, to a great extent, duplicate each other, the statement noted. The operating efficiences and economies resulting from merger would enhance the traffic potential and strengthen the financial position of the combined companies.

The proxy material included a letter signed jointly by The First Boston Corp., Glore, Forgan & Co., and Morgan Stanley & Co., the three investment banking firms retained to advise the railroads in connection with the determination of fair ratios of exchange for the capital stocks of the two companies. The three firms, exercising independent judgment, unanimously recommended the ratio of 1.3 shares of capital stock of the merged company for each present share of the Central stock and one share of capital stock of the merged company for each present share of Pennsylvania stock. The directors of both companies determined that these ratios are fair and equitable.

The law requires that holders of at least two-third of Central and Pennsylvania stock vote their acceptance of the merger agreement, approved by the directors of both railroads on Jan. 12. A joint application for approval and authorization of the merger was filed by both companies with Interstate Commerce Commission on March 9.—V. 195, p. 910.

Plymouth Oil Acquisition Completed—

On April 3 the company completed the purchase, for a cash payment of $57,572,081, of most of the assets of Plymouth Oil Co., subject to a reserved production payment. In addition, Ohio Oil is assuming $9,475,119 of Plymouth's liabilities, principally trade accounts payable and accrued taxes, as well as certain contingent liabilities relating to the acquired properties.

The purchase includes Plymouth's crude oil and natural gas producing properties in the U. S. and Canada, its refinery at Texas City, Texas, and transportation, distribution and marketing facilities, J. C. Donnell II, Ohio Oil President, said. Ohio Oil is also acquiring Plymouth's inventories and accounts receivable.

Plymouth's production in 1961 totaled 3.9 million barrels of crude oil and natural gas liquids and 26.5 billion cubic feet of natural gas. Its net reserves on January 1, 1962 in the United States and Canada were estimated by Ohio Oil to be approximately 44.1 million barrels of crude oil and natural gas liquids and 352 billion cubic feet of natural gas, using recovery methods presently in operation. Some of the properties offer possibilities of secondary recovery programs which, if successful, may add secondary recovery reserves approaching 25 million barrels of crude oil, Mr. Donnell, said.

The producing properties in the U. S. are subject to a reserved production payment in a primary sum of $48 million which is payable out of 73.5% of production from properties. On the basis of 1961 price levels and production rates, Ohio Oil estimates that the production payment will require 16.7 million barrels of crude oil and natural gas liquids and 110 billion cubic feet of natural gas. The production payment is expected to be discharged in eight years.

Plymouth's oil and gas production is primarily in Texas, with other producing properties located in ten other states and in Canada. —V. 195, p. 1205.

Among the many commodities which Drexel will handle are the following: Potato Chips, Pretzels, Miscellaneous Snack Items, Salted & Shelled Varietics of Nuts, and Private Label Cookies.—V. 194, p. 321.

Pennsauken Montgomeryville Co.—Securities Offered—Pursuant to an Oct. 18, 1961 prospectus, investors Funding Corp. of New York, 630 Fifth Ave., New York City, offered publicly, 645,000 of assignments of the interest of the limited partner in this company, a limited partnership. Each unit, priced at $5,000, consists of a 1/130th fractional interest in the capital of Pennsauken Montgomeryville Co., the principal asset and source of income of the partnership will be a 10% second mortgage of Pennsylvania Invesco Corp., maturing on Nov. 1, 1970.

BUSINESS—The company is a limited partnership organized under the laws of the State of New York. The Certificate of Limited Partnership was filed in the New York County Clerk's office on July 7, 1961, by Jerome Dansker and Norman Dansker as General Partners (the "General Partners"), and Dr. Rahpael M. Dansker as Limited Partner (the "Limited Partner").

The Partnership proposes to loan $650,000 to Pennsylvania Invesco Corp. ("Pa. Invesco") on a note of Pa. Invesco in the principal amount of $650,000 bearing interest on unpaid principal at the rate of 10% per annum. The loan is to be secured by a second mortgage on the land (but not the buildings) of the Pennsauken and the Montgomeryville Merchandise Marts, two "farmers market" type shopping centers located near Philadelphia, Pa. The note and mortgage will be payable on Nov. 1, 1970, and may be prepaid in whole or in part at any time without penalty. On July 7, 1961, the Partnership entered into a loan agreement with Pa. Invesco pursuant to which the Partnership agreed to make the loan on the aforesaid terms and conditions. The note and mortgage of Pa. Invesco will be the Partnership's principal assets and source of income. The assignees of the Limited Partner may be regarded as actually purchasing a pro rata share of said note and mortgage. The maximum annual return of income which assignees of the Limited Partner may receive will be $100 for each $1,000 of investment. Thus, there is little likelihood of an increase in the value of the units being offered and the value of such units will be subject to the risks which are inherent in a second mortgage. As all of the income of the Partnership will be received as interest on the second mortgage, all amounts distributed to the partners and the assignees of the Limited Partner will be taxed as ordinary income.

The properties to be mortgaged (the "Properties") are the principal assets of Pa. Invesco and were acquired on Nov. 1, 1960 for a cash consideration of $750,000. The Properties are subject to a 12% first mortgage held by Sixty Trust, Providence, R. I., the principal balance of which was $1,866,659 on July 1, 1961 and which is due on Nov. 1, 1970. The Properties have been leased by Pa. Invesco until Oct. 31, 1981 (the "Prime Lease"), with certain options for renewal, to an affiliate, Pennsauken Montgomeryville Corp., for a net rental of $120,000 per year. This rental, if received, will be more than sufficient to pay the annual interest expense of $65,000 on the second mortgage to be acquired and held by the Partnership; and Pa. Invesco will receive approximately $55,000 per year on its net cash investment of approximately $100,000 which income, after taxes, will be paid to the stockholder of Pa. Invesco (Investors Funding Corp. of New York, referred to herein as "I.F.C."). Pennsauken Montgomeryville Corp. has subleased the premises until Oct. 31, 1981 (the "Operating Lease"), with certain options for renewal (which sublease terms is identical to the Prime Lease term) to P & H Holding Co. and T & P Holding Co. (the "Operating Lessee") for a net rental of $120,000 per year until Oct. 31, 1970 and $250,000 per year thereafter. If this increased net rental subsequent to Oct. 31, 1970 is paid, Pennsauken Montgomeryville Corp. will realize approximately $130,000 per year upon no capital investment. The Prime Lease and the Operating Lease contain substantially similar provisions (except for the increased rental provided for the Operating Lease subsequent to Nov. 1, 1970) and provide for monthly escrow deposits of taxes, insurance premiums and payments on the first mortgage which covers both the Properties and the buildings located thereon, which buildings are owned by the Operating Lessee. The rental paid by the Prime Lessee and the Operating Lessee is a net rental after payment of all charges against the Property, including real estate taxes and amortization and interest of the first mortgage.

Radio Corp. of America—To Sell Majority of Whirlpool Share Holdings—

A registration statement covering the proposed sale to the public, through underwriters, of 1,000,000 shares of common stock in the Whirlpool Corp. by RCA is being prepared for filing with the SEC in Washington, D. C., it was announced by the company.

RCA plans to retain 158,563 shares of Whirlpool common, the current market value of which is more than $5,000,000.

"The sale of these shares," said Dr. Elmer W. Engstrom, President, "stems from the growing needs of RCA's expanding business. The accelerating growth in color television, electronic data processing, space and other promising areas is increasing our financial requirements. The proceeds from the sale of Whirlpool stock will provide additional funds to help meet these growth requirements."

The relationship that has existed between RCA and Whirlpool since 1955, including the use of the RCA Whirlpool brandname on Whirlpool products, will continue without interruption, according to Dr. Engstrom.

RCA's primary objective in establishing a business relationship with Whirlpool in 1955 was to make available to the public a complete line of major home appliances ("white goods") bearing the RCA Whirlpool brandname. This objective has been achieved, Dr. Engstrom said, and RCA regards its relationship with Whirlpool as being eminently satisfactory.

"The Whirlpool organization is pleased that RCA retains a substantial stock interest in our corporation," Elisha Gray, Whirlpool President, said. "RCA will continue to be represented on our board of directors, and we look forward to continuing our mutually constructive relationship."

In addition to continuation of the use of the RCA Whirlpool brandname on Whirlpool products, it was pointed out that service on RCA Whirlpool appliances by the RCA Service Co. will continue to be available at established locations throughout the country. Also financing for RCA Whirlpool appliances and RCA products, as well as competitive products, will continue to be available through the Appliance Buyers Credit Corp., a Whirlpool subsidiary.

RCA acquired a stock interest in Whirlpool on Sept. 15, 1955 through the transfer of net assets of $21,600,000. In exchange it received 1,158,563 shares of Whirlpool common stock. The total outstanding common stock of Whirlpool is approximately 6,260,000 shares.— V. 194, p. 428.

Studebaker-Packard Corp.—Proposed Name Change—

The company has announced that it will ask stockholders at the annual meeting on April 26 to approve a change of name to Studebaker Corporation.

"The present corporate name has become anachronistic as a result of the termination of Packard car production and is a hindrance to the development of a new and more vital corporate image," the statement said.

The corporation's name was assumed in 1954 upon the acquisition of the business of Packard Motor Car Co. Production of the Packard auto was discontinued in 1958.

If the name change is approved, the unit that manufactures passenger cars and trucks in South Bend would be called the Studebaker division of Studebaker Corp.

The proxy statement indicated that the present 10 members of the board are all nominees for re-election.—V. 195, p. 1598.

Mr. C. R. Dietrick has been elected President of Suburban Natural Gas processing Co. in Frio County, Texas, a new subsidiary of the Suburban Propane Gas Corp. Sunray Mid-Continent Oil Co.—Plans Debenture Sale

On April 4, 1962 the company announced its plans to sell $75 million of sinking fund debentures to finance redemption of its 5½% second preferred stock, series of 1955, and to repay a $10,750,000 term bank loan. The date and method of the proposed offering have not been determined, the company said.

The Directors also are considering the redemption of the company's 4½% cumulative preferred stock, Series A, at $25.25 a share although no formal action on this move has been taken. The $75 million debentures would include sufficient funds to redeem this issue. But if Sunray decides not to call the 4½% preferred, the debenture offering would be reduced to about $50,750,000, a Sunray official said.

The remaining 844,856 outstanding shares of the cumulative convertible 5½% preferred will be redeemed on May 8 for $30 a share, plus 30.7 cents a share in dividends accrued to the redemption date. Earlier this month Sunray called 100,000 shares of the issue for redemption.

Record date for the notice of redemption was fixed as April 6 and notices will be mailed to stockholders the following day, the company said.

Holders of the preferred stock have the option of converting their shares into Sunray common at any time before May 8, or being paid cash for their shares. Each preferred share is convertible into 1.0425 common shares until one-third of the total shares originally issued have been converted, redeemed or retired, a spokesman said. For the second third of the issue, the conversion rate is 0.9625 common share for each preferred, and the final portion is convertible at the rate of 0.8925 common share for each preferred share.

"It's too early to estimate whether most stockholders will convert their shares or redeem them for cash, but the cash is available and there is sufficient authorized common stock," a spokesman said.—V. 195, p. 1143.

The new acquisition, together with another wholly-owned subsidiary, the Mnemotron Corp., of Pearl River, N.
