CONCORDANCE OF STATISTICS  
AVAILABLE IN  
SELECTED FEDERAL RESERVE PUBLICATIONS

Unless otherwise noted, the tables referred to in the Federal Reserve Bulletin are published each month, and they contain the latest annual, quarterly, monthly, or weekly data available as of the date of publication. Changes in the form or content of tables during 1977 have been noted. At the end of the Bulletin column there is a listing of tables that had appeared in earlier Bulletins but that were eliminated beginning 1977.

Because the frequency of the data shown may vary among the three publications listed, the frequencies for each table are shown in parentheses, as are any other pertinent differences of which users should be aware.

Generally speaking, titles of tables in the Annual Statistical Digests do not indicate the period covered, and no attempt has been made to include such information unless the period is longer or shorter than the usual 5-year span covered by the particular Digest.

Table numbers are not necessarily consecutive.

Footnotes appear at the end of the Concordance.
