By reference to the foregoing summary it will be noted that national banks have made five reports during the period beginning November 10, 1904, and ending August 25, 1905, and that there has been an increase in banks in that time from 5,477 to 5,757. Loans and discounts representing over 50 per cent of the banks' aggregate resources steadily increased from \$3,772,638,941.58 on November 10, 1904, to \$3,998,509,152.62 on August 25, 1905. The increase in bonds on deposit as security for circulation was from \$425,759,090 to \$477,592,690, the increase being approximately \$52,000,000. The banks' total investments in Government bonds—that is, as security for circulation and public deposits and amount held—represented approximately 7.5 per cent of their resources. The amount invested in securities of this character on November 10, 1904, was \$548,600,000 and on August 25, 1905, \$551,300,000, the net increase being only \$2,700,000 by reason of the large withdrawals during the year of Government

deposits and the coincident release of a like amount of securities. At date of the first report in question the holdings of specie and legal-tender notes aggregated \$642,100,000. These holdings increased on January 11 to \$669,900,000, fell to \$641,100,000 on March 14, increased to \$649,200,000 on May 29, and on August 25 last reached \$665,500,000. The percentage of specie and legal-tender notes to the total resources was 8.9 on the last-named date, as against 7.2 on September 6 and 8.9 on November 10, 1904. The three items of loans, United States bonds, and lawful money represented 70.2 per cent of the aggregate resources, \$7,472,350,878.64, on August 25.

The paid-in capital stock on August 25, 1905, was approximately \$800,000,000, the exact amount being \$799,870,229, and the earnings—surplus and other undivided profits—were \$620,200,000. On November 10, 1904, the capital paid in was slightly in excess of \$776,000,000 and the surplus and other undivided profits, \$595,300,000. On September 6, 1904, the stockholders' interest, represented by capital, surplus, and profits, was 20.8 per cent, and on August 25, 1905, 19 per cent of the total liabilities. The reported outstanding circulating notes on November 10, 1904, were \$419,120,020 and on August 25, 1905, \$468,979,788, an increase of nearly \$50,000,000.

Of the liabilities on August 25, 1905, 51.1 per cent represented individual deposits, which latter amounted to \$3,820,681,713.23, an increase since November 10, 1904, of \$112,900,000. The Government deposits, including deposits of United States disbursing officers, decreased from \$110,300,000 on November 10, 1904, to \$62,000,000 on August 25, 1905.

The composition of the specie held by the banks on November 10, 1904, was as follows: Gold, \$395,000,000; silver, \$89,000,000. On January 11, 1905, the holdings of gold had fallen to \$386,000,000, and the silver had increased to \$105,000,000. On March 14, 1905, the amount of gold held was \$387,000,000 and silver \$95,000,000. On May 29, 1905, the gold holdings had fallen to \$380,000,000 and the silver holdings increased to \$99,000,000. The aggregate specie holdings on August 25, 1905, were the greatest at date of any report during the period in question and amounted to \$495,000,000, of which \$397,000,000 was in gold and \$98,000,000 in silver. Legal tenders held by the banks fluctuated from a minimum of \$157,000,000 on November 10, 1904, and March 14, 1905, to a maximum of \$178,000,000 on January 11, 1905, but fell to \$170,000,000 on August 25.

In connection with the foregoing résumé interest will be taken in the accompanying table, showing the relative proportion of the principal items of resources to the aggregate resources of national banks at date of reports nearest to October 1 from 1900–1905, inclusive.

PERCENTAGE OF LOANS, ETC., TO AGGREGATE RESOURCES.

	1900.	1901.	1902.	1903.	1904.	1905.
	<i>Per cent.</i>	<i>Per cent.</i>	<i>Per cent.</i>	<i>Per cent.</i>	<i>Per cent.</i>	<i>Per cent.</i>
Loans and discounts.....	53.2	53.0	53.7	55.2	53.4	53.9
United States bonds.....	8.1	7.8	7.5	8.6	7.9	7.4
Lawful money.....	10.3	9.5	8.3	8.8	7.2	8.9

Total.....	69.9	70.7	72.1	70.7	70.4	70.1

RESERVE.

The deposits on which reserve is required—that is, individual deposits and net bank balances—amounted on August 25, 1905, to \$4,735,000,000, of which \$1,342,000,000 was held by central reserve city banks (New York, Chicago, and St. Louis), \$1,275,000,000 by banks in other reserve cities (the aggregate in the two classes being \$2,618,000,000) and \$2,117,000,000 by associations classed as country banks. The law requires banks in the central reserve cities to maintain a cash reserve of 25 per cent, and on the date in question the rate was exceeded by 0.63 per cent of the proportion required. Banks located in other reserve cities are authorized to carry one-half of their 25 per cent reserve with central reserve city banks, and their reserve with such banks and on hand averaged 25.29 per cent, the average for both classes being 25.47 per cent. Banks located elsewhere than in reserve cities are required to maintain a reserve of but 15 per cent, three-fifths of which may be on deposit with reserve city banks and the remainder held in their vaults. The average reserve held by the banks of this class was 17.03 per cent, making an average for all banks of 21.69 per cent.

LOANS AND DISCOUNTS.

Appearing in the appendix, Table No. 53, will be found a statement in which the loans and discounts of national banks, based on the August 25, 1905 reports, are classified, and from which it is shown that of the total amount of funds loaned, namely \$3,998,509,152, demand paper with one or more individual or firm names amounts to \$320,052,942; demand paper secured by stocks, bonds, and other personal securities, \$854,115,721; time paper with two or more individual or firm names, \$1,382,258,561; time paper, single name (one person or firm), without other security, \$689,124,987; time paper secured by stocks, bonds, and other personal security, and mortgages, \$752,956,941. Nearly one-third of the aggregate volume of loans represented accommodations granted by central reserve city banks, New York leading with \$805,000,000, followed by Chicago with \$213,000,000, and St. Louis with \$99,000,000. The loans granted by other reserve city banks slightly exceed \$1,031,000,000, Philadelphia leading with \$176,000,000, followed by Boston with \$168,000,000, Pittsburg, \$130,000,000, Baltimore, \$51,000,000, and decreasing from \$48,000,000 in Cleveland to approximately \$2,000,000 in Dubuque. The loans granted by banks in the central and other reserve cities amount to 54 per cent of the total, leaving 46 per cent as the proportion of loans of banks located elsewhere. In the list of country banks Pennsylvania leads with loans of \$232,000,000, followed by New York with \$155,000,000, Ohio, \$125,000,000; Massachusetts, \$118,000,000, Illinois, \$116,000,000; New Jersey, \$87,000,000; Texas, \$83,000,000; Iowa, \$64,000,000, Indiana, \$58,000,000, and Connecticut, \$53,000,000.

The amount and rate per cent of loans on August 25, 1905, of national banks in New York City, the three central reserve cities, other reserve cities, and banks elsewhere, are shown in the accompanying table, in which appears a corresponding statement from the returns received on September 6, 1904. It will be noted that the banks located in the reserve cities held on the former date 53.8 per cent of the volume of loans against 53.9 per cent in 1904, a variation of but one-tenth of 1 per cent.

The table in question follows:

Banks in—	August 25, 1905.		September 6, 1904.	
	Loans.		Loans.	
	Amount.	Percent.	Amount.	Per cent.
New York.....	\$805,665,012	20.1	\$807,264,703	21.7
New York	1,118,408,388	28.0	1,090,374,043	29.3
Chicago.....				
St. Louis.....				
Other reserve cities.....	1,031,114,691	25.8	919,232,812	24.6
All reserve cities.....	2,149,523,079	53.8	2,009,606,855	53.9
Country.....	1,848,986,073	46.2	1,716,544,564	46.1
Total.....	3,998,509,152	3,726,151,419

For the purpose of comparison the following table is submitted, showing the amount and classification of loans on approximate dates during the past six years:

CLASSIFICATION OF LOANS.

[In millions of dollars.]

Date.	Number of banks.	On demand, paper with one or more individual or firm names.	On demand, secured by stocks, bonds, and other personal securities.	On time, paper with two or more individual or firm names.	On time, single-name paper (one person or firm), without other security.	On time, secured by stocks, bonds, and other personal securities, or on mortgages or other real-estate security.	Total.
Sept. 5, 1900.....	3,871	183.3	576.6	978.3	421.8	526.8	2,686.8
Sept. 30, 1901.....	4,221	211.6	665.7	1,087.0	468.2	586.1	3,018.6
Sept. 15, 1902.....	4,601	237.3	706.9	1,176.4	517.1	642.4	3,280.1
Sept. 9, 1903.....	5,042	283.1	717.3	1,267.5	558.1	655.4	3,481.4
Sept. 6, 1904.....	5,412	279.8	818.9	1,316.7	611.0	699.7	3,726.2
Aug. 25, 1905.....	5,757	320.1	854.1	1,382.2	689.1	753.0	3,998.5

RATES FOR MONEY.

In connection with the amount and distribution of loans of national banks, the following statement furnished by the William B. Dana Company, of New York, relating to the range and average monthly rates for money in the New York market during the year ended October 31, 1905, will be found of interest:

CAPITAL, CIRCULATION, AND BONDS.

In the past year there was a gross addition to the authorized capital of national banks of \$59,336,240, of which \$33,532,500 were from banks organized since October 31, 1904, and \$25,803,740 from old associations increasing their capitalization. The net increase, however, was but \$30,899,740, as there was a loss of \$28,436,500 as a result of voluntary liquidations, failures, and reductions of capital of continuing banks.

The average capital of the 3,617 national banks in existence on March 14, 1900, was \$170,000. At the close of business on October 31, 1905, the average capital of the 5,858 banks then in operation had been reduced to \$138,000, the reduction being due to the organization of banks with capital of less than \$50,000, under authority of the act of March 14, 1900, the latter being organized generally with capital of \$25,000, although the exceptions raised the average of that class of banks to approximately \$26,000. The average capital of the 947 banks organized under authority of the act of 1864, and from March 14, 1900, to October 31, 1905, was \$120,000, making an average for the 2,702 banks organized during the period in question of approximately \$60,000.

The outstanding circulation secured by bonds on March 14, 1900, was but 35 per cent of the authorized capital stock, the latter being the measure of the maximum amount issuable. By reason of the granting of authority to issue circulation to the par value of bonds deposited, and the reduction by one-half of the semi-annual tax on circulation secured by 2 per cent consols of 1930, the proportion of circulation secured by bonds to authorized capital had increased on October 31, 1905, to 60 per cent.

At the close of business on October 31, 1905, registered bonds to the amount of \$493,912,790 were on deposit with the Treasurer of the United States, in trust as security for national-bank circulation, of which \$483,181,900, or nearly 98 per cent, were 2 per cent consols of 1930, there being still on deposit as security for circulation 3 per cent bonds of 1908 to the amount of \$2,215,540, fours of 1907 to the amount of \$4,050,350, and fours of 1925 to the amount of \$4,465,000. The average market price of 2 per cent consols in November, 1904, was

104.7838. The maximum price was reached in March, 1905, namely, 105.1389. In October, 1905, the average market price of these consols fell to 103.4295, giving them an average investment value in October of 1.826.

In the accompanying table is shown the number of banks in existence at the close of each month from November 30, 1904, to October 31, 1905, together with the amount of authorized capital stock, bonds on deposit to secure circulation, circulation secured by bonds and by lawful money, total circulation outstanding, and the average monthly market price of 2 per cent consols of 1930:

Date.	Num-ber of banks.	Capital.	Bonds on deposit.	Average monthly market price of 2 per cent consols of 1930.	Circulation secured by—		Total cir-culation out-standing.
					Bonds.	Lawful money.

The percentage of outstanding circulation to the paid-in capital of national banks, as shown by reports of condition, periodically, from January, 1866, to December, 1885, materially exceeded 50 and ranged from a maximum of 70.3 at the close of 1868 to 50.5 at the close of 1885. From the latter date there was a gradual decrease to 18.4 in July, 1891. From October, 1893, to March, 1895, the average was approximately 25 per cent, and thereafter a steady and slight increase to 33.8 per cent in December, 1899. The act of March 14, 1900, resulted in an increase of the rate to 38.3 per cent on April 26 of that year, and 47.3 at the close of the year. With the exception of July, 1902, when the rate was 44 per cent, the proportion of circulation to capital has exceeded 45 per cent since the date last named, and reached a maximum of 58.6 per cent in August, 1905.

The distribution of national-bank circulation, based on reports of condition during the year ended August 25, 1905, is shown in the following table in its relation to the amounts issued by national banks located in reserve cities and elsewhere:

Date.	New York.	New York, Chicago, and St. Louis.	Other reserve cities.	All reserve cities.	Country.	Total.
1904.	<i>Millions.</i>	<i>Millions.</i>	<i>Millions.</i>	<i>Millions.</i>	<i>Millions.</i>	<i>Millions.</i>

August 25.....	53.6	72.6	101.5	174.1	294.9	499.0

Under Department regulations the printing of circulating notes is confined to three plates, the first for four notes of the denomination of \$5 each; the second, three \$10's and one \$20, and the third of one \$50 and one \$100. Prior to the resumption of specie payments, the issue of notes of the denomination of \$1 and \$2 was authorized, and there are still outstanding \$344,558 of the former and \$164,922 of the latter. Notes of a denomination larger than \$100 not now issued but still outstanding, are as follows: Five hundred dollar notes to the amount of \$92,500; one thousand dollar notes, \$24,000.

The amount of each denomination of circulation outstanding on October 31, 1905, the amount previously issued, together with total redemptions, are shown in the following table:

Denominations.	Issued during the year.	Issued previ- ous years.	Total issued to Oct. 31, 1905. ^a	Total redeemed to Oct. 31, 1905.	Circulation outstanding Oct. 31, 1905.

^aNational gold bank notes amounting to \$75,664 not included.

The law requires every national bank to keep on deposit with the Treasurer of the United States lawful money to the amount of 5 per cent of its outstanding circulation for use in providing for current redemptions. During the year ended October 31, 1905, notes to the amount of \$306,073,880 were received for redemption at the United States Treasury redemption agency, of which \$204,753,612 were delivered to the Comptroller of the Currency for destruction, \$182,021,822 of the latter amount being replaced by new notes, \$12,583,410 redeemed and destroyed as a result of reduction of circulation under the act of June 20, 1874, and \$10,148,380 redeemed and destroyed on account of insolvent and liquidating banks. In addition to the foregoing, notes to

the amount of \$404,618 were received by the Comptroller direct from national banks for redemption without reissue or for replacement with new notes.

Nearly one-third of the notes received for redemption by the national bank agency (\$98,910,670) being in good condition after their redemption, were returned to the issuing banks. Ninety per cent of the total receipts at the redemption agency was shipped from New York, Chicago, Boston, Philadelphia, St. Louis, Baltimore, Cincinnati, and New Orleans, the receipts from New York alone amounting to approximately 50 per cent of the total.

The cost of redemption of notes by the Treasury of the United States during the fiscal year ended June 30, 1905, was \$247,973.26, the cost per thousand dollars being \$0.80993. In addition to redemption charges every national bank is required to pay the cost of plates from which its notes are printed, both at organization and extension of charter. The assessments for the cost of the original plates and those ordered on extension of charters during the past fiscal year were \$47,825 and \$64,800, respectively. The fees assessed for examination of banks during the year aggregated \$388,307.39, and during the same period taxes were paid on circulating notes to the amount of \$2,163,882.05. Including tax on capital stock, 1864-1883, tax on capital and surplus under the war-revenue act of 1898, and on deposits from 1864-1883, aggregating \$75,884,368, the associations have been charged with and paid expenses during the existence of the system as follows:

Expenses.	Amount.
Redemption of circulating notes from 1874 to 1905	\$5,211,035
Cost of original plates, 1883 to 1905	527,760
Cost of extension plates, 1883 to 1905	368,170
Fees for examinations authorized by section 5240, United States Revised Statutes, 1883 to 1905	4,697,506
Total payments other than taxes	10,804,471
Combining the taxes and other expenses, a total is shown of	182,869,767

The profit on national bank circulation varies with the cost price of bonds deposited as security for circulation. In October last the market price of 2 per cent consols of 1930 was at the lowest point during the year and hence circulation secured thereby shows a greater profit than during any other month of the year. In calculating the profit the interest on the bonds is added to the interest received on the circulation loaned at 6 per cent, giving the total receipts on an investment in \$100,000 worth of bonds as \$8,000. From the gross receipts are deducted the taxes on circulation, average expenses incident to cost of plates, redemption charges, etc., and the amount set aside as a sinking fund to provide for the premium paid for the bonds, the difference being the net receipts. Assuming that the amount invested in \$100,000 worth of bonds was loaned at 6 per cent, the profit on the issue of circulating notes will represent the difference between the interest on the amount invested in bonds and the net receipts from the interest on bonds purchased and the amount received by loaning the circulating notes. The profit so ascertained at the average cost price of bonds in October is shown to be 1.123 per cent.

While the deposit of bonds is mandatory, the issue of circulating

notes is permissive. There are eight national banks in operation with aggregate capital of \$2,625,000, having bonds on deposit to the amount of \$181,250, which have no circulating notes outstanding. With one exception none of these banks has ever issued circulating notes.

EARNINGS AND DIVIDENDS OF NATIONAL BANKS.

On March 1, 1869, an act was passed requiring national banking associations to submit reports of their earnings and dividends to the Comptroller of the Currency within ten days after the declaration of a dividend. Since that date reports of this character have been compiled covering semiannual periods ending March 1 and September 1. These returns from March 1, 1869, to March 1, 1905, inclusive, have been consolidated in annual statements, the capital and surplus being averaged and the total amount of net earnings and dividends, with the ratios of dividends to capital, dividends to capital and surplus, and net earnings to capital and surplus shown. The annual summary which appears in the appendix of this report shows that from 1869 to 1876, inclusive, dividends were paid at an average rate of approximately 10 per cent. The liquidation following the stringency of 1892 is reflected in the decline in the rate of dividends on capital from $7\frac{1}{2}$ per cent in the year named to 6.7 in 1897. Since the last date there has been a gradual recovery and the dividend rates have fluctuated from a minimum of 6.9 per cent in 1898 to a maximum of 9.9 in 1904, with a slight falling off in 1905 to 9.2.

The average aggregate capital of banks reporting during the thirty-six years in question was \$565,472,373, the average net earnings \$61,103,723, and the average dividends \$44,441,143. The average rate of dividends to capital was 7.86, to capital and surplus 5.87, and the average net earnings to capital and surplus 8.08. The aggregate net earnings during the period in question were \$2,199,734,027, and the aggregate amount of dividends paid \$1,699,881,153, the proportion of dividends to capital being as three to one.

CHANGES IN CORPORATE TITLES.

The act of May 1, 1886, authorizes any national bank to change its name or place where its operations are conducted to any other place in the same State not more than 30 miles distant, with the approval of the Comptroller of the Currency and by vote of shareholders representing not less than two-thirds of the capital stock, but provides that no such change shall take effect until the Comptroller of the Currency has issued his certificate of approval.

During the past year, while there were no changes in location, 25 associations changed their corporate titles—in some instances, as a result of change in name of the locality; in others, by reason of consolidation of a town with a larger city, the latter having extended its corporate limits. Generally, however, the change was made on account of a desire to operate under a different corporate title.

The old and new titles, with the dates the changes took effect, are stated in the accompanying table.

CHANGES IN CORPORATE TITLES.

No.	Title.	Date.
595	"The Peoples National Bank of Roxbury," Boston, Mass., to "The Peoples National Bank of Roxbury at Boston"	1904.

1602	"The National Bank of Neenah," Wis., to "The First National Bank of Neenah"	Sept. 8 Oct. 12

EXTENSIONS OF CORPORATE EXISTENCE.

The act of July 12, 1882, provides for the extension for an additional period of twenty years of the corporate existence of national-banking associations from the date of expiration of original charters, extension requiring an amendment to the articles of association, effected by the written consent of shareholders representing at least two-thirds of the stock, to be given at any time within two years prior to the date of expiration under existing law. In 1902 the act was again amended, providing for a further extension of charters for a period of twenty years of associations extended under authority of the act of 1882. Extensions effected under the earlier act, and from that date to October 31, 1905, numbered 2,348, the capital of the banks extended being \$504,459,365. Under authority of the act of 1902, 935 banks with capital of \$312,524,365 have effected the second extension of their corporate existence. In the year closed October 31, 1905, the number of first extensions was 90 and the second extensions 620. In the interest of the banks concerned, there are given in the appendix lists of associations the corporate existence of which will expire for the first and second time during the year ending October 31, 1906.

LIQUIDATIONS AND CONSOLIDATIONS.

Including one association placed in voluntary liquidation prior to October 31, 1904, but not reported until subsequent to that date, 144 national-banking associations with capital stock of \$26,744,500 were closed during the year ended October 31, 1905, of which 90 with capital of \$18,840,000 were closed by voluntary liquidation; 31 with capital stock \$5,569,500 by expiration of corporate existence, and 22 with capital of \$2,035,000 (exclusive of one bank closed and resumed during the year) by failure. Of the banks in the first class, 33 with capital of \$9,620,000 were consolidated with 30 associations with capital of \$13,910,000, the consolidation resulting in an increase of capital of the absorbing banks to \$23,635,000. Nine of these associations with capital of \$4,250,000 were reorganized under seven new charters, the capital of the latter banks being \$5,100,000. In both classes instances occurred where two liquidated banks consolidated their interests in one new or absorbing association. Thirty-two banks with capital of \$3,915,000 were succeeded or absorbed by State banks or trust companies, and 16 with capital of \$1,055,000 closed to discontinue business.

Of the 31 associations closed as a result of expiration of corporate existence, the stockholders of 22 of the number reorganized under new charters with aggregate capital of \$2,480,000; 5 of the number with capital of \$830,000 were succeeded or absorbed by State banks or trust companies, and 4 with capital of \$420,000 were not succeeded by any other class of bank.

In the appendix to this report Table No. 71 is stated the name, location, and capital of banks closed in the manner indicated, together with the name and capital of absorbing banks, showing the method of absorption, together with the capital of the absorbing associations prior and subsequent to absorption. In the same connection will be found a list of banks whose charters expired by limitation, together with the names of associations organized as their successors where reorganizations were effected.

The accompanying table contains a list of banks closed during the year, both by vote of stockholders and by expiration of corporate existence, together with the amount of their circulation issued, redeemed, and outstanding.

NATIONAL BANKS PLACED IN LIQUIDATION.

^a Resumed business Oct. 16, 1905.

The history of the national banking system has been marked by very few failures, only 5.5 per cent of the total number of associations chartered from 1863 to October 31, 1905, having been closed as the result of insolvency. The failures, with few exceptions, were due to fraudulent management or violations of the restrictive provisions of the national banking laws.

The capital of the 460 insolvent banks, liquidated, or in process of liquidation (including 21 restored to solvency), was \$74,737,420, the assessments thereon to make good deficiency in assets amounting to \$42,268,490. Assets coming into possession of receivers were of the nominal value of \$289,554,139, classed as—Good, \$140,861,361; doubtful, \$88,399,431; worthless, \$60,293,347.

The disposition of assets was as follows:

Collections.....	\$135,221,042
Offsets allowed and settled	21,445,459
Losses (assets compounded or sold under order of court)	98,722,584
Returned to shareholders	8,917,034
Remaining on hand	25,248,020

Total 289,554,139

In addition to collections from assets there was realized from the assessments upon shareholders \$19,873,856, these collections having been disposed of as follows:

Loans paid and other disbursements.....	\$31,194,756
Dividends	107,208,594
Legal expenses.....	4,341,391
Receivers' salaries and all other expenses	7,479,917
Returned to shareholders	2,383,473
Balance held by comptroller or receivers.....	2,486,767

Total 155,094,898

The record of every national bank which failed and was placed in charge of a receiver from the first failure in 1864 will be found in the appendix, showing the date of appointment of receiver; capital stock; dividends paid prior to failure; cause of failure; circulation issued, redeemed, and outstanding; lawful money deposited to redeem circulation; the amount of assets, collections therefrom and from stockholders; dividends paid; expenses incident to liquidation, etc.; and also similar information relating to each insolvent national bank, fully liquidated, up to and including October 31, 1905. The affairs of 361 of the 460 insolvent national banks have been settled. The capital of those banks was \$56,182,420, and their assets coming into the possession of the receivers amounted to \$203,280,184. United States bonds amounting to \$19,424,150 were held as security for \$17,295,748 outstanding circulation. These bonds were sold for \$20,970,480.39, leaving a balance transferable to the general assets of the trusts of \$3,674,732.39. Stockholders were assessed \$33,780,390, and there was realized from the assessments \$15,897,440.

The disposition of assets was as follows:

Offsets allowed and settled	\$15,553,455
Losses (assets, compounded or sold under order of court)	82,848,290
Collections from assets, etc	94,085,712
Assets returned to shareholders, nominal value.....	8,917,034
Assets remaining, nominal value.....	1,875,693

Total 203,280,184

The disposition of collections from assets and from shareholders was as follows:

Loans paid and other disbursements	\$21,459,075
Dividends paid	77,199,813
Legal expenses.....	3,339,365
Receivers' salaries and other expenses	6,021,552
Returned to shareholders in cash	1,935,254
Balance held by the Comptroller or receivers.....	28,093

Total 109,983,152

On claims proved, amounting to \$109,514,273, dividends were paid, as heretofore shown, to the amount of \$77,199,813, or 70.49 per cent. Including, with dividends, loans paid and offsets allowed, creditors

received on an average 77.95 per cent. Up to and including 1904 the average rate of dividends paid on claims proved was 70.78 per cent, and on claims proved, including offsets and loans, 78.11 per cent.

For the purpose of ascertaining the results of the settlement of affairs of insolvent national banks located in central reserve and other reserve cities, a comparative statement has been compiled and incorporated in the appendix, relating to the affairs of all insolvent national banks, classified as to their location—central reserve cities, all other reserve cities, and other cities and towns. In the first class are 20 banks with capital at date of failure of \$10,810,300 and assets of \$35,519,412, from which creditors received on an average 88.91 per cent. The second division relates to 45 banks, located in other reserve cities, the capital and assets at date of failure being \$16,052,800 and \$68,799,836, respectively. Creditors of these banks received on an average 78.01 per cent. The 296 insolvent national banks located in other cities and towns were capitalized at \$29,319,320, and their assets at date of failure were \$98,960,936, from which creditors received on an average 73.87 per cent.

The cost of liquidation—that is, receivers' salaries, legal and all other expenses, in relation to the assets of the trusts, averaged 4.4 per cent for the central reserve city banks, 3.2 per cent other reserve city banks, 5.63 per cent for banks located in other cities and towns, the average for all being 4.6 per cent.

The life of a receivership averages about four years; but the records show that the affairs of the seven insolvent national banks closed since October 31, 1903, have been settled, in four cases creditors receiving dividends at the rate of 100 per cent, and in two cases interest in full in addition; one trust paid 98.15 per cent and one but 30 per cent. One bank in this class was formerly in voluntary liquidation, the receiver having been appointed to enforce stockholders' liability as the proceeds of all assets had been distributed leaving some claims unpaid.

Sixteen receiverships were terminated during the year ended October 31, 1905, the creditors receiving dividends to the amount of \$2,827,087 on claims proved aggregating \$4,447,215.

The work of the year resulted in the reduction of receiverships to 78, a number of which, however, are inactive and only continued for the purpose of realizing on old claims and settling pending litigation.

Supplementary to the tables hereinbefore referred to, relating to insolvent national banks and those the affairs of which have been finally closed, tables appear in the appendix showing the number of banks closed and fully liquidated in each year, and also the failures in each State and geographical division, from 1864 to 1905.

Geographically the number of failures and capital of the banks involved, the affairs of which have been settled, are shown in the following table:

Location.	Number of banks.	Capital.
New England States.....	19	\$5,021,300
Eastern States.....	66	11,940,620
Southern States.....	69	9,771,500
Middle Western States.....	78	15,422,000
Western States.....	92	9,267,000
Pacific States.....	37	4,760,000
Total.....	361	56,182,420

In order to ascertain the extent to which officers and directors were interested in the insolvent national banks, an examination of the receivers' reports of the 49 banks which failed during the two years ended October 31, 1905, has been made and shows that of the 43,850 shares of stock of the banks 7,771 were owned by the presidents, 1,805 by vice-presidents, 3,210 by cashiers, 8,687 by directors other than executive officers, and 290 by minor officers. The total number of shares held by directors and other officers was 21,763, or nearly one-half of the total number of shares of the associations with which they were connected.

ORGANIZATION OF NATIONAL BANKS.

From the date of the granting of the first charter to a national banking association, in 1863, to October 31, 1905, 7,966 associations were organized, of which 1,214, with capital at date of issue of charter of \$298,861,928, were conversions of State banks, 64 per cent of the number being located in the New England and Eastern States. At the close of business on October 31, 1905, 5,858 associations were in existence, 1,669 having been placed in voluntary liquidation and 439 (exclusive of 21 restored to solvency) in the charge of receivers. Expressed in percentages, the proportion of active banks is 73.5 per cent; in voluntary liquidation, 21 per cent; insolvent, 5.5 per cent.

Under authority of the act of March 14, 1900, permitting of organization of banks with capital of less than \$50,000 in places having population of not more than 3,000 there have been organized 1,755 national banks, with aggregate capital of \$45,817,000, and during the same period charters were issued to 947 banks, with capital of \$113,227,800, the individual capital being \$50,000 or more, making the total number of organizations since March 14, 1900, 2,702, with authorized capital of \$159,044,800 and charter bonds of \$39,363,800. A further classification shows that 1,503 of these banks, with capital of \$79,544,000, were of primary organization; 904, with capital of \$59,859,000, reorganizations of State or private banks, and 295, with capital of \$19,641,800, conversions of State banks. The combined capital of the converted and reorganized banks was approximately the same as that of banks of primary organization, although the number of banks of the latter class exceeded conversion and reorganizations by 304.

In the year ended October 31, 1905, there were organized 506 associations with aggregate capital of \$33,532,500, of which 318, with capital of \$8,357,500, were with individual capital of less than \$50,000, and 188, aggregate capital \$25,175,000, with individual capital of \$50,000 or more. The number of conversions was 45, reorganizations 188, and primary organizations 273.

The distribution of banks by classes, showing the number and capital, organized in each State and geographical division, from March 14, 1900, to October 31, 1905, is shown in the table which follows.

NATIONAL BANKS ORGANIZED FROM MARCH 14, 1900, TO OCTOBER 31, 1905.

October.....	22	1,060,000	13	450,000	1	42,000	36	1,542,000	433,250
Total.....	273	14,417,500	188	16,103,000	45	3,012,000	506	33,532,500	8,032,550

At the close of business on March 14, 1900, there were in existence \$3,617 national banking associations, with authorized capital of \$616,308,095; bonds on deposit as security for circulation of \$244,611,570, on which circulation was outstanding to the amount of \$216,374,795. In addition to the latter amount circulating notes were outstanding to the amount of \$38,027,935, for which lawful money had been deposited with the Treasurer of the United States by banks reducing their circulation, those in voluntary liquidation, and on account of

those which had failed, which, with the bond-secured circulation, gave the total amount outstanding as \$254,402,730. On October 31, 1905 there had been an increase in number of banks to 5,858, or 2,241 since March 14, 1900. The capital stock had increased in the sum of \$195,717,980, or to \$812,026,075; bonds on deposit as security for circulation and circulation issued thereon increased during this period by over 100 per cent, bonds on the earlier date amounting to \$244,611,570 and on the latter to \$494,017,850, the circulation secured by bond increasing from \$216,374,795 to \$489,937,806. The outstanding circulation secured by bonds and by lawful money rose from \$254,402,730 to \$524,408,249. During the past year the net increase in number of banks was 363; authorized capital, \$30,899,740; bonds deposited as security for circulation, \$67,473,060; circulation secured by bonds and by lawful money, \$67,126,749.

The number, capital, etc., of national banks on March 14, 1900, as compared with June 30 and October 31, 1904 and 1905, are shown in the following table:

	Mar. 14, 1900.	June 30, 1904.	Oct. 31, 1904.	June 30, 1905.	Oct. 31, 1905

STATE, SAVINGS, AND PRIVATE BANKS, LOAN AND TRUST COMPANIES.

Under the provisions of section 333 of the Revised Statutes of the United States, the Comptroller of the Currency is required to incorporate in his annual report to Congress "a statement exhibiting under appropriate heads the resources and liabilities and condition of the banks, banking companies, and savings banks organized under the law of the several States and Territories."

No other officer, State or Federal, is charged with this duty, and it is the constant aim of the Comptroller's office, in view of the value of such statistics, to present in the annual reports as complete information as possible relative to the condition of all banks of the country as of the date of latest returns each year.

In order to obtain this information the Comptroller is necessarily dependent upon the courtesy of officers of the different States, and upon individual bankers in States the laws of which States do not provide for the compilation of data of this character.

The promptness with which State officials respond to the Comptroller's request for information relating to banks under their supervision is worthy of note. Each year one or more States formerly without adequate provision for obtaining and compiling reports of banks incorporated under their laws have, through legislative enactment, placed such banks under the supervision of an official whose duty it is to receive and tabulate the reports so required, which information is placed at the disposal of the Comptroller. Every year this office is thereby enabled to publish official, and hence more reliable, statistics relating to this class of banks from a greater number of States than

in the previous year, all but seven States and Territories now furnishing official statements.

Official reports as to incorporated banking institutions herein presented are from all the States and Territories of the United States with the exception of Arkansas, Nevada, Oregon, Idaho, Indian Territory, and Alaska. The official report from the State of South Carolina this year will be received too late for publication. Banking statistics relative to this State for the current year have been made up from individual statements and from commercial directories.

Statements showing the condition of private banks and bankers have been received from official sources from North Carolina, Kentucky, Missouri, Kansas, Wyoming, and California. The private banks of the other States and Territories sent reports direct to this office. Of 2,575 banks to which requests for statements were mailed, 879, or about one-third of the number addressed, responded with reports.

Reliable estimates place the number of banks and bankers in the United States and island possessions, exclusive of national banks, at 14,242; of this number reports pertaining to 10,742 banks have been received and tabulated.

From official and unofficial sources reports have been received showing the condition on or about June 30, 1905, of 10,742 banks, other than national, with aggregate resources of \$9,590,401,009. The reports include 7,794 commercial banks, 683 loan and trust companies, and 1,237 savings banks (of which 668 were of the mutual class and without capital stock), and 1,028 private banks and bankers. The capital stock of the State banks is \$379,756,040, and individual deposits \$2,365,209,630.

Reports received from 683 loan and trust companies show aggregate resources of \$2,865,976,479, against 585 with aggregate resources of \$2,380,287,747 which reported in 1904.

Reports were obtained from 1,028 private banks, with aggregate resources of \$165,233,295. In 1904 returns were received from 854 private banks, with aggregate resources of \$123,549,859, while in 1903 reports from 1,174 private banking institutions, with aggregate resources of \$169,049,821, were received.

Information submitted with respect to the capital, amount, and average rate per cent of dividends paid by State and private banks and loan and trust companies for the year ended June 30, 1905, will be found in the appendix. Reports covering the subject were received from 1,199 State banks, with capital of \$92,629,125, showing payment of dividends to the amount of \$8,675,706, or an average of 9.37 per cent; from 524 loan and trust companies, which paid dividends amounting to \$18,507,354, or 9.19 per cent, on capital stock of \$201,319,452, and from 356 private banks, with capital of \$10,786,800, on which dividends aggregating \$1,339,843, or 12.42 per cent, were paid during the current year.

CONSOLIDATED RETURNS FROM STATE, SAVINGS, PRIVATE BANKS, AND LOAN AND TRUST COMPANIES.

There is given herewith, for the purpose of comparison, a table showing the principal items of resources and liabilities of banks other than national in the years 1900 to 1905, inclusive.

CONSOLIDATED RETURNS FROM STATE, SAVINGS, PRIVATE BANKS, AND LOAN AND TRUST COMPANIES, 1900 TO 1905, INCLUSIVE.

Item.	1900.	1901.	1902.	1903.	1904.	1905.
Loans	\$3,013,419,827	\$3,444,377,672	\$3,942,592,907	\$4,296,675,586	\$4,360,209,382	\$5,097,761,36
Bonds	1,723,830,351	1,935,625,964	2,094,496,729	2,334,329,907	2,522,890,815	2,748,447,46
Cash	220,667,109	240,145,951	250,815,787	275,813,526	301,578,011	314,248,36
Capital	403,192,214	430,401,557	499,621,208	578,418,944	625,116,824	671,599,14
Surplus and undi- vided profits ...	490,654,957	538,866,278	614,509,805	731,314,014	779,241,781	824,243,06
Deposits	4,780,893,692	5,518,804,859	6,005,847,214	6,352,700,055	6,688,107,157	7,567,080,82
Resources	5,841,658,820	6,681,567,334	7,355,110,843	8,016,181,848	8,542,839,385	9,590,401,00

The foregoing figures indicate an increase in aggregate resources in 1905 over 1904 of more than \$1,047,000,000. Loans and discounts increased \$737,500,000, and individual deposits show a gain of approximately \$879,000,000.

A table appearing in the appendix shows the aggregate resources and liabilities of loan and trust companies from 1900 to 1905, inclusive, the figures therein presented indicating that the resources of the loan and trust companies have increased during the past year over \$485,000,000, or more than 20 per cent, the individual deposits having increased from \$1,600,000,000 in 1904 to over \$1,980,000,000 in 1905, a gain of over \$380,000,000. The loans and discounts increased over \$401,000,000, and the stocks, bonds; and other securities more than \$120,000,000. The cash holdings show an increase of about \$3,500,000.

The principal items of resources and liabilities of national banks, all other banks and banking institutions, and consolidated returns from all reporting banks in 1893, 1903, 1904, and 1905 are incorporated in the following table:

Classification.	1893.			1903.		
	3,807 National banks.	5,685 State, etc., banks.	Total, 9,492 banks.	4,939 National banks.	8,745 State, etc., banks.	Total, 13,684 banks.

STATE AND PRIVATE BANK FAILURES.

Through the courtesy of the Bradstreet Commercial Agency this office has been placed in possession of information relating to the number, assets, and liabilities of State and private banks which failed in the year ended June 30, 1905. The total number of failures during the year was 57, the assets of the banks being \$6,970,345, and the liabilities, \$10,273,023. In the year ended June 30, 1904, there were 102 failures of banks of this character, with assets of \$24,296,823 and liabilities of \$31,774,895. Included in the 57 failures of banks other than national in 1905 were 16 State banks, 4 savings banks, 2 trust companies, and 35 private banks. The number of failures by geographical sections was: New England States, none; Eastern States, 8; Southern States, 10; Middle Western States, 32; Western States, 2, and Pacific States, 5.

The number of banks, other than national, which failed annually from 1864 to 1905, together with their aggregate assets and liabilities, are shown in the table following:

NUMBER OF FAILURES, CAPITAL, ASSETS, LIABILITIES, AND DIVIDENDS PAID BY BANKS OTHER THAN NATIONAL WHICH FAILED IN EACH YEAR FROM 1864 TO 1905.

Year.	Number of failures.	Capital.	Nominal assets.	Liabilities.	Dividends paid.

SAVINGS BANKS.

Savings bank reports to the number of 1,237 have been received of which 668 are from mutual institutions and 569 from stock saving banks, the latter being operated for the benefit of both shareholder and depositors.

The principal items of resources and liabilities of savings banks both mutual and stock, are as follows: Loans, \$1,534,114,618; bonds stocks, and securities, \$1,535,354,306; deposits, \$3,093,077,357, an aggregate resources, \$3,368,279,857. Compared with 1904, these figure show an increase in loans of \$122,500,000; bonds, stocks, and securities of \$45,300,000; deposits of \$174,300,000, the aggregate resource having increased over \$193,000,000.

In the following table is given a comparative statement of the number of depositors, amount of deposits, and average savings deposit in savings banks in the States named for the years 1903-4 and 1904-5. Included in this table are deposits in savings departments of commercial banks in operation in the State of Illinois, for the reason that the auditor of public accounts of that State in his periodical statement reports such deposits separately from deposits subject to check. The result of the addition of the Illinois savings deposits is the raising of the aggregate savings deposits in the United States to \$3,261,236,119 the number of depositors to 7,696,229, the average deposit being \$423.74.

NUMBER OF SAVINGS DEPOSITORS, AGGREGATE SAVINGS DEPOSITS, AND AVERAGE AMOUNT DUE TO DEPOSITORS IN SAVINGS BANKS IN EACH STATE IN 1903-4 AND 1904-5.

State, etc.	1903-4 (1,157 banks).				1904-5 (1,237 banks).

a Estimated.

b Partially estimated.

The mutual savings banks are located in the New England and the Eastern States, with the exception of 1 in West Virginia, 2 in Wisconsin, 3 in Ohio, 5 in Indiana, and 10 in Minnesota, the number of these reporting institutions remaining the same as last year.

As shown by Table IV in the appendix, the aggregate resources of mutual savings banks is \$2,967,341,724, against \$2,817,996,115 in 1904, a gain of over \$149,000,000. The loans and discounts amount to \$1,269,755,274, an increase of \$85,570,729 over 1904. The loans are classified as follows: On real estate, \$1,054,950,935; other collateral security, \$41,285,876; all other loans, \$173,518,463. The amount invested in bonds, stocks, and other securities has been increased from \$1,402,292,764 in 1904 to \$1,453,091,615 in 1905, a gain of \$50,798,851. The investments in bonds and other securities are as follows: United States bonds, \$13,278,932; State, county, and municipal bonds, \$136,493,056; railroad bonds and stocks, \$321,282,624; bank stock, \$27,119,101; other stocks, bonds, and securities, \$954,917,902. The cash in bank is only \$265,210 greater than reported last year, being now \$18,404,563; the cash on deposit with other banks is \$121,815,707, or \$6,624,123 more than shown by the reports of 1904.

Individual deposits have increased from \$2,602,040,775 in 1904 to \$2,736,533,039, a gain of over \$134,000,000. The deposits are credited to 6,463,677 depositors, or 177,302 more than was shown by the reports for 1904. The average deposit account has increased during the same period from \$413.92 to \$423.37. Reports from each State having this class of banks show a larger average deposit account than in 1904 with the exception of Wisconsin and Minnesota.

The fact that the number of depositors in the two mutual savings banks reporting from Wisconsin had to be partially estimated may account for the apparent decrease in the average deposit for that State. A decrease of two in the number of banks reporting from Minnesota is accompanied by a reduction of the average deposit in that State.

Comparing the average deposit account in mutual savings banks by geographical sections, it will be observed that the average in the New England States is \$384.90 against \$380.10 in 1904. In the Eastern States the average is \$458.40 against \$445.20 in 1904. Figures for the Middle Western States show an average deposit of \$393.47 to the

credit of depositors for the present year, against \$389.36 for the year prior. The one mutual savings bank in West Virginia, being the only one of this class reporting from the Southern States, gives the average deposit account as \$183.68, against \$177.68 in 1904.

The number of depositors in all reporting savings banks (exclusive of those having accounts in the savings departments of the State banks of Illinois) has increased since 1904 from 6,888,546 to 7,213,278 and the average deposit from \$423.72 to \$428.51. Including savings depositors in the Illinois State banks, the total number of depositors has increased from 7,305,443 in 1904 to 7,696,229 in 1905, and the average to each depositor estimated to be \$418.89 in the former year to \$423.74 this year. The aggregate deposits were \$3,060,178,611 in 1904 and in the current year \$3,261,236,119, an increase of \$201,057,508.

The reporting stock savings banks are located in the District of Columbia, North Carolina, Iowa, and California. The resources of these banks amount to \$400,938,133, approximately 12 per cent of the total assets of all reporting savings banks. The loans aggregate approximately \$264,350,000; investments in stocks, bonds, and other securities \$82,262,000; deposits with other banks \$33,033,000, and cash on hand \$9,199,000. The capital is \$26,191,000, surplus and undivided profits \$15,786,000, deposits \$356,544,000, the number of depositors 754,601, and the average deposit \$424.94.

Comparing the stock savings bank returns for the current year with those of 1904 an increase in aggregate resources is shown of more than \$43,000,000. The deposits have increased by about \$40,000,000, and the number of depositors by 152,430.

The following table shows the growth of savings banks in the United States from 1820 to 1905 as evidenced by the amount of deposits, number of depositors, and average deposit accounts, and the average per capita based on the census years from 1820 to 1890 and annually thereafter:

NUMBER OF SAVINGS BANKS IN THE UNITED STATES, NUMBER OF DEPOSITORS, AMOUNT OF SAVINGS DEPOSITS, AVERAGE AMOUNT DUE EACH DEPOSITOR IN THE YEARS 1820, 1825, 1830, 1835, 1840, AND 1845 TO 1905, AND AVERAGE PER CAPITA IN THE UNITED STATES IN THE YEARS GIVEN.

Year.	Number of banks.	Number of depositors.	Deposits.	Average due each depositor.	Average per capita in the United States.

1905 ^a	1,237	7,696,229	3,261,236,119	423.74	39.17

^a Population estimated at 83,260,000 June 30, 1905.

From an examination of the returns submitted with respect to the rate of interest paid on savings accounts, it will be noted that the maximum rate is 4.50 per cent, the minimum rate 2.85 per cent. The estimated average rate is 3.55 per cent, a slight increase over the estimated average interest rate of 3.50 per cent in 1904.

The following table shows the reported rate paid in each State by savings banks located therein:

State, etc.	Rate per cent.	State, etc.	Rate per cent.
Maine.....	3.28	Maryland ^a	3.21

BUILDING AND LOAN ASSOCIATIONS.

Through the courtesy of H. F. Cellarius, secretary of the United League of Building and Loan Associations, it is possible to present the most recently compiled statistics relating to the condition of the building and loan associations of the country.

The secretary states that the associations are in a very satisfactory condition and that their total assets, \$600,342,586, increased during the year to the extent of \$20,786,474. The membership has increased to 1,631,046, or a net increase of 64,346. The returns submitted relate to 5,265 associations, 4,245 of which are located in the 21 States named the remaining 1,020 being combined under the heading "Other States."

Pennsylvania has nearly double the number of building and loan associations of any other State and also the largest volume of assets although Ohio, which has 699 associations, has a greater membership and nearly as large a volume of assets as Pennsylvania. Over one third of the associations and about the same proportion of membership and assets are represented by institutions located in the two States named.

The following table shows by States the number and membership of associations, the amount of their assets, together with the increase or decrease in assets and membership over the prior year:

State.	Number of associations.	Total membership.	Total assets.	Increase in assets.	Decrease in assets.	Increase in membership.
Pennsylvania.....	1,223	319,459	\$123,448,958	\$5,587,179	6,266

SCHOOL SAVINGS BANKS.

Statistics relating to the operation of school savings banks in the United States, in existence on January 1, 1905, have been received through the courtesy of J. H. Thiry, of Long Island City, N. Y.

The school bank system was inaugurated in the schools of Long Island City in 1885. From the statement compiled by Mr. Thiry it appears that there are 4,541 school banks in operation located in 1,089 schools in 109 cities of the United States. The number of scholars registered in these schools is 347,895, of which 191,009 are depositors in the school banks. The amount collected since the introduction of the system is shown to be \$2,782,012, the amount withdrawn \$2,165,072, leaving a balance due depositors of \$616,940.

The school savings bank is the simplest form of banking institution known. A teacher collecting the money from the pupils of a class, Mr. Thiry's report states, constitutes a school savings bank. From the statement submitted it appears that the school children of Dayton, Ohio, have the largest sum on deposit to their credit, namely, \$111,433.

A letter (in part) from Mr. Thiry, explaining the workings of the school bank system, follows:

I beg to answer your inquiries as follows:

1. In what manner are the deposits safeguarded?

Answer. By the law of the State of New York. (For a copy of the bill of the legislature and the rules and regulations see my annual for the years 1902 and 1904 in a separate cover.)

2. What disposition is made of the deposits, especially with respect to their investment?

A. The deposits of the scholars are subjected to the same process as those of adult depositors.

3. Is interest paid on deposits?

A. Yes; 4 per cent on average.

4. In what manner is provision made for expenses incident to the management?

A. None. In some cities the banks receiving the deposits of the juvenile depositors furnish all the blank forms. In others the school boards furnish a part of them, which, however, do not amount to much.

5. What is the minimum and maximum amount which may be deposited at one time?

A. One cent and up.

As regards the debit and credit accounts, the teacher and principal have nothing to do with them. This is solely the work of the banks. * * * The monthly list of depositors, with name and amount deposited during the previous four weeks, is the only clerical work performed by the teacher besides the record of the four Mondays previous of deposits inscribed in the Monday column of the roll-call book. * * * I may say without vanity that the Long Island City plan, which is in practice in the majority of the schools included in the statistical table, has proved to be the shortest and the most effective of all the plans in practice in the European cities.

As far as the expenses of the general supervision of the system in America is concerned, such as correspondence, collecting, and publishing the annual report for the past twenty years, the introducer, moved by a sentiment of charity and patriotism, has tried to save from a moderate income enough to cover the expenses, which amount annually to about \$300.

The introduction in 1885 of the school savings bank system in the United States has evidently been the incentive of many other good things. First, it helped to swell the list of depositors in the localities where the plan was introduced. The stamp savings plan and the recent introduction of commercial stamps now offered by the merchants as a premium owe their origin to the school savings bank plan.

BANKS IN THE ISLAND POSSESSIONS.

Under the law the treasurer of the Philippine Archipelago is required to examine the condition of banks and banking institutions doing business in the Philippine Islands, and also to obtain from the banks periodical statements of their condition. The reports are forwarded to the Insular Bureau of the War Department. Reports of condition, under date of June 30, 1905, have been submitted to this office for use in connection with this report.

The banks and banking agencies in operation in the archipelago, as shown by reports in question, are as follows: The Manila agency and the Iloilo subagency of the Hong-Kong and Shanghai Banking Corporation, the Manila agency and the Cebu subagency of the Chartered Bank of India, Australia, and China, the Banco Español-Filipino at Manila and the Iloilo subagency; the Monte de Piedad y Caja de Ahorros de Manila, Bank of Pangasinan at Dagupan, Hong-Kong and Manila Yuen Sheng Exchange and Trading Company (Limited) at Manila; S. Misaka Bank at Sampaloc, Manila, and the International Banking Corporation at Manila. A summary of the returns from these banks on June 30, 1905, together with the individual statements made to the treasurer of the Philippines under that date appears in the appendix.

The principal items of resources and liabilities of the banks are: Loans and discounts, including overdrafts, \$11,351,221; Philippine and other currency and bullion, \$2,791,235; due from other banks and agencies, \$2,824,398; aggregate resources, \$21,399,864; capital stock, \$1,502,336; surplus and undivided profits, \$1,312,210; individual deposits, \$6,481,822; public deposits (insular), \$277,235; bank deposits, \$8,530,464.

Comparing these returns with those submitted to this office under date of June 30, 1904, the aggregate resources show a decrease of \$3,848,668; cash holdings, a decrease of \$1,900,006; loans and discounts, including overdrafts, a decrease of \$1,736,439. Individual deposits show a decrease of \$616,293, while public deposits (insular) have been reduced from \$1,360,345 in 1904 to the nominal sum of \$277,235. Bank deposits, which amounted to \$13,003,890 in June, 1904, show a loss of \$3,473,426, the aggregate amount due to other banks, head offices, and branches being \$8,530,464 in June, 1905. United States currency in the banks has been reduced from \$964,794 in 1904 to \$395,994 in 1905; but Philippine currency has increased from \$2,011,382 to \$2,364,861 during the same period. The reports indicate that the Mexican pesos and Spanish currency, which constituted at least 25 per cent of the money in the banks in 1904, have practically disappeared from circulation, as the reports for the current year show an aggregate of only \$26,409 of money on hand other than that reported under the head of United States and Philippine currency.

The American Bank at Manila became insolvent and was placed in the charge of a receiver during the past year.

PORTO RICO.

Reports have been received showing the condition of 8 banks in Porto Rico, furnished through the courtesy of Mr. W. F. Willoughby, treasurer of the island. The capital stock of the reporting banks operating under local laws is \$2,255,825, and the capital of the national bank is \$100,000. The combined resources of these 9 banks on or about June 30, 1905, were \$10,076,260, a gain of \$2,659,423 during the year.

The principal items of resources and liabilities of banks other than national are: Loans, \$2,608,571; bonds and stocks, \$1,596,358; due from banks and bankers, \$1,440,460; real estate, furniture, fixtures, \$479,567; cash on hand, \$1,889,297; total resources, \$9,624,911; capital stock, \$2,255,825; surplus and undivided profits, \$276,281; deposits, \$3,999,706; bank deposits, \$714,285; liabilities not classified, \$2,371,331.

The aggregate resources of the national bank as shown by report of May 29, 1905, are \$451,349; loans amount to \$36,571; bonds, securities, etc., \$152,018; amount due from banks and bankers, \$103,218; cash in bank, \$53,139; undivided profits, \$8,346; circulation outstanding, \$100,000, and individual deposits, \$243,003.

The treasurer states in his letter to this office transmitting the statements mentioned that the important merchants of Porto Rico to a considerable extent do a semibanking business in the way of loaning money. The reports sent by him, include, he states, the condition of all real banking institutions on the island.

HAWAII.

There are two national banks in the Territory of Hawaii, with capital stock of \$535,000, individual deposits, \$685,218, and aggregate resources, \$1,830,850. Individual reports have been received from seven other banks and banking institutions doing business in this Territory. A compilation of these reports shows capital of \$2,342,500, individual deposits, \$5,980,834, and aggregate resources of \$9,265,315. Other items of resources are loans and discounts, \$6,090,836; stocks, bonds, etc., \$848,733; cash in bank, \$1,388,129; surplus and undivided profits, \$489,519. The aggregate resources of the reporting banks, territorial and national, are \$10,096,165, the capital is \$2,877,500, and individual deposits \$6,666,052.

By comparing these figures with those published in the report for 1904, it will be observed that while the aggregate resources are approximately the same as shown last year deposits show a gain of more than \$1,400,000.

GROWTH OF BANKING IN THE UNITED STATES.

The following table shows the growth of banking in the United States, including island possessions, as indicated by the number of banks, capital stock, and individual deposits, from 1902 to 1905.

Banks.	Number.	Capital.		Individual deposits.	
		Amount.	Per cent.	Amount.	Per cent.
1902.

Total.....	18,844	1,473,904,674	100.00	10,448,545,990	100.00
1905.					
National.....	5,668	791,567,231	51.41	3,783,658,494	32.1
State, etc.....	10,742	671,599,149	48.59	7,567,080,822	67.9
Nonreporting.....	3,500	76,664,000		435,582,000	
Total.....	19,910	1,539,830,380	100.00	11,786,321,316	100.00

From returns made to this office on or about June 30, 1902, it appears that there were in operation 4,535 national banking associations, with capital of \$701,990,554 and individual deposits of \$3,098,875,772, and also 7,889 incorporated State and private banks, with capital and deposits of \$499,621,208 and \$6,005,847,214, respectively. The nonreporting banks to the number of 3,732 had capital and deposits estimated at \$138,548,654 and \$478,592,792, respectively, or an aggregate of 16,156 banks and banking institutions, with capital of \$1,340,160,416 and deposits of \$9,583,315,778. The first estimate made by this office as to the number, etc., of nonreporting banks, published in 1903, was for the year 1902. From returns on or about June 30, 1905, it is

shown that the number of national banks has increased during the past three years to 5,668, with capital of \$791,567,231 and deposits of \$3,783,658,494. The number of State and private banks reporting and nonreporting are now 14,242, with capital of \$748,263,149 and deposits aggregating \$8,002,662,822. The total number of national, State, and private banks in the United States and island possessions is therefore 19,910, with aggregate capital of \$1,539,830,380 and individual deposits of \$11,786,321,316. The number of national banks in active operation has increased since 1902 by 25 per cent, and the figures presented indicate that banks other than national have increased at the rate of about 22 per cent during this period.

In 1902 national-bank capital represented 52.4 per cent and deposits 32.3 per cent of aggregate capital and deposits, respectively, of all reporting banking institutions.

The percentage of capital of national banks to capital of all banks in 1905 was 51.41 per cent, and of deposits 32.10 per cent, showing a slight reduction since 1902. Within the period in question the capital of national, State, and private banks increased about 15 per cent, while the deposits increased approximately 23 per cent.

There was in existence in 1902, as estimated, 1 bank for every 4,897 inhabitants and, based on the estimate for the present year, there is 1 bank for every 4,182 inhabitants.

DEPOSITS.

No items indicate so clearly the growth of banking as those relating to deposits. A compilation of the returns for the years 1896, 1900, 1904, and 1905 for each State and geographical division is submitted, showing the amount of individual deposits of each class of banks in each geographical division during the years mentioned. It will be noted that the increase was from \$4,945,124,423 in 1896 to \$7,238,986,450 in 1900, or 46+ per cent. During the four years from 1900 to 1904 deposits increased to \$10,000,546,999, or over 38 per cent. The deposits for the current year are \$11,350,739,316, or an increase of 13.5 per cent over 1904, and approximately 130 per cent over 1896.

INDIVIDUAL DEPOSITS IN STATE, SAVINGS, PRIVATE BANKS, LOAN AND TRUST COMPANIES, AND NATIONAL BANKS, IN EACH GEOGRAPHICAL DIVISION, ON OR ABOUT JUNE 30, 1896, 1900, 1904, AND 1905.

Geographically summarized, there is shown to have been an increase in the deposits of banks located in the New England States from \$1,193,300,000 in 1896 to \$1,791,400,000 in 1905, a gain of \$598,100,000. The increase in the Eastern States during this period was \$2,961,000,000, or from \$2,291,700,000 in 1896 to \$5,252,700,000 in 1905. In the Southern States the increase was from \$221,700,000 to \$767,300,000, an increase of \$545,600,000. The deposits of banks in the Middle Western States which reported in 1896, amounting approximately to \$877,800,000, have now increased to \$2,461,200,000, showing a gain in that section of \$1,583,400,000. The banks of the Western States increased their deposit accounts from \$128,800,000 to \$430,900,000, a gain of \$302,100,000. In the Pacific States the banks gained

\$397,700,000 in deposits, or an increase from \$231,800,000 to \$629,500,000.

The deposits in the banks in the island possessions (Hawaii only) were first stated for 1900, when they amounted to \$3,096,174.

It will be noted from the accompanying table that the Southern States show the largest percentage of increase in deposits during the period from June 30, 1896, to June 30, 1905, the percentage of increase in this section being 246.1, followed by the Western States, where the ratio of increase is 234.6; and, in the order named, the Middle Western States with 180.3, the Pacific States 171.6, the Eastern States 129.2, and the New England States 50.1. The average of increase for the United States is 129.2 per cent.

Geographical divisions.	Individual deposits.			
	1896.	1905.	Increase.	Per cent.
	<i>Millions.</i>	<i>Millions.</i>	<i>Millions.</i>	
New England States	\$1,193.3	\$1,791.4	\$598.1	50.1
Eastern States	2,291.7	5,252.7	2,961.0	129.2
Southern States	221.7	767.3	545.6	246.1
Middle Western States	877.8	2,461.2	1,583.4	180.3
Western States	128.8	430.9	302.1	234.6
Pacific States	231.8	629.5	397.7	171.6
Total	4,945.1	11,333.0	6,387.9	129.2

The average individual deposit in the United States per capita of population has steadily risen from \$69 in 1896 to \$95 in 1900, \$122 in 1904, and \$136 in 1905.

FOREIGN BANKS OF ISSUE, ETC.

The principal items of resources and liabilities of foreign banks are set forth in the following table. So much of the table as relates to the principal European banks of issue, excepting the items of capital stock and deposits and loans of the banks of Scotland and Ireland, was taken from the August number of the Bulletin de Statistique. To these data have been added returns from other foreign banks. The statistics are presumed to be complete and accurate with respect to the items indicated.

CAPITAL, SPECIE, CIRCULATION, ETC., OF THE PRINCIPAL FOREIGN BANKS OF ISSUE C
OR ABOUT JUNE 30, 1905.

Grand total.....	829,483,000		85,753,963	11,052,716,598		

a Figures for New South Wales and Tasmania relate to Dec. 31; figures for the other States to June 30.

b Figures for postal savings banks relate to the end of the calendar year 1903; figures for the other savings banks to the end of 1902.

c Deposits with the State-controlled Caisse Générale d'Epargne. Includes savings deposits with post-offices. Moreover, accounts are published in the Annuaire Statistique of 4 municipal and 5 private savings banks for the year 1902. At the end of that year these 9 institutions had 45,165 depositors, credited with 46,262,519 francs' worth of deposits.

d Exclusive of data for the "special savings banks," the total deposits in which on June 30, 1904, amounted to \$23,063,143. The total deposits with all savings banks amount thus to \$85,221,598, making the average deposit per inhabitant \$15.21. This total does not include the savings deposits in the chartered banks.

da Figures for the two savings banks in Santiago and Valparaiso.

e Includes all savings institutions. Figures for savings banks proper, exclusive of branches of ordinary banks, were 970,711 (number of depositors) and \$152,334,168 (total deposits plus interest due on said deposits at the end of the year).

f Not included in the grand total.

g Exclusive of population in native states. Data for postal savings banks only.

h Figures for private savings banks for the year 1902; figures for Government postal savings banks for the year 1903.

i Exclusive of 132,009,802 lire savings deposits with the so-called "Società ordinarie di credito," and 313,407,272 lire with the "Società cooperative di credito." No data are given with regard to number of depositors in these institutions.

j Data for postal savings banks and the five principal private savings banks.

k Figures for the "Casa de economie" only.

l Preliminary data for all Government savings banks as published by the Vestnik Finansov, No. 39, 1905.

m Year ended November 20, for trustee savings banks.

n Estimates of M. Guillaume Fatio in the Journal de Statistique Suisse, 1900, No. 4.

a Post-office savings banks.

b Government savings banks.

c Exclusive of the postal savings depositors of Montserrat, the number of which is not stated.

BANKING POWER OF THE WORLD.

The banking power of the United States, including the island possessions, consisting of capital, surplus, other undivided profits, deposits, and circulation, is shown to be \$15,333,865,561. These figures include funds of the national banks, amounting to \$5,711,271,024; reporting State banks and bankers, \$9,062,923,037, and nonreporting banks, estimated, \$559,671,500, and are stated in detail in the following table:

BANKING POWER OF THE UNITED STATES.

Classification.	No.	Capital.	Surplus, etc.	Deposits.	Circulation.	Total.

a Includes Government deposits.

b Estimated capital, etc., based on reports received from private banks.

From the latest and most reliable data available the banking power of the foreign countries is estimated at \$19,158,500,000, the details being shown in the accompanying table:

BANKING POWER OF FOREIGN COUNTRIES.

Classification.	Capital.	Surplus.	Deposits.	Circulation.	Total.
	Millions.	Millions.	Millions.	Millions.	Millions.
Principal European and other foreign banks of issue, etc.....	\$1,191.4	a \$536.1	\$6,998.2	\$3,832.7	\$11,367.0

Total.....	1,191.4	536.1	14,789.7	3,832.7	19,158.5

a Estimated.

The world's banking power in 1890 was estimated by Mulhall at \$15,985,000,000, the United States being credited with something less than one-third of that amount. The present estimate, compared with that of 1890, shows that the banking power of the United States has increased since that date to the extent of \$10,183,900,000, or 197.7 per

cent; that of the foreign countries, \$8,323,500,000, or 76.8 per cent and the combined banking power, \$18,507,400,000, or 115.8 per cent

The subjoined consolidated statement relates to the banking power of the world in 1890, 1903, and 1905, and shows also the amounts and percentages of increase in 1905 over 1903 and 1890.

STOCK OF MONEY OF THE WORLD.

Under direction of the Director of the Mint there has been recently compiled a statement based on the latest information obtained relating to the monetary systems and approximate stock of money in the principal countries of the world at the close of the year 1904. The summary relates to 47 countries, in all of which gold is the monetary standard, with the exception of the Straits Settlements, Bolivia, and the Central American States.

The aggregate stock of gold, silver, and uncovered paper currency is reported as amounting to \$12,510,000,000, classified as follows: Gold, \$5,987,100,000; silver, \$3,130,400,000; uncovered paper currency, \$3,392,500,000. The gold represents 48 per cent of the stock and the silver and uncovered paper currency 25 and 27 per cent, respectively. Comparing this statement with that relating to the stock of money at the close of 1903, it appears that the holdings of gold have increased to the extent of \$358,900,000, but that silver and uncovered paper currency have decreased \$71,000,000 and \$91,000,000, respectively, the net increase in the stock of money being \$196,900,000. The greatest mass of gold is held in the United States and is stated as amounting to \$1,348,200,000. France is second in the list, with stock of \$926,400,000; followed by Germany with \$886,700,000; Russia, \$783,700,000; United Kingdom, \$533,200,000; Austria-Hungary \$305,000,000; India, \$263,900,000; Italy, \$131,400,000; and Australia, \$128,600,000. The leading countries with their stock of silver are as follows: United States, \$685,100,000; India, \$603,800,000; France, \$411,100,000; China, \$350,000,000; Germany, \$210,200,000; Spain, \$173,700,000; United Kingdom, \$113,400,000; Russia, \$101,900,000. With the exception of Colombia, which has \$741,000,000, the United States leads the principal countries of the world with a stock of uncovered paper currency of \$559,900,000, followed by Brazil with \$368,100,000, the next in the list being Argentina, \$286,100,000. Germany's stock of uncovered paper currency is \$169,800,000, and that of Italy \$150,700,000. The amount of this kind of currency in Spain is \$125,100,000, the next in the list being the United Kingdom with \$118,100,000; Belgium, \$111,900,000; France, \$110,900,000, and Japan \$101,200,000.

The greatest per capita stock of money is held in France, namely, \$37.13, followed by the United States with \$31.41; Germany, \$22.46; Spain, \$19.83; United Kingdom, \$17.58; Italy, \$9.26; Austria-Hungary, \$9.04, and Russia, \$6.90.

The countries reported have an aggregate population of 1,298,500,000 and an average per capita holding of money of \$9.63.

MONEY IN THE UNITED STATES.

At the close of the fiscal year ended June 30, 1905, the stock of money in the United States amounted to \$2,883,109,864, of which \$2,031,296,042 was in coin, including bullion in the Treasury, and \$851,813,822 United States and national-bank notes. The coin, bullion, and paper currency in the Treasury as assets amounted to \$295,227,211, the remainder, \$2,587,882,650, being in circulation. The estimated population of the country on this date was 83,260,000, giving an average circulation per capita of \$31.08. The amount of money held by national and other reporting banks at date of reports nearest to June 30, 1905, was \$987,800,000, which leaves \$1,600,100,000 outside of the Treasury and the reporting banks. Stated in percentages the money in the Treasury represents 10.24 per cent of the stock; in reporting banks, 34.27 per cent, and elsewhere 55.49 per cent. The per capita unaccounted for appears to be \$19.22.

The following table relating to the distribution of money in the country from 1892 to 1905, inclusive, will be examined with interest:

DISTRIBUTION OF MONEY IN THE UNITED STATES.

Year.	Coin and other money in the United States.	Coin and other money in Treasury as assets.		Coin and other money in reporting banks.		Coin and other money not in Treasury or banks.			In circulation, exclusive of coin and other money in Treasury as assets.	
		Amount.	Per cent.	Amount.	Per cent.	Amount.	Per cent.	Per capita.	Amount.	Per capita.

1905	2,883.1	295.2	10.24	<i>f</i> 987.8	34.27	1,600.1	55.49	19.22	2,587.9	31.08

a \$12,567,265, *b* \$10,125,999, *c* \$9,240,801, *d* \$7,620,304, and *f* \$6,301,590 in banks of island possessions not included in these returns.

The currency of the country is represented by gold, silver, gold and silver certificates, gold clearing-house certificates, United States and national-bank notes, and minor coins. The reports made to the Comptroller of the Currency by national banks contain statements of the amount of each kind of currency held. It is impossible, however, to give a detailed statement of the holdings of currency by other banks, as over one-fourth of the amount held is not classified.

The subjoined statement was compiled from reports of 5,668 national banks and 10,742 other banking institutions, making a total of 16,410 reporting banks. It will be noted that nearly one-half of the money held by the banks consists of gold and gold certificates. It is probable that this proportion is materially exceeded by reason of the amount of that metal presumably included in the items "specie" and "cash."

GOLD AND OTHER MONEY HELD BY NATIONAL BANKS ON MAY 29, 1905, AND BY OTHER REPORTING BANKS AND BANKERS ON OR ABOUT THE SAME DATE.

Classification.	National banks (5,668).	All other banks (10,742).	Total, all banks (16,410).

α Includes fractional currency.

In the following table is stated the amount of cash held by national and other banks separately in each geographical division in 1904 and 1905 together with the increase or decrease in each class and division, and the net increase or decrease of all banks in each division. While there was an increase generally in each geographical division, the decrease in the Eastern States division was so great, namely, \$25,630,211, that the net increase over 1904 is shown to be only \$3,560,268.

CASH IN NATIONAL AND OTHER BANKS ON OR ABOUT JUNE 30, 1904 AND 1905, AS REPORTED TO THE COMPTROLLER OF THE CURRENCY.

α Decrease.

β Net increase.

From midsummer of 1900 to June, 1905, the increase in money in banks was from \$749,900,000 to \$987,800,000, or \$237,900,000. In 1900 the banks in the Eastern States held 49.22 per cent of the total

the proportion falling to 46.61 in 1902, 46.01 in 1903; increased to 50.60 in 1904, and decreased to 47.75 in 1905.

By reference to the accompanying table it will be noted that banks in the New England and Eastern States held 57.47 per cent of the aggregate money in all banks in 1900, and 56.62 per cent in 1904, whereas in 1902 and 1903 the proportion was but 54.56 and 53.35 per cent respectively. In 1905 the average held by banks in those sections was 54.22 per cent. The amount and percentage of money held by banks in each geographical division in 1900 to 1905, inclusive, are shown in the following table (island possessions not included):

GEOGRAPHICAL DISTRIBUTION OF MONEY IN BANKS IN THE UNITED STATES.

CLEARING HOUSE EXCHANGES.

Through the courtesy of Manager William Sherer, of the New York clearing house, statistics have been compiled and furnished to this office covering the amount of exchange of the clearing houses of the United States for the year ended September 30, 1905; and, separately, the operations of the New York clearing house for the same period, showing, in addition to the aggregate clearings, the balances, amounts, and kinds of money passing in settlement, together with the transactions of the association with the Assistant Treasurer of the United States at New York. Settlements of exchanges of the New York clearing house are generally effected by the use of less than 5 per cent of money.

The volume of exchanges of the 103 clearing houses in the United States amounted to \$140,501,841,957, as against \$102,356,435,047 for the year ended September 30, 1904, an increase of \$38,145,406,910 and the largest gain in any year since these statistics have been published in reports issued by this Bureau. The general prosperity of the country and confidence in the stability of business credits are evidenced in the volume of clearings effected during the current year.

The clearings for the whole country in the years indicated were as follows:

1900.....	\$84, 000, 000, 000
1901.....	114, 000, 000, 000
1902.....	115, 000, 000, 000
1903.....	113, 000, 000, 000
1904.....	102, 000, 000, 000
1905.....	140, 000, 000, 000

The proportion of increase in transactions in 1905 over 1900 was 66 per cent.

The percentages of gain in each geographical section for five years were as follows: New England States, 19 per cent; Eastern States, 74 per cent; Southern States, 72 per cent; Middle Western States, 52 per cent; Western States, 48 per cent; Pacific States, 100 per cent.

The statement of the exchanges of the clearing houses of the United States for the year ended September 30, 1904, shows a decrease in volume, as compared with 1903, of \$12,000,000,000, thirty-seven cities sharing in this decrease. For the year ended September 30, 1905, the reports from only 14 cities having clearing houses show decreases as compared with 1904, viz: Cincinnati, Dayton, Youngstown, Springfield, Canton, and Akron, Ohio; Lowell and Fall River, Mass.; New Orleans, La.; Macon, Ga.; Lexington, Ky., Davenport, Iowa; Topeka, Kans., and Beaumont, Tex.

The falling off in the volume of exchanges in the cities named during the past year was \$57,681,839.

There will be found in the appendix a table relating to the exchanges of the clearing houses of the United States for each year from 1900 to 1905, inclusive, geographically arranged.

A condensed statement is given herewith of the clearing-house transactions, in millions of dollars, by geographical sections, for the years ended September 30, 1900 and 1905, together with the increase and percentage of increase:

Section.	1900.	1905.	Increase.	Per cent.

DECISIONS RELATING TO NATIONAL BANKS.

During the past year decisions have been rendered on questions frequently brought to the attention of this office—one on the right of shareholders to inspect the books and records of the association with which they are connected, and the other as to the right of shareholders to the proceeds of assets, the latter having been charged off as a condition precedent to a reduction of capital stock where the reduction is made for the purpose of avoiding an assessment on capital to make good an impairment.

A stockholder of The Commercial National Bank of Ogden, Utah, having been refused the privilege of inspecting the books of that bank, instituted mandamus proceedings in the district court of Utah. The case was ultimately carried to the Supreme Court of the United States, and in rendering the decision of the court Justice Day stated, in effect, that the right of inspection rests upon the primary proposition that the stockholders of a corporation own the property and the officers are their agents. The conclusion of the decision is to the effect that when a stockholder, with proper motives, demands access to the books of the corporation he shall be permitted to inspect them, and he can enforce the right of inspection in the State courts.

The case of Cogswell et al v. Second National Bank was in relation to the right of shareholders to the proceeds of assets, the latter having been charged off and set aside as a result of a reduction of capital stock, the reduction being authorized in lieu of an assessment to provide for an impairment of capital. The decision of the court was as follows:

The directors may, on a reduction of the capital stock of the bank by a vote of the shareholders, approved by the Comptroller of the Currency on the assurance of the president and directors that bad and doubtful assets will be charged off and set aside for the benefit of the then shareholders, charge off the bad and doubtful assets as, in effect, a dividend from assets in excess of capital stock, and on so doing the right to receive the proceeds of the assets thus set apart is irrevocably vested in those who are shareholders on the date of the approval of the reduction of stock by the Comptroller of the Currency.

Under sections 5199 and 5204 * * * assets which it is not necessary to retain as capital or for the surplus fund may be returned to the shareholders by the directors, and dividends so ordered may be made payable in the future and on the contingency of future collections on such assets. Where assets of a national bank are charged off against withdrawn capital stock and set apart in trust for the benefit of the then stockholders, a subsequent transfer of shares by the stockholders does not pass the right to the interest of the transferrers in the trust fund, notwithstanding the provisions of the Revised Statutes of the United States, section 5139, that transferees of national-bank stock shall succeed to all the rights and liabilities of their transferrers. Similarly, shareholders at the time of the creation of the trust fund may at any time thereafter transfer their rights in the trust fund with or without a transfer of their shares of stock.

PERSONNEL AND EXPENSES OF THE CURRENCY BUREAU.

The force of the Currency Bureau consists of the Comptroller, Deputy Comptroller, chief clerk, three chiefs of division, superintendent of the redemption division, general bookkeeper, and 96 clerks, etc., whose salaries aggregate \$137,431.43, which amount includes \$16,900 reimbursed by national banks from the assessment for the expense of redemption of national-bank circulation. In addition to the amount paid for salaries, there was expended during the year ended June 30, 1905, \$259,163.81 for special dies, plates, printing, etc. The total expenses of the Bureau from May, 1863, to June 30, 1905, represented by salaries (exclusive of the amount reimbursed by national banks), special dies, etc., were \$10,403,261.17. By reason of the adoption of improved methods, the business of the Bureau is now conducted with a less number of employees and attendant expense than thirty years ago, when the number of banks in existence was only about one-third of the present number.

Section 5173 of the Revised Statutes provides in part that the expenses necessarily incurred in executing the laws respecting the procuring of circulating notes and all other expenses of the Bureau

of the Currency shall be paid out of the proceeds of the taxes or duties assessed and collected on the circulation of national banking associations. The proceeds of the tax on circulation, however, are not directly available, as they are covered into the Treasury with other receipts of the Government, specific appropriations being made annually for the expenses of the Bureau. During the existence of the system the tax collected from national banks on their circulation amounted to approximately ninety-six and a quarter millions, or nearly ten times the amount appropriated for the expenses of the Currency Bureau.

THE ANNUAL REPORT.

The annual report issued by this Bureau in 1904 consisted of three volumes, the first, of 726 pages, devoted to the text and general statistics; the second, of 1,846 pages, statements of condition of all national banks reporting to this office under date of September 6, and the third, of 578 pages, the Digest of National Bank Decisions.

The current report is confined to one volume, the contents consisting of the text, statistics relating to national and other banking institutions, clearing-house transactions, etc., and statements of condition of all national banking associations reporting under date of August 25, the statements being confined to the principal items of resources and liabilities.

The work incident to the compilation, publication, and distribution of this report has been greatly expedited, in consequence of changes indicated, in addition to effecting a reduction of over two-thirds in the volume of the report and also a reduction to approximately the same extent of the expense attending its publication. The banks' statements, in the condensed form presented, contain all essential information relative to each bank.

The Digest of National Bank Decisions will be published periodically and, when demanded, as a separate document.

BANKING INSTITUTIONS WITHIN THE DISTRICT OF COLUMBIA.

The attention of Congress is called to the necessity for legislation regulating banking institutions within the District of Columbia.

Under existing legislation only national banks, safe deposit, trust, loan, and mortgage companies, and savings banks organized under the laws of Congress, and banking institutions organized under State laws and having their principal place of business in the District, are required to make reports of their condition or are subject to any official supervision. As a matter of fact every bank operating under a State charter within the District has, or claims to have, its "principal place of business" outside the District, and thus escapes or evades all governmental supervision and control.

Section 605, subchapter 3, of the District Code, providing for the general organization of corporations, excepts from its provisions only "banks of circulation and discount." Savings banks organized under this general act of Congress are required to make to the Comptroller of the Currency all the reports which national banking associations are required to make. The Comptroller has also power to cause examination to be made into the condition of any such savings bank, but he is without power to correct any abuse discovered, or to take any step

for the protection of depositors, however unsafe he may find the condition of the bank; the power of the Comptroller is so limited as to render it practically useless.

The numerous banking institutions deriving their charters from the States have no other restrictions upon their methods of conducting business than such as may be contained in their respective charters. Many, if not all of them, are not required to make any reports of condition, are not subject to any examination, are not restricted as to reserve fund, or as to loans, or as to the amount or character of their investments.

Congress having exclusive power of legislation within the District, depositors, no doubt, assume that their interests are not left to the care of distant State legislatures. The erroneous impression is strengthened by the fact that some of the banks, not required to make any report of condition, in fact publish such reports in the same manner and at the same time as those of national banks are published according to law.

The Comptroller respectfully recommends the passage of an act requiring all banking institutions receiving deposits in the District of Columbia to make reports of their condition, to be subject to examination, and to conduct their banking business under such regulations as will afford better protection to depositors than exists under present conditions.

BANK EXAMINATION AND SUPERVISION.

After a careful study of the cases which have come under my observation during the past four years, I am firmly convinced that no system of bank examination or supervision from the outside of the bank can absolutely prevent fraudulent bank failures. The more thorough and efficient the supervision the more surely and quickly frauds will be discovered and the more fear of detection will tend to prevent them, but they can not be surely and in every case prevented by any practical means outside of the bank.

I am also equally convinced by the same experience that with careful and efficient work on the part of the examiner, aided by intelligent and thorough letters of criticism based on the examiners' reports, any board of bank directors of fair intelligence with an honest desire to obey the law can, by cooperating with the examiner and the Comptroller, make the failure of their bank practically if not absolutely impossible.

I am sure that in this direction the cooperation between the directors of a bank and the supervising authority lies the best hope of decided and permanent improvement in the supervision of banks and the reduction of bank failures to a minimum.

No outside supervision can supply honesty or brains for the management of a bank or take the place of either when it is lacking. The best it can do is to discover acts of dishonesty or bad errors of judgment after they have occurred, and to some extent prevent illegal acts by fear of their discovery and punishment.

An examiner always works under one great and unavoidable disadvantage. He can do little or nothing until after the law has been violated, when much, if not all, of the harm is done. If the trouble is a bad, excessive, or fraudulent loan, it has been made before he can act. If there is a shortage in the cash through a defalcation or robbery, the money is gone before he can know it, and often with little or

no chance for its recovery. A good examiner does his whole duty the discovery of such a case. It is not reasonable to ask him prevent it.

A bank does not often fail suddenly. The condition which leads it is apt to be of comparatively slow growth. Far the most frequent cause of failure is a large line of loans to some concern or group concerns in which the officers are interested, or to the officers themselves. When the loans are new they look all right and frequent are good; but if things go wrong and this outside venture loses money, the loans begin to increase, and soon good money begins to go after bad with the inevitable result. It is surprising to see in a few cases men who may have been theretofore honest and square lack the honesty and moral courage to face the failure of their bank, who due to bad judgment or incompetency, without resorting to frauds of some kind. It is extremely rare to find a bank has failed without some of the officers committing fraudulent or illegal acts to hide it.

Every examiner, however, has many cases to report which are taken up and corrected, sometimes after they have become very bad. There are a great many such cases where a bank gets into more or less serious trouble, and yet is saved, where one goes on to failure. This is seldom a day in the Comptroller's office when there is not pending a case of a bank which is found, not necessarily from frauds, but always violations of law, but from bad banking, in a condition which if allowed to go on, would lead to serious trouble, but which is corrected on the examiner's report and advice. There always is a list of those that are being watched, and a very large percentage come out all right. They almost invariably do when the officers are honest and tell the truth. It is very hard to tell when the bank is beyond hope and really is insolvent. The hard cases are where the officers are dishonest and untruthful, and perpetrate all kinds of frauds to conceal the condition.

After a bank fails and disclosures of dishonesty are made, it is wondered why such things could go on undiscovered so long. The examiner is blamed and abused, with or without reason. In some cases the examiner is very much to blame, but in those which I have had occasion to investigate this has not very frequently been found to be true. It must be remembered that these frauds and deceptions are in many instances being carried on by men of unusual ability—men who stand very high among their neighbors, not only in business, but also in social, religious, and political matters. Almost invariably they deceive the whole community, their business associates, their friends, and even their families. It is frequently an astounding revelation to all of them that the banker who has failed, defaulted, and perhaps absconded or killed himself, is not a man of wealth as well as the ideal of honor and business integrity. Only men who establish such reputations have the opportunity to betray large trusts, and of these, only those with skill, shrewdness, and peculiar courage can carry them on for any length of time without discovery. However his suspicions may be aroused the examiner is, as I have said, under the great disadvantage of not being able to act after the crime is committed. He can discover them but he can not surely prevent such frauds.

The system of national-bank examination is much the most extensive which has ever been undertaken by any country or government, and the experience accumulated during the forty-three years of its operation

ation covers almost every conceivable trouble or complication into which the affairs of a bank may be brought, either by dishonesty, incompetency, or neglect. The methods of examination, reports, and criticisms based on them have, of course, been a gradual growth. In spite of certain defects and weak points, some of them serious and now needing improvement, it has worked very well. In the main the examiners have been faithful, competent men, doing conscientious and good work. The record of the national banks in regard to failures is better than any banks we have ever had in the United States or those of any other country under at all similar conditions.

Of the 7,966 national banks which have been organized, 460 have failed, or $5\frac{1}{2}$ per cent of the whole number, as against about $17\frac{1}{2}$ per cent of banks other than national in the same period. The national banks which have failed have paid their creditors about 78 per cent of the amount due them, while the other banks have paid only about 45 per cent. Of the billions and billions of dollars they have had on deposit, the national banks have lost for their creditors in the whole period of their existence only about \$32,000,000.

These records in favor of the national banks are mainly, if not entirely, due to the wise provisions and restrictions of the national-bank act and examination and supervision by the national authority. The examination provided in the bank act from the first—and in this it has never been changed—contemplated the examination of a bank by a single individual, and, except in the large cities, only provided such compensation as would cover one or two days' fair pay, including expenses. This is not sufficient examination, no matter how efficient and careful the examiner, to infallibly detect, much less prevent, fraud and dishonesty. It does detect much of it, perhaps most of it, but not by any means all. One is more often surprised at what is detected by shrewd examiners, and upon what slight clues, than at what escapes them.

The weakest feature of the present system of examinations is that the examiners are paid by fees instead of salaries. I believe every Comptroller of the Currency of recent years has advised a change in this system. The examiners as a whole are a good body of men—faithful, industrious, and attentive to their duty. But unfortunately this is not true of each individual, and the circumstances of their work being away from the observation of the office, makes it difficult to check them up and see that all the work is well done. The temptation to slight it is sometimes too great, and this should be removed as far as possible by changing the basis of their remuneration. It is not reasonable to expect a complete audit of the books of a bank and the checking up of every department in it for a fee of sometimes only \$20. If one were to employ a professional accountant to do such work it would cost many times this amount. This in a large bank is the work of many days or weeks. Perhaps it is not practicable nor advisable to have such complete service as this by officers of the Government. It is more a matter for the directors of a bank. It is now being done very thoroughly by an increasing number of the best banks, and it is a matter to which every board of directors should give the most careful consideration.

The Government can, however, and should by all means, improve the service by paying the examiners by the day and greatly increasing their number, so that a man would have time and take time to go into matters as thoroughly as is necessary to get at the real condition of

the bank. The men ought to be paid good salaries; large enough to attract and hold good men. It is one of the difficulties of the present service that it is hard to keep a good man. Just as an examiner gets to know his district well, and becomes really efficient, he is apt to be hired by some bank looking for an officer. I see no way to altogether prevent this, but the salaries should be enough to keep men fit for the service in it. It is easy enough to get ambitious young men who are thoroughly competent to go into the service for the experience and acquaintance it gives them. It is more difficult and more important to keep them after they have been trained to the work.

There are now in the service 78 examiners, to examine 5,858 banks or make 11,716 examinations a year. This number should be materially increased.

The examiners should be paid a per diem for the days actually at work and an allowance for traveling expenses and subsistence. Each examiner should have with him, also, a clerk or assistant, who should be a good accountant, familiar with bank books, and able to count money quickly and accurately. The pay of the assistant need not be large, but the assistant will add very greatly to the value and efficiency of examinations and save much of the time of the higher-priced man.

INCREASE IN BANK CIRCULATION.

The increase in the amount of national-bank notes outstanding which had been so great during the years 1903 and 1904 has been still greater during 1905. On October 31, 1905, the total amount in circulation was \$524,508,249, which is by far the greatest sum outstanding during the history of the national banks.

This amount is 64.6 per cent of the authorized capital stock of all the banks, or of the possible maximum of circulation, and is the highest percentage of possible circulation since 1882.

This increase in circulation is mainly due to the release of bonds deposited with the Treasurer of the United States to secure Government deposits which could find little other profitable use, and to the refunding of the older issues of bonds into the 2 per cent consols of 1930. The 2 per cent bonds have, in consequence, declined in price until the profit on circulation has proved so attractive as to lead to its great increase.

On the present capitalization of the banks, there is room for \$287,617,826 further increase in this circulation, and a possible demand for this amount of bonds. Of the \$580,429,000 2 per cent bond consols of 1930, outstanding on October 31, 1905, \$483,181,900 are deposited against circulation and \$44,243,600 against the Government deposits in the banks, leaving only \$53,003,500 which are not deposited with the Treasurer.

The bonds on deposit to secure circulation on October 31, 1905, were divided as follows:

Loan of 1908, threes	\$2,215,500
Loan of 1907, fours	4,050,300
Loan of 1925, fours	4,465,000
Consols of 1930, twos	483,181,900

From these figures it will be seen that for a further increase of circulation of the banks now organized and the new banks entering the system we shall have to depend upon the \$53,000,000 of 2 per cent bonds and whatever additional quantity of these bonds is made available.

through refunding operations, and the bonds to be issued for the Panama Canal, if they are given the same privilege as the other 2's, in regard to circulation.

In spite of the great increase in the volume of the national bank circulation, as shown by the figures in this report, and a considerable increase in the amount of money of all kinds in circulation, there has been within the last few weeks a very decided disturbance in the money market, call money having advanced to figures which were alarming. This has led to the usual call upon the Treasury Department to relieve this situation. Fortunately the demand has subsided, and rates have declined. That this should have occurred when every line of business in all parts of the country was in a most prosperous condition and there was abundant basis for all the credit needed to do the business required, is a most serious reflection upon banking and financial conditions in the United States. It but emphasizes again the necessity for the creation of some remedy or safety valve for our banking and financial machinery which could be used in case of such an emergency. No practical way has yet been suggested, of which the Comptroller is aware, which is not based upon adding elasticity to our currency.

With this in view, the Comptroller would again call attention to his recommendation, made in his annual report for 1902, on the subject of uncovered emergency bank notes. Several very good plans of this kind have been suggested, differing only in nonessential details.

The Comptroller would very respectfully but earnestly urge upon Congress the necessity for the adoption of some measure of this kind.

LIMITATION ON ISSUE OF FIVE-DOLLAR NOTES.

The Comptroller has several times called attention to the provisions of the law of March 14, 1900, limiting the amount of five-dollar notes any bank can issue to one-third of its circulation.

The purpose of this provision was evidently to keep the proportion of five-dollar bank notes in circulation below one-third of the whole amount. The official records show that without this limitation the proportion of notes of this denomination has never exceeded one-third, and since the limit was placed on them the proportion of five-dollar bank notes fell from 31 per cent in 1900 to 13.6 per cent October 31, 1904, and was 14.01 per cent October 31, 1905.

Most of the larger banks do not need any five-dollar notes, and so issue none. The smaller banks in the country districts, however, have a great demand for smaller bills, and it seems a useless hardship on them to limit the proportion of five-dollar bills which they may issue to meet the demand of their customers.

The Comptroller would therefore recommend that he be authorized to suspend the limitation on five-dollar notes issued by any one bank as long as the proportion of five-dollar bank notes in circulation does not exceed one-third of the circulation issued to all banks. This will afford a badly needed relief in some parts of the country, and is therefore very strongly urged.

LIMITATION ON REDUCTION OF CIRCULATION.

Section 9 of the act approved July 12, 1882, limits the amount of lawful money which may be deposited with the Treasurer of the

United States by national banks reducing their circulation to \$3,000,00 during any calendar month.

The repeal of this limitation, it is believed, would contribute materially to the elasticity of the currency. The principal causes which led to its enactment no longer exist as a reason for its continuance having been removed or corrected by subsequent legislation, as fully shown in the Comptroller's annual report to Congress for the year 1902.

The volume of national bank circulation should be governed by the business needs of the country. The banks should be as free to retire the whole or any part of their circulation during periods of redundancy as they are at liberty to increase their note issues in times of money scarcity. The uncertainty of being able to promptly retire their notes when demand for them has ceased deters many banks from increasing their circulation when such increase would be a material aid to the business needs of their respective communities during periods of commercial activity.

The only known objection to the unrestricted reduction of bank note circulation advanced in opposition to the repeal of the \$3,000,000 a month limitation is the fear of too great a contraction of the currency at a time when it would be detrimental to the business needs of the country. It is claimed that if the limitation is removed the bank would take advantage of every rise in the market by withdrawing and selling their bonds held as security for circulation in order to realize the greater profit in the increased premiums over that to be derived from circulation.

While this was one of the principal reasons which led to the adoption of the \$3,000,000 limitation, the act of March 14, 1900, minimized the temptation to indulge in operations of this character by increasing the issue of circulation from 90 per cent to par of the bonds, thereby giving the banks dollar for dollar of the face value of the bonds deposited, and reducing the incentive to engage in transactions of this nature to whatever profit might be represented by the difference between the price paid for and the fluctuating market value of the bonds.

The volume of circulation, however, does not appear to have been materially affected by operations of this kind, either before or since the adoption of the three-million limitation, either in periods of stringency or redundancy, and it is not believed that the repeal of this restrictive clause would result in any undue contraction of the currency in time of monetary stringency.

The volume of national-bank circulation should be governed by the law of supply and demand. The removal of the obstacle to the prompt retirement of currency when the supply exceeds the demand would induce the banks to immediately increase their note issues when the demand for circulation exceeds the supply, and the increased elasticity which such a result would give the currency is more to be desired than the danger of undue contraction is to be feared.

The Comptroller would therefore renew his recommendation that the \$3,000,000 limit on the retirement of circulation be repealed.

EXCESSIVE LOANS.

With the increase in the size of business houses and the magnitude of their operations there has come a necessity for larger loans from the banks; and unless a bank has an enormous capital, one-tenth of

is not sufficient to take care of the loans needed by any large customer, which the bank feels compelled to do to hold his business. The result of this is the very large number of excess loans reported. When such loans are discovered the banks are always notified that they must be reduced to the legal limit, and in most instances they are, even though they may soon reappear in new notes. The chief difficulty with the enforcement of this clause of the bank act is the lack of any reasonable penalty which can be imposed. There is no way to discipline an offender but the general clause authorizing the Comptroller to begin a suit for the forfeiture of the charter of any bank violating any of the provisions of the act. In other words, there is no penalty but death to the corporation for what is alone no more than a serious misdemeanor. The result of this is that in more than forty years no Comptroller has felt justified in invoking such a severe penalty. In most cases where the violations have been so excessive and flagrant as to justify closing a bank for excess loans, they have soon been closed through insolvency. In many cases where it was still possible to collect the loans the mere threat of a suit has led to their being collected, or at least taken out of the bank. But this is not as it should be. The law should be made reasonable and right, so it could and should be enforced, and then all banks should be made to live up to it strictly.

If the 10 per cent limit is too small, it should be changed to what is right and fair, and there should be some reasonable penalty put upon the violations of this clause, so the Comptroller could enforce obedience to it without such a proceeding as a suit in court for forfeiture of charter.

When the loan limit was originally placed at 10 per cent of the capital stock of the bank few banks had any large surplus. It was not expected that new banks then organizing would pay in surplus with their capital; and by many it is claimed that the capital was meant to include surplus, which only differed from it through a bookkeeper's entry, and that this is now the meaning and intent of the law. However that may be, it would seem if it is safe for a bank with \$500,000 capital and no surplus to loan \$50,000 it should be safe for one with \$250,000 capital and \$500,000 surplus to loan as much.

After much consideration and discussion of this subject with many able and conservative bankers and business men the Comptroller is satisfied that this is a reasonable view of it and that banks may safely loan 10 per cent of their unimpaired capital and surplus, and would recommend that the law be amended to that effect.

WM. B. RIDGELY,
Comptroller of the Currency.

THE SPEAKER OF THE HOUSE OF REPRESENTATIVES.

APPENDIX.

CUR 1905—5

65

No. 1.—COMPTROLLERS AND DEPUTY COMPTROLLERS OF THE CURRENCY, DATES OF APPOINTMENT AND RESIGNATION, AND STATES FROM WHENCE APPOINTED.

No.	Name.	Date of appointment.	Date of resignation.	State.
COMPTROLLERS OF THE CURRENCY.				
1	Hugh McCulloch	May 9, 1863	Mar. 8, 1865	Indiana.
2	Freeman Clarke	Mar. 21, 1865	July 24, 1866	New York.
3	Hiland R. Hulburd	Feb. 1, 1867	Apr. 3, 1871	Ohio.
4	John Jay Knox	Apr. 25, 1872	Apr. 30, 1884	Minnesota.
5	Henry W. Cannou	May 12, 1884	Mar. 1, 1885	Do.
6	William L. Trenholm	Apr. 20, 1886	Apr. 30, 1889	South Carolina.
7	Edward S. Lacey	May 1, 1889	June 30, 1892	Michigan.
8	A. Barton Hepburn	Aug. 2, 1892	Apr. 25, 1893	New York.
9	James H. Eckels	Apr. 26, 1893	Dec. 31, 1897	Illinois.
10	Charles G. Dawes	Jan. 1, 1898	Sept. 30, 1901	Do.
11	William Barret Ridgely	Oct. 1, 1901	Do.
DEPUTY COMPTROLLERS OF THE CURRENCY.				
1	Samuel T. Howard	May 9, 1863	Aug. 1, 1865	New York.
2	Hiland R. Hulburd	Aug. 1, 1865	Jan. 31, 1867	Ohio.
3	John Jay Knox	Mar. 12, 1867	Apr. 24, 1872	Minnesota.
4	John S. Langworthy	Aug. 8, 1872	Jan. 3, 1886	New York.
5	V. P. Snyder	Jan. 5, 1886	Jan. 3, 1887	Do.
6	J. D. Abrahams	Jan. 27, 1887	May 25, 1890	Virginia.
7	R. M. Nixon	Aug. 11, 1890	Mar. 16, 1893	Indiana.
8	Oliver P. Tucker	Apr. 7, 1893	Mar. 11, 1896	Kentucky.
9	George M. Coffin	Mar. 12, 1896	Aug. 31, 1898	South Carolina.
10	Lawrence O. Murray	Sept. 1, 1898	June 27, 1899	New York.
11	Thomas P. Kane	June 29, 1899	District of Columbia.

NO. 2.—NAMES AND COMPENSATION OF OFFICERS AND CLERKS IN THE OFFICE
THE COMPTROLLER OF THE CURRENCY, OCTOBER 31, 1905.

Name.	Grade.	Salary.

No. 18.—DECREASE OR INCREASE OF NATIONAL-BANK CIRCULATION DURING EACH OF THE YEARS ENDED OCTOBER 31, 1898 TO 1905, INCLUSIVE, AND THE AMOUNT OF LAWFUL MONEY ON DEPOSIT AT THE END OF EACH YEAR.

Net circulation outstanding October 31, 1897.....		\$203, 925, 680
National-bank notes outstanding October 31, 1898, including notes of national gold banks.....	\$239, 629, 136	
Less lawful money on deposit at same date, including deposits of national gold banks.....	29, 583, 680	
		<u>210, 045, 456</u>
Net increase of circulation		6, 119, 776
Net outstanding as above October 31, 1898.....		210, 045, 456
National-bank notes outstanding October 31, 1899, including notes of national gold banks.....	243, 066, 624	
Less lawful money on deposit at same date, including deposits of national gold banks.....	35, 145, 850	
		<u>207, 920, 774</u>
Net decrease of circulation		2, 124, 682
Net outstanding as above October 31, 1899.....		207, 920, 774
National-bank notes outstanding October 31, 1900, including notes of national gold banks.....	331, 693, 412	
Less lawful money on deposit at same date, including deposits of national gold banks.....	32, 864, 348	
		<u>298, 829, 064</u>
Net increase of circulation		90, 908, 290
Net outstanding as above October 31, 1900.....		298, 829, 064
National-bank notes outstanding October 31, 1901, including notes of national gold banks.....	359, 911, 683	
Less lawful money on deposit at same date, including deposits of national gold banks.....	31, 713, 070	
		<u>328, 198, 613</u>
Net increase of circulation		29, 369, 549
Net outstanding as above October 31, 1901.....		328, 198, 613
National-bank notes outstanding October 31, 1902, including notes of national gold banks.....	380, 476, 334	
Less lawful money on deposit at same date, including deposits of national gold banks.....	44, 693, 145	
		<u>335, 783, 189</u>
Net increase of circulation		7, 584, 576
Net outstanding as above October 31, 1902.....		335, 783, 189
National-bank notes outstanding October 31, 1903, including notes of national gold banks.....	419, 610, 683	
Less lawful money on deposit at same date, including deposits of national gold banks.....	38, 959, 862	
		<u>380, 650, 821</u>
Net increase of circulation		44, 867, 632
Net outstanding as above October 31, 1903.....		380, 650, 821
National-bank notes outstanding October 31, 1904, including notes of national gold banks.....	457, 281, 500	
Less lawful money on deposit at same date, including deposits of national gold banks.....	32, 750, 919	
		<u>424, 530, 581</u>
Net increase of circulation		43, 879, 760
Net outstanding as above October 31, 1904.....		424, 530, 581
National-bank notes outstanding October 31, 1905, including notes of national gold banks.....	524, 508, 249	
Less lawful money on deposit at same date, including deposits of national gold banks.....	34, 470, 443	
		<u>490, 037, 806</u>
Net increase of circulation		65, 507, 225

NO. 19.—NATIONAL-BANK NOTES OUTSTANDING, THE AMOUNT OF LAWFUL MONEY ON DEPOSIT WITH THE TREASURER OF THE UNITED STATES TO REDEEM NATIONAL-BANK NOTES, AND THE KINDS AND AMOUNTS OF UNITED STATES BONDS ON DEPOSIT TO SECURE CIRCULATION AND PUBLIC DEPOSITS ON OCTOBER 31, 1905, WITH THE CHANGES DURING THE PRECEDING YEAR AND THE PRECEDING MONTH.

National-bank notes, lawful money.	Circulation based on U. S. bonds.		Circulation secured by lawful money.		Total circulation.	
	Oct. 31, 1904.	Sept. 30, 1905.	Oct. 31, 1904.	Sept. 30, 1905.	Oct. 31, 1904.	Sept. 30, 1905.
Total amount outstanding at the dates named at top of column	\$424, 530, 581	\$481, 688, 526	\$32, 750, 919	\$34, 663, 714	\$457, 281, 500	\$516, 352, 240
Additional circulation issued during the intervals					90, 753, 284	10, 831, 592
To new banks	16, 760, 600	2, 144, 660				
To banks increasing circulation	73, 992, 684	8, 686, 932				
Lawful money deposited since dates named at top of column					24, 451, 585	2, 578, 845
By insolvent banks			910, 065	212, 600		
By liquidating banks			11, 900, 509	1, 316, 567

NOTE 1.—Specie payments were suspended from Jan. 1, 1862, to Jan. 1, 1879. During the greater part of that period gold and silver coins were not in circulation except on the Pacific coast, where, it is estimated, the specie circulation was generally about \$25,000,000. This estimated amount is the only coin included in the above statement from 1862 to 1875, inclusive.

NOTE 2.—In 1876 subsidiary silver again came into use, and is included in this statement, beginning with that year.

NOTE 3.—The coinage of standard silver dollars began in 1878 under the act of Feb. 28, 1878.

NOTE 4.—Specie payments were resumed Jan. 1, 1879, and all gold and silver coins, as well as gold and silver bullion in the Treasury, are included in this statement from and after that date.

United States deposits.....		1.9
Due to other banks.....		.6
Unpaid drafts outstanding.....		.2
Total.....	23.5	24.2

TABLE XVIII.

RESOURCES AND LIABILITIES OF THE SECOND BANK OF THE UNITED STATES.

[Chartered by Congress in 1816, for twenty years; renewal of charter denied; in consequence, reorganization was effected by means of authority of the legislature of the State of Pennsylvania. The bank assigned in 1841, the affairs being finally liquidated in 1856, and resulted in the payment in full, interest and principal, of liabilities to depositors and note holders; the shareholders, however, received nothing on their investment in stock of the bank.]

[In millions of dollars.]

NOTE.—Gold was first quoted at par on December 19, 1878.

The average rates of gold and currency for each month, as given in the above tables, was obtained as follows:

Four daily quotations of the rates of gold at New York, viz, the Opening, Closing, Highest, and Lowest, were recorded, from which a daily average was made, and the average rate for each month was prepared from these daily averages.
