As will be noted from the foregoing statement, 6,137 national banking associations, with aggregate resources of \$8,016,021,066, were in active operation on September 4. Over three-fourths of the resources of the banks are in loans, bonds, securities, etc., and lawful money, the loans amounting to \$4,298,983,316; United States bonds on deposit to secure circulation, \$524,036,980; Government loans, \$97,171,580; and held in bank, \$7,588,150; other bonds and securities, \$701,240,755; specie, \$464,437,290; legal-tender notes, \$161,575,120. The paid-in capital stock is shown to be \$835,066,796; surplus, \$490,245,134; other undivided profits, \$180,569,857; circulating notes outstanding, \$517,964,511; individual deposits, \$4,199,938,310; United States deposits and deposits of United States disbursing officers, \$107,831,813.

Since August 25, 1905, the date of the corresponding call, increases have occurred as follows: Loans and discounts, \$300,474,163; United States bonds, \$77,315,040; capital stock, \$35,196,567; surplus and

other profits, \$50,521,023, circulation outstanding, \$48,984,722, individual deposits, \$379,256,597. The amount of specie and legal-tender notes held on September 4, 1906, was \$39,540,889 less than on August 25, 1905, and the amount due to other banks and bankers was less to the extent of \$35,876,120. The abstracts further show that from November 9, 1905, there was a gradual increase in the volume of loans from \$4,016,735,497 to \$4,298,983,316 on September 4, 1906. Individual deposits amounting to \$3,989,522,834 at the beginning of this period increased to the extent of \$99,000,000 by January 29, 1906; fell off to the extent of \$110,000,000 on April 6, but between that date and June 18 increased \$77,000,000, and from that date to September 4 increased \$144,000,000. The total increase in individual deposits from November 9, 1905, to September 4, 1906, was approximately \$210,400,000.

LOANS AND DISCOUNTS.

Periodical reports of condition made to this office by national banking associations show the amount and character of loans, classified as demand paper, with one or more individual or firm names; demand paper collateralized by stocks, bonds, and other securities; time paper, with two or more individual or firm names; time paper, single name, and time paper secured by stocks, bonds, etc.

The amount of loans and discounts on September 4, 1906, was \$4,298,983,316, of which \$1,016,793,343 were held by the 61 banks in the reserve cities of New York, Chicago, and St. Louis. Accommodations of this character granted by the 295 banks in the 38 reserve cities amounted to \$1,161,984,189. The total for banks in both classes of reserve cities was \$2,178,777,532, divided as follows: Demand, single-name paper, \$171,787,594; demand, secured by stocks, bonds, etc., \$621,324,914; time paper, with two or more individual or firm names, \$571,779,482; time paper, single name, \$406,430,691; time paper secured by stocks, bonds, etc., \$407,454,851.

Loans granted by the 5,781 country banks aggregated \$2,120,205,784, classified as follows: Demand, single-name paper, \$202,901,651; demand paper, with collateral, \$206,691,820; time paper, two or more individual or firm names, \$930,255,416; time paper, single name, \$369,694,410; time paper, with collateral, \$410,662,487.

The amount and percentage of each class of loans shown by the reports made nearest to October 1, 1896, 1905, and 1906 are exhibited in the following table:

Class.	1896.		1905.		1906.	
	Amount.	Per cent.	Amount.	Per cent.	Amount.	Per cent.
On demand, paper with one or more individual or firm names.....	\$101,743,561	5.4	\$520,052,942	8.0	\$574,689,245	8.7
On demand, secured by stocks, bonds, and other personal securities.....	259,231,822	13.8	854,115,721	21.3	828,016,734	19.3
On time, paper with two or more individual or firm names.....	879,696,235	47.0	1,382,258,561	24.5	1,502,034,898	35.0
On time, single name paper (one person or firm) without other security.....	268,257,365	14.3	689,124,687	17.2	776,125,101	18.0
On time, secured by stocks, bonds, and other personal securities, or on mortgages or other real-estate security.....	367,662,733	19.5	752,956,941	19.0	818,117,358	19.0
Total.....	1,876,591,716	3,998,509,152	4,298,983,316

The amount and percentage of loans on September 4, 1906, of national banks in New York city, the three central reserve cities, other reserve cities, and elsewhere, are shown in the accompanying table, in which appears also a corresponding statement from the returns on August 25, 1905, and September 6, 1904. It will be noted that the banks located in the reserve cities held on September 4, 1906, but 50.7 per cent of the volume of loans as against 53.8 per cent in 1905 and 53.9 per cent in 1904.

The table in question follows:

Banks in—	September 4, 1906.		August 25, 1905.		September 6, 1904.	
	Loans.		Loans.		Loans.	
	Amount.	Per cent.	Amount.	Per cent.	Amount.	Per cent.

Sept. 4, 1906.....	6,137	374.7	823.0	1,502.0	776.1	818.1	4,299.0

RESERVE.

With the abstract of reports of condition of national banks at each call is presented a statement of the amount of deposits on which reserve is required, together with a classification of, and the amount and per cent of reserve held. National banks located in the central reserve cities—New York, Chicago, and St. Louis—are required to hold a cash reserve of 25 per cent; banks in other reserve cities 25 per cent, of which, however, one-half may be deposited to their credit with central reserve city banks; and 15 per cent by banks not located in reserve cities, three-fifths of which reserve may consist of balances due from approved correspondents in central or other reserve cities.

On November 9, 1905, the deposit liabilities of banks were \$4,667,-325,425 and the reserve held \$988,293,963, or 21.17 per cent. The

New York city national banks held a reserve of 25.26 per cent, but the deficiency in the other central reserve cities brought the average of the three cities down to 24.55, and while the other reserve city banks held a reserve ranging from 21.23 to 32.40, the average for these cities was but 24.77. The average reserve held by country banks was 2.30 per cent in excess of the requirement. On January 29, 1906, the average reserve for the central reserve city banks was 26.51; other reserve city banks 25.70, making the average for both classes 26.09. The average for the country banks was 17.03. On April 6, 1906, the reserve held by the central reserve city banks averaged 24.60 per cent and that of other reserve city banks 24.69, an average for both classes of 24.64. The average for the country banks exceeded the requirement by 2.07 per cent. The June 18, 1906, statement shows the average reserve held by the central reserve city banks to have exceeded the requirement by 0.95 of 1 per cent; Chicago and St. Louis banks were deficient, but the excess of New York City banks made the average for all good. The other reserve city banks had an average reserve of 25.42 per cent and the country banks 16.77. On September 4, 1906, the deposit liabilities of all the banks aggregated \$4,927,865,451, and the reserve held \$1,020,168,046, the average being 20.70 per cent. The average reserve held by all banks in the central and other reserve cities was deficient, amounting to 24.37 and 24.52 per cent, respectively. The average reserve of the country banks was 16.71 per cent.

RELATION OF CAPITAL TO OTHER ITEMS.

In connection with the general statements in relation to the condition of national banks it is interesting to note changes which have occurred in the relation of capital, etc., to individual deposits, etc. The table appended is based upon the reports made to this office on or about September, 1896, 1905, and 1906. As will be noted the ratio of capital to individual deposits in 1896 was as \$1 to \$2.46; in 1905, \$1 to \$4.78; in 1906, \$1 to \$5.03 and, including with capital, surplus and other undivided profits, the ratios were in 1896, \$1 to \$1.62; 1905, \$1 to \$2.66; 1906, \$1 to \$2.77. The proportion of capital to aggregate resources has gradually decreased from \$1 to \$5.03 in 1896 to \$1 to \$9.60 in 1906. The relation of specie and legal tender notes to individual deposits varied from \$1 to \$5.13 in 1896 to \$1 to \$5.74 in 1905 and to \$1 to \$6.71 in 1906. The variations in the ratios relating to banks located in New York City have not been so marked, as the ratio of capital to individual deposits of banks in that city in 1896 was as \$1 to \$5.48 and in 1906 \$1 to \$6.22. The ratio of capital to aggregate resources in 1896 was \$1 to \$11.56 and in 1906 \$1 to \$13.92. The proportion of capital, surplus and other undivided profits to individual deposits was as \$1 to \$2.49 in 1896 and as \$1 to \$2.77 in 1906. The ratio which shows the least change is in respect to specie and legal tenders as compared with individual deposits. In 1896, for each \$3.22 of individual deposits, the banks held \$1 in lawful money and in 1906 \$1 was held against each \$3.31 of individual deposit liabilities.

The table relating to all national banks follows:

RATIOS OF CAPITAL, ETC., TO INDIVIDUAL DEPOSITS, ETC., OF NATIONAL BANKS
IN SEPTEMBER, 1896, 1905, AND 1906.

Items.	1896.	1905.	1906.
Capital to individual deposits	\$1.00 to \$2.46	\$1.00 to \$4.78	\$1.00 to \$5.03
Capital to loans	1.00 to 2.92	1.00 to 5.00	1.00 to 5.15
Capital to aggregate resources	1.00 to 5.03	1.00 to 9.34	1.00 to 9.60
Capital and surplus and other profits to individual deposits	1.00 to 1.62	1.00 to 2.66	1.00 to 2.77
Specie and legal tenders to individual deposits	1.00 to 5.13	1.00 to 5.74	1.00 to 6.71

The relative proportion of the principal items of resources and liabilities to the aggregate resources of national banks at date of reports nearest to October 1, from 1900 to 1906, inclusive, is shown in the following table:

Items.	1900.	1901.	1902.	1903.	1904.	1905.	1906.
	<i>Per cent.</i>	<i>Per cent.</i>	<i>Per cent.</i>	<i>Per cent.</i>	<i>Per cent.</i>	<i>Per cent.</i>	<i>Per cent.</i>
Loans and discounts	53.2	53.0	53.7	55.2	53.4	53.9	54.0

CAPITAL, BONDS, AND CIRCULATION.

During the year ended October 31, 1906, there was a gross increase of \$49,935,500 in the authorized capital stock of national banks, of which \$28,517,000 was from old banks increasing their capital, and \$21,418,500 from newly chartered banks. The loss of capital was \$15,409,800, which includes \$13,223,000 by associations placed in voluntary liquidation and as a result of expiration of the corporate existence of two associations; \$1,536,800 by banks reducing their capital, and \$650,000 by insolvent national banks. The net increase as a result of these changes was \$34,525,700, but this includes \$612,000, the capital of banks closed but for which lawful money has not been deposited for the retirement of circulation and release of bonds on deposit as security therefor. The books of the office show the actual net increase as \$33,913,700.

The average authorized capital of the 6,225 national banks in operation October 31, 1906, was \$135,895 as against an average of \$170,000 for the 3,617 banks in existence on March 14, 1900. This reduction is the result of the organization of 2,062 national banks under authority of the act of March 14, 1900, the minimum capital authorized being \$25,000, but the average was approximately \$26,000. The average capital of the 1,095 banks organized under the act of 1864, but since March 14, 1900, was \$115,722, making an average for the 3,157 banks incorporated from March 14, 1900, to October 31, 1906, of \$57,480.

The authorized capital stock of national banks at the close of the current report year was \$845,939,775; bonds on deposit as security for circulation, \$539,653,180; circulation outstanding secured by bonds, \$536,933,169; circulation secured by deposits of lawful money, by banks reducing their circulation, those placed in voluntary liquidation, and on account of insolvent national banks, \$46,238,816, making the aggregate circulation outstanding \$583,171,985. Bonds on deposit as security for circulation are as follows: Two per cent consols of 1930, \$492,170,650; Panama Canal bonds, \$14,482,080; fours of 1907, \$25,124,650; fours of 1925, \$4,602,100; threes of 1908, \$3,273,700. The consols of 1930 and the Panama Canal bonds represent approximately 94 per cent of the bonds on deposit as security for circulation. The highest and lowest market prices of 2 per cent consols of 1930 in October were 104½ and 104¼; Panama Canal bonds,

105 and 104½; fours of 1907, 102½ and 102¾; fours of 1925, 131½ and 130½; threes of 1908, 103 and 102½.

The number of national banks in operation, authorized capital stock, bonds on deposit to secure circulation, circulation secured by bonds and by lawful money, total amount of circulation outstanding, and the average monthly market price of 2 per cent consols from November 1, 1905, to October 31, 1906, are shown in the accompanying table.

	Number of banks.	Capital.	Bonds on deposit.	Average monthly price of bonds.	Circulation secured by—		Total circulation outstanding.

CLASSIFICATION OF BANKS BY CAPITAL STOCK.

By reference to the subjoined table it will be noted that 50 per cent of the number of banks in existence, representing one-fourth of the capital stock, are of the class with capital of \$50,000 to \$100,000, inclusive, and that nearly 28 per cent of the capital, representing 7 per cent in number, is with banks having individual capital of over \$250,000 to \$1,000,000, inclusive. Nearly 16 per cent of the capital is represented by approximately 12 per cent of banks with capital of \$100,000 to \$250,000, inclusive. Approximately 1 per cent of the banks with capital in excess of \$1,000,000 represent nearly 25 per cent of the aggregate capital. Of the smallest class, those with capital of less than \$50,000, there are 1,831 associations, nearly 30 per cent of the number, but with only 5.72 per cent of the capital stock. The table in question is as follows:

Capital, classified.	Number of banks.	Percent.	Capital.	Percent.
Less than \$50,000.....	1,831	29.41	\$48,196,500	5.72
\$50,000 to \$100,000, inclusive.....	3,166	50.86	222,381,220	26.39
Over \$100,000 to \$250,000, inclusive.....	719	11.55	131,316,435	15.58
Over \$250,000 to \$1,000,000, inclusive.....	445	7.15	234,506,920	27.83
Over \$1,000,000 to \$5,000,000, inclusive.....	58	.93	125,280,700	14.87
Over \$5,000,000.....	6	.10	81,000,000	9.61
Total.....	6,225	100.00	842,681,775	100.00

Amount and kinds of bonds on deposit to secure circulation on March 13, 1900, and on October 31, 1902, to 1906, inclusive, are shown in the following table:

Class.	Mar. 13, 1900.	Oct. 31, 1902.	Oct. 31, 1903.	Oct. 31, 1904.	Oct. 31, 1905.	Oct. 31, 1906.

The percentage of outstanding circulation to the paid-in capital of national banks, as shown by reports of condition, periodically, from January, 1866, to December, 1885, materially exceeded 50 and ranged from a maximum of 70.3 at the close of 1868 to 50.5 at the close of 1885. From the latter date there was a gradual decrease to 18.4 in July, 1891. From October, 1893, to March, 1895, the average was approximately 25 per cent, and thereafter a steady and slight increase to 33.8 per cent in December, 1899. The act of March 14, 1900, resulted in an increase of the rate to 38.3 per cent on April 26 of that year, and 47.3 at the close of the year. With the exception of July, 1902, when the rate was 44 per cent, the proportion of circulation to capital has exceeded 45 per cent since the date last named, and reached a maximum of 62.03 per cent in September, 1906.

Distribution of national-bank circulation, based on reports of condition during the year ended September 4, 1906, is shown in the following table in its relation to the amounts issued by national banks located in reserve cities and elsewhere:

Date.	New York.	New York, Chicago, and St. Louis.	Other reserve cities.	All reserve cities.	Country.	Total.
1905.	Millions.	Millions.	Millions.	Millions.	Millions.	Millions.
November 9.....	55.2	74.8	106.5	181.3	304.2	485.5
1906.						
January 29.....	52.9	76.2	108.1	184.3	313.9	495.2
April 6.....	52.5	75.9	110.9	186.8	318.7	505.5
June 18.....	49.3	73.3	113.5	186.8	324.1	510.9
September 4.....	45.7	69.7	116.5	186.2	331.7	517.9

Amount of each denomination of circulation outstanding on October 31, 1906, the amount previously issued, together with total redemptions, are shown in the following table:

Denominations.	Issued during the year.	Issued previ- ous years.	Total issued to Oct. 31, 1906.	Total redeemed to Oct. 31, 1906.	Outstanding Oct. 31, 1906.

^a Excluding \$75,185 gold bank notes.

During the year ended October 31, 1906, notes to the amount of \$278,550,060 were received for redemption at the United States Treasury redemption agency, of which \$203,247,874 were delivered to the Comptroller of the Currency for destruction, \$177,851,593 of the latter amount being replaced by new notes; \$12,912,870 redeemed and destroyed as a result of reduction of circulation, and \$12,142,389 redeemed and destroyed on account of insolvent and liquidating banks. In addition to the amount stated, notes aggregating \$341,022 were received by the Comptroller direct from national banks for redemption without reissue.

Nearly one-third of the notes received for redemption at the agency were in condition to warrant their return to the issuing banks upon redemption, the amount returned being \$77,523,750. About 86 per cent of the receipts for redemption came from banks located in the reserve cities and nearly 50 per cent from banks located in the city of New York. The amount and per cent of receipts from the principal reserve cities were as follows:

Reserve cities.	Amount.	Per cent.
New York.....	\$136,252,360	48.9
Chicago.....	26,965,300	9.7
Boston.....	20,710,985	7.4
Philadelphia.....	19,276,901	6.9
St. Louis.....	13,233,105	4.8
Baltimore.....	10,256,200	3.7
Cincinnati.....	8,167,500	2.9
New Orleans.....	5,814,500	2.1
Total.....	230,677,251	86.4

The law limits the retirement of national-bank circulation by the deposit of lawful money to \$3,000,000 in any one calendar month. Beginning with January, 1906, applications to retire circulation exceeded the limit each month, but the aggregate amount of circulation retired in this manner from November 1, 1905, to October 31, 1906, was but \$20,686,400. Deposits to retire circulation of insolvent and liquidating banks and the coincident withdrawal of bonds to a like amount aggregated \$31,980,090.

The relative proportion of national-bank circulation to aggregate currency of the country was greatest in 1873, namely, 43.7 per cent, but with the increase in the coinage of gold and silver the ratio steadily declined to 7.3 per cent in 1891. From this low point there was a very gradual rise and in June, 1906, 16.6 per cent was reached and, coincidentally, the percentage of circulation to capital reached a higher rate (61.8) than in any year since 1883, when it stood at 63.7.

In 1900 circulating notes of the denomination of \$5 amounted to approximately one-third of the outstanding issues. As a result of the legislation of March 14 of that year, limiting the amount of five-dollar notes issuable by any one bank, the percentage steadily declined to 13.6 per cent in 1903 but increased to 14.01 per cent in 1905 and to 15.63 per cent on October 31, 1906. As an aid to the issue of the largest amount possible of notes of the lower denominations, and without permitting a deviation from the provisions of the act of March 14, 1900, during the past year the Department authorized the engraving of an additional plate for the printing of four notes of the denomination of \$10. Theretofore, under departmental

regulations, notes could be printed only from one or more of three sets of plates, namely, four \$5's, three \$10's and a \$20, and a \$50 and \$100. It should be stated, however, that the use of the four-\$10 plate has not been in effect long enough to result in a material increase in the amount of notes issued of that denomination.

PROFIT ON CIRCULATION.

The profit on, as well as the flexibility of, national-bank circulation depends upon the cost of bonds deposited as security therefor. The average net price, monthly, of 2 per cent consols of 1930 fluctuated during the year from a minimum of 103.075 in February, 1906, to 103.95 in July, 1906. In August the price rose to 104.756, in September to 105.090, but declined in October to 104.221. At the minimum price of bonds during the year, 103.075 in February, the profit on circulation was 1.160 per cent. At the market price of bonds in September, namely, 105.090, the profit is reduced to 0.982 per cent. The average rate of profit, based on the average cost of bonds, monthly, during the year ended October 31, 1906, was 1.09 per cent. In estimating the profit on circulation 6 per cent is taken as the rate for money. From the gross receipts, interest on bonds at 2 per cent and on circulation at 6 per cent, taxes, expenses for redemptions, and sinking fund are deducted to determine the net receipts. The difference between net receipts and interest on cost of bonds at 6 per cent is the measure of profit over the cost price of bonds invested at 6 per cent. Upon circulation secured by \$100,000 2 per cent bonds at 104.221, the average market price in October, gross receipts are \$8,000, taxes, etc., \$646, making net receipts \$7,354. Interest on the cost of the bonds at 6 per cent amounts to \$6,253.26, resulting in an excess profit on the issue of circulation to the amount stated of \$1,100.74 or 1.056 per cent.

BANKS WITHOUT CIRCULATION.

At the close of the year ended October 31, 1905, there were 8 national banks in operation, with aggregate capital of \$2,625,000 and bonds on deposit with the Treasurer of the United States in trust of \$181,250, which had no circulating notes outstanding. At the close of the current year the number of nonissuing-note banks was reduced to four, with capital and bonds of \$280,000 and \$70,000, respectively.

EARNINGS AND DIVIDENDS.

In the year ended March 1, 1906, shareholders of national banks were paid dividends to the amount of \$80,831,561 on \$779,544,247 capital, the average rate being 10.4 per cent, the highest since 1870. Based on capital and surplus the ratio was 6.8 per cent. The net earnings were \$113,662,529, or 9.5 per cent, of the combined capital and surplus. The average rate of dividends paid by national banks annually from 1870 to 1906, 37 years, was 8.42 per cent. The aggregate net earnings of the banks during the period in question were \$2,313,396,556, from which dividends were paid to the amount of \$1,780,712,714, which is over three times the average annual capital.

As the act providing for the submission to this office of semiannual

reports of earnings and dividends was enacted in March, 1869; from that date to the present time the reports have been compiled and published for the six months periods ending March 1 and September 1. By reason of the fact that the dividend periods for the large majority of banks end on June 30 and December 31, in future the returns will be compiled and published for the six months ending on those dates.

EXPENSES.

The expenses of national banks, in so far as this Department is concerned, during the fiscal year ended June 30, 1906, were as follows: Semiannual duty on circulation, \$2,509,977.80; examiners' fees, \$396,766.23; cost of redemption of notes by the Treasurer of the United States, \$250,924.24; cost of plates for new banks, \$54,150; cost of plates for extended banks, \$31,450; the aggregate being \$3,243,268.27. The cost of redemption of circulating notes per thousand dollars was 84.528 cents. The cost per thousand in 1905 was 80.993 cents. During the existence of the system national banking associations have paid \$98,730,906 in tax on circulating notes; from 1874 to 1906, for expenses in connection with redemption of circulating notes, \$5,461,959; for examiners' fees, 1883 to 1906, \$5,094,273; cost of plates for the printing of circulating notes, \$981,530. In addition to these amounts taxes were paid on capital to June 1, 1883, and under the war-revenue act of 1898, amounting to \$14,904,301, and on deposits to June 1, 1883, \$60,940,067, the total payments for all purposes enumerated being \$186,113,036. These payments are stated in the following table:

Expenses.	Amount.
Redemption of circulating notes from 1874 to 1906.....	\$5, 461, 959
Cost of original plates, 1883 to 1906.....	581, 910
Cost of extension plates, 1883 to 1906.....	399, 620
Fees for examination authorized by section 3240, United States Revised Statutes, 1883 to 1906.....	5, 094, 273
Total.....	11, 537, 762
Tax paid on capital to June 1, 1883, and under war-revenue act of 1898.....	14, 904, 301
Tax paid on deposits to June 1, 1883.....	60, 940, 067
Duty paid on circulation to June 30, 1906.....	98, 730, 906
Total.....	186, 113, 036

GAIN ON NATIONAL-BANK NOTES NOT PRESENTED FOR REDEMPTION.

From the date of the first issue of national-bank circulation in 1863 to October 31, 1906, notes to the amount of \$3,566,012,225 were issued; \$2,982,955,511 redeemed, leaving outstanding on the latter date \$583,056,714, of which \$46,238,816 is covered by deposits of lawful money with the Treasurer of the United States from which the notes are redeemed as presented. Under the law any gain that may arise from the failure to present notes for redemption inures to the benefit of the United States. An examination of the records discloses the fact that from the beginning of the system up to October 31, 1872, 119 associations were closed, 98 by voluntary liquidation, and 21 by failure; further, that the notes issued by these associations aggregated \$13,351,233, and that of these issues there is still outstanding \$100,488,

or seventy-five one-hundredths of 1 per cent. The fact that during the past year notes to the amount of \$635 were presented for redemption, which were issued over thirty-five years ago, makes it impossible to state the percentage of such notes which will never be presented for redemption. Some years since an estimate was made by the Department in relation to the percentage of Government and national-bank notes that would never be presented for redemption, and which would represent the measure of the gain that would inure to the Government. It was then estimated that the proportion of nonpresented notes would not exceed two-fifths of 1 per cent. From the records hereinbefore presented it would appear probable that the gain on nonpresented national-bank notes will not exceed one-half of 1 per cent and may possibly be reduced to two-fifths of 1 per cent.

CHANGES IN CORPORATE TITLES.

Under authority of the provisions of the act of May 1, 1886, 14 national banks changed their corporate titles during the year, change of location within the 30-mile limit occurring in one instance. By special act of Congress the American National Bank of Graham, Va., was removed to Bluefield, W. Va., and the title changed by the substitution of the word "Bluefield" for "Graham."

The associations concerned in these changes are shown in the following table:

No.	Title and location.	Date.
		1905.
1274	"The Marthas Vineyard National Bank of Edgartown," Mass., to "The Marthas Vineyard National Bank of Tisbury," Mass.	Nov. 15
7852	"The First National Bank of Saries," N. Dak., to "The First National Bank of Adams," N. Dak.	Dec. 15
		1906.
1009	"National Metropolitan Citizens Bank of Washington," D. C., to "The National Metropolitan Bank of Washington"	Jan. 10
7017	"The Lodi National Bank," Lodi, Ohio, to "The Exchange National Bank of Lodi"	Jan. 12
6714	"The Roswell National Bank," Roswell, N. Mex., to "American National Bank of Roswell"	Jan. 15
3458	"The First National Bank of Eugene City," Oreg., to "The First National Bank of Eugene"	Feb. 16
5604	"The Hereford National Bank," Hereford, Tex., to "The First National Bank of Hereford"	Feb. 17

EXTENSIONS OF CORPORATE EXISTENCE.

During the past year the corporate existence of 124 national banking associations was extended, of which 102 were effected under the act of July 12, 1882, and 22 under the act of April 12, 1902, banks in the latter class having reached the completion of their second period of succession.

Subsequent to July 12, 1882, and under authority of the act of that date, the corporate existence of 2,450 associations, with aggregate capital of \$519,261,365, have been extended. Since April 12, 1902, 957 associations, with capital of \$317,284,365, have extended their charters for a further period of twenty years. During the year ending October 31, 1907, the corporate existence of 138 banks, with capital of \$18,595,000, will expire and may be extended under the act of July 12, 1882, and in the same year four associations, with aggregate capital of \$950,000, will reach the period when their charters may be extended for a second time under the act of April 12, 1902. The names of banks in both classes, with the dates of expiration of existing charters, will be found in the appendix to this report.

LIQUIDATIONS AND CONSOLIDATIONS.

Including 2 associations whose charters expired by limitation, 81 national banks, with capital of \$13,223,000, were placed in voluntary liquidation during the past year. Four of the banks in the list, however, were closed prior to October 31, 1905, but not reported until subsequent to that date. Of these liquidated banks 22, with capital of \$3,612,000, were closed to consolidate with other national banks, the capital of the latter prior to consolidation being \$5,270,000 and subsequent thereto \$7,190,000. Two associations with capital of \$363,000 were reorganized, with authorized capital of \$1,050,000; 45 banks, with capital of \$8,735,000, were reorganized as state institutions or succeeded or absorbed by banks of that character; 12 associations, with capital of \$513,000, are reported to have been liquidated to close business.

The liquidating national banks, with date of authority to begin business, date of closing, capital stock, circulation issued, redeemed, and outstanding, are listed in the accompanying table:

NATIONAL BANKS PLACED IN LIQUIDATION.

Name and location of bank.	Date of authority to commence business.	Date of closing.	Capital stock.	Circulation.

^a Resumed business Jan. 29, 1906.

^b Resumed business July 17, 1906.

^c Resumed business Apr. 30, 1906.

^d Resumed business Oct. 15, 1906.

By reference to the foregoing statement it will be noted that the capital and outstanding circulation of the 12 associations listed were \$830,000 and \$253,670, respectively. It further appears from the examination of reports of condition made to this office prior to closing that the liabilities of the banks to depositors and other creditors aggregated \$1,656,796. Four of the associations listed, with combined capital of \$150,000, having been restored to solvency, were permitted to resume business and the receivers discharged. Of the remaining eight banks in the list three have paid dividends to creditors to the extent of 50 per cent, one 35 per cent, and one 100 per cent, together with 2.9 per cent of interest. In addition to the 50 per cent dividend paid by one of the banks in the list up to October 31, a final dividend was subsequently declared in full payment of all claims.

Transactions effected during the year show collections from assets of \$8,988,860 and dividends paid \$8,840,327. Nonliquidated assets of the nominal value of \$15,933,698 are still held, being a reduction of \$9,314,322 since October 31, 1905. The Comptroller and receivers have on hand, to the credit of the trusts, cash to the amount of \$1,031,796. The collections made and dividends paid during the year were materially greater than in any similar period since 1900.

Since the beginning of the national banking system, banks to the number of 468 have been placed in the charge of receivers, with capital stock aggregating \$75,417,420. Assessments amounting to \$43,018,240 were made upon the shareholders, and assets of the non-

inal value of \$295,112,058 were taken charge of by receivers, classified as "good" \$143,666,558, "Doubtful" \$90,205,825, and "worthless" \$61,239,675.

The disposition of assets was as follows:

Collections	\$144, 209, 902
Offsets allowed and settled	22, 153, 295
Losses (assets compounded or sold under order of court).....	103, 302, 481
Returned to shareholders.....	9, 512, 682
Remaining on hand.....	15, 933, 698
Total.....	295, 112, 058

In addition to collections from assets, there was realized from assessments upon shareholders \$20,288,907. These collections have been disposed of as follows:

Loans paid and other disbursements.....	\$32, 583, 458
Dividends paid.....	116, 048, 921
Legal expenses	4, 453, 299
Receivers' salaries and other expenses.....	7, 754, 569
Returned to shareholders.....	2, 626, 768
Balance held by Comptroller or receivers.....	1, 031, 796
Total.....	164, 498, 811

The record of every national bank which failed and was placed in charge of a receiver from the first failure in 1805 will be found in the appendix, showing the date of appointment of receiver, capital stock, dividends paid prior to failure, cause of failure, circulation issued, redeemed, and outstanding, lawful money deposited to redeem circulation, the amount of assets, collections therefrom and from stockholders, dividends paid, expenses incident to liquidation, etc., and also similar information relating to each insolvent national bank fully liquidated up to and including October 31, 1906.

RECEIVERSHIPS TERMINATED.

Within the past twelve months the affairs of 15 national banks theretofore placed in the charge of receivers were fully settled by the payment of final dividends to creditors, leaving 71 pending trusts.

Of the three largest banks the affairs of which were closed during the year, two—the Central National Bank of Boston, Mass., and the First National Bank of Macon, Ga.—paid their creditors, principal and interest, in full. The third—the National Bank of Illinois, at Chicago—paid principal in full and 16.30 per cent of all the interest. The latter bank was much the largest of all banks closed by this office in recent years. Its largest asset was an interest in the Calumet Electric Street Railway Company of Chicago. Much credit is due to the receiver, Mr. Edwin A. Potter, of Chicago, for the ability with which he managed the affairs of this trust, and especially his skill and fidelity in the operation and sale of the street railway property, of which he was also the receiver. This property consisted of about 80 miles of street railway track and equipment in South Chicago, operated under different franchises expiring within various periods, respectively ranging from three to fourteen years. It required business judgment and tact of the highest order to prevent a sacrifice of this valuable interest, upon which Mr. Potter succeeded in realizing for the creditors \$3,000,000. From many expressions of approval received it is believed the creditors of the

National Bank of Illinois generally appreciate the result which was so gratifying to the Comptroller.

The affairs of 376 insolvent national banks have been fully settled and the receiverships terminated. The capital of these banks at date of failure was \$59,047,420, and the total assets, nominal value, taken charge of by the receivers, \$236,459,547. United States bonds, amounting to \$20,678,650, were held as security for \$18,503,548 outstanding circulation. These bonds were sold for \$22,310,069.86, leaving a balance transferable to the general assets of the trusts of \$3,803,521.86. Stockholders were assessed \$35,753,390, and there was realized from the assessments \$17,362,345. The collections from assets and the amount settled by offsets, etc., were \$114,622,566 and \$17,945,308, respectively. The losses on assets compounded or sold under order of court aggregated \$92,152,092. On the final settlement of the affairs of these trusts assets of the nominal value of \$11,607,387 were returned to stockholders, including \$2,094,705 in cash. Dividends were paid to the amount of \$94,690,043, or 74.42 per cent, on claims proved, amounting to \$127,236,915. In order to ascertain the full amount realized by creditors it is necessary to add the dividends paid to the amount of offsets allowed and loans paid. The records, therefore, show that creditors realized on their claims a total of 80.88 per cent.

The following shows the liabilities of the 376 trusts which have been finally closed and how disposed of:

Liabilities.....		\$170,236,026
Deduct—		
Liabilities canceled by offsets.....	\$17,945,308	
Liabilities paid (loans, etc.).....	25,653,803	
		<hr/> 42,999,111
Liabilities proved for dividends.....		127,236,915
Dividends paid to creditors on claims proved.....		<hr/> 94,690,043
Amount of loss to creditors.....		<hr/> 32,546,872

The actual value of the assets of an insolvent national bank is not known at date of failure. Assets coming into possession of a receiver are scheduled at their face value in his first report, and this valuation appears in all subsequent reports to this office. The actual value of the assets is determined only at the termination of a receivership when reduced to cash or otherwise liquidated.

In the same manner the liabilities require adjusting and can not always be definitely known for a considerable lapse of time after the beginning of a receivership.

The first process in adjusting claims against the bank is to recover collateral, if in excess of the loans, which may have been placed with other banks as security for money borrowed. To recover this class of assets, generally rediscounted paper, it becomes necessary to pay off the loan from funds of the trust, expenditures for this purpose being shown in the receiver's reports under the head of "Loans paid," etc. Disbursements for protecting the assets of the trust from deterioration are also reported under this head. Liabilities may be further reduced by offsets allowed where the same party is both a debtor and creditor of the bank. All remaining creditors are permitted to prove their claims for participation in dividends as from time to time these are declared. It is therefore seen that the total

liabilities at date of failure, determined at close of the trust, consist of the amounts reported under the heads of "Claims proved," "Loans paid," and "Offsets." Likewise the gross value of assets at date of failure is indicated by collections therefrom added to amount of offset against liabilities.

Cost of liquidation of the affairs of insolvent national banks—that is, receivers' salaries, legal and all other incidental expenses—based on the amount of assets (nominal value) of the trusts, averaged up to and including October 31, 1906, 4.28 per cent, against an average of 4.6 per cent to October 31, 1905.

By reference to Table 74, relating to the failures of national banks in each State and geographical division, the affairs of which have been finally liquidated, it will be noted that the greatest number of failures occurred in the Western States, namely, 92, with capital of \$9,267,000. In the Middle Western States there were 81 failures, with capital of \$16,772,000; in the Eastern States, 72 failures, the capital of the banks being \$12,470,620; in the Southern States, 71 banks with capital of \$9,996,500; Pacific States, 37 banks with capital, \$4,760,000; and New England States, 23 banks with capital \$5,781,300. Creditors of banks located in the New England States realized 94.09 per cent on their claims; in the Middle Western States, 90.42 per cent; Eastern States, 76.01 per cent; Pacific States, 71.71; Southern States, 70.25 per cent, and Western States, 67.73 per cent.

Questions have been frequently raised as to the demand for, and successful operation of, national banks with the minimum amount of capital (\$25,000), authorized by the act of March 14, 1900. The records show that under authority of that act 2,062 associations have been chartered, with capital of less than \$50,000, the average being approximately \$26,000; and that of this number, 17, or less than 1 per cent, have failed. Of the total number of failures since March 14, 1900, namely, 72, less than one-fourth were of the smaller class, which would indicate that these banks are as conservatively managed, and that, as far as the six years' record shows, the probability of failure is less, than with banks of larger capital.

For the purpose of comparison, there is submitted herewith a statement covering the years indicated of the annual (average) deposits in active national banking associations and the ratio of annual loss sustained by creditors of insolvent national banks to the average deposits, together with the amount of claims proved and the aggregate and average loss sustained by creditors:

Annual (average) deposits in active national banks, 1865-1904.....	\$1, 333, 063, 452
Total claims proved against insolvent national banks to 1904	147, 309, 310
Total loss to creditors (actual 1865-1892, and estimated at 25 per cent of claims, 1893-1904).....	43, 028, 977
Average annual loss	1, 075, 724
Average annual amount of claims proved	3, 682, 732
Average annual loss.....per cent..	29. 21
Average (annual) rate of loss, based on average deposits in active national banks	per cent.. 0.0807

The affairs of practically every bank which failed prior to 1892 have been finally liquidated, and in calculating the total amount of loss it has been assumed that trusts still open will be finally liquidated at an average loss not greater than 25 per cent.

ORGANIZATION OF NATIONAL BANKS.

The First National Bank of Philadelphia, chartered June 20, 1863, was the first national banking association authorized to do business under authority of the act of February 25, 1863. From that date to the close of the year ended October 31, 1906, 8,421 associations were chartered, of which 6,225, or 74 per cent, are in active operation, 1,750, or 21 per cent, closed by voluntary liquidation or expiration of charter, the number of the latter being 167. Four hundred and forty-six banks, exclusive of 22 temporarily in charge of receivers, but subsequently authorized to resume business, were liquidated through, or are still in charge of receivers. The number of failures represents but 5 per cent of the total number of banks chartered. Included in the total number of banks organized are 1,271 State banks, which were converted into national banking associations under the provisions of section 5154 of the United States Revised Statutes, the capital at date of conversion being \$302,476,928. Approximately, one-half of the converted banks, and representing over two-thirds of the capital, were institutions in existence in the States of New York, Massachusetts, Pennsylvania, Connecticut, and Rhode Island. The number of conversions in the State of New York was 204; Massachusetts, 182; Pennsylvania, 102; Connecticut, 65, and Rhode Island, 52.

Legislation embraced in the act of March 14, 1900, resulted in the organization from that date to October 31, 1906, of 2,062 banks with aggregate capital of \$53,755,500, and individual capital of less than \$50,000. That the act in question gave an impetus to the organization of national banks with capital in excess of \$50,000 is evidenced by the fact that during the period mentioned 1,095 banks of this class with aggregate capital of \$126,707,800 were chartered, the number and capital of both classes being 3,157 and \$180,463,300, respectively, being nearly 40 per cent of the number of associations organized during the existence of the system. That the organization of banks since March 14, 1900, has not been spasmodic is evidenced by the fact that the average number of banks chartered during each month of the years in question was approximately 40.

Prior to 1900 no record was kept of the number of banks organized to succeed State or private banking institutions, but since that date organizations have been divided into three classes: (1) primary organizations; (2) conversions of State banks, and (3) reorganizations of State or private banks; and from which it is shown that 1,772 of the organizations were primary, the capital represented being \$91,417,500; 352 conversions, capital \$23,256,800, and 1,033 reorganizations, capital \$65,789,000.

In the current year charters were granted to 455 associations, the aggregate capital being \$21,418,500, and bonds deposited to secure circulation to the amount of \$6,071,830. This number includes 307 banks with capital of \$7,938,500, and individual capital of less than \$50,000, and 148 with aggregate capital of \$13,480,000, and individual capital of \$50,000 or more. Banks organized in each State and geographical division chronologically arranged, are shown in the appendix of this report.

As supplementary to the data given in Table No. 7 of the appendix, relating to the number of national banks organized during the year, in liquidation, and the number and capital of banks in existence in

each State on October 31, 1906, there is submitted herewith a statement relating to the organization of national banks since March 14, 1900.

NATIONAL BANKS ORGANIZED FROM MARCH 14, 1900, TO OCTOBER 31, 1906.

State, etc.	Capital -\$50,000.		Capital \$50,000+.		Total Organizations.

July.....	13	785,000	13	425,000	6	185,000	32	1,395,000	395,500
August.....	24	765,000	5	150,000	4	1,075,000	33	1,990,000	320,970
September.....	21	1,100,000	8	325,000	2	75,000	31	1,500,000	408,100
October.....	27	1,130,000	9	355,000	5	215,000	41	1,700,000	604,110
Total.....	269	11,873,500	129	5,930,000	57	3,615,000	455	21,418,500	6,071,830

As hereinafter shown, there were in operation on March 14, 1900, but 3,617 national banks, with authorized capital of \$616,308,095 and circulation outstanding secured by bonds of \$216,374,795. Since that date there has been an increase in the number of banks to 6,225 and authorized capital to \$845,939,775. The outstanding circulation on October 31, 1906, secured by bonds on deposit with the Treasurer of the United States in trust was \$536,933,169. Notes are outstanding to the amount of \$46,238,816, which are secured by deposits of lawful money made by banks reducing their circulation, those placed in voluntary liquidation, and on account of insolvent national banks. The total circulation outstanding secured by bonds and lawful money was \$583,171,985. The conditions with respect to the number of

banks, authorized capital, bonds on deposit, and circulation outstanding on the two dates mentioned, and also on October 31, 1904, June 30 and October 31, 1905, are shown in the following table:

	Mar. 14, 1900.	Oct. 31, 1904.	June 30, 1905.	Oct. 31, 1905.	Oct. 31, 1906.

ORGANIZERS OF NATIONAL BANKS.

Section 5210 of the Revised Statutes provides in part for the submission to the Comptroller of lists of shareholders of national banks, showing the number of shares held and residence of shareholders. These lists, however, contain no information in relation to the vocations of shareholders. To a certain extent the business in which applicants for authority to organize national banks are engaged is an indication of the occupation of shareholders as a whole. Beginning with November, 1905, a record has been kept relative to the business of approximately 3,200 applicants, and the results show that 876, or 28 per cent, of the applicants are bankers; 971, or 30 per cent, merchants, with which are included manufacturers, lumber and coal dealers, publishers, hotel proprietors, real estate and insurance agents. Farmers and stockmen to the number of 485 represent 15 per cent of the applicants and the law and medical professions 285, or 9 per cent; the remaining 555 not engaged in any of the lines of business heretofore mentioned, and including a number with respect to whom no information is of record, represent 18 per cent of the total.

STATE, SAVINGS, AND PRIVATE BANKS AND LOAN AND TRUST COMPANIES.

Conformably with the provision of law which requires the Comptroller of the Currency to incorporate in his annual report to Congress statements exhibiting the resources and liabilities of banks organized under State laws, there is submitted information relating to 11,852 banks of that class.

Official reports as to incorporated banking institutions herein presented are from all the States and Territories with the exception of Arkansas, Indian Territory, Oregon, Nevada, Alaska, and Hawaii.

Statements showing the condition of private banks and bankers have been received from official sources from North Carolina, Indiana, Missouri, South Dakota, Kansas, Wyoming, and California. Official statements of private banks of South Carolina, Nebraska, and Idaho, and unofficial statements from Indian Territory are included with the statements of incorporated banks for those States. The private banks of the other States and Territories sent reports direct to this office.

Reliable authorities place the number of banks and bankers in the United States and island possessions, exclusive of national banks, at 15,343. Of this number reports pertaining to 11,852 banks have

been received and tabulated, being 1,110 more than in 1905. The aggregate resources of these banks amount to \$10,363,350,846, being an increase of approximately \$773,000,000 over the previous year. The returns include 8,862 commercial banks, 742 loan and trust companies, and 1,319 savings banks (of which 678 were of the mutual class—that is, without capital stock), and 929 private banks and bankers.

The capital stock of the State banks is \$421,845,705; individual deposits, \$2,741,464,129; surplus and undivided profits, \$251,114,808. The loans aggregate \$2,272,959,644; investments in stocks, bonds, and other securities, \$412,966,794; and total resources, \$3,677,050,317. The resources of State banks reporting in 1905 aggregate \$3,190,911,378, thus showing a gain in 1906 of \$486,138,939.

Reports received from 742 loan and trust companies show aggregate resources of \$2,959,230,534 against 683 companies with aggregate resources of \$2,865,976,479 in 1905, a gain over 1906 of \$93,254,055. The resources in detail compared with 1905 are: Loans, \$1,610,407,833 against \$1,549,633,063, a gain of \$60,774,770; investments in stocks, bonds, and other securities, \$760,285,420 against \$787,918,435, indicating a loss of \$27,633,015 in this class of assets. The capital stock of these institutions as reported for June 30, 1906, shows a gain of \$25,250,715, being \$268,384,337 as against \$243,133,622 in 1905. The surplus and undivided profits, which in 1905 amounted to \$363,515,702, are now reported at \$395,373,620, a gain of \$31,857,918. Individual deposits have increased from \$1,980,856,737 in 1905 to \$2,008,937,790 in 1906, a gain of more than \$28,000,000.

While the summary of reports of the loan and trust companies of the United States shows that resources have increased over \$93,000,000 during the past year, it appears from statements made by the loan and trust companies of the city of New York to the New York banking department, as of date May 16, 1906, that there had been a loss of approximately \$174,000,000 in the assets of these companies since the report for June 7, 1905, when they amounted to \$1,239,878,936. Of the 35 loan and trust companies making reports on May 16, 12 show increase in resources from \$300,000 up to approximately \$6,000,000, while each of the other 23 companies doing business in that city show a shrinkage in resources for the period named from a few thousand dollars to over \$47,000,000. A large proportion of this shrinkage was later regained, the bank commissioner's statement for August 6 showing that the companies then had assets aggregating \$1,120,554,720, as against \$1,065,952,448 on May 16.

Reports were obtained from 929 private banks with aggregate resources of \$144,045,800. Last year reports were received from 1,028 private banks with resources of \$165,233,295. The decrease shown in the number reporting this year is accounted for by the fact that some of the States have recently legislated private banks out of existence, a large number of such banks having since incorporated under State laws. The loans and discounts of the reporting private banks aggregate \$96,535,709; investments in stocks, bonds, and securities, \$7,131,705; and amount deposited in other banks, \$24,723,406. The capital stock of these concerns amounts to \$20,036,992; surplus and profits, \$8,856,787, and individual deposits, \$109,947,509.

Statistics submitted with respect to the amount and average rate per cent of dividends paid by State and private banks and loan and trust companies for the year ended June 30, 1906, will be found in the appendix. Reports covering the subject were received from 3,124 State banks, with capital of \$191,456,642, showing the payment of dividends to the amount of \$17,273,356, or an average rate of 9.02 per cent; from 641 loan and trust companies which paid dividends amounting to \$21,529,190, or 9.64 per cent on capital stock of \$223,325,178, and from 304 private banks with capital of \$6,528,077, on which dividends aggregating \$917,592, or 14.05 per cent, were paid.

**CONSOLIDATED RETURNS FROM STATE, SAVINGS, AND PRIVATE
BANKS AND LOAN AND TRUST COMPANIES.**

There is submitted herewith for the purpose of comparison a table showing the principal items of resources and liabilities of banks other than national in the years 1900, 1902, 1904, 1905, and 1906.

Item.	1900.	1902.	1904.	1905.	1906.
Loans.....	\$3,013,449,827	\$3,942,592,907	\$4,360,209,382	\$5,097,761,364	\$5,656,832,201
Bonds.....	1,723,830,351	2,094,496,729	2,522,890,815	2,748,447,464	2,790,159,501
Cash.....	220,667,109	250,815,787	301,578,011	314,248,369	334,938,185
Capital.....	403,192,214	499,621,208	625,116,824	671,599,149	739,163,401
Surplus and undivided profits.....	490,654,957	614,509,805	779,241,781	824,243,066	893,679,524
Deposits.....	4,780,893,692	6,005,847,214	6,688,107,157	7,567,080,822	8,159,894,029
Resources.....	5,841,658,820	7,355,110,843	8,542,839,386	9,590,401,009	10,363,350,846

The foregoing figures indicate an increase in the aggregate resources in 1906 over 1905 of \$772,949,837, and of \$4,521,692,026 since 1900. The gain in resources for the fiscal year ended June 30, 1906, has not been so great as for the year 1905 over 1904, the increase for the latter period being over \$1,047,000,000. Loans and discounts have increased during the year \$559,000,000, and individual deposits approximately \$593,000,000. Loans have increased over 87 per cent and deposits more than 70 per cent since 1900.

A statement showing the principal items of resources and liabilities of national banks from reports of condition on June 18, 1906, and from all other reporting banks and banking institutions on or about that date, separately and in the aggregate, is presented herewith:

Classification.	6,053 national banks.	11,852 State, etc., banks.	Total, 17,905 banks.
	<i>Millions.</i>	<i>Millions.</i>	<i>Millions.</i>
Loans.....	\$4,236.9	\$5,656.8	\$9,893.7
United States bonds.....	632.2	20.0	652.2
All other bonds.....	651.2	2,770.2	3,421.4
Cash.....	681.5	334.9	1,016.4
Capital stock.....	826.1	739.2	1,565.3
Surplus and profits.....	665.2	893.7	1,558.9
Deposits (individual).....	4,055.9	8,159.9	12,215.8
Aggregate resources.....	7,784.2	10,363.4	18,147.6

The principal items of resources and liabilities of national and all other reporting banks by years from 1864 to 1906, inclusive, and of State banks separately from 1834 to 1872, are shown in tables XXV and XXIII of the appendix.

By reference to the first of the tables in question it appears that the aggregate resources of all reporting banks increased in 1904 over 1903, \$895,700,000; in 1905 over 1904, \$1,719,400,000, and 1906 over 1905, \$1,229,400,000. The increase for the ten years ended June 30, 1906, amounted to \$10,593,700,000.

Tables I to IV in the appendix show by States the resources and liabilities in detail of the several classes of banks other than national from reports on or about June 30, 1906, and Tables V to VIII, inclusive, the aggregate resources of the several classes of banks annually from 1902 to 1906.

The following table is a summary of reports received for the year 1906 from State banks, loan and trust companies, savings and private banks:

RESOURCES AND LIABILITIES OF STATE BANKS, LOAN AND TRUST COMPANIES, SAVINGS AND PRIVATE BANKS, 1906.

Classification.	8,862 State banks.	742 loan and trust companies.	1,319 savings banks.	929 private banks.	Total, 11,852 banks.

SAVINGS BANKS.

Savings bank reports to the number of 1,319 have been received, of which 678 are from mutual institutions and 641 from stock savings banks, the latter being operated for the benefit of both shareholders and depositors. The principal items of resources and liabilities of savings banks, both mutual and stock, are as follows: Loans, \$1,676,-929,015; bonds, etc., \$1,609,775,582; deposits, \$3,299,544,601; aggregate resources, \$3,583,024,195.

Compared with 1905, these figures show an increase in loans of \$142,814,000; bonds, stocks, and securities of \$74,421,000; deposits, \$206,467,000, the aggregate resources having increased approximately \$215,000,000. All of these items show a much larger increase for the current year than for the year 1905.

In the following table is given a comparative statement of the number of depositors, amount of deposits, and the average savings deposit in savings banks in the States named for the years 1905 and 1906. Included in this table are deposits in savings departments of commercial banks in operation in the State of Illinois, for the reason that the auditor of public accounts of that State in his periodical statements reports such deposits separate from deposits subject to check. The result of the addition of Illinois savings deposits is the raising of the aggregate savings deposits of the United States to \$3,482,137,198; the number of depositors to 8,027,192, the average deposit being \$433.79.

NUMBER OF SAVINGS DEPOSITORS, AGGREGATE SAVINGS DEPOSITS, AND AVERAGE AMOUNT DUE TO DEPOSITORS IN SAVINGS BANKS IN EACH STATE IN 1905 AND 1906.

b Includes 13 banks in liquidation.

c Included in abstract of State banks having savings departments.

e Includes 3 banks in liquidation.

d Estimated.

MUTUAL SAVINGS BANKS.

The mutual savings banks are located in the New England and the Eastern States, with the exception of one in West Virginia, two in Wisconsin, 3 in Ohio, 5 in Indiana, and 14 in Minnesota. The number

of reporting institutions is 678, being 10 more than reported last year. As shown by Table IV in the appendix, the aggregate resources of mutual savings banks is \$3,134,591,325, or a gain of over \$167,000,000 since June 30, 1905, the gain for the prior year having been \$149,000,000. The loans and discounts, which in 1905 amounted to \$1,269,755,274, are reported this year at \$1,375,582,066, a gain of \$105,826,792. The loans are classified as follows: On real estate, \$1,150,250,807; other collateral security, \$46,986,647; all other loans, \$178,344,612. Compared with the returns for 1905, real estate loans in this class of banks have increased approximately \$95,000,000; loans on other collateral, \$5,700,000, and unclassified loans, \$4,800,000. The amount invested in bonds, stocks, and other securities has increased from \$1,453,091,615 in 1905 to \$1,522,989,449 in 1906, a gain of \$69,897,834. The investments in bonds and other securities are as follows:

United States bonds	\$12, 159, 058
State, county, and municipal bonds.....	140, 345, 235
Railroad stocks and bonds.....	346, 343, 902
Bank stock	25, 724, 090
Other bonds, stocks, etc	998, 417, 164

Compared with the returns for 1905, it will be found that investments in State, etc., bonds have increased \$3,800,000; railroad bonds in the sum of \$25,000,000; other unclassified bonds, stocks, etc., in the sum of \$43,500,000, while the holdings of United States bonds and bank stocks have decreased \$1,119,000 and \$1,395,000, respectively. Cash in banks is \$1,033,578 less than was reported in 1905, being now \$17,370,985, against \$18,404,563 in 1905. The cash on deposit with other banks is \$117,840,827, or \$3,974,880 less than was shown by the reports for 1905. Individual deposits have increased from \$2,736,533,039 in 1905 to \$2,908,710,654, a gain of \$172,177,615. Deposits are credited to 6,753,037 depositors, the number reporting for 1905 being 6,463,677, a gain of 289,360. The average deposit account has increased during the same period from \$423.37 to \$430.73. Reports from each State having this class of banks show large increases in deposits over 1905. Of the \$172,000,000 added to the deposits of the mutual savings banks during the past year more than \$125,000,000 was gained by the banks located in New York, Massachusetts, and Connecticut, the New York savings banks having gained \$82,000,000 in deposits; Massachusetts, \$31,000,000, and Connecticut, \$12,000,000. New York mutual savings banks gained 123,665 new depositors during the past year, Massachusetts 62,873, and Connecticut 19,335. The number of depositors given for the several States is from official reports except for Maine, which has been partially estimated.

Comparing the average deposit account in the mutual savings banks by geographical sections, it will be observed that the average in the New England States is \$391.04 against \$384.90 in 1905; for the Eastern States \$466.91 against \$458.40 in 1905. The Middle Western States show an average deposit of \$392.42 for the present year against \$393.47 for the prior year. The one mutual savings bank in West Virginia, being the only bank of this class reporting from the Southern States, gives the average deposit account as \$206.30 against \$183.68 in 1905.

STOCK SAVINGS BANKS.

Reporting stock savings banks are located in the District of Columbia, North Carolina, Iowa, and California. The resources of these banks amount to \$448,432,970. The loans aggregate approximately \$301,347,000; investments in stocks, bonds, and other securities, \$86,786,000; deposits with other banks, \$38,923,000; and cash on hand, \$8,759,000. The capital is \$28,806,000; surplus and undivided profits, \$16,825,000; deposits, \$390,831,000; the number of depositors, 742,165, and the average deposit \$526.61.

Comparing the stock savings-bank returns for the current year with those of 1905, an increase in the aggregate resources is shown of approximately \$47,495,000, the increase in 1905 over 1904 being \$43,676,000. The deposits have increased by \$34,289,000, being \$5,520,000 less than the increase for the year ended June 30, 1905. The number of depositors, estimated at 754,601 in 1905 and 742,165 in 1906, shows a loss of 12,436. The exact number of depositors is given only for the District of Columbia; those for the three States named are partially estimated, the estimate being based upon unofficial returns from such banks as gave that information.

The number of depositors in all savings banks reporting (exclusive of those having accounts in savings departments of the State banks of Illinois) has increased since 1905 from 7,218,278 to 7,495,202, and the average deposit from \$428.51 to \$440.22. The total number of savings depositors, including those of Illinois State banks, has increased from 7,696,229 in 1905 to 8,027,192 in 1906, and the average amount to the credit of each depositor, estimated to be \$423.74 in the former year, amounts to \$433.79 this year. The aggregate deposits were \$3,261,236,119 in 1905 and \$3,482,137,198 in 1906, an increase of \$220,901,079.

The following table shows the growth of savings banks in the United States from 1820 to 1906 as evidenced by the amount of deposits, number of depositors, average deposit account, and the average per capita in census years from 1820 to 1890 and annually thereafter.

NUMBER OF SAVINGS BANKS IN THE UNITED STATES, NUMBER OF DEPOSITORS, AMOUNT OF SAVINGS DEPOSITS, AVERAGE AMOUNT DUE EACH DEPOSITOR IN THE YEARS 1820, 1825, 1830, 1835, 1840, AND 1845 TO 1906, AND AVERAGE PER CAPITA IN THE UNITED STATES IN THE YEARS GIVEN.

Year.	Number of banks.	Number of depositors.	Deposits.	Average due each depositor.	Average per capita in the United States.

INTEREST RATES PAID BY SAVINGS BANKS.

From an examination of the returns submitted with respect to the rate of interest paid on savings accounts it will be noted that the maximum rate is 4.50 per cent, the minimum rate 3 per cent. The estimated average rate is 3.545 per cent, a slight decrease in the estimated average interest rate of 3.55 per cent in 1905.

The following table shows the reported rate paid in each State by savings banks located therein:

State, etc.	Rate per cent.	State, etc.	Rate per cent.
Maine.....	3.41	Maryland ^a	3.20
New Hampshire.....	3.43	District of Columbia (7 banks).....	3.14
Vermont.....	3.333	West Virginia (1905).....	4.50

STATE AND PRIVATE BANK FAILURES.

Through the courtesy of the Bradstreet Commercial Agency this office has been placed in possession of information relating to the number, assets, and liabilities of State and private banks which failed in the year ended June 30, 1906. The total number of failures during the year was 37, the assets of the banks being \$6,591,515 and the liabilities \$7,187,858. In the year ended June 30, 1905, there were 57 failures of banks of this character, with assets of \$6,970,345 and liabilities of \$10,273,023. Included in the 37 failures of banks in 1906 were 15 State banks, 5 savings banks, 4 trust companies, and 13 private banks. The failures by geographical sections were as follows: New England States, 3; Eastern States, 2; Southern States, 16; Middle Western States, 14; Western States, 1; Pacific States, 1. The assets of the 16 banks which failed in the Southern States amounted to \$5,110,414 and their liabilities to \$4,806,924. The assets of the 21 banks failing in the other sections aggregated \$1,481,101 and liabilities \$2,380,934.

The number of banks of these classes that failed annually from 1864 to 1906, together with their aggregate assets and liabilities and dividends paid, from 1864 to 1896, is shown in the table following:

NUMBER OF FAILURES, CAPITAL, ASSETS, LIABILITIES, AND DIVIDENDS PAID BY STATE AND PRIVATE BANKS THAT FAILED IN EACH YEAR FROM 1864 TO 1906.

Year.	Number of failures.	Capital.	Nominal assets.	Liabilities.	Dividends paid.

DEPOSITS.

The individual deposits in all reporting banks in 1896 aggregated \$4,945,124,423; for the current year individual deposits in all reporting banks in the United States and island possessions aggregate \$12,215,767,666, a gain of over \$7,270,000,000 within the past ten years. A compilation of the returns for the years 1896, 1900, 1904, 1905, and 1906, for each State and geographical division, showing the amount of individual deposits of each class of banks, will be found in the appendix, and a summary for the years named, by geographical divisions, is presented in the accompanying table:

Location and class of banks.	Individual deposits.

^aStatements for April 6, 1906.

Upon an examination of the foregoing statement it will be noted that there was an increase in deposits from \$4,945,124,423 in 1896 to \$7,238,986,450 in 1900, or over 46 per cent. During the four years from 1900 to 1904 deposits increased over 38 per cent; for the year ended June 30, 1905, the increase was 13.5 per cent; the increase in the current year over 1905 was \$865,000,000, or about 7.6 per cent. The ratio of increase in individual deposits from 1896 to 1906 was nearly 147 per cent.

The following table shows the amount of individual deposits in national and other reporting banks by geographical divisions on or about June 30, 1896 and 1906, together with the amount and per cent of increase:

Geographical divisions.	Individual deposits.			
	1896.	1906.	Increase.	Percent.
	<i>Millions.</i>	<i>Millions.</i>	<i>Millions.</i>	
New England States.....	\$1,193.3	\$1,809.0	\$675.7	56.62
Eastern States.....	2,291.7	5,411.8	3,120.1	136.15
Southern States.....	221.7	882.3	660.6	297.97
Middle Western States.....	877.8	2,729.4	1,851.6	210.94
Western States.....	128.8	506.1	377.3	292.93
Pacific States.....	231.8	797.4	565.6	244.00
Total.....	4,945.1	12,196.0	7,250.9	146.63

It will be noted from the foregoing table that banks of the Southern States show the largest percentage of increase in deposits during the period from June 30, 1896, to June 30, 1906, the percentage of gain being 297.97, followed by the Western States, where the ratio of increase is 292.93, and in the order named: The Pacific States, 244; the Middle Western States, 210.94; the Eastern States, 136.15, and the New England States, 56.62.

The average individual deposit in the United States per capita of population has risen from \$65 in 1896 to \$95 in 1900, \$122 in 1904, \$136 in 1905, and \$144 in 1906, being an average annual gain of \$8.

The following comparative statement showing increase in population, individual deposits, and money in circulation in the United States from 1896 to 1906 is of interest:

	1896.	1906.	Increase.	Per cent of increase.
Population.....	71,390,000	84,662,030	13,272,000	18.6
Deposits.....	\$4,945,124,423	\$12,196,029,486	\$7,250,905,063	146.6
Money in circulation.....	1,506,434,966	2,744,483,330	1,238,048,364	82.2

PROPORTION OF INDIVIDUAL DEPOSITS HELD BY THE VARIOUS CLASSES OF BANKS.

In 1896 savings banks had the largest portion of the aggregate deposits of the country, or 39.1 per cent of the individual deposits in all reporting banks. National banks held 33.7 per cent; state banks, 14.1 per cent; loan and trust companies, 11.9 per cent, and private banks 1.2 per cent. Statistics relating to deposits for the current year show that the national banks now hold the largest portion of deposits, although the ratio has decreased from 33.7 per cent to 33.2 per cent since 1896. Savings banks hold 27 per cent against 39.1 per cent in 1896,

while within the same period State bank deposits have risen from 14.1 to 22.5% and loan and trust companies from 11.9 to 16.4%.

The following table shows the amount and per cent of deposits held by the several classes of banks in 1896 and 1906.

Classification.	1896.		1906.		Ratios.	
	Amount.	Per cent.	Amount.	Per cent.	Increase.	Decrease.
	<i>Millions.</i>		<i>Millions.</i>		<i>Per cent.</i>	<i>Per cent.</i>
State banks.....	\$695.6	14.1	\$2,741.5	22.5	8.4
Savings banks.....	1,935.5	39.1	3,299.5	27.0	12.1
Private banks.....	59.1	1.2	109.9	.93
Loan and trust companies.....	586.5	11.9	2,008.9	16.4	4.5
National banks.....	1,668.4	33.7	4,055.9	33.25
Total.....	4,945.1	100.0	12,215.7	100.0	12.9	12.9

On June 30, 1906, savings banks held the largest proportion of deposits in the New England and Pacific States, viz: 62 per cent and 33 per cent, respectively. In the Eastern States savings and national banks each held 31 per cent of the aggregate deposits of that section. State banks held 50 per cent of deposits in the Southern States; 45.9 per cent in the Middle Western States, and 33.1 per cent in the Pacific States. National banks held the largest proportion of deposits in the Western States, 58.2 per cent, and stand second as to deposits in the Southern States, with 47.4 per cent; in the Middle Western States they hold 39.6 per cent; in the Eastern States 31 per cent, and in the Pacific States 28.6 per cent.

Loan and trust companies hold 28 per cent of the aggregate deposits of the Eastern States; 18 per cent in the New England States; 4.3 per cent in the Pacific States, and 4.2 per cent in the Middle Western States. The proportion of deposits held by private banks in the geographical sections is 2.9 per cent in the Middle Western States; 2.1 per cent in the Western States; 0.9 per cent in the Southern States; 0.7 per cent in the Pacific States, and 0.1 per cent in the Eastern States.

BANK RESOURCES.

Table XII in the appendix shows the average per capita of resources of each class of banks, state and national, and the per capita of all banks arranged by States and geographical sections. It appears that the average per capita of bank resources for the United States is \$214.69. Geographically, the Eastern States are first, with \$427.86; New England States second, \$393.25; Pacific States third, \$319.55; Middle Western States fourth, \$164.24; and the Western and Southern States fifth and sixth, with \$131.41 and \$61.25, respectively. The State having the largest per capita of bank resources is New York, the amount per capita in that State being \$639.80; California is second, with \$515.70; and Rhode Island third, with \$491.91. It is interesting to note that, excluding the Southern States and four of the Territories, the per capita in every other State ranges from \$110 to \$639, while in the Southern section only one State has a per capita of over \$100, that being West Virginia, with a per capita of \$105.46. The total resources of all banks, including island possessions, on or about June 30, 1906, was \$18,147,578,959, and the estimated population of the United States on June 1, as computed by the government actuary, was 84,348,000 and of the island possessions 9,197,000.

GROWTH OF BANKING IN THE UNITED STATES.

The following table shows the growth of banking in the United States, including island possessions, as indicated by the number of banks, capital stock, and individual deposits, from 1902 to 1906:

Bank.	Number.	Capital.		Individual deposits.	
		Amount.	Percent.	Amount.	Percent.
1902.

1906.					
National.....	6,053	826,129,785	50.23	4,055,873,636	32.12
State, etc.....	11,852	739,163,401	49.77	{ 8,159,894,029 }	67.88
Nonreporting.....	3,491	75,356,000			
Total.....	21,396	1,640,649,186	100.00	12,628,927,665	100.00

From returns to this office on or about June 30, 1906, it appears that there were in operation 6,053 national banking associations, with capital of \$826,129,785 and individual deposits of \$4,055,873,636; also 11,852 State, savings, and private banks and loan and trust companies, with aggregate capital and deposits of \$739,163,401 and \$8,159,894,029, respectively; nonreporting banks to the number of 3,491, with capital and deposits estimated at \$75,356,000 and \$413,160,000, respectively; or a total of 21,396 banks and banking institutions, with capital of \$1,640,649,186 and deposits of \$12,628,927,665. Since 1902 the increase in the number of banks has been 5,240, capital stock has increased in the sum of \$300,488,770, and individual deposits \$3,045,611,887.

The number of national banks in active operation has increased by more than 33 per cent, and the foregoing indicates that the number of banks other than national have increased in about the same ratio. In 1902 national-bank capital represented 52.04 and deposits 32.3 per cent of aggregate capital and deposits, respectively, of all reporting banking institutions. The percentage of capital of national banks to capital of all banks in 1905 was 51.41, and of deposits, 32.10. For the present year the percentage of capital is 50.23 and of deposits 32.12.

During the period from 1902 to 1906 the percentage of capital of banks other than national to the capital of all banks has increased from 47.6 to 49.77, and the percentage of individual deposits in such

banks from 67.7 to 67.88. In 1902 there was in operation in the United States one bank for every 4,897 inhabitants, in 1905 one for every 4,182, and in the present year one for every 3,956 inhabitants.

BANKS AND BANKING IN THE ISLAND POSSESSIONS.

THE PHILIPPINES.

The treasurer of the Philippine Archipelago is required by law to make examinations of banks and banking institutions doing business in the Philippine Islands, and also to obtain from the banks periodical statements of their condition. These statements are forwarded to the Insular Bureau of the War Department, and the reports of condition under date June 30, 1906, have been submitted by that Bureau to this office for use in connection with this report.

There are in operation in the archipelago, as shown by the reports in question, the following banks:

The Manila agency and the Iloilo subagency of the Hongkong and Shanghai Banking Corporation; the Manila agency and the Cebu subagency of the Chartered Bank of India, Australia and China; the Banco Español-Filipino at Manila and the Iloilo subagency; the Monte de Piedad and Savings Bank at Manila; the S. Misaka Bank at Manila, and the International Banking Corporation at Manila and its Cebu subagency.

A summary of the returns from these banks on June 30, 1906, together with individual statements made to the treasurer of the Philippines under that date, appears in the appendix.

The resources of the 10 banks named aggregate \$17,359,483, or a decrease of \$4,040,381 as compared with the returns submitted in 1905. The principal items of resources and liabilities are: Loans and discounts, including overdrafts, \$9,703,309; Philippine and other currency and bullion, \$2,292,953; due from banks and agencies, \$2,249,578; capital stock, \$1,393,080; surplus and undivided profits, \$1,224,230; bank notes outstanding, \$750,000; individual deposits, \$7,031,636; public deposits, insular, \$309,333; bank deposits, \$4,924,815. Comparing these returns with those submitted to this office under date of June 30, 1905, the loans and discounts show a decrease of \$1,647,912, and cash holdings a decrease of \$498,282. Individual deposits have increased in the sum of \$549,814 and public deposits by \$32,098; on the other hand, bank deposits have decreased from \$8,530,464 in 1905 to \$4,924,815 in 1906, a loss of \$3,605,649.

Statements showing the condition on June 30, 1905, of the Bank of Pangasinan and the Yuen Sheng Exchange and Trading Company (Limited) were published in the Comptroller's report for 1905. Since that date the treasurer of the Philippine Islands has taken possession of the former bank as receiver, and the latter bank has discontinued making reports to the Island government in accordance with a decision of the attorney-general of the Philippine Islands that inasmuch as it does not receive money on general deposit this bank is not subject to governmental examination under the statutes of the Philippine Islands.

The International Banking Corporation has established an agency at Cebu during the past year, a statement of condition of which as of June 30, 1906, appears in the appendix.

PORTO RICO.

By the courtesy of the treasurer of Porto Rico, reports have been received showing the condition of 8 Territorial banks and 1 private bank in operation in that island as of June 30, 1906. The capital stock of these 9 banks is \$2,296,908, and aggregate resources \$9,009,612. There is 1 national banking association in active operation in Porto Rico, with capital stock of \$100,000 and resources on June 18, 1906, of \$460,883. Combining the resources of the 9 Territorial banks with the national banking association reporting on the date named, the resources of the banks of Porto Rico aggregate \$9,470,495, which is \$605,765 less than the amount reported in 1905. The principal items of resources and liabilities of banks other than national are: Loans, \$2,751,905; bonds and stocks, \$1,663,751; due from banks and bankers, \$1,076,077; real estate, furniture, and fixtures, \$659,289; cash on hand, \$1,576,444; capital stock, \$2,296,908; surplus and undivided profits, \$465,320; individual deposits, \$4,739,509; bank deposits, \$107,058. All of these items show gains over the year past, with the exception of cash on hand, amount due from other banks, and bank deposits.

The principal items of resources and liabilities of the one national bank, in operation in the island, as shown by the report of condition of June 18, 1906, are as follows: Loans, \$23,855; United States bonds, \$100,000; other bonds, stocks, and securities, \$151,658; due from banks and bankers, \$92,843; cash in bank, \$53,467; capital stock paid in, \$100,000; undivided profits, \$9,949; circulation outstanding, \$100,000; individual deposits, \$250,933.

HAWAII.

There are 4 national banks in the Territory of Hawaii with paid-in capital stock, as shown by reports made under call of June 18, 1906, aggregating \$587,500. Two banks have been authorized to begin business during the current year. The deposits in the 4 banks on June 18, 1906, aggregated \$1,268,621, and the total resources were \$2,244,907, against \$1,886,212, as reported by the 2 national banks doing business in the Territory on May 29, 1905.

Unofficial reports have been received from 5 other banks doing business in the Territory, a summary of which shows capital of \$2,178,702; individual deposits, \$6,461,624; and aggregate resources of \$9,611,414. In 1905, 7 banks reporting capital of \$2,877,500 furnished statements for compilation of statistics relating to the banking institutions of Hawaii.

The principal items of resources and liabilities of the nine reporting banks, Territorial and national, are: Loans, including overdrafts, \$6,802,905; stocks, bonds, etc., \$2,253,078; due from banks, \$489,574; cash on hand, \$1,800,265; capital, \$2,766,202; surplus and profits, \$568,828; individual deposits, \$7,400,120; United States deposits, including deposits of United States disbursing officers, \$330,126; due to other banks, \$289,639; aggregate resources, \$11,856,321.

By comparing these figures with those published in the Comptroller's report for 1905 it will be found that the aggregate resources have increased in the sum of \$540,660; investments in bonds, \$885,329; cash on hand, \$164,639; individual deposits, \$500,484; United States deposits, \$117,866, while the items that show a decrease are loans,

in the sum of \$112,134; amount due from banks and bankers, \$338,392; capital stock, \$111,298; surplus and profits, \$17,152, and amount due to banks and bankers, \$13,426.

BUILDING AND LOAN ASSOCIATIONS.

By the courtesy of H. F. Cellarius, secretary of the United States League of Local Building and Loan Associations, recently compiled statistics relating to the condition of the building and loan associations of the country are herewith presented. The report is for the year ended December 31, 1905. The receipts and disbursements of building and loan associations of the United States, as shown by the report, were \$38,000,000 in excess of the previous year, the receipts from weekly dues being \$15,000,000 more than in the prior year. There was also a large increase in the earnings, aggregating \$5,294,204 more than in the year before, as the mortgage loans were over \$22,000,000 in excess of the previous year. The receipts and disbursements of the associations for the year ended January 1, 1906, are shown in the following statement:

RECEIPTS, 1905.		DISBURSEMENTS, 1905.	
Cash on hand Jan. 1, 1905..	\$20, 861, 232	Pass-book loans.....	\$12, 122, 992
Weekly dues.....	153, 103, 440	Mortgage loans.....	173, 922, 560
Paid-up stock.....	15, 434, 048	Stock withdrawals.....	139, 064, 352
Deposits.....	31, 799, 824	Paid-up stock withdrawals..	15, 597, 232
Loans repaid.....	129, 789, 184	Deposit withdrawals.....	27, 409, 648
Interest.....	36, 874, 320	Expenses.....	5, 558, 784
Premium.....	2, 926, 784	Borrowed money.....	36, 111, 040
Fines.....	473, 760	Interest.....	1, 194, 928
Pass books and initiation...	789, 600	Real estate purchased.....	4, 105, 920
Borrowed money.....	37, 363, 872	Miscellaneous disbursements	11, 812, 416
Real estate sold.....	6, 927, 424	Cash on hand Jan. 1, 1906..	22, 582, 560
Miscellaneous receipts.....	13, 138, 944		
Total.....	449, 482, 432	Total.....	449, 482, 432

The secretary states in his annual report that the associations during the past year have, in a marked degree, shared the general prosperity of the country, and have done the largest business in their history. It appears that the assets of the local building and loan associations of the United States amount to \$629,344,257, or \$29,000,000 more than shown by the report of the prior year. The total membership in the 5,264 associations is reported at 1,642,127, an increase of a little over 11,000 for the year. The returns submitted relate to 4,239 associations located in the 21 States named and 1,025 combined under the head "Other States." The report states that there has been a continuous growth since 1901, and that during the four years following 1901 an increase in membership of over 100,000 and nearly \$64,000,000 in assets occurred. The largest gain in assets made during the past year was in Ohio, where the increase was \$7,162,519. Pennsylvania gained \$4,604,467; New Jersey, \$3,296,361; Massachusetts, \$3,111,034; Illinois, \$1,921,665; California, \$1,280,829; Indiana, \$1,084,142, and Nebraska, \$1,051,947. Three States show less assets than for the preceding years—Missouri, \$201,410; Tennessee, \$187,306, and Kentucky, \$2,265,848. The large decrease in Kentucky is explained as due to the liquidation of two large associations in that State.

The following table shows, by States, the number of associations, total membership, and total assets in 1905, together with increase or decrease in assets and membership over the year 1904:

States.	Num- ber of associ- ations.	Total member- ship.	Total assets.	Increase in assets.	Decrease in assets.	Increase in mem- bership.
Pennsylvania.....	1,257	329,852	\$128,053,425	\$4,604,467	10,393
Ohio.....	674	299,904	109,741,189	7,162,519	a 20,311
New Jersey.....	382	121,196	57,657,384	3,296,361	4,751
Illinois.....	505	83,425	42,897,266	1,921,665	3,050
Massachusetts.....	130	95,287	38,725,081	3,111,034	6,595
New York.....	247	95,065	33,661,549	816,720	4,370

Total.....	5,264	1,642,127	629,344,257	31,656,235	2,654,564	11,081

a Decrease.

Net increase in assets, \$29,001,671.

NOTE.—Apparent decrease of 20,311 in membership in Ohio results from clerical errors made by the State Department in compilation of figures of last year, being given as 320,215, whereas the correct figures were 301,340; actual decrease, 1,436.

The foregoing statistics, the secretary states, relate exclusively to local building and loan associations. National building and loan associations to the number of 60, with estimated assets of \$20,000,000, are stated to have been in existence on January 1, 1906.

SCHOOL SAVINGS BANKS.

Statistics relating to the operation of school savings banks of the United States, in existence on January 1, 1906, have been received through the courtesy of J. H. Thiry, of Long Island City, N. Y. From Mr. Thiry's report it appears that the school savings bank system is now in operation in 1,023 schools of 122 cities of 25 States, and the pupils of these schools have deposited \$4,864,575.98, of which \$3,641,015.66 have been withdrawn, leaving a balance of \$1,223,560.32 due depositors on January 1, 1906.

MONEY IN THE UNITED STATES.

The stock of money in the United States on June 30, 1906, amounted to \$3,069,900,000, of which \$2,162,000,000 was in coin (including bullion in the Treasury) and \$907,000,000 in United States notes and national bank notes. The coin, bullion, and paper currency in the Treasury as assets amounted to \$325,400,000, the remainder, \$2,744,500,000, being in circulation. The estimated population of the country on that date was 84,622,000, giving an average circulation per capita of \$32.42, against a per capita of \$31.08 for 1905 and \$21.10 in 1896. The amount of money held by national and other reporting banks in the United States, shown by reports nearest to June 30, 1906,

was \$1,010,700,000, which leaves \$1,733,800,000 in circulation, exclusive of money in the Treasury and in banks, being a gain of \$133,700,000 over the amount in circulation in 1905, outside of the banks and the Treasury. The money in the Treasury on June 30, 1906, represented 10.60 per cent of the stock; in reporting banks 32.92 per cent, and elsewhere 56.49 per cent. The per capita unaccounted for in 1906 appears to be \$20.48, an increase of \$1.26 over the per capita estimated for 1905 and a gain of \$6.83 in the per capita of money estimated to be in circulation ten years ago.

The monthly circulation statements issued from the Treasury Department show the general stock of money in the United States, the amount held in Treasury as assets of the Government, the money in circulation, and disclose the amount of each class of coin or paper currency. At the close of the fiscal year ended June 30, 1896, the stock of money in the country was \$1,799,900,000 and consisted of \$599,600,000 in gold, \$627,700,000 silver, \$346,681,016 legal-tender notes, and \$226,000,547 national-bank notes. At the close of the last fiscal year, June 30, 1906, the stock of money was \$3,069,884,640, an increase in the ten-year period of \$1,269,900,000. The increase in the stock of gold was \$873,395,000, silver \$60,200,000, and national-bank circulation \$335,111,813. No change occurred in the amount of legal-tender notes. During the decade in question the gold coinage amounted to \$900,768,352, and in this period the exports of gold exceeded the imports by approximately \$50,000,000, the imports aggregating \$166,728,891 and the exports \$216,652,337. In the years 1897 and 1898 the imports of gold exceeded the exports by \$66,300,000, but annually thereafter to the current year the exports largely exceeded imports. In 1905 the exports were \$54,409,014, as against imports of \$2,236,399. The imports for the current fiscal year were \$35,251,921, as against exports of \$20,573,572, the imports exceeding the exports by nearly \$15,000,000.

Of the coin and other money in the United States at the close of the fiscal year ended June 30, 1906, \$1,016,448,222 was held by national and other banks, including those in the island possessions, the details of which are set forth in the accompanying table:

GOLD AND OTHER MONEY HELD BY NATIONAL BANKS ON JUNE 30, 1906, AND BY OTHER REPORTING BANKS AND BANKERS ON OR ABOUT THE SAME DATE.

Classification.	National banks (6,633).	All other banks (11,852).	Total, all banks (17,905).

1904.....	2,803.5	284.3	10.14	982.9	35.06	1,536.3	54.80	18.77	2,519.2	30.77
1905.....	2,883.1	295.2	10.24	987.8	34.27	1,600.1	55.49	19.22	2,587.9	31.08
1906.....	3,069.9	325.4	10.60	1,010.7	32.92	1,733.8	56.49	20.48	2,744.5	32.42

a \$12,567,265, *b* \$10,125,909, *c* \$9,240,801, *d* \$7,620,304, *f* \$6,301,899, and *g* \$5,661,868, in banks of island possessions not included in these returns.

In 1896 the then Comptroller had compiled and published in his annual report statistics showing by States the cash held by national and other reporting banks on July 1 of that year. For this report a similar statement has been prepared showing the amount of gold and other money held by national banks on June 18, 1906, and by other reporting banks and bankers on or about the same date which will be found in Table No. XIV of the appendix.

Upon reference to the table it will be seen that on or about June 30, 1906, the sum of \$1,016,448,222 was in 17,905 banks of the country, \$5,661,868 of the amount being in 28 banks located in the island possessions. Three-fifths of the stock of money consisted of specie and the remaining two-fifths of paper currency and unclassified cash, as follows:

Specie (gold and silver)	\$633, 048, 675
Paper currency (including Philippine currency).....	301, 827, 866
Not classified.....	81, 571, 681
Total.....	1, 016, 448, 222

Gold represents over 48 per cent of the cash in bank; silver dollars, fractional and unclassified specie 14 per cent; legal tenders and national-bank notes about 29 per cent; the balance, 9 per cent, being unclassified.

The following classification of the currency held by the banks in 1896 and 1906 is presented for the purpose of comparison, the sum in banks in the island possessions not being included:

Currency.	1896.	1906.	Increase.
	9,469 banks.	17,877 banks.	
Gold coin.....	\$149,260,431	\$156,699,578	\$7,439,147
Gold certificates.....	51,720,400	329,982,467	278,262,067
Silver dollars.....	13,717,838	22,888,827	9,170,989
Silver, fractional.....	5,619,454	11,357,041	5,737,587
Silver certificates.....	29,495,375	101,277,029	71,781,654
Legal tender notes.....	189,078,207	260,433,306	71,355,099
National bank notes.....	17,444,746	37,599,418	20,154,672
Fractional paper, currency, nickels, and cents.....	999,427	1,992,978	993,551
Unclassified specie.....	2,413,485	7,027,629	4,614,144
Unclassified cash.....	72,107,150	81,528,081	9,420,931
Total.....	531,856,513	1,010,786,354	478,929,841

In July, 1896, 9,469 banks reported individual deposits of \$4,945,124,423, and cash holdings of \$531,856,513, the cash being 10.72 per cent of deposits. The individual deposits of all reporting banks in the United States on or about June 30 of the present year amounted to \$12,196,029,486, and the cash on hand of these banks was \$1,010,786,354, or about 8.3 per cent of deposits. The following table shows deposits and cash holdings and percentage of cash to deposits of the several classes of reporting banks:

Banks.	Individual deposits.	Cash on hand.	Ratios of cash to deposits.	
			Per cent.	Per cent.
National banks.....	\$4,054,677,558	\$681,163,987	16.80	
State banks.....	2,722,922,028	226,547,594	8.30	
Savings banks.....	3,299,544,001	26,129,931	.79	
Private banks.....	109,947,500	6,761,156	6.15	
Loan and trust companies.....	2,008,937,790	70,183,686	3.49	
All banks.....	12,196,029,486	1,010,786,354	8.29	

The percentage of cash to deposits held by banks other than national appears to be less than one-fourth the percentage held by national banks, such holdings being 16.80 per cent by national banks and an average of 4.04 per cent by all other banks.

The geographical distribution of money in banks of the United States in 1896, 1900, 1904, and 1906 is shown in the following table:

Division.	1896.		1900.		1904.		1906.	
	Amount.	Per cent.	Amount.	Per cent.	Amount.	Per cent.	Amount.	Per cent.
	<i>Mil-</i>		<i>lions.</i>		<i>Mil-</i>		<i>lions.</i>	
New England States.....	\$51.3	9.65	\$61.9	8.25	\$59.2	6.02	\$61.8	6.11
Eastern States.....	262.2	49.30	369.1	49.22	497.3	50.00	462.0	45.71
Southern States.....	36.9	6.94	47.8	6.37	68.9	7.01	78.4	7.76
Middle Western States.....	134.1	25.21	195.2	26.03	261.9	26.65	280.5	27.75
Western States.....	21.0	3.95	31.8	4.25	42.4	4.31	53.0	5.24
Pacific States.....	26.3	4.95	44.1	5.88	53.2	5.41	75.1	7.43
Total.....	531.8	100.00	749.9	100.00	982.9	100.00	1,010.8	100.00

Classifying the total cash holdings of the reporting banks geographically, the Eastern States had in their banks on or about June 30, 1906, \$461,997,552; the Middle Western States, \$280,545,761; the Southern States, \$78,419,709; Pacific States, \$75,061,035; New England States, \$61,768,022; Western States, \$52,994,275, and island possessions, \$5,661,868. The banks of the Eastern States, together with those of the Middle Western States, held 73 per cent of the money in banks, 45.7 per cent being in banks of the Eastern States and 27.7 in banks of the Middle Western States. Of the \$462,000,000, approximately, in the banks of the Eastern States, nearly \$352,000,000, or over 76 per cent, was in banks of New York (State and city). The banks of New York, including the city of New York, held on June 30, 1906, over 34 per cent of the total bank holdings of money. Banks in the borough of Manhattan alone had over \$319,000,000 in their vaults, being 31.5 per cent of the available cash resources in the banks of the United States and over 10 per cent of the total stock of money of the country.

Referring again to the table of cash holdings by States, it will be noted that exactly 40 per cent of the cash in banks of the Middle Western States was in Illinois banks, Missouri and Ohio being next in order, with 17.6 and 13.4 per cent, respectively.

In the Southern States, which are third in the geographical divisions as to cash holdings in the banks, Texas is first, with \$16,300,000 of the \$78,400,000, or 20.7 per cent; Kentucky is next, with \$10,140,000, or 12.9 per cent, Tennessee being third, with \$7,600,000, or about 9.7 per cent. The Pacific States are fourth in the geographical order as to cash holdings, \$75,000,000 being in the vaults of the banks in this section. California banks hold over two-thirds of this amount, or \$51,000,000; Washington banks have a little less than \$10,000,000, or 13 per cent, and Oregon banks \$5,300,000, or 7 per cent. The banks of the New England States hold \$61,768,022 in their vaults, over two-thirds of this sum being in Massachusetts banks. Connecticut banks have \$7,300,000 and Rhode Island banks \$5,000,000 in their vaults. Banks in the Western States hold approximately \$53,000,000, Colorado banks holding about 29 per cent of this amount, Nebraska and Kansas being next, in the order named, with 21.5 and 20.6 per cent, respectively.

For the purpose of comparison, the following statement, showing the geographical distribution of money in the United States on or about June 30, 1905 and 1906, is submitted:

	1905.	1906.	Increase.	Decrease.
	<i>Millions.</i>	<i>Millions.</i>	<i>Millions.</i>	<i>Millions.</i>
New England States.....	\$33.9	\$61.8		\$2.1
Eastern States.....	471.7	462.0		9.7
Southern States.....	75.5	78.4	\$2.9	
Middle Western States.....	271.8	280.5	8.7	
Western States.....	45.1	53.0	7.9	
Pacific States.....	39.8	75.1	15.3	
Total.....	937.8	1,010.8	34.8	11.8

Comparing the figures showing cash in banks with those for 1905, it appears that there has been a net increase of \$23,000,000. Reports of the New England banks show a loss of \$2,100,000 and those of the Eastern States a loss of \$9,700,000. During the same period the banks of the Pacific States gained \$15,300,000; those of the Middle Western States \$8,700,000; Western States, \$7,900,000; and Southern States, \$2,900,000.

Approximately \$9,000,000 of the gain in cash in banks of the Pacific slope should be credited to the California banks. The statements showing the condition of California State, private, and savings banks furnished for this report were of April 14, 1906, prior to the earthquake, and show a loss compared with 1905 of about \$1,225,000 in available cash. The reports of condition of national banks of California, on the other hand, made at the close of business June 18, show an increase of \$10,151,000 over the aggregate cash holdings at close of business on May 29, 1905.

As shown by reports of condition as of June 18, 1906, there were national-bank notes outstanding to the amount of \$510,860,726, being a gain of \$65,405,000 since May 29, 1905. Of this \$65,000,000 gain, approximately \$24,000,000 went to banks of the Middle Western States, \$16,400,000 to banks of the Eastern States, \$12,100,000 to Southern banks, and the remaining \$12,500,000 to the other three sections of the country. This, however, is not necessarily an accurate indication of the distribution, as there is no way of determining how much of the amount named remained in the sections to which sent. It is known that nearly 50 per cent of the national-bank notes received at the Treasury for redemption comes from banks in the city of New York.

As an indication of the amount of money in circulation in the various States, the per capita of the bank holdings will be of interest. The per capita of cash in banks of the United States on June 30, 1906, was \$11.96. New York had a per capita of cash in bank of \$43.36, Nevada being next with \$35.49, and California third among the States with \$31.05. Geographically, the per capita for the Eastern States is \$24.22, the Pacific States \$21.23, Middle Western States \$11.05, New England States \$10.15, Western States \$9.23, Southern States \$3.19. The average per capita bank holdings in the Hawaiian Islands is \$8.83, and in Porto Rico, \$1.63.

FOREIGN BANKS OF ISSUE.

The following table exhibits the principal items of resources and liabilities of foreign banks. So much of the table as relates to the European banks of issue, excepting capital stock of all banks, and the deposits and loans of the banks of Scotland and Ireland, is taken from the August number of the Bulletin de Statistique. To these data have been added returns from other foreign banks, and the statistics presented are assumed to be complete and accurate with respect to the items indicated.

a Figures for New South Wales and Tasmania relate to Dec. 31; figures for the other States to June 30.

b Figures for postal savings banks relate to the end of the calendar year 1904; figures for the other savings banks to the end of 1903.

c Deposits with the State-controlled Caisse Générale d'Epargne. Includes savings deposits with post-offices. Moreover, accounts are published in the Annuaire Statistique of four municipal and five private savings banks for the year 1904. At the end of that year these nine institutions had 42,279 depositors, credited with \$9,379,633 worth of deposits.

d Exclusive of data for the "special savings banks," the total deposits in which, on June 30, 1904, amounted to \$23,033,143. The total deposits with all savings banks amount thus to \$85,221,593, making the average deposit per inhabitant \$15.21. This total does not include the savings deposits in the chartered banks ("deposits payable after notice or on a fixed day"), which, on Aug. 31, 1906, were \$385,027,505.

e Figures for the two savings banks in Santiago and Valparaiso.

f Includes all savings institutions. Figures for savings banks proper, exclusive of branches of ordinary banks, were 996,615 (number of depositors) and \$100,621,194 (total deposits plus interest due on said deposits at the end of the year).

g Not included in the grand total.

h Exclusive of population in native states. Data for postal savings banks only.

i Exclusive of 132,009,802 lire of savings deposits with the so-called "Società ordinarie di credito" and 313,407,272 lire with the "Società cooperative di credito" at the end of 1903. No data are given with regard to number of depositors in these institutions.

j Data for postal savings banks and the five principal private savings banks. Figures for the former are for the calendar year 1905; figures for the latter are for the calendar year 1904.

k Figures for the "Casa de economie" only.

l Preliminary data for all Government savings banks as published by the Viestnik Finansov, No. 37, 1906, exclusive of securities held for depositors, the nominal value of which, on December 31, 1905, was \$115,431,000.

m Estimates of M. Guillaume Fatio in the Journal de Statistique Suisse, 1906, No. 4.

n Year ended Nov. 20 for trustee savings banks; year ended Dec. 31 for postal savings banks.

^a Government Savings Banks.^b Post-Office Savings Banks.^c In the original accounts £75,828 and 1,445,326 Spanish pesetas, which latter were converted at the rate of 7½ d. per peseta.

By reference to the first of the foregoing series of tables relating to savings banks it will be seen that the United States leads both in aggregate amount of deposits and average deposit account. The savings deposits in the United States during the current year reached \$3,482,137,198, nearly 30 per cent of the deposits in all savings banks of the world. The average deposit account is \$433.79. The German Empire is second in the list, with deposits of \$2,639,590,400, the average deposit, however, being but \$158.89. The United Kingdom, Austria, and France are third, fourth, and fifth in the list, with deposits of \$996,827,464, \$979,282,787, and \$890,398,872, respectively. The average deposit account in the United Kingdom is \$85.24, in Austria \$183.90, and in France \$75.66. Germany, including Prussia, leads in number of depositors, namely, 16,612,771, followed by France, with 11,767,772; United Kingdom, 11,694,918; Japan, 10,279,598; United States being fifth, with 8,027,192. In the order of highest average deposit per capita Denmark is foremost with \$81.47, followed by Switzerland with \$62.26; German Empire, \$45.07; Norway, \$42.55; and the United States, \$41.13.

The second table in the series relates to postal savings banks. Including the colonies it appears that the postal savings banks of the British Empire hold over 52 per cent of the deposits in all postal savings institutions—that is, \$932,697,906 out of \$1,783,066,322. Postal savings deposits in France amount to \$229,862,136; Italy, \$206,224,600; and in Belgium, \$116,052,662.

Under date of May 24, 1906, a law was enacted by the Philippine Commission establishing an institution to be known as "The Philippine Postal Savings Bank," and it was placed under the control and management of the director of the posts. The law provides that immediately upon its passage postal savings banks shall be established at Manila, Iloilo, and Cebu, authority being conferred upon the director, subject to approval of the secretary of commerce and police, to establish postal savings banks in other cities, towns, and villages as rapidly as practicable. So far no returns have been received relating to the operations of these postal savings banks.

BANKING POWER OF THE WORLD.

The banking power of the United States in 1906, as represented by capital, surplus, other profits, deposits, and circulation of national and other reporting banks, together with estimated amount of funds of this character in nonreporting banks, is shown to be \$16,462,470,465. The items composing this fund are stated in the accompanying table:

Classification.	No.	Capital.	Surplus, etc.	Deposits.	Circulation.	Total.
National banks...	6,053	\$826,129,785	\$665,163,368	\$4,145,783,652	\$510,800,726	\$6,147,937,511
State, etc., banks.	11,832	739,163,401	893,679,524	8,159,894,029	9,792,736,954
Nonreporting banks (b).....	3,491	75,356,000	33,280,000	413,160,000	521,796,000
Total.....	21,376	1,640,649,186	1,592,122,892	12,718,837,661	510,800,726	16,462,470,465

^a Includes Government deposits.

^b Estimated capital, etc., based on reports received from private banks.

From the latest and most reliable data obtainable, the banking power of the foreign countries is estimated at \$21,952,500,000, the details being set forth in the following table:

Banks.	Capital.	Surplus.	Deposits.	Circulation.	Total.
Principal European and other foreign banks...	\$1,364.7	^a \$587.4	\$7,642.7	\$4,111.8	\$13,706.6
Foreign savings banks.....	8,245.9	8,245.9
Total.....	1,364.7	587.4	15,888.6	4,111.8	21,952.5

^a Estimated.

Mulhall estimated the world's banking power in 1890 at \$15,985,000,000, the United States being credited with about one-third of that amount. Since that year the banking power of the United States has increased to the extent of \$11,312,400,000, or over 219 per cent; that of the foreign countries \$11,117,500,000, or 102.6 per cent, and the combined banking power \$22,429,900,000, or 140.3 per cent.

The statement following relating to the banking power of the world in 1890 and 1906 shows also the amounts and percentages of increase in 1906 over 1890:

Classification.	1890.	1906.	Increase.	
			Amount.	Per cent.
Banking power of the United States.....	<i>Millions.</i> \$5,150.0	<i>Millions.</i> \$16,462.4	<i>Millions.</i> \$11,312.4	219.6
Banking power of foreign countries.....	10,835.0	21,952.5	11,117.5	102.6
Banking power of the world.....	15,985.0	38,414.9	22,429.9	140.3

MONETARY SYSTEMS AND STOCK OF MONEY IN THE PRINCIPAL COUNTRIES OF THE WORLD.

Statistics have been recently compiled by the Director of the Mint relating to the monetary systems and stock of money in the principal countries of the world on December 31, 1905, and which relate to 47 countries, including dependencies of the British Empire, their aggregate population being 1,324,400,000. Gold is the monetary standard in all of the countries with the exception of the Straits Settlements, the Malay States, Ceylon, Johare, Bolivia, the Central American States (exclusive of Costa Rica and British Honduras), and China, wherein silver is the standard. The stock of money is stated at \$13,215,400,000, composed of \$6,483,500,000 gold, \$3,176,000,000 silver, and \$3,555,900,000 uncovered paper currency. Nearly 75 per cent of the gold is held by the following-named countries and in the amounts stated:

United States, \$1,420,800,000; France, \$1,032,600,000; Germany, \$917,400,000; Russia, \$854,900,000; United Kingdom, \$559,100,000. The per capita of gold holdings in these countries is as follows: France, \$26.41; United States, \$16.91; Germany, \$15.14; United Kingdom, \$12.79; Russia, \$5.96. Fifty per cent of the stock of silver is held by the same countries, the amount and per capita being as follows: United States \$686,800,000, per capita \$8.18; France, \$411,100,000, per capita \$10.51; Germany \$209,700,000, per capita \$3.46; United Kingdom \$111,900,000, per capita \$2.56; Russia \$81,900,000, per capita \$0.57. In connection with the stock of silver it is noted that nearly one-third of the aggregate is held in India and China, the amounts being \$603,800,000 and \$350,000,000, respectively.

One-third, approximately, of the uncovered paper currency is in the following countries: United States, \$582,100,000; Germany, \$213,900,000; France, \$118,200,000; United Kingdom, \$116,600,000, the per capita therein being as follows: United States, \$6.93; Germany, \$3.53; France, \$3.02; United Kingdom, \$2.67. Nearly one-half of the uncovered paper currency of the world, which amounts to \$3,555,900,000, is in the South American States, the exact amount being \$1,437,300,000. Consolidating the gold, silver, and uncovered paper currency in all countries, it is shown that the per capita is greatest in France, namely, \$39.94. The amount per capita in the United States is \$32.02; in Germany, \$22.13; in the United Kingdom, \$18.02, and in Russia, \$6.53.

Japan's stock of money is reported at \$211,500,000, and the per capita \$4.15. The stock of gold in the Empire amounts to \$69,900,000; silver, \$43,300,000, and uncovered paper currency, \$98,300,000.

CLEARING-HOUSE EXCHANGES.

Revised returns to Manager Sherer of the New York Clearing House show that the amount of exchanges of the clearing houses of the United States for the year ended September 30, 1905, was \$140,612,554,199. The aggregate clearings for the year ended September 30, 1906, were \$157,749,328,913, a net increase of

\$17,136,774,714. With the exception of six cities, reporting a decrease in the amount of clearings of \$10,584,882, there was an increase in the amount of transactions of the associations in the 112 cities in which clearing-house associations are in existence.

Nearly 70 per cent of the clearings of the country were effected through the New York Clearing House, the amount of exchanges handled in that city during the past year being \$103,754,100,091. Chicago is second on the list with \$10,873,546,251, followed by Boston with \$8,149,377,513, Philadelphia with \$7,553,273,999, St. Louis \$2,934,576,620, and Pittsburg \$2,630,996,408. The other cities with exchanges exceeding \$1,000,000,000 are San Francisco, Baltimore, Cincinnati, and Kansas City.

The New York Clearing House has a membership of 55, representing capital of \$118,150,000. The average daily clearings in New York during the year were \$342,422,773. The settlement of balances of the transactions for the year were effected by the payment in money of \$3,832,621,024, or 3.69 per cent of the aggregate volume of clearings. Practically the entire balances were paid in gold, i. e., 99.99 per cent. In 1896 only 0.01 per cent of the balances were settled in gold.

The clearing-house transactions of the Assistant Treasurer of the United States at New York for the year ended September 30, 1906, aggregated \$447,344,424, of which \$422,025,604 represented exchanges received and \$25,318,820 balances received from the clearing house.

The clearing-house transactions of the whole country from 1900 to 1906, inclusive, were as follows:

1900.....	\$84,000,000,000
1901.....	114,000,000,000
1902.....	115,000,000,000
1903.....	113,000,000,000
1904.....	102,000,000,000
1905.....	140,000,000,000
1906.....	157,000,000,000

There will be found in the appendix a table relating to the exchanges of the clearing houses of the United States for each year from 1900 to 1906, inclusive, geographically arranged.

A condensed statement is given herewith of the transactions, in millions of dollars, by geographical sections, for the years ended September 30, 1900, and 1906, together with the amount and percentage of increase.

THE ANNUAL REPORT.

The Comptroller's unabridged report is published in one volume, as was the case last year. The individual statements made by the banks under date of September 4 appear in condensed form at the end of the report. The principal items of resources and liabilities are given as reported; bonds, exclusive of United States bonds, other similar investments, and real estate are consolidated; also amounts due from banks, exchange, and other cash items, as well as all liabilities other than capital, surplus and profits, circulation, individual deposits, deposits of the Government and of United States disbursing officers.

DIGEST OF BANK CASES.

Following the text of this report will be found a compilation of decisions in bank cases rendered by the Federal courts and published in the United States Supreme Court Reports and Federal Reporter since the publication of the 1905 edition of the Digest of National Bank Decisions.

The most important questions of general interest which appear in the compilation are the following:

Powers of States in relation to legislation affecting national banks; enforcement of liability of stockholder of national bank in voluntary liquidation; rights and liabilities of national bank on indorsement or transfer of negotiable paper; powers, etc., of officers of national bank; criminal and civil liability of officers of national banks; misapplication of funds of and false entries in books of national banks; national banks subject to control of Congress; ultra vires acts; assessment on stock of insolvent national bank; liability of shareholders determined by Federal not State statute; right of shareholders to inspect books.

AMENDMENTS TO THE NATIONAL-BANK ACT.

Section 5146 of the Revised Statutes provides in part that every director of a national banking association must own in his own right at least ten shares of the capital stock of the bank of which he is a director. Under date of February 28, 1905, this section was amended to provide that a director of a national bank with capital not in excess of \$25,000 shall own in his own right at least five shares of such capital stock.

Under date of December 21, 1905, an act was approved, supplemental to the act entitled "An act to provide for the construction of a canal connecting the waters of the Atlantic and Pacific oceans," providing as follows:

That the two per cent bonds of the United States authorized by section eight of the act * * * approved June twenty-eighth, nineteen hundred and two, shall have all the rights and privileges accorded by law to other two per cent bonds of the United States, and every national banking association having on deposit, as provided by law, such bonds issued under the provisions of said section eight of said act approved June twenty-eighth, nineteen hundred and two, to secure its circulating notes, shall pay to the Treasurer of the United States, in the months of January and July, a tax of one-fourth of one per cent each half year upon the average amount of such of its notes in circulation as are based upon the deposit of said two per cent bonds; and such taxes shall be in lieu of existing taxes on its notes in circulation imposed by section fifty-two hundred and fourteen of the Revised Statutes.

The recommendations of the present and prior Comptrollers with respect to an amendment of section 5200, relating to the limit to the amount of loans which may be granted by national banking associations, received consideration by the last Congress, and on June 22, 1906, an act was approved amending that section to read as follows:

The total liabilities to any association, of any person, or of any company, corporation, or firm, for money borrowed, including in the liabilities of a company or firm the liabilities of the several members thereof shall at no time exceed one-tenth part of the amount of the capital stock of such associations, actually paid in and unimpaired and one-tenth part of its unimpaired surplus fund: *Provided, however,* That the total of such liabilities shall in no event exceed thirty per centum of the capital stock of the association. But the discount of bills of exchange drawn in good faith against actually existing values, and the discount of commercial or business paper actually owned by the person negotiating the same shall not be considered as money borrowed.

No other legislation affecting national banks was enacted by the last Congress except the act approved June 25, 1906, amending the code of the District of Columbia, providing for the examination of and reports from savings banks, savings companies, trust companies, and other banking institutions organized by virtue of the laws of any of the States of the Union, and having an office or banking house located in the District of Columbia where deposits or savings are received.

The second proviso to section 713 of the code, as amended, reads as follows:

That all publications authorized or required by section fifty-two hundred and eleven of the Revised Statutes, and all other publications authorized or required by existing law to be made in the District of Columbia, shall be printed in two or more daily newspapers of general circulation, published in the city of Washington, one of which shall be a morning newspaper.

SAVINGS BANKS IN THE DISTRICT OF COLUMBIA.

In my annual report for 1905 attention was called to the necessity for legislation regulating banking in the District of Columbia, in order to secure to depositors in banks organized under authority of State laws and doing business in the District the same measure of protection that is afforded depositors in banks and trust companies organized under Federal laws.

In line with this suggestion and the recommendation of the Commissioners of the District of Columbia, an act was passed and approved June 25, 1906, placing under the supervision of the Comptroller of the Currency all savings banks, savings companies, trust companies, and other banking institutions organized under any act of Congress or by virtue of the laws of any of the States, having an office or banking house in the District of Columbia for the receipt of deposits or savings.

Previous to this enactment the only banking institutions in the District of Columbia under official supervision were the national banks and trust companies organized under acts of Congress. Banking institutions doing business in the District but organized under authority of State laws were subject practically to no official supervision whatever, Federal, State, or District.

When the act of June 25, 1906, went into effect there were 14 institutions of this class operating in the District of Columbia. Six of these were incorporated under the laws of Virginia, six under the laws

of West Virginia, one under the laws of Connecticut and one under the code of laws for the District of Columbia, as amended by the act of June 30, 1902.

On September 4, 1906, the date of their first report of condition made to the Comptroller under the above-mentioned act, 13 of these institutions showed individual deposits aggregating \$4,191,738. Banking institutions having offices or banking houses in foreign countries as well as in the District of Columbia, being required by the act mentioned to make and publish semiannual reports only, no report was received from the International Banking Corporation, the only institution of this class having a banking house in the District.

All of these institutions were examined during the past few months by a national bank examiner. Two of them were found to be insolvent and were immediately closed and placed in the charge of receivers, namely, the Aetna Banking and Trust Company and the Peoples Savings Bank.

The first-named company was organized under the laws of West Virginia May 14, 1901. Its principal office was located in Butte, Mont. It operated a branch in Washington, D. C., and was reported as maintaining another in New York City. An examination of the Washington branch disclosed a condition of hopeless insolvency, and immediately upon its being closed by the Comptroller the parent bank at Butte suspended business. A receiver was placed in charge of each bank by the Comptroller. No books or assets whatever were found at the New York office. The liquidation of this concern has not progressed far enough to enable an accurate statement to be made. What disposition was made of the funds or who is responsible for their disappearance has not yet been determined, but apparently the bank has been looted by its officers, and the prospects for any material returns to the depositors and other creditors are very discouraging.

The failure of this bank affords a striking illustration of the urgent necessity for more adequate legislation regulating banks of this class operating in the District of Columbia, and providing for the punishment of offenses committed against the banking laws.

The supervisory powers conferred upon the Comptroller over institutions of this kind by the act of June 25, 1906, are insufficient, as they only give him authority to require them to make and publish sworn reports of condition, to cause an examination to be made into their affairs whenever he may deem it necessary, and to take possession of and appoint a receiver for any such institution for the same reasons that he is authorized to take possession of and appoint a receiver for a national bank.

If the capital stock of any such bank becomes impaired by losses or otherwise, he has the power to require the impairment to be made good within a stated time under the alternative penalty of liquidation or receivership. If an examination discloses a condition of insolvency, he may close the bank's doors, take possession of the institution, and appoint a receiver to wind up its affairs; but there is no law, Federal or District, regulating the conduct of the bank's business or empowering the Comptroller to correct abuses or dangerous practices which jeopardize the safety of the institution and ultimately result in insolvency and irreparable loss to depositors.

The provisions of the national banking laws covering crimes and

misdeemeanors do not apply to these banks, and no adequate laws of this nature are provided by the District Code.

The remedy recommended for this condition of affairs is the enactment of a law requiring banks and banking companies of this class to incorporate in the District of Columbia, instead of permitting them in the absence of such a statute to operate under charters obtained from neighboring States, which do not appear to retain any control or to exercise any supervision over them. All institutions of this kind in operation in the District of Columbia at the time of the approval of the proposed act should be required to reincorporate under its provisions within a stated time or to cease doing business in the District.

The Code of Laws for the District, approved March 3, 1901, should also be amended to provide for the punishment of offenses against banking institutions operating therein by an enactment similar to that which provides for offenses against the national banking laws, as follows:

Every president, director, cashier, teller, clerk or agent of any savings bank, or savings company, or trust company, or other banking institution, organized under authority of any act of Congress to do business in the District of Columbia, or organized by virtue of the laws of any of the States of this Union and having an office or banking house located within the District of Columbia where deposits or savings are received, who embezzles, abstracts or willfully misapplies any of the moneys, funds or credits of the bank, company or institution; or who, without authority from the directors, issues or puts forth any certificate of deposit, or draws any order or bill of exchange, makes any acceptance, assigns any note, bond, draft, bill of exchange, mortgage, judgment or decree; or who makes any false entry in any book, report or statement of the bank, company or institution, with intent, in either case, to injure or defraud the bank, company or institution, or any other company, body politic or corporate, or any individual person, or to deceive any officer of the bank, company, or institution, or any agent appointed to examine the affairs of any such bank, company or institution; and any person who, with like intent, aids or abets any officer, clerk or agent in violation of this section, shall be deemed guilty of a misdemeanor and shall be imprisoned not less than five years nor more than ten years.

BANK EXAMINATIONS.

The Comptroller would again respectfully call the attention of Congress to the necessity of a change in the system of bank examinations, and renew his recommendation made in the report for 1905, that the bank examiners be paid salaries, by the day, instead of fees, as at present.

This is a matter of very great importance in the interest of good administration, and the effective supervision of national banks. Every Comptroller of the Currency has agreed in this opinion, and has recommended that this change be made. The examination and supervision of national banks will never be what it should be, until this recommendation is carried out.

CURRENCY REFORM.

The Comptroller again most respectfully and earnestly calls the attention of Congress to the necessity of a change in the national currency and renews the recommendations made in his report of December 1, 1902, that the national banks be authorized to issue a portion of their circulation as uncovered notes, as the best means of adding to this circulation the greatly needed quality of elasticity.

It is recommended, therefore, that the laws be amended so as to allow of the following changes:

All national banks which have been in operation for not less than two years, and which have an unimpaired surplus of not less than 20 per cent of their capital stock, to be permitted to issue not to exceed 50 per cent of the amount of their bond-covered notes in notes uncovered by bond deposits.

To protect these notes the banks shall carry the same reserves as against deposits, in gold or its equivalent; in reserve banks this would be 25 per cent, and in all others 15 per cent of the outstanding notes.

These notes to be further protected by a guaranty fund of 5 per cent, to be deposited by the issuing bank with the Treasurer of the United States before any are issued.

Out of this guaranty fund all such gold reserve notes to be redeemed on demand.

The guaranty fund to be kept good by a graduated tax on the gold reserve notes, beginning at a rate of not over $2\frac{1}{2}$ per cent per annum.

Every bank issuing gold reserve notes to be required to provide means of redemption for such notes, in every reserve and central reserve city, and also such other points as may be designated.

These points to be so numerous and convenient as to put every national bank within twenty-four hours of a redemption center.

The provision limiting the retirement of the present bond-secured notes to \$3,000,000 per month, not to apply to gold reserve notes, and this limit to be repealed or greatly extended, at the discretion of the Secretary of the Treasury, in its application to bond-secured notes.

There are several special reasons why elasticity is very necessary to our currency system. There is no other country where there is such a great variation in the amount of currency needed for current cash transactions, owing to the vast extent of our territory, our varied interests and enormous business, and the great value of crops and products which have to be moved at certain seasons, calling for very large and varying amounts of cash. There is no good way to provide this needed elasticity but by means of bank notes, if they can be made quickly available when and where needed and as quickly redeemed and retired when the work is done and the demand for them ceases.

In our system all the elasticity must be supplied by the bank notes. There is and can be no periodical variation in the amount of coin and coin certificates in circulation which can in any way respond to varia-

tions in demand. The volume of our Government legal-tender notes is absolutely fixed by statute and can not be varied to meet changing conditions. Since all the elasticity in our supply of currency must come from the bank notes, it is therefore of vital importance that they be given this quality in the highest degree possible consistent with safety. This should be done with the greatest possible care, in order that the essential qualities of safety and uniformity in value which our bank notes have always had in so marked a degree shall not be lost or impaired, but if this currency can be made more elastic without danger of losing these qualities it should be done at once.

The autumn of each year makes more apparent the urgent necessity of some additional facility or means by which the demand for crop-moving funds can be supplied to the people without derangement of all the business and financial affairs of the country. There is no possibility that this can be supplied except by Congressional legislation. It is a question which involves the welfare and prosperity of every section of our land, and every man, woman, and child in the United States.

As has been so often said, there is no flexibility or elasticity in our currency. The necessity for this is always most acutely felt in the late summer and early autumn, or at the crop-moving time. The two ways in which the demand for funds then manifests itself are in a demand for an increase of deposits requiring more reserve money, and for cash or currency to make cash payments. This latter demand has to be largely met by money which would otherwise be available for reserve. The withdrawal of this reserve money reduces the reserves when they should increase, and after it is no longer needed for cash payments, the money returns to reserves and tends to inflate loan credits and induce speculation.

The real solution of the problem is to enable the banks to supply for the cash transactions bank notes not available for reserves, and which therefore do not contract loans when paid out and do not inflate them when they return.

Considering for the moment the supply of crop-moving funds, which is the real critical point in this question: When the harvests first begin in the South and Southwest, the banks at once feel two demands; first for loans to the people who must provide funds to buy the products of the farm and plantation; second, for currency to pay the wages of labor and to pay for such products as must be paid for in actual cash, and not by a transfer of credits by check. This demand for loans to be kept on deposit makes more reserve money necessary for the banks to hold, and at the same time they must supply more currency for cash transactions. It would seem, therefore, perfectly axiomatic and apparent to anyone that the best way to meet the situation would be to keep in the banks all the money which can properly be used for reserve and to supply for cash transactions, currency which will answer all necessary requirements, be just as safe, just as convenient, and just as good in every way, but which is not available as bank reserves. This can be done simply, easily, and automatically by the proper use of the right kind of bank notes, and in no other way.

The increase in credits necessary for crop-moving is perfectly legitimate, as well as necessary. To supply such credits is one of the prime functions of a bank, and among the greatest services it can perform.

There could be no better basis of credit than the production of such enormous wealth as our people gather every year from our wonderfully productive lands. This is the ideal business for banks, and the ideal way for such business to be done for the people is through a good system of banks with facilities for granting credits and making the value of the products immediately available to those who have produced them, either in deposits to be checked against, or in currency for cash payments, at the option of the people, not of the banks.

For such advances as are made by the banks, there is a prompt and sure pay day, as there is an immediate cash market for everything which is produced. The people who have raised the products, those who want to buy and trade in them, and those who wish to procure and store them for future use, are entitled to these credits, and are entitled to such a banking system as will supply them as needed, without friction or delay, and with the least possible derangement of the other business of the country.

There should be no limit to the amount of credits created for crop moving but the judgment of each bank as to the credit it shall give to its customers, subject to the limitations of the banking laws and the amount of reserve money it can provide to safeguard its deposits and maintain its legal reserve. This is true not only of the banks in the farming communities directly in communication with the crop movement, but also those in all the larger cities designated as reserve and central reserve cities. The whole volume of the deposit credits of the country should be, and is, limited only by the total amount of reserve money available, and the amount granted by each bank is limited only by the judgment of its officers and the amount of its cash reserve. There is no urgent need of present legislation on the subject of this reserve money. The ideal reserve would be gold or gold certificates immediately convertible into gold, but our business is now all adjusted to the use of what is termed in the statutes "lawful money," and as our various kinds of lawful money are now kept as good as gold, they may all properly be used as bank reserves and considered practically as gold reserves.

As we have seen, then, the banks are free, as they should be, to increase and reduce their deposit credits up to the limit of their available reserves. If they were also at liberty to either increase or reduce their bank-note credits, within safe limits and under proper regulations, so they could supply the varying amount of currency needed by their customers for cash transactions, the whole financial machinery for supplying the crop moving funds would be complete.

In considering these questions, there are a few fundamental principles which should be clearly kept in mind. They are not new—few, if any, good financial ideas are; novelty is one of the least desirable qualities in currency plans. We are apt, however, to lose sight of these principles or confuse their application.

THERE ARE TWO GENERAL USES FOR MONEY OR CURRENCY IN MODERN BUSINESS.

The first is for bank reserves, against deposits or note circulation, and for this use gold or its equivalent only should be employed.

The second is for daily cash transactions. This is the proper field for the use of bank notes.

THERE IS NO ESSENTIAL DIFFERENCE BETWEEN A BANK-DEPOSIT CREDIT AND A BANK-NOTE CREDIT.

They should be kept as nearly identical as possible by legislation. It should be the free option of the customer of the bank to use either one, and it should, as far as possible, be made a matter of indifference to the bank as to which one the customer does use. This may be practically accomplished by requiring the same reserve for note credits as deposit credits, and by providing for such redemption that the two classes of credits may be daily interchangeable.

This latter is the vital principle of the whole matter, and if we can so change our national currency laws that the banks are still free to expand or contract their credits in response to the demands of their customers and the amount of reserves available and can then supply these credits to their customers either as note credits or deposit credits instantly convertible from one to the other at the convenience of the customer without danger to either the customer or the banks, the main problem of our currency will be solved.

The credit system, with all necessary machinery for deposit credits, is already in satisfactory operation. We need only to add to it proper facilities for note credits. The question is, Can it be safely done, and if so, how? Unless its safety can be fully demonstrated it would be very unwise to make any change in our national currency, for whatever their faults are or may have been our bond-covered national-bank notes have always had the prime requisite of absolute safety and uniformity in value.

GOLD RESERVE BANK NOTES.

The Comptroller is of the opinion, however, and believes it can be absolutely demonstrated, that such a change as is necessary can be made without any danger whatever, and the necessary elasticity added to our bank-note currency by allowing the banks to issue a portion of their notes uncovered by a bond deposit, protecting them by other methods which will insure their being just as good and safe in the hands of the note holders and allow of such daily expansion or contraction as will make the total volume of our currency responsive to the needs of trade, with great resulting benefit and no corresponding disadvantage to our currency system.

In any plans for making this change it is necessary to utilize the present bond-secured currency. We should not if we could do anything to radically change or do away with the present notes. The most conservative and practicable plan seems to be to make no change whatever in the present national-bank circulation, but to allow the national banks to issue in addition to the present notes a certain percentage of notes uncovered by bond deposits, but against which the banks should be required to hold in gold or its equivalent the same reserves as are now held against deposits, and at the same time to so add to the laws and regulations in regard to redemption as to provide very ample requirements and means for redemption and retirement.

This redemption machinery can be made so complete, and the redemption centers can be so numerous and convenient, as to compel constant and frequent redemption of the uncovered gold reserve notes. It should also be part of this plan to provide a guaranty fund for the

payment of these uncovered gold reserve notes. Each bank should be required to pay into this fund 5 per cent of its uncovered notes before they are issued. This fund should be maintained by a tax on the uncovered circulation. Forty or 50 per cent of the amount of the bond-covered notes might be ultimately issued as uncovered gold reserve notes with entire safety. The Comptroller would suggest, however, that the authorization be gradual, at the rate, say, of 20 per cent, the first year, and an increase of 10 per cent each year until 50 per cent of the bond-covered notes is reached.

Under this plan, the safeguards to take the place of the bond deposit, are, first, the guaranty fund, deposited before the notes are issued, and maintained by a tax on the notes; next, the reserve to be held by the banks, in gold or its equivalent, in the same proportion as now required against deposits. In addition to this, there is added safety in the fact that the notes are limited by law to a maximum percentage of the notes of the bank of issue, and would be further limited by such ample facilities for redemption that the total amount of uncovered gold reserve notes, at any time in circulation, would be exactly the amount the people require, and will keep in their hands for cash transactions.

Any change in the law should apply uniformly to all national banks in good standing, except that the uncovered gold reserve notes should only be issued by banks which have been organized and in operation for at least two years, and have an unimpaired surplus of at least 20 per cent of their capital stock. Authority should also be given to the Comptroller of the Currency, with the approval of the Secretary of the Treasury, to veto the issue of any such notes by any one or all of the banks.

Any bank which was known to be in bad condition could thus be prevented from issuing the notes, and the issue confined to good solvent banks, which could properly be trusted to protect them.

REDEMPTION.

The essential feature in any good system of bank notes is constant and frequent redemption. Under our present bond-secured system we have practically no inducement for redemption, and no real redemption at all. The notes come to the Treasury and are reissued or replaced with new notes about once every two years, but this is no real redemption, such as is contemplated in this plan.

If the uncovered gold reserve notes are authorized, every national bank issuing them should be required to have a redemption agent in every reserve city and at enough points in addition to those now designated as reserve cities, to insure that any bank on the line of a railway, with ordinary mail facilities, could reach a redemption center within twenty-four hours. The result of this would be that whenever any bank received the note of another, unless there was a demand for it that day, from its customers for current cash in addition to the demand for its own notes, the note would be sent to be redeemed and made available as reserve.

The notes on reaching the redemption center could be cleared like checks through a clearing house, and the balances either remitted as currency or transferred for credit in reserve or central reserve cities. Each bank which issued uncovered gold reserve notes would thus have to face every day the redemption of some of its notes and be

prepared for it. Self-interest as well as the law would compel them to carry the necessary reserves. The advantage of keeping its own notes in circulation would make each bank alert to pay out only their own, as long as they had them on hand, and to send notes of other banks to the nearest redemption center for the credit of their account against their own notes which would be presented there. The number and location of the redemption centers would insure that every gold reserve note as soon as there was any decrease in the demand for it for current cash transactions, would at once start on its way for redemption. In this way the net results of the transactions of each bank with its own customers would immediately be felt, and the amount of the uncovered gold reserve notes in circulation would be exactly determined by the demand for them for current cash transactions. If the people wanted notes and would keep them in circulation, they would stay out; if they no longer needed them, and began to turn them into the banks, they would at once be redeemed. The volume of notes in circulation would be immediately and exactly responsive to the demands of the people, and the needs of business.

This is the only way to accomplish this result, and it will result in a far better regulation of the amount of circulating notes needed than any tax or any arbitrary regulation, either by law or the discretion of any executive officer. This is the result of experience everywhere such a system has been tried, and a careful study of all the elements and forces involved makes it clear that the requirement of a gold reserve and prompt and constant redemption would make the proposed gold-reserve notes quickly and exactly responsive to the demands of business, and the national banks could and would thus supply such notes as are needed just when and where they are needed.

In the discussion in regard to elastic bank notes, it is frequently urged that the redemption of the notes of the national banks would be interfered with and possibly be made insufficient to accomplish the results claimed for it, by the fact that many of the notes would soon come into the possession of State and private banks, which would have no inducement to forward them for redemption, and would therefore not sort them out for that purpose, but carry them in their own reserves.

This difficulty could be met by allowing all banks, whether national or not, to have the same privilege of forwarding notes to redemption centers, and receiving credit for them there, which they might have transferred for credit at the different subtreasuries, or in the reserve or central reserve cities. There would be no practical difficulty in the way of making this arrangement, which would result in State and private banks having the same inducement to sort out the notes and to forward them for redemption as national banks would have. This would make the redemption perfectly complete and automatic and accomplish just exactly the result which is desired from it.

Another impediment to redemption which has been suggested is the holding of national-bank notes by State banks and trust companies between which and the national banks whose notes were held there was some community of ownership or some arrangement in regard to the holding of notes. This might be done in some cases, but we must give the managers of such banks and trust companies credit for good business judgment and prudence, and assume that the reserves to be held by them are for the purpose of protecting their

banks. No prudent or careful banker would, therefore, hold as any considerable part of his reserve notes which in case of any trouble or crisis would simply be a liability of the bank in which he was interested which would add to their difficulties in time of trouble, instead of being a source of strength. While there might be occasional instances where the gold-reserve notes would be so held, the aggregate amount can not possibly be enough to seriously interfere with the scheme of redemption, or prevent its working as outlined, as a whole, with entire satisfaction.

SAFETY OF GOLD RESERVE NOTES.

The ample redemption of the uncovered gold-reserve notes and the prohibition of their use for bank reserves, insures that the people and not the banks shall determine what quantity of them shall be kept in circulation. A full and fair consideration of these provisions with the fundamental principles of banking and credits thoroughly understood, will demonstrate beyond any doubt that such gold reserve notes can be issued by the banks with absolute safety to the note holder and the banks as a whole. The guaranty fund will make the note holder as safe as the holders of the notes which have been in circulation for more than forty years, without the loss of one dollar. The provisions for gold reserves held against the notes and for frequent redemption will make the note credits as safe to the bank as their present deposit credits.

The records of the national-bank failures for over forty-three years show that the 5 per cent guaranty fund is ample to insure safety. A 5 per cent fund in the year 1893 would have paid the notes of all the 65 banks which failed almost five times over if there had been no assets in the banks and no dividends to creditors, and in the year of the panic of 1873 it would have paid about seven times the amount of the notes of the banks which failed. These were the years of the worst panics we have ever had. A tax of less than one-fourth of 1 per cent on the circulation of active national banks would have provided for the redemption of the circulation of all banks which have failed during the existence of the system, so that a 5 per cent fund is more than twenty times enough to cover the average note losses, without taking credit for any dividend from the insolvent banks. The national banks which have been finally liquidated since their failure paid on the average 78 per cent to creditors, so that if the reserve fund is made an ordinary creditor it will be reimbursed for at least 75 to 80 per cent of the losses, as stated above. There can not therefore be the least possibility that notes will not be perfectly secure with a 5 per cent fund, as it would be sufficient to pay the average net losses for one hundred years.

Five per cent on the present amount of national-bank notes is enough to pay every note of every national bank which has failed in forty-three years. These figures, which are based on the experience of forty-three years, should surely be conclusive and absolutely remove all doubt as to the sufficiency of the guaranty fund to make every note good in the hands of the holder.

The figures also show that there is no necessity for making these gold-reserve notes a first lien on the assets of a bank, but that they can safely be put on the same basis as the deposit credits, thus main-

taining consistently the similarity and equality of the note and the deposit credit. One of the strong objections to uncovered notes, that they would be an element of danger and a menace to depositors, would thus be completely met. Every holder of an uncovered gold-reserve note would be protected by the guaranty fund which would immediately pay his note. This would eliminate all possibility of loss to the public.

In case of failure the guaranty fund would look for its reimbursement to the receiver of the insolvent bank and stand in the same relation as the other creditors. This would result in the collection of about 78 per cent of all losses. The depositor or other creditor would be fairly treated by receiving the same dividends as the guaranty fund, and the credit notes, instead of being a menace and a danger to the depositor, would add to his safety. They would enable the individual banks and all the banks as a whole to meet the seasonable demands and also many sudden demands for currency from their depositors with gold-reserve notes without reducing the amount of their reserve money. This would in most, if not all, instances prevent the necessity for the calling or collection of loans on short notice, thus adding greatly to the stability and safety not only of all the banking business, but of all other enterprises and undertakings in any way dependent on bank accommodations, as practically all modern business is.

Objection is frequently heard to a great number of small banks, widely scattered, issuing uncovered notes. On thorough consideration this objection does not seem to be serious, and there are some counter-balancing advantages. The notes being furnished by the Government, there is no danger of fraudulent overissue. The proportion of uncovered notes to the capital of the bank proposed is not large, and the regulations could be made such as to remove the temptation to organize the banks for the note issue only. The constant redemption spoken of so often would check this. These small banks are now allowed to take unlimited deposits. The notes will be safer than the deposits on account of the guaranty fund. If the banks are fit to take unlimited deposits, they are fit to issue a limited quantity of notes, protected by a gold reserve. One chief advantage of the issue by the great number of banks is that the gauge of the quantity needed by widely scattered banks, each in close touch with its own customers and community, would be the best possible way to determine the proper amount required. They would feel and supply the demand more quickly and collect and retire the notes more promptly, quietly, and with less disturbance when no longer needed in circulation.

Although the small banks authorized under the law of 1900 have not yet gone through the test of a panic, the figures given elsewhere in this report show that the proportion of failures among them has been for six years rather less than among the larger banks, and as far as this goes it is an indication that their management is up to the average of all the banks.

GRADUATED TAXATION OF NOTES.

Carrying out the principle of keeping the note credit as nearly as possible the same as the deposit credit, the rate of taxation should be low on the greater part of the uncovered notes; that is, not over $2\frac{1}{2}$ per cent per annum on at least the first half of the uncovered notes. Behind this we should have for special emergencies further notes with a rapidly increasing tax, some at 4, some at 5, and the last at 6

percent per annum. This would insure that there should be some reserve elasticity; that we should have several lines of reserve which would come into action one at a time, in emergencies, as they are needed.

The bulk of the variation, however, would be, and must be, in the first or lower taxed notes. The tax of $2\frac{1}{2}$ per cent would about correspond with the interest paid on reserve deposits and maintain the equality of notes and deposits in this respect. The gold reserve and frequent redemption would make these notes vary exactly in accordance with the demand of the people for current cash transactions. They would supply the variations due to differences in the seasons and the ordinary course of business. They might be increasing in one part of the country, where currency is needed, and decreasing in another, where the demand is less. The business of each bank with its customers would supply just the amount needed for each community. If the banks are compelled to carry a gold reserve and to furnish daily redemption for what are not needed, it will result in far better regulation of the quantity of circulation of currency than would be brought about by any tax, official supervision, or arbitrary control through any currency commission or clearing house. It will be better than any other system which is not automatic and controlled by the composite result of the relations with his bank of every bank customer in the United States.

This result can only be accomplished, however, with a considerable proportion of the notes moderately taxed. The notes at the higher rate could only come out in times of special stress or emergencies. Instead of helping the banks and people to keep off a crisis, they would and could only be used after the crisis had become manifest. The mere issue of such notes would be the sure sign of it. The high-taxed notes would only rarely be used, and every bank would avoid the confession of weakness by issuing them to the last minute possible. They might answer a very good purpose if we had a great central bank with government or semigovernment ownership and control, which could, in the public interest, take out notes at 5 or 6 per cent and loan them even at a lower rate, as is sometimes done by the banks in Europe, but it is not reasonable or sensible to expect the necessary concert of action and disinterestedness to do this, from our thousands of scattered and independent banks. In times of great emergency, when conditions are widespread and well known, they might act together, but it would then be too late to prevent much of the harm which comes from such conditions. A great central or government bank might do with perfect safety many things it would be folly for any individual bank to attempt.

A circulation to be used in emergencies may be very useful and proper, but what is much more necessary is a circulation which will always tend to prevent, and in most cases really prevent, the conditions which give rise to or make the emergency necessary. This the lower taxed gold reserve notes would do, and the higher taxed alone would not. The lower taxed notes would be in circulation to a greater or less extent all the time. Most of the banks would at once take them out and be prepared to use them whenever their depositors wished to change their deposit credits for note credits. In this way any increase in the demand for currency would be met by bank notes without any change in the total volume of credits, or any with-

drawal of reserve money making a contraction of loans necessary. All the uncovered gold reserve notes, at whatever rate of taxation, should be exactly alike in appearance, so no one would know as to the tax rate a note bore.

The lower taxed notes being always more or less in circulation, increasing or decreasing as the demand dictated, the people would be used to them and expect all the banks to use them. Then, if there came a time when the notes at the higher rate were needed, the banks could and would use them without making it a signal of danger, and without anyone knowing the quantity at each rate in circulation. The higher taxed notes might in this way be a final reserve in case of emergency, but without a considerable proportion of notes ordinarily and commonly in use the high-taxed emergency notes would be a source of danger rather than safety.

As for notes with a high rate of taxation, without any gold reserve, they would not answer the purpose at all, with our system of small, independent banks. The reserve is a far better protection than the tax, and under no circumstances should the notes be permitted without ample reserves. In Germany, where the Imperial Bank makes what is known as an overissue of notes taxed 5 per cent, the bank must have a reserve in cash of one-third the amount of the notes, and have the other two-thirds covered by discounted paper.

The issue of uncovered notes without reserves would be inflation of credits pure and simple, without any safeguards, and would do far more harm than good. Reserves and redemptions are what we must depend on to make the notes safe and regulate their amount. Taxation will not and can not do either.

With the gold reserves, however, and a graduated tax, or at least two rates of tax, one of them low enough to allow of a considerable use of notes in normal times, we should have the great advantage of having note credits and deposit credits quickly and easily interchangeable. With proper laws and regulations there can be no possible harm or danger from this, and its benefits and advantages are very great.

This is all there is to the whole proposition. There can be no harm in making such a change. It will greatly benefit every industry and every line of business in the United States. This simple and correct principle introduced into our currency system will make it thoroughly adequate and well adapted to the business of our people. Until this is done in some way it can not be either theoretically sound or practically efficient.

NO DANGER OF INFLATION OR SPECULATION.

A natural inquiry, perhaps, will be whether the issue of these uncovered gold reserve notes may not lead to inflation and possibly to the promotion of speculation in stocks, lands, and many commodities to a dangerous degree. It certainly could not promote stock speculation or furnish any funds for such purposes. Such speculation is not done with currency at all. There is seldom, if ever, a dollar of actual cash used. It is all done through loans and checks against deposits. The change in the law proposed will not add to the loans or make any addition to the possible credits, because the reserve requirements are the same for notes and deposits. The change from one form of credit to another will add no facilities for stock exchange

or grain speculation and little or none for land speculation. In fact it seems certain that such notes as are contemplated will not be used to as great an extent by the large city banks as by the banks in the country and small cities.

Assuming that the gold reserve notes might all be kept in circulation all the time and be made the basis of loans at 6 per cent per annum to the full extent of their issue (this is a condition which could never possibly exist—but assume that it should), the profit to the issuing bank in a central reserve city would be about 1.7 per cent; in a reserve city about 1.9 per cent, and in a nonreserve city a little under 2.5 per cent on the notes taxed at $2\frac{1}{2}$ per cent. Under the present system of notes about 49 per cent of the redemptions come from New York City alone and 86 per cent come from 8 cities composed of the central reserve cities and 5 of the largest reserve cities. The almost certain probability therefore is that the difficulty of keeping the gold reserve notes in circulation in New York, and especially the large eastern cities, and the lower interest rate than 6 per cent which usually prevails, will cut down the above estimated profits fully one-half, so that it will probably be less than on the bond covered notes at present. Under these conditions the gold reserve notes will not be used by the large city banks, except for that portion of the year when there is a demand from the country and only after the country banks have supplied their depositors to their legal limit or the limit of their reserves.

If there should be one or two hundred millions of dollars issued in the uncovered notes or their issue should vary between these limits, they would take the place of about that quantity of reserve money, which would find its way into bank reserves. Except as this would be required for reserves for the gold reserve notes, that money could become the basis for a corresponding amount of loans and deposits. A part of this would naturally come to the reserve cities and in all probability some of it would be loaned on call and used on the stock, grain, and cotton exchanges. It could hardly be such an amount, however, as would lead to any speculative boom. - After the first readjustment, which would come gradually, the amount would be more constant and less fluctuating than it is now or has been, and the result would be that the speculation which we can not prevent would be done on more uniform rates, and would be in consequence less dangerous.

The main advantage to the banks in the central reserve and large reserve cities of these gold reserve notes would be that the balances of their banking customers would be more stable and uniform. The country banks would meet demands from their depositors with their own notes, as far as they could, before drawing on their reserves, and if there should come a demand on the reserve bank for currency it could to a large extent supply this with their gold reserve notes. This could not fail to make conditions more stable and money rates not only lower but more uniform in the reserve cities and all over the country, with great resulting benefit to all.

There need be no fear of inflation of credits from the issue of bank notes against which the same reserves are required as against deposits, and for which there is sure and prompt and compulsory redemption. The reserve requirement makes it impossible for the total of note and deposit credits to be more than the possible deposit credits are

now. There is just so much reserve now available. This is the limit of deposits and consequently of loans. The total amount of loans must stay on deposit in the banks, however much it may be transferred by check from one bank to another. Even when cash currency is taken from one bank for any use, it before long finds its way back to another bank, and the amount or proportion of cash in circulation is in the end quite constant.

Referring to the table on page 51 of this report, giving the distribution of money in the United States, it will be seen that the percentage of the money in the country held by the banks remains very closely around $33\frac{1}{3}$ per cent, going below 30 per cent only in the years 1893 and 1896, when there were special reasons for this variation, and going over 35 per cent only once in fifteen years.

There is no objection to the increase of deposits as long as there is ample reserve against them. What objection can there be to the change of the deposit credit to a note credit, as long as the reserve remains the same, and the total of the deposit and note credits remains constant, which the reserve requirement makes sure it will?

As has been seen and stated repeatedly, the issue of these gold-reserve notes is simply changing one form of credit into another for the convenience of the customer of the bank. There is no inflation or increase of the whole volume of credits as the result of this operation. There is now a demand for every dollar of the available reserve money in the world. Business not only in the United States, but all over the world, has so increased in volume that it is taxing all kinds of facilities to the utmost. This activity is based on sound conditions: Abundant yields of field and mine and forest. Labor is employed at the highest wages ever known. Everyone is busy and prosperous. The only possible danger is that there may be some sudden event or calamity which will call for widespread liquidation, with the resulting panic. There is nothing in the industrial, commercial, or agricultural situation to produce this. If it comes, it must be from financial or money trouble. At a time when there is a most persistent demand for all the bank reserves possible, we are wasting our reserves by withdrawing them from the banks and money centers to send them to the farms, and we continue to take the same risks year after year in spite of all warning.

Would it not be far better to keep the reserve in the banks when needed and send bank notes, protected by ample reserves, where they are needed for cash transactions? There is in circulation in the country, not in the banks or Treasury of the United States, about \$1,700,000,000. At least \$1,000,000,000 of this might be used for reserves, as it is lawful money. If the uncovered gold reserve notes are authorized, the national banks could issue as against their present bond-covered notes about \$200,000,000. This is just about the amount of currency it is estimated must be shipped from the reserve centers to move the crops. Instead of thus wastefully employing this reserve money, deranging all business and contracting loans and deposits, would it not be infinitely better and more sensible to allow the banks to transform that amount of deposit credits into note credits, which are really the same thing, and thus meet the demand for crop-moving funds without altering the total volume of credits at all? It could be done with perfect safety to all, and every business interest, every line of trade, and every citizen of the country would be the gainer from it.

If authorized to issue the gold reserve notes, the banks could daily and hourly meet the demands from the depositors for currency for their cash transactions. The day there was no further use for a note it would return to some bank, wherever it was, and at once be sent for redemption. Within twenty-four hours it would be redeemed and within a few days the note credit would be changed back to a deposit credit. This transformation back and forth from notes to deposits, and deposits to notes, would go on automatically, and the business public, not the banks, would decide what portion of the bank credits of the country they needed in notes and what in deposits. The banks would not only be compelled to obey the demand, but be glad to do so, for it would make for the prosperity of their customers and business. The season of harvest would be then one of general satisfaction for the bounty of the yield, not of apprehension lest an abundance of wealth produced should bring with it a demand upon business facilities, the strain of which would be so great as to produce panic and ruin instead of security and prosperity.

This is not a question in which the banks alone are interested. Except so far as they are affected by the general welfare of their customers, the banks have rather less direct pecuniary interest in the matter than the people who need the money, or the business man whose calculations and enterprises are interfered with by financial disturbances. When money is scarce and interest rates rise to unusual figures, it is a matter of greater concern to the borrower than to the lender. There can be no argument as to the fact that our banking laws are very defective in the note facilities which they enable our banks to furnish the people, and the reform of these laws is one of the most urgent and important problems to which the attention and effort of Congress can be devoted. The same situation with its dangers presents itself every year, and the Comptroller would most respectfully but most emphatically urge that Congress give this problem most prompt and careful attention.

The fact that the demand for crop-moving funds creates a disturbance in the money market and raises rates for money adds just so much to the cost of carrying and handling the crops, and reduces the price at which farm products are sold by the producers. The farmer thus has a direct pecuniary interest in the proper solution of this question. Any man who is engaged in any other business and who finds his plans for raising money interfered with or his rates raised, pays the penalty for our imperfect system with no advantage to anyone, unless it is the banker, who charges him more on his loan. For these reasons the question is of more importance by far to the general public than it is to the bankers themselves. For their own purposes and profits the banks are entitled to no additional facilities or privileges. Unless it can be shown to be in the interest of all the people, no change in the currency should be made. A study of the question, however, will show that the interest of all kinds of business demands an improvement in our banking currency, and on that account, far more than on the account of the banks, it is so strongly urged.

WM. B. RIDGELY,
Comptroller of the Currency.

THE SPEAKER OF THE HOUSE OF REPRESENTATIVES.

APPENDIX.

DIGEST OF BANK DECISIONS.

[The following decisions have been rendered during the period covered by this report.]

ATTACHMENT.

Exemption from attachment.

(U. S. Sup. Ct., 1905.) Under section 5242, Revised Statutes, a national bank, whether solvent or insolvent, is exempt from process of attachment before judgment in any suit, action, or proceeding in any State, county, or municipal court (*Pacific National Bank v. Mixter*, 124 U. S., 721), nor can a State court acquire jurisdiction over a national bank situated in another State by the process of attaching property within its jurisdiction under section 4 of the act of July 12, 1882. (*Van Reed v. Peoples National Bank of Lebanon, Pa.*, 198 U. S., 554.)

CHECKS.

Mutual accounts between bank and depositor—Deposits credited as payment on overdrafts—(A State bank case).

(U. S. C. C. A., 1906.) Where a manufacturing company for some two years before its bankruptcy had an agreement with the bank in which it kept its account subject to check by which it was allowed to overdraw in payment of current expenses subsequent deposits to be applied to payment of such overdrafts, deposits so made in the usual course of business and applied in payment of previous overdrafts, made in payment of its pay rolls, freight on material received, and other necessary expenses, do not constitute preferences which the bank must surrender before proving an indebtedness on notes against the bankrupt estate, although the company was insolvent when the deposits were made, the bank having the right of set-off in respect to the overdraft and the deposits under bankruptcy act 1898 (c. 541, section 68a, 30 Statutes, 565 [U. S. Comp. St., 1901, p. 3450]. *Tomlinson v. Bank of Lexington*, 145 Fed. Rep., 824.)

Agreement to give security.

(U. S. C. C. A., 1906.) Where a bank allowed a customer to overdraw on the express agreement that the customer should assign good accounts for collection to pay the overdraft the subsequent assignment of the accounts, although the customer was insolvent, did not constitute the giving of a preference. (*Ib.*)

Check as assignment of funds on deposit in bank.

(U. S. C. C., 1906.) Both at the common law and under the New York statute a check does not operate as an assignment of funds on deposit to the credit of the drawer in the bank against which the check is drawn until it has been accepted or certified by the bank. (*Bowker v. Haight & Freeze Co. et al.*, 146 Fed. Rep., 257.)

Receivers—Right to possession of property—Bank deposit.

(U. S. C. C., 1906.) An attorney who received a check from a corporation as a retainer for services to be rendered, and who presented and received payment of the check after he had knowledge that a receiver had been appointed for the property of the corporation, will be required to turn over the sum so received to the receiver. (*Ib.*)

DEPOSITS.

Banks and banking—Deposits—Relation of depositor and bank—Taxes.

(U. S. Dist. Ct., 1906.) The deposit of money in a bank establishes the relation of debtor and creditor between the depositor and the bank, and this, though the fund deposited arose from taxes levied for municipal and school purposes. (*In re Salmon et al. In re Henry County et al.*, 145 Fed. Rep., 649.)

Contracts—Agreement to stifle competition—Validity.

(U. S. Dist. Ct., 1906.) The controlling banks in two of the largest cities and towns of a county, with a view to stifling competition among themselves whereby they would obtain the use of the county's moneys at reduced rates, agreed that one of them should obtain the money on an understood bid. In order to give color to a competitive bidding, another bank put in a bid lower than that it knew would be offered by the favored bank, with the distinct understanding that the latter, on becoming the depositary, should parcel out the deposits among all the banks in the combination in given proportions, the allottees paying on the respective sums the amount of interest the favored bank agreed to pay to the county, and that the funds paid under the agreement to the combining banks should only be subject to withdrawal on checks or warrants drawn by the county. *Held*, that such combination was a fraud on the county and invalid. (*Ib.*)

Bankruptcy—Bank Deposits—Rights of Creditors.

(U. S. Dist. Ct., 1906.) Where several banks entered into an illegal combination to suppress bidding for county funds, under an agreement providing that, after the successful bidder obtained the funds, they should be apportioned among the members of the combination, and that such funds should not be subject to check, except for the payment of drafts and warrants drawn by the county, on the bankruptcy of the successful bidder, and the discovery of such scheme, the county was entitled to rescind and recover funds in the possession of another of the conspiring banks as against the bankrupt's general creditors. (*Ib.*)

FORGED OR ALTERED PAPER.

Payment and discharge.

(U. S. C. C., 1902.) Declaration held sufficient in an action to recover money paid on a check bearing a forged indorsement. (*United States v. National Bank of Republic*, 141 Fed. Rep., 208; *Same v. National Bank of Commonwealth, Id.*; *Same v. National Exch. Bank, Id.*)

(U. S. C. C., 1905.) Where a plaintiff by honest mistake paid money to defendant upon a check bearing a forged indorsement, mere delay in notifying defendant of the discovery of the forgery, although unnecessary and unreasonable, will not defeat the right to recover back the money paid, in the absence of evidence that the delay has worked damage to defendant. (*United States v. National Exch. Bank*, 141 Fed. Rep., 209.)

JURISDICTION.

Citizenship—Jurisdiction of Federal courts—Power of States.

(U. S. Sup. Ct., 1905.) States have no power to enact legislation contravening Federal laws for the control of national banks, but such banks are, for actions against them at law or equity, deemed citizens of the States in which they are located, and the Federal courts have such jurisdiction only as they have in cases between individual citizens of the same States. (*Guthrie v. Harkness*, 199 U. S., 148.)

On decision by State court as to bar of limitations against suit by receiver of national bank to collect assessment on stock.

(U. S. Sup. Ct., 1905.) Where the State court has held that a suit to collect assessment by the receiver of a national bank under directions of the Comptroller of the Currency is barred by a State statute of limitations, a Federal question is involved and the writ of error will not be dismissed. (*Rankin v. Barton*, 199 U. S., 228.)

Of suit in nature of creditor's bill to enforce liability of stockholder of national bank—Finality of decree of Circuit Court of Appeals.

(U. S. Sup. Ct., 1906.) Where a national bank has gone into liquidation under section 5220, Revised Statutes, and one holding its notes seeks to enforce the additional liability imposed by section 5151, Revised Statutes, against a stockholder by a suit in the nature of a creditor's bill on behalf of himself and all other creditors, the case is presented under the laws of the United States giving the circuit court jurisdiction independently of diverse citizenship, and the decree of the circuit court of appeals is not final but an appeal therefrom will lie to this court. It is not necessary in order to maintain such a suit that the creditor should first obtain judgment on the note. (*Wyman v. Wallace*, 201 U. S., 230.)

When national bank sets up at every stage of a suit its intention of relying on the banking law of the United States, it can not be required to anticipate the specific form in which the immunity was denied.

(U. S. Sup. Ct., 1906.) Where a national bank sued for debts of a partnership, shares of which it had taken as security and afterwards acquired in payment of the debt, sets up at every stage of the suit its intention of relying on the banking law of the United States, it can not be required in the first instance to anticipate the specific and qualified form in which the immunity finally was denied; and if in addition thereto there is a certificate of the State court to the effect that it was material to consider the question of the bank's power under the banking law to become liable for the debt and that the decision was against the bank, this court has power on writ of error to renew the judgment. (*Merchants National Bank of Cincinnati v. Wehrmann*, 202 U. S., 295.)

Jurisdiction of United States courts—Suit by receiver of national bank.

(U. S. C. C. 1905.) A circuit court of the United States has jurisdiction of a suit in equity by a receiver of a national bank to recover an assessment levied against a stockholder where the matter in dispute exceeds \$500, by virtue of act March 3, 1875 (c. 137, 18 Stat., 470, U. S. Comp. St., 1901, p. 508), such jurisdiction being preserved by act March 3, 1887 (c. 373, sec. 4, 24 Stat., 554, U. S. Comp. St., 1901, p. 514), with respect to suits brought by direction of any officer of the United States. (*Rankin v. Herod*, 140 Fed. Rep., 661.)

NEGOTIABLE PAPER.

Negotiability and transfer.

(U. S. C. C. A., 1905.) The mere fact that a borrower of money from a third person through the cashier of a bank as agent for the lender, for which a note was given to the bank and indorsed by it to the lender, afterwards paid notes to the bank from the proceeds of the loan, did not constitute a consideration for the bank's indorsement. (*First Nat. Bank v. Anderson*, 141 Fed. Rep., 926.)

Rights and liabilities on indorsement or transfer.

(U. S. C. C. A., 1905.) A national bank is not liable to the indorsee of a note on an indorsement made without consideration and merely as a means of transferring the legal title to such indorsee, who was the equitable owner. (Ib.)

OFFICERS.

BONDS OF OFFICERS—(A STATE BANK CASE).

Fidelity bonds—Conditions—Construction.

(U. S. C. C. A., 1905.) Where a fidelity bond provided that any "willful misstatement" or suppression of fact by the employer, in his statement or declaration concerning the employed, should render the bond void from the beginning, the phrase "willful misstatement" was intended to mean any material false statement made with knowledge of its falsity, voluntarily, and not inadvertently, and hence an instruction that the bond was not avoided unless the misstatements were made "with intent to secure renewals of the bond" was erroneous. (*Fidelity and Casualty Co. of New York, v. Bank of Timmons ville*, 139 Fed. Rep., 101.)

Materiality—Belief.

(U. S. C. C. A., 1905.) Where a fidelity bond provided that any willful misstatement or suppression of fact by the employer concerning the employe should render the bond void, a mere belief on the part of the employer's president that it was immaterial whether the questions asked were answered truly or not did not render such answers immaterial. (Ib.)

Notice of default.

(U. S. C. C. A., 1905.) A bank cashier was given a leave of absence on August 17, 1901, which expired on August 22. His failure to return did not arouse suspicion until August 26, when an examination of his books was made, which disclosed his defalcation. His sureties were then telegraphed, either on the 26th or 27th, whereupon each sent a representative, who participated in the examination of the books during the latter part of August, and on September 2 a formal notification of the cashier's flight and defalcation was sent to defendant surety company. *Held*, that whether defendant was given "immediate" notice of the defalcation, as required by the fidelity bond, was for the jury. (Ib.)

Scope of bond.

(U. S. C. C. A., 1905.) Where a bank cashier's fidelity bond, given March 7, 1901, covered only acts and defaults committed during its currency and within 12 months next before the date of the discovery of the act or default on which the claim was based, it did not cover an alleged larceny of silver coin claimed to have been deposited May 19, 1900, but not found in the bank's vaults when the cashier absconded in August, 1901, there being no evidence as to when the same was taken. (Ib.)

POWERS AND REPRESENTATION OF BANK BY OFFICERS.

Authority of officers—Borrowing money.

(U. S. C. C. A., 1906.) The executive officers of a national bank may legitimately borrow money for the bank's use, in the usual course of business without special authority from their board of directors. (*Cherry v. City National Bank of Kansas City, Mo.*, 144 Fed. Rep., 587.)

Conversion by correspondent—Fictitious deposit.

(U. S. C. C. A., 1906.) The president of a national bank discounted his note with a correspondent bank under an agreement by which the latter placed the proceeds to the credit of his own bank in a special account which was not subject to check, but was to be held to meet the note at its maturity. The books of his bank showed the amount as a deposit in its general account with the correspondent, the purpose being to deceive the examiner. On the failure of his bank the correspondent charged the note to the special account in accordance with the agreement. *Held*, that the amount to the credit of the insolvent bank in such account did not in fact belong to it, but remained the property of the pretended lender; the whole transaction being merely a subterfuge, and that its application to the payment of the note was not a conversion. If the transaction be regarded as a real and not a pretended loan, it was one made for the benefit of the borrowing bank, and not of its president, and its application to the payment of his note, which was in reality that of the bank, was within the right of the lender. (Ib.)

OFFICERS, CIVIL LIABILITY OF.

Equity—Pleading—Multifariousness.

(U. S. C. C., 1906.) A bill filed by the receiver of a bank against a number of the directors to recover money of the bank alleged to have been lost through defendants' misconduct is not bad for multifariousness, where the matters alleged are such as can most conveniently be tried in a single suit. (*Allen v. Luke et al.*, 141 Fed. Rep., 694.)

Suit against directors—Receiver of national bank.

(U. S. C. C., 1906.) A receiver of a national bank may maintain a suit against the directors in behalf of creditors and stockholders to recover sums alleged to have been lost to the bank through the misconduct or negligence of defendants, and it is not a necessary condition precedent that violations of the banking act should have been previously adjudged in a suit brought by the Comptroller. (Ib.)

Pleading—Certainty of bill.

(U. S. C. C., 1906.) In such a suit it is not necessary that the bill allege the exact amount of the loss arising from each transaction set out where it is not yet known; but it should set out with particularity the acts of defendants relied on to constitute negligence or misconduct, and the details of the several transactions should be given with such fullness as can be done by complainant. (Ib.)

Abatement and revival—Action against bank director—Survival.

(U. S. C. C., 1906.) A cause of action against a director of a national bank to recover for money lost to the bank through his negligence or misconduct survives against his executors. (Ib.)

OFFICERS, CRIMINAL LIABILITY OF.

Indictment—Motion to quash—Grounds.

(U. S. C. C. A., 1905.) A motion to quash an indictment, based on an affidavit that the grand jury received certain incompetent evidence, is insufficient, where it is not alleged nor shown that there was not other and competent evidence on the subject upon which the indictment was based. (Chadwick v. United States, 141 Fed. Rep., 225.)

Motion to quash indictment—Review of ruling.

(U. S. C. C. A., 1905.) A motion to quash an indictment is addressed to the sound discretion of the trial court, and in general its ruling thereon is not reviewable, and especially where the motion was heard on affidavits which are not in the record. (Ib.)

Conspiracy—Elements of offense—Violation of national banking laws.

(U. S. C. C. A., 1905.) While it is a settled rule of criminal law that an indictment for conspiracy will not lie where a plurality of agents is logically necessary to complete the crime which it was the object of the conspiracy to commit, such rule does not apply to an indictment under Revised Statutes, section 5440 (U. S. Comp. St. 1901, p. 3676), for a conspiracy between the defendant, who had no official connection with a national bank, and an officer of such bank to violate Revised Statutes, section 5208 (U. S. Comp. St. 1901, p. 3497), by causing a check of defendant drawn on the bank to be certified by such officer when defendant did not have a sufficient amount on deposit to pay the same. (Ib.)

Indictment—Joinder of counts—Compelling election.

(U. S. C. C. A., 1905.) Counts charging separate conspiracies with officers of a national bank for the violation by such officers of Revised Statutes, section 5208 (U. S. Comp. St. 1901, p. 3497), by certifying checks when the drawer did not have sufficient funds on deposit to pay the same, may be joined in the same indictment under Revised Statutes, section 1024 (U. S. Comp. St. 1901, p. 720), and unless it appears that substantial rights of the defendant will be prejudiced by their trial together, the court may properly refuse to compel the government to elect between them. (Ib.)

Evidence—Admissions.

(U. S. C. C. A., 1905.) On the trial of an indictment for conspiracy, letters shown to be in the handwriting of the defendant, addressed to an alleged co-conspirator and containing self-charging admissions, are admissible in evidence, although it is not proved that they were transmitted to the persons to whom they are addressed, and their interpretation and weight are matters for determination by the jury in the light of all of the evidence in the case. (Ib.)

Conspiracy—Proof of intent—Knowledge of the law.

(U. S. C. C. A., 1905.) On the trial of an indictment charging defendant with conspiring with officers of a national bank for the certification of checks by such officers when the drawer had no funds on deposit, in violation of Revised Statutes, section 5208 (U. S. Comp. St. 1901, p. 3497), it is not essential to conviction to prove that defendant had knowledge that such false certification was in violation of the statute; the necessary criminal intent being imputed where it is shown that the parties to the transaction acted with knowledge of the facts. (Ib.)

New trial—Mistake of juror.

(U. S. C. C. A., 1905.) It was within the discretion of the trial court to deny a motion for a new trial, based on the ground that the given name of one of the jurors who was accepted and sat on the trial was not the same as the name on the jury list which was drawn and called when the jury was impaneled; it being shown that the juror who served was the one summoned and actually intended, that he appeared in good faith, and that there was no person having the name on the list which was so written through mistake. (Ib.)

Trial—Argument of counsel.

(U. S. C. C. A., 1905.) There is a degree of liberty allowable to counsel in a criminal case, whether for the Government or the accused, in respect to the line of argument they shall pursue and the inferences to be drawn from the evidence, which a trial judge should respect unless the facts of the case are overstepped or arguments used which plainly abuse the privilege, and a reviewing court should not reverse a judgment because of the refusal of the trial court to interfere with an argument of counsel, unless it was plainly unwarranted and so improper as to be clearly injurious to the accused. (Ib.)

Waiver of objection.

(U. S. C. C. A., 1905.) A defendant who deems himself prejudiced by language used by counsel in argument should promptly and publicly object and point out the language deemed improper, and then take exception if the trial judge fail to condemn it. Unless this is done error can not be predicated on the refusal of a trial judge to grant a new trial on account of such language. (Ib.)

Sentence—Cumulative terms of imprisonment.

(U. S. C. C. A., 1905.) Under convictions upon separate counts for distinct offenses of the same character judgment may be entered and sentence passed for a specified term of imprisonment upon each count, and the terms may be made consecutive and cumulative. (Ib.)

FALSE ENTRIES.

Making false entries in books.

(U. S. C. C. A., 1905.) Entries in the books of a national bank which correctly record actual transactions of the bank, although such transactions may have been unauthorized, or even fraudulent, are not false entries, within the meaning of Revised Statutes, section 5209 (U. S. Comp. St., 1901, p. 3497), and will not sustain an indictment thereunder for the making of false entries. (Twining v. United States, 141 Fed. Rep., 41.)

MISAPPLICATION OF FUNDS OF NATIONAL BANKS.

Elements of offense.

(U. S. Dist. Ct., 1903.) Funds of a national bank are not misapplied by an officer for the purpose of constituting a criminal offense, under Revised Statutes, section 5209 (U. S. Comp. St., 1901, p. 3497), merely by the drawing of a draft on a fund on deposit in another bank, or by entering a credit to a depositor on the books; but it is necessary that the fund should have been actually withdrawn or converted in some form, so that it is lost to the bank, and such loss must be averred in an indictment for the offense, and the facts set out showing it to have been unlawful. (United States v. Martindale, 146 Fed. Rep., 280.)

Indictment—Description of offense.

(U. S. Dist. Ct., 1903.) An averment in an indictment, under Revised Statutes, section 5209 (U. S. Comp. St., 1901, p. 3497), charging that defendants, as director and cashier of a national bank, by means of a draft drawn by them or by other stated means misapplied the moneys, funds, and credits "of said association without the knowledge and consent thereof," is not equivalent to an averment that the act was done without the knowledge and consent of the directors, as required by the statute, and is insufficient. (Ib.)

Misjoinder of separate offenses.

(U. S. Dist. Ct., 1903.) Where an officer of a national bank is charged in an indictment with the fraudulent misapplication of its funds in the payment of several and distinct notes, each payment constitutes a separate misapplication, and must be charged in a separate count. (Ib.)

Indefiniteness of count in indictment.

(U. S. Dist. Ct., 1903.) A count in an indictment, under Revised Statutes, section 5209 (U. S. Comp. St., 1901, p. 3497), charging that defendant, as a director of a national bank, between certain given dates abstracted and misapplied a stated sum of the moneys, funds, and credits of the bank, without further specification, is insufficient, as too general and indefinite. (Ib.)

Prosecution for misapplication of funds of national bank—Variance.

(U. S. Dist. Ct., 1904.) An indictment under Revised Statutes, section 5209 (U. S. Comp. St., 1901, p. 3497), against an officer or director of a national bank for willful misapplication of its funds, in order to advise the defendant of the issues to be met, must set forth all of the facts necessary to show how the misapplication was made, and that it was an unlawful one. Under such an indictment charging that the misapplication was made by the drawing of checks on the bank, and obtaining their payment when he had in fact no money on deposit, where it appeared on the trial that defendant had an apparent credit on the books of the bank sufficient to cover the checks, the Government can not impeach such apparent credit by showing that a deposit previously entered on the books to the credit of defendant's account was false and fictitious, and the entry thereof fraudulently procured by defendant, no such transaction being charged in the indictment. (United States v. Martindale, 146 Fed. Rep., 289.)

POWERS.

NATIONAL CHARACTER OF—CONTROL OF CONGRESS.

(U. S. Sup. Ct., 1905.) National banks are quasi public institutions, and for the purpose for which they are instituted are national in their character, and, within constitutional limits, are subject to control of Congress, and not to be interfered with by State, legislative, or judicial action, except so far as Congress permits. (Van Reed v. People's National Bank of Lebanon, Pa., 198 U. S., 554.)

POWER TO BORROW MONEY AND GIVE TIME OBLIGATIONS THEREFOR—LIABILITY OF STOCKHOLDERS.

(U. S. Sup. Ct., 1906.) A national bank finding itself embarrassed, though possessed of a large amount of assets apparently in excess of its obligations, is not prohibited by the national-banking act from borrowing, and it has the power to borrow—money to meet pressing needs, which it has not the cash to meet, and to give its time obligations therefor, secured by all of its assets; and if it subsequently goes into liquidation and the collateral is insufficient to meet the obligations, the stockholders, both assenting and nonassenting to the liquidation, are subject to the additional liability to the extent imposed by section 5151, Revised Statutes, and the holder of the notes can enforce the same by creditor's bill. (Wyman v. Wallace, 201 U. S., 230.)

POWER TO PURCHASE STOCK IN OTHER BANKS.

(U. S. Sup. Ct., 1905.) A national bank has no power to invest its surplus fund in the stock of another national bank and can not be assessed thereon as a stockholder, although it actually made the purchase and held and received dividends on the stock. (*Shaw v. National German American Bank of St. Paul, Minn.*, U. S. C. C. A., 1904, affirmed by U. S. Supreme Court, 199 U. S. R., 603.)

ULTRA VIRES ACTS; TAKING STOCK IN CORPORATION ORGANIZED FOR SPECULATIVE BUSINESS.

(U. S. Sup. Ct., 1906.) A Minnesota manufacturing corporation having failed, the creditors, a national bank among them, organized a new corporation under the laws of Minnesota for the purchase of the capital stock, evidences of indebtedness and assets of the corporation and for the manufacture of the same articles that it had manufactured. The bank and other creditors exchanged their claims against the old corporation for stock in the new corporation. After the incorporation, and prior to the failure of the new corporation, the laws of Minnesota imposing double liability on stockholders of certain corporations were amended and a new method of procedure for enforcing them was provided. Stockholders of corporations organized exclusively for manufacturing purposes are not subject to double liability. Proceedings having been taken under the statute to enforce the double liability of the stockholders, a receiver was appointed, an assessment determined, and a judgment for the pro rata amount obtained against the national bank, which denied liability, claiming that the corporation was organized for manufacturing purposes only, and, therefore, the stockholders were exempt from double liability; that the provisions in the statute providing for enforcing double liability were unconstitutional under the impairment of obligation clause of the Federal Constitution; and that the original taking of the stock by it as a national bank was ultra vires. Held, that a national bank has no power to engage in or promote a purely speculative business or to take stock in a corporation organized for that purpose, nor can the power to take such stock as a means of protecting itself from loss on preexisting indebtedness be inferred from the right to accept it as security for a present loan. (*First National Bank of Ottawa v. Converse*, 200 U. S., 425.)

Defense of ultra vires in action to subject bank to liability as stockholder not affected by its subscription.

(U. S. Sup. Ct., 1906.) Notwithstanding its subscription, a national bank, taking stock in a corporation organized for purely speculative purposes, may plead its want of authority so to do as a defense to the claim of a receiver of such corporation for the double liability imposed by a State statute on the stockholders thereof. (Ib.)

Power to take security—Ownership of shares in partnership formed for speculative purposes.

(U. S. Sup. Ct., 1906.) While a national bank may take, by way of security, property in which it is not authorized to invest, and may become the owner thereof by foreclosure in satisfaction of the debt, but, without deciding whether it could take shares in a partnership formed for purely speculative purposes as security, it can not, even in satisfaction of a debt so secured, become the absolute owner of such shares. It would be ultra vires, and as it can not take the shares, it is not and can not be held liable for any of the debts of the firm. (*Merchants' National Bank of Cincinnati v. Wehrmann*, 202 U. S., 295.)

Estoppel to deny liability.

(U. S. Sup. Ct., 1906.) A national bank which has taken such shares in satisfaction of a debt is not estopped either from denying that it was a partner or that it is liable for the debts of the firm. (Ib.)

POWER TO DISCOUNT NOTES.

(U. S. C. C. A., 1905.) The power to discount promissory notes and other evidences of debt, expressly given to national banks by Revised Statutes, section 5136 (U. S. Comp. St., 1901, p. 3455), is sufficiently comprehensive to include the purchase of notes at less than their face value. (*Morris v. Third National Bank, of Springfield, Mass.*, 142 Fed. Rep., 25.)

INCIDENTAL POWERS IN COLLECTION OF DEBTS.

(U. S. C. C. A., 1905.) A national bank which, in the usual course of its business, has become the owner of notes secured by mortgage may lawfully agree with others holding conflicting mortgages on the same property to represent all in an action to enforce the security, their respective rights in the proceeds to be subsequently determined, where such action was deemed best for its own interests, and when vested with title to the other mortgages by proper assignments its right to maintain the suit can not be questioned by the defendant on the ground that its agreement was ultra vires. (Ib.)

SHAREHOLDERS.

RIGHT OF SHAREHOLDERS TO INSPECT BOOKS.

(U. S. Sup. Ct., 1905.) The shareholder has a common-law right, for proper purposes and under reasonable regulations as to time and place, to inspect the books of the corporation of which he is a member. The possibility of the abuse of a legal right affords no ground for its denial, and while an examination of the books of a corporation should not be granted for speculative or improper purposes, it should not be denied when asked for legitimate purposes. Where stockholders of a national bank have the legal right to enforce inspection, the State court has authority to enforce the right by granting the proper relief in a judicial proceeding. Nothing in section 5211, Revised Statutes, requiring reports by, or in section 5240, Revised Statutes, providing for examination of, national banks cuts down the usual common-law rights of shareholders in such corporations. The term visitatorial powers as used in section 5241 does not include the common-law right of the shareholder to inspect the books of the corporation. (*Guthrie [President Commercial National Bank of Ogden, Utah] v. Harkness*, 199 U. S., 148.)

CONCLUSIVENESS OF DETERMINATION BY COMPTROLLER OF THE CURRENCY RELATIVE TO COLLECTION OF ASSESSMENT ON STOCK.

(U. S. Sup. Ct., 1905.) A national bank is an instrumentality of the United States, the administration whereof is vested in the Comptroller of the Currency, who, in case of insolvency, appoints the receiver and directs his acts. The liability for assessment on the stock dates from the order of the Comptroller, who decides when it is necessary to institute proceedings therefor, and his determination is conclusive. This power is derived from a statute of the United States, and can not be controlled or limited by State statutes. (*Rankin v. Barton*, 199 U. S., 228.)

VALIDITY AND EFFECT OF TRANSFER.

Shareholders' liability—Fraudulent transfers of stock.

(U. S. Sup. Ct., 1906.) An officer of a national bank owning stock therein knowing that it was insolvent, although it did not actually fail for two years after the first transfer, transferred stock at various times to one who merely acted as his agent and who absolutely transferred a part thereof to various people of doubtful financial responsibility, all transfers being forthwith made on the books of the bank; after the failure an assessment was levied by the Comptroller and the receiver sued the original owner for the assessment on all of the shares originally owned by him. *Held*, That the gist of the shareholders' liability is the fraud implied in selling with notice of insolvency and with intent to evade the double liability imposed by section 5139, Revised Statutes. The fact that the sale is made to an insolvent buyer is additional evidence of fraudulent intent, but not sufficient to constitute fraud unless, as in this case, with notice of the bank's insolvency. (*McDonald, receiver, v. Dewey*, 202 U. S., 510.)

Shareholders; defenses to claim of double liability where stock transferred with notice of bank's insolvency.

(U. S. Sup. Ct., 1906.) While a shareholder, selling with notice of the bank's insolvency, may defend against a claim of double liability by showing that the vendee is solvent and the creditors therefore are not affected by the sale, the burden of proof is on him to show such solvency, and that burden is not sustained when, as in this case, it does not satisfactorily appear that a decree for the amount of the assessment could have been collected by ordinary process of law. (Ib.)

Shareholders' liability on transfer of stock—Transfer to agent, and absolute transfer with notice to irresponsible party.

(U. S. Sup. Ct., 1906.) A shareholder who has transferred his stock to a mere agent is liable for the full amount of the assessment on the stock so transferred standing in the agent's name at the time of the failure; but when he has absolutely transferred stock prior to the failure, with knowledge of the bank's insolvency, to persons financially unable to respond to the assessment and those transfers have been made on the books of the bank, he is liable only for such amount of the assessment as may be necessary to satisfy creditors at the time of the transfer. (Ib.)

LIABILITY OF SHAREHOLDERS; EXEMPTION FROM LIABILITY BY STATE STATUTE.

(U. S. Sup. Ct., 1906.) Although in a limited sense there is an element of contract in becoming a shareholder of a national bank, the liability for debts of the institution is not contractual, but is based on the provisions to that effect in the national banking law. The Government creating the bank has prescribed the terms upon which ownership of its shares can be acquired, and only those are exempted from liability who are specially described in the statute; nor can any shareholder be exempted from such liability by a State statute. Under section 5151, Revised Statutes, a married woman residing in Florida who has inherited stock in a national bank, which has been transferred to her and on which she has received and accepted dividends, is subject to a personal judgment for an assessment of the Comptroller, notwithstanding that under the laws of Florida a married woman can not enter into a contract. Nothing in the law of Florida incapacitates a married woman in that State from becoming the owner, by bequest or otherwise, of stock in a national bank. How and from what property such a judgment shall be satisfied not involved or decided in this action. (Christopher v. Norvell, 201 U. S., 216.)

STATE-BANK CASES—RECEIVER APPOINTED UNDER LAWS OF NEBRASKA.

Insolvency—Receivers—Claims—Establishment—Separate suit.

(U. S. C. C., 1906.) Where the court in which the settlement of the affairs of an insolvent bank was pending permitted a creditor to establish his claim in a separate suit, and, after the claimant's judgment was reported to the court, it appointed a special receiver to enforce the stockholders' liability to pay the same, it was no defense to a suit against a stockholder that the claim should have been filed with the receiver in the original suit.—(Covell v. Fowler, 144 Fed. Rep., 535.)

Stockholders' Liability—Statutes—What law governs.

(U. S. C. C., 1906.) While, in a proper case, the liability of a nonresident stockholder of an insolvent bank would be determined by the construction placed on the statute creating such liability by the courts of the domicile of the corporation, the remedy or method of enforcing such liability against him must conform to the procedure of the forum whose aid is invoked. (Ib.)

Subscription liability—Power to enforce.

(U. S. C. C., 1906.) During the solvency of a bank, the stockholders' subscription liability can only be enforced by assessment made in conformity with the by-laws of the corporation. (Ib.)

Liability after insolvency.

(U. S. C. C., 1906.) After a bank has become insolvent and its property has been placed in the hands of a receiver for liquidation, the court in which the receivership proceedings are pending has power to levy assessments against stockholders to enforce their subscription liability. (Ib.)

Suit against stockholder.

(U. S. C. C., 1906.) Prior to the levy of an assessment, a stockholder of a bank can not be pursued by suit to enforce his subscription liability. (Ib.)

Judgment against bank—Conclusiveness as against stockholders.

(U. S. C. C., 1906.) Where a creditor of a bank obtained a judgment against it for services rendered after the bank was placed in the hands of a receiver, such judgment, though prima facie conclusive on the question of the indebtedness of the corporation, did not deprive a court of equity sitting in another State of the right to determine whether the claimant's right of action was such as to bind the stockholders, in a proceeding to enforce a stockholder's subscription and statutory liability. (Ib.)

Insolvency—Stockholders—Power to bind.

(U. S. C. C., 1906.) Where a bank became insolvent and went into liquidation, its power to bind its stockholders ceased except with reference to transactions implied in the duty of liquidation. (Ib.)

Receivers—Suit in foreign court—Power.

(U. S. C. C., 1906.) An ordinary receiver of a bank acting in an equity suit to liquidate the bank's affairs, having no other title to the corporation's assets than that derived from the order of the court appointing him, has no power to sue in a foreign jurisdiction to enforce an alleged liability of stockholders. (Ib.)

RECEIVER APPOINTED UNDER LAW OF MARYLAND.

Corporations—Banking companies—Stockholders—Liability to creditors—Statutes—Nature and effect.

(U. S. C. C. A., 1905.) The liability of stockholders to creditors of a banking association under Acts General Assembly Maryland, 1892 (p. 156, c. 109, § 85*l*), declaring that each stockholder shall be liable to depositors and creditors for double the amount of stock at par held by such stockholder, though statutory, was contractual in its nature; each stockholder voluntarily agreeing to incur the liability at the time he became such, which liability was not a corporate asset, but a debt due directly by the stockholder to creditors of the corporation who became such while the stockholder held its stock. (*Myers v. Knickerbocker Trust Co.*, 139 Fed. Rep., 111.)

Statutes—Constitutionality—Obligation of contract—Impairment.

(U. S. C. C. A., 1905.) Acts General Assembly Maryland, March 25, 1904 (p. 179, c. 101), repealing the preexisting remedy of a creditor to bring a separate action at law to enforce a several statutory liability against a stockholder of a banking association for corporate debts to the extent of an amount equal to the par value of the stock held by him, conferred by Acts General Assembly Maryland, 1892 (p. 156, c. 109, § 85*l*), and substituting therefor a remedy by bill in equity on behalf of all creditors against all stockholders in the State, and declaring that such statutory liability shall constitute an asset of the corporation if necessary to pay debts, etc., not only changed the remedy, but abrogated the contract right conferred by such former statute, and was therefore unconstitutional, as impairing the obligation of contract, as against creditors of a corporation who became such and had brought suit to enforce such statutory liability prior to the passage of the act.

NO. 1.—COMPTROLLERS AND DEPUTY COMPTROLLERS OF THE CURRENCY, DATES OF

NOTE 1.—Specie payments were suspended from Jan. 1, 1862, to Jan. 1, 1879. During the greater part of that period gold and silver coins were not in circulation except on the Pacific coast, where, it is estimated, the specie circulation was generally about \$25,000,000. This estimated amount is the only coin included in the above statement from 1862 to 1875, inclusive.

NOTE 2.—In 1876 subsidiary silver again came into use, and is included in this statement, beginning with that year.

NOTE 3.—The coinage of standard silver dollars began in 1878, under the act of Feb. 28, 1878.

NOTE 4.—Specie payments were resumed Jan. 1, 1879, and all gold and silver coins, as well as gold and silver bullion in the Treasury, are included in this statement from and after that date.

Aetna Banking and Trust Co.....	W.Va.....		399	81,080	42,464
McLachlen Real Estate and Loan Co.....	Va.....	56,950	12,123	85,182	46,500
Total.....		802,395	146,961	4,191,739	211,934

TABLE XX.

RESOURCES AND LIABILITIES OF THE FIRST BANK OF THE UNITED STATES.

[Incorporated by Congress in 1791 for twenty years.]

[In millions of dollars.]

	January.	
	1809.	1811.
RESOURCES.		
Loans and discounts.....	15.0	14.6
United States 6 per cent and other United States stock.....	2.2	2.8
Due from other banks.....	.8	.9
Real estate.....	.5	.5
Notes of other banks.....		.4
Specie.....	5.0	5.0
Total.....	23.5	24.2
LIABILITIES.		
Capital.....	10.0	10.0
Surplus.....	.5	.5
Circulation.....	4.5	5.0
Individual deposits.....	8.5	5.9
United States deposits.....		1.9
Due to other banks.....		.6
Unpaid drafts outstanding.....		.2
Total.....	23.5	24.2

TABLE XXI.

RESOURCES AND LIABILITIES OF THE SECOND BANK OF THE UNITED STATES.

[Chartered by Congress in 1816, for twenty years; renewal of charter denied; in consequence, reorganization was effected by means of authority of the legislature of the State of Pennsylvania. The bank assigned in 1841, the affairs being finally liquidated in 1856, and resulted in the payment in full, interest and principal, of liabilities to depositors and note holders; the shareholders, however, received nothing on their investment in stock of the bank.]

[In millions of dollars.]

NOTE.—Gold was first quoted at par on December 19, 1878.

The average rates of gold and currency for each month, as given in the above tables, was obtained as follows:

Four daily quotations of the rates of gold at New York, viz, the Opening, Closing, Highest, and Lowest, were recorded, from which a daily average was made, and the average rate for each month was prepared from these daily averages.

a In United States Treasury and national banks.*b* Official information furnished thru United States representatives.*c* No information.*d* Estimate, Bureau of the Mint.

e The figures for the total stock of gold in India are for the net imports since 1893-94 plus the production of the country. The amount in the government treasury is from official advices. The net imports of gold since 1835-36—when the records begin—amount to \$817,374,610 and the production recorded to \$103,209,754. The tide of gold and silver has been flowing into India for centuries.
