The prosperity of the country in the year just closing is notably shown in the reports relating to the agricultural output, which, for a number of products, exceeds that of any previous year and is

attended by average returns per unit and in the aggregate to the producer in excess of those for 1911. Exports from the United States during the ten months ended October aggregated \$1,870,000,000 and the imports \$1,511,000,000, resulting in a favorable balance of

\$359,000,000.

Business in general has shared in this prosperity, as is evidenced by the returns from national and other banks of the country. Reports depicting in detail the items of assets and liabilities of 25,195 banks have been tabulated showing aggregate assets of approximately \$25,000,000,000. The capital of these financial institutions amounts to approximately \$2,010,000,000 and the liabilities to depositors over \$17,000,000,000. Compared with 1911 the current returns show increase in capital of \$58,400,000, in deposits of \$1,117,000,000, and in aggregate assets, \$1,355,000,000. Elsewhere in this report information appears relative to the condition of each class of banking institutions in each state and section of the country.

Of the 10,285 national banks chartered from 1863 to October 31, 1912, there are in active operation 7,397 banks, as shown by the reports for September 4, 1912. The paid-in capital is stated at \$1,046,012,580; combined surplus and other undivided profits, \$943,756,626; circulating notes outstanding, \$713,823,118; due to banks, \$2,177,488,662; individual deposits, \$5,891,670,007; United States deposits, \$59,227,328; rediscounts and bills payable, \$82,374,789;

and aggregate liabilities, \$10,963,400,760.

About 60 per cent of the banks' loanable funds is represented by loans and discounts, which aggregate \$6,061,009,345. Nearly 17 per cent, or \$1,850,584,138, is invested in United States and other bonds and securities, about 7 per cent of the amount being investments in United States bonds, of which \$724,085,520 are on deposit with the Treasurer of the United States to secure national bank circulation, \$46,228,460 to secure public deposits, and \$7,804,070 held in bank unpledged. The premium account on all United States bonds, as shown by the banks' books, is \$7,092,456, an amount which is appreciably less than the market value of these securities. ments in bank premises, furniture and fixtures, and real estate taken for debt total \$268,505,340, which is less than  $2\frac{1}{2}$  per cent of the aggregate assets. Credits with other banks, that is the amount "due from," are \$1,453,069,556; checks and other cash items, including exchanges for clearing house, are \$333,359,723; and cash in bank, that is, specie, legal tender notes, bank notes, and minor currency, \$947,843,746; these two latter amounts, totaling \$1,281,203,469, equal nearly 22 per cent of the liabilities to depositors, the actual cash means being 16 per cent of such liabilities.

On September 1, 1911, there were in operation 7,301 banks, with capital of \$1,025,441,384, surplus and other profits, \$904,434,537; circulation, \$696,982,033; due to other banks, \$2,088,187,242; individual deposits, \$5,489,995,002; United States deposits, \$48,343,741; rediscounts and bills payable, \$78,531,117; and aggregate liabilities, \$10,379,439,384. The loans and discounts, including overdrafts, aggregated \$5,690,561,906, or a fraction less than 55 per cent of the banks' total assets. Investments in United States and other bonds totaled \$1,799,873,725, or 17 per cent of the assets. The amount invested in United States bonds exclusively was \$766,218,220, or

7.3 per cent. The premium on these investments in United States bonds was stated at \$8,801,366. Bank premises, furniture and fixtures, together with real estate taken for debt, showed an investment of \$256,416,542, approximately the same percentage as in 1912. Credits with other banks totaled \$1,306,395,076. Checks, cash items, and exchanges for clearing house amounted to \$333,503,061, and with cash in bank of \$941,362,369, showed aggregate cash means of \$1,274,865,430, exceeding slightly 23 per cent of the individual deposit liabilities, the cash in bank exceeding by a fraction over 17 per cent the amount of liabilities of that character.

With a net increase during the year in question of 96 in number of active banks, there was an increase in capital of \$20,571,195, together with an addition of \$39,322,089 to the surplus and other profits. The increase in bank-note circulation was \$16,841,085. In this period individual deposits increased \$401,674,995, and United States deposits \$11,979,832. On the credit side of the account the following increases are shown: Loans and discounts, \$377,430,197; United States bonds, \$11,899,830; other bonds, \$38,810,583; cash means,

\$6,338,039; and aggregate resources, \$583,961,376.

By reference to the abstracts of the returns from national banks made since September 1, 1911, a steady increase is shown in the volume of loans and discounts, while overdrafts have declined from \$35,950,532 on December 5, 1911, to \$20,168,074 on September 4, 1912. Bonds deposited as security for circulation increased since December last from \$713,619,820 to \$724,085,520, while the amount of securities of that character deposited on account of Government deposits increased only from \$44,978,000 to \$46,228,460. a material increase in bonds other than "Governments" deposited as security for public deposits, as the rise was from \$25,663,796 to Investments in bonds and other securities, excluding United States bonds, standing at \$1,052,219,286 in December last, increased but slightly until June 14, 1912, when the amount reported was \$1,077,783,000, but by September 4 investments of this character had decreased to \$1,072,466,088. Immediately available cash means in banks; that is—lawful money, bank notes, exchanges for clearing house, checks, and other cash items—fluctuated but slightly, as it appears that the amount in bank on December 5, 1911, was \$1,210,780,830, and on February 20, 1912, \$1,276,087,634, or an increase of \$65,306,804. By April 18 these items had declined to \$1,266,706,820, or by \$9,380,814; on June 14 had risen to \$1,291,-358,223, or an increase of \$24,651,403; and by September 4 had again declined—to \$1,281,203,469, or by \$10,154,754.

The total amount of assets increased from \$10,443,457,166 on December 5, 1911, to \$10,812,427,983 on February 20, 1912, but declined to \$10,792,149,256 on April 18. There was an increase by June 14 to \$10,861,763,877, and a further increase to \$10,963,400,760

on September 4.

Results of the organization of banks and the increase in capital of existing banks are shown in the gradual increase of the paid-in capital stock from \$1,026,440,500 on December 5 to \$1,036,124,945 on April 18. By reason, however, of liquidations for consolidation without an increase in capital stock, the June 14 statement showed a reduction of capital to \$1,033,570,675. By September 4, however,

there was a notable rise to \$1,046,012,580. The surplus fund shows a normal increase from \$672,891,252 on December 5, 1911, to \$701,-021,452 on September 4, 1912. The payment of dividends by national banks, generally at semiannual periods ending with December and June, show marked fluctuations in the undivided profit account, which on February 20 showed a decline to \$242,069,421 from \$258,-906,244 in the prior December. The amount in this account on June 14 was \$256,837,095, which was depleted by the June 30 dividend to the extent of reducing the fund on September 4, 1912, to \$242,735,174. National-bank notes outstanding increased only to a nominal extent from \$702,647,103 on December 5, 1911, as shown by the subsequent calls to June 14, 1912, when the amount outstanding was \$708,690,593. Between that date and September 4 there was an increase of over \$5,000,000, the amount outstanding on the latter date being \$713,823,118. Individual deposits increased from \$5,536,042,281 in December last to \$5,630,559,231 on February 20, to \$5,712,051,088 on April 18, to \$5,825,461,163 on June 14, and to \$5,891,670,007 on September 4. Deposits of the United States, including postal savings and deposits of Government disbursing officers, increased from \$53,000,000 in December, 1911, to \$59,000,000 on September 4, 1912, the increase apparently being mainly due to the deposit of postal savings funds.

Rediscounts and bills payable, standing at \$64,173,481 on December 5, 1911, declined to \$40,514,525 in the following February, and reached the maximum during year on September 4, standing at \$82,374,789. The relatively limited capital and volume of other loanable funds to the ability of the banks to meet the required accommodations is shown in the summary by geographical divisions, relating to the volume of rediscounts and bills payable. On September 4 the amount of obligations of this character in the New England States was \$3,272,000; in the Eastern States, \$9,846,000; in the Middle West, \$9,035,000; in the Western States, \$7,362,000; in the Pacific section, \$3,270,000, and in the South the amount shown is \$49,587,000, approximately 60 per cent of the total amount of rediscounts and bills payable of all banks.

#### CHARACTER OF NATIONAL-BANK LOANS.

Supplementing the detailed periodical statements relating to the assets and liabilities of the banks, there is shown in each bank's report a classification of the loans and discounts. For purposes of comparison there is submitted herewith a table showing the amount and percentage of each class of paper held by the banks on September 1, 1910, June 7, 1911, and June 14, 1912. It will be noted that the relative amount of each class of paper shows but slight variations from year to year. One-third of the volume of the paper is shown to be time paper with two or more individual or firm names; one-fifth time paper, single name without other security, the same proportion on time secured by stocks and bonds, etc., leaving slightly over one-fourth in demand paper. Demand paper secured by bonds, etc., represents approximately one-sixth, and demand paper with one or more individual or firm names one-eleventh of all loans.

Table in question follows:

	Sept. 1, 191	.0.	June 7, 191	1.	June 14, 1912.

#### RATES FOR MONEY.

As will be noted by the following statement relating to the range and average rates for money in the New York market, as reported by the William B. Dana Co., rates were normal up to August, but thereafter there was somewhat of a tightening of the money market, the range for call loans on the stock exchange in October being from 3 to 8 per cent, with an average of 5½ per cent; time loans in that month ranged from 5½ to 6 per cent; commercial paper, double

name, 60 to 90 days,  $5\frac{3}{4}$  to 6 per cent, and single name, prime and good, from  $5\frac{3}{4}$  to  $6\frac{1}{2}$  per cent.

The report in question follows:

#### RESERVE AND DEPOSITS OF NATIONAL BANKS.

Exclusive of United States deposits national banks are required by law to maintain lawful-money reserve for all deposit liabilities. Banks located in New York, Chicago, and St. Louis (central reserve cities) are required to maintain a reserve of 25 per cent; banks in the other reserve cities are required to maintain the same per cent, although one-half of the amount required may be kept on deposit with their reserve agents in central reserve cities; banks located elsewhere than in the two classes of reserve cities are required to maintain a reserve of 15 per cent, of which two-fifths must be held in bank and three-fifths may be kept on deposit with their agents in reserve or central reserve cities.

On December 5, 1911, against deposits subject to reserve aggregating \$6,670,804,612, the reserve held was \$1,404,400,973, or 21.05 per cent, and including with the available reserve funds in excess thereof on deposits with correspondents the aggregate means available to meet liabilities were \$1,649,290,440, an average of 24.72 per cent.

The reserve held by national banks in New York and St. Louis exceeded the legal requirement, while the average for the Chicago banks was but 0.15 of 1 per cent less than the required 25 per cent. The average percentage held by other reserve city banks exceeded the requirement and ranged from a minimum of 19.15 per cent to a maximum of 33.05 per cent. As a general rule, the average in each of these reserve cities approximated or exceeded the legal requirement. Without an exception, the average reserve of all banks in every State, exclusive of the reserve cities, exceeded the 15 per cent requirement, the average being 16.75 per cent. In the city of New York on February 20 the high reserve of 27.04 brought up the average of all central reserve cities to 26.49. On that date the average in other reserve cities was 25.59 per cent and elsewhere in the country 16.48 per cent, making the average for the United States 21.44 per cent. The deposit liabilities on that date were \$7,030,641,998, and the reserve held \$1,507,514,837. On April 18 both St. Louis and Chicago banks were deficient 0.13 of 1 per cent, but the average in New York of 26.31 per cent brought the average for the three cities up to 25.87 per cent. The average in other reserve cities was 25.61 per cent, in country banks 16.59 per cent, and in the country at large 21.30 per cent. The deposit liabilities on that date were \$6,997,244,603 and the reserve \$1,490,352,447. By June 14 the deposit liabilities had increased to \$7,050,134,993 and the reserve held to \$1,505,150,954, or 21.35 per cent. On this date St. Louis only of the central reserve cities was deficient and to the extent of but 0.12 of 1 per cent, the average for the three central reserve cities being 26.19 per cent. The average in the other reserve cities was 25.48 per cent and that of the country banks 16.53 per cent. On the date of the last report of the year, September 4, against liabilities of \$7,093,336,535 the banks held reserve of \$1,467,739,561, or 20.69 per cent. New York and Chicago banks were slightly deficient and St. Louis slightly excessive, but the average for the three cities was deficient but 0.26 of 1 per cent, standing at 24.74 per cent. On this call the banks in the major portion of the other reserve cities were slightly deficient, making the average for all 24.92 per cent. Country banks still maintained approximately 16 per cent reserve, the exact figures being 16.40 per cent.

Reports from each class of banks have been tabulated to show the legal reserve and also the amount and per cent of all available means to meet the reserve requirements. From these reports the following table has been compiled for each class of banks at the date of each

report from December 5, 1911:

	Dec. 5, 1911.		Feb. 20, 1912.		Apr. 18, 1912.		June 14, 1912.		Sept. 4, 1912.

#### SAVINGS DEPOSITORS AND DEPOSITS IN NATIONAL BANKS.

During the past two years especial attention has been given to the work of obtaining returns from national banks in relation to the volume of their savings accounts and the number of participants therein. In an appreciable percentage of banks paying more than nominal rates of interest on deposits, there is a lack of uniformity in the characterization of savings or interest bearing accounts. That this condition exists is evident from the examination of the reports of various banks from date to date, as discrepancies occur in the volume of savings accounts and the number of savings depositors which would not appear if there was a complete segregation of accounts of this character from other deposits. Notwithstanding this fact, it is evident that national banks and commercial banks generally are competing to a certain extent with the savings banks, and the reports show a steady increase in deposits of this character in national banks.

There is nothing in the Federal law authorizing the establishment of a savings department by national banks, but as the right to pay interest on deposits is recognized, the position of the office is that the question of the conduct of a savings or interest department is a matter for the determination of the directors of each bank. Deposits in commercial banks are presumed to be subject to demand, but whether such institutions have the right to enter into a different arrangement with their customers is a matter for determination by the courts. Deposits, of whatever character, however, are subject to the various provisions of the national-bank act with respect to their investment.

The extent to which national banks are securing savings accounts is shown in the following table, which is based upon the reports made at each call from December 5, 1911, to September 4, 1912.

Number of savings depositors and amount of savings deposits in national banks.

Date.	Number of report- ing banks.	Number reporting savings deposits.	Number of depositors.	Amount of deposits.	Average deposit.
Dec. 5, 1911	7,339	3,073	2,445,806	\$670, 492, 062. 96	\$274.14

#### CLASSIFICATION OF NATIONAL BANKS BY CAPITAL STOCK.

Elsewhere in this report appears a statement relating to the number and paid-in capital stock of national banks, grouped by States and geographical divisions, the banks being divided into seven classes, namely, those with capital of \$25,000, over \$25,000 and less than \$50,000, \$50,000 and less than \$100,000, \$100,000 and less than \$250,000, \$250,000 and less than \$1,000,000, \$1,000,000 and less than \$5,000,000, and \$5,000,000 and over. The figures in question are taken from the reports of condition of the banks of date September 4, last, and are summarized in the accompanying table.

The number of banks of the first two classes, the large majority of which are of the minimum amount of capital, represent 32.24 per cent in number and 6.02 per cent of the capital of all banks; banks with capital of \$50,000 and less than \$250,000 are the most numerous, being 58.5 per cent in number and representing 36.19 per cent of the aggregate capital; banks with capital ranging from \$250,000 to less than \$1,000,000 represent 6.73 per cent in number and 18.67 per cent in capital, while banks with capital of \$1,000,000 and less than \$5,000,000 are but 2.29 per cent in number, though representing 22.4 per cent of the capital. There are 18 banks, less than one-fourth of 1 per cent of the total, with capital of \$5,000,000 and over, the latter representing, however, 16.72 per cent of the capital of all reporting national banks.

The table in question follows:

Number of national banks, classified by capital (paid in), on Sept. 4, 1912.

Class.	Number.	Per cent.	Amount.	Per cent.
\$25,000 and less than \$50,000 \$50,000 and less than \$100,000 and less than \$250,000 and less than \$250,000 and less than \$250,000 and less than \$1,000,000 \$250,000 and less than \$1,000,000 \$1,000,000 and less than \$5,000,000 \$25,000,000 and over \$1,000,000 and over \$1,000,000 \$1,000,00	2,321 2,006 498 169	27. 09 5. 15 31. 38 27. 12 6. 73 2. 29 . 24	\$50, 069, 730 12, 849, 335 124, 452, 200 254, 053, 385 195, 282, 230 234, 305, 700 175, 000, 000	4. 79 1. 23 11. 90 24. 29 18. 67 22. 40
Grand total	7,397	100.00	1,046,012,580	100.00

RELATION OF CAPITAL TO DEPOSITS, ETC., OF NATIONAL BANKS.

By reference to the following table, relating to the proportion of capital to deposits, loans, and aggregate resources; of capital, surplus, and other profits to individual deposits; and of specie and legal Digitized for the result of the past four

http://fraser.stlouisfed.org/

years, it will be noted that there have been no material changes, the capital now standing as \$1 to \$5.63 of deposits, \$1 to \$5.77 of loans, \$1 to \$10.48 of aggregate resources, while the combined capital, surplus, and other profits to deposits is as \$1 to \$2.96 and specie and legal tender notes to individual deposits as \$1 to \$6.58.

The table in question follows:

Items.	1909	1910	1911	1912
Capital to individual deposits	1.00 to 5.43 1.00 to 10.14	\$1.00 to \$5.13 1.00 to 5.45 1.00 to 9.80 1.00 to 2.74 1.00 to 6.04	\$1.00 to \$5.35 1.00 to 5.52 1.00 to 10.12 1.00 to 2.84 1.00 to 6.14	\$1.00 to \$5.63 1.00 to 5.77 1.00 to 10.48 1.00 to 2.96 1.00 to 6.58

#### CHANGES IN LOANS, BONDS, CASH, AND DEPOSITS.

In connection with the general summary of the assets and liabilities of the national banks as shown by the periodical returns during the year, a compilation has been made, in thousands of dollars, relating to the volume of loans, investments in bonds, cash and cash items, and individual deposits for each call since September 1, 1911. Following the figures for each date is stated the average of each of the items, by geographical divisions, enabling ready comparisons to be made as to fluctuations.

The table in question follows:

Changes in volume of principal assets and in deposits, by geographical divisions, 1911–12.

[In thousands of dollars.]

#### Cash and Individual Bonds, etc. Divisions and dates. Loans. cash items. deposits. Supplementing the foregoing statement relative to the principal items of assets and individual deposits of national banks, by geographical divisions, the items in question have been assembled by classes; that is, those relating to banks in central reserve, other reserve cities, elsewhere in the country, and the total. As will be observed, the loans, cash, and individual deposits in the central reserve city banks were greater in amount on September 4, 1912, than on December 5, 1911, while the bond investments declined from \$341,390,000 to \$304,198,000, a decrease of approximately \$37,000,000. The figures in question show an increase in all items in banks in other reserve cities, the investments in bonds increasing from \$414,076,000 to \$429,063,000, approximately \$15,000,000. The amount of loans, bonds, and individual deposits in banks outside of the reserve cities show, with three exceptions, a gradual increase from each report to the one following, the most notable feature being the increase in investments in bonds, which was approximately \$48,000,000. The gross increase in investments in bonds by all banks was \$63,000,000. but by reason of the reduction in investments of this character by the central reserve city banks of \$37,000,000, the net increase of all banks was \$26,000,000. The details are shown in the accompanying table.

Loans, bonds, cash, and individual deposits of national banks at date of each call from Dec. 5, 1911, to Sept. 4, 1912, inclusive, in central reserve cities, and other reserve cities, and the country, together with the average for each section, 1911–12.

#### BOND INVESTMENTS BY NATIONAL BANKS.

From June 7, 1911, to June 14, 1912, the banks increased their investments in bonds and other securities from \$1,752,480,889 to \$1,853,825,171, the increase being \$101,344,282. By reference to the periodical reports it appears that practically 75 per cent of this increase was effected between June and December, 1911, and also that the bulk of the increase was represented by investments of banks outside of the reserve cities. As considerable interest attaches to these investments, a statement is submitted herewith showing the character and amount of each class of these investments, other than United States bonds, owned by the banks on June 7, 1911, and June 14, 1912, which is supplemented by similar information relating to the investments in United States bonds.

The table follows.

Class.	June 7, 1911.	June 14, 1912.
State, county, and municipal bonds.	\$164, 116, 007	\$179,322,004

Total bonds of all classes	1,752,480,889	1,853,825,171

#### PRODUCTIVITY OF LOANS AND BOND INVESTMENTS.

Practically the entire income of banks is derived from the interest on loans and returns upon investments in bonds and other securities. The total of these two classes of investments, based upon averages of the returns for the year ended September 4, is shown to be \$7,708,292,000, \$5,869,290,000 representing loans and discounts and \$1,839,002,000 investments in bonds and other similar securities. The gross earnings of the banks, as shown by their returns for the year ended June 30, 1912, were \$450,043,250, or 5.84 per cent on loans and investments. The percentage of gross earnings from both classes of investments is shown to have varied from a minimum of 5.05 in the New England States to a maximum of 8.33 in the Western States. The percentage shown for the Eastern States was 5.29; Middle Western, 5.75; Pacific, 6.30; and Southern, 6.87. The volume of loans and investments in bonds (averages), together with the amount of gross earnings and the percentage of gross earnings to investments, for each geographical division, are shown in the accompanying table.

	Loans.	Bonds, etc.	Total invest- ments.	Gross earnings.	Percentage of gross earnings to investments in loans, etc.

# UNITED STATES BONDED DEBT AND NATIONAL-BANK HOLDINGS IN DETAIL.

The bonded debt of the United States on October 31, 1912, was \$964,631,630 as against \$963,349,390 on October 31, 1911, the increase being in Panama 3 per cents to the extent of \$10,000 and postal savings bonds to the amount of \$1,272,240. All Government bonds, exclusive of the Panama threes and the postal savings two-anda-halfs, are available as security for national-bank circulation, and of the bonds available \$730,257,280 are on deposit with the Treasurer of the United States as security for circulation. As a result of the legislation of 1900, reducing the semiannual tax on national-bank circulation from one-half to one-fourth of 1 per cent where secured by bonds bearing interest at the rate of 2 per cent, the investments by banks in securities of that character now represent 94 per cent of the securities deposited for that purpose. In addition to bonds deposited as security for circulation, national banks have on deposit with the Treasury Department \$38,952,500 United States bonds as security for public deposits, and on September 4, 1912, they held in their vaults unpledged Government bonds to the amount of \$7,804,070; that is, a fraction in excess of 80 per cent of the bonded debt of the United States is held by national banking associations.

The interest-bearing bonded debt of the United States, the amount of bonds on deposit to secure national-bank circulation and Government deposits, including other bonds on deposit for the latter purpose, on October 31, 1912, are shown in the following table.

#### EARNINGS AND DIVIDENDS OF NATIONAL BANKS.

Section 5212 of the Revised Statutes of the United States provides that within 10 days after a national bank has declared any dividend the amount of such dividend and the amount of net earnings in excess of such dividend shall be reported to the Comptroller of the Currency, but in view of the fact that section 5211 authorizes the comptroller to call for special reports whenever in his judgment they are necessary to a full and complete knowledge of the bank's condition, every bank is required to submit a report of its earnings, regardless of the fact that no dividend may have been declared, at the close of each selected dividend period. Dividend periods, as a general rule, are for the six months ending with June and December of each year, although there are a limited number of banks declaring quarterly dividends and some bimonthly. Heretofore it has been the policy to publish the abstracts covering the semiannual returns, but in this report the returns for the year ended June 30, 1912, have been consolidated, as from a statistical standpoint information relative to earnings and dividends for a full year is more satisfactory than for semiannual periods, as the latter necessitate combination to enable proper comparisons to be made. As heretofore, the abstracts show the condition with respect to earnings and dividends of all national banks in each reserve city, each central reserve city, other reserve cities, and separately each State, together with the aggregates for each geographical section of the country.

The capital on which dividends were paid during the year ended June 30, 1912, was \$1,031,383,425; the surplus, \$704,346,706.70, and the gross earnings were \$450,043,250. The charges against gross earnings were losses and premiums aggregating \$42,256,130, or 9.39 per cent, and expenses of \$258,730,516, or 57.49 per cent. These deductions left net earnings to the amount of \$149,056,603, from which dividends were paid to the amount of \$120,300,872, or 11.66 per cent on capital and 6.93 per cent on capital and surplus combined. The net earnings were equivalent to 8.59 per cent of capital

The capital, surplus, ratio of surplus to capital, amount and per cent of dividends paid by national banks in each geographical division are shown in the following table:

Number of banks making earning returns for the year ended June 30, 1912, the capital stock, surplus, amount of dividend paid, and percentages of each to capital.

Following the abstract of reports of earnings and dividends for the year 1912, appearing in the appendix, is a comparative statement covering the past 43 years. This table shows that the average net earnings-annually were \$75,726,559; the dividends, \$57,142,245, or an average dividend based upon capital stock of 9.17 per cent. The total net earnings for the 43 years were \$3,256,242,044, and the aggregate dividends \$2,457,116,551.

#### NATIONAL-BANK NOTES IN CIRCULATION.

Except as permitted by the act of 1908, relating to the issue of so-called "additional currency," the issue of national-bank circulation is limited to the amount of paid-in capital stock with United States interest-bearing registered bonds as security. On September 4, 1912, with paid-in capital of \$1,046,012,580, national banks had on deposit with the Treasurer of the United States as security for circulation \$724,085,520 United States bonds. The latter amount is a fraction less than 70 per cent of the capital, and shows that with additional deposits of United States bonds the banks might increase their circulation to the extent of \$321,927,060; but regardless of this fact there has been only a normal increase in national-bank circulation during the past year, although the maximum during the history of the system was reached on September 4 last, as shown by the banks' reports of condition.

Statistics appear in the appendix showing the percentage of national-bank circulation to capital and to assets at the date of each report made by the banks from 1863 to 1912, and also to the stock of money in the United States on or about June 30 of each year. These statistics show not only a material increase in the amount of national-bank circulation since March 14, 1900, by reason of the legislation of that date, but a constantly increasing percentage as compared with the stock of money in the country. On June 29, 1900, the reports of condition of the banks indicated that circulating notes represented 11.3 per cent of the general stock of currency, whereas on September 4, 1912, they reached 19.5 per cent.

The distribution of national-bank currency, as appears from the reports made by the banks during the current year, is shown in the following table:

Date.	New York.	New York, Chicago, and St. Louis.	Other reserve cities.	All reserve cities.	Country.	Total.

BONDS, CIRCULATION, CAPITAL STOCK, ETC.

At the close of business on October 31, 1912, the number of national banks in existence was 7,428, with paid-in capital stock of \$1,053,-670,435; bonds deposited with the Treasurer of the United States to secure circulation, \$730,257,280; and circulation outstanding secured by bonds, \$727,169,316. On the same date there were outstanding circulating notes to the amount of \$22,179,543, the redemption of which has been provided for by deposits of lawful money with the Treasurer of the United States by banks reducing their circulation, those in voluntary liquidation, and in the charge of receivers, making the aggregate outstanding bank circulation \$749,348,859. As will be noticed by reference to the following table there has been a gradual increase in the number of banks from month to month, and in capital stock, except in the months of June and October, the reductions in those two months being due to the liquidation for consolidation of banks with large capital, the consolidation of the banks not being attended with any increase in capital stock of the absorbing associations. The bond-secured circulation steadily increased from \$712,115,338 on November 30, 1911, to \$718,548,203 on February 28, 1912. In March, however, by reason of withdrawal of bonds, the bond-secured circulation was reduced approximately \$1,500,000, but increased in the next month to \$718,604,693 and steadily increased thereafter to \$727,169,316 on October 31. Deposits of lawful money to provide for the redemption of circulation to be retired were at the maximum \$27,869,790 in March and the minimum on October 31, when the amount was \$22,179,543. By reason of an increase of \$15,000,000 in bonds securing circulation and a reduction of \$5,500,000 in circulation secured by lawful money. there was a net increase during the year of circulation outstanding of **\$**9,584,513.

The number of banks, paid in capital stock, bonds on deposit to secure circulation, and circulation secured by bonds and lawful money monthly from November 30, 1911, to October 31, 1912, together with the average monthly price of 2 per cent consols of

1930, are shown in the accompanying table.

<sup>1</sup> Includes \$74,679 gold bank notes.

#### CIRCULATION ISSUED, REDEEMED, AND OUTSTANDING.

From the date of the first issue on December 21, 1863, to October 31, 1912, national-bank circulation, exclusive of gold bank notes, has been issued to the amount of \$5,922,574,825. The redemptions aggregated \$5,172,102,476, leaving outstanding at the close of the current year, exclusive of gold bank notes and unredeemed fractions, \$750,472,349. Issues during the current year on account of redemptions, issues to new banks, and to those increasing their circulation, amounted to \$462,388,390. In addition to the issues to the banks there were withdrawn from the vaults, canceled and destroyed, notes to the amount of \$20,459,820 by reason of liquidations and failures of banks for the account of which these notes were held.

To meet possible demands for additional currency by reason of the legislation of May 30, 1908, incomplete notes of every bank to the extent of 50 per cent of the capital are held in the vaults of the office, the aggregate amount so held being \$539,164,590.

Gold bank notes to the amount of \$3,465,240 were issued under authority of the act of 1870 by banks organized for the specific purpose of issuing circulating notes redeemable in gold. All of these banks, however, were liquidated or changed to national-currency banks prior to 1884, hence no notes of that character have been issued since that date. The records of the office show that there are still outstanding national gold bank notes to the amount of \$74,679.

With the exception of the Irvington National Bank, Irvington, N. Y., and the Rogers National Bank, Jefferson, Tex., each capitalized for \$25,000, every national bank in the system is a bank of issue. The two banks in question have on deposit with the treasurer the requisite amount of United States bonds, but neither has taken advantage of the permissive feature of taking out circulation on their bond deposit.

Prior to 1879, the date of the resumption of specie payments, national-bank notes of the denomination of \$1 and \$2 were per-

mitted to be issued, but since that year the minimum denomination was \$5. With that restriction there were no limitations on the amount of each denomination of bank currency issuable upon the security of bonds until March 14, 1900, when the law was amended to limit the proportion of notes of the denomination of \$5 to one-third of each bank's issue. In 1900 \$5 notes represented 31.2 per cent of the aggregate amount of national-bank circulation outstanding, and by reason of that legislation the proportion steadily and materially declined to 13.6 per cent on October 31, 1904. Thereafter there was a gradual increase to 20.05 per cent on October 31, 1909, and on October 31, 1912, notes of this denomination constituted 18.65 per cent of the total outstanding.

In the following table is shown the amount of circulation of each denomination outstanding on March 14, 1900, and October 31, 1912:

Denominations.	Mar. 14, 1900.	Oct. 31, 1912.

#### NATIONAL BANK REDEMPTION AGENCY RECEIPTS AND REDEMPTIONS.

The act of June 20, 1874, requires that every national bank shall at all times keep and have on deposit in the Treasury of the United States in lawful money of the United States a sum equal to 5 per cent of its circulation, to be held and used for the redemption of such It is further provided that when the circulating notes of circulation. any bank are presented for redemption to the Treasury of the United States they shall be redeemed and the notes so redeemed shall be charged by the Treasurer to the respective issuing banks. Subsequent to redemption all notes fit for circulation are returned to the bank of issue, and those worn, defaced, mutilated, or otherwise unfit for circulation are delivered to the Comptroller of the Currency to be destroyed and replaced by new issues as provided by law. The banks are required to reimburse to the Treasury the charges for transportation and cost of assorting notes, the amount assessed upon each bank being based upon the amount of its notes that are redeemed.

In the year ended October 31, 1912, the national bank redemption agency received for redemption circulating notes to the amount of \$669,359,343, of which \$219,324,000, being fit for circulation, were returned to the issuing banks. The monthly receipts for redemption during the year ranged from a maximum of \$77,819,645 in January to a minimum of \$41,816,565 in September, the average receipts per Digitized for FRASER

month being \$55,779,945. The total receipts for the year equaled 89.89 per cent of the average amount outstanding.

Redemptions by months from November, 1911, to October, 1912,

are shown in the following statement:

November, 1911	\$46, 646, 904
December, 1911	54, 363, 693
January, 1912	77, 819, 64 <b>5</b>

#### PROFIT ON NATIONAL BANK CIRCULATION.

That the margin of profit on the issue of national bank circulation is not as great as generally assumed is realized when it is known that the amount of circulation issued is less than 70 per cent of the amount issuable, the measure of the latter being the paid-in capital stock of the national banks.

In computing the profit on the issue of national-bank circulation it is assumed that money is worth 6 per cent. Assuming that a bank with a capital of \$100,000 purchases a like amount of Government bonds to be deposited with the Treasury as security for circulation, the measure of profit is then the difference between the interest on the cost of the bonds at 6 per cent and the net receipts from the issue of \$100,000 of national-bank notes. The gross receipts are represented by the interest on the bonds and the interest on the circulation loaned at 6 per cent, from which are deducted taxes and expenses incident to the engraving of the plates for printing the circulation, redemption charges, etc., and sinking fund to provide for the cost of the bonds in

excess of par. The actuary of the Treasury Department has made computations for this report, which will be found in the appendix, on the profit on circulation based on the deposit of \$100,000 of United States consols of 1930, 4 per cent loan of 1925, and the Panama Canal loan, at the average net price monthly of bonds during the year ended October 31, 1912. These computations show the greater measure of profit on circulation secured by Panama Canal bonds treated as maturing on August 1, 1936. It is seen that in January last this issue of bonds was obtainable at par, hence on \$100,000 of an investment the banks received \$100,000 of circulation, obtaining \$2,000 interest on the bonds and \$6,000 on the loaning of the circulation, making the gross receipts \$8,000. The tax was \$500, expenses, \$62.50, making the net deductions \$562.50. The net receipts were therefore \$7,437.50, which exceeded by \$1,437.50 the interest on the cost of bonds at 6 per cent. That is, the profit, under these conditions, on the issue of circulation was 1.438 per cent in excess of 6 per cent on the amount of the investment in bonds. Based upon the October price of the Panama Canal bonds, namely, 101.25, the percentage of profit upon circulation in excess of 6 per cent on the investment in the bonds was 1.322.

#### CHANGE IN DESIGN AND SIZE OF NOTES.

The Secretary of the Treasury has approved a plan for systematizing the designs of United States notes, coin certificates, and nationalbank notes, and simultaneously the reduction of the size of all notes. It is the purpose to make the notes more artistic and at the same time to give them added security in the circumvention of counterfeiting. The number of designs will be reduced from 19 to 9. The change determined upon will also reduce the number of plates necessary to print national-bank notes from 12,000 to 200, thus effecting not only an economy in the printing of the notes but a saving to the banks interested.

The reduction in size of the notes will enable the storage capacity of the department and bank vaults to be increased about 25 per cent, and it is believed that with the reduction in size the folding of notes, to a certain extent, will be obviated, resulting in their greater longevity.

The length of time required to effect the changes in designs and size of notes is stated at about 18 months.

or notes is stated at about 18 months.

# EXPENSES OF THE BANKS INCIDENT TO THE ISSUE OF CIRCULATION AND EXPENSES OF THE CURRENCY BUREAU.

For the year ended June 30, 1912, the expenses of national banks in connection with the issue of circulation aggregated \$4,251,108.74, of which the semiannual tax on circulation was \$3,690,313.53; cost of redemption of notes, \$505,735.21; cost of plates for new banks and those extending their charters, or duplicates of original plates of other banks, \$55,060. The Treasurer states the cost of redemption of national-bank circulation per \$1,000 at \$0.78233.

In addition to the expenses stated, assessments for examination of national banks during the year were paid to the amount of \$526,169.76. The corporation tax returns to the Internal Revenue

Digitized for FRASER

Bureau by national banks are not tabulated separately, but are included with returns from State banks and other financial institutions; but from a careful examination of the reports of earnings of national banks for the year ended December 31, 1911, it would appear that the tax, on earnings of each bank in excess of \$5,000, produced in the aggregate approximately \$1,168,000. This result is obtained by ascertaining the net earnings of each bank for the year in excess of the limit not taxable, that is, \$5,000, such net earnings being stated at \$116,829,000. Assuming the approximate correctness of the calculation of the corporation tax, it appears that the national banks have paid in taxes to the Government during the past year over \$4,858,000.

The expenses of the currency bureau for the year ended June 30, 1912, that is, for special dies, plates, printing, etc., and for salaries, excluding those reimbursed by national banks, were \$670,528.15. From the date of the organization of the bureau in May, 1863, the total expenses of the office, excluding contingent expenses not paid by the comptroller but from the general appropriation for contingent expenses of the Treasury Department no separate account of which

is kept, aggregated \$14,596,167.53.

The total taxes paid to the Government by national banks on capital and deposits to July 1, 1883, on capital and surplus under the war-revenue act of 1898, and on circulation aggregate \$194,383,516.40, and with the addition of the corporation tax for the years 1909, 1910, and 1911, estimated at \$3,668,000, the total payments to the Government by these banks is shown to be over \$198,000,000, or more than 13 times the amount appropriated for the conduct of the business of the currency bureau during its entire existence.

In the appendix statistics will be found showing by years the amount of tax paid on circulation, the cost of redemption of notes, assessments for bank plates, assessments for examiners' fees, together with the tax paid on capital and deposits during the periods for which tax on those items was imposed and the estimate of taxes paid under the corporation tax act.

#### ORGANIZATIONS OF NATIONAL BANKS.

In the year ended October 31 last charters were issued to 188 national banking associations, making the number chartered from 1863 to date 10,285. Applications to organize national banks, including conversions of State banks, numbered 262, of which 192 were approved and 35 rejected. Rejections were based, as a rule, upon information received with respect to local conditions; that is, the lack of a satisfactory field for the operation of a bank, either by reason of limited population and business or existing banking facilities. In other cases rejections were based upon the reputed character of the applicants and others interested. In cases of the rejection of applications to convert State banks, action was based upon information received to the effect that the management of the State institution had not been successful or its business had not been conducted in conformity with the laws of the State from which the charter was received.

The capital at organization of the 188 associations chartered during the year was \$16,080,000. The gross increase in capital Digitized for FRASER

during the year was \$43,875,300, but by reason of voluntary liquidations, reductions of capital and failures, the net increase was but \$21,038,300, the aggregate authorized capital of all national banks

on October 31, 1912, being \$1,053,670,435.

Of the 10,285 banks chartered, 7,428 are in active operation, 2,357 having been placed in voluntary liquidation and 500 in the charge of receivers. Changes from the State to the national system during the existence of the system are shown in the conversion of 1,692 banks, with capital at date of conversion of \$337,985,928.

In conformity with the provisions of the act of March 14, 1900, 3,196 banks have been chartered with individual capital of less than \$50,000, and generally with the minimum amount; that is, \$25,000, but by reason of the organization of a limited number of banks with capital between \$25,000 and \$50,000, the average capital of the banks organized under the act in question is shown to have been

\$26,070, the aggregate being \$83,320,500.

The policy of permitting the organization of national banks with capital of less than \$50,000 was questioned at the time the provision was under consideration as well as subsequent to the enactment of the law, but statistics evidence the fact that these small banks have generally been successful and supplied their communities with desirable banking facilities. An investigation was made last year with respect to the earning power of the banks of various classes, based upon volume of capital, and it was shown that the dividends paid by banks with minimum capital averaged 8.05 per cent, as against an average of 10.26 per cent for all banks, and that dividends based on capital and surplus averaged 6.3 per cent against an average for all banks of 6.17 per cent. It further appeared that a fraction less than 1 per cent of banks of this character failed since 1900, against nearly It also appears 5 per cent for all national banks failing since 1865. that the creditors of these small insolvent banks have been paid a higher rate of dividend than the average for all insolvent banks excluding those with capital of \$1,000,000 and over. Approximately 82 per cent has been received by creditors of all insolvent national banks, and 81.14 per cent by creditors of the small banks, the highest average, 94.63 per cent, being paid by the banks with capital of \$1,000,000 and over.

Since March 14, 1900, 1,825 banks have been organized under the act of 1864, the aggregate capital being \$237,442,800, and with individual capital of \$50,000 or more. Of the banks chartered during this period, 773 were conversions of State banks, with capital of \$58,765,800; 1,528 were reorganizations of State or private banks, with capital aggregating \$107,102,000; and 2,720 banks of primary organization, with capital of \$154,895,500.

The total number of banks chartered from March 14, 1900, to October 31, 1912, was 5,021, with capital of \$320,763,300. The number organized in this period exceeded by 1,404 the number of banks in active operation on March 14, 1900.

Classification, based upon capital stock and location by States and geographical divisions, of national banks organized from March 14, 1900, to October 31, 1912, is shown in the following table.

Summary, by States, geographical divisions, and classes, of national banks organized from Mar. 14, 1900, to Oct. 81, 1912, and the paid-in capital stock of all reporting national banks on Sept. 4, 1912.

#### EXTENSIONS AND EXPIRATIONS OF CHARTERS.

Under the law the corporate existence of national banks extends for a period of 20 years from the date of the execution of the organization certificate, and in the year ended October 31, last, 104 banks reached the termination of that period, and their charters were extended for an additional period of 20 years, in conformity with the act of July 12, 1882. During this same time the charters of 75 banks, which had been extended under the act of 1882, were extended for a further period of 20 years under the act of April 12, 1902. Extensions of charters under the act of 1882 have been granted to 3,188 banks, and under the act of 1902 to 1,141 banks. In 1913 the charters of 83 banks will expire for the first time, and 26 under their first extension. In the appendix to this report will be found a list of all banks interested in extension of their charters during the year ending October 31, 1913.

Extension of the charter or corporate existence of a national bank requires the written consent of shareholders representing at least two-thirds of the stock and the comptroller's approval of the action of the shareholders. Extension occasions no change in the title, charter number, or corporate rights of a bank.

The law provides that before the approving of the extension of charter the comptroller shall be satisfied that the bank is in a satisfactory condition, and to determine that question a special examination is made in every instance within 30 to 90 days of the date of

expiration of the prior charter. Under the law every bank the charter of which is extended is required to order a new plate or plates for the printing of circulation of a design materially different from that of the plates in prior use. The cost of these plates and expenses incident to special examination of a bank represent the total expense to the bank, so far as the Government is concerned, in connection with the extension of charter.

Under the act of 1863 the corporate existence of a number of banks was fixed by the articles of association at less than 20 years, and in consequence expired prior to the act of 1882 authorizing extension. Under the regulations of the department at that time banks of this character were required to formally liquidate, reorganize, and take a new charter, and necessarily a new charter number. By reason of the sentiment attaching to the original numbers, banks in that category have been permitted to resume their original numbers. A list of these banks will be found in the appendix to this report.

#### CHANGES OF TITLE AND LOCATION OF NATIONAL BANKS.

Under the law the comptroller may approve of the change of the corporate title of national banks, and also their removal to a point in the same State not more than 30 miles distant from the original location. Change of either character necessarily requires the ordering of new plates for the printing of circulation to conform to the change of corporate title. Changes of title and location necessitate affirmative action by shareholders representing at least two-thirds of the capital stock.

In the year just ended 17 changes have occurred, a list of the banks interested being shown in the following table:

STAŢUS OF BANK WHEN PLACE IN WHICH ORGANIZED HAS BEEN ANNEXED TO ADJACENT CITY.

The national-bank act fixes the amount of capital required to organize a national bank, making it dependent upon the population of the place in which said bank is organized. The act also requires the organization certificate to state specifically the place in

which the banking business is to be carried on.

In the course of time, as the larger cities grow, annexation is made of suburban villages which frequently contain national banks organized with the capital required for a population of such village. A question has arisen several times as to whether a bank chartered in this suburban village which has been annexed to the larger city has or has not a right to remove into the older or original city. The comptroller has held that they can not do so, being restricted to the place named in the organization certificate, and has refused to permit them to remove beyond the original limits of that place unless they increase their capital to the amount required for the organization of a national bank in the larger place and also comply with all other conditions required of banks in such cities.

The First National Bank of Capitol Hill was organized in the village of Capitol Hill, adjacent to Oklahoma City. Some time after Capitol Hill had been annexed to Oklahoma City the First National Bank removed from its old location into the business section of Oklahoma City. They were at once notified by the comptroller to return to their former location or to increase their capital stock from its present amount of \$25,000, the amount required for a bank in the village of Capitol Hill, to \$200,000, the amount required for the organization of a bank in Oklahoma City, and also to comply with all the require-

ments of a reserve city bank.

The First National Bank of Capitol Hill declined to increase their capital stock or to return to the former location in Capitol Hill, and the comptroller thereupon referred the matter to the Solicitor of the Treasury. The attorneys for the First National Bank of Capitol Hill were present at a hearing in the solicitor's office, and by agreement a suit was instituted in the United States District Court for the Second District of Oklahoma in the name of the Comptroller of the Currency, against the First National Bank of Capitol Hill, asking for the forfeiture of its charter.

To the petition in this case the defendant bank demurred, and on October 15, 1912, Judge Cottrell, of the United States district court, overruled the demurrer and held that the petition stated a good cause of action for the forfeiture of the charter of the bank.

The position taken by the controller was that as the organization certificate stated the place where a bank's operations are to be carried on, designating the State, Territory, or district, and the particular county, city, town, or village, and that the law required that the usual business should be transacted at an office located in the place specified in its organization certificate, the bank could not change its place of operations to any other place, except with the approval of the Comptroller of the Currency. It was therefore claimed that this bank could not remove from its location within the limits of Capitol Hill over into Oklahoma City and outside the limits of the old village of Capitol Hill without the consent of the comptroller and meeting

http://fraser.stlouisfed.org/

contrary to the spirit and intent of the national banking acts, and that said act requires certain capital stock in places of certain population.

It is understood that the First National Bank of Capitol Hill intends to ask for a stay of execution and will take the case up on error to the United States circuit court of appeals.

# VOLUNTARY LIQUIDATIONS OF NATIONAL BANKS.

Eighty-three national banks, with capital aggregating \$21,605,250, were placed in voluntary liquidation during the past year, of which 14, with capital of \$3,610,250, were absorbed by other national banks; 21, with capital of \$11,475,000, consolidated with other national banks; and 10, with capital of \$1,215,000, were absorbed by State barks and trust companies. Banks to the number of 21, with capital of \$2,405,000, liquidated to reorganize as State banks; 8, with capital of \$2,500,000, liquidated to reorganize as national banks; and 3, with capital of \$200,000, the corporate existence of which expired by limitation, were succeeded by new national banks, while 6, with capital of \$200,000, went into liquidation to discontinue business.

A list of national banks placed in voluntary liquidation during the year, together with the names, where reported, of succeeding banks,

will be found in the appendix.

When a national bank is placed in voluntary liquidation for the purpose of discontinuing business and not to consolidate with any other bank, a liquidating agent is elected by the shareholders, who is required to submit quarterly reports to the comptroller covering the amount of assets not liquidated and liabilities to depositors and other creditors at close of the quarter. Banks in voluntary liquidation are also subject to periodical examinations until such time as the claims of creditors are paid or otherwise satisfied. Neither reports nor examinations are required, however, where banks liquidate for the purpose of consolidating with other institutions whereby the liabilities are assumed by the bank with which consolidation is effected.

# INSOLVENT NATIONAL BANKS.

Receivers were appointed for eight national banks during the year ended October 31, 1912, the aggregate capital being \$1,100,000. In the accompanying table will be found a list of the banks, with date of authority to begin business, date of appointment of receiver, capital stock, and circulation issued, redeemed, and outstanding.

Federal Reserve Bank of St. Louis

From April 14, 1865, the date of the first failure of a national bank, to October 31, 1912, receivers have been appointed for 525 national banks, of which, however, 25 were restored to solvency and authorized to resume business or liquidate, by reason of the restoration of capital, where necessary, or the placing of assets in a condition enabling the claims of all depositors and other creditors to be satisfactorily settled. Including the 25 banks in question, the affairs of 478 banks placed in charge of receivers have been settled, the assets taken charge of by receivers aggregating \$305,908.459. The capital of these banks was \$78,340,920. From the assets the collections were \$152,346,371, and from assessments upon shareholders, \$20,141,001, making total collections of \$172,487,372. The proceeds of collections were disposed of as follows: Dividends, \$122,060,521, on claims proved amounting to \$160,201,795; loans paid and other disbursements, \$34,812,040; legal expenses, \$4,567,045; receivers' salaries and all other expenses, \$8,128,561; balance in the hands of receivers or the comptroller, \$27,796; returned to shareholders in cash, \$2,891,409. Assessments levied upon shareholders to make good deficiency in assets amounted to \$42,065,290. The outstanding circulation of the banks at date of failure was \$23,506,707, secured by bonds on deposit with the Treasury of face value of \$25,630,400. These bonds were sold and realized \$26,590,545. The difference between the amount realized from these bonds and the circulation secured thereby was added to the general fund for the liquidation of liabilities to other creditors.

There are still in the charge of receivers 47 insolvent banks, the face value of the assets of these trusts being \$45,238,913, and from which there has been collected \$23,883,880. The claims proved and filed with the receivers amount to \$25,917,314, on which dividends have

been paid to the amount of \$18,353,606.

In view of the indeterminate value of assets of insolvent banks still in charge of receivers, authentic data relative to the settlement of the affairs of the insolvent national banks are properly restricted to the trusts that have been fully settled. Computations based upon the figures relating to trusts closed indicate that creditors have received on claims proved, dividends at an average rate of 76.19 per cent, but including offsets allowed, loans paid, and other disbursements, with dividends, creditors received on an average 82.61 per cent. Expenses of administration of these 478 trusts, represented by receivers' salaries, legal, and other incidental expenses, amounted to \$12,695,606, or 4.14 per cent of the nominal value of the assets and 7.36 per cent of the total collections from assets and shareholders. On an average shareholders were assessed 58.5 per cent on their holdings, the collections averaging 47.8 per cent of the assessments. In the current year 35 dividends were paid to the creditors of 26 insolvent banks, the total disbursements being \$2,851,248.47.

In the following table is summarized the condition of all insolvent national banks, the condition of the closed and active receiverships being shown separately.

# REPORTS OF CONDITION OF BANKS IN THE UNITED STATES.

Under the provisions of section 333 of the Revised Statutes of the United States, the Comptroller of the Currency is required to incorporate in his annual report to Congress a statement exhibiting under appropriate heads the resources and liabilities and condition of the banks, banking companies, and savings banks organized under the laws of the several States and Territories, the statute providing that the information shall be obtained from reports made to legislatures or officers of the different States and Territories, or from such authentic sources as may be available.

Since 1908 the annual statements received from banks outside of Digitized fother national system have conformed in general as to details of assets

<sup>&</sup>lt;sup>2</sup> Capital stock of 25 banks restored to solvency.

and liabilities with the reports made by national banks. Individual statements for a date concurrent with the June call on national banks, beginning with 1909, have been furnished by the State and private banks through the courtesy and assistance of the State bank superintendents. Prior to 1909 statements for State banks were furnished to the comptroller for varying dates, and there was no uniformity in the form of the reports, many valuable details, such as the classification of cash, bonds, and deposits, being wanting. It is due to the courteous cooperation of the heads of the banking departments of the various States that it is possible now for the comptroller to present such complete and satisfactory statistics relative to practically all the banks of the country.

The statements used in the compilations are of date June 14, 1912, with the exception of State banks for Kentucky, May 18; Georgia, May 29; Tennessee, June 29; Alaska and the island possessions, June 30; the mutual savings banks of Maryland, June 29. With these

exceptions the reports are uniform as to date and form.

The banks furnishing statements for use in connection with this report number 25,195, being 803 more than reported last year, and include 7,372 national banks, 13,381 State banks, 1,922 mutual and stock savings banks, 1,110 private banks, and 1,410 loan and trust companies.

Abstracts of reports of condition for each class of banks, arranged by States, will be found in the appendix. The summary referred to follows.

Summary of reports of condition from 25,195 banks in the United States and island possessions (including national, State, savings, and private banks and loan and trust companies), showing their condition at the close of business June 14, 1912.

The foregoing summary of reports of condition shows resources aggregating \$24,986,642,774. Loans and discounts aggregated \$13,953,606,243 against \$13,046,389,844 in 1911; bonds, securities, etc., \$5,358,883,382 against \$5,051,856,404; cash in bank, \$1,572,953,479 against \$1,554,147,169; capital, \$2,010,843,505 against \$1,952,411,085; individual deposits, \$17,024,067,606 against \$15,906,274,710; surplus and undivided profits, \$2,166,159,148 as against \$2,065,574,839. The increase in these items during the year is as follows: Loans and discounts, \$907,216,399; bonds, securities, etc., \$307,026,978; cash in bank, \$18,806,310; capital, \$58,432,420; surplus and undivided profits, \$100,584,309; and individual deposits, \$1,117,792,896.

The percentage of increase for the principal items of resources and liabilities is as follows: Loans and discounts, 6.95; bonds, securities, etc., 6.08; cash, 1.21; capital, 2.99; surplus and undivided profits, 4.87; individual deposits, 7.02; and aggregate liabilities, 5.78.

The following comparative statement shows the classification of resources and liabilities of national and other reporting banks for each year from 1908 to 1912, inclusive:

The foregoing statistics show that the aggregate resources of the banks have increased from \$19,583,410,393 in 1908 to \$24,986,642,774 for the present year, a gain of \$5,403,232,381, or over 27 per cent. These figures indicate an unprecedented growth in bank resources during the past four years, and far exceeds that for any like period in the country's history. The nearest approach to this increase is shown in the statistics for June 30, 1904, when the aggregate resources of all reporting banks were about \$4,413,000,000 greater than the amount reported in 1900. Individual deposits in the banks during the last four years increased from \$12,784,511,169 to \$17,024,067,606, the increase being \$4,239,556,437, or over 33 per cent. The next largest increase shown was for the four years from June, 1904, to June, 1908, when the increase in round amount was \$2,784,000,000, or 27 per cent. From June, 1908, to June, 1912, loans and discounts increased by \$3,515,600,000, or 33 per cent, the next highest increase being \$2,456,000,000, or 30 per cent, during the prior four-year period.

For the purpose of comparison, the following shows the number of reporting banks, aggregate loans, resources, capital, and deposits for the fiscal years 1908 to 1912, inclusive:

[In millions of dollars.]

Year.	Num- ber of banks.	Loans.	Resources.	Capital.	Individual deposits.	
1908.	21, 346	\$10, 437. 9	\$19, 583. 4	\$1,757.1	\$12,784.5

## GROWTH OF BANKING IN THE UNITED STATES.

Information relating to banking in the earliest days of the country is meager, but some interesting data gathered from reliable sources are published in the annual reports of the Comptroller. In the appendix is a table which gives the number of colonial and State banks together with the principal items of resources and liabilities in the years indicated from 1784 to 1833. In 1784 the three banks from which reports have been compiled had a capital of about \$2,100,000, circulation \$2,000,000, and specie \$10,000,000. In 1800 reports from 28 banks showed capital of \$21,300,000, circulation \$10,500,000, and specie \$17,500,000. In 1820 there were 307 banks with capital of \$102,100,000, circulation of \$40,600,000, deposits \$31,200,000, and specie \$16,700,000. In 1830, 329 banks had \$110,100,000 capital, \$48,400,000 circulation, \$39,500,000 deposits, \$14,500,000 specie, and \$159,800,000 in loans.

A statement of the resources and liabilities of the banks of the country in detail from 1834 to 1863 will also be found in the appendix. It appears from the table in question that in 1834 there were 506 State banks in the country, with capital of more than \$200,000,000, circulation of \$94,800,000, and deposits of \$75,600,000. In 1840 the number of banks had increased to 901, with capital of \$358,400,000, circulation \$106,900,000, and deposits \$75,600,000. In 1850 reports show only 824 banks, with capital of \$217,300,000, circulation \$131,300,000, and deposits \$109,500,000. In 1862, the year prior to the inauguration of the national banking system, there appears to have been 1,492 banks in operation; the capital of these banks being \$418,100,000, circulation \$183,700,000, and deposits \$296,300,000; the loans aggregated \$646,600,000, investments in stocks \$99,000,000, specie on hand \$102,100,000, specie funds \$27,800,000, and notes of other banks held \$25,200,000.

The following condensed statement gives the principal items of resources and liabilities of national, State, savings, private banks, and loan and trust companies from 1863 to 1912, and reveals the growth

Digitized for hanking in this country for the past 50 years.

Note.—Since 1873 the Comptroller of the Currency has collected and published statistics of State banks, but complete data for compiling these statistics for a number of years thereafter were available only for those States in which the banks were required to report to some State official. For recent years the statistics are practically complete,

#### GROWTH OF BANKING IN RECENT YEARS.

The table following shows the growth of banks in the United States, including island possessions, as indicated by the number of banks, capital stock, and individual deposits for four-year periods from 1900, the number of nonreporting banks, their capital, and deposits being estimated from data obtained from reliable sources.

Since 1900 the number of banks in operation in the country has increased by over 107 per cent, and their volume of business, as indicated by their deposits, shows an increase of over 127 per cent. In that year the total number of banks in operation (data for non-reporting banks being estimated) was stated at 13,977, with capital of \$1,150,728,675, and individual deposits, \$7,688,986,450. The non-reporting banks in 1900 were estimated at 3,595, in 1904 at 3,994, in 1908 at 3,654, and in 1912 at 3,800.

For the current year (nonreporting banks being again estimated) the number has increased to 28,995, with aggregate capital of \$2,-080,843,505 and individual deposits, \$17,494,067,606. In 1900, 3,732 national banks had 54 per cent of capital of all reporting banks and about 32 per cent of the individual deposits. In June, 1912, 7,372 national banks held 49.67 per cent of the capital stock of all banks and nearly 33\frac{1}{3} per cent of all individual deposits. In 1900 the capital stock of national banks, in round amount, aggregated \$621,-000,000, and that of all other banks, \$529,000,000; for the current

year the capital of national banks aggregates \$1,033,000,000, and that of all other reporting and nonreporting banks, \$1,047,000,000. The figures show that national banks during the last 12 years have increased their capital by 66 per cent, while that of all other banks increased 97 per cent; but the statistics further show that the national banks increased their volume of business, as measured by individual deposits, by a much larger percentage than did the other banks, the gain during this period being 137 per cent for national and 123 per cent for other banks.

## BANKING POWER OF THE UNITED STATES.

The banking power of the United States in 1912, as represented by capital, surplus and other profits, deposits, and circulation, of national and other reporting banks, together with the estimated amount of funds of this character in nonreporting banks, is \$22,548,706,835, against \$21,334,456,790 in 1911, and \$17,642,705,274 in 1908. The increase for the year 1912 was 5.69 per cent and for the four years ended June 14, 1912, over 27.8 per cent. Since 1900, when it was reported at \$10,685,000,000, the banking power of the country has more than doubled, the increase being 111 per cent. The details are set forth in the following table:

	Num- ber.	Capital.	Surplus and profits.	Deposits.	Circulation.	Total.	
National banks State, etc., banks Nonreporting banks	7,372 17,823 3,800	\$1,033,570,675 977,272,830 70,000,000	\$950, 827, 515 1, 215, 331, 634 40, 000, 000	\$5,884,407,144 11,198,606,444 470,000,000		\$8,577,495,927 13,391,210,908 580,000,000

<sup>&</sup>lt;sup>1</sup> Includes United States deposits.

## RESOURCES AND LIABILITIES OF THE BANKS BY STATES.

In order that the banking power of the several States may be readily compared, the following condensed statement of the resources and liabilities of all reporting banks of the United States as of June 14, 1912, arranged by States and geographical divisions, is submitted herewith:

# [Includes national, State, savings, and private banks and loan and trust companies.]

<sup>&</sup>lt;sup>1</sup> Other liabilities include: National-bank circulation outstanding, \$708,690,593; dividends unpaid, \$3,639,127.75; bills payable, \$127,778,722.66; notes and bills rediscounted, \$21,836,346.24; and miscellaneous, \$232,046,666.79.

An examination of the foregoing table shows the distribution of banks among the geographical sections in the following order, according to the number reporting: 8,383 in the Middle Western States; 6,069 in the Southern States; 5,003 in the Western States; 2,901 in the Eastern States; 1,721 in the Pacific States; 1,083 in the New England States; and 35 in the island possessions. The increase in the number of banks during the year is as follows: 304 in the Southern States; 216 in the Middle Western States; 117 in the Pacific States; 104 in the Western States; 57 in the Eastern States; 4 in the New England States; and 1 in the island possessions.

Comparing the aggregate resources of the several sections, the Eastern States are first, with \$10,441,000,000; the Middle Western States second with \$6,150,000,000; the New England States third with \$3,077,000,000; the Southern States fourth with \$2,335,000,000; the Pacific States fifth with \$1,726,000,000, and the Western States sixth with \$1,179,000,000, the resources for the island possessions

being \$75,000,000.

The increase in bank resources during the year was most marked in the Eastern States, amounting to \$432,000,000. The increase in the Middle Western States was \$392,000,000; Southern States, \$157,000,000; Pacific States, \$153,000,000; New England States, \$143,000,000; Western States, \$65,000,000; and the island possessions, \$12,000,000. Compared with 1911, statistics show the highest percentage of increase in Montana, 19.90, followed by Tennessee 16.08, Utah with 15.84, Florida 14.38, Alabama 13.93, Nebraska 11.56, Michigan 10.77, Iowa 10.37, and California 10.30, the increase in the other States being less than 10 per cent. Decreases are shown for the following States: Mississippi, 3.25 per cent; South Dakota, 2.04 per cent; New Mexico, 0.32 per cent; and Oklahoma 2.73 per cent.

The following comparative statement is a summary of reports of condition from the banks in New York City, Chicago, St. Louis, Boston, Philadelphia, and San Francisco.

## CLASSIFICATION OF LOANS AND DISCOUNTS IN ALL BANKS.

Loans and discounts in the banks of the United States as shown by reports of condition for 1912, aggregate roundly, \$13,953,600,000. Of this amount, \$5,973,700,000 is in national banks and \$7,979,900,000 in banks other than national. Of the total loans, the sum of \$3,301,000,000 is reported as secured by real estate, and \$4,239,000,000 by other collateral.

The classification of loans of banks other than national and of national banks compiled from reports as of June 14, 1912, is set

forth in the following table:

# Loans and discounts.

Classification.	Number of banks.	Secured by real estate (including mortgages owned).	Secured by collateral other than real estate.	All other loans.	Overdrafts.	Total.
State banks	1,292	Millions. \$572.9 1,707.8 379.9 526.5 39.6	Millions. \$564.0 135.9 104.5 1,280.0 19.8	Millions. \$1,379.6 76.6 182.8 900.3 68.1	Millions. \$32.8 2.0 4.4 2.4	Millions. \$2,549.3 1,920.3 669.3 2,711.2 129.8
Total	17,823	3,226.7	2, 104. 2	2,607.4	41.6	7,979.9
National banks	7,372	74.8	2, 135. 7	3,743.3	19.8	5, 973. <b>7</b>
Grand total	25, 195	3,301.5	4,239.9	6,350.7	61.5	13,953.6

From the foregoing statement it appears that about 24 per cent of the total loans are secured by real estate or other liens on realty, the proportion of loans secured by real estate for each class of banks being as follows: 88 per cent for mutual savings banks, 56 per cent for stock savings banks, 30 per cent for private banks, 22 per cent for State banks, 19 per cent for loan and trust companies, and a little over 1½ per cent for national banks.

# INVESTMENTS OF ALL BANKS IN BONDS AND OTHER SECURITIES.

Investments in bonds, securities, etc., of all banks, as shown by reports for 1912, aggregate \$5,358,800,000, as against \$5,051,900,000 in 1911, the gain being nearly \$307,000,000.

The classification by amounts and percentages of investments held

by banks in 1911 and 1912 is as follows:

Charles	191	.1	1912		
Classification.	Amount.	Per cent.	Amount.	Per cent.	
United States bonds. State, county, and municipal bonds. Railroad bonds. Bonds of other public-service corporations. Other bonds, stocks, and securities.	1,602.1 550.2	15. 3 23. 8 31. 7 10. 9 18. 3	Millions. \$823.3 1,273.5 1,631.6 603.5 1,027.0	15. 4 23. 8 30. 4 11. 3 19. 1	
Total	5,051.9	100.0	5, <b>8</b> 58. 9	100.0	

From the foregoing it will be noted that 30.4 per cent of the investments of banks reporting in 1912 is in railroad bonds against 31.7 per cent in 1911; 11.3 per cent in bonds of other public-service corporations against 10.9 per cent in 1911; 15.4 per cent in United States bonds against 15.3 per cent in 1911. The percentage of State, county, and municipal bonds remains the same as in 1911, i. e., 23.8 per cent, while the unclassified bonds, stocks, securities, etc., is 19.1 per cent against 18.3 per cent in 1911.

In the following table is shown the amount of the various classes of bonds, stocks, and other securities held by the several classes of

banks on June 14, 1912:

Classification of investments in bonds, etc., held by banks of the United States on June 14, 1912.

[Expressed in millions.]

<sup>1</sup> Includes premium.

From the foregoing table it appears that of the \$823,300,000 United States bonds owned by the banks \$783,500,000, including premium, are held by national and \$39,800,000 by all other banks, \$19,900,000 of the latter amount being owned by mutual savings The largest proportion of the bond investments held by mutual savings banks is shown to consist of bonds of railroad and other public-service corporations, 49 per cent of the bonds held by mutual savings banks being of this character. Forty-eight per cent of the investments of loan and trust companies consists of this class of bonds, as also 38 per cent of investments of stock savings banks, 36 per cent of State-bank investments, 31 per cent of national-bank investments, and 24 per cent of private-bank investments. Fortyone per cent of the investments of mutual savings banks consists of State, county, and municipal bonds; the proportion of investments in this class of bonds by the other banks are 29 per cent for stock savings banks, 24 per cent for State banks, 16 per cent for loan and trust companies, 11 per cent for national banks, and less than 2 per cent for the private banks.

Of the total investments in bonds, stocks, etc., 33 per cent is held by mutual savings banks, 34 per cent by national banks, and 22 per cent by loan and trust companies, the balance, 11 per cent, being the combined holdings of State banks, stock savings banks, and private

banks.

### MONEY IN BANKS.

On June 7, 1911, the cash holdings of all reporting banks were \$1,554,147,169.28, and on June 14, 1912, \$1,572,953,479.43, being an Digitized foincrease during the year of \$18,806,310.15. The reports show that http://fraser.stlouisfed.org/

during the year cash in national banks has decreased in the sum of \$1,918,617.59, and that the cash in State banks has increased in the sum of \$20,724,927.74. Of the total amount held by the banks on June 14, 1912, \$996,000,000 was in national and \$576,000,000 in other reporting banks. The proportion of cash to deposits held by national banks is, therefore, shown to be 17.10 per cent, that for all other commercial banks is 7.38 per cent, and including mutual saving bank 5.15 per cent.

The following table shows the amount of coin and other money held

by all reporting banks.

Classification of cash in banks June 14, 1912.

<sup>1</sup> Public money In national-bank depositaries to the credit of the Treasurer of the United States not <sup>3</sup> Money in banks of island possessions not included.
Digitized for FRASER included.

http://fraser.stlouisfed.org/ Federal Reserve Bank of St. Louis The general stock of money in the United States at the close of the fiscal year ended June 30, 1912, was \$3,648,800,000. Of this amount \$364,300,000, or 9.98 per cent, was in the Treasury as assets; \$1,563,800,000, or 42.86 per cent, in reporting banks (excluding those of the island possessions); and \$1,720,700,000, or 47.16 per cent, outside of the Treasury and banks—that is, in circulation among the people. The amount reported in circulation, exclusive of coin and other money in the Treasury as assets, is \$3,284,500,000, or \$34.34 per capita, being \$70,500,000 more than the amount reported in 1911. Of this increase in circulation during the year \$18,300,000 in June lastwas in the vaults and tills of the banks of the United States and \$52,200,000 in circulation outside of banks.

# INDIVIDUAL DEPOSITS IN ALL BANKS IN THE UNITED STATES.

Individual deposits in all reporting banks on or about June 30, 1908, aggregated \$12,784,500,000, for the current year the deposits aggregate \$17,024,000,000, being an increase for the four years of \$4,239,500,000, or over 33 per cent. The increase for the current year over the amount reported in 1911 is \$1,117,700,000, or 7 per cent. Of the aggregate individual deposits in all reporting banks on June 14 last national banks held 34.2 per cent; savings banks, 26.1 per cent; loan and trust companies, 21.6 per cent; State banks, 17.2 per cent; and private banks, 0.9 per cent.

The following table shows the amount and per cent of individual deposits held by the several classes of banks in 1908, 1911, and 1912:

Federal Reserve Bank of St. Louis

From the foregoing it will be noted that the largest percentage of increase during the past year, 10.22 per cent, is shown for the Pacific States. In 1911 the largest percentage of increase was 15.62, in the Southern States. The percentage of increase in deposits during the current year for the other sections is, in the order named, as follows: Middle Western States, 8.73 per cent; Southern States, 7.08 per cent; island possessions, 6.28 per cent; Eastern States, 6.26 per cent; Western States, 6.01 per cent; and New England States, 5.28 per cent.

The largest volume of increase was in the Eastern States, or \$418,000,000, followed by the Middle Western States with \$328,-200,000, the New England States with \$122,900,000, the Pacific States with \$110,600,000, the Southern States with \$90,900,000, the Western States with \$44,600,000, and the island possessions

\$2,500,000.

Since June, 1908, individual deposits held by the banks have increased 33.16 per cent. With the exception of the island possessions, where the increase is shown to be 106.34 per cent, the largest percentage of increase is shown for the Southern States, the gain in deposits for that section during the last four years being 50.38 per cent; next in order are the Pacific States with 41.94 per cent, the Middle Western 36.09 per cent, the Western 32.89 per cent, the Eastern 30.71 per cent, and the New England States 23.11 per cent.

In the following table is shown the classification of individual deposits in banks other than national, in national banks, and in all

banks on June 14, 1912.

Classification of deposits in national and other banks.

Classification.	7,372 national banks.	17,823 State, etc., banks.	Total, 25,195 banks.
Individual deposits subject to check	733, 643, 936, 11 812, 745, 391, 86 85, 228, 860, 85	\$4, 200, 548, 180, 85 15, 762, 548, 771, 49 1, 140, 038, 702, 08 50, 012, 402, 35 45, 458, 386, 76	\$8, 323, 485, 623, 53 1 6, 496, 192, 707, 60 1, 952, 784, 093, 94 135, 241, 263, 20 116, 363, 918, 62
Total	5,825,461,163.36	11, 198, 606, 443. 53	17,024,067,606.89

<sup>&</sup>lt;sup>1</sup> Exclusive of \$284,203,157.82 deposits subject to check without notice, certificates of deposit, certified and cashier's checks reported by savings banks.

From the foregoing it will be noted that of the \$17,024,000,000 on deposit in all reporting banks, over 38 per cent, or \$6,496,000,000, in round amount, consists of savings deposits; \$1,952,000,000 are certificates of deposit (time and demand); and \$8,323,000,000 are commercial deposits, i. e., subject to check without notice.

### SAVINGS DEPOSITS IN ALL BANKS.

Statistics relating to savings deposits are of special interest, by reason of the fact that such deposits are supposed to represent chiefly the accumulations of wage earners and other people of moderate means. Savings deposits in all banks of the country in June last aggregated \$6,496,192,707.60, but if all deposits in the savings banks are termed "savings deposits," this aggregate will be increased to \$6,780,395,865.42, or nearly 40 per cent of all individual deposits

http://fraser.stlouisfed.org/ Federal Reserve Bank of St. Louis held by the banks. These figures measure and prove the increasing

thrift of the American people.

The aggregate deposits in all banks on June 14, 1912, roundly stated, were \$17,024,000,000; of this amount \$6,496,000,000 was reported as savings deposits, the latter sum being exclusive of \$284,200,000 held by savings banks subject to check without notice. Statistics showing the number of savings depositors for the current year are not available, but the information obtained upon this subject in 1911 showed that there were on June 7 of that year over 17,600,000 savings accounts on the books of the various banks of the country.

For the purpose of comparison the following table is presented relating to the classification of deposits in each class of banks as

shown by reports of condition as of June 14, 1912.

Classification of deposits in each class of banks as of June 14, 1912.

A statement showing the aggregate amount of savings deposits held by the banks in each State and geographical division, with the per capita, will be found incorporated with the table of resources and

liabilities on another page.

Grand total.....

By reference to the table in question it will be noted that the largest amount of savings deposits is held by banks in the State of New York, namely, \$1,826,300,000, followed by Massachusetts with \$857,700,000, Pennsylvania with \$598,200,000, and California with \$389,500,000. In the Southern States the Virginia banks hold the largest amount of savings deposits, or \$41,500,000, Louisiana being next with \$29,600,000, Georgia third with \$26,700,000, West Virginia fourth with \$26,500,000, and South Carolina fifth with \$24,800,000. In the Middle Western States Illinois is first with \$323,700,000, Ohio second with \$312,700,000, Michigan third with \$218,000,000, and Iowa fourth with \$128,800,000. In the Western States Nebraska is

first with \$18,300,000, Colorado second with \$18,000,000, and, Montana third with \$7,800,000. In the Pacific States, as has been stated, California leads, while Washington is second with \$44,200,000, Utah third with \$20,600,000, and Oregon fourth with \$16,700,000. There are over \$8,000,000 reported as savings deposits in the island possessions.

The amount of savings deposits per capita for the United States is \$67.77 and for each geographical section is as follows: New England States, \$237; Eastern States, \$129.23; Pacific States, \$82.43; Middle Western States, \$46.13; Southern States, \$9.89; Western States, \$8.56.

STATE, SAVINGS, PRIVATE BANKS, AND LOAN AND TRUST COMPANIES.

Summaries of the reports received for the current year from State, savings, and private banks, and from loan and trust companies show the condition on June 14, 1912, of 17,823 banks other than national. The aggregate resources of these banks are \$14,124,878,897.03. In 1911, 17,115 banks other than national reported, with aggregate resources of \$13,248,034,688.36, or less by 708 in the number of banks, and \$876,844,208.67 in aggregate resources, than in 1912. The returns for the current year include 13,381 commercial banks, 630 mutual savings banks, 1,292 stock savings banks, 1,110 private banks, and 1,410 loan and trust companies. The returns for each class of bank, with the exception of private banks, are practically complete.

The compilations of banking reports as made by the State authorities in a number of States include all classes of incorporated banks under the head of "State banks" and considerable difficulty is experienced by this office in making a proper classification of the trust companies and of the stock savings banks in operation in such States, due to the great confusion in the use of the term "trust company" and "bank" as well as in the use of the term "savings bank." It is claimed that a large percentage of the so-called "trust companies" do only a banking business, and it is known that a large number of the so-called "savings banks" are strictly speaking only commercial banks. In some States, notably California, a system of departmental banks prevails, where any commercial bank may carry on a savings or a trust company business, or both, but each kind of business must be kept separate and distinct. Specific regulations apply to each department.

Where the banking department of a State makes no separate classification, this office has adopted the plan of requesting each bank cashier to designate on his report the class of bank reporting. When this is not done, the proper classification is determined by the character of the business indicated in the report. In this manner it has been possible to make a satisfactory classification of trust companies and of savings banks for States where the law does not provide for a separate classification by the State authorities.

Reports of condition were received from banks, other than national, as of June 14, 1912, with the exception of those in Kentucky as of May 18; Georgia, May 29; Tennessee, June 29, mutual savings banks of Maryland, June 29; Alaska and the island possessions, June 30, and a summary of these reports is presented herewith.

Summary of reports of condition of 17,823 State, savings, private banks, and loan and trust companies in the United States on June 14, 1912.

### STATE BANKS.

Reports from State (commercial) banks to the number of 13,381 show capital of \$459,067,206.81 and aggregate resources of \$3,897,770,826.71.

A summary of the reports submitted by the State banks shows, in round amounts, loans aggregating \$2,549,300,000; investments in bonds, securities, etc., \$341,700,000; cash on hand, \$241,700,000, being 8.27 per cent of individual deposits; capital, \$459,000,000; surplus and undivided profits, \$271,300,000, and individual deposits, \$2,919,900,000. Of the loans, \$572,900,000 are reported as secured by real estate, including mortgages owned, and \$563,900,000 as secured by collateral other than real estate. The investments in bonds, securities, etc., consist of \$4,330,000 United States bonds, \$81,967,000 State, county, and municipal bonds, \$71,549,000 railroad bonds, \$53,609,000 bonds of other public-service corporations, and \$130,339,000 unclassified. The individual deposits were classified as follows: Deposits subject to check without notice, \$1,609,117,069.91; savings deposits, \$657,477,220.31; certificates of deposit (time and demand), \$610,207,548.25; certified checks, \$32,254,762.10; and cashier's checks outstanding, \$10,921,297.42.

#### SAVINGS BANKS.

Savings bank reports to the number of 1,922 have been tabulated, 630 being from mutual institutions and 1,292 from stock savings banks—the latter class transacting both a savings and a commercial business. Deposits in these banks aggregate \$4,451,818,522.88, including \$262,835.16, reported by stock savings banks as dividends unpaid, and the depositors number 10,010,304, the average deposit account being \$444.72. Savings banks reporting in June, 1911, numbered 1,884, with deposits of \$4,212,583,598 to the credit of 9,794,647 depositors, the average deposit account being \$430.09. While there has been an increase of only 38 in the number of banks reporting, deposits have increased by \$239,234,924 and depositors by 215,657, the increase in the average deposit account being \$14.63.

The following table shows the number of savings depositors, aggregate savings deposits, and average amount due depositors in savings

banks in each State on June 7, 1911, and June 14, 1912. figures do not include the amount of savings deposits in savings departments of the State banks of Illinois, as this information is shown in the statement for commercial banks in another table.

Number of savings depositors, aggregate savings deposits, and average amount due to each depositor in savings banks (mutual and stock savings) in each State in 1911 and 1912.

Note 1.—The compilation for 1911 includes statements as of June 7, from 635 mutual savings banks and 1,249 stock savings banks. Many of the stock savings banks receive commercial deposits and included with the figures for 1911 are \$105,200,096.30 reported as subject to check without notice in such banks to the credit of 362,820 depositors. Depositors in the following number of banks for the States named have been estimated: 1 bank each in Maryland and Washington, 2 in Mississippi, 3 each in North Carolina, Georgia, and Ohio, 8 in Tennessee, and 128 in Iowa.

Note 2.—The compilation for 1912 includes statements as of June 14, from 630 mutual savings banks and 1,292 stock savings banks. Many of the stock savings banks receive commercial deposits, and included with the figures for such banks for 1912 are \$178,127,748.36 reported as subject to check without notice to the credit of 412,512 depositors. Savings bank reports from Maryland as of June 29, Georgia May 29, and Kentucky May 18. Depositors in the following number of banks for the States named have been estimated: 1 in North Carolina; 1 in Nebraska, 2 in Mississippi, 2 in Tennessee, 4 in Georgia, 6 in Kentucky, and 131 in Iowa. Deposits include \$262,835.16 as "dividends unpaid" by stock savings banks.

The growth of savings banks in the United States from 1820 to 1912, as evidenced by the amount of deposits, number of depositors, average deposit account, and the average per capita in census years from 1820 to 1890 and annually thereafter, is shown in the following table:

Number of savings banks in the United States, number of depositors, amount of savings deposits, average amount due each depositor in the years 1820, 1825, 1830, 1835, 1840, and 1845 to 1912, and average per capita in the United States in the years given.

<sup>&</sup>lt;sup>1</sup> Population estimated at 95,656,000 July 1, 1912.

In the figures for 1896 to 1908, inclusive, but not subsequently, are the number of depositors and amount of deposits in the State banks of Illinois having savings departments, but not the number of such banks, by reason of the fact that general returns from these institutions are incorporated in State-bank returns.

The increase in aggregate deposits in savings banks since the fiscal year ended June 30, 1908, has been over \$791,000,000, or more than 21 per cent, the deposits in 1908 being \$3,660,000,000, and for the present year, \$4,451,000,000. During the same period the number

of depositors has increased from 8,705,848 to 10,010,304, or a gain of 1,304,456. Since 1899 the amount of deposits in savings banks has nearly doubled and the number of depositors has increased by over 76 per cent.

### MUTUAL SAVINGS BANKS.

Mutual savings banks are confined chiefly to the manufacturing centers of the New England and Eastern States, there being only 21 institutions of this character in operation in other sections of the country, namely, 1 in West Virginia, 3 in Ohio, 5 in Indiana, 3 in Wisconsin, 8 in Minnesota, and 1 in California. As this class of banks do practically no commercial business, the accumulation of deposits may serve as a gauge of the thrift of wage earners of the sections where located.

The deposits of the 630 mutual savings banks reporting as of June 14, 1912, aggregated \$3,608,657,828.11 and the number of depositors 7,851,377. On June 7, 1911, 635 mutual savings banks reported deposits aggregating \$3,460,575,072.17 the depositors numbering 7,690,973. The gain during the past year is shown to be \$148,082,755.94 in deposits and 160,404 in the number of depositors. The average deposit account in 1911 was \$449.95, and for the current year it is \$459.62.

Total resources of mutual savings banks increased from \$3,762,-401,625.61 in 1911 to \$3,929,091,986.91, a gain of \$166,690,361.30. It will be of interest to note how the vast sum representing the resources of these institutions is invested. Loans aggregate \$1,920,-256,975.33; bonds, securities, etc., \$1,778,042,428.09; banking house and other real estate owned, \$47,608,339.49; due from banks, \$150,-482,502.86; cash items, \$1,006,619.39; cash on hand, \$16,186,061.29; and miscellaneous items of resources, \$15,509,060.46. The loans secured by real estate aggregate \$1,707,753,988.86; secured by collateral other than real estate, \$135,954,574.49; and not classified, **\$76**,548,411.98. There has been a gain of \$110,576,760.38, or 6.11 per cent, in loans during the year. Investments have increased in the sum of \$62,525,711.68, or 3.64 per cent. The character of the investments follows: United States bonds, including premium, \$19,891,167.12; State, county, and municipal bonds, \$733,405,351.66; railroad bonds, \$770,722,277.18; bonds of other public service corporations, \$110,639,920.26; other bonds, stocks, etc., \$143,383,711.87.

Compared with the figures for 1911, there appears to be a decrease stated roundly of over \$20,400,000 in the State, county, and municipal bonds held and of over \$10,800,000 in railroad bonds held, but an increase of \$7,676,000 in United States bonds, \$18,194,000 in bonds of other public-service corporations, and \$68,000,000 in bonds not classified. There has been a slight increase during the year—\$394,414—in the amount of cash holdings, but the percentage of cash held to deposits is less, being 0.448 per cent against 0.456 per cent last year.

Mutual savings banks on June 7, 1911, had on deposit with other banks \$154,773,302.26. For the current year the amount so reported is \$150,482,502.86, a decrease of \$4,290,799.40. Banking house, furniture, and fixtures, together with other real estate owned, increased from \$45,472,487.08 in 1911 to \$47,608,339.49, thus showing a gain of \$2,135,852.41 in this class of assets. Over 45 per cent of the aggregate deposits in mutual savings banks is held by 140 mutual

savings banks located in New York State, the deposits in mutual savings banks of this State being \$1,633,495,812.16. During the year over \$72,000,000 has been added to deposits in mutual savings banks of this State, and there has been a net gain of 67,096 in the

number of depositors, which now number 3,024,746.

Reports from 193 Massachusetts mutual savings banks show a gain during the year of \$32,845,000 in deposits and 41,135 in the number of depositors. Other notable gains during the year are shown in the statistics for Connecticut and Pennsylvania mutual savings banks. In Connecticut the gain was \$10,700,000 in deposits and 8,185 in depositors; in Pennsylvania an increase of \$9,600,000 is shown in deposits and 5,404 in depositors.

There are 3,447,299 depositors in mutual savings banks of the New England States, with deposits of \$1,420,529,756, and 4,069,984 in the Eastern States, with deposits aggregating \$2,039,295,241. In the other States where mutual savings banks are in operation the

depositors aggregate 334,094, and the deposits \$148,832,830.

The following table shows the number of depositors in mutual savings banks, the aggregate savings deposits, and average amount due depositors in the States indicated, on June 7, 1911, and June 14, 1912.

Number of mutual savings banks, number of depositors, aggregate deposits, and average deposit account by States, June 7, 1911, and June 14, 1912.

Reports from 2 banks received December 3, too late to include in this table.
 Reports as of June 29.

The average rate of interest paid to depositors in mutual savings banks for 1912 is 3.90 per cent; the average rate for 1911 was 3.95 per cent. The average rate in the New England States is 3.87 per cent, against an average of 3.82 per cent in 1911. In the Eastern States it is 3.70 per cent, or the same as in 1911. In the Middle Western States it is 3.73 per cent, against 3.72 per cent in 1911. The one savings bank reporting from the Pacific States pays an average of 3.75 per cent against 4 per cent in 1911, and the one reporting from the Southern States 4.50 per cent, being the same rate reported last year.

## STOCK SAVINGS BANKS.

Stock savings banks to the number of 1,292 furnished reports as of June 14, 1912. The term "savings bank" as applied to banks in some of the States, as before indicated, is somewhat misleading, as a large number of so-called savings banks transact chiefly a commercial business and carry very few savings accounts. In those States where savings-bank reports are not separately compiled by the banking department, but are classified with commercial banks, great care has been exercised in eliminating from the classification made by this office all so-called savings banks which are chiefly banks of discount and deposit, transacting only a minimum of savings-bank business. Some difficulty is experienced in making the classification uniform throughout, but this difficulty can not be entirely overcome until the State banking departments of every State shall make a separate classification of reports for this class of banks.

The reporting stock savings banks are located as follows: 8 in New Hampshire, known as guaranty savings banks; 44 in the Eastern States; 178 in the Southern States; 833 in the Middle Western States; 58 in the Western States; and 171 in the Pacific States. Of the total number of stock savings banks reporting, 728 are located in the State of Iowa and 131 in California. While there are a large number of so-called savings banks in Michigan, only 25, indicating by their reports only a minimum amount of commercial-bank business, are included in this classification, and while a large number of commercial banks in Ohio use the word "savings" in their title, for the

same reason only 60 have been classified with savings banks.

The capital of the 1,292 reporting stock savings banks amounts to \$76,871,811.79. Their loans aggregate \$669,246,257.55, and are classified as follows:

Secured by real estate, including mortgages owned	\$379, 923, 689, 04
Secured by collateral other than real estate	104, 518, 332, 28
All other loans, including overdrafts	184, 804, 236. 2 <b>3</b>

Investments in bonds, securities, etc., including premiums, are as follows:

United States bonds	\$9, 139, 971. 33
State, county, and municipal bonds	43, 025, 789, 09
Railroad bonds	23, 360, 728, 40
	32, 925, 345, 34
Other stocks, bonds, etc.	36, 425, 900. 97

In addition to the foregoing, the summary of reports shows cash in bank \$29,266,002.56, or 3.47 per cent of deposits. The individual deposits aggregate \$842,897,859.61, of which \$574,822,459.57 are reported as savings deposits, \$178,127,748.36 as commercial deposits, or subject to check without notice; \$87,099,928.02 as certificates of deposit (time and demand); \$795,385.48 as certified checks, and \$2,052,338.18 as cashiers' checks outstanding.

The depositors in stock savings banks number 2,158,927, of which 1,746,415 are savings depositors and 412,512 have commercial accounts. In arriving at the number of depositors those in 142

banks have been estimated.

The rate of interest paid to depositors in all stock savings banks ranges from 3.03 to 3.64 per cent, the lower rate being for deposits not subject to restrictions as to withdrawal. Four per cent is the average rate of interest paid on savings deposits by stock savings banks reporting from nine States, while in five States the average is above this rate. The average rate paid on savings deposits by stock savings banks in North Dakota (two banks only) is 5 per cent; in New Mexico, 4.50 per cent; in Idaho, 4.25 per cent; in Georgia, 4.15 per cent; in South Carolina, 4.08 per cent; and in the State of Washington, 4.05 per cent. The lowest average rate is paid by the stock savings banks in Wisconsin, being 2.94 per cent, the next lowest rate, 3 per cent, being the average paid by the savings banks in the

District of Columbia, Kentucky, and Kansas.

Geographically stated, the eight stock savings banks reporting from the New England States pay an average of 3.37 per cent on savings deposits, and the same average rate is paid in the Eastern States. In the Southern States the average rate is 3.76 per cent, in the Middle Western States 3.50 per cent, in the Western States 3.90 per cent, and in the Pacific States 3.98 per cent. The average rate reported for the New England, Eastern, and Southern States ranges lower than the rates reported for 1911, while for the Middle Western, Western, and Pacific States the rates appear to average higher. The interest paid on savings deposits by stock savings banks in the New England States in 1911 averaged 3.43 per cent; Eastern States, 3.40 per cent; Southern States, 3.78 per cent; Middle Western States, 3.39 per cent; Western States, 3.73 per cent; and Pacific States, 3.95 per cent; the average for the country that year being 3.61 per cent.

## PRIVATE BANKS.

It is estimated that there are over 4,000 private banking concerns and brokerage houses in the country, but less than one-third of this number furnish reports for statistical purposes. Private banks appear to be most numerous in the Middle Western States and nearly 74 per cent of those reporting are located in that section. were received from 820 private banks in the Middle Western States, 92 from the Southern States, 78 from the Western States, 93 from the Eastern States, and 27 from the Pacific States. Two hundred and fifty-nine reported from Illinois, 194 from Indiana, 149 from Ohio, and 107 from Iowa, less than 100 reporting from each of the other States.

The capital of the 1,110 private banks from which reports were obtained aggregates \$22,348,040.33. For 1911, reports from 1,116 private banks, with capital of \$21,872,416.34 were obtained. The statistics show an increase of \$475,623.99 in capital, but a decrease

of 6 in the number of banks reporting.

The principal items of resources and liabilities of the reporting private banks are as follows: Loans and discounts, \$129,784,262.65; bonds, securities, etc., \$13,745,669.14; cash on hand, \$7,450,404.38, being 4.88 per cent of individual deposits; capital, \$22,348,040.33; surplus and undivided profits, \$13,584,315.29; individual deposits, \$152,494,618.90; aggregate liabilities, \$196,940,397.42.

A recent legislative enactment in New York requires private banks to make reports, and through the courtesy of the State banking department 50 reports from this class of banks in operation in that State are incorporated in the statistics for private banks for the current year against only 13 New York private banks reporting to this

office in 1911.

## LOAN AND TRUST COMPANIES.

A number of so-called loan and trust companies in several of the States are nothing more than commercial banks which transact no trust business, being permitted, in anticipation of opening a trust department, to use the word "trust" in their corporate names. So far as possible the reports of such concerns are excluded from the compilations which follow, being included with the statistics for commercial banks.

Reports as of June 14, 1912, with the exception of those from Kentucky and Georgia as of May 18 and May 29, respectively, were received from 1,410 loan and trust companies with aggregate resources of \$5,107,444,382.27. For June 7, 1911, reports were received from 1,251 loan and trust companies, with aggregate resources of \$4,665,-110,868.71, being less by 159 in the number of reporting companies and \$442,333,513.56 in resources than in 1912. Of the institutions of this character, 181, with aggregate resources of \$605,038,656.95, are located in the New England States; 494, with \$2,958,853,674.66, in the Eastern States; 271, with \$251,940,932.45, in the Southern States; 320, with \$1,180,004,504.57, in the Middle Western States; 70, with \$45,886,216.87, in the Western States; and 74, with \$65,720,396.77, in the Pacific States.

Pennsylvania has the largest number of loan and trust companies, 278 being the number reporting from that State for the current year; Indiana is second with 119, New Jersey third with 95, New York being fourth with 81. The aggregate resources of the loan and trust companies of New York, however, are largely in excess of the amount shown for any other State or geographical section, being \$1,821,-889,070; next in order as to aggregate resources is Pennsylvania, with \$750,696,432.06, Illinois being third with \$578,494,072.32, and Massachusetts fourth with \$347,376,909.64. In capitalization Pennsylvania comes first with \$97,140,816, New York second with \$72,-025,000, Illinois third with \$39,225,000, and Massachusetts fourth with \$23,162,000.

The loans and discounts of loan and trust companies aggregate \$2,711,241,748.18, classified as follows: Loans on real estate, including mortgages owned, \$526,509,702.69; loans on other collateral security, \$1,279,983,539.16; unclassified, \$904,748,506.33, of which \$4,397,620.37 are overdrafts. The investments in bonds, securities, Digitized for FRASER

etc., aggregate \$1,219,139,445.41, including premiums thereon, classified as follows: United States bonds, \$5,985,094.59; State, county, and municipal bonds, \$202,293,176.75; railroad bonds, \$380,190,967.79; bonds of other public service corporations, \$208,673,579.15; all other bonds, stocks, etc., \$421,996,627.13. The capital of reporting loan and trust companies amounts to \$418,985,771.77; surplus and profits, \$560,741,978.47; and individual deposits, \$3,674,578,238.92. Of the individual deposits, \$910,850,167.60 are reported as savings accounts and \$395,983,407.02 as certificates of deposit. Deposits subject to check amount to \$2,319,055,959.95, and certified and cashiers' checks \$48,688,694.35.

Comparing the foregoing statistics with those submitted for 1911, loans show an increase of \$281,820,666.88; investments in bonds, securities, etc., \$104,360,758.35; cash on hand, \$12,325,897.03; capital, \$33,202,838.33; surplus and profits, \$21,871,525.67; and individual deposits, \$378,722,343.65. The amount of cash on hand is \$282,151,463.26, being 7.67 per cent of individual deposits. This is slightly less than the cash reserve held in 1911, when the proportion

of cash to individual deposits was 8.18 per cent.

Since 1908 there has been an increase of 568 in the number of reporting loan and trust companies, the number reporting in that year being 842. During this period the capital stock has increased by 50 per cent, while individual deposits have increased by over 96 per cent and aggregate resources by over 78 per cent.

# BANKS AND BANKING IN THE DISTRICT OF COLUMBIA.

In addition to national banks and the loan and trust companies, organized under authority of the act of 1890, the act of June 25, 1906, places under the supervision of the Comptroller of the Currency all other banking institutions organized under authority of any act of Congress to do business in the District of Columbia, or organized by virtue of the laws of any of the States of the Union and having an office or banking house located within the District of Columbia where deposits or savings are received. The supervision in question extends to the requirements applicable to national banks with respect to reports of condition, earnings and dividends, and examinations. It is further provided that the comptroller shall have power when, in his opinion, it is necessary, to take possession of any such banking institution for the reason and in the manner and to the same extent as are provided in the laws of the United States with respect to national banks.

Including 1 savings bank recently opened, but from which no report has been received, there are 50 banking institutions in the District of Columbia, consisting of 11 national banks, 6 trust companies, 13 savings banks, and 20 building and loan associations. The aggregate capital of these banking institutions on September 4 was \$16,021,876, an increase during the year of \$305,196. The total individual deposits were \$82,217,460, an increase of \$6,021,508.

The number, capital, individual deposits, and aggregate resources of each class of financial institutions doing business in the District of Columbia on September 4, 1912, are shown in the following table:

Classification.	Number.	Capital.	Individual deposits.	Aggregate resources.

<sup>1</sup> Statement of July 1.

# BANKS AND BANKING IN THE ISLAND POSSESSIONS.

Banking institutions reporting from the island possessions number 35, four of which are national associations located in Hawaii. The banking resources of Porto Rico, Hawaii, and the Philippines now aggregate \$75,899,602.94, as shown by reports submitted as of June 30, 1912.

The capital of the 35 banks from which reports have been received aggregates \$8,201,400.72; loans, \$38,476,733.23; investments in bonds, securities, etc., \$7,116,294.55; amount due from other banks and branches, \$13,512,008.06, and cash on hand, \$9,114,350.02. The surplus and undivided profits amount to \$3,887,072.92; amount due to other banks and branches, \$8,980,408.51, individual deposits, \$42,283,048.18, and unclassified liabilities, including circulating notes outstanding, deposits in effects, etc., are stated at \$12,019,673.59.

### PHILIPPINES.

Through the courtesy of the Bureau of Insular Affairs, War Department, reports of condition as of June 30, 1912, have been received from the following named banks in operation in the Philippine Islands: Hongkong & Shanghai Banking Corporation, at Manila, with branch at Iloilo; Chartered Bank of India, Australia, and China, at Manila, with branches at Cebu and Iloilo; International Banking Corporation, at Manila, with branch at Cebu; Agricultural Bank of the Philippine Government, at Manila; Banco de las Islas Filipinas, at Manila; Monte de Piedad and Savings Bank, at Manila; Bank of the Philippine Islands (Yamboanga Branch); and Secursal del Banco de las Islas Filipinas, at Iloilo.

The principal items of resources and liabilities of these 12 banking

institutions are as follows:

### RESOURCES.

Capital	\$3,092,500,00
Surplus and undivided profits	1, 309, 265, 99
Due to banks	805, 714. 25
Individual deposits	17,068,921.15
Aggregate liabilities	23, 320, 500. 85

# PORTO RICO.

Through the courtesy of the Bureau of Insular Affairs, War Department, it is possible to present returns for the current year from 11 banking institutions in operation in the island of Porto Rico.

The banks furnishing reports are as follows: American Colonial Bank of Porto Rico, Banco de Puerto Rico, Banco Territorial y Agricola de Puerto Rico, Agency of the Bank of Nova Scotia, Banco Popular de Economias y Prestamos, Caja de Economias y Prestamos—all located at San Juan; Credito y Ahorro Ponceno, at Ponce; Caja Popular de Ahorros y Prestamos, at San German; Caja de Economias y Prestamos, at Cabo Roja, Credito y Ahorro Popular, at Yauco, and a consolidated statement of the branches of the Royal Bank of Canada at San Juan, Ponce, and Mayaguez.

A summary of the resources and liabilities of these banking institutions as of June 30, 1912, is as follows:

### RESOURCES.

Loans. Bonds, securities, etc. Real estate and furniture and fixtures Due from banks. Checks and other cash items. Cash on hand. Other resources.	2, 017, 697. 69 396, 845. 27 3, 355, 216. 67 538, 908. 37 2, 107, 191. 34

# STATE AND PRIVATE BANK FAILURES.

No statistics are at command in relation to the settlement of the affairs of insolvent State and private banks, but through the instrumentality of the Bradstreet Commercial Agency information is obtainable with respect to the number of banks of each class closed and the amount of assets and liabilities at date of closing.

In the year ended June 30, 1912, 55 institutions of this character were closed, the nominal assets at the date of failure being \$7,797,401 and the liabilities \$12,838,837. Included in the list of failures are 29

Digitized for FRASER

State banks, with assets of \$2,328,717 and liabilities of \$3,128,993; 1 savings bank, assets \$40,000, liabilities \$66,516; 4 trust companies, assets \$2,451,925, liabilities \$4,304,590; and 21 private banks, with assets of \$2,976,756 and liabilities of \$5,338,738.

For the period beginning with 1864 and terminating in 1896, as a result of special efforts, information was obtained in relation to the settlement of the affairs of State and private banks closed during that time, from which it would appear that creditors received on an average approximately 45 per cent on their claims. Since 1896 no figures have been secured relating to the settlement of the affairs of banks of this character, but there have been reported from year to year the number of failures, with the assets and liabilities at date of failure, which are summarized in the following table:

Number of failures, capital, assets, liabilities, and dividends paid by State and private banks that failed in each year from 1864 to 1912.

Year.	Number of failures.	Capital.	Nominal assets.	Liabilities.	Dividends paid.
1864	2				
1865	2 5	\$125,000.00	\$245,401.97	\$225,662,14	\$145,592.

# BUILDING AND LOAN ASSOCIATIONS IN THE DISTRICT OF COLUMBIA.

Building and loan associations in operation in the District of Columbia, and which were placed under the supervision of the Comptroller of the Currency by the act of March 4, 1909, have shown a steady increase in business from that date, as indicated by the volume of loans, installment payments on shares, and aggregate resources, as is shown in the following table:

Years.	Number of associa- tions.	Loans.	Installments on shares.	Aggregate resources,
June 30, 1909. June 30, 1910. June 30, 1911. June 30, 1912.	19 19	\$13,511,587 14,415,832 14,965,220 16,004,760	\$11,996,357 13,213,644 13,324,217 14,529,977	\$14, 393, 927 15, 250, 731 16, 017, 465 17, 160, 293

These institutions are required to make semiannual reports and are

subject to periodical examinations.

The total number of shares issued by these associations is stated at 345,655, of which 129,680 were in force on June 30, 1912. The membership is reported at 31,793, of whom 8,142 are borrowing and 23,648 nonborrowing members. The installment payments for one association are \$2.50 per month; one, \$2; one, \$1.50, and the remaining \$1 per share.

# BUILDING AND LOAN ASSOCIATIONS IN THE UNITED STATES.

Statistics relating to building and loan associations in the United States for the year 1911, obtained through the courtesy of Mr. H. F. Cellarius, secretary of the United States League of Local Building and Loan Associations, show the existence of 6,113 associations on January 1, 1912, with a membership of 2,355,066, and assets aggregating \$1,040,307,717.

It appears that there has been an increase of 176 in the number of associations, 138,154 in membership, and \$94,738,806 in assets. The greatest increase in assets is shown to be in Ohio, \$16,683,596. Pennsylvania is second with an increase of \$15,937,912, followed by New Jersey with \$9,846,268, Massachusetts with \$6,074,542, Illinois with \$5,775,097, Indiana with \$5,643,806, and Nebraska, \$3,557,519.

In the tables following are shown, by States, the number of building and loan associations, their membership, total assets, and changes in assets and membership, during the year, together with a statement of the receipts and disbursements of the associations for the year ended December 31, 1911.

Number of associations, membership, and assets of the building and loan associations of the United States Dec. 31, 1911.

# SCHOOL SAVINGS BANKS.

The school savings bank system was first established in the United States by the late J. H. Thiry, principal of the public schools in Long Island City, N. Y., and Mr. Thiry is known as the author of thrift teaching in our public schools. Since the first school savings bank was established in 1885, hundreds of public schools throughout the country have adopted some system of teaching the children to save. Massachusetts has a law making thrift teaching obligatory, New York has a similar law pending, and other States favor such legislation. Mrs. S. L. Oberholtzer, of Philadelphia, has undertaken to continue the work begun by Mr. Thiry of collecting statistics

<sup>2</sup> Reports issued biennially; figures for 1910 used.

relating to this class of banks, and through her courtesy the comptroller is enabled to present the latest statistical data showing the

growth of the school savings bank system in this country.

The following statement shows the number of school savings banks in the United States on or about January 1, 1912, together with the number of depositors and balance due depositors, arranged by geographical sections:

### SAVINGS BANKS IN FOREIGN COUNTRIES.

Through the cooperation of the Bureau of Foreign and Domestic. Commerce, Department of Commerce and Labor, the comptroller is enabled to present the latest available statistics in relation to the number of depositors and volume of deposits in the various classes of savings banks in the foreign countries.

The first table following is a consolidated statement relating to all foreign savings banks, and the second is confined to postal savings banks, showing returns for the current year and 10 years prior. As will be noted, the United Kingdom, the country in which the postal savings bank system had its practical origin, leads all other countries in the volume of deposits and number of depositors.

The tables in question follow.

[Compiled by the Bureau of Foreign and Domestic Commerce, Department of Commerce and Labor, from the official reports of the respective countries.]

<sup>1</sup> Includes 38,958 depositors in school savings depositories, credited with \$105,060. The above total is exclusive of \$162,185,345 worth of securities held by the savings banks to the credit of depositors.

Exclusive of Government stock held for depositors, which, at the end of the year, amounted to \$120,776,096 in the postal savings banks and to \$12,934,743 in the trustee savings banks.

The peseta has been converted at the rate of 18 cents. Data taken from "España Económica y Financiera," Oct. 21, 1911. Exclusive of data for savings departments of commercial banks, which comprised 124,657 accounts credited with \$28,588,964 on Dec. 31, 1910.

<sup>4</sup> Exclusive of the population of the feudatory States.

Exclusive of data for special private savings banks which, on June 30, 1912, held deposits amounting to \$40,828,420. The above total does not include the savings deposits in chartered banks ("Deposits payable after notice or on a fixed day"), which, on June 30, 1912, amounted to \$631,317,687.

Number of offices, 12,823.

Comparative statement relative to number of depositors, amount of deposits, and average deposit in postal savings banks.

# INSTRUMENTS OF CREDIT.

The extent to which checks, drafts, and other instruments of credit are used in daily business transactions has been the subject of various investigations, and which have been analyzed in detail in the reports issued for the years covering the investigations made. As the question is frequently raised as to the relative use of instruments of credit, there appears in the appendix to this report a table showing for two dates in 1881 and 1890, and one date in 1892, 1894, 1896, and 1909, the percentage of receipts of each kind of currency, as well as the percentage of checks, drafts, and clearing-house exchanges, etc. The fact is generally recognized that over 90 per cent of the daily transactions are effected through the medium of instruments of The reports received for June 30, 1881, indicate a percentage of instruments of credit of 95.10; on September 17 of that year of 94.10, while on July 1 and September 17, 1890, the percentages were 92.5 and 91 respectively. The returns for September 15, 1892, show a percentage of 90.6. On July 1, 1896, and March 16, 1909, the returns included a limited number of banks other than national, and the percentages in those years were 92.6 and 94.1, respectively. special investigation was made for May 15, 1894, but was confined to national banks and their transactions with retail merchants. Only about two-thirds of the national banks then in existence made the report in question. The returns necessarily indicated the use of a larger proportion of cash to total transactions than the returns for other periods. On the date in question it appears that 41.1 per cent of the transactions were effected in cash and 58.9 per cent in checks, etc.

### NATIONAL CURRENCY ASSOCIATIONS.

Under authority of the act of May 30, 1908, providing for the issue of "additional currency" secured otherwise than by United States bonds, 18 national currency associations have been formed, all of which, with the exception of the Los Angeles association, were formed prior to the current year. Each association has an aggregate capital and surplus of at least \$5,000,000, and is composed of at least 10 national banks having an unimpaired capital and an unimpaired surplus of not less than 20 per cent of the capital, and having United

States bonds on deposit to secure circulation to the extent of at least 40 per cent of its capital. There are 286 national banks forming these 18 national currency associations, their capital aggregating \$321,105,710 and surplus \$281,544,722. The capital represented is slightly in excess of 30 per cent of the paid-in capital stock of all national banks, as shown by the reports for September 4 last.

The title, membership, capital, and surplus of each of the associa-

tions are shown in the following table:

# National currency associations.

# CLEARING-HOUSE TRANSACTIONS.

Data relating to the transactions of the clearing houses of the country are assembled by the manager of the New York Clearing House, and through the courtesy of that officer it is possible to present in this report a comparative statement of the volume of exchanges for the year ended September 30, 1912, of the 151 clearing houses in the United States. The volume of transactions for the current year was \$168,506,362,000, as compared with \$159,508,005,000 for 1911, the net increase being \$8,998,357,000. Gains are shown in the returns from 125 associations and losses in 26. The 15 associations showing transactions in excess of \$1,000,000,000 are the following: New York, Chicago, Boston, Philadelphia, St. Louis, Pittsburgh, San Francisco, Baltimore, Cincinnati, Kansas City, Mo.; Minneapolis, Cleveland, New Orleans, Detroit, and Los Angeles. By reason of consolidations, the number of bank members of the

By reason of consolidations, the number of bank members of the New York Clearing House has decreased from 67 in 1911 to 65 in 1912, although the capital increased from \$170,275,000 to \$174,275,000. The New York exchanges in 1911 aggregated \$92,420,120,000, and in 1912, \$96,672,301,000. Balances paid in currency in 1911 total \$4,388,563,113, and in 1912, \$5,051,262,292. In 1911, 85.5 per cent of the balances were settled in gold and 14.5 per cent in other currency, while in 1912 the percentages were 75.4 and 24.6. The

average daily clearings of the New York association were \$305,016,898

in 1911, and \$319,050,498 in 1912.

Transactions of the Assistant Treasurer of the United States at New York with the clearing house for the year ended September 30, 1912, were as follows:

Exchanges received from the clearing house	\$733, 715, 901
Balances received	
Exchanges delivered to the clearing house	775, 511, 350
Balances paid to the clearing house	77, 662, 898

Since September, 1902, the membership of the New York association has increased from 60 to 65, the capital from \$100,672,700 to \$174,275,000, and the clearings from \$74,753,000,000 to \$96,672,000,000. This association made its first report in 1854, at which time the membership was 50, the capital \$47,044,900, and the clearings for that year \$5,750,455,987. The relatively small amount of clearings paid in money is shown in the table covering the transactions of this association annually from 1854 to 1912, and is stated at an average of 4.63 per cent.

# DIGEST OF NATIONAL-BANK DECISIONS.

During the past year there have been two decisions, one by the Supreme Court of the United States (Thomas v. Taylor, 224 U. S., 73), and one by the United States Circuit Court of Appeals (Chesbrough et al. v. Woodworth, 195 Fed. Rep., 875), bearing on the liability of directors for damages sustained by parties who purchase stock in banks, relying on the published reports of condition of said banks, the reports of condition in each instance being false and large amounts of worthless assets being carried at full value on the books of the bank and shown as such in the reports of condition.

In the case of Thomas v. Taylor it is stated by the court that prior to March 1, 1904, the Comptroller of the Currency had informed the directors of the bank by letter that certain specified assets, amounting to \$194,107.02, must be regarded as doubtful and that immediate steps should be taken for their collection or removal from the bank, and that the directors had knowledge of such letter. Nevertheless, on April 8, 1904, pursuant to a call of the comptroller, a report of the condition of the bank at the close of business on March 28, 1904, made in regular form and attested to be correct by each of the defendants, was published as required by law. In this report was included as a part of the resources of the bank the doubtful assets to which the attention of the directors had been called by the comptroller. report also stated that the capital stock of the bank was \$100,000, that there was a surplus of \$50,000, and that there were undivided profits of \$13,456.75; thus making the book value of the stock a little The plaintiff in the case knew of the contents of this published report and relying on it he purchased 30 shares of the stock in June, 1904, for the sum of \$4,800, approximately its book value as shown by the report of condition.

On June 27, 1904, the comptroller notified the bank that its capital had become totally impaired and levied an assessment of 100 per cent to make good said impairment, and the plaintiff in the case was compelled to pay \$3,000 on account of the stock he had recently purchased.

Federal Reserve Bank of St. Louis

The plaintiff in error contended that the statement was not voluntary, having been made under command of the national banking act, and therefore an element of the action of deceit was wanting, and that such act requires "proof of something more than mere negligence and recklessness. Nothing short of an intentional violation will suffice."

The Supreme Court, in referring to this contention, stated that "there is in effect an intentional violation of the statute when one deliberately refuses to examine that which it is his duty to examine. And such was the conduct of plaintiffs in error in this case. They had notice from the Comptroller of the Currency that \$194,000 of the items counted as assets of the bank were doubtful and should be collected or charged off. This was a direct warning to them by the bank examiner and the comptroller that assets of nearly twice the amount of the capital stock were considered doubtful. They, notwithstanding, represented the assets to be good. Such disregard of the direction of the officers appointed by the law to examine the affairs of the bank is a violation of the law. Their directions must be observed. Their functions and authority can not be preserved otherwise and be exercised to save the banks from disaster and the public who deal with

them and support them from deception."

In the case of Chesbrough et al. v. Woodworth the United States circuit court of appeals held that the making and publishing by a national bank of the reports required by statute are not merely for the information of the comptroller, but to guide so much of the public as may have occasion to act thereon, and one who buys from another stock in a bank in reliance on a false report of its condition and suffers damages thereby has a right of action against any officer or director who, knowing its falsity, authorized such report, under Revised Statutes, section 5239, which makes them individually liable for damages sustained by the association, its stockholders, or any other person. The court further held that the damages in such a case were personal with the plaintiff who sues in his own individual right and not in that of the association, and that the action against the directors involves no direct issue of negligence, the primary issue being whether the defendant caused or permitted to be made a statement of the bank's condition on which plaintiff relied to his injury, and which statement the defendant knew was materially false. The liability of the directors was held to be several; the plaintiff could sue one or more and must make out a sufficient case against each one to authorize a recovery against him.

In a case where the falsity of the statement consisted in including worthless assets in the loans and discounts, and the making and publishing of the statement in such case was merely the automatic result of the bookkeeping, the publishing of the statement did not constitute the underlying wrong, and any director who participated in or approved the continued carrying on the books of such paper as assets at its face value to an amount sufficient to affect the standing of the bank, and knowing its worthlessness, is bound to know under the prevailing practice that the statements will be substantially false, is responsible therefor. While the duty of charging off such worthless paper is that of the board of directors as an entity, and in such matters the board has a reasonable discretion, when the duty exists and is wholly unperformed an individual director may be personally liable

Digitized for FRASER

because of his participation in the failure to act by failing to make reasonable personal efforts to induce the proper action. The general rule of damages in action of deceit that one induced by false representations to purchase property at more than its value is entitled to recover the difference between what the property was actually worth and what it would have been worth if the representations had been true, not exceeding the sum paid, is not applicable to an action against directors of a national bank under Revised Statutes 5239 by one who purchased stock of the bank in reliance on published statements of its condition which were false in that they included as assets a large amount of worthless paper, since under such section defendants are liable only for knowing violations of the law. In such a case the measure of plaintiff's recovery is the difference in the fair market value of his stock if all the paper had been of a character entitling it to be reported as assets, and that sum which would have been its fair market value if the directors in the exercise of due care and good faith had charged worthless paper off the books and not reported it as collectible.

In the appendix to this report will be found a supplement to the last digest of decisions of national-bank cases, including all decisions in 224 United States Reports and 199 Federal Reporter.

# EXAMINATIONS BY DIRECTORS' COMMITTEES.

Realizing that the most effective efforts to improve the condition of national banks as a whole must come from the management, the Comptroller of the Currency for years has been urging the directors of each national bank to supplement the work of the national bank examiner by examinations by an examining committee of their own appointment, and with this in view to provide in the by-laws for an examining committee to look carefully into the affairs of the bank at stated intervals.

In order to determine the effectiveness of these examinations, the comptroller decided to ask the banks to forward to this office copies of reports made by the examining committees, and on June 1, 1912, the following letter was addressed to the banks:

In order to bring about a more thorough cooperation between the banks, the comptroller's office, and the examiners, the comptroller is asking the banks to send to this office copies of all reports of examinations made for the directors by their examining committees or accountants employed by them. These are to be checked up with the last reports made by national-bank examiners, and any additional information which they contain will be carefully noted.

The comptroller feels that with the cooperation of the examining committees in the national banks every dishonest employee can be detected; that forged paper will be found; that losses that may escape the examiner will be ascertained by the examining committees and in turn by the boards of directors; and that in general by this sincere and hearty cooperation the national banks will be lifted to a higher degree of conservatism and safety.

It will be appreciated very highly by me if you will agree to send here, for the files of this office, copies of all reports made hereafter to your board of directors. Will you please advise me by return mail of your willingness to do this, and whether such examinations are made by your committee annually or semiannually.

Reply to this letter was received from nearly 5,000 banks, the directors signifying their willingness in practically every case to comply with this request. There have been received to date reports of directors' examinations from over 3,000 banks.

It was apparent from the reports received that a large proportion of these examinations were ineffective in that many of the points essential to a thorough examination were covered only in a superficial way or omitted entirely, this being especially true of the liability side of the ledger, many examinations being confined entirely to the counting of the cash and inspecting the notes and securities. This appeared to be due not to a lack of willingness on the part of the directors but to their lack of knowledge as to what constituted an examination and unfamiliarity with the proper methods of verifying many of the assets and liabilities of the bank.

To meet this condition the comptroller, on July 9, 1912, sent to the banks a circular directing attention to the points that should be covered by an examination, and made the following suggestions:

(1) The cash should be counted and the total compared with the books of the bank. Cash items should be carefully scrutinized, and any improper items, such as unposted checks held for the purpose of not showing overdrafts, and other items that can not be readily converted into each should be reported.

readily converted into cash, should be reported.

(2) The bonds and other securities of the bank should be examined and those not on hand should be verified by reference to the receipts of the parties with whom they are deposited, and if the receipts are old they should be verified by correspondence. The market value and the amount at which carried on the books in the aggregate should be shown, and any stocks held by the bank should be listed, with a statement showing

the reason the securities were taken by the bank.

(3) The notes should be carefully checked and their total compared with the general ledger. The genuineness, value, and security of each note, and of any collateral thereto, should be carefully determined, and any losses ascertained, or probable, in the judgment of the committee, should be noted. The liabilities of each of the larger borrowers, and loans to affiliated interests, should be aggregated and carefully con sidered. The report should also show the general character of the loans—whether well distributed; the general character of the collaterals; whether corporations in which officers or directors are interested borrow to an undue extent; also any large liabilities of the officers or directors. It should also be shown whether all paper claimed by the bank as its own property, including collaterals, is properly indorsed or assigned to it, and all mortgages recorded. Any loans exceeding 10 per cent of the capital and surplus of the bank should be reported. The signatures of all note makers and indorsers should be carefully scrutinized, and any erasures and alterations or any indications of manipulation should be carefully investigated and reported to the full board. All overdue paper should be listed and comment made as to its collectibility.

(4) The certificates of deposit and the cashier's checks should be verified by totaling those outstanding as shown by the register and comparing with the general ledger, and also by comparing the canceled certificates and checks with the register and checking

them against the stubs.

(5) The copy retained by the bank of the report of condition made to the Comptroller at the last call should be compared with the bank's books at that date, particularly with reference to the excessive loans and directors' and officers' liabilities reported to the board of directors.

(6) The bank's last reconcilements of accounts with correspondent banks should be compared with the bank's books, and a transcript of the bank's account from the date of the last reconcilement to the date of the examination sent to the correspond-

ent bank with a request for verification.

(7) Individual ledger balances should be verified in such manner as the directors may deem advisable, by calling in pass books, by sending out reconcilements of certain accounts selected by the directors, or in some other suitable way. A trial balance of the ledger should be taken by some member of the committee, or at least by some person other than the clerk engaged on the ledger.

(8) Overdrafts should be totaled and carefully considered, and the report should

show any estimated losses.

(9) The committee should consider carefully the "profit and loss" and the "expense" accounts, with a view of determining whether the charges against those accounts are proper, whether the earnings of the bank warrant the expense charges, and whether the bank is making a legitimate profit.

(10) The examining committee should inquire carefully into the arrangement of the working affairs of the bank and ascertain whether any employee who keeps the

individual ledger receives deposits or balances pass books; and whether the em-

ployees are properly bonded, and in whose custody the bonds are lodged.

(11) Any liability of the bank for borrowed money should be listed, and the proper authority and the necessity for such borrowing ascertained. The total amount of the present liabilities of that nature should be reported to the board, including money borrowed from other banks on certificates of deposit.

The report of the directors or the examining committee should show that these

points have been covered, and should recite any deficiencies discovered.

The report should also contain a complete statement of the total assets and liabilities of the bank, with any additions or deductions that in the judgment of the directors should be made as a result of their investigation. There should also be included a detailed statement of the loans which the directors estimate as worthless, doubtful, or insufficiently secured, giving reasons therefor, and as nearly as possible the real value.

A statement should also be made of any matters which in the opinion of the com-

mittee affect in any way the bank's solvency, stability, or prosperity.

It is believed that there are few instances where the examining committee can not,

if they will take the necessary time, cover these points fully and satisfactorily.

An examination twice a year, along the above lines, by a committee of the directors who will give sufficient time to the work to make it thorough and complete, can not fail to be of great benefit to all concerned, and this the directors owe to the shareholders who have placed them in their positions of trust.

In order to give the directors every possible assistance, the national bank examiners were instructed to take up with the directors upon their next round of examinations the proper methods of verification and to give them all the information along that line that they might

The examiners are now doing this, and in many cases the board of directors or the examining committee are accompanying the national

bank examiner through all the details of his work.

Reports of examining committees are now coming into the comptroller's office daily. Each one is being carefully scrutinized, and where it appears that the ground was not thoroughly covered, a letter is being written calling attention to the specific items omitted and suggesting that upon the examiner's next visit he be consulted in regard to them.

A decided improvement is already noticeable in the character of the examinations, and it is believed that during the coming year practically every board of directors will be fully informed as to the proper methods of verifying the affairs of their bank and will be making thorough examinations, and that the effectiveness of direc-

toral supervision from now on will be greatly increased.

LAWRENCE O. MURRAY, Comptroller of the Currency.

The Speaker of the House of Representatives.

# APPENDIX.

# DIGEST OF DECISIONS RELATING TO NATIONAL BANKS.

[The following decisions reported in volumes 223 and 224, U. S. R., and volumes 193-197, Fed. Rep., were reported too late to be included in the Digest of Dicisions Relating to National Banks for April, 1912.]

# ACCOMMODATION PAPER.

Accommodation notes—Participation in fraud—Jury questions (U.S. C. C. A., 1912).—In an action on an accommodation note, carried by a bank fraudulently, whether the indorser participated in the fraud, and whether he signed for the accommodation of the bank, or to accommodate its officers, held under the evidence jury questions. (Westwater v. Lyons, 193 Fed. Rep., 817.)

Power of bank to hold accommodation note (U. S. C. C. A., 1912).—A bank may hold a note for its own accommodation under the ordinary relationship governing accommo-

dation paper. (Ib.)

Parol or extrinsic evidence—Accommodation notes (U. S. C. C. A., 1912).—A national bank having failed to sell an entire issue of stock, which was necessary before it could do business on increased capital, a third person in accordance with an agreement between the officers, gave his note for the price of the remaining shares to a director, who indorsed and delivered it to the bank; the shares being issued in his name. The maker having become insolvent, defendant was induced by such director to execute his accommodation note to the director's uncle, who indorsed it, and it was substituted for that of the first maker. The notes were carried and reported as assets of the bank until its failure; but neither maker paid any interest, the dividends on the stock being applied thereon. The cashier gave defendant a letter assuring him that he would not be held liable on his note. Held, that instructions which assumed that the letter was admissible only as evidence of a release by the bank of any liability of defendant if he was innocent in the transaction were erroneous; the letter being also admissible as tending to show that the note was given as an accommodation to the bank. (Ib.)

Instructions to jury on accommodation note (U. S. C. C. A., 1912).—An instruction that if the defendant accommodated the bank, and did not know for what purpose the note was to be used, verdict might be for defendant if the directors authorized the letter, was improper, since he was entitled to a verdict if the note was made for the

bank's accommodation innocently. (Ib.)

# COLLATERAL SECURITIES.

Conversion of collateral—Right of possession in third person as a defense (U.S.C.C.A., 1912).—It is a complete defense to an action for conversion of property which came lawfully into defendant's possession that it delivered the same to a third person, who was entitled to its possession. (McKinnon v. Western Development Co., 196 Fed. Rep., 487.)

Evidence in action for conversion of collateral (U. S. C. C. A., 1912).—Where plaintiff sued defendant bank for the conversion of collateral delivered as security for a loan which the bank agreed to make, but failed to make the loan, defendant could show that the arrangement was made with one of the bank's officers, who agreed personally to advance the money to another bank to make the loan, and did so, and that the

collateral was delivered to him. (Ib.)

When bank has general lien on collateral (U. S. C. C., 1911).—Where a note given to a bank for a loan of \$20,000 declared that the maker had deposited collateral as security for the payment of the note and every other liability of the undersigned to the bank, direct or contingent, due or to become due, or which might thereafter be contracted or existing, followed by a specific description of the collateral, such collateral was pledged to secure not only the \$20,000 note, but also the other indebtedness of the maker to the bank. (Commercial and Savings Bank v. Robert H. Jenks Lumber Co., 194 Fed. Rep., 732.)

(U. S. C. C., 1911).—Where an insolvent corporation deposited collaterals with claimant bank as security for its entire indebtedness, the bank on administration of the corporation's estate in equity was entitled to prove its claim for the full amount of its debt and to receive dividends up to the balance due after crediting the proceeds

of the sale of the collaterals. (Ib.)

8

Pledge of bonds with an agreement that part should be exchanged at par for notes held by bank (U.S. D.C., 1912).—Bonds of a corporation were pledged to a bank, with an agreement that part of the bonds should be exchanged at par for notes held by the bank; the corporation paying a difference by check. The check was not cashed, and the notes were not returned. Held, in a suit to wind up the corporation, the bonds must be regarded as pledged. (Nichols v. Waukesha Canning Co., 195 Fed. Rep., 807.)

Reception of accommodation note secured by collateral liability of bank (U.S. C. C. A., 1912).

Reception of accommodation note secured by collateral liability of bank (U. S. C. C. A., 1912).—A national bank receiving a note of a third person for the debt of its cashier who pledged collaterals attached to the note must be deemed to have contracted to keep the securities for the benefit of the maker, and its failure to do so was a breach of con-

tract. (Skud v. Tillinghast, 195 Fed. Rep., 1.)

Execution of accommodation notes for officers of bank—Knowledge of officers imputable to bank (U. S. C. C. A., 1912).—Where an accommodation note was made to a national bank and collaterals were attached thereto to secure the bank for a debt due from its cashier, the president's interest in the transaction was not adverse to the bank, so that his knowledge with respect to the transaction was imputable to the bank. (Ib.)

his knowledge with respect to the transaction was imputable to the bank. (Ib.)

Bank having received the benefit is liable for the loss of the collateral (U. S. C. C. A., 1912).—Since the bank could not receive the benefit of the note without bearing the burden of the knowledge of its officers that the note was secured by the collaterals, it was liable for the loss of such collaterals. (Ib.)

Rights of receiver of insolvent bank (U. S. C. C. A., 1912).—A receiver of an insolvent national bank stands in the place of the bank as to property equitably belonging to

third persons. (Ib.)

Loss of securities available to maker by way of recoupment when sued on note (U.S. C. C. A., 1912.—Where a national bank received a third person's note for the accommodation of its cashier who pledged securities attached to the note, the failure of the bank to protect the securities, whereby they were lost, was available to the maker by way of recoupment when sued on the note by the receiver of the bank. (Ib.)

Action on principal claim—Rights of pledgee (U.S. C. C. A., 1912).—A pledgee in

Action on principal claim—Rights of pledgee (U. S. C. C. A., 1912).—A pledgee in possession of the pledge and entitled to retain the same until his claim is paid need not, as between himself and the pledgor, resort as a general rule to the pledge before suing on the principal claim, though he may be compelled to release the pledge when his

claim is satisfied. (Ib.)

Effect of conversion of pledge by pledgee (U. S. C. C. A., 1912).—A pledgee who converts the pledge thereby in effect to the extent of its value discharges the debt, and the same result follows where the pledgee through his fault fails to preserve the pledge. (Ib.)

## Collections.

# GENERALLY.

Collections—Acts within power in connection with (U. S. Supreme Court, 1912).—While a national bank can not act as trustee and hold land for third persons, under 5136, Revised Statutes, it may do those acts that are usual and necessary in making collections of commercial paper and evidences of debt. (Miller v. King, 223 U. S., 505.)

Collections—Capacity to act as assignee of judgment (U. S. Supreme Court, 1912).— A national bank, under 5136, Revised Statutes, may be assignee of a judgment to collect and distribute the amount thereof where the assignment is not made merely

to enable it to sue in its own name. (Ib.)

Ultra vires acts—Who may raise question—quaere as to (U. S. Supreme Court, 1912).—Quaere: Whether any but the Government can raise the question that a national bank in acting as trustee violates 5136, Revised Statutes. Kerfoot v. Bank, 218 U. S., 281. (Ib.)

TITLE TO CLAIMS DEPOSITED WITH BANK FOR COLLECTION.

When depositor entitled to proceeds of collections (U.S. District Ct., 1912).—Where complainant deposited a number of checks and vouchers payable to him in a bank, duly indorsed in blank, and the bank credited plaintiff's account with the amount thereof, but there was no agreement that complainant might draw against them until they were collected, and the bank was notified thereof, the bank prior to such collection and notice did not become the debtor of complainant but was a mere agent to collect, and having passed into the hands of the Comptroller of the Currency before notice by other banks to which the items were sent for collection that the collections had been made and the proceeds credited to insolvent bank's account, and the proceeds of the collections having thereafter been paid to the bank's receiver, complainant was entitled to recover the same as a trust fund from the receiver. (Goshorn v. Murray, Digitized fol 97 Feet Rep., 407.)

When deposit of checks of third parties presents no basis for claim for preference (U. S. C. C. A., 1912).—Checks of third parties on a bank with which they are deposited, which are paid by crediting the bank and charging the drawers on its books, do not increase the cash in the bank and present no basis for a preferential payment to the depositor. (Empire State Surety Co. v. Carroll County, 194 Fed. Rep., 593.)
(U. S. C. C. A., 1912).—The deposit of checks of third parties, which are credited to the depositor and used by the bank to pay its debts, bring no money into its cash

and lay no foundation for a preferential payment to the depositor. (Ib.)
(U. S. C. C. A., 1912).—Checks of third parties deposited with a bank credited to the depositor and collected through a clearing house do not warrant a preferential payment, in the absence of proof of the actual balance of cash which the bank received through the clearing house, for they may have been, and presumptively were, used in whole or in part to discharge debts of the bank. (Ib.)

# Insolvency and Receivers.

(See also Collections—Title to claims deposited with bank for collection and Trusts— Following trust funds—preferences.)

POWERS OF RECEIVER TO DISPOSE OF ASSETS AND COMPOUND CLAIMS.

When receiver can not compromise claim (U. S. C. C. A., 1912).—It is beyond the power of a receiver of a national bank, who is a party to a decree allowing a preferred claim in a suit between a creditor of the insolvent who is entitled to appeal from the decree and the receiver and the successful claimant, to deprive the creditor of his right to appeal from the decree and this court of its jurisdiction to review it, by compromising it with the successful claimant without the consent of the aggrieved creditor and without any order of the court. Barber Asphalt Paving Co. v. Morris, 132 Fed., 945, 953; 66 C. C. A., 55, 63, 67; L. R. A., 761. (Empire State Surety Co. v. Carroll County, 194 Fed. Rep., 593.)

# Interest and Usury.

Actions under Revised Statutes, 5198, to recover usurious interest—When period of limitation begins to run (U. S. Supreme Court, 1912).—The two-year limitation in Revised Statutes, 5198, within which an action must be commenced against a national bank to recover double the amount of payments of usurious interest begins to run from the time of payment of the usurious interest, and not from the time of payment of the note. (McCarthy v. First National Bank, 223 U. S., 493.)

Usurious contracts prohibited—No statute of limitations to defense of usury (U. S. Supreme Court, 1912).—National banks are prohibited from making usurious contracts, and whenever the debtor is sued on such a contract he may plead the usury and be relieved from payment; as to this defense there is no statute of limitations. (Ib.)

Usurious interest exacted by—Remedies and defenses of debtor (U. S. Supreme Court, 1912).—Where a national bank reserves or deducts usurious interest in advance, the debtor may plead usury, but may not recover double the amount paid under 5198, Revised Statutes. (Ib.)

Usurious contracts—Actions on—When statute of limitations begins to run (U. S. Supreme Court, 1912).—When the debtor actually makes, and the national bank knowingly receives and appropriates, a payment of usurious interest, the cause of

action arises and the statute begins to run. (Ib.)

Locus penitentix—To whom privilege granted (U. S. Supreme Court, 1912).—There is no locus penitentixe. That privilege is only granted to those banks which, having charged usury, may by refusal to accept interest when tendered show that they will not carry the illegal contract into effect. (Ib.)

# LOCATION OF BANK, CHANGE OF.

(U. S. District, 1912).—A national bank organized in a village, the name of the village being entered in its organization certificate as the "place" where its banking business is to be carried on, can not, on the subsequent annexation of said village to an adjacent city, remove beyond the limits of said village at date of annexation into the city to which said village had been annexed without the consent of the Comptroller of the Currency and without increasing its capital to an amount equal to that required for the organization of a national bank in said city and complying with all other requirements applicable to national banks in said city. (Murray v. First National Bank of Capitol Hill, Okla. Decision overruling demurrer on Oct. 15, 1912, in United States District Court for Western District of Oklahoma; the case not re-Digitized fapa**rted**SER

# Officers, Civil, Liability of.

False statements-Right of action for (U. S. Supreme Court, 1912).—Although the common-law action of deceit does not lie against directors of a national bank for making a false statement, and the measure of their responsibility is laid down in the national banking act (Yates v. Jones National Bank, 206 U. S., 158), an action may be maintained in the State court regardless of the form of pleading if the pleading itself satisfies the rule of responsibility declared by that act. (Thomas v. Taylor, 224 U.S., 73.)

False statements—Liability of directors—Effect of involuntary character of statement (U. S. Supreme Court, 1912).—The fact that a statement of the condition of a national bank is not made voluntarily, but under order of the Comptroller of the Currency, does not relieve the directors from liability for false statements knowingly made

therein.

False statements—Liability of directors—Effect of notice from comptroller to collect or charge off assets (U. S. Supreme Court, 1912).—Notice from the Comptroller of the Currency to directors of a national bank to collect or charge off certain assets is a warning that those assets are doubtful; and to disregard such a notice and represent the assets in a statement to be good is a violation of the law and renders the directors

making the statement liable for damages to one deceived thereby.

Liability of officers and directors for false reports (U. S. C. C. A., 1912).—The making and publishing by a national bank of the reports required by statute are not merely for the information of the comptroller, but are to guide so much of the public as may have occasion to act thereon, and one who buys from another stock in the bank in reliance upon a false report of its condition and suffers damage thereby has a right of action against any officer or director who, knowing its falsity, authorizes such report under Revised Statutes 5239, which makes them individually liable for damages sustained by the association, its stockholders, "or any other person." (Chesbrough et al.

v. Woodworth, 195 Fed. Rep., 875.)

Damages are personal (U. S. C. C. A., 1912).—The damages in such a case are personal with plaintiff, who sues in his own individual right and not in that of the asso-

ciation.  $(\bar{1}b.)$ 

Actions against directors—Issue and proof (U. S. C. C. A., 1912).—Such an action against directors involves no direct issue of negligence, the sole primary issue being whether a defendant caused or permitted to be made a statement of the bank's condition on which plaintiff relied to his injury, and which statement defendant knew was materially false. The liability of the directors is several, and plaintiff may sue one or more, but must make out a sufficient case against each one to authorize a recovery against him, and, in general, the detailed history of the entire transaction and of each defendant's connection with the same is admissible. (Ib.)

When director held to know that statements are false, and to be liable therefor (U. S. C. C. A., 1912).—In such an action, where the falsity of the statement consisted in its including as resources in the loans and discounts paper to a large amount which was worthless, the making and publishing of the statement, which under the general custom are merely the automatic result of the bookkeeping, do not constitute the underlying wrong, and any director who participated in or approved the continued carrying on the books of such paper as assets at its face value to an amount sufficient to affect the standing of the bank and knowing its worthlessness is bound to know that under the prevailing practice the statements will be substantially false, and is responsible therefor. (Ib.)

Director liable if he does not make reasonable personal effort to induce proper action (U. S. C. C. A., 1912).—While the duty of charging off such worthless paper is that of the board of directors as an entity, and in such matter it has a reasonable discretion, when the duty exists and is wholly unperformed an individual director who is engaged generally in the performance of his functions may be personally liable because of his participation in the failure to act by failing to make reasonable personal efforts to

induce the proper action. (Ib.)

Evidence in actions against directors (U. S. C. C. A., 1912).—An action against directors of a national bank to recover damages sustained by plaintiff because of the making and publication by the bank of statements including as assets a large amount in worthless notes, in reliance on which statements plaintiff purchased stock at more than its actual value, is not supported by evidence that such notes were for loans to the maker in excess of the 10 per cent permitted by Revised Statutes, section 5200 (U. S. Comp. St. 1901, p. 3494), since that fact does not affect their collectibility, but evidence to show motive, as that defendants were themselves selling their stock at a high price, is material. (Ib.)

(U. S. C. C. A., 1912).—In such an action, the fact that plaintiff subsequently became a director and joined in attesting statements which included as assets some of the same paper was admissible as in the nature of an admission that such paper was not so clearly worthless as to make defendants' acts unlawful, its weight being for the

jury. (1b.)

Action against directors—Measure of damages (U. S. C. C. A., 1912).—The general rule of damages in actions of deceit that one induced by false representations to purchase property at more than its value is entitled to recover the difference between what the property was actually worth and what it would have been worth if the representations had been true, not exceeding the sum paid, is not applicable to an action against directors of a national bank under Revised Statutes, section 5239 (U. S. Comp. St. 1901, p. 3515), by one who purchased stock of the bank in reliance on published statements of its condition which were false, in that they included as assets in the loans and discounts a large amount of worthless paper; since under such section defendants are liable only for knowing violations of the law. In such case the measure of plaintiff's recovery is the difference in the fair market value of his stock if all the paper had been of a character entitling it to be reported as assets, and that sum which would have been its fair market value if the directors, in the exercise of due care and good faith, had charged off the books, and not reported so much of the paper as they knew or had good reason to believe was uncollectible, assuming that defendants participated in or assented to such nonaction. (Ib.)

# OFFICERS, CRIMINAL LIABILITY OF.

Aiding and abetting—Dates (U.S.C.C.A., 1912).—An indictment for aiding and abetting a national bank clerk to misappropriate the bank's funds contained 10 counts, relying on 10 different transactions, giving the date of the first as of December 1, 1909, the second on December 9, and running through to include December 31. Held, in the absence of a bill of particulars, the jury might select 10 dates out of the whole list of dates involved on which to base a conviction, except as something occurred during the trial to specifically fix the dates. (Kelliher v. United States, 193 Fed. Rep., 8.)

Aiding and abetting—Not necessary to allege with particularity (U. S. C. C. A., 1912).— The rule applied that where accused was charged with aiding and abetting a national-bank clerk to misappropriate its funds, in violation of Revised Statutes, section 5209 (U. S. Comp. St. 1901, p. 3497), it was not necessary that the indictment should allege

with particularity the nature of the aid or abetting rendered. (Ib.)

"Aid or abet"—Defined (U. S. C. C. A., 1912).—The words "aids or abets," as used in Revised Statutes, section 5209 (U. S. Comp. St. 1901, p. 3497), providing that every person who with intent to deprive a national banking association of its funds aids or abets any clerk or agent in any violation of such section shall be guilty of a misdemeanor, are to be construed according to their natural import, and are satisfied by proof that accused actually participated in such misappropriation, and of concurring acts performed by him to that end. (Ib.)

acts performed by him to that end. (Ib.)

Misappropriation of funds (U. S. C. C. A., 1912).—Where an indictment for aiding and abetting a national-bank clerk to misapply certain of the bank's funds alleged that the clerk was also a depositor, that he obtained possession of the bank's funds by means of overdrafts, and that he neglected to inform the bank's officers thereof, but, instead, secreted the same by false entries, the indictment sufficiently set out the funds were

misapplied by the clerk. (Ib.)

Misappropriation of funds—Knowledge of officer (U. S. C. C. A., 1912).—Where a national-bank clerk misappropriated a large amount of the bank's funds by a system of more than 50 overdrafts, and the Government claimed that accused was an aider and abettor therein, the fact that the bank's officers might have had knowledge of some of the overdrafts did not relieve the transactions of their criminal character. (Ib.)

the overdrafts did not relieve the transactions of their criminal character. (Ib.)

Aiders and abetters—Accomplice testimony—Corroboration (U. S. C. C. A., 1912).—The rule applied that it is not necessary that an accomplice should be corroborated in every particular in order to sustain a conviction; it being enough, if the corroboration extends to a point sufficient to show that the accomplice has testified truly in some particulars,

as to authorize the jury to infer that he has so testified in others. (Ib.)

Aiding and abetting—National-bank funds—Misappropriation—Modus operandi—Knowledge (U. S. C. C. A., 1912).—In a prosecution of accused for aiding and abetting a national-bank clerk to misappropriate its funds in violation of Revised Statutes, section 5209 (U. S. Comp. St., 1901, p. 3497), it was not necessary to sustain a conviction of defendant that the United States prove that he knew the clerk's modus operandi in obtaining the funds. (Ib.)

Misappropriation of funds—Aiding and abetting (U. S. C. C. A., 1912).—Where accused, with knowledge that a national-bank clerk had misappropriated certain of the bank's funds, actually accepted into his own hand what he knew to be moneys of the bank, and used or pretended to use the same for the clerk in gambling, he was guilty of aiding and abetting the clerk, in violation of Revised Statutes section 5209 (U. S. Comp. St., 1901, p. 3497), he shall be guilty of a misdemeanor. (Ib.)

# Powers.

Purchase of stock (U. S. C. C. A., 1912).—Under Revised Statutes, section 5136 (U. S. Comp. St., 1901, p. 3455), defining the general powers of national banks, and conferring no express power to deal in stocks of corporations, a purchase of stock in a corporation by a national bank from one of its officers for the purpose of selling the same at a profit was ultra vires and voidable as between the parties. (Barron v. McKinnon, 196 Fed. Rep., 933.)

Purchase of stock an ultra-vires act, but title passes to bank (U. S. C. C. A., 1912).— Though a purchase of corporate stock by a national bank from one of its officers was ultra vires and voidable as between the parties, it was not void, and title passed to the bank which it could transfer to a third person prior to any election by the other party to the original transaction to rescind the sale. (Ib.)

Doctrine of ultra vires (U.S. C. C. A., 1912).—The doctrine of ultra vires rests on the principle that on grounds of public policy courts will not enforce an illegal or ultravires contract, and that a defendant may avail himself of the defense in a suit brought to enforce such contract. (Ib.)

Purchase of real estate (U.S. C. C. A., 1912).—A purchase of real estate by a national bank for a purpose other than that specified by Revised Statutes, section 5137 (U.S. Comp. St., 1901, p. 3460), is voidable only and not void. (Ib.)

Loans on its own stock—Purchase and transfer of the stock (U. S. C. C. A., 1912).— Though a national bank has no power to loan money on its own stock as collateral in violation of Revised Statutes section 5201 (U. S. Comp. St., 1901, p. 3494), a loan made in violation of such section is voidable only, and hence the bank, having been compelled to take title to its stock so held as collateral, may convey a good title to a purchaser. (Ib.)

Ultra vires defense of Statu quo (U.S. C. C. A., 1912).—Where a defense of ultra vires is available on the ground of public policy, the court will strive to do justice between the parties, either by refusing to interfere in rare cases, or by permitting the money or property parted with on the faith of the unlawful contract to be recovered or compensation made therefor. (Ib.)

# TRUSTS.

Following trust funds—Preferences (U. S. C. C. A., 1912.)—One who is an equitable owner of a fund for many sound reasons is entitled to no preference over one who is the equitable owner of his fund for one sound reason in payment out of a common fund in which the trustee has commingled them. (Empire State Surety Co. v. Carroll County, 194 Fed. Rep., 593.)

(U. S. C. C. A., 1912.)—Where a trustee has commingled in a common fund the moneys of many beneficiaries, it is presumed that the moneys were paid out in the order in which they were paid in, and the beneficiaries are entitled to preferences in the inverse

order. (Ib.)

(U. S. C. C. A., 1912.)—For a cestui que trust to maintain a claim of preferential payment, clear proof that the trust property or its proceeds went into a specific fund or a specific piece of property is necessary; proof that it went into the general assets of the

insolvent estate being insufficient. (Ib.)
(U. S. C. C. A., 1912.)—Proof that a trustee commingled a trust fund with his own and made payments out of the common fund held a sufficient identification of the remainder not exceeding the smallest amount subsequent to the commingling; it being presumed that the trustee regarded the law and neither paid out nor invested in other

security the trust fund. (Ib.)
(U. S. C. C. A., 1912.)—It is presumed that promissory notes, bonds, and other property coming into the hands of a receiver of an insolvent were not produced by the use

of and are not trust property. (Ib.)

When claim of a cestui que trust to a preference will not be allowed (U.S.C.C.A., 1912).— A claim of a cestui que trust to a preference in payment out of the assets of an insolvent estate will not be allowed over the objection of the receiver, where the claims of the majority of the creditors in amount and in value which the receiver represents are equal to it in law and in equity, although such creditors are content to share ratably with all the creditors and make no claims for preferences. (Ib.)

Note 1.—Specie payments were suspended from Jan. 1, 1862, to Jan. 1, 1879. During the greater part of that period gold and silver coins were not in circulation except on the Pacific coast, where it is estimated the specie circulation was generally about \$25,000,000. This estimated amount is the only coin included in the above statement from 1862 to 1875, inclusive.

NOTE 2.—In 1876 subsidiary silver again came into use, and is included in this statement, beginning

NOTE 2.—In 1876 subsidiary silver again came into use, and is included in this statement, beginning with that year.

NOTE 3.—The coinage of standard silver dollars began in 1878, under the act of Feb. 28, 1878.

NOTE 4.—Specie payments were resumed Jan. 1, 1879, and all gold and silver coins, as well as gold and silver bullion in the Treasury, are included in this statement from and after that date.

NOTE 5.—The Director of the Mint recently made a revised estimate of the stock of gold coin, and as a consequence of such revision the estimated stock of gold in the United States and of gold coin in circulation has been reduced \$135,000,000 in the figures for 1907.

Note 6.—There was a reduction as of June 30, 1910, of \$9,700,000 of subsidiary silver coin as a result of the revision of stock by the Mint Bureau.

Note 7.—This table has been revised and shows slight changes from previous figures in many of the

<sup>1</sup> From 1873 to 1886 holdings of State banks only; from 1887 all banks other than national.
2 Gold and silver, 1902, partially estimated on basis of national-bank holdings.
3 From 1902 gold includes gold certificates and silver includes silver certificates; prior to that date coin certificates are included in paper currency.
4 Presumably gold mainly, but not classified in the returns.
5 Fractional currency, nickels, and cents.
6 Subsidiary and minor coin.

Table No. 94.—Resources and liabilities of the second Bank of the United States.

[Chartered by Congress in 1816, for 20 years; renewal of charter denied; in consequence reorganization was effected by means of authority of the Legislature of the State of Pennsylvania. The bank assigned in 1841, the affairs being finally liquidated in 1856, and resulted in the payment in full, interest and principal of liabilities to depositors and note holders; the shareholders, however, received nothing on their investment in stock of the bank.]
