## REPORT

## OF THE

# COMPTROLLER OF THE CURRENCY 

## Treasury Department, Office of the Comptroller of the Currency, Washington, D. C., January 3, 1940.

Sir: In accordance with the provisions of section 333 of the United States Revised Statutes, I have the honor to submit the following report covering the activities of the Bureau of the Comptroller of the Currency, for the year ended October 31, 1939. This is the seventyseventh annual report made to Congress since the organization of the Bureau.

Under date of February 25, 1863, the Thirty-seventh Congress passed an act to provide a national currency secured by a pledge of United States bonds and to provide for the circulation and redemption thereof. This act created a separate bureau in the Treasury Department to be administered by an officer designated as the Comptroller of the Currency, with the assistance of a Deputy Comptroller and the clerks necessary to discharge the duties of the office. This act also provided for the organization of associations to be formed by not less than five persons to carry on the business of banking. Thus, the origin of the national banking system and the creation of the office of the Comptroller of the Currency were simultaneous.

On January 1, 1863, the Nation was engaged in war. Financing the war was extremely difficult. There were approximately 1,500 banks in operation throughout the country, all of which were organized and operating under State laws. They issued bank bills or bank notes which formed the circulation of the country. Notes were printed upon every variety of paper and no two banks issued bills of similar appearance. It was generally the case that bank notes current in one State could not be circulated in the other States, and it was impossible for any one but those skilled in handling money in vast quantities to detect the innumerable counterfeits and altered notes which were in circulation. The Honorable John Sherman in an address in the Senate commented: "How is it possible to have a currency-and how is it possible for any honest man to detect the genuine from the counterfeit, when he has to select from 7,000 different kinds of bank bills, and the bills of those banks have been counterfeited; when so large a portion of them are spurious and counterfeit." At that time banks could be organized very easily. For instance, former Comptroller of the Currency A. Barton Hepburn, in writing of a particular State which was for a time the favorite place for incubating note-issuing banks, without capital, banking offices, or furniture, stated: "A circular letter which was issued, offer-
ing aid to any one desiring to start such a bank, stated that the sole cost necessarily incurred in starting a $\$ 100,000$ bank would be $\$ 5,000$ for plates to print the notes and expenses, including compensation to the promoter, and $\$ 5,000$ as margin to carry the necessary bonds to be deposited." It is easily seen that with such a multiplicity of banks depending upon different organizations, with no common regulator, and no common check or control over them, there could not be a uniform national currency. Especially was this true in view of the fact, that as a general rule, the weakest banks issued the most bank notes, and the strongest banks either did without the privilege of issuing bank bills, or used it slightly. These shortcomings of the system eventually exhausted the patience of the American people and the result was the creation of the national banking system.

The National Currency Aet of 1863, as it was called until 1874 when the title was changed to "The National Bank Act," was proposed as a means of providing a uniform currency, as well as to help finance the war. The establishment of a national commercial banking system was regarded as secondary to the creation of a national currency. The first Comptroller of the Currency, Hugh McCulloch, in his annual report to Congress on November 28, 1863, stated that the purpose of the National Currency Act "contemplates the organization of national banks, which by becoming its financial agents may aid the Government in the safekeeping and transmission of its revenue and the transaction of its business and through the instrumentality of which a safe and uniform circulation may be furnished to the people."

The creation of the national banking system quickly resulted in the establishment of a uniform currency, after the Supreme Court held that the prohibitive Federal tax on State bank notes was constitutional.

The National Currency Act was one of the first important steps of the Federal Government in the field of administrative law. The Bureau of the Comptroller of the Currency, which title has been inappropriate for many years, became the first truly administrative agency of the Federal Government.

Throughout the past 77 years much of the progress in this country has been made possible by the credit facilities afforded by the members of the national banking system. The original act has been revised from time to time to meet changing needs and conditions, but many of the provisions of the original act are still in force. In 1913 the Federal Reserve System was set up to provide additional credit facilities. More recently the Federal Deposit Insurance Corporation has been created. Changes in banking have, of course, resulted from changes in the needs which have developed along with the alterations in our whole political, social, and economic structure. No longer do national banks supply the currency for the country. They have gradually restricted their field to "banking" in its truest sense. With the tremendous technological, industrial, agricultural, and commercial developments of the past 77 years, banking has become more and more important to the welfare of the Nation.

In view of this brief history of the origin and development of the national banking system, it is pertinent to review the evolution of the functions of the Comptroller's office.

Undoubtedly, a considerable portion of the time and effort of the first Comptroller and his staff was consumed with the organization of new banks or the conversion of State banks into national banking associations, but the major function was the issuance and redemption of the circulating notes. At the time of the submission of the first annual report, no circulating notes had as yet been issued to the limited number of newly created national banks; but State banks in existence on the date of its passage were, under the act, permitted to issue circulating notes secured by a pledge of United States bonds in an amount equal to 50 percent of their capital. This provision was retained in the act of June 3, 1864, which repealed the former act but retained most of its provisions and included additional ones. This act was acknowledged to be an improvement over the original act, and has been described as a "new birthday" for the national system.

The first annual report of Comptroller Hugh McCulloch is replete with arguments which he considered favorable to the establishment and growth of the national currency system. It is a commentary upon Mr. McCulloch that whereas he was president of the State Bank of Indiana and came to Washington in 1862 for the purpose of opposing the establishment of a national banking system, in the belief that such a system would prove injurious to the State banks of the country, he accepted the appointment as Comptroller of the Currency and became one of the most ardent advocates of the national system. His recommendations for improvement during the formative years amply evidence his wisdom and foresight. His report stated that even though the War in which the country was then engaged was a great calamity "it would not be an unmixed evil financially" if one result were the establishment of a system of banking by which, without interference with the rights of the States, and without detriment to their solvent institutions, a bank note circulation should be furnished to the people, solvent as the Nation itself, and uniform in value, as a substitute for that supplied by the States which, in his opinion, was neither uniform in value nor, in general, properly secured. The report discussed the provision of the act requiring that national currency be furnished State banks and concluded that that provision was unwise because of the lack of any governmental supervision of the State banks. Further, the report stated, if two systems of banking, National and State, were to coexist, they should do so as separate and independent systems. Then followed Comptroller McCulloch's recommendation to the Congress that in order for the national banking system to become the sole agency, other than the Government itself, for the issuance of circulating notes, the State bank circulation should be subjected to taxation to force its withdrawal.

In the first annual report, the Comptroller stated that 134 banks had been organized, situated in 17 States and in the District of Columbia. Reports of condition as of October 1, 1863, for 66 banks are listed in detail. Of these banks, 25 are still in active operation. The 66 reporting banks had total resources of $\$ 16,793,758.40$. Their combined capital was $\$ 7,184,715$, and deposits were $\$ 8,673,740$. Although no circulation had been issued, United States bonds pledged with the Treasurer of the United States amounted to $\$ 3,925,275$.

At that time the personnel of the Bureau of the Comptroller of the Currency consisted of the Comptroller, one deputy, and six employees.

The annual report for the following year showed the number of banks to have been increased by the organization of 282 new banks and the conversion of 168 State banks into national associations. The combined capital had increased to $\$ 108,964,597.28$, and circulating notes outstanding amounted to $\$ 65,864,650$. In that report the Comptroller expressed apprehension regarding an overexpansion of banking capital through the organization of new national banks in areas already adequately supplied by existing State banking facilities. He praised certain State legislatures for passing enabling legislation to facilitate conversions of State banks into national banks. Mention was then made for the first time, in the annual reports, of supervision by the Comptroller of the Currency over national banks. Stating that "the most satisfactory references or credentials" were being required in regard to the standing and responsibility of persons proposing to organize national banks, the report added that a system of examination "is being instituted which will serve to expose and check any improper practices or violations of the provisions of law."

It is interesting to note that in this, as well as in the previous report there was a discussion of the wide variation of interest rates charged by banks in the several States and the recommendation was made that Congress impose a uniform rate upon all national banks. In this connection the suggestion was advanced that banks in the larger cities of that day, such as New York and Philadelphia, be allowed, with the permission and under the authority of a governmental agency, to raise the interest rate beyond the prescribed maximum, if such action appeared desirable in order to curb excessive speculation. This suggestion, as well as the suggestions relative to the maintenance of adequate reserves, many years later were incorporated in substance as integral parts of the Federal Reserve Act.

The annual report of Comptroller John J. Knox for the year 1873 reveals that some opposition had developed toward the National Bank system. In defense of it he pointed out that theretofore it had been possible in effect for a few favored individuals to restrict the issuance of State charters and thus monopolize the banking field. The same criticism was apparently being directed at the national system, based on the contention that since the maximum amount of available circulation authorized by Congress had been exhausted, the organization of additional national banks was precluded. Mr. Knox refuted that criticism by pointing to the fact that from the beginning the organization of national banks had been open to any proper applicants.

Reference was made in that report to the fact that during the 10 year period national banks had been able to accumulate earnings in the form of surplus aggregating $\$ 120,000,000$, and the assertion was made that the system afforded a greater degree of safety than any previously existing.

Ascribing the immediate causes of the panic of 1873 to speculative excesses and to the large accumulation of debt incidental to the period of expansion, notably in the building of the railroads which had proceeded at a vigorous and increasing rate for several years, Comptroller Knox deplored the practice, indulged in by many banks during periods of subnormal local demand, of concentrating large reserves in the banks of New York City, on the ground that the large amount of funds available in that center tended to stimulate speculation. It is
notable that he believed the situation to arise largely from the payment by the banks of interest on deposits, an "old-established custom" which he concluded could not easily be changed by direct legislation. Sixty years later the practice of paying interest on demand deposits was prohibited by an act of Congress.

The act of February 19, 1873, required that the Comptroller include in his annual report the statements of condition of State banks in addition to the statements of condition of national banks. Up to that time many of the States had made little or no provision for publishing the information contained in such statements. In the annual report of 1875 , referring to the incompleteness of data relating to State banks, the Comptroller stated that efforts were being made to induce State legislatures to eliminate the difficulty by appropriate legislation. From the comments made in the annual report for the following year it is apparent that the efforts of the Comptroller bore fruit, and it is, of course, well known today that there is complete cooperation between the various State and national supervisory agencies with respect to the publication and submission of information relating to the condition of the country's banks, for the benefit of Congress and the public at large. The publication of such information was required of national banks from the inception of the national system, and in extending it to all banks the provision has undoubtedly been a very vital factor in preventing abuses. In this connection the statement made by Comptroller Knox in the annual report of 1875 is as applicable now as then, and, fortunately, more generally recognized. He wrote:

It is wrong not to provide for plain losses, and wrong to pay unreal dividends. But in the case of a bank, it is not only wrong, but dangerous. Perfect explicitness in such cases is the only means of safety. The credit of a bank is its life, and the credit can only be maintained by deserving the confidence of the public, by telling the whole truth, though it is not favorable, and by acting consistently upon real facts, though they are not pleasant.

The act of June 20, 1874, is memorable in that the title of the act of June 3, 1864, was, as heretofore noted, changed from "National Currency Act" to "The National Bank Act." That act marked the beginning of the change of national banks from currency-issuing units to actual banking units. Thereafter, slowly, but with ever-increasing recognition, the national banking system became important because of the credit facilities afforded, rather than for the currency which its members issued. However, at that time the national bank system was still important from a currency standpoint. As a matter of fact, whereas the national bank circulation had previously been limited to three hundred million dollars, the act of June 20, 1874, lifted all limitations and the national bank circulation increased to a peak of $\$ 1,122,452,661$ on October 31, 1914. An extensive history of national bank circulation is contained in the annual report of the Comptroller for the year 1935.

National banks no longer have any liability for circulating notes, provision having been made in 1935 for the retirement of all outstanding currency of this type. Despite the fact that national bank circulation reached an all-time peak one year after the passage of the Federal Reserve Act, that act with its provisions for furnishing a form of currency possessing more elastic characteristics than other forms, clearly contemplated the eventual retirement of the national bank notes. However, that act, which was undoubtedly one of the most
important single pieces of banking legislation in this country since the act of February 25, 1863, gave even greater dignity to the national bank system as a whole by using that system as a nucleus for the Federal Reserve System. Furthermore, while unquestionably a transition in the duties of the Comptroller's office had been in process prior thereto, the supervisory functions gradually assuming more and more importance, the passage of the Federal Reserve Act definitely forecast the eventual termination of its duties as a currency bureau and its continual growth as the major bank-supervisory agency.

On June 30, 1922, approximately nine years after the enactment of the Federal Reserve Act, there were in active operation 8,249 national banks, the largest number on any "call date" in the history of the national bank system.

Happily, the decade now drawing to a close witnesses the banking structure of the country in a much sounder and more stabilized condition than in the early days of the thirties. As bad as conditions were then, however, they appear to have been infinitely better than prior to 1863. Again drawing on Comptroller Knox's report, we quote as follows:

Elliot's funding system gives a list of 55 banks in the United States, with an aggregate capital of $\$ 67,036,265$, which failed in 1841. The total bank capital in that year, as stated by Elliot, was $\$ 317,642,692$, and the failures therefore represented more than one-fifth of the entire bank capital of the country. It is further mentioned that, in nearly every instance, the capital invested in such failures was wholly lost.
and, further:
The experience of this country, previous to the organization of the national banking system, has shown that in 20 years an amount equal to its whole banking circulation was lost in the hands of the people-the loss by bills of broken banks alone being computed to have been at the rate of 5 percent per annum. There has been no loss whatever upon the circulation of the national banks, and no loss to the bill holder can arise so long as the present laws shall remain in force.

Originally, the National Currency Act empowered and directed the Comptroller of the Currency, with the approval of the Secretary of the Treasury, to appoint a suitable person or persons to make an examination of the affairs of every national banking association as often as the Comptroller should deem it necessary or proper. From the language of the act, which excludes any director or officer from making an examination of the affairs of the association with which he is identified, it is apparent that the appointment of an examiner for each examination was contemplated. At first it was the practice to employ individuals of the locality wherein the bank was located to conduct the examination. However, because of the necessity of having experienced and specially qualified men for this work, it was not long before a corps of examiners was organized to make the examinations.

An early Comptroller, referring in his annual report to the examinations for that year, stated that an effort had been made to examine all national banks considèred to be in a weak or insolvent condition. It was not until 1913 that the law made provision for regular, semiannual examinations.

Shortly after the passage of the Federal Reserve Act, and in view of the increased recognition of the importance of examinations in the supervision of national banks, the Comptroller designated district chief examiners, one for each of the 12 Federal Reserve districts, and
provided for the employment of assistant national bank examiners to work under the district chiefs.

At first the examiners were paid at the rate of $\$ 5$ a day for every day engaged, and $\$ 2$ a mile for every 25 miles of travel, the expense to be borne by the association examined. Subsequently, by law, a regular fee, based upon the amount of the capital of the bank, was charged for an examination. This, of course, was changed with the passage of the Federal Reserve Act. Since then the examiners have been paid stated salaries and expenses, and the fees charged the banks have been based upon the amount of their total assets or resources.

Urging that means be provided to defray the expense of more frequent and thorough examinations, a Comptroller of many years ago wrote in his annual report to Congress as follows:

It is not to be supposed that the short time usually spent in the examination of a national bank will be sufficient, in all cases, to detect bad management or defalcations. If the directors of national banks, to whom are confided the interest of shareholders, neglect their duties, it is not to be expected that an examiner shall, in a single day, detect and correct the abuses of a year. A number of days is required for the thorough examination of a national bank of any considerable business, and if it is expected that the reports to this office shall detect and expose defalcations and other violations of law, the means should be provided of defraying the expenses of more frequent and thorough examinations.

The change from the fee system of compensation to a stated salary basis distinctly increased the efficiency and the morale of the examining staff, and the establishment of regional offices and the employment of assistant examiners also proved to be wise moves. In the act of August 23, 1935, Congress made provision for the establishment of a retirement system which has proved to be a further aid in attracting to the examining service men of ability and good character who intend to make the service a career. It has long been the practice, when vacancies occur, to promote assistants to examiners' positions provided they can qualify and can pass oral and written examinations. Applicants for appointments as assistant examiners are expected to fulfill certain minimum requirements with respect to educational advantages and banking experience.

The employees of the Comptroller's office, in the main, are engaged in a career service. The average tenure of office for the 12 district chief national bank examiners in those positions is 10 years; their average actual period of service in the employ of this office, however, is much longer. The average tenure in office of the national bank examiners is 8 vears, although here again the average period of service in the employ of this office as assistant examiners or otherwise, preparatory to receiving commissions as national bank examiners, is much longer. Several have been in the service more than 20 years.

On several occasions the experience and efficiency of the staff of this office has been availed of by other governmental agencies. When the War Finance Corporation was created in 1918, it borrowed several national bank examiners. More recently, the Reconstruction Finance Corporation borrowed a number of examiners to help it perfect its organization, and in 1933 with the establishment of the Federal Deposit Insurance Corporation, employees of this office played an important part not only in assisting in setting up the organization of that Corporation, but in making the preliminary examinations of State banks which wished to obtain the benefits of deposit insurance.

The efficiency of the career-service employees of this office can be
illustrated by the fact that with a staff of only 767 employees in the field service, examinations were made of 10,506 banks, in addition to which examinations were made of 3,162 branches of national banks, 2,381 trust departments, and 132 affiliates. Equally impressive records have been made by the remaining portion of the 1,297 officials and employees of this office, both with respect to their work in connection with the supervision, regulation, and examination of national banks and the supervision of the liquidation of the insolvent associations.

The existing systems of banking and Federal bank supervision are not perfect. There are many adjustments which must be made to meet changing conditions. In determining the character of these adjustments, great care and wisdom must be exercised. Every available resource must be thoroughly explored and to that end it is essential that there be very close cooperation between bankers and the Government and between the several agencies of the Government which are interested in the subject. It is manifest that every effort should be made to preserve the good features of the existing systems, recognize and correct their shortcomings, and formulate methods whereby banking may be made to conform to the needs and demands of our rapidly changing economy. This requires vision and imagination, wisdom and statesmanship. Because of the intricacies of our present-day economic structure, the task is difficult. However, it is essential that the future development of our banking system should be carefully planned, rather than permitted to evolve haphazardly, in order that adequate credit facilities, so essential to our continued economio and social progress, shall be available even in times of stress and great emergency.

Because a thorough investigation of our banking 'aws and the need for changes in them is now under way by a Senate committee, no recommendations for legislation are included in this report.

## STRUCTURAL CHANGES IN THE NATIONAL BANKING SYSTEM

The authorized capital stock of the 5,205 national banks in existence at the close of business October 31, 1939, consisted of common capital stock aggregating $\$ 1,323,295,420$, a net increase during the year of $\$ 9,446,337$, and preferred capital stock aggregating $\$ 239,292,352$, a net decrease during the year of $\$ 20,428,600$.

Covering the entire period since the inception of the national banking system, February 25, 1863, to and including October 31, 1939, 14,421 national banking associations have been authorized to begin business. Of these banks, 6,007 have gone into voluntary liquidation in the manner provided by sections 5220 and 5221, U. S. R.S., paid their depositors, and quit business or merged with other national and State banks; and 408 have consolidated with other national banking associations under authority of the act of November 7, 1918. Exclusive of banks which failed but subsequently were restored to solvency, loss to the national banking system since its inception through receiverships has been 2,801 banks.

At the date of the beginning of operation of the Federal Reserve System, November 2, 1914, there were 7,578 national banks in existence with aggregate common capital stock of $\$ 1,072,492,175$, ns compared with the total common capital stock of $\$ 1,323,295,420$ for
the 5,205 national banks in existence October 31, 1939. In addition, 1,618 of the national banks in existence October 31, 1939, had an aggregate of $\$ 239,292,352$ of preferred capital stock outstanding. Since November 2, 1914, there has been a net decrease of 2,373 in the number of national banks in existence but a net increase of $\$ 250,803,245$ in the amount of the common capital stock and in addition a net increase of $\$ 239,292,352$ in capital through the issuance of preferred capital stock during the last $6 \frac{1}{2}$ years. During this 25 -year period, 3,769 new national banks have been chartered, with aggregate common capital stock of $\$ 563,736,600$ and preferred capital stock of $\$ 55,304,300$.

During the year ended October 31, 1939, in addition to 19 applications with proposed capital stock of $\$ 3,295,000$ carried over from the previous year, 34 applications were received to organize national banks and to convert State banks into national banking associations, with proposed capital stock aggregating $\$ 5,175,000$. Of these applications 21 with proposed capital stock aggregating $\$ 3,425,000$ were approved; 5 with proposed capital stock of $\$ 350,000$ were rejected; and the remainder were still pending or had been abandoned on October 31, 1939. From the applications carried over from the previous year and the 21 applications approved during the current year, 19 national banking associations with common capital stock aggregating $\$ 2,845,000,2$ of which also had $\$ 80,000$ preferred capital stock, were authorized to commence business. Of the 19 charters issued, 13 with common capital stock aggregating $\$ 2,220,000,1$ of which also had $\$ 55,000$ preferred capital stock, were the result of the conversions of State banks; and 2 with common capital stock of $\$ 75,000,1$ of which also had $\$ 25,000$ preferred capital stock, were organized for the purpose of acquiring the business of 2 liquidating national banks.

During the year ended October 31, 1939, 4 national banks and 2 State banks were consolidated into 3 national banking associations, under authority of the act of November 7, 1918, as amended February 25,1927 , the common capital stock of the consolidated banks being $\$ 649,000$ and the preferred capital stock being $\$ 700,000$. In 1 case there was an increase of $\$ 134,000$ in the common capital stock and a decrease of $\$ 75,000$ in the preferred capital stock. Additional assets of approximately $\$ 7,721,804$ were brought into the national system by reason of the 2 State banks consolidated with national banks. Also, during this period, national banks reported the purchase of the business of 22 State banks, with aggregate capital stock of $\$ 894,062$ and aggregate assets of approximately $\$ 9,469,000$.

During the year ended October 31, 1939, 56 national banks with common capital stock of $\$ 5,581,500$, among which were 19 with preferred capital stock aggregating $\$ 1,484,500$, went into voluntary liquidation in the manner provided by sections 5220 and 5221 , U.S. R. S. Of these banks, 7 with common capital stock of $\$ 200,000$, and assets of $\$ 755,457$, including 3 with preferred capital stock aggregating $\$ 52,500$, paid their depositors and quit business; 26 with common capital stock of $\$ 2,508,500$ and assets of $\$ 49,267,108$, including 6 with preferred capital stock aggregating $\$ 752,500$, were succeeded by other national banks; and 23 with common capital stock of $\$ 2,873,000$ and assets of $\$ 39,615,325$, including 10 with preferred capital stock aggregating $\$ 679,500$, were succeeded by State banks.

Changes in the number and capital stock of national banks during the year ended October 31, 1939, are shown in the following summary:

Organization, capital stock changes, and liquidations of national banks during the year ended Oct. 31, 1939

## BRANCHES

On February 25, 1927, the date of the passage of the McFadden Act, 118 national banking associations had in operation 372 branches, as compared with 192 national banking associations with 1,594 branches as of the close of business October 31, 1939.

In the entire period from February 25, 1927, to the close of business October 31, 1939, 2,076 branches have been added to the national system. Of these branches, 1,240 were de novo branches, 326 were branches of State banks which converted into national associations, and 510 were branches brought into the system by the consolidation of State banks with national banks. During this same period 854 branches have been relinquished, of which number 569 went out of the system through liquidation of the parent institutions, and 285 through
consolidations or for other reasons. The net result of these operations was a gain of 1,222 branches since February 25, 1927.

During the year ended October 31, 1939, 33 branches were brought into the national system. Of these branches, 20 were de novo branches and 13 were branches of a State bank which was converted into a national banking association. Of the 20 de novo branches authorized, 16 were authorized under the Banking Act of 1933 to operate in places other than the city in which the parent bank is located. During this same period, 5 branches were relinquished through the liquidation of the parent institution and 4 were discontinued through action of the board of directors of the parent bank. The net result of these operations was a gain for the system of 24 branches during the year ended October 31, 1939.

A summary of the status of branch-banking operations in the various periods appears in the accompanying table:

## CHANGES IN PRINCIPAL ITEMS OF ASSETS AND LIABILITIES OF NATIONAL BANKS IN THE YEAR 1939

Loans and discounts of all national banks in the United States and possessions on June 30, 1939, were $\$ 8,574,000,000$, an increase of $\$ 239,000,000$ in 12 months. Loans on real estate increased $\$ 202$,000,000 , and loans to brokers and dealers in securities increased $\$ 19,000,000$. The change in other loans secured by United States Government and other securities is not available since prior to December 31, 1938, loans to other than brokers and dealers in securities included all loans, except loans to banks, secured by bonds, stocks, and other securities.

Investments increased $\$ 909,000,000$ and amounted to $\$ 12,553,-$ 000,000 at the end of the year. United States Government direct obligations of $\$ 6,900,000,000$, and obligations guaranteed by the United States Government as to interest and principal of $\$ 1,870,000$,000 , increased in the year $\$ 390,000,000$ and $\$ 392,000,000$, respectively. Obligations of States and political subdivisions increased $\$ 267,000,000$ and amounted to $\$ 1,694,000,000$ while other bonds, notes, and debentures decreased $\$ 90,000,000$ to $\$ 1,864,000,000$. Corporate stocks, including stock of Federal Reserve banks, totaling $\$ 225,000,000$, decreased $\$ 50,000,000$ during the 12 months ending June 30, 1939.

Cash, balances with other banks, including reserve balances and cash items in process of collection, increased $\$ 1,625,000,000$ and amounted to $\$ 11,075,000,000$ at the end of the year.

The total deposits on June 30, 1939, amounted to $\$ 29,469,000,000$, an increase of $\$ 2,653,000,000$ during the year. These deposits comprise demand deposits of $\$ 21,287,000,000$, which increased $\$ 2,555,000,000$,
and time deposits of $\$ 8,182,000,000$, which showed an increase of $\$ 98,000,000$.

Total capital funds of $\$ 3,390,000,000$ represented an increase of $\$ 116,000,000$. Common stock increased $\$ 9,000,000$ while preferred stock decreased $\$ 19,000,000$. Surplus, profits, and reserves increased $\$ 126,000,000$.

Figures with respect to the above mentioned asset and liability items of national banks, together with a balance sheet covering each of the four calls made on such banks in the year ending October 31, 1939, appear in the accompanying tables:

## EARNINGS AND EXPENSES OF NATIONAL BANKS FOR YEAR ENDING JUNE 30, 1939

Gross earnings of national banks in the year ending June 30, 1939, were $\$ 839,000,000$, or $\$ 11,000,000$ less than those of the preceding year. Interest and discount on loans equaled $\$ 377,000,000$ and interest and dividends on bonds, stocks and other securities $\$ 304,000,000$. Expenses were $\$ 9,000,000$ less than in the preceding year, amounting to $\$ 577,000,000$. Of this, salaries, wages, and fees accounted for $\$ 250,000,000$ and interest on deposits and borrowed money, for $\$ 118,000,000$. Net operating earnings were $\$ 262,000,000$, which were increased by $\$ 212,000,000$ of recoveries. Recoveries on loans were $\$ 33,000,000$; recoveries on bonds, stocks and other securities, $\$ 35,000,000$; and profits on securities sold, $\$ 130,000,000$. Losses and depreciation of $\$ 249,000,000$ were $\$ 31,000,000$ more than in the preceding year. Losses on loans were $\$ 85,000,000$ and losses on bonds, stocks, and other securities, $\$ 116,000,000$. Net additions to profits were thus $\$ 225,000,000$ and were $\$ 17,000,000$ more than those in the previous year and were 6.75 percent of capital funds.

Interest and discount on loans accounted for nearly 45 percent of the gross earnings in the year ending June 30, 1939, varying in ratios from less than 33 percent in Federal Reserve district No. 7 to approximately 57 percent in district No. 12. Interest and dividends on investments were 36 percent of total earnings, with the banks in district No. 11 showing the smallest ratio of 25 percent and those in district No. 3 the largest ratio of 46 percent. Salaries, wages, and fees were 30 percent of total earnings, ranging from nearly 24 percent in district No. 3 to slightly more than 33 percent in district No. 9. The
net operating enrnings to gross earnings showed averages of from $25 \not / 2$ percent in district No. 9 to 35 percent in district No. 3 .

Interest and discount on loans to total loans were $4 \frac{1}{2}$ percent and varied from less than $31 / 2$ percent in district No. 2 to $5 \frac{2}{3}$ percent in district No. 11. Interest and dividends on bonds, stocks, and other securities averaged $2 \frac{1}{2}$ percent of total investments, the banks in district No. 2 showing the lowest ratio of 2 percent while the banks in district No. 3 showed the highest ratio of nearly $3 \frac{1}{2}$ percent. Profits on securities sold during the period were 1 percent of total investments, varying from $3 / 4$ percent in district No. 9 to $11 / 3$ percent in district No. 12 .

Net operating earnings were 8 percent of total capital funds, the lowest ratio being 6 percent in district No. 1, and the highest ratio 11 percent in district No. 12. The net additions to profits for the period were $63 / 4$ percent of capital funds, the average ranging from $41 / 4$ percent in district No. 2 to $10 \frac{1}{4}$ percent in district No. 10 .

The proportion of gross earnings which were preserved as net additions to profits before dividends were better among the larger banks than among the smaller for the calendar year 1938. For banks with deposits of more than $\$ 100,000,000$ the ratio of net additions to profits to gross earnings was 26.8 percent while for banks of $\$ 500,000$ deposits or less it was 18.8 percent.

Changes in the earnings and expense figures of national banks in the year ending June 30, 1939, together with a comparison of earnings and expense figures for each of the 5 years ended June 30, 1939, appear in the accompanying tables:

Earnings and expenses of national banks for year ending June 30, 1939

years ended June 30, 1927 to 1932. Beginning July 1, 1932, however, and continuing until Dec. 31, 1935 , profits on securities sold were included with recoveries on bonds, stocks
and other securities
Includes stock dividends of $\$ 2,243,000$
Includes stock dividends of $\$ 7,342,000$.
Includes stock dividends of $\$ 30,141,000$.
Revised.
1 Includes stock dividends of $\$ 21,853,000$
Note.-The number of banks, capital stock, surplus, and capital funds used in this able are as of end of period.

## SIZE OF NATIONAL BANKS

There has been a considerable increase in the size of national banks in the continental United States in the last 20 years. On June 30, 1920, there were 8,024 national banks and at that time there were 30,000 banks in all, contrasted with 15,000 in 1939. The national banks had an aggregate of loans and investments of $\$ 17,500,000,000$ in 1920. On June 30, 1939, there were 5,203 national banks with $\$ 21,000,000,000$ loans and investments. The average size of national banks in 1920 was $\$ 2,200,000$ of loans and investments. This had increased more than two-fold by 1939 when the average size was $\$ 5,700,000$ in deposits. In 1920, 66 percent of all national banks had loans and investments of $\$ 1,000,000$ or less. This ratio in 1939 was 50 percent. In 1939, 70 banks had $\$ 50,000,000$ or more of deposits and 220 banks had between $\$ 10,000,000$ and $\$ 50,000,000$. In 1920, there were only 37 banks with loans and investments of $\$ 50,000,000$ or more. The average size of the 70 banks in 1939 with deposits of $\$ 50,000,000$ or more was $\$ 246,000,000$. The 37 banks in 1920 of this size averaged $\$ 141,000,000$. The banks with over $\$ 50,000,000$ in 1939 had 56 percent of loans and investments of all national banks. This size of banks had 30 percent of the loans and investments for national banks in 1920.

The classification of national banks was by size of loans and investments in 1920, and was made a good many years ago. Because of the large volume of cash funds held in 1939 it seemed better to classify on the basis of deposits in that year. It is likely that a classification on the basis of deposits in 1920 would have yielded practically the same result as that on the basis of loans and investments.

The following tabulation shows the distribution by size of national banks in 1920 and 1939:

Size of national banks: On the basis of loans and investments, June 30, 1920, and deposits, June S0, 1939

## aFFILIATES AND HOLDING COMPANY AFFILIATES OF NATIONAL BANKS

The Federal statute requires each national bank to obtain and submit to the Comptroller periodically reports of its affiliates as defined in section 2 (b) and (c) of the Banking Act of 1933 as amended, unless whaived by the Comptroller. On October 2, 1939, the date of
the latest call, there were 960 national banks with 13,240 affiliates, 27 of which were holding-company affiliates. Under the waiver of requirement for reports of affiliates it was necessary for the banks to submit and publish reports of only 695 of their affiliates. The 27 holding company affiliates controlled 188 national banks, varying in number from 1 to 47 banks.

## NATIONAL BANKS IN THE TRUST FIELD

The development of trust activities in national banks is reflected in a substantial manner by statistics compiled for the fiscal year ended June 30, 1939, which revealed that 1,884 of these institutions held fiduciary permits, with a combined capital of $\$ 1,283,456,939$, and banking assets of $\$ 28,828,243,612$, representing 36.17 percent of the number, 81.95 percent of the capital, and 86.88 percent of the assets of all banks in the national banking system.

Trust departments had been established by 1,534 of these banks and 136,451 individual trusts were being administered with assets aggregating $\$ 9,283,907,276$. Seven hundred and ninety of these banks were also administering 16,750 corporate trusts and were acting as trustees for note and bond issues amounting to $\$ 9,768,726,724$. Compared with 1938 these figures represent an increase of 796 or 0.59 percent in the number of individual trusts being administered, a reduction of $\$ 135,109,766$ or 1.43 percent in the volume of individual trust assets under administration; a decrease of 359 or 2.10 percent in the number of corporate trusts with a reduction of $\$ 449,679,948$ or 4.40 percent in the volume of note and bond issues outstanding under which national banks had been named to act as trustee.

Segregation of the number of fiduciary accounts in national banks reveal that 70,839 or 46.24 percent were those created under private or living trust agreements; 65,612 or 42.83 percent were trusts being administered under the jurisdiction of the court and the remaining 16,750 or 10.93 percent were trusteeships under corporate bonds or note-issue indentures. Private trust assets comprised $\$ 7,380,865,555$ or 79.50 percent of the total assets under administration while the remaining $\$ 1,903,041,721$ or 20.50 percent belonged to court trusts.

An analysis of the $\$ 7,817,871,227$ of invested trust funds belonging to private and court trusts under administration reveal that 48.44 percent were in bonds, 32.16 percent in stocks, 7.04 percent in real estate mortgages, 7.33 percent in real estate, and 5.03 percent consisting of miscellaneous assets.

The development of these activities in national banks is emphasized by comparing the record in 1939 with that of 6 years earlier, 1933, which reflects an increase of 36,095 or 35.97 percent in the number of individual trusts being administered; an increase of $\$ 2,972,249,523$ or 47.09 percent in the volume of individual trust assets under administration; and an increase of 5,966 or 55.32 percent in the number of corporate trusts.

Gross earnings from fiduciary activities aggregated $\$ 31,685,000$ for the fiscal year ended June 30, 1939, as against $\$ 33,447,000$ in 1938, a reduction of $\$ 1,762,000$ or 5.27 percent.

Three hundred and forty-three national banks were acting as trustees under 1,493 insurance trust agreements involving $\$ 66,789,867$ in proceeds from insurance policies while 704 national banks had been
named to act as trustees under 15,533 insurance trust agreements not yet matured or operative supported by insurance policies with a face value aggregating $\$ 589,663,725$.

Two hundred and fifty-nine banks were acting as transfer agents for 3,558 accounts involving $\$ 3,386,784,612$, and 365 banks were acting as registrars of stocks and bonds for 4,772 accounts involving $\$ 4,591,425,805$.

An analysis of the new trust accounts placed on the books of the national banks between June 30, 1938, and June 30, 1939, reveal that 237 banks were named as trustees for 797 bond and note issues aggregating $\$ 651,987,692$; 837 banks were named to act as individual trustees under 5,916 agreements involving $\$ 210,072,438 ; 756$ banks were named to act under 2,705 executorships involving $\$ 169,484,603$; 546 banks were named as administrators under 1,335 appointments involving $\$ 29,390,538 ; 501$ banks were named under 2,036 guardianships involving $\$ 9,693,975 ; 8$ banks were named to act as assignees in 9 instances involving $\$ 1,144,878 ; 21$ banks were named to act in 35 receiverships involving $\$ 309,160 ; 122$ banks were named to act as committee of estates of lunatics in 273 cases involving $\$ 3,478,356$; and 389 banks were named to act 5,461 times in miscellaneous fiduciary capacities other than those enumerated above involving $\$ 1,069,381,438$.

Sixty-three banks were named to act as registrar of stocks and bonds in 145 cases involving $\$ 743,012,504$ while 54 banks were named to act as transfer agents in 146 instances involving $\$ 48,298,287$.

The following tables show the activities of national banks in the trust field on June 30, 1939 and June 30, 1933, and by size of bank. Detailed tables in the appendix show trust activities first, according to capital of the banks; second, according to Federal Reserve districts, and third, an analysis of the type of investments held in trust.

## NATIONAL BANK NOTES OUTSTANDING

There were, as of October 31, 1939, $\$ 180,700,000$ of national bank notes still outstanding.

## BANKS IN THE DISTRICT OF COLUMBIA

In addition to the national banks in the District of Columbia, which are supervised by the Comptroller of the Currency, the Code of Law for the District places under the Comptroller's supervision, savings banks and trust companies having a banking office in the District. On June 30, 1939, there were 13 of such institutions, 5 of which were trust companies, and 8 were stock savings banks. These 13 associations and 9 national banks in the District, a total of 22, had loans and discounts aggregating $\$ 105,000,000$, an increase of $\$ 6,000,000$ over the year earlier. Their investments of $\$ 131,000,000$ were approximately the same as the year before. Cash and balances with other banks, including reserve balances, increased by $\$ 9,000,000$ to $\$ 115,000,000$. Total deposits were $\$ 324,000,000$, an increase of $\$ 17,000,000$ in the year. The demand deposits of $\$ 213,000,000$ included $\$ 175,000,000$ deposits of individuals, partnerships and corporations, an increase of $\$ 9,000,000$. Time deposits amounted to $\$ 111,000,000$, all but $\$ 12,000,000$ of which were savings deposits. Surplus, profits, and reserves accounted for $\$ 27,000,000$ of the capital funds which totaled $\$ 47,000,000$. Fipures with respect to the asset and liability items of banks in the District of Columbia on June 30,1939 , appear in the accompanying tables:

## Reserves of Nonmember Banks in the District of Columbia

The Code of Law for the District of Columbia requires each bank and trust company doing business in the District and not a member of the Federal Reserve system to establish and maintain reserves on the same basis and subject to the same conditions as are prescribed for national banks located in the District of Columbia, except that the reserves are carried with such designated agency or agencies as are approved by the Comptroller of the Currency.

The nonmember banks held net demand deposits subject to reserve and time deposits on each of the four calls in the year ending October 31,1939 , averaging from $\$ 35,000,000$ to $\$ 38,500,000$. The ratio of reserves required against such deposits was less than 11 percent, while the ratio of reserves held ranged from $16 \frac{1}{2}$ percent to 20 percent. Figures showing the reserves of nonmember banks appear in the accompanying table:

Reserves of nonmember banks in the District of Columbia at date of each call during year ending Oct. 31, 1939
[In thousands of dollars]

Earnings and Expenses of Banks in the District of Columbia
Gross earnings of all active banks in the District of Columbia in the year ending June 30 , 1939, were $\$ 11,738,000$, or $\$ 50,000$ less than in the previous year. Interest and discount on loans accounted for $\$ 5,090,000$ and interest and dividends on bonds, stocks, and other securities $\$ 3,611,000$. Expenses were $\$ 86,000$ more than in the preceding year, amounting to $\$ 8,496,000$. Of this $\$ 3,912,000$ were salaries, wages, and fees, and $\$ 1,635,000$ interest on deposits and borrowed money. Net earnings were $\$ 3,242,000$, which were increased by $\$ 1,980,000$ of recoveries. Recoveries on loans were $\$ 209,000$, recoveries on bonds, stocks, and other securities $\$ 507,000$, and profits on securities sold $\$ 1,210,000$. Losses and depreciation at $\$ 2,099,000$ were $\$ 49,000$ less than in the preceding year. Losses on loans were $\$ 258,000$, and losses on bonds, stocks, and other securities $\$ 964,000$. Net additions to profits before dividends were $\$ 3,123,000$, or $\$ 497,000$ more than in the previous year, and was 6.76 percent of capital funds. Figures of earnings and expenses appear in the accompanying table:

## Earnings and axpenses of banks in the District of Columbia for the year ending June 30, 1939

[In thousands of dollars]

## Building and Loan Associations in the District of Columbia

The assets of the 26 building and loan associations operating in the District of Columbia under the supervision of the Comptroller of the Currency on June 30, 1939, amounted to $\$ 132,000,000$, an increase of $\$ 9,000,000$ in the year. Loans increased more than $\$ 8,000,000$ to $\$ 123,000,000$, and investments of $\$ 1,400,000$ were about the same as the year previous. Shares of stock outstanding increased more than $\$ 5,000,000$ to $\$ 117,000,000$, and surplus and profits of $\$ 10,000,000$ showed an increase of $\$ 1,000,000$. Changes in the principal items of assets and liabilities of District building and loan associations are shown in the accompanying table:

## District of Columbia Credit Unions

At the close of business October 31, 1939, there were 25 active credit unions operating in the District of Columbia which were recommended for approval by the Comptroller and licensed by the District Commissioners under the provisions of the District of Columbia Credit Unions Act, approved June 23, 1932.

On June 30, 1939, there were 24 active District of Columbia credit unions with loans of $\$ 1,205,000$, investments of $\$ 174,000$, and cash and deposits in banks of $\$ 120,000$, which increased respectively in the year $\$ 308,000, \$ 79,000$, and $\$ 9,000$. Fully paid and installment shares were $\$ 1,364,000$, an increase of $\$ 349,000$ in the year, and undivided profits and reserves increased by $\$ 38,000$ to $\$ 110,000$. Changes in the principal items of assets and liabilities of these credit unions appear in the accompanying table:

## CHANGES IN PRINCIPAL ITEMS OF ASSETS AND LIABILITIES OF STATE BANKS, YEAR ENDING JUNE 30, 1939

Federal law requires the Comptroller of the Currency to assemble and publish in the annual report figures with respect to the assets and liabilities of all State banks. Of these 64 were private banks; 552, mutual savings banks; and 9,321 , commercial banks. In the latter group are included trust companies and stock-savings banks. In years previous to 1936 separate figures were given for these two groups. However, in recent years it has become clear that there is little to distinguish commercial banks, trust companies, and stocksavings banks. Most banks in the latter two groups engage in commercial activities and many State commercial banks exercise trust powers.

On June 30, 1939, State banks had loans and discounts, including overdrafts, of $\$ 12,943,000,000$, a decrease of $\$ 34,000,000$ in the year. State commercial banks held $\$ 7,976,000,000$ of loans, which increased $\$ 18,000,000$ in the year. Mutual savings banks had $\$ 4,895,000,000$ of loans, nearly all of which were on real estate. State commercial banks had $\$ 2,275,000,000$ of such loans. Open market paper, loans to banks and miscellaneous loans, including commercial, industrial and agricultural loans, of commercial banks amounted to $\$ 4,829,000,000$, approximately the same as a year earlier.

United States Government direct obligations held by commercial banks aggregated $\$ 5,289,000,000$, an increase of $\$ 398,000,000$ during the year, and mutual savings banks increased their holdings of such securities by $\$ 259,000,000$ to $\$ 2,654,000,000$. Total United States Government direct obligations held by all State banks increased $\$ 751,000,000$ to $\$ 8,324,000,000$. Obligations guaranteed by the United States Government held by commercial banks increased by $\$ 344,000,000$ in the year to $\$ 1,257,000,000$. Mutual savings banks held $\$ 389,000,000$ of such securities, an increase of $\$ 99,000,000$ during the year. Obligations of States and political subdivisions held
by commercial banks aggregated $\$ 1,504,000,000$ on June 30, 1939, which was an increase of $\$ 181,000,000$. Such holdings by mutual savings banks decreased $\$ 70,000,000$ to $\$ 634,000,000$. Other bonds, notes, and debentures held by commercial banks amounted to $\$ 1,538,000,000$ and by mutual savings banks, $\$ 1,546,000,000$, decreases of $\$ 99,000,000$ and $\$ 86,000,000$, respectively. Corporate stocks held by all State banks, including stock of Federal Reserve banks, aggregated $\$ 497,000,000$, a decrease of $\$ 66,000,000$ in the year.

Cash in vault of State banks on June 30, 1939; amounted to $\$ 512,000,000$, approximately the same as a year earlier. Balances with other banks, including reserve balances, aggregated $\$ 9,040,-$ 000,000 , an increase of $\$ 1,536,000,000$ during the year. Most of the balances with other banks were reported by State commercial banks.

Mutual savings banks held virtually no demand deposits. Such deposits held by commercial banks aggregated $\$ 16,601,000,000$, an increase of $\$ 2,013,000,000$. Private banks held $\$ 632,000,000$ of such deposits, an increase of $\$ 164,000,000$ during the year. Commercial banks held demand deposits of individuals, partnerships, and corporations of $\$ 11,545,000,000$, an increase of $\$ 1,173,000,000$. Savings deposits amounted to $\$ 5,852,000,000$ in commercial banks and $\$ 10,-$ $382,000,000$ in mutual savings banks, an increase of $\$ 206,000,000$ and $\$ 236,000,000$, respectively. The total time deposits of all State banks increased by $\$ 374,000,000$ to $\$ 17,871,000,000$. Total deposits of all State banks increased $\$ 2,543,000,000$ in the year and amounted to $\$ 35,107,000,000$ on June 30,1939 , of which amount $\$ 24,009,000,000$ were in commercial banks, $\$ 10,433,000,000$ in mutual savings banks, and $\$ 665,000,000$ in private banks.

Mutual savings banks had no capital stock, but their surplus, undivided profits, and reserves amounted to $\$ 1,335,000,000$, an increase of $\$ 8,000,000$ during the year. Total capital funds of commercial banks were $\$ 3,471,000,000$, a decrease of $\$ 9,000,000$ in the year.

Figures with respect to the above-mentioned asset and liability items appear in the accompanying table:

Changes in principal items of assets and liabilities of State banks, year ending June 30, 1939
[In millions of dollars]

## DISTRIBUTION OF ALL BANKS

On June 30, 1939, there were 15,146 banks in the United States and its possessions, of which 5,209 , or 34 percent, were national banks. Of these, 13,618 , or 90 percent, were insured banks. All banks had deposits of $\$ 64,600,000,000,46$ percent of which was in national banks and 83 percent of which was in insured banks. There were 552 mutual savings banks which had $\$ 10,433,000,000$ of deposits.

## CHANGES IN NUMBER OF BANKS, BRANCHES, AND BANKING OFFICES IN THE YEAR ENDING JUNE 30, 1939

As has been the case in other recent years, the number of banking offices in the continental United States decreased during the 12 months ending June 30, 1939. At the end of the year the total banking offices in this country were 18,681 of which 15,074 were head offices of banks and 3,607 were branches. These figures are much in contrast with conditions in 1920 when there were approximately 30,000 banks and 1,200 branches. During the year banks decreased by 216 in number and branches increased by 48. During the year national banks decreased by 39 , being 5,203 at the end of the year, while national bank branches increased by 23. State member banks at 1,127 increased by 31, while State commercial banks which were insured, but not members of the Federal Reserve system, those not insured, mutual savings banks not insured, and private banks, each decreased, and their numbers were respectively, $7,236,890,554$, and 64 . During the year 3 national banks were organized and 11 State banks were converted into national banks. Forty-two national banks were eliminated because of consolidations, absorptions, or suspensions, and 11 national banks were converted into State banks. Eight de novo branches of national banks were authorized during the year and 13 banks were succeeded by branches of national banks. The national system lost 7 branches by voluntary liquidation or otherwise. Figures with respect to banks and branches are given in the accompanying table:

## REPORTS FROM NATIONAL BANKS

National banks were, in accordance with provisions of section 5211 of the Revised Statutes, called upon to submit four reports of condition during the year ending October 31, 1939. Reports were required as of December 31, 1938, March 29, 1939, June 30, 1939, and October 2, 1939. Uniform instructions and forms adopted by the Federal bank supervisory agencies and a number of State authorities were used in submitting these reports. In order to relieve banks of the burden of preparing detailed call reports four times a year, the report of condition form used by national banks for the call as of October 2, 1939, was reduced materially in size by eliminating schedules providing for detailed classifications of the loans and investments, etc., appearing in previous report forms. It is the present intention of the Comptroller to use the "short" form for future spring and autumn calls on banks under his supervision. Summaries from all condition reports by States were published in pamphlet form. National banks were also required by the statute to obtain reports of their affiliates and holding company affiliates other than member banks and to submit such reports to the Comptroller as of the four dates for which condition reports of the banks were obtained.

Under the general powers conferred upon him by law, the Comptroller required from eacb national bank two semiannual reports of
earnings, expenses, and dividends, one for the half year ending December 31, 1938, and one for the half year ending June 30, 1939; also reports of condition of all domestic and foreign branches of national banks for the first three calls in the year ending October 31, 1939. No reports of branch banks were called for as of October 2, 1939, the former practice of obtaining such reports for each call date having been abandoned with a view to requiring branch reports only annually in the future, as of the date of the midsummer call.

National banking associations authorized to act in a fiduciary capacity were called upon to submit reports of their trust departments as of the close of business on June 30, 1939. Reports of branch-bank trust departments heretofore required from national banks concerned were discontinued during the year.

In accordance with section 298 of the Code of Laws of the District of Columbia banks other than national banks in the District were required to make to the Comptroller all condition reports and reports of earnings and dividends obtained from national banks during the year. Building and loan associations and credit unions in the District of Columbia under the supervision of the Comptroller were required to submit seniannual reports of their assets and liabilities and receipts and disbursements, one for the 6 months ending December 31, 1938, and one for the 6 months ending June 30, 1939.

Detailed figures for reports of condition and earnings and dividends are published in the appendix to this report.

## EXAMINATION OF NATIONAL BANKS

The most important duty of the Bureau of the Comptroller of the Currency is that of examining national banks with the end in view of correcting unhealthy situations to maintain national banks continuously in sound operating condition. The National Bank Act requires that each national bank be examined twice each year. In addition to these regular examinations, special exammations are conducted for various reasons, important among which are inquiries into the condition of banks the condition of which is regarded as unsatisfactory.

During the 12 months ending October 31, 1939, 10,506 examinations of banks, 3,162 examinations of branches, 2,381 examinations of trust departments, and 132 examinations of affiliates were conducted. Twenty-five State banks were examined in connection with conversions to or consolidations with national banks. Investigations were also conducted in connection with applications for 15 new charters and 31 new branches.

The machinery for conducting these examinations has been built up over the years. The function is administered by the chief national bank examiner in Washington. There are 12 examining districts in the country which coincide with Federal Reserve districts. The function of examining in each of these districts is administered by a district chief national bank examiner. There are assigned to him an appropriate number of examiners, assistant examiners, clerks, and stenographers. In Washington, the chief national bank examiner has seven assistants who review for him the reports of examination made in the field and an examiner is assigned to review reports of oxamination of trust departments. There are 807 persons in the

Examining Division, of which 767 are in the field and 40 are in Washington. The expense of examining banks is assessed against the banks examined.

National bank examiners are appointed by the Comptroller of the Currency, with the approval of the Secretary of the Treasury. The appointment is made after an investigation of the individual's fitness and after he has successfully passed an oral and written examination and has been graded on his experience and personality. It has long been the practice to advance assistant examiners to these positions. The 12 examining districts are divided into subdistricts, each in charge of an examiner. There are usually more examiners than subdistricts and therefore many examiners are unassigned and work out of the district headquarters office under direct instruction of the district chief examiner.

Examiners are assisted in conducting an examination by assistant examiners and clerks. The principal duty of an examiner is to determine the bank's condition by an analysis and appraisal of assets; to ascertain whether or not the bank's affairs are being so conducted as to indicate capable and responsible management and to satisfy himself that the provisions of law covering the conduct of business are being properly adhered to.

## LIQUIDATION OF INSOLVENT NATIONAL BANKS

In addition to other duties imposed by law, the Comptroller of the Currency is authorized under the National Banking Act of 1864, as amended, to appoint receivers for national banks when satisfied of the insolvency thereof. Receivers so appointed are required, under the direction and supervision of the Comptroller, to liquidate the assets of banks involved for the benefit of depositors and other creditors. In order to effectively administer such appointments of receivers and to supervise and direct the activities thereof in the liquidation of closed national banks, it became necessary early in the history of the Comptroller's Bureau to assign a personnel unit thereof to the handling of such matters. This unit, under the designation of the Division of Insolvent National Banks, now handles one of the major activities of the Bureau.

During the year ended October 31, 1939, there were four failures of national banks, involving total deposits of $\$ 1,322,500$. All deposit accounts of these four banks were insured up to $\$ 5,000$ by the Federal Deposit Insurance Corporation. In addition to such four failures receivers were, however, appointed in two other instances to levy and collect stock assessments covering deficiencies in value of assets sold, or to complete unfinished liquidation of banks formerly in voluntary liquidation. There bave been 17 national-bank failures since the banking holiday of 1933 , with total deposits at failure of $\$ 11,848,952$. All deposit accounts of 14 of these banks, which failed from 1934 to 1939 , inclusive, after the insurance of bank deposits became effective, were insured up to $\$ 5,000$ by the Federal Deposit Insurance Corporation.

During the past year substantial progress has been made in completing the liquidation of failed national banks. Receiverships in process of liquidation have been reduced from a total of 520 banks in charge of 201 receivers to 367 banks in charge of 133 receivers, while
the book value of the unliquidated assets of such banks has been correspondingly reduced from 550 million to 450 million dollars, and the estimated values thereof from 173 million to 128 million dollars. During the year, a total of 245 dividend distributions were authorized, making available to depositors and other creditors the aggregate sum of 29 million dollars.

Total costs of liquidation of insolvent national banks during the year amounted to an average of 11.28 percent of total collections from all sources, including offsets allowed. This average cost closely follows the trend for the past several years and may be regarded as approximately normal in amount in view of the increasing average liquidation age of remaining receiverships. It may be pointed out in this connection that average percentage costs of liquidation are comparatively low during the early years of receivership administration but invariably increase progressively from date of failure to date of final closing. Furthermore, costs of liquidation have during recent years been considerably increased by reason of interest payments to the Reconstruction Finance Corporation and to lending banks upon loans made to receivers for dividend payment purposes. A summary of total receipts and disbursements of receivership funds resulting from the liquidation of insolvent national banks during the past year is given in the following table:

Liquidation statement, summary for year ended Oct. 31, 1939

|  | Total all receiverships, 526 | District of Columbia State bank receiverships, 13 | National bank receiverships, 513 |

1 Credit adjustment in accordance with revised figures submitted by receivers.
During the past year the liquidation of 159 reeeiverships, with total deposits at failure of $\$ 123,971,181$, has been completed and all affairs of such receiverships finally closed. The depositors and other creditors of these receiverships, upon the completion of all dividend
distributions, are found to have received payments amounting to an average of 76.1 percent of amounts due. The average period of time required to complete the liquidation of each of these banks was 6 years and 5 months. Costs involved in the liquidation of these receiverships do not appear excessive since the total thereof amounted to but 7.34 percent of total collections from all sources. A statement of total receipts and disbursements of receivership funds involved in the liquidation of these 159 insolvent national banks is given in the following table:

Liquidation statement, 159 administered receiverships finally closed, year ended Oct. 31, 1939

The 367 receiverships remaining in process of liquidation at this time consist principally of the larger banks suspended during recent years. These larger receiverships have been found to involve a greatly increased number and complexity of liquidation problems requiring solution. The proper disposition of these more complex problems and situations, among which may be mentioned the disposition of large and involved trust departments, the conclusion of complicated and protracted litigation instituted both by and against receivers and the greater difficulty encountered in the disposal of large volumes of real estate and securities assets has, of course, correspondingly lengthened the average period of time required to complete liquidation.

While the returns to depositors of any given bank are limited by the nature of the assets found by the receiver upon his appointment, the extent to which these assets may have been hypothecated for borrowed money or for secured deposits and by the conditions under which their liquidation must be accomplished, nevertheless administration of the 367 receiverships still in process of liquidation has been productive of favorable results. The depositors and other creditors of such receiverships are found to have received dividend payments amounting to an average of 71.7 percent of their claims
with the probability of future distribution of some additional amounts. Total costs of liquidation of these receiverships to date have amounted to but 5.48 percent of total recoveries. In other words, of each dollar realized from the liquidation of assets and stock assessments, 94.52 cents have been available for return to depositors and other creditors. It will be impossible to effect termination of all existing receiverships during the forthcoming year although substantial progress to that end will be made.

A statement of total receipts and disbursements of receivership funds in connection with the liquidation to date of the 367 receiverships still in process of liquidation is given in the following table:

Liquidation statement, 867 active receiverships as of Oct. 31, 1999

Data as to deposits and amounts of dividend payments, by percentage groups, with respect to the 367 receiverships still in process of liquidation and for all other receiverships administered from the year 1865 to October 31, 1939, are given in the following table:

Number and deposits of national and District of Columbia State banks ${ }^{1}$ placed in receivership period Apr. 14, 1865, to Oct. 31, 1939, by groups according to percentages of dividends paid to Sept. 30, 1939

${ }^{1}$ Including building and loan associations.
Deposits for banks restored to solvency unavailable.
Including 1 bank eliminated as an insolvent national bank through revocation of receiver's commission as of the date of issuance.

- Exclusive of 1 receivership finally closed during year ended Oct. 31, 1933, but reopened as a receivership and again finally closed during the year ended Oct. 31 , 1938.

Administrative policies of the Comptroller's office with regard to liquidation and the methods urged upon receivers in the discharge of their duties are determined and limited by the fact, kept constantly in mind, that the Comptroller of the Currency is by statute a trustee who holds and liquidates the assets of each insolvent national bank for the benefit of the depositors and other creditors through receivers appointed for such purpose. Expenses of liquidation are kept at a minimum and continual pressure has been, and is now, exerted on receivers to bring about the early termination of the trusts in their charge. An effort is also made to avoid such severity in liquidation methods as would work unnecessary hardship on individual debtors or would cripple or disrupt the community without, however, losing sight of the needs of depositors for the return of their deposits at the earliest practicable date.

The liquidation of those insolvent national banks which suspended during the banking holiday of 1933, or just prior thereto, presented new problems of administration requiring prompt solution. Among these was the proper method to be employed in the liquidation of the vast amount of general market securities held in the portfolios of these banks as secondary reserves or acquired from collateral held to secure the obligations of debtors. Experience quickly proved that receivers acting independently of each other were in no position to sell these securities efficiently upon a falling market and likewise demonstrated that efforts to do so introduced a confusing element into the national security markets, and in fact defeated the very purpose thereof. The Comptroller, therefore, early in 1932 established an office in New York City, headed by a special liquidator of securities, to assist receivers in the liquidation of this type of asset. General market securities, at first consisting of bonds only but later stocks and other types of securities, were forwarded by receivers to the Federal Reserve Bank of New York, where they were held for safekeeping until sales could be effected. Sales were negotiated by the special liquidator from time to time after a careful study of the securities to be sold and the capacity of the market to absorb offerings made, having in mind the interests of depositors and other creditors for whose benefit the sales were to be effected. However, need of this special provision for the liquidation of securities no longer obtains, and arrangements have been made for the closing of the special liquidator's office as of November 30, 1939. During the period of nearly 8 years since organization of the special liquidator's office the total proceeds of all sales effected have amounted to $\$ 163,438,463$. Of this total $\$ 155,084,084$ was realized from the sale of bonds having a par value of $\$ 227,590,598$, while the balance of $\$ 8,354,379$ resulted from sales of stocks and other types of securities.

Another major problem was encountered in connection with the immense amount of real estate acquired through foreclosures and settlements consummated both before and after suspension of the banks involved. All types of real estate were held in large volume, of which prompt and satisfactory liquidation was impossible because of the limited demand therefor and a falling market. If the real estate were to be held for any considerable time, large expenditures for operation, taxes, and rehabilitation were inevitable, while if forced sales were attempted by the receivers, the resulting sacrifices would have been disastrous to the depositors. Such disbursements
as were necessary to preserve the creditors' equities were authorized with, however, the imposition of rigid restrictions on rehabilitation costs and the refusal to authorize expense of such nature without reasonable assurance that the funds so invested would be recovered. The situation required a solution that would relieve the depositors of this burden and in 1935 resort was had to auction sales with satisfactory success. A total of 182 advertised sales of this character involving 7,659 separate parcels of real estate owned by 305 receiverships have been held and this aid to liquidation has been a great factor in expediting distributions to creditors and in the prompt termination of scores of receiverships. The auction method is now being used much less extensively and is largely confined to those cases where a normal demand for the type of real estate held does not exist or where such action will remove the immediate obstacle to termination of a receivership. During the past year receivers have sold, with and without the aid of auction sales, a total of 3,705 parcels of real property, but there remains unsold an aggregate of 9,323 parcels of which 78 percent is held by two receiverships. The remaining realestate holdings are valued by the receivers at approximately 45 million dollars and consist of 162 bank buildings, 748 store or office buildings, 458 apartment buildings, 4,567 dwellings, 275 farms, 2,482 items of vacant urban property, and 631 miscellaneous parcels of other types.

The development of the procedure to be followed in obtaining newly available loans from the Reconstruction Finance Corporation, and the distribution of the proceeds thereof to creditors likewise presented a new problem. These loans were obtained in large volume, but the age and advanced stage of liquidation of most of the active receiverships now preclude any further benefits being obtained from this source although loans can still be procured wherever circumstances warrant. Since the passage of the Reconstruction Finance Corporation Act in 1932, 2,321 loans have been obtained for the benefit of 1,125 receiverships on which advances of 395 million dollars were made by the Corporation. Practically all of the original loans were repaid in full with interest, the loss ratio being only five one-thousandths of 1 percent of the total advances. Only 13 of theseloansremain unpaid on which the balances due as of October 31, 1939, amounted to $\$ 1,786,227$. Many banks have found these loans to be desirable investments, and during the last 3 years, 94 receiverships have obtained loans aggregating $\$ 94,659,760$ from 45 lending banks. Wherever possible, these loans are placed with banks in preference to the Corporation. All of such loans have been repaid with interest except 6, on which, as of October 31, 1939, the unpaid balances amounted to $\$ 856,100$. No loss is anticipated to any bank by reason of any of these advances.

The Comptroller's Bureau has, through the Division of Insolvent National Banks, taken a very active part in the management and liquidation of each receivership. In accordance with provisions of the statute, all compromise settlements and sales of assets are submitted to the Comptroller for consideration and approval before submission by the receivers to courts of competent jurisdiction. All questions of offset as well as the rights of alleged preferred or secured creditors are submitted to the Comptroller for consideration and instructions. Receivers are not permitted to make expenditures of
trust funds for the preservation or protection of assets except as to very minor items without first informing the Comptroller of the facts and receiving necessary authority therefor. All general administrative expense is carefully reviewed and receivers must have the approval of the Comptroller's office for the employment and salaries of those persons whose assistance is considered necessary in the handling of liquidation activities. The careful supervision and management of receiverships require sufficient competent personnel in the Division of Insolvent National Banks to perform efficiently the various necessary functions thereof and, in order to handle the large volume of work involved in these numerous activities, it has been necessary to greatly expand the personnel of the Division from time to time. The Division of Insolvent National Banks now consists of 290 Washington office employees under the direction of a chief supervising receiver assisted by two supervising receivers in charge of the various Division activities. This supervisory personnel was supplemented as of September 30, 1939, by 135 field receivers and approximately 1,500 field receivers' assistants of various kinds. The present Washington office and field personnel is, however, much reduced from the maximum thereof, since during the period of extreme activity following the national banking holiday, there were approximately 425 Washington office employees, and 5,000 field receivers and receivers' employees. The present Division personnel will continue to decrease as the volume of Division activity diminishes and particular functions thereof are terminated. Costs of maintenance of the Washington office and personnel of the Insolvent Division are ratably assessed against insolvent national banks, while salaries of field personnel and other costs are paid directly from funds of particular receiverships involved.
-In carrying out the task of supervision numerous policies have been developed which have been impressed upon both the office and field personnel. Receivers have been expected to use constructive methods in dealing with the individual debtor, permitting him to continue as a productive member of the community while programs of payment were determined upon and carried out. While this may have slightly prolonged the process, it has saved much of the dislocation and distress that usually follows upon the liquidation of any body of assets. Receivers have been expected to use meticulous care in the study of each asset, however small, and to overlook no opportunity to make recoveries for the depositors. Bad or doubtful obligations have been freely compromised upon orders of courts of competent jurisdiction. Except in very rare instances no settlements of this type have been made without the debtors having first submitted sworn financial statements for investigation and verification by the receivers. While the collection of such a large volume of miscellaneous assets has necessarily entailed a large amount of litigation, this has been held to a minimum. Just as the details of liquidation receive the benefit of the experience of the administrative section of the office, questions involving litigation are likewise carefully reviewed and supervised by the office of the General Counsel of the Treasury. Therefore, as a general rule litigation has not been instituted in any case unless settlement by negotiation proved impossible and then only when it appeared that probable recoveries would justify the expense. Through the medium of this supervision it has been possible to keep the management of litigation arising in receiverships on a high level as
is evidenced by the fact that an overwhelming proportion of the decisions rendered in such suits have been favorable to the receivers. This is true with respect to both State and Federal court decisions. All cases which come before the Appellate courts receive special consideration by the legal staff. In many instances the briefs prepared by counsel for the receivers are merely revised, although on occasion they are completely rewritten. All cases which come before the United States Supreme Court are handled directly by the General Counsel's office in order to avoid unnecessary expense to receiverships involved and to insure uniformity in method of presentation. Costs of litigation have been closely watched and no attorney is designated to act for a receiver without an agreement in writing that his employment shall be upon a fee basis and that he will abide by the determination of the Comptroller as to the fairness of fees charged. All fee bills presented by attorneys are made the subject of close scrutiny to the end that the charges may be made commensurate with the services rendered and results obtained. Wherever necessary, and to insure the best results, the courts have been asked to fix dates for hearings. upon petitions for orders authorizing sales of real estate, at which hearings dissenting depositors or newly interested buyers may be heard. A similar procedure has been frequently utilized in connection with other important sales, settlements, or compromises and the courts have been very helpful and cooperative in this regard. A uniform method of accounting is used by all receiverships and all receivers. are subject to uniform regulations and instructions, developed as a result of many years of experience. Detailed reports containing transcripts of all transactions and showing the current status of all unliquidated assets are made to the Comptroller quarterly. Receivers are bonded to the Comptroller in such penal amounts as are necessary to protect the interests of creditors, and are in turn expected to require that receivership employees in responsible positions be adequately bonded. A force of examiners in the field is constantly engaged in special assignments or investigations, or in making regular audit examinations of active receiverships.

## MISCELLANEOUS ACTIVITIES OF THE BUREAU

## Organization Division

The Organization Division supervises the activities of national banks where the corporate organization is involved. The Division furnishes general information pertaining to organization to applicants who wish to organize a new national bank. An examiner makes an investigation of the need of a new bank in the community, the probability of its success, and the financial and moral competence of its organizers and proposed directors. If the Comptroller of the Currency approves the application, the Organization Division then prepares and furnishes the applicant with complete organization papers. When these are filed, the charter is issued. The Organization Division receives from every national bank annually lists of all directors elected, copies of their oaths, the official signatures of officers, and any action of the shareholders amending the articles of association. Reports are required of banks in connection with changes of title or location and any changes in the actual capital structure. The bank is also requested to file with the Division a copy of its bylaws.

If a national bank desires to consolidate with another national bank or State bank, to establish or discontinue branches, or to go into voluntary liquidation, or if a State bank wishes to convert into a national bank, the applications are handled by the Organization Division. In addition to the matters described above with respect to national banks, the Organization Division handles similar matters with respect to all banks in the District of Columbia.

Representatives from the Division must be present at conferences having to do with capital readjustments, to suggest methods of procedure as well as plans for capital changes.

Earlier in this report a section deals with transactions handled by this Division during the year.

## Statistical Division

The Statistical Division is operated primarily to enable the Comptroller to effect compliance with certain requirements of law relating to supervision of national banks in the United States and its possessions as well as banks other than national, and certain building and loan associations and credit unions in the District of Columbia.

The major function of the Division is the compilation of figures for the information of Congress, the Comptroller, and others, through the tabulation of numerous reports required to be submitted by statute. Among these reports are at least three reports of condition each year required from every national bank, accompanied by reports of holding company affiliates and other affiliates, as well as reports of condition of domestic branches and of foreign branches once a year, and trust department balance sheets once a year from those banks authorized to exercise fiduciary powers. Reports of earnings, expenses, and dividends are required for each half year.

In the year ended October 31, 1939, tabulations were made by the Division from approximately 30,000 condition reports and 10,500 reports of earnings, expenses, and dividends of national banks.

The statutes require the Comptroller to include in his annual report a summary of the condition of every national bank from which reports are received during the year, as well as resources and liabilities of State and private banks in the various States. The latter is obtained from State supervisors of banking. The Statistical Division also compiles for publication an individual statement of condition of national banks at the close of business December 31.

## Federal Reserve Issue and Redemption Division

This office prepares correspondence and maintains files with respect to authorizing withdrawals of Federal Reserve notes from the Bureau of Engraving and Printing for shipment; advices to Federal Reserve agents and branch Federal Reserve banks, specifying denomination, amount, and serial numbers of notes shipped; advices to Federal Reserve agents covering the amount and denomination of Federal Reserve notes of their bank received daily from the Treasurer of the United States for verification and destruction.

Fragments and charred particles of Federal Reserve notes are referred to this Division for identification and approval before payment.

Complete records are maintained of shipments and issues as to denominations, amounts, number of notes, and serial numbers. Accounting is also maintained of fit notes returned to the Federal Reserve agents by the banks, reissued by the banks to the Federal Reserve agents, the amount of unfit notes, returned to the Comptroller for destruction, and the amount held by the Federal Reserve agent, and the total outstanding of each Federal Reserve district, at the close of each day's business. Every month the Federal Reserve agent's account with the Federal Reserve bank to which he is accredited is verified by this office.

All orders for the printing of Federal Reserve notes are received direct from the Board of Governors of the Federal Reserve System and Federal Reserve notes are consigned direct from the Federal Reserve vault in Washington. Unfit Federal Reserve notes as they are returned to the office of the Treasurer of the United States are cut in half. The upper halves come to this Division for verification and the lower halves are assorted in the office of the Treasurer of the United States. Records are kept of the amount of unfit notes received and actually destroyed by bank of issue, by number of notes, and by denominations since the formation of the Federal Reserve System.

This division also handles retirement and certifications for destruction of national bank notes.

Six hundred and nineteen shipments of Federal Reserve currency were made from Washington, D. C., during the year ending October 31, 1939, to the Federal Reserve agents and Federal Reserve branch banks, aggregating $\$ 1,766,920,000$, and in addition $\$ 35,400,000$ was delivered to the Treasurer of the United States.

Fifty-two weekly reports were furnished the Secret Service Division showing the highest Treasury serial number, face plate and back plate serial number appearing on the Federal Reserve notes shipped. This information is useful in suppressing counterfeits.

Three thousand, one hundred and two lots of unfit Federal Rescrve currency were received for verification by 100 percent count and certification for destruction consisting of $101,282,386$ notes, aggregating $\$ 1,348,701,760$.

Fifty-six lots of national bank notes were received for verification by 100 percent count as certified for retirement and destruction consisting of $1,980,683$ notes aggregating $\$ 27,105,030$.

Three thousand four hundred and forty-one fragmentary or charred Federal Reserve and national bank notes were delivered to this office for identification and approval.

Semimonthly reports were furnished the office of the Comptroller of the Currency, Board of Governors of the Federal Reserve System, and Federal Reserve agents showing total Federal Reserve notes shipped, by bank and by denomination, the amount printed, and the amount in process of printing by bank and by denomination and the amount on hand available for shipment by bank and by denomination.

## Retirement System

As of October 31, 1939, there were 784 active members of the retirement system for national bank examiners, assistant examiners, and clerks. Nine individuals have been retired since the establishment of the system on June 1, 1936, and a total of $\$ 21,481.56$ has
been paid in retirement benefits to date. During the past year, $\$ 2,287.00$ in death benefits were paid.

## ORGANIZATION AND STAFF

On May 1, 1939, Mr. A. J. Mulroney was appointed a Deputy Comptroller of the Currency.

On December 7, 1938, Mr. L. H. Sedlacek was appointed as Chief National Bank Examiner for the Ninth Federal Reserve District, with headquarters at Minneapolis, Minn.

On June 1, 1939, Mr. H. L. Post was appointed as Chief of the Organization Division.

During December 1938 and the year 1939, a number of district chief national bank examiners were shifted from one district to another as follows:

The personnel of the Bureau of the Comptroller of the Currency at the close of the year ending October 31, 1939, consisted of 1,297 persons, of whom 530 were located in the main office in Washington and 767 in the field. The personnel of the Bureau decreased by 46 during the current year ended October 31, 1939. The decrease in the personnel was chiefly in the Division of Insolvent National Banks and resulted from curtailment of the work in that division as a result of the continued reduction in the number of receiverships administered.

During the year 1939, a total of 29 assistant national bank examiners and 13 national bank examiners left the service. During the same year, 54 assistant examiners were appointed and 19 assistants were promoted to examiners. The number of employees in each division of the Bureau is given in the accompanying table:

Personnel of the Bureau of the Comptroller of the Currency, Oct. 31, 1939

## EXPENDITURES OF THE CURRENCY BUREAU

The total expenditures of the Currency Bureau for the year ending June 30 , 1939, were $\$ 5,883,012.58$, which was $\$ 174,076.22$ less than the preceding year. Of these total expenses $\$ 5,612,323.88$ was reimbursed by the banks. This amount was $\$ 165,816.92$ less than that for the preceding year. Total expenses paid by appropriation were $\$ 270,688.70$ which were $\$ 8,259.30$ less than in the preceding year. The regular pay roll provided by appropriation of $\$ 239,223.30$ was $\$ 11,907.81$ less than in the preceding year. Among expenses reimbursed by the banks, those on account of examinations were largest at $\$ 3,390,542.33$ and were $\$ 373,450.12$ larger than those of the previous year. Printing of Federal Reserve notes cost $\$ 736,922.50$, a decrease of $\$ 371,260.37$ from the previous year. Insolvent national bank pay roll, including retirement deductions, aggregated $\$ 766,910.56$, a decrease of $\$ 152,984.89$ from the previous year. Details of expenditures are given in the accompanying table:

|  | Expenses paid from ap- propriations | Cbange in 12 months | Expenses reimbursed by banks | Change in 12 months | Total expenses | Change in 12 months |

 for separately and are included with "Other assets."
${ }^{8}$ Licensed banks; i. e., those operating on an unrestricted basis.

 revised for years 1925 to 1938 in that securities sold with agreements to repurchase are now included with bills payable instead of with "Other liabilities."
(See also tables 57 and 58 covering figures for all banks and State and private banks, respectively.)

## TABLE "Q"

# SHOWING STATEMENTS OF ASSETS <br> AND LIABILITIES OF THE INDIVIDUAL NATIONAL BANKS AT CLOSE OF BUSINESS DECEMBER 30, 1939 <br> IS OMITTED FROM THIS REPORT AND PUBLISHED AS A SEPARATE TABLE 

(States, Territories, and Towns Arranged Alphabetically)

#### Abstract

NOTE.-In each of the years 1923 to 1929, inclusive, a table similar to table " $Q$ " mentioned above, showing statements of assets and liabilities of the individual national banks for one date in the year, was also issued as a supplement to the Comptroller's report, but in lieu of being designated as tables "A" to " G ", inclusive, they were numbered $89,93,94,98,121,97$, and 103 , respectively. Since 1930 the supplements are lettered alphabetically, beginning with the letter " H ." Prior to 1923 individual statements were included in the report proper.

## INDEX

[Note.-The year, except where otherwise indicated, refers to the year ended Oct. 31]
