## NINETY-THIRD ANNUAL REPORT

OF THE

# Comptroller of the Currency 1955

**WASHINGTON: 1956** 

TREASURY DEPARTMENT
Document No. 3200
Comptroller of the Currency

#### LETTER OF TRANSMITTAL

Treasury Department,
Office of the Comptroller of the Currency,
Washington, D. C., June 11, 1956.

Sirs: In accordance with the provisions of section 333 of the United States Revised Statutes, I have the honor to submit the following report covering the activities of the Bureau of the Comptroller of the Currency for the year 1955.

Respectfully,

RAY M. GIDNEY, Comptroller of the Currency.

THE PRESIDENT OF THE SENATE.
THE SPEAKER OF THE HOUSE OF REPRESENTATIVES.

ш

#### ANNUAL REPORT

#### OF THE

### COMPTROLLER OF THE CURRENCY

The year 1955 was a very active one for commercial banks which were supplying a major portion of the credit necessary to enable business production and expansion, and individual buying, to reach record levels in all sectors of the economy, with the exception of agriculture, and in providing banking services in the form of new branches or banks to areas favored by population shifts and growth.

The most significant development in banking during 1955 was the sharp increase in loans amounting to \$12 billion in the nation's commercial banks. While loans were increasing, investments were reduced by \$7 billion so that the increase in loans and investments of all commercial banks during 1955 was \$5 billion, a smaller expansion than in 1954 when the net increase in both types of assets aggregated \$10.2 billion. Commercial bank holdings of United States obligations were reduced by \$7.4 billion during 1955 to enable banks to meet loan demands, and the buyers, to an important extent, were business corporations which acquired the obligations for temporary investment. The \$7.4 billion of liquidated United States obligations were largely short term issues. Loans and investments, other than United States obligations, increased \$12.4 billion, the largest growth of any year since 1950.

#### Status of Dual Banking System

At the end of 1955, approximately 47 percent of the banking resources in the commercial and savings banks of the nation, and 54 percent of the commercial banking resources, were held by 4,700 national banks. State-chartered mutual savings banks numbering 528 had total resources of \$31.3 billion. State-chartered commercial banks and trust companies, 9,037 in number, held total resources of \$98.1 billion, or about 46 percent of all commercial bank assets. The dual banking system of the United States held total resources

1

of \$243.1 billion and was comprised of the following types and categories of banks:

	[Figu	res in million	as of dollars]				
Type of bank	Members of both the Federal Reserve Sys- tem and Federal De- posit Insurance Cor- poration		Members Deposit Corporat	of Federal Insurance ion only	Not members of Federal Reserve or Federal Deposit Insurance Corporation		
	Number	Total re- sources	Number	Total re- sources	Number	Total re- sources

 Supervised by State banking departments only.

#### Growth of Financial Institutions

The growth of financial institutions, including savings and loan associations, during the past 10 years has been at a rapid rate, but the commercial banks have been less favored owing to higher liquidity requirements and a less favorable tax status than mutual-type associations. Commercial banks have not found it possible to offer fully competitive interest rates in seeking time deposits. Relative growth is revealed by the following tabulation of 1945 and 1955 year-end figures:

#### Financial institutions [Total resources]

	Dec. 31, 1945	Dec. 31, 1955	Percentage of increase
	(In billions of dollars)	01 11101 0010	
Commercial banks Mutual savings banks Savings and loan associations	161 17 9	212 31 38	31. 6 82. 3 322. 2

#### Status of National Banks

The number of national banks comprising the national banking system was reduced from 4,796 to 4,700 during the year as a result of consolidations, mergers, sales, and a few conversions. The 4,700 national banks, with a small number of relatively unimportant exceptions, are in excellent condition when appraised by the basic tests of management competency, asset soundness, capital adequacy, and earning capacity. At the end of 1955, the total assets of national banks amounted to \$113.7 billion, a reduction of \$2.4 billion during the year. Five large national banks consolidated or merged with State-chartered banks under the charters of the latter during the year, and at the end of 1954 these 5 banks had total resources of \$6.7 billion. Thus the 4,700 national banks continuing in the system at the end of 1955 increased their resources \$4.3 billion. To make an accurate analysis of the annual progress or trend of the 4,700 banks continuing in the national banking system, the figures of the 5 banks above mentioned have been deleted from the December 31, 1954, totals of resources and liabilities in comparisons in the following paragraphs with similar totals at the end of 1955.

#### Deposits

The total deposits of national banks amounted to \$104.2 billion, an increase of \$3.9 billion for the year. The comparable increase in 1954 amounted to \$5 billion. Time and savings deposits of \$25.1 billion are included in this figure and reflect an increase of only \$832 million over the 12-month period. This is the result, in part, of the difficulty on the part of commercial banks to compete effectively for time money against mutual-type associations that are able to offer higher rates because of tax and other advantages.

#### Loans

The loans of national banks, net of \$672 million of reserves for bad debts and valuation reserves, amounted to \$43.5 billion, up \$6.4 billion during the year. The increase in loans to business and industry was of outstanding importance during 1955, and such credits increased \$3.7 billion to a total of \$18.3 billion, or 41 percent of the

aggregate loans held by national banks.

The residential (1 to 4 family) mortgage debt of the Nation increased \$12.7 billion in 1955 and at the end of the year amounted to \$88.4 billion. An increase of \$16.4 billion was recorded for all types of mortgage loans. There were 1,300,000 starts of nonfarm housing, the dollar value of new building in 1955 amounting to \$42.2 billion. Construction increased 25 percent over 1954. Real estate mortgage loans held by all types of investors have increased from \$36 billion to \$130 billion in 10 years. Farm-mortgage debt amounted to about \$9 billion, up 10 percent from the end of 1954. National banks held real estate mortgage loans at the end of 1954 and 1955 as follows:

[Figures in millions of dollars]

Туре	Dec. 31,	Dec. 31,	Dollar
	1954	1955	increase
Conventional—residential Conventional—other properties Conventional—farm Insured—FHA Insured or guaranteed—VA	3, 081	3, 500	419
	1, 691	1, 986	295
	441	505	64
	2, 444	2, 787	343
	2, 065	2, 242	177
	9, 722	11, 020	1, 298

The \$11 billion of mortgage loans held by national banks amount to nearly 25 percent of their total loans. The \$1.3 billion increase during the year is equal to 8 percent of the \$16.4 billion increase recorded for all types of mortgage loans during 1955. National banks must restrict their total investment in real estate mortgage loans, exclusive of mortgage loans guaranteed or insured by the Veterans' Administration to the extent of 20 percent or more of the amount of the loan, to 60 percent of time and savings deposits or 100 percent of capital and surplus, whichever is the greater. The \$8.8 billion of mortgage loans which are subject to the provisions of this statute are equal to 35 percent of the \$25.1 billion of time and savings deposits held by national banks.

Consumer debt of the Nation rose by more than \$6 billion in 1955 to a total of about \$36 billion of which \$12.7 billion was held by national and State commercial banks. Nearly \$28 billion of installment credit is included in this figure and reflects an increase since the end of World War II from \$2.1 billion. Consumer loans of the installment type and cash installment loans held by national banks at the end of the year amounted to \$6.7 billion or 15 percent of their total loans, and reflected an increase of \$1 billion from the end of 1954. Automobile installment loans were \$3.2 billion, up \$821 million for the year, and equal to 48 percent of all installment loans held by

national banks.

There are various well-known and valid reasons for the large increase in consumer and installment credit during the past 10 years. The extent to which this growth has been fostered during the past 12 months by unsound liberalization of downpayment and maturity terms on the part of some lenders is difficult to assess. Based on the policies being followed by a large majority of national banks, it should not be a major adverse factor. The importance of the present total of consumer debt increases or diminishes, in a credit sense, in direct relation to the relative soundness of the individual loans, and soundness, in turn, depends heavily on reasonably conservative downpayment and maturity requirements on loans to people who are not and will not become committed to pay out so heavy a percentage of their incomes for the liquidation of their debts that the necessary margin for error is too thin. The principle that the borrower should by means of his downpayment have a reasonable equity in the property pledged as security should not be neglected. It follows that the maturity of the loan should be sufficiently short so that the monthly payments will protect the initial equity. It became apparent toward the middle of 1955 that some national banks had initiated practices which might not meet these fundamental safeguards, and the Comptroller sent the following letter to national banks on July 18, 1955:

In view of recent developments in the field of consumer financing, we are adding to the examination report forms used by national bank examiners a section dealing with consumer credit and installment credit. The Board of Governors of the Federal Reserve System is making a similar addition to its reports. This is designed to develop better information as to terms and conditions of loans in this field, and also to make readily available to bank officers and directors a summary of what the examiner finds in this respect as he makes his examination.

It is not intended to imply a criticism of this form of loan, or to suggest a tightening of credit which would prevent the transaction of soundly financed and desirable business. It is our view that the activities of national banks during recent years in developing this form of credit have been valuable to the banks as a source of earnings, and beneficial to bank customers and to the economy generally in facilitating the distribution of consumer durable goods. However, recent surveys indicate that in some areas there is a tendency to loosen terms under which this type of credit is granted, particularly in the automobile-financing field, by extending maturities, and accepting downpayments which, measured in terms of actual value, are lower than previously had been considered standard. Well managed banks and finance companies alike will wish to avoid such a development and will use their influence to keep the business on a sound basis.

The purpose of this letter is to bring to your attention this new means of

covering consumer loans in examination reports.

Commencing on September 1, 1955, national bank examiners were asked to incorporate the new and more comprehensive data on installment loans in the examination reports of all national and district banks. A recent survey of these reports covering 2,317 national banks, large and small, reveals that the required downpayment percentage and the maturity policies being observed on a "general rule" basis appear to be, in the great majority of cases, soundly conceived. However, downpayment requirements that appear conservative on the surface do not prove necessarily that the policy in this respect is sound. Overallowance on trade-ins and the inflation of sales prices by padding or packing devices have taken much of the meaning, in some cases, out of downpayment percentages. The amounts of loans and the downpayment percentages should be based on sound prices which may be measured by the wholesale or dealer's cost, unless exceptions to such a policy are adequately merited. The following schedules reveal the findings of the recent survey made of 2,317 national banks:

Recapitulation—percent of downpayment and monthly payment terms on installment automobile loans required by 2,317 representative national banks

#### Liquidity

The large increase in loan volume during 1955 reduced the liquidity of national banks to some extent. At the end of 1954, 82½ percent of demand deposits and 61½ percent of total deposit liabilities were covered by cash, balances due on demand from correspondent banks, including reserve balances, and United States Government obligations. At the end of 1955, 77 percent of demand deposits and 57 percent of total deposit liabilities were covered by such assets.

#### Investment Accounts

The investment accounts of national banks in the aggregate amount of \$42.8 billion were, for the first time in many years, less than the total amount of outstanding loans. \$33.7 billion of the investments were in obligations of the United States Government, \$6 billion in the general obligations of States and their political subdivisions, \$2.9 billion of other bonds, largely special revenue, Federal Corporation, and corporate obligations, and \$187 million of Federal Reserve Bank stock. Obligations of the United States Government were reduced \$4.1 billion and municipal and other bonds were increased \$309 million. The following recapitulation by maturities and categories of issues shows the position of national bank investment accounts at the end of the year. (Figures on all bonds other than United States Government issues are taken from most recent reports of examination.)

The range in maturities of United States Bonds, municipal, and other investment securities held by national banks is of particular interest in view of the substantial liquidation that occurred in obligations of the United States during 1955 to accommodate increased loan demands.

#### Recapitulation by maturities

[United States bonds as of Dec. 31, 1955; municipal and other bonds as of most recent examination reports] [In millions of dollars]

	United States bonds	General obligation municipal bonds	Special revenue municipal authority and corpo- rate bonds	Total
Short term (maturing up to 5 years)  Medium term (maturing between 5 and 10 years)  Long term (maturing after 10 years)	1 18, 981 11, 951 2, 758	2, 962 1, 820 1, 271	1, 983 477 435	23, 926 14, 248 4, 464
Total	33, 690	<sup>2</sup> 6, 053	3 2, 895	42, 638

Includes \$1,285 million of nonmarketable United States bonds.
 Includes \$1,239 million of general obligations of States and \$600 million of housing authority obligations.
 Includes \$940 million of special revenue municipal authority obligations and \$1,150 million of Federal Corporation (not guaranteed) bonds.

During the past 2 years there has not been a major change in the holdings or maturities of general obligation municipal bonds, special revenue municipal authority obligations, nonguaranteed Federal Corporation obligations, or corporate bonds, but there has been in the maturities of United States obligations as is revealed in the following figures.

[In millions of dollars]

	United St	ates bonds
	Dec. 31, 1953	Dec. 31, 1955
Short term	26, 833 5, 888 2, 867	18, 981 11, 951 2, 758
Total	35, 588	33, 690

#### Capital Structure

During 1955 the sale of additional capital stock to further strengthen capital structures was undertaken and consummated by the managements and shareholders of 215 national banks. These 215 banks sold new shares of common stock which yielded \$151 million of additional funds to augment their capital structures. The shareholders of 367 national banks, with the approval of the Comptroller, approved dividends payable in common stock having a total par value of \$96 million during the year. During the 10-year period commencing with the year 1946, 1,544 national banks have completed new capital sale programs which added \$933 million to their capital funds.

At the end of 1955, the capital structures of the 4,700 national banks amounted to \$7,936 million, and their reserves for bad debts and other valuation reserves to \$672 million, or an aggregate total of capital structure and reserves of \$8.6 billion. The national banking system's \$8.6 billion of capital funds and reserves is the equivalent of \$1 of capital protection to cover the potential risks involved in each \$5.80 (\$5.27 at the close of 1954, \$5.43 at the close of 1953) of loans, municipal and corporate bonds, and other assets remaining after deducting from its \$114.4 billion of total assets, \$64.5 billion of cash or its equivalent, United States Government obligations, and loans or portions of loans guaranteed or insured by Federal Government agencies. The upward swing to \$5.80 per \$1 of capital funds and reserves is accounted for by the large increase in loans during 1955.

The volume of assets in the national banking system considered by national bank examiners to contain substantial or unwarranted elements of risk continues to be nominal in relation to the protection

offered by capital structures and reserves.

#### Earnings

The earnings of national banks for the year 1955 were satisfactory. Net profits after taxes and before dividends amounted to \$643.1 million, exclusive of net additions to reserves for bad debts and valuation reserves made from the year's earnings amounting to \$88.3 million. Dividends of \$309.7 million were paid to shareholders, and net retained earnings and additions to reserves amounted to \$421.7 million.

Net earnings from operations amounted to \$1.332 million, equivalent to 1.28 percent of year-end deposits of \$104.2 billion, as compared

with 1.16 percent for the year 1954.

After allowing for actual recoveries on assets previously charged off of \$78.1 million, and profits on securities sold of \$35.8 million, actual losses on securities sold of \$152.8 million, actual loan losses of \$69 million, and actual losses on other assets of \$46 million, the national banking system had net profits of \$1,178 million. After deducting net additions to reserves for bad debts and valuation reserves of \$88.3 million, net profits before taxes amounted to \$1,089 million. Income taxes paid amounted to \$446.2 million, equal to 33½ percent of net earnings from operations and 41 percent of net profits before taxes. Net profits after taxes, exclusive of \$88.3 million net additions to reserves, as above noted, amounted to \$643.1 million.

While national banks had greater net earnings from operations in 1955 (\$1,332 million) than in 1954 (\$1,230 million), their net earnings before taxes, including net additions to reserves, were \$202 million less in 1955, and after taxes were \$116 million less in 1955, than in 1954. Net asset losses, after allowing for all bond profits and recoveries, amounted to \$153.9 million in 1955, whereas net asset recoveries, including bond profits and allowing for all asset losses, amounted to \$149 million in 1954. This accounts for the poorer net results in 1955.

The schedule set forth below incorporates further details on this subject. (An additional detailed commentary on 1955 earnings appears elsewhere in this report.)

appears eisewhere in this report.

Earnings, expenses, etc., of national banks for the years ended Dec. 31, 1928, 1953, 1954, and 1955

#### Reserve for Bad Debts

At the end of 1955, 2,654 national banks were maintaining reserves for bad debts totaling \$618 million, an increase of \$69 million for the These banks held gross loans aggregating \$40.3 billion, or 91 percent of all loans of the 4,700 banks in the national banking system. The total of reserves for bad debts amounted to 1.5 percent of the gross loans of the 2,654 banks maintaining such reserves.

As pointed out in the Comptroller's annual report for 1954, the existing formula approved by the Internal Revenue Service for computing the allowable amounts of reserves for bad debts requires each bank to limit its reserve for bad debts to a percentage based on its own loan loss experience for any consecutive 20 years' period commencing January 1, 1928. This permits the largest reserves in relation to gross loans outstanding to be established by those banks which suffered the greatest loan losses in the past. This results in undesirable inequities between banks since the bank that may most need such reserves, based on its present condition and the caliber of its management, may be one that is permitted to establish only a relatively small percentage of reserves in relation to its outstanding loans because of a favorable loss history years ago. There is a need for a bad debt reserve formula, not limited to the loss history of the individual bank or group of banks, but based upon the sound premise that a normal proportion of loss must be expected in the business of lending, and such losses should be regarded as a banking hazard

<sup>&</sup>lt;sup>1</sup> Exclusive of transfers to and from reserve for bad debts and other valuation reserves on loans and securities but including net losses charged to these reserves.

<sup>2</sup> Total taxes included with gross expenses. Income taxes not called for separately.

<sup>3</sup> Includes funds transferred to reserve for bad debts and valuation reserves less the amount of assets charged off against such reserve accounts. Includes \$33 million in 1954, and \$89 million in 1955 transferred to effect a net increase in reserves for bad debts and valuation reserves. (Taxes would have absorbed a fair portion of these amounts had the transfers not been made.)

against which a reasonable initially tax-free reserve should be established. A suitable and soundly based formula should be adopted to permit banks to create and maintain reserves by transfers from earnings at a reasonable rate in relation to total loans until a suitable ceiling is reached, without reference to or as an alternative to a ceiling based on current or past loss experience. It is believed that this will require legislative action.

#### Branch Banking

A record number of applications for de novo branches were filed with the Comptroller by national banks during 1955. The applications numbered 532 and were dealt with as follows:

	Number	Percent
Applications approved Applications denied Applications withdrawn Applications pending	339 130 26 37	63.7 24.4 4.9 7.0
Total	532	100.0

On December 31, 1955, 6,824 branch offices were being operated by 1,677 national and State-chartered commercial banks located in 35 States, which permit branch banking, 6 States where branch banking is no longer permitted, and in territories and possessions. Over the 14-year period since December 31, 1941, 3,146 new branch offices have been established by national and State-chartered banks, and 1,989 of these new branches (63 percent) have come into being during the last 5 years. The 6,824 branch offices now in operation are operated by 12 percent of all commercial banks, State and national; 547 national banks (11.7 percent) are operating 3,224 branch offices, and 1,130 State-chartered commercial banks (12.4 percent) are operating 3,600 branches. During the last 3½ years, the number of national banks operating branches has increased from 369 to 547, and during this same period national banks established 912 new branches.

Reasons for the large number of new branches being established are the shift of population to suburban areas and to rapidly growing States, and the general population growth of the country. Census Bureau figures reveal that in the last 5 years the total population growth in the United States was 11.8 million, and this included a population growth in suburban areas of 9.6 million. Where branch banking is permitted, the banking needs of growing suburban communities are being served largely through the establishment of branch offices by banks situated in nearby cities that wish to continue their business relationships with customers who have moved to the suburbs, obtain new business, and to further their general policy of entering The growth of consumer more fully into the field of retail banking. lending has been a factor of considerable importance in the expansion of branch banking, and if it were to contract in any important degree, some branch offices might become unprofitable units.

Branch banking under varying types of limitations is now permitted in 35 of the 48 States. Developments in certain of the non-branch bank and limited branch bank States reveal at least a small degree of restiveness over branch bank prohibitions and limitations. As a means of coping with the problem, the attorneys general of several such States have issued interpretations or rulings that a separate banking office connected with the main banking office of a bank by a tunnel, or a pneumatic tube, or even closed-circuit television, may be regarded as a part of the main banking house and, therefore, will not be considered or construed to constitute a branch banking office in violation of specific statutes prohibiting or limiting branch banking or of banking codes that are silent on the subject of branch banking. A review of these opinions is of interest.

State

Alabama (limited branch banking authorized by statute).

Arkansas (limited branch banking authorized by statute).

Colorado (branch banking prohibited by statute).

Indiana (limited branch banking authorized by statute).

Iowa (limited branch banking authorized by statute).

Summary of opinion rendered by the attorney general of the State

The attorney general of Alabama, in an opinion dated Apr. 12, 1954, has ruled that it would not be a violation of Alabama banking laws for a bank to construct a drive-in depository across a 20 feet wide alleyway from the banking house and connected thereto by an overhead passage-way and an underground conveyor system.

The attorney general of Arkansas, in an opinion dated Mar. 7, 1955, has ruled that it would be legal under Arkansas law for a bank to place a window on a lot across the street and approximately 80 feet from the lot occupied by the banking house, the window to be connected by a pneumatic tube through which deposits, checks, etc., would be transmitted to a teller inside the bank for handling, so that all banking business would be transacted inside the bank.

The attorney general of Colorado, in an opinion dated Apr. 15, 1953, has ruled that it would not be in violation of Colorado banking laws for a bank to install a consumer credit department across the alley from its banking quarters and connected thereto by a tunnel underneath the alley.

The director of the department of financial institutions of Indiana, with the approval of the attorney general of Indiana, in an opinion dated Feb. 16, 1953, has ruled that the operation of a banking facility office located across an alley from the main banking premises, and connected thereto by a tunnel, would not be considered a branch operation under Indiana law.

The State banking board of Iowa, with the approval of the attorney general of Iowa, in an opinion dated Mar. 12, 1954, has ruled that a bank may establish a station located half a block plus the width of 2 streets from the banking house, and connected thereto by a pneumatic tube, the station to be manned by an attendant who would not make change, cash checks, or issue drafts or cashiers' checks, but would only perform the mechanical task of receiving money, checks, papers, and documents from the customer and placing them in the pneumatic tube for delivery to the bank premises proper.

State

Kansas (branch banking prohibited by statute).

Summary of opinion rendered by the attorney general of the State

The attorney general of Kansas, in an opinion dated Mar. 31, 1954, has ruled that it would not be a violation of the Kansas banking laws for a bank to operate a teller window at a location separate from the bank's immediate premises provided that each window is in close and immediate proximity to and connected with the banking office or premises by a tunnel, corridor or passageway, and such window enclosure and corridor or passageway are under the exclusive use and control of the bank and its employees and not accessible to the general public; and the business conducted at such window is limited in scope to the same types of transactions which are conducted at other teller windows of the bank.

(branch Minnesota banking prohibited by statute).

he attorney general of Minnesota, in an opinion dated Dec. 14, 1951, has ruled that it would not be a viola-tion of the Minnesota laws prohibiting the maintenance of a branch bank for a bank to operate drivein-tellers' windows located in a building directly across the street from the banking house, and permanently and structurally attached thereto by a tunnel

Missouri (branch banking prohibited by statute).

suitable for foot passage under the street. The attorney general of Missouri, in an opinion dated

Mar. 30, 1949, has ruled that it would not be branch banking for a bank to install a pneumatic tube on a parking lot directly across from the bank, where the bank's customers will be able to place their deposits in the tube for passage into the bank. Subsequently, in an opinion dated Aug. 24, 1954, the attorney general stated that a factual situation involving placing an attendant at the drive-in facility to assist the bank's customers did not differ materially from that upon which the opinion of Mar. 30, 1949, was based, and, therefore, that type of operation would not be

Nebraska (branch banking prohibited by statute).

branch banking. The attorney general of Nebraska, in an opinion dated June 3, 1954, has ruled that a bank may install and operate a drive-in teller's cage across the alley from the main banking quarters on property owned by the bank where deposits may be delivered and checks delivered for payment and be transmitted to the bank through a pneumatic tube system where the deposits are entered in the bank and a record is made and the deposit slip or money for the payment of the check returned to the drive-in teller's cage and then to the customers.

Oklahoma (State statutes silent on subject of branch banking).

The attorney general of Oklahoma, in opinions dated Nov. 18, 1953, Apr. 14, 1955, Oct. 12, 1955, and Dec. 29, 1955, has ruled that a bank may establish and operate within the city or town in which it is located 1 or more tellers' windows directly connected to the main banking house by pneumatic tubes; and that such drive-in facilities may be established within the same municipality some 4,000 feet from the bank's regular banking house but connected thereto by closed circuit or private wire television and a direct wire communication system, without such drive-in facilities constituting branch banks.

State

South Dakota (limited branch banking authorized by statute). Summary of opinion rendered by the attorney general of the State

The attorney general of South Dakota, in an opinion dated Aug. 2, 1954, has ruled that a small building staffed with 1 or 2 tellers but no officers, located diagonally across the street and an alley from the banking house, and connected thereto by a tunnel would not constitute a branch bank or branch office, but would be an enlargement of the present bank building; however, if the building were connected to the banking house only by a pneumatic tube, it could not be regarded as constituting an extension or enlargement of the banking house.

Texas (branch banking prohibited by constitution of State).

ing).

Wyoming (State statutes silent on subject of branch bankThe attorney general of Texas, in an opinion dated Apr. 26, 1950, has rules that it would not contravene the provisions of Texas law for a bank to construct a garage building containing a drive-in deposit window or windows directly across the street from its banking house, and connected thereto by a tunnel suitable for passage back and forth, but that the 2 structures will in reality be 1 and will constitute the banking house.

The attorney general of Wyoming, in an opinion dated May 12, 1955, has ruled that a bank may be permitted to operate an office for the purpose of cashing checks, receiving deposits, and issuing travelers' checks in another locality within the corporate limits of the city or town in which it is chartered to do a banking business even though there is no physical connection between the 2 offices.

National banks operating in the States noted above, with the exception of Wyoming, have been permitted to establish offices similar to those permitted State-chartered banks under the respective opinions of the attorneys general; these offices have been considered by the Comptroller to be integral parts of the banks' main offices and not branch offices. Up to the present time, the office of the Comptroller has not seen its way clear to permit national banks to take advantage of the opinion of the attorney general of Wyoming, nor that portion of the opinion of the attorney general of Oklahoma approving offices connected only by closed-circuit television, because of a doubt that such action would be in compliance with the requirements of the Federal branch banking statutes.

In one State, Michigan, the attorney general has issued an opinion at variance with those set out above.

Michigan\_\_\_\_\_ The attorney general of Michigan, in an opinion dated Nov. 25, 1955, has ruled that it would constitute branch banking under Michigan law for a bank to establish a structure for the purposes of performing banking activities usually ascribed to branch banks, if the structure would be separated from the banking house by a physical barrier such as a street or public alley or business building located on property not owned by the bank and devoted to other commerce, even though such structure was connected to the main bank building by a tunnel or by a tube.

In addition to the rulings by the various attorneys general, the legislatures of 2 States which prohibit branch banking and 1 State having limited branch banking have enacted legislation permitting

389422--56---2

the operation of separate facilities in close proximity to the banking house.

Florida (branch banking prohibited by statute). The legislation adopted in Florida provides that a bank may operate a drive-in facility to serve patrons in motor vehicles provided that the facility is a part of or adjacent to the main banking room, that there is a physical connection with the main banking room and the facility, and that there will be a private connecting doorway or private enclosed secure passageway connecting the main banking room and the facility enabling tellers to pass between the facility and main banking room without coming in contact with the public.

Illinois (branch banking prohibited by statute).

The legislation adopted in Illinois provides that a separate place at which a bank's business is conducted shall not be deemed to be a branch if such place is adjacent to and connected with the main banking premises, or if it is separated from such main banking premises by not more than an alley; provided that if the place is separated by an alley from the main banking premises there must be a connection between the two by public or private way or by subterranean or overhead passage, and if the place is in a building not wholly occupied by the bank, it must not be within any office or room in which any business other than that of the bank is conducted or carried on.

New Jersey (limited branch banking authorized by statute).

The legislation adopted in New Jersey provides that a bank may establish one auxiliary office which shall not be deemed a branch office as an adjunct to each of its banking offices, that no auxiliary office shall be established or maintained at a location which is more than 1,500 feet from the office of the bank, and that no business shall be transacted at an auxiliary office other than the receipt of deposits of currency, checks and other items, the payment of withdrawals, the cashing of checks, drafts, and other items, the receipt of monies due to the bank, and the issuance of cashier's checks, travelers' checks, and money orders.

In Florida and New Jersey national banks have been permitted to establish offices similar to those permitted State-chartered banks. In Illinois the legislation will not become effective until it has been approved by a referendum of the people in November 1956.

#### Bank Consolidations, Mergers, Sales

A variety of causes, as outlined in detail in the 1954 annual report, have resulted in an increased number of bank consolidations and mergers since the end of World War II and particularly during the last 6 years. This trend continued in 1955 and resulted in the absorption of (1) 74 national and 52 State banks by 118 national banks, (2) 47 national banks by 46 State banks, and (3) 52 State banks by about the same number of other State banks, by means of consolidation, merger, and purchase. The following schedule contains pertinent details of these transactions.

Consolidations, mergers, purchases-1955

Number of banks	$\Upsilon \mathrm{ype}$	Total deposits	Total capital structure
		Millions	of dollars
49 24 25 28 126	National banks consolidated or merged with and into 41 national banks. State banks consolidated or merged with and into 24 national banks. National banks purchased by 25 national banks. State banks purchased by 28 national banks.  Approved by Comptroller of Currency.  National banks consolidated or merged with and into 35 State banks.	1, 112 248 202 155 1, 717 6, 032	192 20 17 10 239
11 52	National banks purchased by 11 State banks.  State banks consolidated, merged or purchased with or by about the same number of State banks.	197	(?)
99	Approved by State banking departments	6, 666	555
225	Grand total	8, 383	794

<sup>1</sup> Total resources.

#### Conversions-1955

	Number	Deposits (in millions of dollars)	Capital structure (in millions of dollars)
State banks converted into national banks.	8	60. 2	4.7—converted into 8 national banks.
National banks converted into State banks.	4	19.5	2.0—converted into 4 State banks.
Total	12	79. 7	6. 7

The shareholders of the 73 banks consolidated or merged with and into 65 national banks received cash and book value stock of the continuing banks aggregating \$218,086,266 or \$5,886,266 in excess of the aggregate book value of the assets which those banks contributed to the mergers or consolidations. This excess amounted, on the average, to 0.43 percent of the aggregate deposits acquired by the continuing banks. On an estimated or fair-valuation basis, the shareholders of the 73 absorbed banks contributed assets having an estimated value, in excess of liability to creditors, of \$228,031,266 and received cash and fair-value stock of the continuing banks aggregating \$240,722,755 or \$12,691,489 in excess of the aggregate fair value of the assets which those banks contributed to the mergers or consolidations. This difference is accounted for through an estimated or fair-value appraisal of fixed assets (bank premises—furniture and fixtures), bond appreciation or depreciation, allowances for pension fund adjustments, excess reserve for taxes, etc. This excess amounted, on the average, to approximately 0.93 percent of the aggregate deposits acquired by the continuing banks.

The shareholders of the 53 national and State banks that were purchased by 53 national banks received \$35,034,828 in cash, or \$7,399,901 in excess of the book value of the selling banks' aggregate capital structures. This amounts, on the average, to 2.07 of the selling banks' deposit liabilities.

Over the 6-year period from January 1, 1950, to December 31, 1955, the Comptroller's Office approved the acquisition by national banks of 231 other national banks and 229 State-chartered banks through consolidation, merger, or sale, and saw 153 national banks absorbed by State-chartered banks after approval by the governing State banking department. The latter also approved consolidations, mergers, and sales involving the absorption of 217 State banks by other State banks. The following table shows the number of banks which have been absorbed since 1950, and their total resources.

Data on consolidations, mergers, purchases and sales, and conversions—1950 to Dec. 31, 1955

Number of banks	Туре		
85 29 117	National banks consolidated with and into other national banks	1, 285 1, 021 1, 186	
231	Total	3, 492

	Conversions—1950 to Dec. 31, 1955		
15 30	National banks converted into State-chartered banks. State-chartered banks converted into national banks.	154 297	

The Nation's commercial banking needs, apart from mutual savings banks, are served by 13,737 national and State commercial banks that operate 6,824 branches, or a total of 20,561 banking offices. The 13,737 commercial banks serve the banking needs of over 165 million people. This means that on an average there is 1 commercial bank for each 12,000 of population, and, if branch offices are added, there is 1 banking office for each 8,025 of population. The population of the United States at the time of the 1950 census was 64 percent urban and 36 percent rural. During the last 5 years the population growth of 11.8 million included a population growth of 9.6 million in suburban areas of large cities. This growth has been taken care of largely by the establishment of branch banks. Over the 14-year period since December 31, 1941, 3,146 new branches were established, and 63 percent of these new branches (1,989 of them) have come into being during the last 5 years.

On December 31, 1941, there were 14,423 national and State commercial banks. Fourteen years later, at the end of 1955, this figure

had been reduced by 686 banks to the present total of 13,737, but the number of banking offices had increased from 18,055 to 20,561. At the end of 1941, the 100 largest commercial banks held 55.3 percent of the deposits held by all commercial banks. At the end of 1955, the 100 largest commercial banks held 46.8 percent of the total deposits held by all commercial banks. Using a different type of comparison, and including only national banks, at the end of 1940 there were only 90 national banks out of 5,150 such banks that had total resources in excess of \$50 million and these 90 banks held 63 percent of all the resources in the national banking system. At the end of 1955 there were 280 national banks out of 4,700 such banks with resources in excess of \$50 million and these 280 banks held 69 percent of all the resources in the national banking system. It is apparent from these figures that the group of 100 largest commercial banks hold a smaller percentage of the Nation's banking resources today than was the case 14 years ago, and that there is a greatly increased number of fairly large banks to compete effectively against the top group composed of the 100 largest banks. Competition in banking is as keen or keener today than at any time in our history.

The increased number of bank consolidations and mergers has given rise to some apprehension that desirable levels of competition in banking might not be maintained unless legislation were enacted requiring that full consideration be given to the competitive aspects of such transactions prior to their being approved by the Federal official having jurisdiction. The President of the United States in his January 1956 economic report to Congress (p. 79) recommended that legislation be enacted which would extend Federal regulation to

all mergers of banking institutions.

The consolidation and merger of banks or the absorption of banks by the purchase of their assets and the concurrent assumption of their deposit liabilities by other banks are in the form of asset acquisitions rather than stock acquisitions and do not come within the prohibitions and limitations of section 7 of the Clayton Act (15 U. S. C. 18). That statute prohibits corporate mergers where there may be a substantial lessening of competition or a tendency to create a monopoly and applies to the acquisition of bank stocks but not to the acquisition of bank assets. Insofar as that statute is applicable to banks (bank holding companies frequently use the stock acquisition method to expand) it is administered by the Board of Governors of the Federal Reserve System with concurrent jurisdiction in the Department of Justice.

Even though that statute does not apply to bank asset acquisitions it has been the practice of the Comptroller in passing upon proposed transactions requiring his approval to consider their competitive aspects. When approval is requested for any of these transactions, the proposal is examined in the light of what is regarded as the Comptroller's primary duty—to exercise the responsibilities placed upon him in such a way as to promote a strong and sound national banking system, and one which will grow with American business and industry so that it can provide the financial services necessary for the continued growth of our economy. Among the things which are first considered in connection with such proposals is the effect upon the soundness of the national banking system, the effect upon the convenience and

needs of the community concerned, the effect upon the particular banks involved, whether the resulting institution will be capably managed, soundly capitalized and in a sound asset condition, and whether the plan is fair and equitable to the stockholders of each of the banks. If it is decided that the proposal may be approved on the basis of these factors, consideration is then given to the effect which its consummation will have upon competition in the area; i. e., whether the effect thereof in any section of the country may be harmful through lessening of competition unduly. In making this determination the more important factors considered would include the following:

1. The number, and the capital structure, deposits, and loans, of banks operating in the city and area served. A comparison of the projected percentage of total banking resources in the field of operations to be held by the merged bank with those of competing banks provides one basis for determining the possible effect of the merger on banking competition.

2. The lending activities of the merging banks. A comparison of the lending policies and a comparison of the character and volume of loans to manufacturers, commercial enterprises, farmers, brokers, home owners and consumers, and the extent to which the banks have common borrowers provide an insight into the extent to which

the merger might lessen competition in the loan field.

3. The deposit structure of the banks involved. The relative volume of demand, savings and public fund deposits; the character of those deposits such as deposits of banks, corporations, small business enterprises, farmers, and individuals, the amount of the average deposit; and the number of common depositors, aid in disclosing the extent to which the merger might lessen competition in the deposit field.

4. The geographic distribution of any branch offices of the merging banks as related to the extent of existing competition between those branches and the competition that would be provided

by other banks if the merger were to be approved.

5. The extent of the activities of the banks in trust department business. The comparative volume of the assets of the trust departments of the merging banks, the relative volume of their fiduciary activities in the various fields such as pension and profit sharing, agency, court, testamentary, corporate, and other fiduciary activities, and the number of accounts in common, give an insight into the extent to which the merger might lessen competition in the trust field.

6. A comparison of interest rates on loans and deposits and service charges of the merging banks, and also a comparison in these respects with competing banks which would remain if the merger were to be approved.

7. The extent to which lending institutions other than banks are a factor of importance in supplying the credit needs of the section and as such may be considered as providing competition to banks.

In varying degrees each of the above factors relating to competition has a bearing on whether a proposed acquisition of assets might substantially lessen competition or tend to create a monopoly. If the competitive factors might appear unduly to lessen competition, these factors would need to be balanced against the elements of desirability or need that may be present in the banking factors in arriving at a final decision. If the proposed asset acquisition fails to meet reasonable banking standards, the Comptroller's approval would be withheld

on that point alone.

Several bills have been introduced in Congress designed to prohibit asset acquisitions in the form of bank consolidations, mergers, or purchases if there might result a substantial reduction in competition or a tendency to create a monoply. At least 2 of these bills, H. R. 2115 and H. R. 6405, would achieve this goal through an amendment to the banking statutes with jurisdiction being placed in the 3 Federal bank supervisory agencies. Two of the bills, H. R. 5948 and H. R. 9424, would achieve this goal by amending section 7 of the Clayton Act to bring asset acquisitions by banks within its scope. H. R. 9424 would also require that 90 days' notice of a proposed acquisition of bank stock or bank assets be given to the Board of Governors of the Federal Reserve System and the Attorney General where the combined capital, surplus, and undivided profits of the acquiring and acquired corporations are in excess of \$10 million. H. R. 5948 and H. R. 9424 have both been passed by the House of Representatives, but neither has yet been acted upon by the Senate. Under these bills the Board of Governors of the Federal Reserve System would have jurisdiction to determine whether in any proposed bank consolidation, merger, or purchase there might result a substantial lessening of competition or a tendency to create a monoply. There would be concurrent jurisdiction in the Department of Justice.

The Comptroller does not favor the technical method of H. R. 5948 and H. R. 9424, nor the jurisdictional scope that would be achieved by their enactment. Banking is a supervised and regulated industry, and our dual banking system is one composed of well designed checks and balances that have been the outgrowth of long and, at certain periods in our history, unhappy experience. They may seem complicated but these checks and balances that comprise our dual banking system in the form of (1) a national banking system under the Comptroller of the Currency, but with the requirement that all national banks located in the continental United States must be members of the Federal Reserve System and of the Federal Deposit Insurance Corporation, and (2) 48 separate and distinct State banking systems under the supervision of State officials, and whose banks may or may not choose to apply for membership in the Federal Reserve System and the Federal Deposit Insurance Corporation, assure an aggressive and progressive climate for banking which rebounds to the benefit of the public. State banks which are accepted for membership in the Federal Reserve System must be insured by the Federal Deposit Insurance Corporation and are examined and supervised by the Federal Reserve Banks in addition to the primary supervision given by the respective State government officials. State banks which are not members of the Federal Reserve System but are members of the Federal Deposit Insurance Corporation are examined and supervised by that corporation in addition to the primary supervision of the State government officials. Only the State banks that are neither members of the Federal Reserve System nor the Federal Deposit Insurance Corporation, and there are only 498 of such institutions in the United States with less than 1½ percent of the country's commercial

banking resources, have no form of Federal bank supervision.

It will be appreciated that the powers of the 3 Federal bank supervisory agencies as between themselves, and the powers of the Federal Reserve System and the Federal Deposit Insurance Corporation in relation to those of the 48 State banking departments, require delicate balance plus a large measure of cooperative good will to function with That is the present status. complete effectiveness.

Under existing statutes, the Comptroller of the Currency is required to approve or deny all consolidations, mergers, and purchases where the continuing or acquiring bank is a national bank. The 48 State banking departments occupy a similar position where the continuing or acquiring bank is a State-chartered institution. However, if the continuing or acquiring State-chartered bank is a member of the Federal Reserve System, and a diminution is to occur in the combined total of the merging banks' capital or surplus, the approval of the transaction by the Board of Governors of the Federal Reserve System is also If the continuing or acquiring State-chartered bank is not a member of the Federal Reserve System, but is insured by the Federal Deposit Insurance Corporation, and the combined total of the merging banks' capital or surplus will be reduced, the approval of the Federal Deposit Insurance Corporation is also required to the transaction.

H. R. 5948 and H. R. 9424 would cut across all of these fields of authority without distinction and vest in the Board of Governors of the Federal Reserve System, with concurrent jurisdiction in the Department of Justice, the entire responsibility of determining in every type of bank consolidation, merger or purchase whether the competitive aspects are such that it must be disapproved. We do not believe that this can fail to have injurious and far-reaching effects on our dual banking system. It gives the Federal Reserve System complete dominance in this part of the field of banking supervision, a position it has publicly stated it does not desire, and adds the Department of Justice as an additional Federal agency with which the 48 State banking departments would have to coordinate in their supervisory duties. Moreover, in effect, it would require merging banks to secure the approval in every case of at least 2, and in some cases of 3 or even 4 Federal agencies.

It is the view of the Comptroller that it is desirable that there should be Federal banking legislation which would formalize the consideration of competitive factors in bank mergers now given by the supervisory agencies. While, as stated above, the Comptroller does consider competitive factors in national bank mergers and has rejected some proposals on this basis, it is preferable to have authority in this respect made statutory. If legislation is enacted which would require Federal consideration of competitive factors in bank mergers, the consideration of those factors should be placed in the banking agencies which have an expert knowledge of the banking industry, and which have, it is believed, worked out satisfactory methods of coordinating their activities with those of State banking officials. It is the view of the Comptroller that healthy competition is important in banking and should be maintained and encouraged. However,

it is believed that it is in the best interests of the public as well as that of banking that competitive factors alone should not necessarily be conclusive as would be the case if H. R. 5948 or H. R. 9424 were adopted, but that those factors should be weighed in conjunction with banking factors in order to arrive at sound decisions. The banking supervisory agencies, whose officials are intimately familiar with banking in all its phases, including competition, throughout the United States, are in a position to do this. Accordingly, it is recommended that any legislation enacted by Congress to require consideration of competitive aspects of bank mergers be in the form of an amendment to the banking statutes and not an amendment to the Clayton Act.

It is recommended also that Clayton Act language should not be used with respect to banks, as greater flexibility is needed in the case of banks than in the case of industrial corporations generally, and that any legislation enacted should require the approving bank supervisory agency to take into consideration whether the effect of a particular merger or other form of asset acquisition might be to lessen competition "unduly" or to tend "unduly" to create a monopoly. The use of the word "unduly" is desirable because its interpretation is slightly broader than that of the word "substantially" and its use would give the banking agencies needed flexibility. There will be circumstances in which a bank merger may be desirable in the entire public interest even though it might incidentally result in a "substantial" but not an "undue" lessening of competition.

#### New Charters to Organize National Banks

Seventy-one applications to organize new national banks were filed during 1955. Approval was given to 38 applications, 23 cases were denied, 2 were abandoned, and 8 were pending. The 38 approved cases have resulted or will result in the organization of new national banks in the following States.

	Number of	1	Number of
State:	Number of new banks	State:	new banks
California		Oklahoma	_ 1
Florida	13	Pennsylvania	_ 1
Georgia		South Dakota	_ 1
Illinois		Texas	_ 9
Missouri	1	Washington	
Montana	1	_	
New York	1	Total	_ 38
Ohio	1		

#### Outmoded Articles of Association

During the summer of 1954 it was thought desirable to write to those national banks operating under outmoded and obsolete articles of association and suggest that a set of modern articles, approved by the Comptroller, be presented to their shareholders at an annual or special meeting for their required statutory approval. Of the 466 national banks so notified, 321 of the banks had taken the required steps at the end of 1955 to provide modern articles; 42 additional banks have indicated their intention to take such action at a reasonably early date.

#### Legislation Proposed

During the past year there were several legislative proposals which would amend the national banking laws but which have not thus far been enacted.

The Comptroller has recommended to the Congress legislation (S. 3629) which would permit national banks to make 18-month construction loans to finance the construction of commercial or industrial properties, provided that there is a firm take-out commitment from a financially responsible lender. This legislation would also increase the aggregate limit on construction loans which are not regarded as real-estate loans but are classed as ordinary commercial loans, from 50 percent of capital to 50 percent of capital and surplus. It is the purpose of the proposed changes to enable national banks to make safe and desirable loans on the basis of security which they are now unable to accept and to enable them better to compete with State banks in this field of financing. A proposal to this effect was adopted by the Senate during 1955 as an amendment to other legislation, but was not accepted by the House of Representatives.

The proposed legislation would also liberalize the powers of national banks to lend on the security of real property leaseholds. The present law permits national banks to lend on a leasehold (1) under a lease for not less than 99 years which is renewable, or (2) under a lease having a period of not less than 50 years to run from the date the loan is made or acquired. It is proposed to permit national banks to lend on the security of a leasehold under a lease having not less than 10 years to run beyond the maturity date of the loan. The present restrictions on lending on leaseholds are unduly restrictive.

The Comptroller has also recommended to the Congress legislation (S. 2996) which will eliminate the requirement that national banks notify this office of declarations of dividends. These reports no longer serve a useful purpose and it is desirable to relieve national banks of the unnecessary burden of furnishing them. This proposed legislation would also change from 5 to 10 days the period allowed national banks in which to furnish call reports to the Comptroller of the Currency. Five days is usually too short a period for banks to compile

the necessary data in the proper form.

There has been introduced in Congress legislation (S. 256) which would eliminate mandatory cumulative voting in the election of directors of national banks. This legislation would, however, permit cumulative voting if provided for in a bank's articles of association. The experience of the Comptroller's office has been that a national bank can best be operated when there is a high degree of unity in the directorate, and that the successful operation of any bank depends upon confidence—confidence of stockholders in the management, confidence of different members of the management body in each other, and confidence of the depositors and the community in the bank as an organization. Confidence is not engendered by having a minority group force itself on the directorate of a bank by the use of the cumulative voting provision, thereby lessening the mutual confidence of the directorate, and, in some cases, the confidence of the community in the bank. For this reason the Comptroller favors the proposed legislation. This proposed legislation has been passed

by the Senate but has not been acted upon by the House of Representatives.

Several bills have been introduced in Congress which would permit national banks to underwrite eligible revenue bonds up to their 10 percent limit. No position has been taken on this proposed legislation.

#### Legislation Enacted

Public Law 266 of the 84th Congress, approved August 9, 1955, amended section 5221 of the Revised Statutes to eliminate the requirement that national banks going into voluntary liquidation must publish notice of that fact in a newspaper published in the city of New York. This legislation was enacted at the recommendation of

the Comptroller of the Currency.

Public Law 343 of the 84th Congress, approved August 11, 1955, amended section 24 of the Federal Reserve Act (1) to permit national banks to make amortized mortgage loans having a maturity in excess of 10 years but not in excess of 20 years, provided that the terms are such that the installment payments are sufficient to amortize 100 percent of the principal of the loan within a term of 20 years; (2) to permit national banks to make amortized mortgage loans in amounts up to 66% percent of the appraised value of the real estate offered as security rather than the former 60 percent; and, (3) to extend the maximum duration of residential and farm construction loans which are not to be regarded as real estate loans from 6 to 9 months. The Comptroller of the Currency recommended legislation to extend the maximum duration of amortized mortgage loans to 20 years, and to extend from 6 to 9 months the maximum duration of residential and farm construction loans. The increase in percentage of appraised value was not objected to by the Comptroller of the Currency although that change was not included in his initial recommendations.

Public Law 496 of the 84th Congress, approved April 27, 1956, amended section 5146 of the Revised Statutes to require that two-thirds, instead of the former three-fourths, of the directors of national banks must reside, and must have resided for at least 1 year preceding their election, within the State in which the bank is located or within 100 miles, instead of the former 50 miles, of the bank. This legislation was enacted at the recommendation of the Comptroller

of the Currency.

Public Law 502 of the 84th Congress, approved April 30, 1956, amended section 5240 of the Revised Statutes, which requires the Comptroller of the Currency to examine every national bank twice in each calendar year, to permit the Comptroller to waive 1 of the required 2 examinations. The Comptroller may not, however, waive an examination with respect to any particular bank more frequently than once in any 2-year period. The legislation also permits assessments for examinations to be made upon the banks in proportion to their assets and resources on dates to be determined by the Comptroller rather than at the dates of examinations, and permits the Comptroller to assess against national banks having trust departments the expense of examinations of those departments. This legislation was enacted at the recommendation of the Comptroller of the Currency.

#### Amendment, Section 10 (c), Regulation F

During the year 1955 the Board of Governors of the Federal Reserve System amended section 10 (c) of Regulation F governing the exercise of trust powers by national banks so as to permit the commingling or collective investment of trust funds of pension, profit-sharing or stock bonus plans held by the national bank as fiduciary, where such commingling or collective investment is authorized by the provisions of the governing trust instrument.

Under the provisions of section 17 of Regulation F, national banks are authorized to establish common trust funds for the collective investment of funds of individual trust accounts. Participation in common-trust funds by any one individual fiduciary account is limited to \$100,000. As this limit was not considered sufficient or desirable for the administration of pension, profit-sharing, or employee-benefit trusts, section 10 (c) was amended to permit the collective investment for these accounts without requiring the use of a common-trust fund under the provisions of section 17.

Several national banks have by resolution of their board of directors established commingled trusts under section 10 (c), as amended, for the collective investment of funds of pension, profit-sharing, and employee-benefit trusts. The plans thus established may be joined by various corporations within the provisions and requirements of the initial plans as adopted. To join such a commingled plan, a bank or other corporation, by resolution of its own board of directors, adopts a pension or welfare plan with specific provision for joining the trust already established and in operation in the trustee bank.

Statistics have not been sought as to the number of such plans currently in operation in the trust departments of national banks or the number of participating pension and welfare accounts in such plans. It is believed that the commingled plans for collective investment under section 10 (c) of Regulation F, as amended, constitute only a very small proportion of the pension, profit-sharing, or welfare accounts under administration in national bank trust departments at the present time. By a contemplated revision in the report of examination of trust departments, the volume of commingled pension trusts in each national bank will be reported to our office.

#### Bank Holding Company Legislation

Public Law 511 of the 84th Congress, approved May 9, 1956, enacted into law the Bank Holding Company Act of 1956. Thus bank holding company legislation, which has been under consideration by Congress for many years, and which has been favored in general by the Comptroller of the Currency, has been adopted.

The act defines bank-holding company to include any company which owns or controls 25 percent or more of the voting stock of each of 2 or more banks, or of a bank-holding company, and it requires all bank-holding companies to register with the Board of Governors of the Federal Reserve System within 180 days after enactment of the legislation or within 180 days after becoming a bank-holding company.

Under the act, without the prior approval of the Board no com-

pany may (1) acquire direct or indirect ownership or control of any voting shares of any bank which will make its ownership of such shares exceed 5 percent of the voting shares of the bank; (2) acquire all or substantially all of the assets of a bank unless the bank-holding company is itself a bank; or (3) merge or consolidate with any other bank-holding company; nor may a subsidiary of a bank-holding company other than a bank acquire all or substantially all of the assets of a bank, without the prior approval of the Board. Upon the receipt of an application for approval of any such transaction, the Board is required to give notice to the Comptroller of the Currency if a national bank is involved, or to the appropriate supervisory authority of the interested State if a State bank is involved, and to allow 30 days within which the views and recommendations of the Comptroller of the Currency or the State supervisory authority may be submitted. If either of these officials disapproves the application the Board is then required to hold a hearing, and to grant or deny the application on the basis of the record made at the hearing. No application may be approved by the Board which will permit any bankholding company or any subsidiary thereof to acquire any voting shares of, interest in, or substantially all the assets of any additional bank located outside the State in which the holding company maintains its principal office and place of business or in which it conducts its principal operations unless the acquisition of the shares or assets of a State bank by an out-of-State holding company would be specifically authorized by the statute laws of the State in which the bank is located.

In determining whether or not to approve any acquisition of assets or merger or consolidation for which its approval is required by the act, the Board must take into consideration the following factors: (1) The financial history and condition of the company or companies and the banks concerned; (2) their prospects; (3) the character of their management; (4) the convenience, needs, and welfare of the communities and the area concerned; and (5) whether or not the effect of such acquisition or merger or consolidation would be to expand the size or extent of the bank-holding company system involved beyond limits consistent with adequate and sound banking, the public interest, and the preservation of competition in the field of banking.

No bank-holding company may, under the provisions of the act, acquire direct or indirect ownership of any voting shares of any company which is not a bank, nor may it retain after 2 years from the date of enactment of the act direct or indirect ownership or control of any voting shares of any company which is not a bank or a bank-holding company, nor may it engage in any business other than that of banking or managing or controlling banks or furnishing services to or performing services for its subsidiary banks. There are some exceptions to this prohibition.

Under the act no bank may invest any of its funds in the capital stock or obligations of its parent bank-holding company or any subsidiary thereof, nor accept such shares or obligations as collateral security, nor make any extension of credit to its parent bank-holding company or any other subsidiary of the parent bank-holding company.

The act amends the Internal Revenue Code of 1954 to permit a bank-holding company to distribute to its stockholders the property

required to be disposed of, or the property by reason of the ownership of which the company is a bank-holding company, without recognition of gain to the stockholders. This distribution may be either direct or by means of transferring the assets to a newly created corporation and distributing the stock of that corporation to the stockholders of the bank-holding company.

The Board is authorized to issue such regulations and orders as may be necessary to enable it to administer and carry out the pur-

poses of the act and to prevent evasions thereof.

Any party aggrieved by any order of the Board under the act may obtain judicial review by the appropriate United States Court of

Appeals.

Any company which willfully violates any provision of the act or any regulation or order issued by the Board pursuant to the act may be fined not more than \$1,000 for each day during which the violation continues, and any individual who willfully participates in a violation of any provision of the act may be fined not more than \$10,000 or imprisoned not more than 1 year or both.

#### Litigation

During the past year there were court decisions in two cases in which the Comptroller of the Currency was involved. The first of these was Overby v. United States Fidelity & Guaranty Company (5th Cir. 1955), 224 F. 2d 158. In this case reports of examinations made by the Comptroller's examiners and furnished to the First National Bank of Auburn, Ala., for the use of its directors, together with all correspondence between the Comptroller's office and the bank over a period of years, were subpoenaed. In keeping with the traditional position of the Comptroller of the Currency that these documents are confidential papers of the Treasury Department, and that they are privileged against disclosure, there was filed in this litigation an assertion of interest and claim of privilege made by Acting Secretary of the Treasury A. N. Overby. This assertion of interest and claim of privilege was denied by the United States District Court, and an appeal was taken to the United States Court of Appeals for the Fifth Circuit. That court did not discuss the subject of governmental privilege against disclosure of official information as it held the order to produce was in such broad terms as to require reversal of the lower court decision. The court pointed out that much of the matter claimed to be privileged and which would have to be produced under the order bore no possible relevance to the litigation, and there was no necessity for requiring its production. The court suggested that there should be prepared detailed written interrogatories or requests calling for the production of such parts only of the documents as might be pertinent to the litigation, describing the same as accurately as could be done, and that the Secretary of the Treasury might be willing to furnish such information without claiming privilege. Subsequent to this decision the litigation between the bank and the surety company was settled.

The second case was that of Michigan National Bank v. Gidney (D. C. Cir. 1956), decided April 5, 1956. This suit was one brought by the Michigan National Bank of Lansing, Mich., against the Comptroller of the Currency seeking a declaratory judgment that the Comptroller was not precluded by Michigan law from approving the establishment by the bank of an additional branch in Saginaw, Mich., where it already had one branch. The Comptroller had declined to approve the branch on the grounds that under the applicable statutes the branch could not legally be established. The Comptroller's decision in this matter was in accord with opinions rendered on the legal questions involved by the attorney general of the State of Michigan, by counsel for the Comptroller's office, and the general counsel of the Treasury Department. Cross motions for summary judgment was granted. An appeal from this decision was taken to the United States Court of Appeals for the District of Columbia. That court held that the Comptroller's action in denying the branch was based upon a proper construction of applicable law, and affirmed the district court decision.

#### Fiduciary Activities of National Banks

As of December 31, 1955, there were 1,727 national banks which had been authorized by the Board of Governors of the Federal Reserve System to administer fiduciary accounts, either full or limited. Under these authorizations there were also 64 trust departments in branches of national banks. There were 247 banks not acting under any of their granted powers. During the year 1955 there were 1,439 head office trust department examinations conducted and 60 branch examinations, making a total of 1,499 examinations of trust departments in national banks. Trust department assets totaled \$37,187,830,514 at the end of 1955, including \$24,185,779,339 in agency, escrow, custodianship, and corporate accounts held in the trust department. Various comparative statistical data concerning fiduciary activities of national banks are presented in tables in the appendix of this report.

While carrying values for trust department assets have not been standardized throughout the country, there have been relatively few changes of system within individual organizations. Some substantial changes have been occasioned by the conversion of banks both into and out of the national banking system, but otherwise, because of the relatively few changes of system, the figures presented herein are fairly comparable, even though they do not reflect total current market values. Fiduciary accounting by corporate fiduciaries does not permit the maintenance or tabulation of statistics based upon current market values. Therefore, accurate information as to aggregate market values cannot be obtained without requiring special

reports imposing a substantial burden upon the banks.

In corporate financing national banks were acting as trustee for bond and debenture issues totaling \$17,358,441,198 in 8,056 accounts as of December 31, 1955. They were also acting as registrar in 3,060 accounts and as transfer agent in 3,153 accounts.

Of the total liabilities for all activities of the trust departments of national banks, 22 percent was in living trusts, 13 percent in court accounts, 54 percent in agency, escrow, custodianship type accounts, and 11 percent in all other accounts.

Of the total liabilities of the trust departments of national banks in all Federal Reserve districts, 33.1 percent was in the 7th district,

7.3 percent in the 6th district, Atlanta; 6.1 percent in the 2d district, New York; 5.2 percent in the 10th district, Kansas City, and the remaining 5 districts had less than 5 percent each.

Gross trust department earnings for national banks during 1955

totaled \$103,033,000.

Stock of the trustee banks held in their own trust departments by national banks is presenting an increasing problem, although not one of serious proportions. Very little of the stock is acquired by purchase, because Regulation F, issued by the Board of Governors of the Federal Reserve System governing the fiduciary activities of national banks, prohibits the purchase of such stock except when expressly required by the provisions of the trust instrument, or specifically authorized by order of the court, and in such cases the bank normally may exercise no discretion as to the retention or disposition of the Most of the stock of the trustee bank held in fiduciary acstock. counts is acquired from a decedent or trustor as a part of the original inventory of a trust or estate and is held subject to the discretion of the bank. In the discretionary retention of its own stock by a national bank as fiduciary there exists a strong possibility of a conflict of interest under which it is difficult, if not impossible, for the bank to exercise an unbiased discretion. Additional problems are occasionally presented in capital increases, primarily due to the above-mentioned regulations prohibiting puchase of such stock, and in voting the stock, due to statutory restrictions. National banks are advised that emphasis should be placed, not on ways and means of retaining the stock without liability, but on ways and means of reducing the amount of the bank's stock held in fiduciary capacities without conflicting with the provisions and objectives of the trust instruments.

Under authority of Regulation F, there were 105 common trust funds in operation in 94 national banks at the end of 1955. These common trust funds have been established to make collective investments of trust funds primarily in the smaller fiduciary accounts, thereby resulting in wider diversification of investment and less risk of loss to the individual accounts. Assets in common trust funds aggregated \$542,378,548 as of December 31, 1955, at ledger carrying

values.

Pension, profit-sharing, and other employee benefit trusts created by banks and by other employers are becoming a substantial part of the fiduciary business of national banks. While statistics are not yet maintained as to the number of such accounts or market value of their assets under administration in the national banks, a survey made by contacting several major trust departments indicates that probably 15 percent of all fiduciary business of national banks at the present time consists of employee welfare or benefit accounts. The form for reporting examinations of the trust departments of national banks is therefore being revised to include specific information on pension, profit-sharing and other employee benefit trusts held by the national banks and the information so obtained will substantially parallel information currently being collected by the Board of Governors of the Federal Reserve System from their reports of examination of State member banks.

The pension, profit-sharing, and other employee benefit accounts in the national bank trust departments fall generally into three categories: (1) Those accounts wherein the bank as trustee has full responsibility for administration, including investment of the funds and disbursement of benefits, (2) those accounts wherein the bank, although designated as trustee, may act only upon written directions of a committee, generally composed of employees of the employer corporation, and (3) those accounts for which the bank acts solely as

agent or custodian.

In the administration of any fiduciary account a national bank is governed by the terms of the trust instrument by which it was appointed, the provisions of Regulation F issued by the Board of Governors of the Federal Reserve System, and by the statutes of the State in which the bank is located. In addition, the bank as fiduciary must observe certain requirements of the Internal Revenue Code which includes special provisions concerning pension, profit-sharing, stock bonus, and annuity plans. In the supervision of national banks our examiners review the various fiduciary accounts to determine adherence to law, regulation and sound fiduciary practice, the primary purposes being to protect the rights of beneficiaries and the solvency of the banks.

In the investment of funds of pension, profit-sharing and other employee benefit trust accounts, the national banks with very few exceptions follow recognized sound policies and somewhat standard investment procedures. The funds are usually invested in bonds and stocks of good investment quality. Bonds are usually a higher percentage of total investments, with stocks generally between 25 and 50 percent of the total. Common stocks are purchased in higher percentages than preferred stocks.

Opinion seems to be divided as to the advisability of the purchase of stock or obligations of the employer company as an investment for pension, profit sharing, or other employee welfare accounts. In such accounts created by a national bank for its own employees and administered in its trust department, Regulation F prohibits the purchase of stock of the bank unless such investment is expressly required by the provisions of the trust instrument. Fundamentally, this office is opposed to placing stock of the employer national bank in a pension trust for its employees, other than to a limited extent, the theory being that an employee's retirement should not be dependent upon the continued success of his employer.

Legislation currently pending (S. 3873) will involve all employee benefit accounts whether or not they are administered by banks. This act proposes that all employee welfare or benefit plans will be registered with the Securities and Exchange Commission for the purpose of protecting the revenue of the United States and the rights of the beneficiaries of the various plans. Comprehensive annual reports are also to be filed with the Securities and Exchange Commission. These reports will reflect investments in securities or properties of all parties in interest, including stock of the employer bank, and investment concentrations. Copies of the annual reports are to be furnished to

the employees beneficiaries.

All national banks which are exercising fiduciary powers are endeavoring to supervise and administer their trust departments in full accordance with the provisions of law and sound fiduciary practice. The interests of the various beneficiaries are given prime consideration and the loss in national banks due to faulty administration of fiduciary accounts continues to be almost negligible.

#### Organization and Staff

On December 31, 1955, the Office of the Comptroller of the Currency had in its employ 1,137 persons. Of these 199 were assigned to the Washington office, including 33 in the Federal Reserve Issue and Redemption Division, which is an expense of the Federal Reserve banks. During the year the total personnel in the Washington office was increased by 1 and the total field force was increased by 25 persons.

Twenty-two national bank examiners and 81 assistant national bank examiners left the service during the year. In the same period 29 assistants were commissioned national bank examiners, 1 former national bank examiner was reappointed, and 126 new assistants were appointed. Four assistant examiners returned from military furlough, leaving a total of 258 examiners and 567 assistants in the service at the end of the year.

Chief National Bank Examiner William P. Folger retired on June 30, 1955, after many years of distinguished service with the Comptroller's office. District Chief National Bank Examiner Hollis S. Haggard was transferred from the Boston district to succeed Mr. Folger and National Bank Examiner Aloysius W. Green was promoted

to succeed Mr. Haggard.

District Chief National Bank Examiner Louis H. Sedlacek, in charge of the Cleveland office, resigned on April 17, 1955, and was succeeded by Clarence B. Redman, who had been serving as an Assistant Chief National Bank Examiner in the Washington office. National Bank Examiner Marshall Abrahamson was promoted to Assistant Chief National Bank Examiner to succeed Mr. Redman.

District Chief National Bank Examiner Irwin D. Wright retired from his position in charge of the Chicago office, on April 30, 1955. He was succeeded by Mr. James F. Rush, who had served for many years as an assistant examiner and examiner in 'the Chicago district.

In the last annual report it was stated that conferences were being had with the Civil Service Commission with respect to the continued recruitment of assistant national bank examiners on an excepted basis under long-established existing procedures and that it appeared continuance of the exception under schedule B of the civil-service regulations, instead of schedule A as formerly, would be approved. During the year an agreement was reached with the Civil Service Commission in this matter and all positions on the national bank examining staff were placed in schedule B, on an excepted basis, effective January 1, 1956. The change of the positions from schedule A to schedule B involves no major changes in recruitment procedures, the principal distinction being that an applicant for appointment as assistant national bank examiner must, under schedule B, qualify in a formal, noncompetitive examination whereas no such formal examination was required under schedule A.

The educational program conducted for members of the examining staff, referred to in previous reports, was continued during the year, this program being designed to improve training procedures for newly appointed assistant examiners and the efficiency of the entire examining staff. As of December 31, 1955, 255 members of the examining

staff had completed the extension courses of the American Institute of Banking, and 189 were still enrolled; 39 had completed the graduate-school courses conducted by the American Bankers Association at Rutgers University, the University of Wisconsin, the University of Washington, and the University of Louisiana, and 23 were still enrolled in these courses; and 113 had completed the prescribed courses in the interagency training school established in 1952 by the Comptroller of the Currency, the Board of Governors of the Federal Reserve System and the Federal Deposit Insurance Corporation.

The Office of the Comptroller of the Currency, as previously noted, had 1,137 persons in its employ at the end of 1955. The following data show how these people are utilized, and the various divisions that

comprise the working organization of the office.

Division	Executive or super- visory	Assistant examiners, assistant counsel, administrative assistants, auditors, secretarial, typists, clerical	Total

Funds used in payment of the bank supervision costs are derived from assessments against the banks supervised. The cost of operating the Division which handles the currency issue and redemption functions is paid by the Federal Reserve banks.

A comparison of the assets and liabilities of the banks in the national banking system as of December 31, 1954, April 11, June 30, October 5, and December 31, 1955, reported pursuant to calls for condition statements by the Comptroller of the Currency, is shown in the following table.

## EARNINGS, EXPENSES, AND DIVIDENDS OF NATIONAL BANKS FOR YEAR ENDED DECEMBER 31, 1955

The net profits of national banks before dividends for the calendar year 1955 were \$643,000,000, which amounted to 8.12 percent of average capital funds. Net profits for the previous year were \$741,000,000, or 9.58 percent of average capital funds. Cash dividends declared on common and preferred stock in 1955 totaled \$310,000,000, in comparison with \$300,000,000 in the previous year. The rate was 3.91 percent of average capital funds. These dividends were 48 percent of net profits available for the year. The remaining 52 percent of net profits, or \$333,000,000, was retained by the banks in their capital funds.

Net earnings from operations of \$1,332,000,000 showed an increase of \$101,000,000 over the year 1954. Adding to net earnings from operations profits on securities sold of \$36,000,000 and recoveries on loans and investments, etc. (including adjustments in valuation reserves) of \$99,000,000 and deducting losses and chargeoffs (including

current additions to valuation reserves) of \$378,000,000 and taxes on net income of \$446,000,000, the net profits of the banks before dividends for the year 1955, were \$98,000,000 less than for the year 1954.

Gross earnings were \$3,437,000,000, an increase of \$210,000,000 over 1954. Principal items of operating earnings in 1955 were \$1,955,000,000 from interest and discount on loans, an increase of \$153,000,000 over 1954, and \$757,000,000 from interest on United States Government obligations, an increase of \$23,000,000. Other principal operating earnings were \$195,000,000 from interest and dividends on securities other than United States Government, and \$189,000,000 from service charges on deposit accounts. Operating expenses, excluding taxes on net income, were \$2,105,000,000 as against \$1,996,000,000 in 1954. Principal operating expenses were \$1,008,000,000 for salaries and wages of officers and employees and fees paid to directors, an increase of \$36,000,000 over 1954, and \$374,000,000 expended for interest on time deposits, an increase of \$30,000,000.

Interest and discount on loans accounted for 57 percent of the bank's earnings, varying from 51 percent in the 7th Federal Reserve District to 62 percent in the 11th district. Interest and dividends on securities represented 28 percent of gross earnings for the year, with the banks in the 1st district showing the lowest ratio of 22 percent, while banks in the 7th district showed 35 percent, the highest ratio. Salaries, wages, and fees took 29 percent of gross earnings, ranging from 27.7 percent in the 4th district to 30.9 percent in the 9th and 10th districts. Current operating earnings before income taxes were 39 percent of gross earnings, ranging from 37 percent in the 12th district to 41.5 percent in the 4th district.

The rate of interest and discount on the average loans and discounts for the year varied from 4.21 percent in the 2d district to 5.19 percent in the 6th district. The national average was 4.77 percent. The rate of interest and dividends received on the average securities held was 2.10 percent, and varied from 1.99 percent at the banks in the 1st district to 2.20 percent for the banks in the 3d district.

Current operating earnings before income taxes were 17 percent on the average total capital accounts, varying from 13 percent in the 3d district to 22.3 percent in the 12th district. Net profits after income taxes but before dividiends were, as noted above, 8.12 percent on the average capital accounts, ranging from 6.53 percent in the 3d district to 10.43 percent in the 12th district.

Summaries of the earnings, expenses, and dividends of national banks for the years ended December 31, 1954 and 1955, are shown in the following table.

<sup>&</sup>lt;sup>1</sup> Number at end of period. Remaining figures include earnings, expenses, etc., of those banks which were in operation a part of the year but were inactive at the close of the year.

<sup>2</sup> Figures are averages of amounts reported for the June and December call dates in the current year and the December call date in the previous year.

Note.—Figures are rounded to the nearest tenth of a million and may not equal totals.

### STRUCTURAL CHANGES IN THE NATIONAL BANKING SYSTEM

The authorized capital stock of the 4,700 national banks in existence on December 31, 1955, consisted of common capital stock aggregating \$2,470,416,703, a net decrease during the year of \$13,085,560, and preferred capital stock of \$4,165,670, a net decrease during the year of \$222,250. These figures include one bank recently chartered but not yet open for business at the end of the year and excludes one bank which furnished a report of condition in response to the call, although it was merged with another national bank at the close of business on December 31. The capital stock adjustment relative to the merger is reflected in these figures but not in the reports of condition.

In addition to 48 applications with proposed common capital stock of \$12,020,000 and \$50,000 preferred capital stock carried over from the previous year, 78 applications were received to organize national banks and to convert State banks into national banking associations with proposed common capital stock of \$24,212,500. Of these applications, 50 with proposed common capital stock of \$16,920,000 and preferred capital stock of \$50,000 were approved; 25 with proposed common capital stock of \$5,837,500 were rejected; and the remainder had been abandoned or were still pending on December 31. From the applications carried over from the previous year and those approved during 1955, 37 national banking associations with common capital stock of \$9,680,000 and preferred capital stock of \$50,000 were authorized to commence business. Of the charters issued, 8 with common capital stock of \$2,040,000 and preferred capital stock of \$50,000 resulted from the conversions of State banks.

Changes in the number and capital stock of national banks during the year ended December 31, 1955, are shown in the following summary.

### NATIONAL BANK NOTES OUTSTANDING

There were, as of December 31, 1955, \$66,192,249 of national bank notes outstanding.

# ASSETS AND LIABILITIES OF ALL BANKS IN THE UNITED STATES AND POSSESSIONS

The total assets of all classes of active banks in the United States and possessions on December 31, 1955, amounted to \$243,105,000,000, an increase of \$10,420,000,000 since December 31, 1954.

The total deposits at the end of 1955 amounted to \$221,392,000,000, an increase of \$9,362,000,000 over 1954. Included in the latter aggregate are deposits of individuals, partnerships, and corporations of \$183,879,000,000, an increase of \$8,989,000,000 in the year. Deposits of the United States Government, including postal savings deposits, were \$4,161,000,000, a decrease of \$472,000,000; deposits of States and political subdivisions amounting to \$12,768,000,000 showed an increase of \$305,000,000, and deposits of banks of \$16,661,000,000 were \$165,000,000 less than in 1954.

Loans and discounts amounted to \$100,575,000,000 in December 1955 after deducting reserves of \$1,484,000,000 for possible future losses. The net loans were \$14,516,000,000 over the amount reported as of the end of 1954. Commercial and industrial loans of \$33,456,000,000 were \$6,396,000,000 more than the 1954 figure; real-estate loans of \$38,461,000,000 were up \$4,880,000,000, and all other loans of \$30,142,000,000 increased \$3,458,000,000.

The banks held obligations of the United States Government, direct and guaranteed, of \$70,310,000,000 in December 1955, a decrease of \$7,694,000,000 in the year. Obligations of States and political subdivisions held amounted to \$13,396,000,000, an increase of \$152,-000,000, and other securities held amounted to \$7,358,000,000, an increase of \$82,000,000. The total of all securities held at the end of 1955 was \$91,064,000,000, and represented 37 percent of the banks' total assets. At the end of the previous year the ratio was 42 percent.

Cash and balances with other banks, including reserve balances, in 1955 were \$47,979,000,000, an increase of \$3,225,000,000 since the previous year.

Total capital accounts were \$18,210,000,000, compared to \$17,-

364,000,000 at the end of 1954, an increase of 5 percent.

A statement of the assets and liabilities of all classes of active banks at the end of December 1954 and 1955 follows.

#### REPORTS FROM BANKS

National banks in the continental United States, Alaska, the Territory of Hawaii, and the Virgin Islands of the United States were, in accordance with the provisions of section 5211 of the Revised Statutes, called upon to submit 4 reports of condition during the year ended December 31, 1955. Reports were required as of April 11, June 30, October 5, and December 31. Summaries from all condition reports, by States, are published in pamphlet form. National banks were also required by statute to obtain reports, unless waived by the Comptroller, of their affiliates and holding company affiliates other than member banks as of the 4 dates for which condition reports of the banks were obtained and to submit such reports to the Comptroller.

Under the general powers conferred upon him by law, the Comptroller obtained from each national bank during the period indicated semiannual reports of earnings, expenses, and dividends; also reports of condition of foreign branches as of December 31, 1955.

National banking associations authorized to act in a fiduciary capacity were called upon to submit reports of their trust departments as of the close of business on December 31, 1955.

In accordance with section 298 of the code of law for the District of Columbia, banks other than national in the district were required to make to the Comptroller condition reports and reports of earnings,

expenses, and dividends identical with those obtained from national banks during the year.

Detailed figures from reports of condition and earnings and dividends

will be found in the appendix of this report.

## AFFILIATES AND HOLDING COMPANY AFFILIATES OF NATIONAL BANKS

The Federal statute requires each national bank to obtain and submit to the Comptroller periodically reports of its affiliates, as defined in sections 2 (b) and (c) of the Banking Act of 1933, as amended. However, section 21 of the Federal Reserve Act, as amended, provides in part that the Comptroller may waive the requirement for the submission of the report of an affiliate if in his judgment such a report is not necessary to disclose fully the relations between an affiliate and a bank and the effect thereof upon the affairs of the bank. Pursuant to this latter section the Comptroller's waiver of requirement for reports of affiliates provides principally that reports of affiliates (other than holding company affiliates) need not be submitted and published in a newspaper unless the affiliate is indebted to the national bank or the bank owns obligations of the affiliate and the aggregate of such indebtedness and/or investment is carried as an asset on the bank's books at a value in excess of \$5,000, or 1 percent of the bank's capital and surplus, whichever is the greater.

At the end of December 1955, 296 member national banks in the United States submitted 333 reports of affiliates. Included in these figures are 180 banks in 22 States which are members of 20 holding company groups. The number of banks in each holding company group varied from 1 to 50. The actual number of reporting affiliates

and holding company affiliates was 172.

In addition there were 2 nonnational banks in the District of Columbia which are members of the Federal Reserve System that reported 3 affiliates to the Comptroller pursuant to the provisions of the code of law for the District of Columbia.

### LIQUIDATION OF INSOLVENT NATIONAL BANKS

During the year ended December 31, 1955, the Federal Deposit Insurance Corporation was appointed by the Comptroller of the Currency as receiver of 2 insolvent national banks, the First National Bank of Lewisville, Tex., and the Joshua Monument National Bank of Twentynine Palms, Calif. Both receiverships were the outgrowth of large defalcations that absorbed normal surety bond protection that was maintained and an amount in excess of the entire capital structure of each bank. Pursuant to the Federal Deposit Insurance Act of 1950 (Public Law 797), approved September 21, 1950, the liquidation of these 2 banks has not been subject to the supervision of the Comptroller of the Currency.

The one insolvent national bank in process of liquidation under the supervision of the Comptroller of the Currency as of December 31, 1954, was still in process of liquidation as of December 31, 1955. The liquidation of this receivership has been continued because of pending litigation but it presently appears that an early adjudication may be

expected.

#### ISSUE AND REDEMPTION OF NOTES

Six hundred and forty-four shipments of Federal Reserve currency were made from Washington, D. C., during the year ended December 31, 1955, to Federal Reserve agents and Federal Reserve branch banks, aggregating \$5,697,560,000, and in addition, 18 deliveries were made to the Treasurer of the United States aggregating \$103,000,000.

Four thousand four hundred and sixty-nine lots of unfit Federal Reserve currency were received for verification and certification for destruction consisting of 452,667,258 notes aggregating \$5,510,947,355.

There were received 30 lots of national bank notes for verification and certification for retirement and destruction consisting of 184,433

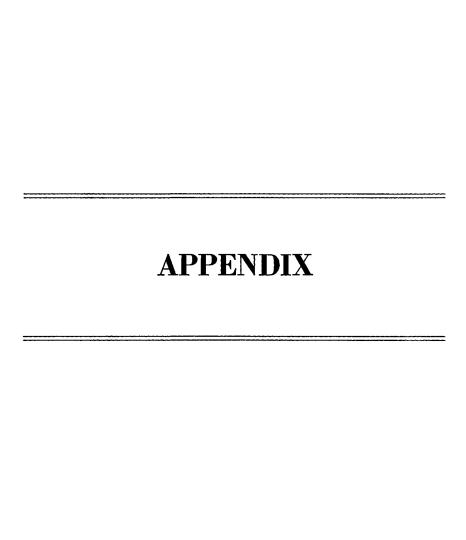

notes aggregating \$2,996,415.

One hundred and sixty thousand three hundred and forty-one fragments or charred Federal Reserve and national bank notes aggregating \$2,800,210 were presented by the Treasurer of the United States for identification and approval.

### EXAMINATION OF NATIONAL BANKS

The National Bank Act requires that each national bank be examined at least twice each year in order that the Comptroller may be kept currently informed of its condition and require such corrections as are deemed necessary with a view to maintaining each bank in sound condition. In addition to the regular examinations, special examinations are conducted of banks the condition of which is regarded as unsatisfactory.

During the year ended December 31, 1955, 8,178 examinations of banks 5,321 examinations of branches, 1,499 examinations of trust departments, and 16 examinations of affiliates were conducted. Twenty-two State banks were examined in connection with conversions to or consolidations with national banks. Investigations were also conducted in connection with applications for 65 new charters and 447 new branches.

#### Notes

Act of Feb. 25, 1863, provided for reports of condition on the first of each quarter, before commencement of business

Act of June 3, 1864—First Monday of January, April, July, and October, before commencement of business, on form prescribed by Comptroller (in addition to reports on first Tuesday of each month showing condition at commencement of business in respect to certain items; i. e., loans, specie, deposits, and circulation).

Act of Mar. 3, 1869, not less than 5 reports per year, on form prescribed by Comptroller, at close of business on any past date by him specified.

Act of Dec. 28, 1922, minimum number of calls reduced from 5 to 3 per year.

Act of Feb. 25, 1927, authorized a vice president or an assistant cashier designated by the board of directors

to verify reports of condition in absence of president and cashier.

Act of June 16, 1933, requires each national bank to furnish and publish not less than 3 reports each year of affiliates other than member banks, as of dates identical with those for which the Comptroller shall during such year require reports of condition of the bank. The report of each affiliate shall contain such information as in the judgment of the Comptroller shall be necessary to disclose fully the relations between the affiliate and the bank and to enable the Comptroller to inform himself as to the effect of such relations upon the affairs of the bank.

Sec. 21 (a) of the Banking Act of 1933 provided, in part, that after June 16, 1934, it would be unlawful for any private bank not under State supervision to continue the transaction of business unless it submitted to periodic examination by the Comptroller of the Currency or the Federal Reserve bank of the district, and made and published periodic reports of condition the same as required of national banks under section 5211, U. S. R. S. Sec. 21 (a) of the Banking Act of 1933, however, was amended by section 303 of the Banking Act of 1935, approved Aug. 23, 1935, under the provisions of which private banks are no longer required to submit to examination by the Comptroller or Federal Reserve bank, nor are they required to make to the Comptroller and publish periodic reports of condition. (5 calls for reports of condition of private banks were made by the Comptroller, the first one for June 30, 1934, and the last one for June 29, 1935.)

<sup>&</sup>lt;sup>1</sup> Number at end of period. Remaining figures include earnings, expenses, etc., of those banks which were in operation a part of the year but were inactive at the close of the year.

<sup>2</sup> Figures are averages of amounts reported for the June and December call dates in the year indicated and the December call date in the previous year.

Note.—Earnings and dividends figures for 1869 to 1937 were published for the years ended August 31 or June 30 and appear in the table beginning on page 96 of the Comptroller's Annual Report for 1937. Similar figures for 1938 through 1941 appear in table 26 on page 136 of the 1941 report. Calendar year figures are available, beginning with the year 1917, and are published in the Comptroller's reports as follows: 1938, p. 100; 1940, p. 17; 1942, p. 34; 1943, p. 30; 1946, p. 98; 1949, p. 100, 1951, p. 118, and 1954, p. 142.

Back figures.—See reference in heading of table 46, p. 190, in 1953 annual report to reports containing figures since 1834. (Comparable figures for years prior to 1936 covered June 30 only.)

Note.—Reciprocal interbank demand balances with banks in the United States are reported net beginning with the year 1942.

Includes reserve balances and cash items in process of collection,
 Includes capital notes and debentures in banks other than national.
 Includes reserve accounts.
 Not called for separately. Included with "Balances with other banks,"

THE

<sup>1</sup> Includes reserve balances and cash items in process of collection.

Note.—Reciprocal interbank demand balances with banks in the United States are reported net beginning with the year 1942.

Back figures.—See reference in heading of table 48, p. 192, in 1953 annual report, to reports containing figures since 1834. (Comparable figures for years prior to 1936 covered June 30 only.)

<sup>&</sup>lt;sup>2</sup> Includes reserve accounts.

<sup>8</sup> Not called for separately. Included with "Balances with other banks."

Table No. 49.—Summary of status, progress, and results of liquidation of all national banks 1 placed in charge of receivers from the date of the first national bank failure, Apr. 14, 1865, to Dec. 31, 1955 10

State and private banks: December 31, 1955, by classes of banks and	
by States 166, 184–185, 192–193, 200	. 204
Legislation enacted:	,
Section 24 of F. R. Act amended to permit national banks to make	
amortized mortgage loans not in excess of 20 years, and to extend	
the maximum duration of residential and farm construction loans	
which are not regarded as real estate loans from 6 to 9 months	23
Section 5146, U.S. R. S., amended to require two-thirds of directors	
to live within State or 100 miles of bank	23
Section 5221, U. S. R. S., amended to omit requirement that national	
banks going into voluntary liquidation publish notice thereof in	
newspaper in New York City	23
Section 5240, U. S. R. S., amended to provide for not more than three	
examinations each two-year period in instances where considered	
prudent by Comptroller	<b>2</b> 3
Legislation proposed:	
To change from 5 to 10 days the period allowed national banks in	
which to furnish call reports	22
To eliminate requirement that national banks notify this office of	
declarations of dividends	22
To permit cumulative voting by shareholders of national banks only	
if provided for in banks' articles of association	22
To permit national banks to make 18-month construction loans to	
finance construction of commercial or industrial properties	22
Liabilities. (See Assets and liabilities of banks.)
