NINETY-FOURTH ANNUAL REPORT

OF THE

Comptroller of the Currency 1956

WASHINGTON: 1957

TREASURY DEPARTMENT
Document No. 3204
Comptroller of the Currency

For sale by the Superintendent of Documents, U. S. Government Printing Office Washington 25, D. C. - Price \$1.75 cents

LETTER OF TRANSMITTAL

TREASURY DEPARTMENT,
OFFICE OF THE COMPTROLLER OF THE CURRENCY,
Washington, D. C., July 1, 1957.

Sirs: In accordance with the provisions of section 333 of the United States Revised Statutes, I have the honor to submit the following report covering the activities of the Bureau of the Comptroller of the Currency for the year 1956.

Respectfully,

RAY M. GIDNEY, Comptroller of the Currency.

THE PRESIDENT OF THE SENATE.
THE SPEAKER OF THE HOUSE OF REPRESENTATIVES.

ш

ANNUAL REPORT

OF THE

COMPTROLLER OF THE CURRENCY

STATUS OF NATIONAL BANKING SYSTEM

The 4,659 national banks with total assets of \$117,701,982,000 at December 31, 1956, maintained their relative position in the Nation's banking. They held approximately 47 percent of the banking assets in the commercial and savings banks of the Nation, and 54 percent of the commercial banking assets, while State-chartered commercial banks and trust companies, numbering 9,001, held assets of \$101 billion, and 528 State-chartered mutual savings banks had assets of \$33.3 billion. For all banks, assets were \$252 billion, an increase of \$8.8 billion for the year, which were held in the following types and categories of banks:

[Figures in millions of dollars]

Growth of Financial Institutions

Commercial bank assets increased \$6.8 billion over 1955. The 3.2 percent increase was below the average annual growth of 4.5 percent during the past decade. The most rapid growth has occurred in savings and loan associations and mutual savings banks which have been in position to offer more attractive savings interest rates because of their favorable tax status and lower liquidity requirements. Effective January 1, 1957, most of the Nation's commercial banks were permitted to make upward revisions in savings interest rates. Whether this will enable the commercial banks to compete more effectively with the mutual type organizations remains to be seen. Relative growth by classes during the past ten-year period is presented in the following table:

Financial Institutions [Total assets]

	Dec. 31, 1946	Dec. 31, 1956	Percentage of increase
	(In billions		
Commercial banks Mutual savings banks Savings and loan associations	151 19 10	219 33 43	45. 0 73. 7 330. 0

Status of National Banks

A reduction in the number of national banks in the national banking system from 4,700 to 4,659 is accounted for through consolidations, mergers, sales, and a few conversions which occurred during 1956. The total assets held by the system at the year end amounted to \$117.7 billion reflecting a gain of nearly \$4 billion during the year. Of this gain \$326 million came through assets acquired in the absorption of State banks by national banks by consolidations, mergers, and purchases, and the conversion of 10 State banks into national banks, and represents the net gain in excess of the aggregate assets of national banks which flowed into the various State banking systems through similar transactions. With a few exceptions, the national banks continue to maintain an excellent condition as measured by the basic tests of competency of management, soundness of assets, capital adequacy, and earning capacity.

Deposits

During 1956, the total deposits of all national banks increased \$3.3 billion thereby raising the year end total to \$107.5 billion as compared to \$104.2 billion at the end of 1955. The increase for the year 1955 was \$3.9 billion.

The need for a higher interest rate to permit commercial banks to achieve a better measure of competitive equality in the field of savings and time deposits became more critical during 1956. Late in the year the Board of Governors of the Federal Reserve System issued a supplement to Regulation Q, effective January 1, 1957, which raised from

2½ percent to 3 percent the maximum rate of interest a member bank may pay on time and savings deposits and similar action was taken by the Federal Deposit Insurance Corporation for nonmember insured banks. This departure from the 2½ percent maximum rate in effect since February 1, 1935, was in recognition of the general rise which had been taking place in interest rates. Many national banks promptly revised their savings interest rates upward, some to the maximum permitted by the Regulation. At this time it is too early to determine whether the increased rates will result in commercial banks obtaining an importantly larger proportion of available savings and time deposits. Mutual-type associations enjoy tax advantages over commercial banks, maintain loan positions (with attendant earnings advantages) that the liquidity requirements of commercial banks will not permit, and have also been able to place in effect higher rates of interest for deposits or share accounts.

Loans

After deducting Reserves for Bad Debts and valuation reserves of \$833.5 million, national banks held net loans of \$48.2 billion at the end of 1956, an increase of \$4.6 billion over the net total of \$43.6 billion reported at the close of the previous year. Loans to commercial and industrial type borrowers increased \$2.8 billion to a total of \$21.1 billion at the year end. This category of loans now constitutes 43 percent of national system portfolios, up 2 percent from the prior year end.

Nonfarm housing units on which construction was started in 1956 numbered 1,120,000, approximately 209,000 less than those started in 1955. The value of all types of new construction activity in 1956 has been estimated at \$44.3 billion with business construction ac-

counting for most of the gain of \$1.3 billion during the year.

That portion of the real estate mortgage debt of the nation secured by residential properties (1 to 4 family houses) totalled \$99.1 billion at the close of 1956 reflecting an increase of \$10.9 billion for the year as compared to a gain of \$12.5 billion for the prior year. The 1956 increase in the total of all types of real estate mortgage loans was \$14.7 billion whereas the gain reported for 1955 was \$16.2 billion. Farm mortgage debt reported at \$9.7 billion was up less than 8 percent from the close of 1955. National banks held real estate mortgage loans at the end of 1955 and 1956 as follows:

[Figures in millions of dollars]

Туре	Dec. 31,	Dec. 31,	Dollar
	1955	1956	increase
Conventional—residence Conventional—other properties Conventional—farm Insured—FHA. Insured or guaranteed—VA.	3, 500	3, 931	431
	1, 986	2, 264	278
	505	516	11
	2, 787	3, 022	235
	2, 242	2, 330	88
Total	11, 020	12, 063	1, 043

The \$12 billion of real estate mortgage loans held by national banks at the end of 1956 constituted approximately 25 percent of their net loans and discounts. The \$1 billion by which national banks increased their holdings of real estate mortgage loans constitutes about 7 percent of the \$14.7 billion reported increase for all types of such loans in the Nation in the year 1956. National banks acquired about 8 percent of the Nation's increase in such loans in 1955.

Each national bank is required by law to restrict its total investment in real estate mortgage loans, excepting those loans which are insured or guaranteed to the extent of 20 percent or more by the Veterans Administration, to an amount not exceeding 60 percent of its time and savings deposits or 100 percent of capital and surplus, whichever is the greater. The \$9.7 billion in real estate mortgage loans which are subject to this limitation equals 36.9 percent of the \$26.3 billion of time and savings deposits held by the national banking system.

The Nation's consumer debt continues to rise and reached an estimated \$41.9 billion at the year end as compared to \$38.6 billion at the end of 1955, an increase of \$3.3 billion.* Instalment credit at the close of 1956 is estimated at \$31.6 billion of which \$14.4 billion or 45.6 percent is represented by automobile paper, nearly 1 percent less

than the proportion which existed at the end of 1955.

The total amount of instalment type personal and consumer loans held by the national banking system at the year end was \$7.5 billion, up \$777.5 million from the end of 1955. The holdings of these types of instalment loans by national banks represented 23.7 percent of such loans held by all financial institutions and retail outlets of the Nation. Automobile loans held by national banks totalled \$3.5 billion, up \$293.7 million for the year, and constituted 46.7 percent

of all instalment loans held by such banks.

Generally, national banks have maintained sound standards of down payment and maturity terms for automobile paper accepted during 1956. On the basis of information assembled from 1956 reports of examination of 3,856 national banks which segregate instalment paper in their loan portfolios or hold such paper in an aggregate amount equal to 10 percent or more of their loan accounts, only 14 banks were offering automobile loan terms or accepting dealer paper upon terms which appeared subject to criticism. Subsequent to the examinations, some of these banks have revised their terms to more conservative limits or have such a revision under consideration. The new examination report forms dealing with instalment credit which have been in use since August 16, 1955 are thought to have been beneficial and helpful from a supervisory standpoint, and also because bank management has the opportunity to consider graphic presentation of policy weakness if it exists and adopt suitable strengthening measures. The following schedule provides details on the down payment and maturity policies of the 3,856 national banks abovementioned divided into three size groups.

^{*}Consumer Credit Statistics have been revised on the basis of data which became available recently. The revision raised the estimate of total consumer credit outstanding as of December 31, 1955, by about 7 percent or \$2.4 billion. Comments relating to these statistics contained herein take into account the revised data which were not available at the time the 93rd Annual Report of the Comptroller of the Currency—1955 was prepared

Liquidity

A continuing increase in loan volume in 1956 affected the liquidity of national banks less than in either 1954 or 1955. Demand deposits at the end of 1956 were 74 percent covered and total deposits 54.7 percent covered by cash, balances due on demand from correspondent and reserve banks, and United States Government securities, as opposed to 77 percent and 57 percent, respectively, at the 1955 year end. At the close of 1954 such liquid assets covered 82.3 percent of demand deposits and 61.3 percent of total deposit liabilities.

Investment Accounts

Total investment accounts of national banks continued to decline in 1956 and amounted to \$40.5 billion at the end of the year, a reduction of \$2.3 billion of which \$2 billion were in obligations of the United States. During the last half of the year there was an increase of \$1 billion in holdings of United States obligations and the rate of addition to these holdings appeared to have accelerated in the last quarter. The reduction of investments provided an important source of funds to satisfy the demand for loans which increased \$4.6 billion to \$48.2 billion. Deposits of individuals, partnerships and corporations increased \$2.5 billion to furnish the difference.

A significant change has taken place in the distribution of maturities in the holdings of United States obligations. In the year 1955 a decrease of \$5.8 billion occurred in U. S. Government holdings but the percentage of short term holdings remained relatively constant at slightly over 56 percent. At the end of 1956, short maturities had increased to over 70 percent of all holdings of United States obligations by national banks. While there has been some addition to long term United States issues, they represent less than 8 percent of the total investment account. During 1956 no important change took place in the distribution of maturities of municipal and other bonds.

Includes \$978 million of nonmarketable United States Bonds.
 Includes \$1,108 million of general obligations of States and \$676 million of housing authority obligations.
 Includes \$924 million of special revenue municipal authority obligations and \$992 million of Federal Corporation (not guaranteed) bonds.

Capital Structure

The adequate capitalization of all national banks continues to be an important objective of the Comptroller's office. During 1956 the sale of additional capital stock to further strengthen capital structures was undertaken and consummated by the managements and shareholders of 232 national banks. These 232 banks sold new shares of common stock which yielded \$192 million of additional funds to augment their capital structures. The shareholders of 329 national banks, with the approval of the Comptroller, approved dividends payable in common stock having a total par value of \$83 million during the year. During the 10-year period 1947 to 1956, 1,639 national banks have completed new capital sale programs which added \$1,074 million to their capital funds.

At the end of 1956, the capital structures of the 4,659 national banks amounted to \$8,472 million, and their reserves for bad debts and other loan valuation reserves to \$833.5 million, or an aggregate total of capital funds and reserves of \$9.3 billion. This is the equivalent of \$1 of capital protection to cover the potential risks involved in each \$5.88 (\$5.80 at the close of 1955, \$5.27 at the close of 1954, \$5.43 at the close of 1953) of loans, municipal and corporate bonds, and other assets remaining after deducting from its \$118.5 billion of total assets, \$63.8 billion of cash or its equivalent, United States Government obligations, and loans or portions of loans guaranteed or insured by Federal Government agencies.

The volume of assets in the national banking system considered by national bank examiners to contain substantial or unwarranted elements of risk continues to be very small in relation to the protection offered by capital structures and reserves.

Earnings and Net Additions to Reserves

Net profits of national banks after taxes but before dividends in the year ended December 31, 1956 were \$647.1 million, exclusive of \$142.9 million added to bad debt and valuation reserves. Comparable figures for the year 1955 were \$643.1 million and \$88.3 million, respectively. Such net profits and additions to reserves for the year 1956 were equal to 9.32 percent of year end capital funds, up from 9.22 percent for the year 1955. Dividends of \$329.9 million were paid to shareholders, and net retained earnings and additions to reserves amounted to \$460.1 million.

Net earnings from current operations amounted to \$1,497 million, equivalent to 1.39 percent of year end deposits of \$107.5 billion, as compared with 1.28 percent for the year 1955. Adding to the net operating earnings profits on securities sold of \$11.4 million, recoveries on assets previously charged off of \$79 million, and deducting therefrom actual losses on securities sold and charge-offs against book values of \$238.9 million, actual loan losses of \$78.3 million, and chargeoffs on other assets of \$48.2 million, the aggregate net profits of all national banks equaled \$1,221.8 million. Deducting therefrom net additions to bad debt reserves and valuation reserves of \$142.9 million, net profits before income taxes amounted to \$1,078.9 million. taxes paid were \$431.7 million (29 percent of net earnings from operations and 40 percent of net profits before taxes), leaving net profits, as above stated, of \$647.1 million.

Set forth below is a schedule of earnings, expenses, etc., per \$100 (1) of assets and (2) capital funds, showing the trend in each of the past 4 years.

Earnings, expenses, etc., of national banks for the years ended December 31, 1953, 1954, 1955, and 1956

¹ Exclusive of transfers to and from reserve for bad debts and other valuation reserves on loans and securi-

thes but including net losses charged to these reserves.

Includes funds transferred to reserve for bad debts and valuation reserves less the amount of assets charged off against such reserve accounts. Includes \$33 million in 1953, \$106 million in 1954, \$89 million in 1955 and \$143 million in 1956 transferred to effect a net increase in reserves for bad debts and valuation reserves. (Taxes would have absorbed a portion of these amounts had the transfers not been made.)

Reserve for Bad Debts

During the calendar year 1956, the upward trend continued in the number of national banks maintaining reserves for bad debts and in the dollar volume of such reserves. At year end, 2,721 national banks (58.4 percent of all national banks) having gross loans of \$45.2 billion (92.27 percent of gross loans in all national banks) were maintaining reserves for bad debts of \$792.7 million, an increase of \$174 million over 1955. At the end of 1955, 2,654 national banks maintained such reserves. The total amount of bad debt reserves amounted to 1.75 percent of gross loans in those banks maintaining such reserves. A large number of banks have reached or are approaching the ceiling established for such reserves by the Internal Revenue Service.

As pointed out in the Comptroller's annual reports for 1954 and 1955, the existing formula approved by the Internal Revenue Service for computing the allowable amounts of reserves for bad debts requires each bank to limit its reserve for bad debts to a percentage based on its own loan loss experience for any consecutive 20 years' period commencing January 1, 1928. This permits the largest reserves in relation to gross loans outstanding to be established by those banks which suffered relatively the greatest loan losses in the past. This results in undesirable inequities between banks since the banks that may most need such reserves, based on their condition present and prospective, may be those that are permitted to establish a small percentage of reserves in relation to outstanding loans because of their favorable loss history. There is a need for a bad debt reserve formula, not limited to the loss history of the individual bank or group of banks, but based upon the premise that loan losses must be expected in the long run which may become abnormally large under unfavorable conditions and such losses should be regarded as a banking hazard against which a reasonable initially tax-free reserve should be established. A soundly based formula should be adopted to permit banks to create and maintain reserves by transfers from earnings at a reasonable rate in relation to total loans until a suitable ceiling is reached, without reference to or as an alternative to a ceiling based on current or past loss experience. It is believed that this will require legislative action.

Pension Plans

During 1954 the examination report form was revised to include pertinent information regarding the pension plans of national banks. Recently the Office of the Comptroller of the Currency compiled data based on the information thus obtained.

Of 4,521 ¹ banks surveyed, 34.6 percent or 1,567 national banks, employing 202,058 or 80.3 percent of all national bank personnel, have pension plans. A total of 49,577 or 19.7 percent of the officers and employees of national banks are not covered by some type of formal retirement program.

Pension programs in the banking field have gained increased prominence within the past 10 years. Many small and medium-sized insti-

¹ Not included are 138 banks which have plans of some type but for which information is not complete,

tutions have adopted plans during this period. Generally speaking the larger banks of the country have had pension plans for longer periods. Their adoption has come about largely through the desire of banks to provide economic security for their employees and recognition that formal retirement plans covering old age and disability have become increasingly important in the general wage structure. Thus it has become correspondingly more difficult for banks to obtain and retain desirable personnel if such plans are not available.

Among the considerations which have influenced banks to adopt

pension plans are the following:

(1) Increased efficiency of employees who enjoy good prospects for future economic security.

(2) Reduction in employee turnover.

(3) Greater selectivity possible in obtaining new employees.

(4) Improved opportunity for advancement of younger workers afforded by the systematic retirement of older employees.

(5) Promotion of employee satisfaction and good will.

An important advantage of pension plans is that these programs assist in furnishing continuity of management, particularly in the small and medium-sized banks. The problem of management succession in these institutions has become more difficult in the past few years and, in many instances, has been a motivating factor in the consolidation or merger of smaller banks with larger institutions.

Costs of the retirement programs surveyed, which are fully deductible for Federal Income Tax purposes contingent upon approval of the plan by the Internal Revenue Service, average approximately 7 percent of net profits before taxes and dividends. The net cost would appear to be within the earnings capacity of almost all banks and the value received is adequate to justify the expense. The average annual cost to the banks surveyed per employee is approximately \$280. The largest banks have a higher average annual cost per employee, caused in part by the greater proportion of these institutions which bear the entire cost of the plans without employee contributions.

The following table reflects some of the important factors in connection with pension programs of national banks. Data is classified according to size of bank based on total deposits.

National banks with Pension Plans

	Number	of banks	Average		Average	Cost of plan per bank as

The following table presents a geographical distribution according to Federal Reserve districts of national banks with pension plans. In all Federal Reserve districts a majority of the larger banks have pension plans while only 22 percent of the national banks with deposits under \$10 million have programs. Most of the smaller banks without plans are located in agricultural areas which do not have to compete directly with industries offering such plans. National banks with pension plans range from a high of 58 percent in the First Federal Reserve district to a low of 18 percent in the Tenth Federal Reserve district.

		rith deposi 10 million		Banks	Grand

Branch Banking

The apparent need of banks for new branches continued during 1956, as evidenced by the near-record number of applications for de novo branches filed by national banks. The 524 applications received were acted upon as indicated below:

	Number	Percent
Approved Denied Withdrawn In process of investigation and study	299 125 46 54	57 24 9 10
Total	524	100

Pressure for new branch facilities continues in direct relation to the growth in population of suburban areas and the increasing traffic congestion and parking problems in downtown business sections. It is also fostered by competitive banking factors.

On December 31, 1956, 631 national banks out of a total of 4,659 were operating 3,655 branches in 35 States, the District of Columbia, Alaska, Hawaii and the Virgin Islands. This compares with 3,224

branches of 547 national banks at the previous year end.

The Financial Institutions Act of 1957, which was passed by the Senate in March, and is awaiting action in the House of Representatives, in Section 39 contains two changes in the provisions dealing with branches that are of interest. Subsections (a), (c), (d), (e) and (g) of this section are the same as Title 12, United States Code, Sec-Subsection (b) of this section is the same as subsection (b) of Title 12, United States Code, Section 36, to the effect that if a State bank is merged with a national bank, or if two or more national banks are merged, then the merged banks may retain and operate any of their branches in lawful operation on February 25, 1927. It adds a new provision to the effect that as to any banks so merged or consolidated, any branches of the continuing bank may continue to be retained and operated if they were in lawful operation immediately prior to the effective time of the merger or consolidation. The purpose of the existing law is to prevent a bank from acquiring branches by taking over other banks where such branches could not legally be established under State law. However, this purpose does not apply to branches of the continuing bank, and no public interest is served by requiring the continuing bank to obtain anew the approval of the Comptroller of the Currency for continued operation of its legally established branches already in existence.

Subsection (f) of this section continues the definition of the term "branch," but adds a proviso that acceptance of deposits in furtherance of a school thrift or savings plan by a national bank at any school located within its trade area and within the same State shall not be considered to be the operation of a branch. The public interest in encouraging school children in habits of thrift is ample justification for this departure from the general rule that the acceptance of deposits by a national bank agent at any place other than the bank's

main office constitutes branch banking.

Applications to Organize National Banks

Fifty-nine applications to organize new national banks were filed in 1956. Approval was given to 23 applications, 20 cases were denied, 11 were abandoned and 5 were pending. The 23 approved cases have resulted or will result in the organization of new national banks in 14 States. Thirty banks were chartered during the year and opened for business in 13 States.

State	Number of ap- provals	Number of banks opened	Approvals total capital structure	Banks opened total capital structure

^{*}Approvals include three that also opened during 1956. The remaining 20 had not completed their organization.
**Opened banks include 27 that were originally approved in 1955 or 1954 but did not open for business until 1956.

Bank Consolidations, Mergers, Sales

During 1956 the Comptroller approved the absorption of 105 State and national banks by 101 national banks as compared to 126 such absorptions by 118 national banks in 1955. Twenty-six national banks were absorbed by 25 State banks during 1956 as compared to 47 such absorptions by 46 State banks in 1955. Fifty-five State banks were absorbed by other State banks in 1956 as compared to 52 in 1955. The following schedule contains details of the absorptions which occurred during 1956.

Consolidations, mergers, purchases-1956

National banks converted into State banks.	3	3.3	. 4—converted into 3 State banks.
Total	13	113. 5	4.1

The shareholders of the 69 banks consolidated or merged with and into 65 national banks received cash and book value stock of the continuing banks aggregating \$177,339,698 or \$8,186,229 in excess of the aggregate book value of assets which those banks contributed to the mergers or consolidations. This excess amounted, on the average, to 0.42 percent of the aggregate deposits acquired by the continuing banks. On an estimated or fair valuation basis, the shareholders of the 69 absorbed banks contributed assets having an estimated fair value, in excess of liability to creditors, of \$177,307,888 and received cash and fair value stock of the continuing banks aggregating \$186,309,454 or \$9,001,566 in excess of the aggregate fair value of assets which those banks contributed to the mergers or consolidations. This difference is accounted for through an estimated or fair value appraisal of fixed assets (bank premises—furniture and fixtures), bond appreciation or depreciation, allowances for pension fund adjustments, excess reserve for taxes, etc., and amounted, on the average, to approximately 0.46 percent of the aggregate deposits acquired by the continuing banks.

The shareholders of the 14 national and 22 State banks that were purchased by the 36 national banks received \$26,426,576 in cash, or \$5,093,707 in excess of the book value of the selling banks' aggregate capital structures. This amounted, on the average, to 2.26 percent of the selling banks' deposit liabilities.

Over the 7-year period from January 1, 1950, to December 31, 1956, the Comptroller's Office approved the acquisition by national banks of 281 other national banks and 284 State-chartered banks through consolidation, merger, or sale, and saw 179 national banks absorbed by State-chartered banks after approval by the governing State banking department. The latter also approved consolidations, mergers, and sales involving the absorption of 272 State banks by other State banks. The following table shows the number of banks which have been absorbed since 1950 and their total resources.

Data on consolidations, mergers, purchases and sales, and conversions—1950 to Dec. 31, 1956

Much study has been given to the competitive position of banking in the United States to determine whether the 1,016 absorptions during the past 7 years have had the effect of depriving the public of adequate banking competition. It is the conclusion of the Comptroller's Office that this has not occurred.

Banking has unique safeguards against monopoly or inadequate competition which are not present in industry or trade. Banks may not establish offices across State lines. Their operations within individual States are either limited to one head office (in nonbranch bank States, such as Illinois, Texas, Florida, etc.) or to the establishment of branch offices within the State where the bank's head office is located as may be approved by the bank supervisory authorities within areas defined in State statutes authorizing branch banking. A majority of the branch bank States restrict such activities to county limits, while some States permit it on a trade area basis, a contiguous county basis, or on a statewide basis. Obviously, such geographical

limitations tend to limit the concentration of commercial bank re-

sources which might otherwise accrue.

Banking has other safeguards which serve to maintain adequate competition. It is a closely supervised and regulated industry. maximum legal interest rates that may be charged on loans are governed by the 48 State statutes. The maximum rates that may be paid on savings or time deposits are governed by Federal statutes and regulations, as well as by State statutes in some States. The maximum amount of a loan that may be granted to a single individual or interest is governed by Federal and State statutes. Types of investment securities, based on credit quality standards, and the maximum amount that may be invested in the obligations of a single obligor. are governed by Federal and State statutes. Reasonable credit standards must be maintained in granting loans within the framework of the statutes noted above. Competition among and between banks takes place within an orbit greatly influenced by the policies of Federal fiscal and monetary authorities which control the cost and availability Banks, for practical purposes, have only one completely free area in which to compete, and that rests in service to the banking public. This is governed very largely by the ability, progressiveness, aggressiveness, and capacity of individual bank managements. is a factor to the extent that a small country bank could not provide adequate service or credit to a large corporation, but within its own natural field, size alone is not a factor that militates against the ability of a bank to compete.

In banking, banks of varying sizes, unlike business concerns, do not suffer such disadvantages as a lack of ability to command quantity discounts on purchases because a bank's merchandise, in a very real sense, consists of service and its deposits with which it makes loans and buys investment securities. A smaller bank is able, or should be able, to pay as large an interest rate on deposits as its larger competitors. The smaller bank's net earnings from operations in relation to each \$100 of deposits are approximately the same as those of larger banks. The small bank, unlike the average small business concern, has proportionately the same availability of credit from its Federal Reserve Bank or correspondent banks as its larger competitors. It has been our observation over many years that access to capital is relatively

as available to small banks as it is to larger banks.

The following compilation reveals the competitive position and trend of banking as measured by the number of banks and their total assets in the 254 cities of the country having populations of 50,000 or more at the time of the 1950 Census. (In order to obtain representation in each of the 48 States, 7 cities with a somewhat smaller population have been included.)

The banks in the 254 cities held 73.5 percent of the commercial banking assets of the Nation at the end of June 1946, and held 72.3 percent, or a very similar percentage at the end of June 1956. The 254 cities were served by 1,593 banks on June 29, 1946, and by 1,568 banks on June 30, 1956. These financial centers of the country have not increased their proportion of the banking assets of the country during this 10-year period.

Fiduciary Activities of National Banks

As of December 31, 1956, there were 1,722 national banks which had been authorized by the Board of Governors of the Federal Reserve System to administer fiduciary accounts, either full or limited. Under these authorizations there were also 72 trust departments in branches of national banks. One national bank has authority under Title 12, U. S. C., section 34a, to continue administration of certain fiduciary accounts received by consolidation with a State bank. There were 236 national banks not acting under any of their granted powers. The Financial Institutions Act of 1957, now pending before the Congress (S. 1451 and H. R. 7026) includes a provision transferring the duty and responsibility for granting fiduciary powers to national banks from the Board of Governors of the Federal Reserve System to the Comptroller of the Currency.

During the year 1956 there were 1,437 head office trust department examinations conducted and 71 branch examinations, making a total of 1,508 examinations of trust departments in national banks. Trust department assets totaled \$39,000,150,658 at the end of 1956, in-

cluding \$24,123,482,348 in agency, escrow, custodianship, and corporate accounts held in the trust department. Comparative statistical data concerning various fiduciary activities of national banks

are presented in tables in the appendix of this report.

Carrying values for trust department assets throughout the country have not been standardized. There are no statutes or regulations governing the method for establishing carrying values of assets under administration in national bank trust departments. Because of the relatively few changes in the system of establishing carrying values within individual organizations, the figures reflected by the tables in the appendix of this report are believed to be of value for comparative purposes from year to year, but it should be understood that they do not represent current market values. Accurate information as to aggregate market values cannot be obtained without requiring special reports which would impose a substantial and unwarranted buyden upon the banks.

Of the total liabilities for accounts administered by the trust departments of national banks as of December 31, 1956, 24 percent was in living trusts, 13 percent in court accounts, 53 percent in agency, escrow, custodianship type accounts, and 10 percent in all other accounts. In addition, national banks were acting as trustee for bond and debenture issues totaling \$19,200,708,415 in 8,381 accounts, as registrar in 3,369 accounts, and as transfer agent in 3,322 accounts.

Under authority of section 17 of Regulation F, issued by the Board of Governors of the Federal Reserve System governing fiduciary activities of national banks, there were 130 common trust funds in operation in 104 national banks at the end of 1956. Regulation F permits the establishment of common trust funds for the collective investment of funds of bona fide fiduciary accounts where the bank acts in the capacity of trustee, executor, administrator or guardian. Assets in common trust funds aggregated \$382,397,189 as of Decem-

ber 31, 1956, at ledger carrying values.

Pension, profit-sharing and other employee benefit trusts created by banks and by other employers continue to form a substantial and increasing part of the fiduciary business of national banks. The form for reporting examinations of the trust departments of national banks has been revised to reflect comprehensive information on this class of business. The information to be obtained will substantially parallel that currently being obtained by the Board of Governors of the Federal Reserve System from their reports of examination of State member banks. In the investment of funds of pension, profitsharing and other employee benefit trust accounts, the national banks are following generally sound policies and investment procedures. such accounts created by a national bank for its own employees and administered in its trust department, Regulation F prohibits the purchase of stock of the bank unless such investment is expressly required by the provisions of the trust instrument. This office is opposed to placing stock of the employer national bank in a pension trust for its employees, beyond a limited proportion of the total fund because of the belief that the employee pensions should not be in important degree dependent upon the continued success of the employer.

All national banks which are exercising fiduciary powers are endeavoring to supervise and administer their trust departments in full accordance with the provisions of law and sound fiduciary practice. The interests of the various beneficiaries are given prime consideration and the loss in national banks due to faulty administration of fiduciary accounts continues to be almost negligible.

Liquidation of Insolvent National Banks

During the year ended December 31, 1956, the Federal Deposit Insurance Corporation was appointed by the Comptroller of the Currency as receiver of one insolvent national bank, the Home National Bank of Ellenville, New York. This receivership was the outgrowth of a large defalcation. Pursuant to the Federal Deposit Insurance Act of 1950 (Public Law 797), approved September 21, 1950, the liquidation of this bank has not been subject to the supervision of the Comptroller of the Currency.

The one insolvent national bank in process of liquidation under the supervision of the Comptroller of the Currency as of December 31, 1955, was still in process of liquidation as of December 31, 1956. The liquidation of this receivership has been continued because of pending litigation but it presently appears that an early adjudication

and completion of the liquidation may be expected.

Legislation

On July 20, 1956, Senator J. W. Fulbright of Arkansas, Chairman of the Senate Banking and Currency Committee announced that the Committee would undertake a general revision of the Federal laws governing financial institutions and that Senator A. Willis Robertson of Virginia would act as chairman of the subcommittee having this work in charge. Senator Robertson stated that the purpose of the proposed legislation would be (1) to eliminate obsolete provisions from the statutes in order to make the financial laws more workable and understandable and (2) to add new authority where needed to meet the present and future needs of our economy. The Comptroller of the Currency and the other Federal supervisory agencies were asked to review the respective statutes administered by them and to recommend changes designed to accomplish the stated purposes.

In September an Advisory Committee of twenty-seven was selected to assist the Banking and Currency Committee in its study. On November 9 and 10, 1956, hearings were held before Senator Robertson and members of the Advisory Committee for the purpose of receiving an oral explanation of the agencies' recommendations. Following these hearings the Advisory Committee made a report

and recommendations to the Senate Committee.

Early in January, 1957, Senator Robertson released the text of a Committee Print Bill which was based upon some 175 legislative recommendations submitted by the Federal supervisory agencies, the views of the various trade organizations in the financial field, the recommendations of the Advisory Committee and suggestions offered by many other persons. Extensive hearings were held on this

proposed bill, and subsequently Senator Robertson introduced in the Senate the Financial Institutions Act of 1957, S. 1451. This bill was reported favorably by the Senate Committee on Banking and Currency, with a recommendation that it be passed. On March 21, 1957, S. 1451 passed the Senate. On April 18, 1957, Congressman Paul Brown of Georgia introduced in the House of Representatives the Financial Institutions Act of 1957, H. R. 7026. This bill differs from S. 1451 only in that it contains two changes relative to savings and loan associations.

In connection with the study of the Federal banking laws administered by this office and having to do with national banks, the Comptroller of the Currency made 45 recommendations to the Senate Subcommittee. Twenty-four of these recommendations involving important changes in substance were approved by the Advisory Committee and included in S. 1451 as it passed the Senate. These recommendations were:

Recommendation No. 2.—It is recommended that the statutes be amended to provide for fourth and fifth Deputy Comptrollers of the Currency if, in the judgment of the Comptroller, one or both are

essential to the adequate discharge of his responsibilities.

Reasons.—The volume of work in the Comptroller's Office has greatly increased creating a need for additional Deputy Comptrollers. There has been a considerable increase in the number of branch applications, proposed mergers and consolidations, capital increase programs, and other important matters and the national banks have a continuously growing volume of assets and liabilities which are within the field of examination procedures. Also, the pressure of the competition in banking today has caused banks to search for new methods of doing business and new ways of serving their customers. All of these matters require the careful attention of well qualified officials, and the burden placed on the present deputies is too great to be continued indefinitely. At the present time two additional Deputy Comptrollers are very much needed. Since the Comptroller's staff is paid out of assessments on national banks, additional Government appropriations or expenditures would not be necessary.

Recommendation No. 5.—It is recommended that section 5136 of the Revised Statutes be amended by adding a proviso at the end of the first sentence in paragraph seventh thereof which would declare that no national bank shall be subjected to examination by, or required to be licensed by, or to pay any license or assessment fee, or penalty to, any State, political subdivision, or other agency or instrumentality of a State as an incident to such bank's right to make loans or to discount and negotiate promissory notes, drafts, bills of exchange, conditional sales contracts, and other evidences of debt or to carry

on the business of banking.

Reasons.—Various States have enacted statutes which appear to require national banks to acquire a license from the State authorities in order to qualify as a licensed lender. In order to acquire the obligations arising from certain transactions national banks have in many cases elected to be licensed under the State law. These State laws customarily require examination of the licensed lenders by the State authorities. In some cases where the national banks have

qualified as licensed lenders the State banking authorities have contended that such national banks should be subjected to examination

by State authorities as licensed lenders.

Any examining or other visitorial power attempted to be exercised by State officials over national banks in this respect would be in direct conflict with section 5240 of the Revised Statutes (12 U. S. C. 484) and any attempt by the State to levy and collect a license tax appears to be in conflict with section 5219 of the Revised Statutes (12 U.S. C. 548) which defines the limits within which States may tax national National banks derive their general powers from section 5136 of the Revised Statutes (12 U. S. C. 24) including all such incidental powers as are necessary to carry on the business of banking. banks may legally acquire evidences of debt and no State statute can deprive them of that power or append conditions which would require them to obtain licenses or pay license fees. However, some State officials have disagreed with this view and contended that the national banks must comply fully with all the provisions of the State law including the examining and licensing requirement. In order to eliminate controversies with State banking officials who seek to enforce State licensing and examining requirements with respect to national banks, section 5136 should be amended to follow the above recom-Amendment of this section in accordance with our recommendation will, in our opinion, merely be declaratory of existing law.

Recommendation No. 6.—It is recommended that R. S. 5136 be amended to permit national banks to make contributions in such sums as the directors may deem expedient and in the interests of the association to educational institutions not operated for profit and to organizations established for the purpose of civic improvement or betterment. The right of national banks to make such contributions should be made explicit.

This statute should also be amended to eliminate any requirement that contributions by national banks be dependent upon the provisions of the laws relative to contributions by State banking institutions.

Reasons.—There has always been doubt whether under the existing statute national banks could legally make contributions of the type which it is now recommended they should be permitted to make. Since national banks may make contributions to charitable, philangethropic, or benevolent instrumentalities conducive to public welfare, there would seem to be little doubt that they should also be permitted to make contributions to educational institutions which are not operated for private profit. Also, national banks may reasonably be said to have the same ethical obligations to support organizations established to benefit the community in which they do business as do other corporations and individuals. The law should permit contributions to such organizations. It is clear that local development corporations which seek to attract industry to their communities will, if successful, benefit the entire community and contributions to them would be in the best interests of the banks.

It is not necessary that the provisions of State laws in relation to contributions by State banks should be applicable to the making of contributions by national banks.

Recommendation No. 7.—Amend section 30 of title 12 of the United States Code to eliminate the word "place" and substitute the word "location" and provide that no change in location of the main office within the limits of the city, town, or village in which it is located will be permissible without the approval of the Comptroller of the Currency.

Reason.—The Comptroller has interpreted this statute to mean that a bank may change the location of its head office within the city where it was chartered to do business without his approval. It is believed that all changes of location should be subject to his approval.

Recommendation No. 8.—It is recommended that the consolidation and merger statutes be amended to provide uniformity in the provisions for giving notice of shareholders' meetings, waiver of notice, dissenters' rights including appraisal of the value of the stock of dissenters and payment of the expenses of appraisal or reappraisal by the Comptroller of the Currency, and manner of disposing of stock not taken by dissenters but that no change be made in the merger provisions of title 12, United States Code, section 34b (b) confining dissenters' rights to the stockholders of the bank merged into the "receiving association." It is also recommended that the statutes be amended to contain uniform provisions for the transfer of fiduciary functions and the administration of estates to the resulting combined bank automatically and by operation of law, without any order or other action on the part of any court or otherwise, and similar uniformity regarding the fiduciary bank's being subject to removal by a court of competent jurisdiction in the same manner and to the same extent as was the consolidating or merging bank prior to the consolidation or merger.

Reasons.—There would appear to be no justification for requiring publication in the local newspaper for the publication of legal notices or advertisements in addition to publication in a newspaper of general circulation in one form of combination of banks and not in the others. It would appear that publication in a newspaper of general circulation published in the place where the association or bank is situated, or, if there is no such newspaper, then in a paper of general circulation published nearest thereto, is adequate. The phrase "or, if there is no such newspaper, then in a paper of general circulation, published nearest thereto" should be added to the merger statute, title 12, United States Code, section 34b. There would likewise seem to be no justification for a variation in the provisions for giving notice of shareholders' meetings or the waiver of such notice and in dissenters' rights as to the procedure to be followed, the date on which the value of the dissenters' stock is to be determined, the applicability of that determined value to one or all dissenting stockholders, and the vote of dissenters required to choose a representative to participate in the appraisal of the value of such stock, and the payment for the expense of appraisal or reappraisal made by the Comptroller of the Currency. The three statutory provisions should specify that the value of the dissenters' stock should be determined as of the effective date of the consolidation or merger. The three statutory provisions should alike require that the stock of the constituent bank which a dissenter owns must be turned in for cancellation as a condition to the payment

to him of its value, and that the stock of the resulting bank which would have been delivered to him is the stock which will be sold at auction. Nor is there justification for requiring that stock rejected by dissenters be sold at auction in one case, with any excess in the sale price above the appraised value going to the dissenting stockholder in two types of combinations but not in the third. The justification for confining dissenters' rights to stockholders of the bank which merges into a receiving association under the provisions of title 12, United States Code, section 34b is that such statute is intended to be used mainly in cases of large banks taking over much smaller banks where the value of the stock of the larger bank will be affected only

slightly, if at all, by the merger.

The merger statute, title 12, United States Code, section 34b, contains a provision that the value of shares of the dissenters shall be ascertained as of the date of the meeting of shareholders of the association or state bank approving the merger by an appraisal made by a committee of three persons composed of "one selected by the vote of the holders of a majority of the stock, the owners of which are entitled to payment in cash; * * *", but title 12, United States Code, section 33 and title 12, United States Code, section 34a would appear to give each dissenting shareholder the separate right of appraisal. Also, the merger statute provides that the valuation agreed upon by any two of the three appraisers shall govern, whereas no such provision is contained in title 12, United States Code, section 33 or title 12, United States Code, section 34a. Furthermore, the merger statute provides that the value of the shares of dissenters shall be ascertained as of the date of the meeting of the shareholders of the association or State bank approving the merger, whereas the other two statutes prescribe that such value should be ascertained as of the date of the Comptroller's approval of the consolidation. Again, the merger statute prescribes that if, within 90 days from the date of consummation of the merger, one or more of the appraisers have not been selected or the appraisers have failed to determine the value of the shares, the Comptroller, upon written request of any interested party, shall cause an appraisal to be made which shall be binding on all parties. provision is not contained in the other two statutes. Also title 12, United States Code, section 33 provides, with respect to reappraisals of stock of dissenters by the Comptroller of the Currency, that if the reappraisal shall exceed the value fixed by the appraisal committee, the bank shall pay the expenses; otherwise the appellant shall pay said expenses. Title 12, United States Code, section 342 provides that the consolidated association shall pay the expenses of reappraisal, and title 12, United States Code, section 34b prescribes that in such case the receiving association shall pay the expenses of reappraisal. It would appear that with respect to the matters referred to in this paragraph there should be uniformity in the three statutory provisions.

With respect to the transfer of fiduciary functions and the administration of estates, it is essential that these be transferred automatically to the resulting bank. Otherwise the fiduciary estates of various kinds would be deprived of anyone authorized to perform the duties of fiduciary with respect to such estates until they were transferred

singly by appropriate court orders or by consents of the interested parties, including the beneficiaries in the case of private trusts. Such individual transfers would be costly and time-consuming and might defeat a contemplated combination of two banks otherwise desirable and in the public interest.

Recommendation No. 9.—It is recommended that R. S. 5155 be amended to provide that upon the consolidation or merger of two or more national banking associations or of a State bank with a national banking association the continuing bank may retain and operate all of the branches which it had in lawful operation at the time of the

merger or consolidation.

Reasons.—A bank which takes over another bank by merger or consolidation should not for that reason have to give up the branches which it has in operation at the time of the consolidation or merger. The purpose of the existing law is to prevent a bank from acquiring branches where they could not legally be established under State law, by taking over other banks. This purpose does not exist in the case of branches of the continuing bank and it should be permitted to continue the legally established branches which it already has in existence without reestablishment and without securing anew the approval of the Comptroller of the Currency.

Recommendation No. 11.—It is recommended that R. S. 5155 (f) be amended by adding at the end thereof a proviso to the effect that the acceptance of deposits in furtherance of a school thrift or savings plan by an officer, employee, or agent of a national bank at any school located in the trade area of the bank shall not be construed to be the

operation of a branch.

Reasons.—It is the general position of this office that the acceptance of deposits by an agent of a national bank at a place other than the bank's offices constitutes branch banking under the definition contained in this section. Notwithstanding this general rule we believe that the desirability of school savings programs is such that an amendment of the statute is warranted to remove any doubt that a national bank may participate in this activity.

Recommendation No. 12.—It is recommended that the requirements in sections 5140 and 5168 of the Revised Statutes that 50 percent of capital stock be paid in be amended so as to require that 100 percent of capital stock be paid in cash before a national bank shall be authorized to commence business. The provisions relating to instalment payments in sections 5140 and 5141 should be eliminated from the

statute.

Reasons.—It'is no longer considered necessary that the statutes permit a national bank to open for business when only 50 percent of the capital stock has been paid in and over a long period there have been no cases where this method was used. It has been the practice of the Comptroller of the Currency at least since 1935 to require that 100 percent of the capital stock of a newly organized national bank must be paid in cash before it shall be authorized to commence business.

Recommendation No. 15.—Amend R. S. 5144 in order to eliminate mandatory cumulative voting in the election of directors of national banks but permit such association to have cumulative voting if desired

by so providing in their articles of association.

Reasons.—A national bank can best be operated where there is a high degree of unity in the directorate and in the official staff. The successful operation of any bank depends upon confidence of stockholders in the management, confidence of different members of the management body in each other, and confidence of the depositors and the community in the bank as an organization. Confidence is not engendered by having a minority group force itself on the directorate of a bank by the use of the cumulative voting provision, and in cases where such an end has been accomplished it has been the usual experience that the party or parties thus added to the boards have not been helpful to the institutions and have caused a lessening of the mutual confidence of the directorate, the confidence of the staff in the directorate, and in some cases, the confidence of the community in the bank.

Recommendation No. 16.—It is recommended that R. S. 5144 be amended to provide that where a holding company affiliate of a member bank is owned by another corporation which by virtue of such ownership becomes a holding company affiliate, and which in turn is owned by another corporation which is also, therefore, a holding company affiliate, only one holding company affiliate should be required to maintain the requisite reserves. It should be designated by the

Board of Governors of the Federal Reserve System.

Reasons.—This statute requires that a holding company affiliate of a member bank must establish and maintain out of net earnings over and above 6 percent per annum on the book value of its own shares outstanding a reserve of readily marketable assets in an amount of not less than 12 percent of the aggregate par value of bank stocks controlled by it. The purpose of this requirement is to insure that a holding company affiliate owning stock of two or more banks will be in a position to aid the banks by replacement of capital in the event that losses make such replacement necessary. When such a reserve had been established and is maintained by a holding company affiliate directly owning bank stocks, it would seem that parent or upstream companies of the holding company affiliate should not also be required to maintain such reserves. In a recent case a group of banks had four holding company affiliates in vertical alignment. Under the interpretation given this statute by the Board of Governors of the Federal Reserve System, each of these parent companies would be required to maintain the specified reserves so that in effect reserves of 48 percent rather than 12 percent would be required. This requirement has been a major deterrent to nonmember State banks owned by the holding company affiliate giving consideration to becoming members of the Federal Reserve System or directly by conversion into national banks. Such a requirement is not justified and the statute should be rewritten to bring it into conformity with the intent of Congress to require a suitable reserve.

Recommendation No. 20.—It is recommended that R. S. 5149 be amended to provide that if an election of directors is not held at the meeting of shareholders called for that purpose because the date set in the articles of association falls on a legal holiday, the meeting shall

be held on the next following business day.

Reasons.—In some cases the day specified in the articles of association for annual shareholders' meeting at which directors will be elected

will fall on a legal holiday in the State in which the bank is located. In such cases the practice has been for a brief shareholders' meeting to be held at which no business is transacted but the meeting adjourned until some subsequent date decided upon and the directors are elected at that adjournment of the annual meeting. It is believed that it would be preferable to provide by legislation that in this event the meeting shall be held and the directors elected on the next following business day.

Recommendation No. 24.—It is recommended that exception 7 to section 5200 of the Revised Statutes be amended by adding a new sentence which would permit national banks to acquire obligations of dealers in dairy cattle arising out of the sale of dairy cattle, which bear a full recourse endorsement or unconditional guaranty of the seller to a limitation of 15 percent of capital and surplus, in addition to

such 10 percent of capital and surplus.

Reasons.—Exception 7 to the basic 10 percent limitation of capital and surplus covers obligations which are secured by liens on range animals (cattle, sheep, goats, horses, mules) or on cattle, sheep, or hogs being fattened for or shipped to market. It does not cover dairy cattle. It is believed advisable that the statute be amended to permit national banks to acquire obligations of dealers arising out of the sale of dairy cattle subject to a limitation of 15 percent of a national bank's capital and surplus in addition to the present limitation of 10 percent of capital and surplus. Frequently such obligations are not in the form to qualify under either exception 2 or 4 of Revised Statutes 5200 because they are not negotiable and thus may not qualify under exception 2, or because they have a maturity of more than 6 months and therefore will not qualify under exception Where they arise out of the sale of dairy cattle they do not qualify under exception 7 in its present form.

Recommendation No. 25.—It is recommended that exception 8 of section 5200 of the Revised Statutes be amended so as to eliminate

the words "in the form of notes."

Reasons.—Frequently the obligations referred to in exception 8 are not in the form of promissory notes but are repurchase agreements, or some other form of binding obligations. These agreements are considered to be of equal stature with promissory notes and therefore should be treated as obligations as defined in the first paragraph of section 84.

It is believed that the requirement that the obligation in the case of such loans must be "in the form of a note" is needlessly restrictive.

Recommendation No. 27.—Section 144 of title 12 of the United States Code should be amended to eliminate the requirement that the Comptroller of the Currency must approve the national banking

associations at which the requisite reserves may be kept.

Reasons.—It is believed that the power given to the Comptroller to approve the national banks in which reserves of national banks located outside the continental United States may be placed is ineffective in that it would be difficult and discriminatory for the Comptroller to refuse to approve a particular national bank, or to withdraw his approval once it had been given. The withdrawal of such approval or the refusal to give such approval would probably cause rumors and might create doubts as to the solvency of the bank not approved. Furthermore, should the Comptroller withdraw his approval and require such reserve deposits to be withdrawn from a particular bank and that bank shortly thereafter became insolvent, there might be a pertinent question as to whether the Comptroller was causing the

preferring of one creditor of the insolvent bank over others.

It is believed that banks located outside the continental United States should select the member banks with which to keep their reserve deposits on the same basis on which other banks normally select the banks with which to carry correspondent balances. Substantially all banks carry correspondent balances with other banks and these correspondent banks are selected on the basis of management and capitalization. The banks outside the continental United States should be permitted to select the member banks with which to carry their reserve balances on the same basis and the Comptroller of the Currency should not be required to approve the selections made.

Recommendation No. 28.—R. S. 5211 should be amended to change from 5 to 10 days the time within which national banks must transmit

call reports to the Comptroller of the Currency.

Reasons.—It is difficult for some banks to compile the necessary information and furnish it to the Comptroller within the 5 days allowed, and it is believed that a 10-day period would be more realistic.

Recommendation No. 29.—R. S. 5212 requiring a report to the Comptroller of the Currency of a declaration of dividends should be

repealed.

Reasons.—The Comptroller of the Currency requires and receives semiannually a report of the earnings and dividends of each national banking association. In addition, he has access to this information through the examinations performed by his examiners. The requiring of the reports of declaration of dividends does not serve a useful purpose.

Recommendation No. 30.—It is recommended that section 5220 of the Revised Statutes be amended to require approval by shareholders owning two-thirds of the stock of any national bank before the assets of said bank may be sold to another banking institution in carrying

out the liquidation of the selling bank.

Reasons.—Section 5220 now requires shareholder approval of any vote to place a national bank in voluntary liquidation but does not require shareholder approval of any agreement entered into by the directors relating to a bulk sale of the bank's assets to another banking institution as a preliminary step to voting the bank into voluntary liquidation. In order to permit shareholders to have a vote on the vital question of selling the bank's assets it is believed the statute should be amended so as to require preliminary approval of the sale by shareholders owning two-thirds of the stock of the national bank unless an emergency exists and the Comptroller of the Currency specifically waives such requirement for shareholder approval.

Recommendation No. 32.—Section 197 of title 12 of the United States Code should be amended so as to substitute the Federal Deposit Insurance Corporation in the place of the Comptroller of the Currency with respect to insured national banks placed in receiver-

ship where the Federal Deposit Insurance Corporation is appointed receiver pursuant to the Federal Deposit Insurance Act of 1950, as amended.

Reasons.—The Federal Deposit Insurance Act of 1950, as amended (12 U. S. C. 1821) requires the Comptroller of the Currency to appoint the FDIC as receiver of any insured national bank which is placed in receivership and provides that such receiver shall not be subject to the direction or supervision of the Secretary of the Treasury or the Comptroller of the Currency. Since the Comptroller does not supervise or direct the actions of the FDIC as receiver of an insured national bank, the statutory provision referred to should be amended so as to substitute the Federal Deposit Insurance Corporation for the Comptroller of the Currency where the national bank involved is an insured national bank, thus permitting the Federal Deposit Insurance Corporation to call the meeting of the shareholders of such insured national bank and require that the bond of any shareholders' agent elected at such meeting run to the Federal Deposit

Insurance Corporation.

Recommendation No. 33.—It is recommended that the Bank Conservation statutes be revised to authorize the Comptroller of the Currency to appoint a conservator for any bank under his jurisdiction whenever there have been defalcations the amount of which is uncertain and cannot be ascertained without an examination of the bank, giving rise to a doubt as to the solvency of the bank. should be provided that the conservator under the direction of the Comptroller shall take possession of the books and records and assets of every description of such bank, and take such action as may be necessary to conserve the assets of such bank pending further disposition of its business, as provided by law. Such conservator should have all the rights, powers, and privileges now possessed by or hereafter given, receivers of insolvent national banks, and should be subject to the obligations and penalties to which receivers are now or may hereafter become subject. As soon as possible after any insured bank is placed in the hands of a conservator the Federal Deposit Insurance Corporation should be required to pay the insured deposits as provided in the Federal Deposit Insurance Act. bank is insured under the Federal Deposit Insurance Act and it is determined that the bank is insolvent the Comptroller of the Currency should be required to appoint the Federal Deposit Insurance Corporation receiver, which should have all the rights, duties, and powers prescribed by law, and, in the event that there have been withdrawals by depositors as above provided for, the amount of such withdrawal by each depositor should be deducted from the amount payable by the Federal Deposit Insurance Corporation to such depositor under the provisions of the Federal Deposit Insurance Act. All expenses of any such conservatorship should be paid out of the assets of such bank and should be a lien thereon which shall be prior to any other lien.

Reasons.—From time to time a situation arises in a national bank where a large defalcation is discovered that appears to equal or exceed the capital structure, but of which the full extent cannot be determined without further investigation and audit. Under existing

statutes, immediate action is necessary in such a case to (1) place the bank in receivership and name the Federal Deposit Insurance Corporation as receiver, or (2) arrange by means of a loan from the Federal Deposit Insurance Corporation for the acquisition of the sound assets and assumption of the deposit liabilities of the insolvent bank by another bank. It is usually difficult or impossible to determine which of the two courses is in the best interests of the Federal Deposit Insurance Corporation pending an accurate determination of the size of the defalcation and the extent of the insolvency. bank is insolvent by a small amount, it is usually advantageous to the Corporation and in the public interest for the Federal Deposit Insurance Corporation to grant a loan against the unacceptable assets and permit the insolvent bank to be taken over by another bank as this eliminates all receivership expenses. If the extent of the insolvency is large, it is usually in the best interests of the Federal Deposit Insurance Corporation for the bank to be placed in receivership with the Federal Deposit Insurance Corporation named as receiver and the depositors of the bank protected up to \$10,000 per depositor.

The suggestion made herein would allow the time necessary to determine the full amount of the defalcation and the extent of insolvency without injury to the ultimate position of the Federal Deposit Insurance Corporation when the final determination is made as to the

disposition of the bank.

Recommendation No. 34.—It is recommended that section 11 (k) of the Federal Reserve Act be amended to transfer from the Board of Governors of the Federal Reserve System to the Comptroller of the Currency the power to grant to national banks the right to act in fiduciary capacities and to transfer from the Board of Governors of the Federal Reserve System to the Comptroller of the Currency the

power to promulgate regulations in connection therewith.

Reasons.—At the time national banks were first permitted to engage in trust activities, the power to grant to them permission to do so was given to the Board of Governors of the Federal Reserve System rather than to the Comptroller of the Currency. This statute applies only to national banks and not to State member banks. Since national banks, including their trust departments, are supervised, examined, and regulated by the Comptroller of the Currency, the power to grant to national banks authority to act in fiduciary capacities and to regulate their activities in those capacities should be vested in the Comptroller of the Currency rather than the Board of Governors of the Federal Reserve System. The Comptroller of the Currency is in a position to know whether a particular national bank should be permitted to exercise trust powers, and also what problems arise that need to be dealt with by regulation.

Recommendation No. 36.—Section 378 of title 12 of the United States Code should be amended to prohibit the receipt of deposits by any person, corporation, etc., even though incorporated under, and authorized to engage in the business of receiving deposits by, the laws of any State, Territory, or district, unless made subject to examination and regulation by the laws of the State, Territory, or district.

district

Reasons.—Recently a corporation incorporated under the laws of Texas engaged in receiving deposits and offered to pay 5 percent interest on such deposits. Upon investigation the Comptroller found that while this corporation was duly incorporated under the laws of the State of Texas its deposit activities were not supervised or regulated. The Bank Commissioner of Texas disclaimed jurisdiction on grounds that the company was incorporated under the insurance laws. The insurance commissioner stated that his jurisdiction was limited to regulating the insurance activities of this company and did not extend to regulation of its deposit activities. Comptroller submitted the matter to the Department of Justice for a determination of whether the Federal Statute was being violated, and was advised that there was no violation. Subsequently, the company became bankrupt with loss to its depositors. Amendment of this statute in the manner suggested would be helpful in preventing other similar situations.

Recommendation No. 42.—It is recommended that section 18 (c) of the Federal Deposit Insurance Act be amended to provide that no insured bank shall merge or consolidate with any other insured bank or acquire the assets of, or assume liability to pay any deposits made in, any other insured bank without the prior written consent of the appropriate Federal authority. It should also provide that in granting or withholding its consent the approving authority must consider the factors enumerated in section 6 of the Federal Deposit Insurance Act and also must take into consideration whether the effect of the transaction may be to lessen competition unduly or tend unduly to create a monopoly. In the interests of uniform standards, the approving authority should be required to first seek the views of each of the other two banking agencies, and should also be authorized to request the opinion of the Attorney General of the United States.

Reasons.—A variety of causes have resulted in a considerable number of bank consolidations or mergers since the end of World War II, and during the last five years. This has given rise to the question of whether desirable levels of competition in banking will be maintained unless legislation is enacted requiring that full consideration be given to the competitive aspects of such transactions prior to being approved by the Government official having jurisdiction. The Federal bank supervisory agencies are not now required by statute to consider the competitive or monopolistic aspects of merger transactions requiring their approval and bank asset acquisitions are not now subject to section 7 of the Clayton Act. It is believed that in exercising their authority over bank mergers and consolidations, the Federal banking authorities should be required to consider in addition to banking factors whether the result thereof might be to lessen competition unduly or to tend unduly to create a monopoly. This authority should be vested in the bank supervisory agencies as banking is a supervised and regulated industry, and important banking factors must be weighed in conjunction with purely competitive factors in arriving at sound decisions.

Since there will be three banking agencies making decisions in respect to this matter, the legislation should require that, in the interests of achieving uniform standards, the Federal bank supervisory

agency having jurisdiction in a particular case shall seek the views of each of the other two supervisory agencies on the competitive and monopolistic aspects of such asset acquisitions. The approving authority should be authorized to request the opinion of the Attorney General of the United States in order that the knowledge of the Antitrust Division of the Department of Justice would be available to it. Final authority should, however, be placed in the hands of the Federal banking supervisory agencies whose officials are intimately familiar with banking in all its phases throughout the United States.

The views of this Department with respect to this matter were presented to the Senate Committee on Banking and Currency in great detail during the 2d session of the 84th Congress with respect to S. 3911. This recommendation was incorporated in S. 3911, which was passed by the Senate but not by the House of Representatives

during the 84th Congress.

Recommendation No. 43.—It is recommended that section 709 of title 18 of the United States Code be amended to expressly permit the use of the word "national" in the title of all national banks. It is also recommended that the use of the letters "U. S." as part of the business or firm name of persons, corporations, etc. engaged in the banking, loan, building and loan, brokerage, factorage, savings or trust business be prohibited. It is also recommended that no corporation other than a national bank should be permitted to use the words "national bank" in its corporate title.

Reasons.—At the time of the codification of the criminal statutes in 1948 the statute was eliminated which expressly permitted national banks to use the word "national" in their corporate titles. There is now no statute of the United States which expressly permits national banks to thus use the word "national" but the Comptroller of the Currency has continued to require all national banks to do so. Their

rights and duties in this respect should be made statutory.

The use of the letters "U.S." should be prohibited to corporations engaged in the types of business specified in order that the public will not be misled into believing that the corporation using these letters is a Government agency or is connected with a Government agency or that its business or that the deposit liabilities, obligations, certificates, or shares thereof, are insured or guaranteed by the United States or any instrumentality thereof. Legislation which would accomplish this purpose was passed by the Senate but not by the House of Representatives during the 84th Congress (S. 2891 of the 84th Congress.) Need for this legislation was highlighted by the bankruptcy of the U.S. Trust & Guaranty Co. of Waco, Texas, a corporation accepting deposits which was not regulated or examined by any supervisory authority.

There is now in existence a corporation which has recently adopted a corporate title including the words "national bank." This corporation is not a bank but is a corporation engaged in holding the stock of national banks. We do not believe that any corporation other than a national bank should be able to combine the words "national bank" in its corporate title thus implying to the public that it is a national bank supervised and regulated by the Comptroller of the Currency. Legislation which would prohibit this should apply to

corporations in existence at the time the legislation is enacted as well

as those incorporated later.

Recommendation No. 44.—It is recommended that there be enacted a statute which would provide that reports of examinations of national banks made by national bank examiners and related correspondence and papers should be deemed to be confidential documents privileged against disclosure to unauthorized persons except with the consent of the Comptroller of the Currency.

Reasons.—From time to time outside persons, usually persons engaged in litigation with or in some way involving national banks, attempt to subpoen from the Comptroller of the Currency or from the national bank involved copies of reports of examination and related correspondence and papers. In these cases it is the practice of the Treasury Department to resist the subpoena by claiming that such documents are confindential documents of the Treasury Department privileged against disclosure under well-known doctrines of

governmental privilege.

Reports of examination of financial institutions under the jurisdiction of the Comptroller and other information obtained by him in the exercise of his visitorial powers over such institutions are classified as confidential because such information is obtained by or submitted to him in confidence. Its revelation might adversely affect such institutions, the affairs of their customers, or others dealing with them or with the Comptroller of the Currency, and would be inimical to the public interest. The courts have generally recognized that the National Bank Act contemplates exclusive supervision of banks by the Comptroller of the Currency and the confidential treatment by him of the information developed as to their internal affairs. Consequently, claims of privilege are ordinarily upheld. Recently, however, a United States district court refused to uphold such a claim of privilege by the Secretary of the Treasury and ordered the production in evidence of reports of examination of a national bank. decision was reversed by the court of appeals which held that the subpoena was too broadly drawn.

It is believed that this is a matter of such importance that the confidential and privileged nature of reports of examination and related documents should be made statutory. In practically all cases in which litigants seek to subpoen reports of examination any information which they need and to which they are entitled is available from the books of the bank, which are the best evidence of the trans-

actions involved, and which are subject to subpoena.

Two of the Comptroller's recommendations were approved in part by the Advisory Committee but contained recommendations of that Committee for changes in the Comptroller's original recommendations. These recommended changes were acceptable to the Comptroller of the Currency and, as changed, these recommendations were included in S. 1451 as it passed the Senate. They were:

Recommendation No. 23.—This recommendation as originally made

was as follows:

(1) It is recommended that exception 6 to section 5200 of the Revised Statutes be amended by adding a new sentence which will permit national banks to acquire obligations of any person, copartnership, association or corporation in the form of notes or drafts secured by shipping documents, warehouse receipts or other such documents transferring or securing title covering readily marketable staples, when such property is fully covered by insurance, to a limitation of 15 percent of the bank's capital and surplus, in addition to the statutory limitation of 10 percent of capital and surplus, when the market value of such staples securing such obligation is not at any time less than 115 percent of the face amount of such obligation, but this exception shall not apply to obligations of any one person, copartnership, association, or corporation arising from the same transaction and/or secured by the identical staples for more than 6 months. The present first sentence in exception 6 should be amended by changing the word "upon" to "by" in the last full line as quoted above.

(2) It is recommended that section 5200 of the Revised Statutes be amended to add a new exception which will permit a national bank to acquire from any one seller or dealer obligations arising out of the discount of instalment consumer paper whether negotiable or nonnegotiable, which paper carries a full recourse endorsement or unconditional guaranty of the seller or dealer, to a limitation of 15 percent of the bank's capital and surplus in addition to such 10

percent of capital and surplus.

Reasons.—(1) Exception 6 to Revised Statutes 5200 provides that readily marketable staples in order to qualify as security for loans under this exception must be nonperishable. Exception 6 has not been amended since 1927. In recent years frozen food processors have developed greatly improved methods in processing, freezing, and storing foods which must be kept under refrigeration before sale to consumers. Frozen packaged fruits, citrus juices, vegetables, meats and seafood represent a substantial proportion of foods sold in retail stores. Where insurance can be obtained, it is believed that national banks should be permitted to lend to one obligor not more than 25 percent of capital and surplus when the security consists of readily marketable staples which are kept under refrigeration during the period of a loan not exceeding 6 months.

(2) Commercial and business paper arises out of the process of production, manufacture, or distribution of goods. It is so related to a commercial or business transaction that it is virtually self-liquidating. It is characteristically short-term paper. It is almost invariably negotiable in form. To promote the currency of this type of paper the law merchant adopted its most important principle, i. e., that if this paper is in negotiable form, an innocent purchaser for value will take it free of defenses which might exist between prior parties. Commercial and business paper that is negotiable in form is acceptable for discount at Federal Reserve banks under section 13 of the Federal Reserve Act and regulation A. Title 12, United States Code, section 84 (1), (2), and (3), permits national banks to loan on or purchase such paper without any limitations based on capital or

surplus.

Instalment consumer paper, however, is quite different from commercial and business paper. It is almost invariably longer term paper; it is not discountable at Federal Reserve banks under section 13 of the Federal Reserve Act and regulation A; and it is not intended for ready negotiability in the same sense or degree as commercial or business paper. In consumer financing the commodity, the purchase of which is being financed, is likely to be the real and ultimate security for the lender. Consequently, it is not as traditional or important that consumer paper should be in negotiable form as that commercial or business paper should be. The Comptroller's office has consistently ruled that instalment consumer paper purchased by national banks with the full recourse endorsement of the seller or dealer and which was negotiable could enjoy the provisions of title 12, United States Code, section 84 (2) and be acquired without any limitations based on capital or surplus. If the paper is not negotiable, the 10 percent limitation applies. This discrimination against consumer instalment paper not in negotiable form is unnecessarily severe. This provision of the statute was not originally intended to deal with this type of It is now believed that all purchased or discounted instalment consumer paper acquired from one dealer or seller which bears the full recourse endorsement or unconditional guaranty of such dealer or seller, whether negotiable or nonnegotiable, should be limited as to any one obligor to 25 percent of a bank's capital and surplus.

Whenever a question of the office requirement of negotiability has come up, our files show that it has been with reference to consumer paper which is usually in the form of conditional sales contracts. It is this type of paper that contains the provisions that are needed to protect the lender's security while it is being used and paid for by the borrower, for example, provisions that the borrower will keep the property in repair, keep it insured, pay taxes, etc. When such provisions are included in consumer paper, they definitely make the paper nonnegotiable under the uniform negotiable instruments law and the decisions of the courts. The lender cannot include such provisions in consumer paper and still have the paper considered to be negotiable in form and we cannot permit such provisions to be included in consumer paper and still require that the paper be negotiable in form.

It will be noted that it is not the negotiable form of the paper which makes it safer but rather the circumstances under which it is acquired, i. e., by a party who not only pays value for it but also has no knowledge of facts which might give a prior party a defense against the paper. If a bank is in fact an innocent purchaser for value, it is better off holding paper that is negotiable in form rather than paper that is not.

The banks and automobile dealers and other vendors have also worked out dealers' guaranty or repurchase agreements and reserve accounts for the holding of defaulted consumer paper. These arrangements reduce the need of the banks for the protection afforded by the innocent purchaser rule. It is believed that in actual practice the banks rely very much more heavily on these agreements than on the innocent purchaser rule for their protection.

Thus, it will be observed that, although banks may be better protected through the operation of the innocent purchaser rule if

they hold negotiable consumer paper rather than nonnegotiable paper, it is open to question whether as a practical matter the actual amount of protection is any greater in the one case than in the other.

Therefore, it is deemed advisable that a new exception be added to

section 84 dealing exclusively with instalment consumer paper.

Changes Recommended by Advisory Committee.—In lieu of the Comptroller's recommendation (2) the committee recommends a change which consists of that which the Comptroller suggests, supplemented by a proviso to the effect that the 10 percent limitation as regards the maker of each note shall apply rather than the 25 percent limitation upon the aggregate acquired from the endorser where, after evaluation of the responsibility of each maker has been made, an officer of the bank, designated for such purpose by its board of directors, certifies that in acquiring such paper from the particular seller the acquiring bank is relying primarily upon the obligations of the makers for payment of the paper.

Under present law nonnegotiable recourse instalment consumer paper is subject to the 10 percent limitation, whereas such negotiable paper is subject to no limitation. Thus the Comptroller's recommendation 23 (2) is restrictive as to negotiable paper and is somewhat

liberalizing as to such non-negotiable paper.

The committee has stated its views on this problem as follows:

"(A) There is no reason here to view such non-negotiable paper

in any different light than negotiable paper, or vice versa.

"(B) There is no reason to differ with the Comptroller's recommendation in cases where the acquiring bank does not evaluate the responsibility of the individual maker but rather relies primarily

upon the responsibility of the endorser (or guarantor).

"(C) But where the acquiring bank does evaluate the maker's responsibility, there should be a different rule. In other words, if the acquiring bank is looking to the maker after investigation, why should not the transaction for loan limit purposes be deemed to be a loan to the maker rather than to the endorser?"

It is on this analysis that the committee disagrees with the Comp-

troller and makes the recommendation which it does.

Recommendation No. 35.—(1) Amend section 24 of the Federal Reserve Act to enable national banks to make loans to finance the construction of industrial or commercial buildings for terms of not more than 18 months where there is a valid and binding agreement entered into by a financially responsible lender to advance the full amount of the bank's loan upon completion of the buildings, without such loans being regarded as real estate loans, and to increase the aggregate limit on construction loans from 50 percent of capital to 50 percent of capital and surplus.

(2) Amend the statute to permit national banks to make loans on leaseholds which have at least 10 years to run beyond the maturity

date of the loan.

(3) Amend the statute to permit national banks to make loans to finance the construction of buildings upon the security of purchase contracts entered into pursuant to the provisions of the Public Buildings Purchase Act of 1954 or the Post Office Department Property Act of 1954, without regard to the provisions of the section concerning loans on real estate.

(4) Amend the statute to permit national banks to make working capital loans to manufacturing or industrial enterprises secured by liens on the physical properties of the enterprise, including plant real estate, without such loans being regarded as real estate loans. Loans for the purpose of financing the construction of such plants, or to refinance existing mortgage indebtedness on such plants, must be regarded as subject to all pertinent provisions of this section.

Reasons.—(1) Loans to finance the construction of industrial or commercial facilities having maturities of not more than 18 months where there is a valid and binding agreement entered into by a financially responsible lender to advance the full amount of the bank's loan upon the completion of the buildings are safe and desirable loans which national banks are now unable to make. Permitting them to make such loans would enable them to better compete with State banks in the financing of the construction of industrial and commercial facilities. If this legislation is enacted it will be desirable and necessary to raise the aggregate limits on construction loans.

(2) Present restrictions on leasehold loans are unrealistic and the present provision of law has been of little benefit either to national banks or to prospective borrowers. It is believed the restrictions can

be liberalized without danger to the banks.

(3) Enactment of this legislation is necessary to aid the General Services Administration and the Post Office Department in securing

financing for the construction of public buildings.

(4) Manufacturing and industrial companies or firms regularly borrow money for working capital purposes from national banks. In some cases, because of moderate credit weaknesses which must be assessed with great care because of the size of the loan and its repayment terms, and which could become more acute under adverse conditions or circumstances, it is considered prudent judgment on the part of bankers to require a collateral mortgage on the actual plant The loan is based on the premise that it will be used of the borrower. for normal working capital purposes and will be repaid from profitable operations, the liquidation of inventory or receivables, etc. plant has, in most instances, salvage value only if it cannot be operated on a profitable basis. Such loans are in reality commercial loans and represent ordinary business financing. Such loans should not be treated as real-estate loans subject to the provisions of section 24 of the Federal Reserve Act (12 U. S. C. 371). The reasons behind that statute and the purpose for which the statute was deemed desirable do not apply in the case of this type of loan which will be liquidated in a normal business way, barring unforeseen reverses.

Changes Recommended by Advisory Committee.—With respect to the Comptroller's recommendation (1) the committee believes that a combined aggregate limitation of 100 per cent of capital and surplus on loans for residential, farm, industrial, and commercial construction would be a more reasonable and realistic figure and accordingly urges that the Comptroller's recommendation be amended to this effect.

With respect to the Comptroller's recommendation (4) the committee considers that an amendment to the real-estate loan section applicable to national banks, being section 24 of the Federal Reserve Act, to meet the problem discussed in the Comptroller's recommenda-

tion 35 (4) is highly desirable but it is concerned with some of the

limitations contained in the Comptroller's recommendation.

Manufacturing and industrial companies regularly borrow money from banks, both for working capital and to enlarge their facilities. These loans are expected to be repaid through the liquidation of inventory or receivables or through the operations and earnings expected to be derived from the facilities. In some cases, as protection against other creditors, existing or potential, or to prevent the bank from being in a less favorable lending position than other lenders, it is considered prudent judgment on the part of the bank to take a collateral mortgage on the facility of the borrower. These loans are really business loans and represent ordinary business financing and should not be treated as real-estate loans subject to the provisions of section 24 of the Federal Reserve Act.

Accordingly, the committee recommends that the amendment to section 24 as recommended by the Comptroller in his recommendation (4) be modified so as not to base the exception on working capital loans as such but to base the exception on loans where made on the basis of repayment out of the operations of the borrower's business, when the bank relies primarily on the borrower's general credit standing, forecast of operations with or without other security, but wishes to take a lien on the borrower's real estate as a precaution against

contingencies, whether present or future.

The committee is of the opinion that the alternative aggregate limitation on real-estate loans under section 24 of the Federal Reserve Act of capital and surplus or 60 percent of time and savings deposits is unnecessarily restrictive with respect to banks which have a relatively low proportion of time and savings deposits. This situation arises particularly in communities where the competition for savings is such that national banks cannot acquire savings at reasonable interest rates sufficient to permit these institutions to meet the normal demand of their customers for real-estate financing. The capacity of such banks to engage in mortgage lending seems to be unreasonably restricted by the present limitation.

The committee, therefore, recommends that paragraph 1 of section 24 be amended to add the additional alternative of 20 percent of Thus amended, the statute would authorize a demand deposits. national bank to make real-estate loans in an aggregate amount not exceeding its capital and surplus, or 60 percent of its time and savings deposits, or 20 percent of its demand deposits, whichever is greater. It is the judgment of the committee that such additional alternative would reasonably liberalize the capacity of such banks to make mort-

gage loans without in anywise exposing them to an undue risk.

One of the recommendations made by the Comptroller was approved by the Advisory Committee, but was adopted by the Senate Committee only in part. It was:

Recommendation No. 17.—(1) Section 62 of title 12 of the United States Code should be amended to eliminate the provision that creditors of the association may inspect the list of shareholders.

(2) This statute should be amended by qualifying the right of the shareholders to inspect the shareholders list by providing that they may inspect the shareholders list only for a proper purpose not inim-

ical to the interests of the bank.

Reasons.—(1) Double liability of shareholders in national banks has now been eliminated. With the elimination of the double liability there is no longer any reason to permit the creditors of the bank to view the shareholders lists. The purpose of that requirement was so that the creditors would know who were the shareholders against whom double liability might be enforced in the event of the insolvency of the bank.

(2) There appears to be no reason why shareholders of national banks should have any greater right of access to shareholders lists than the shareholders of corporations generally. That right is generally limited to the right to inspect the shareholders list upon the showing of a proper purpose not inimical to the interests of the corporation. The present requirement related back originally to the double liability provisions of law, and there is no longer any need for the provision to be any broader than in the case of corporations generally.

Comment.—It was the second part of this recommendation that was not adopted by the Senate Committee nor included in S. 1451 as it passed the Senate. The Comptroller continues to believe that

adoption of this recommendation is desirable.

One of the recommendations made by the Comptroller was approved by the Advisory Committee, but was not adopted by the Senate Committee. It was not included in S. 1451 as it passed the Senate. It was:

Recommendation No. 41.—Section 2 of the Federal Deposit Insurance Act should be amended to provide that in case of the inability of the Comptroller of the Currency to act, through illness or otherwise, the Acting Comptroller of the Currency shall be a member of the Board of Directors in the place and stead of the Comptroller.

Reasons.—While the statute now provides that the Acting Comptroller of the Currency shall serve as a member of the Board of Directors of the Federal Deposit Insurance Corporation in the event of a vacancy in the office of the Comptroller of the Currency and during the absence of the Comptroller from Washington, it says nothing about the Acting Comptroller of the Currency serving as such director in the event of the illness of the Comptroller. While it would be assumed that the Acting Comptroller of the Currency should serve as a director of the Corporation during the illness or disability of the Comptroller, the authority should be made statutory.

Comment.—The Comptroller continues to believe that this change is

needed.

One of the Comptroller's recommendations was disapproved by the Advisory Committee which substituted a recommendation of its own. This substitute recommendation was acceptable to the Comptroller and was included in S. 1451. It was:

Recommendation No. 13.—It is recommended that appropriate amendment to sections 56 and 60 of title 12 of the United States Code be enacted to require the approval of the Comptroller of the Currency before the directors of any national bank may declare and pay to shareholders of the association cash dividends which exceed the amount of net profits after taxes realized from banking operations during the previous 6 months' period. Furthermore, that amendment be made to the statutes to permit directors of national banks to declare dividends quarterly, semiannually, or annually, as long as all legal requirements are met.

Reasons.—There have been cases where national banks have paid dividends in excess of net profits after taxes to shareholders even though such payment resulted in the dissipation of needed capital

 \mathbf{funds} .

A recent instance occurred in which the controlling block of the capital stock of a strongly capitalized and well-managed national bank was sold to another shareholder. The new majority shareholder negotiated a deal whereby the quarters of the bank were sold for a large sum in excess of the book value, the profit of over \$400,000 was credited to the undivided profits of the bank, and the bank entered into a long-term lease at unduly heavy rental expense for its occupancy of the banking house it formerly owned. It seems possible, if not likely, that the exorbitant terms of the lease rather than the real value of the property may have been the principal factor in the negotiation of the selling price of the banking house.

Under the new majority share ownership, the directors of the bank declared over \$1 million in dividends which exceeded by \$480,000 the profit on the sale of the banking house as well as net profits from operations for the year. Theretofore, the annual dividend to shareholders amounted to \$30,000 and today no dividend is being paid. Although this depletion of the capital funds of the bank did not violate the above-quoted statutes, its effect was the creation of an undercapitalized position, particularly so in the light of the policies of the new management which engaged in self-serving lending activities of an unsafe and unsound nature. The Comptroller of the Currency warned the entire board of directors of the bank under title 12, United States Code, section 77 (Banking Act of 1933, sec. 30) which is a preliminary step toward their removal from office. However, the majority share ownership of the bank changed hands again and resulted in the election of another new board of directors. still remains in an undercapitalized condition. Although the present management, which is the third within 2 years since the initial sale of control in 1954, has been advised of the need for additional capital funds, the matter must be delayed until the settlement of litigation between former and present principal shareholders arising out of charges of fraud and misrepresentation in the sale of the shares and the banking house.

It is deemed necessary to ask for the reasonable legal requirement that the Comptroller approve the payment of cash dividends exceeding the bank's net profits after taxes for the previous year to prevent such situations from arising.

With respect to the recommendation concerning the frequency of

declaration of dividends, many banks find it desirable to declare dividends at intervals more frequently than semiannually as now specifically provided in the law. To answer many inquiries concerning this subject the Comptroller of the Currency has incorporated the following ruling in the Digest of Opinions of the Office of the Comptroller of the Currency Relating to Operations and Powers of National Banks:

"6310A. Declaration and payment of dividends more frequently

than semiannually.

"Under R. S. 5199 and 5204 (12 U. S. C. 60 and 56), the directors of a national bank are expressly empowered to declare dividends semiannually out of the bank's 'net profits.' However, until the bank's surplus equals its common capital, the bank must first carry 'not less than one-tenth part of its net profits of the preceding half year to its surplus fund.' (The 'preceding half year' refers to the 6-months' period ending June 30 or December 31, as the case may be.) Such dividends may be made payable more often than semiannually, such as quarterly.

"The reference in R. S. 5199 to semiannual declaration of dividends is related to the requirement in the same sentence that, before declaration of a dividend, the bank shall carry not less than one-tenth part of its net profits to surplus until the same shall equal the amount of its common capital. There is no objection on the part of this office to more frequent declarations of dividends (for example, quarterly) so long as the bank's surplus fund is at least equal to its capital."

This ruling is based upon the opinion that the law is intended to be restrictive only as long as the surplus of the bank remains less than the amount of its capital. After the legally required capital and surplus relationship is established and no further transfers of portions of net profits to surplus must be made, there seems to be no reason for restricting the declaration of dividends to a semiannual basis if there is no conflict with other provisions of law. A clarification of the statute to deal with what appears to be all-inclusive restrictive language would be helpful.

Recommendations of Advisory Committee.—It is recognized that occasionally there occurs a case where dividend declarations which are made in technical compliance with the requirements of existing law nonetheless are not justified by present and accumulated earnings, result in a weakened and undercapitalized bank, and violate safe and sound banking practice. Present law should, therefore, be amended to vest in the Comptroller of the Currency appropriate powers to prevent any such occurrence. The recommendation of the Comptroller is considered to be sound in principle, but it is questioned whether it would be practical or equitable in operation. It is therefore disapproved.

An amendment to strengthen existing law to prevent the recurrence of any such case should not be so restrictive in operation as to penalize the great bulk of conservatively, soundly, and safely managed banks. It is well known that the dividend policies and records of the Nation's banks have been and are conservative in the interest of increasing bank capital in order to strengthen even further the banking system and to enable it better to meet the ever-expending credit needs of our country. However, the conservative dividend policy followed by the Nation's banks understandably is not likely to aid the banks in attracting the additional capital which the banks need if they are to continue to meet the increasing credit needs of the country. Stockholders in banks have had to be content with a smaller dividend return on their invested capital than have the stockholders of other major segments of American business and industry. Hence, any amendment to accomplish the Comptroller's objective should avoid any undue burden on the dividend policy of banks generally.

Accordingly the committee feels that the terms of the recommendation of the Comptroller should be amended so that the requirement for obtaining prior approval of dividend declarations for any calendar year should be operative only in a case in which dividend declarations in any calendar year exceed net profits after taxes for the current year, plus retained net profits for the preceding 2 years. Such a provision would supply the Comptroller with the additional authority he needs to prevent any unsound dividend declaration and at the same time not impose an unduly restrictive limitation on all banks in order to prevent occasional abuse.

The committee, therefore, recommends that the Comptroller's

proposal be amended as set out in the preceding paragraph.

Four of the Comptroller's recommendations were disapproved by the Advisory Committee and not included in S. 1451. They were:

Recommendation No. 21.—It is recommended that section 30 of the Banking Act of 1933 be amended to prevent a director or officer of a national bank who has been removed under the provisions of section 77 from voting his shares of stock for any purpose at regular or special meetings of the shareholders. The remaining outstanding stock shall be regarded as 100 percent of the bank's outstanding shares for all voting purposes. If the removed shareholder sells or transfers his shares, it may not be voted by the new owner unless the Comptroller of the Currency determines that the sale or transfer was bona fide and not merely an attempt by the removed officer to vote the shares through a third party.

Reasons.—The statute provides that any director or officer who has been removed from office is subject to a fine of not more than \$5,000, or imprisonment for not more than 5 years, or both, in the discretion of the court if he participates in any manner in the management of the bank. However, there is nothing in the statute that prohibits a removed officer or director from voting the stock of the bank owned by him. Thus, if he owns more than 50 percent of the stock of the bank, he can, as a practical matter, manage the bank through those he is able to elect to the directorate, and, in order to eliminate his direct or indirect control, his stock while owned by him or anyone he controls should be deprived of its voting power and the remainder of the stock of the bank held by independent parties should be considered as representing 100 percent of the voting stock of the bank.

Reasons for Disapproval by Advisory Committee.—The remedy of unconditional deprivation of the right to vote stock as proposed by

the Comptroller poses possible questions of legality and of abuse. Such questions could well weaken the effectiveness of such a remedy if enacted into law.

While the committee is sympathetic with the objective which the Comptroller seeks, the recommendation for the reasons above is disapproved.

Comments.—While the Comptroller continues to believe there is merit to his proposal, no consideration is being given at this time to

again submitting this recommendation to the Congress.

Recommendation No. 37.—It is recommended that R. S. 5240 be amended to provide that the Federal Deposit Insurance Corporation shall pay to the Comptroller of the Currency annually an amount equal to 50 percent of the expense incurred by it in examining State nonmember insured banks, and the Board of Governors of the Federal Reserve System shall pay to the Comptroller of the Currency annually an amount equal to 50 percent of the expense incurred by it and by the Federal Reserve banks in examining State member banks, and that the expenses of the Comptroller of the Currency not otherwise provided for shall be assessed by the Comptroller of the Currency upon the national banks in proportion to their assets and resources.

Reasons.—National banks now bear the full expense of the supervision and the examinations which they receive from the Comptroller's office. The entire expenses of the Comptroller's office are paid out of assessments levied on national banks. State banks, on the contrary, which are supervised and examined by the Board of Governors of the Federal Reserve System, or the Federal Deposit Insurance Corporation, do not bear directly any of the expense of such Federal supervision and examination. In the great majority of cases State banks are examined jointly by the State authorities and by the examiners of the Federal Reserve banks or the Federal Deposit Insurance Corporation. In many States such examinations are conducted only once a year. By conducting joint examinations with Federal examiners State banking departments are enabled to operate with substantially smaller staffs and at less expense to the banks.

Thus State banks are to some extent subsidized by the Federal Government through the Federal Reserve System and the Federal Deposit Insurance Corporation, and they get the benefits of Federal supervision and examination at no direct cost to them. All national banks in the continental United States are members of the Federal Reserve System and are insured by the Federal Deposit Insurance Corporation. All of the funds of the Federal Deposit Insurance Corporation are derived from insurance assessments on insured banks including national banks. Thus national banks through their payments to the Federal Deposit Insurance Corporation are paying part of the cost of examining State banks. This inequity should be eliminated.

In some States the examination fees are very much less for State banks than for national banks particularly in the case of larger banks. This is an incentive for national banks to leave the national system and convert into State banks.

Through the payments suggested in the proposed amendment the examination fees assessed to the national banks by the Comptroller

of the Currency could be reduced, thus restoring a more equitable balance between the State and National systems.

Reasons for Disapproval by Advisory Committee.—No reasons stated. Comments.—While the Comptroller continues to believe there is merit to his proposal, no consideration is being given at this time to

again submitting this recommendation to the Congress.

Recommendation No. 45.—It is recommended that legislation be enacted to provide that any national bank located within the same county may, with the approval of the Comptroller of the Currency, acquire by consolidation, merger, or purchase of assets, and assumption of liabilities another national bank which is found by the Comptroller of the Currency to be in a precarious financial condition and permit the acquiring bank to continue the office or offices of the absorbed bank as branch offices, even though State laws do not permit the establishment of such branches.

Reasons.—Situations have arisen in the past where communities in States the laws of which either prohibit branch banking or provide for limited branch banking have been deprived of needed banking services through the discontinuance of a national bank because of insolvency. Other nearby banks could and would have provided those communities with all necessary banking services through take-overs of the discontinuing banks and the establishment of branches at the locations of such banks if the branch banking laws had not prohibited their doing so. This would have substantially eased the problem of the bank supervisory authorities and been to the best advantage of all concerned. Similar situations are almost certain to arise in the future. It would appear to be essential that a method of dealing with such problems and permitting the continuance of necessary banking services in such situations be provided through the recommended legislation.

Reasons for Disapproval by Advisory Committee.—While the merit of the reasoning advanced by the Comptroller in support of this recommendation is recognized, nonetheless this recommendation departs from the "State law test" historically applied to branches of national banks. For this reason this recommendation is nonetheless

disapproved.

Comments.—While the Comptroller continues to believe there is merit to his proposal, no consideration is being given at this time to

again submitting this recommendation to the Congress.

Recommendation No. 45A.—It is recommended that a statute be enacted to govern specifically certain important phases of the administration of pension, profit-sharing, and employee welfare or benefit accounts of national banks, as follows:

(1) Such accounts into which profits of the bank are contributed should have the approval of the stockholders who own a majority of

the capital stock of the bank.

(2) Borrowing by such accounts should be prohibited, except for

temporary needs to meet required disbursements.

(3) Investment of funds of such accounts in any real estate, equipment, enterprise, obligation, interest or stock, the principal purpose of which is to serve the interest of the bank or any director, officer, or employee thereof, should be prohibited.

(4) Ownership of more than 5 percent of the shares of the capital stock of any bank or trust company or the investment of more than 10 percent of the corpus of the pension, profit-sharing, and employee welfare or benefit fund or trust in shares of any bank or trust company whichever is the lesser based upon cost price at the time of purchase, should be prohibited.

(5) The Comptroller of the Currency should be authorized by law to examine, in the course of the examination of each national bank, the affairs of any pension, profit-sharing, and employee welfare or benefit accounts which it established for its directors, officers, or employees, except when such accounts are administered by an independent

corporate trustee.

Reasons.—In the investment of trust funds of pension, profit-sharing, and employee welfare or benefit arrangements, abuses have occurred which could have been prevented had suitable statutory restrictions existed governing the administration of such trust funds. The most outstanding abuses which have come to the attention of this office are:

(1) The failure to obtain approval of the shareholders of the employer bank. This could result in litigation. In the case of *Heinz v. National Bank of Commerce in St. Louis* (237 Fed. 942), the United States Circuit Court of Appeals held that the creation of a pension fund was within the incidental powers of a national bank. In that case the directors had established the plan pursuant to a resolution of the shareholders. Such approval by the shareholders is believed to be wise procedure in order that the shareholders may be fully informed, and their specific approval may remove the possibility of later criticism. Furthermore, the shareholders are entitled to know the extent to which the future earnings of their bank are committed for such a purpose.

(2) There have been cases where pension funds created by banks have borrowed substantial sums of money to purchase the controlling interest in other banks. Control held in such a manner permits the employer-bank to dominate the policies and operations of the bank concerned. We do not believe that such funds should be used for this

purpose.

(3) Also, trust funds of employee benefit accounts have been invested in banking houses, equipment, automobile parking facilities, insurance agency, and an automobile dealer-ship on the verge of bankruptcy. Such investments are not suitable to the type of trust funds being

invested and are indicative of self interest.

(4) There is divided opinion as to whether stock of an employer bank is a proper investment of trust funds held for its employees. We believe it would be advisable to restrict the ownership of such stock to a reasonable amount with respect to the corpus of the trust as well as to the proportion of the capital stock of the employer bank. Furthermore, the limitations recommended are the same as those provided by section 17 (c) (5) of Regulation F of the Board of Governors of the Federal Reserve System which sets forth miscellaneous limitations on investment of common trust funds. Fundamentally, it is contrary to sound fiduciary practice to engage in self-dealing, particularly where the trustor and trustee are essentially the same. We also regard it to

be inappropriate for an employee's pension to be substantially dependent upon the continued success of his employer. In any case where it is necessary for a bank to increase its capital stock by means of a sale of new shares, ownership of a major portion of the existing capital stock by an employees' trust fund, which may not be in a position to purchase more stock, could impede if not prevent an increase in capital which might be necessary for the continued welfare of the bank and the protection of the interests of its depositors. Furthermore, if the bank is sole trustee, it is prohibited by title 12, United States Code, section 61 (U. S. R. S., sec. 5144) from voting such shares held in trust in the election of directors, except under certain circumstances. If these circumstances are met and a substantial portion of the stock of the bank is held in trust, it may become possible for the management of the bank to perpetuate itself in office. This perpetuation of management could also occur through the influence of directors and officers upon employees, if they, instead of the bank, are trustees of the fund.

(5) Statutory authority exists under which the Comptroller of the Currency may examine trust departments of national banks and in any case where such a department is acting as trustee of an employees' pension, profit-sharing, welfare or benefit trust, the administration of such trust funds may be examined. However, when the bank is not trustee and such funds are under a trusteeship composed of directors, officers, employees, or others, statutory authority does not exist which would permit examination into the administration of such trusts. Even though under these circumstances the administration of the trust is not a direct responsibility of the bank, because of the fact that its trustees (other than an independent corporate trustee) are closely connected with the bank and in a position to be influenced by those who formulate and administer its policies, the bank might be held liable for any loss which may occur in such a trust fund by reason of unsound acts of its directors, officers, or employees who also serve as trustees and whose interest is divided between the bank and the trusteeship. The probability or likelihood that under adverse circumstances the trustees may be charged with self-dealing and the bank held liable make it advisable that statutory authority be provided under which the affairs of such trusts may be supervised.

Reasons for Disapproval by Advisory Committee.—For some time now the Congress, as well as several agencies in the executive branch of the Federal Government, have been studying the need for additional Federal legislation with respect to the establishment and regulation of employee benefit plans generally. In the second session of the last Congress the subcommittee on Pension and Welfare Funds of the Senate Labor and Public Welfare Committee made an extensive report of its findings and recommendations in this area. The subcommittee also reported to the full committee proposed legislation which would impose reporting and disclosure requirements with respect to the financial details of the operation of employee benefit plans. As this proposed legislation was reported late in the last session of Congress, no action was taken on it. It seems reasonably clear

at this time that that or similar legislation will be introduced and pressed in the next Congress.

In the light of these considerations, it would seem to be premature for the Congress to consider this recommendation at this time. For

this reason this recommendation is disapproved.

Comments.—The Comptroller considers it essential that there be enacted at an early date legislation specifically governing certain important phases of the administration of pension and profit-sharing trusts of national banks. Because the trustee is frequently the bank, or designated individuals selected by and closely connected with the bank, the trust instruments ordinarily place very great discretionary powers in the trustees. There is at present no control over the actions of the trustees except the usual right of beneficiaries of the trusts to object to actions of the trustees. These beneficiaries are all employees of the bank. In a few cases funds of this type of trust have been used by banks to acquire and own stock beyond reasonable limits, or to acquire the stock of competitive banks, or for other purposes more to the benefit of the bank than the bank's employees. Legislation which would set minimum standards for the operation of these trusts should not wait for consideration by the Congress of proposed legislation regarding employee benefit plans generally, in which problems other than those peculiar to banks would be uppermost. With respect to the proposed legislation referred to by the Advisory Committee, it should be pointed out that this legislation would not have provided for the regulation of employee benefit plans but merely for the gathering of information.

It is anticipated that this recommendation will be again presented

to the Congress at an early date.

One of the Comptroller's recommendations relating to facilities of national banks at military posts was disapproved as being unnecessary because existing legislation on the subject was deemed adequate. The remaining eleven recommendations, which were all purely technical in nature and involved no change of substance, but merely deleted obsolete provisions of law were approved by the Advisory Committee and included in S. 1451 as it passed the Senate.

In addition to the changes recommended by the Comptroller and by the Advisory Committee as indicated above, S. 1451 would make

several other important changes in the national banking laws.

Conflicts of Interest

Section 8 of S. 1451 would prohibit the Comptroller or any Deputy Comptroller from owning stock in any national bank or District bank, or from holding any office or employment in any such bank while he holds his office. Under present law the Comptroller and the First Deputy Comptroller are prohibited from being interested in any national banking association. The proposed change is merely declaratory of existing practice.

Section 8 would add a provision to present law making it unlawful for any employee of the Office of the Comptroller to accept employ-

ment in any national bank or any District bank, within 2 years after terminating his employment with the Comptroller, except upon approval of the Comptroller pursuant to regulations prescribed by him. A similar rule is under existing practice applied by the Comptroller's office to national bank examiners.

Preferred Stock

Section 20 of S. 1451 changes present law dealing with the issuance of preferred stock by national banks to provide that preferred stock may be issued only when approved by the Comptroller, after determination by him that the most practicable method of obtaining desired and needed additional capital is through the issuance of preferred stock. The present provisions of law permitting the issuance of preferred stock by national banks are regarded as emergency provisions to be used only under emergency conditions.

Shareholders List

Section 22 of S. 1451 would add a requirement that the Comptroller shall be immediately notified by the president or cashier of the national bank involved, of any single transaction recorded on the bank stock transfer records involving the purchase or sale of 10 per centum or more of the outstanding shares of the association.

Disclosure of Stock Ownership

Section 23 of S. 1451 would require that the record owner of any stock in any national bank shall within 30 days after becoming such record owner notify the Comptroller in writing of the name of any person or persons having a beneficial or equitable interest in such stock in excess of 5 per centum of the outstanding shares of the bank. In the case of stock held in a trust, this requirement may be satisfied by filing a copy of the trust instrument with the Comptroller. Any change in the person or persons having such a beneficial or equitable interest in any such stock, except pursuant to any trust instrument on file, must be promptly reported to the Comptroller by the record owner. The transferee of any such stock must, within 30 days after such transfer, cause his name to be listed as the record owner thereof.

Removal of Officers and Directors

Section 29 of S. 1451 would continue in substance the present provisions of law dealing with the removal of officers and directors who had violated laws or engaged in unsafe and unsound practices, but would add the provision that in the case of a hearing held by the Board of Governors of the Federal Reserve System as provided for by the statute, the hearing shall be held in accordance with the provisions of the Administrative Procedure Act and shall be subject to review as therein provided except that the review by the court shall be upon the weight of the evidence. The usual test under the Administrative Procedure Act is whether the decision of the administrative agency is supported by substantial evidence.

Stock Options

Section 31 (a) (9) of S. 1451 would add a new provision permitting national banks, with the approval of the Comptroller, to grant restricted stock options which qualify under the Internal Revenue Code to their employees. This section would provide that no stock options shall be approved if the option price is less than 85 per centum of the fair market value of the shares, or 85 per centum of the book value of the shares, as determined by the Comptroller, whichever is greater.

Stock Acquisitions in Connection With Bank Mergers

Section 32 (b) of S. 1451 would permit a national bank, with the approval of the Comptroller, to purchase and hold, for not to exceed 90 days, stock of another bank as a step in a proposed absorption of such other bank through merger, consolidation, acquisition of assets and assumption of liabilities, or otherwise.

Maximum Rate of Interest

Section 35 of S. 1451 would contain a provision to the effect that the purchase of obligations or evidences of indebtedness from the actual owner thereof shall not, for the purposes of determining the maximum rate of interest which a national bank may charge, be deemed a loan or discount if such purchase would not, under the law of the State in which the purchasing bank is located, be deemed a loan or extension of credit subject to the interest or usury statutes of such State.

Limit on Bank's Indebtedness

Section 37 of S. 1451 would provide that no national bank may at any time be indebted in an amount exceeding the amount of its capital stock plus the amount of its unimpaired surplus fund, except on account of demands of a specified nature. Under present law the amount in which a national bank may be indebted is limited to the amount of its capital stock.

Investment in Bank Premises

Section 43 of S. 1451 would provide that no national bank, without the approval of the Comptroller may invest in bank premises in amounts in excess of 100 percent of its capital stock or 50 percent of its capital and surplus, whichever is greater. Under present law investments in bank premises are limited to 100 percent of the capital stock of the bank.

Businesses Representing Themselves as Banks

Section 44 (b) of S. 1451 would provide that it shall be unlawful for any institution organized under the laws of the United States to represent in any manner that it is a bank unless the law under which it is organized expressly authorizes it to engage in the business of receiving

demand deposits and of making loans and discounts, or expressly authorizes the use of the word "bank" in its corporate or business name.

Provision for Amending Articles

Section 47 of S. 1451 would add a new provision specifying the manner in which a national bank may amend its articles of association.

Outside Audits

Section 48 (c) of S. 1451 would provide that in any case in which the Comptroller deems it necessary, he may require any national bank to have an audit made by an independent individual or firm approved by him.

Territorial Applicability

Section 70 of S. 1451 would extend the territorial applicability of the National Bank Act to the several States, the District of Columbia, the several territories and the several possessions of the United States, and the Commonwealth of Puerto Rico.

Legislation Enacted

Public Law 496 of the 84th Congress, approved April 27, 1956, amended section 5146 of the Revised Statutes to require that two-thirds, instead of the former three-fourths, of the directors of national banks must reside, and must have resided for at least 1 year preceding their election, within the State in which the bank is located or within 100 miles, instead of the former 50 miles, of the bank. This legislation was enacted at the recommendation of the Comptroller of the Currency.

Public Law 502 of the 84th Congress, approved April 30, 1956, amended section 5240 of the Revised Statutes, which requires the Comptroller of the Currency to examine every national bank twice in each calendar year, to permit the Comptroller to waive one of the required two examinations. The Comptroller may not, however, waive an examination with respect to any particular bank more frequently than once in any 2-year period. The legislation also permits assessments for examinations to be made upon the banks in proportion to their assets and resources on dates to be determined by the Comptroller rather than at the dates of examinations, and permits the Comptroller to assess against national banks having trust departments the expense of examinations of those departments. This legislation was enacted at the recommendation of the Comptroller of the Currency.

Public Law 809 of the 84th Congress, approved July 26, 1956, the Farm Credit Act of 1956, amended Paragraph Seventh of section 5136 of the Revised Statutes to provide that the limitations and restrictions therein contained as to dealing in, underwriting and purchasing for its own account, investment securities shall not apply to obligations issued by the thirteen banks for cooperatives or any of them. Prior to enactment of this legislation national banks were permitted to deal in, underwrite and purchase for their own accounts, obligations issued by

the thirteen banks for cooperatives or any of them only in amounts not

exceeding 10 percent of the bank's capital and surplus.

Public Law 854 of the 84th Congress, approved July 31, 1956, the Federal Executive Pay Act of 1956, increased the compensation of the Comptroller of the Currency from \$16,000 per annum to \$20,500 per annum.

Public Law 896 of the 84th Congress, approved August 1, 1956, extended the applicability of all acts of Congress relating to national banks to Guam.

Litigation

On October 8, 1956, the Supreme Court of the United States refused to review the decision of the Court of Appeals for the District of Columbia in the case of *Michigan National Bank* v. *Gidney*, 237 F. 2d 762. The Court of Appeals had held that the Comptroller's action in denying a second branch in Saginaw, Michigan to the Michigan National Bank of Lansing, Michigan, had been based upon a proper construction of applicable law, and had affirmed the District Court decision granting a motion for summary judgment made on behalf of the

Comptroller of the Currency.

On August 17, 1956, suit was filed by the Wayne Oakland Bank of Royal Oak, Michigan, against the Comptroller of the Currency seeking a declaratory judgment that the issuance by the Comptroller of a certificate authorizing the establishment by the National Bank of Detroit, Michigan, of a branch in Troy, Michigan, would be unlawful, and an injunction restraining the Comptroller from issuing his branch certificate. This suit was filed in the United States District Court for the District of Columbia, but was transferred with the consent of the Comptroller to the United States District Court for the Eastern District of Michigan where the National Bank of Detroit was joined as a party defendant. At the close of 1956 this case was pending in that Court.

Organization and Staff

On December 31, 1956 the Office of the Comptroller of the Currency had in its employ 1,081 persons. Of these, 195 were assigned to the Washington office, including 32 in the Federal Reserve Issue and Redemption Division, which is an expense of the Federal Reserve banks. During the year the total personnel in the Washington office decreased

by 3 and the total field force decreased by 52 persons.

Twenty-six national bank examiners (one deceased) and 94 assistant national bank examiners left the service during the year. In the same period 23 assistants were commissioned national bank examiners, 1 former national bank examiner was reappointed, and 71 new assistants were appointed. Two assistant examiners returned from military furlough, leaving a total of 255 examiners and 524 assistant examiners in the service at the end of the year.

District Chief National Bank Examiner Alfred P. Leyburn, in charge of the Atlanta office, retired on October 31, 1956 and was succeeded by Lester V. Bailey, who had been serving as a National Bank Examiner in the San Francisco district.

Assistant Chief National Bank Examiner Clarence F. Smith of the Washington office staff retired on January 31, 1956 and was succeeded by National Bank Examiner F. Parker West of the New York district.

The entire national bank examining staff continued under Schedule B of the civil service regulations during the year, the result being that assistant national bank examiners were recruited on an excepted basis as has been the long-established procedure. However, the competition that has existed for all types of personnel has affected the recruitment efforts in almost every district, resulting in the decline amounting to 43, as above noted, in the staff of assistant examiners. In two of the districts notices were inserted in banking periodicals calling attention to the existence of vacancies in assistant examiner

positions, without noticeable results.

The previously established educational programs conducted for members of the examining staff, referred to in previous reports, was continued during the year. This program is designed to train newly appointed assistant examiners and improve the efficiency of the entire examining staff. As of December 31, 1956, 263 examining staff members had completed the extension courses of the American Institute of Banking, and 239 were still enrolled; 49 had completed the graduate school courses conducted by the American Bankers Association at Rutgers University, the University of Wisconsin, the University of Washington, and the University of Louisiana, and 22 were still enrolled in these courses; and 153 had completed the prescribed courses in the inter-agency training school for both examiners and assistant examiners established in 1952 by the Comptroller of the Currency, the Board of Governors of the Federal Reserve System, and the Federal Deposit Insurance Corporation.

As previously stated, the Office of the Comptroller of the Currency had 1,081 persons in its employ as of December 31, 1956. The following table is designed to show how the services of these employees

are utilized and how the work is organized.

¹ Number at end of period. Remaining figures include earnings, expenses, etc., of those banks which were in operation a part of the year but were inactive at the close of the year.

² Figures are averages of amounts reported for the June and December call dates in the current year and the December call date in the previous year.

STRUCTURAL CHANGES IN THE NATIONAL BANKING SYSTEM

The authorized capital stock of the 4,659 national banks in existence on December 31, 1956, consisted of common capital stock aggregating \$2,634,403,741, a net increase during the year of \$163,987,038, and preferred capital stock of \$3,807,670, a net decrease during the year of \$358,000. These figures include two banks recently chartered but not yet open for business, and excludes one bank converted into a State bank and one bank consolidated with another national bank, both at the close of business on December 31, 1956.

In addition to 54 applications with proposed common capital stock of \$15,500,000 carried over from the previous year, 69 applications were received to organize national banks and to convert State banks into national banking associations with proposed common capital stock of \$17,798,330. Of these applications, 33 with proposed common capital stock of \$8,585,000 were approved; 23 with proposed common capital stock of \$6,415,000 were rejected; and the remainder had been abandoned or were still pending on December 31. From the applications carried over from the previous year and those approved during 1956, 40 national banking associations with common capital stock of \$12,185,000 were authorized to commence business. Of the charters issued, 10 with common capital stock of \$3,710,000 resulted from the conversions of State banks.

Changes in the number and capital stock of national banks during the year ended December 31, 1956, are shown in the following summary.

NATIONAL BANK NOTES OUTSTANDING

There were, as of December 31, 1956, \$63,302,057 of national bank notes outstanding.

ASSETS AND LIABILITIES OF ALL BANKS IN THE UNITED STATES AND POSSESSIONS

The total assets of all classes of active banks in the United States and possessions on December 31, 1956, amounted to \$251,965 million, an increase of \$8,860 million since December 31, 1955.

The total deposits at the end of 1956 amounted to \$228,579 million, an increase of \$7,187 million over 1955. Included in the latter aggregate are deposits of individuals, partnerships, and corporations of \$189,999 million, an increase of \$6,120 million in the year. Deposits of the United States Government, including postal savings deposits, were \$4,158 million, a decrease of \$3 million; deposits of States and political subdivisions amounting to \$13,006 million showed an increase

432389-57--5

of \$238 million, and deposits of banks of \$17,614 million were \$953 million more than in 1955.

Loans and discounts amounted to \$110,632 million in December 1956 after deducting reserves of \$1,785 million for possible future losses. The net loans were \$10,057 million over the amount reported as of the end of 1955. Commercial and industrial loans of \$38,965 million were \$5,509 million more than the 1955 figure; real-estate loans of \$42,465 million were up \$4,004 million, and all other loans of \$30,987 million increased \$845 million.

The banks held obligations of the United States Government, direct and guaranteed, of \$66,795 million in December 1956, a decrease of \$3,515 million in the year. Obligations of States and political subdivisions held amounted to \$13,637 million, and other securities held amounted to \$6,920 million, a decrease of \$438 million. The total of all securities held at the end of 1956 was \$87,352 million, and represented 35 percent of the banks' total assets. At the end of the previous year the ratio was 37 percent.

Cash and balances with other banks, including reserve balances, in 1956 were \$49,837 million, an increase of \$1,858 million since the previous year end.

Total capital accounts were \$19,350 million, compared to \$18,210 million at the end of 1955, an increase of 6 percent.

A statement of the assets and liabilities of all classes of active banks at the end of December 1955 and 1956 follows.

REPORTS FROM BANKS

National banks in the continental United States, Alaska, the Territory of Hawaii, and the Virgin Islands of the United States were, in accordance with the provisions of section 5211 of the Revised Statutes, called upon to submit 4 reports of condition during the year ended December 31, 1956. Reports were required as of April 10, June 30, September 26, and December 31. Summaries from all condition reports, by States, are published in pamphlet form. National banks were also required by statute to obtain reports, unless waived by the Comptroller, of their affiliates and holding company affiliates other than member banks as of the 4 dates for which condition reports of the banks were obtained and to submit such reports to the Comptroller.

Under the general powers conferred upon him by law, the Comptroller obtained from each national bank during the period indicated semiannual reports of earnings, expenses, and dividends; also reports of condition of foreign branches as of December 31, 1956.

National banking associations authorized to act in a fiduciary capacity were called upon to submit reports of their trust departments as of the close of business on December 31, 1956.

In accordance with the code of law for the District of Columbia, banks other than national in the District were required to make to the Comptroller condition reports and reports of earnings, expenses, and dividends identical with those obtained from national banks during the year.

Detailed figures from reports of condition and earnings and divi-

dends will be found in the appendix of this report.

AFFILIATES AND HOLDING COMPANY AFFILIATES OF NATIONAL BANKS

The Federal statute requires each national bank to obtain and submit to the Comptroller periodically reports of its affiliates, as defined in sections 2 (b) and (c) of the Banking Act of 1933, as amended. However, section 21 of the Federal Reserve Act, as amended, provides in part that the Comptroller may waive the requirement for the submission of the report of an affiliate if in his judgment such a report is not necessary to disclose fully the relations between an affiliate and a bank and the effect thereof upon the affairs of the bank. Pursuant to this latter section the Comptroller's waiver of requirement for reports of affiliates provides principally that reports of affiliates (other than holding company affiliates) need not be submitted and published in a newspaper unless the affiliate is indebted to the national bank or the bank owns obligations of the affiliate and the aggregate of such indebtedness and/or investment is carried as an asset on the bank's books at a value in excess of \$5,000, or 1 percent of the bank's capital and surplus, whichever is the greater.

At the end of December 1956, 327 member national banks in the United States submitted 369 reports of affiliates. Included in these figures are 200 banks in 25 States which are members of 23 holding company groups. The number of banks in each holding company group varied from 1 to 57. The actual number of reporting affiliates

and holding company affiliates was 193.

In addition there were 2 nonnational banks in the District of Columbia which are members of the Federal Reserve System that reported 3 affiliates to the Comptroller pursuant to the provisions of the code of law for the District of Columbia.

ISSUE AND REDEMPTION OF NOTES

Six hundred and fifteen shipments of Federal Reserve currency, aggregating \$5,667,420,000, were made from Washington, D. C., during the year ended December 31, 1956, to the Federal Reserve agents and Federal Reserve branch banks; and, in addition, 18 deliveries, aggregating \$86,500,000, were made to the Treasurer of the United States.

Four thousand five hundred and sixty lots of unfit Federal Reserve currency, consisting of 481,606,813 notes, aggregating \$5,828,177,902, were received for verification and certification for destruction.

Thirty-eight lots of national bank notes, consisting of 175,160 notes, aggregating \$2,890,192, were received for verification and certification for retirement and destruction.

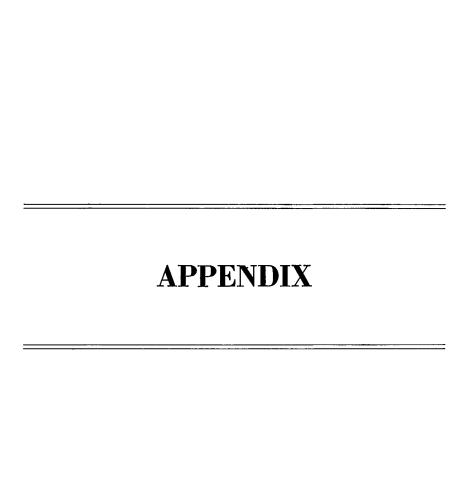

One hundred and eighty-three thousand, five hundred and forty-five fragments and charred Federal Reserve and National Bank currency, aggregating \$3,039,435, were presented by the Treasurer of the United States for identification and approval.

EXAMINATIONS CONDUCTED

The National Bank Act requires that each national bank be examined at least twice each year in order that the Comptroller may be kept currently informed of its condition and require such corrections as are deemed necessary with a view to maintaining each bank in sound condition. However, the Comptroller is authorized to waive an examination with respect to any particular bank not more frequently than once in any 2-year period. In addition to the regular examinations, special examinations are conducted of banks the condition of which is regarded as unsatisfactory. Also, the District Code authorizes the Comptroller to examine each nonnational bank and trust company in the District of Columbia.

During the year ended December 31, 1956, 7,752 examinations of banks, 5,267 examinations of branches, 1,511 examinations of trust departments, and 17 examinations of affiliates were conducted. Twenty-four State banks were examined in connection with consolidations and mergers with, or purchases by, national banks, and 8 State banks were examined in connection with conversions to national banks. Investigations were conducted in connection with applica-

tions for 46 new charters and 418 new branches.

CONTENTS

TABLES

Pa	. Comptrollers and Deputy Comptrollers of the Currency since 1863	1.	No.
7	Total number of national banks organized, consolidated and merged under act November 7, 1918, as amended, insolvent, in voluntary liquidation, converted into and merged or consolidated with State banks under Public Law 706 (12 U. S. C. 214), and in existence on December 31, 1956	2.	No.

Notes

Act of Feb. 25, 1863, provided for reports of condition on the first of each quarter, before commencement of busines

Act of June 3, 1864—First Monday of January, April, July, and October, before commencement of business, on form prescribed by Comptroller (in addition to reports on first Tuesday of each month showing condition at commencement of business in respect to certain items; i. e., loans, specie, deposits, and circula-

sommendation at commendation of business in respect to certain items, i. e., iosins, specie, deposits, and circumstion).

Act of Mar. 3, 1869, not less than 5 reports per year, on form prescribed by Comptroller, at close of business on any past date by him specified.

Act of Dec. 28, 1922, minimum number of calls reduced from 5 to 3 per year.

Act of Feb. 25, 1927, authorized a vice president or an assistant cashier designated by the board of directors to verify reports of condition in absence of president and cashier.

Act of June 16, 1933, requires each national bank to furnish and publish not less than 3 reports each year of affiliates other than member banks, as of dates identical with those for which the Comptroller shall during such year require reports of condition of the bank. The report of each affiliate shall contain such information as in the judgment of the Comptroller shall be necessary to disclose fully the relations between the affiliate and the bank and to enable the Comptroller to inform himself as to the effect of such relations upon the affairs of the bank.

Sec. 21 (a) of the Banking Act of 1933 provided, in part, that after June 16, 1934, it would be unlawful for any private bank not under State supervision to continue the transaction of business unless it submitted to periodic examination by the Comptroller of the Currency or the Federal Reserve bank of the district, and made and published periodic reports of condition the same as required of national banks under section 5211, U. S. R. S. Sec. 21 (a) of the Banking Act of 1933, however, was amended by section 303 of the Bank ing Act of 1935, approved Aug. 23, 1935, under the provisions of which private banks are no longer required to submit to examination by the Comptroller or Federal Reserve bank, nor are they required to make to the Comptroller and publish periodic reports of condition. (5 calls for reports of condition of private banks were made by the Comptroller, the first one for June 30, 1934, and the last one for June 29, 1935.)

Included with figures for the State of Nevada.
 Includes figures for 2 banks in Arizona and 1 bank in Utah.
 Included with figures for the State of Vermont.
 Includes figures for 2 banks in Rhode Island.

⁵ Includes 24 banks which have been granted only certain specific fiduciary powers.

¹ Includes agency accounts in 1928. ² These figures were not developed at that time.

³ Revised.

¹ Number at end of period. Remaining figures include earnings, expenses, etc., of those banks which were in operation a part of the year but were inactive at the close of the year.
² Figures are averages of amounts reported for the June and December call dates in the year indicated and the December call date in the previous year.

Note.—Earnings and dividends figures for 1869 to 1937 were published for the years ended August 31 or June 30 and appear in the table beginning on page 96 of the Comptroller's Annual Report for 1937. Similar figures for 1938 through 1941 appear in table 26 on page 136 of the 1941 report. Calendar year figures are available, beginning with the year 1917, and are published in the Comptroller's reports as follows: 1938, p. 100; 1940, p. 17; 1942, p. 34; 1943, p. 30; 1946, p. 98; 1949, p. 100; 1951, p. 118; and 1954, p. 142.

Table No. 26.—Number of national banks, capital stock, capital funds, net profits, dividends, and ratios years ended Dec. 31, 1930-56 [In thousands of dollars. Figures for previous years published in report for 1938, p. 115]

Back figures.—See reference in heading of table 46, p. 190, in 1953 annual report, to reports containing figures since 1834. (Comparable figures for years prior to 1936 covered June 30 only.)

Note.—Reciprocal interbank demand balances with banks in the United States are reported net beginning with the year 1942.

Includes stock savings banks.
 Includes 1 private bank.
 Includes 1 trust company which is a member of the Federal Reserve System.

Includes reserve balances and cash items in process of collection.
 Includes capital notes and debentures in banks other than national.
 Includes reserve accounts.
 Not called for separately. Included with "Balances with other banks."

Table No. 49.—Assets and liabilities of all active national banks, Dec. 31, 1936 to 1956 [Amounts in thousands of dollars]

	Number of banks	Loans and discounts, including overdrafts	U. S. Government obligations, direct and guaranteed	Other bonds, stocks, and securities	Cash	Balances with other banks ¹	Other assets	Total assets	Capital	Surplus and undivided profits 2	Total de- posits	Bills pay- able and redis- counts, etc.	Other liabilities

¹ Includes reserve balances and cash items in process of collection.

Note.—Reciprocal interbank demand balances with banks in the United States are reported net beginning with the year 1942.

Back figures.—See reference in heading of table 48, p. 192, in 1953 annual report, to reports containing figures since 1834. (Comparable figures for years prior to 1936 covered June 30 only.)

Includes reserve accounts.
 Not called for separately. Included with "Balances with other banks."

Table No. 51.—Summary of status, progress, and results of liquidation of all national banks ¹ placed in charge of receivers from the date of the first national bank failure, Apr. 14, 1865, to Dec. 31, 1956 ¹⁰
