U.S. DEPARTMENT OF LABOR Bureau of Labor Statistics Washington 25, D. C.

CONSUMER PRICE INDEX FOR JANUARY 1957

Consumer prices in United States cities rose 0.2 percent between December 1956 and January 1957, according to the U.S. Department of Labor's Bureau of Labor Statistics. Lower prices for food and apparel were more than offset by increased prices for all other major groups of goods and services. This was the fifth consecutive month in which the Consumer Price Index advanced to a new high level. The January index was 118.2 percent of the 1947-49 average and 3.1 percent higher than a year ago.

The January food index declined fractionally to 112.8 (1947-49=100), 3.3 percent higher than a year ago, but still 3.3 percent below the August 1952 peak.

An average decrease of 8.1 percent in egg prices reflected increased supplies in all cities. Prices of fruits and vegetables averaged 0.4 percent lower, principally because of seasonally reduced prices for oranges (down 3.7 percent), lettuce (down 11.2 percent), and tomatoes (down 7.4 percent). Prices of frozen, canned, and dried fruits and vegetables also declined. Partially offsetting these reductions were price advances of 5.0 percent for potatoes, 15.7 percent for celery, 2.3 percent for apples, and 12.4 percent for cabbage.

A rise of 1.0 percent in the meats, poultry, and fish group, the first increase since September 1956, resulted chiefly because of an advance of 3.0 percent in pork prices. Bacon advanced 5.0 percent, pork chops 2.6 percent, and ham 1.2 percent. Beef and lamb prices were lower in January, but most other items in the group advanced.

The price of bread increased in 16 of the 46 cities surveyed.

Residential rents averaged unchanged over the month and housefurnishings prices declined 0.1 percent as January white sales of
household textiles more than offset higher prices of floor coverings and new models of
some appliances. All other housing components increased. Coal and fuel oil prices
were higher in most cities surveyed, advancing 2.1 percent on the average, and gas bills
also rose slightly. Higher rates for telephone service were reported and there were
continued increases in the prices of laundry and dry cleaning.

APPAREL The decrease of 0.6 percent in apparel prices reflected end-of-season clearance sales of fall and winter clothing. Women's wool coats were substantially lower and smaller reductions were reported for women's wool suits and dresses and rayon skirts, and girls' coats. Prices were also lower for men's wool trousers and men's and boys' rayon jackets. Prices of men's business shirts and boys' suits advanced.

OTHER COMMODITIES

AND SERVICES

AND SERVICES

Higher automobile insurance rates and higher prices for used cars and gasoline more than offset reductions in prices of new automobiles. Railroad fares were increased in the Western states.

The medical care index rose 0.4 percent as costs of hospital services advanced and there were scattered reports of higher fees for other professional medical services.

Labor D.C. BLS, LS57-2351

Brief Explanation of the CPI

The Consumer Price Index (CPI) measures the average changes in prices of goods and services typically bought by city families of wage earners and clerical workers. It is based on prices of about 300 items which were selected so that their price changes would represent the movement of prices of all goods and services purchased by wage and clerical families; they include all of the important items in family spending. Prices for these items are obtained in 46 cities which were chosen to represent all urban places in the United States; they are collected from grocery and department stores, hospitals, filling stations, and other types of stores and service establishments which wage-earner and clerical-worker families patronize.

Prices of foods, fuels, and a few other items are obtained every month in all 46 cities. Prices of most other commodities and services are collected every month in the 5 largest cities and every 3 months in other cities. Almost all prices are obtained by personal visits of the Bureau's trained representatives.

In calculating the index, price changes for the various items in each city are averaged together with weights which represent their importance in family spending. City data are then combined in the total index with weights based on the 1950 populations of cities they represent. Index numbers are computed on the base 1947-49 = 100.

The national index (the United States city average) includes prices from the 20 large cities for which separate indexes are published in this report, as well as from the following 26 medium-sized and small cities:

Anna, Illinois
Camden, Arkansas
Canton, Ohio
Charleston, W. Virginia
Evansville, Indiana
Garrett, Indiana
Glendale, Arizona
Grand Forks, N. Dakota
Grand Island, Nebraska

Huntington, W. Virginia
Laconia, New Hampshire
Lodi, California
Lynchburg, Virginia
Madill, Oklahoma
Madison, Wisconsin
Middlesboro, Kentucky
Middletown, Connecticut
Newark, Ohio

Pulaski, Virginia Ravenna, Ohio Rawlins, Wyoming San Jose, California Sandpoint, Idaho Shawnee, Oklahoma Shenandoah, Iowa Youngstown, Ohio

Comparisons of city indexes show only that prices in one city changed more or less than in another. The city indexes cannot be used to measure differences in price levels or in living costs between cities.

A description of the index is contained in BLS Bulletin 1140, "The Consumer Price Index: A Layman's Guide," which may be purchased for 20 cents at any Bureau of Labor Statistics regional office (addresses below) or from the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. A more technical description of the index appears in BLS Bulletin 1168, "Techniques of Freparing Major BLS Statistical Series." Reprints of chapter 9, pertaining to the CPI, are available on request to the Bureau of Labor Statistics in Washington or at any of its regional offices.

Historical series of index numbers for the United States city average and for 20 large cities are available upon request. These series include index numbers for All Items, Food, Apparel, and Rent for periods from 1913 to date; and for other groups of goods and services from 1947 to date.
