U.S. DEPARTMENT OF LABOR Bureau of Labor Statistics Washington, D. C. 20212

#### CONSUMER PRICE INDEX FOR JANUARY 1965

The Consumer Price Index rose by 0.1 percent in January, largely as a result of higher prices can homeownership items, potatoes, gasoline, and automobile insurance, the habor Department's percau of Labor Statistics reported today. Prices averaged lower for appared in Cresh fruits and vegetables.

The January index was 108.9 (1957-59=100), 1.1 percent higher than a year ago. Higher charges for consumer services (up 2.1 percent) were chiefly responsible for the rise from January 1964. Food prices were 0.8 percent higher. Eggs, new cars, and household durable goods were the major consumer items whose prices have decreased over the year.

Higher prices in January for gasoline and further increases in automobile insurance premiums caused a rise in transportation costs. Both new and used car prices declined less than usual in January, as effects of the shortages caused by last fall's strikes in the automobile industry continued to be felt. Higher housing costs were chiefly the result of further increases in costs of homeownership, together with higher prices for housekeeping services and seasonally higher prices for fuel oil.

A small decline in food costs in January was brought about by substantially lower prices for many fresh fruits and vegetables, particularly lettuce, tomatoes, and oranges. Egg prices continued to decline in response to record production. On the other hand, reduced supplies caused a substantial rise in potato prices. Apparel prices dropped sharply as a result of the usual mid-winter special sales in many parts of the country, but charges for medical care services advanced further.

ADJUSTMENTS
for January, about 950,000 workers will receive cost-of-living increases of 1 cent an hour. Of these, 800,000 are employed in the automobile and automotive parts industries, 100,000 in farm and construction equipment, and 50,000 in aerospace. In addition, about 5,000 transit workers will receive increases averaging 3½ cents an hour, based on the 12-month rise in the national index. If the escalator provisions of a number of contracts, which are now up for renewal or renegotiation, are continued in new contracts, another 100,000 workers, mostly in the automobile, farm equipment, and aerospace industries, will receive 1 cent increases.

OTHER BASES

The Consumer Price Index for January 1965 and purchasing power of the consumer dollar on the bases of 1947-49 and 1939 are shown below:

Base	Index	Purchasing Power
1947-49=100 (or \$1.00)	133.6	\$ 0.749
1939=100 (or \$1.00)	224.9	.445

:The first set of the attached tables (A-1 etc.) and the : analysis contained in this report are based on the new : index series, covering both single workers living alone : and families.

<sup>1/</sup> The old series Consumer Price Index, U.S. city average, has been discontinued with the June 1964 publication. Contrary to original plans, Portland and Scranton will be published on the old series basis temporarily. Indexes for Cincinnati, Houston, Kansas City, and Minneapolis will be published on the old series basis for the duration of 1964 and the first part of 1965, and will be added to the new series index in 1966. The present index for Milwaukee calculated by special arrangement with the City of Milwaukee, is now published on the old series basis, and will also be added to the new series index in 1966.

2/ Foods, fuels, and several other items priced every month in all cities; most other goods and services priced as indicated:

January, April, July, and October.
 February, May, August, and November.
 March, June, September, and December.

2/ Corrected indexes: July 1964 = 110.1; October 1964 = 110.7.
3/ Corrected indexes: July 1964 = 124.7; October 1964 = 124.5.

## Brief Explanation of the CPI

The Consumer Price Index (CPI) measures average changes in prices of goods and services usually bought by urban wage earners and clerical workers, both families and single persons living alone. It is based on prices of about 400 items which were selected to represent the movement of prices of all goods and services purchased by wage earners and clerical workers. Prices for these items are obtained in urban portions of 33 Standard Metropolitan Statistical Areas (SMSA's) and 17 smaller cities, which were chosen to represent all urban places in the United States, including Alaska and Hawaii. They are collected from grocery and department stores, hospitals, filling stations, and other types of stores and service establishments which wage earners and clerical workers patronize.

Prices of foods, fuels, and a few other items are obtained every month in all 50 locations. Prices of most other commodities and services are collected every month in the 5 largest SMSA's and every 3 months in other SMSA's and cities. Mail questionnaires are used to obtain local transit fares, public utility rates, newspaper prices, fuel prices, and certain other items which change in price infrequently. Prices of most other goods and services are obtained by personal visits of the Bureau's trained representatives.

In calculating the index, price changes for the various items in each location are averaged together with weights which represent their importance in the spending of all wage earners and clerical workers. SMSA and city data are then combined in the total index with weights based on the 1960 populations of SMSA's and cities they represent. Index numbers are computed on the base 1957-59=100, and are also available on the bases of 1947-49=100 and 1939=100.

The national index (the United States city average) includes prices from the 17 SMSA's for which separate indexes are published in this report, as well as from the following additional locations:

Alabama - Florence
Alaska - Anchorage
California - Bakersfield\*
Colorado - Denver\*
Connecticut - Hartford\*
Florida - Orlando\*
Indiana - Indianapolis\*
Indiana - Logansport
Illinois - Champaign-Urbana\*
Iowa - Cedar Rapids\*
Kansas - Wichita\*

Louisiana - Baton Rouge\*
Maine - Portland\*
Massachusetts - Southbridge
Michigan - Niles
Minnesota - Crookston
Mississippi - Vicksburg
New Jersey - Millville
New York - Kingston
North Carolina - Durham\*
North Dakota - Devils Lake
Ohio - Dayton\*

Ohio - Findlay
Oklahoma - Mangum
Oregon - Klamath Falls
Pennsylvania - Lancaster\*
South Carolina - Union
Tennessee - Nashville\*
Texas - Austin\*
Texas - McAllen
Utah - Orem
Virginia - Martinsville
Wisconsin - Green Bay\*

\*Standard Metropolitan Statistical Area

Comparisons of indexes for individual SMSA's show only that prices in one location changed more or less than in another. The SMSA indexes cannot be used to measure differences in price levels or in living costs between areas.

A description of the index and historical tables of index numbers for the United States city average and for 17 large SMSA's are available on request to the Bureau of Labor Statistics, Washington, D.C. 20212 or any of its regional offices (addresses below).
