W. John Layng, Assistant Commissioner

The CPI Detailed Report is a monthly report on consumer price movements, including statistical tables and technical notes. The report covers two indexes, the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W). The indexes reflect data for the U.S. city average and selected areas.

This publication may be ordered from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Subscription price per year \$12 domestic, and \$15 foreign. Single copy \$1. Send correspondence on circulation and subscription matters (including address changes) to the Superintendent of Documents.

Material in this publication is in the public domain and may be reproduced without permission of the Federal Government. Please credit the Bureau of Labor Statistics. Controlled circulation postage paid at Riverdale, Md.

Price Movements

The Consumer Price Index for All Urban Consumers (CPI-U) increased 1.1 percent before seasonal adjustment in July to 218.9 (1967=100). The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) increased 1.2 percent before seasonal adjustment in July to 219.4 (1967=100). The CPI-U was 11.3 percent higher and the CPI-W was 11.5 percent higher than in July 1978.

CPI for All Urban Consumers (CPI-U)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI-U rose 1.0 percent in July, the seventh consecutive monthly increase of approximately 1.0 percent. About two-thirds of the increase in July was due to higher energy and homeownership prices as the transportation and housing components continued to advance sharply. The 0.1 percent increase in the food and beverage index was about the same as in June and considerably smaller than the average monthly increase of 1.1 percent in the first 5 months of this year. Most other major categories of consumer spending in July also registered price changes similar to those of the previous month. The 0.7 percent increase in the index for entertainment was substantially larger than the 0.1 percent increase in June but about the same as the average monthly increases during the first 5 months of the year.

The index for grocery store foods declined 0.1 percent in July, the same as in June, due primarily to a 2.7 percent decline in the index for meats, poultry, fish, and eggs. Beef prices declined for the second consecutive month and pork and poultry prices for the fourth consecutive month after substantial increases during the fourth quarter of 1978 and earlier this year. Egg prices declined 4.5 percent after seasonal adjustment. These declines were partially offset by

increases in prices for both fresh and processed fruits and vegetables, coffee, bread, and other cereal and bakery products. Restaurant meals rose 0.6, in July, considerably less than the average monthly rate of increase in the first half of this year.

The housing index rose 1.2 percent in July, the sixth consecutive month of large increases. Rising homeownership costs and household fuel prices continued to account for most of the increase. In July, house prices rose 1.2 percent. Home financing costs rose 2.7 percent, reflecting increases in both mortgage interest rates and house prices. Charges for home maintenance and repairs rose 0.8 percent. Fuel oil prices, up 6.2 percent, rose sharply in July for the sixth consecutive large increase. The index for gas and electricity also rose substantially in July but by less than in May or June.

The index for apparel and upkeep declined 0.1 percent in July, the same as in June, following no change in May. The decline was primarily due to decreases in the prices of women's and girls' apparel which offset moderate increases in other apparel goods and apparel services.

The transportation component advanced sharply for the ninth consecutive month in July. Gasoline prices rose 5.0 percent and accounted for over four-fifths of the transportation increase. In the 12 months ended in July, gasoline prices increased 42.0 percent. New car prices rose 0.8 percent in July compared with 0.5 percent in June. Used car prices declined for the fifth consecutive month after showing large increases in each of the 10 preceding months. The index for public transportation rose 1.5 percent in July compared with an increase of 0.1 percent in June. Airline fares, intercity train and bus fares, and taxi fares all showed substantial increases.

Other goods and services	1.0	.8	.5	.5	.5	.4	.4	5.3	6.2

The medical care index rose 0.7 percent in July, about the same as in each of the preceding 5 months. Charges for physicians' services and hospital rooms rose 1.2 and 1.0 percent, respectively, in July, following more moderate increases since February. The index for medical care commodities continued to increase at about the same rate as during the first 6 months of the year.

The index for entertainment rose 0.7 percent in July compared with 0.1 percent in June, reflecting higher prices for reading materials and sporting goods and equipment. The index for other goods and services rose 0.5 percent in July, the same as in the previous 3 months.

CPI for Urban Wage Earners and Clerical Workers (CPI-W)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers rose 1.0 percent in July, the seventh consecutive increase of 1.0 percent or more. About two-thirds of the increase in July was due to higher energy and homeownership prices as the transportation and housing components continued their sharp advance. The index for food and beverages increased slightly less than in May and June and substantially less than earlier this year. The index for apparel and upkeep increased 0.2 percent in July, following declines in May and June. The medical care and other goods and services components rose about the same as in June while the entertainment index increase was substantially larger than in June but about the same as earlier this year.

The July increase of 0.2 percent in the food and beverage component was the smallest increase in 12 months. Prices for grocery store foods showed no change on average, following a 0.1 percent decline in June. A 2.6 percent decline in the index for meats, poultry, fish, and eggs offset larger increases in July in most other major grocery store foods. Beef prices, which declined in June, increased 0.1 percent in July, substantially less than earlier this year. Pork and poultry prices declined for the fourth consecutive month. Egg prices declined 5.1 percent following seasonal

adjustment. Price increases were registered for both fresh and processed fruits and vegetables, coffee, bread, and other cereal and bakery products. Restaurant meals and alcoholic beverages rose 0.7 and 0.5 percent, respectively, in July following increases of 1.2 and 0.3 percent in June.

The housing index rose 1.2 percent in July, the sixth consecutive month of large increases. Rising homeownership costs and household fuel prices continued to account for most of the increase. In July, house prices rose 1.1 percent, home financing costs rose 2.6 percent, and maintenance and repairs increased 0.8 percent. Fuel oil prices, up 6.2 percent, rose sharply in July for the sixth consecutive large increase. The index for gas and electricity also rose substantially in July but by less than in May or June.

The index for apparel and upkeep rose 0.2 percent in July, after declining in each of the 2 preceding months. Increases in prices for men's and boys' clothing, footwear, and apparel services offset declines in prices for women's, girls', and infants' and toddlers' clothing.

The transportation component advanced sharply for the ninth consecutive month. Gasoline prices rose 4.9 percent in July and accounted for over three-fourths of the transportation increase. Gasoline prices in the past 12 months have increased 42.7 percent. New car prices rose 1.0 percent in July compared with 0.6 percent in June. Used car prices declined after seasonal adjustment, the fifth consecutive decline after large increases in each of the 10 preceding months. The index for public transportation rose 1.2 percent in July compared with an increase of 0.1 percent in June as airline fares, intercity train and bus fares, and taxi fares all showed substantial increases.

The medical care index rose 0.8 percent in July, about the same as in June. Charges for physicians' services and hospital rooms, however, both rose 1.3 percent in July, after relatively moderate increases since February.

The index for entertainment rose 0.7 percent in July compared with 0.1 percent in June. The index for other goods and services rose 0.4 percent in July, about the same as in the previous 4 months.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

³ Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined below:

A-1 - More than 4,000,000.

A-2 - 1,250,000 to 4,000,000.

B - 385,000 to 1,250,000.

C - 75,000 to 385,000.

D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

NOTE: Price changes within areas are found in the Consumer Price Index; differences in living costs among areas are found in Family Budgets.

¹ Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

² Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

³ Regions are defined as the four Census regions. The population size classes are aggregations of areas which have urban population as defined below:
 A-1 - More than 4,000,000.
 A-2 - 1,250,000 to 4,000,000.
 B - 385,000 to 1,250,000.
 C - 75,000 to 385,000.
 D - Less than 75,000.
 Population size class A is the aggregation of population size classes A-1 and A-2.

¹ Areas priced on pricing schedule 2 (See table 13) will appear next month.

² Indexes on an October 1967=100 base unless otherwise indicated.

³ Indexes on a November 1977=100 base unless otherwise indicated.

⁴ Index on a June 1978=100 base in Miami, Fla.; formerly on a November 1977=100 base.

⁵ Indexes on a June 1978=100 base in Cincinnati, Ohio-Ky.-Ind. and Miami, Fla.; formerly on the bases listed in footnote 6 below. Index on a January 1978=100 base in Denver-Boulder, Col.

⁶ Indexes are on the bases listed below:

Anchorage, Alaska.....January 1978=100.
 Baltimore, Md.....March 1978=100.
 Boston, Mass.....January 1978=100.
 Cincinnati, Ohio-Ky.-Ind.....March 1978=100.
 Denver-Boulder, Colo.....January 1978=100.
 Miami, Fla.....November 1977=100.

Milwaukee, Wis.....November 1977=100.

Northeastern Pennsylvania.....November 1977=100.

Portland, Oreg.-Wash.....January 1978=100.

St. Louis, Mo.-Ill.....March 1978=100.

San Diego, Calif.....November 1977=100.

Seattle-Everett, Wash.....November 1977=100.

Washington, D.C.-Md.-Va.....November 1977=100.

⁷ Indexes on a June 1978=100 base; formerly on the bases listed in footnote 6 above.

⁸ The 1957-59=100 base is not available for San Diego, Calif.; index is on a February 1965=100 base.

⁹ Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

¹⁰ Index on a June 1978=100 base in San Diego, Calif.; formerly on a November 1977=100 base.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

³ Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined below:

A-1 - More than 4,000,000.

A-2 - 1,250,000 to 4,000,000.

B - 385,000 to 1,250,000.

C - 75,000 to 385,000.

D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

NOTE: Price changes within areas are found in the Consumer Price Index; differences in living costs among areas are found in Family Budgets.

West/D	1.0	1.6	-.2	1.7	2.3	1.1

¹ Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

² Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

³ Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined below:

- A-1 - More than 4,000,000.
- A-2 - 1,250,000 to 4,000,000.
- B - 385,000 to 1,250,000.
- C - 75,000 to 385,000.
- D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

Seattle-Everett, Wash.....November 1977=100.

Washington, D.C.-Md.-Va.....November 1977=100.

⁷ Indexes on a June 1978=100 base; formerly on the bases listed in footnote 6 above.

⁸ The 1957-59=100 base is not available for San Diego, Calif.; index is on a February 1965=100 base.

⁹ Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

¹⁰ Index on a June 1978=100 base in San Diego, Calif.; formerly on a November 1977=100 base.

Technical Notes

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. Effective with the January 1978 index, the Bureau of Labor Statistics began publishing CPI's for two population groups: (1) a new CPI for All Urban Consumers (CPI-U) which covers approximately 80 percent of the total noninstitutional civilian population; and (2) a revised CPI for Urban Wage Earners and Clerical Workers (CPI-W) which represents about half the population covered by the CPI-U. The CPI-U includes, in addition to wage earners and clerical workers, groups which historically have been excluded from CPI coverage, such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Prices are collected in 85 urban areas across the country from over 18,000 tenants, 18,000 housing units for property taxes, and about 24,000 establishments—grocery and department stores, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of food, fuels, and a few other items are obtained every month in all 85 locations. Prices of most other commodities and services are collected every month in the five largest geographic areas and every other month in other areas. Prices of most goods and services are obtained by personal visits of the Bureau's trained representatives. Mail questionnaires are used to obtain public utility rates, some fuel prices, and certain other items.

In calculating the index, price changes for the various items in each location are averaged together with weights which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Separate indexes are also published for 28 local areas. Area indexes do not measure differences in the level of prices among cities; they only measure the average change in prices for each area since the base period.

The index measures price changes from a designated

reference date—1967—which equals 100.0. An increase of 22 percent, for example, is shown as 122.0. This change can also be expressed in dollars as follows: The price of a base period "market basket" of goods and services in the CPI has risen from \$10 in 1967 to \$12.20.

For further details see the following: *The Consumer Price Index: Concepts and Content Over the Years*, Report 517, revised edition (Bureau of Labor Statistics, May 1978); *The Revision of the Consumer Price Index*, by W. John Layng, reprinted from the *Statistical Reporter*, February 1978, No. 78-5 (U.S. Dept. of Commerce), and *Revisions in the Medical Care Service Component of the Consumer Price Index*, by Daniel H. Ginsburg, *Monthly Labor Review*, August 1978.

A Note About Calculating Index Changes

Movements of the indexes from one month to another are usually expressed as percent changes rather than changes in index points because index point changes are affected by the level of the index in relation to its base period while percent changes are not. The example in the accompanying box illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

Index Point Change	
CPI	189.8
Less previous index	<u>189.2</u>
Equals index point change:	0.6
Percent Change	
Index point difference	<u>0.6</u>
Divided by the previous index	189.2
Equals:	0.003
Results multiplied by one hundred	0.003×100
Equals percent change:	0.3

A Note on Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data are also used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used to compute the seasonally adjusted indexes are derived by the X-11 Variant of the Census Method II Seasonal Adjustment Program. Annual updates replace 5 years of seasonal data, e.g., data from 1975 through 1979 will be replaced at the end of 1979. The seasonal movement of all items and 35 other aggregations is derived by combining the seasonal movement of 45 selected components.
