

CPI Detailed Report

June 1986

U.S. Department of Labor
Bureau of Labor Statistics

U.S. DEPARTMENT OF LABOR
William E. Brock, *Secretary*

BUREAU OF LABOR STATISTICS
Janet L. Norwood, *Commissioner*

OFFICE OF PRICES AND LIVING CONDITIONS
Kenneth V. Dalton, *Associate Commissioner*

The CPI Detailed Report is a monthly report on consumer price movements, including statistical tables and technical notes. The report covers two indexes, the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W). The indexes reflect data for the U.S. city average and selected areas.

This publication may be ordered from the Superintendent of Documents, U.S. Government Printing Office, Washington D.C. 20402. Subscription price per year \$25 domestic, and \$31.25 foreign. Single copy domestic, \$4; foreign, \$5. Send correspondence on circulation and subscription matters (including address changes) to the Superintendent of Documents.

CPI MAILGRAM provides selected U.S. City Average data for CPI-U and CPI-W within 24 hours of release. Order from: National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161. Subscription rates: \$145 in contiguous U.S. and Hawaii; \$160 in Alaska and Canada.

Material in this publication is in the public domain and may be reproduced without permission of the Federal Government. Please credit the Bureau of Labor Statistics. Second-class postage paid at Washington, D.C., and at additional mailing offices.

NOTE: The Bureau of Labor Statistics currently is completing a major revision of the Consumer Price Index. Beginning with release of the CPI for January 1987 on February 27, 1987, the Bureau will introduce revised versions of the current CPI's both for All Urban Consumers and for Urban Wage Earners and Clerical Workers. The revised CPI's will reflect more current population and spending patterns and numerous technical enhancements. See page 3 for further details.

Price Movements

June 1986

The Consumer Price Index for All Urban Consumers (CPI-U) rose 0.5 percent before seasonal adjustment in June to a level of 327.9 (1967 = 100). For the 12-month period ended in June, the CPI-U has increased 1.7 percent.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) also increased 0.5 percent in June prior to seasonal adjustment. The June 1986 CPI-W level of 323.0 (1967 = 100) was 1.3 percent higher than the index in June 1985.

CPI for All Urban Consumers (CPI-U)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI-U rose 0.5 percent in June. This compares with a 0.2-percent increase in May and declines in each of the 3 preceding months. Excluding energy, the CPI-U rose 0.2 percent in June, the same as in May. Energy prices, which were responsible for the earlier declines, rose 2.3 percent in June, following a slight advance in May, and accounted for about half of the June advance in the overall CPI-U. Substantial increases in prices for gasoline, electricity, and natural gas were only partially offset by a further decline in fuel oil prices.

During the first 6 months of 1986, the CPI-U declined at a seasonally adjusted annual rate of 0.2 percent. This decrease represents the first time that the index has declined over the first half of the year since 1955. Reflecting the sharp drop in crude oil prices, the index for energy commodities—fuel oil, coal, bottled gas, and motor fuels—declined at an annual rate of 40.2 percent in the first half of 1986. Prices for used cars and grocery

store foods also declined in the first half. On the other hand, shelter costs continued to advance at an annual rate of about 5 percent. The index for all items excluding food, shelter, energy, and used cars increased at an annual rate of 4 percent during the first 6 months. Within this all other items group, however, price movements for commodities and for services continued to diverge. Price increases in the goods sector, continued to moderate, but prices for services, in particular medical care, have accelerated.

The annual rates for these groups during the last several years and the first half of 1986 are shown below.

	Annual percent changes				Seasonally adjusted annual rate—6-months ended June 1986
	12 months ended December 1982	1983	1984	1985

Other goods and services6	1.0	.5	.4	.4	.2	.3	3.7	5.9

In June, the transportation component registered its second consecutive monthly increase, after declining sharply in the 3 preceding months. The motor fuel component, which had been primarily responsible for the sharp declines earlier this year, rose 3.0 percent in June and accounted for nearly three-fourths of the 0.8-percent advance in the June transportation index. Despite increases in May and June, gasoline prices have declined 22.3 percent in the first 6 months of 1986 and are 31.2 percent below their peak level of March 1981. The new car index rose 0.6 percent in June, reflecting price increases in both domestic and imported models. This index has advanced at an 8.4-percent annual rate in the past 3 months, the largest quarterly increase in 5 years. In contrast automobile finance charges declined 0.9 percent in June and fell at an annual rate of 19.2 percent during the second quarter. Automobile insurance costs increased 1.3 percent in June and have risen 14 percent in the past 12 months. Used car prices declined 0.4 percent in June and were 4.7 percent lower than in June 1985. The index for public transportation rose 0.4 percent in June, the same as in May.

The housing component, which declined 0.1 percent in May, rose 0.5 percent in June, reflecting a sharp turnaround in the index for fuel and other utilities. The indexes for electricity and natural gas rose 3.7 and 1.2 percent, respectively, in June, following declines in each of the 3 preceding months. Charges for telephone services, which were unchanged in May, increased 1.9 percent in June. A 4.6-percent rise in local charges, reflecting an increase in the monthly line access fee, more than offset decreases of 5.6 and 0.2 percent in interstate and intrastate toll calls, respectively. (Local telephone charges are priced monthly in all areas; long distance charges are priced every other month in most areas.) Fuel oil prices, however, continued to decline—down 2.1 percent in June and 27.6 percent in the first 6 months of 1986. Shelter costs increased 0.2 percent in June, following a 0.1-percent increase in May. Within shelter, renters' costs rose 0.4 percent, homeowners' costs were virtually unchanged, and maintenance and repair costs declined 0.1 percent. The index for household furnishings and operations rose 0.2 percent in June.

The food and beverage index rose 0.1 percent in June, after advancing 0.4 percent in May. Grocery store food prices, which had also increased 0.4 percent in May, declined slightly in June. A turnaround in fruit and vegetable prices more than offset the acceleration in most other major grocery store food groups. Fresh fruit and vegetable prices declined 4.3 percent in June after increasing 10.6 percent in the previous 2-month period. The cereal and bakery products and meats, poultry, fish, and egg groups, however, registered their largest increases this year—up 0.7 and 1.0 percent, respectively. Pork, poultry, and egg prices all rose substantially in June and beef prices—up 0.3 percent—registered their first increase in 1986. The indexes for dairy products and other foods at home increased only slightly in June. The other two components of the food and beverage index—restaurant meals and alcoholic beverages—rose 0.4 and 0.3 percent, respectively.

The medical care component increased 0.7 percent in June, about the same as the average monthly rate of increase during the first 5 months of 1986. The index for medical care commodities—prescription drugs, non-prescription drugs, and medical supplies—rose 0.5 percent. The index for medical care services increased 0.7 percent, with the costs of physicians' services and hospital rooms up 0.5 and 0.8 percent, respectively.

The index for apparel and upkeep declined 0.3 percent in June. For the first 6 months of 1986, apparel prices have declined at an annual rate of 2.4 percent. Prices for men's, boys', women's, and girls' clothing and for footwear each declined during the first 6 months while the index for apparel services increased at an annual rate of 4.1 percent.

In June, for the second consecutive month, the entertainment and the other goods and services components both registered increases of 0.4 percent.

CPI for Urban Wage Earners and Clerical Workers (CPI-W) — seasonally adjusted changes

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers increased 0.5 percent in June.

The Consumer Price Index Revision

The Bureau of Labor Statistics will begin publishing a revised Consumer Price Index (CPI) with the release of the January 1987 index in February 1987. As a result of the revision, both the CPI-U and the CPI-W will have updated expenditure weights based upon data tabulated from 3 years (1982, 1983, and 1984) of the Consumer Expenditure Survey, replacing the current expenditure weights based on 1972-73 data. The Bureau periodically revises the expenditure weights so that the CPI reflects price changes of items currently being purchased by consumers.

The January 1987 CPI also will introduce a greatly enhanced housing survey which will improve the rental equivalence measure of homeownership costs in both the CPI-U and CPI-W. The new housing sample was designed to represent optimally both owners and renters in the estimation of shelter costs.

A number of methodological and sampling advances first introduced in the 1978 revision also have been enhanced and will be incorporated into the CPI for January 1987. For example, the selection of the urban areas and the allocation of outlet samples in which prices are collected for the CPI were done by the Bureau with the primary objective of producing the most accurate national CPI possible with the funds available. The January 1987 index also will be based, for the first time on the geographic distribution of consumers as of the 1980 Census of Population. The current CPI uses the 1970 Census of Population. The requirement to allocate the sample so as to provide the most accurate national CPI did result in some local areas not having samples sufficient to permit frequent publication. Therefore, beginning in January 1987, the Bureau will publish a number of local area CPI's less frequently. The areas affected by the changes in publication are identified later in this article.

Both the CPI-U and the CPI-W published for January 1987 will be linked to the present series of each index as of December 1986 to provide a continuous series. The linking will be accomplished by setting the index levels of the revised CPI with the updated expenditure weights and samples equal to those published for the present series in December 1986. Each index will move upward or downward from the December 1986 level in accordance with subsequent changes in prices.

As in the past, the Bureau will publish selected indexes using the old expenditure weights for 6 months after the issuance of the revised CPI. Unlike earlier revisions,

these overlap indexes will not be based on the old samples and will differ from the revised indexes only by their expenditure weights. The base period for revised CPI issued for January 1987 will be 1967 = 100, the same as for the present index.

In addition to the national all-city average CPI-U and CPI-W indexes, the Bureau now publishes indexes for 28 local areas. In 1987, it will continue to publish indexes for all but one of these areas—Northeast Pennsylvania (Scranton-Wilkes-Barre). Because of the requirement to allocate the sample to provide the most accurate national CPI possible, 14 of the remaining 27 published areas will have a change in the frequency of their publication.

Based on the population growth since 1970 and expanded geographic definitions of Consolidated Metropolitan Statistical Areas issued by the Office of Management and Budget, the San Francisco-Oakland-San Jose area has superseded the Detroit-Ann Arbor area as the fifth largest area covered by the CPI. For this reason, beginning with data for January 1987, the San Francisco area will be published monthly while the Detroit area will be published only for even-numbered months rather than monthly.

Twelve areas now published bimonthly will be compiled on a semiannual average basis. These areas are: Buffalo-Niagara Falls, N.Y.; Cincinnati-Hamilton, Ohio-Ky.-Ind; Kansas City, Mo.-Kansas City, Kan.; Milwaukee, Wis.; Minneapolis-St. Paul, Minn.-Wis.; Atlanta, Ga.; Anchorage, Alaska; Denver-Boulder, Colo.; Honolulu, Hawaii; Portland-Vancouver, Ore.-Wash.; San Diego, Calif.; and Seattle-Tacoma, Wash. These semiannual average indexes, which refer to the arithmetic averages of the 6-month periods from January through June and July through December, will be published with release of the CPI for July and January, respectively, i.e., in the months of August and February. These series will be compiled and published on their present reference bases, 1967 = 100 for all areas other than Anchorage, which is on an October 1967 reference base. Also, the Cleveland-Akron-Lorain, Ohio, indexes will be published for odd-numbered rather than even-numbered months.

Indexes also are currently published bimonthly for 4 regions, 5 size classes, and 16 region-by-size groups. Beginning with January 1987, publication will become monthly; two of the size classes will be combined; and two of the region-by-size groups will be eliminated.

Selected beef cuts ¹		264.1	264.1	-1.0	.0	-1.9	-.5	.0
Imported food and fishery products ⁴	12/77	153.6	152.2	6.0	-.9	.3	.0	-.7

¹ Not seasonally adjusted.

² New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

³ After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

⁴ This index series will not be published after December 1986.

⁵ Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

⁶ New aggregate index. Monthly data for this series back to January 1967 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

Alcoholic beverages away from home	12/77	173.5	175.5	6.8	14.0	4.8	5.7	10.3	5.2
Special indexes:									
Domestically produced farm food		284.2	284.3	1.0	7.3	-7.6	3.9	4.1	-2.0
Selected beef cuts ¹		284.1	284.1	-9.0	28.2	-9.6	-9.1	8.0	-9.4
Imported food and fishery products ⁴	12/77	153.3	152.2	3.7	2.2	21.3	-1.6	2.9	9.3

¹ Not seasonally adjusted.

² New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

³ After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

⁴ This index series will not be published after December 1986.

⁵ Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

⁶ New aggregate index. Monthly data for this series back to January 1967 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Not seasonally adjusted.

² This index series will not be published after December 1986.

³ After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

⁴ Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

⁵ New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Not seasonally adjusted.

² This index series will not be published after December 1986.

³ After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

⁴ Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

⁵ New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

³ Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

⁴ Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

⁵ This index will no longer be published after December 1986.

⁶ After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

⁷ After December 1986, this index series will be published on a monthly basis.

⁸ Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.

A-2 - 1,250,000 to 4,000,000.

B - 385,000 to 1,250,000.

C - 75,000 to 385,000.

D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

⁹ A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

¹ Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

² Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

³ Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

⁴ This index will no longer be published after December 1986.

⁵ Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

- A-1 - More than 4,000,000.
- A-2 - 1,250,000 to 4,000,000.
- B - 385,000 to 1,250,000.
- C - 75,000 to 365,000.
- D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

⁶ A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

¹ Areas on pricing schedule 1 (See footnote 1, Table 13) will appear next month.

² Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. Local indexes will be published on a semi-annual average basis.

³ After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

⁴ For the following areas the 1957-59=100 base is not available; indexes are on the bases listed below:

Buffalo, N. Y.....November 1963=100.

Dallas-Fort Worth, Tex.....November 1963=100.

Honolulu, Hawaii.....December 1963=100.

⁵ Indexes on a December 1982=100 base.

⁶ Indexes on a June 1976=100 base, except in Buffalo, N.Y. where 1967=100.

⁷ Indexes on a June 1978=100 base.

⁸ Indexes on a January 1976=100 base.

⁹ Indexes on an August 1981=100 base.

¹⁰ Indexes are on the bases listed below:

Atlanta, Ga.....December 1977=100.

Buffalo, N. Y.....February 1978=100.

Cleveland, Ohio.....February 1978=100.

Dallas-Fort Worth, Tex.....February 1978=100.

Honolulu, Hawaii.....December 1977=100.

Houston, Tex.....April 1978=100.

Kansas City, Mo.-Kans.....December 1977=100.

Minneapolis-St. Paul, Minn.-Wis.....April 1978=100.

Pittsburgh, Pa.....April 1978=100.

San Francisco-Oakland, Calif.....December 1977=100.

¹¹ After December 1986, this area will be published on a monthly basis.

¹² Indexes on a June 1978=100 base, except in Minneapolis-St. Paul, Minn.-Wis. where 1967=100.

^{NA} Data not adequate for publication.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

³ Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

⁴ Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

⁵ This index will no longer be published after December 1986.

⁶ After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

⁷ After December 1986, this index series will be published on a monthly basis.

⁸ Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.

A-2 - 1,250,000 to 4,000,000.

B - 385,000 to 1,250,000.

C - 75,000 to 385,000.

D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

⁹ A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar.

Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

¹ Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

² Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

³ Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

⁴ This index will no longer be published after December 1986.

⁵ Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

- A-1 - More than 4,000,000.
- A-2 - 1,250,000 to 4,000,000.
- B - 385,000 to 1,250,000.
- C - 75,000 to 385,000.
- D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

⁶ A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

¹ Areas on pricing schedule 1 (See footnote 1, Table 18) will appear next month.

² Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. Local indexes will be published on a semi-annual average basis.

³ After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

⁴ For the following areas the 1957-59=100 base is not available; indexes are on the bases listed below:

Buffalo, N. Y. November 1963=100.

Dallas-Fort Worth, Tex. November 1963=100.

Honolulu, Hawaii. December 1963=100.

⁵ Indexes on a December 1984=100 base.

⁶ Indexes on a June 1978=100 base, except in Buffalo, N.Y. where 1967=100.

⁷ Indexes on a June 1978=100 base.

⁸ Indexes on a January 1976=100 base.

⁹ Indexes on an August 1981=100 base.

¹⁰ Indexes are on the bases listed below:

Atlanta, Ga. December 1977=100.

Buffalo, N. Y. February 1978=100.

Cleveland, Ohio. February 1978=100.

Dallas-Fort Worth, Tex. February 1978=100.

Honolulu, Hawaii. December 1977=100.

Houston, Tex. April 1978=100.

Kansas City, Mo.-Kans. December 1977=100.

Minneapolis-St. Paul, Minn.-Wis. April 1978=100.

Pittsburgh, Pa. April 1978=100.

San Francisco-Oakland, Calif. December 1977=100.

¹¹ After December 1986, this area will be published on a monthly basis.

¹² Indexes on a June 1978=100 base, except in Minneapolis-St. Paul, Minn.-Wis. where 1967=100.

^{NA} Data not adequate for publication.

¹ Regions are defined as the four Census regions.
The population size classes are aggregations of areas which have urban population as defined:
A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

² Indexes on a December 1982=100 base.

³ Indexes on a June 1978=100 base.

⁴ Indexes on an August 1981=100 base.

¹ The population size classes are aggregations of areas which have urban population as defined:

- A-1 - More than 4,000,000.
- A-2 - 1,250,000 to 4,000,000.
- B - 385,000 to 1,250,000.
- C - 75,000 to 385,000.
- D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

² Data for this area will no longer be published after December 1986.

³ Indexes on a December 1982=100 base.

⁴ Indexes on a June 1978=100 base.

Services less rent of shelter ³	122.3	6.4	2.7	119.3	5.9	1.5	121.4	4.7	.7	114.9	4.5	.8
Services less medical care	209.9	7.0	1.6	199.4	3.7	1.2	180.1	3.8	.5	193.7	3.0	-.1

¹ The population size classes are aggregations of areas which have urban population as defined:

- A-1 - More than 4,000,000.
- A-2 - 1,250,000 to 4,000,000.
- B - 385,000 to 1,250,000.
- C - 75,000 to 365,000.
- D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1966, indexes for

the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

² Data for this area will no longer be published after December 1986.

³ Indexes on a December 1982 = 100 base.

⁴ Indexes on a June 1978 = 100 base.

⁵ Indexes on an August 1981 = 100 base.

^{NA} Data not adequate for publication.

¹ Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

- A-1 - More than 4,000,000.
- A-2 - 1,250,000 to 4,000,000.
- B - 385,000 to 1,250,000.
- C - 75,000 to 385,000.
- D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

² Indexes on a December 1984=100 base.

³ Indexes on a June 1978=100 base.

⁴ Indexes on an August 1981=100 base.

¹ The population size classes are aggregations of areas which have urban population as defined:

- A-1 - More than 4,000,000.
- A-2 - 1,250,000 to 4,000,000.
- B - 385,000 to 1,250,000.
- C - 75,000 to 385,000.
- D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

² Data for this area will no longer be published after December 1986.

³ Indexes on a December 1984=100 base.

⁴ Indexes on a June 1978=100 base.

¹ The population size classes are aggregations of areas which have urban population as defined:

- A-1 - More than 4,000,000.
- A-2 - 1,250,000 to 4,000,000.
- B - 385,000 to 1,250,000.
- C - 75,000 to 385,000.
- D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for

the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

² Data for this area will no longer be published after December 1986.

³ Indexes on a December 1984 = 100 base.

⁴ Indexes on a June 1978 = 100 base.

⁵ Indexes on an August 1981 = 100 base.

^{NA} Data not adequate for publication.

¹ Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

² Honolulu not included for utility (piped) gas.

³ Due to smaller sample sizes in this area, data will no longer be published after December 1986.

⁴ Prices are for synthetic natural gas and propane only.

⁵ Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined below:

- A-1 - More than 4,000,000.
- A-2 - 1,250,000 to 4,000,000.
- B - 385,000 to 1,250,000.
- C - 75,000 to 385,000.
- D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

^{NA} Data not adequate for publication.

Table P-2. Average residential unit prices and consumption ranges for utility (piped) gas and electricity for U.S. city average and selected areas

¹ Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

² Honolulu not included for utility (piped) gas.

³ Due to smaller sample sizes in this area, data will no longer be published after December 1986.

⁴ Prices are for synthetic natural gas and propane only.

⁵ Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined below:

- A-1 - More than 4,000,000.
- A-2 - 1,250,000 to 4,000,000.
- B - 385,000 to 1,250,000.
- C - 75,000 to 385,000.
- D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

NA Data not adequate for publication.

Technical Notes

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPI's for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 80 percent of the total noninstitutional civilian population; and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which represents about half the population covered by the CPI-U. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Prices are collected in 85 urban areas across the country from about 4,000 food stores, 24,000 rental units, and 28,000 establishments—department stores, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of food, fuels, and a few other items are obtained every month in all 85 locations. Prices of most other commodities and services are collected every month in the five largest geographic areas and every other month in other areas. Prices of most goods and services are obtained by personal visits of the Bureau's trained representatives. Mail questionnaires are used to obtain public utility rates, some fuel prices, and certain other items.

In calculating the index, price changes for the various items in each location are averaged together with weights which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 28 local areas. Area indexes do not measure differences in the level of prices

among cities, they only measure the average change in prices for each area since the base period.

The index measures price changes from a designated reference date—1967—which equals 100.0. An increase of 203 percent, for example, is shown as 303.0. This change can also be expressed in dollars as follows: The price of a base period "market basket" of goods and services in the CPI has risen from \$10 in 1967 to \$30.30.

For further details see *BLS Handbook of Methods*, Vol. II, "The Consumer Price Index," Bulletin 2134-2, April 1984.

Calculating Index Changes

Movements of the indexes from one month to another are usually expressed as percent changes rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period while percent changes are not. The example in the accompanying box illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

Index Point Change	
CPI	315.5
Less previous index	303.5
Equals index point change	12.0
Percent Change	
Index point difference	12.0
Divided by the previous index	303.5
Equals	0.040
Results multiplied by one hundred	0.040 x 100
Equals percent change	4.0

Homeownership Changes

The Consumer Price Index (CPI) has been changed to incorporate a rental equivalence measure of homeowners' costs in accordance with plans announced by the Bureau of Labor Statistics (BLS) on October 27, 1981. For the CPI for All Urban Consumers (CPI-U), this change was effective with release of the index for January 1983 and for the CPI for Urban Wage Earners and Clerical Workers (CPI-W), it was effective with the release of the January 1985 index. The rental equivalence approach calculates shelter costs of homeowners based on the implicit rent owners would have to pay to rent homes that they own. The old method calculated homeownership as home purchase, mortgage interest costs, property taxes, property insurance, and maintenance and repairs. The new homeownership component was introduced into both the CPI-U and the CPI-W in such a manner that in each case the indexes using the old and new methodologies were equal in the so-called "link month"—December 1982 for the CPI-U and December 1984 for the CPI-W. For more information, see the *CPI Detailed Report* for January 1983, pp. 7-13.

Energy Prices

Prices are usually available for the U.S. city average, 28 large urban areas, and 16 areas reflecting the four Census regions cross-classified by four population sizes. However, not all energy commodities and services are used in every area of the country. Fuel oil, for example, is not a common heating fuel in some urban areas, particularly in the South and West. Where no average prices are available, the designation NA will appear. NA will also appear if the data sufficiency criteria have not been met in any given month. For example, if there are fewer than five usable fuel oil prices for a published city or region size class, no fuel oil prices for the area will be published.

All prices, except for electricity, are collected monthly by BLS representatives in the urban areas priced for the CPI. Electricity prices are collected monthly on mail questionnaires by the Department of Energy for BLS. Prices for natural gas and electricity include fuel and purchased gas adjustments and all applicable taxes. Fuel oil and gasoline prices include applicable Federal, State, and local taxes.

Natural gas and electricity. Natural gas prices are reported in therms, which are a measure of heating value. Electricity prices are given in kilowatt hours (kwh). For both utility services, the consumption ranges specified in table P-2 are the upper and lower limits of the bill sizes priced for the Consumer Price Index. The average prices per therm and per kilowatt hour are

calculated from bills priced within these ranges. It should be noted that bills priced for the CPI are not only for different consumption amounts, but may also be calculated from different types of residential rate schedules. *The average prices per therm and per kilowatt hour are not, therefore, generally suitable for use in place-to-place price comparisons.*

The average prices for 40 and 100 therms of natural gas and for 500 kilowatt hours of electricity (table P-1) are calculated from a special price collection program. They are not used in the calculation of the CPI. Since heating and air-conditioning requirements vary by geographic location, climate, and weather conditions, it cannot be inferred that these consumption amounts represent those used by a typical residential consumer. These bills are used merely to track price changes over time for constant amounts of consumption, to provide data for place-to-place price comparisons, and to provide continuity with prices of natural gas and electricity formerly published in conjunction with the unrevised Consumer Price Index.

Fuel oil. Only #2 fuel oil (home heating oil) is priced. Prices are collected, in most cases, for quantities greater than one gallon. These prices are converted to a per gallon price for this program. Fuel oil prices reflect discounts for quantity and/or quick payment.

Gasoline. Gasoline prices are collected at the pump from a sample of full service, mini-service, and self-serve gas stations.

Approximate British Thermal Unit (BTU) values for some energy items are as follows, according to the source indicated:

1 therm = 100,000 BTU'S (U.S. Department of Energy).

1 kwh = 3,412 BTU'S (Edison Electric Institute)

1 gallon #2 fuel oil = 140,000 BTU'S (U.S. Department of Energy).

Food Prices

In the revised CPI, actual weighted average prices are calculated each month at the national level and for the four Census geographic regions. As a result of changes in price collection methodology and sample sizes, average prices for individual cities cannot in general be produced. It is hoped, however, that regional average prices will help satisfy the need for local area data. It should be noted, however, that the average food prices in this report reflect variations in brand, quality, and size among geographic areas. Users of average food prices should be aware that these differences exist.

Because a number of food commodities are not available in all areas on a year-round basis, prices will

not appear in some months for some regions or for the U.S. city average. In other instances, sufficient prices may not be available due to temporary disruptions in supplies. Where no average prices are available, the designation NA will appear. When a price is not available from an individual store in any month, an estimated price will be calculated for the missing item and used in computing the average price. In cases where the proportion of estimated prices used to calculate the average is considered too high, the average price will not be published and NA will appear for that item in the table.

Because of space limitations in the table, the description for each item is abbreviated. More detailed specifications are available from BLS Regional Offices or from the Washinton Office upon request.

Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from changing

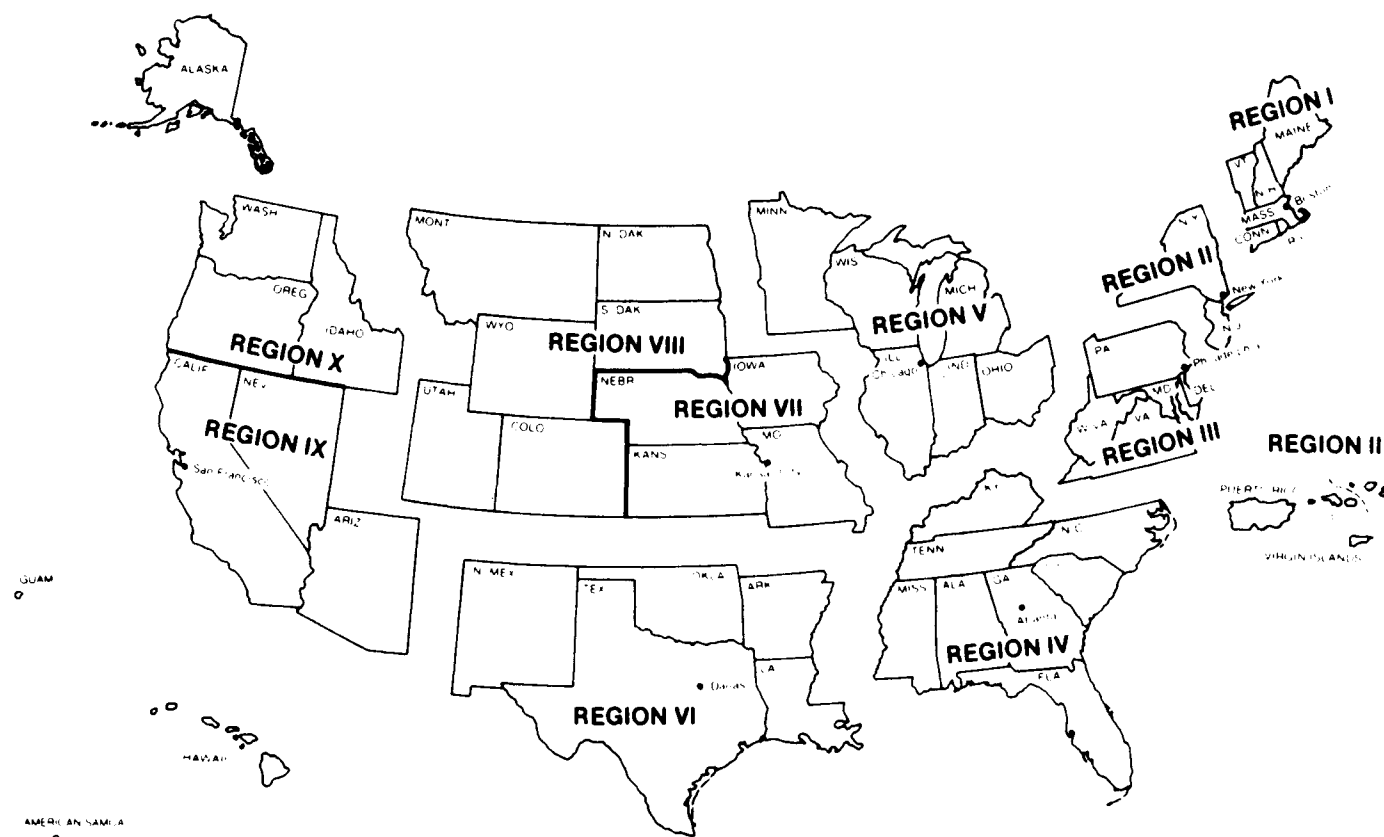

climatic conditions, production cycles, model change overs, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used in computing the seasonally adjusted indexes are derived by the X-11 Seasonal Adjustment Method. The updated seasonal data at the end of 1977 replaced data from 1967 through 1977. Subsequent annual updates have replaced 5 years of seasonal data, e.g., data from 1981 through 1985 were replaced at the end of 1985. The seasonal movement of all items and 44 other aggregations is derived by combining the seasonal movement of 51 selected components. Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. If any of the 51 components change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used for the last 5 years, but the seasonally adjusted indexes will be used before that period. If any of the 51 components change their status from not seasonally adjusted to seasonally adjusted, seasonally adjusted data will be used for the last 5 years, but not seasonally adjusted indexes will be used before that period.
