

CPI Detailed Report August 1984

U.S. Department of Labor
Bureau of Labor Statistics

U.S. DEPARTMENT OF LABOR
Raymond J. Donovan, *Secretary*

BUREAU OF LABOR STATISTICS
Janet L. Norwood, *Commissioner*

OFFICE OF PRICES AND LIVING CONDITIONS
Kenneth V. Dalton, *Associate Commissioner*

The CPI Detailed Report is a monthly report on consumer price movements, including statistical tables and technical notes. The report covers two indexes, the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W). The indexes reflect data for the U.S. city average and selected areas.

This publication may be ordered from the Superintendent of Documents, U.S. Government Printing Office, Washington D.C. 20402. Subscription price per year \$25 domestic, and \$31.25 foreign. Single copy domestic, \$4; foreign, \$5. Send correspondence on circulation and subscription matters (including addresses changes) to the Superintendent of Documents.

CPI MAILGRAM provides selected U.S. City Average data for CPI-U and CPI-W within 24 hours of release. Order from: National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161. Subscription rates: \$125 in contiguous U.S. and Hawaii; \$135 in Alaska and Canada.

Material in this publication is in the public domain and may be reproduced without permission of the Federal Government. Please credit the Bureau of Labor Statistics. Second-class postage paid at Washington, D.C. and at additional mailing offices.

Price Movements

August 1984

The Consumer Price Index for All Urban Consumers (CPI-U) increased 0.4 percent before seasonal adjustment in August, to a level of 313.0 (1967=100). For the 12-month period ended in August, the CPI-U increased 4.2 percent.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) rose 0.9 percent in August, prior to seasonal adjustment. The August level of 310.3 (1967=100) was 3.6 percent higher than the index in August 1983. The CPI-W is used for indexing Social Security and some other Federal payments. It is also commonly used as an escalator in collective bargaining agreements.

CPI for All Urban Consumers (CPI-U)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI for All Urban Consumers advanced 0.5 percent in August, somewhat more than in recent months. Larger increases in the August indexes for food and beverages—reflecting a sharp jump in fresh vegetable prices—and housing accounted for about three-fourths of the advance in the overall CPI. Apparel prices also rose more in August. The transportation component was virtually unchanged following a 0.3 percent decline in July, as prices for gasoline and used cars fell less in August than in July. On the other hand, the entertainment index rose 0.5 percent for the third consecutive month, and the medical care and other goods and services components both

registered smaller increases in August than in July. During the first 8 months of 1984, the CPI-U rose at a seasonally adjusted annual rate of 4.2 percent. This compares with a 3.8 percent increase for the 12 months ended in December 1983.

The food and beverage component rose 0.6 percent in August. Grocery store food prices advanced 0.8 percent, following an increase of 0.2 percent in July. A substantial increase in the index for fruits and vegetables—up 3.3 percent—and a turnaround in the index for meats, poultry, fish, and eggs were responsible for the acceleration. Supply shortages contributed to the 13.2 percent rise in fresh vegetable prices, their largest increase since February 1977. Beef and pork prices, which declined in July, advanced in August and more than offset declines in prices for poultry and eggs. The August increase of 1.4 percent in beef prices followed 5 consecutive months of declines. Most other major grocery store food groups registered very moderate increases, advancing the same or less than in July. The other two components of the food and beverage index—restaurant meals and alcoholic beverages—rose 0.4 and 0.2 percent, respectively.

The August advance of 0.6 percent in the housing component followed a 0.5 percent rise in July. Shelter costs rose 0.5 percent, with renters' costs advancing 0.6 percent; homeowners' costs, 0.5 percent; and maintenance and repair costs declining 0.1 percent. The index for fuels and utilities rose 0.8 percent. For the second

consecutive month, sharp increases in charges for electricity—up 1.6 percent—and natural gas—up 1.7 percent—were partially offset by a large decline in fuel oil prices. Among other utilities, the cost of telephone services advanced 0.2 percent in August as increases in local charges were partially offset by decreases in interstate and intrastate toll calls. The index for household furnishings and operations, which declined in July, rose 0.6 percent in August.

After registering decreases in both June and July, the transportation index was virtually unchanged in August. Gasoline prices declined—down 0.9 percent in August—but by less than in each of the preceding two months. The August drop brought gasoline prices down 15.5 percent below their peak level of March 1981. Used car prices declined 0.4 percent, following a 0.7 percent decrease in July. New car prices rose 0.5 percent, the same as in July, as limited supplies of 1984 models have resulted in smaller dealer concessions than usual at the end of the model year. Automobile finance charges—up 1.5 percent—rose sharply for the fifth consecutive month. Among other automobile expenses, tire prices registered their first increase since April, but were still 11.6 percent below their peak level in June 1982. On the other hand, the index for public transportation rose 0.4 percent in August, following increases of more than 1.0 percent in both June and July.

The index for apparel and upkeep advanced 0.9 percent in August, following a 0.5 percent increase in July. The August advance was the largest increase since March 1980. Clothing price increases for fall and winter wear were, on average, larger than in recent years. In addition, the cost for apparel services—up 1.1 percent—rose substantially more than in recent months.

The medical care component rose 0.3 percent in August, following an increase of 0.6 percent in July. The index for medical care commodities—prescription drugs, nonprescription drugs, and medical supplies—advanced 0.4 percent. The cost of medical care services rose 0.3 percent, with both hospital room and profes-

sional services also up 0.3 percent.

The entertainment index increased 0.5 percent in August, the same as in each of the preceding two months. The other goods and services component rose 0.4 percent.

CPI for Urban Wage Earners and Clerical Workers (CPI-W)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers rose 0.9 percent in August. The 0.9 percent rise in the CPI-W compares with an increase of 0.5 percent in the CPI-U. In the CPI-U, the homeowners' cost index—which uses a rental equivalence approach—rose 0.5 percent in August. Homeownership in the CPI-W, which is based on house prices, mortgage interest rates, property taxes, property insurance, and maintenance and repair costs, rose 2.8 percent in August, primarily due to a 3.5 percent increase in mortgage interest rates and a 1.7 percent increase in house prices.

Changes in frequency of publication for local area CPI's to begin in 1987

The Bureau of Labor Statistics will improve the sample of urban areas in which it gathers prices for monthly preparation of the Consumer Price Index beginning in 1987. At the same time, the Bureau will publish a number of local area CPI's frequently.

The changes in publication frequency arise from the requirement to allocate the sample to reflect population shifts in the 1980 Census so as to provide the most accurate national CPI possible with the funds available. As a result, some local areas will no longer have samples sufficient to permit more frequent publication.

In addition to the national index for all cities, the Bureau now publishes indexes for 28 urban areas. In 1987, it will continue to publish indexes for all but one of these areas—Northeast Pennsylvania (Scranton-Wilkes-Barre).

Of the remaining 27 published urban areas, 13 will have a reduction in frequency beginning in 1987. The index for Detroit, currently published monthly, will be published every other month. Twelve areas now published bimonthly will be compiled on a semiannual average basis. These areas are: Buffalo-Niagara Falls, NY; Cincinnati-Hamilton, OH-KY-IN; Kansas City, MO-Kansas City, KS; Milwaukee, WI; Minneapolis-St. Paul, MN-WI; Atlanta, GA; Anchorage, AK; Denver-Boulder, CO; Honolulu, HI; Portland-Vancouver, OR-WA; San Diego, CA; and Seattle-Tacoma, WA. Also, the Cleveland-

Akron-Lorain, OH, indexes will be published in even-numbered rather than odd-numbered months.

Further details are available from BLS.

Homeownership changes

As announced in October 1981, the Bureau of Labor Statistics will change the treatment of homeownership costs in the CPI for Urban Wage Earners and Clerical Workers (CPI-W) effective with release of data for January 1985. See the last page of the Technical Notes for additional detail.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

³ Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.

A-2 - 1,250,000 to 4,000,000.

B - 385,000 to 1,250,000.

C - 75,000 to 385,000.

D - Less than 75,000.

Population size class A is the aggregation of population classes A-1 and A-2.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

¹ Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

² Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

³ Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

- A-1 - More than 4,000,000.
- A-2 - 1,250,000 to 4,000,000.
- B - 385,000 to 1,250,000.
- C - 75,000 to 385,000.
- D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

² For the following areas the 1957-59=100 base is not available; indexes are on the bases listed below:

Buffalo, N. Y. November 1963=100.

Dallas-Fort Worth, Tex. November 1963=100.

Honolulu, Hawaii. December 1963=100.

³ Indexes on a December 1982=100 base.

⁴ Indexes on a June 1978=100 base, except in Buffalo, N.Y. where 1967=100.

⁵ Indexes are on the bases listed below:

Atlanta, Ga. December 1977=100.

Buffalo, N. Y. February 1978=100.

Cleveland, Ohio. February 1978=100.

Dallas-Fort Worth, Tex. February 1978=100.

Honolulu, Hawaii. December 1977=100.

Houston, Tex. April 1978=100.

Kansas City, Mo.-Kans. December 1977=100.

Minneapolis-St. Paul, Minn.-Wis. April 1978=100.

Pittsburgh, Pa. April 1978=100.

San Francisco-Oakland, Calif. December 1977=100.

⁶ Indexes on a June 1978=100 base.

⁷ Excludes motor oil, coolant, and other products as of January 1983.

⁸ Indexes on a June 1978=100 base, except in Minneapolis-St. Paul, Minn.-Wis. where 1967=100.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

³ Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.

A-2 - 1,250,000 to 4,000,000.

B - 385,000 to 1,250,000.

C - 75,000 to 385,000.

D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

¹ Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

² Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

³ Regions are defined as the four Census regions. The population size classes are aggregations of areas which have urban population as defined:
A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.
Population size class A is the aggregation of population size classes A-1 and A-2.

¹ Areas on pricing schedule 1 (See table 18) will appear next month.

² For the following areas the 1957-59=100 base is not available; indexes are on the bases listed below:

Buffalo, N. Y. November 1963=100.
Dallas-Fort Worth, Tex. November 1963=100.
Honolulu, Hawaii. December 1963=100.

³ Indexes on a January 1981=100 base.

⁴ Indexes on a June 1978=100 base, except in Buffalo, N.Y. where 1967=100.

⁵ Indexes are on the bases listed below:

Atlanta, Ga. December 1977=100.
Buffalo, N. Y. February 1978=100.

Cleveland, Ohio. February 1978=100.

Dallas-Fort Worth, Tex. February 1978=100.

Honolulu, Hawaii. December 1977=100.

Houston, Tex. April 1978=100.

Kansas City, Mo.-Kans. December 1977=100.

Minneapolis-St. Paul, Minn.-Wis. April 1978=100.

Pittsburgh, Pa. April 1978=100.

San Francisco-Oakland, Calif. December 1977=100.

⁶ Indexes on a June 1978=100 base.

⁷ Excludes motor oil, coolant, and other products as of January 1983.

⁸ Indexes on a June 1978=100 base, except in Minneapolis-St. Paul, Minn.-Wis. where 1967=100.

¹ Regions are defined as the four Census regions. The population size classes are aggregations of areas which have urban population as defined:
A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.
Population size class A is the aggregation of population

size classes A-1 and A-2.
² Indexes on a December 1982=100 base.
³ Indexes on a June 1978=100 base.
⁴ New series; includes direct pricing of new trucks and motorcycles as of September 1982.
⁵ Revised index for North Central Region: June 1984 = 220.6
⁶ Excludes motor oil, coolant, and other products as of January 1983.

¹ The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.

A-2 - 1,250,000 to 4,000,000.

B - 385,000 to 1,250,000.

C - 75,000 to 385,000.

D - Less than 75,000.

Population size class A is the aggregation of population size classes

A-1 and A-2.

² Indexes on a December 1982=100 base.

³ Indexes on a June 1978=100 base.

⁴ New series; includes direct pricing of new trucks and motorcycles as of September 1982.

⁵ Revised index for Population size class A-1: June 1984 = 191.4

⁶ Excludes motor oil, coolant, and other products as of January 1983.

¹ Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

- A-1 - More than 4,000,000.
- A-2 - 1,250,000 to 4,000,000.
- B - 385,000 to 1,250,000.
- C - 75,000 to 385,000.
- D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

² Indexes on a December 1982=100 base.

³ Indexes on a June 1978=100 base.

⁴ Excludes motor oil, coolant, and other products as of January 1983.

⁵ Revised index for North Central/A: June 1984 = 217.0

^{NA} Data not adequate for publication.

¹ Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

- A-1 - More than 4,000,000.
- A-2 - 1,250,000 to 4,000,000.
- B - 385,000 to 1,250,000.
- C - 75,000 to 385,000.
- D - Less than 75,000.

Population size class A is the aggregation of population

size classes A-1 and A-2.

² January 1981 = 100.

³ Indexes on a June 1978 = 100 base.

⁴ New series; includes direct pricing of new trucks and motorcycles as of September 1982.

⁵ Revised index for North Central Region: June 1984 = 218.9

⁶ Excludes motor oil, coolant, and other products as of January 1983.

¹ Regions are defined as the four Census regions.
The population size classes are aggregations of areas which have urban population as defined:
A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.
² January 1981 = 100.
³ Indexes on a June 1978 = 100 base.
⁴ Excludes motor oil, coolant, and other products as of January 1983.
⁵ Revised index for North Central/A: June 1984 = 217.5
^{NA} Data not adequate for publication.

Technical Notes

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. Effective with the January 1978 index, the Bureau of Labor Statistics began publishing CPI's for two population groups: (1) a new CPI for All Urban Consumers (CPI-U) which covers approximately 80 percent of the total noninstitutional civilian population; and (2) a revised CPI for Urban Wage Earners and Clerical Workers (CPI-W) which represents about half the population covered by the CPI-U. The CPI-U includes, in addition to wage earners and clerical workers, groups which historically have been excluded from CPI coverage, such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Prices are collected in 85 urban areas across the country from about 18,000 tenants, 18,000 housing units for property taxes, and about 24,000 establishments—grocery and department stores, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of food, fuels, and a few other items are obtained every month in all 85 locations. Prices of most other commodities and services are collected every month in the five largest geographic areas and every other month in other areas. Prices of most goods and services are obtained by personal visits of the Bureau's trained representatives. Mail questionnaires are used to obtain public utility rates, some fuel prices, and certain other items.

In calculating the index, price changes for the various items in each location are averaged together with weights which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 28 local areas. Area indexes do not measure differences in the level of prices among cities, they only measure the

average change in prices for each area since the base period.

The index measures price changes from a designated reference date—1967—which equals 100.0. An increase of 122 percent, for example, is shown as 222.0. This change can also be expressed in dollars as follows: The price of a base period "market basket" of goods and services in the CPI has risen from \$10 in 1967 to \$22.20.

For further details see the following: *The Consumer Price Index: Concepts and Content Over the Years*, Report 517, revised edition (Bureau of Labor Statistics, May 1978); "The Revision of the Consumer Price Index," by W. John Layng, reprinted from the *Statistical Reporter*, February 1978, No. 78-5 (U.S. Dept. of Commerce), "Revisions in the Medical Care Service Component of the Consumer Price Index," by Daniel H. Ginsburg, *Monthly Labor Review*, August 1978; and *CPI Issues*, Report 593, (Bureau of Labor Statistics, February 1980).

Calculating Index Changes

Movements of the indexes from one month to another are usually expressed as percent changes rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period while percent changes are not. The example in the accompanying box illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would

Index Point Change	
CPI	236.4
Less previous index	233.2
Equals index point change	3.2
Percent Change	
Index point difference	3.2
Divided by the previous index	233.2
Equals	0.014
Results multiplied by one hundred	0.014x100
Equals percent change	1.4

be if the current rate were maintained for a 12-month period.

Homeownership Changes

Effective with data for January 1985, the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) will be changed to incorporate a rental equivalence measure of homeownership costs. The Bureau of Labor Statistics announced plans to change the treatment of homeownership costs on October 27, 1981. Effective with release of the index for January 1983, the BLS changed the way homeowner costs are measured in the CPI for All Urban Consumers (CPI-U) to rental equivalence.

The rental equivalence approach calculates homeowner costs of the shelter based on the implicit rent owners would have to pay to rent the homes they own. The old method calculated homeowner costs as home purchase, mortgage interest costs, property taxes, property insurance, and maintenance and repair. As with the CPI-U, the new homeownership component will be introduced into the CPI-W in such a manner that the indexes using the old and new methodologies will be equal in the so-called link month—December 1984 for the CPI-W. This technical procedure has also been used in previous revisions of the CPI. In accordance with historical practice, BLS will make available to users, for a 6-month overlap period after the change in the official indexes, calculations based on the current treatment of homeownership. In the case of the CPI-W, the overlap period will run from January to June 1985.

Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics

publishes seasonally adjusted as well as unadjusted changes each month.

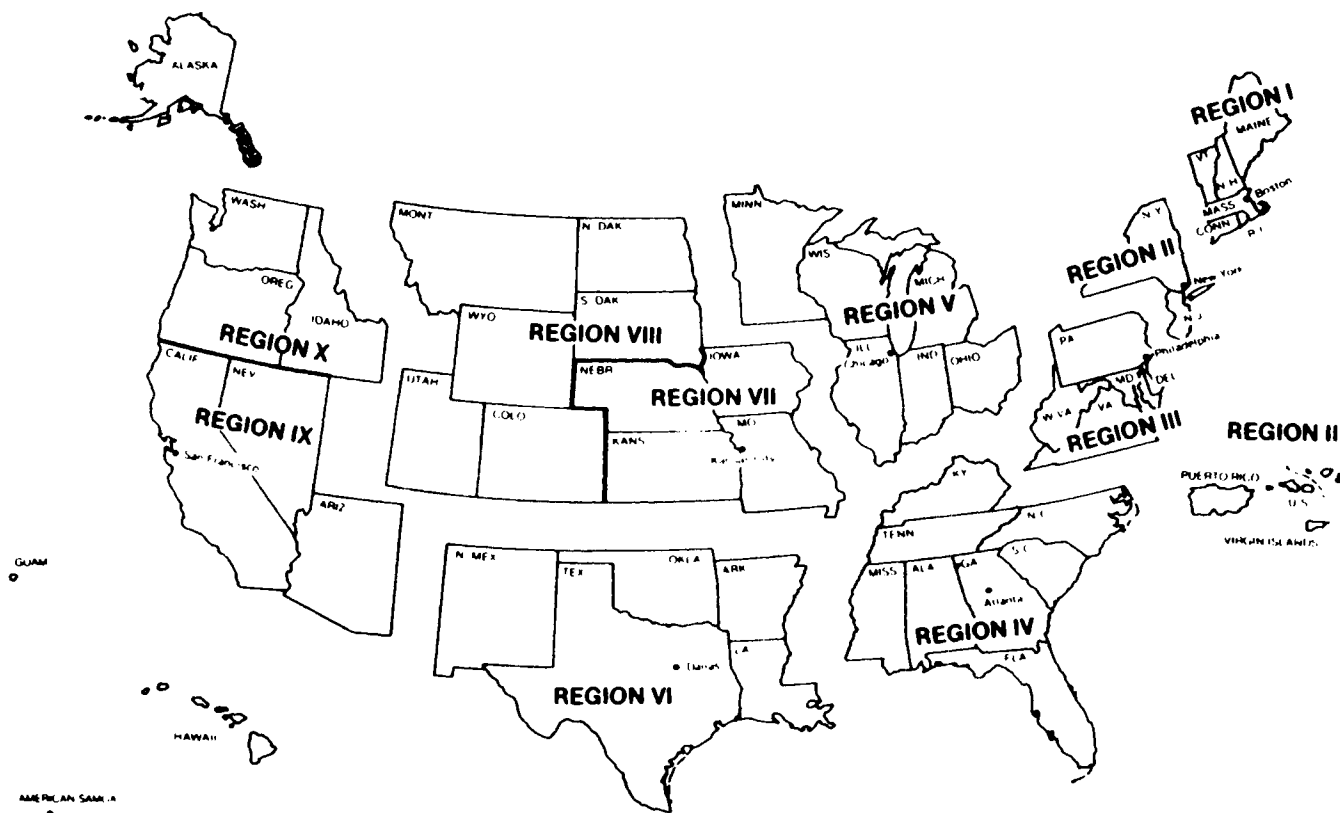

For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used in computing the seasonally adjusted indexes are derived by the X-11-ARIMA Seasonal Adjustment Method. The updated seasonal data at the end of 1977 replaced data from 1967 through 1977. Subsequent annual updates have replaced 5 years of seasonal data, e.g., data from 1979 through 1983 were replaced at the end of 1983. The seasonal movement of all items and 44 other aggregations is derived by combining the seasonal movement of 51 selected components. Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. If any of the 51 components change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used for the last five years, but the seasonally adjusted indexes will be used before that period. If any of the 51 components change their status from not seasonally adjusted to seasonally adjusted, seasonally adjusted data will be used for the last five years, but not seasonally adjusted indexes will be used before that period.
