**U.S. DEPARTMENT OF LABOR**  
Raymond J. Donovan, *Secretary*

**BUREAU OF LABOR STATISTICS**  
Janet L. Norwood, *Commissioner*

**OFFICE OF PRICES AND LIVING CONDITIONS**  
Kenneth V. Dalton, *Associate Commissioner*

The CPI Detailed Report is a monthly report on consumer price movements, including statistical tables and technical notes. The report covers two indexes, the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W). The indexes reflect data for the U.S. city average and selected areas.

This publication may be ordered from the Superintendent of Documents, U.S. Government Printing Office, Washington D.C. 20402. Subscription price per year \$28 domestic and \$35 foreign. Single copy domestic, \$5; foreign, \$6.25. Send correspondence on circulation and subscription matters (including address changes) to the Superintendent of Documents.

**CPI MAILGRAM** provides selected U.S. City Average data for CPI-U and CPI-W within 24 hours of release. Order from: National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161. Subscription rates: \$125 in contiguous U.S. and Hawaii; \$135 in Alaska and Canada.

Material in this publication is in the public domain and may be reproduced without permission of the Federal Government. Please credit the Bureau of Labor Statistics. Second-class postage paid at Laurel, Md.

# Price Movements

## October 1983

The Consumer Price Index for All Urban Consumers (CPI-U) increased 0.3 percent before seasonal adjustment in October. The October level of 302.6 (1967=100) was 2.9 percent higher than the index in October 1982.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) rose 0.2 percent in October, prior to seasonal adjustment, to a level of 301.3 (1967=100). For the 12-month period ended in October, the CPI-W has increased 2.6 percent. The CPI-W is used for indexing Social Security and some other Federal payments. It is also commonly used as an escalator in collective bargaining agreements.

### CPI for All Urban Consumers (CPI-U)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI for All Urban Consumers rose 0.4 percent in October, about the same as the average monthly increase during the preceding 6-month period. The transportation component, which advanced less than in September, accounted for about one-third of the overall increase in the October CPI. The continued advance in prices for motor vehicles was only partially offset by the decline in gasoline prices. Energy prices also contributed to the smaller increase for the housing component. On the other hand, the entertainment and other goods and services components posted larger increases than in September. The food, medical care, and apparel and upkeep indexes

registered about the same change in October as in the preceding month.

The transportation component advanced 0.6 percent in October, following increases of 1.0 and 0.8 percent in the 2 preceding months. New and used car prices rose 0.7 and 2.1 percent, respectively, and accounted for over four-fifths of the transportation increase. The higher-priced 1984 model new cars are being purchased (and therefore included in the CPI) at a faster rate relative to last year's models than has been the case in recent years. (For a report on quality change for 1984 cars, see news release USDL 83-488, dated November 10, 1983.) Used car prices have risen sharply in each of the last 6 months, increasing at an annual rate of over 20 percent. Among other automotive expenses, the cost of automobile insurance rose 1.8 percent while automobile finance charges increased 0.5 percent. Finance charges have increased 3.6 percent over the past 3 months after declining 21.6 percent in the 12 months ended in July. The index for public transportation rose 0.4 percent, largely due to increases in airline fares and intercity bus fares. In contrast, gasoline prices registered their first decline in 7 months—down 0.4 percent in October. Despite the sharp advances from April through September—increasing at an annual rate of 23.8 percent—gasoline prices in October were 8.4 percent below their peak level of March 1981.

The food and beverage component advanced 0.5 percent in October, following an increase of 0.4 percent

in September. A sharp increase in prices for fresh fruits and vegetables accounted for over one-half of the 0.4 percent increase in the grocery store food index in October. Fresh vegetable prices, in particular, rose sharply—up 4.3 percent—reflecting supply shortages related to adverse weather and decreased acreage. The index for meats, poultry, fish, and eggs rose slightly, recording its first increase since May, largely because of a 5.7 percent jump in egg prices. Pork and poultry prices declined, while the index for beef and veal, following seasonal adjustment, registered its first increase since April. The other foods at home category increased 0.5 percent, as prices for fats and oils and non-alcoholic beverages rose sharply. Prices for cereal and bakery products advanced slightly while the index for dairy products was unchanged for the second consecutive month. The other two components of the food and beverage index—restaurant meals and alcoholic beverages—increased 0.6 and 0.2 percent, respectively.

The housing component rose 0.2 percent in October, following an increase of 0.5 percent in September. The index for fuel and utilities, which had increased 0.7 percent in September, declined slightly in October. Declines in charges for natural gas and telephone services more than offset increases in prices for other fuels and water and sewerage services. Natural gas prices declined at an annual rate of 4.6 percent in the 5 months ended in October. The index had risen at a 22.5 percent annual rate between August 1981 and May 1983. Shelter costs rose 0.4 percent, with both renters' and homeowners' costs up 0.4 percent. The index for maintenance and repairs, which pertains to both renters and homeowners, increased substantially—up 1.3 percent. The index for household furnishings and operations rose 0.2 percent in October, the same as in September.

The medical care component rose 0.4 percent in October, continuing the more moderate rate evident since

March. The index for medical care commodities, which includes prescription drugs and non-prescription drugs and medical supplies, increased 0.8 percent. The cost of medical care services advanced 0.3 percent. Charges for professional services and hospital rooms rose 0.6 and 0.5 percent, respectively.

The index for apparel and upkeep was unchanged for the second consecutive month in October. A small decline in clothing prices, following seasonal adjustment, offset a 0.4 percent increase in laundry and dry cleaning costs.

The entertainment and other goods and services components both increased 0.7 percent in October. Within the entertainment index, the cost of reading materials advanced 1.4 percent. Higher tuition costs were largely responsible for the increase in the other goods and services component.

#### **CPI for Urban Wage Earners and Clerical Workers (CPI-W)—seasonally adjusted changes**

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers rose 0.4 percent in October, the same as in September. The acceleration in the indexes for food and beverages, entertainment, and other goods and services was offset by smaller increases in three other major categories of consumer spending.

The 0.4 percent rise in the CPI-W was the same as in the CPI-U. In the CPI-U, the homeowners' cost index — which uses a rental equivalence approach — rose 0.4 percent in October. Homeownership in the CPI-W, which is based on house prices, mortgage interest rates, property taxes, property insurance, and maintenance and repair costs, was unchanged in October. Increases in mortgage interest rates, property insurance, property taxes, and maintenance and repair costs were offset by a decline in house prices.

<sup>1</sup> Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

<sup>2</sup> Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colc. which does not include Douglas County. Definitions do not include revisions made since 1973.

<sup>3</sup> Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.

A-2 - 1,250,000 to 4,000,000.

B - 385,000 to 1,250,000.

C - 75,000 to 385,000.

D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

Northeast/D .....	-.1	.1	-1.0	-.2	-1.3	1.6
North Central/D .....	-.3	1.3	-1.2	-.3	-1.3	.3
South/D .....	.1	1.1	-.2	.8	-2.2	.8
West/D .....	.9	2.0	-.4	.3	2.8	.8

<sup>1</sup> Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

<sup>2</sup> Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

<sup>3</sup> Regions are defined as the four Census regions. The population size classes are aggregations of areas which have urban population as defined:  
A-1 - More than 4,000,000.  
A-2 - 1,250,000 to 4,000,000.  
B - 385,000 to 1,250,000.  
C - 75,000 to 385,000.  
D - Less than 75,000.  
Population size class A is the aggregation of population size classes A-1 and A-2.

<sup>1</sup> Areas on pricing schedule 1 (See table 13) will appear next month.

<sup>2</sup> For the following areas the 1957-59=100 base is not available; indexes are on the bases listed below:

Buffalo, N. Y. .... November 1963=100.

Dallas-Fort Worth, Tex. .... November 1963=100.

Honolulu, Hawaii. .... December 1963=100.

<sup>3</sup> Indexes on a December 1982=100 base.

<sup>4</sup> Indexes on a June 1978=100 base, except in Buffalo, N.Y. where 1967=100.

<sup>5</sup> Indexes are on the bases listed below:

Atlanta, Ga. .... December 1977=100.

Buffalo, N. Y. .... February 1978=100.

Cleveland, Ohio. .... February 1978=100.

Dallas-Fort Worth, Tex. .... February 1978=100.

Honolulu, Hawaii. .... December 1977=100.

Houston, Tex. .... April 1978=100.

Kansas City, Mo.-Kans. .... December 1977=100.

Minneapolis-St. Paul, Minn.-Wis. .... April 1978=100.

Pittsburgh, Pa. .... April 1978=100.

San Francisco-Oakland, Calif. .... December 1977=100.

<sup>6</sup> Indexes on a June 1978=100 base.

<sup>7</sup> Excludes motor oil, coolant, and other products as of January 1983.

<sup>8</sup> Indexes on a June 1978=100 base, except in Minneapolis-St. Paul, Minn.-Wis. where 1967=100.

<sup>1</sup> Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

<sup>2</sup> Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

<sup>3</sup> Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.

A-2 - 1,250,000 to 4,000,000.

B - 385,000 to 1,250,000.

C - 75,000 to 385,000.

D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar.

Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

<sup>1</sup> Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

<sup>2</sup> Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

<sup>3</sup> Regions are defined as the four Census regions. The population size classes are aggregations of areas which have urban population as defined:  
A-1 - More than 4,000,000.  
A-2 - 1,250,000 to 4,000,000.  
B - 385,000 to 1,250,000.  
C - 75,000 to 385,000.  
D - Less than 75,000.  
Population size class A is the aggregation of population size classes A-1 and A-2.

<sup>1</sup> Areas on pricing schedule 1 (See table 18) will appear next month.

<sup>2</sup> For the following areas the 1957-59=100 base is not available; indexes are on the bases listed below:

Buffalo, N. Y. .... November 1963=100.  
Dallas-Fort Worth, Tex. .... November 1963=100.  
Honolulu, Hawaii. .... December 1963=100.

<sup>3</sup> Indexes on a January 1981=100 base.

<sup>4</sup> Indexes on a June 1978=100 base, except in Buffalo, N.Y. where 1967=100.

<sup>5</sup> Indexes are on the bases listed below:

Atlanta, Ga. .... December 1977=100.  
Buffalo, N. Y. .... February 1978=100.

Cleveland, Ohio. .... February 1978=100.

Dallas-Fort Worth, Tex. .... February 1978=100.

Honolulu, Hawaii. .... December 1977=100.

Houston, Tex. .... April 1978=100.

Kansas City, Mo.-Kans. .... December 1977=100.

Minneapolis-St. Paul, Minn.-Wis. .... April 1978=100.

Pittsburgh, Pa. .... April 1978=100.

San Francisco-Oakland, Calif. .... December 1977=100.

<sup>6</sup> Indexes on a June 1978=100 base.

<sup>7</sup> Excludes motor oil, coolant, and other products as of January 1983.

<sup>8</sup> Indexes on a June 1978=100 base, except in Minneapolis-St. Paul, Minn.-Wis. where 1967=100.

<sup>1</sup> Regions are defined as the four Census regions.  
The population size classes are aggregations of areas which have urban population as defined:  
A-1 - More than 4,000,000.  
A-2 - 1,250,000 to 4,000,000.  
B - 385,000 to 1,250,000.  
C - 75,000 to 385,000.  
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

<sup>2</sup> Indexes on a December 1982=100 base.

<sup>3</sup> Indexes on a June 1978=100 base.

<sup>4</sup> New series; includes direct pricing of new trucks and motorcycles as of September 1982.

<sup>5</sup> Excludes motor oil, coolant, and other products as of January 1983.

<sup>1</sup> The population size classes are aggregations of areas which have urban population as defined:

- A-1 - More than 4,000,000.
- A-2 - 1,250,000 to 4,000,000.
- B - 385,000 to 1,250,000.
- C - 75,000 to 385,000.
- D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

<sup>2</sup> Indexes on a December 1982 = 100 base.

<sup>3</sup> Indexes on a June 1978 = 100 base.

<sup>4</sup> New series; includes direct pricing of new trucks and motorcycles as of September 1982.

<sup>5</sup> Excludes motor oil, coolant, and other products as of January 1983.

<sup>1</sup> Regions are defined as the four Census regions.  
The population size classes are aggregations of areas which have urban population as defined:  
A-1 - More than 4,000,000.  
A-2 - 1,250,000 to 4,000,000.  
B - 385,000 to 1,250,000.  
C - 75,000 to 385,000.  
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.  
<sup>2</sup> Indexes on a December 1982 = 100 base.  
<sup>3</sup> Indexes on a June 1978 = 100 base.  
<sup>4</sup> Excludes motor oil, coolant, and other products as of January 1983.  
<sup>NA</sup> Data not adequate for publication.

<sup>1</sup> Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

- A-1 - More than 4,000,000.
- A-2 - 1,250,000 to 4,000,000.
- B - 385,000 to 1,250,000.
- C - 75,000 to 385,000.
- D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

<sup>2</sup> January 1981 = 100.

<sup>3</sup> Indexes on a June 1978 = 100 base.

<sup>4</sup> New series; includes direct pricing of new trucks and motorcycles as of September 1982.

<sup>5</sup> Excludes motor oil, coolant, and other products as of January 1983.

<sup>1</sup> Regions are defined as the four Census regions.  
The population size classes are aggregations of areas which have urban population as defined:  
A-1 - More than 4,000,000.  
A-2 - 1,250,000 to 4,000,000.  
B - 385,000 to 1,250,000.  
C - 75,000 to 385,000.  
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.  
<sup>2</sup> January 1981 = 100.  
<sup>3</sup> Indexes on a June 1978 = 100 base.  
<sup>4</sup> Excludes motor oil, coolant, and other products as of January 1983.  
<sup>NA</sup> Data not adequate for publication.

# Technical Notes

## Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. Effective with the January 1978 index, the Bureau of Labor Statistics began publishing CPI's for two population groups: (1) a new CPI for All Urban Consumers (CPI-U) which covers approximately 80 percent of the total noninstitutional civilian population; and (2) a revised CPI for Urban Wage Earners and Clerical Workers (CPI-W) which represents about half the population covered by the CPI-U. The CPI-U includes, in addition to wage earners and clerical workers, groups which historically have been excluded from CPI coverage, such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Prices are collected in 85 urban areas across the country from about 18,000 tenants, 18,000 housing units for property taxes, and about 24,000 establishments—grocery and department stores, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of food, fuels, and a few other items are obtained every month in all 85 locations. Prices of most other commodities and services are collected every month in the five largest geographic areas and every other month in other areas. Prices of most goods and services are obtained by personal visits of the Bureau's trained representatives. Mail questionnaires are used to obtain public utility rates, some fuel prices, and certain other items.

In calculating the index, price changes for the various items in each location are averaged together with weights which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 28 local areas. Area indexes do not measure differences in the level of prices among cities; they only measure the average change in prices for each area since the base period.

The index measures price changes from a designated reference date—1967—which equals 100.0. An increase of 122 percent, for example, is shown as 222.0. This change can also be expressed in dollars as follows: The price of a base period "market basket" of goods and services in the CPI has risen from \$10 in 1967 to \$22.20.

For further details see the following: *The Consumer Price Index: Concepts and Content Over the Years*, Report 517, revised edition (Bureau of Labor Statistics, May 1978); *The Revision of the Consumer Price Index*, by W. John Layng, reprinted from the *Statistical Reporter*, February 1978, No. 78-5 (U.S. Dept. of Commerce), *Revisions in the Medical Care Service Component of the Consumer Price Index*, by Daniel H. Ginsburg, *Monthly Labor Review*, August 1978; and *CPI Issues*, Report 593, (Bureau of Labor Statistics, February 1980).

## Calculating Index Changes

Movements of the indexes from one month to another are usually expressed as percent changes rather than changes in index points because index point changes are affected by the level of the index in relation to its base period while percent changes are not. The example in the accompanying box illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

Index Point Change	
CPI	236.4
Less previous index	233.2
Equals index point change:	3.2
Percent Change	
Index point difference	3.2
Divided by the previous index	233.2
Equals:	0.014
Results multiplied by one hundred	0.014x100
Equals percent change:	1.4

## Homeownership Changes

Effective with release of the index for January 1983, the Bureau of Labor Statistics changed the way homeowner costs are measured in the CPI-U to rental equivalence. The rental equivalence approach calculates homeowner costs of the shelter based on the implicit rent owners would have to pay to rent the homes they own. The old method calculated homeowner costs as home purchase, mortgage interest costs, property taxes, property insurance, and maintenance and repair.

As previously announced, the CPI-W will be changed to rental equivalence effective with data for January 1985. The CPI experimental measures, known as the CPI-U, X-1 through CPI-U, X-5 are no longer being published.

The new homeowners' cost component was introduced into the CPI-U in such a manner that the indexes using the old and new methodologies were equal in the so-called link month—December 1982. A similar technique will be employed for the CPI-W in December 1984. This technical procedure has been used in previous revisions of the CPI. In accordance with historic practice, the BLS made available calculations for the CPI-U from January to June 1983 based on the old method of homeownership. A 6-month overlap period for the CPI-W will also be made available to users; it will run from January to June 1985. For further details, see: Changing the Homeownership Components of the Consumer Price Index to Rental Equivalence, *CPI Detailed Report*, January 1983.

## Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publish-

es seasonally adjusted as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year - such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

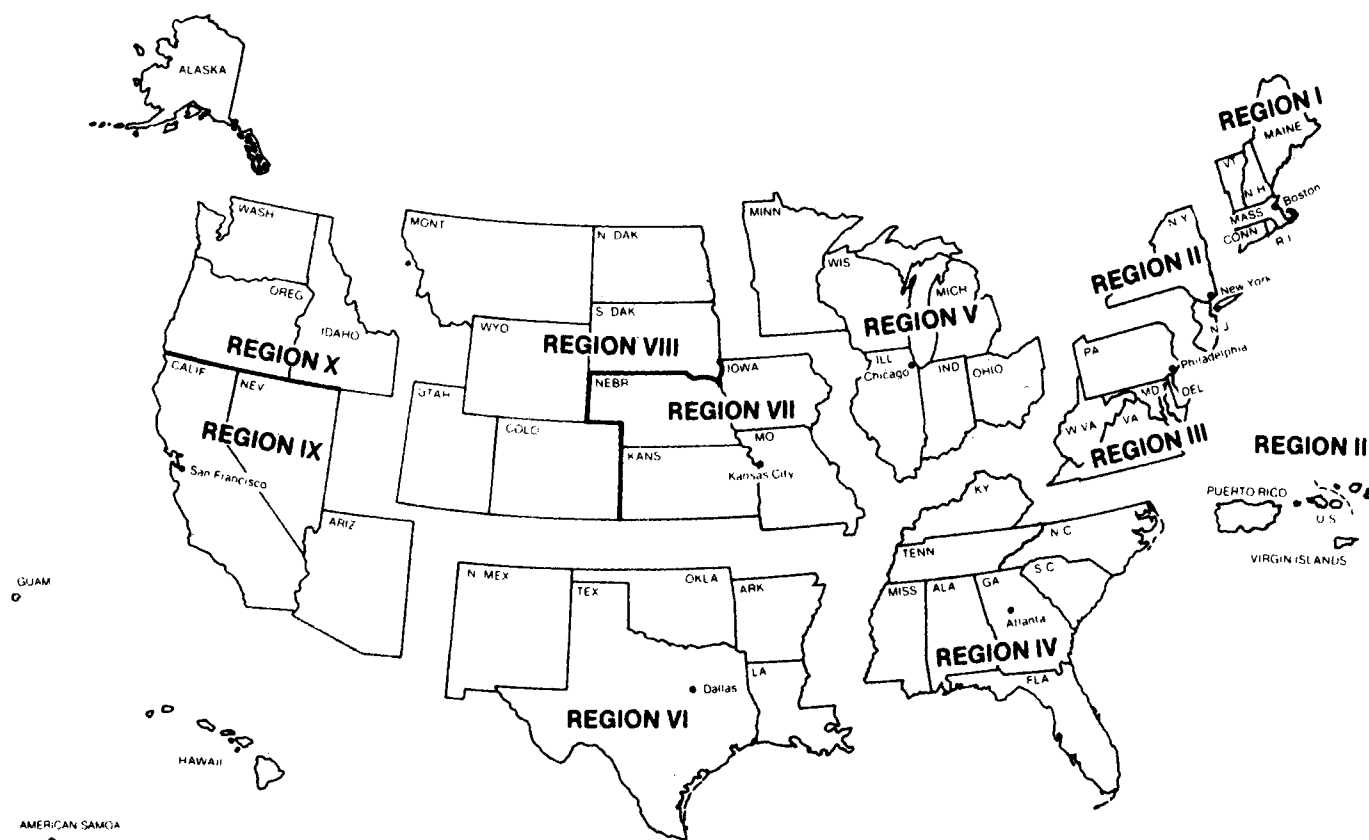

The unadjusted data are of primary interest to consumers about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used in computing the seasonally adjusted indexes are derived by the X-11 Variant of the Census Method II Seasonal Adjustment Program. The updated seasonal data at the end of the 1977 replaced data from 1967 through 1977. Subsequent annual updates have replaced 5 years of seasonal data, e.g., data from 1978 through 1982 were replaced at the end of 1982. The seasonal movement of all items and 43 other aggregations is derived by combining the seasonal movement of 50 selected components. Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. If any of the 50 selected components changes its seasonal status, seasonal data from 1967 forward for the all items and for any of the 43 other aggregations that have that series as a component are replaced.
