Janet L. Norwood, *Commissioner*

OFFICE OF PRICES AND LIVING CONDITIONS
Kenneth V. Dalton, Associate Commissioner

The CPI Detailed Report is a monthly report on consumer price movements, including statistical tables and technical notes. The report covers two indexes, the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W). The indexes reflect data for the U.S. city average and selected areas.

This publication may be ordered from the Superintendent of Documents, U.S. Government Printing Office, Washington D.C. 20402. Subscription price per year \$28 domestic, and \$35 foreign. Single copy domestic, \$5; foreign, \$6.25. Send correspondence on circulation and subscription matters (including addresses changes) to the Superintendent of Documents.

CPI MAILGRAM provides selected U.S. City Average data for CPI-U and CPI-W within 24 hours of release. Order from: National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161. Subscription rates: \$125 in contiguous U.S. and Hawaii; \$135 in Alaska and Canada.

Material in this publication is in the public domain and may be reproduced without permission of the Federal Government. Please credit the Bureau of Labor Statistics. Second-class postage paid at Laurel, Md.

Price Movements

December 1983

The Consumer Price Index for All Urban Consumers (CPI-U) increased 0.1 percent before seasonal adjustment in December, to a level of 303.5 (1967=100). For the 12-month period ended in December, the CPI-U has increased 3.8 percent.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) was virtually unchanged in December, prior to seasonal adjustment. The December level of 301.5 (1967=100) was 3.3 percent higher than the index in December 1982. The CPI-W is used for indexing Social Security and some other Federal payments. It is also commonly used as an escalator in collective bargaining agreements.

CPI for All Urban Consumers (CPI-U)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI for All Urban Consumers advanced 0.3 percent in December, the same as in November and also the same as the average monthly rate of advance recorded during both 1982 and 1983.

The 3.8 percent advance in the CPI-U for the 12 month period ended December 1983 compares with a 3.9 rise in 1982 and was the smallest calendar year increase (December-to-December) since the 3.4 percent in 1972. Although the overall increase in 1983 was virtually the same as in 1982, the major components be-

haved somewhat differently. On average, energy prices declined slightly during 1983, following a small rise in 1982. Prices rose more slowly in 1983 than in 1982 for medical care, entertainment, and other goods and services. Food prices rose only slightly less in 1983. On the other hand, prices for new and used cars and apparel were up more in 1983.

The housing component advanced 0.2 percent in December, after increasing 0.5 percent in November. The index for fuels and utilities, which rose 0.8 percent in November, was unchanged in December and was largely responsible for the slowdown. Declines in prices for fuel oil, electricity, and telephone services offset small increases in the indexes for natural gas and water and sewer maintenance. Shelter costs rose 0.3 percent, with renters' costs up 0.3 percent, homeowners' costs up 0.2 percent, and maintenance and repair costs up 0.4 percent. The index for household furnishings and operations rose 0.5 percent, its largest increase in 8 months.

The food and beverage component rose 0.3 percent in December, following an increase of 0.1 percent in November. Grocery store food prices, which declined slightly in November, advanced 0.5 percent in December due largely to the turnaround in the indexes for meats, poultry, fish, and eggs and fruits and vegetables. Prices increased sharply for poultry and eggs. During the 12 months ended in December, poultry and egg

prices increased 10.2 and 35.7 percent, respectively. On the other hand, prices for pork and beef were both lower than a year ago. Although both fresh fruit and fresh vegetable prices rose sharply in December, the two series showed substantially different behavior over the past 12 months; fresh vegetable prices rose 16.9 percent, while fresh fruit prices declined 1.3 percent. In December, other major grocery store food groups registered about the same changes as in the preceding month. Prices for restaurant meals rose 0.2 percent, while prices for alcoholic beverages declined slightly in December.

The 0.3 percent rise in the transportation component follows a 0.2 percent increase in November. Motor fuel prices, which had declined 0.8 percent in November, increased slightly in December, following seasonal adjustment. Despite the 5 cents a gallon federal excise tax increase imposed in April, gasoline prices registered a 1.6 percent decrease during 1983 and were 9.1 percent below their peak level of March 1981. The new and used car indexes rose 0.1 and 0.6 percent, respectively, in December, about the same as in November. During 1983, new car prices rose 3.4 percent while used car prices went up 14.4 percent. The cost of automobile insurance rose 0.7 percent in December and automobile finance charges increased 0.6 percent. Finance charges, however, were down 7.9 percent during the past 12 months. The index for public transportation dropped 0.4 percent in December, as a decline in airline fares and intercity bus fares more than offset increases in train and taxi fares.

The medical care component rose 0.5 percent in December, continuing the more moderate trend evident since March. The 6.4 percent advance in 1983 follows increases of 10 percent or more in each of the preceding 4 years. In December, the index for medical care

commodities, which includes prescription drugs and nonprescription drugs and medical supplies, increased 0.4 percent. Charges for professional medical services also rose 0.4 percent, while the cost of hospital rooms advanced 0.8 percent.

The apparel and upkeep index declined 0.1 percent in December and now stands 2.9 percent above December 1982. The index for entertainment rose 0.1 percent in December, following an increase of 0.3 percent in November. Declines in the cost of reading materials and photographic supplies and a smaller increase in entertainment services were responsible for the slowdown. The 0.6 percent rise in the other goods and services component for December was about the same as in October and November.

Workers (CPI-W)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers rose 0.2 percent in December, following an increase of 0.1 percent in November. The 0.2 percent rise in the CPI-W compares with an increase of 0.3 percent in the CPI-U. In the CPI-U, the homeowners' cost index—which uses a rental equivalence approach—rose 0.2 percent in December. Homeownership in the CPI-W, which is based on house prices, mortgage interest rates, property taxes, property insurance, and maintenance and repair costs, declined 0.2 percent in December. Declines in house prices and property insurance more than offset increases in property taxes and maintenance and repair costs. Mortgage interest rates were essentially unchanged. For the 12 months ended in December, the homeownership component in the CPI-W rose 1.9 percent, compared with a 4.5 percent rise in homeowners' costs in the CPI-U.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas.

Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

³ Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.

A-2 - 1,250,000 to 4,000,000.

B - 385,000 to 1,250,000.

C - 75,000 to 385,000.

D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

West/D	-.3	-.7	-1.2	-.9	2.3	-.1

¹ Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

² Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

³ Regions are defined as the four Census regions. The population size classes are aggregations of areas which have urban population as defined:

- A-1 - More than 4,000,000.
- A-2 - 1,250,000 to 4,000,000.
- B - 385,000 to 1,250,000.
- C - 75,000 to 385,000.
- D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

West/D	2	12/77	-	162.2	-	161.6	2.3	-4	-	-	-	-

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

³ Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.

A-2 - 1,250,000 to 4,000,000.

B - 385,000 to 1,250,000.

C - 75,000 to 385,000.

D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

¹ Areas on pricing schedule 1 (See table 18) will appear next month.

² For the following areas the 1957-59=100 base is not available; indexes are on the bases listed below:

Buffalo, N. Y.....November 1963=100.
Dallas-Fort Worth, Tex.....November 1963=100.
Honolulu, Hawaii.....December 1963=100.

³ Indexes on a January 1981=100 base.

⁴ Indexes on a June 1978=100 base, except in Buffalo, N.Y. where 1967=100.

⁵ Indexes are on the bases listed below:

Atlanta, Ga.....December 1977=100.
Buffalo, N. Y.....February 1978=100.

Cleveland, Ohio.....February 1978=100.

Dallas-Fort Worth, Tex.....February 1978=100.

Honolulu, Hawaii.....December 1977=100.

Houston, Tex.....April 1978=100.

Kansas City, Mo.-Kans.....December 1977=100.

Minneapolis-St. Paul, Minn.-Wis.....April 1978=100.

Pittsburgh, Pa.....April 1978=100.

San Francisco-Oakland, Calif.....December 1977=100.

⁶ Indexes on a June 1978=100 base.

⁷ Excludes motor oil, coolant, and other products as of January 1983.

⁸ Indexes on a June 1978=100 base, except in Minneapolis-St. Paul, Minn.-Wis. where 1967=100.

¹ Regions are defined as the four Census regions.
The population size classes are aggregations of areas which have urban population as defined:
A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

² Indexes on a December 1982 = 100 base.

³ Indexes on a June 1978 = 100 base.

⁴ New series; includes direct pricing of new trucks and motorcycles as of September 1982.

⁵ Excludes motor oil, coolant, and other products as of January 1983.

¹ The population size classes are aggregations of areas which have urban population as defined:

- A-1 - More than 4,000,000.
- A-2 - 1,250,000 to 4,000,000.
- B - 385,000 to 1,250,000.
- C - 75,000 to 385,000.
- D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

² Indexes on a December 1982=100 base.

³ Indexes on a June 1978=100 base.

⁴ New series; includes direct pricing of new trucks and motorcycles as of September 1982.

⁵ Excludes motor oil, coolant, and other products as of January 1983.

¹ Regions are defined as the four Census regions.
The population size classes are aggregations of areas which have urban population as defined:
A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

² Indexes on a December 1982 = 100 base.

³ Indexes on a June 1978 = 100 base.

⁴ Excludes motor oil, coolant, and other products as of January 1983.

^{NA} Data not adequate for publication.

¹ Regions are defined as the four Census regions.
The population size classes are aggregations of areas which have urban population as defined:
A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.
² January 1981 = 100.
³ Indexes on a June 1978 = 100 base.
⁴ New series; includes direct pricing of new trucks and motorcycles as of September 1982.
⁵ Excludes motor oil, coolant, and other products as of January 1983.

¹ Regions are defined as the four Census regions.
The population size classes are aggregations of areas which have urban population as defined:
A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

² January 1981 = 100.

³ Indexes on a June 1978 = 100 base.

⁴ Excludes motor oil, coolant, and other products as of January 1983.

^{NA} Data not adequate for publication.

Technical Notes

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. Effective with the January 1978 index, the Bureau of Labor Statistics began publishing CPI's for two population groups: (1) a new CPI for All Urban Consumers (CPI-U) which covers approximately 80 percent of the total noninstitutional civilian population; and (2) a revised CPI for Urban Wage Earners and Clerical Workers (CPI-W) which represents about half the population covered by the CPI-U. The CPI-U includes, in addition to wage earners and clerical workers, groups which historically have been excluded from CPI coverage, such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Prices are collected in 85 urban areas across the country from about 18,000 tenants, 18,000 housing units for property taxes, and about 24,000 establishments—grocery and department stores, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of food, fuels, and a few other items are obtained every month in all 85 locations. Prices of most other commodities and services are collected every month in the five largest geographic areas and every other month in other areas. Prices of most goods and services are obtained by personal visits of the Bureau's trained representatives. Mail questionnaires are used to obtain public utility rates, some fuel prices, and certain other items.

In calculating the index, price changes for the various items in each location are averaged together with weights which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 28 local areas. Area in-

dexes do not measure differences in the level of prices among cities; they only measure the average change in prices for each area since the base period.

The index measures price changes from a designated reference date—1967—which equals 100.0. An increase of 122 percent, for example, is shown as 222.0. This change can also be expressed in dollars as follows: The price of a base period "market basket" of goods and services in the CPI has risen from \$10 in 1967 to \$22.20.

For further details see the following: *The Consumer Price Index: Concepts and Content Over the Years*, Report 517, revised edition (Bureau of Labor Statistics, May 1978); "The Revision of the Consumer Price Index," by W. John Layng, reprinted from the *Statistical Reporter*, February 1978, No. 78-5 (U.S. Dept. of Commerce), "Revisions in the Medical Care Service Component of the Consumer Price Index," by Daniel H. Ginsburg, *Monthly Labor Review*, August 1978; and *CPI Issues*, Report 593, (Bureau of Labor Statistics, February 1980).

Calculating Index Changes

Movements of the indexes from one month to another are usually expressed as percent changes rather than changes in index points because index point changes are affected by the level of the index in relation to its base period while percent changes are not. The example in the accompanying box illustrates the computation of index point and percent changes.

Index Point Change	
CPI	236.4
Less previous index	233.2
Equals index point change:	3.2
Percent Change	
Index point difference	3.2
Divided by the previous index	233.2
Equals:	0.014
Results multiplied by one hundred	0.014x100
Equals percent change:	1.4

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

Homeownership Changes

Effective with release of the index for January 1983, the Bureau of Labor Statistics changed the way homeowner costs are measured in the CPI-U to rental equivalence. The rental equivalence approach calculates homeowner costs of the shelter based on the implicit rent owners would have to pay to rent the homes they own. The old method calculated homeowner costs as home purchase, mortgage interest cost, property taxes, property insurance, and maintenance and repair.

As previously announced, the CPI-W will be changed to rental equivalence effective with data for January 1985. The CPI experimental measures, known as the CPI-U, X-1 through CPI-U, X-5 are no longer being published.

The new homeowners' cost component was introduced into the CPI-U in such a manner that the indexes using the old and new methodologies were equal in the so-called link month—December 1982. A similar technique will be employed for the CPI-W in December 1984. This technical procedure has been used in previous revisions of the CPI. In accordance with historical practice, the BLS made available calculations for the CPI-U from January to June 1983 based on the old method of homeownership. A 6-month overlap period for the CPI-W will also be made available to users; it will run from January to June 1985. For further details see "Changing the Homeownership Component of the Consumer Price Index to Rental Equivalence," *CPI Detailed Report*, January 1983.

Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month.

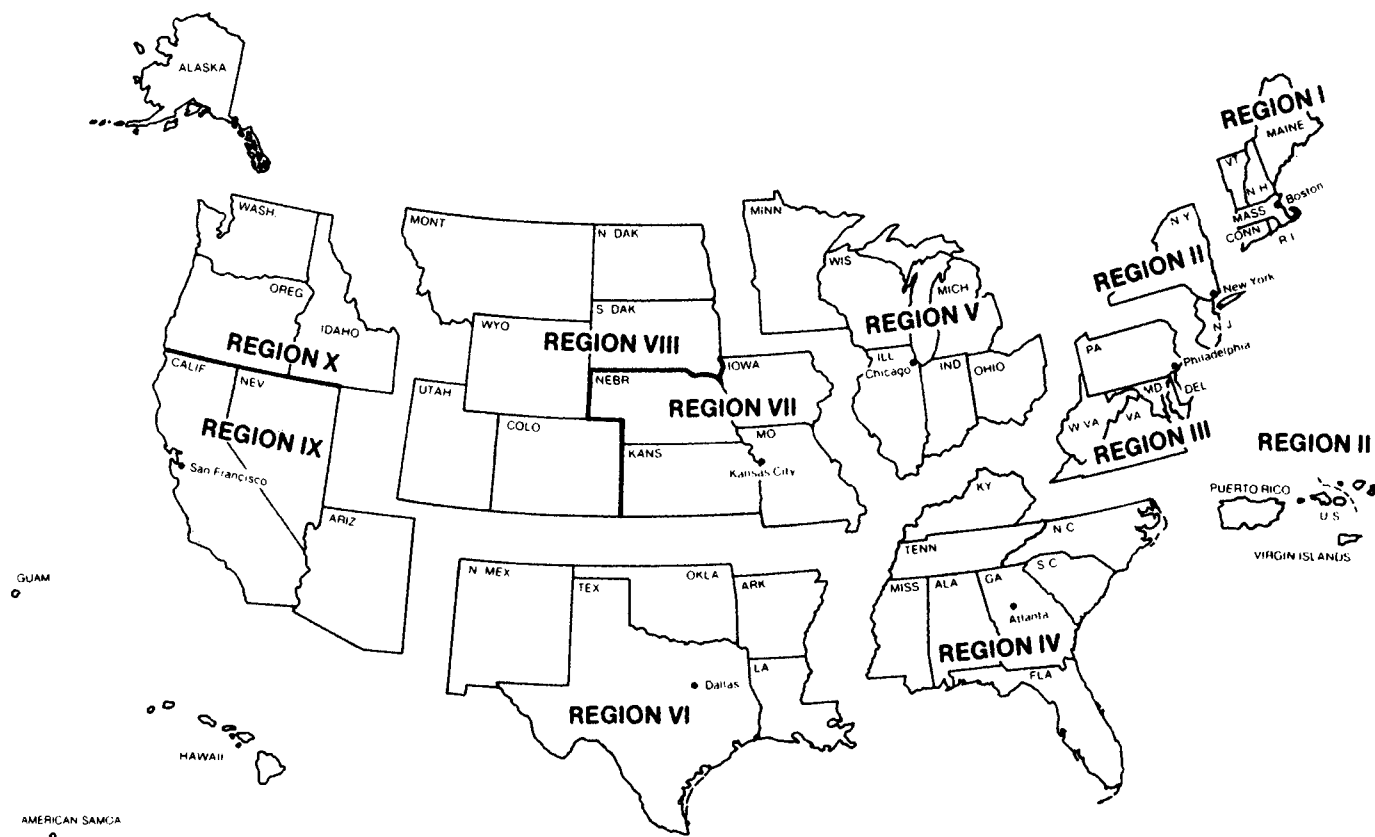

For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used in computing the seasonally adjusted indexes are derived by the X-11 Variant of the Census Method II Seasonal Adjustment Program. The updated seasonal data at the end of 1977 replaced data from 1967 through 1977. Subsequent annual updates have replaced 5 years of seasonal data, e.g., data from 1978 through 1982 were replaced at the end of 1982. The seasonal movement of all items and 43 other aggregations is derived by combining the seasonal movement of 50 selected components. Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. If any of the 50 selected components changes its seasonal status, seasonal data from 1967 forward for the all items and for any of the 43 other aggregations that have that series as a component are replaced.
