CHRISTIAN A. HERTER, Massachusetts
Fred E. Berquist, Acting Staff Director
John W. Lehman, Clerk
William H. Moore, Economist

## To the Members of Congress:

As has been stated in previous issues of Economic Indicators, from the time the Joint Committee on the Economic Report was established its members realized that one of its basic needs was a concise and meaningful picture of current economic trends and developments.

Fortunately, the Joint Committee finds that Economic Indicators, a set of basic charts and tables compiled monthly by the Council of Economic Advisers, admirably fills this need. While this material was prepared primarily for the use of the President, the Council and other officials in the executive offices, the Council has made it available to the Joint Committee.

Other Members of Congress have also expressed an interest in being able to obtain a quick picture of current economic facts without having to go through voluminous and specialized documents. In addition, businessmen, farm leaders, labor organizations, and repre:entatives of the press and radio have indicated their
desire for this information. Since nothing contained in these charts and tables is of a confidential nature they have urged that the material be made available to the general public.

Accordingly, the Joint Committee has, since last July, provided the Congress and the public with a limited number of copies of Economic Indicators as a Committee print pending final action on authorizing the publicadion on a more permanent basis. Since such legislation is still under consideration, the Committee is continuing to issue the report on a monthly basis.

Comments or suggestions with respect to possible improvements in this presentation will always be welcome.

## Letter of Transmittal

Hon. Joseph C. O'Mahoney, Chairman, Joint Committee on the Economic Report, United States Congress, Washington, D. C.

Dear Senator: The Council of Economic Advisers is happy to cooperate with the Joint Committee on the Economic Report in your plans to make Economic Indicators available to the Congress as a whole and to the general public.

In carrying out its mandate under the Employment Act of 1946, the Council has found it desirable to bring together in concise and graphic form the most important facts showing current trends in the Nation's economy. Thus the Executive Office is in a better position to point up the key problems of national economic policy and to promote the improvement and coordination of the Federal Government's widespread statistical services.

We have realized, of course, that this material has a potential usefulness not only to the President, the Council and the executive departments, but also to the Congress. Furthermore, its usefulness to the general public has been impressed upon us, particularly by the representatives of business, labor, agriculture, and consumer organizations with whom we regularly consult.

We believe the Joint Committee will perform a service of real value by giving wide circulation to this material.

Sincerely yours,

## THE NATION'S ECONOMIC BUDGET

## THE NATION'S ECONOMIC BUDGET

A general decline in economic activity during the ist quarter resulted in about a $3 \%$ decline in gross national product from the level of the 4 th quarter of 1948 , according to revised estimates. All major components of business investment declined significantly.

1949, Ist Quarter (BILLIONS of DOLLARS) Is
TOTAL (Gross Nationd Product)

## CONSUMERS' PRICES

Consumers' prices rose slightly in April as food prices increased seasonally and rents continued to advance. Prices of apparel and housefurnishings continued to decline.

- also incluoes mousefurnishings, fuel, electricity, refrigeration, ano miscellaneous gugos ano services, nut shown on chart SCURCE: DEPARTMENT OF LABOR.

## PRODUCTION OF SELECTED DURABLE MANUFACTURES

The Aprii output of oll mojor durable goods industries except automobiles was below their Morch levels. The sharpest drops occurred in iron and steel and machinery.

## PRODUCTION OF SELECTED NONDURABLE MANUFACTURES

Production of textiles again declined about 10 percent in April; chemicals also declined again. These declines were in part seasonal influences, which have not been included in the present adjustment factor.

## EXPENDITURES FOR NEW PLANT AND EQUIPMENT

SEC-Commerce survey made in January shows that nonagricultural business expenditures for plant and equipment in 2nd quarter of 1949 are expected to be slightly lower than in same quarter of 1948. It also shows that substantial declines in all fields except electric and gas utilities and mining are anticipated in 2 nd half of this year.

## MONEY, BANKING, AND FEDERAL FINANCE

## BANK LOANS AND INVESTMENTS

After a slight contraction during the first quarter of the year, bank loans fell sharply in April. The decline of $\mathscr{W} \mid$ billion was almost entirely in loans of city banks to business concerns.

[Billions of dollars]

| End of period |  | Total loans and investments | Bank loans | Investments |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
