[Public Law 120--81st Congress; Chapter 237-1st Session]
JOINT RESOLUTION [S. J. Res. 55]
To print the monthly publication entitled "Economic Indicators"
Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Joint Committee on the Economic Report be authorized to issue a monthly publication entitled "Economic Indicators," and that a sufficient quantity be printed to furnish one copy to each Member of Congress; the Secretary and the Sergeant at Arms of the Senate; the Clerk, Sergeant at Arms, and Doorkeeper of the House of Representatives; two copies to the libraries of the Senate and House, and the Congressional Library; seven hundred copies to the Joint Committee on the Economic Report; and the required number of copies to the Superintendent of Documents for distribution to depository libraries; and that the Superintendent of Documents be authorized to have copies printed for sale to the public.

Approved June 23, 1949.

## To the Members of Congress:

From the time the Joint Committee on the Economic Report was established its members realized that one of its basic needs was a concise and meaningful picture of current economic trends and developments.

Fortunately, the joint committee found that Economic Indicators, a set of basic charts and tables compiled monthly by the Council of Economic Advisers, admirably filled this need. While this material was prepared originally for the use of the President, the Council, and other officials in the executive offices, the Council made it available to the joint committee.

Other Members of Congress also expressed an interest in being able to obtain a quick picture of current economic facts without having to go through voluminous and specialized documents. In addition businessmen, farm leaders, labor organizations, and representatives of the press and radio indicated their desire for this information.

Accordingly, the joint committee provided the Congress and the public with a limited number of copies of Economic Indicators as a committee print pending final action on authorizing the publication on a more permanent basis. As is indicated above such legislation has now been passed and the committee will issue the report on a regular monthly basis.

Comments or suggestions with respect to possible improvements in this presentation will always be welcome.

Chairman, Joint Committee on the Economic Report.

# Letter of Transmittal 

Hon. Joseph C. O'Mahoney, Chairman,<br>Joint Committee on the Economic Report, United States Congress, Washington, D. C.

Dear Senator: The Council of Economic Advisers is happy to cooperate with the Joint Committee on the Economic Report in making Economic Indicators available to the Congress as a whole and to the general public, in accordance with Public Law 120, Eightyfirst Congress.

In carrying out its mandate under the Employment Act of 1946, the Council has found it desirable to bring together in concise and graphic form the most important facts showing current trends in the Nation's economy. Thus the Executive Office is in a better position to point up the key problems of national economic policy and to promote the improvement and coordination of the Federal Government's widespread statistical services.

In this undertaking the Council has the full cooperation of the several agencies of the Federal Government that collect statistical material. In many cases these agencies supply advance estimates for use in Economic Indicators. While the charts are drawn through the courtesy of the Graphics Unit in the Office of the Secretary of Commerce, the Council takes complete responsibility for the graphic presentation.

This material has proven useful to the President, the Council, the executive departments, and the Congress. Furthermore, its usefulness to the general public has been impressed upon us, particularly by the representatives of business, labor, agriculture, and consumer organizations with whom we regularly consult.

We believe that the Congress is performing a service of real value by making this material available.

Sincerely yours,

## THE NATION'S ECONOMIC BUDGET

## THE NATION'S ECONOMIC BUDGET

A general decline in economic activity during the 1 st half of 1949 resulted in about a $31 / 2$ percent decrease in gross national product from the level of the last half of 1948, according to preliminary estimates. Cash payments by Federal, State, and local governments exceeded cash receipts, leaving a small cash deficit.

## PRICES

## CONSUMERS' PRICES

The consumers' price index fell slightly in May for the first time in three months. Rents continued to advance, while the price of food and other items showed a decrease.

-also includes housefurnishings, fuel, electricity, refrigeration, ano miscelianeous gooos and services, not shown on chart SOURCE: DEPARTMENT OF LABOR.

## WHOLESALE PRICES

Farm products and food prices dropped during June. Industrial prices continued their decline.

## PRICES RECEIVED AND PAID BY FARMERS

Falling prices especiolly for truck crops, food grains, and oil seeds, lowered the index of prices received by farmers nearly 2 percent from May to June, and brought the parity ratio to the lowest level in 7 years. Contrary to the general trend, hog prices rose 5 percent.

Note.-Detail will not necessarily add to totals because of rounding.

## EMPLOYMENT IN BUSINESS AND GOVERNMENT

Further declines in employment in both durable and nondurable manufacturing were the most significant employment developments in May. Construction continued its seasonal rise, and stood at essentially the same level as a year ago.

## WEEKLY PRODUCTION - SELECTED INDICATORS

Steel production dropped again in June. Production of bituminous coal returned to levels prevailing before the work stoppage. The number of automobiles manufactured increased sharply. Output of electric power continued above last year's rates.

## NEW HOUSING STARTS

About 95,000 new permanent dwelling units were started in May, bringing the total for this year to about 10 percent below the number for the corresponding period in 1948. May was the second successive month to show a more than seasonal increase. Starts in June were about equal to the number in June 1948, according to preliminary data.

## EXPENDITURES FOR NEW PLANT AND EQUIPMENT

Estimated nonagricultural business expenditures for plant and equipment in 2nd quarter of 1949 showed, for the first time in the postwar period, no gain over the corresponding quarter of the previous year. Anticipated expenditures in 3 rd quarter of this year run lower, with electric and gas utilities the only field to show a continued gain.

## CONSUMER INCOME, SPENDING, AND SAVING

For the 2nd. quarter of 1949, consumer disposable income decreased about $2 \frac{1}{2}$ percent from the 1 st quarter level. Consumption expenditures decreased only I percent, so that most of the decrease in income was reflected in a lower rate of personal saving.

[Billions of dollars]

| Period | Disposable personal income ${ }^{1}$ | Less: Personal consumption expenditures | Equals: Personal saving |
