## THE TOTAL OUTPUT OF THE ECONOMY

## THE NATION'S ECONOMIC BUDGET

Consumer incomes and expenditures both increased sharply in 3 rd quarter. Business income declined mainly because the increase in inventory valuation adjustment more than offset the rise in corporate profits. Business expenditures increased slightly. The government occount changed from a deficit to a surplus.

## PRICES

## CONSUMERS' PRICES

Despite a seasonal drop in food prices, consumers' prices as a whele rose slightly in August becouse of gains in oll other cotegories. The increases in opparel and housefurnishing prices were substaniol.

$[1935-39=100]$

${ }^{1}$ A special sürvey during the week of September 11 indicate a decline in food prices of 0.8 percent between August 15 and September 15
Nore.-Prices are for moderate-income families in large cities.
Source: Department of Labor.

## WHOLESALE PRICES

Wholesale prices, after continuing to rise during the first three weeks of September, dropped during the 4 th week because of seasonal declines in prices of form products and foods. Industrial prices, however, continued upward to new peaks.

## AVERAGE HOURLY ERRNINGS - GELECTED INDUSTRIES

Average hourly earnings in manufocturing indusiries showed a very small upward change in August but declined slightly in purchasing power because of the rise in the consumers' price index. Recent widespread wage increases will not be reflected in these series until the September and October doto are avalable.

## AVERACE WEERSIY ERRNINGS . SEEBTED INDUGTRES

Weekly earnings in both durable goods manufacturing and nondurable goods manufacturing were mote than a doller higher in August than in July. The increase wos primorily due to the lengthaned work. week in both durables ond nondurables.

## WEEKLY PRODUCTION - SELECTED INDICATORS

Steel was operating at over 100 percent of rated copacity in the second half of September. Electric power output continued to push forward to new highs. Bituminous coal production was running above the Augus! figures, the production of automobiles and trucks a little below.

SOURCES: AMERICAN IRON AND STEEL institute, EDISON ELECTRIC institute, department of the interior, ward's automotive reports.

1 Excludes agriculture.
2 Commercial and miscellaneous composed of trade, service, finance, and communication.
o Figures for third quarter are based on anticipated capital expenditures reported in the July-August survey.
NoTe. - These figures do not agree with the totals included in the gross national product estimates of the Department of Commerce, principally because the latter cover arricultural investment and also certqin equipment and construction outlays charged to current expense. Figures for $1939-44$ are Federal Reserve Board estimates based on Securities and Exchange Commission and other data.

Detail will not necessarily add to totals because annual rates are based on quarterly figures rounded to the nearest 10,000,000.

## MONEY SUPPLY

The privately-held money supply rose $\$ 700$ million during August. Demand deposits, which exceeded the previous high reached in 1947, accounted for the increase. The slight rise in currency was more than offset by a drop in time deposits.
