## COUNCIL OF ECONOMIC ADVISERS

(Created pursuant to Sec. 4 (a) of Public Law 304, 79th Cong.)
LEON H. KEYSERLING, Cbairman
JOHN D. CLARK
ROY BLOUGH
[Public Law 120-81st Congress; Chapter 237-1st Session]
JOINT RESOLUTION [S. J. Res. 55]
To print the monthly publication entitled "Economic Indicators"
Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Joint Committee on the Economic Report be authorized to issue a monthly publication entitled "Economic Indicators," and that a sufficient quantity be printed to furnish one copy to each Member of Congress; the Secretary and the Sergeant at Arms of the Senate; the Clerk, Sergeant at Arms, and Doorkeeper of the House of Representatives; two copies to the libraries of the Senate and House, and the Congressional Library; seven hundred copies to the Joint Committee on the Economic Report; and the required number of copies to the Superintendent of Documents for distribution to depository libraries; and that the Superintendent of Documents be authorized to have copies printed for sale to the public.

Approved June 23, 1949.

## PRICES

## CONSUMERS' PRICES

Consumers' prices, continuing to exceed previous peaks, rose a further $0.5 \%$ from October 15 to November 15. All of the major categories of the index showed increases, with those in housefurnishings and apparel being the sharpest. A special survey indicates that food prices increased $3.2 \%$ between November 15 and December 15.

[^0]
## WHOLESALE PRICES

Wholesale prices increased at the fastest pace since September, and continued to reach new postwar highs throughout December. Farm, food, and industrial prices all advanced substantially.

${ }^{1}$ Includes all full- and part-time wage and salary workers in nonagricultural establishments who worked or received pay during the pay period ending nearest the 15 th of the month. Excludes proprietors, self-employed persons, domestic servants, and personnel of the armed forces. Total derived rom this table not comparable with estimates of nonagricultural employment of the civilian labor force reported by the Department of Commerce (p. 7 ) which include proprietors, selfemployed persons, and domestic servants; which count persons as employed when they are not at work because of industrial disputes; and which are based on an enumeration of population, whereas the estimates in this table are based on reports from employing establishments.

Preliminary estimates.

## AVERAGE WEEKLY HOURS - SElected industries

The workweek in manufacturing averaged 41.1 hours in November. The slight decline from the October level of 41.3 was mainly because of holidays.

## AVERAGE HOURLY EARNINGS - SElected industries

Hourly earnings in manufacturing continued upward in November. The one-cent increase brought average hourly earnings to a new peak of $\$ 1.51$.

## AVERAGE WEEKLY EARNINGS - selected industries

Weekly earnings of $\$ 62.06$ in November were practically unchanged from the October level. The slight increase in hourly earnings was about offset by the decline in hours.

## PRODUCTION AND BUSINESS ACTIVITY

## INDUSTRIAL PRODUCTION

Preliminary estimates for December indicate a small rise in the total index of industrial production, due entirely to an increase in the manufacture of durable goods.

## WEEKLY PRODUCTION - SELECTED INDICATORS

Steel production during December and in the Ist half of January was maintained at very high levels. Electric power output reached a new record in the week ended December 23. Most other weekly production data indicate high levels of activity.

## PRODUCTION OF SELECTED MANUFACTURES

A small decline in steel production in November reflected the temporary effects of the severe storm. More recent data indicate that sleel mills have since been operating above rated capacity. Production of most other durable goods increased in November; output of nondurable goods continued near their recent levels.

## NEW CONSTRUCTION

Expenditures for new construction, on a seasonally adjusted basis, dropped slightly in December, for the first time in 1950. The small decline in private residential nonfarm construction was mainly responsible.

[Millions of dollars, seasonally adjusted]

## EXPENDITURES FOR NEW PLANT AND EQUIPMENT

Nonfarm plant and equipment expenditures have risen in each quarter of 1950. Businessmen reported in November that in the first quarter of next year outlays would exceed those of any previous first quarter and show an increase of 30 percent over the first quarter of 1950.

## 1 Excludes agriculture.

- Commercial and miscellaneous composed of trade, service, finance, and communication.

3 Estimates for fourth quarter 1950. first quarter 1951, and year 1951 based on anticipated capital expenditure of business.
Note.-These figures do not agree with the totals included in the gross national product estimates of the Department of Commerce, principally because the latter cover agricultural investment and also certain equipment and construction outlays charged to current expense. Figures for $1939-44$ are Federal Reserve Board estimates based on Securities and Exchange Commission and other data.

Detail will not necessarily add to totals because annual rates are based on quarterly figures rounded to the nearest $10,000,000$.
Sources: Securities and Exchange Oommission and Department of Commerce (except as noted).

## NEW CORPORATE SECURITY ISSUES

Net proceeds from new security issues showed a large seasonal decline in 3rd quarter of the year. About
$\frac{2}{3}$ of the total was for financing expansion in fixed and working capital; the remainder for retirement of debt and stock.

## MERCHANDISE EXPORTS AND IMPORTS

Imports fell 8\% in November, the first decline since last April. A rise of $8 \%$ in exports, to the highest level since June 1949, reinforced the recent evidence of a new upward trend. These changes converted the small import surplus of October into an export surplus of $\$ 126$ million.

[Millions of dollars]

[^7]
## PURCHASING POWER

## NATIONAL INCOME

National income gained at an annual rate of $\$ 11$ billion (seasonally adjusted) between 3rd and 4 th quarters of 1950, $\$ 8$ billion of which was due to a rise in compensation of employees.

${ }^{1}$ Estimates based on incomplete data, corporate profits and total national income for third quarter and all items for fourth quarter by Council of Economic Advisers.

Note.-Detail will not necessarily add to totals because of rounding.

## CORPORATE PROFITS

Corporate profits for 4th quarter of 1950 far surpassed those of any previous period. Preliminary estimates indicate gains of $\$ 2$ billion before taxes and almost $\$ 1$ billion after taxes (seasonally adjusted annual rates) over profits for the 3 rd quarter, even though the latter have been revised upward sharply.

[Billions of dollars]

| Period | Corporate profits before taxes | Corporate tax liability | Corporate profits after taxes |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
