## THE TOTAL OUTPUT OF THE ECONOMY <br> THE NATION'S ECONOMIC BUDGET

In the third quarter, consumer income and expenditures rose at about the same rate, thus maintaining the hish savings ratio of the second quarter. With much smaller inventory accumulation, business investment dropped $\$ 6 \frac{1}{2}$ billion at a seasonally adjusted annual rate. Government cash receipts rose by $\$ 4$ billion, while payments rose by $\$ 5$ billion.

## GROSS NATIONAL PRODUCT

The gross national product rose by less than 1 percent between the second and third quarters of this year. Government security expenditures increased by more than 15 percent, and consumer expenditures rose moderately. Business investment dropped 10 percent as the rate of inventory accumulation declined.

## PRICES

## CONSUMERS' PRICES

Consumers' prices maintained the same level between mid-July and mid-August, as declines in housefurnishings and food prices offset increases in rents and utility prices and the first rise in apparel prices since May.

${ }^{1}$ A special survey of food prices showed no change between August 15 and September 15, and indicated a rise of 0.2 percent from mid-September to the end of the month.

Note.-Prices are for moderate-income families in large cities.
The index has been revised, begioning with January 1940, to correct the downward bias resulting from the failure to take account of the differentials in rent between newly built housing and comparable existing dwellings. Certain changes, starting with January 1950 , in commodity coverage and weighting were linked into the index providing an improved and consistent serles.

## WHOLESALE PRICES

Wholesale prices continued in September to display signs of increased stability, with food prices changing little, farm prices moving unevenly but tending upward, and industrial prices declining very little in spite of a substantial drop in textile prices.

## PRICES RECEIVED AND PAID BY FARMERS

The gradual decline in farm prices continued to mid-September, mainly a reflection of lower prices received for cotton and truck crops. For the first time in 1951 the parity ratio fell behind that of the same month in 1950.

## NONAGRICULTURAL EMPLOYMENT - SELECTED INDUSTRIES

Manufacturing employment increased 140,000 in August with the largest gains occurring in nondurable goods industries. Construction employment continued to rise to a new high, while a slight decline was registered in trade.

## AVERAGE WEEKLY HOURS - SELEcted industries

The workweek in durable goods manufacturing increased $\frac{1}{2}$ hour in August but was still below that of a year ago. In nondurable goods manufacturing, it declined slightly.

[Hours per week, selected industries ${ }^{1}$ ]

## AVERAGE HOURLY EARNINGS - SElected industries

Average hourly earnings in manufacturing were unchanged between July and August. A slight increase in the durable goods segment was offset by a decline in the nondurables.

## AVERAGE WEEKLY EARNINGS - selected industries

Average weekly earnings in manufacturing rose to $\$ 64.72$ in August.' The increase in durable goods manufacturing amounted to slightly more than $\$ 1.00$. There was some decline in nondurable earnings reflecting both the lower hourly rates and the shorter workweek.

| Period | All manufacturing |  | Durable goods manufacturing |  | Nondurable goods manufacturing |  | Building construction |  | Retail trade |  |

## PRODUCTION AND BUSINESS ACTIVITY

## INDUSTRIAL PRODUCTION

Industrial production rose slightly in September, but did not regain second quarter levels. In durable goods manufacturing, defense industries increased production over August; in nondurables, textile output continued below June. In the minerals group, coal output was above August.

[^4]
## PRODUCTION OF SELECTED MANUFACTURES

In August, machinery and lumber output recovered part of the July dip. Nonferrous metals production dropped for the third month due chiefly to lower output of copper and zinc. Among the nondurable goods industries, textiles rose and chemical products continued a rise which has been uninterrupted since the spring of 1950.

## NEW CONSTRUCTION

There was little change in total new construction outlays in September, as increases in government construction somewhat exceeded declines in private. The level of total construction was slightly below that of a year ago.

[Millions of dollars, seasonally adjusted]

## EXPENDITURES FOR NEW PLANT AND EQUIPMENT

Nonfarm plant and equipment expenditures in the third quarter of 1951 are estimated at an all-fime high, 45 percent above the third quarter of 1950, with manufacturing facilities outlays 78 percent above those of the third quarter last year.

## Excludes agriculture.

Commercial and miscellaneous composed of trade, service, finance, and communication
Estimates for third and fourth quarters based on enticipated capital expenditures of business as reported in a survey made in late July and during August.
Note.-These figures do not agree with the totals inclided in the gross national product estimates of the Department of Commerce, principally because the latter cover agricultural investment and also certain equipment and construction outlays charged to current expense. Figures for $1939-44$ are Federal Reserve Board estimates based on Securities and Exchange Commission and other data.

Detail will not necessarily add to totals because anmual rates are based on quarteriy figures rounded to the nearest $10,000,000$.
Sources: Securities and Exchange Commission and Department of Commerce (except as noted).

## NEW CORPORATE SECURITY ISSUES

In the second quarter of 1951, net proceeds from new security issues again increased sharply, to almost $\$ 2.4$ billion. Three-fifths of this amount was used for plant expansion.

[^5]
## INVENTORIES AND SALES

Sales by both manufacturers and retailers rose in August, after adjustment for seasonal variation. Manufacturers' inventories have risen each month since July 1950, and at the end of August were almost 38 percent higher than a year ago. Department store inventories dropped in August.

| Period | Total business ${ }^{1}$ |  | Retail |  | Manufacturing |  |  | Department stores |  |

## MERCHANDISE EXPORTS AND IMPORTS

Exports continuing to decline in July were below the April peak, mainly because of seasonally lower shipments of wheat and cotton. With a smaller decline in imports, the export surplus dropped below the post-Korean highs of the second quarter.

## PURCHASING POWER

## NATIONAL INCOME

National income advanced about $2 \frac{12}{2}$ percent to almost $\$ 285$ billion (seasonally adjusted annual rate) between the second and third quarters under the impetus of increased wages and salaries and entrepreneurial income. Corporate profits before taxes declined somewhat but when adjusted for inventory valuation changes increased by $\$ 31 / 2$ billion.

| Period | Total national income | Compensation of employees | [Billions of dollars] |  | Corporate profits and inventory valuation adjustment |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Proprietors' (business, professional, farm) and rental income | Net interest |  |  |  |

Note. - Detail will not necessarily add to totals because of rounding.

## CORPORATE PROFITS

After reaching an all-time peak in the first quarter of 1951, corporate profits before taxes (and before adjustment for inventory valuation changes), according to preliminary indications, turned downward in the second and third quarters.

[Billions of dollars]

${ }^{1}$ Estimates based on incomplete data; by Council of Economic Advisers.
Nore.-No allowance has been made for inventory valuation adjustment. See p. 21 for profits before taxes and mentory valuation adjustment.

Detail will not necessarily add to totals because of rounding.
Source: Department of Commerce (except as noted).

## PERSONAL INCOME

In August, personal income increased at an annual rate of $\$ 2$ billion, the largest rise since April. The August gain was primarily a result of increases in farm and labor income. However, all other major groups rose slightly.

| Period | Total personal income | Labor income (salaries, wages, and other labor income) | Proprietors' income |  | Dividends and personal interest | Transfer payments |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## PERSONAL CONSUMPTION EXPENDITURES

Consumption expenditures gained $\$ 2.3$ billion (seasonally adjusted annual rate) between the second and the third quarters, as a result of some recovery in nondurable goods sales and a rise in service expenditures, particularly rents.

[Billions of dollars]

| Period ${ }^{\text {- }}$ | Personal consumption expenditures |  |  |  |
| :---: | :---: | :---: | :---: | :---: |

[^10]
## FARM INCOME

Larger cash receipts for meat animals and tobacco were the principal factors in raising farm income in August. A continued gradual decline in farm prices in recent months has been more than offset by greater marketings, which in August were almost 8 percent greater than in August 1950.

| Period | Farm income (millions of current dollars) | Prices paid by farmers (incl. interest, taxes, and wage rates) $1950=100^{2}$ | Farm income (millions of 1950 dollars) ${ }^{3}$ |

## FEDERAL CASH RECEIPTS FROM

 AND PAYMENTS TO THE PUBLICThe cash deficit in the third quarter resulted from a seasonal decline in cash receipts and a counter-seasonal rise in payments. The dominant influence on the payments side was the expansion in the national security programs.
